448. Nutrition Policies and Programs: Domestic and International Perspectives. (4) Lecture, two hours; discussion, two hours; field visits. Preparation: one nutrition sciences course and/or nutrition program experience. Nutrition programs and policies in U.S. and developing countries compared and contrasted. Analysis of role of major international, governmental, and non-governmental agencies. Emphasis on meeting needs of vulnerable populations. Letter grading.

449. Nutrition and Chronic Disease. (4) Lecture, four hours. Requisite: course 130 or one introductory nutrition or biology course. Advanced-level seminar on nutrient metabolism, diet and chronic disease. Examination of role of nutrition in disease prevention, nutritional and metabolic responses to disease, and role of nutritional therapy in management of disease. Letter grading.

451. Post-Disaster Community Health. (4) Lecture, four hours. Examination of public health research and practices can be combined to address post-disaster community health needs. Identification of disaster-related problems, data collection strategies, and service delivery approaches in post-disaster environment. Letter grading.

452. Management of Food and Nutrition in Major Emergencies. (4) Lecture, three hours. Designed for second-year master’s or doctoral students interested in humanitarian relief. Basic principles required to design rational and cost-effective food and nutrition emergency relief approaches and programs. Letter grading.

CM470. Improving Worker Health: Social Movements, Policy Debates, and Public Health. (4) Same as Environmental Health Sciences M471 and Urban Planning M470.) Lecture, three hours; fieldwork, two hours. Examination of intersection between work, health, and environment, analysis of social causes of health disparities, investigation of historical trends and social movements, interpretation of current policy debates, and development of innovative interventions. Concurrently scheduled with course CM170. SU or letter grading.

477. Health Disparities, Health Equity, and Sexual Minority Populations. (4) Lecture, two hours; discussion, one hour. Limited to graduate students. Examination of health disparities affecting sexual minority populations, category that includes lesbians, gay men, bisexuals, and transgender (LGBT) persons. Use of Healthy People 2010 Companion Document for LGBT Health to outline key health issues and national recommendations for achieving reductions in each area. Discussion of considerations for providing clinical care and public health practice in this population, unique social and contextual factors influencing LGBT health, and methodological issues for conducting research among LGBT persons. SU or letter grading.

482. Practicum: Community Health Sciences. (4) Discussion, two hours; fieldwork, up to 20 hours. Requisites: courses 210, 211A, 211B. Understanding of professional practice in health-related organizations. Letter grading.

484. Risk Communications. (4) Lecture, three hours; fieldwork, one hour. Requisites: courses 210, 211A, and 211B, or prior public health and behavioral sciences courses. Risk communication theory, research, and practice, including social and psychological bases of population risk perceptions, media theories, and how risk is portrayed in media. Environmental, product safety, food-borne and infectious disease, disasters, and bioterrorism communication. Competencies: understanding everyday and emergency risk communication principles, creating valid risk communication messages and materials, working proactively with new media. Letter grading.

485. Resource Development for Community Health Programs. (4) Lecture, three hours; fieldwork, one hour. Enforced requisites: courses 211A, 211B, Public Health 200A, or permission of instructor. Designed for graduate students. Course summary of fund and resource development for public health and community-based programs. Lectures and workshops include developing grant proposals, researching funding sources, evaluating proposals, developing volunteer and in-kind resources, and implementing capital campaigns. Letter grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor, graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master’s degree minimum total course requirement; may not be applied toward minimum graduate course requirement. SU or letter grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward MPH and MS minimum total course requirement. May be repeated for credit. SU or letter grading.

597. Preparation for Master’s Comprehensive or Doctoral Qualifying Examinations. (2 to 12) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. SU or letter grading.

598. Master’s Thesis Research. (2 to 8) Tutorial, to be arranged. Only 4 units may be applied toward MPH and MS minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. SU or letter grading.

599. Doctoral Dissertation Research. (2 to 12) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. SU or letter grading.

Adjunct Professor
Romy Sutherland, PhD

Overview
Standing at the forefront of innovative work in literary, theoretical, and cultural studies, comparative literature is one of the most exciting fields in the humanities. As a multifaceted discipline, it promotes linguistic proficiency in more than one language, fosters cultural knowledge of more than one culture, and empowers students with the critical and theoretical tools necessary for them to achieve success in a quickly globalizing world. The UCLA program offers students the opportunity to work with the diverse faculty members of the Department of Comparative Literature as well as with the vast number of faculty members in any language and literature departments.

Interdisciplinary and multilingual in scope, the department is committed to continuing its pioneering work in defining new literary paradigms and fostering new directions for exploration in literary and critical studies from around the globe, with particular focus on lesser-known literatures, cultures, and languages. Its diverse class offerings allow students the unique opportunity to explore and grasp new ventures in the humanities (such as health humanities, global south studies, decolonial studies, and memory studies) as well as continuing pursuits of the relationship between translation and transnationalism, literary theory and emerging media, the future of national literatures in an era of globalization, gender and sexuality studies, East-West cultural encounters, human rights, critical race studies, and experimental approaches to literature and culture.

Focusing on elements that preoccupy literary and critical studies in general, such as genre, narrative, form, period, theme, language, and theory, comparative literature also extends its range to questions that concern other disciplines such as anthropology, art history, film and media studies, gender studies, history, and philosophy. Courses are designed to provide students with both a historical and theoretical understanding of literary, visual, and cultural forms, themes, and movements. Given its focus on interdisciplinary research and pedagogy, comparative literature is the ideal site around which to explore and expand the boundaries of national cultures, modern languages, and literary studies.

Undergraduate Major

Comparative Literature BA

Learning Outcomes
The Comparative Literature major has the following learning outcomes:

- Ability to analyze literary texts
- Ability to situate literary texts in their aesthetic, historical, and cultural contexts
- Knowledge of different methods of analyzing literature
- Understanding of the importance of reading texts in their cultural context
- Ability to read literary texts in two languages
- Ability to write clearly-written, structured analytic essays

Entry to the Major

Transfer Students
Transfer applicants to the Comparative Literature major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one English composition course, two literature survey courses, at least one of which must be world literature, and the equivalent of at least one year of foreign language.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: (1) Two courses from the Comparative Literature 1, 2, or 4 series (with approval of the director of undergraduate studies, a comparable and appropriate lower-division course in another department may be substituted for one of the courses), (2) completion of the College Writing requirement, and (3) one additional upper-division comparative literature course other than English, to be demonstrated by admission into one upper-division literature course in the original language.

The Major

Required: Ten courses, of which (1) five must be from comparative literature offerings, including Comparative Literature 100 and at least four additional comparative literature courses selected from M101 through 197, (2) three upper-division literature courses using original language texts in the primary language area, and (3) two upper-division literature courses using original language texts in the secondary language area (students may petition the student services adviser to take two upper-division literature courses in translation if their primary literature area is in a language other than English).

Honors Program
The departmental honors program is open to Comparative Literature majors with a 3.5 departmental and a 3.25 overall grade-point average. Eligible interested students should contact the student services adviser to enter the program.

Departmental honors candidates must complete all requirements for the major and an honors research paper (in addition to regular course requirements) in two of the four required upper-division comparative literature courses. These two honors research papers must be completed during the quarter in which the student is enrolled in the course. Candidates must also complete a fourth course in the primary literature area and Comparative Literature 198 with a core faculty member in which they write an independent research paper of approximately 25 pages.

Undergraduate Minor

Comparative Literature Minor

The Comparative Literature minor offers students interested in literature and the humanities the opportunity to gain insight into the critical problems and theories addressed by comparative literature and to apply that knowledge in literature and comparative literature courses.

Admission
To enter the minor students must have fulfilled the College Writing requirement, have completed 40 units with an overall grade-point average of 2.0 or better, have taken at least one year or equivalent of a language other than English, and contact the student services adviser, 3508 Kaplan Hall, 310-825-7650.

The Minor

Required Courses (28 units minimum): (1) Four upper-division comparative literature courses (one course from Comparative Literature 1A through 40D may be substituted), (2) two upper-division courses in one literature (e.g., Arabic, Chinese, English, French, German, Korean, Russian, Spanish) in the original language, and (3) one upper-division course in a second literature in the original language (one level-six foreign language course may be substituted).

Policies
If students complete two upper-division courses in a language other than English, they may petition to take one upper-division course taught in English translation to fulfill the third requirement. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Major

Comparative Literature

MA, CPhil, PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Comparative Literature

Lower-Division Courses

1A. World Literature: Antiquity to Middle Ages. (5) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to students with credit for course 2AW or 4AW. Study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as Iliad or Odyssey, Greek tragedies, portions of Bible, Virgil, Petronius, St. Augustine, Dante, Marlowe, Shakespeare, Goethe, Herodotus, Homer, Plato, Aristotle, Confucius, Derrida, Nietzsche, and Sartre. Satisfies Writing II requirement. Letter grading.

1B. World Literature: Middle Ages to 17th Century. (5) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to students with credit for course 2BW or 4BW. Study of world literature, with emphasis on Western civilization as it grapples with its past and with other civilizations. Examination of works such as Dante's Divine Comedy, Cervantes' Don Quixote, Shakespeare's King Lear, and Sor Juana's Mexican poetry. P/NP or letter grading.

1C. World Literature: Age of Enlightenment to 20th Century. (5) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to students with credit for course 2CW or 4CW. Study of major texts in world literature, with emphasis on Western civilization, with special attention to those that support fairness and inclusiveness. Satisfies Writing II requirement. Letter grading.

2AW. Survey of Literature: Antiquity to Middle Ages. (5) Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 1A or 4AW. Study of selected texts from antiquity to Middle Ages, with emphasis on literary analysis and expository writing. Texts include works by authors such as Dante, Cervantes, Shakespeare, Goethe, M. Shelley, Beowulf, Petronius, Gilgamesh, Sappho, Greek tragedies, Aeneid, Marie de France, Tristan and Isolde, One Thousand and One Nights, Popul Vuh, Satisfies Writing II requirement. Letter grading.

2BW. Survey of Literature: Middle Ages to 17th Century. (5) Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 1B or 4BW. Study of selected texts from Middle Ages to 17th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Chaucer, Dante, Marlowe, Shakespeare, Goethe, Calderon, Moliere, and Racine. Satisfies Writing II requirement. Letter grading.

2CW. Survey of Literature: Age of Enlightenment to 20th Century. (5) Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3. Not open for credit to students with credit for course 1C or 4CW. Study of selected texts from Age of Enlightenment to 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Voltaire, Diderot, Rousseau, M. Shelley, Strindberg, Swift, Voltaire. Analysis of texts includes focus on structures, processes, and practices that generate inter-group inequities or conflicts as well as those that support fairness and inclusiveness. Satisfies Writing II requirement. Letter grading.

2DW. Survey of Literature: Great Books from World at Large. (5) Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3. Not open for credit to students with credit for course 1D or 4DW. Study of major literary texts usually overlooked in courses that focus only on canon of Western literature, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Achebe, Can Djeugoue, Xue, Desai, Emecheta, Kincaid, Xue, Desai, Emecheta, Kincaid, Ndebele, Rushdie, and El Saadawi. Analysis of texts includes focus on structures, processes, and practices that generate inter-group inequities or conflicts as well as those that support fairness and inclusiveness. Satisfies Writing II requirement. Letter grading.

10. Virtual Realities: Introduction to Humanities. (5) Lecture, two hours; discussion, two hours. What exactly are humanities? Position of humanities as not science is becoming unclear as human communication, thought, and culture are increasingly tied to technology. Examination of various disciplines within humanities at UCLA to define their place in today's society, contemplate their possible function in tomorrow's world, and determine to whom humanities will and will not cater in future. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

20. Blockchain: Future of Absolutely Everything. (5) Lecture, three hours; discussion, one hour. Interdisciplinary science, social, legal, and scientific workings of blockchain. Critical exploration of ethical, legal, and cultural effects of blockchain's potential to improve human behavior and impact our sense of individuality. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, one hour. Limited to 20 students. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

Upper-Division Courses

100. Introduction to Literary and Critical Theory. (5) Lecture, four hours. Preparation: satisfaction of Entry-Level Writing and College Writing requirements. Requisites: two courses from Comparative Literature 1 or 2 series or English 10 series or Spanish 60 series, etc. Seminar-style introduction to discipline of comparative literature presented through series of texts illustrative of its formation and practice. Letter grading.

103. People on Run: Migrants, Minorities, and Multiculturalism in Europe. (4) Seminar, three hours. Problems of migrants and refugees in ongoing crisis of European Union. Examination of contemporary crisis of European Union from multicultural and political perspectives. Overview of history of European integration since World War II, as well as more focused examination of ways in which culture and migration have come to dominate discussions of future of what had primarily been conceived of as one economic union. Offered in summer only. P/NP or letter grading.

106. Comparative Literature / 339

107. Film on Brain. (4) Seminar, three hours; discussion/analysis of feature film laboratory, one hour. Designed for juniors/seniors. Seminar and analysis of interactions between film language and neuroscience. Exploration of questions such as how do cues on screen prompt emotions in mind; what are viewers’ affective impacts of color; how do brains respond to screen prompt emotions in mind; what are viewers’ affects on cerebral cortex? Two or more film field trips to LA Opera, UCLA Opera, and/or Long Beach Opera to experience opera. P/NP or letter grading.

109. M132. Comparative Media Studies. (4) Lecture, three hours. Exploration of geopolitics of media within tradition of comparative cultural literature. Examination of rhythm, rhymes, flow, wordplay, traditions of signifying, beats, body, and human rights or censorship, reception, and resistance. Possible examination of various national cinemas such as Tunisian, Egyptian, Moroccan, Algerian, and Palestinian. Various national cinemas such as such as Rael and Rai and writing about hip-hop. P/NP or letter grading.

110. M119. Al-Andalus: Literature of Islamic Spain. (4) (Same as Arabic M155.) Lecture, three hours. Study of literature of Islamic Spain to learn about interaction of Arabic and Western and Arabic and Jewish cultures and to recognize Islamic culture as vital force in European life and letters. P/NP or letter grading.

111. M120. Women and Literature in Southeastern Europe. (4) (Same as Central and East European Studies M120.) Lecture, three hours. Designed for upper-division literature majors. Broad interdisciplinary study of avant-garde literature and art, including futurism, Dadaism, Expressionism, Surrealism, new avant-gardes. Works by Marinetti, Boccioni, Picasso, Stein, Malevich, Popova, Maya, Rilke, Brecht, Fritz Lang, Duchamp, Breton, Buñuel, Walter Benjamin, and Hannah Arendt. May be concurrently scheduled with course C252. Undergraduate students may read all required French texts in translation. P/NP or letter grading.

112. M130. Comparative Literary Studies. (4) (Same as Russian M132.) Lecture, three hours. History, form, and function of various media. Grounded in political and commercial experience of Eastern Europe, comparative investigation of media technologies, today’s burgeoning markets, and yesterday’s tragic abuses. Development of media form(s) and content across various times, places, and cultures, with special attention to global media phenomena. Lectures and secondary texts depict issues of displacement, cultural contact, and assimilation. Overview of connections among Portuguese-speaking cultures. May be repeated for credit with topic change. P/NP or letter grading.

114. Contemporary Arab Film and Song. (4) (Same as Arabic M148,) Seminar, three hours. Exploration of conjunctions between contemporary Arab film and song and between literature of commitment (lit-tanz), with possible focus on specific genres such as realist/neorealist Arab film; feminist Arab film or popular Arab film and song; and topics such as nation, gender, and representation or democracy and human rights or censorship, reception, and resistance. Possible examination of various national cinemas such as Tunisian, Egyptian, Moroccan, Algerian, and Palestinian. Various national cinemas such as such as Rael and Rai and writing about hip-hop. P/NP or letter grading.
plastic and verbal arts in comparative study. May be repeated for credit with instructor and/or topic change. May be concurrently scheduled with course C260. Undergraduates may read all works in translation. P/NP or letter grading.

C161. Fiction and History. (4) Seminar, three hours. Designed for upper-division literature majors. Analysis of use of historical events, situations, and characters in literary works and/or historical narratives (Italian humanists, Maquiavel, etc.) to 19th- and 20th-century novels by authors such as Stendhal, Verga, Tomasi di Lampedusa, Carpenter, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors’ choice and use of historical events. Concurrently scheduled with course C261. P/NP or letter grading.

M162. Israel Seen through Its Literature. (4) Seminar, three hours. Attempt to impart profound understanding of Israel as seen through the lens of a variety of literary texts—stories, novels, and poems—and reading of them in context of their historical backgrounds. P/NP or letter grading.

C163. Crisis of Consciousness in Modern Literature. (5) Seminar, three hours. Designed for upper-division literature majors. Study of modern European and American works that are concerned both in subject matter and artistic techniques with growing self-consciousness of human beings and their works and focus on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with course C263. Undergraduates may read all works in translation. P/NP or letter grading.

C164. Modern European Novel. (5) Seminar, three hours. Designed for upper-division literature majors. Study of modern European novel’s development from 19th to 21st century. Use of authors such as Hardy, Strindberg, Lagerkvist, Gide, Proust, Mann, Joyce, Kafka, Woolf, Nabokov, Grass, Christa Wolf, and Derrida to focus on development of themes such as shifting authorial voice, gender conflicts, change versus stability, formal experimentation, and self-consciousness in narrative. May be concurrently scheduled with course C264. Undergraduate students may read all works in translation. Encouraged to read original language whenever possible. P/NP or letter grading.

M165. Holocaust in Literature. (4) Seminar, three hours. Knowledge of Chinese not required. In-depth look at Arab world to narrow focus on Maghreb Jews to modernity, its challenges, and threats. Readings in texts originally written in English or translated from Hebrew, Yiddish, German, Russian, French, and Italian. Analysis of formal aspects of each work. P/NP or letter grading.

M167. Modern Arabic Literature in English. (4) (Same as Arabic M151.) Lecture, three hours. Designed for upper-division literature majors. Study of modern Arabic works and raises wide range of aesthetic and moral questions. P/NP or letter grading.

M166. Modern Jewish Literature in English: Diaspora Literature. (4) (Same as Jewish Studies M151A.) Lecture, three hours. Study of literary responses of Jews to modernity, its challenges, and threats. Readings in texts originally written in English or translated from Hebrew, Yiddish, German, Russian, French, and Italian. Analysis of formal aspects of each work. P/NP or letter grading.

M168. Continental African Authors. (4) (Same as African M151.) Lecture, three hours. Designed for upper-division literature majors. Introduction to a new set of African authors and attempt to discern similarities or differences they may have with major authors such as Achebe, Ngugi, Amadou, Soyinka, etc. P/NP or letter grading.

M171. Chinese Immigrant Literature and Film. (4) (Same as Asian American Studies M130B and Chinese M153.) Lecture, three hours; discussion, one hour. Knowledge of Chinese not required. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues. P/NP or letter grading.

C172. Postmodern Novel. (4) Seminar, three hours. Designed for upper-division literature majors. Study of postmodern novel as it developed out of modernism. Postmodernism defined in three different ways—philosophically, scientifically, and economically. Emphasis on examination of theoretical and literary readings combined to explore three main areas of concern: theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with course C272. Undergraduates read all works in translation. P/NP or letter grading.

M175. Race, Gender, Class. (5) (Same as Asian American Studies M165.) Seminar, three hours. Theoretical and literary readings combined to explore three main aspects of social and cultural experience (race, gender, class) as separate but interconnected spheres affecting both minority and majority populations in U.S. Emphasis on reading, writing, and discussion of relevant issues. P/NP or letter grading.

177. Comparative Literature of Francophone and Anglophone Caribbean. (5) Seminar, three hours. Designed for junior/senior literature majors. Study of the relationship of current and historical events in the Caribbean and their literary legacies, emergence of nationalist discourse, postcolonial influences and rivalries, Haitian revolution and independence, and cultural expressions with other disciplines such as arts, music, and literary achievements of African diaspora. P/NP or letter grading.

C178. India Ink: Literature and Culture of Modern South Asia. (5) Seminar, three hours. Survey of significant issues in history of 20th-century Indian literature and culture. Great works of modern Indian culture by such figures as Rabindranath Tagore, Satyajit Ray, Faiz Ahmed Faiz, and U.R. Ananthamurthy, including novels, short stories, poetry, music, and works in cultural criticism and historical scholarship. Central and defining issue for 20th-century Indian culture is experience of British colonial rule and massive cultural and political changes that followed. Emphasis placed on exploration of Indian diaspora. Concurrently scheduled with course C278. P/NP or letter grading.

C179SL. Movement in Art, Philosophy, and Daily Life. (5) (Same as Middle Eastern Studies M179SL.) Seminar, three hours. Concurrently scheduled with courses 1A, 1B, 1C, 1D, 2A, 2B, 2C, or English Composition 3 or 4. In-depth look at new set of African authors and attempt to discern similarities or differences they may have with major authors such as Achebe, Ngugi, Amadou, Soyinka, etc. P/NP or letter grading.

180. Variable Topics: Medical Humanities in Comparative Contexts. (4) Seminar, three hours. Designed for junior/senior literature majors. Study of fixed and changing periods and approaches in medical humanities, giving pride of place to literary and cultural expressions in dialogue with other disciplines such as anthropology, historical linguistics, philosophy, psychology, or sociology. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. P/NP or letter grading.

180SL. Variable Topics: Medical Humanities in Comparative Contexts and Community-Based Learning. (4) Seminar, three hours; fieldwork, three hours. Exploration of topics in medical humanities with community service component, giving pride of place to literary and cultural expressions with other disciplines such as art, philosophy, or sociology. Ways in which medical humanities can make contributions to Los Angeles community through service learning. Consult Schedule of Classes for topic of specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

186. Graduate Research Seminar: Comparative Literature. (4) Seminar, three hours. Preparation: permission of Department Chair. Writing requirements. Designed for graduate students interested in learning more about research and/or writing honors thesis. Introduction to research in comparative literature, with focus on critical and theoretical methodologies and approaches to analyzing literary texts. Students complete final paper on topic of their own design. P/NP or letter grading.

C187. Reading Across Cultures. (5) Seminar, three hours. What is it we do when we try to understand words, habits, gestures, and beliefs not our own? Do we understand something foreign to us by immersing ourselves in it or by standing apart? Does an understanding of something foreign imply taking universal standpoint? Can we make judgments about beliefs other than our own? Questions of cultural interpretation have long history in both Western and non-Western cultures. Discussion of history of questions about cross-cultural interpretation and comparative interpretation of cultures in both comparative literature and cultural anthropology. Readings from complex and influential works by such writers as Claude Lévi-Strauss, Aimiat Ghoash, James Clifford, Edward Said, Gayatri Spivak, and Erich Auerbach. Concurrently scheduled with course C287. P/NP or letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin prepa- ration of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SD. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in great length through supervisory meetings, papers, or other activities and led by lecture course instructor.
Graduate Courses

200A. Theory of Comparative Literature. (6) Seminar, three hours. Study of theory of literature, with emphasis on genealogy of theoretical problems. S/U or letter grading.

200B. Methodology of Comparative Literature. (6) Seminar, three hours. Requisite: course 200A. Study of methodology of comparative literature, with emphasis on methodology and letter grading.

202. Classical Tradition: Epic, Tragedy, or Comedy. (4) Seminar, three hours. Preparation: reading knowledge of Greek, Latin, or Italian. Analysis of Greek and Roman works and their re-creations in Renaissance and modern periods. Emphasis on how poets build on the work of their predecessors. Reading may range from Iliad or Odyssey to tragedies by Sophocles and Euripides or satires by Aristophanes. S/U or letter grading.

220A. Graduate Seminar. (1 to 4) Seminar, 1 to 4 hours. (Same as Arabic M220A.) Seminar in Graduate Student College Program. Designed as an adjunct to upper-division lecture course. Individual study with lecture or seminar course to explore topics in greater depth through supplemental readings, papers, or projects. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

230. Research Colloquia in Comparative Literature. (2) Seminar, three hours. Requisite: to design and bring together students undertaking supervised research in the seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one or more seminar faculty member. May be repeated for credit. P/NP or letter grading.

191. Variable Topics in Comparative Literature. (4) Seminar, three hours. Designed for juniors/seniors. Study and discussion of limited periods and specialized thematic approaches to literary theory, especially in relation to other modes of discourse such as history, philosophy, psychology, linguistics, anthropology, Development of cultivating project. Consists of Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. P/NP or letter grading.

191R. Careers in Humanities. (4) Same as English M191R. Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Challenges misrepresentations regarding humanities majors and their practical applications to life after graduation. Exploration of wide range of careers, with hands-on practice in crafting professional narrative. Guest lectures from UCLA professionals and alumni— all experts in career planning and local industry. Students engage with workplace leaders, and simultaneously build professional dossier—on paper or online— in preparation for life after UCLA with a humanities degree. P/NP or letter grading.

197. Individual Studies in Comparative Literature. (2 to 4) Tutorial, three hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

198. Honors Research in Comparative Literature. (2 to 4) Tutorial, three hours. Limited to senior comparative literature honors students. Development and completion of honors thesis or comprehensive project on comparative topic selected by student and written under supervision of core faculty member. Students expected to meet regularly with supervisor throughout term. Honors thesis may be used as basis for four-course requirement for Comparative Literature majors. May be repeated once for maximum of 8 units. Individual contract required. Letter grading.

199. Directed Research or Senior Project in Comparative Literature. (2 to 4) Tutorial, three hours. Requisite: course 100. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culumminating paper or project required. May be repeated for credit with consent of chair. Individual contract required. P/NP or letter grading.

Comparative Literature / 341

Graduate Courses

200A. Theory of Comparative Literature. (6) Seminar, three hours. Study of theory of literature, with emphasis on genealogy of theoretical problems. S/U or letter grading.

200B. Methodology of Comparative Literature. (6) Seminar, three hours. Requisite: course 200A. Study of methodology of comparative literature, with emphasis on methodology and letter grading.

202. Classical Tradition: Epic, Tragedy, or Comedy. (4) Seminar, three hours. Preparation: reading knowledge of Greek, Latin, or Italian. Analysis of Greek and Roman works and their re-creations in Renaissance and modern periods. Emphasis on how poets build on work of their predecessors. Reading may range from Iliad or Odyssey to tragedies by Sophocles and Euripides or satires by Aristophanes. S/U or letter grading.

C261. Fiction and History. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to modern period. S/U or letter grading.

C252. Symbolism and Decadence. (5) Seminar, four hours. Preparation: reading knowledge of French. Study of symbolist and decadent movements in 19th- and 20th-century English and French poetry and prose, including authors such as Baudelaire, Rimbaud, Symbolists, Mallarmé, Verlaine, and Eliot. May be concurrently scheduled with course C152. Graduate students required to prepare papers based on texts read in original languages and to meet as group one additional hour each week. S/U or letter grading.

C253. Post-Symbolist Poetry and Poetics. (5) Seminar, four hours. Study of specific poets and poetic traditions related to them during first half of 20th century. May include poets such as W.B. Yeats, Ezra Pound, T.S. Eliot, Paul Valéry, R.M. Rilke, Gunnar Ekelöf, and Wallace Stevens. May be concurrently scheduled with course C153. Graduate students may meet as group one additional hour each week. S/U or letter grading.

C256. Fantastic Fictions. (4) Seminar, three hours. Prepares students for modern literature, as it becomes conduits or catalysts for revelation. What are ghosts, and what is their function in modern, and popular art? The myth of the alien and the concept of the monstrosity. Readings from James Joyce, John Banville, Henry James, Toni Morrison, Adolfo Bioy Casares, Jūrėnais, Jovita Arquint, and Carlos Fuentes, with films by Alejandro Amenábar, Andrei Tarkovsky, and Kenji Mizoguchi. May be concurrently scheduled with course C166. Graduate students have additional meetings and theoretical readings by Benjamín Pérez, Barthes, Dufour, Ricke, and Caruth. S/U or letter grading.

C250A-250B. Seminar in Experimental Critical Theory. (5) Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Examination of nature of cross-cultural, cross-linguistic, and cross-confessional exchange in known medieval worlds of Europe, Asia, and the Americas. Focus on concepts such as hybridization and translation. Drawing on literary, social, cultural, economic, art history, and manuscript studies to trace formation of discourses produced by diverse encounters. Choice of bilingual texts. May be repeated for credit with topic change. S/U or letter grading.

C222. Renaissance Drama. (4) Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Broad introduction to subject matter, including key plays in Renaissance and Early Modern literature, with consideration of historical and literary influences on plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with course C122. Graduate students required to prepare papers based on texts read in original languages and to meet as group one additional hour each week. S/U or letter grading.

M251. Literatures and Cultures of Maghreb. (4) Seminar: Arabic M251.) Seminar, three hours. Limited to graduate students. Examine of traditionally diverse literatures of Maghreb in their multiple and conflicting contexts of language and gender politics, religious and cultural formations, Pan-Arabism and post-colonial nationhood, Third-Worldism and economic development, modernity and globalization, immigration and citizenship, soccer industry and Rai music, modernity and contemporary methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors’ choice and use of historical material. May be concurrently scheduled with course C161. Graduate students required to prepare papers based on texts read in original languages. S/U or letter grading.

C253. Crisis of Consciousness in Modern Literature. (5) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of modern European and American works that are concerned with the problems of representation and consciousness and with growing self-consciousness of human beings and their society, with focus on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with course C166. Graduate students required to prepare papers based on texts read in original languages and to meet as group one additional hour each week. S/U or letter grading.

C264. Modern European Novel. (5) Seminar, three hours. Preparation: reading knowledge of at least one appropriate foreign language. Study of modern European novel’s development from 19th to 21st century. Use of authors such as Hardy, Strindberg, Lagerkvist, Goldoni, Houst, Mana, Nabokov, Grass, Christa Wolf, and Enqi to focus on development of themes such as shifting authority, gender conflicts, change versus stability, formal experimentation, and self-consciousness in narrative. May be concur-
277. Caribbean Literature from Negritude to Diaspo-
ra. (4) Seminar, three hours. Historical approach to modern 
Anglophone and Francophone Caribbean lit-
terature, retracing search for cultural identity, begin-
ing with negritude movement’s claim to Africa as ex-
pressed in Aimé Césaire’s classic poem Cahier d’un 
retour au pays natal and ending with consideration of 
dispersion of identities in work of writers and intellec-
tuals who work in diasporic Caribbean 
culture. S/U or letter grading.

C278. India Inc: Literature and Culture of Modern 
South Asia. (5) Seminar, three hours. Survey of signifi-
cant issues in modern Indian literature and culture. 
Great works of modern Indian culture by such 
figures as Rabindranath Tagore, Satyajit Ray, 
Faiz Ahmed Faiz, and U.R. Anantham Murthy, 
including novels, short stories, and other works in 
cultural criticism and historical scholarship. 
Central and defining issue for 20th-century Indian culture 
is experience of British colonial rule and massive cultural 
and material changes that accompanied it. 
Exploration of manner in which literature and culture have 
developed in interaction with powerful social forces, 
such as struggle for national independence from 
British rule and the impact of economic growth. 
S/U or letter grading.

279. Subaltern Studies: Colonial Histories and Culi-
nal Critique. (5) Seminar, three hours. Examination of 
culture of colonial and postcolonial 
cultures in both comparative literature and 
humanities. Focus on literary, philosophical, 
and political issues of modern imperialism and 
development of literary and cultural theory. 
S/U or letter grading.

280. Latin American Literature in Comparative Con-
texts. (4) Seminar, three hours. Preparation: 
reading knowledge of one foreign language. 
In-depth study of one topic of Latin American literature in comparative context. 
May be repeated for credit. S/U or letter 
grading.

M281. Studies in Contemporary Spanish-American 
Literature. (4) (Same as Spanish M280B) Seminar, 
three hours. Preparation: reading knowledge of 
one foreign language. In-depth study of 
Latin American literature in comparative context. 
May be repeated for credit. S/U or letter 
grading.

284. Theories of Translation. (4) Seminar, three hours. 
Preparation: knowledge of foreign language. 
Survey of major theories and problems in 
theory of translation and to its significance for literary studies. 
S/U or letter grading.

285. Translation Workshop. (4) Seminar, three hours. 
Preparation: solid reading knowledge of at least one 
foreign language. Open to qualified undergraduates 
with proper language preparation. Introduction to prin-
ciples of literary translation. Study of 
how principles of translation are 
translated into practice. 
S/U or letter grading.

290. Contemporary Theories of Criticism. (4) 
Seminar, three hours. Preparation: reading knowledge of 
foreign language. In-depth study of 
topical issues in theory of literature for advanced students in 
criticism and literary theory. 
May be repeated for credit. S/U or letter 
grading.

291. Problems in Theory of Literature. (4) Seminar, 
three hours. Preparation: reading knowledge of French 
or German. Requisite: course 290. Study of specific 
topics in theory of literature for advanced students in 
theory of literature. 
May be repeated for credit. S/U or letter 
grading.

292. Theories of Empire. (4) Seminar, three hours. 
Preparation: knowledge of modern imperialism and co-
lonialism and contemporary literature by thinkers such 
as Nietzsche, Marx, and Fredric 
Engels. Examination of primary 
literary and philosophical works 
that address the question of 
empire and colonialism. 
S/U or letter grading.

299. Aesthetics and Literature. (4) Seminar, three 
hours. Preparation: reading knowledge of one 
foreign language. Study of literary theory through 
exploration of approaches to literature by philosophers ground 
worked on analytic tradition. Careful attention to 
theoretical concepts of truth, meaning, expression, representa-
tion, metaphor, fiction, and literature. 
S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, 
to be arranged. Preparation: apprentice 
personnel employment as teaching assistant, associate, 
assistant professor, or professor. Teaching 
assistantship under active guide-
ance and supervision of regular faculty member re-
ponsible for curriculum and instruction at UCLA. 
May be repeated for credit. S/U grading.

495. Preparation for Teaching Literature and Com-
mentary (required) Seminar, three hours. Preparation: 
problems and methods of presenting literary texts as ex-
emplary materials in teaching of composition. 
Deals with theory and classroom practice and involves 
discussion of teaching counseling and feedback of teaching 
assistants’ performance. 
May not be applied toward MA course requirements. 
S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be 
aranged. Preparation: consent of UCLA graduate 
advisor and graduate dean, and host campus instructor.
The major in Computational and Systems Biology is designed primarily for highly motivated undergraduate students interested in interdisciplinary studies in life sciences, behavioral sciences, and engineering and computer sciences. Preparation for the major consists of a broad foundation in basic sciences—chemistry, biology, physics, and mathematics, plus an introduction to computing. The major itself provides students with foundations in mathematical modeling, information processing, and control and system analysis, with an emphasis on quantitative ideas and methodologies. Mathematical and other analytical skills are essential in the major.

Computational and Systems Biology majors have several options for in-depth studies: a coherent integration of courses selected from one of three tracks in bioinformatics, biological data sciences, or dynamical modeling. The major is appropriate preparation for employment or for graduate studies in any of these areas, with emphasis on interdisciplinary activities. It is also appropriate preparation for professional school studies in dentistry, engineering, management, medicine, and public health.

Undergraduate Major

Computational and Systems Biology BS

Computational and Systems Biology majors select a coherent integration of courses from one of three designated tracks: bioinformatics, biological data sciences, or dynamical modeling. The synergy for all tracks is integrative systems, information, and computational systems modeling sciences in biology. The focus is primarily quantitative, as mastery of advanced quantitative skills is essential for multidisciplinary understanding. Each track emphasizes different systems or modalities, and modeling or other computational approaches. Students choose one of the three tracks when they declare the major. Well-justified customized tracks may also be approved by the faculty.

Bioinformatics Track

The bioinformatics track is designed for students interested in computational discovery and management of biological data, primarily genomic, proteomic, or metabolomic data. Bioinformatics emphasizes computational, statistical, and other mathematical approaches for mining, modeling, and analyzing high-throughput biological data and the inherent structure of biological information. Example research problems include finding statistical patterns that reveal genomic or evolutionary or developmental information, studying how regulatory sequences give rise to programs of gene expression, or searching how the genome encodes the capabilities of the human mind.

Biological Data Sciences Track

The biological data sciences track addresses a diverse set of biological questions—ranging from medicine, to genomics, physiology, pharmacology, neuroscience, ecology, and evolution—using recent tools and advances in mathematics and computation—specifically machine learning, statistical data sciences, and informatics. Biological data sciences leverages new and developing courses within computational and systems biology and across UCLA, and greatly aids students who aim to go directly into industry—biotech, pharmaceuticals, and more—as well as computational biology graduate school. The track has a strong focus and deep integration with life sciences.

Dynamical Modeling Track

The dynamical modeling track seeks to provide students a strong foundation in the use of mathematical and computational models for analyzing biological systems. The modeling approaches are based on a varied set of approaches such as partial differential equations, stochastic equations, dynamical systems theory, stability theory and linear algebra, network theory, cellular automata, and numerical methods. Dynamical models are the heart of evolution that underpin all of biology and can be applied to disease spread, tumor growth and treatment, wound healing, cell migration, blood flow, ecology, climate change biology, population genetics, evolutionary theory, game theory, and scaling theory. Models are tailored based on the biological and physical details of the system and can often be simplified or used to build intuition based on the associated timescales and spatial dimensions—from cellular signaling and transcriptional regulation to communication between organs through hormones to consumer-resource interactions among species. The track allows students to develop quantitative approaches to interpret complex biological systems and is a gateway towards careers in biotechnology and academia.

Capstone Major

The Computational and Systems Biology major is a designated capstone major. The capstone experience is a senior-level sequence of two courses integrating the discipline via mathematical modeling, simulation, and active research and report writing. Students are expected to demonstrate critical thinking skills and familiarity with research techniques needed to successfully pursue a project in computational and systems biology, conceive and execute a project on which they engage current methods and theory, communicate original scholarly findings to peers both in oral and written form, and work productively with others as part of a team. The experience culminates with completion of the senior thesis requirement.

Learning Outcomes

The Computational and Systems Biology major has the following learning outcomes:

- Demonstrated familiarity with research techniques needed to successfully pursue a research project
- Demonstrated critical thinking skills in mathematics, computation, and quantitative thinking
- Demonstrated critical thinking skills in life science disciplines and biological applications
- Conception and execution of a research project that engages current methods and theory
- Oral and written communication of original scholarly findings to peers
- Productive participation with others as part of a research team
Entry to the Major

Pre-major
Students entering UCLA directly from high school or first-term transfer students who declare the Computational and Systems Biology pre-major at the time of application are automatically admitted. Current students who were admitted as first-year or transfer students (transfer students must have been admitted under the division of life sciences) may request to declare the pre-major once they have met the following criteria: (1) completed one quarter at UCLA, (2) are in good academic standing, (3) have a minimum cumulative grade-point average (GPA) of 2.0, and (4) have established a pre-major GPA of a minimum of 2.7 by taking at least one pre-major course at UCLA for a letter grade. Requests to declare the pre-major should be sent by e-mail to the program. For more information, see the program website.

All courses taken for the pre-major must be completed with a grade of C or better. Pre-major course Computer Science 32 is required for students following the Biological Data Sciences track, but does not have to be completed prior to applying to the major. Pre-major courses Program in Computing 10B and 10C, or Computer Sciences 32, are required for students following the Bioinformatics track, but do not have to be completed prior to applying to the major.

All students are identified as pre-majors until they satisfy the preparation for the major requirements by achieving (1) a minimum 2.7 GPA in all pre-major courses, and (2) a minimum grade of C in all pre-major courses.

Transfer Students
Transfer applicants to the Computational and Systems Biology major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of general chemistry with laboratory for majors, two years of calculus for majors, one year of calculus-based physics, one year of biology with laboratory for majors, and one programming course using C++, Python, or similar language.

Transfer applicants must meet the same academic requirements as current UCLA students, based on all courses transferred from another institution that satisfy pre-major requirements, and must have completed one 12-unit term of residence in regular session at UCLA. Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements
Preparation for the Major
Required: A minimum of 66 to 82 units (depending on the calculus series, computer programming courses, and additional prerequisites for specific concentrations), including Chemistry and Biochemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L; Computer Science 31 or Program in Computing 10A; Life Sciences 7A, 7B, 7C; Life Sciences 30A, 30B, 40, and Computational and Systems Biology M32 or Mathematics M32T, or Mathematics 31A or 31AL, 31B, and Statistics 10; Mathematics 33A, 33B; Physics 1A, 1B, and 1C, or 1AH, 1BH, and 1CH, or Physics 5A, 5B, and 5C.

Students following the bioinformatics track must also complete Computer Science 32 or Program in Computing 10B and 10C.

Students following the biological data sciences track must also complete Computer Science 32. Additional lower-division courses may be requisite to desired track courses.

The Major
The major consists of a methodology core of seven courses (27 units) and a track of five upper-division courses (20 units minimum).

Methodology Core
Required: (1) Computational and Systems Biology M150, M184, 185, (2) one probability course from: Electrical and Computer Engineering 131A, Mathematics 170E, or Statistics 100A, (3) one statistics course from: Biostatistics 100A or Statistics 100B, and (4) two capstone courses from the following options: Computational and Systems Biology M187 and 195, or M187 and 199, or M19A and 198B.

Tracks
Required: A minimum of five courses (20 units minimum) from the tracks listed below. No 199 course may be applied toward any track.

Bioinformatics (at least 20 units): One course selected from Computer Science CM121, CM122, or CM124; two courses selected from Computer Science CM121, CM122, CM124, Ecology and Evolutionary Biology C135, Molecular, Cell, and Developmental Biology CM156, 187AL, Physiological Science 125, or Statistics M254, two life science courses selected from the list below.

Note: Computer Science 32 or Program in Computing 10B and 10C, and Computational and Systems Biology M32 (same as Life Sciences 33B or Mathematics M32T) or Mathematics 32A are completed in the pre-major.

Biological Data Sciences (at least 20 units): Three courses selected from Computer Science CM124 or M226, M146 or Mathematics 156 or Statistics C161, 161, 168, 180 or Mathematics 182, Electrical and Computer Engineering C143A, C147, Mathematics 155, 164, Statistics 101A, or 101C, two life science courses selected from the list below. A maximum of two courses may be from mathematics.

Note: Computer Science 32 is completed in the pre-major.

Dynamical Modeling (at least 20 units): Three courses selected from Computational and Systems Biology M186 (or Computer Science M182), Electrical and Computer Engineering 102, 113, Ecology and Evolutionary Biology C119A, C119B, Mathematics 124 (or 135), 136, 142, 146, 168, or 171; two life science courses selected from the list below. A maximum of two courses may be from mathematics.

Life Science Courses (for all three tracks): any two courses selected from the subareas below. Courses may be chosen from different subareas.

Biochemistry: Chemistry 153A, 153B.
Epidemiology: Epidemiology 100, Microbiology, Immunology, and Molecular Genetics 101, 102, 168, C185A.

Genetics and Molecular Biology: Life Sciences 107, Molecular, Cell, and Developmental Biology 138, M140, 144, 165A (or 100).

Neurosystems: Neuroscience M101A (or Psychology 115), M101B, 102, 205, 260, Physiological Sciences C144, Physics C186, Psychology 119M.

Psychology: Bioengineering C102, Biomatics 206, Ecology and Evolutionary Biology 170 (or Physiological Sciences 166), Physiological Sciences 149.

Honors Program
Students with a grade-point average of 3.5 or better in required major courses and a 3.0 cumulative GPA may apply for admission to the honors program. Honors or highest honors may be granted at the discretion of the faculty sponsor and the faculty committee to students demonstrating exceptional ability on the senior research thesis.

Policies
Preparation for the Major
All courses taken for the Preparation for the Major must be completed with a grade of C or better. Students are allowed to repeat up to two Preparation for the Major courses in which they receive a C– or worse. Students who receive a third grade of C– or worse in Preparation for the Major courses are dismissed from the program.

The Major
Each course in the major must be passed with a grade of C or better.

Undergraduate Minors

Mathematical Biology Minor
The Mathematical Biology minor introduces undergraduate students to an active interdisciplinary research field at UCLA. The minor core examines biological systems in a holistic and quantitative manner by emphasizing systems and integrative principles in biology. Students who complete the minor have sufficient training to apply the knowledge they learn in graduate school or employment of their choice. Students complete a core curriculum and an elective course. The minor consists of lower-division courses basic to the minor, five core courses, and one elective course that provide the needed background in mathematical biology, molecular and cell biology, statistics and probability, and mathematical modeling and simulation methods for biological systems.
Admission
To enter the minor, students must be in good academic standing (2.0 grade-point average or better) and have completed Computer Science 31 or Program in Computing 10A with a grade of C or better. Requests to declare the minor must be sent by e-mail to the program. The e-mail should include full name, UID number, request to declare the minor, and a statement indicating whether the student consents to being added to the departmental Common Collaboration and Learning Environment (CCLE) web page.

The Minor
Required Lower-Division Course (4 units): Mathematics 33A.
Required Upper-Division Courses (22 units): Chemistry and Biochemistry 153A, M230B, Computational and Systems Biology M184, Microbiology, Immunology, and Molecular Genetics 105, and two elective courses selected from Biostatistics 100A, Chemistry and Biochemistry M117, 156, Electrical and Computer Engineering 102, 113, Statistics 100A, 100B.

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Structural Biology Minor
The Structural Biology minor introduces undergraduate students to an active interdisciplinary research field at UCLA. It examines biological systems in a holistic and quantitative manner by emphasizing systems and integrative principles in biology. It consists of lower-division courses basic to the minor, four core courses, and one elective course that provide the needed background in molecular and cell biology, computational and systems engineering, and mathematical modeling and simulation methods for biological systems.

Admission
To enter the minor, students must be in good academic standing (2.0 grade-point average or better) and have completed Computer Science 31 or Program in Computing 10A with a grade of C or better. Requests to declare the minor must be sent by e-mail to the program. The e-mail should include full name, UID number, request to declare the minor, and a statement indicating whether the student consents to being added to the departmental Common Collaboration and Learning Environment (CCLE) web page.

The Minor
Required Lower-Division Courses (8 units): Mathematics 33A, 33B.
Required Upper-Division Courses (24 units): Computational and Systems Biology M184, M186, Mathematics 170A or Electrical and Computer Engineering 131A or Statistics 100A, Molecular, Cell, and Developmental Biology M140 or 144, Statistics 100B, and one elective course selected from Electrical and Computer Engineering 102, Mathematics 134, 136, 171, Molecular, Cell, and Developmental Biology 172, or Physiological Science 125.

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Systems Biology Minor
The Systems Biology minor introduces undergraduate students to an active, interdisciplinary, quantitative biosciences research and teaching field at UCLA. It offers a coherent course plan encompassing basic foundations of the field. Beside broadening student knowledge in systems biology, the minor provides students with enhanced perspective about computational and systems biology methods and applications and better prepares students to make more informed choices about their future directions and careers. The minor consists of lower-division courses basic to the minor, a survey seminar course, four core courses, and one elective course that provide the needed background in molecular and cell biology, computational and systems engineering, and mathematical modeling and simulation methods for biological systems.

Admission
To enter the minor, students must be in good academic standing (2.0 grade-point average or better) and have completed Computer Science 31 or Program in Computing 10A with a grade of C or better. Requests to declare the minor must be sent by e-mail to the program. The e-mail should include full name, UID number, request to declare the minor, and a statement indicating whether the student consents to being added to the departmental Common Collaboration and Learning Environment (CCLE) web page.

The Minor
Required Lower-Division Course (4 units): Mathematics 33A.
Required Upper-Division Courses (22 units): Chemistry and Biochemistry 153A, M230B, Computational and Systems Biology M184, Microbiology, Immunology, and Molecular Genetics 105, and two elective courses selected from Biostatistics 100A, Chemistry and Biochemistry M117, 156, Electrical and Computer Engineering 102, 113, Statistics 100A, 100B.

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Computational and Systems Biology
Lower-Division Courses
10. Preparation for Research in Computational Biology. (3) Lecture, two and one half hours. Provides students with basic understanding of several computational tools used in molecular biology research. Focus on practical application of these tools rather than deep theoretical understanding. Creates more inclusive and accessible experience for learners. Students are introduced to computational tools for carrying out research in computational biology, including basic statistics, Python, R, and UNIX. P/NP or letter grading.
18. Flat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.
M32. Essential Calculus for Mathematical Biologists. (4) (Same as Mathematics M31T and Life Sciences M32T.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 30A, 30B. Not open to students with credit for Mathematics 31A, 31B, 32A, or 32B. Designed for life sciences students. Methods and results of single and multivariable calculus essential for quantitative training in biology. Limits, differentiation (single and several variables), optimization, integration and methods of integration, Taylor polynomials and applications to approximation, Taylor and other power series, vector valued functions, gradients, and Lagrange multipliers. P/NP or letter grading.
89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities. May be repeated for credit for eligible students. Honors content noted on transcript. P/NP or letter grading.
89HC. Honors Contracts. (1-2) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.
99. Student Research Program. (1-2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.
Upper-Division Courses
M130. Fundamentals of Digital Imaging and Image Processing. (5) (Same as Molecular, Cell, and Developmental Biology M130.) Lecture, three hours; laboratory, two hours. Requisites: Life Sciences 7A, 7B, 7C,
Mathematics 3A, 3B, and 3C, or Mathematics 31A, and Life Sciences 30A, 30B, and 40 or Statistics 13, or 346 / Computational Medicine
(Same as Chemistry M186.) Lecture, four hours; laboratory, three hours. Requisites: Life Sciences 7A, 7B, 7C, Mathematics 31A and 33B, with grades of C or better. Recommended Requisites: Physics 1A, 1B, and 1C, or 5A, 5B, and 5C, with grades of C or better. Students learn how to translate their biological knowledge and intuition into mathematical equations and computer simulations, and how to interpret and glean biological insights from quantitative results and predictions. Review and integration of core mathematical and computational approaches in novel ways. Students gain experience translating and intuition about systems through many examples across range of biological levels, such as predator-prey, disease transmission, cancer initiation, cell migration, neural systems, vascular networks, sleep, drug interactions, gene expression, and more. Students learn how to manipulate data, basics of coding, and how to instantiate their models to and simulated from systems through numerical solutions and simulations. Letter grading.

M178. Quantitative Regulatory Biology and Signal Transduction. (4) (Same as Medicine M185 and Physiological Science M178.) Lecture, three hours; laboratory, one hour. Requisites: Life Sciences 7A, 7B, 7C, 30A, 30B. Introduction to key biological regulatory circuitry and pathway concepts that are critical to understanding how cellular responses are controlled. Letter grading.

M184. Introduction to Computational and Systems Biology. (2) (Same as Bioengineering M184 and Computer Science M184.) Lecture, two hours; outside study, four hours. Enforced requisites: one course from Civil Engineering M20, Computer Science M21, Mechanical and Aerospace Engineering M20, or Program in Computational and Mathematical Sciences M184, and Biological Science M184 or Mathematics 30B or 31B. Survey course designed to introduce students to computational and systems modeling and computation in biology and medicine, providing a foundation for courses on modeling cellular systems, and for computational biology seminars and projects. Letter grading.

M186. Computational Systems Biology: Modeling and Simulation of Biological Systems. (5) (Same as Bioengineering CM186, Computer Science CM186, and Ecology and Evolutionary Biology M178.) Lecture, four hours; laboratory, two hours; discussion, one hour. Requisites: Life Sciences 30A, 30B, Mathematics 32A or M32T, 33A, and 33B; or Mathematics 31A, 31B, 32A or M32T, 33A, and 33B. Dynamic bio-system modeling, and computer simulation methods for studying biological/biomolecular processes and systems at multiple levels of organization. Intermediate linear and nonlinear control system, multicompartamental, epidemiological, pharmacokinetic, and other biochemical modeling methods applied to life sciences problems at molecular, cellular, organ, and population levels. Both theory- and data-driven modeling, with focus on translating biomodeling goals and data into dynamical mathematical models, and implementing them for simulation, quantification, and analysis. Numerical simulation, optimization, and parameter identifiability and search algorithms, with model discrimination and analysis and software exercises in PC laboratory assignments. Letter grading.

M187. Research Communication in Computational and Systems Biology. (4) (Same as Bioengineering CM187 and Computer Science CM187.) Lecture, four hours; outside study, eight hours. Requisites: course M150 or M186 or Computer Science M182; and research experience (course 199, Bioengineering, Computer Science 199, or equivalent). Closely directed, interactive, and real research experience in active quantitative systems biology research laboratory. Direction on how to focus on topics of current interest in scientific community, appropriate to student interests and capabilities. Critiques of oral presentations and written progress reports explain how to proceed with research for results. Major emphasis on effective research reporting, both oral and written. Letter grading.

M199. Directed Research in Computational and Systems Biology. (4–4) Tutorial, eight hours. Limited to juniors/seniors. Supervised internship under guidance of faculty mentor. Further supervision is to be provided by organization for which students are doing internship. Students may be required to meet on regular basis with instructor and provide periodic reports of their experience. Culminating report/project required. May be repeated for credit. Maximum of 4 units of 199 can be applied toward major. Individual contract required. P/NP grading.

M198A-198B. Honors Research in Computational and Systems Biology. (4–4) Tutorial, 12 hours. Maximum of 8 units of courses 198A and 198B may be applied toward major. Individual contract required. 198A. Required: course M150. Limited to Computational and Systems Biology students. Supervised individual research involving extensive reading and development of honors thesis or comprehensive project under guidance of faculty mentor. In Progress grading (credit to be given on completion of course 198B). 198B. Required: course 198A. Continued reading and research culminating in honors thesis under direct supervision of faculty member. Letter grading.

199. Directed Research in Computational and Systems Biology. (2–2) Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating report/thesis required. May be repeated for credit. Four units may be applied toward major requirements. Individual contract required. Letter grading.
Overview
As biology advances rapidly in quantitative research methods, both the need and potential for closely associated theoretical research increases. On numerous medical science frontiers—such as genetics, molecular biology, oncology, pharmacology, neuroscience, and physiology—the Department of Computational Medicine contributes both in basic research and the development of specialized software to support investigation and health care. UCLA has one of the few departments in this rapidly evolving field.

The department builds from abstract modeling toward research vital to the advancement of current biomedical frontiers. The doctoral program reflects this in requirements for advanced training in a biomedical research specialty and in the mathematical and computing skills required to contend realistically with the complex phenomena encountered in biology and medicine. The art of quantitative research is developed individually from the first year.

The department welcomes both undergraduate and graduate students in other majors to its courses in mathematical modeling, research computing, and biomedical statistics. Pre-medical majors with mathematical and computational interests can receive early guidance toward an MD/PhD joint degree. The department also offers quantitative research training in the medical curriculum and postgraduate medical programs.

Graduate Majors

Biomathematics MS, PhD
Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Clinical Research MS
Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Data Science in Biomedicine MS
Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Biomathematics

Lower-Division Courses
19. Fiat Lux Freshmen Seminars. (1 Seminar, one hour. Discussion of and critical thinking about topics of current interest in science and technology, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2 Tutorial (supervised research or other scholarly project), two hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses
170A. Introductory Biomathematics for Medical Investigators. (4 Lecture, three hours; discussion, one hour. Intensive elementary statistics course emphasizing design and interpretation of observational studies and experiments/c clinical trials. Statistical topics include study design, descriptive statistics, elementary probability and distributions, confidence intervals and hypothesis testing, sample size and power, linear regression and correlation, analysis of variance, nonparametric statistics. Applications to biomedical literature and design of clinical trials. Letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplementary readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

190HA-190HB. Honors Research in Biomathematics. (4-6) Tutorial, to be arranged. Limited to juniors/seniors. Individual research in some aspect of biomathematics designed to acquaint students in depth with mathematical and computer applications in biology. Must be taken for at least two terms and for total of at least 8 units. Thesis required. P/NP or letter grading.

197. Individual Studies in Biomathematics. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Biomathematics. (2 to 6) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Cumulative paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200B. Frontiers and Methods in Mathematical Systems. (4) Lecture/seminar, four hours. Introduction to cutting-edge mathematical biology. Emphasis on critical thinking through critique of research, trains students in scientific writing and presentation skills. Short writing assignments, figure preparation, and slide development. Letter grading.

210. Deterministic Models in Biology. (4) Lecture, three hours; laboratory, three hours. Preparation: knowledge of linear algebra and differential equations. Examination of conditions under which deterministic approaches can be employed and conditions where they may be expected to fail. Topics include compartmental analysis, enzyme kinetics, physiological control systems, and cellular/animal population models. S/U or letter grading.

M203. Stochastic Models in Biology, (4) (Same as Human Genetics M203.) Lecture, four hours. Requirements: Mathematics M207A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and variety of other biological and medical disciplines. S/U or letter grading.

204. Biomedical Data Analysis. (4) Lecture, four hours. Requirements: at least one course in probability or statistics that included basic probability, estimation, and hypothesis testing, and confidence intervals; knowledge of elementary calculus. Familiarity with elementary matrix algebra and previous programming experience are strongly preferred. Modern scientific research and quality and quantity of data have been greatly affected by rapid expansion of statistical computing software. Probability of study of latest methods in applied statistical data analysis and its use arising in laboratory and clinical research. S/U or letter grading.

M207A. Theoretical Genetic Modeling. (4) (Same as Biostatistics M272 and Human Genetics M207A.) Lecture, three hours; discussion, one hour. Requirements: Mathematics 115A, 131A, Statistics 100B. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

M207B. Applied Genetic Modeling. (4) (Same as Biostatistics M237 and Human Genetics M207B.) Lecture, three hours; laboratory, one hour. Requirements: Biostatistics 200B, 202B (may be taken concurrently) or equivalent coursework or consent of instructor. Covers basic genetic concepts (prior knowledge of human genetics not required). Topics include statistical methodology underlying genetic analysis of both quantitative and qualitative complex traits. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M207A; students may take either and are encouraged to take both. S/U or letter grading.

209. Mechanisms and Modeling in Bioanalytical As-
says. (4) Lecture, three hours. Preparation: knowledge of basic physical chemistry and ordinary differential equations recommended. Course includes course overview of basic physical mechanisms and mathematical analyses used in common bioanalytical assays. Topics include chromatography, electrophoresis, blotting, DNA sequencing, SELEX, ChIP–sequencing, FACS, FRAP, and FISH. S/U or letter grading.

M211. Mathematical and Statistical Phylogenetics. (4) (Same as Biostatistics M239 and Human Genetics M211.) Lecture, three hours; laboratory, one hour. Preparation: undergraduate course in statistics and probability. Theoretical models in molecular evolution focusing on phylogenetic techniques. Topics include evolutionary tree reconstruction methods, studies of viral evolution, and comparative approaches. Examples provided from evolutionary biology and evolutionary medicine, with unique focus on implications for human disease processes. Laboratory for hands-on computer analysis of sequence data. S/U or letter grading.

M212. Evolutionary Ecology. (4) (Same as Ecology and Evolutionary Biology M232.) Lecture, two and one half hours; discussion. Basic and Evolutionary Ecology M200A or 200B, or equivalent. Concepts and topics include functional concepts of evolutionary ecology, including life history theory, quantitative genetics, and phenotypic evolution, and advances made in field in last decade. May be repeated for credit. Letter grading.

213. Modeling Vascular Networks. (4) Lecture, four hours. Recommended preparation: calculus, differential equations, complex analysis, elementary knowledge of partial differential equations. Introduction to equations that describe fluid dynamics and branching, and hierarchical networks to provide survey of models for structure and flow of vascular systems. Vascular systems are nearly ubiquitous in nature, occurring across animals, plants, and other organisms. Coverage of applications to tumor growth and angiogenesis, sleep, and a variety of other phenomena. S/U or letter grading.

M226. Machine Learning in Bioinformatics. (4) (Same as Bioinformatics M226, Computer Science M226, and Human Genetics M226.) Lecture, four hours; laboratory, one hour. Preparation: Programming and Computer Science 32 or Program in Computing 10C with grade of C- or better. Recommended: one course from Biostatistics 106A, 119A, Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, or Statistics 100A. Familiarity with probability, statistics, linear algebra, and algorithms expected. Designed for engineering students as well as students from biological sciences and medical school. Biology has become data-intensive science. Bottle- neck in being able to make sense of biological processes has shifted from data generation to statistical modeling and analysis that can analyze these datasets. Statistical machine learning provides important toolkit in this endeavor. Biological datasets offer new challenges to field of machine learning. Examination of statistical and computational aspects of machine learning techniques and their application to key biological questions. Letter grading.

M234. Applied Bayesian Inference. (4) (Same as Bio-
statistics M234.) Lecture, three hours; laboratory, one hour. Requisites: Biostatistics 200B or another substantial regression course. Bayesian approach to sta-
tistical inference, with emphasis on biomedical applica-
tions. Understanding of mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hy-
pothesis testing, and numerical methods. S/U or letter grading.

M243. Condensed Matter Physics of Cells. (4) (Same as Physics M243L.) Seminar, four hours. De-
signation of goals, development of means to understand the condensed matter physics and applications to bio-
physical modeling. S/U or letter grading.

M257. Computational Methods for Biostatistical Re-
search. (4) (Same as Biostatistics M257.) Lecture, three hours; discussion, one hour. Requisites: Bio-
statistics 250A or Statistics 100C. Mathematics 115A. Preparation for quantitative research in statistics and data sciences. Numerical analysis and hands-on computing techniques. Numerical analysis topics include computer arithmetic, solving linear equations, Cholesky factorization, QR factorization, regression computations, eigenvalue problems, iterative solvers, optimization, and design and analysis of statistical simulation experiments. Computing techniques include basics of R programming, reproducible research using R and R Studio, collaboration on research, parallel computing, and cloud computing. No prior knowledge of R assumed. S/U or letter grading.

259. Controversies in Clinical Trials. (2) Lecture; one hour; discussion, one hour. Preparation: completion of professional health sciences or MD degree. Required of all MS in Clinical Research students. Discussion and analysis of eight published and well-known trials with different outcomes and conflicting results. Development of critical ability to evaluate trial design and pitfalls. S/U or letter grading.

M260A-M260B. Methodology in Clinical Research I, II (4-4) (Same as Medicine M260A-M260B.) Lecture, four hours; Recommended preparation: MD, PhD, or dental degree. Requisites: courses 170A, 265A. Course M260A is requisite to M260B. Presentation of principles and practices of major disciplines underlying clinical research, especially as they relate to the conduct of clinical trials. S/U or letter grading.

M260C. Methodology in Clinical Research III. (4) (Same as Medicine M260C.) Lecture, four hours. Recommended preparation: MD, PhD, or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

M261. Responsible Conduct of Research Involving Humans. (2) (Same as Medicine M261.) Lecture, two hours; discussion, two hours. Preparation: completion of one basic course in protection of human research subjects through Collaborative Institutional Training Initiative. Discussion of current issues in responsible conduct of clinical research, including reporting of research, basis for authorship, bias, dual use and conflict of interest. S/U or letter grading.

M262. Communication of Science. (2) (Same as Psy-
chology M263C.) Lecture, homework, discussion, one hour. Presentation of various types of scientific writ-
ings and their good practice. Details of writing specific articles: methods, results, discussion. Writing of re-
view articles, compact writing in genetic search, principles and practice of research on hu-
mans, conflicts of interest, Institutional Review Board (IRB), and related topics. S/U or letter grading.

M266A. Advanced Biostatistics. (4) Lecture, three hours; discussion, one hour. Requisites: course 170A. Proficiency in applied regression analysis, with focus on interpretation of results and performing computation. Primary topics include linear regression, multiple regression, regres-
sion model selection, analysis of variance, logistic re-
gression, and survival analysis. Letter grading.

M266B. Data Analysis Strategies I. (4) Lecture, two hours; discussion, two hours. Requisites: course 266A or MD or PhD degree. Requisite: course 170A. Designed to provide students with hands-on experience developing and testing hypotheses using various types of databases. Topics include developing testable hypothesis, data management, and analysis strategies and written pre-
sentation of findings. Experience with full process of hypothesis generation, operationalization of variables, selection of analysis techniques, and presentation of findings so students are better prepared to complete data analysis, interpretation of results, and written pre-
sentation of their findings (e.g., for master’s thesis and dissertation). Students will provide their own data. Databases provided for use in completing exercises for those without available data. Letter grading.

M267. Applied Regression Analysis in Medical Sci-
ences. (4) Lecture, three hours; laboratory, one hour. Preparation: course 170A. Proficiency in applied regres-
sion analysis, with focus on interpretation of results and performing computation. Primary topics include linear regression, multiple regression, regres-
sion model selection, analysis of variance, logistic re-
gression, and survival analysis. Letter grading.

M270. Optimal Parameter Estimation and Experi-
ment Design for Biomedical Systems. (4) (Same as Bioengineering M269B, Computer Science M269B, and Medicine M270D.) Lecture, four hours; outside study, eight hours. Requisites: course 220 or Bioengi-
neering CM266 or M269A. Estimation methodology and experiment design for fitting dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for de-
signing optimal experiments for developing and quan-
tifying devices, with special emphasis on sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment design via applications in physiology and pharma-
cology. Letter grading.

M271. Statistical Methods in Computational Biologi-
y. (4) (Same as Bioinformatics M272 and Statistics M254.) Lecture, three hours; discussion, one hour. Preparation: elementary probability concepts. Requi-

M272. Statistical Computing. (4) (Same as Bioinfor-
matics M270 and Statistics M272.) Lecture, three hours, outside study, two hours. Preparation: one basic course in probability and statistics M234.) Lecture, three hours; laboratory, one hour. Preparation: elementary probability concepts. Requisit-
ees: Mathematics 115A, Statistics 100C. Introduction to statistical methods developed and widely applied in several branches of computational biology research, including sequence align-
ment, motif discovery, comparative genomics, and bi-
ological networks, with emphasis on understanding of basic statistical concepts and use of statistical infer-
ence to solve biological problems. Letter grading.

M273. Statistical Computing. (4) (Same as Biostatistics M280 and Statistics M230.) Lecture, three hours. Requisites: Mathematics 115A, Statistics 100C. Intro-
duction to theory and design of statistical programs: computational methods for linear and nonlinear regres-
sion, dealing with constraints, robust estimation, and general maximum likelihood methods. Letter grading.

M282. Longitudinal Data. (4) (Same as Biostatistics M236.) Lecture, three hours; laboratory, one hour. Requisite: Biostatistics 200B or another substantial regression course. Analysis of continuous responses for which multivariate normal model may be assumed. Students learn how to think about longitudinal data, plot data, and how to specify mean and variance of longitudinal response. Advanced topics include introductions to clustered, multivariate, and discrete longitudinal data. S/U or letter grading.

M284. Methodology of Clinical Trials. (4) (Same as Biostatistics M238.) Lecture, three hours; discussion, one hour. Requisite: Biostatistics 200B. Introduction to material on design and analysis of clinical trials, including adaptive methods for early and late randomized trials. S/U or letter grading.

205. Introduction to High-Throughput Data Analysis. (4) Seminar, three hours. Requisite: courses M260A, M260B. Introduction to high-throughput data analysis, including DNA microarray technologies and next-generation sequencing technology. Presentation of statistical methods and software for handling complex data produced by experiments using these technologies. Some hands-on training on data analysis provided. S/U or letter grading.

206. Special Topics in Clinical Research. (2 to 6) Seminar, three hours. Requisite: courses M260A, M260B. Advanced study and current topics in clinical research. Discussion of current research and literature in research specialty of faculty member teaching course. Content varies from term to term and may include lectures from visiting scientists. May be repeated for credit with consent of instructor. S/U or letter grading.

596. Directed Individual Study or Research in Biostatistics. (2 to 12) Tutorial, to be arranged. Individual study on topics not yet covered by offerings of department. May be repeated for credit with topic change. S/U or letter grading.

597. Preparation for MS or PhD Comprehensive Examination or PhD Qualifying Examinations. (2 to 6) Tutorial, to be arranged. Individual study. S/U grading.

Data Science in Biomedicine
Graduate Courses

200. Foundations of Data Science. (4) Lecture, four hours; discussion, two hours. Preparation: familiarity with programming and algorithms, probability, statistics, linear algebra. Study offers background in mathematical and engineering foundations that are building blocks of data science. Topics include linear algebra, probability, and statistics. Overview of science software engineering and reproducibility fundamentals including working on a compute cluster, pipeline development, virtual notebooks, version control. Letter grading.

205. Machine Learning Applications in Biomedicine. (4) Lecture, four hours; discussion, two hours. Requisite: course 200 or equivalent. Introduction to machine learning and analysis of biomedical data, with focus on formulating interdisciplinary problems as computational problems and then solving those problems using machine learning techniques and computational interdisciplinarity, research in genetics, fundamentals of machine learning and applications to genetics and health records. Letter grading.

206. Advanced Machine Learning Applications in Biomedicine. (4) Lecture, four hours; discussion, two hours. Requisite: course 200 or equivalent. Statistical models for analysis of biomedical data that captures the structure of the data and accounts for the constraints. Topics include Bayesian models, probabilistic graphical models, deep learning, time series, dynamical systems, stochastic processes, scalable inference (gradient descent, stochastic gradient descent, expectation-maximization, Markov chain Monte Carlo, variational inference), privacy-preserving inference (differentiable privacy, inference over encrypted data), interpretable machine learning, and fairness and bias. Letter grading.

207. Data Science for Medical Imaging. (4) Lecture, four hours; discussion, two hours. Requisite: course 200 or equivalent. Overview of medical image modalities and 3D visualization, classical image processing (histogram analysis and filtering), modern deep learning techniques (convolutional networks), image alignment, and statistical analysis of populations. Letter grading.

208. Recent Research in Machine Learning in Medicine. (4) Lecture, four hours; discussion, two hours. Requisite: course 200 or equivalent. Overview of recent research in machine learning applied to medicine. Covers recent papers utilizing data science approaches to analyze large amounts of medical data. Topics include analysis of medical imaging data, electronic health records, and waveforms. Students receive instruction on how to read recent research papers, and present these papers in class. Letter grading.

209. Recent Research in Data Science in Genomic Medicine. (4) Lecture, four hours; discussion, two hours. Requisite: course 200 or equivalent. Overview of recent research in data science applied to genomic medicine. Covers recent papers that use data science approaches to analyze large amounts of genomic data along with medical data with the goal of improving patient care. Topics include and family genomics, diagnosis rare diseases, estimation and utilization of polygenic risk scores in electronic medical records, and integrating novel types of genomic data into clinical care. Students receive instruction on how to read recent research papers, and present these papers in class. Letter grading.

Overview
Computer science is concerned with the design, modeling, analysis, and applications of computer systems. Its study at UCLA provides education at the undergraduate and graduate levels necessary to understand, design, implement, and use the software and hardware of computer systems. The programs offer comprehensive and integrated studies of subjects in computer system architecture, computer networks, distributed computer systems, programming languages and software systems, information and data management, artificial intelligence, computer science theory, computational systems biology and bioinformatics, and computer vision and graphics.

The undergraduate and graduate studies and research projects in the Department of Computer Science are supported by significant computing resources. In addition to the departmental computing facility, there are over a dozen research laboratories specializing in areas such as distributed systems, multimedia computer communications, distributed sensor networks, VLSI systems, embedded computing systems, computer graphics, bioinformatics, and artificial intelligence.

Also, the Cognitive Systems Laboratory is engaged in studying computer systems that emulate or support human reasoning. The Biocybernetics Laboratory is devoted to multidisciplinary research involving the application of engineering and computer science methods to problems in biology and medicine.

Undergraduate Majors

Computer Science and Engineering BS
The Computer Science and Engineering curriculum at UCLA provides students with the education and training necessary to design, implement, test, and utilize the hardware and software of digital computers and digital systems. The curriculum has components spanning both the Computer Science and Electrical and Computer Engineering departments. The curriculum covers all aspects of computer systems from electronic design through logic design, VLSI, VLSI, and VLSI concepts; device utilization, machine language design, implementation and programming, operating system concepts, systems programming, networking fundamentals, and higher-level language skills; and their application. Students are prepared for employment in a wide spectrum of high-technology industries.

The computer science and engineering program is accredited by the Computing Accreditation Commission and the Engineering Accreditation Commission of ABET.

Capstone Major
The Computer Science and Engineering major is a designated capstone major. Computer Science and Engineering students complete a major product design course. Graduates are expected to apply the basic mathematical and scientific concepts that underlie modern computer science and engineering; design a software or digital hardware system, component, or process to meet desired needs within realistic constraints; function productively with others as part of a team; identify, formulate, and solve computer software- and hardware-related engineering problems; and demonstrate effective communication skills.

Learning Outcomes
The Computer Science and Engineering major has the following learning outcomes:
- Application of basic mathematical and scientific concepts that underlie the modern field
- Design of a software or digital hardware system, component, or process to meet desired needs within realistic constraints
- Function productively with others on a team, including those with different specialties within the field
- Identification, formulation, and solution of computer software- and hardware-related engineering problems
- Effective communication

Requirements
Preparation for the Major
Required: Computer Science 1, 31, 32, 33, 35L, M51A; Electrical and Computer Engineering 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 1A, 1B, 1C, and 4AL or 4BL.

The Major
Required: Computer Science 111, 118, 131, M151B, M152A, 180, 181, Electrical and Computer Engineering 100, 102, 115C; one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, or Statistics 100A; one capstone design course (Computer Science 152B); a minimum of 4 units and one elective course selected from Electrical and Computer Engineering 101A through M185; a minimum of 12 units and three elective courses selected from Computer Science 111 through CM187, and up to 8 units of Computer Science 188; and 12 units of technical breadth courses selected from an approved list available in the Office of Academic and Student Affairs.

Students who want to deepen their knowledge of electrical engineering are encouraged to select that discipline as their technical breadth area.

For information on UC, school, and general education requirements, see the Samueli school section in College and Schools.

Policies
The Major
Credit is not allowed for both Computer Science 170A and Electrical and Computer Engineering 133A unless at least one of them is applied as part of the technical breadth area. Electrical and Computer Engineering 110, 131A, and CM182 may not satisfy elective credit. A petition may be submitted to consider four units of Computer Science 194 or 199 for an elective. Credit is not guaranteed and subject to vice chair review.

A multiple-listed (M) course offered in another department may be used instead of the same computer science course (e.g., Electrical and Computer Engineering M116C may be taken instead of Computer Science M151B). Credit is applied automatically.

Computer Science BS
The Computer Science curriculum is designed to accommodate students who want professional preparation in computer science but do not necessarily have a strong interest in computer systems hardware. The curriculum consists of components in computer science, a minor or technical support area, and a core of courses from the social sciences, life sciences, and humanities. Within the curriculum, students study subject matter in software engineering, principles of programming languages, data structures, computer architecture, theory of computation and formal languages, operating systems, distributed systems, computer modeling, computer networks, compiler construction, and artificial intelligence. Majors are prepared for employment in a wide range of industrial and business environments.

The computer science program is accredited by the Computing Accreditation Commission of ABET.

Capstone Major
The Computer Science major is a designated capstone major. Students complete either a software engineering or a major product design course. Graduates are expected to apply the basic mathematical and scientific concepts that underlie modern computer science and engineering; design a software or digital hardware system, component, or process to meet desired needs within realistic constraints; function productively with others as part of a team; identify, formulate, and solve computer software- and hardware-related engineering problems; and demonstrate effective communication skills.

Learning Outcomes
The Computer Science major has the following learning outcomes:
- Application of basic mathematical and scientific concepts that underlie the modern field
- Design of a software or digital hardware system, component, or process to meet desired needs within realistic constraints
- Function productively with others on a team, including those with different specialties within the field
- Identification, formulation, and solution of computer software- and hardware-related engineering problems
- Effective communication
Requirements

Preparation for the Major
Required: Computer Science 1, 31, 32, 33, 35L, M51A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 1A, 1B, 1C, and 4AL or 4BL.

The Major
Required: Computer Science 111, 118, 131, M151B, M152A, 180, 181; one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, or Statistics 100A; one capstone software engineering or design course from Computer Science 130 or 152B; a minimum of 20 units and five elective courses selected from Computer Science 111 through CM187, and up to 8 units of Computer Science 188; a minimum of 12 units and three science and technology courses (not used to satisfy other requirements) that may include 12 units of upper-division computer science courses or 12 units of courses selected from an approved list available in the Office of Academic and Student Affairs; and 12 units of technical breadth courses selected from an approved list available in the Office of Academic and Student Affairs.

For information on UC, school, and general education requirements, see the Samueli school section in College and Schools.

Policies

The Major
Students must take at least one course from Computer Science 130 or 132. Computer Science 130 or 152B may be applied as an elective only if it is not taken as the capstone course.

Credit is not allowed for both Computer Science 170A and Electrical and Computer Engineering 133A unless at least one of them is applied as part of the science and technology requirement or as part of the technical breadth area. A petition may be submitted to consider four units of Computer Science 194 or 199 for an elective. Credit is not guaranteed and subject to vice chair review.

A multiple-listed (M) course offered in another department may be used instead of the same computer science course (e.g., Electrical and Computer Engineering M116C may be taken instead of Computer Science M151B). Credit is applied automatically.

Computer Engineering BS
The undergraduate curriculum provides all computer engineering students with preparation in the mathematical and scientific disciplines that lead to a set of courses that span the fundamentals of the discipline in the major areas of data science and embedded networked systems. These collectively provide an understanding of many inventions of importance to our society, such as the Internet of Things, human-cyber-physical systems, mobile/wearable/implantable systems, robotic systems, and more generally smart systems at all scales in diverse spheres. The design of hardware, software, and algorithmic elements of such systems represents an already dominant and rapidly growing part of the computer engineering profession. Students are encouraged to make use of their computer science and electrical and computer engineering electives and a two-quarter capstone design course to pursue deeper knowledge within one of these areas according to their interests, whether for graduate study or preparation for employment.

Capstone Major
The Computer Engineering major is a designated capstone major that is jointly administered by the Computer Science, and Electrical and Computer Engineering, departments. Undergraduate students complete a design course in which they integrate their knowledge of the discipline and engage in creative design within realistic and professional constraints.

Students apply their knowledge and expertise gained in previous mathematics, science, and engineering coursework. Students identify, formulate, and solve engineering problems and present their projects to the class.

Learning Outcomes
The Computer Engineering major has the following learning outcomes:

- Application of mathematical, scientific, and engineering knowledge
- Design of a software or hardware system, component, or process to meet desired needs within realistic economic, environmental, social, ethical, health, safety, security, reliability, manufacturability, and sustainability constraints
- Function productively on a team with others
- Identification, formulation, and solution of computer engineering problems
- Effective communication

Requirements

Preparation for the Major
Required: Computer Science 1 (or Electrical and Computer Engineering 1), 31, 32, 33, 35L, M51A (or Electrical and Computer Engineering M16); Electrical and Computer Engineering 3; Engineering 96L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 1A, 1B, 1C, and 4AL or 4BL.

The Major
Required: Computer Science 111, 118 (or Electrical and Computer Engineering 132B), M151B (or Electrical and Computer Engineering M16C), M152A (or Electrical and Computer Engineering M116L), 180; Electrical and Computer Engineering 100, 102, 113, 115C; one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, Statistics 100A; 8 units of computer science and 8 units of electrical and computer engineering upper-division electives; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; 8 units capstone design from either Electrical and Computer Engineering 180DA/180DW or 183DA/183DB.

For information on UC, school, and general education requirements, see the Samueli school section in College and Schools.

Undergraduate Minors

Bioinformatics Minor
The Bioinformatics minor introduces undergraduate students to the emerging interdisciplinary field of bioinformatics, an active area of research at UCLA combining elements of the computational sciences with the biological sciences. The minor organizes the many course offerings in different UCLA departments into a coherent course plan providing students with significant training in bioinformatics in addition to the training they obtain from their major. Students who complete the minor will be strong candidates for admission to PhD programs in bioinformatics as well as have the relevant training to obtain jobs in the biotechnology industry.

Students complete a core curriculum and an elective course and are strongly encouraged to participate in undergraduate research as early as possible in one of the many groups offering research opportunities in bioinformatics.

Admission
To enter the minor, students must be (1) in good academic standing (2.0 grade-point average or better), (2) have completed at least two of the lower-division requirements with minimum grades of C, and (3) file a petition through Message Center. Steps to apply are outlined on the Office of Academic and Student Affairs website. Information about the minor and the application are available on the minor website.

The Minor

Required Lower-Division Courses (17 units minimum): Computer Science 32 or Program in Computing 10C, Life Sciences 7A, Mathematics 33A, 61.

Required Upper-Division Courses (18 units minimum): Computer Science 180 (or Mathematics 182), M184; two courses selected from Computer Science CM121, CM122, and CM124, and one course selected from Chemistry and Biochemistry C100, 153B, Civil and Environmental Engineering 110, Computer Science CM121, CM122, CM124, 170A, CM186, CM187, Ecology and Evolutionary Biology C135, Electrical and Computer Engineering 102, 131A, 141, Human Genetics C144, Mathematics 170A, 170E, Microbiology, Immunology, and Molecular Genetics 132, Molecular, Cell, and Developmental Biology 144, 187AL, Physical Science 125, Statistics 100A, 100B.

Students are strongly encouraged to take Computer Science M184 as early as possible to obtain an overview of computational biology.
Policies
Eight units of either Bioinformatics 199 or Computer Science 194 or 199 may be applied as an elective by petition.

If students apply any of Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, or Statistics 100A toward major requirements or another minor, then no other course from that set may be applied toward the minor requirements.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

All minor courses must be taken for a letter grade (unless not offered on that grading basis), and students must have a minimum grade of C- in each and an overall C (2.0) grade-point average in all courses taken for the minor. Successful completion of the minor is indicated on the transcript and diploma.

Data Science Engineering Minor
The minor is intended to expose students to the entire data science life cycle from both foundational and application perspectives. The foundational courses provide the engineering skills to collect, cleanse, and store data; analyze and draw inference from data; and take action and make decisions. A wide-ranging list of interdisciplinary courses focuses on various data-science applications using these skills.

Admission
To apply for the minor, students must have an overall grade-point average of 3.0 or better, have completed or be in the process of completing in the present quarter the two lower-division required courses with the grade B- or better, and file a petition through Message Center. Steps to apply are outlined on the Office of Academic and Student Affairs website. Information about the minor and the application are available on the minor website.

The Minor
Required Lower-Division Courses (8 units): Computer Science 32, Mathematics 33A.

Required Upper-Division Courses (12 units minimum): One course from Civil and Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, or Statistics 100A; Computer Science M148 or Electrical and Computer Engineering M148; Computer Science 145 or M146 or Electrical and Computer Engineering M146.

Elective Upper-Division Courses (8 units minimum): Two courses from Computer Science M119, CM121, CM122, CM124, 143, 145 or M146 (if not taken as a required course), 161, 180, 182, Electrical and Computer Engineering 102, 113, 114, M119, 133A, M146 (if not taken as a required course), C147, 183DA and 183DB (both must be taken), Mechanical and Aerospace Engineering C137, 185, Statistics 100B, 115, 170, or C180.

Policies
Variable topics courses may be taken as topics apply.
Transfer credit for any of the above is subject to approval; consult with the undergraduate counselors before enrolling in any courses for the minor.
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
Each minor course must be taken for a letter grade, and student must have a minimum grade of C in each and an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Major
Computer Science MS, PhD
Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Concurrent Degree Program
Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

- Computer Science MS/Master of Business Administration
- Bioinformatics

Lower-Division Courses
19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion and of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Project. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Course
199. Directed Research in Bioinformatics. (2 to 4) Tutorial, six to 12 hours. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. Letter grading.

Computer Science
Lower-Division Courses
1. Freshman Computer Science Seminar. (1) Seminar, one hour. Introduction to department resources and principal topics and key ideas in computer science and computer engineering. Students create critical summaries of seminar talks. P/NP grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion and of critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

30. Principles and Practices of Computing. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Designed for students in computer science and related majors who do not have prior programming experience. Precursor course to introductory computer science sequence (courses 31, 32, 33). Teaches students how to use computers as tool for problem solving, creativity, and exploration through design and implementation of computer programs. Key topics are data types including integers, strings, and lists; control structures, including conditionals and loops; and functional decomposition. Letter grading.

33. Introduction to Computer Organization. (5) Lecture, four hours; discussion, two hours; outside study, nine hours. Enforced requisite: course 32. Introductory course on computer architecture, assembly language, and operating systems fundamentals. Number systems, machine language, and assembly language. Procedure calls, stacks, interrupts, and traps. Assemblers, linkers, and loaders. Operating systems concepts: processes and process management, input/output (I/O) programming, memory management, file systems. Letter grading.

35L. Software Construction. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Required: course 31. Fundamentals of tools and environments for software construction projects, particularly open-source platforms used in upper-division computer science courses. Software practice through collaborative student project. Letter grading.

97. Variable Topics in Computer Science. (1 to 4) Lecture, one to four hours; discussion, zero to two hours. Designed for freshmen/sophomores. Variable topics in computer science not covered in regular computer science courses. May be repeated once for credit with topic or instructor change. Letter grading.

112. Modeling Uncertainty in Information Systems. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 111. Topics include decision theory, models for analysis of scientific and engineering problems, and decision-making under uncertainty. Letter grading.

117. Computer Networks: Physical Layer. (4) Lecture, two hours; laboratory, two hours; outside study, six hours. Not open to students with credit for course M117L. Introduction to fundamental computer communication concepts underlying the modern networked world, with focus on wireless communications and media access layers of network protocol stack. Systems include wireless LANs (IEEE802.11) and ad hoc wireless and personal area networks such as Bluetooth. Experiments include experimental project based on mobile radio-equipped devices (smart phones, tablets, etc.) as sensor platforms for personal applications such as wireless health, positioning, security, and awareness, as well as experimental laboratory sessions included. Letter grading.

118. Computer Network Fundamentals. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 111. Designed for juniors/seniors. Probability and stochastic process models as applied in computer science. Basic tools include random variable, conditional probability, expectation and higher moments, Bayes theorem, Markov chains. Applications include network traffic analysis, performance. Basic methods include random variate generation, solution of recurrence relations, and Markov chain analysis. Letter grading.

143. Data Management Systems. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Enforced requisite: course 32 or Program in Computing 10C with grade of C– or better, Mathematics 33A, and one course from Civil Engineering 110, Electrical and Computer Engineering 137A, Mathematics 170E, or Statistics 100A. Design for engineering students as well as students from biological sciences and medical school. Databases of genomic sequence data are among the largest datasets in all of science. Assembling, indexing, and querying such tremendous datasets is computationally challenging yet critical for many areas of biomedical research. Focus on development of scalable algorithms for analysis of genomic sequence data, with additional focus on formulating biologically relevant problems as computational problems using biological knowledge and solving the problems by developing new algorithms. Concurrently scheduled with course C222. Letter grading.

CM124. Machine Learning Applications in Genetics. (4) (Same as Human Genetics CM124.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 32 or Program in Computing 10C with grade of C– or better, Mathematics 33A, and one course from Civil Engineering 110, Electrical and Computer Engineering 137A, Mathematics 170E, or Statistics 100A. Designed for juniors/seniors. Introduction to machine learning and computational methods for analyzing high-throughput biological data, including both single- and multi-omics approaches. The emphasis may vary depending on student interests and tools available. Letter grading.

CM121. Distributed Systems. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 111. Covers fundamental concepts regarding design and implementation of distributed systems. Topics include consensus (e.g., clock synchronization, logical clocks, vector clocks), failure recovery (e.g., snapshotting, primary-backup), consistency models (e.g., linearity, eventual consistency), causally consistent protocols (e.g., Raft), distributed transactions, and lock. Students gain hands-on, practical experience through multiple programming assignments that take students through steps of creating fault-tolerant, shared key/value store. Exploration of how these concepts have manifested in several real-world, large-scale distributed systems used by Internet companies like Google, Facebook, and Amazon. Letter grading.

C137A. Introductory Survey of Data Mining. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 131. Important concepts and theory of data mining including basic concepts from statistics and computer science. Focus on useful techniques to analyze biological data. Focus on formulating interdisciplinary problems as computational problems and then solving those problems using computational techniques from statistics and computer science. Letter grading.

Introduction to Data Mining. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 131. Important concepts and theory of data mining including basic concepts from statistics and computer science. Focus on useful techniques to analyze biological data. Focus on formulating interdisciplinary problems as computational problems and then solving those problems using computational techniques from statistics and computer science. Letter grading.
bioinformatics, e-commerce, environmental studies, financial markets, multimedia data processing, network monitoring, and social service analysis. Letter grading.

M146. Introduction to Machine Learning, (4) (Same as Electrical and Computer Engineering M146.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32 or Program in Computing 104. Credit/No Credit only. Introduction to machine learning techniques that analyze and evaluate sets of data automatically to discover patterns behind natural language processing, tasks, algorithms for effectively solving these problems, and methods of evaluating their performance. Focus on statistical and neural-network learning algorithms that train on text corpora to automate text analysis. Emphasis on proper design and evaluation of machine learning systems. Letter grading.

162. Natural Language Processing, (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 145 or M146. Recommended requisite: course 174A. See course 35L. Introduction to natural language processing, machine learning, and natural language interfaces. Emphasis on applications in simulating human-like systems. Letter grading.

162L. Natural Language Processing Laboratory, (4) Lecture, four hours; discussion, two hours; outside study, six hours. Concurrency scheduled with course C274C. Letter grading.

163. Computational Linguistics, (4) Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisite: course 145A or M146A. See course 35L. Introduction to computational linguistics. Emphasis on applications in simulating human-like systems. Letter grading.

164. Introduction to Data Science, (4) (Same as Electrical and Computer Engineering M148.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 31 or Program in Computing 104A, 104B, and 105B, and one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 113A, 131A, Math 170A, Math 170E, or Statistics 100A. Introduction to breadth of data science. Foundations for analyzing large data sets and selection of common tools for data analysis, and application of tools and models to data gathering and analysis. Topics include statistical foundations, regression, classification, clustering, dimensionality reduction, and machine learning. Letter grading.

165. Handwritten Digit Recognition, (4) Lecture, two hours; discussion, two hours; outside study, six hours. Requisite: course 145 or M146. Recommended prerequisite: course 145A or M146A. See course 35L. Introduction to handwritten digit recognition. Emphasis on applications in simulating human-like systems. Letter grading.

166. Computational Methods for Medical Imaging, (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32 or Program in Computing 140C with grade of C- or better. Mathematics 33A, one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 113A, Math 170A, 170E, or Statistics 100A. Theory and practice of image acquisition including angiography, computed tomography (CT), and magnetic resonance (MR). Project-based course covers applied topics in medical imaging including image processing, attenuation, and data driven and machine learning methods. Letter grading.

170B. Design of Communication Systems Laboratory, (2 to 4) (Same as Electrical and Computer Engineering M116L.) Laboratory, four hours; eight hours; outside study, two to four hours. Recommended preparation: course M120A. Limited to seniors. Not open to students with credit for course M117. Introduction to analog-signaling aspects of digital systems and data communications through experience in using contemporary test instruments to generate and display signals relevant to relevant laboratory setups. Use of oscilloscopes, pulse and function generators, baseband spectrum analyzers, desktop computers, terminals, modems, PCDs, and workstations. Noise, transmission impairments, waveforms and their spectra, modern and terminal characteristics, and interfaces. Letter grading.

172. Real-Time Three-Dimensional Animation, (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 32' 32. Introduction to handling of geometry, appearance, and motion specifically for real-time virtual environments, both on theoretical and practical levels. Completion of one quality real-time three-dimensional animation by following through from preproduction to production and postproduction. End products expected to be game demonstrations, storytelling/entertainment (use of real-time graphics engines to create cinematic productions). Focus on achieving highest quality productions to qualify and submit products to Student Academy Awards. Students form teams (or individual) to make technical decisions to adapt stories to games. Introduction to interaction concepts, enabling students to create low-latency real-time three-dimension animation on artificial intelligence, enabling them to refine their interactions to create high-latency real-time three-dimensional animation. Letter grading.

174A. Introduction to Computer Graphics, (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 32. Basic principles behind modern two- and three-dimensional computer graphics systems, including complete set of steps that modern graphics pipelines use to create realistic images in real time. How to position and manipu
permutations, semantic security, public-key and private-key encryption, key-agreement, homomorphic encryption, private information retrieval and voting protocols, message authentication, digital signatures, interactive proofs, zero-knowledge proofs, collision-resistant hash functions, commitment protocols, and two-party secure computation with static security. Letter grading.

M184A. Introduction to Computer and Systems Biology. (2) (Same as Bioengineering M184B and Computational and Systems Biology M184A.) Lecture, two hours; outside study, four hours. Enrolled requisites: one corequisite: course M182, Mechanical and Aerospace Engineering M20, or Program in Computing 10A; and Life Sciences 30B or Mathematics 3B or 31B. Survey course designed to introduce students to the field of systems biology. Emphasis on modeling and computation in biology and medicine, providing motivation, flavor, culture, and cutting-edge contributions in computational biosciences and areas of particular interest. Presentations by individual UCLA researchers discussing their active computer and systems biology research interests. Letter grading.

M185. Computer and Systems Biology: Modeling and Simulation of Biological Systems. (5) (Same as Bioengineering CM185, Computational and Systems Biology M185, and Ecology and Evolutionary Biology M175B.) Lecture, two hours and 90 minutes; discussion, one hour; requisites: Life Sciences 30A, 30B, Mathematics 32A or 32T, 33A, or 33B; or Mathematics 31A, 31B, 32A or 32T, 33A, or 33B. Dynamic modeling and computer simulation methods for studying biological/biomedical processes and systems at multiple levels of organization. Intermediate and nonlinear control system, multi-component, epidemiological, pharmacokinetic, and other biomodeling methods applied to life sciences problems at molecular, cellular, organ, and population levels. Both theory and data-driven modeling, with focus on translating biomodeling goals and results into dynamical mathematical models, and implementing them for simulation, quantification, and analysis. Numerical simulation, optimization, and parameter identifiability and search algorithms, with model discrimination and analysis and software exercises in PC laboratory assignments. Concurrently scheduled with course CM256. Letter grading.

CM187. Research and Communication in Computational and Systems Biology. (4) (Same as Bioengineering CM187 and Computational and Systems Biology M187.) Lecture, four hours; outside study, eight hours. Restricted to students majoring in Computational and Systems Biology M150; and research experience (course 199, Bioengineering 199, Computational and Systems Biology 199, or equivalent). Closely directed, interactive, and real research experience in quantitative systems biology research laboratory. Direction on how to focus on topics of current interest in scientific community, appropriate to student interests and capabilities. Critiques of oral presentations and written progress reports explain how to proceed with search for research results. Major emphasis on effective research reporting, both oral and written. Concurrently scheduled with course CM257. Letter grading.

188A. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory or follow-up research, and present progress and results. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory or follow-up research, and present progress and results. Individual contract with faculty mentor required. May not be repeated. Letter grading.

211. Network Protocol and Systems Software Design for Wireless and Mobile Internet. (4) Lecture, four hours; outside study, eight hours. Requisite: course 118. Designed for graduate students. In-depth study of network protocol and systems software design in area of wireless and mobile Internet. Topics include (1) networking fundamentals: design philosophy of TCP/IP, end-to-end arguments, and protocol design principles; (2) mobile networks: MAC standards, packet scheduling, mobile IP, ad hoc routing, and wireless TCP; (3) mobile computing systems software: middleware, file and network services, and security; and (4) topical studies: energy-efficient design, security, location management, and quality of service. Letter grading.

213A. Embedded Systems. (4) (Same as Electrical and Computer Engineering M202A.) Lecture, four hours; outside study, eight hours. Requisite: course 112. Designed for graduate students. Embedded systems hardware and software design. Topics include the theory and design and implementation of embedded systems from real-time operating systems to communication protocols. Letter grading.

213B. Energy-Aware Computing and Cyber-Physical Systems. (4) (Same as Electrical and Computer Engineering M202B.) Lecture, four hours; outside study, eight hours. Designed for graduate students. In-depth study of energy-efficient design and management and cross-layer methods for power and energy consumption in computing and communication at various scales ranging across embedded, mobile, personal, enterprise, and community-level systems. Topics include hardware and software platforms for embedded systems, techniques for modeling and specification of system behavior, software organization, real-time operating system scheduling, real-time communication and packet scheduling, low-power battery and energy-aware system design, timing synchronization, fault tolerance and debugging, and techniques for hardware and software architecture optimization. Letter grading.

Graduate Courses

201. Computer Science Seminar. (2) Seminar, four hours; outside study, two hours. Requisite: admission to graduate program in computer science. Letter grading.

202. Advanced Computer Science Seminar. (4) Seminar, four hours; outside study, eight hours. Preparation: completion of major field examination in computer science. Current computer science research into theory of, analysis and synthesis of, and applications of information processing systems. Each member completes one tutorial assignment of research projects, in form of paper or project required. Letter grading.

205. Health Analytics. (4) Lecture, four hours; outside study, eight hours. Enrolled requisites: courses 31, 189. Recommended: statistics and probability, numerical methods, knowledge in programming languages. Applied data analytics course, with focus on health care applications. How to properly generate and analyze health data and learn best practices in health data collection and validation. Exploration of various machine learning and data analytic tools to help solve healthcare problems. Different machine learning concepts and algorithms, statistical models, and building of data-driven models. Big data analytics and tools for handling structured, unstructured, and semi-structured datasets. Letter grading.

208. Computer Science / 355

214. Big Data Systems. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enrolled requisite: course 111. Modern computing has entered era of big data. Introduction to concepts of state-of-art in modern big data systems. Study of distributed storage and database systems, which provide foundation for other systems. Discussion of systems built for specific kinds of workloads, such as processing of streaming data, relational data, batched data, graph data, as well as machine learning. Letter grading.

215. Internet of Things: Connectivity and Sensing. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enrolled requisite: course 111. Modern computing has entered era of big data. Introduction to concepts of state-of-art Internet of Things (IoT) technologies and their applications. Covers diverse set of IoT and wireless network technologies such as millimeter wave (mmWave), acoustic, radio-frequency identification (RFID), Wi-Fi, long range (LoRa), Bluetooth, global positioning system (GPS) for variety of emerging communication and sensing applications such as 5G, dig-
216. Network Algorithms. (4) Lecture, four hours; outside study, eight hours. Enforced prerequisite: course 211. Introduction to algorithms for routers and servers. Models of network devices and hardware design. Principles for efficient implementation. Lookup algorithms (exact match, prefix lookups, advanced card: life support), fair queuing implementations, crossbar and scalable switches, with examples from well-known networking devices. Advanced topics include traffic measurement and network security. Letter grading.

217A. Internet Architecture and Protocols. (4) Lecture, four hours; outside study, eight hours. Enforced prerequisite: course 118. Focus on mastering current core set of Internet protocols, including IP, core transport protocols, routing protocols, DNS, NTP, and security protocols such as DNSSEC, to understand principles behind design of these protocols, appreciate their design tradeoffs, and learn lessons from their operations. Letter grading.

217B. Advanced Topics in Internet Research. (4) Lecture, four hours; outside study, eight hours. Enforced prerequisite: course 217A. Designed for graduate students. Review of Internet development history and fundamental principles underlying TCP/IP protocol design. Discussion of current Internet research topics, including research results in routing protocols, transport protocols, network measurements, network security protocols, and clean-slate approach to network architecture design. Fundamental issues in network protocol design and implementations. Letter grading.

219. Current Topics in Computer System Modeling Analysis. (4) Lecture, eight hours; outside study, four hours. Review of current literature in area of computer system modeling analysis in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. Letter grading.

CM221. Introduction to Bioinformatics. (4) (Same as Bioinformatics M221, Chemistry CM260A, and Human Genetics M229S.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32 or Program in Computing 10C with grade of C– or better, and one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170K, Mathematics 170E, or Statistics 100A. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventing new computational and statistical techniques to analyze biological data. Focus on sequence analysis and alignment algorithms. Concurrently scheduled with course CM121. S/U or letter grading.

C222. Algorithms in Genomic Sequences. (4) (Formerly numbered CM222.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32 or Program in Computing 10C with grade of C– or better, and one course from Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, Mathematics 170E, or Statistics 100A. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Database of genomic sequences spanning the largest datasets in all of science. Assembling, indexing, and querying such tremendous datasets is computationally challenging yet critical for many areas of biomedical research. Focus on the art of scalable and efficient algorithms for analysis of genomic sequence data, with additional focus on formulating biologically relevant problems as computational problems and then solving these problems by developing new algorithms. Concurrently scheduled with course C122. Letter grading.

CM224. Machine Learning Applications in Genomics. (4) (Same as Biological Chemistry M229S and Human Genetics CM224.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32 or Program in Computing 10C with grade of C– or better, and one course from Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, Mathematics 170E, or Statistics 100A. Designed for engineering students as well as students from biological sciences and medical school. Introduction to computational analysis of genetic variation and computational interdisciplinary research in genetics. Topics include introduction to genomics, scientific techniques in disease, inferring human population history, technologies for obtaining genetic information, and genetic sequencing. Focus on formulating interdisciplinary problems as computational problems and then solving those problems using computational techniques from statistics and computer science. Concurrently scheduled with course CM124. Letter grading.

CM225. Computational Methods in Genomics. (4) (Same as Bioinformatics M225.) Lecture, two and one half hours; discussion, two and one half hours; outside study, seven hours. Introduction to computational approaches in bioinformatics and preparation for computational interdisciplinary research in genetics and genomics. Topics include genome analysis, regulatory genomics, association analysis, analysis study design, isoalted and admixed populations, population substructure, human structural variation, model organisms, and genomic technologies. Computational techniques and methods include those from statistics and computer science. Letter grading.

CM226. Machine Learning in Bioinformatics. (4) (Same as Bioinformatics M226, Biomathematics C226, and Human Genetics M229S.) Lecture, four hours; outside study, eight hours. Enforced prerequisite: course 32 or Program in Computing 10C with grade of C– or better. Recommended: one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, or Statistics 100A. Familiarity with probability, statistics, linear algebra, and algorithms expected. Designed for engineering students as well as students from biological sciences and medical school. Biology has become data-intensive science. Bottleneck in being able to make sense of biological processes has shifted from analysis of data to statistical models and inference algorithms that can analyze these datasets. Statistical machine learning provides important tools in this endeavor. Biological datasets offer new challenges, as statistical validation of results is important. Examination of statistical and computational aspects of machine learning techniques and their application to key biological questions. Letter grading.

M229S. Seminar: Current Topics in Bioinformatics. (4) (Same as Biological Chemistry M229S and Human Genetics M229S.) Seminar, four hours; outside study, eight hours. Designed for graduate engineering students as well as students from biological sciences and medical school. In-depth investigation of topics in bioinformatics, genomics, and computational genomics and preparation for computational interdisciplinary research in genetics and genomics. Topics include genome analysis, regulatory genomics, classification, clustering, association analysis, isolation and admixed populations, population substructure, human structural variation, model organisms, and genomic technologies. Computational techniques include those from statistics and computer science. May be repeated for credit with topic change. Letter grading.

230. Software Engineering. (4) Lecture, four hours; discussion, two hours. Recommended preparation for undergraduate students; prior software engineering course. Required preparation for graduate students undergraduate-level knowledge of data structures and object-oriented program languages. As software systems become increasingly large and complex, automated software engineering analysis and development tools play an important role in various software engineering tasks, such as design, construction, evolution, and testing and debugging of software systems. Introduction to foundations, techniques, tools, and case studies of automated software engineering technology. Development, extension, and evaluation of mini automated software engineering analysis tool and assessment of how tool fits into software development processes. Introduction to research topics in automated software engineering. S/U or letter grading.

231. Types and Programming Languages. (4) Lecture, four hours; outside study, eight hours. Enforced prerequisite: course 131. Introduction to static type systems and their usage in programming language design and software reliability. Operational semantics, simply-typed lambda calculus, type soundness proofs, types for immutable references, types for exceptions. Parametric polymorphism, first-order type inference, type inference. Types for objects, subtyping, comparing parametric polymorphism and subtyping. Types for modules, parameterized modules. Formal specification and implementation of variety of type systems, as well as readings from recent research literature on modern applications of type systems. Letter grading.

232. Static Program Analysis. (4) Lecture, four hours; outside study, eight hours. Enforced prerequisite: course 132. Introduction to static analysis of object-oriented programs and their usage in software development processes. Type systems, such as Class hierarchy analysis, rapid type analysis, equality-based analysis, subset-based analysis, flow-insensitive and flow-sensitive analysis, context-insensitive and context-sensitive analysis. Examples for each type of static analysis. Efficient data structures for static analysis information such as directed graphs and binary decision diagrams. Flow-directed method for the static analysis of program understanding and debugging. Formal specification and implementation of static type analysis. Letter grading.

233A. Parallel Programming. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 111, 131. Mutual exclusion and resource allocation in distributed systems; primitives for parallel computation; specification of parallelism, interprocess communication and synchronization, atomic actions, binary and multiway rendezvous; synchronous and asynchronous languages: CSP, Ada, Linda, Maie, UC, and others; introduction to parallel program verification. Letter grading.

233B. Verification of Concurrent Programs. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 111, 181. In-depth investigation of topics in automated software engineering. S/U or letter grading.

234. Computer-Aided Verification. (4) Lecture, four hours; outside study, eight hours. Enforced prerequisite: course 181. Introduction to theory and practice of formal methods for design and analysis of concurrent and embedded systems, with focus on algorithmic techniques for checking logical properties of hardware and software systems. Topics include semantic and reactive systems, invariant verification, temporal logic model checking, theory of omega automata, state-space reduction techniques, compositional and hierarchical reasoning. Letter grading.

235. Advanced Operating Systems. (4) Lecture, four hours. Preparation: C or C++ programming experience. Enforced prerequisite: course 111. In-depth investigation of operating systems issues through guided construction of research operating system for PC machines and consideration of recent literature. Memory management and protection, interrupts and traps, processes, interprocess communication, multiprogramming, multithreading, multiprocessors, virtualization, networking, profiling, re- search operating systems. Series of laboratory projects, including extra challenge work. Letter grading.
236. Computer Security. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 111, 118. Basic and research material on computer security. Topics include basic concepts and goals of computer security, common security tools, use of cryptographic protocols for security, security tools (firewalls, virtual private networks, honeypots), virus and worm protection, security assurance and testing, design of secure programs and hardware. Lecture, four hours; discussion, 30 minutes; laboratory, one hour; outside study, seven hours. Requisite: course 143. Multimedia data: alphanumeric, long text, images/pictures, video, and audio. Structure of multimedia systems. Data models. Searching and accessing databases and across Internet by alphanumeric, image, video, and audio content. Querying, visual languages, and command languages. Large-scale web and client-server systems. Searching and ranking algorithms, and query processing techniques on independent data sources. Letter grading.

241B. Pictorial and Database Management System. (4) Lecture, four hours; outside study, eight hours. Requisite: course 143. Data mining: a major topic in databases, and many dimensions such as modularity, extensibility, expressiveness, and scalability. Anomaly detection of three major programming paradigms—functional, object-oriented, and logic programming—by prototyping implementations of languages in each. Analysis of prototypes to shed light on design and structural properties of each language and paradigm and to allow easy comparison against one another. Hands-on experience implementing new abstractions, both as stand-alone languages and as libraries in existing languages. Concurrently scheduled with course C137A. Letter grading.

237A. Prototyping Programming Languages. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 237A. Study of various program- ming languages, from computing history and research literature, that attempt to address problems of software engineering by implementing new languages, natural languages, abstractions, and/or programming environments. Concurrently scheduled with course C137A. Letter grading.

237B. Programming Language Design. (4) Seminar, four hours; discussion, two hours; outside study, six hours. Requisite: course 237A. History of computer compostion of a quantum computer; two postulates that provide interface to quantum mechanics; concepts of quantum circuit and universal gate set; quantum teleportation; superdense coding; no-cloning theorem; rule of fundamental quantum algorithms including Shor’s algorithm, Grover’s algorithm, and quantum approximate optimization algorithm; several quantum programming languages; quantum machine learning; quantum simulators; quantum compilers; quantum error correction; quantum advantage. Students implement several quantum algorithms in multiple languages and run them on both simulators and quantum computer. Letter grading.

239. Current Topics in Computer Science: Program- ming Languages and Systems. (4) Lecture, four hours; outside study, eight hours. Review of current literature in area of computer science programming languages and systems in which instructor has developed special proficiency as consequence of research interests. May be repeated for credit with topic change. Letter grading.

240A. Databases and Knowledge Bases. (4) Lecture, four hours; outside study, eight hours. Requisite: course 143. Theoretical and technological foundation of Intelligent Database Systems, that merge database technology, knowledge-based systems, and advanced programming environments. Rule-based knowledge representation, spatio-temporal reasoning, and logic-based declarative querying/programming are salient features of this new generation of technology. Other topics include object-relational systems and data mining techniques. Letter grading.

240B. Advanced Data and Knowledge Bases. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 143, 240A. Logical models for data and knowledge representations. Rule-based languages and nonmonotonic reasoning. Temporal queries, spatial queries, and uncertainty in deductive databases and object relational databases (ORDBs), Abstract data types and user-defined column functions in ORDBs. Data mining algorithms. Semistructured information. Letter grading.

241B. Pictorial and Database Management System. (4) Lecture, four hours; outside study, eight hours. Requisites: course 143. Multimedia data: alphanumeric, long text, images/pictures, video, and audio. Structure of multimedia systems. Data models. Searching and accessing databases and across Internet by alphanumeric, image, video, and audio content. Querying, visual languages, and command languages. Large-scale web and client-server systems. Searching and ranking algorithms, and query processing techniques on independent data sources. Letter grading.

244A. Distributed Database Systems. (4) Lecture, four hours; outside study, eight hours. File allocation, intelligent directory design, transaction management, deadlock, strong and weak concurrency control, commit protocols, semantic query answering, multi- graduate students. Scale of Web data requires novel partitioning, examples, trade-offs, and design experi- ences. Letter grading.

245. Big Data Analytics. (4) Lecture, four hours; dis- cussion, two hours; outside study, six hours. Requi- site: course 143 or M146 or equivalent. With the current rate at which data is being collected today in almost all fields of human endeavor, there is emerging a need to make sense of this flood of data and extract in- formation from it. Data analytics is a process of automatic discovery of patterns, changes, associations, and anomalies in massive databases, and is highly inter-disciplinary field representing confluence of several disciplines, including database systems, data ware- housing, data mining, machine learning, statistics, al- gorithms, data visualization, and cloud computing. Lecture, three and one half hours. Letter grading.

246. Web Information Management. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 112, 143, 180, 181. Designed for graduate students. Scale of Web data requires novel partitioning, examples, trade-offs, and design experi- ences. Letter grading.

247. Advanced Data Mining. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 145 or M146 or equivalent. Introduction of concepts, algorithms, and techniques of data mining on different types of datasets, covering basic data mining algorithms, advanced topics on text mining, recommender systems, and graph/network mining. Team-based project involving hands-on practic- e of mining useful knowledge from large data sets is required. Letter grading.

249. Current Topics in Data Structures. (4) Lecture, four hours; outside study, eight hours. Review of cur- rent literature in area of data structures in which in- structor has developed special proficiency as conse- quence of research interests. Students report on se- lected topics for credit with consent of instructor. Letter grading.

251A. Advanced Computer Architecture. (4) Lec- ture, four hours; outside study, eight hours. Requisites: course M151B. Recommended: course 111. Design and implementation of computer systems and technologies for next generation computing. Team project involving hands-on practic- e of mining useful knowledge from large data sets is required. Letter grading.

251B. Parallel Computer Architectures. (4) Lecture, four hours; outside study, eight hours. Requisite: course M151B. Recommended: course 251A. SIMD and MIMD systems, symmetric multiprocessors, distrib- ute-shared memory machines, multi-core systems, multicore chips, clusters, interconnection networks, host-network interfaces, switching element design, communication primitives, cache coherency, memory consistency models, synchronization primi- tives, state-of-art design examples. Letter grading.

252A. Arithmetic Algorithms and Processors. (4) Lecture, four hours; outside study, eight hours. Requir- e: course M151B. Number system representation, re- dundant, signed-digit, and residue. Types of algo- rithms and implementations. Complexity measures. Fast algorithms and implementations for two-operan- d multiplication, addition, and logic circuits. Letter grading.

256A. Advanced Scalable Architectures. (4) Lecture, four hours; outside study, eight hours. Requisite: course M151B. Recommended: course 251A. Scalable and re- dundant, signed-digit, and residue. Types of algo- rithms and implementations. Complexity measures. Fast algorithms and implementations for two-operan- d multiplication, addition, and logic circuits. Letter grading.

258A. Design of VLSI Circuits and Systems. (4) (Same as Electrical and Computer Engineering M216A) Lecture, four hours; discussion, two hours; laboratory, four hours; outside study, two hours. Requisites: courses M145 or M146 or equivalent. Introduction to the design and implementation of VLSI circuits and systems. Design and use of VLSI design tools. Letter grading.

258M. LSI in Computer System Design. (4) (Same as Electrical and Computer Engineering M216C) Lecture, four hours; laboratory, four hours; outside study, four hours. Requisite: course M258A. LSI VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. Letter grading.

258S. Physical Design Automation of VLSI Systems. (4) Lecture, four hours; outside study, eight hours. De- tailed study of various physical design automation problems of VLSI circuits, including logic partitioning, floor planning, placement, routing, timing analysis, and switchbox routing, planar routing and via minimization, compaction and performance-driven layout. Discus- sion of applications of number of important optimization techniques, such as network flows, Steiner trees, simulated annealing, and generic algorithms. Letter grading.

255G. Logic Synthesis of Digital Systems. (4) Lecture, four hours; outside study, eight hours. Requir- e: courses M51A, 180. Detailed study of various problems in logic-synthesis of VLSI digital systems, including two-level Boolean network optimization, Boolean minimization, technology mapping for standard cell designs and field-programmable gate array (FPGA) designs; retina for sequential circuits; and applications of binary decision diagrams (BDDs). Letter grading.

258H. Analysis and Design of High-Speed VLSI Interconnects. (4) Lecture, four hours; outside study, eight hours. Requisites: courses M258A, 258F. Deta- iled study of various problems in analysis and design of high-speed (BO) interconnections on both integrated circuit (IC) and packing levels, including interconnect capacitance and resistance, lossless and lossy trans- mission lines, cross-talk and power distribution noise, dynamic and static timing analysis, technology models, intercon- nect topology and geometry optimization, and clocking for high-speed systems. Letter grading.
260B. Algorithmic Machine Learning. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 146. Introductory algorithm course. Students report on selected topics. Topics include: optimization, machine learning, reinforcement learning, deep learning, and generative adversarial networks. Letter grading.

260C. Deep Learning. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 180, 260. Open to students with credit for Electrical and Computer Engineering 147 or 224T. Study of basics of deep neural networks and their applications, including but not limited to computer vision, natural language processing, and graph mining. Covers topics including representation of deep learning, how to train neural network (optimization), architecture designs for various tasks, and other advanced topics. By course end, students are expected to be familiar with deep learning and to apply deep learning algorithms to various tasks. Letter grading.

260D. Large-Scale Machine Learning. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course M116. To alleviate costs and improve robustness and generalization performance of modern machine learning models, it becomes crucial to develop methods with strong theoretical guarantees to warrant efficient, accurate, and robust learning. Lecture topics include statistical art research to improve efficiency, robustness, and scalability of machine learning algorithms on large data. Topics include advanced optimization, variance reduction, compressed sensing, federated learning, data summarization, robust learning, neural network pruning, neural architecture search, neural network quantization. Letter grading.

260R. Reinforcement Learning. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Fundamentals and advanced topics of reinforcement learning (RL), computational learning approach where agent tries to maximize total amount of reward it receives while interacting with complex and uncertain environments. Includes introduction of Markov decision processes, model-free RL and model-based RL methods, policy optimization, RL distributed system design, and applications of RL in various domains such as AlphaGo, traffic simulation, autonomous driving, and other machine automation applications. Advanced topics of RL such as multi-agent RL, human-in-the-loop method, and imitation learning. Letter grading.

262A. Learning and Reasoning with Bayesian Networks. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 112 or Electrical and Computer Engineering 131A. Review of several formalisms for representing and managing uncertainty in reasoning systems; presentation of comprehensive description of Bayesian inference using belief networks representation. Letter grading.

262Z. Current Topics in Cognitive Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 262A. Additional requisites for each offering announced in advance by department. Theory and implementation of systems that emulate or support human reasoning. Current literature and individual studies in artificial intelligence, knowledge-based systems, expert systems, computational psychology, and heuristic programming theory. May be repeated for credit with topic change. Letter grading.

263. Natural Language Processing. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Natural language processing (NLP) enables computers to understand and process human language. NLP techniques have been widely used in many applications, including search engines, machine translation, question answering, machine summarization, robust learning, neural network pruning, neural architecture search, neural network quantization. Letter grading.

264A. Automated Reasoning: Theory and Applications. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 130 or 131. Introduction to automated reasoning by experience, role of episodic memory organization, pattern recognition, speech, bioinformatics, data mining. Topics include Markov chain Monte Carlo computing, sequential Monte Carlo methods, belief propagation, probabilistic graphical models. Letter grading.

267A. Probabilistic Programming and Relational Learning. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Introduction to computational models of probability and statistical models of relational data. Study of relational representations such as probabilistic databases, relational graphical models, and Markov logic networks, as well as various probabilistic programming languages. Covers their syntax and semantics, probabilistic inference problems, parameter, and structure learning algorithms, and theoretical properties of representation and inference. Emphasis on formalization to formalize and reason about complex statistical assumptions and encode knowledge in machine learning models. Survey of key applications in natural language processing, graph mining, computer vision, and computational biology. Letter grading.

268. Machine Perception. (4) Same as Electrical and Computer Engineering 260B.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: for graduate students only. Basic aspects of processing visual and other sensory information. Unified treatment of early vision in man and machine. Integration of symbolic and iconic representation in the processing of images. Focus on computing the multimodal sensory information by neural-net architectures. Letter grading.

268S. Seminar: Computational Neuroscience. (2) Seminar, two hours; outside study, four hours. Discussion of students undertaking thesis research. Discussion of advanced topics and current research in computational neuroscience. Neural networks and connectionism as paradigm for parallel and concurrent computation in application to problems of perception, vision, multimodal sensory integration, and robotics. May be repeated for credit. S/U grading.

269. Seminar: Current Topics in Artificial Intelligence. (4) Seminar, to be arranged. Review of current literature and research practicum in area of artificial intelligence in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. Letter grading.

274C. Computer Animation. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 174A. Introduction to computer graphics, illumination, and shading; character modeling, forward and inverse kinematics, forward and inverse dynamics, motion capture animation techniques, physics-based animation of particles and fluids, computer vision and cinematography currently scheduled with course C174C. Letter grading.
275. Artificial Life for Computer Graphics and Vision. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course 174A. Recommended: knowledge of programming concepts from artificial life, emerging discipline that spans computational and biological sciences, can play in construction of advanced computer graphics and vision models for virtual reality, animation, interactive games, and digital cinema. Use of artificial life in medical image analysis, etc. Focus on comprehensive models that can realistically emulate variety of living things, from simple organisms to higher-order systems. Letter grading.

M276A. Pattern Recognition and Machine Learning. (4) (Same as Statistics M231A.) Lecture, three hours; discussion, one hour. Designed for graduate students. Fundamental concepts and algorithms for pattern recognition and machine learning that are used in computer vision, image processing, speech recognition, data mining, statistics, and computational biology. Bayesian decision theory, parametric and nonparametric learning, clustering, complexity (VC-dimension, MLD, AIC), PCA/ICA/ICA, MDS, SVM, boosting, S/U or letter grading.

280AP. Approximation Algorithms. (4) Lecture, four hours; outside study, eight hours. Requisite: course 180. In-depth background in discrete mathematics helpful. Theoretically sound techniques for dealing with NP-hard problems. Inability to solve these problems efficiently means algorithmic techniques are based on approximation—finding solutions that are near to best possible in sufficient running time. Coverage of approximation techniques for number of different problems, emphasizing techniques that include primal-dual method, linear program rounding, greedy algorithms, and local search. Letter grading.

281A. Computability and Complexity. (4) Lecture, four hours; outside study, eight hours. Requisite: course 189. Course 180 is strongly recommended. Confrontation of study to demonstrate in treatment and theory of computing, with emphasis on regular sets of strings, Turing-recognizable (recursively enumerable) sets, closure properties, machine characterizations, nondeterminism, decidability, unsolvable problems, easy and hard problems, PTIME/NPTIME. Letter grading.

M282A. Cryptography. (4) (Same as Mathematics M209A.) Lecture, four hours; outside study, eight hours. Introduction to theory of cryptography, stressing rigorous definitions and proofs of security. Topics include notions of hardness, one-way functions, hard-core bits, pseudorandom generation, pseudorandom functions and permutations, semantic security, public-key and private-key encryption, secret-sharing, message authentication, digital signatures, zero-knowledge proofs, commitment schemes, collision-resistant hash functions, commitment protocols, key-agreement, contract signing, and two-party secure computation with static security. Letter grading.

M282B. Cryptographic Protocols. (4) (Same as Mathematics M209B.) Lecture, four hours; outside study, eight hours. Requisite: course M282A. Consideration of cryptographic protocol design and analysis. Topics include noninteractive zero-knowledge proofs; zero-knowledge arguments; commitments; non-black-box zero-knowledge; IP-PSpace proof, stronger notions of security for public-key cryptography in chosen-ciphertext security; secure multiparty computation; dealing with dynamic adversary; nonmalleability and composability of secure protocols; software protection; threshold cryptography; identity-based cryptography; private information retrieval; secure memory management; attacks; voting protocols; identification protocols; digital cash schemes; lower bounds on use of cryptographic assumptions, how many bits of communication are needed to evaluate function f, making it impossible for any one party to compute f in isolation. Communication complexity theory studies how many bits of communication are needed to evaluate f. Pioneered in 1979 by Turing award winner Andrew Yao, communication complexity has become central area of theoretical computer science with deep open questions, beautiful mathematics, and vast array of applications. Letter grading.

285C. Communication Complexity. (4) Lecture, four hours; outside study, eight hours. Limited to graduate students. Course 280 is strongly recommended. Introduction to communication complexity with coverage of fundamentals, key classic theorems, and current research directions. Consider function f whose ar-guments x and y are held by separate parties, several parties, making it impossible for any one party to compute f in isolation. Communication complexity theory studies how many bits of communication are needed to evaluate f. Pioneered in 1979 by Turing award winner Andrew Yao, communication complexity has become central area of theoretical computer science with deep open questions, beautiful mathematics, and vast array of applications. Letter grading.

289A. Advanced Modeling Methodology for Dynamic Biomedical Systems. (4) (Same as Bioengineering M296A and Medicine M270C.) Lecture, four hours; outside study, eight hours. Basic concepts and design techniques for randomized algorithms, such as probability theory, Markov chains, and probabilistic model checking. Applications to randomized algorithms in data structures, graph theory, computational geometry, number theory, and parallel and distributed systems. Letter grading.

290. Current Topics in Computer Theory: Complexity Theory. (4) Lecture, four hours; outside study, eight hours. Review of current literature in area of computer theory in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. Letter grading.

290A. Current Topics in Computer Theory: Online Algorithms. (4) Lecture, four hours; outside study, eight hours. Requisite: course 180. Introduction to decision making under uncertainty and competitive analysis. Review of current research in online algorithms for problems arising in many areas, such as data and memory management, searching and navigating in unknown terrains, and server systems. Letter grading.

299P. Current Topics in Computer Theory. (4) Lecture, four hours; outside study, eight hours. Review of current literature in area of computer theory in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. Letter grading.

299Q. Current Topics in Computer Theory: Randomized Algorithms. (4) Lecture, four hours; outside study, eight hours. Basic concepts and design techniques for randomized algorithms, such as probability theory, Markov chains, and probabilistic model checking. Applications to randomized algorithms in data structures, graph theory, computational geometry, number theory, and parallel and distributed systems. Letter grading.

299S. Current Topics in Computer Theory. (4) Lecture, four hours; outside study, eight hours. Review of current literature in area of computer theory in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. Letter grading.

M296A. Advanced Modeling Methodology for Dynamic Biomedical Systems. (4) (Same as Bioengineering M296A and Medicine M270C.) Lecture, four hours; outside study, eight hours. Basic concepts and design techniques for randomized algorithms, such as probability theory, Markov chains, and probabilistic model checking. Applications to randomized algorithms in data structures, graph theory, computational geometry, number theory, and parallel and distributed systems. Letter grading.
namic system models to biomedical data. Model dis-
crimination methods. Theory and algorithms for de-
signing optimal experiments for developing and quan-
tifying models, with special focus on optimal sampling
schedule design for kinetic models. Exploration of PC
software for model building and optimal experiment
design via applications in physiology and pharma-
cology. Letter grading.

M296D. Introduction to Computational Cardiology.
(4) (Same as Bioengineering M296C and Medicine M270E.)
Lecture, four hours; outside study, eight hours. Requisite:
course M296B. Research techniques and experience on
special topics involving models, modeling
methods, and model/computing in biological and
medical sciences. Review and critique of literature.
Research problem searching and formulation.
Approaches to solutions. Individual MS- and PhD-level
project training. Letter grading.

M296D. Advanced Topics and Research in Biome-
cial Systems Modeling and Computing. (4) (Same as
Bioengineering M296C and Medicine M270E.)
Lecture, four hours; outside study, eight hours. Requisite:
course M296B. Research techniques and experience on
special topics involving models, modeling
methods, and model/computing in biological and
medical sciences. Review and critique of literature.
Research problem searching and formulation.
Approaches to solutions. Individual MS- and PhD-level
project training. Letter grading.

97C. Preparation for PhD Oral Qualifying Examina-
tion. (2 to 16) Tutorial, to be arranged. Limited to
graduate computer science students. Preparation for
oral qualifying examination, including preliminary re-

98. Research for and Preparation of MS Thesis. (2
to 12) Tutorial, to be arranged. Limited to graduate
computer science students. Supervised independent
research for MS candidates, including thesis pro-
spects. S/U grading.

99. Research for and Preparation of PhD Disserta-
tion. (2 to 16) Tutorial, to be arranged. Limited to
graduate computer science students. Petition forms
to request enrollment may be obtained from assistant
dean, Graduate Studies. S/U grading.

Overview

The UCLA/Getty Conservation interdepartmen-
tal program provides an excellent platform for edu-
cation and research in the conservation of materi-
al culture. It supports discovery and in-
ovation through research that transcends the
boundaries of traditional disciplines. It uniquely
trains cultural property professionals in the best
practices and methods of cultural heritage con-
servation through various pedagogical ap-
proaches including, but not limited to, core
learning, independent research, and
laboratory experience in museums and in
the field. Finally, it positively impacts the com-
203, AN. 8000.

culture and policy of conservation and sustain-
the next generation of conservation pro-
essionals and leaders with strong research,
theoretical, and applied qualitative and quanti-
tative skills; rigorous training in conservation
theory, praxis, ethics, policy, and research;
substantive research training in a specific do-
main of application in conservation; and experi-
mental learning and mentoring in communica-
tion, scientific writing skills, and the ability to
work in multidisciplinary teams.

The objectives of the program are to provide
students with a solid educational base and
practical training in the conservation of both ar-
chaological and ethnographic materials, as
well as an appreciation of the often complex
issues related to significance, access, and use of
these materials that can be very different from
the criteria for conservation of fine art or
historical materials. The special focus of the
program and its interdisciplinary curriculum
serves the archaeological, scientific, native,
and cultural minority communities alike and of-
fers a nexus at the boundaries of conservation,
archeology, ethnography, the natural sciences,
and engineering.

The partnership between UCLA and the Getty
in establishing the program ensures that both a
major research university and an institution with
a principal mandate for conservation of world
heritage are working to create rich and
vibrant conservation training opportunities. The
program helps students develop working rela-
tionships with a wide array of colleagues in the
Getty Conservation Institute, the J. Paul Getty
Museum, other local museums and cultural or-
ganizations, and different departments and
programs at UCLA.

Graduate Majors

Conservation of Cultural Heritage MA

Requirements

Official, specific degree requirements are de-
tailed in program requirements for UCLA
graduate degrees, available at the Graduate
Education website. In many cases, more de-
tailed guidelines may be outlined in announce-
ments, other publications, and websites of the
schools, departments, and programs.
Conservation of Cultural Heritage

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members and graduate students under the expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in a minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

C120. Field Methods in Archaeological Conservation: Readiness, Response, and Recovery. (4) Formerly numbered Conservation of Archaeological and Ethnographic Materials C120.) Laboratory, four hours. Overview of risks (direct and indirect) and materials vulnerability of in situ cultural heritage and movable archaeological materials in emergency situations (rescue excavations, disasters, conflicts), with emphasis on readiness, first aid response, and recovery. Readiness focuses on preparedness and preventive measures, including reburials, shelters, rescue excavations, and documentation as well as developing inventories and awareness campaigns. First aid response covers development of on-site emergency risk assessments to evaluate damage and putting triage theory into practice, salvage rescue operations, emergency temporary in situ stabilization and protection (using locally available materials), and training. Recovery is based on documentation, lifting methods, handling, transportation, and storage. Emphasis on finding practical solutions to prevent and mitigate damage and to recover and safeguard archaeological artifacts. Concurrently scheduled with course C220. Letter grading.

C142. Managing Collections for Museums, Libraries, and Archives. (4) Formerly numbered Conservation of Archaeological and Ethnographic Materials C142.) Lecture, two hours; activity, two hours. How conservators work together with curators, collections managers, mount makers, designers, and registrars to permit collections to be both accessed and preserved. Concurrently scheduled with course C224. Letter grading.

Graduate Courses

211. Science Fundamentals in Conservation of Materials. (4) Formerly numbered Conservation of Archaeological and Ethnographic Materials 211.) Lecture, three hours. Introduction to important scientific parameters in conservation of materials that are of great importance for both fundamental science and practical applications. Understanding of intrinsic properties of materials, mechanisms of deterioration, and conservation treatments. General chemistry, physics, and physical chemistry (ionic, electronic, and photonics technology and practical skills on conservation photo-documentation, analytical (forensics) photography, and advanced new imaging technologies. Letter grading.

M215. Cultural Materials Science I: Analytical Imaging and Documentation in Conservation of Materials. (4) Formerly numbered Conservation of Archaeological and Ethnographic Materials M215.) Lecture, two hours; laboratory, two hours. Basic and advanced techniques in digital photographic imaging (e.g., digital microscopy, digital radiography, and scientific imaging) to determine and document condition (defects) and technological features of archaeological and ethnographic materials. Development of basic theoretical knowledge on imaging and photonics technology and practical skills on conservation photo-documentation, analytical (forensics) photography, and advanced new imaging technologies. Letter grading.

C220. Field Methods in Archaeological Conservation: Readiness, Response, and Recovery. (4) Formerly numbered Conservation of Archaeological and Ethnographic Materials C220.) Laboratory, four hours. Overview of risks (direct and indirect) and materials vulnerability of in situ cultural heritage and movable archaeological materials in emergency situations (rescue excavations, disasters, conflicts), with emphasis on readiness, first aid response, and recovery. Readiness focuses on preparedness and preventive measures, including reburials, shelters, rescue excavations, and documentation as well as developing inventories and awareness campaigns. First aid response covers development of on-site emergency risk assessments to evaluate damage and putting triage theory into practice, salvage rescue operations, emergency temporary in situ stabilization and protection (using locally available materials), and training. Recovery is based on documentation, lifting methods, handling, transportation, and storage. Emphasis on finding practical solutions to prevent and mitigate damage and to recover and safeguard archaeological artifacts. Concurrently scheduled with course C120. Letter grading.

M221. Principles, Practice, and Ethics in Conservation of Cultural Heritage / 361. (Formerly numbered Conservation of Cultural Heritage M221.) (Same as Art History M221B.) Seminar, three hours. Introduction to preservation of cultural heritage materials, including what should be preserved and why, including as who should make decisions. Consideration of preservation and restoration of these cultural heritage materials both in museum and outdoor environments. Contexts. Materials and techniques used to make cultural heritage materials and preservation efforts needed to prevent decay and loss. Introduction to examples of conservation issues related to sites, buildings, monuments, and collections. Ethical and practical aspects of using these in museum contexts. Letter grading.

222. Conservation and Community. (4) Formerly numbered Conservation of Archaeological and Ethnographic Materials 222.) Seminar, three hours. Designed for graduate conservation students. Introduction to work as conservators with indigenous repatriation, consulting cultural organizations. Students learn different models for tribal museums and cultural centers, and importance of material selection and properties in baskets they are treating. Letter grading.

224. Issues in Preservation and Management of Archaeological and Ethnographic Materials. (4) Formerly numbered Conservation of Archaeological and Ethnographic Materials C224.) Seminar, three hours. Designed for graduate conservation students. Introduction to offer practical model of preservation and management planning for heritage sites that reflects real case-study scenarios. Adaptive management planning following iterative processes for sustainable heritage preservation and protection of challenges such as climate change and global warming, conflicts, and neglect. Consideration of significance and value of heritage sites and role of stakeholders. Investigation of methods of evaluation of physical condition and development of risk assessments to address physical risks in milieu of site preservation management, including visitors’ organization, urban development, and socioeconomic growth, and tourist development. Letter grading.

234. Conservation Laboratory: Metals I. (4) Formerly numbered Conservation of Archaeological and Ethnographic Materials C234.) Laboratory, four hours. Enforced requisite: course 263. Recommended:
238. Conservation Laboratory: Organic Materials II. (4) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 238.) Laboratory, four hours. Enforced prerequisite: course 262. Recommended for graduate conservation students. Typical treatments used historically and currently for deterioration problems found in organic materials from archaeological and ethnographic contexts. Materials include plant and animal fibers, feathers, and quills. Letter grading.

239. Conservation Laboratory: Metals II. (4) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 239.) Laboratory, four hours; outside fieldwork, four hours. Recommended: courses M210, M215. Treatment of conservation problems of metallic artifacts made of iron, steel, cast iron, gold, zinc, and aluminum that have some organic components. Practical work on metallic artifacts. Letter grading.

240. Environmental Protection of Collections for Museums, Libraries, and Archives. (4) (Formerly Conservation of Archaeological and Ethnographic Materials 240.) (Same as Information Studies M328.) Lecture, two hours; laboratory, two hours. Requisite: Information Studies 432. Required of graduate conservation students. Review of environmental and biological agents of deterioration, including light, temperature, relative humidity, pollution, insects, and fungi. Emphasis on monitoring to identify agents and understanding of materials sensitivities, along with protective measures for collections. Letter grading.

242. Managing Collections for Museums, Libraries, and Archives. (4) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 242.) Lecture, two hours; activity, two hours. Designed for graduate conservation students. How conservators work together with curators, collections managers, mount makers, designers, and registrars to permit collections to be both accessed and preserved. Concurrently scheduled with course C142. Letter grading.

244. Collection Management for Archives, Libraries, and Museums. (4) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 244.) (Same as Information Studies M244.) Lecture, two hours; fieldwork, two hours. How conservators work together with curators, collections managers, mount makers, designers, and registrars to permit collections to be both accessed and preserved. Letter grading.

262. Structure, Properties, and Deterioration of Materials: Organics I. (2) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 262.) Lecture, one hour; laboratory, one hour. General introduction to different types of organic materials used to produce ethnographic and archaeological cultural heritage. Relationship between material composition, processing, and properties of natural and manufactured materials using basic concepts from biology and chemistry. Structural stability and deterioration phenomena of these materials as found in cultural collections. Letter grading.

264. Structure, Properties, and Deterioration of Materials: Rock Art, Wall Paintings, Mosaics. (2) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 264.) Lecture, three hours. Recommended preparation: basic knowledge of general chemistry and materials science. Introduction to materials and techniques of rock art, wall paintings (including painted surfaces on cement and composite decorative architectural surfaces), and mosaics. Archaeological and ethnographic context, techniques, and materials. Pigments, colorants, and binding media. Chemical, optical, and structural properties. Relationship between composition (chemistry), structure (crystals, molecular arrangement, and microstructure), and properties explained using basic concepts from physics and chemistry. Intrinsic attributes and resistance to weathering. Causes, sources, and mechanisms of deterioration (physical, chemical, and biochemical) Letter grading.

265. Structure, Properties, and Deterioration of Materials: Organics II. (2) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 265.) Lecture, one hour; laboratory, one hour. General introduction to the nature of organic materials used to produce ethnographic and archaeological cultural heritage: wood, bark, paper, bast fibers, grasses. Relationship between materials, processing, and properties of natural materials using basic concepts from biology and chemistry. Structural stability and deterioration phenomena of these materials as found in cultural collections. Letter grading.

288. Special Topics in Conservation. (2 or 4) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 288.) Lecture, three hours; laboratory, one hour. Special topics on theoretical and practical subjects in conservation including selected focus on recent materials studies, new conservation approaches, advanced scientific applications, or current special work by core program faculty or visiting scholars. If approved, field trips may be arranged. May be repeated for credit with topic or instructor change. Letter grading.

290. Conservation Program Internship. (6 or 12) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 498.) Fieldwork, 20 or 40 hours. Open only to Conservation MA program graduate students who have completed first year of conservation program coursework. Supervised conservation-related, project-based, and/or fieldwork training in field projects (i.e., archaeological excavation, site management, indigeneous site preservation and consultation), as well as in museum, library, archive, and collections conservation and science departments, regional and national laboratories, or at other similar venues. All intern placements must be preapproved by program and developed in collaboration between student, faculty, graduate students, and host institution/agency. S/U grading.

596. Directed Individual Studies. (2 to 6) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 596.) (Same as Information Studies M596.) Tutorial, to be arranged. May be repeated for credit. S/U grading.

597. Preparation for PhD Qualifying Examination. (2 to 12) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 597.) Tutorial, to be arranged. May not be applied toward PhD course requirement. May be repeated for credit. S/U grading.

598. MA Thesis Preparation. (2 to 12) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 598.) Tutorial, two hours; laboratory, one hour. Development of research paper on conservation topic or treatment-based investigation that can be theoretical in scope or practically oriented. Letter grading.

599. PhD Dissertation and Preparation. (2 to 12) (Formerly numbered Conservation of Archaeological and Ethnographic Materials 599.) Tutorial, to be arranged. May not be applied toward PhD course requirement. May be repeated for credit. S/U grading.
DENTISTRY
School of Dentistry
A0-111 School of Dentistry
Box 951762
Los Angeles, CA 90095-1762
Dentistry
310-825-9789
Paul H. Krebsbach, DDS, PhD, Dean

Overview
The UCLA School of Dentistry offers courses for general campus students. Dentistry 199 and 199H are individual special studies courses for UCLA undergraduates with definitive research interests and abilities applicable to dentistry. The subject areas include oral biology, clinical research, and dental health policy. Interested students should contact the associate dean of research at 310-825-6401 to obtain the names and areas of interest of participating School of Dentistry faculty members. Dentistry faculty information is available from the department.

Dentistry
Lower-Division Courses
19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses
199. Individual Special Studies. (2 to 8) Tutorial, to be arranged. Studies in dentistry and related subject areas appropriate for training of particular students, with required reading assignments or laboratory work leading to final oral or written examination. May be repeated for maximum of 16 units. P/NP or letter grading.

199H. Individual Special Studies (Honors). (2 to 8) Tutorial, to be arranged. Studies in dentistry and related subject areas appropriate for training of particular students, with required paper submitted at end of course in addition to final examination (paper to be of publication quality as judged by course mentor). May be taken for maximum of 8 units. P/NP or letter grading.

Graduate Course
441C. Introduction to Healthcare. (2) Lecture, two hours. Description and analysis of American dental care system from historical, ethical, and legal perspectives. Assessment of how dentistry fits within general provision of healthcare services in America, with comparisons to dental care provisions in other countries. S/U grading.

DESIGN/MEDIA ARTS

Associate Professor
Ramesh Srinivasan, PhD

Assistant Professors
Jenna B. Caravello, MFA
Chandler B. McWilliams, MFA, MA
Daniel S. Snelson, PhD

Overview
The Department of Design/Media Arts offers the Bachelor of Arts (BA) and Master of Fine Arts (MFA) degrees. The BA degree focuses on visual communication design, with emphasis on digital media. The MFA degree focuses on media arts. These uniquely challenging programs invite students to balance aesthetic sensibility with logical reasoning, formal theories with practical application, and contemporary thought with historical perspective.

The Department of Design/Media Arts reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

Facilities
Facilities and equipment in the department enable students to create work in two, three, and four dimensions. They expand opportunities for students to develop interactive media applications in a networked environment and advanced computer graphics. The department equipment includes computer laboratories with high-end PC and Macintosh computers and relevant software for the creation of works for print, web, video, and other media, a fabrication laboratory with equipment ranging from table saws to three-dimensional printers to a CNC machine to create physical objects combined with electronics, and a print laboratory with high-quality printers.

Undergraduate Major
Design/Media Arts BA
The undergraduate program begins with the study of basic design elements and processes: color, drawing, letterforms and typography, motion, and interactivity. Historical perspectives and social issues are also introduced. At the upper-division level, studio courses explore current uses of interactive media and new directions in visual communication design, including the study of time and motion, as well as virtual form and space in computer-generated environments. Through a balance of courses in theory, criticism, and practice, students develop an understanding of design principles. Most courses are taught as studios of no more than 22 students, which encourages individual growth and fosters a sense of community within the department.

Capstone Major
The Design/Media Arts major is a designated capstone major. Students are required to complete an advanced project of their own that entails full engagement with the design process. Through their capstone work, students demonstrate their capacities for research, ideation/concept development, creative and design direction, communication strategy, design, production/fabrication, and critical analysis. Capstone courses focus on career choice, and final projects are showcased at the spring senior show.

Learning Outcomes
The Design/Media Arts major has the following learning outcomes:

• Deep understanding of the field through immersion
• Exploration and development of ideas through listening to and observation of patterns
• Definition of an event and its surroundings and mise-en-scène, and the ethos of the student’s idea
• Development of the specifics of a design
• Conceptualization of how an idea reaches its audiences, and how it launches, and how it stays relevant and vibrant
• Designed specifics of each element of the visual vocabulary—from graphic elements to photography, videography, and illustrations—including definition of spatial, material, and auditory elements
• Thorough research of appropriate and relevant production methods
• Analysis, review, and critique of others’ work

Facilities and equipment in the department enable students to create work in two, three, and four dimensions. They expand opportunities for students to develop interactive media applications in a networked environment and advanced computer graphics. The department equipment includes computer laboratories with high-end PC and Macintosh computers and relevant software for the creation of works for print, web, video, and other media, a fabrication laboratory with equipment ranging from table saws to three-dimensional printers to a CNC machine to create physical objects combined with electronics, and a print laboratory with high-quality printers.
Requirements

Preparation for the Major
Required: Design/Media Arts 8, 10, 21, 22, 24, 25, 28.

The Major
Required: Twelve upper-division courses: Design/Media Arts 101, 104; six courses selected from 152, 153, 154, 155, 156, 157, 158, 161, 163; three courses selected from 160, 171, 172, 173; and one capstone course: 159.

It is recommended that students have each term’s program approved by the departmental adviser.

Consult the Schedule of Classes for courses limited to majors only.

Graduate Major

Design/Media Arts MFA

The three-year Master of Fine Arts (MFA) program fosters mature, professional-quality work utilizing the most current technologies in the field of media arts. The program focuses on developing an individual thesis project that incorporates in-depth research and theoretical exploration of a topic, culminating in a final exhibition of work.

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Design/Media Arts

Lower-Division Courses

1. Graphic Design. (2) Studio, 30 hours. Limited to high school students. Basic and advanced photography skills using digital cameras. Alteration/manipulation of photos using techniques from latest version of Adobe Photoshop. Uploading of images on Web or in print. Production of digital and print portfolio of student work. Field trips to surrounding Los Angeles locales to shoot photos. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

2. Web Design. (2) Studio, 30 hours. Limited to high school students. How Web design works: basic hand coding and creation of personalized homepages with Macromedia Director and Flash software. Photograph scanning and manipulation of images in Adobe Photoshop to incorporate student Web designs. Critique of various Web pages to analyze successful use of Web design and understand enormous potential of Internet. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

3. Game Design. (4) Studio, 30 hours. Limited to high school students. Development of fundamental skills to create games and game art that express personal and subjective approach to game making. Artistic vision combined with technological expertise to teach students fundamental principles of designing games, building game worlds, creating game characters, and making playable games for mobile platforms. Use of current software and technology, including Maya and Unity3D. Creation of game projects that students exhibit and can use for college applications. Offered only as part of UCLA Game Lab Summer Institute. P/NP grading.

4. Audio Video Design. (2) Studio, 30 hours. Limited to high school students. Creation of storyboard for short documentary, commercial, or music video. Students shoot and edit their own work by learning fundamental aspects of postproduction and production using latest digital software such as Adobe Premiere and After Effects, to create their work. Burning of DVD of finished project. Visits from professional video producer to help guide students in creating their own videos. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

5. Introduction to Design | Media Arts. (4) Studio, 40 hours. Limited to high school students. Two-week summer course designed to meet needs of high school students interested in exploring their creative potential within fields of design media arts, with focus on concepts of narrative and storytelling. Introduction to and exploration of variety of media such as graphic, web, game, and video design with goal of combining and integrating these media to express and realize their narrative projects. Students work with most current software and technology in each discipline area, developing diverse skill sets while cultivating conceptual capabilities around storytelling project, and with experienced instructors and professionals in field to develop projects utilizing this comprehensive and integrative approach. Culminates in projects that may be used for college applications. Possible field trips. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

6. Art|Science and Technology Studio/Laboratory. (4) Studio/laboratory, 40 hours. Limited to high school students. Two-week summer course, including lectures, required screenings, laboratory visits, field trips, and outside study. Exploration of creative projects on scientific research and innovation to gain broad understanding of impact of science on contemporary art and popular culture, with focus on new sciences of biotechnology and genetic engineering. Development of proposals and ideas that could serve as prototypes for either art projects or scientific research study. P/NP grading.

7. Media Histories. (5) Lecture, three hours; discussion, one hour; outside study, 11 hours. Exploration and survey of cultural impact of scientific and cultural innovations, technology-driven art inspired by science, and art/science collaborative projects. Introduction to vast array of cutting-edge research taking place on campus; scientific guest lecturers. Emphasis on art projects that use technology and respond to new scientific concepts. P/NP or letter grading.

8. Art, Science, and Technology. (5) Lecture, three hours; discussion, one hour; outside study, 11 hours. Exploration and survey of cultural impact of scientific and cultural innovations, technology-driven art inspired by science, and art/science collaborative projects. Introduction to vast array of cutting-edge research taking place on campus; scientific guest lecturers. Emphasis on art projects that use technology and respond to new scientific concepts. P/NP or letter grading.

9. Design Culture. (5) Lecture, three hours; outside study, 12 hours. Open to nonmajors. Understanding design process, with emphasis on development of visual language; study of historic, scientific, technological, economic, and cultural factors influencing design in physical world. P/NP or letter grading.

10. Design Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating major paths and questions of UCLA. P/NP or letter grading.

11. Flat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating major paths and questions of UCLA. P/NP or letter grading.

12. Drawing and Color. (4) Studio, six hours; outside study, six hours. For drawing, exploration of relation-ship between concept and image creation while focusing on concept of drawing as tool for working with colors. Combination of painting and software to be predominant way of exploring and presenting ideas regarding color. P/NP or letter grading.

13. Form. (4) Studio, six hours; outside study, six hours. Internale of two-dimensional surfaces and three-dimensional forms with traditional and experimen-tal materials as foundation for creativity; origina-tion and solution of problems. P/NP or letter grading.

14. Motion. (4) Studio, six hours; outside study, six hours. Introduction and development of design tools, camera, and digital technologies for application to visual thinking and fundamentals of design. P/NP or letter grading.

15. Typography. (4) Studio, six hours; outside study, six hours. Focused on three typographic basics: letter, text, and grid. Introduction to fundamentals of type-ography. Assignments designed to develop understanding of form, scale, and shape of letters as single elements, as text in layout, and information hierarchy to create successful typographic messages. P/NP or letter grading.

16. Interaction. (4) Studio, six hours; outside study, six hours. Requires: courses 21, 22, 25. Introduction to concept of interactivity and field of media art that follows history of computer as media for artistic ex-prosion in relation to print, animation, and interactivity. Discussion of potential and ideas related to interac-tivity, with focus on required skills for creating interac-tive work. Development of programming skills in ser-vice of creating examples of digital artworks and skills taught enable student to excel in future courses about Internet, animation, interactive media, and game design. Discussion and readings on four themes—form/programming, motion, interactivity/pro-gramming, and interface. P/NP or letter grading.

17. Individual Course. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Stu-dents must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

101. Media Arts: Introduction. (5) Lecture, three hours; outside study, 12 hours. Limited to and required of Design/Media Arts majors. Survey of media arts, their history, aesthetics, and cultural roles from late-19th century to present. Investigation of media arts within broad historical and cultural framework. Discussion of parallels and links with other cultural forms, including history of technology and various art and design prac-tices. P/NP or letter grading.

104. Digital Futures. (8) Lecture, three hours; outside study, 12 hours. Preparation and completion of prepara-tion for major courses. Open to nonmajors with con-sent of instructor. Critical examination of design practice and theory of 20th and 21st centuries, incorpo-rating historical as well as speculative methodologies. Consideration of various design practices and techniques related to each other across cultures and media, with strong emphasis on communication design. P/NP or letter grading.

152. Tangible Media. (5) Studio, six hours; outside study, nine hours. Requires: courses 22, 28, and 101 or 104. Through workshops, readings, lectures, cri-tiques, and discussions, exploration of role of in-teractive design lecture as tool for working with colors. Combination of
153. Video. (5) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requires: course 101 or 104. Use of video technology (video editing, cameras, tripods, editing, and sound) to integrate image, sound, time, and motion. Emphasis on expression, continuity, and sequential patterns for video communication. P/NP or letter grading.

155. Interactive Animation. (5) Studio, six hours; outside study, nine hours. Preparation: courses 101 or 104, and 156. Exploration of traditional and experimental animation techniques that are central to 2D and 3D interactive digital projects and video games. Course work develops skills and concepts that are integral to animation workflows and game engine animation systems including traditional animation principles, 2D sprite animation, rigging 2D and 3D game objects, and character controller implementation. Students experiment with common and alternative input methods for real-time interaction, ray tracing, image compositing, and class gameplay sessions supplement lessons. P/NP or letter grading.

156. Three-Dimensional Modeling and Motion. (5) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requires: courses 24, 28, and 101 or 104. Introduction to game design, with focus on developing conceptual and practical skills that form basis for both digital and nondigital game development. Development of four playtable game projects that explore various aspects of game design: rule design, game balance, multiplier strategy, complexity, randomization, physical interaction and aesthetic and pragmatic aspects of physical game design. P/NP or letter grading.

157. Game Design. (5) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requires: courses 24, 28, and 101 or 104. Introduction to game design, with focus on developing conceptual and practical skills that form basis for both digital and nondigital game development. Development of four playtable game projects that explore various aspects of game design: rule design, game balance, multiplier strategy, complexity, randomization, physical interaction and aesthetic and pragmatic aspects of physical game design. P/NP or letter grading.

158. Game Engine. (5) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requires: courses 24, 28, 101 or 104, and 156. Exploration of conceptual space enabled by electronic media through exercises, presentations, discussions, and critiques. Weekly exercises balance concept and technique to reveal potential of computer as medium and tool. Experience with programming basics includes procedural and object-oriented programming, two- and three-dimensional graphics, file I/O, color models, and image processing. Letter grading.

159. Capstone Senior Project in Design Media Arts. (2–4) Studio, six and 12 hours. Tutorial, two hours. Preparation: 3.0 grade-point average, two semesters of advanced studio courses. Limited to seniors and students required. P/NP or letter grading. May be repeated for credit. Individual contract required. Letter grading.

160. Special Topics in Design Media Arts. (5) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requires: course 101 or 104. Selection of knowledge and sensitivity to typographic in context of complex communication problems in print and digital media. Research, concept and content development, and articulation of methodology for visualization. P/NP or letter grading.

161. Network Media. (5) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requires: courses 28, 154. Exploration of creative, technical, and critical tools to realize Internet-based projects. Focus on students gaining deeper understanding of Internet as creative platform—where did it come from, how does it work, how do you make things for it, and what do you want to say? Methods include: scripting, server-side technologies, file I/O, and IP. Topics announced in advance. May be repeated for credit. Letter grading.

162. Exploration of traditional and experimental animation techniques that are central to 2D and 3D interactive digital projects and video games. Course work develops skills and concepts that are integral to animation workflows and game engine animation systems including traditional animation principles, 2D sprite animation, rigging 2D and 3D game objects, and character controller implementation. Students experiment with common and alternative input methods for real-time interaction, ray tracing, image compositing, and class gameplay sessions supplement lessons. P/NP or letter grading.

163. Narrative. (5) Lecture, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requires: course 101 or 104. Provides wider understanding of arts that parallels world of 20th-century visual culture by theories that allow viewer to connect story of one art form to another in richer context. Letter grading.

164. Topics in Interactivity and Games. (5) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major and upper-division core courses required. Requires: courses 101 or 104, 157. Selected topics in interactive media and games explored through various means of approaches that may include projects, presentations, papers, and oral presentations. Topics announced in advance. May be repeated for credit. Letter grading.

165. Topics in Video and Animation. (5) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major and upper-division core courses required. Requires: courses 24, 28, 101 or 104, and 156. Selected topics in video and animation explored through various means of approaches that may include projects, readings, discussions, research papers, and oral presentations. Topics announced in advance. May be repeated for credit. Letter grading.

166. Topics in Visual Communication and Image. (5) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major and upper-division core courses required. Requires: courses 24, 28, 101 or 104, and 156. Selected topics in visual communication and image explored through various means of approaches that may include projects, readings, discussions, research papers, and oral presentations. Topics announced in advance. May be repeated for credit. Letter grading.

167. Topics in Visual Communication and Image. (5) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major and upper-division core courses required. Requires: courses 24, 28, 101 or 104, and 156. Selected topics in visual communication and image explored through various means of approaches that may include projects, readings, discussions, research papers, and oral presentations. Topics announced in advance. May be repeated for credit. Letter grading.

168. Advanced Honors Seminars. (5) Seminar, three hours. Limitations for 20 students. Designated as an undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other exercises. Course does not constitute major work. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

169A–169B. Community or Corporate Internships in Design Media Arts. (2–4) Topics, six and 12 hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business related to design. Students meet on regular basis with instructor and provide periodic reports of their experience. Courses 169A and 169B may be repeated for combined maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

170. Honors Research in Design | Media Arts. (4) Tu- torial, four hours. Preparation: 3.0 grade-point average overall. Limited to juniors/seniors. Development and completion of an honors or comprehensive re- search project under direct supervision of faculty mentor. May be repeated once for credit. Individual contract required. Letter grading.

171. Directed Research in Design | Media Arts. (2 to 5) Tutorial, four hours. Preparation: 3.0 grade-point av- erage in major. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract re- quired. P/NP or letter grading.

Graduate Courses

200. Design | Media Arts Faculty Seminar. (2) Sem- inar, two hours. Limited to graduate design | media arts students. Designed to familiarize new graduate stu- dents with departmental and discipline's creative work and research to help students select their faculty advisers. May be repeated once for credit. S/U grading.

252A. Programming Media 1. (5) Studio, six hours; outside study, nine hours. Preparation: 3.0 grade-point average. Introduction to computer programming within context of art and design. Exploration of conceptual space enabled by electronic media through exercises, presentations, discussions, and critiques. Weekly exercises balance concept and technique to reveal potential of computer as medium and tool. Experience with programming basics includes procedural and object-oriented programming, two- and three-dimensional graphics, file I/O, color models, and image processing. Letter grading.

252B. Programming Media 2. (5) Studio, six hours; outside study, nine hours. Preparation: 3.0 grade-point average. Introduction to essential 3D computer graphics tech- niques, concepts, and applications. Students complete short exercises to better understand work- flows used to create 3D digital art and adjacent media including but not limited to 3D models and animation, virtual and augmented reality, video games, motion capture, photogrammetry, 3D scanning, and physics simulations. Offers technical, formal, and theoretical background for 3D computer graphics to inspire new perspectives on potential of artmaking in virtual spaces. Letter grading.

252C. Virtuality. (5) Studio, six hours; outside study, nine hours. Limited to Design | Media Arts majors. Intro- duction to essential 3D computer graphics tech- niques, concepts, and applications. Students complete short exercises to better understand work- flows used to create 3D digital art and adjacent media including but not limited to 3D models and animation, virtual and augmented reality, video games, motion capture, photogrammetry, 3D scanning, and physics simulations. Offers technical, formal, and theoretical background for 3D computer graphics to inspire new perspectives on potential of artmaking in virtual spaces. Letter grading.

269. Graduate Seminar. (4) Seminar, four hours. De- signed for graduate design | media arts students. Survey of critical theories in media art and design. Critical examination of theories in studio practice, with scheduled meetings to be arranged between students, faculty members, and expert guests. Must be taken twice for MFA degree. May be repeated for credit with consent of adviser. Letter grading.

272. Introduction to Art | Science. (5) Seminar, three hours. For past 50 years artists have increasingly moved from being inspired by scientific innovation and discovery to actually collaborating with scientists and even residing and working in science laboratories. History of science in relation to artists' interpretation of scientific work to current works that are created in re- sponse to recent developments in biotechnology and nanotechnology. Letter grading.

280. Topics in Design Media Arts. (3) Seminar, 90 minutes; seven and one half hours arranged. Exam- ination of topics relevant to media arts theory and practice, with scheduled meetings to be arranged.
tween faculty member and student as needed. Topics announced in advance. May be taken for maximum of 18 units. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

403. Graduate Critique. (2) Seminar, three hours; outside study, three hours. Limited to first- and second-year departmental graduate students. Students meet with instructor in small classroom setting to exchange ideas through presentation of current projects and research, discussion, research papers, and reports. Instructors may invite visiting critics to contribute. May be repeated for credit. S/U grading.

404. Graduate Tutorial. (3) Tutorial, three hours; outside study, six hours. Limited to first- and second-year departmental graduate students. Development of body of work while working toward MFA degree, with one-to-one interaction between students and faculty members. May be repeated for credit. Letter grading.

495. Teaching Assistant Training Practicum. (2) Seminar, three hours; outside study, three hours. Forum for first-year teaching assistants for discussion and exploration of teaching methodology and classroom mechanics. Problems and practices of teaching design at college level, as well as role of teaching assistants within department. Designed to help new teaching assistants develop teaching skills and to orient them to department and University policies and resources. May not be applied toward degree requirements. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. May be repeated for credit with consent of adviser. S/U or letter grading.

597. Preparation for MFA Comprehensive Examination. (4 to 8) Tutorial, to be arranged. Designed for second-year MFA students to prepare for comprehensive examination. May be repeated for credit with consent of adviser. S/U grading.

598. MA Research and Thesis Preparation. (4 to 12) Tutorial, to be arranged. Designed for second-year MA students. May not be applied toward minimum graduate course or unit requirements for MA degree. May be repeated for credit. S/U grading.

Overview
The Digital Humanities minor is an interdisciplinary minor that studies the foundations and futures of the digital world. Digital humanities interprets the cultural and social impact of the new information age as well as creates and applies new technologies to answer cultural, social, and historical questions, both those traditionally conceived and those enabled by new technologies. The interdisciplinary curriculum draws on faculty members from more than 15 departments, five schools, and three research centers at UCLA. It places project-based learning at the heart of the curriculum, with students working in collaborative teams to realize digital research projects with real-world applications. Students use tools and methodologies such as three-dimensional visualization, data mining, network analysis, and digital mapping to conceptualize and advance research projects. Students have the opportunity to make significant contributions to scholarship in fields ranging from archaeology and architecture to history and literature. By preparing students to be active participants in the design and production of new knowledge, the minor emphasizes the critical thinking skills, creativity, and collaborative methodologies necessary for success in the digital information age.

Undergraduate Minor
Digital Humanities Minor
The Digital Humanities minor is intended to provide students with literacy in creating, interpreting, and applying the technologies of the digital world. It examines the cultural and social impact of new technologies and enables students to harness these technologies to develop their own research projects in a wide range of fields.

Admission
To apply for the minor, students must (1) have an overall grade-point average of 2.7 or better and (2) submit an application essay supporting their interest in pursuing the minor and enumerating any digital projects that they have already undertaken. On acceptance to the minor, students are expected to identify an academic area of digital humanities in which they intend to concentrate. Information about the minor is available on the minor website. To submit an application for the minor, see the website.

The Minor

Required Upper-Division Courses (25 to 28 units): Digital Humanities 101; one upper-division elective course selected from Digital Humanities 110 through 160; one capstone course selected from Digital Humanities 187, 198, or 199; and three elective courses selected from Ancient Near East M101C (or Art History M110C), M125A, M125B (or Architecture and Urban Design M125B), M125C (or Architecture and Urban Design M125C), M162, C165, C169 (or Anthropology CM110Q), Anthropology M116R (or Chinese M183), Architecture and Urban Design 132, Armenian C153, Art History C145A, C145B, Classics 164, 166B, Design/Media Arts 104, Digital Humanities 151, 195 or 196, English 118A, History 188, Korean 183, 187, Russian 121, 129, Scandinavian C133A, C171, Society and Genetics 131, 175, Spanish 130, 150, 170, Urban Planning 129, 141.

Policies
Variable topics courses may be taken as topics apply.
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
Each minor course must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

Digital Humanities
Lower-Division Courses
19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.
30. Los Angeles Tech City: Digital Technologies and Spatial Justice. (5) Lecture, two and one half hours; studio, two hours. Investigation of spatial justice and injustice in multi-ethnic cities of Los Angeles through Lens of three thematic technologies that built and transformed Los Angeles into global metropolis: cars and highways, networks culminating in Internet and World Wide Web, and film and broadcast media. Use of innovative forms of investigation and communication, from digital mapping to video-sensing, to integrate interpretative and historical approaches of humanities with material and projective practices of design. Letter grading.
89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.
89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.
99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Stu-
101. Introduction to Digital Humanities. (4) Lecture, 75 minutes; tutorial, 75 minutes. Foundation course for students in Digital Humanities minor, providing theoretical and conceptual framework for understanding genesis of digital world. Use of contemporary cultural and historical methodology to focus on new media and information technologies in 19th, 20th, and 21st centuries, such as photography, film, radio, television, Internet, and World Wide Web and their impact on society, governments, groups, and cultures experienced their worlds. Letter grading.

110. User Experience and Design. (4) Seminar, three hours. Requisite: course 101. Introduction to fields of user experience (UX) research and design. Covers UX research methods including qualitative and quantitative analysis of how users engage with websites. Focus on how to design for user experience and evaluate user interfaces. Letter grading.

120. Social Media Data Analytics. (4) Lecture, three hours; laboratory, one hour. Requisite: course 101 or consent of instructor. Social media data analytics, with focus on questions of power, privilege, identity, whose voices are heard in what spaces, as well as how data science and digital humanities may be used to challenge power structures. Study of how social media has been used both to undermine and to support social justice and change movements in ways in which social media is currently used by corporate entities, and ethical data usage. Students learn digital research methods including quantitative and qualitative data analysis, as well as data visualization to examine social media data. Letter grading.

M121. Race, Gender, and Data. (4) Same as Community Engagement and Social Change M121. Seminar, three hours. Requisite: course 101. Data plays a crucial role in political representation, governmental resource allocation, and policy decisions. Investigation of how data does or does not ascribe a quantitative value to a human life by employing a community-engaged approach. Students will learn how emerging digital models link data with social justice organizing. Students learn to read datasets produced by governmental entities such as the U.S. Census Bureau, Bureau of Labor Statistics, and Department of Health and Human Services. Assignments include working on a community-engaged data project that evaluates and addresses key concerns facing communities-of-color. Introduction to community data studies and data ethics. Studio sessions include lessons on finding and analyzing datasets relevant to racial and gender justice themes; and to generating data visualizations, digital stories, and maps using the latest software tools. No prior knowledge of statistics or quantitative analysis is required. IPNP or letter grading.

125. Data Analysis for Social and Cultural Research. (4) Seminar, three hours. Requisite: course 101 or consent of instructor. Data analysis and statistical methods tailored for students in humanities and social sciences, with focus on topics and issues related to social justice. Study of descriptive and inferential statistics as applied in humanistic research. Consideration of how to generate evidence-based, statistically sound arguments, applying methods learned throughout the course to a collaborative project. Students learn statistical methods, R Studio environment and language, and how to communicate their arguments in cogent narratives supported by evidence. Letter grading.

131. Digital Mapping and Critical Geographic Information Systems. (4) Seminar, three hours. Requisite: course 101 or consent of instructor. Introduction to digital mapping and critical geographic information systems. Study of basic data types including geographic, structured, and unstructured. Students engage with fundamental mapping practices such as geolocating structured data, working with open data through web mapping technologies, georeferencing historical maps, and analyzing human-based narratives and visualizations. Through project-based learning, students discover how to manage and apply data to wide range of digital mapping technologies. Consideration of how to incorporate these concepts into humanities and social sciences research. Letter grading.

140. Coding for Humanities. (4) Seminar, three hours. Requisites: course 101. Introduction to coding, with focus on Python. Study of basic structural elements such as lists, if statements, dictionaries, loops, function systems (GIS) cartography, mobile telephony, real-time data collection, social media, digital databases, and interactive web platforms can be deployed to research and document urban experience. Familiarization with basic components of urban interface, from affordable housing to access to public space and employment, to civic participation. Letter grading.

150. Advanced Topics in Digital Humanities. (4) Seminar, three hours. Requisite: course 101. Seminar introduces students to advanced research methods or thematic issues in digital humanities such as database and visualization technologies, social media technologies, application programming interfaces, and digital mapping to acquire familiarity with particular set of technologies by learning practical research methods and theoretical issues to carry out advanced research in this area. Students consult with advisors for topics to be offered in specific term. May be repeated for credit with topic change. Letter grading.

151. Advanced Topics in Urban Humanities. (4) Seminar, three hours. Requisite: course 101. Students pose critical questions about social impact of data, while also gaining literacy in digital humanities research project. Students learn to develop and refine research question, carry out advanced research in digital humanities, and present results of their research to their peers. Students participate in structured trainings, work with classmates to select suitable research topics, give weekly updates about their research process, and develop presentation of project. Librarians and members of Digital Research Consortium introduce students to available digital collections, archives, and other resources at UCLA. Letter grading.

187. Capstone Seminar in Digital Humanities. (4) Seminar, three hours. Requisite: course 101. Students are guided in development and realization of collaborative digital humanities research project. Students learn to develop and refine research question, carry out advanced research in digital humanities, and present results of their research to their peers. Students participate in structured trainings, work with classmates to select suitable research topics, give weekly updates about their research process, and develop presentation of project. Librarians and members of Digital Research Consortium introduce students to available digital collections, archives, and other resources at UCLA. Letter grading.

196. Research Apprenticeship in Digital Humanities. (4) Tutorial, three hours per week. Limited to juniors/seniors. Entry-level research apprenticeship for undergraduate students co-supervised by faculty mentor. May be repeated for credit. Individual contract required. IPNP or letter grading.

199. Directed Research in Digital Humanities. (2 to 4) Tutorial, one hour. Requisite: course 101. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses

201. Introduction to Digital Humanities. (5) Seminar, three hours; laboratory, one hour. Introduction to field of digital humanities. Historical overview of field from its beginning in post-World War II era to present, highlighting major intellectual problems, disciplinary paradigms, and institutional challenges that are posed by digital humanities. Examination of major epistemological, methodological, technological, and institutional challenges posed by digital humanities through number of specific projects that address fundamental problems in creating, interpreting, preserving, and transmitting human cultural record. How digital technologies and tools, ranging from map visualizations and modeling environments to database structures and interface design, are arguments that make certain assumptions about, and even transform, objects of study. Letter grading.

M221. Data and Society. (4) Same as Social Science M240.) Seminar, three hours. Introduction to way data and computing technologies increasingly play pivotal role in social life. Students pose critical questions about the impact of emerging digital and data technologies and tools, ranging from map visualizations and modeling environments to database structures and interface design, arguments that make certain assumptions about, and even transform, objects of study. Letter grading.

230. Special Topics in Digital Humanities. (4) Seminar, three hours. Enforced requisite: course 201. Introduction to advanced research methods or thematic issues in digital humanities, such as digital textual analysis, digital mapping database and visualization technologies, or social media technologies. Acquisition of familiarity with particular set of technologies by learning practical research methods and theoretical issues to carry out advanced research in this area. Examination of critiques of theoretical underpinnings of social sciences and humanities. May be repeated for credit with topic change. Letter grading.

259. Special Projects in Digital Humanities. (2 to 4) Tutorial, one hour. Enforced requisite: course 201. Limited to and required of graduate students in Digital Humanities. Development and Graduate Committee supervised research and investigation under guidance of faculty mentor. Culminating project required. May be repeated for maximum of 12 units. Letter grading.

296. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged by student with faculty member who directs study or research. S/U or letter grading.

195. Community or Corporate Internships in Digital Humanities. (4) Tutorial, two hours; fieldwork, eight hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Placement to be arranged by instructor. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. Letter grading.

196. Research Apprenticeship in Digital Humanities. (4) Tutorial, three hours per week. Limited to juniors/seniors. Entry-level research apprenticeship for undergraduate students co-supervised by faculty mentor. May be repeated for credit. Individual contract required. IPNP or letter grading.

199. Directed Research in Digital Humanities. (2 to 4) Tutorial, one hour. Requisite: course 101. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. Letter grading.

Overview
Disability—whether bodily, cognitive, emotional, or sensory—is part of the fabric of universal human experience; yet it is often regarded as a deficit to be fixed, cured, or hidden, with disabled individuals cast as unfortunate victims. The robust Disability Studies program is challenging this view, changing attitudes, and redefining normal.

By exploring disability as a social issue and cultural identity rather than a medically defined condition, students are prepared to use the experience of disability as a lens to re-envision models of access, inclusion, participation, communication, and equality.

Led by some of the most distinguished UCLA faculty, disability studies examines the meaning and nature of disability from a variety of perspectives, including arts and humanities, health sciences, social sciences, public policy, technology, and education. At UCLA, the conversation around disability has shifted from exclusion to inclusion, from limitations to possibilities.

Undergraduate Major

Disability Studies BA

Disability Studies is a multifaceted field that examines the nature, meaning, and consequences of disability. The Bachelor of Arts (BA) degree in Disability Studies is an interdisciplinary, community-based, capstone major. It appeals to undergraduates seeking a conceptual and practical understanding of disability as a foundation for graduate or professional studies and/or careers across a broad spectrum of professions. The major curriculum recognizes disability as a central part of our lived experience; a critical dimension of social, cultural, and political identity; and a frequent target of discrimination and exclusion. Through foundational courses, interdisciplinary electives, community-engaged course work, and a senior capstone research project, students in the major learn to think critically about disability as a core aspect of the human experience, preparing them to enact transformational change across disability communities and beyond.

Capstone Major

The Disability Studies major is a designated capstone major. Students have the option of completing a capstone seminar (Disability Studies 191) or independent research project (Disability Studies 198A and 198B, or 199A and 199B) that enables them to use knowledge and skills acquired through previous coursework to engage, under the guidance of a faculty member, in a research or creative project that results in a final paper or other product.

Learning Outcomes

The Disability Studies major has the following learning outcomes:

- Demonstrated understanding of disability studies concepts, theories, history, and political movements
- Integration of multiple perspectives on disability through interdisciplinary inquiry
- Development of professional skills through academic and applied experiences
- Use of theory to inform practice through participation in community-engaged learning activities
- Conduction and communication of research to various audiences

Entry to the Major

Admission

Students must first complete all preparation for the major courses. Students must have a UC grade-point average (GPA) of 2.0 or better in major courses. Students must have a UC grade-point average (GPA) of 2.0 or better in major courses. Students must have a UC grade-point average (GPA) of 2.0 or better in major courses. Students must have a UC grade-point average (GPA) of 2.0 or better in major courses. Students must have a UC grade-point average (GPA) of 2.0 or better in major courses. Students must have a UC grade-point average (GPA) of 2.0 or better in major courses. Students must have a UC grade-point average (GPA) of 2.0 or better in major courses. Students must have a UC grade-point average (GPA) of 2.0 or better in major courses. Students must have a UC grade-point average (GPA) of 2.0 or better in major courses.

Transfer Students

Transfer applicants to the Disability Studies major with 90 or more units must complete the following preparatory courses prior to admission to UCLA: one social theory course; one race, identity, and society course; one humanities and ethics course; and one data analysis course. Disability Studies 1 must be taken at UCLA once a transfer student is admitted to the University.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: (1) Disability Studies 1; (2) one social theory course selected from Anthropology 3, Public Affairs 10, 80, or Sociology 1; (3) one race, identity, and society course selected from African American Studies 1, 6, American Indian Studies M10, Asian American Studies 10, 20, 30, 40, 50, Chicana/o and Central American Studies 10A, 10B, 20, Clusters 20B, M172B, 80BX, Communication M172B, Design/Media Arts 10, Education 11, Gender Studies 10, Labor Studies 10, Society and Genetics M172B, Sociology M172B, or World Arts and Cultures M23; (4) one humanities and ethics course selected from Clusters M171B, 73B, Comparative Literature 1E, Design/Media Arts 10, Molecular, Cell, and Developmental Biology 60, Philosophy 22, 22W, Society and Genetics 5, or M171B; and (5) one data analysis course selected from Education 35, Life Sciences 40, Political Science 6, Public Affairs 60, Statistics 10, or 13.

The Major

Required Core Course (5 units): Disability Studies 101W.

Interdisciplinary Perspectives on Disability (16 units): Select one course from each of the four categories:

Category 1: Health Humanities and Bioethics—Anthropology 137P, 149 (when offering a disciplinary perspective of disability), Asian American Studies M117, M129, M161, Community Health Sciences 100, M140, Comparative Literature 180, Disability Studies 138XP, M139, M148, M168 and M172XP (must be taken together to satisfy requirement), M183, Education 132, Health Policy and Management M110, History 179A, 179B, 179C, Honors Collegium M183, Nursing M172 and M172XP (must be taken together to satisfy requirement), Philosophy 173, Public Affairs M131, 134, Psychology M107, 127A, 127B, 127C, M139, Society and Genetics M166, M183, or Sociology M148

Category 2: Access and Social Change—Community Engagement and Social Change 172XP, Disability Studies 145, M148, M149, M166, M172 and M172XP (must be taken together to satisfy requirement), Design/Media Arts 171, Education 104A, Gender Studies 152, Nursing M172 and M172XP (must be taken together to satisfy requirement), Psychology 132A, Society and Genetics M166, Sociology M120, or M148

Category 3: Representation, Embodiment, and Disability Culture—American Sign Language
M115. Comparative Literature 180, Disability Studies M103, 111, M114, M115, M121, M139, M161, English M103, Gender Studies 104, M121, M161, Psychology M139, or Theater M114

Category 4: Global and Historical Perspectives—Anthropology 137P, 149 (when offering an interdisciplinary perspective of disability), Community Health Sciences 132, Comparative Literature 180, Disability Studies M103, English M103, Gender Studies 152, History 179A, 179B, or 179C

Internship or Research Practicum (8 units): Disability Studies 195CE (taken twice) or 196 (taken twice).

Capstone (5 or 6 units): one capstone course from Disability Studies 191 (5 units) or two capstone courses from Disability Studies 198A and 198B (6 units) or 199A and 199B (6 units).

Honors Program
All honors students must complete their capstone requirement by taking courses 198A and 198B, in which they research, write, and present an honors thesis.

Policies
Preparation for the Major
All courses must be completed with a 2.0 or better grade-point average.

The Major
Each course must be taken for a letter grade, and students must earn a C or better grade in Disability Studies 101W.

Disability Studies 101W and one quarter of Disability Studies 195CE or 196 must be taken prior to the capstone.

Honors Program Admission
The honors program is open to majors with a 3.5 departmental and a 3.0 overall grade-point average (GPA). Students with lower GPAs may petition for admission to the program. Students should apply by winter quarter of the junior year. For application forms and more information, contact the departmental counselor in A316 Murphy Hall.

Requirements
To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 198A and 198B) and an overall GPA of 3.0.

Disability Studies

Lower-Division Courses

1. Construction of (Dis)ability and Ableism in U.S. (5) Lecture, two hours; discussion, two hours. Examination of ways in which certain bodies and minds have been categorized, disabled, concealed of, opressed, and liberated in U.S. over time. Using intersectional lens, exploration of origins of American eugenics movement, social construction of normalcy and (dis)ability, and ableism in its many forms (e.g., individual, legal, medical, cultural, financial). Students learn how to apply critical disability studies framework to evaluate relationships between race, ethnicity, language, gender, sexual orientation, income, and disability in relation to disablement and ableism. Covers key topics and theoretical frameworks in disability studies to give students foundational and conceptual knowledge to analyze social, political, and cultural issues from critical disability studies perspectives. P/NP or letter grading.

10. Intersections of Art History and Disability Studies: Disability in Modern Art. (5) Lecture, four hours. Breadth of viewing course featuring manifesta-
testations through modern art in the 19th and 20th centuries. Introduction of historical development and fundamental intellectual and ethical issues associated with representations of disability in arts and humanities. Investigation of complex relations between artistic and humanistic expression and this major facet of society and culture. Introduction of new methodology and language to build understanding of the complex relationship between art and disability. May be repeated for credit with topic or instructor change. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of the concept of disability and how it changes. Letter grading.

89HC. Honors Contracts. (1 to 2) Tutorial, three hours. Limited to students in College Honors Program. May be repeated for credit with topic or instructor change. P/NP or letter grading.

101W. Perspectives on Disability Studies. (5) Lecture, one hour; discussion, two hours. Open for credit to students with credit for course 101W. Creation of critical framework for understanding concept of disability from sampling of disciplinary perspectives. Organized around product and central tension in disability studies—between disability as lived subjective experience that is both individual and communal, and disability as objective, medical, and sometimes stigmatized category. Students encouraged to make connections between units and to create their own perspectives on disability in field that defines itself by how it changes. Letter grading.

102. Disability and Violence. (4) Seminar, three hours. Relationship between disability and violence from three angles: (1) review of disproportionate incidence of violence committed by able-bodied white men, whether specifically as form of hate crime or based on dependency and/or vulnerability that accompany some types of disability, (2) study of role of disability and particularly mental illness in representations of crime and violence, and (3) disempowerment of emer-
gent disability (injuries, illnesses, and impairments cre-
ted by social inequality) as consequence of inter-
sectional forms of racial, gender, sexual, class, disability, or as result of state or interpersonal violence. Consideration of possible coalition-based strategies for challenging systemic subordination and prospects for improving disability-consciousness across international efforts and campaigns. P/NP or letter grading.

M103. Studies in Disability Literatures. (5) (Same as English M103.) Lecture, four hours; discussion; one hour (when scheduled). Enforced prerequisite: English Composition 3 or 3H. Survey of modes of disability in literature, with specific emphasis on thematic concerns. Topics may include introduction to disability studies; race, gender, and disability; disability narratives; etc. May be repeated for credit with topic or instructor change. P/NP or letter grading.

111. Disability and Popular Culture. (4) Lecture, four hours. Drawing from disability studies, media studies, and the theory of representation, examination of in-
creasing visibility of people with disabilities in popular culture. How disability is represented and who gets to represent it. Analysis and critique of representations of people with disabilities in late 20th and early 21st cen-
tury cinema and television to understand functioning of representation in popular culture. Development of critical media literacy skills. P/NP or letter grading.

M112. Disability and Musical-Dramatic Arts: Representation, Embodiment, Themes, and Practices. (5) (Same as Musicology M113.) Lecture, four hours; discussion, one hour. Exploration of ways disability and impairment factor into musical and musical-dramatic creation and performance, considered historically and in relation to social inequity, disability, ableism, music technologies and instrument design; representation of disability in music; and more. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M113. Variable Topics on Music and Disability. (4) (Same as Musicology M113.) Seminar, four hours. Analysis and critique of depiction of disability and music. Topics may include introduction to disability studies; exploring work and creative strategies of dis-
abled musicians; music technologies and instrument design; representation of disability in music; and more. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M114. Variable Topics in Performance and Disability Studies. (4) (Same as American Sign Language M114.) Lecture, seminar, four hours. Analysis and critique of depiction of disability in theater. Topics may include introduction to disability studies; race, gender, and disability; representation of disability in theater; and more. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M115. Enforcing Normalcy: Deaf and Disability Studies. (4) (Same as American Sign Language M115.) Lecture, three hours. Exploration of historical, medical, social, political, philosophical, and cultural in-
fluences that have constructed categories of nor-
malcy, disability, and deafness. Building on writing of Michel Foucault and critical work in field of disability studies, inquiry into institutions that have enforced standards of normalcy throughout 19th and 20th cen-
turies to present. Primary attention to rise of medical
authority in West, history of eugenics, and contemporary bioethics issues confronting disability and deaf communities. P/NP or letter grading.

120. Special Topics on Race and Disability. (4) Lecture, four hours. Exploration of race and disability, with emphasis on lived realities of people of color with disabilities. Use of scholarly texts from disability studies, sociology, gender studies, or critical race studies to investigate race and disability in representations and systems that shape race, ableism, and dominant/non-dominant power dynamics. P/NP or letter grading.

M121. Topics in Gender and Disabilities. (4) Same as Gender Studies M121.) Lecture, three and one half hours. Limited to juniors and seniors. Ways in which disability is a gendered experience of language delay, disorder, difference, and difficulty from disability studies perspective. Presenta-
tion of key concepts and terminology of disability, culture, and language use. Discussions and assignments critically evaluate findings on language acquisition by asking questions about disability studies scholarship about inclusion, identity, and socially constructed experience, and power. P/NP or letter grading.

139X. Normative Ethics. (4) Same as Gender Studies M161.) Lecture, four hours. Since cre-
ation of International Olympic Committee in 1894, ath-
letes with disabilities have had, and been denied, full access and representation in the games. This course explores intersection of justice and disability, addressing variety of perspectives and theories related to disability and masculinity. Students analyze and practice research, writing, and skills integration, competition versus charity, and masculinity. Sources include readings, film, television, and biographical writings that address sports, body and disability narratively, and Special Olympics specifically. P/NP or letter grading.

163A-163B. Autism Media Laboratory. (5-) Lecture, two hours; discussion, one hour. Course 163A is re-
quired to course 163B. People with autism who are nonspeaking face challenges in and out of their communities. Exploration of documentary filmmaking as catalyst to educate greater community on impor-
tance of inclusion of people with disabilities. Students will work on producing documentaries that are directed by advocates who are nonspeaking or minimally speaking, to create documentary short films. Students explore issues related to autism and disability while gaining exposure to observational, interview-based, and participatory documentary shooting and editing techniques. Letter grading.

M164A. Documentary Production for Social Change. (Formerly numbered 138SL.) Lecture, three hours; fieldwork, two hours. Exploration of documentary filmmaking as cat-
ylist for social change, using daily commute in Los Angeles as case study. Introduction to ideas of race, ethnicity, gender, disability, and class on experiences of commuting, access to public transportation, and car-based versus alternative (bike and pedestrian) forms of commuting. Exposure to observational, inter-
view-based, and participatory documentary shooting and editing techniques, as well as social marketing strategies that are vital to documentary production and distribution. Letter grading.

M164B. Documenting Disability on Film. (4) Lecture, four hours. Nonfiction digital media is used as con-
temporary form of investigation or research or is at-
tached to research projects, built into websites, used in community programs for social advocacy and ex-
hibited at film festivals. Social-issue documentaries appear more frequently on cable, public television, and Internet. Examination of how powerful documentaries and nonfiction digital media are used as catalyst to educate greater community on impor-
tance of inclusion of people with disabilities. Students will work on producing documentaries that are directed by advocates who are nonspeaking or minimally speaking, to create documentary short films. Students explore issues related to autism and disability while gaining exposure to observational, interview-based, and participatory documentary shooting and editing techniques. Letter grading.

M166. Health-Care Ethics. (4) (Same as Society and Genetics M166.) Lecture, three hours; discussion, one hour. Consideration of critical ethical concepts as they apply to health-care practice, medical decision-
making, and medical technology development and use. Consideration of concepts drawn from philos-
ophy, literature and culture, and political history in-
corporate ideas of human dignity, rights, charity, mercy, and justice. Examination of how concept of human dignity should structure health-care decisions such as physician-aided dying or selective abortion; proper relationship between history and concept of human rights and distribution of medical resources; how political and ethical category equality should structure development and use of gene editing techniques; and how concept of patient au-
tonomy relates to political concept of liberty or freedom; how to evaluate good life, or what philoso-
phers call flourishing, in medical treatment decisions for individuals or development of therapies. P/NP or letter grading.

M171. Philanthropy: Confronting Challenges of Serving Disabled. (5) (Same as Honors Collegium M171.) Lecture, three hours. Enforced requisites: Coreuse 101 or 101W. Study of history, philosophy, and

M172. Care Work: Disability Justice and Health Care. (2) (Same as Nursing M172.) Lecture, one hour; discussion, one hour. Exploration of nature, history, models, and propositions of care, care work, disability, disability justice movement, and health care. Consideration of intersections, interdependence, and complexities of formal and informal care webs and care economies between caregivers and receivers, which includes kin, advocates, disability communities, and health professionals. Use of multi-media, scholarly texts, and theoretical frameworks from disability justice, disability studies, film, gender studies, health, labor studies, law, nursing, and public policy to investigate the concepts of care and care work. Letter grading.

M172XP. Care Work: Disability Justice and Health Care. (3) (Same as Nursing M172XP) Seminar, one hour. Corequisite course M172. Exploration of nature, history, models, and propositions of care, care work, disability, disability justice movement, and health care. Consideration of intersections, interdependence, and complexities of formal and informal care webs and care economies between caregivers and receivers, which includes kin, advocates, disability communities, and health professionals. Use of multi-media, scholarly texts, and theoretical frameworks from disability justice, disability studies, film, gender studies, health, labor studies, law, nursing, and public policy to investigate the concepts of care and care work. Emphasis on community engagement with observational and collaborative interaction and learning in governmental, non-profit, community-based organizations, or health-care networks of disability care. Letter grading.

M183. Identity and Mental Illness. (5) (Same as Honors Collegium M183 and Society and Genetics M183.) Seminar, three hours. Exploration of relationship between identity and mental illness through different approaches to nature and treatment of mental disorder, from biomedical accounts of brain-based pathology (and identity) to Mad Pride movement emphasis on mental diversity. Enduring philosophical questions regarding personal identity, consciousness, selfhood and mind-body relationship are investigated through consideration of conditions such as dissociative identity disorder, trauma, psychosis, autism, or depression. P/NP or letter grading.

187. Special Topics in Disability Studies. (4) Lecture, one hour; discussion, two hours (when scheduled). Variable topics in one area within disability studies. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

191. Variable Topics Senior Research Seminars: Disability Studies. (5) Seminar, three hours. Enforced requisite: course 101 or 101W. Designed for advanced junior/senior Disability Studies minors. In-depth study of major themes in disability studies research. Themes vary by instructor and term. Students pursue independent research related to course theme, with guidance from instructor, then share and critique other student works in progress. May be repeated for credit with topic change. Letter grading.

M191F. Topics in Gender and Disability. (5) (Same as Gender Studies M191F.) Seminar, three hours. In-depth study of major themes in disability studies and gender studies. Themes vary by instructor and term. Students pursue independent research related to course theme, with guidance from instructor, then share and critique other student works in progress. May be repeated for credit with topic change. Letter grading.

194. Capstone Research Seminar. (2) Seminar, two hours. Enforced requisite: course 195CE. Required of students pursuing Disability Studies minor. Integration of off-campus work with academic theories and concepts within field of disability studies. Students report on their internship experiences and analyze relationship between their internship and issues of policy, ethics, systemic responses to community needs, or personal and intellectual transformations. Students identify one faculty mentor and develop proposal for required capstone research project. Letter grading.

195CE. Community and Corporate Internships in Disability Studies. (4) Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Engagement. Students complete weekly written assignments, attend biweekly meetings with graduate student instructor, and write final research paper. Faculty mentor and graduate student instructor construct series of reading assignments that examine issues related to internship site. May be repeated for credit with consent of Center for Community Engagement. No more than 8 units may be applied toward major; units applied must be taken for letter grade. May not be applied toward concentration distribution requirements. Individual contract with supervising faculty member required. Letter grading.

198A-198B. Honors Research in Disability Studies. (2–4) Tutorial, one hour. Enforced requisite: course 101 or 101W. Course 198A is enforced requisite to 198B. Limited to juniors/seniors. Required capstone course to Disability Studies minor for students pursuing College Honors. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty mentor. May be repeated for credit. Individual contract required. In Progress (198A) and letter (198B) grading.

198C. Honors Research in Disability Studies. (2 to 8) Tutorial, one hour. Limited to juniors/seniors. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

199A-199B. Directed Research in Disability Studies. (2–4) Tutorial, one hour. Enforced requisite: course 101 or 101W. Course 199A is enforced requisite to 199B. Limited to juniors/seniors. Required capstone course to Disability Studies minor. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. In Progress (199A) and letter (199B) grading.

199C. Senior Project in Disability Studies. (2 to 8) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. Letter grading.

Graduate Course

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate,
Overview
The disciplines of geology, geochemistry, geophysics, paleobiology, and space physics are concerned with the structure and evolution of the solar system, Earth, and life: essentially, the physical environment and its interaction with biota. These studies entail the application of fundamental physics and chemistry to a broad subject area stretching from astronomy at one extreme to biology at the other. Areas that are emphasized in the Department of Earth, Planetary, and Space Sciences include isotope and trace element analyses, petrology and mineralogy, sedimentology, paleobiology, and organic geochemistry, structural geology and tectonophysics, seismology, the Earth’s interior, planetary physics, and space plasmas.

Career Prospects
The variety of techniques applied lead to several concentrations within the three main disciplines. Students completing their studies with a BS or MS degree usually are employed by industry. Many are employed in environment-related activities; others are involved in mineral or oil exploration or in construction. Students attaining the PhD degree are usually employed by universities or government and industrial research groups.

The Bachelor of Arts program in Earth and Environmental Science is intended to provide a broad background in Earth sciences that is especially appropriate for students intending to become K through 12 teachers in Earth, physical, or life sciences. It may also be of interest to students who plan careers in business, dentistry, environmental sciences, government, journalism, law, medicine, or public health. Those who intend to become professional geologists, geochemists, or geophysicists and/or to continue into graduate studies in Earth or space sciences are urged to pursue one of the BS degrees.

Undergraduate Majors
Earth and Environmental Science BA
Capstone Major
The Earth and Environmental Science major is a designated capstone major. Students are required to use skill and knowledge sets from previous coursework to complete a field-based research project from conception to written report. Projects must be placed into context within the current state of understanding, and results are presented at a research symposium or published as a brief report.

Learning Outcomes
The Earth and Environmental Science major has the following learning outcomes:

- Use of skills and knowledge set from coursework
- Definition of research methodology and data
- Placement of project into context of current state of understanding
- Completion of research project from conception to written report
- Oral presentation at a research symposium, or brief published report, of field experience results

Entry to the Major
Transfer Students
Transfer applicants to the Earth and Environmental Science major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course with laboratory, one general chemistry course with laboratory for majors, and one calculus course. One introductory biology course (evolution) with laboratory, a second general chemistry course, and one calculus-based physics course with laboratory are recommended.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements
Preparation for the Major
Required: Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17 or Clusters 70A); one course from Earth, Planetary, and Space Sciences 51, 61, or M71; Chemistry and Biochemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L; Life Sciences 7B or another introductory organismic biology course; Mathematics 3A and 3B, or 31A and 31B; Physics 1A or 5A.

The Major
Required: Two courses from Earth, Planetary, and Space Sciences 103A, 103B, 111, 112; one capstone 199 research course in the senior year; four additional upper-division courses from Earth, Planetary, and Space Sciences other than M187, and 189 through 199; two courses from Geography 101, M102, M103, 116, 120, M126, M131, 136.

Policies
Preparation for the Major
Each course must be passed with a minimum grade of C-.

Engineering Geology BS
Capstone Major
The Engineering Geology major is a designated capstone major. Students are required to use skill and knowledge sets from previous coursework to complete a field-based research project from conception to written report. Projects must be placed into context within the current state of understanding, and results are presented at a research symposium or published as a brief report.

Learning Outcomes
The Engineering Geology major has the following learning outcomes:

- Use of skills and knowledge set from coursework
- Definition of research methodology and data
- Placement of project into context of current state of understanding
- Completion of research project from conception to written report
- Oral presentation at a research symposium, or brief published report, of field experience results

Entry to the Major
Transfer Students
Transfer applicants to the Engineering Geology major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course with laboratory, one general chemistry course with laboratory for majors, and one year of calculus. A second general chemistry course and one course of calculus-based physics with laboratory are recommended.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements
Preparation for the Major
Required: Three courses from Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17 or Clusters 70A), 51, 61, M71; Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering 20; Mathematics 31A, 31B, 32A, 33A; Physics 1A, 1B, 1C, 4A, 4BL. Recommended: Mathematics 2B.

The Major
Required: Earth, Planetary, and Space Sciences 103A, 103B, 111, 112, 136A, 139; four courses selected from Civil and Environmental Engineering 108, 120, 121, 125, 129L, 150, 151, C15B; two capstone field research courses (Earth, Planetary, and Space Sciences 121, 121F).

Policies
Preparation for the Major
Each course must be passed with a minimum grade of C-.
Geology BS

Capstone Major

The Geology major is a designated capstone major. Students are required to use skill and knowledge sets from previous coursework to complete a field-based research project from conception to written report. Projects must be placed into context within the current state of understanding, and results are presented at a research symposium or published as a brief report.

Learning Outcomes

The Geology major has the following learning outcomes:
- Use of skills and knowledge set from coursework
- Definition of research methodology and data
- Placement of project into context of current state of understanding
- Completion of research project from conception to written report
- Oral presentation at a research symposium, or brief published report, of field experience results

Entry to the Major

Transfer Students

Transfer applicants to the Geology major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course with laboratory, one calculus course, and one general chemistry course with laboratory for majors. A second calculus course and a second general chemistry course are recommended.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Earth, Planetary, and Space Sciences 103A, 103B, 111, 112; two capstone field research courses (121, 121F); five additional 100-level Earth, planetary, and space sciences courses (except Earth, Planetary, and Space Sciences M187, and 189 through 199).

Students may opt to take courses from the following groups.

Computational Geosciences: Earth, Planetary, and Space Sciences 136A, 150, M171

Geobiology: Earth, Planetary, and Space Sciences CM114A, CM114B, 116, M118

Geochemistry: Earth, Planetary, and Space Sciences 103C, C106, C107, C109, C113, 152, 153

Planetary science: Earth, Planetary, and Space Sciences 136A, C143, 155, C179

Surface processes: Earth, Planetary, and Space Sciences 136A, C143, 150, C162, 165

Tectonics/Structural Geology: Earth, Planetary, and Space Sciences 119, 133, 136A, 165

Honors Program

The honors program in geology is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a faculty member.

Students must complete a minimum of two terms (8 units) of Earth, Planetary, and Space Sciences 198 leading to the preparation of a satisfactory honors thesis.

Policies

Preparation for the Major

Each course must be passed with a minimum grade of C–.

Honors Program

Requirements for admission to candidacy are the same as those required for admission to the Honors Programs of the College of Letters and Science. Qualified students wishing to enter the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geology are awarded at graduation to those students who have a cumulative grade-point average of 3.5, have completed at least 90 graded units at the University of California, and have completed a minimum of two terms (8 units) of Earth, Planetary, and Space Sciences 198 leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

Geophysics BS

Capstone Major

The Geophysics major is a designated capstone major. Students are required to use skill and knowledge sets from previous coursework to complete a field-based research project from conception to written report. Projects must be placed into context within the current state of understanding, and results are presented at a research symposium or published as a brief report.

Learning Outcomes

The Geophysics major has the following learning outcomes:
- Use of skills and knowledge set from coursework
- Definition of research methodology and data
- Placement of project into context of current state of understanding
- Completion of research project from conception to written report
- Oral presentation at a research symposium, or brief published report, of field experience results

Entry to the Major

Transfer Students

Transfer applicants to the Geophysics major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course with laboratory, one general physics course with laboratory for majors, and one year of calculus. A third calculus course and a second calculus-based physics with laboratory course are recommended.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Earth, Planetary, and Space Sciences 51, 61, M71, and one course from 1 (preferred) through 15; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

The Major

Required Core: Earth, Planetary, and Space Sciences 136A, 171, one capstone field research course (136C), one course from 152, 153, 154, 155; Physics 105A, 105B, 110A, 110B, 131.

At least three courses from one of the following areas are also required: (1) applied geophysics—Earth, Planetary, and Space Sciences 111, 112, 122, 136B, M140, 150, 152, (2) marine geophysics—courses 119, 122, 136B, M140, 150, 153, (3) planetary geophysics—courses M140, 150, 153, 154, 155, (4) solid earth geophysics—courses 119, 122, 136B, M140, 150, 152, or (5) space physics—Atmospheric and Oceanic Sciences C170, Earth, Planetary, and Space Sciences 136B, M140, 154, 155, Physics M122. Any course used to satisfy an area requirement cannot also be applied toward the core requirements listed above.

Honors Program

The honors program in geophysics is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a faculty member.

Students must complete a minimum of two terms (8 units) of Earth, Planetary, and Space Sciences 198 leading to the preparation of a satisfactory honors thesis.

Policies

Preparation for the Major

Each course must be passed with a minimum grade of C–.

The Major

Substitutions of equivalent courses from engineering or other physical sciences departments must be approved by the undergraduate adviser.

Honors Program

Requirements for admission to candidacy are the same as those required for admission to the Honors Programs of the College of Letters and Science. Qualified students wishing to enter
the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geophysics are awarded at graduation to those students who have a cumulative grade-point average of 3.5, have completed at least 90 graded units at the University of California, and have completed a minimum of two terms (8 units) of Earth, Planetary, and Space Sciences 198 leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

**Undergraduate Minors**

**Earth and Environmental Science Minor**

In the Earth and Environmental Science minor students study the interaction of the solid Earth, oceans, and atmosphere with human activities. The minor provides background in Earth sciences that is especially appropriate for students intending to become K through 12 teachers in Earth, physical, or life sciences. It may also be of interest to students who plan careers in business, dentistry, environmental sciences, government, journalism, law, medicine, or public health.

**Admission**

To enter the minor, students must have an overall grade-point average of 2.0 or better.

**The Minor**

**Required Lower-Division Courses (9 units):**

- Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17 or Clusters 70A), and one course from Earth, Planetary, and Space Sciences 51, 61, or M71; or two courses from Earth, Planetary, and Space Sciences 51, 61, or M71.

**Required Upper-Division Courses (20 units minimum):**

- Five 100-level Earth, planetary, and space sciences courses (except Earth, Planetary, and Space Sciences M187, and 189 through 199).

**Policies**

A minimum of 20 upper-division units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Geology Minor**

Geology is the study of the surface of the Earth and the rocks and processes that created it. Field methods, interpretation of rocks, and modern plate-tectonic models are emphasized, with the goals of finding valuable or hazardous materials and inferring geologic history. These skills are valuable in engineering, urban planning, and environmental and resource studies.

**Admission**

To enter the Geology minor, students must have an overall grade-point average of 2.0 or better.

**The Minor**

**Required Lower-Division Courses (8 or 9 units):**

- Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17 or Clusters 70A), and one course from Earth, Planetary, and Space Sciences 51, 61, or M71; or two courses from Earth, Planetary, and Space Sciences 51, 61, or M71.

**Required Upper-Division Courses (22 units):**

- Two courses from Earth, Planetary, and Space Sciences 103A, 103B, 111, 112, and three additional 100-level Earth, planetary, and space sciences courses (except Earth, Planetary, and Space Sciences M187, and 189 through 199).

**Policies**

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Geophysics and Planetary Physics Minor**

Classical physics, supported by field data, mathematics, and computing, is used to understand diverse processes from ocean circulation and earthquakes to the formation of planets and the flow of particles and electromagnetic fields in space. These skills are valuable in environmental, engineering, and resource studies and more broadly in any kind of career that requires quantitative analysis.

**Admission**

To enter the Geophysics and Planetary Physics minor, students must have an overall grade-point average of 2.0 or better.

**The Minor**

**Required Lower-Division Courses (8 or 9 units):**

- Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17, 51, 61, or Clusters 70A, M71).

**Required Upper-Division Courses (20 units):**

- Earth, Planetary, and Space Sciences 136A, M171, and three courses from M140, 152, 153, 154, 155.

**Policies**

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Majors**

**Geochemistry MS, CPhil, PhD**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Geology MS, CPhil, PhD**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.
Geophysics and Space Physics MS, PhD

**Earth, Planetary, and Space Sciences**

**Lower-Division Courses**

1. Introduction to Earth Science. (6) Lecture, three hours; laboratory, two hours; field days. Not open to students with credit for or currently enrolled in course 100, English 13A, or equivalent. Study of Earth materials; nature and interpretation of geologic evidence; study of geologic processes; historical aspects of geology. Mandatory field trips introduce students to solving of geologic problems in field. P/NP or letter grading.

2. Geologic Hazards. (4) Lecture, two hours; laboratory, one hour; one field day. Study of volcanic processes, earthquakes, and floods; discussion of landforms and processes involved; discussion of natural and human-induced hazards. P/NP or letter grading.

3. Environmental Geology of Los Angeles. (4) Lecture, three hours; discussion, two hours; field trips. Geologic hazards and natural resources of greater Los Angeles region. Topics include Los Angeles geologic hazards such as earthquakes, landslides, and floods; Southern California oil fields; gold and gem mining in region; local beach processes; and Los Angeles water resource problems. Field trips to San Andreas fault, California aqueduct, active landslides, and historic gold mines. P/NP or letter grading.

4. Metamorphic Petrology. (5) Lecture, two hours; laboratory, three hours; five field days. Interpretation of metamorphic rocks, mineralogical composition, and stabilizing geologic and thermodynamic conditions. Enforced requisite: course 103A. P/NP or letter grading.

5. Physical Geology. (3) Lecture, three hours. Introduction to geology, basic geologic principles and terminology, rock and mineral identification, and formation and distribution of igneous, sedimentary, and metamorphic rocks. P/NP or letter grading.

6. Earthquakes. (5) Lecture, three hours; laboratory; one hour; one field day. Causes and effects of earthquakes. Plate motion, frictional faulting, earthquake instability, wave propagation, earthquake damage, and other social effects. Hazard reduction through earthquake forecasting and earthquake-resistant design. P/NP or letter grading.

11. Natural Disasters. (5) Lecture, three hours; discussion, one hour; one field day. Global urbanization together with historical demographic population shift to coastal areas, especially around Pacific Ocean’s Ring of Fire, and increasing large population of this planet’s human population at risk due to earthquakes, volcanoes, and tsunamis. Global climate change combines with variety of geologic processes to create enhanced risks of major natural disasters. P/NP or letter grading.

15. Blue Planet: Introduction to Oceanography. (5) Lecture, three hours; laboratory, two hours; not open to students with credit for or currently enrolled in course 106, Environmental Science; study of Earth’s oceans, weather, and climate. Enforced requisite: course 51. P/NP or letter grading.

17. Dinosaurs and Their Relatives. (5) Lecture, three hours; laboratory, two hours; one optional field trip. Designed for nonmajors. Study of dinosaurs and their history. History of life on Earth as revealed through fossil record. P/NP or letter grading.

20. Natural History of Southern California. (5) Lecture, two hours; laboratory, three hours; five field weekends. Identification, distribution, diversity of native plants and communities; identification and interpretation of rocks, minerals, and geologic features; and historic geologic and biologic processes and history of Earth’s global ocean system. P/NP or letter grading.

51. Geologic Maps. (4) Lecture, two hours; laboratory, three hours; five field days. Enforced requisite: course 1. Topographic and geologic mapping in field. Interpretation of mapped geologic units in laboratory. P/NP or letter grading.

52. Physical Geology. (3) Lecture, three hours. Study of rock formations and geologic structures through field trips, discussion, and homework assignments. P/NP or letter grading.

54. Geology of Exotic Rocks. (4) Lecture, two hours; laboratory, three hours; ten field trips. Introduction to exotic rocks. Origin, identification, and classification. P/NP or letter grading.

55. Isotopes in Geology. (4) Lecture, three hours; laboratory, two hours; field trips. Study of isotopes as tools for geologic time and space. Origin of elements and their isotopes; distribution and abundance of elements and their isotopes; distribution and use of elements and their isotopes. P/NP or letter grading.

Stable isotopes as indicators of environment and paleoclimate. Concurrently scheduled with course C209. P/NP or letter grading.

111. Stratigraphic and Field Geology. (6) Lecture, three hours; laboratory, three hours; fieldwork, eight hours per week. Enforced requisites: courses 61, 112. Principles of stratigraphy; geologic mapping of selected area; preparation of geologic report. Letter grading.

111G. Field Geology. (2 to 4) Lecture, two hours; laboratory, three hours; fieldwork, one day per week. Designed for graduate students. Geologic mapping, principles of stratigraphy, structural geology, and map interpretation, with laboratory work.

112. Structural Geology. (5) Lecture, three hours; laboratory, six hours. Requisites: courses 1, 61. Recommended: course 51. Planar and linear structures at different scales in sedimentary, metamorphic, and igneous rocks. Theories of plates, plate tectonics, classification, and kinematic and dynamic analysis. Deformation, strength, fracture, and rheological properties of rocks. P/NP or letter grading.

C113. Biological and Environmental Geochemistry. (4) Lecture, three hours. Requisites: Chemistry 14A and 14B (or 20A and 20B), Mathematics 3A, 3B, and 3C (or 31A and 31B). Recommended: at least one lower-division course in Earth, planetary, and space sciences course. Intended for junior/senior life and physical sciences students. Study of chemistry of Earth's surface environment and interplay between biology, human activity, and geology. Introduction to origin and composition of Earth, including atmosphere, crust, and hydrosphere. Examination of how these reservoirs are affected by biological cycles and feedbacks to biological evolution; local and long-term movements of biologically important elements like carbon, nitrogen, and phosphorus. Concurrently scheduled with course C213. P/NP or letter grading.

CM114A. Aquatic Geomicrobiology: Metabolisms. (4) (Formerly course C114A.) (Same as Atmospheric and Oceanic Sciences CM114A.) Lecture, three hours. Recommended requisite: course C107 or Atmospheric and Oceanic Sciences M105. Study of fundamental geomicrobiological metabolic processes and biogeochemical reactions occurring in aquatic systems and how these processes interact with environment. Metabolisms include photoautotrophic (anoxic and oxygenic photosynthesis), chemoheterotrophic (fermentation and respiration of organic matter), phototrophic (organic matter degradation with light), and chemotrophic (iron, nitrogen, manganese, methane, methanogenesis, fermentation) processes. Study of microbial communities in diverse environments, including critical geosciences literacy at local, state, and national levels.

120. Ruby Colloquium: Major Advances in Earth, Planetary, and Space Sciences. (4) Lecture, two hours; discussion, two hours. Enforced requisites: Mathematics 1A, 1B, 2A, or equivalent. Lecture that can be extracted from each. Interpretation of deposition model from complex sedimentary structures and textures, and how these processes drive element cycling on Earth. Concurrently scheduled with course C226. P/NP or letter grading.

123. Geosciences Outreach. (4) Lecture, two hours; discussion, two hours; field days. Recommended requisites: at least three college-level life sciences or physical sciences courses. Introduction to pedagogical approaches and methods used in geosciences community to educate demographically diverse populations, including K-12 through higher-education audiences and general public. Focus on development of motivational and public communication skill sets as practiced at outreach events and demonstrations, including communication of science in multifaculty settings. Active participation required in minimum of three scheduled outreach events over course of term, providing perspective and basis for follow-up discussions on critical geosciences literacy at local, state, and national levels.

125. Volcanoes. (4) Lecture, three hours; laboratory, three hours; field trip(s). Requisite: course 1. Recommended requisite: course 103A, Physics 1A or 1AH or 6A. Types of volcanism. Physics of magma chambers, volcanic plumbing, explosive and effusive eruptions as illustrated by historical examples. Practical methods of volcano monitoring, with field trip. P/NP or letter grading.

C126. Advanced Petrology. (4) Lecture, three hours; laboratory, three hours; field trips. Enforced requisite: course 103A. Understanding genesis of igneous rocks based on geochemical, tectonochemical, and other geologic evidence and principles. Concurrently scheduled with course C226. P/NP or letter grading.

133. Historical and Regional Geology. (4) Lecture, three hours; discussion, two hours; field trips. Requisite: course 61. Recommended requisite: course 112. Principles of historical geology. Physical evolution of Earth, especially North America. One area of Earth to be investigated in detail, with emphasis on its geologic evolution through time. Letter grading.

136A. Applied Geophysics. (4) Lecture, three hours; laboratory, three hours; course M71; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 4AL, and 4BL, or 5A and 5B. Methods and techniques of geophysical exploration. Energy waves, seismic ray theory, reflection and refraction, seismic interpretation, basic earthquake source theory, and introduction to magnetic fields and electrical resistivity. P/NP or letter grading.

136B. Applied Geophysics. (4) Lecture, three hours; laboratory/field trips, six hours. Preparation: knowledge of MATLAB. Enforced requisite: course 136A. Principles and techniques of exploration for mineral deposits and underground water, and geophysical methods for predicting, searching for, and mapping deposits. Methods include self potential, resistivity, induced polarization, electromagnetics, magnetotellurics, magnetics, P/NP or letter grading.

139. Engineering and Environmental Geology. (4) Lecture, three hours; discussion, one hour. Requisites: course 1 or 100. Recommended: course 111. Principles and practice of soil mechanics. Engineering in light of geologic conditions, recognition, prediction, and control of subsidence, landslides, and other geologic as- sociated with underground disposal of liquids and solid wastes. P/NP or letter grading.

C143. Advanced Physical Sedimentology. (4) Lecture, three hours; fieldwork, three hours. Requisites: 103B, 111, or equivalent. Advanced topics related to sediments, sedimentary rocks, and information that can be extracted from each. Interpretation of depositional environment from complex sedimentary structures and textures, with lecture component and builds on previous sedimentology basics. Concurrently scheduled with course C243. P/NP or letter grading.

152. Physics of Earth. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 33A, Physics 1C (or 1CH). The Earth system. Atmosphere, ocean, hydrosphere, biosphere, atmosphere; origin and evolution of planetary atmospheres; geophysical, chemical, and biological processes of Earth's interior; atmospheric circulation and the greenhouse effect; atmospheric and oceanic circulation systems. P/NP or letter grading.

154. Solar Terrestrial Physics. (4) Lecture, three hours; discussion, one hour. Enforced requisite or corequi- site: Physics 10A. Particle and electromagnetic emis-
sions from sun under quiet and under disturbed condi-
tions. Solar wind. Magnospheres and ionospheres of
Earth and other planets. Geomagnetic phenomena and au-
tomation. P/NP or letter grading.

155. Planetary Physics. (4) Lecture, three hours; dis-
cussion, one hour. Requisites: Mathematics 31A, 31B,
32A, Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH).
Formation of solar nebula; origin of planets and their
satellites; and meteorites. Celestial mechanics and
mechanics; physics of planetary inte-
riors, surfaces, and atmospheres. P/NP or letter grading.

M156. Introduction to Plasma Science and Engi-
eering. (4) Lecture, two hours; labora-
tory, two hours. Enforced requisites: Mathematics
31B, Physics 1B. Recommended: course 71, Com-
puter Science 31, Physics 110B, Program in Com-
puting 104. Star formation; search for extraterrestrial intelligence
(SETI) is based on number of astronomical, mathe-
matical, statistical, and computational principles. Cov-
erage of fundamental concepts in these disciplines in
context of SETI. Communication: extraterrestrial; extra-
solar planetary systems; radio astronomy, including
wave propagation and dispersion; signal processing,
including sampling theory and Fourier transforms;
random processes, including Gaussian and Poisson
statistics, and algorithm development. Design of ob-
servational program, acquisition of telescopic data,
development of algorithms to analyze data, and
writing of report on results. Concurrently scheduled
with course C279. P/NP or letter grading.

M18. Careers in Earth System, Environment,
and Space Sciences. (1) Same as Atmospheric and Oce-
nic Sciences M187 and Environment M187.) Sem-
ar, one hour. Examination of the role of science in
understanding and addressing grand challenges in cli-
mate, earth and environment, and space exploration
through seminars given by scientists, engineers, man-
agers, and policy makers. Meets in person and
online. Crounse, McFadden, and student members of
the National Academy of Science, Space Science and
Technology, and industry. Includes tour of National Aeronautics
and Space Administration (NASA) Jet Propulsion Lab-
aratory (JPL). Students engage speakers on science, career
advice, opportunities for undergraduate internships, and building fulfilling careers. P/NP
grading.

184. Special Topics in Earth, Planetary, and Space
Sciences. (4) Lecture, three hours; labora-
tory, to be arranged. Departmentally sponsored experimental or temporary coursework, such as those taught by visiting faculty mem-
bers, P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three
hours. Limited to 20 students. Designed as adjunct
undergraduate lecture course. Exploration of topics in
greater depth through supplemental readings, papers,
or other activities and led by lecture course instructor. May be applied toward honors credit for eligible stu-
dents. Honors content noted on transcript. P/NP or
letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours.
Limited to students in College Honors Program. De-
gined to align undergraduate research across course.
In

1M17. Advanced Computing in Geosciences. (4)
(Formerly numbered 171.) (Same as Atmospheric and Oce-
nic Sciences M171.) Lecture, four hours. En-
forced requisites: course M71, Mathematics 3A, 3B, and
3C (or 31A and 31B). Use of high level computer
language to program microcontrollers to acquire labo-
atory-style experimental data. Missfit modeling and
quantitative comparisons of acquired data sets and theory.
Foci on modeling from fundamental equations.
Examples, experiments, and exercises from dis-
ciplines within geosciences. P/NP or letter grading.

CM173. Earth Process and Evolutionary History. (6)
(Same as Ecology and Evolutionary Biology CM173.)
Lecture, four hours; laboratory, three hours. Requi-
sites: Chemistry 14A, 14B (or 20A, 20B), Life Sciences
1, 2, 3, and 4, or 7A, 7B, and 7C (or 7A and introduc-
tory course in Life Sciences). Exploration of relation-
ship between physical processes, such as tectonics and cli-
mate, and how they affect surface and impact biology of
Earth. Study of evolution of universe, Earth, and life,
with integration of history of science, including Dar-
vian evolution and plate tectonics revolutions. Study
of formation of matter offers tools to understand geo-
logic process of climate and ecology of Earth. Past cli-
mate changes affected future human-be-

Earth, Planetary, and Space Sciences / 377

199. Directed Research or Senior Project in Earth,
Planetary, and Space Sciences. (2 to 8) Tutorial, two
hours. Limited to juniors/seniors. Supervised indi-
vidual research or investigation under guidance of fac-
tory mentor. Culminating paper or project required. May
be repeated for credit. Individual contract re-
quired. P/NP or letter grading.

Graduate Courses

200A. Introduction to Geophysics and Space Phys-
ics I: Solid Earth and Planets. (4) Lecture, three
hours. Requisites: Physics 105A, 110A, 112, Evolu-
tion, chemistry, and heat balance of oceans and at-
omospheres; molecular spectra, radiative transfer, and
planetary observations; dynamics of oceans and at-
omospheres. S/U or letter grading.

200B. Introduction to Geophysics and Space Phys-
ics II: Oceans and Atmospheres. (4) Lecture,
three hours. Requisites: Physics 105A, 110B, 112, 131;
Evo-
lution, chemistry, and heat balance of oceans and at-
omospheres; molecular spectra, radiative transfer, and
planetary observations; dynamics of oceans and at-
omospheres. S/U or letter grading.

200D. Introduction to Geophysics and Space Phys-
ics III: Plasmas—Aeronomy and Interplanetary Mid-
dium. (4) Lecture, three hours. Requisites: Physics
105A, 110B, 112, 131. Solar surface features, heating
and cooling of corona and plasma; magnetic fields,
interaction of solar wind with Earth, magnetospheric phenomena. S/U or letter grading.

200D. Planetary Surfaces. (4) Lecture, three hours.
Introduction to basic physical processes (both exog-
enic and endogenic) shaping solid surfaces in solar
system and description of their optical and thermo-
physical properties, with emphasis on simple physics-
based approach. Discussion of current literature. S/U
or letter grading.

200E. Planetary Origins and Evolution. (4) Lecture,
four hours. Designed for graduate students who are
interested in origins of planetary systems and history of
solar system. Open to advanced undergraduate students with consent of instructor. Provides back-
ground needed to understand and/or participate in re-

193A-193B-193C. Current Research in Earth, Plane-
tary, and Space Sciences. (1–1–1) Seminar, one
hour. Limited to graduates. Study of current topics in
Earth, planetary, and space sciences, including
teaching group meeting, one to

194. Research Topics in Earth, Planetary, and
Space Sciences. (1) Lecture group meeting, one
to three hours. Designed for departmental students par-
ticipating in research group. Discussion of current re-
search in research specialty of faculty
member teaching course. May be repeated for credit. P/NP
grading.

198C. Honors Contracts. (1) Tutorial, three hours.
Limited to students in College Honors Program. De-
sign to align undergraduate research across course.
In

203. Numerical Methods for Geosciences. (6) Lec-
ture, four hours. Preparation: knowledge of program-
ing language. Requisite: Mathematics 33B. Compu-
tational precision and algorithms, linear algebra, non-
linear equations, functional approximation, integration,
ordinary and partial differential equations, spectral
and finite element methods, parallel computing. Sample
programming exercises from Earth and space sci-
cenes. P/NP or letter grading.

205. Inverse Theory and Data Interpretation. (4)
Lecture, three hours. Requisites: Mathematics 115A,
170A, 170B, 171; Inverse modeling—deter-
mine the physical meaning of observed data, including
estimation of random errors and nonuniqueness. Emphasis on linear and quasi-linear problems; nonlinear problems also discussed. Tools used include matrix theory, quadratic forms, orthog-

Earth, Planetary, and Space Sciences / 377

programming exercises from Earth and space sci-
cenes. P/NP or letter grading.

205. Inverse Theory and Data Interpretation. (4)
Lecture, three hours. Requisites: Mathematics 115A,
170A, 170B, 171; Inverse modeling—deter-
mine the physical meaning of observed data, including
estimation of random errors and nonuniqueness. Emphasis on linear and quasi-linear problems; nonlinear problems also discussed. Tools used include matrix theory, quadratic forms, orthog-
al rotations, statistics, principal axis transformation
C206. Physical Geochemistry. (4) Lecture, three hours. Prerequisites: course 107 or Atmospheric and Oceanic Sciences 105B. Study of fundamental geochemical and biochemical reactions occurring in aquatic systems and how these processes interact with environment. Metabolism of microorganisms (biogenic and oxygenic photosynthesis), chemolithotrophic (fermentation and respiration of organic matter), photolithotrophic (organic matter degradation with light), and chemosynthetic (nitrogen, methane, and sulfur oxidation) pathways. Introduction of principals of bioenergetics (adenosine triphosphate production, Gibbs free energy, chemiosmosis, thermodynamic calculations) and biogeochemical fractionation. Concurrently scheduled with course CM114A. S/U or letter grading.

CM214B. Aquatic Geobiogeochemistry: Environments, Evolution, and Systematics. (4) Lecture, three hours. Prerequisite: course CM237B. Lecture, three hours. Recommended requisite: course CM214A. Broad overview of aquatic geobiogeochemical processes in diverse environments (estuaries, wetlands, mudflats, cold seeps, hydrothermal vents, deep biosphere), and how these processes drive element cycling on Earth. Concurrently scheduled with course CM114B. S/U or letter grading.

M217. Molecular Evolution. (4) (Same as Ecology, and Evolutionary Biology M231.) Lecture, two hours; discussion, two hours. Series of advanced topics in molecular evolution, with special emphasis on molecular phylogenetics. Topics may include nature of genome, neutral evolution, molecular clocks, concerted evolution, molecular systematics, statistical tests, and phylogenetic algorithms. Themes may vary from year to year. May be repeated for credit. S/U or letter grading.

219. Planetary and Orbital Dynamics. (4) Lecture, four hours. Planetary rotations, satellite orbits, and tidal dissipation; planetary orbital system; resonance effects and mean orbital coupling; planetary rings. S/U or letter grading.

220. Principles of Paleobiology. (4) Lecture/discussion, three hours. Limited to graduate science students. Emphasis on questions in genetic and physical sciences students with consent of instructor. Current and classic problems in paleobiology, with emphasis on interdisciplinary problems involving aspects of biology, geology, organic geochemistry, and cosmology. Content varies from year to year. May be repeated for credit. S/U or letter grading.

221. Field Geology. (4) Lecture, one hour; discussion, one hour; fieldwork, 10 days. Enforced requisite: course 121F. Planning, execution, and presentation of field studies. Introduction to geologic mapping projects at professional level. Resolution of problems in Southern California geology from synthesis of new and published research. Field area varies from year to year. May be repeated for credit. S/U or letter grading.

222. Introduction to Seismology. (4) Lecture, three hours. Types of seismic waves; travel-time seismology; epicenter location; amplitude variations; seismograph theory; explosion seismology; seismics; focal conditions; surface wave analysis; microseisms and tsunamis. S/U or letter grading.

225. Physics and Chemistry of Planetary Interiors. (4) Lecture, four hours. Chemical compositions of Earth and planets; high-pressure and temperature effects, phase transition; phase equilibria; variations of density and temperature with depth; thermal and compositional evolution. S/U or letter grading.

C226. Advanced Petrology. (4) Lecture, three hours; laboratory, three hours; field trips. Required: course 103A. Designed for graduate students. Understanding genesis of igneous rocks based on geological, tectonic, and other chemical and physical data. Required of students majoring in geology and petroleum engineering. S/U or letter grading.

227. Mars. (4) Lecture, three hours. Limited to graduate students. Results of recent and ongoing missions to Mars are revising many aspects of our understanding of planet and its history. Study highlights major revolutions in thinking about planet, and provides comprehensive overviews as well as current controversies related to Mars’ core and magnetism, thermal evolution and volcanism, geology and cratering history, volatiles and climate, atmosphere and interactions with space environment, and potential pre-biological and biological history. S/U or letter grading.

M229. Planetary Atmospheres and Climates. (4) (Same as Atmospheric and Oceanic Sciences M229.) Lecture, three hours. Enforced requisite: Physics 1C. Planetary atmospheric structure and composition, radiative transfer, and climate dynamics. Topics include origin and evolution of atmospheres, paleoclimate of Earth and Mars, atmospheric thermodynamics, planet-planet radiative transfer, climate dynamics, climate forcings/feedbacks, bifurcation, and climate hysteresis. S/U or letter grading.

230. X-Ray Crystallography. (4) Lecture, three hours; laboratory, three hours. Required: course 51. Point, translation, and space group symmetry, diffraction of X-ray, reciprocal lattice theory, single crystal X-ray methods, diffraction symmetry and elementary crystal structure analysis. S/U or letter grading.

231. Crystal Chemistry and Structure of Minerals. (4) Lecture, three hours; laboratory, three hours. Required: course 51. Bonding, interatomic configurations, polyatomic transformations, isomorphism, thermal and positional disorder; survey of structures of common minerals, and relation of physical and chemical properties to crystal structure. S/U or letter grading.

236. Current Research in Geochronology. (1–1–1) Seminar, one hour. Limited to graduate students. Overview of current research in Earth and planetary science. May be repeated for credit. S/U grading.

M237. How to Write and Publish Scientific Papers. (4) (Same as Atmospheric and Oceanic Sciences M237.) Lecture, three hours. Preparation and presentation: planning to prepare or in the process of preparing manuscripts. Introduction to process of scientific manuscript writing and publishing. Offers insights into fun and frustration of manuscript writing, important rules for manuscript structuring and scientific language, and advice on how to deal with review process. Students gain familiarity with general principles of the manuscript publishing process. Addresses different stages of manuscript writing and publishing by answering when are data ready for publishing, where to publish, how to structure manuscript, best way to present data, how to properly get out message, which writing ethics to consider, how to effectively use citation program, how to communicate with reviewers and editors, and efficient ways to manage coauthors. S/U or letter grading.
238. Metamorphic Petrology. (4) Lecture, three hours; laboratory, six hours. Preparation: one introductory petrology and petrography course. Interpretation of metamorphic rocks in light of observation, theory, and experiment. Geological relations, petrographic evidence, metamorphic zoning, thermodynamics of phase equilibria, projections, chromatic relations, processes, use of piezobienferring haloes, Rayleigh depo- nent mineralogy, and metamorphic, environment, applica- tions to metamorphism. Laboratory study of representative metamorphic rocks and suites of rocks selected to illustrate topics discussed in lectures. S/U or letter grading.

240. Space Plasma Physics. (4) Lecture, three hours; requisite: course 200C or Physics 210A. Physics of plasmas in space, including treatments based on magnetohydrodynamics, kinetic, thermal, phenomena of solar or solar-like stars, solar magnetic fields, wave particle instabilities. S/U or letter grading.

242. Sandstone Petrology. (4) Lecture, two hours; laboratory, four hours. Requisite or corequisite: course C141. Petrographic study of sandstones, with em- phasis on textural characteristics, petrofacies, and paleoecologic reconstructions. S/U or letter grading.

243. Advanced Physical Sedimentology. (4) Lecture, three hours; fieldwork, three hours. Requisites: courses 103B, 111, or equivalent. Advanced topics re- lated to sediments, sedimentary rocks, and informa- tion that can be extracted from each. Interpretation of depositional environment from complex sedimentary structures and textures. Includes field and laboratory component, building on previous sedimentary log bai- sics. Concurrently scheduled with course C143. S/U or letter grading.

244. Tectonics of Sedimentary Basins. (4) Lecture, two hours; discussion, two hours; field trips. Requi- sites: courses 103B, 111, or equivalent. Course 941. Plate tectonic settings of sedimentary basins. Field analysis, stratigraphy, paleoenvironments, sedi- mentology, and related subjects in context of plate- tectonic controls on basin evolution. S/U or letter grading.

245A-245B-245C. Current Research in Geology. (1–1–1) Seminar, one hour. Limited to graduate Earth, planetary, and space sciences students. Seminars presented by staff, outside speakers, and graduate students on current research in tectonics. May be re- peated for credit. S/U grading.

246. Advanced Structural Geology. (4) Lecture, three hours; discussion, two hours; field trips. Requis- ites: courses 103B, 111, 118. Principles of field geology; structure, crystal chemistry, phase equilibria, and petrogen- esis. S/U or letter grading.

251. Seminar: Mineralogy. (4) Seminar, three hours. Examination of groups of mineral families (e.g., feldspars), integrating such aspects as crystal struc- ture, crystal chemistry, phase equilibria, and petrogenes is. S/U or letter grading.

252. Seminar: Geochemistry. (4) Seminar, two hours; discussion, two hours. Phase equilibria under crustal conditions, chemistry of ocean waters, recent and an- cient sediments, structure and chemistry of upper mantle, basaltic rocks, magmatic differentiation, and cos- moschemistry. S/U or letter grading.

253. Seminar: Petrology. (4) Seminar, three hours. Problems of igneous or metamorphic petrology; methods of evaluating physical conditions of meta- morphism; diffusion in mineralogic systems; origin of ultramafic rocks and problems of mantle; element fractionation among coexisting phases; other current subjects in field. S/U or letter grading.

255. Seminar: Structural Geology and Tectonics. (4) Seminar, three hours. Flow and fracture in Earth’s crust from microscopic to continental scale and in ex- periments. Examples may include metamorphic, fer- ranes, glaciers, plutors, volcanoes, and consolidated or unconsolidated sediments. Modern concepts of oceanic basins; processes leading to segregation of continental-type rocks. S/U or letter grading.

256. Seminar: Geophysics. (4) Seminar, three hours. Seismology, geophysical probing, electromagnetic prospecting, Selected topics in Earth physics. Content varies from year to year. May be repeated for credit. S/U or letter grading.

257. Seminar: Paleontology. (4) Seminar/discussion, three hours. Advanced topics in paleobiology, biostra- tigraphy, paleoecology, and paleobiogeography, with emphasis on relations to other disciplines. S/U or letter grading.

259. Seminar: Paleotectonics. (4) Seminar, two hours; discussion, two hours. Requisite: course 244. Basin evolution and paleogeography, with emphasis on Pha- nerozic of Western U.S. S/U or letter grading.

260. Field Seminar. (2 to 6) Seminar, three hours. Advanced topics in paleobiology, petrology, and paleontologic reconstructions. S/U or letter grading.

261. Topics in Magnetospheric Plasma Physics. (4) Lecture, four hours. Lectures, discussions, and exer- cises on specific advanced topics in magnetospheric plasma physics. Previous courses examined magnetic storms, magnetospheric substorms, coronal holes, substorms, auroral substorms, and polarization. S/U or letter grading.

M283A. Solar System Magnetohydrodynamics. (4) (Same as Atmospheric and Oceanic Sciences M250A.) Lecture, three hours. Requisite: Atmospheric and Oceanic Sciences C205A. Derivation of MHD equations based on conservation principles and Ohm’s law. Syllabus includes overview of previous research and new methodologies in MHD. Digital analysis and interpretation of near-infrared, thermal-infrared, and microwave data from satellites and aircraft. Field observation of study site in California desert for testing hypotheses during week between Winter and Spring Quarters. Concur- rently scheduled with course C162. S/U or letter grading.

265. Instrumentation, Data Processing, and Data Analysis in Space Physics. (6) Lecture, four hours. Problems of current interest in space physics. Experimental techniques, models of data from spacecraft and other instruments. Data processing, display, and archiving. Time-series analysis techniques, including filtering, Fourier series, eigenanalysis, and power spectra. S/U or letter grading.

273. Earth Process and Evolutionary History. (6) (Same as Ecological and Evolutionary Biology CM228.) Lecture, four hours; laboratory, three hours. Requi- site: Chemistry 14A, 14B or 20A, 20B, Life Sciences 1, 2, 3, 4, and 7A, 7B, and 7C or (7A and introduc- tory course in geology). Exploration of relationship be- tween physical processes, such as tectonics and cli- mate, and how they affect surface and impact biology of Earth. Study of evolution of universe, Earth, and life, with integration of history of science, including Dar- winian evolution and plate tectonics revolutions. Study of formation of matter offers tools to understand geo- logical process of climate and ecology of Earth. Pal- timate change to examine expected future human-influ- enced climate. Consideration of major events in his- tory of Earth. Deep time evolution, and paleontology, genetics, and geochemistry are integrated to recon- struct past events. This reveals how Earth processes shaped life and how life shaped Earth. Concurrently scheduled with course C179. S/U or letter grading.

C279. Search for Extraterrestrial Intelligence: Theo- ry and Applications. (4) Lecture, two hours; labora- tory, two hours. Enforced requisites: Mathematics 31B, Physics 1B. Recommended: course 71, Com- puter Science 31, Physics 110B, Programming. C10A. Search for extraterrestrial intelligence (SETI) is based on number of astronomical, mathe- matical, statistical, and computational principles. Cov- erage of fundamental algorithms and study of context of SETI: abundance and architecture of extra- solar planetary systems; radio astronomy, including wave propagation and dispersion; signal processing, including sampling theory and Fourier transforms; random processes, including Gaussian and Poisson statistics, and algorithm development. Design of ob- servational program, acquisition of telesopic data, development of algorithms to analyze data, and writing of report on results. Concurrently scheduled with course C179. S/U or letter grading.

M285. Origin and Evolution of Solar System. (4) (Same as Astronomy M285.) Lecture, four hours. De- nomical problems of solar system; chemical, evalua- tions from geochronology, meteorites, and solar at- mosphere; nucleosynthesis; solar origin, evolution, and volatility; solar system, solar system processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

M286A-286B-286C. Current Research in Planetary Science. (1–1–1) Seminar, one hour. Limited to graduate Earth, planetary, and space sciences students. Seminars presented by staff, outside speakers, and graduate students on current interest concerning moon, planets, and mete- orites. May be repeated for credit. S/U grading.

289. Seminar: Fluid Dynamics. (2) Seminar, one to two hours. Problems of current interest in fluid dy- namics, with emphasis on geophysical applications. May be repeated for credit. S/U grading.

OVERVIEW

The Master of Arts (MA) degree in East Asian Studies offers an interdisciplinary and highly flexible program of study. With opportunities to take a range of advanced courses in the social sciences and humanities, students are able to tailor their programs to emphasize particular methodological and disciplinary approaches and to focus in depth on the region as a whole and on its dynamics in particular countries. Coursework and language offerings range from the ancient to the contemporary and allow students to prepare for a broad range of individual needs and career interests with a thorough grounding in the history and culture of the region.

UNDERGRADUATE STUDY

Information on the undergraduate major in Asian Studies and minor in East Asian Studies can be found in the International and Area Studies section.
all influence human decisions on matters ranging from conservation of the environment to advancement of medical science.

**Undergraduate Study**

The Bachelor of Science (BS) degrees combine essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as advanced in-depth exposure to some of them. Students may earn a BS degree in one of three different majors within the department: Biology (general biology); Ecology, Behavior, and Evolution; and Marine Biology. The majors build on similar lower-division introductory courses and differ primarily in the upper-division requirements. The Biology major is designed for students who desire exposure to a wide range of biological subjects. The remaining two majors—Ecology, Behavior, and Evolution and Marine Biology—provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.

**Graduate Study**

The Master of Science (MS) and Doctor of Philosophy (PhD) degrees provide opportunities for advanced, concentrated study. The MS degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The PhD degree requires independent and innovative research that ultimately results in a dissertation.

**Undergraduate Majors**

**Biology BS**

The Biology major is designed for students with a broad interest in biology who desire to pursue careers in a wide range of biological and related fields. It provides students with excellent background preparation for postgraduate training in medicine and other health sciences, in tracks leading to academic and public service careers in biology, in biological industries, and even in nonbiological careers such as business, agriculture, and law. Emphasis is on breadth of training to expose students to all levels of modern biology.

**Learning Outcomes**

The Biology major has the following learning outcomes:

- Broad understanding of basic biology concepts and principles across different levels of biological organization, from molecules to ecosystems
- Effective oral and written communication of scientific information
- Demonstrated understanding of the processes involved in new knowledge generation, including the scientific method, data collection, and data analysis
- Ability to critically evaluate scientific concepts presented in diverse media, from scientific articles to the popular press

**Entry to the Major**

**Transfer Students**

Transfer applicants to the Biology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 7A, 7B, and 7C, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

**Requirements**

**Preparation for the Major**

**Life Sciences Core Curriculum**

Required: Chemistry and Biochemistry 1A, 1B, 14BL, 14C, and 14D, or 20A, 20B, 20L, 30A, 30AL, and 30B; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, 3C, and Life Sciences 40 or Statistics 13, or Mathematics 31A or 31AL, 31B, 32A, and Life Sciences 40 or Statistics 13; Physics 1A, 1B, 1C, 4AL, and 4BL, or 5A, 5B, and 5C.

**The Major**

Students must take two courses from each principle:

**Evolution and Genetics:** Anthropology 120, 124P, 124Q, 124S, 128P, Earth, Planetary, and Space Sciences 116, Ecology and Evolutionary Biology 103, 108, 109, 109L, 110, 111, 112, 113A, 113AL, 114A, 115, 117, 118, 120 (not open for credit to students with credit for course 185), 121, 126, 129, 130, 135, 136, 140, 143, 144, 144L, M145, C146, 149, 150, 150L, 160, 171, CM173, C174, 175, 181, 184, 185 (not open for credit to students with credit for course 120), 186, Life Sciences 107, Microbiology, Immunology, and Molecular Genetics CM156, 158, Molecular Cell, and Developmental Biology CM156, CM156, Society and Genetics M142

**Information Flow:** Anthropology 124P, 128P, Chemistry and Biochemistry B100, 153A, 166, Ecology and Evolutionary Biology 100, 100L, 116, 120 (not open for credit to students with credit for course 185), 121, 122, 125, 126, 129, 132, 134B, C135, 136, 137, 143, C146, 149, 150, 150L, 153, 156, 162, 162L, 168, 170 (not open for credit to students with credit for Physiology Science 166), 171, C172, C174, 176, M175, C179, 180A, 180B, 183, Life Sciences 107, Microbiology, Immunology, and Molecular Genetics 100L and 101 (must be taken together to satisfy requirement), 103AL, 103BL, 109AL, 109BL, 123, 132, CM156, 158, C185A, Molecular, Cell, and Developmental Biology 100, 138, 143, 144, C150, 150AL, CM156, 158, 168, M175A, M175B, M175C, 187AL, Neurosciences M101A, M101B, M101C, 102, Physiological Science M106, 111A, 111B, CM123, 124, C126, 127, 128, 130, 136,
138, 140, C144, M145, 146, 147, 149, C152, 154, 155, 165, 166 (not open for credit to students with credit for Ecology and Evolutionary Biology 170), 167, 173, 174, 175, M176, 177, M180A, M180B, M180C

Field Biology

The department offers three quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ), the Marine Biology Quarter (MBQ), and the joint Field Marine Biology Quarter (FMBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites near the UW campus and in the Pacific Northwest. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter involves some combination of Ecology and Evolutionary Biology 113B, 114B, 118, 124A, 124B, 125, C126, 132, 134B, and 151B. The Marine Biology Quarter includes some combination of Ecology and Evolutionary Biology 102, 106, 123A, 123B, 147, 148, 163, 164, 165, and 182. The Field and Marine Biology quarters may occur during fall, winter, or spring quarter, depending on location and faculty participation. To participate, students must enroll in all courses in the respective program. Participants in both programs are selected by personal interview. Information and applications are available in the Undergraduate Advising Office.

Honors Program

An overall grade-point average of 3.4 and a 3.4 in the major at graduation and who have successfully completed Ecology and Evolutionary Biology 198A and 198B. Students do not need to apply for departmental honors. All students are reviewed for honors.

Computing Specialization

Majors may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science CM186, Psychology 186A, or 186B. A grade of C- or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Undergraduate Advising Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies

Preparation for the Major

Each core curriculum course must be passed with a grade of C- or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C- in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

The Major

Each Life Sciences core curriculum course must be passed with a grade of C- or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C- in three core curriculum courses, either in separate courses or repetitions of the same course, are ineligible for the Biology major.

A minimum of five upper-division courses for the major must be taken within the Ecology and Evolutionary Biology Department.

A minimum of two laboratory courses must be taken, including a minimum of one upper-division ecology and evolution biology laboratory course.

Courses applied to major requirements may be applied to one core principle only. Courses listed in multiple principles may not be applied simultaneously.

Field quarter instructors determine to which core principle courses apply (four requirements).

A maximum of 8 units of the Ecology and Evolutionary Biology 198 series or 4 units of Ecology and Evolutionary Biology 199 may be applied toward the major. The principal investigator determines to which principle the course applies, after the student’s work and quarterly requirements are complete. The course must be for a minimum of 4 units. Credit for 199 courses from other departments may not be applied.

Each course applied toward requirements for the major must be taken for a letter grade. Courses applied to upper-division major requirements must have a minimum of 4 units. Courses with fewer than four units may be taken together to satisfy one course requirement. A maximum of one course requirement may be satisfied. A 6-unit course counts as one course on the requirements for the major.

With consent of the instructors and department, a maximum of 4 units of 200-level courses may be applied toward major requirements.

Ecology, Behavior, and Evolution BS

The Ecology, Behavior, and Evolution major is appropriate for students preparing for graduate study in ecology, behavior, and evolution or for employment in areas such as environmental biology, animal behavior, conservation, teaching, museum work, and governmental positions dealing with environmental issues of wide importance and impact. A strong field component involving study in terrestrial and marine locales
such as coastal, desert, and mountain environments in California and the Southwest and in the Neotropics is required.

Capstone Major

The Ecology, Behavior, and Evolution major is a designated capstone major. Students apply theory and technique learned through four years of classroom and laboratory experience to their own independent projects. The main purpose of the capstone is to provide a unique field experience that involves designing and executing a research project. Students are aided in the scientific process of learning about a new ecosystem, developing relevant questions, designing conceptually based projects, troubleshooting, and completing the work, and writing a publication-ready manuscript. They are also expected to exhibit strong teamwork, problem-solving, and communication skills.

Learning Outcomes

The Ecology, Behavior, and Evolution major has the following learning outcomes:

- Demonstrated broad knowledge of fundamental concepts of ecology, behavior and evolution, or marine biology acquired through coursework
- Development of skills in library research, data interpretation, synthesis, and scientific writing
- Use of current primary scientific literature, including database searches, identification of appropriate sources, and reading and understanding papers
- Understanding of key questions and hypotheses, interpretation of results and conclusions, and discrimination of quality through critique
- Use of knowledge gained for conception and execution of student project that includes self-developed questions and hypotheses, design of appropriate theoretical or empirical/experimental approach, execution of that approach, and analysis and interpretation of data
- Communication of original scientific work to colleagues and mentors through capstone scientific paper
- Demonstrated communication skills through oral or poster presentation at a symposium
- Display of strong teamwork and problem-solving skills

Entry to the Major

Transfer Students

Transfer applicants to the Ecology, Behavior, and Evolution major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 7A, 7B, and 7C, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Life Sciences Core Curriculum

Required: Chemistry and Biochemistry 14A, 14B, 14BL, 14C, and 14D, or 20A, 20B, 20L, 30A, 30AL, and 30B; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, 3C, and Life Sciences 40 or Statistics 13A or 31AL, 31B, 32A, and Life Sciences 40 or Statistics 13: Physics 1A, 1B, 1C, 4AL, and 4BL, or 5A, 5B, and 5C.

The Major

Students must complete the following courses:

1. At least 4 morphology and systematics units (one course) from Ecology and Evolutionary Biology 101, 103, 105, 110, 111, 112, 113A, 113AL, 114A, 115, 117, 130, 140, 144L, M157, or 184.
2. At least 4 physiology units (one course) from Ecology and Evolutionary Biology 117, M157, 162, 162L, 170, Physiological Science 165, or 166. Students with credit for Ecology and Evolutionary Biology 170 cannot take Physiological Science 166.
3. At least 12 ecology, behavior, and evolution units (three courses) from Anthropology 128P, Ecology and Evolutionary Biology 100, 113A, 113AL, 116, 117, 130, 133, 135, 136, 137, 142, 143, 144, 144L, C146, 245, 240, 245L, 250L, 251A, 252, 254, 255, 257, 260, 265, 267, 268, CM173 (or Earth, Planetary, and Space Sciences CM173), C174, 275, 278 (or Bio-engineering CM186 or Computational and Systems Biology M186 or Computer Science CM186), 183, 184, 185, 186, Life Sciences 107 (students with credit for Life Sciences 4 cannot take Life Sciences 107). Students with credit for Ecology and Evolutionary Biology 120 cannot also take course 185.
4. One capstone field quarter consisting of 12 to 16 units from Marine Biology Quarter (MBQ), join Field Marine Biology Quarter (FMBQ), or pre-approved equivalent (see undergraduate adviser)
5. At least 8 units (two courses) from Anthropology 128P, chemistry (except Chemistry and Biochemistry 188S through 199; Chemistry and Biochemistry 153A and 153L are strongly recommended), Earth, planetary, and space sciences (geology only; except Earth, Planetary, and Space Sciences 188 through 199), ecology and evolutionary biology (except Ecology and Evolutionary Biology 188S through 199), geography (except Geography 188S through 199), and Life Sciences 107 (students with credit for Life Sciences 4 cannot take Life Sciences 107), mathematics (except Mathematics 105A, 105B, 105C, 106, 188S through 199), microbiology (except Microbiology 193A through 199), Molecular, Cell, and Developmental Biology M172, and Developmental Biology M173, or Mathematics 3A, 3B, 3C, and Life Sciences 40 or Statistics 13: Physics 1A, 1B, 1C, 4AL, and 4BL, or 5A, 5B, and 5C.

Field Biology

The department offers three quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ), the Marine Biology Quarter (MBQ), and the Joint Field Marine Biology Quarter (FMBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter involves some combination of Ecology and Evolutionary Biology 113B, 114B, 118, 124A, 124B, 125, C126, 132, 134B, and 151B. The Marine Biology Quarter includes some combination of Ecology and Evolutionary Biology 102, 106, 123A, 123B, 147, 148, 169, 165, and 182. The Field and Marine Biology quarters may occur during fall, winter, or spring quarters, depending on location and faculty participation. To participate, students must enroll in all courses in the respective program. Participants in both programs are selected by personal interview. Information and applications are available in the Undergraduate Advising Office.

Honors Program

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Ecology and Evolutionary Biology 198A and 198B. Students do not need to apply for departmental honors. All students are reviewed for honors.

Computing Specialization

Majors may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science CM186, Psychology 186A, or 186B. A grade of C– or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Undergraduate Advising Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies

Preparation for the Major

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.
The Major
A maximum of 8 units of the Ecology and Evolutionary Biology 198 series or 4 units of Ecology and Evolutionary Biology 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

Courses offered as part of the Field Biology Quarter (FBQ) are open to all qualified students, but strict priority is given to students who are Ecology, Behavior, and Evolution majors, are graduating seniors, have taken a broad range of ecology, behavior, and evolution coursework, and have maintained a good grade-point average.

With consent of the instructors and department, students may enroll in 200-level courses and apply them toward major requirements.

Each course applied toward requirements for preparation for the major and the major must be taken for a letter grade. Ecology, Behavior, and Evolution majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major. Courses applied to upper-division major requirements must have a minimum of 4 units. A 6-unit course counts as one course on the requirements for the major.

As requisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 13 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. It is strongly recommended that students complete Ecology and Evolutionary Biology 109 and 109L prior to applying for the Marine Biology Quarter. Contact the Undergraduate Advising Office for all requirements for the Marine and Field Biology quarters.

Marine Biology BS
The Marine Biology major is designed for students who wish to specialize in the area of marine sciences. Completion of this major provides students with both an excellent background in biology and specialization in various disciplines such as oceanography, subtidal and intertidal ecology, and physiology of marine organisms. Graduates are well prepared for postgraduate opportunities in the marine sciences, many other areas of biology, and medicine. The major provides valuable field experience with concomitant individual research opportunities in marine biology.

Capstone Major
The Marine Biology major is a designated capstone major. Students apply theory and technique learned through four years of classroom and laboratory experience to their own independent projects. The main purpose of the capstone is to provide a unique field experience that involves designing and executing a research project. Students are aided in the scientific process of learning about a new ecosystem, developing relevant questions, designing conceptually based projects, troubleshooting and completing the work, and writing a publication-ready manuscript. They are also expected to exhibit strong teamwork, problem-solving, and communication skills.

Learning Outcomes
The Marine Biology major has the following learning outcomes:

- Demonstrated broad knowledge of fundamentals of ecology, behavior and evolution, or marine biology acquired through coursework
- Development of skills in library research, data interpretation, synthesis, and scientific writing
- Use of current primary scientific literature, including database searches, identification of appropriate sources, and reading and understanding papers
- Understanding of key questions and hypotheses, interpretation of results and conclusions, and discrimination of quality through critique
- Use of knowledge gained for conception and execution of student project that includes self-developed questions and hypotheses, design of appropriate theoretical or empirical/approximation approach, execution of that approach, and analysis and interpretation of data
- Communication of original scientific work to colleagues and mentors through capstone scientific paper
- Demonstrated communication skills through oral or poster presentation at a symposium
- Display of strong teamwork and problem-solving skills

Entry to the Major
Transfer Students
Transfer applicants to the Marine Biology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 7A, 7B, and 7C, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements
Preparation for the Major
Life Sciences Core Curriculum
Required: Atmospheric and Oceanic Sciences 1 or Earth, Planetary, and Space Sciences 15; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, and 14D, or 20A, 20B, 20L, 30A, 30AL, and 30B; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, 3C, and Life Sciences 40 or Statistics 13, or Mathematics 31A or 31AL, 31B, 32A, and Life Sciences 40 or Statistics 13; Physics 1A, 1B, 1C, 4AL, and 4BL, or 5A, 5B, and 5C.

The Major
Students must complete the following courses:
1. Ecology and Evolutionary Biology 109 and 109L
2. At least 4 laboratory units (one course) from Ecology and Evolutionary Biology 101, 105, 110, 112, 136, 170, or 181
3. At least 4 units of marine organismic biology or physiology (one course) from Ecology and Evolutionary Biology 101 (unless taken under item 2), 105 (unless taken under item 2), 107, 112, 117, 128, 140, 142, 170 (unless taken under item 2), 174, 184, or Physiological Science 166. Students with credit for Ecology and Evolutionary Biology 170 cannot also take Physiological Science 166
4. At least 4 units of ecology and behavior (one course) from Anthropology 128P, Ecology and Evolutionary Biology 100, 116, C119A, C119B, 122, C126, 128, 129, M131 (or Geography M110), 133, 136, 137, 140, 142, 143, C146, 151A, 152, 154, 155, M157, 161, 162, 170, C172, M178 (or Bioengineering CM186 or Computational and Systems Biology M186 or Computer Science CM186). C174, 184
5. At least 4 evolution units (one course) from Anthropology M128S (or Society and Genetics M142), Ecology and Evolutionary Biology 116, 117, 120, 121, 130, 133, C135, 140, 143, 144, 144L, C146, 149, 150, 150L, CM173 (or Earth, Planetary, and Space Sciences CM173, C174, 175, 184, 185, 186, or Life Sciences 107 if credit for Life Sciences 4 cannot take Life Sciences 107). Students with credit for Ecology and Evolutionary Biology 120 cannot also take course 185
6. One capstone field quarter consisting of 12 to 16 units from the Marine Biology Quarter (MBQ) or pre-approved equivalent (see undergraduate adviser)
7. One additional physical, chemical, or geological oceanography course from Atmospheric and Ocean Sciences 102, 103, 104, 105 (or Ecology and Evolutionary Biology M139), 130, Chemistry and Biochemistry 103, 153A, Earth, Planetary, and Space Sciences 100, 116, 119, C141, 153, Ecology and Evolutionary Biology M131 (or Geography M110), 153, 158, 159, Geography 101, M118 (or Atmospheric and Oceanic Sciences M106), 130, 182A, Mechanical and Aerospace Engineering 103, 150A, or Molecular, Cell, and Developmental Biology 172

Field Biology
The department offers three quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ), the Marine Biology Quarter (MBQ), and the joint Field Marine Biology Quarter (FMBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter involves some combination of Ecology and Evolutionary Biology 113B, 114B, 118, 124A, 124B, 125, C126, 132, 134B, and 151B. The Marine Biology Quarter includes some combination of Ecology and Evolutionary Biology 102, 106, 123A, 123B, 147, 148, 163, 164, 165, and 182. The Field and Marine Biology quarters
may occur during fall, winter, or spring quarter, depending on location and faculty participation. To participate, students must enroll in all courses in the respective program. Participants in both programs are selected by personal interview. Information and applications are available in the Undergraduate Advising Office.

Honors Program
An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Ecology and Evolutionary Biology 198A and 198B. Students do not need to apply for departmental honors. All students are reviewed for honors.

Computing Specialization
Majors may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science CM186, Psychology 186A, or 186B. A grade of C– or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Undergraduate Advising Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies
Preparation for the Major
Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

The Major
Credit for 199 courses from other departments may not be applied. With consent of the instructors and department, students may enroll in 200-level courses and apply them toward major requirements. Each course applied toward requirements for preparation for the major and the major must be taken for a letter grade. Marine Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major. Courses applied to upper-division major requirements must have a minimum of 4 units. A 6-unit course counts as one course on the requirements for the major. As requisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 13 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution majors, and Marine Biology majors. Students must complete Ecology and Evolutionary Biology 109 and 109L prior to participating in the Marine Biology Quarter. Contact the Undergraduate Advising Office for all requirements for the Marine and Field Biology quarters.

Undergraduate Minors

Conservation Biology Minor
The Conservation Biology minor is designed for students who wish to augment their major program of study with courses addressing issues central to the conservation and sustainability of biodiversity and natural ecosystem processes. The minor seeks to provide students with a greater depth of experience and understanding of the role that science can play in developing conservation policy.

Admission
To enter the minor, students must (1) be in good academic standing (2.0 grade-point average or better), (2) have completed Life Sciences 7B and Ecology and Evolutionary Biology 100 with minimum grades of C or better, and (3) submit a petition through Message Center to the Undergraduate Advising Office. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by the College of Letters and Science.

Non-life sciences majors wishing to minor in Conservation Biology should be aware that preparation courses in chemistry, life sciences, mathematics, and physics are requisites to some of the upper-division courses accepted for the minor.

The Minor
Required Lower-Division Course (5 units): Life Sciences 7B.

Required Upper-Division Courses (28 units minimum): Ecology and Evolutionary Biology 100, and four to six courses (24 units minimum) from the following (no more than two courses from any discipline): Anthropology 124P, 124Q, 124S, 126P, 126Q, 126R, 129, Community Health Sciences 100, 130, Ecology and Evolutionary Biology 110, 111, 112, 113A, 113AL, 114A, 114B, 114C, 115A, 115B, 117A, 117B, 118A, 118B, 122, M127 (or Environment M102 or Geography M102), 129, M131 (or Geography M110), 140, 142, 143, 144, 144L, C146, 149, 151A, 152, 153, 154, 155, 161, 162L, 162L, 168, C174, 176, 180A, 180B, 183, 184, Geography M102, M103 (or Environment M103), 106, 107, 116, 117, M118 (or Atmospheric and Oceanic Sciences M106), M126 (or Environment M126), M131, 133. Courses completed as part of the Field Biology Quarter and Marine Biology Quarterly may be applied if not taken to fulfill a field quarter requirement; consult with the undergraduate counselors for more information. A maximum of two upper-division geography courses may be applied to the minor.

Policies
A minimum of 20 units applied toward the minor requirements must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Evolutionary Medicine Minor
The Evolutionary Medicine minor is designed for students who wish to augment their major program of study with courses that combine the disciplines of ecology and evolutionary biology, anthropology, psychology, and zoology with medicine to create new paradigms for investigating and understanding disease. The minor provides students with a greater depth of experience and understanding of the integration of evolutionary biology and medical education.

Admission
To enter the minor, students must (1) be in good academic standing (2.0 grade-point average or better), (2) have completed Life Sciences 7B and Ecology and Evolutionary Biology 100 with minimum grades of C or better, and (3) submit a petition through Message Center to the Undergraduate Advising Office. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by the College of Letters and Science.

Non-life sciences majors wishing to minor in Evolutionary Medicine should be aware that preparation courses in chemistry, life sciences, mathematics, and physics are requisites to some of the upper-division courses accepted for the minor.

The Minor
Required Lower-Division Course (5 units): Life Sciences 7B.

Required Research Project or Internship (4 units minimum): Ecology and Evolutionary Biology 198A and 198B or 199 or a suitable research internship from another department, and must be taken for letter grades.
Graduate Major

Biology MS, CPhil, PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Ecology and Evolutionary Biology

Lower-Division Courses

10. Plants and Civilization. (4) Lecture, three hours; discussion, one hour. Basic ecological processes, scientific method, and ecological basis for local and global environmental issues. Major challenges to be faced in this century, including need to find interdisciplinary and collaborative solutions to world’s worsening environmental problems (e.g., global climate change, biodiversity loss, deforestation, pollution, declining water resources, declining fisheries). Environmental literacy to equip students to become leaders in growing green economy and to help forge solutions to current and future environmental crises that threaten natural resource base. P/NP or letter grading.

19. Flat Lux Freshwater Biology. (4) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery. Environmental literacy to equip students to become leaders in growing green economy and to help forge solutions to current and future environmental crises that threaten natural resource base. P/NP or letter grading.

21. Field Biology. (4) Lecture, three hours; discussion, two hours, or field trips, three to four hours. Recommended preparation: Life Sciences 15. Not open for credit to students with credit for course 122 or Life Sciences 1. Introduction to natural history of Western North America, especially Southern California. Classification, distribution, and ecology of common plants and animals. P/NP or letter grading.

25. Living Ocean. (6) Lecture, three hours; laboratory, one hour; field trips, three hours. Not open for credit to students with credit for Earth, Planetary, and Space Sciences 15. Physical and chemical processes that take place in the ocean, with emphasis on their effects on organisms. P/NP or letter grading.

50. Desert Life. (4) Lecture, three hours; laboratory, two hours. Introduction to fundamental structural, physiological, and behavioral features of desert organisms, with special emphasis on deserts of Western North America. P/NP or letter grading.

87. California’s DNA: Field Course. (1) Lecture, one hour; fieldwork, four hours (every other week). Limited to freshmen. Students join CalEdison community science program and do fieldwork to sample soil and sediments in California. Familiarization with University of California natural reserves spanning coast to woodland, and desert to mountains. Analysis of samples for DNA to capture snapshot of local biodiversity. Prepares students for more intensive, related upper-division science course. Guided Saturday field trips or independent trips. Letter grading.

98. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

98HC. Honors Contracts. (1) Tutorial, three hours. Limited to Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities, and may be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

95. Lower-Division Internship in Biology. (4) Tutorial/fieldwork, three hours per week per unit. Internship course for lower-division students to be supervised by Center for Community Learning, fieldwork site, and faculty adviser. Consult Undergraduate Office for more information. May be repeated for credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

96. Communicating Science: Bringing Complex Concepts to Life. (2) Seminar, three hours. Limited to Ecology and Evolutionary Biology Department majors. Development of tools for research, integrating and presenting complex scientific concepts concisely and effectively. Basic animation techniques and work in groups to illustrate life sciences concepts. How to engage audiences and convey clear messages. Letter grading.

97. Variable Topics in Ecology and Evolutionary Biology. (1 to 4) Seminar, one to four hours. Current issues in research in ecology and evolutionary biology. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor. P/NP or letter grading.

97XA. PEERS Freshman Seminar: Succeeding in Science. (1) Seminar, one hour. Limited to students in Program for Excellence in Education and Research in Sciences (PEERS). Series of lectures, workshops, and discussions to enhance student success in sciences by developing critical academic survival skills, acquainting students with practice of science, and highlighting opportunities available to participate in undergraduate research. P/NP grading.

97XB. PEERS Sophomore Seminar: Pathways in Science. (1) Seminar, one hour. Limited to students in Program for Excellence in Education and Research in Sciences (PEERS). Series of lectures and workshops to enhance student success in sciences by acquainting students with practice of science, opportunities available to participate in research as undergraduate students, and preparing students with campus resources. P/NP grading.

97XC. AAP Freshman Seminar: Succeeding in Science Majors and Careers. (1) Seminar, one hour. Limited to science majors in Academic Advancement Program (AAP) who took Mathematics 1 in fall term. Series of lectures, workshops, and discussions designed to enhance student success in sciences by developing critical academic survival skills, acquainting students with campus resources, and preparing students to practice of science, and highlighting opportunities available to participate in research as undergraduate students. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enroll in minimum of 12 units (excluding course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

100. Introduction to Ecology and Behavior. (4) Lecture, three hours; discussion, one hour. Requisite: Life Sciences 7B. Not open for credit to students with credit for course 118, 122, 124A, 124B, 125, C126, 129, 132, 134B, 136, or 151B. Introduction to methods and topics in ecology and behavior. Growth and regulation of populations, organization of communities, niches and interactions, biogeography, and behaviors animals use to find food, choose mates, and interact in social groups. Letter grading.

100L. Introduction to Ecology and Behavior Laboratory. (4) Laboratory, four hours laboratory. Requisite: course 100 (may be taken concurrently). Life Sciences 1 or 7B. Introduction to research methods in ecology and behavior, resulting in independent research proposals to gain understanding of the critical evaluation of research papers, and development of scientific writing skills. Involves work outside and off-campus meetings. To apply this course to the Biology upper-division major laboratory requirement, the corresponding lecture course must be completed with a passing grade. Letter grading.

101. Marine Botany. (6) Lecture, four hours; laboratory, six hours; three to four field trips. Requisite: Life Sciences 1 or 7B. Introduction to biology and ecology of marine plants, including algae, sea grasses, and mangroves, with focus on form and function of marine plants and their ecological role in different marine habitats and ecosystems. Letter grading.

103. Plant Diversity and Evolution. (6) Lecture, three hours; laboratory, three hours; field trip. Requisites: Life Sciences 1 and 4, or 7A and 7B. Introduction to green plant tree of life, with emphasis on using phylogenetic perspective to examine major transitions in plant evolution, including diversification of land plants, vascular plants, seed plants, and currently ecologically dominant flowering plants. Introduction to phylogenetics, providing overview of theory
and methodology to reconstruct and use phylogenetic trees to study organismal evolution. Exploration of 700 million years of plant evolution, with emphasis on morphological and functional aspects, and biogeographical perspectives. Letter grading.

105. Biology of Invertebrates. (6) Lecture, three hours; laboratory/field trips, six hours. Requires: Life Sciences 1 or 7B. Introduction to systematic, evolution, natural history, and physiology of invertebrates. P/NP or letter grading.

106. Experimental Marine Invertebrate Biology. (4 or 6) Lecture, two hours; laboratory, 12 hours. Requires: course 105, Physiological Science 166 (may be taken concurrently), or three hours-credit level, in either as 8-unit quarter-long course or as 4-unit Marine Biology Quarter course. Advanced course of natural history, physiology, biochemistry of invertebrates, with emphasis on independent research and field investigations. P/NP or letter grading.

107. Evolution, Development, and Function of Invertebrate Animals. (6) Lecture, three hours; laboratory, three hours; three weekend field trips. Requires: course 105 or completion of Marine Biology Quarter. Advanced invertebrate biology course exploring evolutionary relationship of animal groups and evolution of marine species, comparative development and developmental genetics of invertebrate form, and function as they relate to marine invertebrates. Letter grading.

108. Biodiversity in Age of Humans. (5) Lecture, two and one-half hours; field experience, one hour; field trips, six to eight hours. Students learn how to use scientific method, ask and answer questions about eDNA, analyze primary literature, and develop professional skills applicable to career. Series of bioactive videos, interactive workshops, and short lectures outside of class set baseline knowledge for problem solving and applied learning in classroom. Letter grading.

109. Introduction to Marine Science. (4) Lecture, three hours; discussion, one hour. Requires: Life Sciences 1 or 7B. Strongly recommended for prospective Marine Biology Quarter students. Introduction to physical and chemical processes of planet oceans. Designed to be integrative, with focus on solving and applied learning in classroom. Letter grading.

110L. Introduction to Marine Science Laboratory. (4) Laboratory, three hours; four field trips. Requires: course 109 or completion of Marine Biology Quarter. Advanced invertebrate biology course exploring evolutionary relationship of animal groups and evolution of marine species, comparative development and developmental genetics of invertebrate form, and function as they relate to marine invertebrates. Letter grading.

111. Advanced invertebrate biology course exploring evolutionary relationship of animal groups and evolution of marine species, comparative development and developmental genetics of invertebrate form, and function as they relate to marine invertebrates. Letter grading.

116. Conservation Biology. (4) Lecture, three hours; discussion, two hours. Requires: Life Sciences 1 or 7B. Not open for credit to students with credit for Environment 121. Study of ecological and evolutionary principles as they apply to preservation of genetic, species, and ecosystem diversity. Discussion sections focus on interactions of science, policy, and economics in conserving biodiversity. Oral and written student presentations on specific conservation issues. Letter grading.

117. Evolution of Vertebrates. (5) Lecture, three hours; laboratory, three hours. Requires: course 109, Life Sciences 1 or 7B. Introductory introduction of mechanisms by which molecular data adapt themselves to their ablative and biotic environments using population, community, and ecological physiology levels of integration. Letter grading.

118. Plant Adaptations. (8) Lecture, one hour; field trip, 10 hours. Requires: course 100. Five-week course offered only as part of Field Biology Quarter. Field-oriented introduction to mechanisms by which vascular plants adapt themselves to their ablative and biotic environments using population, community, and ecological physiology levels of integration. Letter grading.

119A. Mathematical and Computational Modeling in Ecology. (4) Lecture, three hours; discussion, one hour. Requires: Mathematics 3 or 31A. Recommended: courses 100, 102, 122, Life Sciences 1 or 7B, Mathematics 3C. Introduction to modeling dynamics of ecological systems, including formulation and analysis of mathematical models, basic techniques of scientific programming, probability and stochastic modeling, and methods to relate models to data. Examples from ecology but techniques and principles are applicable to other sciences. P/NP or letter grading.

121A. Herpetology Laboratory. (4) Lecture, three hours; discussion, one hour. Requires: Life Sciences 1 or 7B. Familiarization with reptiles and amphibians in their natural habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion. Letter grading.

123A-123B. Field Marine Ecology. (4 or 8 each) Lecture, five weeks; laboratory, 15 hours. Requires: courses 123A and 123B taken concurrently. Offered either as 4- or 8-unit field course given off campus as part of Marine Biology Quarter. Survey of current topics in marine ecology, including analysis of primary research literature combined with field study of ecology of marine organisms, populations, communities, and ecosystems. Original research project required. Letter grading. 123A. In residence at research station located outside continental U.S. 123B. In residence at research station located within U.S., including Alaska and Hawaii.

124A-124B. Field Ecology. (4 or 8 each) Lecture, five weeks; laboratory or field trip, 15 hours. Requires: course 100, Life Sciences 1 or 7B. Offered either as 4- or 8-unit field course given off campus as part of Marine Biology Quarter. Survey of current topics in marine ecology, including analysis of primary research literature combined with field study of ecology of marine organisms, populations, communities, and ecosystems. Original research project required. Letter grading. 124A. In residence at research station located outside continental U.S. for part or for duration of term. 124B. In residence at research station located within U.S., including Alaska and Hawaii, for part of or for duration of term.

125. Tropical Animal Communication. (4 or 8) Lecture, three hours; discussion, two hours. Requires: course 100, Life Sciences 1 or 7B. Offered either as 4- or 8-unit course offered only as part of Field Biology Quarter. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five to six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Letter grading.

C126. Behavioral Ecology. (4 or 8) Lecture, three hours; discussion, two hours. Requires: course 100, Life Sciences 1 or 7B. Offered either as 4- or 8-unit course offered only as part of Field Biology Quarter. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five to six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Concurrently scheduled with course C242. Letter grading.

Ecology and Evolutionary Biology / 387

chastic models, fitting models to data, sensitivity analysis, presentation of model results, and other topics from current literature. Concurrently scheduled with course C219B. P/NP or letter grading.

120. Evolution. (4) Lecture, three hours; discussion, two hours. Requires: Life Sciences 1, 2, 3, 4, 4X, 23L, or 7A, 7B, 7C, and 23L, Mathematics 3A and 3B (or 31A or Life Sciences 30B). Not open for credit to students with credit for Departmental majors specializing in environmental and population biology. Introduction to mechanisms and processes of evolution, with emphasis on natural selection, mutation, speciation, evolutionary rates, and patterns of adaptation. P/NP or letter grading.

121. Molecular Evolution. (4) Lecture, three hours; discussion, one hour. Requires: Life Sciences 3, 4, and 23L, or 7A and 23L. Molecular biology, with emphasis on evolutionary aspects. DNA replication, RNA transcription, protein synthesis, gene expression, and molecular evolution. Letter grading.

122. Ecology. (4) Lecture, three hours; discussion, two hours. Requires: course 100, Life Sciences 1 or 7B. Designed for departmental majors specializing in environmental and population biology. Introduction to population and community ecology, with emphasis on growth and distributions of populations, interactions between species, and structure, dynamics, and function of communities and ecosystems. P/NP or letter grading.

123A-123B. Field Marine Ecology. (4 or 8 each) Lecture, five weeks; laboratory, 15 hours. Requires: courses 123A and 123B taken concurrently. Offered either as 4- or 8-unit field course given off campus as part of Marine Biology Quarter. Survey of current topics in marine ecology, including analysis of primary research literature combined with field study of ecology of marine organisms, populations, communities, and ecosystems. Original research project required. Letter grading. 123A. In residence at research station located outside continental U.S. 123B. In residence at research station located within U.S., including Alaska and Hawaii.

124A-124B. Field Ecology. (4 or 8 each) Lecture, five weeks; laboratory or field trip, 15 hours. Requires: course 100, Life Sciences 1 or 7B. Offered either as 4- or 8-unit course offered only as part of Field Biology Quarter. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five to six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Letter grading.

C126. Behavioral Ecology. (4 or 8) Lecture, three hours; discussion, two hours. Requires: course 100, Life Sciences 1 or 7B. Offered either as 4- or 8-unit course offered only as part of Field Biology Quarter. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five to six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Concurrently scheduled with course C242. Letter grading.
125. Soils and Environment. (4) Lecture, three hours; discussion, one hour; field trips. General treatment of soil forming processes, soil classification, pedologic, physiologic, and morphologic properties of soils, and soil management as related to plant growth and distribution. P/NP or letter grading.

125TL. Soils and Environment: Field. (1) (Same as Environment M102L and Geography M102L.) Laboratory, two hours; field excursions. Corequisite: course M127. Investigation of supporting material in course M127, including excavating, describing, and naming soils in field, soil forming processes, geomorphology, and soils. P/NP or letter grading.

128. Plant Physiological Ecology. (5) Lecture, three hours; laboratory, three hours; one two-day field trip. Requisites: Life Sciences 1 or 7B, Physics 1C and 4BL, or 5B or 6C. Study of plant/environment interactions under natural conditions. Transpiration and photosynthesis, leaf temperature, and water movement in soil/plant/atmosphere continuum. Letter grading.

129. Animal Behavior. (4) Lecture, three hours; discussion, two hours. Requisites: course 100, Life Sciences 1 or 7B. Behavioral ecology: Methods and results of evolutionary approaches to study of animal behavior, including foraging strategies, social control of group behavior, cooperation, and social organization. Letter grading.

131. Ecosystem Ecology. (4) (Same as Geography M110.) Lecture, three hours; field trips, Requisite: Geography 1 or Life Sciences 7B. Designed for juniors/seniors. Development of principles of ecosystem ecology, with focus on understanding links between ecosystem structure and function. Emphasis on energy and water balances, nutrient cycling, plant-soil-microbe interactions, landscape heterogeneity, and human disturbance to ecosystems. P/NP or letter grading.

132. Field Behavioral Ecology. (8) Lecture, two hours; laboratory/field trip, 10 hours. Requisites: course 100, Life Sciences 1 or 7B. Recommended: course 129. Five-week course as part of Field Behavior Quarter. Field research in behavioral ecology, emphasizing animal communication. Design and execution of individual and small group field projects during extended field trip. Letter grading.

133. Elements of Theoretical and Computational Biology. (4) Lecture, three hours; discussion, one hour; laboratory, two hours. Requisites: Life Sciences 1, 2, 3, 4, 23L, and Mathematics 3A, 3B, and 3C, or 31A and 31B, or Life Sciences 30B. Strongly recommended: elementary statistics course. Introduction of basic core mathematical ideas and models necessary to understand contemporary ecology and evolutionary biology. Population ecology and growth, Reproduction, population ecology, population genetics, natural selection. P/NP or letter grading.

134. Field Physiological Ecology of Desert Animals. (8) Fieldwork, 15 hours. Requisite: Life Sciences 1 or 7B. Recommended: course 100. Two weeks of off-campus research projects with two-week lecture course (four hours per day) and offered only as part of Field Biology Quarter. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in arid habitat. Students carry out supervised research projects, then write up and orally present their results in seminar. Letter grading.

136. Ecological Restoration. (4) Lecture, two and one half hours; laboratory, three hours; three field trips. Requisites: course 100, Life Sciences 1 or 7B. Study of ecosystems that have been degraded by overuse or unnecessary extraction. Course develops foundation of restoration ecology including historical knowledge, reference sites, soil preparation, biodiversity, California natives, succession, disturbances, and best management practices for landscapes. Students learn to identify classic symptoms of unhealthy ecosystem and important metrics to determine if and when ecosystem is recovering. Students evaluate a site in the Los Angeles region in order to develop site and vegetation maps, conduct soil and water tests, and assess overall health of area. Students develop recommendations for restoration plan. Mandatory all-day field trips. Letter grading.

137. Chemical Communication. (4) Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL, Life Sciences 1, 2, 3, 23L. Chemical signals and communication in organisms which by which organisms communicate. Exploration of how chemical signals are produced, transported, and influence behavior of microbes, plants, and animals. Synthesis of principles and emphasis on applications to cellular biology, physiology, and ecology. P/NP or letter grading.

139. Introduction to Chemical Oceanography. (4) (Same as Atmospheric and Oceanic Sciences M103.) Lecture, three hours; discussion, one hour. Introduces course for physical sciences, life sciences, and engineering majors interested in oceanic environment. Chemical composition of oceans and nature of physical, chemical, and biological processes governing this composition in past and present. Cycles of major and minor oceanic constituents, with focus on those that are most important to life. Trace elements and anions (phosphorus, silicon, and oxygen). Investigation of primary production, export production, remineralization, diagenesis, air-sea gas exchange processes. Letter grading.

140. Biology of Marine Mammals. (4) Lecture, three hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Examination of evolution, systematics, natural history, anatomy, physiology, and conservation of marine mammals. Overview of phylogeny of eutherian mammals, porpoises, pinnipeds, sirenians, marine otters, and polar bear. Through lectures and readings from recent primary literature, students gain understanding of special adaptations of marine mammals that allow them to inhabit the marine environment. Emphasis on how marine mammals inhabiting the marine environment. Laboratory includes experimental studies of local marine organisms, with emphasis on primary and secondary production and nutrient flux. Letter grading.

netics in most diverse and inclusive of biological sciences. Fields as divergent as medicine and evolution require understanding of fundamental concepts of heredity and individuals 127. Populations. Many important social questions require understanding of genetics for informed decision making. Study of foundations of genetics at level expected of students gain understanding of some social implications of various aspects of genetics, and tools necessary to form informed opinions on these issues. Letter grading.

150L. Principles of Genetics Laboratory. (4) Laboratory, four hours. Corequisite: course 150. Genetics is most diverse and most inclusive of biological sciences. This course utilizes experimental and theoretical methods to explore the mechanisms that determine which species are present or absent from various populations. Experiments used to make discoveries about plant adaptation. Letter grading.

151A. Tropical Ecology. (4) Lecture, one hour; discussion, two hours. Required: Life Sciences 1 or 7B. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of range of tropical ecosystems. Discussion of subjects such as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. P/NP or letter grading.

151B. (BY) Lecture, three hours; fieldwork, five hours. Required: course 100, Life Sciences 1 or 7B. Two weeks of off-campus research projects followed by two-week lecture course and offered as part of the UCLA Biology Quarter. Introduction to biodiversity, community structure, and dynamics and ecosystem function in tropical forest habitat. Letter grading.

152. World Vegetation Ecology and Ecophysiology. (4) Lecture, three hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Diversity of physiologial and ecological adaptations in biomes of world, explaining distribution and dynamics of world vegetation types. Focus on processes across scales from cells to ecosystem to globe, instrumentation for environmental and ecophysiological measurements, and experiments used to make discoveries about plant adaptation. Letter grading.

153. Physics and Chemistry of Biotic Environments. (4) Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B, and 14BL (or 20A, 20B, and 20L). Life Sciences 1. Recommended: Life Sciences 1. Chemical and physical principles that are critical to functional responses by organisms to their habitats. Focus is integrative, providing comprehensive training in basic sciences of physics and chemistry to provide training in approaches and instrumentation for making physiological adaptations of marine vertebrates to interface is one of most biologically rich, yet challenging

155. Biological Modeling: Mathematical and Computational Approaches. (5) (Same as Computational and Systems Biology M150.) Lecture, four hours; laboratory, three hours. Required: Life Sciences 7A, 7B, 7C, or 5A. Focus on processes across scales from cells to ecosystem to globe, instrumentation for environmental and ecophysiological measurements, and experiments used to make discoveries about plant adaptation. Letter grading.

156. Introduction to Diversity, Health Disparities, and Environment. (2) Seminar, one hour; discussion, one hour. Required: Life Sciences 7B. Focus on interconnection of health disparities and environment. Seminar includes guest presentations about environmental determinants of health, and panel discussions focused on careers addressing health disparities. Discussion where students deconstruct research talks to better understand science and how research on health disparities is conducted. Entry course for three-quarter UCLA-Howard Hughes Medical Institute Health Disparities program. Letter grading.

158. Field Biology of Marine Fishes. (4) Lecture, five hours; laboratory and fieldwork, 15 hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL. Life Sciences 1, 3, and 23L, or 7A, 7B, and 23L. Highly recommended: course 11. Five-week intensive course offered only as part of Marine Biology Quarter. Survey of higher vertebrates living in marine habitats, including estuarine amphibians, marine reptiles and birds, and marine mammals. Laboratory emphasizes observational and experimental approaches to study of morphology, systematics, ecology, and behavior of local marine birds and mammals. Given off campus at marine science center. Letter grading.

165. Ecological Physiology of Marine Vertebrates. (4) Lecture, five hours; fieldwork, 15 hours. Enforced requisites: course 100, 101B, or 102B. Recommended: Chemistry 14B or 20B and 30AL. Life Sciences 1, 3, 23L. Recommended: Life Sciences 30B or Mathematics 3C or 32A, and Physics 1C and 4BL, or 5C or 6CH. Five-week intensive course offered only as part of Marine Biology Quarter. Introduction to physiological adaptations of marine vertebrates to major physicochemical variables in world oceans and to major marine habitats. Given off campus at marine science center. Letter grading.

166. Biology of Marine-Land Interface. (4) Lecture, five hours; fieldwork, 15 hours. Required: one 100, 101B, or 102B. Recommended: Chemistry 14B or 20B and 30AL. Life Sciences 1, 3, 23L, or 30AL. Life Sciences 1, 3, 23L. Recommended: Life Sciences 30B or Mathematics 3C or 32A, and Physics 1C and 4BL, or 5C or 6CH. Five-week intensive course offered only as part of Marine Biology Quarter. Introduction to physiological adaptations of marine vertebrates to major physicochemical variables in world oceans and to major marine habitats. Given off campus at marine science center. Letter grading.
167. Natural History Collections in Biological Science (4). Lecture: two hours and one half hours; discussion, one hour. Requisite: Life Sciences 7B. Consideration of how natural history collections play vital role in research, learning, and engagement. Topics include history of museum collections; history of naming species; collection curation; collections-based research; decolonization and diversity, equity, accessibility, and inclusion practices; and education and outreach using museum collections. Students learn to curate collections and gain understanding of how collections are used for education, outreach, and research. Letter grading.

167L. Natural History Collections in Biological Sciences Laboratory (4). Laboratory, four hours. Requisite: course 167 (may be taken concurrently). Consideration of how natural history collections play vital role in research, learning, and engagement. Topics include history of museum collections; history of naming species; collection curation; collections-based research; decolonization and diversity, equity, accessibility, and inclusion practices; and education and outreach using museum collections. Students learn to curate collections and gain understanding of how collections are used for education, outreach, and research. Letter grading.

168. Global Change Ecology (4). Lecture, three hours; discussion, one hour. Exploration of physical climate system and its variability, carbon cycle and related biogeoeconomy and ecosystem processes, land-use change, urbanization, and interactions among ecosystems, climate, biosphere, and human societies. Impact of global change on societally relevant issues and concerns. Global change ecology is field at interface between ecological systems and all aspects of environmental change that affect multiple components of globe. Focus on use of observations and models, consideration of multiple scales of change (temporal and spatial), interaction of human behaviors and choices with natural systems, and linkages across different aspects of global change science. Letter grading.

170. Animal Environmental Physiology (6). Lecture, three hours; laboratory, six hours. Requisites: Chemistry 14D, or 30B and 30BL, Life Sciences 1, 2, 3, 4, and 23L, or Mathematics 3C or 32A, Physics 1C and 4BL, or 5B or 23L, or Life Sciences 1, 2, 3, 4, 14D, or 30B and 30BL, Life Sciences 1, 2, 3, 4, or 14D. Not open for credit to students with credit for Physiological Science 166. Designed for Ecology, Behavior, Evolution, and Development majors. Introduction to physiological function (of) animal organs and organ systems, with emphasis on environmental interactions and ecological adaptations. Letter grading.

171. Evolution and Sex (4). Lecture, three hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Fitness dynamics of reproduction when females and males are in conflict over reproductive decisions, with focus on animals with human examples as appropriate. Emphasis on natural selection thinking, sexual selection, and origins of sexual conflict, including Fisherian sex allocation, evolution of manipulation through deceptive communication, and theory of Darwinian sexual conflict. Letter grading.

176. Ecological Ethics. (4). Seminar, two hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Debates and discussions on current ethical considerations relevant to fields of ecology, evolution, conservation, and behavior. Letter grading.

177. Practical Computing for Evolutionary Biologists and Ecologists. (4). Lecture, three hours; laboratory, two hours. Requisite: Life Sciences 1 or 7B. Introduction to fundamental skills needed for data analysis, and visualization of large data sets. Basic programming and scripting in Python as well as working in shell, regular expressions, and related topics. Concurrently scheduled with course C234. Letter grading.

M178. Computational Systems Biology: Modeling and Simulation of Biological Systems. (5) (Same as Bioengineering 178 and Systems Biology M186, and Computer Science CM186.) Lecture, four hours; laboratory, two hours; discussion, one hour. Requisites: Life Sciences 30A, 30B, Mathematics 32A or 32T, 33A, and 33B, or Mathematics 31A, 31B, 32A or 32T, 33A, and 33B. Dynamic bio-system modeling and computer simulation methods for studying biological/biomedical processes and systems. Introduction to modeling of linear and nonlinear control system, multicompart- mental, epidemiological, pharmacokinetic, and other biomodeling methods applied to life sciences problems at cellular, tissue, and population levels. Both theory- and data-driven modeling, with focus on translating biomodeling goals and data into dynamical mathematical models, and implementing them for simulation, quantification, and analysis. Numerical simulation, optimization, and parameter identifiability and search algorithms, with model discrimination and analysis and software exercises in PC laboratory assignments. Letter grading.

C179. Communicating Science to Informal Audiences (4). Lecture: two hours; discussion, one hour. Requisites: courses 158, 187. Science communication is essential skill for advancing scientific research and society. Students work collaboratively to communi- cate results of original research using forms (e.g., written paper and/or multimedia presentation) and/or informal (e.g., video, brochure, digital media, etc.) forms of science communication. Students also create interactive communication piece (website, podcast, video) about what they learned through process of research that could be shared with broad audience. Concurrently scheduled with course C237. Letter grading.

190A-190B. Seminars: Biology and Society. (2–4) Seminar, two hours (course 190A) and four hours (course 190B). Investigations and discussions of current socially important issues involving substantial bio- logical considerations, either or both as background for policy and as consequences of policy. May be repeated once for credit with instructor change. Letter grading.

191. Parasitology. (4). Lecture, three hours; laboratory, two hours. Requisites: Life Sciences 1, 3, and 23L, or 7A, 7B, and 23L. Introduction to principles, biology, and evolution of infectiousness, symbiosis, and parasitism, emphasizing protozoan and helminthic parasites, including those of man.

193. Finding Ecological Solutions to Environmental Problems. (4) Seminar, two hours; discussion, two and one half hours. Requisite: course 100. Ecological problem-solving in which students work with teams of student (e.g., non-profit, governmental) to research and pro- pose solutions to diverse ecological problems. Students learn practical skills to apply ecological science to solving of diverse and interdisciplinary environ- mental problems, in intimate and participatory environ- ment. Students learn and are expected to produce high-quality academic work at professional level. Letter grading.

194. Evolution, Development, and Disease. (4) Lecture, three hours; discussion, one hour. Requisite: Life Sciences 7B. Recommended prerequisite: course 103, 110, 120, M157, C174, or 185. Exploration of development- al mechanisms underlying human disease design, including impacts of environment on these mechanisms. Exploration of what happens to animal form, including that of humans, when these develop- mental mechanisms are disrupted by environmental and genetic factors. Letter grading.

195. Evolutionary Medicine. (4) Lecture, two and one half hours; discussion, one hour. Requisite: Life Sciences 7B. Not open for credit to students with credit for course 120. Designed for departmental ma- jors specializing in environmental and population biology and medicine. Introduction to mechanisms and effects of evolution, with emphasis on natural se- lection, population genetics, speciation, evolutionary rates, and patterns of adaptation. Coverage of funda- mental principles of evolution, with special focus on human disease and human health. Letter grading.

196. Evolutionary Medicine: Clinical Perspective on Medical, Surgical, and Psychiatric Disorders. (4) Lecture, three hours; discussion, one hour. From breast cancer and heart failure to self-injury, obses- sive-compulsive and eating disorders, all com- temporary medical issues have evolutionary roots. Under- standing of application of evolutionary thought to issues faced by physicians, veterinarians, psycholo- gists, and other healthcare workers: awareness and understanding of evolutionary roots of these disorders provides future healthcare providers
with expanded perspective that enhances their practice and benefits their patients in whatever field they enter. Letter grading.

187. Variable Topics in Ecology and Evolutionary Biology. (1-4) Seminar, three hours. Prerequisites: Requisites: Life Sciences 1, 2, 3, 4, and 23L, or 7A, 7B, 7C, and 23L. Investigation, discussion, and study of current important issues involving substantial biological considerations in ecology and evolutionary biology. Consult Undergraduate Advising Office for current topics. May be repeated for credit. P/NP or letter grading.

188. Special Courses in Ecology and Evolutionary Biology. (1-12) Seminar, three hours. Departmentally sponsored temporary or long-term course. May be repeated for credit as directed by faculty. Letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Colloquium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Colloquium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to develop and complete USIE course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

188CH. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

190. Research Colloquium in Ecology and Evolutionary Biology. (1) Seminar, one hour. Designed to bring together students undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. P/NP grading.

191. Variable Topics Research Seminars: Ecology and Evolutionary Biology. (4) Seminar, three hours. Seminar on research methodology and evolution of biology. Consult Schedule of Classes for topics and instructors. If consent is approved in advance by Undergraduate Advising Office, undergraduate departmental majors may petition to use course to satisfy or partially satisfy elective requirement. May be repeated for credit with consent of instructor. P/NP or letter grading.

192A-192D. Undergraduate Assistant in Ecology and Evolutionary Biology. (2-4) Seminar, 12 hours (course 192A) and six hours (course 192B). Limited to juniors/seniors. Training and supervised practicum for advanced undergraduate students in assisting faculty with courses related to biology. Students assist in preparation of materials and development of innovative programs with guidance of faculty members in small course settings. Consult Undergraduate Advising Office for further information. May not be applied toward course requirements for departmental majors. May be repeated for credit. P/NP grading.

193. Journal Club Seminars: Ecology and Evolutionary Biology. (1) Seminar, two hours. Enforced corequisite: one course from 198A through 198D or 199. Designed to encourage participation and stimulate progress in specific research areas for undergraduate students who are part of departmental research group or independent students. Discussion of use of specific research methods and current literature in field or of research of faculty members or students. May be repeated for credit or letter grading.

194A. Research Group or Internship Seminars: Access to Research Careers. (2) Seminar, six hours. Designed for juniors/seniors in research traineeships or those who have strong interest in pursuing graduate study in molecular, biochemical, physiological, or biomedical fields. Weekly presentation and discussion of papers selected from current literature. No more than 4 units may be applied toward departmental majors. May be repeated for credit. Letter grading.

194B. Research Group or Internship Seminars: Ecology and Evolutionary Biology. (1) Seminar, two hours. Enforced corequisite: one course from 198A through 198D or 199. Designed to encourage participation and stimulate progress in specific research areas for undergraduate students who are part of departmental research group or independent students. Discussion of use of specific research methods and current literature in field or of research of faculty members or students. May be repeated for credit or letter grading.

195. Community or Corporate Engagement in Ecology and Evolutionary Biology. (4) Tutorial, 12 hours. Internship course for juniors/senior to be supervised by Center for Community Learning, fieldwork site, and faculty adviser. Consult Undergraduate Advising Office for more information. Students meet on regular basis with instructor and provide periodic reports of their experience. May not be applied toward requirements for departmental major. May be repeated twice for credit. Individual contract with supervising faculty member required. P/NP grading.

196. Research Apprenticeship in Ecology and Evolutionary Biology. (2 to 4) Tutorial, three hours per week. Limited to juniors/seniors. Entry-level research apprenticeship for upper-division students under guidance of faculty mentor. May be repeated for credit. Individual contract required. P/NP or letter grading.

198A-198D. Honors Research in Ecology and Evolutionary Biology. (4 each) Tutorial, 12 hours. Designed for juniors/seniors. Supervised individual research designed to broaden and deepen students’ knowledge of specific research areas. Honors content noted on transcript. Ecology and Evolutionary Biology Department faculty for at least two terms and for total of at least 8 units. Eight units may be applied toward departmental majors. Individual research projects (198A) and letter (198B) grading. Students may elect to enroll in additional research through courses 198C and 198D (letter grading). Report on projects must be presented to undergraduate adviser each term 198 course is taken.

199. Directed Research in Ecology and Evolutionary Biology. (2 to 4) Tutorial, six to 12 hours. Preparation: submission of written proposal outlining study or research to be undertaken; involve laboratory or field-related research, not literature surveys or library research. Proposal to be developed in consultation with instructor and submitted for approval to undergraduate adviser. Begins in that term. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. At end of term culminating report describing progress of study research may be submitted. Student and instructor must be presented to undergraduate adviser. Only one 199 course may be applied toward departmental majors. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses

200A. Evolutionary Biology. (4) Formerly numbered M200A). Lecture, two hours; discussion, two hours. Current concepts and topics in evolutionary biology, including microevolution, speciation and species concepts, analytical biogeography, adaptive radiation, mass extinction, community evolution, molecular evolution, and development of evolutionary thought. S/U or letter grading.

200C. Advanced Animal Behavior. (4) Lecture, two hours; discussion, two hours. Survey of major topics in field of behavioral ecology. Topics include introduction to variety of research pursuits in field and questions and debates at leading edges of research. Advanced interdisciplinary projects span topics from mechanisms of behavior at molecular and cellular levels to consequences of behavior for Darwinian fitness and ecological and evolutionary processes. S/U or letter grading.

201. Introduction to R for Ecology and Evolutionary Biology. (1) Lecture, six hours; discussion, six hours. Designed for departmental PhD students. Offered as intensive two-day course at beginning of term. Introductory R language. Topics include working at command line, writing scripts and functions, flow control, graphics, and conducting basic simulations in discrete and continuous time. S/U grading.

203. Marine Botany and Physiology. (4) Lecture, two hours; discussion, one hour; laboratory, six hours; experimental project. Designed for graduate students. Structure, reproduction, life histories, and biology of marine algae, with emphasis on physiological ecology and biochemistry. Techniques in culture and physiological, ecological, and biochemical investigation of algae. Given off campus at marine science center. S/U or letter grading.

204. Advanced Biology of Algae. (4) Lecture, four hours; discussion, one hour. Consideration of current research in experimental and applied experimentation. Topics include disease resistance in algae, biotechnological manipulation of algae, and evolutionary theory. S/U or letter grading.

205. Marine Invertebrate Biology. (4) Lecture, four hours; laboratory, eight hours. Functional morphology, life histories, and systematics of marine invertebrates of all major and minor taxa; emphasis on living animal and its habitat. Given off campus at marine science center. S/U or letter grading.

206. Advanced Ichthyology. (4) Lecture, three hours; laboratory, three hours. Requisite: course 111 or 112. Advanced study of various aspects of fish biology. Theme varies from year to year. May be repeated for credit. S/U or letter grading.

208. Advanced Vertebrate Morphology. (4) Lecture, two hours; laboratory, eight hours. Requisite: course 110. Emphasis on functional approach to evolution of vertebrate locomotor, feeding, and circulatory systems. Laboratory includes comparative and experimental analyses of morphological adaptation. Independent project required. May be repeated once for credit. S/U or letter grading.

209. Behavior of Arthropods. (4) Lecture, three hours; discussion, one hour. Advanced study of topics in behavior of terrestrial arthropods, including communication, feeding, reproductive, and social behavior. Emphasis on both mechanistic and adaptive approaches toward understanding behavior. Independent project required. S/U or letter grading.
210. Advanced Ornithology. (4) Lecture; two hours, laboratory; two hours; fieldwork; two hours. Requisite: course 114A. Advanced study of topics in modern avian biology. Emphasis on experimental approaches to investigations of physiology (energetics, nutrition, osmoregulation), ecology (population and community organization), and behavior (foraging, breeding, sociability). S/U or letter grading.

217. Marine Biology. (4) Lecture, four hours; discussion, one hour. Designed for graduate students. Structure, diversity, and energetics of marine communities; behavior, population dynamics, and biogeography of component species; association with oceanic phenomena; and geology. Given off campus at marine science center. S/U or letter grading.

C219A. Mathematical and Computational Modeling in Ecology. (4) Lecture, three hours; discussion, one hour. Requisite: Life Sciences 30B or for continuing students 31A, 31B, 100, 122, Life Sciences 1 or 7B, Mathematics 3C. Introduction to modeling ecological systems, including formulation of mathematical models. Basic techniques of scientific programming; probability and stochastic modeling, and methods to relate models to data. Examples from ecology but techniques and principles are applicable throughout life and physical sciences. Concurrently scheduled with course C219A. S/U or letter grading.

C219B. Modeling in Ecological Research. (4) Lecture, two hours; discussion, two hours. Recommended requisite: course C219A. Advanced techniques in mathematical and computational modeling of ecological dynamics and other population dynamic problems. Independent research projects developed by students. Topics: stochastic modeling, chaotic models, fitting models to data, sensitivity analysis, presentation of model results, and other topics from current literature. Concurrently scheduled with course C219B. S/U or letter grading.

220. Conservation Science: Theory and Practice. (3) Lecture, three hours. Limited to graduate students. Conceptual foundations of conservation science and its applications to real-world conservation problems. Designed to help students intending to become conservation biologists and to want them to learn about conservation in a way that may make research immediately relevant, and those who intend to be conservation practitioners and want to understand the scientific and social dimensions of conservation. Six-week intensive course designed to train marine biologists in advanced techniques of cell and molecular biology. Independent project required. Given off campus at marine science center. S/U or letter grading.

M225. Global Health Measures for Biological Emergencies. (4) (Same as Epidemiology M226.) Lecture, four hours. Requisite: Epidemiology 200. Mitigation of bioterrorism falls outside traditional public health programs and public health graduate education. Because of seriousness of such threats, it is important that individuals trained in public health understand problems and responses. Letter grading.

C228. Earth Process and Evolutionary History. (6) (Same as Earth, Planetary, and Space Sciences CM228.) Lecture, four hours; laboratory, two hours. Requisite: Life Sciences 1 or 7B. Introduction to fundamental skills needed for manipulation, analysis, and visualization of large data sets. Basic programming and data analysis as well as working in shell, regular expressions, and related topics. Concurrently scheduled with course C177. Letter grading.

237. Communicating Science to Informal Audiences. (4) Lecture, three hours; discussion, one hour. Requisites: courses 158, 187. Science communication is a key skill for advancing scientific research and society. Students work collaboratively to communicate results of original research using formal (e.g., written paper and poster, multimedia presentation) and informal (e.g., video, brochure, digital art, etc.) forms of science communication. Students also create reflective communication piece (written, podcast, video) about what they learned through process and what they have learned that could be shared with broad audiences. Concurrently scheduled with course C179. Letter grading.

M238. Ocean Biogeochromic Dynamics and Climate. (4) (Same as Atmospheric and Oceanic Sciences M235.) Lecture, three hours, discussion, one hour. Designed for graduate students. Study of formation of matter offers insights into understanding the distribution and flux of carbon, oxygen, and nutrients in the ocean. Application of oceanic general circulation models enables prediction of future changes in the ocean. S/U or letter grading.

240. Physiology of Marine Animals. (4) Lecture, four hours; discussion, one hour. Designed for graduate students. Lecture and laboratory. Structure, tissue, organ, and animal physiology; regulatory biology; metabolic characteristics of cells, energy transduction. Given off campus at marine science center. S/U or letter grading.

C242. Behavioral Ecology. (4) Lecture, three hours; discussion, two hours. Requisites: course 100, Life Sciences 1 or 7B, Mathematics 3C or 32A or Life Sciences 30B. Recommended: course 129. Evolutionary perspective of behavioral ecology, with extended consideration of selfish DNA, conflict with genomes, natural selection and coevolution, kin selection and diversification, the role of sex, group living, and life history theory. S/U or letter grading.

243. Animal Communication. (4) Lecture, three hours; laboratory, two hours. Requisites: courses 100, 170, Life Sciences 7A, 7B, 7C, and one of Physics 1C and 4BL or 6C or 6CH, and one of Physiology 190A or 32A, and Physics 1C and 4BL or 6C or 6CH. Physical properties of animal signals and physiological mechanisms underlying their generation and reception. Lecture, discussions, laboratory, formal presentation. Students also present a short talk, write a term paper, and submit a project manuscript. Letter grading.

244. Advanced Insect Physiology. (4) Lecture, two hours; laboratory, five hours. Detailed discussion of current problems in insect physiology, with advanced laboratory. S/U or letter grading.

C246. Conservation Genetics. (4) Lecture, three hours; discussion, one hour. Requisites: course 150 or Life Sciences 170, Life Sciences 7A, 7B, 7C. Conservation genetics is interdisciplinary field that integrates genetic methods and concepts from population genetics, evolutionary biology, molecular ecology, and systematics to understand how to conserve and manage populations and species of natural organisms, and understand genetic processes underlying why some go extinct. Case studies of plants and animals. Linkage, population size, and inbreeding depression; landscape change and genetic connectivity of populations; climate change and local adaptation; management of wild and natural populations and species. Concurrently scheduled with course C146. S/U or letter grading.

392 / Ecology and Evolutionary Biology
247. **Advanced Plant Biology.** (4) Lecture, three hours; discussion, two hours. Requisite: course 162 or Molecular, Cell, and Developmental Biology C141. Open to undergraduates with consent of instructor. Described to expose first-year graduate students to topics of current interest in plant biology. Subjects include plant genetics, growth and development, organelle structure, development and function, and plant-specific metabolic processes (photosynthesis, nitrogen fixation, metabolism of small molecules). S/U or letter grading.

250. **Professional Skills for Biological Research.** (2 to 3) Seminar, two hours. Preparation, writing, and submission of research proposals. Collection and maintenance of field and laboratory data, preparation of scientific presentations, review of literature, and publishing strategies. Optional field trip offered during some years for 1 extra unit. S/U or letter grading.

251. **Seminar: Systematics.** (2) Seminar, two to four hours. Current topics in systematic biology, including methods development and specific applications in study of phylogeny. Theme varies from year to year. May be repeated for credit. S/U or letter grading.

253. **Seminar: Plant Structure.** (2) Seminar, two hours. Requisite: course M200A. Interest in population genetics, such as kin selection, sociobiology, cultural evolution, conservation genetics, etc. S/U or letter grading.

255. **Seminar: Invertebrate Zoology.** (2) Seminar, two hours. S/U or letter grading.

256. **Molecular Ecology of Plant Populations.** (2) Seminar, two hours. Requisite: course M200A. Integration of ecological, population genetic, and evolutionary concepts to understand evolutionary ecology and conservation biology of plant populations in natural and disturbed settings, with application to both terrestrial and aquatic systems. Letter grading.

262. **Seminar: Population Genetics.** (2 or 4) Seminar, three to six hours. Seminar on topics of current interest in population genetics, such as kin selection, sociobiology, cultural evolution, conservation genetics, etc. S/U or letter grading.

264. **Seminar: Stomatal Function.** (4) Seminar, two hours; discussion, two hours. Open to undergraduates with consent of instructor. Structure and function of guard cells; gas exchange; environmental and hormonal regulation of stomatal response; transduction; stomatal adaptations. S/U or letter grading.

265. **Seminar: Biophysical Plant Ecology.** (2) Seminar, two hours. S/U or letter grading.

267. **Seminar: Current Topics in Evolutionary Ecology.** (2) Seminar, two hours. S/U or letter grading.

268. **Seminar: Population Biology.** (2) Seminar, two hours. S/U or letter grading.

269. **Seminar: Animal Ecology.** (2) Seminar, three hours. Advanced study of specific topics in animal ecology and related fields. S/U or letter grading.

270. **Seminar: Environmental Physiology.** (2) Seminar, two hours. S/U grading.

272. **Seminar: Marine Biology.** (2) Seminar, two hours. S/U or letter grading.

273. **Seminar: Entomology.** (2) Seminar, two hours. Discussion of specific topics in entomology and related fields varies from year to year, but usually emphasizes areas such as behavior, ecology, and evolution. S/U grading.

274. **Seminar: Behavioral Ecology.** (2) Seminar, two hours. Discussion of theoretical and empirical aspects of topics in behavioral ecology. S/U or letter grading.

279. **Seminar: Evolutionary Biology.** (2) Seminar, two hours. Requisite: course M231. Emphasis on particular issue in evolutionary biology, varying in topic whenever offered. Topics may include advances in phylogenetic methodology; relationship between development and evolution; biogeography, climate change, and faunal evolution; dispersal mechanisms and macroevolutionary patterns; adaptation and diversification; macroevolutionary patterns in fossil record. S/U or letter grading.

282. **Seminar: Ichthyology.** (2) Seminar, two hours. Requisite: course 111 or 112. Student presentations and discussion of specific topics in ichthyology. Theme varies from year to year. May be repeated for credit. S/U or letter grading.

M286. **Seminar: Statistical Problem Solving for Population Biology.** (2) (Same as Statistics M286.) Seminar, two hours. Nominal credit. Emphasis on statistical thinking and problem solving. Topics include data analysis, probability, and experimental design. S/U or letter grading.

291. **Seminar: Physiology and Biochemistry of Arthropods.** (2) Seminar, two hours. S/U or letter grading.

296. **Seminar: Ecology and Evolutionary Biology.** (1 to 4) Seminar, three hours. Advanced study and analysis of current topics in cellular, organismic, and population biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U or letter grading.

297. **Selected Topics in Evolutionary Ecology.** (1 to 4) Seminar, one to three hours. Advanced study and analysis of variable research topics in research issues in ecology and evolutionary biology. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor. S/U or letter grading.

299. **Seminar: Parasitology.** (2) Seminar, two hours. S/U or letter grading.

375. **Teaching Apprentice Practicum.** (1 to 4) Seminar, to be arranged. Preparation: apprentice per- sonnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U or letter grading.

495. **Preparation for Teaching Biology in Higher Education.** (2) Seminar, to be arranged. Designed for graduate students. Study of problems and methodologies in teaching biology, which includes workshops, seminars, apprentice teaching, and peer observation. S/U grading.

496. **Preparation for Teaching Biology in Higher Education.** (2) Lecture, two hours. Designed for graduate students. Strongly recommended as sequel to course 495 discussions on teaching, theory, and development of advanced skills. Study of methods and approaches to teaching of specific areas in biology, with emphasis on laboratory teaching, instructor/student interaction, and undergraduate motivation. S/U grading.

596. **Directed Individual (or Tutorial) Studies.** (2 to 12) Tutorial, to be arranged. Letter grading.

596F. **Directed Individual (or Tutorial) Studies.** (2 to 8) Tutorial, to be arranged. Given off campus at marine science center. S/U or letter grading.

598. **MA Thesis Research and Writing.** (2 to 12) Tutorial, to be arranged. S/U grading.
The undergraduate students are equally impressive. They are among the brightest students on campus and consistently go on to find success in the job market and in graduate school. Approximately 3,000 majors make the department the largest among major economics departments across the country, and one of the largest majors on campus. Students come from countries around the world, but the majority call California their home. Many are the first in their families to attend college, and the department is proud of them and their accomplishments.

An economics degree opens the door to a world of opportunities beyond UCLA. Department alumni play important roles in business, entertainment, and academia. Many maintain strong ties with UCLA and with the department. Undergraduate students go on to attend business school, law school, medical school, and graduate school in a variety of disciplines. Undergraduate Study

The Economics Department undergraduate program is designed for students who wish to gain a thorough understanding of both empirical and theoretical approaches to economics. Emphasis is on economic principles applied to resolving interpersonal conflicts of interest and coordinating productive activity in a world of scarce resources. Because students must gain a thorough theoretical and technical competence before extensive study of the applied specializations in the discipline, the analytic core of the major in Economics is closely structured. Some courses are appropriate for non-majors, but the curriculum is most suitable for students who wish to make the study of economics the primary focus in their undergraduate education.

The undergraduate major provides students with analytical training in reference to socio-economic phenomena and provides an excellent theoretical background for those pursuing graduate education in economics, law, management, public administration, journalism, social welfare, architecture and urban planning, and education.

Entry to the Major

Admission

Application for the Economics major should be submitted to the department undergraduate counseling office through the Message Center. To apply, students must have completed at least 72 quarter units (but no more than 135 quarter units), one 12-unit term in residence in regular session at UCLA, and all courses listed under preparation for the major. Grades for preparation for the major courses must be reflected on the Degree Audit Report (DAR) prior to submission.

Pre-major

While students are completing the lower-division preparation for the major courses, they may be classified as Economics pre-majors.

Transfer Students

Transfer applicants to the Economics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one microeconomics course, one macroeconomics course, two calculus courses from the mathematics/physical sciences sequence, and one English critical reading and writing course. Transfer students must successfully complete all remaining pre-major re-
Preparation for the Major

**Required:** Economics 1, 2, 11, 41; one Writing II course or English Composition 129B; Mathematics 31A, and 31B or 31E.

**The Major**

**Required:** Twelve upper-division economics courses as follows: Economics 101, 102, 103, 103L, 104, 104L, and six Economics Department upper-division elective courses. No more than two of the elective courses may also be selected from Management 120A, 120B, 122, 127A, 130A, 180 (real estate finance only).

**Honors Program**

Students must complete Economics 198A and 198B in which a thesis is written.

**Business Economics BA**

The Business Economics BA program offers a major for students seeking a business orientation in their study of economics. It does not replicate the traditional undergraduate business school curriculum. Instead, it offers a more tightly focused curriculum that is guided by the rigorous logic and integrative perspective of economics. It is designed to prepare students for graduate education in business, economics, and law. The program requires students to include specific courses offered by the department and the John E. Anderson Graduate School of Management (see the major).

**Learning Outcomes**

The Business Economics major has the following learning outcomes:

- Understanding, through application of microeconomics, of the interaction of individuals and organizations in markets; and of the role of public policy in shaping those interactions
- Understanding, through application of macroeconomics, of the functioning of market economies at regional, national, and global levels; and of the role of public policy in shaping those interactions
- Understanding and application of accounting principles to analysis of business problems
- Acquisition and use of data to evaluate hypotheses with tables, charts, and statistical analyses
- Use of appropriate analytical perspectives and approaches to frame problems involving the interaction of people, organizations, markets, and society; identify effective strategic approaches to problem solving; and gather and organize key information to facilitate problem solving

**Preparation for the Major**

Transfer credit for any of the above is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major.

**Transfer Students**

Transfer applicants to the Business Economics major must complete the following introductory courses prior to admission to UCLA: one microeconomics course, one macroeconomics course, two calculus courses from the mathematics/physical sciences sequence, one English composition/critical thinking course. Transfer students who wish to enter UCLA as Business Economics pre-majors must meet the admission screening requirements. For information, contact Undergraduate Admission.

Transfer credit for any of the above is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major.

**Entry to the Major**

**Admission**

Applications for admission by current UCLA students are handled exclusively by the Department of Economics. To apply, students must have completed at least 72 quarter units (but no more than 135 quarter units), one 12-unit fall, winter, or spring term in residence at UCLA, and all courses listed under preparation for the major. Applications are available on the undergraduate economics Bruin Learn website and are accepted online during the first three weeks of each quarter as well as summer session A. In addition, they must (1) have a 2.0 (C) minimum grade in each preparation course, (2) have a minimum 3.0 (B) overall average in all preparation courses excluding the Writing II course, and (3) have a minimum 2.0 (C) grade-point average in their upper-division courses taken for the major before applying (Economics 101 applies on the major preparation grade-point average).

The requisite grade-point averages plus completion of the preparation for the major courses do not guarantee admission to the program.

**Capstone Learning Outcomes**

- Demonstrate competence in economics, of the interaction of individuals and organizations in markets; and of the role of public policy in shaping those interactions
- Demonstrate understanding of microeconomics, of the functioning of market economies at regional, national, and global levels; and of the role of public policy in shaping those interactions
- Demonstrate understanding and application of accounting principles to analysis of business problems
- Demonstrate ability to use of data to evaluate hypotheses with tables, charts, and statistical analyses
- Demonstrate ability to use of appropriate analytical perspectives and approaches to frame problems involving the interaction of people, organizations, markets, and society; identify effective strategic approaches to problem solving; and gather and organize key information to facilitate problem solving

**Requirements**

**Preparation for the Major**

**Required:** Economics 102, 103, 103L, 104, 104L, and six Economics Department upper-division elective courses. No more than two of the elective courses may also be selected from Management 120A, 120B, 122, 127A, 130A, 140 (real estate finance only).
and may be selected from either the Economics 106 series or an economics elective.

Honors Program

Students must complete Economics 198A and 198B in which a thesis is written.

Policies

Preparation for the Major

Each course must be taken for a letter grade. For students admitted to UCLA in fall 2023 and later, repetition of more than two pre-major economics courses or of any preparation course more than once, including equivalent courses taken elsewhere, results in automatic denial of admission to the major.

For students admitted to UCLA prior to fall 2023, repetition of more than one preparation course or of any preparation course more than once, including equivalent courses taken elsewhere, results in automatic denial of admission to the major.

The Major

Each upper-division major course must be taken for a letter grade. Transfer credit for any of the major courses is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major. Laboratory courses are required for all upper-division economics courses when they are offered and listed as mandatory co-requisite.

To graduate, students must have a minimum 2.0 grade-point average in their upper-division major courses, with at least a C– in each course. (Economics 101 applies on the preparation for the major, therefore requiring a minimum grade of C.)

Honors Program

The departmental honors program is open to majors who have a cumulative grade-point average of at least 3.5 in the major and in all courses taken at UCLA prior to application. To qualify for departmental honors at graduation, students must (1) select at least seven of the required upper-division economics courses from the approved list designated for departmental honors, (2) complete a two-term senior thesis acceptable to the departmental honors committee in Economics 198A and 198B, and (3) complete the major requirements with at least a 3.5 grade-point average in the economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

Economics 198A and 198B, the courses required for thesis preparation, may be counted as upper-division courses toward the field in which the thesis is written (for purposes of satisfying the requirements for the major). More information and application forms are available from an undergraduate counselor in 2263 Bunche Hall.

Mathematics/Economics BS

See the Mathematics/Economics interdepartmental program section for a description of the major.

Graduate Majors

Economics MA, CPhil, PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Master of Quantitative Economics

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Economics

Lower-Division Courses

1. Principles of Economics. (4) Lecture, three hours; discussion, one hour. Not open to students with credit for former course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on application of resources and distribution of income through price system. P/NP or letter grading.

2. Principles of Economics. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 1. Not open to students with credit for former course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregate economic, including national income, monetary and fiscal policy, and international trade. P/NP or letter grading.

3A. Introduction to Investments. (2) Lecture, two hours. Introduction to investments. No previous financial, economic, or mathematics background required. Enforced prerequisites: courses 1, 2, Mathematics 31A, 31B, with grades of C or better. Laws of demand, supply, returns, and costs; price and output determination in different market situations. P/NP or letter grading.

3B. Introduction to Investments. (2) Lecture, two hours. Enforced requisite: course 3A. Broad introduction to investments. No previous financial, economic, or mathematics background required. Students learn organizing framework with which to understand investing landscape with highlight on key concepts and functionality related to business and personal investments. Topics include why financial markets exist and how they work, efficient market hypothesis, risk versus reward, investment styles, valuation techniques, simple quantitative analysis, power of compound interest and understanding capital asset pricing model, Sharpe ratio, and understanding asset’s beta, hedge funds. Serves as excellent introduction to career paths in finance and for those who want to increase their financial literacy. P/NP grading.

4. Introduction to Investments. (4) Lecture, two hours. Broader introduction to investments. No previous financial, economic, or mathematics background required. Enforced prerequisites: courses 1, 2, Economics 198A and 198B, the courses required for thesis preparation, may be counted as upper-division courses toward the field in which the thesis is written (for purposes of satisfying the requirements for the major). More information and application forms are available from an undergraduate counselor in 2263 Bunche Hall.

4C. Probability and Statistics for Economists. (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 1, 2, Mathematics 31A, 31B, with grades of C or better. Laws of demand, supply, returns, and costs; price and output determination in different market situations. P/NP or letter grading.

5. Economics for everyone. (5) Lecture, three hours; discussion, one hour. Introduction to models and tools used by economists in practical real-world context. Study of important topical issues such as health care and environmental policies. Students learn about available economic data sources and become better equipped to understand current events. May not be used to fulfill entrance requirements for any Economics Department major. P/NP or letter grading.

10P. Economics Toolkit: Introduction to Python for Economists. (4) Lecture, three hours. Python is commonly used programming language for data science. It is powerful and easy to learn tool that can be applied to make simple histograms or fit complicated machine learning models. Introduction to using Python for basic data exploration, analysis, and visualization. Emphasis on applications with economic data and econometric analysis. P/NP grading.

11. Microeconomic Theory. (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 1, 2, Mathematics 31A, 31B, with grades of C or better. Laws of demand, supply, returns, and costs; price and output determination in different market situations. P/NP or letter grading.

12. Introduction to Personal Finance. (4) Lecture, three hours; discussion, one hour. Introduction to personal finance. No previous financial, economic, or mathematics background required. Open to nonmajors. Covers wide array of topics with introductory level that are of interest to students on practical level and more broadly for students seeking to deepen their understanding of key features of financial system, financial institutions, and various aspects of personal finance encountered by typical household over their life cycle. Topics covered include: time value of money, types of loans most relevant to typical household, credit and debit cards, savings and investment, stocks and bonds, risk and diversification, personal income tax, social security, retirement, and savings plans, macroeconomic concepts, social security, Medicare, and aspects of behavioral economics. Letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

41. Probability and Statistics for Economists. (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 1, 2, Mathematics 31A, 31B, with grades of C or better. Not open to students with credit for former Statistics 11. Introduction to theory and practice of math-
ematical statistics with emphasis on its use in econometrics. Introduction of basic statistical concepts such as random variables, probability distributions, estimation, confidence intervals, and hypothesis testing. Letter grading.

98. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, presentations, other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors credit noted on transcript. P/NP or letter grading.

89H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors credit noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

103. Introduction to Econometrics. (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 11 and 41 or Mathematics 170A and 170B or 170E and 170F or 170E and 170F. Enforced corequisite: 103L. Introduction to theory and practice of univariate regression analysis with emphasis on its use in economics. Introduction to method of least squares, Gauss-Markov theorem, confidence intervals and hypothesis tests in univariate regression context, and standard errors in case of heteroscedasticity and serial correlation. Emphasis on applications with real data and computer software (R programming language) to implement discussed methods. P/NP or letter grading.

103L. Econometrics Laboratory. (1) Lecture, one hour; laboratory, one hour. Enforced requisites: courses 11, and 41 or Mathematics 170A and 170B or 170E and 170F or 170E and 170F and 170S or Statistics 100A and 100B. Enforced corequisite: 103T. Econometric analysis of case-based studies. Hands-on data collection and problem solving. Use of econometric software. P/NP or letter grading.

104. Data Science for Economists. (4) Lecture, three hours; laboratory, one hour. Enforced requisites: courses 11, 103. Enforced corequisite: course 104L. In-depth discussion of univariate regression. Introduction to estimation of multivariate regression, and confidence intervals and hypothesis tests in context of multivariate regression. Discussion of instrumental variables and two-stage models. Emphasis on hands-on experience on data analytics and real data applications. P/NP or letter grading.

106A. Economics in Practice. (4) Seminar, three hours. Enforced requisites: courses 11, 101, 102. Enforced corequisite: course 106EL. Lecture and discussion address three small problems and one large and more complex problem. Discussion of student-proposed solutions to problems in their groups, with small-group discussions of student presentations of results to class. Detailed coaching and feedback by MBA students on student analysis and presentations. Final written and oral presentations required. P/NP or letter grading.

106AL. Economics in Practice Laboratory. (1) Lecture, one hour; laboratory, one hour. Enforced corequisite: course 106A. Case-based analysis requiring students to apply material from course 106A to real-world problems regarding issues such as economic theory and empirical methods. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

106D. Designed Markets. (4) Lecture, three hours; discussion, one hour. Requisites: courses 11, 101. Enforced corequisite: course 106DL. Discussion of market designs, including theoretically designed, mostly by economists. Choices designers face when designing such markets. Markets and their context and corresponding economic models. Topics include matching between medical residents and hospitals, matching between high school students and New York and Boston high schools, kidney transplants, course allocation in business schools, eBay auctions, and prediction markets. Examination of how to optimize one’s actions out of outcomes in such markets. P/NP or letter grading.

106DL. Designed Markets Laboratory. (1) Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101, 106D. Enforced corequisite: course 106D. Case-based analysis requiring students to apply material from course 106D to real-world problems regarding topics such as matching between medical residents and hospitals, matching between high school students and New York and Boston high schools, kidney transplants, course allocation in business schools, eBay auctions, and prediction markets. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

106E. Economics of Entrepreneurship. (4) Lecture, three hours. Requisite: course 101. Enforced corequisite: course 106EL. Case-based analysis requiring students to apply material from course 106E to real-world problems regarding issues such as combining elements of strategy, market, and entrepreneurial finance courses. Examination of both strategic decisions of entrepreneurs (pricing, advertising, deterring entry) and more practical issues (funding, business plans, patents). Letter grading.

106EL. Economics of Entrepreneurship Laboratory. (1) Lecture, one hour; laboratory, one hour. Requisite: course 106E. Enforced corequisite: course 106EL. Case-based analysis requiring students to apply material from course 106EL to real-world problems regarding business plans, patents, property rights and asset ownership, boundaries of firms, employment versus independent contracting, internal organization of firms, role and levels of firm hierarchy. P/NP or letter grading.

106L. Organization of Firms Laboratory. (1) Lecture, one hour; laboratory, one hour. Enforced requisites: courses 11, 101, 106L. Enforced corequisite: course 106L. Case-based analysis requiring students to apply material from course 106L to real-world problems regarding issues such as combining elements of strategy, market, and entrepreneurial finance courses. Examination of both strategic decisions of entrepreneurs (pricing, advertising, deterring entry) and more practical issues (funding, business plans, patents). Hands-on data collection and problem solving and presentation of student analyses in writing with oral presentations. P/NP or letter grading.

106M. Financial Markets and Financial Institutions. (4) Lecture, three hours; discussion, one hour. Requisites: courses 11, 101, 106M. Enforced corequisite: course 106MML. Application of analytical tools of economics and finance to real-world problems in financial markets to link models students have learned in prior courses to patterns observed in financial markets and to understand when it is that further theoretical refinements are required to better account for certain observed patterns. Development of understanding of potential effects of monetary and regulatory policies on financial markets. Topics include bond market, stock market, foreign exchange market, financial crises, and financial regulation. Analysis and discussion of lessons of subprime crisis and European sovereign debt crisis. P/NP or letter grading.

106ML. Financial Markets and Financial Institutions Laboratory. (1) Lecture, one hour; laboratory, one hour. Enforced requisites: courses 11, 101, 102, 106ML. Enforced corequisite: course 106ML. Case-based analysis requiring students to apply material from course 106ML to real-world problems involving financial markets and financial institutions. Issues include potential effects of monetary and regulatory policies on financial markets. Topics include bond market, stock market, foreign exchange market, financial crises, and financial regulation. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

106SL. Economics of Technology and E-Commerce. (4) Lecture, three hours. Requisites: courses 11, 101. Enforced corequisite: course 106T. Examination of competitive strategy and competitive advantage using game theoretic models and case studies. Topics include economic tools to analyze world of technology and e-commerce. Examination of economic theory, empirical analysis, and case studies to study variety of new markets. Includes analysis of competition in two-sided markets, matching markets, and reputation mechanisms. Written case on one particular firm and presentation required. P/NP or letter grading.

106T. Economics of Technology and E-Commerce Laboratory. (1) Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101. Enforced corequisite: course 106T. Use of rigorous economic tools to analyze world of technology and e-commerce. Examination of economic theory, empirical analysis, and case studies to study variety of new markets. Includes analysis of competition in two-sided markets, matching markets, and reputation mechanisms. Written case on one particular firm and presentation required. P/NP or letter grading.

106VL. Investments Laboratory. (1) Lecture, one hour. Requisite: course 106VL. Corequisite: course 106T. Use of rigorous economic tools to analyze world of technology and e-commerce. Examination of economic theory, empirical analysis, and case studies to study variety of new markets. Includes analysis of competition in two-sided markets, matching markets, and reputation mechanisms. Written case on one particular firm and presentation required. P/NP or letter grading.

107. History of Economic Theory. (4) Lecture, three hours. Enforced corequisite: course 107. Economic history from early 20th century, concentrating on 18th and 19th centuries; special attention to selected writers, including Aristotle, mercantilists, Physiocrats, Hume, Smith, Malthus, Ricardo, Marx, and Keynes. Not open to students with credit for former course 123. P/NP or letter grading.

111L. Theories of Development. (4) Lecture, three hours. Requisites: courses 11, 101, 103. Corequisite: course 111L. Application of theoretical and empirical tools from microeconomics to provide insights into problems confronting low-income countries today and to evaluate policies that are likely to be effective in improving well-being of poorest on globe. P/NP or letter grading.

111L. Theories of Development Laboratory. (1) Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101, 103. Corequisite: course 111L. Case-based analysis requiring students to apply material from course 111L to real-world problems involving development, demand for healthcare, demand for insurance, pensions, labor, and capital, exchange rates and gains of trade. Effects of tariffs, quantitative restrictions, and international integration; effects of free and restricted trade on economic welfare and political stability. P/NP or letter grading.

121L. International Trade Theory Laboratory. (1) Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101, 103. Corequisite: course 121L. Case-based analysis requiring students to apply material from course 121L to real-world problems involving international trade. Topics and analysis include theory of international trade: bases, direction, terms, volume, and gains of trade; effects of tariffs, quantitative restrictions, and international integration; effects of free and restricted trade on economic welfare and political stability. P/NP or letter grading.

122L. International Finance Laboratory. (1) Lecture, one hour; laboratory, one hour. Requisite: course 102. Corequisite: course 122L. Not open to students with credit for former course 122L. Enforced corequisite: course 122L. Not open to students with credit for former course 122L. P/NP or letter grading.

123L. Forecasting Exchange Rates and Constructing Currency Portfolios Laboratory. (1) Lecture, one hour. Requisite: course 102. Corequisite: courses 11, 102, 103, 103L, or consent of instructor. Corequisite: course 123L. Construction of portfolio of currency assets in order to design computer codes to make real-time exchange rate forecasts by applying such models to real-world data. Different statistical tests to evaluate accuracy of forecasts and to assess risk-reward trade-offs of currency portfolios. P/NP or letter grading.

130L. Public Economics Laboratory. (1) Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101, 103. Enforced corequisite: course 130. Case-based analysis requiring students to apply material from course 130 to real-world problems involving government spending programs, taxation, deficit financing, and federal credit programs. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

131L. Economics of Health and Healthcare Labora-
tory, (1) Lecture, one hour; laboratory, one hour. En-
forced corequisites: courses 11, 101, 103. Enforced core-
quisite: course 140L. Case-based analysis re-
quiring students to apply theory from course 131 to
real-world problems regarding economics of health
and healthcare. Hands-on data collection and
problem solving and presentation of student analyses
both orally and in writing. P/NP or letter grading.

132. Topics in Taxation and Social Insurance. (4)
Lecture, three hours; discussion, one hour. Requisites:
courses 11, 101. In-depth examination of selected topics
related to current policy debates. Topics vary from
to year to year but typically emphasize tax policy or
social insurance. Topics may include optimal taxation;
tax inefficiencies and their implications for labor
supply; capital-labor substitution; income redistribution
and personal income tax; corporate taxation and im-
plications for firms’ investment and financing deci-
sions; Social Security and SSDI reform; and welfare
programs. P/NP or letter grading.

133. Intergenerational Poverty in America. (4)
Lecture, three hours; discussion, one hour. Requisites:
courses 11, 101, 103. Enforced corequisite: course
133L. Examination of how poverty influences child
development and aging and its effects on intergenera-
tional mobility in America, looking at historical trends
and placing U.S. in international context. To under-
stand this, we cover regression analysis and theories
in U.S., study of economic model of skill formation in
childhood. Consideration of existing research ex-
ploring how number of factors explain intergenera-
tional persistence of poverty, including parental time
pollution, infant and child health, justice system,
neighborhoods, stress, and preschool/education sys-
tems. Discussion of evidence on whether various public
policies can improve mobility. P/NP or letter grading.

133L. Intergenerational Poverty in America Labora-
tory, (1) Lecture, one hour; laboratory, one hour. En-
forced corequisites: courses 11, 101, 103. Enforced core-
quisite: course 133. Case-based analysis re-
quiring students to apply theory and analysis from
course 133 to real-world problems regarding intergen-
erational poverty in America. Hands-on data collection
and problem solving and presentation of student anal-
yses both orally and in writing. P/NP or letter grading.

134. Environmental Economics. (4)
Lecture, three hours. Requisites: course 41 or Statistics
12 or 13, and courses 10 or 11, 102, 103. Enforced core-
quisite: course 133. Case-based analysis re-
quiring students to apply theory and analysis from
course 133 to real-world problems regarding intergen-
erational poverty in America. Hands-on data collection
and problem solving and presentation of student anal-
yses both orally and in writing. P/NP or letter grading.

M135. Economic Models of Public Choice. (4)
(Same as Political Science M105.) Lecture, three or
four hours; discussion, one hour (when scheduled).
Preparation: any lower-division political science
course. Enforced requisite: course 11. Designed for ju-
niors/seniors. Analysis of methods and consequences
of arriving at collective decisions through political
mechanisms. Topics include free-rider problem, voting
and majority choice, decision, revelation, and political
bargaining. P/NP or letter grading.

137. Introduction to Urban and Regional Econom-
ic Analysis. (4)
Lecture, three hours; discussion, one hour. Requisites:
courses 10, 11, 101, 102. Enforced corequisite: course
140L. Intro-
duction to variety of computational methods used in
economics. Use of Python and numerical techniques
to solve models in macroeconomics and finance, mi-
croeconomics, and econometrics. Students should be
familiar with scientific programming language such as
R or MATLAB but are not required to know Python.
P/NP or letter grading.

140L. Computational Methods for Economists Lab-
oratory, (1) Lecture, one hour; laboratory, one hour.
Requisites: courses 101, 102, 103, Mathematics 31A, 31B,
32A, 32B, 33A, 33B. Enforced corequisite: course 140L.
Problem-solving and project-based laboratory re-
quiring students to apply computational methods from
course 140 to solve models in macroeconomics and
finance, microeconomics, and econometrics. Stu-
dents learn to implement some of the tools and tech-
niques in language such as R or MATLAB but are not required
to know Python. P/NP or letter grading.

141. Topics in Microeconomics: Mathematical Fi-
nance. (4)
Lecture, three hours; computer laboratory, one hour. Requisites:
courses 11, Mathematics 32A, ei-
ther Statistics 100A or Mathematics 170A. Economics
of financial markets, competitive equilibrium with time
and uncertainty, income risk and consumption, and
market completeness. P/NP or letter grading.

142. Topics in Microeconomics: Probabilistic Micro-
economics. (4)
Lecture, three hours. Requisite: course 101. Combination of basic probability intro-
duced in Statistics 11 with microeconomic models
presented in courses 11 and 101 in order to explain
phenomena such as insurance, job search, and stock
market behavior. Optimal production and consump-
tion under uncertainty, the capital asset pricing model
and introduction to alternative measures of risk and risk aver-
sion. P/NP or letter grading.

143. Advanced Econometrics. (4)
Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite:
course 103. Not open to students with credit for former course 147A or 147B. Heteroskedasticity, limited dependent variable, panel data, time-series.
P/NP or letter grading.

144. Economic Forecasting. (4)
Lecture, three hours. Preparation: familiarity with data analysis software
(e.g., R, Excel, MATLAB, Stata) and/or programming experience. Enforced requisites: courses 101, 103,
106. Study and application of time-series methods to forecasting in economics, business,
and government. Topics include modeling and forecasting trend, seasonality, and cycles. Discussion of clas-
sic problems, volatility model, and evaluation of forecasting techniques. Hands-on approach to real-
world data analysis methods widely used by econo-
mists and other professionals. P/NP or letter grading.

145. Topics in Microeconomics: Mathematical Eco-
nomics. (4)
Lecture, three hours. Requisite: course 101. Possible topics include game theory; competitive equilibrium analysis; examination of market failure and role for market intervention. P/NP or letter grading.

C146A-C146B-C146C. Seminars: Asset Pricing. (4-
4-4) Seminar, three hours; discussion, two hours.
Enforced requisite: courses 11, 101. Overview of time-series
models by incorporating realistic features such as
heteroskedasticity and autocorrelation consistent
(HAC) estimation, unit root theory, estimation
and inference of voluntary models. Provides useful preparation to students who plan to take empirically oriented macroeconomics and fi-
cance courses, and solid understanding of tools required to analyze and interpret time-series
data and financial asset prices/returns. Emphasis throughout on link be-
tween statistical models and im-
plementation. P/NP or letter grading.

146L. Time-Series Econometrics Laboratory. (1)
Lecture, one hour; laboratory, one hour. Requisites:
courses 41, 103, Mathematics 31A, 31B. Enforced core-
quisite: course 140. Problem-solving and project-
based analysis requiring students to apply time-series analysis from course 146 to analyze time-series
data. Applications involve weak dependence, autore-
gressive-moving-average (ARMA) processes, linear processes, economic forecasting, long-
run variance and heteroskedasticity and autocorrela-
tion consistent (HAC) estimation, unit root theory, esti-
mation and inference of volatile models. Provides useful preparation to students who plan to take empirically oriented macroeconomics and fi-
cance courses, and solid understanding of tools required to analyze and interpret time-series
data and financial asset prices/returns. Emphasis throughout on link be-
tween statistical models and im-
plementation. P/NP or letter grading.

150. Labor Economics. (4)
Lecture, three hours. Requ-
isites: courses 11, 101, 103. Enforced corequisite:
course 140. Supply and demand. Analysis of
processes, economic forecasting, long-run variance
and heteroskedasticity and autocorrelation consistent
(HAC) estimation, unit root theory, estimation
and inference of time-varying volatility models. Provides useful preparation to students who plan to take empirically oriented macroeconomics and finance courses, and solid understanding of tools required to analyze and model economic time series data and financial asset prices/returns. Emphasis throughout on link be-
tween statistical models and im-
plementation. P/NP or letter grading.

150L. Labor Economics Laboratory. (1)
Lecture, one hour; laboratory, one hour. Requisites:
courses 11, 101, 103. Enforced corequisite: course
150. Case-based analysis requiring students to apply theoretical
tools courses 150 to 152 involving labor economics. Topics include labor supply deci-
sions, household production decisions, life-cycle as-
spects of labor supply, short-run and long-run labor de-
mand, monopsony in labor, national labor market costs and labor demand, human capital, and other ex-
tended topics. Hands-on data collection and problem
solving and presentation of student analyses both oral-
ly and in writing. P/NP or letter grading.

151. Topics in Labor Economics. (4)
Lecture, three hours. Requisites: courses 101, 150. Selected topics in labor theory; income distribution; business cycles and unemployment; investments in human capital and life cycles; migration; human fertility; marriage and di-
vorce, etc. P/NP or letter grading.

152. Women, Men, and Economy. (4)
Lecture, three hours; discussion, one hour. Requisites:
courses 11, 101, 103. Corequisite: course 152L. Introduction to using tools of economics to understand gender-
and persistence of institutions and organizations, World Wars, and development of Europe during 1950s and 1960s. P/NP or letter grading.

181L. Development of Economic Institutions in Western Europe in 1900s. (4) Lecture, three hours; laboratory, one hour. Requisites: courses 11, 103. Corequisite: course 181. Empirical analysis requiring application of material from corresponding lecture course to selected historical issues, such as Malthusian theory, Industrial Revolution, demographic transition, formation and persistence of institutions and organizations, World Wars, and development of Europe during 1950s and 1960s. P/NP or letter grading. Problem solving and presentation of student analyses in writing. P/NP or letter grading.

182A. U.S. Economics History: From Colonial Times to the Civil War. (4) Lecture, three hours; discussion, one hour. Requisites: courses 11, 41 (or equivalent). Enforced corequisite: course 182AL. Examination of the development of the U.S. economy up to and including the Civil War. Focus on using economic models and empirical analysis to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. While the past persists for a long time in the form of people and institutions, there are periods of dramatic change brought on by technological change and by war. Study of the past, with its very different institutions, to inform the present. For example, there was no U.S. currency until the Civil War, and there was a limited number of banks in each state had different banking regulations. Investigation of how the system worked, whether it was effective in allocating capital, and how stability depended on banking regulations. P/NP or letter grading.

182AL. U.S. Economics History: From Colonial Times to the Civil War Laboratory. (1) Lecture, one hour; laboratory, one hour. Enforced corequisite: course 11, 41 (or equivalent). Enforced corequisite: course 182AL. Empirical analysis requiring application of material from course 182A to the development of the U.S. Economy from Colonial Times to World War I. Focus on using economic models and empirical analysis to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. While the past persists for a long time in the form of people and institutions, there are periods of dramatic change brought on by technological change and by war. Study of the past, with its very different institutions, to inform the present. For example, there was no U.S. currency until the Civil War, and there was a limited number of banks in each state had different banking regulations. Investigation of how the system worked, whether it was effective in allocating capital, and how stability depended on banking regulations. P/NP or letter grading.

182B. U.S. Economics History: From the Civil War to World War I. (4) Lecture, three hours; discussion, one hour. Requisites: courses 11, 41 (or equivalent). Enforced corequisite: course 182BL. Examination of the development of the U.S. Economy from the Civil War to World War I. Focus on using economic models and numbers to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. While the past persists for a long time in the form of people and institutions, there are periods of dramatic change brought on by technological change and by war. Study of the past, with its very different institutions, to inform the present. For example, the time period from the Civil War to World War I witnessed the rise of large corporations and complaints of monopoly power. There was anti-trust law. Investigation of degree to which collusion and monopoly was a problem, and whether anti-trust law solved the problem or if the regulators were captured. Consider also that there was no Federal Reserve until 1913, and examination of the problems created by not having a Federal Reserve. P/NP or letter grading.

182BL. U.S. Economics History: From the Civil War to World War I Laboratory. (1) Lecture, one hour; laboratory, one hour. Enforced corequisite: course 182BL. Empirical analysis requiring application of material from course 182A to the development of the U.S. Economy from the Civil War to World War I. Focus on using economic models and empirical analysis to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. While the past persists for a long time in the form of people and institutions, there are periods of dramatic change brought on by technological change and by war. Study of the past, with its very different institutions, to inform the present. For example, the time period from the Civil War to World War I witnessed the rise of large corporations and complaints of monopoly power. There was anti-trust law. Investigation of degree to which collusion and monopoly was a problem, and whether anti-trust law solved the problem or if the regulators were captured. Consider also that there was no Federal Reserve until 1913, and examination of the problems created by not having a Federal Reserve. P/NP or letter grading.

182C. U.S. Economics History: From World War I to 1980s. (4) Lecture, three hours; discussion, one hour. Requisites: courses 11, 41 (or equivalent). Enforced corequisite: course 182CL. Examination of the development of the U.S. economy from the World War I to 1980s. Focus on using economic models and numbers to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. While the past persists for a long time in the form of people and institutions, there are periods of dramatic change brought on by technological change and by war. Study of the past, with its very different institutions, to inform the present. For example, the time period from the Civil War to World War I witnessed the rise of large corporations and complaints of monopoly power. There was anti-trust law. Investigation of degree to which collusion and monopoly was a problem, and whether anti-trust law solved the problem or if the regulators were captured. Consider also that there was no Federal Reserve until 1913, and examination of the problems created by not having a Federal Reserve. P/NP or letter grading.

182CL. U.S. Economics History: World War I to 1980s Laboratory. (1) Lecture, one hour; laboratory, one hour. Requisites: course 11, 41 (or equivalent). Enforced corequisite: course 182CL. Empirical analysis requiring application of material from course 182C to the development of the U.S. Economy from World War I to 1980s. Focus on application of economic models and empirical analysis to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. P/NP or letter grading.

183L. Development of Economic Institutions in U.S. Laboratory. (4) Lecture, one hour; laboratory, one hour. Requisite: course 11. Enforced corequisite: course 183L. Exploration of problems created by not having a Federal Reserve. P/NP or letter grading.

185. Career Development. (1) Lecture, one hour. Enrollments to departmental majors. Designed to provide Business Economics majors with key knowledge and practical skills used in real world that complement traditional academics to maximize interview, communication, and presentation skills and strengthen résumé building. Coverage of career paths in business profession in various aspects to broaden students' perspective on future opportunities. Review of current business environment, financial markets, economy, unemployment, banking crises, market updates, and all related business topics. P/NP grading.

C186A-C186B-C186C. Seminars: Economic History for Advanced Undergraduate and Graduate Students. (2–4) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for credit with topic change. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Requisite: courses 101, 102, 103. Research seminars on selected topics in economics. Reading, discussion, and development of culminating project. Consult Schedule of Classes for meeting times. May not be applied toward credit with topic change. P/NP or letter grading.

190. Variable Topics Research Seminars: Econom- ics. (4) Seminar, three hours. Enforced requisites: courses 101, 102, 103. Research seminars on selected topics in economics. Reading, discussion, and development of culminating project. Consult Schedule of Classes for meeting times. May not be applied toward credit with topic change. P/NP or letter grading.

195A-195B. Community or Corporate Internships in Economics. I, II. (2–4) Tutorial, to be arranged. Requisites: courses 11, 101. Limited to junior/senior Economics majors. Internship to be supervised by Economics faculty members, and advanced graduate students. Internship to be supervised by Economics faculty mentor required. May not be repeated. Letter grading.

198BC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188BS. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 885 course. Individual study in regularly scheduled meetings with faculty mentor required. May not be repeated. Letter grading.

M188XP. Practicum in Social Entrepreneurship. (4) (Formerly numbered M188.) (Same as Community En- gagement and Social Change M188XP) Seminar, three hours. Enrollment priority to departmental majors. Offered during academic year for students engaged in full-scale immersion into challenges of launching social enterprise. Students work in teams alongside staff of local nonprofit organizations in 10-week social enterprise accelerator program aimed at helping participating organizations secure financial and operational resources they need to implement so- cial enterprise for which viable business plan has al- ready been constructed. Students meet assigned or- ganization, study its business plan, and work with in- structors of course and staff of nonprofit organization to develop tailored plan of work for 10-week acceler- ator. Students will work closely with staff of organization under supervision of instruc- tors and with assistance of experienced entrepreneur mentor. P/NP or letter grading.

199A-199B. Honors Internships. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for credit with topic change. P/NP or letter grading.

199HC. Honors Contracts. (1) Tutorial, three hours. Requisite: courses 101, 102, 103. Research seminars on selected topics in economics. Reading, discussion, and development of culminating project. Consult Schedule of Classes for meeting times. May not be applied toward credit with topic change. P/NP or letter grading.

199A-199B. Honors Internships. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for credit with topic change. P/NP or letter grading.
toward major requirements. May be repeated for credit with consent of department. Individual contract with supervising faculty member required. P/NP or letter grading.

198A. Honors Research in Economics I. (4) Tutorial, three hours. Requisites: courses 11, 101, 102. Limited to senior departmental honors program students. First term of two-semester sequence in which students develop honors thesis or comprehensive research project under direct supervision of faculty member. Individual contract required. In Progress grading (credit to be given only on completion of course 198B).

198B. Honors Research in Economics II. (4) Tutorial, three hours; discussion, one hour. Recommended for juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Letter or S/U grading.

199A. Directed Research in Economics. (4) Tutorial, three hours. Requisites: courses 11, 101, 102. Limited to graduate students with permission of the director of graduate studies. May be repeated for credit. Individual contract required. P/NP or letter grading.

199B. Directed Research in Economics/International Area Studies. (4) Tutorial, three hours. Students prepare research papers under guidance of faculty mentor on problems of a regional or international nature. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

Foundations of Economics

200. Mathematical Methods in Economics. (4) Lecture, three hours, Should be taken prior to enrollment in course 201A. Examination of mathematical methods used in graduate-level courses in microeconomics, macroeconomics, and quantitative methods. Topics include real analysis, linear algebra and matrices, calculus of many variables, static optimization, convex analysis, and dynamics and dynamic optimization. S/U grading.

200B. Mathematical Methods in Economics II. (4) Lecture, three hours; laboratory, two hours. Should be taken prior to or concurrent with course 201B. Linear algebra and some of its linear difference equation models. Basic real analysis, normed vector space/ Banach space, Hahn/Banach theorem, Schauder fixed point theorem, and theory of correspondences. S/U grading.

203A. Introduction to Econometrics I. (4) Lecture, three hours; discussion, one hour. Probability and statistical tools for econometric models. Topics include random variables, distribution and density functions, transformations, identification, sampling, estimators, asymptotic properties. S/U or letter grading.

203B. Introduction to Econometrics II. (4) Lecture, three hours; discussion, one hour. Identification and estimation and testing. Basic linear regression model, tests of hypothesis, generalized least squares, heteroskedasticity, multicollinearity, estimation and quantile dependent variables. S/U or letter grading.

203C. Introduction to Econometrics III. (4) Lecture, three hours; discussion, one hour. Econometric methods for time-series econometrics, including theory and applications. Topics include determining techniques, unit root theory, cointegrated system approaches, autocorrelation robust inference, Wald and Beveridge and Nelson (BN) decompositions, model selection, nonlinear stationarity models, spatial density asymptotics and nonparametric time-series models. S/U or letter grading.

204A. Applications of Economic Theory: California Population Research Topical Seminar Series. (4) (Same as Sociology M252A,) Seminar, three hours. Limited to California Center for Population Research (CCPR) affiliates. Examination of issues such as demography, health, aging, labor, and broad array of topics concerned with effects of economic, social, and political transformations on human behavior both in U.S. and abroad. S/U grading.

204B. Applications of Economic Theory: California Population Research Seminar Series. (4) Seminar, three hours. Examination of issues such as demography, health, aging, labor, and broad array of topics concerned with effects of economic, social, and political transformations on human behavior both in U.S. and abroad. May be taken independently for credit. S/U grading.

204C. Applications of Economic Theory: California Population Research Topical Seminar Series. (4) Seminar, three hours. Examination of issues such as demography, health, aging, labor, and broad array of topics concerned with effects of economic, social, and political transformations on human behavior both in U.S. and abroad. May be taken independently for credit. S/U grading.

208. Law and Economics Workshop. (2 or 3) Seminar, two hours. Requisite: course 201A or Management 405. Knowledge of empirical methods and basic calculus required. Interdisciplinary speakers series bringing together outside professors and students from UCLA School and academic departments. Topics include contracts, torts, intellectual property, and business law. Students write graded research papers. May be repeated for credit. Concurrently scheduled with Law 648 and Management 294. S/U or letter grading.

207. History of Economic Thought. (4) Lecture, three hours. Topics from classical economics, including work of Smith, Ricardo, and Mill, and developments from 1870s, including contributions of major figures of marginalist revolution, socialist controversy, and history of welfare economics. S/U or letter grading.

208. Introduction to Demographic Methods. (4) (Same as Biostatistics M208, Community Health Sciences M208, and Sociology M225A.) Seminar, three hours. Examination of issues such as demographic, health, aging, labor, and broad array of topics concerned with effects of economic, social, and political transformations on human behavior both in U.S. and abroad. S/U grading.

209A-209B-209C. PhD Research Seminar. (4-4-4) Seminar, three hours. Designed to help PhD students train for standardized testing (attending lectures, taking examinations) into creating independent research. Students are supported in developing their dissertation and professional skills in all aspects of process of creating their own research, including writing and presentation. Covered topics include demographic, decomposition of differences, life tables, survival analysis, cohort analysis, birth interval analysis, models of population growth, stable populations, population projection, and demographic data sources. Letter grading.

209A-209B-209C. PhD Research Seminar. (4-4-4) Seminar, three hours. Designed to help PhD students train for standardized testing (attending lectures, taking examinations) into creating independent research. Students are supported in developing their dissertation and professional skills in all aspects of process of creating their own research, including writing and presentation. Covered topics include demographic, decomposition of differences, life tables, survival analysis, cohort analysis, birth interval analysis, models of population growth, stable populations, population projection, and demographic data sources. Letter grading.

Economic Theory

211A. Contract Theory. (4) Lecture, three hours. Fundamental introductory undergraduate level course. Emphasis on economic problems and specific cases. Required prerequisite: course 201C. Study of trading relationships between small number of agents. Coverage of many tools and techniques used in models of moral hazard,
adverse selection, and incomplete contracting, starting with static models of moral hazard and mechanism design and development of their dynamic counterparts. Consideration of environments where agents cannot use formal contracts, studying relational contracts and trading relationships with no contracts. Analysis of wide variety of applications from industrial organization, corporate finance, personnel economics, and public choice.

211B. Economics of Uncertainty, Information, and Games. (4) Lecture, three hours. Preparation: introductory probability. Enforced requisite: course 201C. Theory of individual and group behavior under uncertainty, applied to topics such as asset pricing models, adverse selection, moral hazard, bargaining, signaling, auctions, and search. S/U or letter grading.

211C. Game Theory and Economic Applications. (4) Lecture, three hours. Preparation: introductory probability. Enforced requisite: course 201C. Intended for students who are interested in doing research in microeconomic theory and for students who want to acquire good theory background to do applied work. Coverage of combination of standard results in field and topics of current research, including notions of equilibrium in static and dynamic games, reasoning in games where incomplete information gives rise to games of incomplete information, and experiments. S/U or letter grading.

212A. Topics in Advanced Theory: Search Theory. (4) Lecture, three hours. Preparation: calculus, introduction to modern mathematical economics, and topics of current research, including notions of equilibrium in static and dynamic games, reasoning in games where incomplete information gives rise to games of incomplete information, and experiments. S/U or letter grading.

212B. Topics in Advanced Theory: Applied Game Theory. (4) Lecture, three hours. Preparation: calculus, introductory probability. Use of theory of Bayesian games to study bargaining, monetary theory, and oligopoly. Use of theory of mechanisms to study auction design and imperfectly competitive markets. May be repeated for credit. S/U or letter grading.

213A-213B. General Equilibrium and Game Theory. (4) Lecture, three hours. Requisite: course 201C. Selected advanced theoretical topics of current interest and introduction to modern mathematical economics, including general equilibrium theory and game theory. S/U or letter grading.

214A. Topics in Mathematical Economics: General Equilibrium Theory. (4) Lecture, three hours. Requisite: course 201C. Core convergence theorem, cooperative and noncooperative approach to competitive equilibrium theory, perfect competitive economy, no-surplus theorem, and applications to mechanism theory and incomplete market models. May be repeated for credit. S/U or letter grading.

M215. Topics in Applied Game Theory. (4) (Same as Political Science M208B.) Lecture, three hours. Preparation: calculus or introductory probability. Designated for graduate students and political science students. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading.

221B. Monetary Economics II. (4) Lecture, three hours. Emphasis on theoretical, historical, and policy aspects of monetary economics. Financial intermediation, bank panics, asset price volatility, game theoretic monetary models, and application of monopolistic competition, search and coordination failures, central bank operations, and evolution of monetary institutions. S/U or letter grading.

221D. Monetary Economics IV. (4) Lecture, three hours. Requisites: courses 202A, 202B, 202C. Emphasis on applied macroeconomics, with topic change each year. Students select one particular data set to study. Each week class studies article from recent work in applied macroeconomics or applied econometrics that teaches or illustrates one theoretical restriction on data. Subgroups of students report back to class using technique on their selected data set. S/U or letter grading.

222B-222Z. Topics in Monetary Economics. (4 each) Lecture, three hours. Current research in monetary economics. Content varies. May be repeated for credit. S/U or letter grading.

C226A-C226B-C226C. Seminars: Monetary Economics/Macroeconomics. (4–4–4) Seminar, three hours. Designed for predissertation and dissertation writers. Overview of most current developments in monetary economics and macroeconomics for advanced graduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C166A-C166B-C166C. S/U or letter grading.

229A-229B-229C. Workshops: Monetary Economics. (4–4–4) Lecture, three hours. Topics of current research. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students, and advanced graduate students. Research paper or presentation required. S/U grading.

403 Economics / 403

LASSO and Dantzig Selector techniques, and bootstrap. May be repeated for credit. S/U or letter grading.

M232A. Topics in Econometrics: Bayesian Econometrics. (4) (Same as Political Science M228E.) Lecture, three hours. Requisites: courses 231A, 231B. Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simulation of models, criticism. May be repeated for credit. S/U or letter grading.

244. U.S. Labor Markets and Public Programs since 1940. (4) Lecture, three hours. Designed for PhD students. Introduction to current research at intersection of labor economics, public economics, and U.S. economic history, focusing on period after 1940. Topics include economic and wage inequality; intergenerational mobility; increasing (and stalling) educational attainment; changes in health and health care; Great Migration; gender gap in pay and rise of married women’s market work; baby boom and bust; racial inequality from slavery to Civil Rights era; and war on poverty. S/U or letter grading.

C246A-C246B-C246C. Seminars: Economic History. (4–4–4) Seminar, three hours. Designed for predissertation and dissertation writers. Overview of most current developments in economic history for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C186A-C186B-C186C. S/U or letter grading.

Economics

Public Finance

251B. Cost-Benefit Analysis of Public Projects and Programs. (4) Lecture, three hours. Requisite: course 251A. Presentation of those aspects of applied capital theory that are relevant in decisions concerning investment projects in first part of course. Differences between social and private benefits and costs (shadow prices) for foreign exchange, capital, and labor, with applications to public investment decisions, in second part of course. S/U or letter grading.

253A-253Z. Topics in Public Finance. (4 each) Lecture, three hours. Content varies. Topics include Social Security taxes and programs, unemployment insurance, public provision of medical care, theory of public goods, and theory of public choice. May be repeated for credit. S/U or letter grading.

254A-254B-254C. Workshops: Public Economics. (4–4–4) Lecture, three hours. Designed for graduate students. Workshops for advanced graduate students. Research in progress discussed by graduate students, UCLA faculty members, visiting experts. S/U grading.

Applied Microeconomics

261B. Labor Economics II. (4) Lecture, three hours. Requisite: course 261A. Models of life-cycle learning and work behavior, with particular emphasis on recent literature on labor supply, fertility, and life-cycle behavior and experiences of women. S/U or letter grading.

262A. Topics in Labor Economics. (4) Lecture, three hours. Current research in labor economics. Content varies. May be repeated for credit. S/U or letter grading.

262D. Topics in Labor Economics: Development Economics. (4) Lecture, three hours. Preparation: completion of firstr year graduate microeconomics and econometrics courses. Coverage of important key topics in microeconomics of development, such as health, education, risk coping, savings, credit, and household economics. Discussion of empirical methods. S/U or letter grading.

262F. Topics in Labor Economics: Public Sector Microeconomics. (4) Lecture, three hours. Preparation: completion of first-year graduate microeconomics and econometrics courses. Coverage of topics related to tax incidence, deadweight loss, public expenditure, income tax and transfer programs, with emphasis on impacts of such programs on labor supply and savings, social security, unemployment insurance, and other insurance programs. S/U or letter grading.

262P. Topics in Labor Economics. (4) Lecture, three hours. Current research in labor economics. Content varies. May be repeated for credit. S/U or letter grading.

263. Topics in Urban Economics. (4) Lecture, three hours. Current research in urban and regional economics. Content varies. Serves as forum for presenta- tion of papers on urban economics by students, UCLA faculty members, and visitors. May be repeated for credit. S/U or letter grading.

266A-C266B-C266C. Seminars: Labor Economics. (4–4–4) Seminar, three hours. Quarterly seminars for predissertation and dissertation writers. Overview of most current developments in labor economics for advanced undergraduate and graduate students. May be repeated for credit. S/U or letter grading.

267A-C276B-C276C. Seminars: Industrial Organization. (4–4–4) Seminar, three hours. Designed for predissertation and dissertation writers. Overview of most current developments in industrial organization for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C176A-C176B-C176C, S/U (C266B) and S/U or letter (C266A, C266C) grading.

International Economics

271B. Industrial Organization, Price Policies, and Regulation. II. (4) Lecture, three hours. Requisite: course 271A. Study of firm organization and pricing under conditions of less than perfect competition; inter-
cussion of new papers. Research in progress pre-
sented, discussed, and criticized by visiting experts, 
UCLA faculty members, and advanced graduate stu-
dents. Concurrently scheduled with courses C126A-
C126B-C126C. S/U grading.

Development Economics

286A. Economic Development. (4) Lecture, three hours. Requisites: courses 201C, 202C. Study of theoretical and 
empirical problems related to developing coun-
tries. Emphasis on relation between international trade and 
economic development, dynamic aspects of 
commercial policies, inflation, stabilization, structural 
adjustment, growth and migration. S/U or letter 
grading.

286B. Cost-Benefit Analysis of Development Proj-
ects. (4) Lecture, three hours. Requisite: course 286A. 
Methodology for evaluating investment projects, their use in 
special attention to types of issues that arise in develop-
ing countries. Discussion of social versus private 
evaluation criteria; applications to highway, electricity, and 
irrigation projects. S/U or letter grading.

287A. Topics in Development Economics: Economic 
Problems of Latin America. (4) Lecture, three hours. 
Economic history of Latin America. Great depression, 
import substitution and industrialization, inflation and 
growth. Trade deficits and external debt. Topics of 
recent interest to the students. Introduction to models and 
economic integration. May be repeated for credit. S/U or letter 
grading.

287B. Topics in Development Economics: Economic 
Development in East Asia. (4) Lecture, three hours. Recent 
development in East Asia, focusing on postwar development of Japan, Korea, and China. Emphasis on role of international investment and 
trade, especially with U.S., in area’s economic develop-
ment. May be repeated for credit. S/U or letter grading.

287C. Topics in Development Economics: Economic 
Development. (4) Lecture, three hours. Designed for 
graduate students. Topics in monetary and exchange 
rate policy in developing countries. Students expected to 
develop analytical tools and underlying policy is-
S/U or letter grading.

287D. Topics in Development Economics. (4) 
Lecture, three hours. Current research in development 
economics. Content varies. Courses in this sequence not 
ordinarily given every year. May be repeated for credit. 
S/U or letter grading.

288A-288B-288C. Proseminars: International and 
Development Economics. (4–4–4) Seminar. Three 
hours. Quarterly seminars for presidertation and dis-
sertation writers on current issues in international trade and 
finance and development economics. Presentation of 
work-in-progress for feedback from faculty and 
other graduate students. Presentation or re-
search paper required. S/U grading.

291A. Asset Pricing. (4) Lecture, three hours. Intro-
duction to the practice of evaluating financial assets, 
their use in hedging and diversification of financial 
risks, and in portfolio management. Emphasis on 
valuation of firms, and embedding of these models in 
equilibrium for purposes of under-
standing market valuation of corporate sector as 
whole. Introduction also to continuous-time search-
and-matching models and their applications to finan-
cial economics. S/U or letter grading.

291B. Asset Pricing. (4) Lecture, three hours. Recent 
theoretical and empirical research on monetary policy. 
Includes issues such as how monetary policy is imple-
mented in practice. What are effects of different mon-
etary policy tools, what restrictions on government 
does monetary policy impose, transmission mecha-
nisms of monetary policy, linking macroeconomics 
and microeconomics, and non-linear effects in inflation, 
how does monetary policy interact with credit markets and 
how does it affect asset prices. S/U or letter grading.

291C. Asset Pricing. (4) Seminar, three hours. Designed for 
presidertation and dissertation writers. Overview of most current 
developments in asset pricing theory for advanced 
undergraduate and graduate students. Introduction to 
graduate-level research in this field, focusing on different topics 
each week, with presentation and discussion of new 
papers. Research in progress presented, discussed, and 
criticized by visiting experts, UCLA faculty mem-
bers, and advanced graduate students. Concurrently 
scheduled with courses C146A-C146B-C146C. S/U (C296B) and S/U or letter (C296A, C296C) grading.

296A-296B-296C. Proseminars: Asset Pricing. (4–4– 
4) Seminar, three hours. Designed for presiderta-
tion and dissertation writers on empirical issues in 
asset pricing, broadly defined. Presentation of 
work-in-progress or background material for pro-
posed dissertation topics. Written assignments discussed 
S/U grading.

Teaching Practicum

375. Teaching Apprentice Practicum. (1 to 4) Semi-
inar, to be arranged. Preparation: apprentice per-
sonnel employment as teaching assistant, associate, 
or fellow. Teaching apprenticeship under active guid-
ance and supervision of regular faculty member re-
sponsible for curriculum and instruction at UCLA. May 
be repeated for credit. S/U grading.

Master of Quantitative Economics

401A. Microeconomic Theory. (4) Lecture, three hours. 
Limited to Master of Applied Economics students. 
Coverage of fundamentals of optimization, choices by 
price-taking agents, consumer and producer surplus, 
monopoly and competition, Walrasian equilibrium and 
two welfare theorems, constant returns to scale 
and empirical problems related to developing coun-
tries. Emphasis on relation between international trade 
and empirical problems related to developing coun-
tries. Introduction to models and data used to understand 
connection between asset prices, health of financial 
sector, and macroeconomics, including review of recent papers to 
gain introduction to questions being addressed 
on research frontier. Letter grading.

401B. Applied Microeconomics. (4) Lecture, three hours. 
Limited to Master of Applied Economics students. 
Introduction to main topics of graduate macroeco-

402A. Macroeconomic Theory. (4) Lecture, three hours. 
Limited to Master of Applied Economics students. 
Introduction to monetary and fiscal policy and modifica-
tions of Keynesian ideas designed to explain financial crises. Letter grading.

402B. Applied Macroeconomics. (4) Lecture, three hours. 
Limited to Master of Applied Economics students. 
Introduction to statistical methods and econometric techniques. Letter grading.

403A. Introduction to Statistical Methods and 
Econometrics. (4) Lecture, four hours. Limited to 
Master of Applied Economics students. Introduction to 
probability, statistics, econometrics, and time-se-
ries methods used in economics, business, and 
government. Topics include random variables, hypothesis 
testing, estimation, distribution functions, simple and 
multiple regression, and estimation with stationary/ 
nonstationary processes. Letter grading.

403B. Applied Econometrics. (4) Lecture, three hours. 
Limited to Master of Applied Economics students. 
Basic tools necessary for high-level cutting-edge em-
pirical research. Coverage of variety of methods suited 
for empirical studies that apply to experimental data, 
quasi-experimental data, panel data, and cross-sec-
tional data. Letter grading.

404A. Writing and Presentation Skills for Econo-
mists I. (4) Seminar, three hours. Limited to Master of 
Applied Economics students. Designed to help stu-
dents develop communication and presentation skills 
for success in any aspect of business. Prac-
tice in writing economics documents for variety of 
pro-
spective clients. Writing workshop as essential skill 
for brainstorming, collaborating, continually revising, 
and challenging ideas. Presentation skills to focus on 
presen-
tation of ideas clearly and organizing ideas, with 
emphasis on non-verbal presentation, be-

404B. Writing and Presentation Skills for Econo-
mists II. (4) Seminar, three hours. Limited to Master of 
Applied Economics students. Builds on skills learned in 
course 404A. Focuses on summarizing, critiquing, and 
report writing. Process writing used and self-editing skills stressed. Presentations in-
clude summary/critique, opinion piece, and final group 
presentation that includes proposals. Grammar incor-
porated as needed, especially in regard to writing. Letter grading.

(4) Lecture, three hours. Limited to Master of Applied Economics students. Advanced understanding of 
some major macroeconomic implications of in-
creasing integration of world economy through trade 
linkages, multinational production, and financial mar-
tets. Letter grading.

406. Money and Banking. (4) Lecture, three hours. 
Limited to Master of Applied Economics students. In-
troduction to models and data used to understand 
connection between asset prices, health of financial 
sector, and macroeconomics, including review of recent papers to 
gain introduction to questions being addressed 
on research frontier. Letter grading.

407. Economics of Entrepreneurship. (4) Lecture, 
three hours. Limited to Master of Applied Economics students. Examination of role and entrepreneurship 
and entrepreneurial strategies—source of ideas, value cre-
ation, market development, scaling, exit strategies. Group practice of entrepreneurship. Development of 
original ideas into business plan. Letter grading.

408. Environmental Economics. (4) Lecture, three 
hours. Limited to Master of Applied Economics stu-
dents. Introduction to major ideas in environmental economics by studying causes and consequences of 
air and water pollution, with special emphasis on understanding China’s environmental challenges and policy options. Letter grading.

409. Forecasting Asset Prices. (1 to 4) Lecture, three 
hours. Limited to Master of Quantitative Economics 
students. Introduction to recent developments in inter-
national finance. Coverage of lending booms and fi-
nancial crises both theoretically and empirically, as 
well as foreign exchange market anomalies and differ-
ent approaches to forecasting exchange rates. Letter grading.

410. Economists in Action. (1 to 2) Seminar, three 
hours. Limited to Master of Applied Economics stu-
dents. How theory maps into policymaking. Re-
nowned policymakers from Central Banks, Economics Ministries, and International Organizations to lecture on policy-related topics. Completion of assignments linking lectures with economic theory and real-world 
events. Letter grading.

411. Inequality and Macroeconomy. (4) Lecture, 
three hours. Limited to Master of Applied Economics 
students. Introduction to modern economic in-
equalities and interplay between inequality and mac-
roeconomy. What are relative roles of market forces and institutions in shaping dynamics of economic in-
equality? What are consequences of globalization on distribution of income within and between countries? Does inequality hamper economic growth and macro-
economic stability? How do macroeconomic policies and 
structural reforms affect distribution of income 
and wealth? Use of simple models and empirical anal-
ysis by taking global and historical perspective. Dis-

cussions about inequality in U.S. and Europe over last 
two centuries, as well as challenges raised by recent 

412. Fundamentals of Big Data. (4) Lecture, three 
hours. Limited to Master of Applied Economics students. Introduction to basic concepts and challenges of 
big data, with emphasis on pragmatic hands-on appli-
cations using real-world data for current and future big 
data practitioners—consumers of big data insights for 
economic applications. Letter grading.

413. Data Analytics and Big Data. (4) Lecture, three 
hours. Recommended corequisite: course 412. Lim-
ited to Master of Applied Economics students. De-
signed for end users of big data, those who translate 
analytic results into business applications, with guest 
lecturers from wide spectrum of industrial and corpo-

406 / Economics

rate big data users. Presentations of their business models for leveraging big data, sharing of data sets, and guiding students to extract actionable business insights for those industries. Letter grading.

415. Evidenced-Based Policy Analysis in Labor, Public, and Health Economics. (4) Lecture, three hours. Limited to Master of Applied Economics students. Introduction to key policy questions in labor, public, and health economics, including health care, education, unemployment, training programs, and welfare. Economic principles at heart of these topics and main approaches to scientifically evaluate policies that affect them, including data, current case evidence, and empirical methods, and their relation to microeconomic theory. Letter grading.

421. Incentives, Information, and Markets. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Introduction to key concepts of economics that lie at heart of modern economics and application of them to understand incentives within firms, as well as competition between theoretical models and functioning of real-life markets, such as insurance, labor, and consumer markets. Consideration of whether we can design policies that improve market outcomes? Core economic tools, and how to tie data and theory together. Letter grading.

422. International Economics. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Investigation of several theoretical frameworks in international economics followed by applications to empirical questions. Neoclassical trade models, analysis of firms and heterogeneous producers, and economic geography topics. Case studies and focus on understanding determinants of trade patterns and on measurement of aggregate and distributional effects of international trade. Discussion of recent research on effects of NAFTA and Brexit, effect of trade on inequality in developed and developing countries, and impact of infrastructure investments on trade and development. Letter grading.

423. Introduction to Applied Data Science. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Designed to build strong bases in tools and methods of data science and analytics. Introduction of tools for capture, transformation, integration, and analysis of data for downstream processing in analytics pipeline line. Introduction of analytics subsystems and scalable storage and processing of very large and complex datasets. Information theory, computational analysis, and behavioral economics with specific emphasis on data science in economics. Letter grading.

424. Income Inequality. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Investigation of rise of earning inequality (with emphasis on U.S.), focusing on learning how to use data to quantify and explain range of forces on inequality. Overview of broad empirical trends, with emphasis on understanding how to document these facts ourselves. Consideration of three classes of potential explanations for these patterns: international connections (e.g., trade and immigration), institutional change (e.g., minimum wage and unionization), and technical change (e.g., computerization). Focus on understanding how to measure these forces ourselves. Study of top income inequality: why have extremely rich become much richer than very rich? Focus on CEO compensation. Letter grading.

425. Machine Learning for Economists. (4) (Formerly numbered 425.) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Covers set of fundamental machine learning algorithms, models, and theories, and introduces advanced engineering practices for implementing data-intensive intelligent systems. Topics involve both supervised methods (e.g., support vector machines), unsupervised methods (e.g., clustering, dimensionality reduction, etc.), and their applications in classification, regression, data analysis, and visualization. Letter grading.

426. Knowledge Discovery and Data Mining. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Study of theoretical and practical techniques in field of data mining and knowledge discovery. Topics include data processing, clustering, anomaly detection, regression, and classification. Focus on making sense of large-scale or web-scale datasets, with first-hand project experiences. Letter grading.

427. Applied Machine Learning. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Preparation: basic understanding of technology principles, basic programming skills, sufficient mathematical background in probability, statistics, and matrix analysis. Foundational course with primary application to data analytics, in order to be able to apply concepts to ground such as economics or mathematics, and to students from less technical backgrounds. Covers some fundamental topics in machine learning such as Bayesnet, regression tree, metric learning, and various classification, regression, clustering techniques, and other advanced topics. Real-world data-intensive problems. Letter grading.

428. Health Care Analytics: Methods and Applications. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Introduction to basic concepts of health economics. Development of skills in evaluating and real-world data analysis. Written policy briefs and business cases evaluating pros and cons of different approaches to improving health care markets. Letter grading.

429A. Professional Development for Emerging Economists I. (1 to 2) Seminar, two hours. Limited to Master of Applied Economics students. Designed to help students develop professional skills essential for success in professional business settings. Aids student in translating topics covered in other courses into language and format that is accessible to industry/non-academic settings. Topics include preparation and public setting, researching employment market, and résumé writing. Letter grading.

429B. Professional Development for Emerging Economists I. (1 to 2) Seminar, two hours. Enforced prerequisite: course 429A. Limited to Master of Applied Economics students. Designed to help students develop professional, communication, and presentation skills essential for success in professional business settings. Aids students in translating topics covered in other courses into language and format that is accessible to industry/non-academic settings. Topics include preparation and public setting, researching employment market, and résumé writing. Letter grading.

430. Applied Econometrics with Python. (3 to 4) Lecture, three hours; discussion, one hour. Limited to Master of Quantitative Economics students. Introduces finance and quantitative methods to economics, business, and government using Python. Topics include simple and multiple regression, cross-sectional and panel data, instrumental variables, and binary-choice models. Letter grading.

431. Introduction to Econometrics, Cross-sectional and Panel Data, and Time Series. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Introduction to econometric models, estimation, prediction, and risk measures. Covers topics used in economics, business, and government. Topics include estimation, simple and multiple regression, cross-sectional and panel data, instrumental variables, and estimation with stationary/non-stationary processes. Letter grading.

432. Data Science for Financial Time Series. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Data science provides many useful tools for modeling financial data and testing hypotheses on how markets work, and for creating new financial engineering tools. Study of econometric models and methods to understand financial market dynamics. Topics include returns of financial assets, statistical tests on financial market efficiency, linear, time series hour. Limited to varying expected return models, heteroscedastic volatility models, optimal portfolio choice, capital asset pricing models, factor models, portfolio allocation, trading strategies in financial time series modeling.

433. Core Finance. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Introduction to core principles of asset valuations. Emphasis on common economic reasoning used in valuation problems. Derivations and study of valuation formulas for three broad asset classes: fixed income securities, equity, and derivatives. Practical applications to investment problems, and emphasis on current financial topics.

434. Machine Learning and Big Data for Economists. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Covers many machine learning techniques including lasso, regression trees, random forests, and neural networks. Covers most recent developments at intersection of machine learning and economics, now commonly referred to as double machine learning. Study of double machine learning in detail, and discussion of how to apply it to enhance analysis of classical econometric problems, such as program evaluation and demand estimation. Letter grading.

435. Principles of Big Data Management Systems. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Focus on modern data management systems that are used in data analytics. Students are exposed to cutting-edge data management concepts and systems and provided with working knowledge needed to manage large-scale data. Covers modern data management practices in cloud storage systems, NoSQL data bases, and map-reduce computing paradigm. Letter grading.

436. Introduction to Financial Accounting. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Financial accounting is concerned with preparation and public dissemination of financial reports designed to reflect corporate performance and financial condition. By studying these reports, investors can evaluate the performance and financial condition of companies, and creditors, and other interested parties. Financial markets depend on information contained in these reports to evaluate executives, estimate future stock returns, assess firms’ riskiness, and allocate society’s resources to their most productive uses. Letter grading.

437. Health Economics: Understanding Roles of Regulation, Public Policy, and Demographic Change. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Applied microeconomics study of economics of health care. Examination of health care costs, functioning of health care sector, structure of insurance markets, and current public health issues. Study of how underlying economic concepts such as adverse selection and moral hazard lead to markets failures. Examination of impact of policy and demographic change on future costs. Letter grading.

441A. Applied Data Management for Economists. (4) Lecture, three hours. Limited to Master of Applied Economics students. Introduction to data management practices in data gathering, cleaning, and warehousing. Topics include web scraping using application programming interfaces, engineering of R packages, and data manipulation in Structured Query Language (SQL). Emphasis on applications of data pipeline expected of entry-level analyst. Supplements Master of
Applied Economics coursework by offering solutions to expedite R coding techniques and dissemination of analytic findings. Letter grading.

441C. Applied Data Management for Economists. (1) Lecture, three hours. Limited to Master of Applied Economics students. Introduction to business intelligence software relevant for big data and financial services companies. Survey of Amazon Web Services, Microsoft Power BI, and Apache Hadoop, and deployment of automated solutions on these platforms. Development of presentation skills necessary for industry. S/U or letter grading.

442B. Master of Applied Economics Finance Laboratory. (1) Lecture, three hours. Recommended: courses 430, 431. Limited to Master of Quantitative Economics students. Outlook of economy is of vital importance for many key decisions. Introduction to theory and application of cutting-edge tools used by economists and business leaders to inform their views of economy. These tools are applied to forecast or forecast key economic indicators such as inflation, unemployment, and gross domestic product. Examination of how forecasts of fundamentals can be used to inform our views on asset prices. Letter grading.

448. Applications of Cloud Computing and Blockchain. (2 to 4) Lecture, three hours. Use of computational techniques to model supply chain and smart contracts to make business processes more efficient through technical and theoretical application. Letter grading.

452. Empirical Industrial Organization. (4) Lecture, three hours; discussion, one hour. Limited to Master of Quantitative Economics students. Introduction to empirical methods and applications in industrial organization (IO). Development of empirical toolkit to estimate industry models of demand and supply and apply it to analysis of emerging issues in IO from regulator, consumer, and firm perspective. Underlying theme is that most real-world markets are neither perfectly competitive, nor strict monopolies, but rather involve strategic interactions among firms and consumers. To capture these interactions empirically, development of empirical models of consumer demand and firm competition, and use of these models to analyze interactions of firm strategies (including pricing, product quality choices, and advertising) and market structure across range of industries. Letter grading.

Special Studies

455. Teaching College Economics. (2) Seminar, one hour; laboratory, three hours. Designed for graduate students. Required of all new teaching assistants. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Study. (2 to 8) Tutorial, to be arranged. Directed individual study or research. S/U grading.

597. Individual Study: Graduate Examinations. (2 to 8) Tutorial, to be arranged. Directed individual study in preparation for MA comprehensive examination or PhD qualifying examinations. S/U grading.

Overview
As one of the top-ranked public graduate programs in education in the nation, the Department of Education is guided by a commitment to integrate theory and practice and to improve educational practice and policy. The department attracts prominent scholars and is internationally recognized for its research centers in evaluation, higher education, child development, and urban education. Whether students choose to pursue a Doctor of Philosophy (PhD), a Doctor of Education (EdD), a master’s degree, or a services or instructional credential, they graduate with a broad understanding of educational theory and tested practice.

Undergraduate Major
Education and Social Transformation BA

Learning Outcomes
The Education and Social Transformation major has the following learning outcomes:

- Understanding of educational landscape
- Understanding of learning and human development
- Understanding of education and educational institutions in social, cultural, and historical contexts
- Understanding of organizational cultures and dynamics
- Ability to interpret social data and research and critically evaluate research studies
- Ability to apply these understandings to imagine, assess, and implement solutions to specific problems in education
- Clear and cogent communication
- Understanding of multiple perspectives, diversity, pluralism, and social justice

Entry to the Major
Pre-major
Students entering UCLA directly from high school can select the Education and Social Transformation pre-major on the UCLA admission application. Transfer students may also select the pre-major. See Transfer Students for details.

Continuing students who were not admitted directly to the pre-major may apply for admission if they are able to complete the preparation for the major by the end of their second year to apply by the fall of their third year.

Admission
Students must submit an application to declare the Education and Social Transformation major. Admission is based on academic performance in preparation for the major courses and overall academic record at UCLA. The application is available on the major website.

First-Year Students
After completing the required lower-division courses and 45 lower-division units, students identified as Education and Social Transformation pre-majors may formally apply to declare the major.

Transfer Students
Transfer applicants to the Education and Social Transformation major with 90 or more units are considered for admission based on academic achievement. Transfer credit is subject to department approval. Consult an undergraduate counselor before enrolling in any courses for the major.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Transfer students who were not admitted directly to the Education and Social Transformation pre-major may apply for admission if they are able to complete the preparation for the major by the end of their second quarter at UCLA.

Requirements
Preparation for the Major
Required: Education 10 or 11, and 35.

The Major
Required: at least nine upper-division courses distributed as follows:

1. Two courses from each of the following three areas of competency: Histories and Philosophy of Education—Education 100 through 119; Contexts of Teaching, Learning, and Development—Education 120 through 149; Inquiry and Design for Learning—Education 150 through 169
2. At least one additional course in education, which may come from any of the areas of competency or from courses designated as electives (Community Engagement and Social Change 130, Education 170 through 179)
3. Education 180
4. One community engagement course selected from Education M129XP, M130AX, M130BX, M130CX, M131A, M131B, M131C, M142, M144XP, M159, M171, M176, M195, M195CE, or M196XP (this course may also be applied toward an area of competency). Students must complete Education 180 prior to taking a community engagement course
5. Capstone course: Education 181. Students must complete five out of the six courses from the areas of competency and complete the community engagement course requirement before enrolling in the capstone course
Policies

Preparation for the Major
Preparation for the major courses must be completed with a C grade or better.

The Major
Each course must be taken for a letter grade and be a minimum of 4 units. Students must have a grade-point average of 2.0 or better in upper-division education courses.

Undergraduate Minors

Education Studies Minor

The Education Studies minor is intended to address the diverse information needs of the UCLA undergraduate community to allow students to learn more about the multitude of contemporary professional research issues confronting the field of education, understand the complex interactions between the legal, social, political, and economic forces that influence and shape educational policies in America, provide an introduction for students who wish eventually to pursue careers in education either as teachers or researchers.

Admission

To enter the minor, students must have at least sophomore standing with a cumulative grade-point average of 2.3 or better, have completed one education course with a grade of C or better, and submit the minor application. Applicants are expected to be committed to inquiry of issues central to educational research and practice. Students must follow the program of study in effect at the time of their admission.

Students may apply for admission once they have completed one approved Education course. Students must apply by the spring quarter of their third year.

The Minor

Required Courses (28 units minimum): Any seven education courses (minimum of 4 units each), one of which may be a lower-division course.

Policies

A maximum of 8 graded units of Education 195 through 199 may be applied toward the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade and be a minimum of 4 units. Students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Information and Media Literacy Minor

The Information and Media Literacy minor is designed for students who wish to augment their major program with a group of related courses that provide a systematic, focused, and critical introduction to information and media literacies. The core courses together with electives provide students with an understanding of the processes, dynamics, and societal implications of the production and dissemination of information and media and skills for their judicious evaluation, consumption, and productive use.

Admission

To enter the minor, students must have a cumulative grade-point average of 2.3 or better, have completed one required lower-division or upper-division course with a grade of B or better, and submit the minor application. Applications are available on the minor website.

The Minor

Required Lower-Division Core Courses (10 units): Two courses selected from Information Studies 10, 20, 30.

Required Upper-Division Core Courses (9 units): Information Studies C115, M121 (or Education M121).

Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade and be a minimum of 4 units. Students must have a cumulative grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Majors

Doctor of Education

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Articulated Degree Program

Articulated degree programs permit no credit overlap; students must complete degree requirements separately for each degree.

Concurrent Degree Program

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

Concurrent Degree Program

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

• Master of Education/Latin American Studies MA

• Doctor of Education/Juris Doctor

Education MA, PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

• Master of Education/Juris Doctor

Education / 409
Special Education PhD

The Department of Education offers a Doctor of Philosophy (PhD) degree in Special Education jointly with California State University, Los Angeles.

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in program announcements, other publications, and websites of the schools, departments, and programs.

Education

Lower-Division Courses

10. Introduction to Educational Issues and Scholarship. (8) Lecture, two hours; discussion, two hours. Introduction to broad landscape of public education in U.S. Intended for those interested in educational research, policy, or teaching in both formal and informal educational contexts. Readings highlight work of educational researchers from UCLA Department of Education, especially ways their scholarship intersects with policy and practice. Students work in groups to identify real-life problem affecting public education in Los Angeles. Study of this problem from multiple perspectives. Conceptualization of socially-just solution. Letter grading.

11. Education, Equality, and Future of American Society: Problems, Prospects, and Policies. (5) Lecture, four hours. Lecture. Schools are primary institutions charged with responsibility of preparing young people for their roles as citizens so that they can participate in our democracy. Public schools also serve as key sites where two essential, and at times conflicting, functions are carried out: students are sorted based on measures (and perceptions) of their ability to fill occupations and roles that are essential to economy; and students are educated in hopes that next generation will acquire knowledge, creativity, and problem-solving skills to solve problems created by previous generations. Focus on understanding challenges, contexts, and complex issues associated with carrying out these functions. Letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current political, social, and economic importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

35. Introduction to Inquiry and Research in Education. (9) Lecture, two hours; discussion, two hours. Introduction to empirical and analytical educational research. Intended for undergraduates interested in learning how to find, interpret, and evaluate educational research. Overview of different methods of conceptualizing inquiry and gathering evidence, including qualitative approaches (e.g., ethnographic, semi-structured interviews, case study), quantitative approaches (e.g., survey, measurement, experimental, descriptive, statistical methods, and design-based research). Highlights multiple methods of inquiry and research, ethics of conducting research in social sciences, and norms of conducting and reporting research in field of education. Overview of selected strands of equity-oriented research in education. Letter grading.

89H. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

Upper-Division Courses

100. Introduction to Philosophy of Education. (5) Seminar, four hours. Introduction to major Western philosophical thinkers on education including Dewey, Freire, Froebel, Leibniz, Locke, Rousseau, and others. Examination of ultimate goals of education, content of education, and processes of teaching and learning according to these theorists and their influences on later educational thought and practice. Assignments include readings, response papers, film analyses, educator interviews, document analysis (for their underlying educational philosophy), and proposal of educational philosophy. Letter grading.

101B. History of Schools in U.S. (4) Lecture, four hours. Intensive consideration of American society, including its racial and cultural diversity as well as how settler colonial projects define our present conditions. Consideration of historical development of schools in U.S., examining issues of racism, ethnic and gender differences, perspectives of cultural diversity, and impact of colonialism on educational analysis of contexts and structure of public education in California focusing on state, district, and school governance and finance. Letter grading.

101C. History of Higher Education. (5) Formerly numbered C101.) Lecture, three hours; discussion, one hour. Exploration of major eras in history of higher education. Topics include issues concerning access, diversity, parental choice, cultural literacy, teacher empowerment, and more. Letter grading.

M102. Mexican Americans and Schools. (4) (Same as Chicano/a and Central American Studies M102.) Seminar, two hours; discussion, two hours. Theoretical and empirical overview of Chicana/o/Chicano educational issues in the U.S. Analysis of dis-entangling effects of race, gender, class, and immigrant status on Chicana/o/Chicano educational attainment and achievement. Examination of how historical, social, political, and economic factors have dis-entangling effects on Chicana/o/Chicano educational experience. P/NP or letter grading.

M103. Asian American Education and Schooling. (4) (Same as Asian American Studies M114.) Seminar, four hours. Examination of existing body of research from various disciplines on Asian/Pacific American educational experiences. Letter grading.

104A. Introduction to Exceptional Learners. (4) Formerly numbered 134.) Lecture, two hours; discussion, one hour. Survey of characteristics and related educational needs of students (preschool through high school) who vary in mental, physical, psychological, and social characteristics. Focus on disabilities, with exploration in area of gifted/talented education. Emphasis on inclusion, and legal, social, and philosophical issues associated with disabilities and special education with emphasis on role of student special needs in context of general education settings. Letter grading.

105A. Early Childhood Education and Policy. (5) Formerly numbered 133.) Seminar, four hours. Research seminar designed to enable students to gain basic understanding of ways in which public policies are established and implemented, learn about policies' impact on education, and understand the role played by the child and family in U.S. and other countries, and use scientific research in children's cognitive and social development as resources for developing educational programs and policies. Letter grading.

105C. Comparative Educational Policies and Practices. (5) Formerly numbered 109C.) Seminar, four hours. Cross-national survey of educational policies and practices in delivery of education services. Comparative perspective on national context defining institutional differences in policy and practices in delivery and access, types (within tier and sector diversity), and policy systems. Selected topics include achievement of resources for realization of inclusive quality education for all. Early childhood education, foundational education, post-secondary education (including university and non-university systems), and lifelong learning (and adult education) as themes informing educational policies and practices in delivery of education services. Letter grading.

105D. Policy Analysis and Real Politics of Education. (5) Formerly numbered 110.) Lecture, two hours; discussion, two hours. Exploration of relationship between scholarly policy analysis and actual workings of policy systems. Selected topics include achievement standards and assessment, school finance, equal access to education, and school reform. Letter grading.

105E. Organization for Economic Cooperation and Development and Education. (5) Seminar, three hours. Introduction to education policy analysis at international level with focus on Organization for Economic Cooperation and Development (OECD) program of work and outputs related to field of education. Overview of history of OECD and model of governance related to education, criticisms of OECD's power and influence in education, as well as coverage of range of OECD comparative data, comparative studies, and thematic and policy reviews related to education. Letter grading.

106A. Education and Law. (5) Formerly numbered 107A.) Seminar, four hours. Introduction to education policy analysis at international level with focus on Organization for Economic Cooperation and Development (OECD) program of work and outputs related to field of education. Overview of history of OECD and model of governance related to education, comparisons of educational policies in other countries, and policy assessments. Letter grading.
106B. Lesbian, Gay, Bisexual, and Transgender Issues in Education and Law. (4) Formerly numbered 147. Lecture, four hours. Lesbian, gay, bisexual, and transgender issues in education, with emphasis on legal and policy issues that arise in schools, colleges, and universities today and how they are being addressed by legal and education communities. In particular, examination of real-life consequences of current laws and exploration of what might be done to make things better for all persons. Letter grading.

106C. Diversity, Democracy, and Law. (4) Lecture, four hours. Introductory overview of high-profile legal controversies that shape many of the current debates in schools, colleges, and universities today. Focus on access to higher education and equity for marginalized groups. Letter grading.

107A. Race, Class, and Education Inequality in U.S. (5) Formerly numbered 130). Lecture, two hours; discussion, two hours. Focus extensively on understanding educational experiences of four groups in U.S.: African Americans, Asian Americans and Pacific Islanders, Chicanas/Chicanos/Latinas/Latinos, and low-income white Americans. Examination of how historical development of public education in U.S. has influenced educational experiences of these groups. Critical look at current issues and policy debates in education, including debate over school reform, bilingual education, and affirmative action. Letter grading.

107B. Race and Democracy: Access, Equity, and Achievement. (5) Formerly numbered 164.) Seminar, four hours. Social/political perspective on education, with particular attention to race, ethnicity, and inequality. Issues include access, equity, and determinants of educational outcomes. Consideration of relationship of schools to social context and other societal institutions. Examination of how education sets life trajectories in America and effects of race/ethnicity on access to educational opportunities in our society. Letter grading.

M108. Sociology of Education. (5) (Same as Sociology M175.) Lecture, four hours; discussion, one hour. Study of how U.S. educational system both re- motes socioeconomic opportunities and maintains socioeconomic inequalities: historical and theoretical perspectives on role of education in U.S. society; trends in educational attainment; ways in which family background, class, race, and gender affect educational achievement and attainment; stratification between and within schools; effects of education on socioeconomic status, health, attitudes, social participation; educational policies to improve school quality and address socioeconomic inequalities. Letter grading.

M109A. Globalization and Learning. (4) Formerly numbered 102A.) Lecture, two hours; discussion, two hours. Introduction to different conceptualizations of globalization and their relationship to educational processes and learning in contemporary societies. Discussion of several concepts and theoretical lenses as basis for approaching and understanding how dialectics of global and local are affecting educational systems and learning over lifespans. Letter grading.

M109B. Global Citizenship Education. (4) Formerly numbered 152B.) Lecture, four hours. Exploration of issues of global citizenship in education and society as whole by analyzing critical challenges and envi- sioning educational ideals. Historical lenses: philosophical, empirical, and practical implementation of global citizenship education. Examination of how global citizenship education and education for sustainable development are beginning to impact life, actions, policies, and practices of educators, students, non-gov- ernment organizations, governments, multinational organizations, and other key players in local and global governance. Examination of how global citizenship education impacts our worldview, teaching, and learning as we strive to envision and work toward more just and sustainable society. Letter grading.

C111. Politics of Education. (5) Formerly numbered C125.) Lecture, two hours; discussion, two hours. Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as foundation for public policy analysis; interest groups in education policy formation and implementation; and focus on Freirean pedagogy. Concurrently scheduled with course C207. P/NP or letter grading.

112. Black Student Activism: History of Resistance on Campuses. (4) Seminar, four hours. Focus on Black student activism. As higher education became more accessible to African Americans, a new wave of activists entered college campuses, with Black Lives Matter movement being one of most recent examples. Examination of philosophical, intellectual, social, political, and psychological elements that have shaped and propelled Black student activism over past two centuries. Exploration of earliest activism activities among Black students, ranging from abolitions of satirical publications to blockade of Black and African studies programs during 1960s and 1970s. In- terrogation of what past teaches about Black student activism today. Study includes discussions, mock debates, case studies, and primary source analyses. Letter grading.

113. Democracy, Justice, and Education. (5) Lec- ture, three hours. Democracy, justice, and education are core ideals that define public discourse and school- arghy. Contemporary political and educational debates from philosophical and practical perspective in con- text of century-old community schools movement. Global pandemic has renewed public interest in community schools as a means to aid impoverished communities to provide integrated social supports such as health, nutrition, and after-school programs. Move- ment also has strong democratic roots tied to local context. Workshop organized around courses that introduce community-based learning—challenging ideas about who has power, how young people learn, and how teachers teach. Inquiry grounded in experience of two UCLA community schools as well as other community schools site chosen by students. Examination of whether and how these schools are sites of social transformation by investigating contexts, theories, and practices that drive change. Letter grading.

117. Road Trip: Exploring College Campus Cultures across U.S. (5) Seminar, four hours. Study of what other college campuses beside UCLA have to offer. Intended for students interested in understanding prominent aspects of non-mainstream U.S. colleges and universities. Exploration of institutional missions of special mission colleges and universities, how these institutions provide services to students, and unique strengths and challenges on these campuses through discussions, mock debates, case studies, and assign- ments that delve deeper into experiences of attending these special mission colleges and universities. Letter grading.

118. Sociology of Community Colleges. (5) Seminar, four hours. Application of existing research, and so- ciological and economic theories to analysis of community colleges. Scholars have employed diverse set of concepts, theoretical frameworks and methods to understand these educational institutions. Examina- tion of this sector of higher education in U.S. through range of qualitative, quantitative, historical, and case studies. Covers economic and sociological founda- tions of research on community colleges and their missions (transfer, remediation/developmental, adult basic education, ESL, community language, workforce development, etc.), institutional dynamics and organizational culture, government and business im- pact, for-profit colleges, social media use among stu- dents and administrators, and support for community-building, and effective reform efforts. Letter grading.

119. Variable Topics in Histories and Philosophies of Education. (4) Seminar, four hours. Variable topics course. Selection of topics related to the teaching of education impacts our worldview, teaching, and learning as we strive to envision and work toward more just and sustainable society. Letter grading.

M121. Introduction to Media Literacies. (5) (Same as Information Studies M121.) Seminar, four hours. Exploration of relationships between media, technology, and popular culture. Students guide to analyze media representations of media as agents of social change and cultural production. Letter grading.

123. Teaching Profession. (5) Seminar, four hours. Examination of relationship between educators teaching practices and public responses to teachers teaching and students learning. Examination of education in so- ciocultural context and discussion of some philo- sophical questions that challenge teaching profession. Letter grading.

126. Language, Literacy, and Academic Develop- ment: Educational Considerations for School-Age Multilingual and English Language Learner Students. (5) Formerly numbered 169.) Seminar, five hours. Use of center-based approach to examine in- structional strategies and assessment practices with preK-12 multilingual and English learner (EL) students who are learning academic content at same time they are acquiring English (and possibly additional lan- guages) in school. Critical comparison of effectiveness of English-only programming with dual-language ap- proaches (e.g., bilingual education, English-focused bilingual education) and roles of summative and formative assessments in educational decision making with mul- tilingual and EL students. Letter grading.

127. Educational Psychology: Center for Teaching and Learning. (5) Lecture, two hours; discussion, two hours. Open for credit to students for credit for course 128. Broad overview of educational psy- chology with emphasis on teaching and learning; various perspectives as to how children learn; issues of teaching and learning that arise based on child’s social class, ethnic background, gender, age, and level of ability. P/NP or letter grading.

128. Educational Psychology: Contexts for Learning and Development. (4) Lecture, four hours. Not open for credit to students with credit for course 127. Overview of theories, methods, and research in educational psychology. Educational psychology involves study of
how students learn and contexts that support this learning. Learning is complex process. Study of research and theory related to different aspects of learning including cognitive, motivation, and regulation. Discussion of ways in which educators can support these processes in students. Letter grading.

M129. Arts Education Undergraduate Practicum: Preparation, Observation, and Practice. (4) Formerly numbered M192A.) Seminar, three hours; laboratory, two hours; discussion, two hours; credit. Requisite: course 180. Research seminar discusses theories and practice in study of human development in educational contexts. Focus on relationship between theories of development, culture, and language. Letter grading.

M131C. Culture, Communications, and Human Development Research Group Seminars (5) Formerly numbered M194C.) (Same as African American Studies M194C.) Seminar, three hours; laboratory, two hours (when scheduled). Requisite: course 180. Research seminar designed to provide opportunity to combine theory and practice in study of human development in educational contexts. Focus on relationship between theories of development, culture, and technologies. Letter grading.

133. Literacy in Society. (5) Formerly numbered 122.) Lecture, four hours. Literacy plays significant role in cognition and language, political governance and law, and economic, social, and cultural life. Explores aspects of literacy and their implications for the teaching and learning of literacy in workplace, healthcare, and community. Consideration of new literacies between the traditional and technology, and impact of illiteracy on income and opportunity. Letter grading.

134. Early Childhood Mathematics Education. (5) Seminar, two hours; fieldwork, two hours. Focus on how research in early childhood education can be used to engage young people in learning mathematics. Study addresses research on how young children learn mathematically, teaching preschool mathematics, and policy context that shapes student opportunities in early childhood education. Particular attention paid to equity issues. Includes fieldwork at local preschool site working with students in mathematics. Letter grading.

M135. Environmental Justice through Lens of Media and Education. (5) Same as Information Studies M135.) Seminar, four hours. Exploration of human relationships with natural world, historically and today. Students take critical perspective of how information has been shaped, audiences positioned, and movements manipulated to promote commercial interests over public good. Exploration of progressive movements that have in past challenged—and currently challenge—neoliberal agendas, exclusive policies, and unsustainable practices. Letter grading.

M136. Working Families and Educational Inequalities in Urban Schools. (4) Formerly numbered M136.) Seminar, three hours; fieldwork, five hours. Exploration of complex relationship between working-class and poor communities and inequalities in American urban school system designed to address frameworks that address issues of race, ethnicity, and immigration, schools viewed as sites where inequalities are produced and resisted. Review of history of exclusionary treatment conceptual frameworks that educational researchers have used to understand notion of inequality, access to quality public education, and how race, ethnicity, and class affect school experiences, diversity of educational communities. Look inside schools through community service learning opportunity to examine systems, structures, and everyday practices that sustain and reproduce inequality and respond to remedial educational inequalities in urban schools. Opportunity to investigate issues of working-class families and inequalities as they relate to students’ own communities and experiences. P/NP or letter grading.

M137. Critical Digital Media Literacies. (4) Formerly numbered 137.) Same as Information Studies M137.) Lecture, four hours. Students question relationships with digital media and information society and explore how media and information technologies are improving society, strengthening democracy, and opening up opportunities for challenging hegemony and promoting social transformation. Problematics of digital media are presented as the tools being used to surveil, capture data, spread hate, mislead, distract, and destabilize democracies. Students analyze media representations of oppressive patterns of normalizing dominant ideologies, and create counter-hegemonic media messages. Combines theoretical foundations of cultural studies and critical pedagogy with practical applications of new digital media and technologies as well as transmedia storytelling and means of communication. Exploration of media representations of race, class, gender, sexual orientation, and other identity markers. Students analyze and create media projects related to education. Letter grading.

138. Cognitive Development and Schooling. (5) Lecture, four hours; discussion, one hour. Overview of theories, methods, and research on children’s cognitive development and implications for this work for educational practice. Covers range of research from different perspectives, drawing from domains such as developmental psychology, cognitive psychology, development and cognitive neuroscience. Students learn about basic cognitive processes. Exploration of ways in which contexts—including those at home, early-care settings, and school—impact children’s development. Letter grading.

139. Culture and Cognition. (4) Lecture, four hours. Introduction to theoretical foundations of research on culture and cognition. Drawing from insights of cultural psychology and anthropology, study of various definitions of community space, etc.; and consideration of social, political, and educational implications of ways these terms are conceptualized. Study addresses questions of relationship between culture and development of mind by this relationship shows that what insight research on culture and cognition offers for the organization of learning environments and for understandings of diversity and equity. Letter grading.

140. Educational Perspectives of Relational Practices in Modern Medicine. (5) Seminar, four hours. Systematic discussion of personhood and body concepts, in context of asymmetric person-to-person relationships in high-tech modern medical training and practice. Exploration of diverse implications for building theories of relational practice. Students learn to use phenomenological approach, to make sense of lived experience of medicine and training in medicine; and stance on who we are and activities at hand in everyday practices. Phenomenological approach maintains focus on how things show up; what affordances of activities and practices mean; and how we comport toward them making sense of them, others, and ourselves. Letter grading.

141. Adolescent Development. (5) Lecture, four hours. Introduction to adolescence—period of tremendous change and growth across all domains of development, including physical, social, cognitive, and emotional during second decade of life. Topics may include pubertal development, adolescent brain development, family, friends, peers, and intimate relationships, social identity and intergroup relations, school, work, and civic engagement. Draws on developmental science research on adolescence and applies that knowledge to examination of problems in adolescence. Contemporary and global conceptualizations of adolescence and more complex understandings of developing self in relation to significant others (i.e., family, peers, social media and questioning of ways in which our world is habit; and stance on who we are and activities at hand in everyday practices. Phenomenological approach maintains focus on how things show up; what affordances of activities and practices mean; and how we comport toward them making sense of them, others, and ourselves. Letter grading.

M142. Introduction to Arts Education for Multiple Publics: Theory and Practice. (4) Formerly numbered M104.) Same as Communication M102.) Seminar, three hours; outside study, nine hours. Introduc- tory course with focus on arts education for multiple publics in inner-city settings. Study of core issues in arts education, creativity, and social justice as you students develop, implement, and assess original syllabi,
149. Variable Topics in Contexts of Teaching and Learning. (4) Seminar, four hours. Variable topics organized around topics that teachers and researchers are interested in. Examination of debates and dilemmas of conducting ethnography research in educational settings. Survey of research methodologies and methods (observation, interviews) in education research. Analysis of how values and beliefs shape quantitative research questions and how research findings get translated when they are reported for popular media audiences. Qualitative background is not required. Letter grading.

151. Quantitative Research in Education: Measurement and Assessment. (5) Lecture, four hours; discussion, two hours. Preparation: course 35, grade of C or better. Intended for students who are interested in better understanding what makes good tests and how to critically interpret and evaluate tests and the evidence of relationships with education outcomes. Overview of basic statistical and measurement theories and methods, issues, and practices of educational measurement and assessment in educational settings. Setting of foundational concepts, methods, issues, and practices of educational measurement and assessment in educational settings. Setting of foundational concepts, methods, issues, and practices of educational measurement and assessment in educational settings.

152. Quantitative Research in Education: Regression Analysis. (5) Lecture, two hours; discussion, two hours. Preparation: course 150 or 151. Preparation: basic familiarity with programming language R. Introduction to regression as tool to answer questions about education. Regression is commonly used to answer questions about education. Relationship between variables — and causal claims — of one variable on another. Using regression appropriately requires thoughtful about what questions of question answering about regression relies on, about limitations of our data, and about how particular variables (e.g., race and gender) are incorporated into analyses in order to avoid repressing society and inequality issues related to fair use of educational measurement and assessment. Letter grading.

165. Educational Program Evaluation. (5) Formerly numbered 180. Seminar, three hours. Preparation: courses 35, 180. Through collaborative work with Hammer Museum, introduction to importance of informal learning contexts, specifically in art museums, and value of conducting educational research within such contexts, while keeping equity at center of inquiry and exploration. Study of art museum pedagogies and learner experiences and responsibility to support positive learning experiences for diverse audiences and local communities. Exploration of Research-Practice Partnerships education research approach that connects university researchers with local communities. Analysis of education partnership between researchers and practitioners. This approach challenges more traditional research-practitioner power dynamics by creating opportunities for both to jointly negotiate research questions, methods, and data analysis. Letter grading.

166. Program Evaluation Theories and Practice. (5) Formerly numbered 139.) Seminar, four hours. Preparation: course 35. Stages and methods for conducting evaluations of educational and social programs, with emphasis on evaluation approaches that are theoretically grounded, methodologically rigorous, practical, and useful. Letter grading.

169. Variable Topics in Inquiry and Design. (4) Seminar, four hours. Preparation: course 35. Variable topics course organized around topics that teachers and researchers are interested in. Examination of debates and dilemmas of conducting ethnography research in educational settings. Survey of research methodologies and methods (observation, interviews) in education research. Analysis of how values and beliefs shape quantitative research questions and how research findings get translated when they are reported for popular media audiences. Qualitative background is not required. Letter grading.

170. Educational Research and Equity in Informal Learning: Collaboration between Hammer Museum and UCLA Education. (5) Seminar, three hours. Requisites: courses 35, 180. Through collaboration with Hammer Museum, introduction to importance of informal learning contexts, specifically in art museums, and value of conducting educational research within such contexts, while keeping equity at center of inquiry and exploration. Study of art museum pedagogies and learner experiences and responsibility to support positive learning experiences for diverse audiences and local communities. Exploration of Research-Practice Partnerships education research approach that connects university researchers with local communities. Analysis of education partnership between researchers and practitioners. This approach challenges more traditional research-practitioner power dynamics by creating opportunities for both to jointly negotiate research questions, methods, and data analysis. Letter grading.
Electives

170. Exploration of Topics in Education. (Formerly numbered 184.) Lecture, one hour. Variable topics course, with emphasis on theories of teaching and learning, connecting them to instructional activities for students in various settings, including libraries and schools. P/NP grading.

171. Community Service Learning for Academic Achievement. (Formerly numbered 185.) Lecture, two hours; discussion, two hours. Emphasis on cognitive learning of theories and significance of connection to service for developing curricular instructional techniques and training that contribute to tutoring, counseling, and other instructional assistance in various school and community settings. Letter grading.

172. Activism through Community Service. (Seminar, four hours. Exploration of impact and importance of activism in addressing health, educational, and social disparities that have led to discrimination, segregation, and marginalization of people of color. Students acquire methodology to combat these issues through participating in activism and community service at UCLA to further address issues that marginalized populations experience. Students apply their experiential knowledge from their respective projects in Community Programs Office Student Association, Student Initiated Outreach Center, Community Service Commission or community setting in preparation to provide critiques and solutions to issues they are combating in their respective projects. Letter grading.

173. Dialog across Difference. (Seminar, three hours. Offers safe and inviting space to engage in open, constructive discourse on issues related to social identities, such as race/ethnicity, socioeconomic class, and sexual orientation identities. Students learn from and with one another’s perspectives, participate in experiential learning exercises, read and discuss relevant materials, and explore their own and other groups’ experiences in various social and institutional contexts. Offers opportunities to appreciate and learn to bridge differences, discover and maximize commonalities, interact with others around controversial issues perceiving and understanding others’ perspectives and working to help create social change. Letter grading.

174A. Experiential Learning in Secondary Classrooms: Health. (Formerly numbered 170C.) Lecture, one hour; fieldwork, four hours. Training and supervised practicum for undergraduate mathematics students interested in teaching in secondary classrooms, including working with 6th- through 12th-grade students in school sites. Focus on health requirements from California Commission on Teacher Credentialing. Experts in field lead discussion of issues related to physical and mental health of students and educators, issues of bullying, and learning theories and practices and projects related to diverse gender identities in classrooms. Active engagement in reflection on issues in which students work. Letter grading.

174B. Experiential Learning in Secondary Classrooms: Law. (Formerly numbered 170D.) Lecture, one hour; fieldwork, four hours. Training and supervised practicum for undergraduate mathematics students interested in teaching in secondary classrooms, including working with 6th- through 12th-grade students in school sites. Focus on law requirements from California Commission on Teacher Credentialing. Experts in field lead discussion of issues related to legal and ethical concerns of schooling, culture of schools, issues of bullying, building of classroom community, and learning theories and practices that engage diverse groups of students in classrooms. Active engagement in reflection on issues in which students work. Letter grading.

174C. Experiential Learning in Secondary Classrooms: Technology. (Formerly numbered 170E.) Lecture, one hour; fieldwork, four hours. Training and supervised practicum for undergraduate mathematics students interested in teaching in secondary classrooms, including working with 7th- through 12th-grade students in school sites. Focus on technology requirements from California Commission on Teacher Credentialing. Experts in field lead discussion of issues related to use of technology in classrooms, and learning theories and practices that engage students with diverse needs and interests. Active engagement in reflection on issues in schools in which students work. Letter grading.

175A. Educational Innovations in Sport and Entertainment in Context of Diversity. (Seminar, four hours. Introduction to central issues at nexus of education, sports, entertainment, and diversity. Examination and discussion of intersection of education, sports leadership, and entertainment that promise greater representation, equity, and inclusion of marginalized groups. Examination of media role in forming perceptions of athletes, its educational force in changing perceptions of athletes, and of college and professional sports. Examination of innovation in education, sports leadership, and entertainment to promote development of these and other related issues through prism of relevant theories, recent research literature, and documentaries. Letter grading.

175B. Educational Leadership and Diversity in Sports: Equity, Access, and Future Prospects. (Seminar, three hours. Examination of how leadership of sport, especially within intercollegiate athletics, impacts higher education, businesses, and other related organizations at national level. Examination of equity across racial, gender, and social-class lines in both collegiate and professional sports. Addresses access in terms of which institutional mechanisms are in place to cultivate culture that empowers student-athletes, women, and people of color to positively manifest in terms of social mobility. Approach to evaluating success of various organizations with diverse leadership and participation in sport focuses on both qualitative and quantitative measures. Letter grading.

175C. Education, Hip-Hop Culture, and Sport. (Lecture, three hours. Exploration of intersection of hip-hop culture, sport, and how hip-hop culture serves as instrument of critical and culturally relevant pedagogy in K-12 education, higher education, and informal learning contexts. Exploration of development of hip-hop music and its cultural art form, from underground movement to dominant, cultural phenomenon; and its appropriation by prominent sports personalities. Exploration of hip-hop’s connection to television, social media, fashion, art, and film. Exploration of how this cultural art form intersects with development of social identities and cultural learnings in traditional and nontraditional educational settings (e.g., public schools, private schools, charter schools, and home schooling); and its enormous educational impact in general. Exploration of potential of hip-hop music and its cultural art form for furthering culturally relevant pedagogy in educational settings. Letter grading.

175D. Education of Contemporary Athletes: Leadership Themes and Principles. (Seminar, three hours. Introduction to educational and business themes surrounding leadership in athletics. Emphasis on requisite experiences, knowledge, skills set, and abilities/characteristics for pursuing career in sport team operations; and how this impacts educational experiences of athletes. Study dissects current (mis)perceptions related to careers as general managers or sports agents, and supplies students with actionable plans for career development and advancement. Students learn about potential educational and career impact of internship and work-study opportunities related to name image, and likeness rights of contemporary college student-athletes, including detailed discussion and analysis of how California bill fits within overall higher education model at universities such as UCLA. Letter grading.

176. Transformative Research in Community-Based Settings: Practicum. (Seminar, four hours; fieldwork, one hour. Required courses: courses 155, 160. Credit toward completion of transformative research in education—public scholarship that aims to disrupt long-standing educational inequities in and about communities. This tradition includes Youth Participatory Action Research (YPAR), Community-Based Action Research (CBAR), and other collaborative approaches that value diverse forms of expertise and knowledge. Through variety of community-engaged learning experiences, students are supported to develop ability to analyze education in social and political context, develop skills for effecting change, demonstrate understanding of multiple perspectives, diversity, pluralism, and social justice. Letter grading.

177. Creating Safe and Welcoming Schools. (Same as Public Affairs M125S.) Lecture, two hours; discussion, one hour. Examination of historical context and causes of school violence, theories, and diverse school climate interventions. Emphasis on impact of school climate on oppressed groups and how social contexts such as poverty and how neighborhood resources influence school safety. Letter grading.

CM178. Critical Media Literacy and Politics of Gender: Theory and Production. (Same as Gender Studies CM178.) Seminar, three hours. Corequisite: course CM178L. Use of range of pedagogical approaches to theory and practice of critical media literacy that necessarily involves understanding of new technologies and media forms. Study of both theory and production techniques to inform student analysis of media and critical media literacy projects. Concurrently scheduled with course CM278L. Letter grading.

CM178L. Critical Media Literacy and Politics of Gender: Laboratory. (Same as Gender Studies CM178L.) Laboratory, two hours. Corequisite: course CM178. Hands-on production experience as integral component of course CM178. Concurrently scheduled with course CM278L. Letter grading.

Required Courses

180. Orientation to Community Engagement. (Seminar, four hours. First course in three-part series to satisfy community engagement requirement for Education and Social Transformation major capstone project. Introduction to conceptions and contexts of community engagement, focusing on possibilities and complexities of critical and asset-based approaches to community engagement. In preparation for students’ community engagement experiences in community organizations, early childhood centers, or schools in Los Angeles, emphasis on reflecting on possibilities, identifying forms of privilege, and understanding relationships between systemic issues and community engagement. Letter grading.

180W. Orientation to Community Engagement. (Seminar, four hours. Requisite: English Composition 3. Limited to Education and Social Transformation majors. Not open for credit to students with credit for course 180. First course in three-part series to satisfy community engagement requirement for Education and Social Transformation major. Students reflect on their coursework, community engagement experiences, and other curricular and co-curricular opportunities while completing major. Students complete portfolio that incorporates work completed through Education and Social Transformation major curriculum as well as form reflection paper where students synthesize their learning. This includes reflection on their personal development, how coursework and engagement experiences contributed to their fulfillment of learning outcomes for major, and plans for future. Students produce compelling final public presentation of portfolio. Letter grading.

187. Variable Topics in Education. (Seminar, five hours; discussion, two hours. Limited to juniors/seniors. Variable topics course organized around discipline-specific knowledge and understandings of educational and learning processes, phenomenon, policies, methods, and instruction. Development of culminating project. Consult Schedule of
Classes for topics and instructors. May be applied as core credit for Education Studies minor students. May be repeated three times for credit. Letter grading.

**188SA. Individual Studies for USIE Facilitators.** (1) Tutorial, to be arranged. Enforced requisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators.** (1) Tutorial, to be arranged. Enforced requisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators.** (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 885 course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**191A-T. Senior Seminar in Education.** (4) Seminar, four hours. Limited to juniors/seniors. Variable topics course organized on selected current issues, basing field observations and readings through weekly seminars. Development of culminating project. Consult Schedule of Classes for topics and instructors. May be repeated for credit. Letter grading.

**C192A. Practicum in Intergroup Dialogue Facilitation.** (4) Seminar, four hours. Requisite: course C160. Limited to juniors/seniors. Fieldwork in regular meetings with the intergroup dialogue facilitator while students are supervised. reopenings of conceptualization, organization, and gathering non-experimental and quasi-experimental and qualitative data. S/U or letter grading.

**199. Directed Research or Senior Project in Education.** (2 to 4) Tutorial, one hour; fieldwork, eight to 10 hours. Enforced corequisite: course 198SA. Directed research in an area of need of that community. May be repeated for credit. Individual contract required. P/NP or letter grading.

**200A. Historical Research and Writing.** (4) Lecture, four hours. Methods of historical research and writing for students who are or who will be engaged in researching and in report or paper or thesis writing, regardless of their field of interest. S/U or letter grading.

**200D. Research Methods: Special Topics.** (4) Lecture, four hours. Requisite: course 200A. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**200E. Research and Evaluation in Higher Education.** (4) Lecture, four hours. Development of conceptual and practical understanding of research and evaluation in higher education. Topics include basic statistics and design, data analysis, content issues, and research proposal writing. Letter grading.

**201A. Introduction to Education and Social Sciences.** (4) Lecture, four hours. Designed for graduate students. Analysis of various social sciences perspectives and methodologies (including modernization, dependency, Marxist, neo-Marxist, liberation theology, and world-system theories of change and development) and changing notions of role of education in development of less-industrialized countries of world. S/U or letter grading.

**201C. History of American Education.** (4) Same as History M264. Discussion, three hours. History of educational thought and of social forces impinging on American education from 1880s to present. Analysis of relation between these ideas and forces, and aims and practices of American education today. S/U or letter grading.

**202. Evaluation Theory.** (4) Lecture, four hours. Prevalent evaluation theories, systems for categorizing these theories, and process of theory development in educational evaluation. S/U or letter grading.

**204A. Introduction to Education and Social Sciences.** (4) Lecture, four hours. Designed for graduate students. Analysis of various social sciences perspectives and methodologies (including modernization, dependency, Marxist, neo-Marxist, liberation theology, and world-system theories of change and development) and changing notions of role of education in development of less-industrialized countries of world. S/U or letter grading.

**204C. Education and National Development.** (4) Lecture, four hours. Designed for graduate students. Analysis of various social sciences perspectives and methodologies (including modernization, dependency, Marxist, neo-Marxist, liberation theology, and world-system theories of change and development) and changing notions of role of education in development of less-industrialized countries of world. S/U or letter grading.

**205. Minority Education in Cross-Cultural Perspective.** (4) Lecture, four hours. Historical and contemporary analyses of educational policies with regard to ethnic, religious, and linguistic minorities through selected national and international case studies. Intro- duction to cross-cultural education at elementary, secondary, and postsecondary levels. S/U or letter grading.

**209A. History of Higher Education.** (5) Formerly numbered C209A. Research seminar, four hours. Exploration of experiences of immigrant youth in U.S. schools, with focus on language, culture, and educational equity in urban settings. Letter grading.

**211C. Introduction to Factor Analysis and Item Response Theory.** (4) Seminar, three hours. Requisites: course 230B or equivalent, and one course in education measurement (course 200B, 211A, 211B, or equivalent). Introduction to linear factor analysis (FA) and item response theory (IRT) models and their uses in research and assessment. Topics include specification, estimation, evaluation, and interpretation of exploratory and confirmatory models. Students use FA and IRT methods to perform range of basic data analyses. S/U or letter grading.

**212A. Learning and Education.** (4) Lecture, four hours. Models of learning, motivation, reinforcement, motivation, encoding, memory, transfer, individual differences, and instruction. S/U or letter grading.

**212B. Motivation and Affect in Educative Process.** (4) Lecture, four hours. Review of theoretical and empirical literature on children’s development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice. S/U or letter grading.

**217A. Social Development and Education.** (4) Seminar, four hours. Biological and familial, school, and other influences on children’s development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice. S/U or letter grading.
217B. Cognitive Development and Education. (4) Lecture; two hours; discussion; two hours. Designed for graduate students. Critical review of theories and research on development, with focus on work of Piaget and Vygotsky, and relation of this work to is- sues in educational practice. S/U or letter grading.

217D. Language Development and Education. (4) Lecture; four hours. Research and theory on how chil- dren develop their first language; sociolinguistic and psycholinguistic issues in preschool and primary years; bilingual and dialectical issues. S/U or letter grading.

M217T. Adolescent Development. (4) (Same as Psychology M242T.) Seminar, four hours. Designed for graduate students. Review of recent research on physical, cognitive, social, and psychological develop- ment during second decade of life. Topics include pu- bertal changes, development of parent-child/peer rela- tionships, role of peers, identity development, high- risk behaviors, stress and coping, and school adjust- ment. Letter grading.

219. Laboratory: Advanced Topics in Research Methodology. (4) Laboratory, four hours. Provides as- sistance in design of research and interpretation of data to advanced students from other divisions. Cov- erage of special topics not included in other courses on research methods. S/U or letter grading.

220A. Inquiry into Schooling: Organization and Change. (4) Lecture, four hours. Critical analysis of is- sues in reconstruction of schooling; concepts of func- tion and structure of schooling; organization theory; systems approaches in analysis of organization develop- ment and change. S/U or letter grading.

222A. Introduction to Qualitative Methods and De- sign Issues in Research. (4) Lecture, three hours; discussion, one hour. Introductory course for students interested in epistemology, theories, and styles of qualitative research in educational settings. Theory and practical, qualitative research topics and areas of concern covered in second half of course. Letter grading.

222B. Participant-Observation Field Methods. (4) Lecture, two hours; discussion, two hours. Requisite: course 222A. First of two courses on participant-observer- field study methods. Key skills (e.g., observation, recording, interviewing, role management, data storage) learned through classroom lectures and simu- lations, as well as through actual field-based re- search project. Letter grading.

222C. Qualitative Data Reduction and Analysis. (4) Lecture, two hours; discussion, two hours. Requisite: course 222B. Continuation of fieldwork project started in course 222B, with focus on practical skills and con- ceptual/methodological issues involved in reducing and analyzing qualitative data. Letter grading.

222D. Qualitative Inquiry: Special Topics. (4) Lec- ture, four hours. Special topics course on some field or aspect of qualitative inquiry. Topics may include classroom ethnography, advanced ethnographic writing and/or multimedia design, discourse analysis, and microsociography of social interaction. S/U or letter grading.

224. Leading Change through Evaluation: Methods of Continuous Improvement. (4) Lecture, four hours. Introduction to disciplined inquiry and continuous im- provement methods as means for driving change in complex systems. Introduction to organizational learning and change, and adult learning concepts. Focus on disciplined inquiry as strategy to lead change, whether for individuals, teams, or organiza- tions, and on application in education, health care, and other disciplines. S/U or letter grading.

225A. Issues in Education of Exceptional Individu- als. (4) Lecture, four hours. Designed for graduate stu- dents. Analysis of major research regarding compe- tencies, characteristics, and educational needs of exceptional individuals; consideration of commonalities and differ- ences among exceptional individuals. S/U or letter grading.

229. Seminar: Special Topics in Urban Schooling. (4) Seminar, four hours. Research on selected topics in fields of administration, policy, curriculum, and teaching and learning in urban organizations and school systems. Study of hypothetical situations and research programs on division topics and is- sues. Letter grading.

CM229B. Narratives of Justice: Disrupting School- to-Prison Pipeline—Arts, Activism, and Agency. (4) (Same as African American Studies CM213XP.) Lec- ture, four hours; discussion, one hour. Exploration of policies and practices, art and activism, and other forms of agency engaging school-to-prison pipeline. Continually scheduled with course CM123XP. S/U or letter grading.

M231B. Factor Analysis. (4) (Same as Psychology M231B.) Lecture, four hours; discussion, two hours. 211B, 231A. Exploratory factor analysis, rotations, confirma- tory factor analysis, multiple-group analysis. S/U or letter grading.

231C. Advanced Item Response Theory. (4) (For- merly numbered 211C.) Lecture, four hours. Requi- sites: courses 231A, 231B. Review of standard item response theory models, multidimensional models, multiple group models and models with covariates, item and person parameter estimation, differential item functioning analysis, testing model fit, linking and scale alignment, computerized adaptive testing. S/U or letter grading.

231D. Advanced Quantitative Models in Nonexperi- mental Research: Multilevel Analysis. (4) Lecture, four hours. Requisites: courses 230B, 230C. Examina- tion of conceptual, substantive, and methodological issues in analyzing multilevel data (e.g., on individuals in organizational settings such as schools, corpora- tions, hospitals; communities; consideration of alter- native analytical models). Development of hypoth- eses and research programs on division topics and is- sues. Letter grading.

233. Professional Writing in Education. (4) Lecture, four hours. Intended to assist in professional develop- ment as writers, with focus on style and organization, scholarly genres, modes of discourse, and broader is- sues of conceptualization and method. Letter grading.

234. Critical Perspectives on Economic Approaches to Education. (4) Seminar, four hours. Introduction to concepts and principles in economics of education using critical perspective. Overview of evolving relation- ship between education and economics, including general principles of education and economics and an- alysis of influential works concerning education and school policy, the role and increased role of economic principles in internal func- tioning of educational systems. S/U or letter grading.

235. Comparative Political Economy of Education and Skills. (4) Seminar, four hours. Use of political economy of education perspective for exploring, at in- ternational and comparative levels, link between alter- native models of governing, providing and financing education and training systems and impact of alterna- tives on outcomes such as unequal chances to learn, types of skill formation, and well-being. S/U or letter grading.

237. Law and Urban Education. (4) Lecture, four hours. Examination of recent legal controversies that may im- pact the lives of urban educators to meet needs of stu- dents in multicultural society, with special emphasis on such equity-related issues as desegregation, school finance, standardized testing, and rights of lan- guage minority students. Letter grading.

240. Immigrant Children and Education. (4) Sem- inar, four hours. Examination of immigrant child and youth experience, with primary focus on educational outcomes. Topics include intergenerational experi- ences of immigrant youth, dynamics of immigrant families, cultural, ethnic, and socioeconomic status- related influences in immigrant youths' adjustment, and school-family connections. Letter grading.
241. Conceptual Frameworks for Research in Urban Education. (4) Seminar, four hours. Examination of di-verse set of foundational theories for educational re-searchers concerned with understanding, designing, and studying transformative, culturally sustaining, inter-disciplinary, democratic educational practices. Includes both founding parents and neuro perspectives in emancipa-tory/liberatory, pedagogy, sociocultural/sociohistorical activity theory, critical race theory, cultural modeling, cul-turally sustaining pedagogy and contributions from learning sciences, indigenous, post-colonial, sociolog-ical, postmodern, and anthropological ap-proaches to educational research. Attends both to original ideas and how they have changed over time, as well as how faculty in the Urban Schooling program draw on these frameworks for their research. Letter grading.

242. Learning, Culture, and Schooling. (4) Seminar, four hours. Education typically refers to explicit efforts by experienced members of society to instruct new members in acceptable ways of thinking and acting in that society. Study of how learning sciences—broadly, social sciences interested in study of learning, with particular focus on variants of psychology—attempt to explain human cognitive development, and how people learn to think and act. Investigation of how ac-counts of learning and development can be, and have been, used to inform instruction in school. Focus on school: To understand how to examine theoretical perspectives on learning can inform praxis or educational justice and equity. Letter grading.

244. Theory and Practice of Intergroup Dialogue: Building Facilitation Skills. (4) Seminar, four hours. Topics include social psychology of intergroup rela-tions, intercultural and dialogic communication theo-ries, methods for reconciling and bridging differences in schools and communities, research and evaluation of intergroup dialogues and other educational methods for improving intergroup relations, and core competencies for planning, delivering, and evaluating intergroup dialogues in multicultural settings. While providing foundational grounding in theory and peda-gogy of intergroup dialogue, particular attention to re-lations between group dynamics, structural inequalities, systems of privilege and oppression, and mental health outcomes and disparities among popu-lations. Concurrently scheduled with course C124. Letter grading.

245A. Decision Analysis and Advanced Computer Methods for Educational Policy and Planning. (4) Seminar, four hours. How information technology and decision analysis impact K-12 schooling, higher edu-cation, and technical training/workplace settings. With research paper, oral presentation, and two research briefs, students can pursue decision analysis areas of special interest to their professional and career objec-tives. S/U or letter grading.

246. Seminar: Special Topics in Child Development and Education. (4) Seminar, four hours. Content varies; limits of investigation set by individual in-structor. S/U or letter grading.

249. Theories and Methods in Developmental Scien-ces. (4) Lecture, three hours. Broad overview of the-ories and methods used to study development of chil-dren in context. Introduction to foundational theories in field of developmental science, and exposure to range of methodological approaches—ranging from sources of data to analytic approaches—that re-searchers use to characterize developmental change. S/U or letter grading.

250A. Fundamentals of U.S. Higher Education Sys-tem. (4) Lecture, four hours. Designed for graduate students. Two-course sequence designed to orient new students to issues, ideas, and literature that con-stitute this division, with emphasis on underlying so-cial and political issues that shape higher education and organizational change. Letter grading.

250B. Organizational Analysis of Higher Education. (4) Lecture, four hours. Designed for graduate stu-dents. Two-course sequence designed to orient new students to issues, ideas, and literature that constitute this division, with emphasis on underlying social and political issues that shape higher education and orga-nizational change. Letter grading.

250C. Theoretical Frameworks of Higher Education. (4) Lecture, four hours. Designed for graduate stu-dents. Overview of various social sciences theories used to analyze educational issues and issues of contempo-rary higher education. Explanation of how theory and methodology affect research design and framing of re-search questions in studies of higher education. Letter grading.

252B. Educational Enterprise. (4) Lecture, two hours; discussion, two hours. Required: course 252A. Lim-ited to Educational Leadership Program students. Use of structural, human resource, political, and symbolic frames to study K-16 education, with focus on educa-tional environments, organizations, and curriculum and instruction. Letter grading.

M253A. Seminar: Current Problems in Comparative Education. (4) Seminar, four hours. Examination of some of most in-fluential critical theorists, including Marx, Nietzsche, Freud, Marcuse, Foucault, Fanon, and de Beauvoir and their contributions to critique of contemporary ed-ucation, society, and politics. S/U or letter grading.

253B. Seminar: African Education. (4) Seminar, four hours. Designed for graduate students. Contemporary issues in African educational systems, including ques-tions of access and equity, quality and efficiency, rele-vance and responsiveness, links between schools and communities, and policy and practice in education. S/U or letter grading.

253D. Seminar: Latin American Education. (4) Seminar, four hours. S/U or letter grading.

253G. Seminar: Asian Americans and Education. (4) Seminar, four hours. Basic issues and topics related to Asian Americans in field of education. Examples of is-ues and topics include Asian Americans and commun-ity, socioeconomic status, education-to-work transi-tion, language and culture question. S/U or letter grading.

253H. Seminar: Chicanos/Hispanics and Education. (4) Seminar, four hours. Basic issues and topics re-lated to Chicano and other Hispanic groups in edu-cation. Review of literature on specific educational levels and Chicano groups, for example, early childhood, elementary, higher education; specific topics: assessment, access, tracking, segregation; im-plications for schooling. S/U or letter grading.

253I. Education and Social Change in Middle East and Islamic World. (4) Seminar, four hours. Critical and analytic examination of historical and current role of traditional and modern (Western) education in af-fecting social, political, and economic changes in countries of Middle East and Islamic world (including and Pacific Rim, South and Central Asia). S/U or letter grading.

254A-255B-255C. Seminars: Special Topics. (4-4-4) Seminar, four hours; discussion, four hours. Designed for graduate students. Study of current developments in historiography of education and critical reading of texts in history of education. S/U or letter grading.

255A. Measurement; 255B. Design; 255C. Data Analysis.

256B. Seminar: Special Topics in Research. (4) Seminar, four hours. S/U or letter grading.

256C. Seminar: Special Topics in Higher Education. (4) Seminar, four hours. Introduc-tion to theory and practice of internationalization in U.S. higher education, looking at meaning of concept of comprehensive internationalization across campus, issues of effective leadership and management, and individual aspects of internationalization, including study abroad program development and implementa-tion; global education, service-learning, and support services, international curriculum—area and language studies, English as a second language programs, in-ternational internships and careers, faculty develop-ment for international teaching, international trans-national partnerships/branch campuses, international develop-ment and grant projects, international alumni, distance learning/degree delivery, online courses (MOOCs)/hy-brid models. Letter grading.

M260A. Introduction to Programming and Data Management. (Formerly numbered 260A) (Same as Public Policy M276A) Lecture, three hours. Fundamen-tal skills of data management. Development of strong foundation in R programming language. R is most popular language for statistical analysis and one of most popular languages for data science applica-tions (e.g., web-scraping, interactive maps, network analysis). Students become proficient in data manage-ment and R programming through weekly problem sets, completed in groups. No prior experience with R required. S/U or letter grading.

M260B. Fundamentals of Programming. (Formerly numbered 260B) (Same as Public Policy M276B) Lecture, three hours. Recommended requisite: course M260A. Second course in programming/data science sequence. Recommended for students who have pro-gramming background. Uses primarily R programming language. Organized around practical programming skills/concepts that are fundamental across modern object-oriented programming languages (e.g., Python, Javascript). Topics include organizing files, folders, and scripts; reading (importing) and writing (exporting) data; using Git and Github for version control and col-laboration; iteration (e.g., loops); conditional execu-tion; writing functions; strings and regular expressions. These general programming skills are prerequisite for flashier data science applications (e.g., web-scraping, interactive maps). Students will come proficient in pro-gramming skills/concepts through weekly problem sets, completed in groups. S/U or letter grading.

251E. Higher Education Seminar: Diversity Issues and Research Perspectives. (4) Seminar, four hours. Examination of how racial diversity and its related dy-namics have transformed and at same time been re-shaped by institutions of higher education, with focus specifically on student experiences, curricula, institu-tional climate, educational policies, and administrative practices. Letter grading.

251F. Seminar: Cognitive and Personal Develop-ment of College Students. (4) Seminar, four hours. Examination of topics of cognitive development of college stu-dents; issues of personal and social development, in-cluding leadership, and interpersonal relations and skills. S/U or letter grading.

252B. Seminar: Reading. (4) Seminar, four hours. S/U or letter grading.

256. Seminar: Higher Education. (4) Seminar, four hours. May be repeated for credit. S/U or letter grading.

254. Seminar: Teacher Education. (4) Seminar, four hours. Research, issues, and practices in preserves and in-service teacher preparation, evaluation, and certification. Social, philosophical, and methodolog-ical issues and current trends in America and abroad. Opportunities to observe, participate in, and discuss teacher education programs. S/U or letter grading.

256. Higher Education Policy. (4) Lecture, four hours. Required: courses 250A, 250B. Understanding public policy for higher education requires under-standing of both issues and policy process. Review of major topics on which U.S. government is active, as well as key actors and their influence. Letter grading.

M266. Feminist Theory and Social Sciences Re-search. (4) (Same as Gender Studies M266) Lecture, four hours. Examination of how diverse feminist theories addressed in last quarter have challenged and strengthened conventional social sciences theo-ries and their methodologies. Introduction especially to feminist standpoint theory, distinctive critical theory methodology now widely used in social sciences. Letter grading.
270. Introduction to Cultural Studies. (4) Lecture, four hours. Investigation of current trends in cultural studies through examination of different methods of cultural interpretation, seminal texts in cultural studies, and practical criticism engaging popular artifacts of media culture. Emphasis on developing critical media literacy as goal of cultural studies. Letter grading.

272. Case-Study Research in Education Policy and Practice. (2) Lecture, three hours. Case-study methods in education research, providing opportunities for applying methodological skills to actual case-study research projects. Focus on single and multiple case studies that investigate issues in education policy and practice. Letter grading.

274. Science, Technology, and Social Research after Eurocentrism. (4) Lecture, four hours. Philosophy of natural sciences for social scientists that examines critical media literacy, cultural studies, and human development. In particular, examination of history of writing research over last three decades as part of broader intellectual history. Letter grading.

CM278. Critical Media Literacy and Politics of Gender: Theory and Production. (4) Same as Gender Studies CM278.) Seminar, three hours. Corequisite: course CM278L. Use of range of pedagogical approaches to theory and practice of cultural media literacy that necessarily involves understanding of new technologies and media forms. Study of both theory and production techniques to inform student analysis of media and critical media literacy projects. Concurrently scheduled with course CM178. Letter grading.

CM278L. Critical Media Literacy and Politics of Gender: Laboratory. (Q) Same as Gender Studies CM278L.) Laboratory, two hours. Corequisite: course CM278. Hands-on production experience as integral component of course CM278. Concurrently scheduled with course CM178L. Letter grading.

280A. Seminar: Selected Topics in Special Education. (2 to 6) Seminar, two to six hours. Focus on research and clinical problems in special education. Introduction to range of clinical services and research strategies. Exploration of current topics in field. S/U or letter grading.

281. College Access Seminar. (4) Seminar, two hours; discussion, two hours. Knowledge of changing dynamics of college access at individual, organizational, and field level by linking of links between K-12 and postsecondary stratification and how educational advantage and disadvantage accumulates throughout education and affects equity in college access. Letter grading.

284. Critical Theory in Education: Power, Politics, and Liberation. (4) Lecture, four hours. Designed for graduate students. Introduction to major themes, issues, and methodologies within what has come to be known as cultural studies tradition. Includes some major theoretical writings in liberal, neo-Marxist, left liberal/postmodernist, and Marxist subfields of critical education tradition. Letter grading.

285. Educational Law. (3) Lecture, four hours. Examination of recent high-profile, education-related disputes at both K-12 and higher education levels. Exploration of topics including campus safety and privacy, student rights, torts, educational technology issues and concerns, religion in schools, cyberbullying, and accountability for off-campus behavior. Examination of access to quality education by analyzing disputes arising at every stage of educational process from issues of school discipline and school-to-prison pipeline to ongoing legal battles regarding race-conscious policies. Coburger, J., 1991: The Law of Education and the Charismatic School, and multiple case studies, rights, and freedoms of undocumented students. Concurrently taught with Law 282. Letter grading.

296. Language, Culture, and Education. (4) (Same as Anthropology M256.) Seminar, three hours. Examination of ongoing movement to reclaim and reimagine schooling as site to sustain indigenous, Black, Latinx, Asian and Pacific Islander communities, including ways these identities/memberships intersect with gender identity and expression, sexuality, dis/ability, language, migration, place, class, and more. For centuries of teaching and learning, communities have sought to push against ways nation-state schools have devalued communities, their lifeways, and their lives. Most recently, this movement is indebted to several decades of research, theory, and practice in asset or strength-based pedagogy tradition. Work on culturally sustaining pedagogy (CSP) has joined these decades and centuries of work to offer vision of school that seeks to perpetuate and foster—to sustain—in- guistic, literate, and cultural pluralism as part of schooling for positive social transformation and revitalization. S/U or letter grading.

287. Research on Language Issues in Education. (4) Seminar, four hours. Corequisite: course CM278L. Use of range of pedagogical approaches to theory and practice of cultural media literacy that necessarily involves understanding of new technologies and media forms. Study of both theory and production techniques to inform student analysis of media and critical media literacy projects. Concurrently scheduled with course CM178. Letter grading.

288. Research Apprenticeship Course. (2) Discussion, two hours. Course facilitates mentorship model of training PhD students in educational research. Exploration of current research and literature in research specialty and development of graduate student research topics. Assignment of common readings related to these topics; students have opportunity to offer and receive feedback. May be repeated for credit. S/U grading.

292A. Practicum in Intergroup Dialogue Facilitation. (4) Seminar, three hours. Corequisite: course CM244. Application and further development of content and skills learned in course CM244. In addition to co-facilitating weekly dialogues, expected to participate in weekly teaching apprentice practicum seminars. Readings, discussions of group dynamics, and one-on-one meetings with assigned coach. Fosters support for learning the techniques and skills for personal growth. S/U or letter grading.

295. Freire. (4) Seminar, four hours. Corequisites: courses C125 or C207 or prior knowledge of Freire’s work. Study of Freire’s work, with focus on his methodology of Educational Management. (2) Seminar, two hours. Focus on research and analysis of current topics in education. Discussion of current research and literature in research specialty and applicability to school organizations. Letter grading.

296. Research Topics in Education: Legal Aspects of Educational Management. (2) Lecture, two hours. Examination and analysis of legal issues, especially as they apply to school organizations. Letter grading.

296R. Research Topics in Education: Organizational Theory. (2) Lecture, two hours. Examination and analysis of organizational theories, especially as they apply to school organizations. Letter grading.

296J. Introduction to Survey Research Methods. (2) Seminar, two hours. Introduction to conceptual and methodological issues involved in survey-based research in education, offering structured opportunity to practice various practical aspects of survey (instruments and procedures, data collection, data management, data analysis, and report writing). S/U grading.

296K. Research Design. (2) Seminar, two hours. Effective educational leaders require ability to accurately diagnose educational problems before jumping to proposed solutions. Study designs must include systematic ways to collect and analyze data, as well as minimize potential threats to validity of data and analysis. Designed to equip students with tools needed to design research studies that address specific real-world educational problems. Emphasis placed on developing research designs as strategies for investigating educational problems, such as types of questions that can be answered appropriately with qualitative and mixed methods studies, design components, planning for fieldwork and data collection, sampling, ethics, and credibility. Letter grading.

299A-299B. Research Practicum: Education. (4-4-4) Clinical, to be arranged. May be repeated for credit. S/U grading.

301. Introduction to Information and Presentation Tools. (2) Laboratory, two hours. Limited to credential program students. Sequence of laboratory sessions providing service teaching skills and knowledge to education technology infrastructure and classroom presentation tools, introduction to resources and services, e-mail functions and Internet, and presentation software and multimedia creation. Letter grading.

305. Health Education for Teachers. (2) Lecture, two hours. Limited to Teacher Education Program students. Teaching/learning process as applied to personal and community health. Topics include psychoactive drugs (alcohol, tobacco, and narcotics), human sexuality, nutrition, community health resources, and analysis of state’s health framework. S/U grading.

309. Methodologies for English Language Learners. (2) Laboratory, two hours. Limited to credential program students. Pedagogy for bilingual and English language learners. Discussion of competencies needed by all content area teachers of English language, including strategies for teaching in and through English. Topics include educational issues, organizational approaches, and communicative approach; strategies and activities. Letter grading.

315. Principles and Methods for Teaching Reading and Writing. (2) Lecture, two hours. Reading instruction in elementary schools. Analysis of reading programs and problems; study of relationships between language/culture/cognition and reading; examination of multiple methodological approaches to teaching reading; and examination of multiple methodological approaches to teaching reading. S/U grading.

316A. Seminars: Research Topics in Education. (2) Seminar, three hours. Advanced study and analysis of current topics in education. Discussion of current research and literature in research specialty and applicability to school organizations. Letter grading.

316B. Research Topics in Education: Legal Aspects of Educational Management. (2) Lecture, two hours. Examination and analysis of legal issues, especially as they apply to school organizations. Letter grading.

316C. Research Topics in Education: Organizational Theory. (2) Lecture, two hours. Examination and analysis of organizational theories, especially as they apply to school organizations. Letter grading.

316J. Introduction to Survey Research Methods. (2) Seminar, two hours. Introduction to conceptual and methodological issues involved in survey-based research in education, offering structured opportunity to practice various practical aspects of survey (instruments and procedures, data collection, data management, data analysis, and report writing). S/U grading.

316K. Research Design. (2) Seminar, two hours. Effective educational leaders require ability to accurately diagnose educational problems before jumping to proposed solutions. Study designs must include systematic ways to collect and analyze data, as well as minimize potential threats to validity of data and analysis. Designed to equip students with tools needed to design research studies that address specific real-world educational problems. Emphasis placed on developing research designs as strategies for investigating educational problems, such as types of questions that can be answered appropriately with qualitative and mixed methods studies, design components, planning for fieldwork and data collection, sampling, ethics, and credibility. Letter grading.

319A-299B-299C. Research Practicum: Education. (4-4-4) Clinical, to be arranged. May be repeated for credit. S/U grading.

319. Research Practicum: Education. (4-4-4) Clinical, to be arranged. May be repeated for credit. S/U grading.

319. Research Practicum: Education. (4-4-4) Clinical, to be arranged. May be repeated for credit. S/U grading.

320. Introduction to Information and Presentation Tools. (2) Laboratory, two hours. Limited to credential program students. Sequence of laboratory sessions providing service teaching skills and knowledge to education technology infrastructure and classroom presentation tools, introduction to resources and services, e-mail functions and Internet, and presentation software and multimedia creation. Letter grading.

325. Health Education for Teachers. (2) Lecture, two hours. Limited to Teacher Education Program students. Teaching/learning process as applied to personal and community health. Topics include psychoactive drugs (alcohol, tobacco, and narcotics), human sexuality, nutrition, community health resources, and analysis of state’s health framework. S/U grading.

329. Methodologies for English Language Learners. (2) Laboratory, two hours. Limited to credential program students. Pedagogy for bilingual and English language learners. Discussion of competencies needed by all content area teachers of English language, including strategies for teaching in and through English. Topics include educational issues, organizational approaches, and communicative approach; strategies and activities. Letter grading.

335. Principles and Methods for Teaching Reading and Writing. (2) Lecture, two hours. Reading instruction in elementary schools. Analysis of reading programs and problems; study of relationships between language/culture/cognition and reading; examination of multiple methodological approaches to teaching reading; and examination of multiple methodological approaches to teaching reading. S/U grading.
315B. Elementary Literacy Methods. (3) Seminar, three hours. Theoretical principles and pedagogical strategies necessary for developing and maintaining balanced literacy programs for elementary students. Examination of how children learn to read, write, and use language. Letter grading.

318A. Integrated Methods for Elementary Teachers. (3) Lecture, three hours. Examination and development of instructional programs and analyses and practices of instructional methods for teaching K-6 content, with emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Aligned with California state frameworks and California content standards for grades K-12 that address needs and interests of diverse students. Letter grading.

318B. Integrated Methods for Elementary Teachers. (4) Lecture, four hours. Examination and development of instructional programs and analyses and practices of instructional methods for teaching K-6 content, with emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Aligned with California state frameworks and California content standards. Letter grading.

320A-320B-320C. Secondary Content and Literacy Methods. (4–3–3) Lecture, three hours. Examination and development of instructional programs and analyses and practices of instructional methods for teaching content in grades 7–12. Emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Methods courses align with California state frameworks and California content standards for grades K-12, including English Language Development Standards—all of which address needs and interests of diverse students. Letter grading.

321A. Secondary Content and Literacy Methods in Ethnic Studies. (3) Lecture, three hours. Examination and development of instructional programs, analyses, and pedagogical practices for teaching ethnic studies in grades 7 through 12, with emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Methods courses align with California state frameworks and California content standards for grades K-12, including English Language Development Standards—all of which address needs and interests of diverse students. Letter grading.

321B. Ethnic Studies Curriculum Development. (3) Lecture, three hours. Examination and development of theoretical issues and sound curriculum development for ethnic studies in grades 7 through 12, with emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Methods courses align with California state frameworks and California content standards for grades K-12, including English Language Development Standards—all of which address needs and interests of diverse students. Ethnic studies curriculum focuses on Chicano studies, African American/Black studies, indigenous studies, Asian American studies, gender/sexuality studies, and how to develop curriculum focused on local histories in Los Angeles urban classrooms. S/U grading.

330A. Observation and Participation. (2 to 6) Site-based fieldwork, 10 to 15 hours. Students are assigned to student teach in designated school sites with racially, culturally, and linguistically diverse student populations. Throughout student teaching period, students as novice teachers plan, implement, and assess daily lessons and units, as well as actively engage in reflecting on issues specific to school/community relations. Increased daily responsibilities. S/U grading.

330B. Student Teaching. (4 to 8) Site-based fieldwork, 10 to 20 hours. Requisite: course 330A. Students are assigned to student teach in designated school sites with racially, culturally, and linguistically diverse student populations. Throughout student teaching period, students as novice teachers plan, implement, and assess daily lessons and units, as well as actively engage in reflecting on issues specific to school/community relations. Increased daily responsibilities. S/U grading.

330D. Classroom Residency and Teaching. (4) Site-based fieldwork, 10 to 30 hours. Students are employed by local school districts to teach in designated school sites with racially, culturally, and linguistically diverse student populations. Students also work in collaborative teams through Teacher Education Program to initiate change project in their local school and/or complete case study on project. S/U grading.

360A-360B-360C. Novice Seminars. (2–2–2) Seminar, two hours. Analysis of basic principles and concepts of planning, conducting, and evaluating units of instruction with emphasis on constructivist strategies and their application in elementary and secondary schools. Examination of different methods of computer literacy and teaching with an emphasis on conducting ethnographic inquiry of local community of their designated partnership district. May be repeated for credit. S/U grading.

401. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

409A-409B-409C. Colloquium Series: Human Development and Psychology. (1–1–1) Seminar, one hour. Requisite: consent of instructor. Open to all students majoring in education and Psychology (HPY) PhD students. Training to conduct research that has practical implications as well as theoretical significance within field of applied human development. Children’s cognitive, language, personality, and social development in educationally relevant settings such as schools and day care programs. Series units scholars exploring contemporary issues in social development and provide framework to facilitate research and training in human development within school and UCLA community, as well as forum to share information with other graduate institutions. May be repeated for credit. S/U grading.

403. Infant-Toddler Child Development and Care. (4) Lecture, four hours. Development of infant and toddler development (ages 0 to 3) and implications of development on their care and education. Introduction to major theories in child development, developmental milestones, and recent research. Topics include family engagement, inclusion, risk contexts, developmentally appropriate practices, and assessment. S/U or letter grading.

405A. Teaching in Urban Schools: Exploring Communities. (2) Seminar, two hours. Limited to credential program students. Learning about urban communities by critically examining students’ own beliefs, assumptions, and experiences about them to deepen understanding and appreciation about urban communities. Letter grading.

405B. Teaching in Urban Schools: Exploring Identities. (2) Seminar, two hours. Limited to credential program students. Examination and reflection on student values, beliefs, assumptions, and lives to determine how these factors shape way students view their world and, in particular, teaching, learning, students, their families, and their neighborhoods and communities. Letter grading.

405C. Teaching in Urban Schools: Exploring Family-School Connections. (2) Seminar, two hours. Limited to credential program students. Exploration of interrelationships among families, communities, and school systems, engaging parents, caregivers, guardians, students, and school personnel to develop strategies for working with families and to develop philosophy of education. Letter grading.

406. Social Foundations and Cultural Diversity in American Education. (3) Lecture, three hours. Intensive consideration of American society, particularly its cultural and racial diversity. Topics include historical dimensions of American society; relations of different cultures, and ways to learn about students’ cultures. Examination of issues of racism, ethnic and gender differences, perspectives of cultural diversity, and impact of educational and classroom instruction. Letter grading.

406B. Social Foundations and Cultural Diversity in American Education: Ethnic Studies Emphasis. (3) Lecture, three hours. Historical, social, political, and education contexts of American society. Special emphasis on perspectives and contributions from ethnic studies. Examination of central arguments centered around systemic processes, deficit-making, marginalization, and ways to promote social justice, agency and activism. Letter grading.

409. Language Structure, Acquisition, and Development. (3) Lecture, three hours. Theoretical foundations of language structure and first and second language acquisition, with focus on major themes of current research in the field of child language acquisition and development. History and current theories and models of English language learners. Rationale for bilingual/English language acquisition and development programs. Historical and current theories and models of language. Letter grading.

411. Procedural Issues in Evaluation. (4) Lecture, four hours. Assessment methodologies appropriate for evaluation problems. Writing evaluation proposals, focused program evaluation, and developing program evaluation monitoring procedures, selecting appropriate evaluation design strategies, coping with ethical considerations in evaluation, framing decision context, and reporting evaluation results. Letter grading.

412. Why Research Matters to Student Affairs Practice. (3 or 4) Lecture, three hours. How do researchers impact college on students? How can research be used to improve student affairs practice? Introduction to world of college impact research and orientation to major ongoing studies conducted at...
UCLA and beyond. Students interact with researchers and provide input on how research results might be utilized to improve work of student affairs. Letter grading.

413A. Language and Culture. (2 to 4) Lecture, two hours. Limited to credential program students. Offered and required for Bilingual Authorization Programs. Focus on language of emphasis for bilingual teachers. Practice in listening, reading, speaking, and writing competencies required for bilingual classrooms. Assessment made at end of course to determine proficiency of Bilingual Authorization Program candidates. Letter grading.

413B. Methodology for Primary Language Instruction. (2 to 4) Lecture, three hours. Offered and required for Bilingual Authorization Programs. Consideration of models for developing cultural and language skills of home speakers of language of emphasis; practice in use of activities to develop student ability to use language for real-world and academic purposes in culturally appropriate ways. Consideration of models for teaching academic content in primary language for delivery of core curriculum to bilingual students. Letter grading.

413C. Culture of Emphasis. (2 to 4) Lecture, three hours. Offered and required for Bilingual Authorization Programs. Description of language of emphasis in its home country or countries; major historical periods and events; values, belief systems, and expectations; migration and immigration; historical and contemporary demography. Letter grading.

414A. Student Affairs Practice and Theory. (3) Lecture, two hours; discussion, two hours. Examination of needs for student affairs services, range of services, their philosophical and empirical rationale, and their organization and evaluation to provide knowledge base for developing theories of practice. Ongoing involvement in cooperative learning project to examine these issues both as team members and as individuals. Offered in summer only. Letter grading.

414C. College Student Counseling. (3) Lecture, three hours. Overview of counseling at college counseling centers. Review of historical context, philosophical and practical bases, organization and administration, specific programs, and contemporary issues and trends in college student counseling. Letter grading.

414E. Administration of Student Affairs. (3) Lecture, two hours; discussion, two hours. Overview of general knowledge and processes essential to effectively administer programs or services under student affairs. Examination of interactions between environmental factors and strategies for governing, planning, and managing student affairs programs and services. Offered in summer only. Letter grading.

416. Program Development and Planning in Student Affairs. (4) Discussion, two hours. Planning of programs that provide or support learning for individuals and groups in student affairs context. Examination of philosophical foundations of program planning, along with pedagogical and logistical dimensions of program development. Letter grading.

419. Introduction to Research in Student Affairs. (4) Lecture, two hours; discussion, two hours. Designed to orient students to nature of educational research in context of student affairs. Overview of quantitative, qualitative, and mixed methods to position students as scholar-practitioners. Exposure to these methods supplemented by examination of how they are used in published research relevant to practice of student affairs. Letter grading.

426A-426B. Program Development and Program Evaluation in Student Affairs. (2–2) Lecture, two hours. Introduction to program development and planning, as well as to assessment of program effectiveness. Development of knowledge of and skills in planning educational and training programs that provide support for learning within context of student affairs, as well as knowledge of and skill in developing, implementing, and assessing effectiveness of one program. In Progress (426A) and letter (426B) grading.

440C. Administration of Instructional Programs. (4) Lecture, four hours. Examination of current educational problems in society and strategies of their solution through curriculum policy and practice; instructional design and operation; in-service training of teaching staffs. S/U or letter grading.

441A. Instructional Supervision A. (4) Lecture, four hours. Analysis of teaching in light of research-substantiated elements of instruction: task analysis, appropriate objectives, principles that increase motivation, rate and quality of instruction, transfer, monitoring and adjusting instruction to meet needs and capacities of learners. S/U or letter grading.

442B. Legal Aspects of Educational Management and Practice. (4) Lecture, four hours. Examination of legal consequences for educational programs in U.S.; constitutional dimensions of church/state relations; employees’ civil rights and legal aspects of hiring, firing, and negotiating procedures; student attendance, control, and civil rights. S/U or letter grading.

443. Policy Analysis in Education. (4) Lecture, four hours. Overview of political, economic, and legal context of educational policy formation. Included in examination are issues that impact on minorities (e.g., bilingual education, desegregation, affirmative action, role of subordinates in policy-making process). S/U or letter grading.

448A. Urban School Leadership. (4) Lecture, four hours. Analysis of problems of urban school leadership. Emphasis on changing nature of urban principalship, with considerable attention to role of other school and community agencies that interact with urban school leaders. S/U or letter grading.

448B. Urban Leadership Laboratory. (4) Laboratory, four hours. Analysis of and opportunity to practice human and technical skills requisite for success as urban school leader. Topics include: motivation, conflict resolution, applied computer technology, and effective communication. Activities include gaming, simulation, computer programming, and group dynamics. S/U or letter grading.

450. Leadership Capacity Building. (4) Lecture, one hour; discussion, three hours. Limited to Educational Leadership Program students. Course taken in year three of Educational Leadership Program to help students with their communication and leadership capacities. S/U grading.

451. Foundations of Organizations and Leadership. (4) Lecture, four hours. Limited to Educational Leadership Program students. Understanding of traditional and contemporary conceptions of leadership and organizational theory, with application of these conceptions to student professional work settings. Letter grading.

452A–452B. Educational Enterprise. (4–4) Lecture, two hours; discussion, two hours. Limited to Educational Leadership Program students. Use of structural, human resource, political, and symbolic frames to study educational enterprises. Focus on purposes of education governance, finance, access, and equity. 452B. Requisite: course 452A. Focus on educational environments, organizations, and curriculum and instruction.

454A. Action Research: Collaboration in Change. (4) Lecture, one hour; discussion, two hours; small group work, one hour. Limited to Educational Leadership Program students. Students carry out full cycle of action research at educational site. Projects done in teams as students hone and assess their collaboration abilities. Exploration of qualitative and quantitative data gathering methods and analyses. Letter grading.

45B8. Action Research: Collaboration in Change. (4) Lecture, one hour; discussion, one hour; limited to small group work, one hour. Limited to Educational Leadership Program students. Second course in two-course sequence on learning how to do and use action research to improve learning and teaching roles while collaborating on data collection and analysis at educational site. Letter grading.

455. Writing and Inquiry. (4) Lecture/workshop, eight hours per month; discussion, one hour; laboratory, one hour; limited to doctoral candidates in Educational Leadership Program. Intended to assist students’ professional development as writers, addressing style and organization, scholarly genres, modes of discourse, and broad issues of conceptualization and method. Letter grading.

456. Altering Structure and Culture of Schooling. (4) Lecture, four hours; discussion, four hours. Limited to Educational Leadership Program students. Using applied orientation, examination of variety of approaches to organizational change and ways to sustain change. Letter grading.

460. Seminar: Special Issues in Evaluation. (2 or 4) Seminar, one or two hours; discussion, one or two hours. Topics and instructors vary each term. Recent emphases included evaluation utilization and cost-effectiveness evaluation. S/U or letter grading.

466. Critical Media Literacy: Teaching Youth to Critically Read and Create Media. (4) Lecture, four hours. Preparation for educators to teach K-12 students to explore their relationships with media by critically examining media representation and using their own alternative media messages. Critical media literacy combines theoretical foundations of cultural studies and critical pedagogy with practical classroom applications of new digital media as well as traditional print-based means of communication. Exploration of media representations of race, class, gender, sexual orientation, and other identity markers. Educators critically question media and technology, as well as explore new alternatives for creating multimedia messages in their own classrooms. Analysis and creation of media projects related to teaching required. Letter grading.

470A. Seminar: Large Systems and Individual Schools. (4) Seminar, four hours. S/U or letter grading.

471. Principles of Effective Coaching and Leadership. (4) Seminar, four hours. Introduction to principles of effective coaching and teaching for aspiring coaches considering careers in professional and collegiate athletics, K-12 schools, and community- based sports organizations. Premised on principles of social justice and on value and promise of equity, inclusion, and diversity for contributing to creation of more humane, equitable, and harmonious society and nation. Letter grading.

472. Introduction to Philosophies of Coaching. (4) Seminar, four hours. Introduction to philosophies of coaching—overarching frameworks, perspectives, deep beliefs, and values that drive coaches’ specific practices—as they are manifested in writings and conduct of professional and college sport coaches. Exploration of these through study of successful coaches in variety of sports unpacking their fundamental keys of success. Reflection on and cultivation of own personal and intentional philosophy of coaching answering questions what is your why and what is your how. Exploration of questions such as what is coach, what is coach’s overall purpose, what are desired results, how best to produce these results. Methods and assignments include presentations, analyzing videos, group work, interviews, analyses of coaching philosophies, and constructing statement of one’s own philosophy of coaching. Letter grading.
473. Diversity Leadership in Sports and Athletics. (4) Seminar, four hours. Coaching and transformational leadership requires examination of important topics that depend upon analysis of complex, yet essential concepts. Examination and discussion of how and why sports, diversity, and leadership must be interconnected in order to meet needs of universities, professional organizations, and most importantly student-athletes. Sports as industry and as enterprise. Covers its history, purpose, evolution, and role in higher education and wider society. Emphasis on student-student, student-athlete, student-mentor, and student-parent relationships and outcomes, well-being and readiness for educational and professional opportunities in sports and beyond. Addresses growing need for greater gender, ethnic, and racial diversity in athletic leadership. While those who participate in sports, particularly those sports designated as revenue generating, represent much of gender and racial diversity in U.S., leadership of sports falls embarrassingly short. Emphasis on equity throughout. Letter grading.

474. Ethical Issues in Sports. (4) Lecture, three hours. Coaches and sport management professionals are likely to face numerous ethical issues and dilemmas in their day-to-day professional practices. Introduction to salient moral and ethical issues involved in physical education, sports, and coaching. Students gain analytical tools to make ethically informed decisions by introducing ethical theories and frameworks to guide decision-making in real-life situations. Covers content areas where ethical decision-making may be relevant including sportsmanship, gambling, coaching responsibilities, violence, drug use, and testing, race and gender equity, media, and commercialization of college sports. Includes lectures, discussions, analysis of case studies, and applications of decision-making tools to resolve ethical issues. Letter grading.

475. Mental Health in Athletics and Coaching. (4) Lecture, three hours. Introduction to mental health issues in context of athletics and coaching. Mental health issues are prevalent and on rise among athletes. Coaches and other sports personnel are often first line of defense and are best positioned to recognize symptoms and refer athletes to appropriate care and interventions. Cultivates greater awareness of prevalence of mental health issues among athletes. Enables students to recognize common symptoms and manifestations of mental health concerns (e.g., depression, anxiety, eating disorders, etc.). Students gain knowledge base for appropriate referrals and interventions, and range of tools for creation of safe spaces within teams to address mental health concerns. Cultivates informed practitioners who are sensitive to mental health concerns and empathetic to plight of many who suffer from these issues. Letter grading.

476. History and Philosophy of Sport and Physical Education. (4) Lecture, four hours. Focus on philosophical positions of body as determined by philosophical schools and intellectuals, past and present. Investigation that philosophical position of body has been significant factor in determining historic development of sport and physical activity/physical education; e.g., throughout history there were times where body was neglected, which negatively impacted development of sport. Theology also had impact upon how people viewed body. Sometimes sport thrived; sometimes it was condemned depending on theological beliefs. Body has history that is tied to sport history. Modernization theory used to explain how sport and physical activity evolved from pre-modern practice to modern practice. Study takes chronological, descriptive, and interpretive approaches. Letter grading.

477. Leadership and Management of Athletic Departments in Educational Institutions. (4) Seminar, four hours. Introduction to principles and practices of leadership and management of athletic departments in higher education with emphasis on social justice leadership. Students develop their own, authentic and intentional leadership philosophy for leading with purpose and integrity, and gain knowledge, skills, and values to effectively lead in athletic departments. Introduction to various models of leadership and to fundamental management skills such as strategic planning, project management, effective communication, team building, team leadership, program evaluation, and effecting organizational change. Includes reading, application to inquiry techniques, and case studies, and developing leadership philosophy of one’s own, formulating vision and mission statements, constructing strategic plans, developing communication strategies, and other individual and collaborative assignments around leadership and management of athletic departments. Letter grading.

4820. Instructional Strategies in Urban Education: Visual and Performing Arts. (1 to 4) Lecture, two hours; discussion, two hours. Focuses on instructional practices that integrate visual and performing arts into urban classrooms. Debriefing of field experiences im- plementing subject-center arts instruction, instruction connecting arts disciplines, and instruction connecting arts and other core disciplines. Advanced exploration of elements of each art form, as well as content and delivery strategies, and exploration of selection strategies to make learning accessible, engaging, and relevant. Letter grading.

490A. Instructional Decision Making. (4) Lecture, four hours. Analysis of instructional models relevant to public school education. Assumptions, procedures, and constraints of each strategy considered in terms of learner and task variables. Laboratory experiences in classroom settings permitting students systematically to apply and evaluate alternative instructional strate- gies. S/U or letter grading.

492. Data Centric Problem-Based Learning for Hu- manizing Purposes. (3) Lecture, three hours. Focuses on humanizing science, technology, engineering, and mathematics (STEM) education through integration of data science and connections to computational thinking into project-based learning (PBL) pedagogical approach. Integration of data connections to compu- tational thinking further contextualizes humanizing STEM education. Participants (pre-service teachers) explore how their K-12 students’ identities and lived experiences connect with STEM challenges. Critical analysis of data and practices of computational thinking (CT) are leveraged toward humanizing STEM purposes within curricular design and implementation of PBL project. Methods course is aligned with Cali- fornia state frameworks and California content standards for grades K-12, including English Language Development Standards—all of which address needs and various interests of diverse students. Letter grading.

495. Teaching Preparation in Education. (2) Seminar, two hours. Teaching assistants (TA) are supported while becoming more effective and reflective teachers. Focus on how to create student-centered, inclusive learning experiences. Study of theory (relationship between teaching and learning), research (what we know about how people learn), and logistics (how this actually happens for students). Students gain understanding of serving as TA in education (e.g., department, limited responsibilities to students, how/where to get additional support, etc.). Students have opportunities to apply (in their own sections) what they learn, to reflect collaboratively on their ongoing TA experiences, and to learn from experienced TAs. S/U grading.

498A-498B-498C. Directed Field Experience. (2 to 8 each) Clinical, to be arranged. Field experiences designed to increase understanding of student fields of study. May be repeated for credit. S/U or letter grading.

499A-499B-499C. Advanced Directed Field Experi- ence. (4 to 8 each) Clinical, to be arranged. Disserta- tion practicum that supports students in developing their proposals. Guides students on how to write their dissertation proposals and serves as writing workshop where students have opportunities to receive feedback from instructors, fellows, and peers. May be repeated for credit. Letter grading.

501. Co-op in Program in Special Education. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA academic adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Limited to UCLA doctoral students in special education. Used to record enrollment in practicum courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Independent Study. (1 to 12) Tutorial, to be arranged. Individual study or research for graduate students. May be repeated for credit. S/U or letter grading.

597. Preparation for Master’s Comprehensive Ex-aminations or Doctoral Qualifying Examinations. (1 to 12) Tutorial, to be arranged. Individual study for master’s comprehensive examinations or for PhD or EdD qualifying examinations. May be repeated for credit. S/U grading.

Overview

Electrical and computer engineers are responsible for inventions that have revolutionized our society, such as the electrical grid, telecommunications, and automated computing and control. The profession continues to make vital contributions in many domains, such as the infusion of information technology into all aspects of daily life. To further these ends, the Department of Electrical and Computer Engineering fosters a dynamic academic environment that is committed to a tradition of excellence in teaching, research, and service. It has state-of-the-art research programs and facilities in a variety of fields. Departmental faculty members are engaged in research efforts across several disciplines in order to serve the needs of industry, government, society, and the scientific community. Interactions with other disciplines are strong. Faculty members regularly conduct collaborative research projects with colleagues in the Geffen School of Medicine; School of Education and Information Studies; School of Theater, Film, and Television; and College of Letters and Science.

Research

The primary areas in the department are circuits and embedded systems, computer engineering, physical and wave electronics, and signals and systems. These areas cover a broad spectrum of specializations in, for example, communications and telecommunications, computer vision, control systems, cybersecurity, electromagnetics, embedded computer networking, embedded computing systems, engineering optimization, integrated circuits and systems, machine learning, microelectromechanical systems (MEMS), nanotechnology, photonics and optoelectronics, plasma electronics, signal processing, and solid-state electronics.

Undergraduate Majors

Computer Engineering BS

The undergraduate curriculum provides all Computer Engineering majors with preparation in the mathematical and scientific disciplines that lead to a set of courses that span the fundamentals of the discipline in the major areas of data science and embedded networked systems. These collectively provide an understanding of many inventions of importance to our society, such as the Internet of Things, human-cyber-physical systems, mobile/wearable/implantable systems, robotic systems, and more generally smart systems at all scales in diverse spheres. The design of hardware, software, and algorithmic elements of such systems represents an already dominant and rapidly growing part of the computer engineering profession. Students are encouraged to make use of their computer science and electrical and computer engineering electives and a two-quarter capstone design course to pursue deeper knowledge within one of these areas according to their interests, whether for graduate study or preparation for employment.

Capstone Major

The Computer Engineering major is a designated capstone major that is jointly administered by the Computer Science and Electrical and Computer Engineering departments. Undergraduate students complete a design course in which they integrate their knowledge of the discipline and engage in creative design within realistic and professional constraints. Students apply their knowledge and expertise gained in previous mathematics, science, and engineering coursework. Students identify, formulate, and solve engineering problems and present their projects to the class.

Learning Outcomes

The Computer Engineering major has the following learning outcomes:

- Application of mathematical, scientific, and engineering knowledge
- Design of a software or hardware system, component, or process to meet desired needs within realistic economic, environmental, social, ethical, health, safety, security, reliability, manufacturability, and sustainability constraints
- Function productively on a team with others
- Identification, formulation, and solution of computer engineering problems
- Effective communication
Requirements

Preparation for the Major

Required: Computer Science 1 (or Electrical and Computer Engineering 1), 31, 32, 33, 35L, M51A (or Electrical and Computer Engineering M16); Electrical and Computer Engineering 3: Engineering 96L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 1A, 1B, 1C, and 4AL or 4BL.

The Major

Required: Computer Science 111, 118 (or Electrical and Computer Engineering 132B), M151B (or Electrical and Computer Engineering M116C), M152A (or Electrical and Computer Engineering M116L), 180; Electrical and Computer Engineering 100, 102, 113, 115C; one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, Statistics 100A; 8 units of computer science and 8 units of electrical and computer engineering upper-division electives; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; 8 units capstone design from either Electrical and Computer Engineering 180DA/180DB or 183DA/183DB.

Policies

The Major

An approved list of technical breadth courses is available in the Office of Academic and Student Affairs.

For information on UC, school, and general education requirements, see the Samueli school section in College and Schools.

Electrical Engineering BS

The undergraduate curriculum provides all Electrical Engineering majors with preparation in the mathematical and scientific disciplines that lead to a set of courses that span the fundamentals of the three major departmental areas of signals and systems, circuits and embedded systems, and physical wave electronics. These collectively provide an understanding of inferences of importance to society, such as integrated circuits, embedded systems, photonic devices, automatic computation and control, and telecommunication devices and systems.

Students are encouraged to make use of their electrical engineering electives and a two-term capstone design course to pursue deeper knowledge within one of these areas according to their interests, whether for graduate study or preparation for employment. See the department website for examples of specializations.

The Electrical Engineering major is accredited by the Engineering Accreditation Commission of ABET.

Capstone Major

The Electrical Engineering major is a designated capstone major. Undergraduate students complete a design course in which they integrate their knowledge of the discipline and engage in creative design within realistic and professional constraints. Students apply their knowledge and expertise gained in previous mathematics, science, and engineering coursework. Within a multidisciplinary team structure, students identify, formulate, and solve engineering problems and present their projects to the class.

Learning Outcomes

The Electrical Engineering major has the following learning outcomes:

- Application of knowledge of mathematics, science, and engineering
- Design of a system, component, or process to meet desired needs within realistic constraints
- Function as a productive member of a multidisciplinary team
- Effective communication
- Identification, formulation, and solution of electrical engineering problems

Requirements

Preparation for the Major

Required: Chemistry and Biochemistry 20A; Computer Science 31, 32; Electrical and Computer Engineering 2, 3, 10, 11L, M16 (or Computer Science M51A); Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

The Major

Required: Electrical and Computer Engineering 101A, 102, 110, 111L, 113, 131A; six core courses selected from Computer Science 33, Electrical and Computer Engineering 101B, 115A, 121B, 132A, 133A, 141, 170A; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; 12 units of major field elective courses, at least 8 of which must be upper-division electrical and computer engineering courses—the remaining 4 units may be from upper-division electrical and computer engineering courses or from another engineering school department; and one two-term electrical and computer engineering capstone design course (8 units).

Policies

The Major

An approved list of technical breadth courses is available in the Office of Academic and Student Affairs.

Electrical and Computer Engineering 100 and CM182 may not satisfy elective credit.

For information on UC, school, and general education requirements, see the Samueli school section in College and Schools.

Undergraduate Minor

Data Science Engineering Minor

The minor is intended to expose students to the entire data science life cycle from both foundational and application perspectives. The foundational courses provide the engineering skills to collect, cleanse, and store data; analyze and draw inference from data; and take action and make decisions. A wide-ranging list of interdisciplinary courses focuses on various data-science applications using these skills.

Admission

To apply for the minor, students must have an overall grade-point average of 3.0 or better, have completed or be in the process of completing in the present quarter the two lower-division required courses with the grade B- or better, and file a petition through Message Center. Steps to apply are outlined on the Office of Academic and Student Affairs website. Information about the minor and the application are available on the minor website.

The Minor

Required Lower-Division Courses (8 units): Computer Science 32, Mathematics 33A.

Required Upper-Division Courses (12 units minimum): One course from Civil and Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, or Statistics 100A; Computer Science M148 or Electrical and Computer Engineering M148; Computer Science 145 or M146 or Electrical and Computer Engineering M146.

Elective Upper-Division Courses (8 units minimum): Two courses from Computer Science M119, CM121, CM122, CM124, 143, 145 or M146 (if not taken as a required course), 161, 180, M182, Electrical and Computer Engineering 102, 113, 114, M119, 133A, M146 (if not taken as a required course), C147, 183DA and 183DB (both must be taken), Mechanical and Aerospace Engineering C137, 185, Statistics 100B, 115, 170, or C180.

Policies

Variable topics courses may be taken as topics apply.

Transfer credit for any of the above is subject to approval; consult with the undergraduate counselors before enrolling in any courses for the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and student must have a minimum grade of C in each and an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Major

Electrical and Computer Engineering MS, PhD

The graduate program provides students with an opportunity to pursue advanced course-
Electrical and Computer Engineering

Lower-Division Courses

1. Undergraduate Seminar. (1) Seminar, one hour; outside study, two hours. Introduction by faculty members and industry lecturers to electrical engineering disciplines through current and emerging applications of autonomous systems and vehicles, biomedical devices, aerospace electronic systems, consumer products, digital science, and entertainment products (amusement rides, etc.), as well as energy generation, storage, and transmission. P/NP grading.

2. Physics for Electrical Engineers. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Physics 1C. Introduction to concepts of modern physics necessary to understand solid-state devices, including elementary quantum theory, Fermi energies, and concepts of electrons in solids. Discussion of electrical properties of semiconductors leading to operation of junction devices. Letter grading.

2H. Physics for Electrical Engineers (Honors). (4) Lecture, four hours; discussion, two hours; outside study, eight hours. Introduction to field of electrical engineering. Basic circuits techniques with application to explanation of electrical engineering inventions such as telecommunications, electrical grid, automatic computing and control, and enabling device technology. Research frontiers of electrical engineering. Introduction to measurement and design of electrical circuits. Letter grading.

10. Circuit Theory I (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 3 (or Computer Science 1 or Mathematics 10), Mathematics 33A, Physics 1B. Corequisites: course 11L (enforced only for Computer Science and Electrical Engineering majors), Mathematics 33B. Introduction to linear circuit analysis. Resistive circuits, capacitors, inductors and ideal transformers, Kirchhoff laws, node and loop analysis, first-order circuits, second-order circuits, Thévenin and Norton theorem, sinusoidal steady state, Letter grading.

11L. Circuits Laboratory I. (1) Lecture, one hour; laboratory, one hour; outside study, one hour. Enforced corequisite: course 10. Experiments with basic circuits containing resistors, capacitors, inductors, and transformers. Ohm’s law voltage and current division, Thévenin and Norton equivalent circuits, superposition, transient and steady state analysis. Letter grading.

110. Electrical and Electronic Circuits. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: Mathematics 33A, 33B or Mechanical and Aerospace Engineering 82, Physics 1C. Not open for credit to students who have completed course 110. Electrical quantities, linear circuit elements, circuit principles, signal transmission, AC and DC circuit behavior, analog and digital circuits, small signal models, and operational amplifiers. Letter grading.

101A. Engineering Electromagnetics. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Mathematics 32A and 32B, or 33A and 33B, Physics 1C. Corequisites: course 10. Electromagnetic field concepts, waves and phasors, transmission lines and Smith chart, transient responses, vector analysis, introduction to Maxwell equations, static and quasi-static electric and magnetic fields. Letter grading.

101B. Electromagnetic Waves. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 101A. Time-varying fields and Maxwell’s equations, vector addition and interaction with media, energy flow and Poynting vector, guided waves in waveguides, phase and group velocity, radiation and antennas. Letter grading.

110H. Circuit Theory II (Honors). (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: course 10, M16 (or Computer Science 51A). Corequisite: course 111L. Experiments with basic circuits containing resistors, capacitors, inductors, and transformers. AC steady state analysis, AC steady state power, network functions, poles and zeros, frequency response, mutual inductance, ideal transformer, application of Laplace transforms to circuit analysis. Letter grading.

110L. Circuit Measurements Laboratory. (2) Laboratory, four hours; outside study, two hours. Requisite: course 100 or 110. Experiments with basic circuits containing resistors, capacitors, inductors, and op-amps. Ohm’s law voltage and current division, Thévenin and Norton equivalent circuits, superposition, transient and steady state analysis, and frequency response principles. Letter grading.

111L. Circuits Laboratory II. (1) Lecture, one hour; laboratory, one hour; outside study, one hour. Enforced requisite: courses 10, 111L. Corequisite: course 110. Experiments with electrical circuits containing resistors, capacitors, inductors, transformers, and op-amps. Steady state power analysis, frequency response principles, dc biasing circuits, Small-signal analysis. Operational amplifier systems. Letter grading.

113. Digital Signal Processing. (4) Lecture, two hours; laboratory, four hours; outside study, six hours. Enforced requisite: course 113. Real-time implementation of digital signal processing algorithms on digital processor chips. Experiments involving A/D and D/A conversion, aliasing, digital filtering, sinusoidal oscillators, Fourier transforms, and finite word-length effects. Course project involving original design and implementation of machine learning and signal processing systems for communications, radar, medical and other imaging, speech, music, or video using DSP chip. Completion of projects begun in course 113DB. Letter grading.

113DB. Digital Signal Processing Design. (4) Lecture, two hours; laboratory, four hours; outside study, six hours. Enforced requisite: courses 113, 113DA. Real-time implementation of digital signal processing algorithms on digital processor chips. Experiments involving A/D and D/A conversion, aliasing, digital filtering, sinusoidal oscillators, Fourier transforms, and finite word-length effects. Course project involving original design and implementation of signal processing systems for communications, speech, audio, or video using DSP chip. Completion of projects begun in course 113DB. Letter grading.

114. Speech and Image Processing Systems Design. (4) Lecture, three hours; discussion, one hour; laboratory, two hours; outside study, six hours. Enforced requisite: course 113. Design principles of speech and image processing systems. Speech production, analysis and modeling in first half of course; design techniques for image enhancement, filtering, transformation in second half. Lectures supplemented by laboratory implementation of speech and image processing tasks. Letter grading.

115AL. Analog Electronics Laboratory I (2) Laboratory, four hours; outside study, two hours. Enforced requisite: course 115A. Experimental determination of device characteristics, resistive diode
circuits, single-stage amplifiers, compound transistor stages, effect of feedback on single-stage amplifiers, operational amplifiers, and operational amplifier circuits. Students perform various processing tasks using computer-aided design experience based on individual student hardware design and implementation platforms. Letter grading.

115C. Digital Electronic Circuits. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 100 or 115A, and Computer Science 5M1A. Transistor-level digital circuit design and analysis. Basic properties of logic gates, flip-flops, latches, counters, etc., computer-aided simulation of digital circuits. Letter grading.

115E. Design Studies in Electronic Circuits. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 115B. Description of process of circuit design through laboratory exercises. Topics vary by instructor and include communication circuits, power supplies, recommended course 115B or course 115M1A, Computer Science 111, Computer system organization and design, implementation of CPU datapath and control, instruction set architecture (hyper-, parallel, virtual memory), organization and management, input/output subsystems (bus structures, interrupts, DMA), performance evaluation, pipelined processors. Letter grading.

M116C. Computer Systems Architecture. (4) (Same as Computer Science M151B.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course M16 or Computer Science M51A. Hands-on design experiences in FPGAs and using computer-aided design tools for schematic capture and simulation, implementation of complex circuits using programed array logic, introduction to digital tool based on SUPREM, Computer Science 111. Course study, seven hours. Letter grading.

M119. Fundamentals of Embedded Networked Systems. (4) (Same as Computer Science M119.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 132B or Computer Science 118; one course from course 131A, Civil and Environmental Engineering 110, Mathematics 170A, 170E, Statistics 100A; Computer Science 33. Design tradeoffs and principles of operation of cyber physical systems such as devices and systems constituting the Internet of Things. Topics include signal propagation and debugging of complex circuits, use of computer-aided design tools for schematic capture and simulation, implementation of complex circuits using programed array logic, introduction to digital tool based on SUPREM. Course study, seven hours. Letter grading.

121A. Principles of Semiconductor Device Design. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: course 2. Introduction to principles of operation of bipolar and MOS transistors, equivalent circuits, high-frequency behavior, voltage limitations. Letter grading.

121DA-121DB. Semiconductor Processing and Device Design. (4) Design fabrication and characterization of p-n junction and transistors. Students perform various processing tasks such as wafer preparation, oxidation, diffusion, metallization, and photolithography. Introduction to CAD tools used in integrated circuit processing and device design. Device structure optimization tool based on MEDICI; integrated circuit design tool based on SUPREM. Course familiarizes students with those tools. Using CAD tools, CMOS process integration to be designed. 121DA, Lecture, four hours; laboratory, four hours; outside study, four hours. Enforced requisite or corequisite: course 121B. In progress grading (credit to be given only on completion of units 121B, 121DA). Lecture, two hours; laboratory, four hours; outside study, six hours. Enforced requisites: courses 121B, 121DA. Letter grading.

123A. Fundamentals of Solid-State I. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 2 or Physics 1C. Limitation to junior/senior engineering majors. Fundamentals of solid-state, introduction to quantum mechanics and quantum statistics applied to solid-state, Crystal structure, energy levels in solids, and band theory and semiconductor properties. Letter grading.

123B. Fundamentals of Solid-State II. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course 123A. Discussion of solid-state properties, lattice vibrations, thermal properties, dielectric, magnetic, and superconducting properties. Letter grading.

126. Principles of Nanoelectronics. (4) Lecture, four hours; discussion, four hours; outside study, four hours. Requisite: Physics 1C. Introduction to fundamentals of nanoscale for electronics nanosystems. Principles of fundamental quantities: electron charge, effective mass, electron spin, electron mobility, theoretical approaches. From these nanoscale components, discussion of basic behaviors of nanosystems such as analysis of dynamics, variability, and noise associated with those of scaled CMOS. Incorporation of design project in which students are challenged to design electronic nanosystems. Letter grading.

131A. Probability and Statistics. (4) Lecture, four hours; discussion, one hour; outside study, 10 hours. Requisites: Mathematics 32B, 33B. Introduction to basic concepts of probability, including random variables and random vectors, generating functions, characteristic functions, and limit theorems. Applications to communication, control, and signal processing. Introduction to computer simulation and generation of random variables. Letter grading.

132A. Introduction to Communication Systems. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: courses 102, 115A, 131A. Review of basic probability, basics of hypothesis testing, sufficient statistics and waveform communication, signal-design tradeoffs for digital communications, basics of error control coding, bit error rate, symbol interference channels and orthogonal frequency division multiplexing, digital pulse, basic wireless communications. Letter grading.

133A. Analytical Numerical Computing. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 131A, and Civil Engineering 110, Mathematics 170A or 170E or Statistics 100A; Computer Science 32 or Program in Computing 10C. Application of computational techniques to the breadth of data science. Foundations for modeling data sources, principles of operation of common tools for data analysis, application of tools and models to data, introduction to statistical foundations, regression, classification, neural networks, clustering, expectation maximization, principal component analysis, decision theory, reinforcement learning and deep learning. Letter grading.

134. Graph Theory in Engineering. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Basics of graph theory, including trees, bipartite graphs, graph matching, planar graphs and networks. Emphasis on reducing real-world engineering problems to graph theory formulations. Letter grading.

142. Linear Systems: State-Space Approach. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 102. State-space methods of linear system analysis and synthesis, with application to problems in networks, control, and system modeling. Letter grading.

C143A. Neural Signal Processing. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 131A, Mathematics 33A. Topics include fundamentals of signal processing, dynamic, temporal patterns, and activity in neurons; technology for measuring neural activity; spiking statistics and Poisson processes; generative models and classification; regression and Kalman filtering; principal components analysis, factor analysis, and expectation maximization. Concurrently scheduled with course C243A. Letter grading.

M146. Introduction to Machine Learning. (4) (Same as Computer Science M146A.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 131A or Civil and Environmental Engineering 110 or Mathematics 170A or 170E or Statistics 100A; Computer Science 32 or Program in Computing 10C. Application of computational techniques to the breadth of data science. Foundations for modeling data sources, principles of operation of common tools for data analysis, application of tools and models to data, introduction to statistical foundations, regression, classification, neural networks, clustering, expectation maximization, principal component analysis, decision theory, reinforcement learning and deep learning. Letter grading.

C147. Neural Networks and Deep Learning. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 131A, 133A or 205A, and M146, or equivalent. Review of machine learning concepts: maximum likelihood; supervised classification; neural network architectures; backpropagation; regularization for training neural networks; optimization techniques; deep learning and feedforward neural networks; practical CNN architectures; deep learning libraries in Python; recurrent neural networks, backpropagation through time, long short-term memory and gated recurrent units; variational autoencoders; generative adversarial networks; maximum likelihood; supervised examples and training. Concurrently scheduled with course C247. Letter grading.

M148. Introduction to Data Science. (4) (Same as Computer Science M148.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: one course from 131A, Civil and Environmental Engineering 110, Mathematics 170A, Mathematics 170E, or Computer Science 32 or Program in Computing 10A, and 10B. How to analyze data arising in real world so as to understand corresponding phenomenon. Covers topics in machine learning, data analytics, and statistical modeling clas-
scially employed for prediction. Comprehensive, hands-on overview of data science domain by blending theoretical and practical instruction. Data science literacy, data collection and cleaning, feature engineering, model selection, and prediction methodologies. Letter grading.

149. Foundations of Computer Vision. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisites: courses 102, 131A. Mathematics 33A. Covers foundations of computer vision from both theoretical and practical perspective. Particular emphasis on classical computer vision, which should provide employment in machine learning. Study is relevant for various majors in the sciences specializing in artificial intelligence, cyberphysical systems and information engineering, robotics, machine learning, perception, and others looking for interdisciplinary specialties in artificial intelligence, cyberphysical systems and information engineering, robotics, machine learning, perception, and others looking for interdisciplinary training. Enforced requisite: course 101B. Letter grading.

M153. Introduction to Microscale and Nanoscale Manufacturing. (4) (Same as Bioengineering M153, Chemical Engineering M153, and Mechanical and Aerospace Engineering M158B.) Lecture, three hours; laboratory, four hours; outside study, five hours. Enforced requisites: Chemistry 20A, Physics 1A, 1B, 1C, 4A. Introduction to general manufacturing methods, mechanical design, and fabrication. Micro and nanomanufacturing. Focus on concepts, physics, and instruments of various microfabrication and nanofabrication techniques that have been broadly applied in industry and academic settings. Introduction to computer numerical control fabrication. Letter grading.

162A. Wireless Communication Links and Antennas. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 101B. Transmission line design and analysis. Waveguide, impedance matching techniques, power dividers, directional couplers, active devices, transistor amplifier design. Letter grading.

163C. Fundamental Principles of Radiofrequency and Microwave Systems. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course 101B. Theory and design of modern radiofrequency (RF) and microwave systems such as cellular communications, satellite systems, radar systems, wireless sensors, and biological applications of microwaves such as magnetic resonance imaging (MRI). Letter grading.

163DA. Microwave and Wireless Design I. (4) Lecture, one hour; laboratory, three hours; outside study, eight hours. Enforced requisite: course 101A, 101B. Course 163DA is required for 163DB. Limited to seniors and graduate students. Enforced requisites: courses 102, 131A. Hands-on experience with design, selection, and application of microwave and wireless components and systems. Letter grading.

163DB. Microwave and Wireless Design II. (4) Lecture, one hour; laboratory, three hours; outside study, eight hours. Enforced requisites: courses 101A, 101B. Limited to seniors. Design of radio frequency circuits and systems, with emphasis on both theoretical foundations and hands-on experience. Design of radio frequency transceivers and their building blocks according to given specifications or in form of open-ended problems. Introduction to advanced topics related to projects through lecture and laboratories. Creation of projects using advanced techniques and systems in application context, including trade-offs among subsystems while meeting constraints and optimizing metrics related to cost, performance, ease of use, manufacturability, testing, and other real-world issues. Oral and written presentations of project results required. Letter grading.

164DA-164DB. Electronic Circuits and Systems Design. (4) Lecture, two hours; laboratory, two hours; outside study, eight hours. Enforced requisite: course 115B (may be taken concurrently), or instructor consent. Course 164DA recommended to 164DB. In Progress (164DA and letter (164DB) grading. 164DB. Lecture, one hour; laboratory, three hours; outside study, eight hours. Enforced requisite: course 164DA. Letter grading.

170A. Principles of Photonics. (4) Lecture, four hours; recitation, one hour; outside study, seven hours. Enforced requisite: courses 2, 101A. Development of solid foundation on essential principles of photonics from ground up with minimum prior knowledge on this subject. Topics include optical properties of materials, optical wave propagation and modes, optical interferometers and resonators, optical coupling and modulations. Applications of lasers, semiconductors, and light-emitting diodes, and optical detection. Letter grading.

170B. Lasers and Photonic Devices. (4) Lecture, four hours; recitation, one hour; outside study, seven hours. Enforced requisite: course 170A. Coverage of laser physics, related photonic devices, and applications of lasers. Topics include resonators, thermal radiation, Einstein relations, and cavity design of lasers. Resonator media, optical modulation and detection. Letter grading.

170C. Photonic Sensors and Solar Cells. (4) Lecture, four hours; recitation, one hour; outside study, seven hours. Enforced requisite: course 170A. Fundamentals of detection of light for communication and sensing, as well as conversion of light to electrical energy in solar cells. Introduction to photodetectors, photodiodes, photodetector inefficiencies, noise processes and figures of merit, thermal detectors, and photovoltaic solar cells of various types and materials. Letter grading.

171LP. Data Communication Systems Laboratory. (2 or 4) (Same as Computer Science M171L.) Lecture, four to eight hours; outside study, two to four hours. Recommended prerequisite: course M116. Limited to seniors. Not open to students with credit for another course in data communications. Preparation for senior design project. Design of analog circuits, components and systems, emphasizing theoretical foundations and hands-on experience. Design of key analog and digital building blocks, including specifications or in form of open-ended problems. Introduction to advanced topics related to projects through lecture and laboratories. Creation of projects using advanced techniques and systems in application context, including trade-offs among subsystems while meeting constraints and optimizing metrics related to cost, performance, ease of use, manufacturability, testing, and other real-world issues. Oral and written presentations of project results required. Letter grading.

173DA. Advanced Topics in Photonic Systems. (4) Lecture, four hours; discussion, two hours; outside study, eight hours. Enforced requisite: course 101A. Study of advanced topics in photonic systems. Focus on topics related to real-world applications. Letter grading.

180DA-180DW. Systems Design. (4–4) Advanced systems design integrating communications, control, and signal processing subsystems. Introduction to advanced topics related to projects through lecture and laboratories. Open-ended projects vary each offering. Student teams create high-performance designs that manage trade-offs among subsystem components, including cost, performance, ease of use, and other real-world issues. Topics vary each offering. Enforced requisite: course 101A. Letter grading.

181DA-181DB. Honors Thesis. (4–4) Tutorial, one hour; outside study, 11 hours. Limited to seniors. Research by individuals or small teams under supervision of faculty mentor, leading to completion and presentation of an honors thesis. Study of research and development: project conception, planning, development and testing; design iteration cycle; research and data documentation standards; how to read technical literature. Planning, execution, and documentation of original open-ended research/development project. 181DA. Study of research fundamentals, conception of project plan, and first iteration of design such as experiment, simulation, algorithm, or hardware artifact, each with testing and validation plan. Written documentation of design with oral presentation. In Progress grading (credit to be given only on completion of course 181DW). Enforced requisite: course 181DA. Letter grading.

181DB. Written documentation in form of thesis documenting results in their societal and technical contexts, and oral presentation/demonstration of final results. Letter grading.

CM182. Science, Technology, and Public Policy. (4) (Same as Public Affairs M164 and Public Policy CM182.) Lecture, three hours. Recent and continuing advances in science and technology are raising profound questions of public policy. Consideration of selection of critical policy issues, each of which has substantial ethical, social, economic, political, scientific, and technological aspects, currently scheduled with course CM282. Letter grading.

183DA. Design of Robotic Systems I. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Enforced requisite: course 115B. Limited to students with credit for course 183DB or with permission of the instructor. Introduction to robotics and computer scientific applications in robotics. Emphasis is on design of end-to-end systems in application context, including trade-offs among subsystems while meeting constraints and optimizing metrics related to cost, performance, ease of use, manufacturability, testing, and other real-world issues. Oral and written presentations of project results required. Letter grading.

183DB. Design of Robotic Systems II. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Enforced requisite: course 115B. Limited to students with credit for course 183DA. Design, analysis, and construction of advanced robotic systems for various applications. Oral and
written presentation of project results. In Progress grading (credit to be given only on completion of course 183DB).

183DB. Design of Robotic Systems II. (4) Laboratory, four hours lecture, six hours laboratory. Requisite: course 183DA. Recommended: courses 141, 142. Limited to senior Electrical Engineering majors. Topics in robotic design include integrated electromechanical design; design of software; design of sensors and actuators; and design automation. Topics in robotic manufacturing include materials, sensors and actuators, programming, and rapid prototyping. Topics in control include sensors, regulation, motion, and feedback control. Open-ended projects vary annually. Student teams create and analyze robotic systems for various applications. Oral and written presentation of project results. Letter grading.

184DA-184DB. Independent Group Project Design. (2-2) Laboratory, five hours discussion, one hour. Enforced requisites: courses M16, 110, 110L. Course 184DA is enforced requisite to 184DB. Courses centered on group project that runs year long to give students training in teamwork, design problem solving, software design, and project organization. Several projects based on autonomous robots that traverse small mazes and courses offered yearly and target regional competitions. Students must submit proposals that are evaluated and approved by faculty members. Topics include sensing circuits and amplifier-based design, microcontroller programming, feedback control, actuation, and robot motion. In Progress (184DA) and letter (184DB) grading.

M155. Introduction to Plasma Science and Engineering. (4) (Same as Earth, Planetary, and Space Sciences M156 and Physics M122.) Lecture, four hours; laboratory, three hours; discussion, one hour; outside study, eight hours. Requisite: course 101A or Physics 110B. Senior-level introductory course on  electrolydynamics of plasmas in laboratory, near-Earth space and astrophysical settings. Covers selected applications taken from fusion energy, space weather, materials processing, generation of coherent radiation and particle accelerators. Letter grading.

188. Special Courses in Electrical Engineering. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Special topics in electrical engineering vary. May be repeated once for credit with topic change. Letter grading.

196. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

194. Research Group Seminars: Electrical Engineering. (2 to 4) Seminar, four hours; outside study, eight hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field. May be repeated for credit. Letter grading.

199. Directed Research in Electrical Engineering. (2 to 8) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit with school approval. Individual contract required; enrollment petitions available in Office of Academic and Student Affairs. Letter grading.

Graduate Courses

201A. VLSI Design Automation. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 115C. Fundamentals of design automation of VLSI circuits and systems, including introduction to circuit and system platforms such as field-programmable gate arrays and multicore systems; high-level synthesis, logic synthesis, and technology mapping; physical design; and testing and verification. Letter grading.

201C. Modeling of VLSI Circuits and Systems. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 115C. Detailed study of VLSI circuit and system models considering performance, signal integrity, power, thermal effects, reliability, and manufacturability. Discussion of principles of modeling and optimization codevelopment. Letter grading.

210D. Design in Nanoscale Technologies. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 115C. Challenges of digital circuit design and layout in deeply scaled technologies, with focus on design-manufacturing interactions. Summary of legal and design issues, and methods for design automation and technology transfer. Letter grading.

202A. Embedded Systems. (4) (Same as Computer Science M213A.) Lecture, four hours; discussion, one hour; outside study, eight hours. Enforced requisite: course M213A. Topics include design for graduate computer science and electrical engineering students. Methodologies and technologies for design of hardware, software, embedded operating systems and software platforms for embedded systems, techniques for modeling and specification of system behavior, software organization, real-time operating systems, communication and packet scheduling, low-power battery and energy-aware system design, timing synchronization, fault tolerance, and debugging, and techniques for hardware and software architecture optimization. Theoretical foundations as well as practical design methods. Letter grading.

202B. Energy-Aware Computing and Cyber-Physical Systems. (4) (Same as Computer Science M213B.) Lecture, four hours; outside study, eight hours. Requisite: course M16 or Computer Science M51A. Recommended: course M116C or Computer Science M151B, and Computer Science 111. Systematic study of energy consumption in computing and communication at various scales ranging across embedded, mobile, personal, enterprise, and data-center scale. Concepts include modeling and simulation of hardware and software platforms for embedded systems; embedded systems; embedded software; software architecture optimization. Letter grading.

202C. Networked Embedded Systems Design. (4) Lecture, four hours; laboratory, four hours; outside study, four hours. Designed for graduate computer science and electrical engineering students. Training in combination of networked embedded systems design and embedded operating system and software architecture. Concepts include research and industry career paths in wireless devices for applications ranging from conventional wireless mobile devices to new area of wireless health. Laboratory design modules and course projects based on state-of-art embedded hardware platform. Letter grading.

205A. Matrix Analysis for Scientists and Engineers. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Preparation: one undergraduate linear algebra course. Designed for first-year graduate students in all branches of engineering, science, and related fields. Topics include: matrix algebra; linear algebra, language in which virtually all of modern science and engineering is conducted. Review of matrices taught in undergraduate courses and introduction to graduate-level topics. Letter grading.

209AS. Special Topics in Circuits and Embedded Systems. (2 to 4) Seminar, two to four hours; outside study, four to eight hours. Seminars and discussions on current and advanced topics in one or more aspects of circuits and embedded systems, such as digital, analog, mixed-signal, and radio frequency integrated circuits (RF ICs); electronic design automation; wireless communication circuits and systems; embedded processors and embedded software; distributed sensor and actuator networks; robotics; and embedded security. May be repeated for credit with topic change. S/U or letter grading.

209BS. Seminar: Circuits and Embedded Systems. (2 to 4) Seminar, two to four hours; outside study, four to eight hours. Preparation: prior training in probability theory, random processes, and linear algebra. Recommended requisites: courses 205A, 241A. Mean-square-error estimation and filters, least-squares estimation and filters, steepest-descent algorithms, stochastic-gradient algorithms, convergence, stability, tracking, and performance, algorithms for adaptation and learning, adaptive filters, learning and classification, optimization, and artificial intelligence. Letter grading.

211A. Digital Image Processing I. (4) Lecture, three hours; discussion, one hour; laboratory, four hours; outside study, four hours. Preparation: computer programming experience. Requisite: course 113. Fundamentals of digital image processing theory and technology.
niques. Topics include two-dimensional linear system theory, image transforms, and enhancement. Concepts covered in lecture are applied in computer laboratory assignments.

214B. Advanced Topics in Speech Processing. (4) Lecture, three hours; discussion, one hour; computer assignments, two hours; outside study, six hours. Requisite: course 124. Basics of speech analysis/synthesis. Techniques include linear prediction, filter-bank models, and homomorphic filtering. Applications to speech synthesis, automatic recognition, and hearing aids. Letter grading.

215A. Analog Integrated Circuit Design. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 115B. Analysis and design of analog integrated circuits. MOS and bipolar device structures and models, single-stage and differential amplifiers, noise, feedback, operational amplifiers, offset and distortion, sampling devices and discrete-time circuits, bandgap references. Letter grading.

215C. Analysis and Design of RF Circuits and Systems. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 115C, M216A. Analysis and comparison of modern logic families. VLSI memories (SRAM, DRAM, and ROMs). Accuracy of various simulation models and simulation methods for digital circuits. Letter grading.

215D. Analog Microsystem Design. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 215A. Analysis and design of data conversion interfaces and filters. Sampling circuits and architectures, D/A conversion techniques, A/D converter architectures, building blocks, precision techniques, quantization error and continuous-time filters. Letter grading.

215E. Signaling and Synchronization. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 215A, M216A. Analysis and design of circuits for synchronization and communication for VLSI systems. Use of both digital and analog design techniques to improve data rate of electronics between functional blocks, chips, and systems. Advanced clocking methods, lockers, phase-locked loops, clock generation, and high-performance wire-line transmitters, receivers, and timing recovery circuits. Letter grading.

216A. Design of VLSI Circuits and Systems. (4) (Same as Computer Science M258A.) Lecture, four hours; discussion, two hours; laboratory, four hours; outside study, eight hours. Requisites: courses M16 or Computer Science M51A, and 115A. Recommended: course 115C, LSI/VLSI design and application in user systems. Fundamental design techniques that can be used to implement complex integrated systems on chips. Letter grading.

216B. VLSI Signal Processing. (4) Lecture, four hours; outside study, eight hours. Advanced concepts in VLSI signal processing, with emphasis on architecture design and optimization within block-based description that can be mapped to hardware. Fundamental concepts of DSP algorithm design, VLSI architecture, and circuit design applied to complex DSP algorithms in emerging applications for personal communications and healthcare. Letter grading.

216C. LSI in Computer System Design. (4) (Same as Computer Science M226.) Lecture, four hours; laboratory, four hours; outside study, four hours. Requisite: course M216A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectural and VLSI design tools. Letter grading.

217. Biomedical Imaging. (4) (Same as Biomedical M217.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 114 or 211A. Optical imaging modalities in biomedicine. Noninvasive medical imaging and new medical fields discussed briefly for comparison purposes. Letter grading.

218. Network Economics and Game Theory. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 124. Game theory and economics are used in various speech-processing applications, with focus on speech recognition by humans and machine. Physiology and speech production; human perception; Dynamic Time Warping (DTW) and Hidden Markov Models (HMM) for automatic speech recognition systems, pattern classification, and search algorithms. Applications to VLSI in future designs. Letter grading.

219. Large-Scale Data Mining: Models and Algorithms. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Introduction of variety of scalable data mining tools, both predictive and causal, from different disciplines. Topics include supervised and unsupervised data mining tools from machine learning, such as support vector machines, different regression engines, different types of regularization and kernel techniques, deep learning, and Bayesian techniques. Techniques to evaluate relative performance of different methods and their applicability. Includes computer projects that explore entire data analysis and modeling cycle; collecting and cleaning large data sets, developing predictive and causal models, and evaluating performance of different models. Letter grading.

221A. Physics of Semiconductor Devices I. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Physical principles and design considerations of junction devices. Letter grading.

221B. Physics of Semiconductor Devices II. (4) Lecture, four hours; outside study, eight hours. Principles and design of multi-bandgap devices and charge-coupled devices. Letter grading.

221C. Microwave Semiconductor Devices. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Physical principles and design considerations of microwave solid-state devices: Schottky barrier diodes, IMPATT diodes, transferred electron devices, tunnel diodes, microwave transistors. Letter grading.

222. Signal-processed Circuits Fabrication Processes. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 2. Principles of integrated circuits fabrication processes. Technological limitations of integrated circuits design. Topics include both crystal and epitaxial growth, thermal oxidation, diffusion, ion-implantation, chemical vapor deposition, sputter etching, lithography, and metallization. Introduction of advanced process simulation tools. Letter grading.

224. Solid-State Electronics II. (4) Lecture, four hours; outside study, eight hours. Recommended requisite: course 223. Theoretical methods for circulating electronics and optical properties of semiconductor structures. Quantum size effects and low-dimensional systems. Application to semiconductor nanometer scale devices, including negative resistance diodes, transistors, and detectors. Letter grading.

225A. Advanced Electrical Engineering Seminar. (2) Seminar, two hours; outside study, six hours. Preparation: successful completion of PhD major field examination. Seminar on current research topics in solid-state, nonlinear, and microwave electronic devices, diffusion in semiconductors, optical and microwave semiconductor devices, nonlinear optics, and electronics and circuits. Letter grading.

225B. Advanced Electrical Engineering Seminar. (2) Seminar, two hours; outside study, six hours. Preparation: successful completion of PhD major field examination. Seminar on current research topics in solid-state, nonlinear, and microwave electronic devices, diffusion in semiconductors, optical and microwave semiconductor devices, nonlinear optics, and electronics and circuits. Letter grading.

226A. Large-Scale Data Mining: Models and Algorithms. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Introduction of variety of scalable data mining tools, both predictive and causal, from different disciplines. Topics include supervised and unsupervised data mining tools from machine learning, such as support vector machines, different regression engines, different types of regularization and kernel techniques, deep learning, and Bayesian techniques. Techniques to evaluate relative performance of different methods and their applicability. Includes computer projects that explore entire data analysis and modeling cycle; collecting and cleaning large data sets, developing predictive and causal models, and evaluating performance of different models. Letter grading.
231A. Information Theory: Channel and Source Coding. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Fundamentals of information theory, transmission and processing, and learning. Topics include limits and algorithms for lossless data compression, connections to model estimation and learning, channel capacity, rate versus distortion in lossy compression, and basics of multiple-access networks. Letter grading.

231B. Network Information Theory. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course 231A. Point-to-point multiple-input, multiple-output (MIMO) wireless channels: capacity and theorems in network coding, combinational approach and alphabet size, linear programming approach and throughput benefits, network code design algorithms, secure network coding for wireless, other applications. Letter grading.

231E. Channel Coding Theory. (4) Lecture, four hours; outside study, eight hours. Requisite: course 131A. Fundamentals of error control codes and decoding algorithms. Topics include block codes, convolutional codes, trellis codes, and turbo codes. Letter grading.

232A. Stochastic Modeling with Applications to Telecommunication Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 131A. Stochastic processes; applications to telecommunication systems, traffic engineering, business, and management. Discrete-time and continuous-time Markov processes; renewal processes; Markov-renewal processes, Markov-renewal, semi-Markov and semiregenerative stochastic processes. Decision and reward processes. Applications to traffic and queueing analysis, basic telecommunications and computer communication networks, Internet, and management systems. Letter grading.

232B. Queueing Systems and Intelligent Transportation Networks. (4) Lecture, four hours; outside study, eight hours. Requisite: course 131A. Queueing theory; analysis and design of queueing systems; traffic management and design of intelligent transportation systems, telecommunications networks, autonomous vehicular networks, business and management systems. Markovian and non-Markovian queueing systems and networks. Applications to traffic engineering, transportation and autonomous vehicular systems; communication networks, management and business systems. Letter grading.

233E. Speech and Image Processing, and Complex Networks: Design and Algorithms. (4) Lecture, four hours; recitation, one hour; outside study, seven hours. Modeling and design of large-scale complex networks, including social networks. Renewal and queuing networks, World Wide Web, and gene networks. Modeling of characteristic topological features of complex networks, such as power laws and percolation thresholds; random planar networks; applications for various applications, such as e-mail spam detection, friendship recommendations, viral popularity, and epidemics. Introduction to network algorithms, computational complexity, random graphs, poly-time completeness. Letter grading.

233. Wireless Communications System Design, Modeling, and Implementation. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 113. Covers algorithms, architectures, and implementation for radio transceivers, physical, and network layer functionalities. Topics include wireless channel modeling, single-carrier and MIMO systems, radio impairments and their correction, architectures and circuits design trade-offs, wideband spectrum sensing, wideband signaling, cognitive radio, massive multiple-input, multiple-output (MIMO) systems, and applications of Internet of things (IoT) communication. Letter grading.

234A. Network Coding Theory and Applications. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Network coding: combinatorial approach and alphabet size, linear programming approach and throughput benefits, network code design algorithms, secure network coding for wireless, other applications. Letter grading.

235A. Mathematical Foundations of Data Storage Systems. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 113A or equivalent. Research developments in new mathematical techniques for emerging large-scale, ultra-reliable, fast, and affordable data storage systems. Topics include, but are not limited to, graph-based codes and algebraic codes and decoders for modern storage devices (e.g., Flash), rank modulation, writing codes, algorithms for data deduplication and synchronization, and redundant array of independent disks (RAID) systems. Letter grading.

236A. Linear Programming. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: Mathematics 115A or equivalent knowledge of linear algebra. Basic graduate course in linear optimization; convexity and linear programming; second-order cone and semidefinite programming, geometric programming. Simplex method. Interior-point methods. Decomposition and large-scale linear programming. Quadratic programming and complementarity pivot theory. Engineering applications. Introduction to integer linear programming and computational complexity theory. Letter grading.

238. Multimedia Communications and Processing. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Key concepts, principles, and algorithms of online learning and learning how to make decisions under uncertainty in broad context, including Markov decision processes, optimal stopping, reinforcement learning, structural results for online learning, multiarmed bandits learning, multiagent learning, multiagent deep learning. Letter grading.

239A. Special Topics in Signals and Systems. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Special topics in one or more aspects of signals and systems, such as communication, control, image processing, information theory, machine learning, computational speech processing, telecommunications, and VLSI signal processing. May be repeated for credit with topic change. S/U or letter grading.

239BS. Seminar: Signals and Systems. (2 to 4) Seminars for four hours; discussion, one hour to eight hours. Seminars and discussions on current and advanced topics in one or more aspects of signals and systems, such as communications, control, image processing, information theory, multimedia, computer networking, optimization, speech processing, telecommunications, and VLSI signal processing. May be repeated for credit with topic change. S/U grading.

M240A. Linear Dynamic Systems. (4) (Same as Chemical and Biomolecular Engineering M270A.) Lecture, four hours; outside study, eight hours. Requisite: course 141 or Mechanical and Aerospace Engineering 171A. State-space models of linear time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors of matrices, Cayley-Hamilton theorem, Jordan form; matrix functions; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

M240C. Optimal Control. (4) (Same as Chemical Engineering M280C and Mechanical and Aerospace Engineering M270C.) Lecture, four hours; outside study, eight hours. Requisite: course 240B. Applications of variational methods, Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programming) to optimal control of dynamic systems modeled by linear or nonlinear ordinary differential equations. Letter grading.

243A. Neural Signal Processing. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 131A, Mathematics 33A. Topics include fundamental properties of electrical activity in neurons; techniques for mapping neural activity; spiking statistics and Poisson processes; generative models and classification; regression and Kalman filtering; principal components analysis, factor analysis, and expectation-maximization. Concurrently scheduled with course C143A. Letter grading.

246. Foundations of Statistical Machine Learning. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 131A, Mathematics 33A. Introduction to foundations of statistical machine learning. Overview of several widely used learning algorithms including logistic and linear regression, kernel methods and support vector machines, ensemble learning, decision trees and nearest neighbor classifiers. Connections to information theory through probably approximately correct (PAC) learning, stability, bias-complexity trade-
off, structural risk minimization, minimum description length (MDL), and universal learning. Introduction to representation learning with topics including unsupervised learning (linear/non-linear) dimensionality reduction, sketching, parametric distribution estimation including Gaussian mixtures, expectation maximization, non-parametric distribution estimation, property testing and neural networks focused on generative adversarial networks (GANs). Generative adversarial networks (GANs). Discussion of reinforcement learning. Letter grading.

C247. Neural Networks and Deep Learning. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 131A, 133A or 205A, and M146, or equivalent. Review of machine learning concepts; maximum likelihood; supervised classification; neural network architectures; backpropagation; regularization for training neural networks; optimization for training neural networks; convolutional neural networks; practical CNN architectures; deep learning libraries in Python; recurrent neural networks, backpropagation through time, long short-term memory and gated recurrent units; variational autoencoders; generative adversarial networks; adversarial examples and training. Concurrently scheduled with course C147. Letter grading.

M248S. Seminar: Systems, Dynamics, and Control Topics. (2) (Same as Chemical Engineering M237 and Mechanical and Aerospace Engineering M299A) Seminar, two hours; outside study, six hours. Limited to graduate engineering students. Presentations of research topics by leading academic researchers from fields of systems, dynamics, and control. Students who work in these fields present their papers and results. S/U grading.

M250B. Microelectromechanical Systems (MEMS) Fabrication. (4) (Same as Bioengineering M250B and Mechanical Engineering M260B) Lecture, four hours; discussion, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: course M153. Advanced discussion of micromachining processes used to construct MEMS of many aspects: deposition, etching, and processing, as well as their combination in process integration. Materials issues such as chemical resistance, corrosion, mechanical properties, and residual/intrinsic stress. Letter grading.

M252. Microelectromechanical Systems (MEMS) Device Physics and Design. (4) (Same as Bioengineering M252 and Mechanical and Aerospace Engineering M252B) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course M250B. Design of MEMS. Design methods, design rules, sensing and actuation mechanisms, microsensors, and microactuators. Designing MEMS to be produced with both foundry and micromachining techniques. Overview of MEMS design for MEMS. Design project required. Letter grading.

M255. Neuroengineering. (4) (Same as Bioengineering M256 and Neuroscience M256B) Lecture, four hours; laboratory, three hours; outside study, five hours. Requisites: Mathematics 32A, Physics 1B or SC. Introduction to principles and technologies of bioelectricity and neural signal recording, processing, and stimulation. Includes bioelectricity, electrophysiology (action potentials, local field potentials, EEG, ECOG), intracellular and extracellular recording, microelectrode technology, neural signal processing (neural signal filtering, spike detection, spike detection, spike sorting, stimulation artifact removal), brain-computer interfaces, deep-brain stimulation, and prosthetics. Letter grading.

M256A-M256B-M256C. Evaluation of Research Literature in Neuroengineering. (2-2-2) (Same as Bioengineering M256A-M256B-M256C and Neuroscience M252A-M252B-M252C) Discussion; two hours; outside study, eight hours. Introduction to fundamentals of nanoscale science and technology. Basic physical principles, quantum mechanics, chemical bonding and nanostructures, top-down and bottom-up (self-assembly) fabrication; nanocharacterization; nanomaterials, nanoelectronics, and nanobiotechnology. Introduc- tion to new knowledge and techniques in nano areas to understand and inspire students to create new ideas in multidisciplinary nano areas. Letter grading.

266. Computational Methods for Electromagnetics. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 162A, 163A. Computational techniques for partial differential and integral equations: finite-difference, finite-element, method of moments. Applications include transmis- sion lines, resonators, integrated circuits, solid-state device modeling, electromagnetic scattering, and an- tenna Letter grading.

274. Optical Communication and Sensing Design. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 170A and 170B or equivalent. Top-down introduction to physical layer design in fiber optic communication systems, including modulation, demodulation, and computer-aided design. Architectural-level design of fiber optic transceiver circuits, including preamplifier, quantizer, clock and data recovery, laser driver, and predistortion circuits. Letter grading.

M275. Micro- and Nanoscale Biosensing for Molecu- lar Diagnostics. (4) (Same as Bioengineering M273.) Lecture, four hours; discussion, one hour; outside study, seven hours. Covers state-of-the-art and emerging biosensors in context of molecular diagnostics. Stu- dents learn relevant biology and biochemistry pertinent to molecular diagnostics. Students gain thorough understanding of biochemical engineering, bio- fluids, and electronics. Topics include biosensor performance parameters, modes of detection, sample preparation challenges, microfluidics, and emerging wearable biosensing platforms, as well as proteomics, genomics, and DNA sequencing technologies. Letter grading.

279AS. Special Topics in Physical and Wave Elec- tronics. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Covers state-of-the-art and emerging biosensors in context of molecular diagnostics. Stu- dents learn relevant biology and biochemistry pertinent to molecular diagnostics. Students gain thorough understanding of biochemical engineering, bio- fluids, and electronics. Topics include biosensor performance parameters, modes of detection, sample preparation challenges, microfluidics, and emerging wearable biosensing platforms, as well as proteomics, genomics, and DNA sequencing technologies. Letter grading.

279BS. Seminar: Physical and Wave Electronics. (2 to 4) Seminar, two to four hours; outside study, four to eight hours. Seminars and discussions on current and advanced topics in one or more aspects of physical and wave electronics, such as electromagnetic, microwave and millimeter wave circuits, photonics and optoelectronics, plasma electronics, microelectromechanical systems, solid state and nanotechnology. May be repeated for credit with topic change. S/U or letter grading.

CM252. Science, Technology, and Public Policy. (4) (Same as Public Policy CM252) Lecture, three hours. Recent and continuing advances in science and technol- ogy issues. Consideration of selection of critical policy is- sues, each of which has substantial ethical, social, eco- nomic, political, scientific, and technological as- pects. Concurrently scheduled with course CM182. Letter grading.

CM282. Science, Technology, and Public Policy. (4) (Same as Public Policy CM282) Lecture, three hours. Recent and continuing advances in science and technol- ogy issues. Consideration of selection of critical policy is- sues, each of which has substantial ethical, social, eco- nomic, political, scientific, and technological as- pects. Concurrently scheduled with course CM182. Letter grading.

285A. Plasma Waves and Instabilities. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101A, and M185 or Physics M122. Wave phe-

285B. Advanced Plasma Waves and Instabilities. (4) Lecture, four hours; outside study, eight hours. Recent topics: courses M185, and 285A or Physics 222A. Interaction of intense electromagnetic waves with plasmas: waves in inhomogeneous and bounded plasmas, coupling and damping, magnetic metric instabilities, anomalously resistivity, shock waves, echoes, laser heating. Emphasis on experimental considerations and techniques. Letter grading.

285S. Seminar: Engineering Graduate Education. (3) Seminar, 90 minutes; outside study, 90 minutes. Limited to graduate electrical engineering students. Petition forms to request enrollment. May be repeated for credit. S/U grading.

M237B. Seminar: Process Systems Engineering. (2) (Same as Management M237B.) Seminar, four hours; outside study, four hours. Introduction to intellectual property (IP) in context of technology products and markets. Topics include best practices in putting in place before product development starts, how to develop high-value patent portfolios, patent licensing, offensive and defensive IP litigation considerations, trade secrets, opportunities and pitfalls of open source software, trademarks, managing copyright in increasingly complex content ecosystems, and adopting IP strategies to globalized marketplace. Includes case studies inspired by complex IP questions facing technology companies today. S/U or letter grading.

295. Intellectual Property for Technology Entrepreneurs and Managers. (2) (Same as Management M247.) Seminar, two hours; outside study, four hours. Introduction to intellectual property (IP) in context of technology products and markets. Topics include best practices in putting in place before product development starts, how to develop high-value patent portfolios, patent licensing, offensive and defensive IP litigation considerations, trade secrets, opportunities and pitfalls of open source software, trademarks, managing copyright in increasingly complex content ecosystems, and adopting IP strategies to globalized marketplace. Includes case studies inspired by complex IP questions facing technology companies today. S/U or letter grading.

295A. Preparation for MS Comprehensive Examination. (2 to 12) Tutorial, to be arranged. Limited to graduate electrical engineering students. Reading and preparation for MS comprehensive examination. S/U grading.

297A. Preparation for PhD Preliminary Examinations. (2 to 16) Tutorial, to be arranged. Limited to graduate electrical engineering students. Reading and preparation for PhD preliminary examination. S/U grading.

297C. Preparation for PhD Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate electrical engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

597A. Preparation for and Presentation of MS Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate electrical engineering students. Supervised independent research for oral presentation. S/U or letter grading.

597B. Preparation for PhD Preliminary Examinations. (2 to 16) Tutorial, to be arranged. Limited to graduate electrical engineering students. Reading and preparation for PhD comprehensive examination. S/U grading.

597C. Preparation for PhD Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate electrical engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

Research for and Preparation of MS Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate electrical engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Research for and Preparation of PhD Dissertation. (2 to 14) Tutorial, to be arranged. Limited to graduate electrical engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

For details on the Department of Emergency Medicine and courses offered, see the department website.

Emergency Medicine faculty information is available from the department.

ENGINEERING

SCHOOLWIDE PROGRAMS

Henry Samueli School of Engineering and Applied Science

6426 Boelter Hall
Box 951601
Los Angeles, CA 90095-1601

Engineering Schoolwide Programs

310-825-9580

Overview

The Henry Samueli School of Engineering and Applied Science offers several schoolwide graduate degree programs.

Graduate Study

The Samueli School offers the Master of Engineering (MEng) degree, Master of Science (MS) online degree in Engineering, and Engineer (Eng) degree as schoolwide degrees. The following area-specific online degrees have also been established: MS in Engineering–Aerospace, MS in Engineering–Computer Networking, MS in Engineering–Electrical, MS in Engineering–Electronic Materials, MS in Engineering–Integrating Circuits, MS in Engineering–Manufacturing and Design, MS in Engineering–Materials Science, MS in Engineering–Mechanical, MS in Engineering–Signal Processing and Communication, and MS in Engineering–Structural Materials.

A certificate of specialization is available in all areas of specialization.

Graduate Majors

Engineering Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Master of Engineering Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more de-
Engineering MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Engineering—Aerospace MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Engineering—Computer Networking MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Engineering—Electrical MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Engineering—Electronic Materials MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Engineering—Integrated Circuits MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Engineering—Manufacturing and Design MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Engineering—Materials Science MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Engineering—Mechanical MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Engineering—Signal Processing and Communication MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Engineering—Structural Materials MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Engineering Lower-Division Courses

2. Technology and Society. (2) Lecture, two hours; discussion, one hour; outside study, three hours. Introduction to the role of technology in society. Letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

20. First-Year Engineering Transition Bridge. (2) Seminar, 18 hours (two weeks). Designed primarily for new students to help them understand UCLA, its culture, structure (quarter system), and academic policies; and to facilitate their transition from high school to college. Examination of research on first-year experience of college students, studying at UCLA versus high school, policies and procedures, and campus resources. Advanced preparation and early exposure to fall quarter mathematics, chemistry, and computer science curricula. Collaborative learning techniques and community-building activities are integral processes to both day and evening programs. Intensive classroom instruction and collaborative learning workshops. May be repeated for credit. Offered in summer only. P/NP grading.

21. Computing Immersion Summer Experience. (2) Seminar, 18 hours (three weeks). Designed primarily for new students to help them understand UCLA, its culture, structure (quarter system), and academic policies; and to facilitate their transition from high school/community college to university. Designed to immerse incoming computing students in foundation concepts and principles of computer science, with focus on fundamental computer programming principles, methodologies, and techniques. Basic concepts of programming and C++ computing language. Offered in summer only. P/NP grading.

22. Summer Bridge Review for Enhancing Engineering Students. (2) Seminar, 18 hours (two weeks). Designed primarily for new students to help them understand UCLA, its culture, structure (quarter system), and academic policies; and to facilitate their transition from community college to university. Intensive introduction of advanced topics covered in upper-division engineering courses. May be repeated for credit. Offered in summer only. P/NP grading.

23. Finding Industry Internship. (2) Seminar, two hours; outside study, four hours. Designed to engage engineering students in process of formal career development. Students learn about various components of internship/job application and practice preparing relevant materials. Prepares students for career-related social interactions. Development of skills and insights to successfully secure future opportunities, such as first industry internship. P/NP grading.
24. Finding Undergraduate Research Opportunity. (2) Seminar, two hours; outside study, four hours. Designed to engage engineering students, primarily those with one or more hours of technical experience, in ongoing research, securing, and beginning research. Students learn about various methods and resources used to obtain laboratory position. Exploration of opportunities and guidance on how to approach those openings. Offers students a smooth transition into research laboratory. P/NP grading.

25. Communicating Undergraduate Research Results. (2) Seminar, two hours; outside study, four hours. Designed to engage students in the process of communicating formal research. Students learn about various components required in publishing research. Offers templates and examples as guides for undergraduate research presentations and writing. Development of skills and insights to successfully publish first research project. P/NP grading.

26. Finding Entry-Level Job. (2) Seminar, two hours; discussion, two hours; outside study, two hours. Designed to engage engineering students in process of getting ready to graduate and need help joining workforce. Focus on how to apply to entry-level positions in engineering field, and specifically industries that value engineering experience. Hands-on technical experience required. Offers suggestions to overcome typical barriers students encounter in securing entry-level position including students with no industry internships, lack of professional experience, low grade-point average, lack of student organization extracurricular activities, international students, Deferred Action for Childhood Arrivals (DACA) status, and students in need of plans for movement from laboratory to industry. Offered pass/no credit. P/NP grading.

87. Introduction to Engineering Disciplines. (4) Lecture, one hour; laboratory, one hour; outside study, three hours. Introduction to the engineering field, and specifically industries that value engineering experience. Hands-on technical experience, low grade-point average, lack of student organization extracurricular activities, international students, Deferred Action for Childhood Arrivals (DACA) status, and students in need of plans for movement from laboratory to industry. Offered pass/no credit. P/NP grading.

Upper-Division Courses

102. Synthetic Biosystems and Nanosystems Design. (4) Lecture, four hours; outside study, eight hours. Requires: course M101, Life Sciences 3. Introduction to current progress in engineering to integrate biosciences and nanosciences into synthetic systems, where biological components are reengineered and rewired to perform desirable functions in bioengineering, materials science, and medicine. Topics include basic technologies and systems analysis that deal with dynamic behavior, noise, and uncertainties. Design project in which students are challenged to develop novel biosystems and nanosystems for non trivial task required. Letter grading.

M103. Environmental Nanotechnology: Implications and Applications. (4) (Same as Civil Engineering M103) Lecture, four hours; discussion, one hour; outside study, six hours. Recommended requisite: course M101. Introduction to potential implications of nanotechnology to environmental systems as well as potential application of nanotechnology to environmental protection. Technical content includes three multidisciplinary areas: (1) physical, chemical, and biological properties of nanomaterials, (2) transport, reactivity, and toxicity of nanomaterials in environmental systems, and (3) use of nanotechnology for energy and water production, plus environmental protection, monitoring, and remediation. Letter grading.

110. Introduction to Technology Management and Economics for Engineers. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Fundamental principles of micro-level (individual, firm, and industry) and macro-level (government, international) economics as they relate to technology management. How individuals, firms, and governments impact successful commercialization of high technology products and services. Letter grading.

111. Introduction to Finance and Marketing for Engineers. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Critical components of finance and marketing research and practice as they impact management of technology commercialization. Internal (within firm) and external (in marketplace) marketing and financing of high-technology innovation. Concepts include present value, future value, discounted cash flow, internal rate of return, asset appreciation, market value, return on assets, return on equity, return on investment, interest rates, cost of capital, and product, price, positioning, and promotion. Use of market research, segmentation, and forecasting in management of technological innovation. Letter grading.

112. Laboratory to Market, Entrepreneurship for Engineers. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Critical components of entrepreneurship, finance, marketing, human resource, and accounting disciplines as they impact management of technology commercialization. Topics include human resource, capital, technology, management, team building, marketing, and financial management. Students work in small teams studying technology management plans to bring new technologies to market. Topics include intellectual property, management, team building, market forecasting, and entrepreneurial finance. Students work in small teams studying technology management plans to bring new technologies to market. Topics include intellectual property, management, team building, market forecasting, and entrepreneurial finance. Students work in small teams studying technology management plans to bring new technologies to market.
182EW. Technology and Law. (4) Lecture, four hours; discussion, three hours; outside study, five hours. Requisite: English Composition 3, 3D, 3X, or 3SL. Not open for credit to students with credit for course 181EW, 183EW, 185EW, or 188EW. Places engineering in broader societal context through examination of some of key ethical, legal, and regulatory issues. Contemporary, diverse areas covered, including intellectual property, data privacy, and employment of emerging technology products and services. Historical examination of ethical and legal frameworks generally and in relation to technology. Exploration of societal and ethical perspectives and related topics to examine their broader ramifications. Topics may include driverless cars, algorithms and artificial intelligence, social media, digital privacy, and impact of technology on employment. Offers students tools for enabling them to think more proactively and holistically about ethical and societal dimensions of their work as technology creators. Satisfies engineering writing requirement. Letter grading.

183EW. Engineering and Society. (4) Lecture, four hours; discussion, three hours; outside study, five hours. Enforced requisite: English Composition 3, 3D, 3S, 3E, or 3SL. Not open for credit to students with credit for course 181EW, 182EW, 185EW, or 188EW. Limited to sophomores/junior/senior engineering students. Professional and ethical considerations in practice of engineering. Impact of technology on society and development of moral and ethical values. Contemporary environmental, biological, legal, and other issues created by new technologies. Emphasis on research and writing within engineering environments. Writing and revision of a research paper, including two individual technical essays and one team-written research report. Readings address technical issues and writing form. Satisfies engineering writing requirement. Letter grading.

185EW. Art of Engineering Endeavors. (4) Lecture, four hours; discussion, three hours; outside study, five hours. Enforced requisite: English Composition 3, 3D, 3S, 3E, or 3SL. Not open for credit to students with credit for course 181EW, 182EW, 183EW, or 188EW. Designed for junior/senior engineering students. Non-technical skills and experiences necessary for engineering career success with strong emphasis on group dynamics in engineering practice. Teamwork and effective group skills in engineering environments. Organization and control of multidisciplinary complex engineering projects with leadership and qualities and characteristics of effective leaders. How engineering, computer sciences, and technology relate to major ethical and social issues. Societal demands on practice of engineering. Emphasis on research and writing in engineering environments. Satisfies engineering writing requirement. Letter grading.

188. Special Courses in Engineering. (4) Seminar, four hours; discussion, four hours; outside study, six hours. Requisite: course 201. Designed for graduate students. Practical review of major elements of system engineering process. Coverage of key elements: system requirements and flow down, product development cycle, functional analysis, system synthesis and trade studies, budget allocations, risk management, stakeholder analysis, milestone schedules, and success measurement. Also offers opportunity for graduate students window into excitement of graduate student research experience. Also offers opportunity for graduate students to learn about what their peers are doing. P/NP grading.

191. Seminar Series in Engineering Research. (1) Seminar, one hour. Seminar series in cutting-edge engineering research at UCLA. Each seminar is given by UCLA graduate student researcher or post-doctoral scholar. Designed to be accessible to undergraduate students in any science, technology, engineering, and mathematics (STEM) major. Offers undergraduate students window into excitement of graduate student research experience. Also offers opportunity for graduate students to learn about what their peers are doing. P/NP grading.

192. Fundamentals of Engineering Mentorship. (2) Seminar, two hours; outside study, four hours. Requisite: satisfactory performance in prerequisites and practical and theoretical techniques for instruction of hands-on engineering design projects. Curriculum planning, project preparation, classroom management, team dynamics, and isolations and parts obsolescence. Discussion of nature of these issues; their ethical, legal, and social ramifications; and what society values in relation to these issues. Writing and revision of about 20 pages total, including two essays and one analysis of a negotiation from an ethical perspective. Satisfies engineering writing requirement. Letter grading.

195. Internship Studies in Engineering. (1 to 4) Tutorial, one hour. Limited to juniors/seniors. Internship study course supervised by associate dean or designee. May be repeated for credit with topic or instructor change. P/NP grading.

199. Directed Research in Engineering. (2 to 8) Seminar, one to two hours; outside study, four to eight hours. Requisite: satisfactory performance in prerequisites and application for approval. May be repeated for credit with school approval. Individual contract required; enrollment petitions available in Office of Academic and Student Affairs. Letter grading.

Graduate Courses

200. Program Management Principles for Engineers and Professionals. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Practical review of necessary processes and procedures to successfully manage technology programs. Review of fundamentals of program planning, organizational structure, implementation, and performance measurement. Discussion of methodology with necessary information to support decision-making process that provides high-quality products on time and within budget. Letter grading.

201. Systems Engineering (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Practical review of major elements of system engineering process. Coverage of key elements: system requirements and flow down, product development cycle, functional analysis, system synthesis and trade studies, budget allocations, risk management, review and audit activities and documentation. Letter grading.

202. Reliability, Maintainability, and Supportability. (4) Lecture; four hours; outside study; eight hours. Requisite: course 201. Designed for graduate students with one to two years work experience. Interdisciplinary course covering the system life-cycle cost and one key element of system engineering activities. Overview of engineering disciplines critical to this function—reliability, maintainability, and supportability—and how they are related using probability theory. Topics also include fault detections and isolations and parts obsolescence. Discussion of 6-sigma process, one effective design and manufacturing strategy to ensure system reliability, maintainability, and supportability. Letter grading.

203. System Architecture. (4) Lecture; four hours; outside study; eight hours. Requisite: course 201. Designed for graduate students with BS degrees in engineering or science and one to two years work experience in selected domain. Art and science of architectural methodology—paradigm and tools. Principles of architectural through analysis of architecture designs of major existing sys-
tems. Discussion of selected elements of architectural practices, such as representation models, design processes, and architecture frameworks. Examination of professionalization of system architecting. Letter grading.

204. Trusted Systems Engineering. (4) Lecture, four hours; outside study, eight hours. Trust is placed in information systems to behave properly, but cyber threats and breaches have become routine, outpacing the penetration of financial, medical, government, and national security systems. To build systems that can protect confidentiality, integrity, and availability involves more than merely applying security principles. Students learn about computer security, data security, cryptography, etc. One can use most secure components, and resulting system could still be vulnerable. Skills learned ensure that systems are architected, designed, implemented, tested, and operated for specific levels of trust. Aspects include assessing vulnerability and risk for systems, establishing protection principles, and using them in projects.

205. Model-Based Systems Engineering. (4) Lecture; four hours; outside study, eight hours. Model-based systems engineering (MBSE) and systems modeling language (SysML) taught through lectures and real-world projects, and one independent project. Lectures and readings to provide students with conceptual framework and vocabulary. Individual projects enable students to develop basic skills for creating SysML requirements and structural and behavioral diagrams. In group project students learn how to package, compartmentalize, and integrate smaller efforts while being constrained to meet schedules. Industry-recognized credentials may be obtained, as course covers Object Management Group (OMG) Certified Systems Modeling Professional (OCSMP) tests, such as Model User and Model Builder Fundamentals and Modeler. Letter grading.

206. Engineering for Systems Assurance. (4) Lecture, four hours; outside study, eight hours. Recommended requisites: course 204, Computer Science 236. Systems are constructed to perform complex functions and services. How to understand needs of users, analysis of requirements and derived requirements, creation of various system architecture products, and design and integration of various components into systems that perform these functions and services. System assurance addresses confidence that systems meet specified operational requirements based on their design and by applying assurance techniques. Introduction, investigation, and analysis of framework of assurance to accomplish total system assurance. Development of secure, reliable, and dependable systems from commercial resources such as air traffic control, Supervisory Control and Data Acquisition (SCADA), and autonomous vehicles to military realm such as command, control, communication, intelligence, and cyber. Letter grading.

210. Operations and Supply Chain Management. (4) Lecture, four hours; outside study, eight hours. Introduction to strategic and operating issues and decisions involved in managing enterprises. Operational processes transform resources that enter the system as inputs into goods and utilizes them to provide service, or does both. Conceptual framework and set of analytical tools provide to enable students to better understand why processes behave as they do. Given this understanding, students are able to involve themselves in organization's defining strategic decisions, those related to key processes affecting organizational unit's goal achievement. Letter grading.

211. Financial Management. (4) Lecture, four hours; outside study, eight hours. Introduction to concepts reflecting material generally covered in certain MBA core accounting courses. The integration of both theories and principles to introduce essential conceptual building blocks in accounting and finance—and empirical practice—to emphasize how these theories are actually implemented in real world. Cases, comprehensive problems, and recent events presented to provide students with as much hands-on experience in applying material presented as possible. Letter grading.

212. Intellectual Property Law and Strategy. (4) Lecture, four hours; outside study, eight hours. Poor knowledge of legal doctrines or materials not required. Intellectual property law is not just topic for lawyers. Engineers who have design responsibilities must understand why processes behave as they do. Given this understanding, students are able to involve themselves in organization's defining strategic decisions, those related to key processes affecting organizational unit's goal achievement. Letter grading.

213. Data and Business Analytics. (4) Lecture, four hours; outside study, eight hours. Coverage of wide variety of spreadsheet models that can be used to solve business and engineering problems, with emphasis on mastering Excel as integral part of analytic decision making. Managerial models include data modeling, regression and forecasting, linear programming, network and distribution models. Problem solving, Monte Carlo simulation. Problems from operations, finance, and marketing taught by spreadsheet examples and describe general managerial situations from various industries and disciplines. Development of spreadsheet models to facilitate decision making. Letter grading.

214. Management Communication. (4) Lecture, four hours. Exploration of knowledge, attributes, skills, and strategies necessary to succeed communically in workplace, with focus on business presentation skills, visual and verbal persuasion skills, and interpersonal communication in work environment. Letter grading.

215. Entrepreneurship for Engineers. (4) Lecture, four hours; outside study, eight hours. Limited to graduates in engineering. Topics in starting and developing high-tech enterprises and intended for students who wish to complement their technical education with introduction to entrepreneurship. Letter grading.

299. Capstone Project. (4) Activity, 10 hours. Preparation: completion of minimum of four 200-level courses in core area of interest. Project course that satisfies UCLA final comprehensive examination requirement of MS degree in Engineering. Project is completed under individual guidance from UCLA Engineering faculty advisor. Project also serves as laboratory in organization of goal-oriented technical group. In Progress M473A and S/U or letter grading. (Same as English Composition M495I.)

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: appointment for those engineering students who wish to become regular teachers in class. Preparation and one half hours. Limited to Engineering Executive Program students. Letter grading.

472A-472D. Engineer in Business Environment. (3–3–1.5) Lecture, three hours (courses 472A, 472B, 472C) and 90 minutes (course 472D). Limited to Engineering Executive Program students. Introduction to core topics of executive management, economics, human relations, laws, social sciences, humanities, and fine arts on development and utilization of natural and human resources. Interaction of technology and society past, present, future, and resistance to change. S/U or letter (471A) grading; In Progress (471B) and S/U or letter (471C) grading.

473A-473B. Analysis and Synthesis of Large-Scale System. (3–3) Lecture, two and one half hours; outside study, six hours. Limited to Engineering Executive Program students. Letter grading.

495I. Teaching Preparation Seminar: Writing for Engineers. (4) (Same as English Composition M495I.) Seminar, on and one half hours; outside study, eight hours. Preparation: appointment as teaching assistant. Limited to graduate engineering students. Seminar on communication of engineering principles, concepts, and methods, preparation, organization of material, presentation, use of visual aids, grading, advising, and classroom management. Letter grading.

M495S. Teaching Preparation Seminar: Writing for Engineering Students. (2) (Same as English Composition M495S.) Seminar, one and one half hours; outside study, eight hours. Preparation: appointment as teaching assistant. Limited to graduate engineering students. Seminar on communication of engineering principles, concepts, and methods, preparation, organization of material, presentation, use of visual aids, grading, advising, and classroom management. Letter grading.

Undergraduate Study

The department offers Bachelor of Arts (BA) degrees in English and in American Literature and Culture. When selecting courses to fulfill requirements for the majors, students are expected to choose those courses that best reflect their own interests and simultaneously contribute toward a coherent program in literary studies.

Undergraduate Policies

Students must have completed the Entry-Level Writing requirement before taking any courses in English (other than English Composition 1 or 2). For more information, see Entry-Level Writing in Undergraduate Study.

Graduate Study

A graduate program leading to the Master of Arts (MA) degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the PhD degree. Because the PhD program may require five years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

Undergraduate Majors

English BA

Students pursuing the Bachelor of Arts degree in English are expected to meet with the undergraduate counselors and undergraduate faculty advisor to plan and follow a course of study that incorporates their interests and goals with the fulfillment of requirements for the degree.

Capstone Program

The English major is a designated capstone program. Students have the option of completing a capstone seminar or other culminating work that enables them to use knowledge and skills acquired through previous coursework to engage, under the guidance of a faculty member, in literary research or other creative projects that result in a final paper or other product.

Learning Outcomes

The English major has the following learning outcomes:

- Proficiency in a broad knowledge/skill set including research methods, critical thinking, and analytical writing
- Familiarity with basic project material including data from multiple sources
- Familiarity with relevant scholarly and current debates in the field
- Conception and execution of an independent project
- Demonstrated seminar or workshop skills

Overview

The Department of English is dedicated to the study of the literatures and cultures of those parts of the world in which English is a primary language. Although committed to no single method or approach, the department requires a knowledge of British, American, and Anglophone literary history and an engagement with a range of methodological approaches that foster intellectual curiosity and critical thinking and encourage its students to be not only expert readers and writers but engaged and ethical citizens. An understanding and appreciation of literature can furnish lifelong rewards. In addition to offering students such personal benefits, the department seeks to foster critical analysis and lucid writing and to teach them to think about how language and representation function in the world. Such skills are essential to success in a variety of professions for which the major in
• Demonstrated oral and written communication skills
• Demonstrated defense-of-scholarship skills

**Entry to the Major**

**Transfer Students**

Transfer applicants to the English major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, one English critical reading and writing course, one year of English literature survey courses, and either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or literature in translation.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

**Requirements**

**Preparation for the Major**

**Required:** English Composition 3, English 4W or 4HW or 4WX, 10A, 10B, 10C taken in the stated sequence (each course is a prerequisite for the next course), and either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or literature in translation.

The **Major**

**Required:** Ten 4- or 5-unit upper-division English courses, including (1) four historical period courses, one from each of the following four periods: (a) literatures in English to 1500—course 140A through 148 or indicated sections of 149, (b) literatures in English, 1500 to 1700—course 150A through 157, 166A, indicated sections of 159 or 159R, (c) literatures in English, 1700 to 1850—course 160A through 165C, 166B through 168, or indicated sections of 169 or 169R or 176, and (d) literatures in English, 1850 to present—course M101B, M101C, M102A, M102B, M104A through M104D, M105B through M105E, 116B, 130, 131, 164B, 164C, 164D, 167A, 167B, 168, 170A through 174C, 179, or 179R, or indicated sections of 176; (2) three breadth courses, one from each of three of the following four areas: (a) gender, race, ethnicity, disability, and sexuality studies—English 100 through 109, M126, 135, 155, 163C, 165B, 166C, or indicated sections of 119, 139, 149, 159R, 169, 169R, 179, or 179R, (b) imperial, transnational, and postcolonial studies—course M105A through M105D, 106, 112D, 128, 130 through 135, 154, 157, 163B, 164D, 165A, 166A, 166B, 176, or indicated sections of 149, 159, 159R, 169, 169R, 179, or 179R, (c) genre studies, interdisciplinary studies, critical theory—course 111A through 129, 144, 146, 147, 153, 156, 161A, 161B, 161C, 163A, 163C, 164A through 164D, 167A, 167B, 171A through 177, or indicated sections of 149, 159, 159R, 169, 169R, 179, or 179R, and (d) creative writing—courses 136, 137, M138; (3) two elective courses (English 195CE is not applicable); (4) one seminar from course 180 through 184, or M191A through M191E.

Admission to creative writing workshops (courses 136, 137, M138) is by application only.

**Honors Program**

Students must take one theory course from English 120 through 128 no later than winter quarter of the junior year. In spring quarter of the junior year, students must take course 191H. During fall and winter quarters of the senior year, students must take courses 198A and 198B, in which they write a thesis under the direction of a faculty member.

**Policies**

**Preparation for the Major**

A grade of C or better is required in each of English Composition 3, English 4W or 4HW or 4WX, 10A, 10B, 10C. A foreign literature in translation course list is available under Foreign Literature in Translation. Transfer students who have satisfied the College of Letters and Science foreign language requirement at the high-school level through the Interssegmental General Education Transfer Curriculum (IGETC) program may satisfy the departmental requirement with five foreign literature in translation courses. The courses may be taken on a Passed/Not Passed (P/ND) grading basis.

**The Major**

Each course applied toward requirements for the major must be 4 or 5 units and be taken for a letter grade.

**Honors Program**

**Admission**

The honors program is open to majors with a 3.5 departmental and a 3.25 overall grade-point average (GPA). Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. Students should apply by winter quarter of the junior year. For application forms and more information, contact the departmental counselor.

**Requirements**

The one theory course from English 120 through 128 may fulfill one of three required breadth courses. Course 191H may fulfill one of the two electives for the major. Course 198B may fulfill the second of the two electives for the major.

Students in the creative writing concentration are required to have completed or been accepted into their third workshop in a single genre prior to or concurrent with enrollment in course 191H.

The thesis determines whether highest honors, honors, or no honors are received.

**American Literature and Culture BA**

Students are expected to meet with the under-graduate counselors and undergraduate faculty adviser to plan and follow a course of study that incorporates their interests and goals with the fulfillment of requirements for the degree.

**Capstone Program**

The American Literature and Culture major is a designated capstone program. Students have the option of completing a capstone seminar or other culminating work that enables them to use knowledge and skills acquired through previous coursework to engage, under the guidance of a faculty member, in literary research or other creative projects that result in a final paper or other product.

**Learning Outcomes**

The American Literature and Culture major has the following learning outcomes:

- Proficiency in a broad knowledge/skill set including research methods, critical thinking, and analytical writing
- Familiarity with basic project material including data from multiple sources
- Familiarity with relevant scholarly and current debates in the field
- Conception and execution of an independent project
- Demonstrated seminar or workshop skills
- Demonstrated oral and written communication skills
- Demonstrated defense-of-scholarship skills

**Entry to the Major**

**Transfer Students**

Transfer applicants to the American Literature and Culture major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, one English critical reading and writing course, and either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or literature in translation.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

**Requirements**

**Preparation for the Major**

**Required:** English Composition 3, English 4W or 4HW or 4WX taken in the stated sequence (English Composition 3 is requisite to any English 4 course), 11, 87, and either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or literature in translation.

**The Major**

**Required:** Ten 4- or 5-unit upper-division courses, including (1) seven American literature courses, at least two in the time period before 1848 and two in the time period after 1848, selected from the following three areas with a minimum of two selected from each area: (a) origins—beginnings, events, and trajectories: studying the making of America in its myriad beginnings and manifestations—courses 100, M102A, M104A, 166A, 166B, 166C, 167A, 170A, or, when treating American topics, M101B, 106, 123, 131, 139,
Courses may be taken on a Passed/Not Passed basis. Five foreign literature in translation courses may satisfy the departmental requirement with the Intersegmental General Education Transfer Curriculum (IGETC) program, through the Intersegmental General Education Transfer Curriculum (IGETC) program.

Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed English 10A with a grade of C or better, and have satisfied the English Composition 3 and Composition 4 requirements. English 10A and English 10B must be taken in residence during the regular academic year (excluding summer sessions) at UCLA. Transfer credit is subject to department approval; consult with the undergraduate counselors before enrolling in any courses for the minor.

Policies

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed English 10A with a grade of C or better, and have satisfied the English Composition 3 requirement and Composition 4. Students must file a petition to declare the minor by meeting with a student affairs officer in the Undergraduate Counseling Office, 158/160 Kaplan Hall, 310-825-1389. This allows them priority enrollment in many upper-division courses.

The Minor

Required Lower-Division Courses (10 units): English 10A and 10B, with grades of C or better.

Required Upper-Division Courses (25 units): Five courses selected from English 100 through 185 (see course lists 1a, 1b, and 1c under English BA, the major), and one other course in literatures in English written before 1850. Three courses, (3) have completed one upper-division course in poetry writing (English 136A or 136B) or short fiction writing (English 137A or 137B), and (4) submit a brief letter of application, a writing sample (at least 10 pages of prose or 7 to 10 poems), and a PDF copy of their degree audit report.

The thesis determines whether they receive highest honors, honors, or no honors.

Undergraduate Minors

Creative Writing Minor

The creative writing minor allows students to develop the craft of poetry writing or short fiction writing, as well as to explore other and emerging areas of writing practice such as creative nonfiction, screenwriting, playwriting, hybrid genres, and electronic forms. The minor is excellent preparation for those who seek to pursue advanced degrees in writing, as well as for those who seek to pursue careers in writing and the creative industries.

Admission

To enter the minor, students must (1) have an overall grade-point average of 2.0 or better, (2) have completed the required lower-division courses, (3) have completed one upper-division course in poetry writing (English 136A or 136B) or short fiction writing (English 137A or 137B), and (4) submit a brief letter of application, a writing sample (at least 10 pages of prose or 7 to 10 poems), and a PDF copy of their degree audit report.

The Minor

Required Lower-Division Courses (9–10 units): One course selected from English 4HW, 4W, or 4WX; and one additional course selected from English 10C, 11, 20, or 20W.

Required Upper-Division Courses (24–25 units): One course in a core genre selected from English 136A, 136B, 137A, or 137B; one advanced course in the same genre, or one intermediate or advanced course in the other genre, or one creative writing topics course selected from English 136A, 136B, 137A, 137B, or M138; or one or two elective courses selected from Asian American Studies 112C, Chicana/o and Central American Studies CM135, English M101B, M101C, M102B, M104B, M104C, M105D, M136, M136B, M137A, M137B, M138, 170C, 171B, 171C, 172B, 173B, 174A, 174B, 174C, and M191E; and (3) two courses pertaining to American culture offered by other departments from a list of approved courses for the major. Courses 195 and 195CE are not applicable.

Honors Program

Admission

The honors program is open to majors with a 3.5 departmental and a 3.25 overall grade-point average (GPA). Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. Students should apply by winter quarter of the junior year. For application forms and more information, contact the departmental counselor.

Requirements

The one theory course from English 120 through 128 may fulfill one of three required breadth courses. Course 191H may fulfill one of the two electives for the major. Course 198B may fulfill the second of the two electives for the major.

Students in the creative writing concentration are required to have completed or been accepted into their third workshop in a single genre prior to or concurrent with enrollment in course 191H.

The thesis determines whether they receive highest honors, honors, or no honors.

Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. At least 15 upper-division units applied toward the minor must be taken in residence during the regular academic year (excluding summer sessions) at UCLA. Transfer credit is subject to department approval; consult with the undergraduate counselors before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade (except elective courses provided only on a Passed/Not Passed (P/NP) basis; no more than 4 units of P/NP coursework may be applied), and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

English Minor

The English minor is designed for students who wish to enhance their major program with the benefits of intensive study of English language and literatures, including a better understanding and appreciation of literatures in English and improvement in critical thinking, reading, and writing skills.

Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed English 10A with a grade of C or better, and have satisfied the English Composition 3 requirement and Composition 4. Students must file a petition to declare the minor by meeting with a student affairs officer in the Undergraduate Counseling Office, 158/160 Kaplan Hall, 310-825-1389. This allows them priority enrollment in many upper-division courses.

The Minor

Required Lower-Division Courses (10 units): English 10B and 10C, with grades of C or better.

Required Upper-Division Courses (25 units): Five courses selected from English 100 through 191E, including one course in literatures in English written before 1700 (see course lists 1a and 1b under English BA, the major) and one other course in literatures in English written before 1850 (see course lists 1a, 1b, and 1c under English BA, the major).
nor. Successful completion of the minor is indicated on the transcript and diploma.

Literature and the Environment Minor

The Literature and the Environment minor provides students with both a solid foundation for literary interpretation and a superstructure that integrates those skills and perspectives with the questions about the past, present, and future of the biosphere. It is designed for undergraduate students who wish to enhance their major program with intensive study of literature in its relationship to the natural environment, while improving their skills in reading, writing, creative and critical thinking, and analysis of complex situations in an ethical frame. The minor examines how different cultural forms (for example, fiction, journalism, poetry, film, design, and art) represent environmental issues, including biodiversity, animal studies, wilderness, food, urban ecologies, postcolonial ecologies, environmental justice, and climate change.

Admission

To enter the minor, students must be in good academic standing with an overall grade-point average of 2.0 or better and have completed English 4HW, 4W, 4WX, or any Writing II course with a grade of C or better. Students must file a petition to declare the minor by meeting with a student affairs officer in the Undergraduate Counseling Office, 158/160 Kaplan Hall, 310-825-1389. For more information, see the minor website.

The Minor

Required Lower-Division Courses (10 units): English 4W, 4HW, 4WX, or any Writing II course and English M30 (or M30SL), with grades of C or better.

Required Upper-Division Courses (20 to 24 units): (1) English 118E and M118F or one additional 118E course on a different topic or one other English course that has a primary focus on environmental issues to be selected from a list available in the Undergraduate Counseling Office prior to the opening of enrollment each term (students may petition to substitute other courses), (2) one course selected from American Indian Studies C178, Anthropology 133, 168P, Art History 132D, 133E, C145A, Chicana/o and Central American Studies M144, M183, Food Studies M170XP, Geography 130, 136, Honors Consortium 141, 174, Italian 124, Public Policy C115, Russian 122, Urban Planning M120, 121, or CM166 (3) one course selected from Atmospheric and Oceanic Sciences M105, 107, 141, Earth, Planetary, and Space Sciences 101, Ecology and Evolutionary Biology 154, 157, 166, Environment M111, M125, M126, M131, M133, 134, 150, M153, 157, C159, M161, 163, M164, 166, M167, or Environmental Health Sciences 100, (4) one course selected from English 184, 195C, 197, 198A, 198B, or 199 that culminates in a project focused primarily on literature from an ecocritical or other environmentally focused perspective.

Policies

Students may petition to substitute an internship course/independent study/directed research course (195CE, 197, 198, or 199) for an elective course as long as it is clearly and predominantly relevant to the topics covered in the minor and falls within the discipline of the requirement for which it serves as a substitute. No more than one upper-division independent study/directed research course (4 or 5 units) may be applied toward the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Professional Writing Minor

The Professional Writing minor includes the study and practice of originating, designing, and communicating information and ideas. As a discipline, it is the core for creating, debating, and disseminating knowledge in the 21st-century multicultural economy. The minor enables students to expand their knowledge of the practices of writing in a diverse modern society.

Through courses that understand writing broadly—as encompassing written, oral, visual, and electronic multimodal communication—students in the Professional Writing minor acquire deep intellectual and practical skills needed to perform well as good writers within the professions they choose, or to become professional writers with specific areas of academic expertise. All Writing Programs courses in the minor include a segment on digital media.

Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better, have satisfied the Writing II requirement, and submit a 500-word essay explaining why they want to declare the minor, and how they expect it to relate to their professional lives. Minor applications are submitted on the English Department website. For more information, contact the Writing Programs adviser, 146 Kaplan Hall, 310-206-1145.

The Minor

Required Lower-Division Courses (4-5 units): Any Writing II course or equivalent.

Required Upper-Division Courses (26-30 units): One core course from English Composition 130A through 130E; two courses selected from English 110A, 110C, 110E, 110P, 110V, 110P (or Comparative Literature M191P), 119 (or English Composition M192 or Environment M192), English Composition 131A, 131C, 131D, 132, 133, 134, 136, 137, or English M138 (or English Composition M138) when offered on a nonfiction topic; one course selected from African American Studies M194A (or Education M131A), Asian American Studies C142A, C142B, C142C, Community Engagement and Social Change 163SL, Communication 109, 110, Dance C184, Digital Humanities 150, Ecology and Evolutionary Biology C179, Education 133, Film, Television, and Digital Media C144, Life Sciences 110, M192A, Music Industry 102, 104A, 110, 122, Research Practice 192B; one additional upper-division course selected from the lists above; and one capstone, cumulative portfolio, independent study, or community and corporate internship course from English 195CE, 197, 199, English Composition 195, or 199.

Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. No more than one lower-division course may be applied to the minor. Students may petition to substitute courses other than those listed to satisfy elective requirements. Each minor course must be taken for a letter grade (unless the course is graded only on a P/NP basis; no more than 4 units of P/NP may be applied to the minor), and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Major

English MA, CPhil, PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

English

Lower-Division Courses

4HW. Critical Reading and Writing (Honors). (5) Lecture, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. Satisfies Writing II requirement. Letter grading.

4W. Critical Reading and Writing. (5) Lecture, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of 15 to 20 pages of revised writing. Satisfies Writing II requirement. Letter grading.

4WX. Critical Reading and Writing (Community-Engaged Learning). (F) Formerly numbered 4WS.) Lecture, four hours; fieldwork, two hours. Enforced requisite: English Composition 3. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of 15 to 20 pages of revised writing. Service learning com-
M30SL, Environmental Literature and Culture (Service Learning). (5) Same as Environment M30SL. Lecture, three hours; discussion, one hour; fieldwork, two hours. Enforced requisites: satisfaction of Entry-Level Writing requirement. Introduction to core themes, questions, and methods within interdisciplinary field of environmental humanities. Examination of how different culture forms (e.g., fiction, journalism, poetry, visual art) represent environmental issues. Topics may include biodiversity, wilderness, food, urban ecologies, postcolonial ecologies, environmental justice, and climate change. P/NP or letter grading.

M30, Environmental Literature and Culture. (5) Same as Environment M30. Lecture, three hours; discussion, one hour. Enforced requisites: satisfaction of Entry-Level Writing requirement. Introduction to core themes, questions, and methods within interdisciplinary field of environmental humanities. Examination of how different culture forms (e.g., fiction, journalism, poetry, visual art) represent environmental issues. Topics may include biodiversity, wilderness, food, urban ecologies, postcolonial ecologies, environmental justice, and climate change. P/NP or letter grading.

85. American Novel. (5) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of discrete period of queer literature from beginning to circa 1850. Works by such writers as Sappho, Plato, Marlowe, Shakespeare, and Thomas Gray may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M101B. Queer Literatures and Cultures, 1850 to 1970. (5) Same as Gender Studies M101B and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M101B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of discrete period of queer literature and culture from circa 1850 to 1970. Works by such authors as Whitman, Radclyffe Hall, Gertrude Stein, Virginia Woolf, Langston Hughes, Tennessee Williams, and Audre Lorde may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M101C. Queer Literatures and Cultures after 1970. (5) Same as Gender Studies M101C and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M101C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Examination of cultural production, especially literary, cultural, and political works that emerged after Stonewall rebellion in New York in 1969, widely regarded as origins or beginning of modern lesbian and gay rights movement in U.S. Writings and films by such authors as An-
Topics include border, immigration, revolution, lan-
guage, gender, sexuality, and diaspora, among others.
May be repeated for credit with topic or instructor
change. P/N or letter grading.

M105XP. Seminar: Chicana/Chicano and/or Latina/
Latino Literature—Community-Engaged Learning.
(Formerly numbered M105SSL.) (Same as Chica-
na/Chicano and/or American Central Studies M105XP)
Seminar, three or four lectures (or 4W or 4WS),
four hours. Enforced requisite: English Composition
3. Specialized studies in Chicana/Chicano and/or Latino/
Latino literature. In-depth study of various topics re-
lated to Chicano/Latino communities in Southern Cali-
fornia, including Chicana/Chicano visions of Los An-
geles; immigration, migration, and exile; autobiogra-
phy and historical change; Chicana/Chicano journalism
and autobiography. Service-learning component in-
cludes minimum of 20 hours of mean-
ingful work with agency involved with Chicana/Chica-
no and/or Latino/Latino community and selected by
instructor. P/N or letter grading.

106. Studies in Native American and Indigenous Lit-
eratures. (5) Lecture, four hours; discussion, one hour
(when scheduled). Enforced requisite: English Compo-
sition 3 or 3H. Study of Native American and/or trans-
national indigenous experiences and cultural expressions.
Topics may include oral traditions and histories, decol-
onization and sovereignty, identity and place in com-
parative perspectives, and multiple genres and forms
such as novel, poetry, drama, song, dance, and film.
May be repeated for credit with topic or in-
structor change. P/N or letter grading.

107A. Studies in Women’s Writing. (5) (Same as
Gender Studies G108B and Lesbian, Gay, Bisex-
ual, Transgender, and Queer Studies M107B.) Lect-
ure, four hours; discussion, one hour (when sched-
uled). Enforced requisite: English Composition 3.
Ex-
amination of literary and cultural production through
lens of gender and sexuality. Depending on instructor,
emphasize may be historical, regional, national, com-
parative, or thematic and include other intersectional
vectors of identity and representation such as age
and ethnicity. May be repeated for credit with topic or
instructor change. P/N or letter grading.

108. Interracial Encounters. (5) Lecture, four
hours; discussion, one hour (when scheduled).
Enforced requisite: English Composition 3 or 3H.
Consult Schedule of Classes for author, period,
gender, or subject to be studied in specific term.
Depending on instructor, emphasis may be his-
torical, regional, national, comparative, or thematic.
May be repeated for credit with topic or instructor
change. P/N or letter grading.

110A. Writing in English Major: Analytical. (5)
Lecture, four hours; discussion, one hour (when
scheduled). Enforced requisite: English Compo-
sition 3 or 3H. Not open for credit to students with
credit for course 110T. Improvement and refinement of
writing about literature. Focus on writing as process,
rewriting, and argument; minimum 15 to 20 pages
of writing required. May not be repeated for credit.
P/N or letter grading.

110B. Celtic Mythology. (5) Lecture, four hours;
discussion, one hour (when scheduled). Enforced re-
quire: English Composition 3 or 3H. Study of myth, dr-
amatic origins, oral epic, folklore, and ballad. P/N or
letter grading.

110C. Public Readers, Public Writers: Writing about
Books for 21st-Century Audience. (5) Lecture, four
hours. Restricted to staff (or 4W or 4WS), English
Composition 3 or 3D or 3DS or 3SL). In-depth
study and practice of literary and cultural criticism
for general audience. Focus on writing as process, re-
writing, and argument; minimum 15 to 20 pages
of writing. May not be repeated for credit. P/N or letter
grading.

110E. Writing in English Major: Advanced Essay. (5)
Lecture, three or four hours (or 4W or 4WS).
Enforced requisite: Composition 3 or 3H or equivalent.
Limited to American Literature and Culture and
English majors. Writing for professionals. Students
review written mate-
rinals completed in previous English courses and
develop new documents, projects, and writing samples
relevant to success in varied professions including post-
graduate study. Culminates in writing portfolio of
each student’s work. May not be repeated for credit.
P/N or letter grading.

110P. Writing in English Major: Pre-Professional Port-
folio. (5) Seminar, four hours. Requisites: course
4W, English Composition 3 or equivalent. Limited
to American Literature and Culture and English majors.
Writing for professions. Students review written mate-
rinals completed in previous English courses and
develop new documents, projects, and writing samples
relevant to success in varied professions including post-
graduate study. Culminates in writing portfolio of
each student’s work. May not be repeated for credit.
P/N or letter grading.

111A. Hebrew Bible in Translation. (5) Lecture,
four hours; discussion, one hour (when scheduled).
Enforced requisite: English Composition 3 or 3H.
Literary study of Hebrew Bible (Old Testament) with
emphasis on literary devices and narrative structures in
relation to Judaic historical, political, psychological,
philosophical, and theological themes. P/N or letter
grading.

111B. Christian Biblical Texts in Translation. (5)

uled). Enforced requisite: English Composition 3 or
3H. Literary study of Hebrew Bible and/or New Testa-
ment, with attention to colonial and postcolonial issues
and speculative literatures. P/N or letter grading.

112A. Celtic Folklore. (5) Lecture, four hours; dis-
cussion, one hour (when scheduled). Enforced re-
quire: English Composition 3 or 3H. Folkloric traditions
of modern Ireland, Scotland, and other Celtic coun-
tries, with an examination of colonial and postcoloni-
al issues and folkloristic methods. P/N or letter grade-
ing.

112C. Survey of Medieval Celtic Literature. (5)
Lecture, four hours; discussion, one hour (when sched-
uled). Enforced requisite: English Composition 3 or
3H. Knowledge of Irish or Welsh not required. General
course dealing with Celtic literature from earliest
times to 14th century. P/N or letter grading.

113A. History of English Language. (5) Lecture,
four hours; discussion, one hour (when scheduled).
Enforced requisite: English Composition 3 or 3H. Study
directed toward English majors of main features in
classical, medieval, and speculative literatures of
English language from Indo-European time to present.
P/N or letter grading.

113B. Introduction to Structure of Present-Day En-
glish. (5) Lecture, four hours; discussion, one hour
(when scheduled). Enforced requisite: English Compo-
sition 3 or 3H. Introduction to techniques of linguistic
description as applied to pronunciation, grammar, and
vocabulary of modern English. P/N or letter grading.

114. Lyric Histories. (5) Lecture, four hours; dis-
cussion, one hour (when scheduled). Enforced re-
quire: English Composition 3 or 3H. Study of English
verse with attention to colonial and postcolonial issues
and speculative literatures. P/N or letter grading.

115A. American Popular Literature. (5) Lecture,
four hours; discussion, one hour (when scheduled).
Enforced requisite: English Composition 3 or 3H.
Examination of such popular genres as work of
sentimen-
tal literature, sensation fiction, dime novels, crime
stories, pornography, science fiction, supernatural
tales, Hollywood novels, and other kinds of mass lit-
ery expression. P/N or letter grading.

115B. British Popular Literature. (5) Lecture, four
hours; discussion, one hour (when scheduled). Enforced re-
quire: English Composition 3 or 3H. Readings in litera-
ture of British masses, from 16th-century broadsides
to contemporary novels. Focus on historical and cul-
tural aspects of literature. P/N or letter grading.

115C. Literature for Children and Adolescents. (5)
Lecture, four hours; discussion, one hour (when sched-
uled). Enforced requisite: English Composition 3 or
3H. Study of children’s and young adult literatures,
with attention to colonial and postcolonial issues
and speculative literatures. P/N or letter grading.

115D. Detective Fiction. (5) Lecture, four hours;
discussion, one hour (when scheduled). Enforced re-
quire: English Composition 3 or 3H. Study of British
and American detective fiction and literature of detec-
tion. P/N or letter grading.

115E. Science Fiction. (5) Lecture, four hours; dis-
cussion, one hour (when scheduled). Enforced requisite:
English Composition 3 or 3H. Examination of science
fiction and speculative literatures. P/N or letter grade-
ing.

M115XP. Community-Based Studies of Popular Lit-
erature. (Formerly numbered M115SSL.) (Same as
Community Engagement and Social Change M115XP)
Lecture, four hours; discussion, one hour (when sched-
uled); fieldwork, two hours. Enforced requisite: English
Composition 3. Service-learning course that engages
students in the study and analysis of a broad range of
genres of popular literature, with attention to contem-
porary communities of readers and writers and forma-
tion of civil society. Topics vary and may include chil-
dren’s literature and childhood literacy, mass market
fiction and book club culture, or science fiction and
science policy. Service-learning component includes
meaningful work with local nonprofit organizations se-
tected in advance by instructor. May be repeated for
credit with topic change. P/N or letter grading.
116A. Experimental Fiction. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: English Composition 3 or 3H. Study of novels and short stories by contemporary fiction writers, with emphasis on current practices in language, narrative, hybridity (genre, medium), typography, and other material aspects of text such as binding and book design. Focus generally on texts from 20th century and later, but can include readings from beginning of novel. May be repeated for credit with topic or instructor change. P/NP or letter grading.

116B. Introduction to Electronic Literature. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Overview of literatures involving digital technology, such as hypertext fiction, interactive fiction, animatronic poetry, multimedia video game narrative, and works employing network protocols and print-based works influenced by digital culture. Basic introduction to new media theory. P/NP or letter grading.

117. Literature of California and American West. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of literature in English dealing with exploration, settlement, and emergent cultural awareness of Western U.S. P/NP or letter grading.

118A. Interdisciplinary Studies in Literature. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Investigation of literature in relation to other disciplines such as sciences, history, politics, philosophy, music, photography, visual studies, psychology. May be taken with topic or instructor change. P/NP or letter grading.

118B. Literature and Other Arts. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Investigation of literature to one or more other arts, including music (opera, musical theater, popular music, jazz), painting, photography, other visual arts, sculpture and other plastic arts, performance art, dance, architecture. May be repeated for credit with topic or instructor change. P/NP or letter grading.

118C. Studies in Visual Culture. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of visual images (photography, film, video) and their relation to literary and/or popular culture. Topics include adaptation, visual equivalent, and image, image and literature, film and visual culture. May be repeated for credit with topic or instructor change. P/NP or letter grading.

118E. Literature and Environment. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of literature from environmental perspectives, including ecological and interdisciplinary consideration of issues such as environmental justice, animal studies, food studies, gender studies, urban and postcolonial ecologies, climate change, cultural biophilia and biophobia, and relationship of literature to sciences. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M118F. Food Cultures and Food Politics. (5) (Same as Food Studies M132 and Society and Genetics M132.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introduction to interdisciplinary field of food studies, with focus on how literature, art, science writing, and visual culture address political dimensions of food and agriculture. May be repeated for credit with P/NP or letter grading.

119. Literary Cities. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Exploration of place of literary imagination in making of cities, with focus on questions of cultural exchange, development, migration, urban rebellion, and style. Topics may include meaning of urban space and time, city as urban laboratory, dystopian and utopian, topia or postmodern future, and impact of exile, tourism, and migration in making of cities. May be repeated for credit with topic or instructor change. P/NP or letter grading.

119XP. Literary Cities—Service Learning. (5) (Formerly numbered 119SL.) Lecture, four hours; discussion, one hour (when scheduled); fieldwork, two hours. Enforced requisite: English Composition 3 or 3H. Experience of place of literary imagination in making of cities, with focus on questions of cultural exchange, development, migration, urban rebellion, and style. Topics may include meaning of urban space and time, city as urban laboratory, dystopian and utopian, topia or postmodern future, and impact of exile, tourism, and migration in making of cities. Service project may be arranged with local nonprofit organizations selected in advance by instructor. May be repeated for credit with topic or instructor change. P/NP or letter grading.

120. History of Aesthetics and Critical Theory. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B. Investigation of texts and ideas in history of aesthetics, critical theory, and interpretation from Greeks through 18th century. Readings may include Gorgias, Plato, Aristotle, Longinus, Biblical hermeneutics, Hume, Descartes, Kant, Schiller, and Hegel. May not be repeated for credit. P/NP or letter grading.

121. Modern and Contemporary Aesthetics and Critical Theory. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, or 11 and 87. Investigation of some dominant trends in both 19th- and 20th-century aesthetics, critical theory, and interpretation from Marxian psychoanalytic, structuralist/poststructuralism, feminism, and postcolonialism. May not be repeated for credit. P/NP or letter grading.

122. Keywords in Theory. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Recommended: courses 120, 121. Taking its model from Raymond Williams’ classic vocabulary of culture and society, investigation of fundamental theoretical concepts, or keywords, that have emerged from a variety of intellectual disciplines to shape literary and cultural studies. May be repeated for credit with topic or instructor change. P/NP or letter grading.

123. Theories of History and Historicism. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Recommended: courses 120, 121. Exploration of histories of theory and historiography that offer productive approaches to literary texts. Investigation of how historians seek to develop concepts of history and situated historical narratives, how histories are constructed, troped, and given authority, how histories constitute past and present in relationship to each other to stabilize tradition or induce change, and complex ways that literary texts operate within and on their historical contexts. May be repeated for credit with topic or instructor change. P/NP or letter grading.

124. Theories of Religion. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Recommended: courses 120, 121. Examination of relationship between literary and religious practices and traditions. Topics may include religious formations, theories of sacrifice, sacrament, gift, and mystical traditions, as well as history of theology and religious approaches to reading. Selected topics may address literary applications of religious categories as treated in cultural anthropology, philosophy, and critical theory. May be repeated for credit with topic or instructor change. P/NP or letter grading.

125. Violence in Cultural Theory and Literature. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of literature and culture. Topics may include the relationship between culture and imperialism through lens of literary texts to raise questions about what aspects of empire shape literary and cultural expression, with specific emphasis on regional or thematic concerns. Topics may include literatures of Africa and African diaspora, environment and empire, Central and South America, or literatures of Indigenous Pacific. May be repeated for credit with topic or instructor change. P/NP or letter grading.

126. Feminist and Queer Theory. (5) (Same as Gender Studies M126 and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M126.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Recommended: one course from 120, 121, Gender Studies 102, 103, or 104. Investigation of key concepts and debates in study of gender, sexuality, and kinship, with focus on theories of representation and making of culture. Readings to be interdisciplinary, with possible emphasis on impact of changing ideas of gender and sexuality in specific historical cultural histories. May be repeated for credit with topic or instructor change. P/NP or letter grading.

127. Performance, Media, and Cultural Theory. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Recommended: course 120. Exploration of concepts and modes of performance, culture, and/or media, broadly construed. Evaluation of different modes of inquiry around one or more of these concepts, as well as their intersection, in various intellectual traditions, including fields of cultural studies, performance studies, literary analysis, and film theory. May be repeated for credit with topic or instructor change. P/NP or letter grading.

128. Postcolonial and Transnational Theory. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Recommended: course 120. Enactment of concepts and modes of transnational and postcolonial approaches to study of literature and culture. Topics may include theorems such as subaltern, orientalism, and/or indigenous representation and histories and may address representational issues of national sovereignty in wake of globalization and neocolonialism. May be repeated for credit with topic or instructor change. P/NP or letter grading.

129. Topics in Genre Studies, Interdisciplinary Studies, and Critical Theory. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Recommended: courses 120, 121. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. Depending on instructor, emphasis may be historical, regional, national, comparative, or thematic. May be repeated for credit with topic or instructor change. P/NP or letter grading.

130. Introduction to Postcolonial Literatures. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Introduction to major themes and issues in postcolonial literature, with focus on contemporary literatures and their historical origins, often involving engaging history of British or other empires with emphasis on Anglophone writers from Africa, Caribbean, South Asia, and indigenous Pacific. May not be repeated for credit. P/NP or letter grading.

131. Studies in Postcolonial Literatures. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Strongly recommended: course 130. Survey of how colonialism and decolonization have shaped literary and cultural expression, with specific emphasis on regional or thematic concerns. Topics may include literatures of Africa and African diaspora, environment and empire, Central and South America, or literatures of Indigenous Pacific. May be repeated for credit with P/NP or letter grading.

132. Culture and Imperialism. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, and 10C. May adopt thematic or thematic approach, such as Orientalism. Topics may include construction of gender, race, otherness, nature, religion, and nation. May be repeated for credit with topic or instructor change. P/NP or letter grading.
133. Transatlantic Literatures and Cultures. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Study of literatures of Atlantic to examine cultural, political, and ideological issues that followed from transatlantic movement of people, ideas, commodities, and cultural artifacts. In addition to literatures of Britain and U.S., coverage may include texts from Africa, Caribbean, Mexico, South America, and Spain, and other parts of Europe. May be repeated for credit with topic or instructor change. P/NP or letter grading.

134. Nationalism and Transnationalism. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Examination of how critical frameworks of nation and migration have shaped cultural and political globalization, and the translation and modernity framework analysis of literary texts, particularly relationship between literature and national identity. Other topics include nation building in relationship to regional identities as well as discourses of national expansion, diaspora, resettlement, and exile and foundational narratives of nation in relationship to representations of mobility. Genres may include epic, romance, novel, and biography. May be repeated for credit with topic or instructor change. P/NP or letter grading.

135. Literature of Americas. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A and 11 and 87. Study of literatures of Americas, with emphasis on complex ways in which letters of North America, Central America, South America, and Caribbean forge distinctively American, and the global attention. Study of literature from age of encounter to 19th-century U.S. American revolution and Latin American independence movements and beyond, considering such topics as emigration, colonization, slavery, transnational dynamics, and cross-cultural transformations among indigenous, European, and African civilizations. May be repeated for credit with topic or instructor change. P/NP or letter grading.

136A. Creative Writing: Intermediate Poetry. (5) Seminar, three or four hours. Enforced requisites: courses 4HW or 4W or 20 or 20W, English Composition 3. 188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Colloquium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May be repeated twice for Letter grading.

188SB. Independent Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Colloquium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading. Limited to juniors/seniors.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individualized study of advanced topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

190H. Honors Research Colloquium in English. (1) Seminar, one hour. Enforced corequisite: course 198A or 198B. Designed to bring together students under the direction of a supervised tutorial research for departmental honors in seminar setting with one or more faculty members to discuss their own work in progress and critical readings related to honors projects. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

M191A. Topics in African American Literature. (5) (Same as African American Studies M179A.) Seminar, three or four hours. Enforced requisites: English Composition 3 or 3H. Variable specialized studies course in African American literature. Topics may include Harlem Renaissance, African American literature in Nadir, black women’s writing, contemporary African American fiction, and African American poetry. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M191B. Topics in Chicana/Chicana and/or Latina/Latina Literature and Culture. (5) (Same as Chicana/o and Central American Studies M139.) Seminar, three or four hours. Enforced requisites: English Composition 3 or 3H. Variable specialized studies course in Chicana/Chicana literatures. Topics may include Chicana/Chicana visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicana journalism; literary New Mexico; critical methodological issues. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M191C. Topics in Asian American Literature. (5) (Same as Asian American Studies M191F.) Seminar, three or four hours. Enforced requisites: English Composition 3 or 3H. Variable specialized studies course in Asian American literature. Topics may include genres (autobiography, novel, poetry, short fiction, or drama); specific historical, cultural and historical communities; notions of identity; themes of transnational migration; cross-cultural, interdisciplinary, or intercultural negotiation; and gender and queer politics. Reading, discussion, and development of culminating project. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M191D. Topics in Queer Literatures and Cultures. (5) (Same as Gender Studies M191D and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M191D.) Seminar, three or four hours. Enforced requisites: English Composition 3, Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

191H. Honors Research Seminars in English. (5) Seminar, three hours. Enforced requisites: courses 10A, 10B, 10C, or 11 and 87. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M191P. Careers in Humanities. (4) (Same as Comparative Literature M191P.) Seminar, three hours. Challenges misassumptions regarding humanities majors and their practical applications to life after graduation. Engagement with wide range of career-focused hands-on practice in crafting professional narrative. Guest lectures from UCLA professionals and alumni—all experts in career planning and local industry. Students engage in workshops to simultaneously build professional dossier—on paper or online—in preparation for life after UCLA with a humanities degree. P/NP or letter grading.

M192. Undergraduate Writing in English: Journals. (2) (Same as English Composition M192.) Seminar, two hours. Training and supervised practicum for undergraduate student editors of campus journals supported by faculty members in English and/or Writing Programs. May be repeated for credit. P/NP or letter grading.

193. Colloquia and Speakers’ Series Undergraduate Seminars in English. (1) Seminar, one hour. Limited to undergraduate students. Discussion of current critical literature and/or creative readings by writers, artists, and scholars. Exploration in greater depth of literary topics and creative work presented through sponsored forums, speakers’ series, and colloquia. May be repeated for credit. P/NP grading.

195CE. Community and Corporate Internships in English. (4) Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Learning. Students complete weekly written assignments, attend bi-weekly meetings with graduate student coordinator, and write final research paper. Focus on senior and graduate student coordinator construct series of reading assignments that examine issues related to internship site. May not be applied toward major requirements. May be repeated for credit with consent of Center for Community Learning. Individual contract with supervising faculty member required. P/NP or letter grading.

197. Individual Studies in English. (2 to 5) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned readings and/or tangible evidence of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in English. (2 to 8) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual literary research and creative projects under guidance of faculty mentor. Cul-
minating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200. Graduate Proseminar. (4) Seminar, three hours. Introduction to profession of literary studies. Covers wide array of topics including state of discipline and various scholarly organizations and conference presentations; critical and methodological approaches to literary studies; writing and publishing for scholarly and general audiences; building a vita and resume; developing professional skills; understanding academic job market and humanities careers. S/U or letter grading.

201. History of Literary Criticism and Aesthetic Interpretation. (4) Formerly numbered 201A.) Seminar, three hours. Examination of major texts in literary criticism and aesthetic interpretation from classical to contemporary period with focus and topics to be set by individual instructor. S/U or letter grading.

202. Narrative Theory. (4) Seminar, three hours. Introduction to concepts and theories of narrative. These may include linguistic, sociological, cognitive, and computational approaches to narrative such as plot, narrator, character, and style across different media. S/U or letter grading.

203. Digital Theories and Methods. (4) Seminar, three hours. Theories and practices of using computational tools and methods, including digital archives, for analysis of literary texts across media. S/U or letter grading.

M205A. Study of Oral Tradition: History and Method. (4) (Same as Scandinavian M271.) Seminar, three hours. Exploration of scholarly and literary attempts to study, define, analyze, promote, and/or appropriate oral traditions, from Homer and ancient Greece to origins of vernacular literatures, European romantic (re)discovery of oral tradition, 20th-century heuristic models of oral composition, and modern-day electronic media and popular verbal genres, such as joking and rapping. S/U or letter grading.

M205C. Studies in Oral Traditional Genres. (4) (Same as Scandinavian M273.) Seminar, three hours. Exploration in depth of variety of history and of scholarship on, particular oral traditional genre (e.g., ballad, song, epic, proverb, riddle, folktale, legend) or set of closely related oral traditions. S/U or letter grading.

211. Old English. (4) Lecture, four hours. Study of Old English grammar, lexicon, phonology, and pronunciation to enable students to read literature silently and aloud. Reading of as much of more interesting Old English prose and poetry as can be read in one term. S/U or letter grading.

212. Middle English. (4) Lecture, four hours. Requisite: course in Old English. Detailed study of linguistic aspects of Middle English and of representative examples of better prose and poetry. S/U or letter grading.

M215. Paleography of Latin and Vernacular Manuscripts, 900 to 1500. (4) (Same as Classics M218, French M210, and History M218) Lecture, three hours; discussion, two hours. Introduction to history of Latin and vernacular manuscript book from 900 to 1500 to (1) train students to make informed judgments with regard to place and date of origin, (2) provide training in accurate reading and transcription of later medieval scripts, and (3) examine manuscript book as witness to changing society that produced it. Focus on relationship between manuscripts and vernacular manuscripts with regard to their respective presentation of written texts. S/U or letter grading.

230. Workshop: Creative Writing. (2 to 4) Lecture, two to four hours. Preparation: submission of writing samples in specified genre (poetry, fiction, or drama). May be repeated but may not satisfy more than one of nine courses required for first qualifying examination nor any of five courses required for second qualifying examination. S/U or letter grading.

242. Language and Literature. (4) Seminar, three hours. Application of linguistics to literary analysis. Individual seminars dealing with one historical period (medieval and Renaissance, neoclassical, or 19th century and modern), specific authors, or contributions of specific groups of linguists to literary analysis. S/U or letter grading.

244. Old and Medieval English Literature. (4) Seminar, four hours. Studies in poetry and prose of Old and medieval English literature; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

245. Chaucer. (4) Lecture, four hours. May be repeated for credit. S/U or letter grading.

246. Renaissance Literature. (4) Seminar, four hours. Studies in poetry and prose of Renaissance English literature, exclusive of Shakespeare; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

247. Shakespeare. (4) Lecture, three hours. May be repeated for credit. S/U or letter grading.

250. Restoration and 18th Century Literature. (4) Seminar, three hours. Studies in English poetry and prose, 1660 to 1800; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

251. Romantic Writers. (4) Seminar, three hours. May be repeated for credit. S/U or letter grading.

252. Victorian Literature. (4) Lecture, three hours. Studies in English poetry and prose of Victorian period; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

253. 20th- and 21st-Centuries Literatures in English. (4) Seminar, three hours. Studies in 20th- and 21st-century literatures in English. Focus and topics to be set by individual instructor. May be repeated for credit. S/U or letter grading.

255. Topics in Novel. (4) Seminar, three hours. Thematic approach to study of novel. May be repeated for credit. S/U or letter grading.

256. Studies in Genre. (4) Seminar, three hours. Formal approach to study of one genre and its changes across time. May be repeated for credit. S/U or letter grading.

259. Studies in Criticism. (4) Lecture, three hours. May be repeated for credit. S/U or letter grading.

260. Studies in Literature and Its Relationship to Arts and Sciences. (4) Seminar, three hours. Studies in interrelationships of literature, arts, and sciences; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

M260A. Topics in Asian American Literature. (4) (Same as Asian American Studies M260A) Seminar, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. May be repeated for credit. S/U or letter grading.

261. Studies in Chicana/Chicano Literature. (4) (Same as Chicana/o and Central American Studies M261.) Seminar, three hours. Intensive research and study of major themes, authors, and issues in Chicana/Chicano literature and an examination of cultural, political, aesthetic, economic, and social context that emerged in Chicana/Chicano discourse; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

M262. Studies in Afro-American Literature. (4) (Same as African American Studies M200E.) Lecture, four hours. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit. S/U or letter grading.

265. Postcolonial Literatures. (4) Seminar, three hours. Study of aesthetic, historical, and social backgrounds to literatures of former British colonies that became independent after 1947. General issues related to way imperialism, colonialism, and postcolonialism have helped to shape and have been shaped by literature in English. May be repeated for credit. S/U or letter grading.

M266. Cultural World Views of Native America. (4) (Same as American Indian Studies M200B.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms dance, art, song, religious and ritualistic—theories of cultural societies from social and cultural models of oral composition, and modern-day electronic media and popular verbal genres, such as joking and rapping. S/U or letter grading.

M290. Science Communications and Environmental Media. (4) (Same as Environment M242.) Seminar, three hours. Designed for graduate students in food, energy, and water systems (FEWS) training program to survey fields of science communications and environmental narrative from nonfiction to new media (multimedia journalism, documentary, social media, visual reality, etc.), and to explore the role of media in projects communicating student research to diverse public audiences. Course is part of National Science Foundation (NSF) graduate traineeship in integrated urban solutions for food, energy, and water systems (FEWS) training grant program. Enrollment for non-FeWS students in STEM graduate education and related sustainability majors/topics by consent of instructor. S/U or letter grading.

M299. Interdisciplinary American Studies. (6) (Same as History M299.) Discussion, four hours. Readings, discussion, and papers on common theme, team-taught by faculty members from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum assigned. May be repeated for credit. May not be substituted for any departmental enrollment requirements. May be repeated for credit. S/U or letter grading.

495A. Supervised Teaching Preparation. (4) Seminar, three hours. Required of all applicants for teaching assistantships in English. Introduction to teaching of
The Entrepreneurship minor introduces under-

graduate students to the field of entrepreneur-

ship. Entrepreneurship encompasses a wide
ange of business activities, from the genera-

tion of new ideas for products and services, to

the systematic evaluation and development of

those ideas, to the process of building a com-

pany to pursue them. Faculty members teaching

in the minor are drawn from academic depart-

ments across campus, applied fields in the pro-

fessional schools, and industry.

Through a carefully developed core curriculum

and an integrative capstone experience, stu-

dents in the minor obtain both breadth and

depth in their understanding of the concepts,

frameworks, and practical implications of

entrepreneurship in an interdisciplinary and col-

laborative educational environment.

Undergraduate Minor

Entrepreneurship Minor

Admission

To enter the Entrepreneurship minor, students

must (1) have an overall grade-point average of

3.0 or better and (2) submit an application sup-

porting their interest in pursuing the minor. Ap-

plications are accepted in fall, winter, and

spring quarters. To help plan the course sched-

ule and internship/field experience, students are

expected to work closely with the academic

adviser. Applications are available on the minor

website.

The Minor

Required Lower-Division Course (4 or 5 units):

Communication 1 or any Writing II course.

Required Upper-Division Courses (32 or 33

units): Management 159, 160, 161, 169, 199 (4

units minimum), and three elective courses se-

lected from Ancient Near East M105, Commu-

nication 109, M117, 133, 156, Dance C184,

Digital Humanities 101, 150, Economics 106E,

173AX, 173BX, Environment 163, Ethnomusi-

cology 105, Management 162, 163, 164, 165,

167, 168, Sociology 172. At least two of the

three elective courses must be selected from the

management courses listed above.

Policies

A minimum of 20 units applied toward the mi-

nor requirements must be in addition to units

applied toward major requirements or another

minor.

Each minor course must be taken for a letter

grade, and students must have an overall

grade-point average of 3.0 or better in the mi-

nor. Successful completion of the minor is indi-

cated on the transcript and diploma.

Entrepreneurship / 449
The environment is defined broadly to include the interrelated issues of global climate change, loss of biological diversity, and threats to human health and well-being from the use and misuse of natural resources, applying all the tools of scientific and policy analysis as well as moral and aesthetic values to the work. The environment is a crucial component of sustainability, which is defined as the simultaneous consideration of environmental, economic, and social justice concerns. Los Angeles itself is a vital asset to this mission. As an international mega-city located in one of the world’s most biologically diverse regions, Los Angeles is a magnet for scholars from around the world who are facing similar issues of pollution, access to potable water, demand for energy, fragmenta-
tion of habitat, and the need to restore ecological function to sprawling urban settlements in a manner that supports economic growth and that is socially just and equitable.

Overview

The environment is defined broadly to include the interrelated issues of global climate change, loss of biological diversity, and threats to human health and well-being from the use and misuse of natural resources, applying all the tools of scientific and policy analysis as well as moral and aesthetic values to the work. The environment is a crucial component of sustainability, which is defined as the simultaneous consideration of environmental, economic, and social justice concerns. Los Angeles itself is a vital asset to this mission. As an international mega-city located in one of the world’s most biologically diverse regions, Los Angeles is a magnet for scholars from around the world who are facing similar issues of pollution, access to potable water, demand for energy, fragmenta-
tion of habitat, and the need to restore ecological function to sprawling urban settlements in a manner that supports economic growth and that is socially just and equitable.

Mission

The mission of the UCLA Institute of the Environment and Sustainability (IoES) is to advance cross-disciplinary research, teaching, and public service on matters of critical importance to the planet and the campus community.

Undergraduate Study

The Bachelor of Science (BS) degree in Environmental Science is an innovative dual-component degree program for students seeking a challenging and invigorating science curriculum. The first component, the Environmental Science major, provides students with disciplinary breadth in several areas important to environmental science. The second component, a minor or concentration in one of seven environmental science areas, provides students with focused disciplinary depth in an area of their choosing. The minor in Environmental Systems and Society is designed for students who wish to gain a deeper understanding of the relationships between environ-
mental science and associated social and political issues.

The IoES also sponsors Environment M1A, M1B, M1CW and Clusters M1A, M1B, M1CW titled Food: Lens for Environment and Sustainability. The cluster format is a series of three integrated freshman-team-taught courses over the fall, winter, and spring quarters. The fall and winter quarter courses consist of lectures and discussions. The spring quarter consists of seminars and activities in which students explore specialized food-related environmental and sustainability topics such as sustainable agriculture, food culture and justice, and strategies for feeding the growing human population.

Graduate Study

At the graduate level, the IoES offers two degree programs and a graduate certificate.

Graduate Certificate

The national award-winning Leaders in Sustainability graduate certificate program is free to UCLA graduate students pursuing degrees in any discipline. Companies, consumers, and governments across the world increasingly focus on making products, services, operations, and lives more sustainable. The certificate program gives students the tools to make that happen in a collaborative, action-oriented setting. By bringing together students and faculty from diverse academic fields, the program fosters cross-pollination for innovative ideas and solutions. Each graduate student takes a core sustainability class along with electives of their choosing. Working with other students, faculty and professionals, students initiate a leadership project that measurably advances sustainability. For many, this project serves as a jumping-off point into their post-graduate careers and studies.

Environmental Science BS

The Environmental Science BS program represents strong collaboration between the Institute of the Environment and Sustainability and the departments of Atmospheric and Oceanic Sciences; Civil and Environmental Engineering; Earth, Planetary, and Space Sciences; Ecology and Evolutionary Biology; Environmental Health Sciences; and Geography. The program is designed for students who are deeply interested in the study of environmental science. There are two components to the program, and both must be completed to receive the degree. The first component, the Environmental Science major, requires completion of lower-division requirements grounded in basic natural sciences, a five-course upper-division environmental science requirement reflecting the disciplinary breadth of environmental science, three social sciences/humanities coursework, participation in a sustainability-focused speaker series, and completion of an environmental science practicum. The second component is a minor or concentration in one of seven environmental science areas, each associated with a particu-
lar department. With assistance from IoES staff, students must formally apply to and be accepted by the associated department to receive the minor.

Capstone Major

The Environmental Science major is a designated capstone major. In collaboration with a local agency or nonprofit institution, students work individually and in groups to complete projects that require them to integrate many of the skills, principles, theories, and concepts they have learned throughout the curriculum and apply them to real systems. Students are expected to contribute meaningfully to the analysis and solution of particular environmental science issues involving multiple disciplines and stakeholders with different perspectives. Those completing the major should possess critical thinking skills, problem-solving abilities, and familiarity with essential computational, data collection, and analysis skills, as well as demonstrate effective oral and written communication skills. Graduates should also be able to identify key ethical issues and analyze the consequences of various professional dilemmas, as well as work productively as part of a team.

Learning Outcomes

The Environmental Science major has the following learning outcomes:

- Ability to apply theories or concepts from coursework to analysis of issues in the field
- Ability to make meaningful contribution to analysis and solution of particular issues involving multiple disciplines and stakeholders with different perspectives
- Critical thinking skills, problem-solving abilities, and familiarity with computational and data collection and analysis procedures essential to the field
- Ability to identify ethical issues raised by a particular issue
- Ability to analyze the consequences of various professional dilemmas
- Ability to work productively with others as part of a team
- Effective oral and written communication skills

Entry to the Major

Transfer Students

Transfer applicants to the Environmental Science major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two general chemistry courses with laboratory for majors, two general biology courses with laboratory for majors, two calculus courses, and two calculus-based physics courses.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Chemistry 1A, 1B, and 1BLC (or 20A, 20B, and 20L), Environment 10, Geography 7, Life Sciences 7A, 7B, Mathematics 3A
and 3B (or 31A or 31AL and 31B, or Life Sciences 30A and 30B), Physics 5A and 5C (or 1A and 1B), Statistics 12 or 13 (or Life Sciences 40). For the atmospheric and oceanic sciences minor, Chemistry and Biochemistry 14C (or 30A) or Mathematics 3C (or 32A) or Physics 1C (or 5B) is also required. For the conservation biology minor, Chemistry and Biochemistry 14C (or 30A) or Life Sciences 7C and 23L is also required. For the Earth and environmental science minor, Chemistry and Biochemistry 14C (or 30A) or Mathematics 3C (or 32A) or Physics 1C (or 5B), Earth, Planetary, and Space Sciences 1, and one course from 5, 13, 15, or 61 are also required. For the environmental engineering minor, Mathematics 3C (or 32A) is also required. For the environmental health concentration, Chemistry and Biochemistry 14C (or 30A) is also required. For the environmental systems and society minor, one course from Chemistry and Biochemistry 14C (or 30A), Earth, Planetary, and Space Sciences 1, Life Sciences 7C (and 23L), Mathematics 3C (or 32A), and Physics 5B (or 1C) is also required. For the geography/environmental studies minor, one course from Chemistry and Biochemistry 14C (or 30A), Earth, Planetary, and Space Sciences 1, Life Sciences 7C (and 23L), Mathematics 3C (or 32A), and Physics 5B (or 1C), plus Geography 5 and one course from 1, 2, 3, 4, or 6 are also required. Students should take these courses before enrolling in upper-division courses.

The Major

The major consists of four requirements: physical and life science, social science and humanities, practicum/sustainability talks, and minor or concentration, as follows:

Physical and Life Sciences Requirements

Required: Environment 175 and four additional courses from the following physical and life science areas. No more than two courses may be from any one department. Atmospheric and Oceanic Sciences 101, 102, 103, 104, M105, 107, 112, 121, 123, 130, 141, Civil Engineering 153, 154, M166, Earth, Planetary, and Space Sciences 101, C113, 119, 139, 150, 153, Ecology and Evolutionary Biology 100, 109, 116, 136, 151A, 154, Environment 157, Environmental Health Sciences 100, C125, C152D, Geography 101, M102, M103, 107, M110, 116, 117, M118, 120, M126, 133. Social Sciences and Humanities Requirements

Required: Environment 140 and two courses from Anthropology 132, 133, Atmospheric and Oceanic Sciences 121, 123, English 118E, Environment M125, M133, M147, 150, M153, 155, 157, C159, M161, 162, 163, M164, 166, M167, Geography M127, 130, 138, M142, 160, 171C, Philosophy 125, Public Affairs M160, Society and Genetics 141, Urban Planning 121. Practicum/Sustainability Talks Requirements

Required: Environment 180A, 180B, 180C, 185A. Minor and Concentration Requirements

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Successful completion of a minor is indicated on the transcript and diploma. For the atmospheric and oceanic sciences minor, seven 4-unit courses, including (1) three from Atmospheric and Oceanic Sciences M100, 101, 102, 103, 104, M105, M106, 107, C110, C111, 112, CM114A, C115, M120, 121, 123, 130, 135, 141, C144, 145, 150, 155, C160, C170, 180, and (2) four additional courses, two of which must be upper-division, from any of the above atmospheric and oceanic sciences courses beyond the minimum four required or from Atmospheric and Oceanic Sciences 1, 2, 3, 186 (must be taken twice), Chemistry 103, 110A, 110B, 113A, C113B, 114, Earth, Planetary, and Space Sciences 15, Ecology and Evolutionary Biology 109, C119A, 122, 123A or 123B, 147, 148, Mathematics 115A, 115B, 132, 135, 136, 146, 170A, 170B, Physics 110A, 110B, 112, M122, 131, 132. Other relevant courses from related disciplines may be substituted with prior approval of the department. At least five courses approved for the minor must be upper-division. One course may be taken on a Passed/Not Passed basis. For the conservation biology minor, Ecology and Evolutionary Biology 100, 116, and four to six courses from 100L, 101, 103, 105, 109, 109L, 111, 112, 113A, 113AL, 114A, 114B, C119A, C119B, 122, M127, 129, M131, 140, 142, 143, 144, 144L, C146, 149, 151A, 152, 152A, 153, 154, 155, 161, 162, 162L, 168, C174, 176, 180A, 180B, 183, 184, any associated courses with the Field Biology Quarter or the Marine Biology Quarter or approved equivalent. Geography M103, 106, 107, 116, 117, M118, M126, M131, 133 (a maximum of two Geography courses may be applied to the minor) are required. For the Earth and environmental science minor, five courses from Earth, Planetary, and Space Sciences 101, 112, C113, 139, 150, 153 are required. For the environmental engineering minor, Civil Engineering 5 and five courses from Civil Engineering 110, 150, 151, 152, 154, 155, 156A, 156B, 157A, 157B, 157C, 157L, C159, C164, M165, M166, Mechanical and Aerospace Engineering 103, 105A are required. Credit for both Chemical Engineering 102A and Mechanical and Aerospace Engineering 105A is not allowed. For the environmental health concentration, Epidemiology 100, two courses from Environmental Health Sciences 100, C135, C185A, C185B, and three courses from Chemistry and Biochemistry 153A, Environmental Health Sciences C125, C140, C152D, C157, C164, 203 are required. For the environmental systems and society minor, seven courses from Environment M111, M125, M126, M131, M133, 134, 140, M147, 150, M153, 155, 157, C159, M161, 162, 163, M164, 166, M167, 175 are required. For the geography/environmental studies minor, three courses from Geography M102, M103, 109, M118, M125, M126, M127, 130, M131, 133, 136, 138, 139B, 139C, and any two additional upper-division geography courses (except those from the preceding list and courses 194 through 199) are required.

Honors Program

The honors program provides exceptional students an opportunity for advanced research and study, under the guidance of a faculty member, that leads to the completion of an honors thesis or research project. To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper-division coursework in the major and an overall GPA of 3.0 or better, (3) complete at least 8 units of Environment 198 taken over at least two terms, and (4) produce a completed satisfactory honors thesis. The honors thesis or research project is in addition to the requirement of the completed practicum in environmental science project. Contact the student affairs officer for more information.

Policies

Preparation for the Major

Each course applied toward requirements for preparation for the major must be passed with a grade of C– or better. Students receiving a grade below C– in two courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

The Major

Each course applied toward requirements for the major, except Environment 185A, must be taken for a letter grade. Students must maintain an overall grade-point average of 2.0 (C) or better in all courses applied toward the major.

Undergraduate Minor

Environmental Systems and Society Minor

The Environmental Systems and Society minor is designed for students who wish to augment their major program of study with courses addressing the relationships between environmental science and associated social and political issues. The minor seeks to impart a deeper understanding of environmental systems related to air, land, and water resources, providing a basis for sound professional decision making.

Admission

To enter the minor, students must be in good academic standing (2.0 grade-point average) and file a petition at the Institute of the Environment and Sustainability, 300 La Kretz Hall, 310-206-3193.
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer or substitution of credit for any of the above is subject to institute approval; consult with an academic adviser at the institute before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Majors
Doctor of Environmental Science and Engineering
The Environmental Science and Engineering (DEnv) professional doctorate program was founded in 1973 by Nobel laureate Dr. Willard Libby, who envisioned a need to train environmental scientists, engineers, and policymakers in a more interdisciplinary manner than is afforded by traditional PhD programs. The program is designed with an appropriate balance of breadth and specific skills, based on a strong master’s-level foundation in a science or engineering discipline. The curriculum consists of formal coursework across a full spectrum of relevant physical, biological, social, and engineering disciplines, as well as interdisciplinary research training and an off-campus residency where students complete their dissertation embedded in an agency, business, or non-profit organization. UCLA remains unique in the country in awarding the Doctor of Environmental Science and Engineering degree.

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Environment and Sustainability MS, PhD
The Environment and Sustainability PhD program was launched in 2018. The program equips students with diverse perspectives to develop profound new ideas, knowledge and answers to the most important concerns facing people and the planet. The program provides a deep understanding of how fundamental principles of environmental science and sustainability can be applied to research and address key environmental challenges that require skills in multiple disciplines—preparing students for a range of careers in academia, as well as public and private sectors.

Successful completion of the minor program is indicated on the transcript and diploma.

Graduate Majors
Doctor of Environmental Science and Engineering
The Environmental Science and Engineering (DEnv) professional doctorate program was founded in 1973 by Nobel laureate Dr. Willard Libby, who envisioned a need to train environmental scientists, engineers, and policymakers in a more interdisciplinary manner than is afforded by traditional PhD programs. The program is designed with an appropriate balance of breadth and specific skills, based on a strong master’s-level foundation in a science or engineering discipline. The curriculum consists of formal coursework across a full spectrum of relevant physical, biological, social, and engineering disciplines, as well as interdisciplinary research training and an off-campus residency where students complete their dissertation embedded in an agency, business, or non-profit organization. UCLA remains unique in the country in awarding the Doctor of Environmental Science and Engineering degree.

Requirements

Environment
Lower-Division Courses
M1A-M1B-M1CW. Food: Lens for Environment and Sustainability. (6–6–6) (Same as Clusters M1A-M1B-M1CW) Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Limited to first-year freshmen. M1A-M1B. Lecture, three hours; discussion, two hours. Food as lens for local and global environmental and sustainability issues. Integration of environmental, social, economic, and technological solutions for fair, sustainable, and healthy food production, food security, and access. Focus on human impacts on Earth’s biogeochemical and physical systems, including how food production and consumption contribute to, and is impacted by, global problems, including climate change, pollution, and overpopulation. Laboratory exercises to augment lectures. Letter grading. M1CW. Special Topics, Seminar, three hours. Enforced requisite: course M1B. Examination of specialized environmental and sustainability topics as they relate to food, including climate change, biodiversity, climate change, food access, food security, and health. Satisfies Writing II requirement. Letter grading.

10. Introduction to Environmental Science. (4) Lecture, three hours; laboratory, one hour. Limited to undergraduate students. Introduction to environmental science as discipline and as way of thinking. Discussion of critical environmental issues at local and global scales. Fundamentals of physical, chemical, and biological processes important to environmental science. Laboratory exercises to augment lectures. Letter grading.

12. Sustainability and Environment. (4) Lecture, three hours; discussion, one hour. Introduction to sustainability science and policy component, including Earth’s physical, chemical, and biological processes as related to resource demands and management. Examination of application of scientific method in helping to understand and solve sustainability problems. Case studies illustrating how natural and social scientists work on environmental sustainability issues. Focus on global climate change, biodiversity, pollution, and water and energy resources presented in context of creating sustainable human society that is environmentally sound, economically viable, and socially just and equitable. Letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of specialization, enabling students to imagine many paths of discovery at UCLA. P/NP grading.

25. Good Food for Everyone: Health, Sustainability, and Culture. (5) Lecture, three hours; discussion, one hour. Good food is healthy, sustainably produced, and culturally meaningful. Introduction to basic concepts and history of food systems, food science and nutrition, fair and sustainable food production, natural resources and environmental issues including climate change and biodiversity, agriculture and food policy, and food distribution and access, cultural identity and artistic engagements with food. P/NP or letter grading.

M30. Environmental Literature and Culture. (3) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Introduction to core themes, questions, and methods within interdisciplinary field of environmental humanities. Examination of how different culture forms (e.g., fiction, journalism, poetry, visual art) represent environmental issues. Topics may include biodiversity, wilderness, food, urban ecologies, postcolonial ecologies, environmental justice, and climate change. P/NP or letter grading.

M30SL. Environmental Literature and Culture (Seminars). (3) Lecture, three hours; discussion, one hour; fieldwork, two hours. Enforced requisite: satisfaction of Entry-Level Writing requirement. Introduction to core themes, questions, and methods within interdisciplinary field of environmental humanities. Examination of how different culture forms (e.g., fiction, journalism, poetry, visual art) represent environmental issues. Topics may include biodiversity, wilderness, food, urban ecologies, postcolonial ecologies, environmental justice, and climate change. Service learning component includes meaningful work with off-campus agency/agencies selected by instructor. P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses
M102. Soils and Environment. (4) (Formerly numbered M127.) (Same as Earth and Evolutionary Biology M127 and Geography M102.) Lecture, three hours; discussion, one hour; field trips. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution of higher plants and climate change. Service learning component includes meaningful work with off-campus agency/agencies selected by instructor. P/NP or letter grading.

M102L. Soils and Environment Field. (4) (Formerly numbered M127L.) (Same as Earth and Evolutionary Biology M127L and Geography M102L.) Laboratory, one hour; field excursions. Corequisite: course
M102. Investigations and demonstrations supporting soil and water conservation. (4)

M103. Soil and Water Conservation. (Formerly grading.

121. Conservation of Biodiversity. (4)

Earth and Its Environment. (Same as Atmospheric and Oceanic Sciences M100.) Lecture, three hours. Overview of Earth as system of distinct, yet intimately related, physical and biological elements. Origins and characteristics of atmosphere, oceans, and land masses. Survey of history of Earth and of life on Earth, particularly in relation to evolution of physical world. Consideration of possibility of technological solutions to global environmental problems using knowledge gained during course. Letter grading.

M125. Environmentalism: Past, Present, and Future. (Same as Architecture and Community Planning M125 and Urban Planning M165.) Lecture, three hours; discussion, one hour. Exploration of history and policy of major global environmental issues such as climate change, integrating law, policy, and political science perspectives. Recommended requisite: Political Science 20. Politics and policy of major global environmental issues such as climate change, pollution, and air quality; access to ecosystem benefits and services; lack of diversity and engagement; and utilization of socioeconomic systems. Students conduct case study analysis of strategies employed to offer environmental justice, and develop collective course resource on environmental justice strategies. Letter or P/NP grading.

154. Energy and Society in Time of Climate Change: Moving toward Just Transition. (4)

160. Topics in Environmental Economics and Policy. (Seminar, three hours. Requisite: Statistics 12 or 13. Examination of intersection of environmental economics and policy, with focus on testing policy-relevant environmental hypotheses using economics research approach. Invited scholars present research aimed at yielding policy-relevant results on various topics such as climate change, pollution, and transportation. P/NP or letter grading.

M161. Global Environmental and World Politics. (4)

M134. Environmental Economics with Data Analysis. (Lecture, three hours. Requisite: one course from Economics 41, Life Sciences 42, Political Science 6, Statistics 10, or upper division statistics course approved by instructor. Examination of challenges of balancing environmental protection with wants and needs of people in economy. Focus on how to design efficient public policies that meet environmental goals. Lecture, three hours; discussion, one hour. Examination of the role of various energy sources, energy conservation policies, and development of clean energy technologies. Lecture, three hours; discussion, one hour. Examination of implications of current patterns of energy production and consumption for future economic and environmental well-being. Examination of concepts and techniques from physics, engineering, environmental science, economics, and public policy. Letter grading.

C159. Life-Cycle Assessment. (4) Lecture, three hours. Requisite: Life Sciences 30A and 30B, or Mathematics 3A and 3B (or 31A and 31B). Public discourse about current patterns of production and consumption of energy, and goods and services more broadly. Consideration of technological solutions to global environmental problems using knowledge gained during course. Letter grading.
166. Leadership in Water Management. (4) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Examination of water quality and water supply issues, including biological, physical, chemical, economic, and social issues related to water justice. Because environmental inequality is highly complex phenomenon, multidisciplinary and multidisciplinary population approach taken, using alternative ways of understanding, interpreting, and taking action. P/NP or letter grading.

M167. Environmental Justice through Multiple Lenses. (4) (Same as Public Affairs M161 and Urban Planning M167.) Lecture, three hours. Examination of intersection between race, economic class, and environment in urban settings. Emphasis on solutions involving experts, scholars, and practitioners discuss relevant issues, including interactions between scientific, technical, management, and policy issues. Invited experts, scholars, and practitioners discuss relevant issues, such as pollution, climate change, and water infrastructure. Emphasis on solutions involving integrated urban and water systems. May be repeated for credit. P/NP or letter grading.

170. Environmental Science Colloquium. (1) Seminar, 90 minutes; one field trip. Limited to undergraduate students. Study of current topics in environmental science, building on what students have been exposed to in other courses. Letter grading.

175. Programming with Big Environmental Data. (4) (Requisite: Life Sciences 40 or Statistics 12 or 13.) Students gain practical experience conducting empirical research by learning how to program using R. Modern empirical research often requires understanding of statistical software like R. This programming language shares many similarities with other statistical programs, providing students having valuable labor-market skill. P/NP or letter grading.

180A. Practicum in Environmental Science. (4) Lecture, three hours; discussion, two hours. Enforced requisite: Statistics 12 or 13. Limited to Environmental Science majors who have completed 40 or more units of preparation for major courses, including statistics, and 12 or more units of non-environmental science toward major or minor requirements. Examination of case studies and presentation of tools and methodologies in environmental science, building on what students have been exposed to in other courses. Letter grading.

180B. Practicum in Environmental Science. (5) Lecture, one hour; laboratory, five hours. Enforced requisite: course 180A. Course 180B is requisite to 180C. Limited to juniors/senior Environmental Science majors. Investigation of various aspects of one environmental case study representing actual multidisciplinary issue. Particular emphasis on developing skills required for working as professional in this field. Will involve site investigations, original data collection and analysis, mapping and geographic information systems, and environmental and policy law issues. Case study to be defined and conducted with collaboration of local agency or nonprofit institution. Letter grading.

180C. Practicum in Environmental Science. (5) Lecture, one hour; laboratory, five hours. Enforced requisite: course 180B. Limited to junior/senior Environmental Science majors. Investigation of various aspects of one environmental case study representing actual multidisciplinary issue. Particular emphasis on developing skills required for working as professional in this field. Will involve site investigations, original data collection and analysis, mapping and geographic information systems, and environmental and policy law issues. Case study to be defined and conducted with collaboration of local agency or nonprofit institution. Letter grading.

185A. Sustainability Talks. (1) Lecture, two hours. Analysis of principles of sustainability through series of lectures by world-renowned faculty members, authors, environmentalists, entrepreneurs, policymakers, and progressive thinkers. May be repeated for credit. P/NP or letter grading.

185B. Sustainability Action Research. (2) Lecture, two hours; discussion, three hours. Investigation of issues of campus sustainability, including energy efficiency, transportation, waste stream management, sustainable food practices, and more by student researchers that, together with faculty members and UCLA staff, strive to make UCLA more sustainable community. May be repeated for credit. P/NP or letter grading.

185C. Sustainability Action Leaders. (3) Seminar, two hours; fieldwork, six hours. Students lead research teams to investigate issues of campus sustainability, including energy efficiency, transportation, waste stream management, sustainable food practices, and more to generate coalition of student researchers that, together with faculty members and UCLA staff, strive to make UCLA more sustainable community. May be repeated for credit. Letter grading.

186. Comparative Sustainability Practices in Local/Global Settings. (4) Fieldwork, four hours. Guided fieldwork and comparative analysis used to assess local sustainability practices and policies in diverse regions and intersection of local and regional context on sustainability behavior of individuals, small businesses, and other institutions in everyday life. Letter grading.

188A-188B. Special Courses in Environment. (2–2) Lecture, three hours; discussion, one hour (when scheduled—course 188A) and two hours (course 188B). Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit with topic change. P/NP or letter grading.

188A. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors College 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor. May be repeated for credit with topic change. P/NP grading.

188B. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188A. Enforced corequisite: Honors College 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May be repeated for credit. Letter grading.

188C. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188B. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 885 course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

190A. Honors Seminar. (1) Seminar, one hour. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

190B. Honors Research. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

193. Journal Club Seminars: Environment. (1) Seminar, one hour. Limited to undergraduate students. Discussion of readings selected from current literature of field. May be repeated for credit. P/NP grading.

195. Community or Corporate Internships in Environmental Science. (2 or 4) Tutorial, to be arranged. 3.0 grade-point average required. Limited to junior/senior majors. Internship in supervised setting in community agency or business related to environmental science and/or sustainability. Students meet on regular basis with faculty supervisor and provide periodic reports of their experience. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required; consult under- dergraduate adviser. P/NP grading.

198. Honors Research in Environmental Science. (2 to 4) Tutorial, four hours. Limited to junior/senior Environmental Science majors. Development and compilation of honors thesis or comprehensive research of analysis drawn from natural sciences, social sciences, and humanities. Emphasis on conceptual frameworks for defining environmental problems and implementation of research results in solving real-world problems. May be repeated for credit. Letter grading.

200A-200B. Issues and Methods in Environment and Sustainability. (4–4) Seminar, four hours. Course 200A is requisite to 200B. Examination of interdisciplinary case studies that approach problems in environment and sustainability from scientific, social, economic, political, philosophical, ethical, historical, cultural, and policy dimensions. Case studies illustrate use of qualitative and quantitative methods of analysis drawn from natural sciences, social sciences, and humanities. Emphasis on conceptual frameworks for defining environmental problems and implementation of research results in solving real-world problems. May be repeated for credit. 200A-205B-205C. Major Problems in Environment and Sustainability. (2–2–2) Seminar, three hours. Yearlong investigation of questions through series of topics of five of most pressing issues in environment and sustainability over last century: Dust Bowl, lead contamination, dichlorodiphenyltrichloroethane (DDT), stratospheric ozone depletion, and tropical deforestation. Questions include how environmental problems become matters of public concern; what tools, techniques, and practices that make problems visible and legible to different publics and that in form possibilities for response are; how efforts aimed at understanding specific problems from different perspectives changed way other environmental problems and larger processes of environmental change are studied and approached; how get left out in these different ways of seeing, and how do different ways of seeing and governing specific problems facilitate, justify, and compound imposition of harms on particular groups of people. Concurrently scheduled with Law 505A-505B. In Progress (205A, 205B) and S/U or letter grading (205C).

M235. Modern Environmental Statistics. (4) (Same as Statistics M235.) Seminar, three hours. Limited to graduate students. Requires: undergraduate level calculus, linear algebra, and introductory statistics; scientific computing. Introduction to statistical approaches in environmental science, with focus on climatic science. Topics include hypothesis testing, regression, causality, multidimensional data analysis, time series modeling, and extreme value analysis. Draws upon relevant examples in scientific literature. S/U or letter grading.

Graduate Courses
240. Food, Energy, and Water Systems Management Seminar. (1) Seminar, one hour. Designed for students in science, technology, engineering, and mathematics interested in nexus of food, energy, and water systems (FEWS) management and sustainability. Discussion of issues of science, technology, policy, economics, and law with experts in industry, academia, and government. Career development and presentation skills. Course includes conflict resolution, business and entrepreneurship. Course is part of National Science Foundation (NSF) graduate traineeship in integrated urban solutions for food, energy, and water systems (INFEWS). Enrollment for non-INFEWS students in STEM graduate education and related sustainability majors/topics by consent of instructor. S/U or letter grading.

241. Food, Energy, and Water Systems Management in Urban Systems Field Laboratory. (4) Fieldwork, four hours. Designed for students in science, technology, engineering, and mathematics (STEM) filed interested in nexus of food, energy, and water systems (FEWS) management and sustainability. Weekly visits to facility related to FEWS, and discussions of issues in science, technology, policy, economics, and law in written report. Course is part of National Science Foundation (NSF) graduate traineeship in integrated urban solutions for food, energy, and water systems (INFEWS). Enrollment for non-INFEWS students in STEM graduate education and related sustainability majors/topics by consent of instructor. S/U or letter grading.

M242. Science Communications and Environmental Media. (4) (Formerly numbered 242.) (Same as English M242.) Seminar, three hours. Designed for graduate students in food, energy, and water systems (FEWS) training grant program to survey fields of science communications and environmental narrative from nonfiction to new media (multimedia journalism, documentary, social media, virtual reality, etc.), and to develop collaborative projects communicating student research to diverse public audiences. Course is part of National Science Foundation (NSF) graduate traineeship in integrated urban solutions for food, energy, and water systems (INFEWS). Enrollment for non-INFEWS students in STEM graduate education and related sustainability majors/topics by consent of instructor. S/U or letter grading.

250. Tools for Sustainability Assessment. (4) Lecture, three hours. Recommended preparation: introductory courses in industrial ecology, ecological economics, environmental economics, business and management, or public policy analysis. Public discourse about implications of current patterns of production and consumption of energy and various goods and services suggests such patterns are unsustainable. What is meant by sustainability and how is it quantified? Focus on concepts and tools to assess sustainability at micro-level of individuals, products or firms using various techniques, including life-cycle assessment, input-output analysis, and cost-benefit analysis. Exploration of sustainability at macro-level for one entire economy or nation. Discussion of usefulness and limitations of various metrics as guide for public and private decision making. S/U or letter grading.

C259. Life-Cycle Assessment. (4) Lecture, three hours. Requisites: Life Sciences 30A and 30B, or Mathematics 3A and 3B (or 31A and 31B). Public discourse about current patterns of production and consumption of energy, goods and services more broadly is unsustainable and economically unsustainable. Introduction to basic concept of life-cycle assessment (LCA), including analytical frameworks and quantitative techniques for systematic and logically evaluating environmental trade-offs presented by different alternatives. Focus on methodology of LCA to compute various material and energy flows associated with life cycle (i.e., raw material extraction, processing, end use, and disposal) of products or services. Discussion of strengths and limitations of LCA as tool for decision making. Students perform life-cycle analysis of one technology, product, or service of their choice. Concurrently scheduled with course C159. S/U or letter grading.

260. Information, Technology, Business, and Society. (4) Seminar, three hours. Interdisciplinary research seminar to bring social science methods to bear on technology developments to design effective information-based solutions to social problems. Topics include selection and framing of research questions, developing measurements, designing appropriate methods (e.g., surveys, experiments, using available data), and writing up research proposals. S/U or letter grading.

277. Leaders in Sustainability. (4) Lecture, three hours. Common course for all students participating in Leaders in Sustainability Program, including those from engineering, law, management, public affairs, public health, natural and social sciences, and others. Creation of environment for academically based discussions on sustainability-related themes, capitalizing on wide mix of disciplines represented among participating students. Sessions feature UCLA faculty members, external speakers, and leadership skills to help students learn more about how to best put their interests in sustainability to use. Letter grading.

290. Seminar in Environment and Sustainability. (2) Seminar, 90 minutes. Seminars sponsored by Institute of the Environment and Sustainability and other units. Planning and execution of presentations on topics of choice. Emphasis on development of communication skills. May be repeated for credit. S/U grading.

297A-B. Advanced Topics in Environment and Sustainability. (4–2) Seminar, four hours (course 297A) and two hours (course 297B). Advanced study and analysis of variable current topics in environment and sustainability. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

400. Environmental Science and Engineering Problems Course. (8) Seminar, eight hours. Primarily designed for environmental science and engineering doctoral students. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor, assistant, or associate chair, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

599. Doctoral Dissertation Research. (2 to 12) Tutorial, to be arranged. Limited to students who have advanced to doctoral candidacy. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

ENVIRONMENTAL HEALTH SCIENCES
Jonathan and Karin Fielding School of Public Health
16-035 Center for Health Sciences Box 177220 Los Angeles, CA 90095-1772
Environmental Health Sciences 310-825-6381
Rachael M. Jones, MPH, PhD, Chair

Faculty Roster

Professors
Jesus A. Araujo, MD, PhD
Michael D. Collins, PhD
Jared M. Diamond, PhD
Michael L. Jerrett, PhD
Rachael M. Jones, MPH, PhD
Jian Li, PhD
Timothy Malloy, JD (Frank G. Wells Endowed Professor of Environmental Law)
Andre E. Nel, MBCHB, PhD
Shane S. Que Hee, PhD
Beate R. Ritz, MD, PhD
Wendie A. Robbins, RN, PhD, FAAN (Audrienne H. Moseley Professor of Biological Nursing Science)
Linda Rosenstock, MD, MPH
Irwin H. Suffet, PhD
Yifang Zhu, PhD

Professors Emeriti
Richard F. Ambrose, PhD
Brian L. Cole, DrPH
Clilms A. Davos, PhD
Curtis D. Eckhardt, PhD
Richard J. Jackson, MD, MPH
Robert A. Mah, PhD
Arthur M. Winer, PhD

Associate Professors
Alan I. Barreca, PhD
Kirsten Schwarz, PhD
Candace Su-Jung Tsai, ScD
Jane L. Valentine, PhD

Assistant Professors
Lara J. Cushing, MPH, PhD (Jonathan and Karin Fielding Presidential Professor of Health Equity)
Miriam E. Marlier, PhD

Adjunct Professors
Pouran D. Faghihi, MD
Daniel Z. Uslan, MD

Adjunct Associate Professor
Kevin Y. Njabo, PhD

Adjunct Assistant Professors
Hamid Arabzadeh, CIH
Angelo J. Bellomo, MS
Tao Huai, PhD

Overview

The Department of Environmental Health Sciences focuses its research and educational activities on the protection of human health from biological, chemical, mechanical, and physical hazards in the environment. Its graduates are scientists, professionals, and leaders capable of identifying and measuring stressors of environmental concern; evaluating the health, environmental, and all other impacts of such stressors; developing means for their effective management; and evaluating alternative policies directed at improving and protecting health and the environment. Such training is accomplished through several degree programs that offer specialized study in selected academic areas of environmental health sciences such as air pollution, environmental chemistry, environ-
molecular toxicology, built environment and health, climate and health, global environmental health, water quality, occupational health, and industrial hygiene. Graduates of the department pursue careers in the private or public sector as researchers, educators, managers, policymakers, and/or practitioners.

The department offers Master of Science (MS) and Doctor of Philosophy (PhD) degrees in Environmental Health Sciences and, through the Fielding School of Public Health, the Master of Public Health (MPH) degree with a specialization in environmental health sciences (see Public Health Schoolwide Programs). The department also offers an area of focus on industrial hygiene for its MS and MPH degrees. A concurrent degree program (Environmental Health Sciences MPH/Master of Urban Planning) is also offered. The interdepartmental Molecular Toxicology program offers a PhD degree.

Upper-Division Courses

100. Introduction to Environmental Health. (4) Lecture, three hours; discussion, one hour. Preparation: one course each in chemistry and biology. Limited to nonmajors. Not open for credit to students with credit for course 120. Introduction to environmental health, including coverage of sanitary principles and chronic and acute health effects of environmental contaminants, P/N or letter grading.

101. Fundamentals of Chemistry for Environmental Health. (3) Lecture, three hours; discussion, one hour. Guided tutorial on fundamental chemical concepts that are important for public health students that either do not have strong chemistry or who have not recently taken chemistry class and want to refresh their knowledge. Discussion of examples relevant to environmental health more broadly in each topic area and used to illustrate why understanding fundamental chemical concepts are important. Interactive study with focus on core chemical concepts. Recommended to be taken before or concurrently with introductory courses, P/N or letter grading.

120. Environment and Health. (5) Lecture, three hours; discussion, one hour. Limited to Public Health majors. Not open for credit to students with credit for course 100. Examination of scientific principles and methods of field, as well as translation of science to environmental health practice. Topics include environmental stressors and their health effects, regulations and policies, effects of pollution on ecosystems, or pollution on human health. Acquision of skills important for public health professionals, such as application of scientific information to real-world problems and ability to communicate effectively with different stakeholders.

125. Atmospheric Transport and Transformations of Airborne Chemicals. (4) Lecture, four hours. Preparation: one year of calculus, one course each in physics, organic chemistry, and physical chemistry. Designed for science and public health students. Role of regional or long-range transport, and atmospheric lifetimes and fates of airborne chemicals in phenomena such as photochemical smog, acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. Concurrently scheduled with course C255. P/N or letter grading.

C135. Environmental Policy for Science and Engineering. (4) Lecture, four hours, limited to seniors. Designed for senior and graduate students. Examination of theoretical underpinnings of several major types of regulatory policy, as well as practical issues involved in implementing and evaluating each. Exploration of selection and impact of regulatory forms from variety of disciplines and viewpoints. Focus on traditional command and control regulation (including source and performance standards and permitting), market-based regulation (such as emissions trading), remediation, and emerging regulatory approaches such as management-based regulation and alternatives assessment. Issues of compliance and enforcement. Concurrently scheduled with course C235. P/N or letter grading.

C140. Fundamentals of Toxicology. (4) Lecture, four hours. Preparation: one course each in biology, organic chemistry, and biochemistry. Essential aspects of toxicology, with emphasis on human species. Absorption, distribution, excretion, biotransformation, as well as basic toxicologic processes and organizational. Concurrently scheduled with course C240. Letter grading.

C152D. Properties and Measurement of Airborne Particles. (4) Lecture, four hours. Preparation: one year each of chemistry, physics, and calculus. Basic theory and application of aerosol science to environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems. Concurrently scheduled with course C252D. P/N or letter grading.

C157. Risk Assessment and Standard Setting. (4) Seminar, four hours. Requisite: course C140. Designed to provide students with opportunity to review scientific basis for association of selected occupational and environmental exposures with disease. Special emphasis on critical evaluations of literature. Attention specifically to interface of science and regulatory standards. Concurrently scheduled with course C70P or letter grading.

M166. Environmental Microbiology, (4) Same as Civil Engineering M166L. Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisite: Civil Engineering 153. Microbial cell and its metabolic capabilities, microbial genetics and its potential, growth of microbes and kinetics of growth, microbial ecology and diversity, microbiology of wastewater treatment, probing of microbes, public health microbiology, pathogen control. Letter grading.

M166L. Environmental Microbiology Laboratory, (2) Same as Civil Engineering M166L Lecture, one hour; laboratory, two hours; outside study, six hours. Requisite: course M166L (may be taken concurrently). General laboratory practice within environmental microbiology, sampling of environmental samples, classical and molecular detection of microbes from environmental samples, techniques for determination of microbial activity in environmental samples, laboratory setups for studying environmental microbiology. Letter grading.

C185A. Foundations of Environmental Health Sciences. (4) Lecture, four hours. Preparation: one year of undergraduate biology and chemistry. Introduction to field of environmental health sciences designed for students pursuing concentration in environmental health or Public Health minors. Examination of series of topics relevant to science of environmental and occupational health (e.g., climate change, epidemiology, environmental health microbiology, and toxicology) by introducing scientific basis from ecological perspective and describing how topics relate to health on a biochemical and molecular basis. Emphasis on scientific aspects of field, with focus on critique of primary literature and quantitative approaches for examination of topics to provide skills that are critical to perform research. Concurrently scheduled with course C285A. Letter grading.

C185B. Foundations of Environmental Health Sciences for Public Health Professionals. (2) Lecture/ seminar, two hours. Preparation: 4 units each of undergraduate chemistry and biology. Future environmental health and public health professionals need to understand vocabulary and systems issues related to local, regional, and global environmental factors affecting public health. Development of content knowledge and thought processes to effectively analyze environmental health problems and development, implementation, and leading of actions to address these problems. Supplements content presented in Public Health 200A and 200B and Environmental 100. Concurrently scheduled with course C200B. Letter grading.

C185C. Foundations of Environmental Health Sciences. (8) Lecture, four hours; project group, two hours. Enforced requisites: courses C185B. Multidisciplinary aspects of environmental health sciences in context of public health for environmental health majors. Concurrently scheduled with course C285C. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/N or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental read-
Graduate Courses

C200A. Foundations of Environmental Health Sciences. (4) Lecture, four hours. Preparation: one year of undergraduate biology and chemistry, introduction to field. Intended for health sciences graduate students pursuing MS, MPH, and PhD degrees. Examination of series of topics relevant to science of environmental and occupational health (e.g., climate change, ecology, microbiology, and toxicology) by introducing scientific basis from ecological perspective and describing how topics relate to health on a biochemical and molecular basis. Emphasis on scientific aspects: can critique of primary literature and quantitative approaches for examination of topics to provide skills that are critical to perform research. Concurrently scheduled with course C185A. Letter grading.

C200B. Foundations of Environmental Health Sciences for Public Health Professionals. (2) Lecture/ seminar, two hours. Preparation: 4 units each of undergraduate biology and chemistry, future environmental health and public health leaders should understand vocabulary and systems issues related to local, regional, and global environmental factors affecting public health. Development of content knowledge and thought processes to effectively analyze environmental health problems and development, implementation, and leading of actions to address these problems. Supplements content presented in Public Health 200A and Environment 100. Concurrently scheduled with course C185B. Letter grading.

C200C. Foundations of Environmental Health Sciences. (6) Lecture, four hours; group project, two hours. Enforced requisites: course C200A or C200B. Multidisciplinary course introducing environmental health sciences in context of public health for environmental health majors. Concurrently scheduled with course C185C. Letter grading.

C200D. Policy Analysis for Environmental Health Science. (4) Lecture, two hours; discussion, two hours. Designed for second-year Environmental Health Sciences MS and MPH students. Practice-focused synthesis and application of content from prior courses to analyze current environmental health policy issues. Students learn fundamentals of environmental health law, regulatory frameworks, communication strategy, working with community-based organizations, and policy analysis methods. Focus on environmental and occupational health and policy aspects of single case study. S/U or letter grading.

201. Seminar: Health Effects of Environmental Contaminants. (2) Seminar, two hours. Requisites: courses C200A or C200B and C200C. Emphasis on health effects of air, water, environmental pollutants on man and review of research literature. May be repeated for credit. S/U or letter grading.

203. Seminar: Ecotoxicology. (2) Seminar, two hours. Discussion of various topics in ecotoxicology. Topics vary from term to term and include aspects of environmental chemistry and ecology. May be repeated for credit. S/U grading.

204. Seminar: Exposure Assessment. (2) Seminar, two hours. Discussion of various topics in exposure assessment. Topics vary by term and include aspects of population activity, microenvironmental types of monitoring (outdoor, indoor, personal, biomarkers), and multimedia sources of exposure. S/U grading.

205. Environmental Health Sciences Doctoral Seminar. (2) Seminar, two hours. Limited to environmental health sciences doctoral students. Presentation of current research of environmental health sciences doctoral students. May be repeated for credit. S/U grading.

206. Seminar: Applied Coastal Ecology. (2) Seminar, two hours. Discussion of various topics in applied coastal ecology. Topics vary by term and include wetland ecology, restoration ecology, and ecology and management of coastal watersheds. May be repeated for credit. S/U or letter grading.

207. Introduction to Geographic Information Systems Systems. (4) Lecture, two hours; laboratory, two hours. Introduction to geographic information systems (GIS), including use of ArcGIS, QGIS, geocoding, and data analysis. S/U or letter grading.

208. Built Environment and Health. (4) Lecture, three hours; discussion, one hour. Limited to public health and urban planning graduate students. Interdisciplinary course in built and health and breaking down silos. U.S. and other developed, as well as developing, countries are facing increasingly lethal and costly epidemics of acute and chronic diseases related to land use and built environment decisions. While hazards presented by air and water pollution are well recognized for acute, infectious, and toxicological illnesses, there is increasing recognition of hazards presented by communities and designs that fail to recognize human health. Land use and built environment decisions impact every age group and social and racial minority. Impacts range from very acute (motor vehicle trauma) to long term (obesity, cancer, heart disease). Decisions have as their bases economic, financial, insurance, housing, and other factors. Analysis of each factor and related disease. S/U or letter grading.

209. Practical Applications in Environmental Health Sciences. (2) Lecture, two hours. Enforced requisites: courses C200A, C200B. Description of many leading environmental and occupational health problems that environmental health professionals face today, conducted as series of lectures, assignments, hands-on field exercises, and group projects, to help students develop skills that will allow them to integrate concepts across disciplines in field of environmental health. May satisfy some requirements needed to qualify for Registered Environmental Health Specialist (REHS) certification. S/U or letter grading.

211. Seminar: Practical Aspects of Biosafety and Biosecurity. (2) Seminar/discussion, two hours. Preparation: one year of introductory biology. Requisite: Microbiology 101 or 102. Designed for environmental health sciences graduate students and students in UCLA Biosafety Training Program. Interactive seminar with focus on critical concepts in practical and operational biosafety, biosecurity, risk assessment, and risk management that are needed for individuals wishing to serve as interns in UCLA bio-safety program and/or become biosafety professionals. S/U or letter grading.

214. Children’s Environmental Health: Prenatal and Postnatal. (4) Lecture, four hours. Preparation: one year each of chemistry and biology. Examination of how environmental exposures to chemical, physical, and biological agents during period of maturation (from fertilization to adulthood) cause pathophysiological perturbations in homeostasis at any stage during life. Letter grading.

215. Fundamentals of Health Impact Assessment. (4) Seminar and lab. Course provides understanding of health impact assessment (HIA) practice, its rationale and underlying principles, and opportunities to develop and apply HIA skills in work with public health agencies and other organizations. Focus on problem solving around case-study HIA’s and student experiences working on HIA-related projects. S/U or letter grading.

216. Planetary Health: Consequences of Environmental Change for Human and Non-human. Three hours. Planetary health is emerging interdisciplinary field that explores connections between environmental change and public health. Human-caused impacts on natural systems have subsequent effects on human health include changes in land use, food systems, biodiversity, air pollution, and water availability. Our ability to understand planetary health requires synthesizing information from diverse academic disciplines across spatial and temporal scales, including atmospheric and climate science, ecology, epidemiology, and policy. Students from environmental sciences and health sciences will learn how to interpret studies from scientific literature that discuss various aspects of planetary health, from drivers of environmental change to human health outcomes, integrated information across multiple fields, and communicate planetary health research through oral presentation and written report. S/U or letter grading.

M217. Graduate Seminar in Environmental Economics and Policy. (4) Same as Public Policy M217. Seminar, four hours. Preparation: undergraduate-level statistics, basic undergraduate microeconomics. Introduction to applied scholarship in environmental economics and policy. Students learn to become more proficient consumers and producers of social science research that explores questions of environmental policy and sustainability broadly construed. Topics include health and economic impacts of climate change, adaptation to climate change, efficient and equitable design of environmental policies (e.g., cap and trade, carbon taxes). Development of detailed empirical research proposal and short presentation. Letter grading.

218. Science Communication: Art and Practice of Science Storytelling. (4) Lecture, three hours. Students from environmental health sciences focus on communicating with diverse audiences through visual communication. Study of science of science communication and importance of narrative and storytelling to producing engaging science communication. Applying these skills to their own research interests, students develop two pieces of science communication, video and photo/infographic project. Through learning fundamentals of good public communication, students also advance their peer communication. S/U or letter grading.

219. Environmental Health Disparities. (4) Seminar, three hours. Designed for advanced graduate students who have completed foundational coursework in environmental health sciences. Exploration of disproportionate health burden experienced by low income communities and communities of color in U.S. due to environmental hazards. Study of social, economic, and political forces that create inequitable burdens of environmental pollution. Covers theoretical frameworks and analytic tools for understanding cumulative impacts of environmental and social inequities. Case studies illustrate multiple scientific and policy debates used to explore challenges and opportunities for addressing environmental racism and advancing environmental justice. S/U or letter grading.

220. Overview of Environmental Health Microbiology. (2) Lecture, two hours. Preparation: one course in biology, Introduction to environmental public health microbiology. Focus on human-disease-causing pathogens. Discussion of fungi, protozoa or protists, prions, and algae. Consideration of infectious diseases and of toxins produced by these microbes. Addresses how infectious agents interact with human immune system. Overview of this wide variety of microbial topics. S/U or letter grading.
221. Climate Change, Equity, and Health. (4) Lecture, two hours; discussion, two hours. Basic foundation in physical mechanisms of, responses to, and health implications of human-induced climate change. Exploration of variation of epidemiologic, risk assessment, and statistical methods used to understand impacts of climate change on health across diverse demographic groups; including efforts to estimate current and future variation of disease due to climate change, as well as avoidable and attributable risk. Elaboration of public health implications, positive and negative, of adaptation and adapt to climate change, including discussions of ethical, political, and economic aspects of these efforts. Emphasis on how adverse effects of climate change are borne disproportionately by people in low-resource settings. Students are responsible for leading class discussions and presenting posters on their choice of topic related to climate change and health. S/U or letter grading.

C225. Atmospheric Transport and Transformations of Airborne Pollutants. (4) Lecture, four hours. Preparation: one year of calculus, one course each in physics, organic chemistry, and physical chemistry. Designed for science, engineering, and public health students. Role of regional and long-range transport and atmospheric lifetimes and fates of airborne chemicals in phenomena such as photochemical smog, acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. Concurrently scheduled with course C125. S/U or letter grading.

230A-230B-230C. Interdisciplinary Occupational Health Practice. (2–2–2) Seminar, one hour; fieldwork, one hour. Focus on global nature of occupational health practice featured and explored in these varied activity courses, including material related to recognition, prevention, surveillance, and management of work-related health problems that occupational health and safety researchers and professionals encounter in various work environments. Lectures, seminars, field exercises, workshops, clinical case conferences, and group assignments combined to help students develop skills necessary to integrate and communicate relevant approaches to occupational hazard detection and control, work-related injury and illness surveillance, and disease and disability prevention from different disciplines in field of occupational health and safety. S/U grading.

C235. Environmental Policy for Science and Engineering. (4) Lecture, four hours. Preparation: one year of calculus, one course each in physics, organic chemistry, and physical chemistry. For senior and graduate students. Examination of theoretical underpinnings of several major types of regulatory policy, as well as practical issues involved in implementing such policies. Emphasis is placed on strategic selection and impact of regulatory forms from variety of disciplines and viewpoints. Focus on traditional command and control regulation (including self-executing approaches), market-based regulation, and comprehensive market-based regulation (such as emissions trading), remediation, and emerging regulatory approaches such as management-based regulation and alternatives assessment. Issues of compliance and enforcement. Concurrently scheduled with course C135. Letter grading.

C240. Fundamentals of Toxicology. (4) Lecture, four hours. Preparation: one course each in biology, organic chemistry, and physics. Exposure assessment and science of toxicology, with emphasis on human species. Absorption, distribution, excretion, and transformation, as well as basic toxicologic processes and organ systems. Concurrently scheduled with course C140. Letter grading.

M241. Advanced Concepts in Gene-Environment Interactions. (4) (Same as Molecular Toxicology M247.) Lecture, three hours; discussion, one hour. Comprehensive and up-to-date coverage of state of science of gene-environment interaction. Discussion of primary components of field, including role of metabolic pathways in genetic and environmental response and importance of environmental influences in human disease. Exploration of selected hot topics infield, such as importance of epigenetics and of microbiome. S/U or letter grading.

C252D. Properties and Measurement of Airborne Particles. (4) Lecture, four hours. Preparation: one year each of chemistry, physics, and calculus. Basic theory of airborne particle science to environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems. Concurrently scheduled with course C152D. S/U or letter grading.

252E. Identification and Measurement of Gases and Vapors. (4) Lecture, three hours; discussion, one hour; outside study, two hours. Preparation: one year each of chemistry, physics, and calculus. Theoretical and practical aspects of gas sampling and measurement of gases and vapors. Letter grading.

252F. Industrial Hygiene Measurements Laboratory. (3) Laboratory, three hours. Corequisites: courses C252D, 252E. Limited to industrial hygiene majors. Laboratory for methods for sampling, measurement, and analysis of gases, vapors, and aerosols found in occupational environment. S/U or letter grading.

252G. Industrial and Environmental Hygiene Assessment. (4) Lecture, one hour; discussion, two hours; laboratory, two hours; outside study, four hours. Requisites: courses C200A, C200B, C252D, 252E. Environmental and industrial hygiene sampling strategies and assessment via walk-through surveys, lectures, discussion, actual field measurements, laboratory calibrations, and analyses and reports, with emphasis on chemical, physical, and ergonomic hazards. Letter grading.

253. Physical Agents in Work Environment. (2 to 4) Lecture, two hours; laboratory, two hours. Preparation: one year of physics. Physics, measurement methods, health effects, and control methods for radiation (ionizing and nonionizing), noise, and thermal stress in workplace environment. S/U or letter grading.

255. Control of Airborne Contaminants in Industry. (4) Lecture, two hours; laboratory, two hours. Preparation: one year of physics. Requisite: course C252D. Principles and applications of control technology to industrial environments, including general and local exhaust ventilation, air cleaning equipment, and respiratory protection. S/U or letter grading.

256. Biological and Health Surveillance Monitoring in Occupational/Environmental Health. (4) Lecture, three hours; discussion, one hour; assignments, three hours. Principles and applications of biological monitoring and health surveillance to assess occupational and environmental hazards to human health and to evaluate occupational and environmental toxicants that cause biologic and physical effects. Letter grading.

258. Identification and Analysis of Hazardous Wastes. (4) Lecture, three hours; discussion, one hour; laboratory, one hour; one field trip. Requisite: course C252E. Designed to define, identify, label, and quantify hazardous wastes and how workers should be protected. Provides critical understanding of all analytical aspects of hazardous waste analysis and regulation and practice of handling hazardous wastes. Letter grading.

259A. Occupational Safety and Ergonomics. (4) Lecture, four hours. Overview of most frequent and severe occupational injuries and illnesses, their distribution, causes, analysis methods, and control approaches, including low back pain, falls, machine exposures, upper extremity musculoskeletal disorders, fleet safety, and selected ergonomics topics. Letter grading.

259B. Workplace Safety. (2) Lecture, two hours. Introduction to broad range of topics in workplace safety through lecture and class participation. Emphasis on class participation, metrics, control philosophy, and control methods. Specific topics include traditional safety topics, such as fall hazards, machine safety, and fire hazards. Introduction to concepts of safety culture and philosophy. Review and presentation of peer-reviewed articles on topics relevant to course material. Letter grading.

M260. Occupational Epidemiology. (4) (Same as Epidemiology M261.) Lecture, three hours. Requisites: Epidemiology 100; for Epidemiology majors, Epidemiology 200A, 200B, 200C. Methodological considerations, approaches, and limitations in epidemiological studies of occupational and environmental groups and environments. S/U or letter grading.

C264. Fate and Transport of Organic Chemicals in Aquatic Environment. (4) Lecture, four hours. Preparation: bachelor’s degree in science, engineering, geophysics, chemistry, biology, or public health. Evaluation for advanced studies in topics regarding nanomaterial organic pollutants are distributed in aquatic environments. Study of mass transport mechanisms moving organic chemicals between phases, biological transformation and accumulation, and chemical reactions. Effect of humic substances on these processes. Concurrently scheduled with course C164. S/U or letter grading.

M270. Work and Health. (4) (Same as Community Health Sciences M278.) Lecture; three hours; practicum, one hour. Recommended preparation: graduate-level methods/statistics course, basic epidemiology and biostatistics. Examination of impact of work on physical and psychological health in context of newly emerging discipline. Focus on psychosocial models, measurement (including hands-on experience), contextual factors (gender, ethnicity, social class), and how work stressors can be ameliorated. S/U or letter grading.

280. Nanomaterial-Related Emerging Technologies: Exposure and Health Effects. (4) Seminar, three hours; activity, one hour. Students gain understanding of exposure and health effects of nanomaterials and related technologies, and of approaches to control exposure risks to workers and public. Students develop founda- tion for advanced studies in topics regarding nanomaterial-related emerging technologies. Topics include nano- and advanced materials and their developments; electronic products containing toxic substances and nanomaterials and their enabled products, their liability and regulatory compliance; exposure issues related to these materials and products throughout life cycle, including occupational and environmental perspectives; assessment and control of harms in humans from exposure intakes to post-exposure effects. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Following teaching apprentice guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.
400. Field Studies in Environmental Health Sciences. (4) Fieldwork, to be arranged. Field observation and studies in selected community environmental health settings. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward MS minimum course requirement; 4 units may be applied toward BS-unit minimum total required for MPH degree. Letter grading.

401. Environmental Measurements. (4) Lecture, two hours; laboratory, four hours. Requisites: courses C200A, C200B, Chemistry 20A, 30AL. Instrumental methods for laboratory and field applications to assess quantity of environmental pollutants in air, food, and water, and to assess degree of exposure to such factors as noise and radiation. Letter grading.

410A. Instrumental Methods in Environmental Sciences. (4) Lecture, four hours; discussion, two hours; other, two hours. Preparation: one year each of physics, chemistry, and biology. Theory and principles of instrumental methods through lectures and group discussions. Letter grading.

410B. Instrumental Methods Laboratory in Environmental Health Sciences. (4) Lecture, one hour; discussion, one hour; laboratory, four hours; other, two hours. Preparation: one year each of physics, chemistry, and mathematics. Requisites: courses C200A, C200B. Laboratory techniques and instrumentation used in preparation and analysis of biological, environmental, and occupational samples. Letter grading.

411. Environmental Health Sciences Seminar. (2) Seminar, two hours. Required of graduate environmental health sciences students for one term each year. Current topics in environmental health in science, policy, and leadership. Letter grading.

414A. Research Methods and Effective Communication in Environmental Health Sciences. (2) Lecture, two hours. Prepares doctoral students in environmental health sciences and related fields for skills needed to undertake dissertation. Skills including performing literature searches, designing research study, proposing specific aims, forming testable hypotheses, completing Institutional Review Board (IRB) application, choosing data collection methods, data management, analysis, and interpretation; and writing research proposal. Students complete pilot research proposal for submission for funding. S/U or letter grading.

414B. Research Methods and Effective Communication in Environmental Health Sciences. (2) Lecture, two hours. Prepares doctoral students in environmental health sciences and related fields for skills needed to undertake dissertation. Skills including performing literature searches, designing research study, proposing specific aims, forming testable hypotheses, completing Institutional Review Board (IRB) application, choosing data collection methods, data management, analysis, and interpretation; and writing scientific paper and presenting research results. Students complete manuscript for submission to peer-reviewed journal. S/U or letter grading.

450. Case Studies in Regulatory Decision-Making: How Government Agencies Are Influenced to Delay Abatement of Local Health Threats. (2) Seminar, two hours. Requisites: course C200A or Public Health 200A or equivalent. Examination of process in which regulatory decisions are made. Review of several case studies in which industrial operations resulted in discharge of toxic chemicals to air, soils, or surface waters, and the subsequent health of adjoining community; this is common scenario for which California’s health-protective regulatory policy was designed. Through review of response of state and local agencies in these cases, examine extent to which private interests can influence regulatory decisions, rendering process ineffective in abating health threats, especially in some of California’s most vulnerable communities. As practitioners in public health, consideration of how framing of complex regulatory decision in public health terms can be vital to gaining support of policymakers and public. S/U or letter grading.

454. Health Hazards of Industrial Processes. (4) Lecture, two hours; field trips, four hours. Requisite: course 255. Industrial processes and operations and occupational health hazards that arise from them. Letter grading.

461. Water Quality and Health. (4) Lecture, three hours; discussion, one hour. Requisites: courses C200A, C200B, 401. Introduction to water quality, with coverage of hydrology, water chemistry, and various chemical contaminants that may affect human health. Various treatment methods and health implications. S/U or letter grading.

495. Teacher Preparation in Environmental Health Sciences. (2) Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master’s degree minimum total course requirement. May be repeated for credit. S/U grading.

510. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual studies under direct faculty supervision. Only 4 units may be applied toward MPH and MS minimum total course requirement. May be repeated for credit. S/U or letter grading.

550. Preparation for Master’s Comprehensive or Doctoral Qualifying Examinations. (2 to 8) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

559. Doctoral Dissertation Research. (2 to 10) Tutorial, four hours. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Overview
Epidemiology is the study of the distribution and determinants of disease in human populations. Epidemiologists study variations of disease incidence in relation to factors such as age, sex, race, environmental factors, lifestyle, demographic variables, occupational and social characteristics, place of residence, susceptibility, exposure to specific agents, or other pertinent characteristics. All of concern are the temporal and special distribution of disease, examination of trends, and intervals between exposure to causative factors and onset of disease. The scope of the field extends from study of the patterns of disease to the causes of disease with the goal of the control or prevention of disease. What distinguishes epidemiology from other clinical sciences is the focus on health problems in populations rather than in individuals, with the focus on public health.

Epidemiology is a young field with constantly expanding boundaries. The range of activities includes identifying determinants of population health, investigation and control of disease outbreaks, study of environmental and industrial hazards, evaluation of preventive or curative programs or treatments, and evaluation of the effectiveness and efficiency of intervention or control strategies. Many tools of epidemiology are shared with other fields such as microbiology, immunology, medicine, statistics, demography, and medical geography.

There is a growing core of epidemiologic methodology that includes the principles of study design and conduct, and statistical methods. Epidemiologic tools have become relevant for many other fields that study groups of people, e.g., genetics and epigenetics, global health, pharmacology, medicine, and many others.

Epidemiologists work in many settings, including academia, international health agencies, state and local health departments, federal government agencies and health programs, health maintenance organizations, and numerous research projects privately and publicly sponsored.

Mission
The objectives of the Department of Epidemiology fall into three broad categories—research, teaching, and community service.

Graduate Major
Epidemiology MS, PhD
Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Epidemiology
Lower-Division Courses
19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of epidemiologic themes and topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses
100. Principles of Epidemiology. (4) Lecture, four hours; discussion, two hours; preparation; one full biological sciences course. Limited to nonmajors. Not open for credit to students with credit for course 120. Introductory course to provide qualified undergraduate students with broad and comprehensive overview of concepts of epidemiology including evaluating public health problems in terms of magnitude, person, time and place; critical epidemiologic studies; identifying and accessing key sources of data for epidemiologic assessment; using epidemiologic methods and calculating basic epidemiologic measures for operational purposes; and communicating basic principles of epidemiology such as definitions of populations, sources of bias, causation, mortality, morbidity, and protective factors, and basics of study design. Letter grading.

120. Epidemiology in Public Health. (5) Lecture, four hours; discussion, two hours; requisites: Public Health 50B. Limited to public health majors. Not open for credit to students with credit for course 100. Introductory to main principles of epidemiology, including foundational concepts and terminology, and exploration of key historical developments of field. Survey of major study designs and statistical techniques with emphasis on application of epidemiologic concepts in public health. Letter grading.

CM175. Terrorism, Counterterrorism, and Weapons of Mass Destruction: Practical Approach. (5) Same as Honors Collegium M175.) Seminar, three hours. Terrorism, its origins, and ways of addressing terrorism at local, national, and global levels. Guest speakers from variety of UCLA departments and from Los Angeles. Concurrently scheduled with course C275. P/NP or letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced coursequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

197. Individual Studies in Epidemiology. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses
200A. Methods I: Basic Concepts and Study Designs. (6) Lecture, three hours; discussion, one hour. Introduction of basic concepts and methods in epidemiology with emphasis on measuring disease occurrence, study design, and assessing causal relationships. Letter grading.

200B. Methods II: Prediction and Validity. (6) Lecture, six hours; discussion, four hours. Enforced requisites: course 200A and Biostatistics 100A, or Public Health 200A and 200B. Corequisite: Biostatistics 100B. Introduction to basic concepts, principles, and methods of chronic and infectious disease epidemiology. Letter grading.

M203. Topics in Theoretical Epidemiology. (4) (Formerly numbered 203.) Same as Health Policy M201.) Lecture, three hours. Emphasis on methods that help to understand how systems operate and how to intervene on them. Exploration of how to characterize human-centered problems that arise, and how to handle complexity as core design and development challenge. Examination of different traditions of studying and modeling (representing) systems, both conceptually and quantitatively, to address questions that arise in public health. Consideration of utility and limitations of these methods for providing insight to stakeholders who are addressing population health problem. S/U or letter grading.

205. Methods for Analyzing Non-Randomized and Marginalistic Experimental Studies. (4) Lecture, three hours. Requisites: course 200C or 401, or Biostatistics 200A or 200B or 406, and course M403 or 407A or Biostatistics 203A. Provides students with necessary tools to evaluate effectiveness or impact of public health interventions. Study designs include non-randomized, quasi-experiments, and natural experiments. Covers both theoretical concepts as well as practical tools that encompass methods borrowed from related fields including social epidemiology, health policy, econometrics, and evaluation research. These methods include instrumental variable, difference-in-difference, synthetic control, regression discontinuity, and propensity score matching. S/U or letter grading.

206. Systems Science Modeling and Simulation in Epidemiology. (4) Lecture, three hours. Requisites: course 200C or 401, or Biostatistics 200A or 200B or 406, and course M403 or 407A or Biostatistics 203A. Theoretical and practical introduction to modeling and simulation methods for conducting comparative, cost-effectiveness, and forecasting research. These methods include population-level (e.g., Markov state-transition models and system dynamics) and individual-level (e.g., microsimulation and agent-based modeling) simulations. These methods are employed in a field sometimes referred to in statistical epidemiology or computational epidemiology. Multidisciplinary fields that use tools and techniques from computer sciences, econometrics, operations research, engineering, and epidemiology to better understand disease mechanisms or evaluate intervention effectiveness. S/U or letter grading.
207. Reproducibility in Epidemiologic Research. (4) Lecture, three hours. Requisites: courses 200A, 401 (or Biostatistics 100B or 200A and 200B), M403. Introduction to reproducibility in epidemiologic research. Students are exposed to tools for adopting practices to enhance reproducibility in their own research. Letter grading.

211. Statistical Methods for Epidemiology. (4) (Same as Biostatistics M211.) Lecture, four hours. Requisites: two terms of statistics (such as Biostatistics 100A, 100B). Requisites: courses 200B, 200C. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in courses 200B and 200C and introduction of new topics, including principles of epidemiologic analysis, trend analysis, confidence interval determination, and sensitivity analysis. S/U or letter grading.

212. Statistical Modeling in Epidemiology. (4) Lecture, four hours. Preparation: two terms of statistics (three terms recommended). Recommended: course 250A or 251L. Principles of modeling, including meanings of models, a priori model specification, translation of models into explicit population assumptions, model selection, model diagnostics, hierarchical (multilevel) modeling, and letter grading.

215. Systematic Review and Meta-Analysis. (2) Lecture, two hours. Requisites: course 100 or 200A, and Biostatistics 100A, or Public Health 200A and 200B. Offers theoretical understanding of systematic review and meta-analysis of clinical trials and observational studies. Students learn how to conduct systematic literature search, assess quality of selected studies, identify sources of heterogeneity, conduct meta-analysis, and understand standards of reporting on meta-analyses. Offers practical training in meta-analyses and meta-regression using STATA software. Letter grading.

216. Applied Sampling. (4) (Same as Statistics CM248.) Lecture, three hours; discussion, one hour. Designed for upper-division and graduate students in social or life sciences and those who plan to major in Statistics. Topics include methods of sampling from finite populations, sources of sampling and estimation bias, and methods of generating efficient and precise estimates of population characteristics. Practical applications of sampling methods via lectures and hands-on laboratory exercises. S/U or letter grading.

217. Social Networks and Public Health. (4) Lecture, four hours. Requisites: course 200B or 200A, or Biostatistics 200A and 200B. Principles of social network research, composition and size, and social network intervention, especially in relation to public health and health behavior. Coding examples are provided in R (mainly R graph and igraph2 packages). Discussion of land use, international network papers relevant to public health. S/U or letter grading.

218. Questionnaire Design and Administration. (4) (Same as Community Health Sciences M218.) Lecture, four hours. Requisites: courses 200B and 200C, or Community Health Sciences 211A and 211B. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaire design. Letter grading.

219. Strategies for Increasing Sensitivity and Validity of Epidemiologic Studies. (2) Lecture, two hours. Requisite: course 100 or Public Health 200A. Discussion of strategies for increasing sensitivity and validity of epidemiologic studies. Covers issues that led to methodologic articles authored by instructor; nature of articles themselves; subsequent studies that have used suggested approaches; and any modification of methods that have been proposed. Students are expected to have basic training on epidemiological study designs and methods. S/U or letter grading.

220. Principles of Infectious Disease Epidemiology. (4) Lecture, three hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Ascertainment of infection, transmission, and epidemiologic parameters rather than clinical and pathological aspects. Specific diseases discussed in depth to illustrate epidemiologic principles. S/U or letter grading.

221. Emerging Infectious Diseases. (4) Lecture, three hours. Requisite: course 220 or consent of instructor. Emerging infectious diseases (EIDs) are infections that have appeared or whose incidence or geographic range is rapidly increasing or threatens to increase in future. Overview of important emerging and re-emerging infectious diseases globally. Addresses factors associated with disease emergence/re-emergence, research methods, disease emergence, disease surveillance, outbreak investigation, and response to EIDs with global perspective. Letter grading.

226. Global Health Measures for Biological Emergencies. (4) (Same as Ecology and Evolutionary Biology M226.) Lecture, four hours. Requisite: course 220. Mitigation of bioterrorism falls outside traditional public health programs and public health graduate education. Because of seriousness of such threats, it is important that individuals trained in public health understand problems and responses. Letter grading.

228. Biology of HIV. (4) Lecture, three hours. Preparatory to two biology courses. Requisites: course 100 and Biostatistics 100A, or Public Health 200A and 200B. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and bio-safety in laboratory. Letter grading.

230. Epidemiology of Sexually Transmitted Diseases. (4) Lecture, four hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Sexually transmitted diseases; medical/biological aspects, epidemiology and control in developed and developing countries. S/U or letter grading.

231. Principles of Control of Infectious Diseases. (4) Lecture, three hours. Comprehensive study of tools for control of infectious diseases and application of these tools in public health programs to achieve epidemiologic impact on disease reduction, elimination, or eradication. S/U or letter grading.

232. Methods in Research of Marginalized and Hidden Populations. (2) Lecture, two hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Overview of methods of collecting data in situations for which standard methods are unsuitable. Letter grading.

240. Cardiovascular Epidemiology. (2) Lecture, two hours. Topics include definition, pathogenesis, descriptive epidemiology, magnitude of risk factors, strategies for prevention, lipoprotein metabolism, and epidemiology of diabetes, hypertension, and chronic lung disease. Letter grading.

241. Epidemiology of Obesity and Diabetes. (4) Lecture, three hours. Requisite: course 100 or 200A or Public Health 200A and 200B. Epidemiology of obesity and diabetes. Students are exposed to most important research in this area. Focus includes global and regional epidemic of obesity and diabetes, risk factors and complications, classifications and assessment, prevention and management, as well as methodological issues related to study design and measurement for conducting obesity and diabetes research. Large hands-on component in the form of GIS, a student’s creative thinking and improves their skills for scientific writing and oral communications through individual and team assignments. S/U or letter grading.

245. Lifestyle Intervention for Noncommunicable Chronic Diseases. (2) Lecture, two hours. Requisites: course 242 or 243. Emphasis on need to teach students how to apply principles of trial design and data analysis to lifestyle interventions for purposes of preventing onset and progression of diseases focus on noncommunicable chronic diseases (i.e., obesity, diabetes, hypertension, coronary heart disease, or cancer), but concepts and methods can be applied to acute and infectious diseases as well. S/U or letter grading.

247. LifeCourse Epidemiology. (4) Lecture, three hours. Requisites: courses 100A, 100B, 200A, 200B, and Biostatistics 100A, or Public Health 200A and 200B; and Biostatistics 100B, or equivalent, or consent of instructor. Introduction to concepts and methods for studying life-course determinants of health and disease. Consideration of how exposures at one stage of human lifespan influence health outcomes at multiple life stages. Analytical approaches to research on life-course determinants of health. S/U or letter grading.

249. Genetic Epidemiology I. (4) Lecture, two hours. Preparation: at least one course in epidemiology, biostatistics, and genetics. Basic concepts in emerging field of genetic epidemiology, with principal focus on genomics of complex diseases. Understanding of genetic contributions to disease, identifying genes, and characterizing their main effects and interactions with environmental factors. S/U or letter grading.

254. Nutritional Epidemiology. (2) (Same as Community Health Sciences M254.) Lecture, two hours; discussion/laboratory exercise, one hour. Preparation: introductory biostatistics and epidemiology courses. Review of all aspects of contemporary nutrition science that are required to develop knowledge of the scientific basis for dietary recommendations and other dietary practices. Letter grading.

256. Environmental Epidemiology. (2 or 4) Lecture, three hours. Requisites: course 100A, or Public Health 200A and 200B. Environmental epidemiology methods applied to evaluation of public health hazard. Topics include air pollution, pesticides, drinking water contaminants, use of GIS. Review of recently completed environmental studies published in peer-reviewed literature. S/U or letter grading.

265. Epidemiologic Methods in Occupational and Environmental Health. (4) Lecture, three hours. Introduction to epidemiologic methods applied to evaluation of health outcomes of occupational and environmental hazards, including study design, exposure assessment, and statistical techniques commonly encountered in research focused on assessing adverse health effects resulting from occupational and environmental exposures. Includes case-control, cohort, meta-analysis, risk assessment, and policy development. Illustrated by case studies, with focus on techniques to critically evaluate and interpret current literature. Letter grading.

266. Global Health and Tropical Medicine. (4) Lecture, four hours. Introduction to tropical diseases and global health. How humanitarian health issues, material- and health-related factors interact to influence the current health status of the world, and how health organizations, and political/medical constraints all are related with respect to health on worldwide scale. Letter grading.

267. Methodologic Issues in Reproductive Epidemiology. (2) Problems, examination hours. General discussion of methodologic issues important to epidemiologic studies of reproductive outcomes, including fertility, low birth weight, prematurity, birth defects, pregnancy loss, and behavioral risk factors. Focus on approaches to conceptualization, study design and exposure assessment and identification of potential sources of bias illustrated through review of recent studies published in literature and with particular focus on the analysis of nonrandomized and nonexperimental exposure and birth cohorts. S/U or letter grading.

268. Introduction to Pharmacoepidemiology. (2) Lecture, two hours. Requisites: course 100 or 200A, or Public Health 100A or 100B or equivalent. Introduction to pharmacoepidemiology is application of epidemiologic knowledge, reasoning, and methods to study of effects and uses of drugs. Survey of contemporary roles of pharmacoeconomic evaluation of drug development and use in healthcare, with historical background of its evolution and projections of future prospects. S/U or letter grading.

269. Substance Use Epidemiology. (4) Lecture, three hours. Requisites: course 200A, and Biostatistics 100A or 100B or equivalent. Introduction to epidemiology of substance use and substance use disorders within public health paradigm. Review of drug policy in U.S., description of occurrence of substance use and-related problems, examination of intersection of substance use and mental health disorders, and examination of role of epidemiology in informing and evaluating interventions targeting substance use disorders, including prevention and treatment pharmacologic and nonpharmacologic treatments. S/U or letter grading.

270. Behavioral Epidemiology. (4) Lecture, four hours. Requisites: course 100, or 200A, or Public Health 200A and 200B. Introduction to range of different methodologic approaches used in conduct analysis of behaviors studied in epidemiology research. How to collect, analyze, and interpret data on behaviors that can be associated with disease outcomes, including methods to collect survey data (i.e., design of questionnaires, interviewing techniques, use of technology to collect data) and methods to collect and analyze qualitative data (e.g., ethnographic interviews, focus groups, systematic observations). Overview information on epidemiology of key behavioral factors affecting human health, including sexual risk behaviors, substance use, physical activity, and healthcare utilization. S/U or letter grading.

271. Psychiatric Epidemiology. (4) Lecture, three hours. Requisites: Biostatistics 100B, Public Health 200A, 200B. Psychiatry epidemiology examines occurrence and distribution of mental illness and disorder and probable causes and factors that influence manifestation, trajectory, and outcome. Provides students with knowledge and skills necessary to conceptualize mental health-related research questions, property assess mental health symptoms and diagnostic classifications in their research (e.g., prevalence, incidence, and outcome), and analyze data to advance field of psychiatric epidemiology. Emphasize better understanding and ability to establish mental health and substance use treatment guidelines. With respect to measurement, emphasis is given to issues of reliability and validity in studying such disorders—while considering factors such as gender, sexuality, race/ethnicity, age, poverty, education, culture, social support, social capital, etc. S/U or letter grading.

272. Social Epidemiology. (4) Same as Community Health Sciences M272) Lecture, two hours; discussion, one hour. Requisites: course 100 or Public Health 200A and 200B. Relationship between sociocultural, and psychosocial factors in the etiology, occurrence, and distribution of morbidity and mortality. Emphasis on lifestyles and other sociocultural-environmental factors associated with general susceptibility to disease and subsequent mortality. Letter grading.

273. Responsible Conduct of Research in Global Health (Same as Community Health Sciences M273) Lecture, two hours. Requisite: Community Health Sciences 200. Introduction to fundamental principles of public health ethics, current ethical procedures, guidelines, and requirements, and ethical issues facing public health professionals working in developing countries. History of public health issues, unique ethical issues of research in developing countries, analysis of ethical implications of informed consent, responsibility to study community, mechanisms of study approval, role of funders, and role and responsibilities of review boards. S/U or letter grading.

274. Advanced Epidemiologic Methods for Global Health. (2) Lecture, two hours. Requisites: courses 200A, and Biostatistics 100B, or Public Health 200A and 200B. Study provides global health research scientists with new methods for analysis of new data; and advanced methods for statistical analyses focusing on existing sources of data, surveys, data sharing, and advanced statistical and epidemiologic methods in global health. S/U or letter grading.

291. Seminar: Special Topics in Epidemiology. (2) Seminar, two hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Review of current epidemiologic research contained in recent medical literature. May be repeated for credit. S/U or letter grading.

293. International HIV/AIDS Seminar. (2) Seminar, two hours. Requisite: course 200A, 200B, and Biostatistics 100B, or Public Health 200A and 200B. Study provides global health research scientists with new methods for analysis of new data; and advanced methods for statistical analyses focusing on existing sources of data, surveys, data sharing, and advanced statistical and epidemiologic methods in global health. S/U or letter grading.

299. Global Health and Tropical Medicine. (4) Lecture, three hours. Requisites: course 200, or Public Health 200A, 200B. Study provides global health research scientists with new methods for analysis of new data; and advanced methods for statistical analyses focusing on existing sources of data, surveys, data sharing, and advanced statistical and epidemiologic methods in global health. S/U or letter grading.

300. Field Studies in Epidemiology. (4) Fieldwork, to be arranged. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward MS minimum course requirement; 4 units may be applied toward 44-unit minimum total required for MPH degree. S/U or letter grading.

401. Applied Epidemiologic Analysis. (4) Lecture, three hours. Requisites: course M403, Biostatistics 100B, Public Health 200A, 200B. Combines lectures, discussions, and laboratory assignments to offer conceptual understanding of analytic methods in epidemiology. Students develop basic proficiency in methods by conducting statistical analysis using epidemiologic software, with emphasis on courses 200A and 200B in second year and develop expertise in methods they will use for their own research. S/U or letter grading.

M403. Computer Management and Analysis of Health Data Using SAS. (4) (Same as Biostatistics M403B) Lecture, two hours; laboratory, two hours. Introduction to practical issues in management and analysis of health data using SAS programming language. Focus on data management and analysis, data sets, and data management systems. Common issues and solutions in data management, including data manipulation, extraction, presentation, data definitions, unique subject identifiers, and nonstandard data formats. S/U or letter grading.

407. Epidemiologic Research Using R. (4) (Formerly numbered 407A) Lecture, three hours. Requisite: course 100 or 200A, or Public Health 200A and 200B, or consent of instructor. Designed to broadly offer R coding experience, with emphasis on data management, visualization, and analysis. Topics include data management, data manipulation, and requirements, and ethical issues facing public health professionals working in developing countries. History of public health issues, unique ethical issues of research in developing countries, analysis of ethical implications of informed consent, responsibility to study community, mechanisms of study approval, role of funders, and role and responsibilities of review boards. May be repeated for credit. S/U or letter grading.

408. Applied Epidemiologic Research Using R. (2) Lecture, two hours. Requisite: course 407A. Designed to broadly offer R coding experience, with emphasis on data management, data description using tables and figures, and data analysis. Introduction of various concepts with data to facilitate interactive learning through guided R programming exercises. Weekly R data analysis, in which students present their research and data analysis progress using real data. Each student performs secondary data analysis and prepares abstract, brief introduction, methods, and results part of submitted brief communication paper. S/U or letter grading.

412. Public Health Surveillance. (2) Lecture, two hours. Requisites: course 100 or 200A, and Biostatistics 100A, or Public Health 200A and 200B. Overview of public health surveillance methodology, including (1) design, implementation, and evaluation of surveillance systems, (2) analysis and interpretation of surveillance data, and (3) application of methods to specific health-related outcomes. S/U or letter grading.

413. Methods of Scientific Communication. (2) Lecture, two hours. Requisites: course 100 or 200A. Principles of scientific writing, revising, and proofreading. Approaches to developing effective written, oral, and visual presentations of epidemiologic research findings.
Communication issues arising in conduct of research, including informed consent process. S/U or letter grading.

420. Field Trials of Health Interventions in Low-Resource Settings. (4) Lecture, four hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Introduction to practical concepts and issues in conducting epidemiologic field research in developing countries, including formulating research questions, study site selection, ethical considerations, and logistics of data and specimen collection. S/U or letter grading.

495. Teacher Preparation in Epidemiology. (2) Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master’s degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master’s degree minimum total course requirement; may not be applied toward master’s degree minimum total course requirement. May be repeated for credit. S/U grading.

595. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward MPhil and MS minimum total course requirement. May be repeated for credit. S/U or letter grading.

597. Preparation for Master’s Comprehensive or Doctoral Qualifying Examinations. (2 to 12) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master’s Thesis Research. (2 to 8) Tutorial, to be arranged. Only 4 units may be applied toward MPhil and MS minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research. (2 to 12) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**Adjunct Assistant Professor**

Supeena Insee Adler, PhD

**Overview**

Ethnomusicology involves the study of all kinds of music from all over the world, using a variety of disciplinary perspectives. The Department of Ethnomusicology, the largest and first of its kind in a U.S. university, offers courses that cover the music of virtually every region of the world and of many ethnic groups in the U.S., as well as courses on popular music and film music. Most courses combine an interest in music as an art form with questions about how musical art and practice relate to other aspects of culture, society, politics, and economics. Courses are also given on the philosophies and aesthetics of music. In addition to lecture courses, the department offers performance ensemble courses in several world and American music traditions. At the undergraduate level, most of the performance courses are open to nonmajors, and many academic courses target nonmajors; prior knowledge of music is not expected or required. The Ethnomusicology Department is aligned with the departments of Music and Musicology and aspires to promote productive collaboration between performance and scholarship, a cross-cultural global understanding of the art of music, and preparatory training for a broad range of careers in music after students graduate.

---

**Undergraduate Major**

**Ethnomusicology BA**

The undergraduate major in Ethnomusicology emphasizes general world music, performance/composition, public ethnomusicology, and scholarly research. Admission requires an audition/ interview. The major provides students with a wide-ranging liberal arts education in music. At its core, this includes (1) comprehensive knowledge of music cultures of the world; (2) understanding of the interrelationship of music, society, and culture; (3) grounding in the basics of Western music theory and musicianship; and (4) the experience of playing in one or several musical ensembles from various traditions around the world.

Beyond the core and emphasis requirements, students in the world music concentration may, through elective courses, prepare for a variety of career goals, including the study of ethnomusicology in graduate school, composing and performing music, working in the music industry, serving society in the nonprofit sector, or becoming a K through 12 music teacher.

**Capstone Major**

The Ethnomusicology major is a designated capstone major. The capstone project is individualized to each student and requires a creative process either through music performance/composition, a research project, or an internship with a self-reflective journal detailing the process. Through that process, students are expected to demonstrate a broad knowledge base and competency in performance, writing, and/or composition and ability to apply knowledge and experience to the specific requirements of the capstone; conceive and successfully complete a project that is expressive of their specific interests and acquired expertise; and display, through written documentation or live presentation, the requisite communication and, in some cases, teamwork required by work in this field.

**Learning Outcomes**

The Ethnomusicology major has the following learning outcomes:

- Demonstrated broad knowledge and competency in performance, writing, and/or composition
- Demonstrated ability to apply knowledge and experience to capstone requirements
- Conception and successful completion of a project that is individually expressive of the student’s specific interests and acquired expertise
- Written document or live presentation that displays requisite communication and teamwork required by work in this field

**Entry to the Major**

**Admission**

Applicants are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, test scores, a personal statement of purpose, and an on-campus...
interview/audition. Applicants who are unable to travel to UCLA have the option of a Skype interview/audition.

Requirements

Preparation for the Major

Required: Ethnomusicology M6A, M6B, M6C, with grades of C– or better; 20A, 20B, 20C, with grades of C or better; Music 20A, 20B, 20C, with grades of C or better; and 12 units of ethnomusicology world music performance organizations (courses 91A through 91Z), private instruction in music (course 92), and/or world music specializations (courses 68A through 68Z).

The Major

Required: Ethnomusicology 175 or 181, 183; 12 units from courses 161A through 161Z, 162, and/or 168A through 168Z; a minimum of eight upper-division ethnomusicology courses (32 to 36 units); and a capstone project in either (1) performance/composition, (2) public ethnomusicology, (3) scholarly research, or (4) other potential emphasis concepts in consultation with a faculty adviser.

Performance/Composition Capstone: Students must fulfill the capstone final project requirement (4 units) through a public recital (performance). Students must enroll in Ethnomusicology 199 (2 units) and pass a recital permission jury. Instrumental and vocal performers must present a portion of their recital performance, and composers must present excerpts from their recital scores in front of two faculty members. Students also enroll in Ethnomusicology 186 (2 units) during the term in which they perform their recital or their composition(s) are performed.

Public Ethnomusicology Capstone: Students must fulfill the capstone internship requirement, which consists of 8 units of Ethnomusicology 195B, in an institution approved by the faculty sponsor. Students must write a final research paper (at least 10 pages) at the completion of each internship.

Scholarly Research Capstone: Students must write a capstone thesis (25 to 30 pages) and enroll in Ethnomusicology 199 (2 units minimum) for at least one term while writing the thesis.

Independent Capstone: In consultation with a faculty adviser, students can propose capstone projects in other potential emphasis concepts such as technologies, film scoring, interactive arts, dance, and more. Students must enroll in Ethnomusicology 199 (2 units minimum).

Policies

Preparation for the Major

All entering first years are required to take the Music Theory Assessment Examination either during New Student Sessions or during zero week of fall quarter. The examination score is used to determine eligibility and placement in first-year music core courses (Ethnomusicology M6A, M6B, M6C, and Music 20A, 20B, 20C). Examination results may require enrollment in Music 3 as a requisite to both Ethnomusicology M6A and Music 20A. Entering transfer students with fewer than 15 units of prior music theory must take the Music Theory Assessment Examination.

Undergraduate Minors

Ethnomusicology Minor

The Ethnomusicology minor is designed for students who wish to augment their major program with a group of related courses that provide a systematic introduction to the study of world music and performance.

Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better and be in good academic standing, have completed one lower-division course with a grade of C or better, and have successfully completed at least two (2) quarters of the same lower-division ensemble course (Ethnomusicology 91A though 91Z).

Optional Focus in Iranian Music: Students must select 91L as the lower-division ensemble course.

The Minor

Required Lower-Division Courses (9-10 units): Ethnomusicology 5 or M25, and one course from 7, 15, 30, M35, 40, 45, M50A, M50B, 60, M73, M110A, or M110B.

Required Upper-Division Courses (22 units): Ethnomusicology 101; three courses (6 units) from the same performance ensemble course numbered from 161A to 161Z; and three upper-division elective courses from the department. No more than one course from 195A to 199 may be applied to the minor.

Optional Focus in Iranian Music: Ethnomusicology C141, 142, 143, and three courses (6 units) of 161L.

Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Major

Ethnomusicology MA, CPhil, PhD

The department offers MA and PhD degrees in Ethnomusicology, with a specialization in systematic musicology or music and anthropology. Both degree programs train students for future university teaching careers, as well as careers in library science and archiving, the music industry, public service, and music technology. The department provides fellowships, teaching assistantships, and research assistantships for qualified students.

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Ethnomusicology

Lower-Division Courses

5. Music Around World. (8) Lecture, four hours; discussion, one hour; outside study, 10 hours. Overview of world’s musical traditions by selecting one or two case studies from each of nine musical world regions: Pacific, East Asia, Southeast Asia, South Asia, Middle East, Africa, Europe, Latin America, and U.S. and Canada. P/NP or letter grading.

M6A-M6B-M6C. Introduction to Musicology. (2–2–2) (Same as Music M6A-M6B-M6C and Musicology M6A-M6B-M6C.) Laboratory, four hours. Preparation: placement examination. Course M6A is enforced requisite to M6B, which is enforced requisite to M6C. Students must receive grade of C– or better to proceed to next course in sequence. Introduction to musicology through in-depth exploration of basic common musical elements and training in aural recognition, sight singing, dictation, and keyboard skills. Focus on topics such as tonal and modal harmony, rhythm, improvisation, composition, notation, and ear training to prepare students for later theory courses, participation in music ensembles, advanced study in music, and professional careers. Letter grading.

7. Introduction to Music and Culture of Iran. (4) Lecture, four hours. Examination of Persian music in historical, social, linguistic, and cultural contexts. Discuss-
22. Global Popular Musics II: From Cassettes to Digital and Online Media. (4, Lecture, four hours. Exploration of multipolar world of global pop beyond Western music traditions established in the early to mid-20th century. Examination of dramatic decentralization of media that took place with advent of cassette technology and explosion of new forms of popular music that are listened to on recordings as much as they are heard on the radio. Focus on the idea of how major pop genres are appropriated and localized in contexts both intended and unintended by their producers. Intensities of speed and scale, further and further distance from urban, industrial, and political centers of power. Exploration of how this loosening of central control makes quagmires of exploitation, piracy, and creativity in world of popular and recorded music. Development of Internet and social media. P/NP or letter grading.

M25. Global Pop. (5) (Same as Global Jazz Studies M25.) Lecture, four hours; discussion, one hour. Development of world music or world beat, including its meaning and importance to contemporary culture as well as its history and impact. P/NP or letter grading.

M35. Blues, Society, and American Culture. (5) (Same as African American Studies M35.) Lecture, four hours; discussion, one hour. Sociocultural history and survey of blues music tradition from its roots in West Africa to its emergence in African American oral culture, with emphasis on philosophical underpinnings and social and cultural influences of blues and its influence on development of country, jazz, gospel, rhythm and blues, rock, hip-hop music, and other mediums. P/NP or letter grading.

40. Music and Religion. (5) Lecture, four hours; discussion, one hour. Survey of music in religious rituals around world, covering music and ritual of Hinduism, Buddhism, Judaism, Christianity, and Islam, as well as religious traditions of Native Americans and syncretic religions in Americas such as African American gospel music, Brazilian Candomble, Cuban Santeria, and Haitian vodou. Letter grading.

45. Music of Bollywood and Beyond. (5) Lecture, four hours; discussion, one hour; outside study, 10 hours. History and development of South Asian film scores in their filmic context, especially omnipresent songs in those movies that distinctly characterize this genre. P/NP or letter grading.

46. India through Music. (5) Lecture, five hours; discussion, one hour; outside study, nine hours. Exploration of major aspects of society, history, and culture in India, as reflected in its rich musical culture. Introduction to as much diversity as possible, spanning villages to cities and global contexts; high- and low-brow musics; those spanning problematic categories of folk, classical, and popular; and those from powerful as well as oppressed and marginalized peoples. Music as lens to look more deeply into social and cultural world and to explore layers of history ranging form Persianate empires, British Empire, nationhood, and contemporary globalization. Highlights lines of power in particular, notably, those of caste, class, gender, colonialism, and nationalism. Minoritized and disenfranchised people and their music are as prominent as dominant styles and provide contextualization and critique. Letter grading.

M50A-B-C. World Music Performance Organizations. (2 each) Activity, three hours; outside practice, three hours. Performance of specializations in traditional vocal music, instrumental music, and dance. May be repeated for credit without limitation. P/NP or letter grading.

68A. Musical Ensembles and Orchestras. (4) Lecture, four hours. Conducting and instrumental music, with emphasis on the philosophical underpinnings and social and cultural contexts. May be repeated for credit without limitation. P/NP or letter grading.

68B. World Music Performance Organizations. (2 each) Activity, three hours; outside practice, three hours. Performance of specializations in traditional vocal music, instrumental music, and dance. May be repeated for credit without limitation. P/NP or letter grading.

80. Hebrew World Music: Theories and Practices. (5) Lecture, four hours. Conducting and instrumental music, with emphasis on the philosophical underpinnings and social and cultural contexts. May be repeated for credit without limitation. P/NP or letter grading.

91A-91Z. World Music Performance Organizations. (2 each) Activity, three hours. Group performance of traditional vocal and instrumental music of world cultures. May be repeated for credit without limitation. P/NP or letter grading. 91A. World Music Performance Organizations: American Indians. 91B. Music of Bali. 91E. Music and Dance of Ghana. 91G. Music of Japan. 91H. Music of...
Upper-Division Courses

C100. Audiospatial Archiving in 21st Century. (4) Seminar, three hours. Designed for Ethnomusicology majors. Examination of history, present state, and future of audiospatial archives, with specific focus on ethics, copyright, contracts, fieldwork, preservation, and access issues related to technology, space, budgets, and staffing. Concurrently scheduled with course C200. P/NP or letter grading.

101. Introduction to Ethnomusicology. (4) Lecture, four hours. Introduction to history of field of ethnomusicology, basic fieldwork and analysis methods, and current issues in research. Introduction also of career opportunities for ethnomusicology graduates. Letter grading.

M103. Creating Musical Community. (4) (Same as Global Jazz Studies M103, Music M103, and Musicology M103.) Seminar, four hours; discussion, one hour. Limited to school of music majors. Faculty and students make music together in different modes. Students learn to define it, and bring it to concert performance. Students critically engage musical literacies and notion of social contract that forms basis of musical notation. Drawing from American music folk game traditions, highlights complex history of this country and way in which entire body is used as resource when instruments are unavailable. Letter grading.

105. Music Business. (4) Lecture, four hours; outside study, eight hours. Designed for junior/senior Ethnomusicology majors and public ethnomusicology students. How music industry functions and how products are created, marketed, and consumed. Basic information on production of recording and legal issues faced by musicians, students, and scholars who use music in their work. P/NP or letter grading.

106A. Traditional North American Indian Music. (4) Lecture, three hours; discussion, one hour. Native American traditional music: its role in tribal societies, California, Southwest, Pacific Northwest, Northern and Southern Plains, Great Lakes/Eastern Woodlands, and Southeastern culture areas included. P/NP or letter grading.

106B. Contemporary North American Indian Music. (4) Lecture, three hours; discussion, one hour. Contemporary Native North American musical expression, including popular styles (folk, country, rock, western) and various forms of traditional contemporary choral music. Tracing development of this music from 1600s to present, African American choral music is medium performed a cappella or supplemented by keyboard accompaniment. May be repeated for credit without limitation. P/NP or letter grading.

92. Private Instruction in Music. (2) Studio, one hour. Limited to Ethnomusicology majors. Private or semiprivate music instruction with distinguished community-based musician, that must be arranged by students and approved by course instructor. May be repeated for credit without limitation. Letter grading.

99. Student Research Program. (1 to 2) Seminar, up to three hours per week, including laboratory work. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in major of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated, P/NP grading.

CM120. Bibliography and Research Methods in Rap Music/Hip-Hop Studies. (4) (Formerly numbered C120.) (Same as African American Studies CM110.) Seminar, three hours. Requisite: course M118. Designed for juniors/senior students interested in working on hip-hop in preparation for capstone projects such as honors or senior thesis. In-depth examination of intellectual history of rap music/hip-hop studies scholarship. Experiential learning of research methods in history of rap music scholarship and allied traditions (including breakdance and graffiti). Exploration of broad range of research methods in multi-disciplinary centers specific to hip-hop studies. Concurrently scheduled with course CM220. Letter grading.

121. Tibetan Pop Music: Tibet, Exile, China, and World. (4) Lecture, four hours. Pop music is key part of contemporary Tibet, emerging in 1980s in Tibet and exile, and even earlier if mass-diffused socialist songs of Tibet as compulsory, state-produced popular music is considered. Exploration of multifaceted world of Tibetan pop music in and of Tibet and Tibet within China. Of Mao Zedong and socialism, and that of market socialists from Deng Xiaoping to Xi Jinping. Exploration of ways in which Tibetan pop music is voice for Tibetans in Tibet, numerically small minority in China, and in small exile population. Focus on Tibetan pop music exposes students to plethora of issues relevant to music of small, minority, and stateless people, and of myriad political dimensions of the modern world: crude, subtle, social, and economic. Concurrently scheduled with course C221. P/NP or letter grading.

122. Global Dynamics of K-POP. (4) Lecture, four hours. Focused study on K-pop—South Korea’s most significant cultural export—devoted to understanding how global influences that have shaped Korean popular music in earlier decades and in turn, unprecedented global reach of K-pop in recent history. Study is divided into three units: connections between transnational flows in K-pop, and critical takes on K-pop. Each unit features distinctive case studies, and lectures draw out some of broader linkages between what are loosely termed as post-war and Cold War geopolitical formations and legacies, modern South Korean state and economy, and spread of Korean popular culture. Study draws on wide array of scholarly articles, journalistic pieces, music videos, webinars, and online resources while foregrounding larger issues that emerge through cultural analysis. P/NP or letter grading.

128. Exploration in Rhythms. (2) (Same as Global Jazz Studies M128.) Lecture, two hours; outside study, four hours. Preparation: ability to read melodic or rhythmic notation. Investigation and exploration of musical form and rhythm from 20th- and 21st-century classical, jazz, world, and popular music. Concepts explored include meter, pulse, rhythmic cycles, hemiolas, and polyrhythms. P/NP or Letter grading.

130. Culture of Jazz Aesthetics. (4) (Same as Anthropology M130 and Global Jazz Studies M130.) Lecture, three hours. Recommended requisite: course 20A or 20B or 20C or Anthropology 3 or 4. Aesthetics of jazz from point of view of musicians who shaped jazz as art form in 20th century. Listening to and interacting with professional jazz musicians who answer questions and give musical demonstrations. Analytical resources and historical knowledge of musicians and ethnomusicologists combine to interpret jazz as cultural tradition. P/NP or letter grading.

M131. Development of Latin Jazz. (4) (Same as Global Jazz Studies M131 and Music M131.) Lecture, four hours; discussion, one hour. Survey of historical and stylistic development of Latin jazz as art form referred to today as Latin jazz. P/NP or letter grading.

133. European Musics: Politics, Identities, Nationalisms. (5) Lecture, four hours; outside study, 12 hours. Lectures: Ethnomusicology on Music History, and European Studies majors. European folk, popular, and classical music as practice that shapes ideas about national, ethnic, class, and national identity and of political domination and resistance. Letter grading.

M134. Introduction to Armenian Music. (4) (Same as Armenian M134 and Music M134.) Lecture, three hours. Some amount of formal music study and experience as vocalist or instrumentalist desirable but not
essential. Introduction to history, tradition, and scope of music of Armenia. Focus on number of different genres and approaches, and interactions between music and culture, society, and history. P/NP or letter grading.

135. Indo-Persian Musical Cultures: Mapping Musical Connections. (4) Lecture, four hours. Study of connections between musical cultures of Indian subcontinent, Iran, and Central Asia. Exploration of different musical ideas, forms, theories, instruments, styles, lyrics, etc. that make visible cultural continuities across broad Indo-Persianate world. Connected histories developed in both regions and their peoples, and the role of music in defining identity and belonging. Readings include articles and book chapters on musical cultures of Central and South Asia. By exploring diversity of commonalities in Indo-Persian musical cultures, understanding of often hidden similarities across different ethnic, cultural, geographical, and political boundaries is enhanced. Study elucidates values, ideas, and goals that relate individuals and groups across different places and cultures. Letter grading.

136A. Music of Africa. (5) Lecture, four hours; discussion, one hour; outside study, 10 hours. Introduction to music of Africa through general discussion of select topics and related musical genres found throughout the continent, and its people. Focus on music of non-Western musicians, instruments, musical structure and related arts, and contemporary music. P/NP or letter grading.

136B. Music of Africa. (4) Lecture, four hours; outside study, eight hours. Introduction to music of various African cultures and regions. Through readings, lectures, lectures, viewing of films, and analysis of music, students gain greater understanding of diverse musical traditions found on African continent and become more cognizant of contributions that people of Africa have made to world music. Concurrently scheduled with course C236B. Letter grading.

141. Music of Turkey and Iran. (4) Seminar, three hours. Limited to junior/senior Ethnomusicology majors. Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their regional background, sources of musical theory and practice, music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in Near East performance ensemble (course 91N or 161N) required. Concurrently scheduled with course C241. Letter grading.

142. Music and Culture in Afghanistan and Central Asia. (4) Lecture, four hours. Survey of music of Afghanistan, Turkmenistan, Tajikistan, Uzbekistan, and Xinjiang, including traditional and popular styles. Examination of modal systems and specific music genres of these regions, and exploration of cultural context and communicative functions, forms, styles, instruments, and musical philosophies. Consideration of interrelationships between musical genres and other art forms (dance, theater, visual arts, and literature) and how they shape construction and interpretation of types of music in specific social, religious, political, social, and cultural contexts. Includes detailed introduction to musical terms and concepts throughout.

143. Musical Traditions around Iran: Baluchistan, Kurdistan, Azerbaijan, and Iraq. (4) Lecture, four hours. Introduction to selected types of music found in Iran with particular attention to Baluchistan, Kurdistan, Azerbaijan, and Iraq. Study of structures and genres of music in urban and rural communities. Examination of how music-making relates to aspects of current Middle Eastern life such as religious observance, gender relations, ethnic and national identity, and process of globalization. Letter grading.

144. Special Topics in Iranian Music. (4) Seminar, three hours. Requires: courses 5 or M25, and 8. Exploration of topics on musical cultures and styles in Iran focusing on specific sociopolitical contexts, sexuality and gender studies, politics and resistance, religion, and modern technologies. Examination of musical discourses and practices in Iran and in its multiple diasporas (particularly Los Angeles). Topics announced in advance. May be repeated for credit. P/NP or letter grading.

145. Analyzing Rhythm in Persian Music. (4) Seminar, three hours. Requires: courses 5 or M25, and 8. Examination of rhythm principles of Iranian music. Through theoretical and applied methods, exploration of experience of musical rhythm in Iran. Students learn various rhythmic functionalities in order to gain deeper understanding and appreciation for Iran’s traditional, folkloric, religious, and mystical musical styles. Examination of core rhythmic elements in Iranian music both through ethnomusicological literature on and by practicing Persian percussion in class. P/NP or letter grading.

146. Folk Music of South Asia. (4) Lecture, three hours, laboratory, one hour. Illustrated survey of some regional genres, styles, and musical instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence. P/NP or letter grading.

147. Survey of Classical Music in India. (4) Lecture, four hours. Examination of melodic, metric, and formal structures of Indian classical music in context of religious, social, economic, and geographical background of country. P/NP or letter grading.

148. Global and Local South Asian Popular Music. (4) Lecture, four hours, India, South Asia, and South Asian diasporas are home to vast array of popular musics. Bollywood (or Hindi film music) dates from 1940s to present day and has spread to countries as diverse as Ghana, Greece, Israel, and western world from 1950s. Older history of popular music in India delves into composition and performance in magistyre and traveling theatre, and global circulation of gramophone discs. With advent of cassettes, then CDs, VCDs, MP3s, and now online platforms, popular musics have proliferated. These include rustic vernacular styles like Bhojpuri pop; music of downtown groups such as Chamar pop or Gaana; Sufi popular music highlighting religious harmony; pop-style Hindi devotion to songs spiritual Hindustani pop. Popular musics have also emerged from South Asian diasporas, such as Chutney and Soca from Trinidad, or Bhangra from United Kingdom Punjab. P/NP or letter grading.

150. Music and Politics in East Asia. (4) Lecture, four hours. Limited to Ethnomusicology, Music, Music History, World Arts and Cultures, Chinese, Japanese, Korean, and East Asian Studies majors. Political imperatives have long had direct and often explicit impact on music sound and context in East Asia. Examination of interaction of ideology and musical practice in medieval Korea and in contemporary Korea, Japan, Taiwan, and China. Concurrently scheduled with course C250. Letter grading.

155. Intangible Cultural Heritage Worldwide. (4) Lecture, three hours. Designed for Ethnomusicology, Music History, and World Arts and Cultures majors. Through critical reading of publications by scholars, officials, and culture-bearers involved in intangible cultural heritage policy and practice, examination of history of heritage concepts of intangible and intangible heritage; pioneering roles of Japan, South Korea, and UNESCO in making intangible cultural heritage focal point of much cultural policy worldwide; tension between national ideal and internationalization, nationalism, ethnicity, and individuality in creating intangible cultural heritage policies in different settings; U.S. equivalents to intangible cultural heritages, such as other rural agricultural practices, roles of private individuals, community initiative, and professional organizations in cultural preservation schemes; and related concept of sustainability. Concurrently scheduled with course C255. Letter grading.

C156A-C156B. Music in China. (4–4) Letter grading. C156A. Lecture, four hours. Requires: course 20C. Limited to Ethnomusicology majors. Survey of traditional, popular, and Western-influenced musics currently widespread in China, including musical analysis of different genres; examination of contexts in which they exist. Investigation of profound effect of Confucian and Communist ideologies on music. Concurrently scheduled with course C256A. Lecture, three hours; laboratory, two hours. Requires: course C156A. Introduction to various notational systems. Analysis of representative works.

159. Music on China’s Periphery. (4) Lecture, four hours; outside study, eight hours. Designed for under-graduate Ethnomusicology, Music, Music History, and World Arts and Cultures majors. Study of musics from China’s border regions and neighboring countries: technical musical characteristics and important contemporary issues, interaction with modern and traditional styles from Mongolia, Uighurs of Xinjiang, Tibet, Tibet-Burman peoples, Hmong, and indigenous peoples of Taiwan. Concurrently scheduled with course C259. P/NP or letter grading.

161F. Advanced World Music Performance Organizations: African American Music Ensemble. (2) Activity, three hours; outside practice, three hours. Performance of diverse range of vocal repertoire including spirituals, gospel, freedom/Civil Rights songs, and other works by African-American composers, including anthems, hymn arrangements, and various forms of contemporary choral music. Tracing development of this music from 1600s to present, African American choral music is medium performed a cappella or with instrumental accompaniment. May be repeated for credit without limitation. Letter grading.

162. Advanced Private Instruction in Music. (2) Studio, one hour; outside practice, five hours. Preparation: two years of courses 91A through 91Z or 92. Limited to Ethnomusicology majors. Advanced private or semiprivate music instruction with distinguished composers and teachers changed by semester. Enrollment of students and approved by course instructor. May be repeated for credit without limitation. Letter grading.

163. Theory, Practice, and Improvement in Iranian Music. (4) Seminar, three hours. Requires: courses 5 or 8 or 10B. Designed for students from a wide background of experience, outlooks, and training to many facets of art and craft of improvisation in Iranian music. Examination of how organization of rhythm (collection of melodic figures regarding through oral tradition that provides basis of improvisation), master and disciple teaching and tutoring, shape improvisational and performance practices in Iranian traditional music. Comparison to number of related musical cultures: Arabic maqam, Turkish makam, and number of ragas from North Indian tradition. Includes in part workshop format in which stu-
dents are encouraged to bring their own musical instruments, or for vocalist to join in, in exploring radif.

Lecture, four hours; laboratory, three hours; outside study, six hours. Requisites: courses 20A, 20B, 20C. Limited to Ethnomusicology majors. Exploration of music in diverse global contexts. Examination of how social media are social in new ways, and how they offer new potentials (and new limitations and challenges) for music. Examination of rise of Web 2.0, and exploration of how social media affects music in relation to artistic and creative work, affect and experience, livelihoods and remuneration, and music industries. Examination of both utopian and dystopian descriptions in course with music, Internet, and social media; and exploration of potential for marginalized people, as well as for corporate and political control. P/NP or letter grading.

181. Anthropology of Music. (4) Lecture, four hours. Designed for Ethnomusicology, Music History, and Anthropology majors. Cross-cultural examination of music in context of social behavior and how musical patterns reflect patterns exhibited in other cultural systems, including economic, political, religious, and social structure. P/NP or letter grading. CM182. Music Industry. (4) Same as Music CM182, Musicology CM185, and Music Industry M182. Lecture, four hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and beyond. Concurrently scheduled with course CM288. Letter grading.

183. Study of Ethnomusicology. (4) Lecture, three hours; outside study, nine hours. Requisites: courses M6A, M6B, M6C, 20A, 20B, 20C. Designed for Ethnomusicology majors, seniors in elementary and secondary music, and social studies majors. Integration of academic work and hands-on experience. Internship in supervised setting in community agency or private business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit with different subject matter. P/NP or letter grading.

195A. Community or Corporate Internships in Ethnomusicology. (2 to 4) Tutorial, six to 12 hours. Limited to juniors/seniors with minimum cumulative 3.0 grade-point average. Internship in supervised setting in community agency or private business. Students meet on regular basis with instructor and provide weekly reports of their experience. May be repeated for credit with different subject matter. Limited to 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

195B. Community or Corporate Internships in Public Ethnomusicology. (2 to 4) Tutorial, six to 12 hours. Limited to juniors/seniors in psychology emphasis. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide weekly reports of their experience. May be repeated for credit with different subject matter. Individual contract with supervising faculty member required. P/NP or letter grading.

196. World Music Teaching Practicum. (4) Seminar, two hours; fieldwork, three hours; outside study, seven hours. Limited to junior/senior Ethnomusicology majors. Integration of academic work and hands-on training. Participation in theoretical discussions of world music education and application of these theories in elementary and secondary music and social studies classrooms. P/NP or letter grading.

197E. Individual Studies in Ethnomusicology. (2 to 4) Tutorial, one hour; outside study, five to 11 hours. Preparation: 3.0 grade-point average. Limited to seniors. Individual intensive study in ethnomusicology, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter resulting in final research project required. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

197S. Individual Studies in Systematic Musicology. (2 to 4) Tutorial, one hour; outside study, five to 11 hours. Preparation: 3.0 grade-point average. Limited to seniors. Individual intensive study in systematic musicology, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter resulting in final research project required. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.
Graduate Courses

200. Audiovisual Archiving in 21st Century. (4) Seminar, three hours. Designed for Ethnomusicology majors. Examination of history, present state, and future of audiovisual archives, with specific focus on ethics, copyright, contracts, fieldwork, preservation, and access and issues related to technology, space, budgets, and staffing. Concurrently scheduled with course C100. S/U or letter grading.

202. Current Issues in Ethnomusicology. (4) Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Current issues, basic literature, and schools of thought in field of ethnomusicology from late 19th century to present. Concurrent participation in Indian performance group (course C136B). Requisite: course 136A. S/U or letter grading.

205. Seminar: Information Technology and Research Skills. (4) Seminar, three hours. Limited to graduate ethnomusicology students. Lecture, demonstration, and practice. Basic skills for research on and about music that is essential to student careers as ethnomusicologists, specifically information technology skills, acoustics, and representational tools for nonlinguistic acoustic phenomena. Basic understanding of acoustics, ability to represent sounds in various graphic forms appropriate to them, and ability to locate and organize information sources related to field of ethnomusicology. Letter grading.

206. Integrating Theory with Ethnography. (4) Seminar, three hours. Designed to show how theory and primary research cannot exist without each other, and how various authors have integrated theoretical writings with ethnographic or historical data. Reading of several recent ethnographies, mostly about music and possibly historical studies, in tandem with theoretical writings that inform arguments of these books. Letter grading.

215A-215B. Ethnomusico logical Perspectives and Paradigms I, II. (4–4) Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Basic literature and schools of thought in field of ethnomusicology and related social sciences from late 19th century to present. Limited to 20 graduate ethnomusicology students. Concurrent participation in Indian performance group (course C136B). Requisite: course 136A. S/U or letter grading.

216A-216B. Ethnomusico logical Methods I, II. (4–4) Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Letter grading. 216A. Description of various research methods and techniques applicable to the study of music as a social institution. 216B. Methodological instruments for conducting research and writing it up in ethnomusicology. S/U or letter grading.

241. Music of Turkey and Iran. (4) Seminar, three hours. Limited to graduate ethnomusicology students. Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technical practice and improvisation, and fieldwork. Concurrent participation in Near East performance ensembles (course 91N or 161N) required. Concurrently scheduled with course C141. S/U or letter grading.

242. Seminar: Traditional Music of Japan, Korea, China, and World. (4) Lecture, four hours. Pop music is key part of contemporary Tibetan music, in particular a contesting and resolving tensions created between the two. Lecture, five hours. Designed for graduate students. Analytical seminar on role of music in and of Tibet and Tibetan within China of Mao Zedong and socialism, and that of market socialism from Deng Xiaoping to Xi Jinping. Exploration of ways in which Tibetan pop music is voice for Tibetans in Tibet, numerically small minority in China, and in small exilie population. Focus on Tibetan pop music exposes students to plethora of issues relevant to mics of small, minority, and stateless people, and of myriad political dimensions of pop music—turbulent, crude, subtle, social, and economic. Concurrently scheduled with letter grading.

228. Seminar: Balkan Music. (4) Seminar, three hours. Major issues in study of Balkan music, including song text analysis, music instruments, dance music, rhythms and customs, minorities, and ideology. S/U or letter grading.

230. European Musics: Politics, Identities, Nationalisms. (4) Seminar, three hours; outside study, nine hours. Designed for graduate students. European classical, folk, popular, traditional musics, with particular attention to way in which music mirrors, negotiates, and contests ideas about and practices of national and other forms of identity, ideas developed in other domains of discourse and practice such as philosophy, history, language, art, and folklore. Examination of ways music, ordinary people, and politicians have used music to affect political processes involved in contesting and resolving cultural hegemonies and identities between and among these identity formations. Historical period coverage primarily from 19th and 20th centuries, with examples from all over European continent. Letter grading.

233A-233B-233C. European Traditional and Popular Music. (0–0–4) Discussion, one hour. Review of literature on European traditional and popular music, with special attention to modern issues and processes. May be repeated for credit. In Progress (233A, 233B) and letter (233C) grading.

236B. Music of Africa. (4) Lecture, four hours; outside study, eight hours. Introduction to music of various African cultures and regions. Through readings, lectures, viewing of music, students gain greater understanding of diverse musical traditions found on African continent and become more cognizant of contributions that people of Africa have made to world music. Concurrently scheduled with course C136B. Letter grading.

241. Music of Turkey and Iran. (4) Seminar, three hours. Limited to graduate ethnomusicology students. Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technical practice and improvisation, and fieldwork. Concurrent participation in Near East performance ensembles (course 91N or 161N) required. Concurrently scheduled with course C141. S/U or letter grading.

242. Seminar: Traditional Music of Japan, Korea, China, and World. (4) Lecture, four hours. Designed for students. Political imperatives have long had direct and often explicit impact on music sound and context in East Asia. Examination of interaction of ideology and musical practice in medieval Korea and in contemporary Korea, Japan, Taiwan, and China. Concurrently scheduled with course C150. Letter grading.

251. Music of Indonesia. (4) Lecture, three hours; outside study, nine hours. Requisite: course 20C. Emphasis on music of Javanese, Balinese, and Balinese music of Java, Bali, and other Indonesian islands. Concurrent participation in one Indonesian performance group (course 91B or 91H) required. S/U or letter grading.

255. Intangible Cultural Heritage Worldwide. (4) Lecture, three hours. Designed for ethnomusicology, music history, and world arts and cultures graduate students. Through critical reading of publications by scholars, official and cultural heritages are defined in terms of cultural heritage; examination of history of heritage conservation; concepts of tangible and intangible heritage; pioneering roles of Japan, South Korea, and UNESCO in creating intangible cultural heritage focal point of many cultural policies; concepts of intercultural heritage and practices in other countries; roles of private individuals, community initiatives, and international organizations in cultural preservation; and related issues impacting cultural heritage. Concurrently scheduled with course C155. Letter grading.

256A. Music in China. (4) Lecture, four hours. Requisite: course 20C. Limited to Ethnomusicology majors. Survey of traditional, popular, and Western-influenced musics currently widespread in China, including musical analysis of different genres; examination of
contexts in which they exist. Investigation of profound effect of Confucian and Communist ideologies on music. Concurrently scheduled with course C156A. Letter grading.

CM259. Music on China’s Periphery. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Examination of historical and geographical backgrounds, social and cultural contexts in which music exists. Concurrently scheduled with course C159. S/U or letter grading.

M261. Gender and Music in Cross-Cultural Perspective. (4) Same as Gender Studies M261.) Seminar, three hours; outside study, nine hours. Examination of gender as it relates to musical traditions and performances, and a range of social and cultural contexts. Topics include gender in relation to music, musicology. (4 each) Seminar, four hours. Designed for Musicology graduate students. Examination of possibilities for subject-centered musical ethnography to account for gender, sexuality, and subjectivity. Power and media images. Letter grading.

M262. Musical Ethnography. (4) Seminar, three hours; outside study, nine hours. Examination of selected book-length ethnographies, most published in last 10 years, as they reflect genre and research procedure. S/U or letter grading.

M263. Perspectives in Popular Music Research. (4) Seminar, three hours. Investigation of theoretical paradigms, issues, and models of popular music, with emphasis on world music genres, local/global markets, mass mediation, appropriation and aesthetics of style, ethnographic methods, and impact of popular music studies on ethnomusicology. Letter grading.

M264. Urbanism and Music. (4) Seminar, three hours; outside study, nine hours. Theoretical and methodological issues in study of urban music in America and Europe. S/U or letter grading.

M265. Religion and Music. (4) Seminar, three hours; outside study, nine hours. Cross-cultural examination of role of musical expression as spiritual medium and as artistic expression in world religions. S/U or letter grading.

M266. Charles Seeger’s Life and Thought. (4) Seminar, three hours; outside study, nine hours. Charles Seeger’s (1886 to 1979) major writings and influence as his interest in applied musicology and American systematic musicology, his leadership in three fields he helped to found (ethnomusicology, historical musicology), as well as his interest in applied musicology and American composition processes. Letter grading.

M266A. Music and Ecstasy. (4) Seminar, three hours; outside study, nine hours. Relationship between music and consciousness in different world cultures and role music plays in ecstatic experiences. Phenomena include trance, spirit possession, shamanism, religious ecstasy, mysticism, and artistic inspiration. S/U or letter grading.

M268. Modernity and Musical Experience. (4) Seminar, three hours; outside study, 10 hours. Limited to graduate students. Examination of possibilities for subject-centered musical ethnography to account for fragmented musical experience in modern world. Consideration of local and world musics in relation to modernity (de)postmodern, global/local, notions of self and subject, power, and media images. Letter grading.

M270. Selected Topics in Composition. (4) Lecture, four hours; outside study, eight hours. Limited to graduate students. Examination of important musical concepts and approaches to enable students to develop greater compositional technique and understanding. Wayers composers of jazz, European classical, and other musics, with emphasis on successful approaches and use of extended compositional forms. Examination of way in which world music traditions have interfauced with jazz and other types of music to create new musical languages. Use of concepts, structural paradigms, and inspiration from literature, visual arts, and other sources to develop student compositions. May be repeated once for credit. Concurrently scheduled with course C156I. Letter grading.

271. Seminar: Acoustics of Music. (6) Seminar, three hours. Requisite: course 170. Selected topics in acoustics, including laboratory methodologies and practical applications. Topics include Western and non-Western musical instruments, tuning systems, psycho-acoustics, and methods of spectral analysis. May be repeated once for credit. S/U or letter grading.

273. Seminar: Psychology of Music. (6) Seminar, three hours. Theories in psychology of music, including recent findings in brain research, musical perception, learning, cognition, memory, therapy, affect, meaning, and measurement. May be repeated once for credit. S/U or letter grading.

275. Seminar: Aesthetics of Music. (6) Seminar, three hours. Specific topics in Western and non-Western aesthetic thought, including value, meaning (semiotics), historical development of theoretical perspectives on music, and design and appreciation. May be repeated once for credit. S/U or letter grading.

279. Seminar: Systematic Musicology. (4) Seminar, three hours. Requisite: course 170. Exploration of specific topics in general field of systematic musicology covering disciplines such as anthropology, acoustics, aesthetics, music perception, philosophy, organology, sociology, and experimental approaches. May be repeated for credit. S/U or letter grading.

280. Teacher Music Appreciation. (4) Seminar, three hours. Preparation: two ethnomusicology courses or concurrent enrollment in course 20A, 20B, or 20C. Designed for ethnomusicology and musicology students. Introduction to topics of current pedagogical philosophies and texts used in teaching introductory music survey courses, specifically music appreciation and general world music. Letter grading.

285. Seminar: Comparative Music Theory. (6) Seminar, three hours. Comparative study of codified music theories of select cultures—Western and non-Western—considered in themselves and as expressions of their societies. Theory considered as science of music; its place between cultural values and artistic expression; critical theories. S/U or letter grading.

C286. Public Ethnomusicology. (4) Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology majors. How music industry functions and how music products are created, marketed, and consumed. Techniques of media, public relations, marketing, and audience development. S/U or letter grading.

287. Seminar: Folk Music. (4) Seminar, three hours; S/U or letter grading.

CM288. Music Industry. (4) Same as Music CM282 and Musicology CM288.) Lecture, four hours; discussion, one hour; outside study, eight hours. Limited to Ethnomusicology and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM182. Letter grading.

289. Research Design and Grant Writing in Ethnomusicology. (4) Seminar, three hours; outside study, nine hours. Design of dissertation research proposal, locating and applying for dissertation fieldwork grants, organizing and presenting advanced academic proposals with sophisticated methods and professional writing skills. S/U or letter grading.

291. Ethnomusicology Colloquium Series. (1) Research group meeting, one hour. Limited to graduate ethnomusicology students. Introduction to new trends and issues in discipline of ethnomusicology in effort to strengthen and stimulate intellectual community within department. Topics vary from term to term and consist of presentations by guest lecturers, faculty members, and students. May be repeated for credit. S/U grading.

292A-292Z. Seminars: Special Topics in Ethnomusicology. (4 each) Seminar, four hours. Designed for graduate students. Utilization of special interests and expertise of regular and visiting faculty; problems of current interest presently offered in ethnomusicology program. S/U or letter grading.

295. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: appointment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

295A. Teaching Apprentice Practicum. (2) Eight weekly two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Ethnomusicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching ethnomusicology and systematic musicology at college level. May not be applied toward degree requirements. S/U grading.

295B. Teaching with Technology. (2) Seminar, three hours; outside study, three hours. Limited to graduate ethnomusicology students. Training in presentation, blackboard, web design, and digitization software, and its application in classroom and in preparation of electronic teaching portfolio. S/U grading.

296. Directed Individual Studies. (2, 4, or 6) Tutorial, to be arranged. Only 4 units may be applied toward MA comprehensive course requirements. S/U or letter grading.

297. Preparation for Master’s Comprehensive Examination or PhD Qualifying Examinations. (2 or 4) Tutorial, to be arranged. May be repeated for credit. S/U grading.

299. Guidance of PhD Dissertation. (4, 8, or 12) Tutorial, to be arranged. May be repeated for credit. S/U grading.
Overview

The Department of European Languages and Transcultural Studies (ELTS) provides advanced training in the cultural and linguistic traditions of Europe, emphasizing the transcultural relations between countries, while also framing these relations in a much broader global historical context that transcends Europe as a geographic space. This approach to culture and society promises to improve the understanding of history and the challenges of 21st-century globalized existence. Concentrating on the shared European roots is key, as is the goal of complicating the very idea of Europe by under-scoring the transcultural and global qualities of this space, especially in terms of colonial and imperial legacies. Today, Europe is a geopolitical space in which thinking about diversity, human rights, and religious tolerance remains important. The ELTS major and minors include language training, the study of culture, literature, film and media, and a focus on the new applied humanities (digital, environmental, medical, urban) in order to consider how these have altered our relationship to cultural analysis and production. The department also encourages study abroad, internship opportunities, and organize professionalization seminars.

Undergraduate Study

The department provides advanced training in the cultural and linguistic traditions of Europe, emphasizing the transcultural relations between these countries, while also framing these in a much broader global historical context that transcends Europe as a geographic space.

The department trains students to think critically, to develop writing and research skills, and to understand the power of language to pursue advanced research in a challenging intellectual and globalized world. Students are prepared for graduate school and careers in education, international law and business, the arts, media and journalism, international health organizations, advertising, management consultancy, diplomacy, and publishing.

The various Bachelor of Arts (BA) degrees offered in ELTS share common foundational courses across language traditions and offer students the opportunity to specialize in individual language tracks. The BA in ELTS includes language training, but allows students design an individualized curriculum structured around ELTS offerings; whereas the BA in ELTS with individual language tracks provides students with a background in Europe and also in the various fields of French, Germanic, and Italian. In French, Germanic (Dutch, German, Yiddish), and Italian, this includes the study of culture, literature, and society, enhancing the understanding of the many facets of European civilization. In Scandinavian and Nordic Studies (Denmark, Finland, Norway, and Sweden), students explore how this region forms a geographic bridge between the American and European continents and a political bridge between Western and Eastern Europe. Together, the degrees offer undergraduate students a broad, interdisciplinary understanding of Europe, with a robust knowledge of the cultures and histories of this region from a global, transdisciplinary, and transcultural perspective. Students considering a major or minor in the department should consult with the departmental undergraduate adviser as soon as possible in their university career in order to select courses to fulfill major or minor requirements. The approved list of courses for each category of major or minor requirements is available in the department office, 212 Royce Hall, and on the department website.

Undergraduate Policies

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Danish, Dutch, Fin-nish, French, German, Italian, Norwegian, Swedish, and Yiddish grammar and/or composition.

Graduate Study

The graduate programs offer the Master of Arts (MA) degree and the Doctor of Philosophy (PhD) degree in French and Francophone Studies, Germanic Languages, and Italian; and an MA only in Scandinavian. Admission to graduate programs is prioritized for PhD degree applicants. They comprise advanced training in the various fields, as well as in literary criticism, cultural analysis, film studies, the applied humanities, and theory.

Undergraduate Majors

European Languages and Transcultural Studies BA

Learning Outcomes

The European Languages and Transcultural Studies major has the following learning outcomes:

- Demonstrated advanced proficiency in one or more language offered in the department
- Demonstrated proficiency in one of the areas of the experimental humanities (digital, environmental, medical, and urban)
- Demonstrated deep understanding of European culture and history, including in a global context
- Ability to interrogate, analyze, and discuss literary and filmic production
- Evidence of strong oral and writing skills
Entry to the Major

Transfer Students
Transfer applicants to the European Language and Transcultural Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: completion of intermediate level of Danish, Dutch, Finnish, French, German, Italian, Norwegian, Swedish, or Yiddish, and any one course on European literature, culture, film, or media.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: one course from French 6, German 6, Italian 6, Scandinavian 8, or equivalent; one European Literature, Language, Culture, or Film and Media course selected from French 12, 14, 14W, 16, 41, 60, German 50B, 56, 59, Italian 42A, 42B, 42C, 46, 50A, 50B, Scandinavian 40, 40W, 50, 50W, or 60W; one Experimental Humanities (Digital, Environmental, Medical, and Urban) course selected from Digital: Comparative Literature 1E, Digital Humanities 30, Environmental, Medical, and Urban: Ancient Near East 14W, Ecology and Evolutionary Biology 17, History 3D, Honors Collegium 1, 26, Molecul

The Major

Required: One course selected from three of the following four areas:

European Film and Media: French 141, 142, German 103, 104, 157, Italian 121, or Scandinavian 161 through 167.

Experimental Humanities: Community Engagement and Social Change 100XP, 172XP, Comparative Literature 180, 180SL, Classics 148, Digital Humanities 101 through 151, English 118E, M118F, European Languages and Transcultural Studies C101XP, Food Studies M176XP, Italian 124, or Public Affairs M176XP.

Required Elective Courses: Three courses selected from French 100 through 169, and any two courses selected from European Languages and Transcultural Studies 100 through 175, Italian 100 through 158, or Scandinavian C131 through C185.

During their senior year, students must also take European Language and Transcultural Studies 187 in which they complete a capstone senior thesis.

Policies

Preparation for the Major

Required: French 6, or equivalent; one European Literature, Language, Culture, or Film and Media course selected from French 12, 14, 14W, 16, 41, 60, German 50B, 56, 59, Italian 42A, 42B, 42C, 46, 50A, 50B, Scandinavian 40, 40W, 50, 50W, or 60W; one Experimental Humanities (Digital, Environmental, Medical, and Urban) course selected from Digital: Comparative Literature 1E, Digital Humanities 30, Environmental, Medical, and Urban: Ancient Near East 14W, Ecology and Evolutionary Biology 17, History 3D, Honors Collegium 1, 26, Molecular Cell and Developmental Biology 60, Study of Religion 55, Urban: German 61A.

The Major

Required: advanced language course, three area courses, five elective courses, and a capstone senior thesis.

Advanced Language requirement: French 100 or 101.

One course selected from three of the following four areas (total of three courses):

European Film and Media: French 141, 142, German 103, 104, 157, Italian 121, or Scandinavian 161 through 167.

Experimental Humanities: Community Engagement and Social Change 100XP, 172XP, Comparative Literature 180, 180SL, Classics 148, Digital Humanities 101 through 151, English 118E, M118F, European Languages and Transcultural Studies C101XP, Food Studies M176XP, Italian 124, or Public Affairs M176XP.

Required Elective Courses: Three courses selected from French 100 through 169, and any two courses selected from European Languages and Transcultural Studies 100 through 175, Italian 100 through 158, or Scandinavian C131 through C185.

In addition to the advanced language requirement, students are required to complete a minimum of three upper-division courses in the target language from the required and elective sequences.

During their senior year, students must also take European Language and Transcultural Studies 187 in which they complete a capstone senior thesis.

Policies
European Languages and Transcultural Studies with German BA

Learning Outcomes
The European Languages and Transcultural Studies with German major has the following learning outcomes:

- Demonstrated advanced proficiency in German
- Demonstrated proficiency in one of the areas of the experimental humanities (digital, environmental, medical, and urban)
- Demonstrated deep understanding of European culture and history, including in a global context, with a particular expertise in German
- Ability to interrogate, analyze, and discuss literary and filmic production
- Evidence of strong oral and writing skills

Entry to the Major

Transfer Students
Transfer applicants to the European Languages and Transcultural Studies with German major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of German, and any one course in European literature, culture, film, or media. Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: German 6, or equivalent; one European Literature, Language, Culture, or Film and Media course selected from French 12, 14, 14W, 16, 41, 60, German 50B, 56, 59, Italian 42A, 42B, 42C, 46, 50A, 50B, Scandinavian 40, 40W, 50, 50W, or 60W; one Experimental Humanities (Digital, Environmental, Medical, and Urban) course selected from Digital: Comparative Literature 1E, Digital Humanities 30, Environmental: English M30, Medical: Ancient Near East 14W, Ecology and Evolutionary Biology 17, History 3D, Honors Collegium 1, 26, Molecular Cell and Developmental Biology 60, Study of Religion 55, Urban: German 61A.

Students who have completed one year of college-level German language courses should enroll in course 4. Students who are in doubt as to their level of language proficiency or who are native speakers should consult with the language program supervisor.

The Major

Required: advanced language course, three area courses, five elective courses, and a capstone senior thesis.

Advanced language requirement: German 152 or 153

One course selected from three of the following four areas (total of three courses):

European Film and Media: French 141, 142, German 103, 104, 157, Italian 121, or Scandinavian 161 through 167.

Experimental Humanities: Community Engagement and Social Change 100XP, 172XP, Comparative Literature 180, 180SL, Classics 148, Digital Humanities 101 through 151, English 118E, M118F, European Languages and Transcultural Studies C101XP, Food Studies M176XP, Italian 124, or Public Affairs M176XP.

Required Elective Courses: Three courses selected from German 104 through 175, and any two courses selected from European Languages and Transcultural Studies 100 through 180, 191, French 100 through 169, German 104 through 175, Italian 100 through 158, or Scandinavian C131 through C185.

In addition to the advanced language requirement, students are required to complete a minimum of three upper-division courses in the target language from the required and elective sequences.

During their senior year, students must also take European Language and Transcultural Studies 187 in which they complete a capstone senior thesis.

Policies

The Major
Student may apply no more than two courses or 8 units from other departments. Approval for outside courses must be petitioned with the undergraduate adviser of the department. Students may apply no more than 4 units of European Languages and Transcultural Studies 195, 197, and 199 as a substitution for one elective course. Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the major.

European Languages and Transcultural Studies with Italian BA

Learning Outcomes
The European Languages and Transcultural Studies with Italian major has the following learning outcomes:

- Demonstrated advanced proficiency in Italian
- Demonstrated proficiency in one of the areas of the experimental humanities (digital, environmental, medical, and urban)
- Demonstrated deep understanding of European culture and history, including in a global context, with a particular expertise in Italian
- Ability to interrogate, analyze, and discuss literary and filmic production
- Evidence of strong oral and writing skills

Entry to the Major

Transfer Students
Transfer applicants to the European Languages and Transcultural Studies with Italian major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Italian, and any one course on European literature, culture, film, or media.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Italian 6, or equivalent; one European Literature, Language, Culture, or Film and Media course selected from French 12, 14, 14W, 16, 41, 60, German 50B, 56, 59, Italian 42A, 42B, 42C, 46, 50A, 50B, Scandinavian 40, 40W, 50, 50W, or 60W; one Experimental Humanities (Digital, Environmental, Medical, and Urban) course selected from Digital: Comparative Literature 1E, Digital Humanities 30, Environmental: English M30, Medical: Ancient Near East 14W, Ecology and Evolutionary Biology 17, History 3D, Honors Collegium 1, 26, Molecular Cell and Developmental Biology 60, Study of Religion 55, Urban: Italian 61A.

The Major

Required: advanced language course, three area courses, five elective courses, and a capstone senior thesis.

Advanced language requirement: Italian 100.

One course selected from three of the following four areas (total of three courses):

- European Film and Media: French 141, 142, German 103, 104, 157, Italian 121, or Scandinavian 161 through 167.

- Experimental Humanities: Community Engagement and Social Change 100XP, 172XP, Comparative Literature 180, 180SL, Classics 148, Digital Humanities 101 through 151, English 118E, M118F, European Languages and Trans-
cultural Studies C101XP, Food Studies M176XP, Italian 124, or Public Affairs M176XP.

**Required Elective Courses:** Three courses selected from Italian 102A through M158, and any two courses selected from European Languages and Transcultural Studies 100 through 180, 191, French 100 through 169, German 104 through 175, Italian 102A through M158, or Scandinavian C131 through C185.

In addition to the advanced language requirement, students are required to complete a minimum of three upper-division courses in the target language from the required and elective sequences.

During their senior year, students must also take European Language and Transcultural Studies 187 in which they complete a capstone senior thesis.

**Policies**

**The Major**

Student may apply no more than two courses or 8 units from other departments. Approval for elective course. Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the major.

**European Languages and Transcultural Studies with Scandinavian BA**

**Learning Outcomes**

The European Languages and Transcultural Studies with Scandinavian major has the following learning outcomes:

- Demonstrated advanced proficiency in a Scandinavian language
- Demonstrated proficiency on one of the areas of the experimental humanities (digital, environmental, medical, and urban)
- Demonstrated deep understanding of European culture and history, including a particular expertise in the Scandinavian region
- Ability to interrogate, analyze, and discuss literary and filmic production
- Evidence of strong oral and writing skills

**Entry to the Major**

**Transfer Students**

Transfer applicants to the European Languages and Transcultural Studies with Scandinavian major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of either Swedish, Norwegian, or Danish, and any one course on European literature, culture, film, or media.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

**Requirements**

**Preparation for the Major**

Required: Scandinavian 6, or equivalent; one European Literature, Language, Culture, or Film and Media course selected from French 12, 14, 14W, 16, 41, 60, German 50B, 56, 59, Italian 42A, 42B, 42C, 46, 50A, 50B, Scandinavian 40, 40W, 50, 50W, or 60W; one Experimental Humanities (Digital, Environmental, Medical, and Urban) course selected from Digital: Comparative Literature 1E, Digital Humanities 30, Environmental English M30, Medical: Ancient Near East 14W, Ecology and Evolutionary Biology 17, History 3D, Honors Collegium 1, 26, Molecular Cell and Developmental Biology 60, Study of Religion 55, Urban: German 61A.

**The Major**

Required: One course selected from three of the following four areas (total of three courses):

- European Film and Media: French 141, 142, German 103, 104, Italian 121, or Scandinavian 161 through 167.
- Experimental Humanities: Community Engagement and Social Change 100XP, 172XP, Comparative Literature 180, 180SL, Classics 148, Digital Humanities 101 through 151, English 118E, M118F, European Languages and Transcultural Studies C101XP, Food Studies M176XP, Italian 124, or Public Affairs M176XP.

**Required Elective Courses:** Four courses selected from Scandinavian C131 through C185, and any two courses selected from European Languages and Transcultural Studies 100 through 180, 191, French 100 through 169, German 104 through 175, Italian 100 through M158, or Scandinavian C131 through C185.

During their senior year, students must also take European Language and Transcultural Studies 187 in which they complete a capstone senior thesis.

**Policies**

**The Major**

Student may apply no more than two courses or 8 units from other departments. Approval for outside courses must be petitioned with the undergraduate adviser of the department. Students may apply no more than 4 units of European Languages and Transcultural Studies 195, 197, and 199 as a substitution for one elective course. Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the major.

Students who are interested in Danish, Finnish, and Norwegian language instruction may enroll in these courses at other UC campuses through distance learning, and may petition to apply these courses to the major requirements.

**Nordic Studies BA**

**Capstone Major**

The Nordic Studies major is a designated capstone major. Under the guidance of faculty members, students are required to devise, research, and complete either a substantial research paper, film/video, or a website that reflects significant engagement with a challenging question in the realm of Nordic studies. Through their capstone work, all students are expected to demonstrate their skills in articulating a clear and sophisticated research question, devising a realizable set of research goals, deploy their advanced knowledge of a Nordic language to access target language research materials and incorporate them into the research corpus, devise an appropriate modality for the final project, present a concise engaging public presentation of their research and respond to questions, and archive their project in an appropriate form.

**Learning Outcomes**

The Nordic Studies major has the following learning outcomes:

- Demonstrated command of the linguistic and cultural diversity of the Nordic region
- Demonstrated command of the economics, politics, environments, and histories of the Nordic region
- Demonstrated specific skills and expertise, including research, analysis, and writing
- Demonstrated understanding of the role of the Nordic region in global context, and the impact of global phenomena on the region
- Identification, evaluation, and analysis of appropriate primary sources
- Working knowledge of scholarly discourse from broad range of disciplines
- Conception and execution of a project that identifies and engages with a specialized topic
- Engagement with peers through presentation, discussion, and critique of student work

**Requirements**

**The Major**

Required: Nine courses from the following five tracks, with at least one course in four of the tracks: (1) early Nordic literatures and cultures—Scandinavian C131, C133A, C134, C137, 138, (2) theory, genres, and authors—Scandinavian C141A, 141C, 142A, 143C, C145A, C145B, C146A, 147A, C147B, (3) literary periods—Scandinavian C155, 156, 157, (4) Scandinavian cinema—Scandinavian 161, C163A, C166A, C166C, (5) cultural studies—Scandina-
Undergraduate Minors

European Languages and Transcultural Studies Minor

Admission
To enter the minor, students must have an overall grade-point average of 2.0 or better.

The Minor

Required Lower-Division Courses (8 units): One course selected from French 6, German 6, Italian 6, Scandinavian 6, or equivalent; and one European Literature, Language, Culture, or Film and Media course selected from French 12, 14, 14W, 16, 41, 60, German 50B, 56, 59, Italian 42A, 42B, 42C, 46, 50A, 50B, Scandinavian 40, 40W, 50, 50W, or 60W.

Required Upper-Division Courses (20 units): Three upper-division courses in European literature, culture, film, or media selected from three of the following four areas:

**European Literature**
- French 115 through 121, 136, 163, 164, 166
- German 110, 112, 158
- Italian 170, 173, 174
- Italian 103A, 103B, 110, 113, 119, 120, 140, 150

**European Culture**
- European Languages and Transcultural Studies 112, French 121, 130, 137, 138, 139, 160, 167, 169
- German 102, 109, 115, 116, 118SRL, 154, 159, 175

**European Film and Media**
- French 141, 142
- German 103, 104, Italian 121, or Scandinavian 161 through 167.

**Experimental Humanities**
- Community Engagement and Social Change 100XP, 172XP
- Comparative Literature 180, 180SRL, Classics 148, Digital Humanities 101 through 151, English 118E, M118F, European Languages and Transcultural Studies C101XP, Food Studies M176XP, Italian 124, or Public Affairs M176XP.

Upper-Division Electives: Two elective courses (minimum 8 units) selected from European Languages and Transcultural Studies 100 through 180, 191, French 100 through 169, German 104 through 175, Italian 100 through 158, or Scandinavian C131 through C185.

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

European Languages and Transcultural Studies with German Minor

Admission
To enter the minor, students must have an overall grade-point average of 2.0 or better.

The Minor

Required Lower-Division Courses (8 units): German 6 or equivalent; and one European Literature, Language, Culture, or Film and Media course selected from French 12, 14, 14W, 16, 41, 60, German 50B, 56, 59, Italian 42A, 42B, 42C, 46, 50A, 50B, Scandinavian 40, 40W, 50, 50W, or 60W.

Required Upper-Division Courses (20 units): Three upper-division courses in European literature, culture, film, or media selected from three of the following four areas:

**European Literature**
- French 115 through 121, 136, 163, 164, 166
- German 110, 112, 158
- Italian 170, 173, 174
- Italian 103A, 103B, 110, 113, 119, 120, 140, 150

**European Film and Media**
- French 141, 142
- German 103, 104, Italian 121, or Scandinavian 161 through 167.

**Experimental Humanities**
- Community Engagement and Social Change 100XP, 172XP
- Comparative Literature 180, 180SRL, Classics 148, Digital Humanities 101 through 151, English 118E, M118F, European Languages and Transcultural Studies C101XP, Food Studies M176XP, Italian 124, or Public Affairs M176XP.

Upper-Division Electives: Two upper-division elective courses (minimum 8 units) selected from German.

One upper-division required course must be taught in German.

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.
European Languages and Transcultural Studies with Italian Minor

Admission
To enter the minor, students must have an overall grade-point average of 2.0 or better.

The Minor
Required Lower-Division Courses (8 units): Italian 6 or equivalent; and one European Literature, Language, Culture, or Film and Media course selected from French 12, 14, 14W, 16, 41, 60, German 50B, 56, 59, Italian 42A, 42B, 42C, 46, 50A, 50B, Scandinavian 40, 40W, 50, 50W, or 60W.

Required Upper-Division Courses (20 units): Three upper-division courses in European literature, culture, film, or media selected from three of the following four areas:
- European Film and Media: French 141, 142, German 103, 104, Italian 121, or Scandinavian 161 through 167.
- Experimental Humanities: Community Engagement and Social Change 100X, 172X, Comparative Literature 180, 180SL, Classics 148, Digital Humanities 101 through 151, English 118E, M118F, European Languages and Transcultural Studies C101X, Food Studies M176X, Italian 124, or Public Affairs M176X.

Upper-Division Electives: Two upper-division elective courses (minimum 8 units) selected from Italian.

One upper-division required course must be taught in Italian.

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Scandinavian Minor

Admission
To enter the Scandinavian minor, students must have an overall grade-point average of 2.0 or better.

The Minor
Required Courses (28 units): Any seven Scandinavian courses, two of which may be lower-division courses selected from Scandinavian 1 through 50.

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Majors
French and Francophone Studies MA, CPhil, PhD

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Germanic Languages MA, CPhil, PhD

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Scandinavian MA

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Dutch
Lower-Division Courses
19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses
103A-103B. Elementary Dutch. (4–4) Lecture, four hours; language laboratory. Course 103A is requisite to 103B. Introduction to standard language of Netherlands and one of three standard languages of Belgium. Practice in grammar, listening, speaking, reading, and writing. P/NP or letter grading.

104A-104B. Accelerated Dutch. (6–6) Lecture, four hours; discussion, one hour; laboratory, two hours. Covers material in courses 103A, 103B, 103C in two terms rather than three. Letter grading.

113. Modern Dutch and Flemish Literature in Translation. (4) Lecture, three hours. Readings and analysis of works by selected authors of Netherlands and northern (Flemish) Belgium such as Boon, Claus, Cousseus, Hermans, Mulisch, Mutatulli, and Reve and selected poets such as Campert, Gezelle, Gorter, Kloos, Lucebert, Nijhoff, Van Ostaijen, and Vroman. Letter grading.

131. Introduction to Modern Dutch Literature. (4)
Discussion, three hours. Requisite: course 103B or 120. Selected works of literature of Netherlands and northern (Flemish) Belgium from mid-1850s to present, including novels by such writers as Multatuli, Couperus, Hermans, Mulisch, and Reve and poetry by such groups as symbolist Beweging van Tachtig and post-War Beweging van Vijftig. P/N/P or letter grading.
189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/N/P or letter grading.

Upper-Division Courses
C101XP. Between Los Angeles and Europe: New Approaches to Transatlantic European Studies. (4) Lecture, three hours; community-engaged projects, three hours. Examination of migration history between Los Angeles and Europe with view to German-speaking world. Overview of transatlantic cultural, literary, and historical studies back to colonial era. Taught in English. S/U grading.

Graduate Courses
596. Directed Individual Study or Research in Dutch. (4) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culuminating paper or project required. May be repeated for credit. Individual contract required. P/N/P or letter grading.

European Languages and Transcultural Studies
Lower-Division Courses
19. Fiat Lux Freshman Seminars. (1) Tutorial, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many pressing issues for UCLA. P/N/P grading.
20. Copenhagen and Nordic Model of Sustainability. (5) Lecture, three hours. Introductory exploration of field of urban humanities before backdrop of Nordic model of sustainability through case study of city of Copenhagen. Investigation of how city’s human-centered design, planning, and general sustainability are reflected in Scandinavian cultural traditions in architecture, design, film, history, literature, television, urban planning, and design. P/N/P or letter grading.
89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/N/P or letter grading.
89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.
99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students ordinarily under upper-division mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/N/P grading.

European Languages and Transcultural Studies
C101XP. Between Los Angeles and Europe: New Approaches to Transatlantic European Studies. (4) Lecture, three hours; community-engaged projects, three hours. Examination of migration history between Los Angeles and Europe with view to German-speaking world. Overview of transatlantic cultural, literary, and historical studies back to colonial era. Targeted investigation of complex transatlantic relations between Anglophones and German immigrants during 20th century, including World War II. Students apply newly acquired cultural, historical, and political knowledge to current transatlantic conversations. Offers innovative, scholarly, and praxis-oriented approaches to transatlantic European studies through integration of lesson into community-engaged projects. Illumination of limits of monolingual or state-centric configurations of disciplinary knowledge in addition to exemplifying interdisciplinary and transnational studies of Europe, in general, and Germany, in particular. Concurrently scheduled with course C201XP. P/N/P or letter grading.
103. Topics in Medical Humanities. (4) Lecture, three hours. Exploration of selected topics in interdisciplinary field of medical humanities, which seeks to examine how arts, humanities, and social sciences can be brought into dialogue with medical discourse, education, and praxis. Taught in English. May be repeated for credit. P/N/P or letter grading.
112. Medieval Foundations of European Civilization. (4) Formerly numbered French 112.) Lecture, three hours. Introduction to tracing of genealogy of some of most important medieval intellectual traditions, such as empire and state, religion, university, architecture and visual arts, identity, class, race, and sexuality, foundational for European civilization. Exploration of birth of modern nations from their medieval foundation. Examination of cultural production: how and why certain values were created and then passed on. P/N/P or letter grading.
140. European Crime Novel. (4) Lecture, three hours. Focus on Italian crime novel, but in larger context of European crime fiction. Readings include some of most important and interesting contemporary authors of Italian detective fiction, Canto, de Giovanni, Pastor—to see what crime fiction can say about nation in age of globalization, and about Italy in European Union. P/N/P or letter grading.
150. European Folk and Fairy Tales. (4) Lecture, three hours. Study of characteristics, history, and scholarship of folktale/fairytale genre in European contexts. Comparison, analysis, and interpretation of tales. Instruction and texts in English. P/N/P or letter grading.
151. Valkyries and Dragonslayers: Völsung/Nibelung Tradition. (4) Lecture, three hours. Study of medieval Norse and German traditions of Völsung and Nibelungen families (Völsunga saga) and modern versions in various media (e.g., Wagner’s Ring Cycle, Fritz Lang’s Nibelungen films), in their historic and cultural contexts. Instruction and texts in English. P/N/P or letter grading.
167. European Identities in Classic Hollywood and Transatlantic Cycle, Fritz Lang’s Nibelungen films), in their historic and cultural contexts. Instruction and texts in English. P/N/P or letter grading.
214. European Identities in Classic Hollywood and Transatlantic Cycle, Fritz Lang’s Nibelungen films), in their historic and cultural contexts. Instruction and texts in English. P/N/P or letter grading.
203. Topics in Medical Humanities. (4) Seminar, three hours. Exploration of selected topic in interdisciplinary field of medical humanities, which seeks to examine how arts, humanities, and social sciences can be brought into dialogue with medical discourse, education, and praxis. Taught in English. May be repeated for credit. S/U or letter grading.
191. Variable Topics Research Seminar. (4) Seminar, three hours. Research seminar on topics to be announced each term, focusing on such writers, genres, cultural movements, or theoretical practices. Reading, discussion, and development of culminating project. May be repeated for credit. P/N/P or letter grading.

Graduate Courses

200. Graduate Methodology and Professionalization Seminar. (4) Seminar, three hours. Covers wide array of topics related to methodologies, concepts, and theories of transcultural and transnational literary and cultural studies in European context. Taught in English. S/U or letter grading.
C201XP. Between Los Angeles and Europe: New Approaches to Transatlantic European Studies. (4) Lecture, three hours; community-engaged projects, three hours. Examination of migration history between Los Angeles and Europe with view to German-speaking world. Overview of transatlantic cultural, literary, and historical studies back to colonial era. Targeted investigation of complex transatlantic relations between Anglophones and German immigrants during 20th century, including World War II. Students apply newly acquired cultural, historical, and political knowledge to current transatlantic conversations. Offers innovative, scholarly, and praxis-oriented approaches to transatlantic European studies through integration of lesson into community-engaged projects. Illumination of limits of monolingual or state-centric configurations of disciplinary knowledge in addition to exemplifying interdisciplinary, multilingual, and transnational studies of Europe, in general, and Germany, in particular. Concurrently scheduled with course C201XP. P/N/P or letter grading.
202. Studies in History of Ideas. (4) Seminar, three hours. Exploration of key concept or idea in European thought, examined historiographically and/or transnationally. Taught in English. May be repeated for credit. S/U or letter grading.
203. Topics in Medical Humanities. (4) Seminar, three hours. Exploration of selected topic in interdisciplinary field of medical humanities, which seeks to examine how arts, humanities, and social sciences can be brought into productive dialogue with medical discourse, education, and praxis. Taught in English. May be repeated for credit. S/U or letter grading.
204. Studies in Transatlantic Literature. (4) Seminar, three hours. Introduction to principles of literary translation and techniques of literary analysis; practice of translation (to and from English);
readings and research in translation studies, philology, linguistics, cultural studies, media, and technology. Taught in English. May be repeated for credit. S/U or letter grading.

205. Major Works and Figures in Transnational Context. (4) Seminar, three hours. Exploration of major European figure or work, where notion of European may understood broadly. Author, artist, or work selected by instructor and presented in broad transnational and/or transhistorical context. Taught in English. May be repeated for credit. S/U or letter grading.

206. Topics in Cultural Studies. (Seminar, three hours. In-depth exploration of major historical event through its representation in cultural production. Readings include cultural texts, documentary or archival material, essays on politics, and aesthetics, memory, urban space, architecture. Development of techniques of contextualized literary analysis. Taught in English. May be repeated for credit. S/U or letter grading.

207. Topics in Literary Studies. (Seminar, three hours. Conceptual, thematic, or problem-driven approach to questions in literary studies, with emphasis on both establishing and interrogating trends, debates, assumptions. Taught in English. May be repeated for credit. S/U or letter grading.

208. Topics in Film, Media, and Visual Culture. (Seminar, three hours. National or transnational exploration of movements, theories, questions, and problems in film, media, and visual cultures. Taught in English. May be repeated for credit. S/U or letter grading.

100. Written Expression: Techniques of Description and Argumentation. (4) Lecture, two hours; discussion, one hour. Enforced requisite: course 1 with grade of C– or better. P/NP or letter grading.

103. Third-Year French. (12) Lecture, 15 hours. All-in-French intensive language program equivalent to first year of college French and designed to develop basic language skills. Additional work in language and media laboratory required. Offered in summer only. P/NP or letter grading.

104. Fourth-Year French. (12) Lecture, 15 hours. All-in-French intensive language program equivalent to second year of college French. Additional work in language and media laboratory required. Offered in summer only. P/NP or letter grading.

109. French for Professional Purposes: Language and Communication in Professional Environment. (4) Lecture, three hours. Requisite: course 6. Oral and written communication in professional environment, including job search (résumé and cover letter), correspondence (professional letter and e-mail), and how to understand and negotiate work life in French-speaking company. P/NP or letter grading.

114B. Survey of French Literature: 17th and 18th Centuries. (5) Lecture, three hours. Requisite: course 12. Study of selections from major works of classicism and Enlightenment, including those by Racine, Pascal, La Fontaine, La Motte, Voltaire, and Rousseau. P/NP or letter grading.

115. Studies in Medieval French Culture and Literature. (4) Lecture, three hours. Enforced requisite: course 5. Taught in French. Study of medieval French culture and literature, including lyric poetry and narrative poetry, history, art, culture, and class structures. May be repeated for credit with topic change. P/NP or letter grading.

116. Studies in Renaissance French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of Renaissance French literature and culture, including la Pèlerie and 16th-century poetry, linguistic and poetic revolution, novel and early prose, and late French humanism. May be repeated for credit with topic change. P/NP or letter grading.

117. Studies in 17th-Century French Culture and Literature. (4) Lecture, three hours. Enforced requisite: course 5. Taught in French. Study of 17th-century French culture and literature, including theater, philosophers, moralists, novelists, and cultural, political, social, religious, and courtly arts. May be repeated for credit with topic change. P/NP or letter grading.

118. Studies in 18th-Century French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of 18th-century French culture and literature, including satire, novel, theater, philosophers, and theoretical writings. May be repeated for credit with topic change. P/NP or letter grading.

119. Studies in 19th-Century French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of 19th-century French culture and literature, including realist and symbolist, and works from 1848 to World War I. May be repeated for credit with topic change. P/NP or letter grading.

120. Studies in 20th-Century French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of 20th-century French culture and literature, including early 20th-century writers, surrealism, literature from 1915 to 1945, post-World War II literature,
121. Studies in Francophone Cultures and Literatures. (4) Lecture, three hours, Required: course 12 or 100. Taught in French. Study of contemporary France and Francophone world (Africa, Asia, Caribbean, Quebec, Europe, immigrants and colonialism and postcolonial studies. May be repeated for credit with topic change. P/NP or letter grading.

120. Contemporary French and Francophone Cultures. (4) Lecture, three hours, Required: course 12 or 100. Taught in French. Study of contemporary France and Francophone world (Africa, Asia, Caribbean, Quebec, Europe, immigrants and colonialism and postcolonial studies. May be repeated for credit with topic change. P/NP or letter grading.

130. Contemporary French and Francophone Cultures. (4) Lecture, three hours. Required: course 12 or 100. Taught in French. Study of contemporary France and Francophone world (Africa, Asia, Caribbean, Quebec, Europe, immigrants and colonialism and postcolonial studies. May be repeated for credit with topic change. P/NP or letter grading.

134. Eco-Citizenship: Encounters with Eco-Citizens. (4) Lecture, three hours. Enforced requisite: course 6. Taught in French. Not open to students with credit for course 135. Exploration of what eco-citizen is, what it means to be eco-citizen, if we are eco-citizens, and why. Answers to these questions by studying sustainability in France. Study of French cities (i.e., Nantes) that act as real-life laboratories. Using reading, videos, and podcasts, students make observations and draw some conclusions regarding concept of eco-citizenship. Study of some theories on eco-citizenship developed by French thinkers. Exploration of how French citizens aspire to be eco-citizens. Students meet with them formally and informally through readings, videos, and virtual meetings. Examination of several experiments put in place by these cities, and assessment of whether these are successes or failures. Comparison and contrast of actions to protect environment developed in Los Angeles and at UCLA. P/NP or letter grading.

137. French and Francophone Intellectual History. (4) Lecture, three hours. Required: course 12 or 100. Taught in French. Exploration of themes that address particular parts of the French literary, civilization, or ideas. May be repeated for credit with topic change. P/NP or letter grading.

138. Contemporary French Theory. (4) Lecture, three hours. Required: course 12 or 100. Taught in French. Study of French theory (Barthes, Derrida, Cixous, Derrida, Foucault, Irigary) and major concepts in contemporary French thought, with attention to its influence on and application to literary and non-literary texts. May be repeated for credit with topic change. P/NP or letter grading.

139. Paris: Study of French Capital. (4) Lecture, three hours. Enforced requisite: course 5. Taught in French. Textual and visual exploration of historical and imaginary (myths, fictions, beginning with its earliest history and gradual formation of this great urban complex in maps from Renaissance to 20th century. Study of city's streets and quarters, traffic and transportation, multiple layers of past, present, and future, and flâneurs and insurrectionists through wide range of literary and critical texts. Readings cover mainly 19th and 20th centuries—Honoré de Balzac, Charles Baudelaire, André Breton, Paul Eluard, Louis Ferdinand Céline, and others. P/NP or letter grading.

140. Nantes: Shape of City. (4) Lecture, three hours. Enforced requisite: course 6. Taught in French. Not open to students with credit for course 141. Metaphorical and virtual exploration of city of Nantes in western France to discover rich culture. Study of French government's repressive measures against Breton culture, and especially Breton language. Examination of Nantes' dark past, i.e. 18th-century slave trade. Study of how people today made it their mission to recover this repressed memory, and to create connections with African countries, victims of slave trade. Examination of Nantes' industrial past and how in recent years old and abandoned industrial sites transformed into inclusive spaces such as village solidaire, place to combat homelessness and promote social connections for all. P/NP or letter grading.

141. French Cinema. (4) Lecture, three hours. Study of French cinema and cinematographers in generic, thematic, and sociocultural aspects. May be repeated for credit with topic change. P/NP or letter grading.

143. Francophone Cultures in English. (4) Lecture, three hours. Study of historical, anthropological, legal, literary, or filmic texts to provide students with broad view of some main issues in field of colonial and post-colonial Francophone studies. P/NP or letter grading.

144. French and Francophone Theater in Translation. (4) Lecture, three hours. Through plays of 20th century, analysis of struggles of individuals and social groups in contexts that are historical, political, philosophical (existentialism, absurd), and cultural (colonialism and conformism). May be repeated for credit with topic change. P/NP or letter grading.

145. French and Francophone Short Story in Translation. (4) Lecture, three hours. Survey of short fiction forms in France and Francophone world. Terms in Francophone world. May be applied toward inclusive spaces such as village solidaire, place to combat homelessness and promote social connections for all. P/NP or letter grading.

147. Eco-Citizenship: Encounters with Eco-Citizens in Translations. (4) Lecture, three hours. Not open to students with credit for course 135. Exploration of what eco-citizen is, what it means to be eco-citizen, if we are eco-citizens, and why. Answers to these questions by studying sustainability in France. Study of French cities (i.e., Nantes) that act as real-life laboratories. Using reading, videos, and podcasts, students make observations and draw some conclusions regarding concept of eco-citizenship. Study of some theories on eco-citizenship developed by French thinkers. Exploration of how French citizens aspire to be eco-citizens. Students meet with them formally and informally through readings, videos, and virtual meetings. Examination of several experiments put in place by these cities, and assessment of whether these are successes or failures. Comparison and contrast of actions to protect environment developed in Los Angeles and at UCLA. P/NP or letter grading.

149. Eco-Citizenship: Encounters with Eco-Citizens in Translations. (4) Lecture, three hours. Not open to students with credit for course 135. Explanation of what eco-citizen is, what it means to be eco-citizen, if we are eco-citizens, and why. Answers to these questions by studying sustainability in France. Study of French cities (i.e., Nantes) that act as real-life laboratories. Using reading, videos, and podcasts, students make observations and draw some conclusions regarding concept of eco-citizenship. Study of some theories on eco-citizenship developed by French thinkers. Exploration of how French citizens aspire to be eco-citizens. Students meet with them formally and informally through readings, videos, and virtual meetings. Examination of several experiments put in place by these cities, and assessment of whether these are successes or failures. Comparison and contrast of actions to protect environment developed in Los Angeles and at UCLA. P/NP or letter grading.

150. Paris: Study of French Capital in Translation. (4) Lecture, three hours. Textual and visual exploration of historical and imaginary (re)constructions of Paris, beginning with its earliest history and gradual formation of this great urban complex in maps from Renaissance to 20th century. Study of city's streets and quarters, traffic and transportation, multiple layers of past, present, and future, and flâneurs and insurrectionists through wide range of literary and critical texts. Readings cover mainly 19th and 20th centuries—Honoré de Balzac, Charles Baudelaire, André Breton, Paul Eluard, Louis Ferdinand Céline, and others. P/NP or letter grading.

152. Cultural Studies. (4) Lecture, three hours. Introduction to cultural studies and cultural analysis. May be applied toward inclusive spaces such as village solidaire, place to combat homelessness and promote social connections for all. P/NP or letter grading.

153. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

154. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and instructor. May be repeated for credit with consent of major adviser. P/NP or letter grading.

155. Community or Corporate Internship in French. (4) Tutorial, to be arranged. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

156. Honors Research in French. (4) Tutorial, three hours. Limited to junior/senior French majors with 3.5 departmental and 3.25 overall grade-point averages. Development and completion of honors thesis or comprehensive research project. May be repeated for credit with consent of major adviser. P/NP or letter grading.

157. Directed Research or Senior Project in French. (2 to 4) Tutorial, three hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culuminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

201. Techniques of Literary Analysis. (4) Lecture, three hours. Practice in close analysis of literary texts, including exploration of their aesthetic and ideological implications. P/NP or letter grading.

202. Cultural Studies. (4) Lecture, three hours. Introduction to theoretical approaches to popular and mass culture, and to postcolonial and Francophone cultures. Topics include emergent disciplines and theories such as sociology and structuralism, city, revolution, avant-garde strategies, media, diaspora during rich culture. Study of French government's repressive measures against Breton culture, and especially Breton language. Examination of Nantes' dark past, i.e. 18th-century slave trade. Study of how people today made it their mission to recover this repressed memory, and to create connections with African countries, victims of slave trade. Examination of Nantes' industrial past and how in recent years old and abandoned industrial sites transformed into inclusive spaces such as village solidaire, place to combat homelessness and promote social connections for all. P/NP or letter grading.
postwar modernization, Algerian War, May 68, and beyond. Theorists include Barthes, de Certeau, Bourdie, Daudet, Lyotard, Ross, Rey Chow, Virilio. S/U or letter grading.

203. Contemporary Francophone Literature. (4) Lecture, three hours. Study of Francophone African, Caribbean, Vietnamese, or Quebec literature and cultures, with specific attention to issues of cultural context, language, colonialism/postcolonialism, nationalism, resistance and dissidence, and postcolonial theory. S/U or letter grading.

204. Studies in Autobiography. (4) Lecture, three hours. Introduction to theories of autobiography and subjectivity, and to issues of authenticity in literature in French in the 20th century. Focus on the relationship between autobiography and the self, and on the role of autobiography in literary production in the present day. S/U or letter grading.

206. Studies in History of Ideas. (4) Seminar, three hours. Reading of primary texts from any period of French literature. May be repeated for credit. S/U or letter grading.

207. Studies in Literary Criticism. (4) Seminar, three hours. Reading of theoretical texts, theory, and literature from 17th century to present. May be repeated for credit. S/U or letter grading.

208. Studies in Literary Genre. (4) Seminar, three hours. Advanced research and study of literary genres such as poetry, drama, fiction, autobiography, or performance and of the theory of these genres. S/U or letter grading.

211. Introduction to Enlightenment. (4) Lecture, three hours. Taught in English. Readings in 18th-century French thought, including philosophy, science, and social thought. S/U or letter grading.

212. 18th Century. (4) Lecture, three hours. Readings in 18th-century French thought, including philosophy, science, and social thought. S/U or letter grading.

214. 20th Century. (4) Lecture, three hours. Overview of French literature from 1914 to present. S/U or letter grading.

215. Contemporary Francophone Literature. (4) Seminar, three hours. Study of Francophone African, Caribbean, Vietnamese, or Quebec literature and cultures, with specific attention to issues of cultural context, language, colonialism/postcolonialism, nationalism, resistance and dissidence, and postcolonial theory. S/U or letter grading.

216. Research Methods and Writing. (2) Seminar, two hours. Advanced study of current topics in literary and cultural analysis and in critical theory. Discussion of current research in literature and research specialty of faculty member teaching course. S/U grading.

217. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

218. Teaching Practice. (2 to 8) Seminar, to be arranged. May be repeated for maximum of 16 units. S/U grading.

220. 20th Century. (4) Lecture, three hours. Overview of French literature from 1914 to present. S/U or letter grading.

221. Directed Individual Studies or Research. (2 to 4) Seminar, to be arranged. S/U or letter grading.

222. Preparation for Second-Year Research or PhD Qualifying Examinations. (2 to 8) Seminar, to be arranged. May be repeated for maximum of 16 units. S/U grading.

223. Research for and Preparation of MA Thesis. (2 to 4) Seminar, to be arranged. Maximum of 4 units may be applied toward MA degree requirements. S/U grading.

German

Lower-Division Courses

1. Elementary German. (4) Lecture, five hours. P/NP or letter grading.

2. Elementary German. (4) Lecture, five hours. Enforced requisite: course 1. P/NP or letter grading.

5. Intermediate German. (4) Lecture, four hours; laboratory, one hour. Enforced requisite: course 4. P/NP or letter grading.

6. Intermediate German. (4) Lecture, four hours; laboratory, one hour. Enforced requisite: course 5. P/NP or letter grading.

7. Elementary German: Intensive. (12) Lecture, 15 hours; laboratory, five hours. Intensive basic course in German equivalent to courses 1, 2, and 3. P/NP or letter grading.

9. Special Topics in Modern Literature and Cultural Studies. (4) Lecture, three hours. Taught in English. Course of variable content limited to topics of current interest and offered whenever staff member is available. P/NP or letter grading.

10. Lower-Division Seminar. (4) Seminar, three hours. Course of variable content limited to topics of current interest and offered whenever student enrollment is steady. P/NP or letter grading.

11. Honors Seminars. (1 Seminar, three hours. Limited to 20 students. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

12. 61A. Modern Metropolis: Berlin. (5) Lecture, three hours. Taught in English. Analysis of current topics in greater Berlin area, including discussion of challenges and problems encountered in trying to understand the city as a global city. P/NP or letter grading.

14. Modern Metropolis: Berlin. (5) Lecture, three hours; discussion, one hour. Cultural, political, architectural, and urban history of one of most vibrant and significant cities in world. Exploration of city over 800 years, using innovative mapping tools to understand how Berlin evolved from fortified mercantile town into global city. P/NP or letter grading.

15. Special Topics in Modern Literature and Culture. (4) Lecture, three hours. Taught in English. Taught in English. Course of variable content limited to topics of current interest and offered whenever staff member is available. P/NP or letter grading.

16. Upper-Division Courses

102. War, Politics, Art. (5) Lecture, three hours; discussion, one hour. Taught in English. Analysis of interrelationship between politics, social conditions, and art with respect to arts in 18th and 19th centuries. S/U or letter grading.

110. Special Topics in Modern Literature and Culture. (4) Lecture, three hours. Taught in English. Course of variable content limited to topics of current interest and offered whenever staff member is available. P/NP or letter grading.

111. Student Research Program. (1 to 2) Tutorial, supervised research or other scholarly activity. May be repeated. Entry-level research for lower-division students under guidance of faculty mentor. May be repeated for maximum of 12 units excluding this course. Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP or letter grading.
European Languages and Transcultural Studies / 481

114. Fairy Tales and Fantastic. (5) Lecture, three hours; discussion, one hour. Taught in English. History and reception of folklore collections in Europe, with particular attention to primary and secondary German tales. Interpretation of selected tales and their transformations and appropriation in literature, film, advertising, and pedagogy. P/NP or letter grading.

115. 19th-Century German Philosophy. (4) Lecture, three hours; discussion, one hour. Taught in English. German philosophy, which may generally be characterized as philosophy that takes activity rather than passive subsistence to be fundamental nature of all things, is one of Germany’s greatest gifts to humanity. Exploration of first half of two-century history of German philosophy—period from Kant to Nietzsche, including Hegel, Kierkegaard, and Marx. Letter grading.

116. 20th-Century German Philosophy. (4) Lecture, three hours; discussion, one hour. Taught in English. German philosophy, which may generally be characterized as philosophy that takes activity rather than passive subsistence to be fundamental nature of all things, is one of Germany’s greatest gifts to humanity. Exploration of second half of two-century history of German philosophy—period from Nietzsche through Habermas, Horkheimer, Adorno, Gadamer, Derrida, and Frankfurt School theorists. Letter grading.

117. German Exile Culture in Los Angeles. (4) Lecture, three hours. Taught in English. Cultural and historical analysis of creative works by German writers and other artists during and after World War II. General questions of cultural migration and cultural transfer to be thematized. P/NP or letter grading.

118SL. Between Memory and History: Interviewing Holocaust Survivors. (4) Seminar, two hours; fieldwork, two hours. Strongly recommended requisites: prior European and Holocaust history courses. Examination of historical value of eyewitness testimony of Holocaust through unique service opportunities that bring students together with survivors. Question of testimony approached from number of perspectives, including legal, historical, and ethical, to examine vexed relationship between history and memory. Examination of survivor testimony through classic mem- ories in field, such as Primo Levi’s The Drowned and the Saved and Ruth Kluger’s Still Alive. Through collaboration with Jewish Family Services, 1939 Club, and Los Angeles Museum of Holocaust, students meet and work with Holocaust survivors and undertake collaborative research and oral histories. Students also research and curate series of interactive tours through Museum of Holocaust. Letter grading.

140. Language and Linguistics. (4) Lecture, three hours. Enforced requisite or corequisite: course 6. Taught in German. German proficiency required. Theories and methods of linguistics, with emphasis on structure of modern standard German, its phonology, morphology, syntax, semantics, and pragmatics. Other topics include diachronic, spatial, and social variation of German (i.e., its historical development, dialectology, and sociolinguistic dimensions). Letter grading.

141. Current Topics in Germanic Linguistics. (4) Lecture, three hours. Enforced requisite: course 152. Taught in English with German proficiency required. In-depth investigation of one topic in field of Germanic linguistics. Aspects include phonetics and phonology, morphology and syntax, semantics and pragmatics, social and spatial variation (i.e., sociolinguistics and dialectology of German), or history of German. May be repeated for credit. Letter grading.

142. Linguistic Theory and Grammatical Description. (4) Lecture, three hours. Enforced requisite: course 140 or Linguistics 20. Taught in English with German proficiency required. Problems in structure of Dutch and German, analyzed from theoretical frameworks such as sign-oriented linguistics, functional linguistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C238. Letter grading.

152. Conversation and Composition on Contemporary German Culture and Society I. (4) Lecture, three hours. Requisite: course 6. Taught in German. Structured plan for acquiring German while enhancing German texts ranging from news magazine articles to literature, with emphasis on speaking and writing proficiency. Presentation software featured. P/NP or letter grading.

153. Conversation and Composition on Contemporary German Culture and Society II. (4) Lecture, three hours. Requisite: course 6. Taught in German. Structured plan for acquiring German while enhancing German texts ranging from news magazine articles to literature, with emphasis on speaking and writing proficiency. Presentation software featured. P/NP or letter grading.

155. Advanced German Language through Cultural History and Current Affairs. (4) Lecture, three hours. Requisites: courses 152, 153. Taught in German. Advanced German course that juxtaposes cultural history with current affairs to teach complex speaking and writing skills of interpretation, analysis, and critique. Readings and activities from literature, Luther, Heine, Freud, and current authors. Students create their own interactive media presentations. Letter grading.

157. Contemporary German Cinema: Advanced Conversation and Composition. (4) Lecture, three hours. Taught in German. Development of advanced speaking skills and thorough grounding in essay writing in German by considering issues of style, structure, grammar, vocabulary, and cultural nuances. Important terms and resources of literary analysis to help students develop and improve skills in close and critical reading of literary texts, develop basic research technique and data organization. Analysis of several theoretical pieces that examine relationship between internationalization, globalization, and identity. P/NP or letter grading.

158. Introduction to Study of Literature. (4) Lecture, three hours. Taught in German. Introduction to most important terms and resources of literary analysis to help students develop and improve skills in close and critical reading of literary texts, develop basic research technique and data organization. Analysis of several theoretical pieces that examine relationship between internationalization, globalization, and identity. P/NP or letter grading.

160. Goethe. (4) Lecture, three hours. Taught in German, some theoretical readings in English. Exploration of German culture in different historical contexts. Examination of various cultural spaces, practices, and standpoints as they developed in literary and nonliterary texts, with emphasis on constructions of sex and gender, memory and national identity, and ethnicity and race. Analysis of ways of seeing, thinking, and talking about these issues as manifested in contemporary cultural debates that dominated public discussions in Germany (and Europe) for several weeks, months, or even years (e.g., debates about admission of women to universities at end of 19th century). Lecture, to be arranged. Enforced co-requisite: Honors College 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparation and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced requisite: course 188SA. Enforced corequisite: Honors College 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189A. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. Letter grading.

191A. Variable Topics Research Seminars: German. (4) Seminar, three hours. Enforced requisite: course 6. Taught in German. Research seminars on topics to be announced each term. Topics include major writers, genres, cultural movements, or theoretical practices. May be repeated for credit with consent of major adviser. P/NP or letter grading.
Graduate Courses

201C. Theories of Literary Interpretation. (4) Lecture, three hours. Analysis of various models of literary interpretation and selected works that illustrate different approaches. Letter grading.

202B. Readings in Middle High German Literature. (4) Lecture, three hours. In-depth study of Middle High German literature, with particular emphasis on a single major author or work. Letter grading.

204. Early Modern German Literature. (4) Lecture, three hours. Selected readings from 1500 to 1700, with emphasis on development of modern European literature and its relationship to contemporary society. S/U or letter grading.

205. Weimar Classicism. (4) Lecture, three hours. Reading and interpretation of major works of German Classicism, with attention to relationship between Classicism and other periods in German literature. Letter grading.

208. Romanticism. (4) Lecture, three hours. Analysis of selected works and theories of German Romantic literature such as Friedrich Schlegel, Novalis, and Hoffmann, with attention to relationship between Romanticism and other periods in German literature. Letter grading.

210A. Naturalism, Symbolism, and Expressionism. (4) Lecture, three hours. Analysis of selected works by authors of the naturalist, symbolist, and expressionist movements, with attention to relationship between Romanticism and other periods in German literature. Letter grading.

210B. 20th-Century Novel to 1945. (4) Lecture, three hours. Prose works in first half of 20th century as they express war experience, crisis of consciousness, and cultural conflicts between wars, as well as innovations in narrative technique. Letter grading.

211. Postwar Literature. (4) Lecture, three hours. Study of major novels by German-speaking authors writing since World War II. Examination of issues such as identity crises, nationalism and divided Germany, gender expectations, and social-political attitudes. Letter grading.

212. Contemporary Literature and Culture. (4) Lecture, three hours. Analysis of current cultural issues and their relation to literary production and interpretation. Topics may include such areas as feminism, postcolonialism, postmodernism, and contemporary theory. Letter grading.

213. Topics in Literature and Film. (4) Lecture, three hours. With focus on the different modes of cultural representation, examination of topics in German literature and film from Weimar Republic to present. Study of media theory, film theory, and interdisciplinary approaches between film, literature, and social history. Letter grading.

232. Old High German. (4) Discussion, three hours. Introduction to earliest phases of German literature, with extensive readings in major documents of that period (750 to 1050). Emphasis on grammatical interpretation of these documents and identification of dialects used in their composition. S/U or letter grading.

238. Linguistic Theory and Grammatical Description. (4) Lecture, three hours. Enforced requisite: course 140 or Linguistics 20. Taught in English with selected readings in major theoretical works. Letter grading.

260. Seminar: Modern Period. (4) Seminar, three hours. In-depth analysis of one particular issue in pre-1945 German literature and culture. Letter grading.

263. Seminar: Literary Theory. (4) Seminar, three hours. Special focus on particular theoretical or interpretative paradigm. Content varies with instructor. Letter grading.

269. Approaches to Foreign Language Pedagogy. (4) Seminar, one hour. To be arranged with faculty member who directs study or research. Required research paper must be filed with department chair. S/U grading.

275. Teaching Apprentice Practicum. (1 or 2) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, tutor, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

276. Preparation for MA Comprehensive Examination or PhD Qualifying Examinations. (4) Tutorial, three hours. To be arranged with faculty member who directs examination preparation. S/U grading.

596. Directed Individual Study or Research. (4) Seminar, three hours. To be arranged with faculty member who directs research for and preparation of thesis. S/U grading.

Italian

Lower-Division Courses

1. Elementary Italian—Beginning. (4) Lecture, five hours. P/NP or letter grading.

7. Intensive Italian. (12) Lecture, 20 hours. Intensive language program equivalent to first year of college Italian (courses 1, 2, 3) and designed to develop basic language skills. Offered in summer only. P/NP or letter grading.

19. Flat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many perspectives. P/PUC or UCL/ A. P/NP or letter grading.

42A. Italy through Ages in English: Saints and Sinners in Early Modern Italy. (5) Lecture, four hours; discussion, one hour. Examination of issues of cultural hegemony, political and religious freedom, and doctrinal conflict through Italy’s early modern literary and artistic production. Texts may include Dante’s Divine Comedy, Boccaccio’s Decameron, Saint Catherine’s letters, Machiavelli’s The Prince, and Galileo’s scientific writings. Artworks may include those of Raphael and Michelangelo, as well as Bernini’s sculptures. P/NP or letter grading.

42B. Italy through Ages in English: Modern and Contemporary Italy. (5) Lecture, four hours; discussion, one hour. Profile of Italian history and culture through the analysis of gastronomic and literary texts. Special emphasis on the late Middle Ages, Renaissance, and Risorgimento. P/NP or letter grading.

46. Italian Cinema and Culture in English. (5) Lecture/ screen/ings, five hours; discussion, one hour. Special topics in Italian culture as reflected and reinforced by the nation’s prime artform, stressing aesthetics and ideology of films, contemporary Italian history, and politics. Rotating topics include sex and politics, comedy, integration, family networks, and neorealism. P/NP or letter grading.

50A-50B. Masterpieces of Italian Literature in English. (5-5) Lecture, four hours; discussion, one hour. Enforced prerequisite: course 100. Taught in Italian. Selected modern works of Italian literature, theater, art, and culture from medieval era to Renaissance and baroque. Emphasis on critical methods and skills for analyzing and interpreting wide range of Italian texts and cultural formations in their historical context and in comparison to contemporary and transnational views. Representative authors may include Saint Francis of Assisi, Dante, Boccaccio, Caterina Siena, Machiavelli, Giotto, Botticelli, Michelangelo, Leonardo, Caravaggio, Gaspara Stampa, Veronica Franco, Ariosto, Tasso, and Galileo. P/NP or letter grading.

103A, Introduction to Classic Italian Literary and Cultural Studies. (4) Lecture, three hours. Study of language at advanced level through reading of libretti. Six masterworks of Italian opera tradition—Il Barbiere di Siviglia, La Bohème, Pagliacci, Otello, Tosca, and La Traviata—offer culturally authentic contexts to learn about operas, their characters, plots, settings, and themes. Exploration of various historical, political, and cultural issues raised in each opera. P/NP or letter grading.

150. Italian Novella from Boccaccio to Basile in Translation. (4) Lecture, three hours. Analysis of development of Italian novella in its structure, historical context, and folk material. Special emphasis on how Italian novella influenced other European literatures. P/NP or letter grading.

50C. Modern Fiction in Translation. (4) Lecture, three hours. Enforced prerequisite: course 100. Taught in Italian. Study of modern prose from Italy through translations into the works of writers of international fame, with focus on concerns and styles of several prose works such as Umberto Eco’s The Name of the Rose, Pasolini’s The Maga- zine, Pinelli’s The Late Matta Pascal, and Calvino’s The Cosmicomics. P/NP or letter grading.

114B. Middle Ages: Medieval Humor, Moralism, and Society. (4) Lecture, three hours. Novelty of Boccaccio’s witty and comic masterpieces, Decameron, analyzed within context of medieval social codes of culture of time. P/NP or letter grading.

120. Modern and Contemporary Literature. (4) Lecture, three hours. Comparison of specific literary works and their adaptation into film and of different techniques in two media and forms of expression. Study of major Italian authors from modern and contemporary Italy. Examination of contemporary Italian culture, fashion and design, photography and visual arts, mass media, politics, music, and sports. P/NP or letter grading.

124. Food and Literature in Italy. (4) Lecture, three hours. Profile of Italian history and culture through analysis of gastronomic data, food traditions, and literary and visual works. Emphasis on Italian Middle Ages, Renaissance, and Risorgimento, or modern and contemporary movements such as Cucina futurista and slow food. Examination of relation of Italian traditions of food and eating with health, body, gender, community, politics, biodiversity, and environment. P/NP or letter grading.

125. Italian through Opera. (4) Lecture, three hours. Enforced prerequisite: course 6. Taught in Italian. Introduction to traditional Italian opera as means of appreciating cultural and art form of one of Italy’s most successful languages at advanced level through reading of libretti. Six masterworks of Italian opera tradition—Il Barbiere di Siviglia, La Bohème, Pagliacci, Otello, Tosca, and La Traviata—offer culturally authentic contexts to learn about operas, their characters, plots, settings, and themes. Exploration of various historical, political, and cultural issues raised in each opera. P/NP or letter grading.
152. Italy between Europe and Africa. (4) Lecture, three hours. Knowledge of Italian or background in Italian studies not required. Analysis and critical discussion of works by Italian, northern European, and African writers (including travelers and migrants) who from 18th century to present have seen or experienced Italian peninsula and islands as bridge between Europe and Africa, or mix of both. Readings include works by both Italian and African authors about Italy, and Italian authors about Africa and southern Italy. P/NP or letter grading.

M158. Women, Gender, and Sexuality in Italian Culture. (4) Seminar, three hours; discussion, one hour. Analysis of gender roles, images of femininity and masculinity, patriarchy, myths of Madonna and Latin lover, condition of women in modern history, politics, literature, film, and other media. Italian majors required to read texts in Italian. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

190HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as a functional one-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

191. Variable Topics Research Seminars: Italian Studies. (4) Seminar, three hours. Research seminar with focus on themes and issues outside uniquely Italian literature topics covered in regular departmental undergraduate courses. Reading, discussion, and development of culminating project. May be repeated for credit. P/NP or letter grading.

195. Community or Corporate Internships in Italian. (1) Internship, three hours. May be taken independently for credit. S/U or letter grading.

201. Bibliography and Methods of Research. (4) Lecture, three hours. Knowledge of Italian or background in Italian studies not required. Analysis and critical discussion of works by Italian, northern European, and African writers (including travelers and migrants) who from 18th century to present have seen or experienced Italian peninsula and islands as bridge between Europe and Africa, or mix of both. Readings include works by both Italian and African authors about Italy, and Italian authors about Africa and southern Italy. P/NP or letter grading.

214A-214F. Studies in Medieval Literature. (4 each) Lecture, three hours; discussion, one hour. Analysis of gender roles, images of femininity and masculinity, patriarchy, myths of Madonna and Latin lover, condition of women in modern history, politics, literature, film, and other media. Italian majors required to read texts in Italian. P/NP or letter grading.

216A-216E. Studies in the Renaissance. (4 each) Lecture, three hours. S/U or letter grading. 216A. Machiavelli and Renaissance Political Thought. 216B. Ariosto and Renaissance Epic. 216C. Tasso. 216D. Renaissance Theater. 216E. Renaissance Topics. Variable-content seminar on themes and issues of Renaissance literature, with coverage of authors such as Vasari, Leonardo, or Benvenuto.

217. Studies in 17th-Century Literature. (4) Lecture, three hours. Topics include Galileo and birth of scientific prose, Giordano Bruno, Gian Battista Marino, and baroque poetry, S/U or letter grading.

218A-218D. Studies in 18th-Century Literature. (4 each) Lecture, three hours. S/U or letter grading. 218A-218B. Allieri, 218C. Goldoni. 218D. Lecture, three hours. S/U or letter grading. 218D. Variable Topics. Variable-content seminar on themes and issues of 18th-century literature, with coverage of authors such as Vico, Landini, and Serpi.

219A-219D. Studies in 19th-Century Literature. (4 each) Lecture, three hours. S/U or letter grading. 219A. Foscolo. 219B. Leopardi. 219C. Manzonii. 219D. Variable Topics. Variable-content seminar on themes and issues of 19th-century literature, with coverage of authors such as Carducci, Tommaso, and Nievo.

221A-221E. Studies in 20th-Century Literature. (4 each) Lecture, three hours. S/U or letter grading. 221A-221B. Allieri, 218C. Goldoni. 218D. Lecture, three hours. S/U or letter grading. 221D. Variable Topics. Variable-content seminar on themes and issues of 20th-century literature, with coverage of authors such as DI Annunzio, Verga, Marinetti, and Pirandello. 221B. Contemporary Poetry. Analysis of legacy of two major figures in Italian poetry from World War II—Ungaretti and Montale. Thorough examination of movements and individual poets active in the 1960s and 1970s. 221C. 20th-Century Narrative to World War II. Assessment of turn-of-the-century narrative pattern (Gabriele D’Annunzio) and analysis of radical innovations brought about by such towering figures as Dino Buzzati, Svevo, Bernari, Mannucci, etc. 221D. 20th-Century Narrative since World War II. In-depth exploration of some major works that have made contemporary Italian literature famous throughout the world, with special emphasis on study of form/formic models adopted by the neo-avant-garde. 221E. Pirandello and Contemporary Theater. Thorough reading of theatrical texts, accompanied by analysis of how the plays have been realized on stage by important directors such as Veronese, Raimondi, and the playwrights/actors themselves. Emphasis on ritualistic implications of the theatrical performance.

222A-222B. Comparative Romance Historical Grammars. (4 each) Evidently a core course, may be taken independently for credit. S/U or letter grading. 222A. Phonology. Principal sounds changes from late Latin to main Romance dialects. 222B. Mor-phology and Syntax. Prime morpha-syntactic changes occurring between late Latin and main Romance dialects.

223. Structures of Modern Italian. (4) Lecture, three hours. Descriptive. Topics include grammar of standard Italian from synchronic, typologcal vantage. Topical emphasis may vary annually, but core progression depart from phonology (e.g., syllable types, prosodic phonology), moves through morpho-logic constituents, passing to sentence sequences (coordination, ellipses, etc.), S/U or letter grading.

224. Italo-Romance Dialectology. (4) Lecture, three hours. Differentiation of late spoken Latin into myriad varieties spoken in Italy. Attention to discrete language types (e.g., Sardinian, Ladin, Friulan, and Franco-Provençal). Consideration of present-day sociolinguistic pressures. S/U or letter grading.

232. Seminar: Political Geography of Italy. (4) Lecture, three hours; reading period, two hours. Themes in political geography with particular emphasis on Italy. May be repeated for credit. S/U or letter grading.

250A-250D. Seminars: Dante. (4 each) Seminar, three hours. S/U or letter grading.

256A-256B. Seminars: 18th Century. (4–4) Seminar, three hours. S/U or letter grading.

258A-258B. Seminars: Contemporary Italian Literature. (4–4) Seminar, three hours. S/U or letter grading.

260. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature. (4) Lecture, three hours. Open to undergraduate students with consent of instructor. Focuses on the study of specific works produced by women and/or representing women’s conditions in either medieval/Renaissance or contemporary time. S/U or letter grading.

260C. Studies in Film. Cinema. (4) Lecture, three hours. Designed for graduate students. Italian cinema compared with other European countries’ and Hollywood’s cinema, with focus on its development from its origins through Fascist times to neorealism, its legacy, and developments since, and contemporary scene. S/U or letter grading.

298. Variable Topics in Italian Studies. (4) Lecture, three hours; discussion, one hour. Designed for graduate students. Topics include basic features and issues outside the uniquely Italian literature topics covered in regular departmental graduate courses.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Development and learning in general, and for those wishing to prepare for more advanced and specialized studies in Scandinavian literature and culture. Satisfies Writing II requirement. Letter grading.

495A-495B-495C. Teaching Italian at College Level. (2 to 4) Seminar, to be arranged. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

597. Preparation for MA Comprehensive Examinations or PhD Qualifying Examinations. (2 to 12) S/U grading.

599. PhD Research and Writing. (2 to 12) May be repeated. S/U grading.

Scandinavian

Upper-Division Courses

C131. Introduction to Viking Age. (4) Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and Edda. Concurrently scheduled with course C231. Letter grading.

C133A. Saga. (4) Seminar, three hours. Sagas are largest extant medieval prose literature. Texts in English, with selections from different types of Icelandic sagas. Consideration of history and notion of what produced these narratives. Concurrently scheduled with course C233A. Letter grading.

C133C. Social Network Analysis and Icelandic Family Saga. (4) Seminar, three hours. Exploration of how character interactions can be used as basis for developing social network view of stage on which saga action plays out. Examination of how best to model sagas as dynamic social networks and learn about metrics and analytical approaches from social network analysis (SNA) that deepen understanding of saga actions. SNA provides additional opportunity to explore hypothetical situations and recognize alternative social pathways that may have led to other types of community formations. Study of Icelandic saga toward increasing complexity, understanding of characters and character roles, and utilizing this as basis of preliminary investigations. P/NP or letter grading.

C134. Scandinavian Mythology. (4) Seminar, three hours. Overview of major gods and goddesses, heroes and heroines, and notable traditions and characters in order to make up lore collectively referred to as Scandinavian, or Norse, myth. Reading and examination of this lore that is chiefly preserved in two collections traditionally called Poetic (or Elder) Edda and Prose (or Younger) Edda. P/NP or letter grading.

C137. Old Norse Literature and Society. (4) Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C237.

C141A. Theory of Scandinavian Novel. (4) Seminar, three hours. Analysis of the structures of Scandinavian novel from its 18th-century beginnings through its rise in 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to newly discovered novels concurrently scheduled with course C241A. P/NP or letter grading.

C141C. Short Story in Scandinavia. (4) Seminar, three hours. Exploration of range of classic short story and novella texts from Scandinavian literary canon, with stories by authors such as Hans Christian Andersen, Jens Peter Jacobsen, Alexander Kielland, Amalie Skram, Sigfrid Obstfelder, Knut Hamsun, Isak Dinesen, and Rubén Palma. Examination of authors’ lives and oeuvres, larger Nordic/European literary movements of 19th and 20th centuries, and tropes and conventions of short stories themselves. P/NP or letter grading.

C142A. Introduction to Nordic Theater and Drama. (4) Lecture, three hours. Examination of artistry of Henrik Ibsen and August Strindberg in context of emergence of modern Nordic theater and drama as well as important contributions of their contemporaries and successors. Readings include plays, letters, speeches, and memoirs by Ludvig Holberg, Henrik Ibsen, August Strindberg, Pär Lagerkvist, Kjeld Abell, Eeva-Liisa Manner, Hrafnhildur Hagalín Gudmundsdóttir, and others. P/NP or letter grading.

C143A. Scandinavian Detective Fiction. (4) Seminar, three hours. Scandinavian authors have been writing detective fiction for years. Maj Sjöwall and Per Wahlöö were famous worldwide in 1960s and 1970s, especially with their Martin Beck series, and once they had established that Scandinavian writers could be successfully translated into many languages, others fol-
lowed. Scandinavian authors, while following traditional rules of crime fiction, also analyze and often criticize values and cultures of their societies. Reading of these works helps to represent critical social and intellectual problems not only in Scandinavia, but also in Europe and world at large. P/NP or letter grading.

C145A. Henrik Ibsen. (4) Seminar, three hours. Readings and discussion of selected plays by Henrik Ibsen. May be concurrently scheduled with course C245A. P/NP or letter grading.

C146A. August Strindberg. (4) Seminar, three hours. Readings and discussion of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored theme of nature as modern idyl. May be concurrently scheduled with course C245B. P/NP or letter grading.

C147A. Henrik Ibsen. (4) Lecture, two hours; discussion, one hour. Study of works of Hans Christian Andersen, Danish novelist, dramatist, and writer of tales, including consideration of his literary background and an analysis of his works in terms of their structure, style, and meaning. P/NP or letter grading.

C148A. August Strindberg. (4) Seminar, three hours. Readings and discussion of selected works by Soren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C248A. P/NP or letter grading.

147C. Karen Blixen. (4) Lecture, three hours. Investigation of work, writings, and legacy of Danish author Karen Blixen, also known in the English-speaking world as Isak Dinesen. Focus on literary and philosophical paradoxes personified and articulated by enigmatic, controversial, and widely acclaimed Dinesen. Using memoirs, short fiction, and essays by Dinesen, interrogation of aesthetic theory, historiography and biography, feminist theory, postmodern and transcultural theory, and secondary readings. Texts may include texts by Bhabha, Gilbert and Gubar, JanMohammed, Kierkegaard, Nietzsche, Ngugi, Said, and Thurm. P/NP or letter grading.

154. Romanticism. (4) Seminar, three hours. Exploration of the concept and content of Romanticism. Reading and discussion of different approaches to Romanticism and analysis of works of prominent Scandinavian writers from Romantic period to understand Scandinavian Romanticism in larger European context, including work from both English and German Romantic writers and artists. P/NP or letter grading.

C155. Modern Breakthrough. (4) (Formerly numbered 155.) Seminar, three hours. Readings and discussions of selected works of realism, naturalism, and symbolism in late 19th-century Scandinavian literature and art. Concurrently offered with course C255. P/NP or letter grading.

156. Scandinavian Literature of 20th Century. (4) Seminar, three hours. Readings and discussions of selected works of modern Scandinavian literature from beginning of century to present. P/NP or letter grading.

157. Contemporary Nordic Literature. (4) Seminar, three hours. Reading and analysis of selected texts by major 20th-century Swedish authors. P/NP or letter grading.

161. Introduction to Nordic Cinema. (4) Seminar, three hours. Designed for students in general and for those preparing for more advanced studies in Scandinavian literature and culture. Viewing and discussion of films by Ingmar Bergman and other Scandinavians. P/NP or letter grading.

C163A. Introduction to Danish Cinema. (4) Seminar, three hours. Introduction to history of cinema in Denmark, as well as to some fundamental concepts in study of film. Deliberately broad and historically informed approach to development of cinema in Denmark; rather than focus on films of particular directors or topics. Theoretical readings from important critics, including Kracauer, Bazin, Metz, and Chatman, along with selected critical vocabulary and a critical method for discussing films in general and Danish cinema in particular. Other readings include selections from Hitler, Heidegger, and other Scandinavian theorists. Concurrently scheduled with course C263A. P/NP or letter grading.

C163B. Introduction to Swedish Cinema. (4) Lecture, three hours. Introduction to and exploration of history of Swedish cinema and why. Film-makers include auteurs in international canon, such as Victor Sjöström, Mauritz Stiller, and Ingmar Bergman, as well as other key Swedish film-makers such as Gustaf Molander, Alf Sjöberg, Mai Zetterling, Vilgot Sjöman, Jan Troell, Lukas Moodysson, and Josef Fares. Development of Scandinavian high art cinema and popular genres such as rural romanticism, melodrama, crime, crime, and the here and now. Concurrently scheduled with course C263B. P/NP or letter grading.

C163C. Introduction to Norwegian Cinema. (4) Seminar, three hours. Introduction to and exploration of Norwegian cinema and why. Film-makers include Haakon Schyberg, Bent Hamer, Khalid Hussein, and Petter Naess. Particular focus on popular genres such as war films, horror, noir, romantic comedies, and documentaries. Concurrently scheduled with course C263C. P/NP or letter grading.

166B. Vikings on Film. (4) Seminar, three hours. Exploration of representations of Vikings in medium of film. Viking films within their historic and cultural contexts. How does representation of Vikings on film correspond to historical reality of Vikings? How do the cultural and historical context of the era and the region influence the movies? Why? Do we see development in idea of Vikings over time that is reflected in films from different periods? How do representations of Vikings in films produced in Scandinavia differ from their representations in films from other cultures? How do we see changing ideas about gender, ethnicity, disability, sexual preference, and other aspects of identity reflected in Viking films? Development of national cinema and cross-cultural analysis. All readings and films in English or with English subtitles. P/NP or letter grading.

C166A. Ingmar Bergman. (4) Seminar, three hours. Exploration of Ingmar Bergman’s development as film artist. Covered early films of the mid-1940s and late 1970s. Contextualization of work of most personal of filmmakers within multiple frameworks: postwar Swedish film industry, international art cinema movement, and issues of auteur filmmaking. Course readings and viewing of 10 Bergman films. All films have English subtitles. Concurrently scheduled with course C266A. P/NP or letter grading.

C166C. Carl Dreyer. (4) Seminar, three hours. Carl Theodor Dreyer (1889 to 1998) is not only one of the great masters of Nordic cinema, but of world cinema as well. Focus on films that Dreyer made during near half century between 1919 and 1964, contextualization of place of his film-making and place of personal and social values in Nordic society. Reading and discussion of films by David Bordwell, Ray Carney, Paul Schrader, Mark Sandberg, and others, as well as Dreyer’s own writings on cinema. All films have English subtitles. Concurrently scheduled with course C266A. P/NP or letter grading.

C171. Introduction to Scandinavian Folklore. (4) Seminar, three hours. Introduction to fairy tales and legends of Scandinavian tradition as well as to interpretive methodology. Answer question why do people tell stories that they tell? Concurrently scheduled with course C271. Letter grading.

172A. Nordic Folk and Fairy Tales. (4) Seminar, three hours. Exploration of Nordic version of classic tale types such as Dragon Slayer, Cinderella, Hansel and Gretel, and King Lindorm in historic and cultural contexts. Reading of important works of Nordic and international folk tale scholarship, representing historical-geographic, structuralist, psychological, feminist, disability-theory, and queer-theory approaches. Development of critical thinking and close text analysis skills, and understanding and appreciation of genre that continues to provide popular culture. Readings in English translation. P/NP or letter grading.

C173A. Popular Culture in Scandinavia. (4) Seminar, three hours. Examination of popular culture in Scandinavian through study of contemporary Scandinavian literature, music, and art. Investigation of how issues such as globalization, immigration, and nation- alism are portrayed in popular culture in Denmark, Norway, Sweden, Finland, and Iceland. Discussion of how how and why human condition is interpreted through study of cultural expressions and how it is possible—taking literature, film, and art as point of departure—to analyze cultural, historical, and political expression in given piece of art. P/NP or letter grading.

C174A. Minority Cultures in Scandinavia. (4) Seminar, three hours. Exploration of emergence of immigrant cultures in Nordic region. Beginning in 1960s, large numbers of people from Turkey, Italy, and Pakistan began immigrating to Nordic countries. Followed in subsequent decades by immigrants and refugees from Vietnam, India, Iran, Iraq, Afghanistan, Cambodia, and countries throughout Africa. Cultural landscape increasingly marked by relatively high degree of cultural homogenity now characterized by broad cultural diversity. Examination of emergence of new voices in Nordic cultural landscape in wide range of cultural expressive media, including literature, film, and visual and performing arts. Exploration of emergence of new forms of Nordic languages, such as well-documented phenomenon of Rinkeby Swedish. Concurrently scheduled with course C274A. P/NP or letter grading.

174B. Queer Scandinavia. (4) Seminar, three hours. Queer themes in Scandinavian literature, mainly from 19th and 20th centuries. Scandinavian literature had a more progressive view on homosexuality than most other countries, and Scandinavian writers portrayed homosexuality in explicit and radical ways as early as the turn of 19th century. Introduction to key theoretical works within field of gay and lesbian studies and queer studies, as well as presentation of historical view of how homosexuality has been perceived in world. P/NP or letter grading.

C180. Literature and Scandinavian Society. (4) Seminar, three hours. Discussion of selected aspects of Scandinavian society based on readings of contemporary literature as well as historical and/or sociological works. May be repeated for credit with consent of instructor and undergraduate adviser. May be concurrently scheduled with course C280. P/NP or letter grading.

C185. Seminar: Scandinavian Literature. (4) Seminar, three hours. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and undergraduate adviser. May be concurrently scheduled with course C285. P/NP or letter grading.

187FL. Special Studies: Readings in Scandinavian. (2) Seminar, two hours. Requisite: course 105B or 106B or 107B. Students must be concurrently enrolled in the main course of Scandinavian languages (Danish, Icelandic, Norwegian, Swedish) to augment work assigned in main course, including reading, writing, and other exercises. May be repeated for credit. P/NP or letter grading.

188SA. Individual Study: NU USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss a Seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Study: NU USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss a Seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.
mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USCE Facilitators. (2) Tutorial to be arranged. Enforced prerequisite course 188SB. Limited to junior/senior USCE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USCE 885 course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth and/or through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with a course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required.Honors content noted on transcript. Letter grading.

197. Individual Studies in Scandinavian. (2 to 4) Tutorial, three hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Signed reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research in Scandinavian. (4) Tutorial, three hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Cumulating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

C231. Introduction to Viking Age. (4) Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and Eddas. Concurrently scheduled with course C131. Graduate students do additional readings and write more extensive research papers. Letter grading.

C233A. Saga. (4) Seminar, three hours. Sagas are largest extant medieval prose literature. Texts in English, with selections from different types of Iceland sagas. Consideration of history and society that produced these narratives. Concurrently scheduled with course C133A. Graduate students do additional readings and write more extensive research papers. Letter grading.

C238B. Advanced Old Norse Prose. (4) Lecture, three hours. Requisite: course 132B. Readings of major saga texts. Also, secondary sources that bear on specific issues in Old Norse literature and medieval Scandinavian history. S/U or letter grading.

C237. Old Norse Literature and Society. (4) Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C137. Graduate students do additional readings and write more extensive research papers. Letter grading.

C241A. Theory of Scandinavian Novel. (4) Seminar, three hours. Preparation: advanced knowledge of one Scandinavian language. Analysis of predominant structural features of Scandinavian novel from its 18th-century beginnings through its rise in 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to novels. May be concurrently scheduled with course C141A. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C245A. Henrik Ibsen. (4) Seminar, three hours. Preparations: advanced knowledge of one modern Scandinavian language. Readings and discussion of selected plays by Henrik Ibsen. May be concurrently scheduled with course C146A. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C245B. Knut Hamsun. (4) Seminar, three hours. Preparation: advanced knowledge of one Scandinavian language. Readings and discussion of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored theme of nationality. Concurrently scheduled with course C145B. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C246A. August Strindberg. (4) Seminar, three hours. Preparation: advanced knowledge of one Scandinavian language. August Strindberg’s portrayals of marital conflict reflected and shaped literary representation of woman’s work, as well as its literary transformations, placed into Scandinavian, European, and feminist context. May be concurrently scheduled with course C146A. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C247B. Søren Kierkegaard. (4) Seminar, three hours. Preparation: advanced knowledge of one modern Scandinavian language. Readings and discussions of selected works of Søren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C147B. Lecture and seminar scheduled with course C145A. Graduate students do additional readings and write research papers of greater length and depth. S/U or letter grading.

C247S. Modern Breakthrough. (4) Seminar, three hours. Readings and discussions of selected works of realism, naturalism, and symbolism in late 19th-century Scandinavian literature and art. Concurrently offered with course C155S. S/U or letter grading.

C263A. Introduction to Danish Cinema. (4) Seminar, three hours. Introduction to history of cinema in Denmark, as well as to some fundamental concepts in study of film. Deliberately broad and historically centered approach to development of cinema in Denmark rather than focus on films of particular directors or topics. Theoretical readings from important critics, including Benjamin, Conboy, Chatman, along with several directed exercises, to develop vocabulary and critical method for discussing films in general and Danish cinema in particular. Other readings include selections from Hjort, Sandberg, Tangherlini, and other Scandinavian scholars. Concurrently scheduled with course C163A. S/U or letter grading.

C263B. Introduction to Swedish Cinema. (4) Lecture, three hours. Introduction to and exploration of history of Swedish cinema from silent era to present. Filmmakers include auteurs in international canon, such as Victor Sjöström, Mauritz Stiller, and Ingmar Bergman, as well as other key Swedish filmmakers such as Gustaf Molander, Jörn Sjöberg, Mai Zetterling, Viggo Sjöman, Jan Troell, Lukas Moodysson, and Josef Fares. Development of Scandinavian high art cinema and popular genres such as rural romanticism, melodrama, sex, crime, and horror. All films have English subtitles. Concurrently scheduled with course C163B. S/U or letter grading.

C263C. Introduction to Norwegian Cinema. (4) Seminar, three hours. Introduction to and exploration of history of Norwegian cinema from silent era to present. Filmmakers include Tancoed Irksen, Arne Skouen, Edith Carlinar, Nils Gaup, Erik Skjoldbjærg, Bert Hamre, Khalid Hussain, and Petter Næss. Particular focus on popular genres such as war films, noir, horror, romantic comedies, and documentaries. Concurrently scheduled with course C163C. S/U or letter grading.

C265. Seminar: Scandinavian Literature. (4) Seminar, three hours. Preparation: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser. May be concurrently scheduled with course C185S. S/U or letter grading.

C266A. Ingmar Bergman. (4) Seminar, three hours. Exploration of Ingmar Bergman's oeuvre, considered as film artist through various periods, spanning mid-1940s and late 1970s. Contextualization of work of this most personal of filmmakers within multiple frameworks of production and national film industries. Discussion of messages, events, and collective memory and its impact on cinema movement, and issues of auteur filmmaking. Concurrently scheduled with course C166A. S/U or letter grading.

C266C. Carl Dreyer. (4) Seminar, three hours. Carl Theodor Dreyer (1889 to 1968) is not only one of great masters of Nordic cinema, but of world cinema as well. Focus on films that Dreyer made during near half century between 1919 and 1964. Contextualization of silent and sound works of this most personal of filmmakers within multiple frameworks: Danish national film industry, transnational European cinema, and issues of auteur filmmaking. Writing by key Dreyer scholars such as David Bordwell, Ray Carney, Paul Schrader, Mark Sandberg, and others, as well as Dreyer’s own writings on cinema. All films have English intertitles or subtitles. Concurrently scheduled with course C166C. S/U or letter grading.

C271. Introduction to Scandinavian Folklore. (4) Seminar, three hours. Preparation: advanced knowledge of one modern Scandinavian language. Introduction to oral narrative and other extant Scandinavian tradition as well as to interpretive methodologies that strive to answer question why do people tell stories that they tell? Concurrently scheduled with course C171. Letter grading.

C275. Study of Oral Tradition: History and Methods. (4) Same as English M205A(S). Seminar, three hours. Exploration of scholarly and literary attempts to study, define, analyze, promote, and preserve oral traditions, from Homer and ancient Greece to origins of vernacular literatures, European romantic (re)discovery of oral tradition, 20th-century heuristic models of oral composition, and modern literary and popular verbal genres, such as joking and rapping. S/U or letter grading.

C273. Studies in Oral Traditional Genres. (4) Same as English M205C(S). Seminar, three hours. Exploration of oral traditions and literary attempts to study, define, analyze, promote, and preserve oral traditions, from Homer and ancient Greece to origins of vernacular literatures, European romantic (re)discovery of oral tradition, 20th-century heuristic models of oral composition, and modern literary and popular verbal genres, such as joking and rapping. S/U or letter grading.

C274A. Minority Cultures in Scandinavia. (4) Seminar, three hours. Exploration of emergence of immigrant cultures in Nordic region. Beginning in 1960s, large numbers of people from Turkey, Italy, and Pakistan began immigrating to Denmark, followed in subsequent decades by immigrants and refugees from Vietnam, India, Iran, Iraq, Afghanistan, Cambodia, and countries throughout Africa. Cultural landscape previously marked by relatively high degree of cultural homogeneity now characterized by broad cultural diversity. Examination of emergence of new voices in Nordic cultural landscape in wide range of cultural expressive media, including literature, film, and visual and performing arts. Exploration of emergence of new forms of Nordic languages, such as well-documented phenomenon of Rinkäby Swedish. Concurrently scheduled with course C174A. S/U or letter grading.

C280. Literature and Scandinavian Society. (4) Seminar, three hours. Designed for graduate students. Discussion of selected works of Scandinavian society based on readings of contemporary literature as well as historical and/or sociological material. May be repeated for credit (as determined by graduate adviser) with topic change. May be concurrently scheduled with course C180. Graduate students may meet for extra seminar hours and write research papers of greater length and depth. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar to be arranged. Opportunity for graduate student to participate in college, funded cultures in Nordic region. Beginning in 1960s, large numbers of people from Turkey, Italy, and Pakistan began immigrating to Denmark, followed in subsequent decades by immigrants and refugees from Vietnam, India, Iran, Iraq, Afghanistan, Cambodia, and countries throughout Africa. Cultural landscape previously marked by relatively high degree of cultural homogeneity now characterized by broad cultural diversity. Examination of emergence of new voices in Nordic cultural landscape in wide range of cultural expressive media, including literature, film, and visual and performing arts. Exploration of emergence of new forms of Nordic languages, such as well-documented phenomenon of Rinkäby Swedish. Concurrently scheduled with course C174A. S/U or letter grading.
Yiddish

Lower-Division Courses

10. From Old World to New: Becoming Modern as Reflected in Yiddish Cinema and Literature. (5) Lecture, three hours; discussion, one hour. Use of media of Yiddish cinema (classic films and documentaries) as primary focal points to examine ways in which one heritage culture (that of Ashkenazic Jews, adapted to forces of modernity (urbanization, immigration, radical social movements, assimilation, and destructive organized anti-Semitism) from late-19th century to present. Exploration of transformational themes in depth through viewing of selected films, readings, research and weekly papers, and in-class discussions. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to 12 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

99. Student Research Programs. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in a minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

101A. Elementary Yiddish. (4) Lecture, four hours. Introduction to grammar; instruction in listening, speaking, reading, and writing skills. P/NP or letter grading.

102B-102C. Intermediate Yiddish. (4-4) Lecture, three hours. Requisite: course 102A. Course 102B is requisite to 102C. Grammatical exercises, reading and linguistic analysis of texts, conversation. P/NP or letter grading.

121C. Special Topics in Yiddish Literature. (4) Lecture, three hours. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of wide range of 19th- and 20th-century literature. P/NP or letter grading.

130. Introduction to Yiddish Culture and Language through Film. (4) Lecture, three hours. Introduction to Yiddish language and culture, with focus on classic Yiddish films and documentaries as integral tools for accessing culture associated with this heritage language. Viewing and discussion to gain deeper understanding and appreciation of complexity and scope of Yiddish culture and in particular of annihilated Yiddish civilization of 20th century. These films represent the best and most accessible way available to hear Yiddish spoken in fluent, natural manner. P/NP or letter grading.

131C. Special Topics in Yiddish Literature. (4) Lecture, three hours. Requisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of wide range of 19th- and 20th-century literature. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

197. Individual Studies in Yiddish. (2 to 4) Tutorial, to be arranged. Limited to seniors. Individual intensive study or more specialized investigation of topics in Yiddish, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

596. Directed Individual Study or Research in Yiddish. (4) Tutorial, to be arranged with faculty member who directs study or research (course section to be identified by two-letter code using initials of sponsoring instructor—see department for ID number). May be repeated once. S/U grading.

597. Preparation for PhD Qualifying Examinations. (4) Tutorial, to be arranged with faculty member who directs study (see department for ID number). S/U grading.
Upper-Division Course
199. Directed Research in Family Medicine. (2 to 8)
Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Overview
The Fiat Lux curriculum provides an intellectual space for faculty and students to explore new and interdisciplinary areas of topics within an intimate seminar setting.

The Fiat Lux Seminar Program is a unique educational initiative that allows faculty to broadly explore any topic and subject area while also connecting with first-year students. The Fiat Lux subject area and Fiat Lux 19 provide faculty with an intellectual space to explore new or interdisciplinary areas and topics that may be beyond their home academic department. Under the course number 19, Fiat Lux seminars may be offered in all academic departments.

Fiat Lux
Lower-Division Course
19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

Overview
The Department of Film, Television, and Digital Media is dedicated to advancing the art and craft of media making and research in an increasingly complex and technology driven world. The department believes that innovative filmmaking and a critical understanding of media culture are necessary catalysts for social change. The department seek to cultivate a diverse body of students, empowering them to engage with different modes of thinking and creating and to contribute to social change through the collaborative arenas of media creation and intellectual inquiry.

For current or specific information about the programs and faculty members, see the department website.

Undergraduate Major
Film and Television BA
The undergraduate Film and Television major encourages development of a personal vision that incorporates creative, practical, intellectual, and aesthetic values. Within the context of a liberal arts education, the program provides a broad background in the field and in the diversity of film and television practice, including courses in history and theory, critical thinking, animation, screenwriting, and the fundamentals of film, video, and television production.

Capstone Major
The Film and Television major is a designated capstone major. Undergraduate students are required to complete one departmentally sponsored internship course as well as coursework related to the senior thesis concentration area. All courses, including capstone senior thesis projects, involve work shopping individual projects. Group participation in the creation and production of each student’s project is core to the curriculum. Specific student learning objectives vary based on concentration area.

Learning Outcomes
The Film and Television major has the following learning outcomes:

- Production of scholarly and artistic work in the areas of history, criticism, and theory of film, television, and digital media
- Mastery of fundamentals of preproduction, production, and postproduction of film, television, and digital media
• Demonstrated advanced understanding of one or more areas of study in cinema and media studies, filmmaking, screenwriting, animation, digital media, and producing

Entry to the Major

Admission

Students are admitted for fall quarter only. Admission is highly competitive, and only a limited number of students can be accepted each year. In addition to the UC Application for Admission and Scholarships, first-year and transfer applicants must submit a School of Theater, Film, and Television supplemental application. For information about the supplemental application, see the major website.

Transfer Students

Transfer applicants to the Film and Television major with 90 or more units must meet UCLA transfer requirements and, before arriving at UCLA, must complete the School of Theater, Film, and Television general education requirements by either (1) taking college courses that satisfy the school general education requirements or (2) completing the Intersegmental General Education Transfer Curriculum (IGETC) at a California community college or (3) achieving UC reciprocity through completion of general education requirements at another UC campus while a student there.

In addition to the UC Application for Admission and Scholarships, transfer applicants must submit a School of Theater, Film, and Television supplemental application. For information about the supplemental application, see the major website.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Film and Television 4, 6A, 10A, 33, 51, 84A, and one course from Theater 10, 15, 20, 28A, 28B, 28C, or 30.

The Major

Required: Film and Television 101A, 106B or 106C, 134, 150, 154, 155, 163; one cinema and media studies elective from 107, 108, 109, M111, 112, 113, 114, M117, or 122N; one capstone departmentally sponsored internship (course 195); and a senior concentration (20 units) of advanced film coursework selected from among any one or more of the following areas of study, including at least two courses from within one area:

Screenwriting: Film and Television 135A, 135B, 135C.

Producing: Film and Television 146, C147, 183A, 183B, 183C, 184B.

Animation: Film and Television C181A, C181B, C181C.

Digital Media: Film and Television C142, C144, C145, C148.

Policies

The Major

Courses taken to satisfy the senior concentration may not also be applied toward other course requirements in the major.

Students should be mindful of the exigencies inherent in filmmaking and be prepared to meet the additional demands of time and costs.

Students are required to perform assignments on each other’s projects. In addition, the department reserves the right to hold for its own purposes examples of any work done in classes and to retain for distribution such examples as may be selected.

Undergraduate Minor

Film, Television, and Digital Media Minor

The Film, Television, and Digital Media minor is designed for students who wish to augment their major program of study with a series of courses that promote the study of film, television, and digital media as art forms with social, political, cultural, and economic significance. The minor consists of a selection of lower and upper-division courses that introduce students to the practice and critical study of film, television, and digital media.

Admission

To enter the minor students must have declared a major other than the Film and Television major, be in good academic standing, have a minimum 3.0 grade-point average, have completed at least three film and television courses with grades of B or better, and file an application at the Student Services Office, 103 East Melnitz Building, 310-206-8441. For information about the minor, see the minor website.

All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by each student’s school or College.

The Minor

Required Lower-Division Courses (8 to 11 units): Two courses selected from Film and Television 4, 6A, 10A, 33, M50, 51, or 84A.

Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. All units applied toward the minor must be taken in residence at UCLA. Film and television courses taken at other institutions cannot be applied toward the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Majors

Film and Television MA, CPhil, PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduat Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Film and Television MFA

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduat Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Film and Television

Lower-Division Courses

1A-1B-1C. Freshman Symposium. (1-1-1) Labora- tory, three hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Limited to Film and Television majors. Structured forum in which freshmen meet on regular basis to discuss curricular issues, meet with faculty members from department, and have exposure to array of guest speakers from media industries. Letter grading.

4. Introduction to Art and Technique of Filmmaking. (8) Lecture, four hours; discussion, one hour. Students acquire understanding of practical and aesthetic challenges undertaken by artists and professionals in making of motion pictures and television. Examination of film as both art and industry; storytelling, sound and visual design, casting and performance, editing, finance, advertising, and distribution. Exploration of American and world cinema from filmmaker’s perspective. Honing of analytical skills and development of critical vocabulary for study of filmmaking as technical, artistic, and cultural phenomenon. P/NP or letter grading.

6A. History of American Motion Picture. (6) Lecture/ screenings, six hours; discussion, one hour. Historical and critical survey with examples, of American motion picture both as developing art form and as medium of mass communication. Letter grading.

10A. American Television History. (5) Lecture/ screenings, four hours; discussion, one hour. Critical survey of American television history from its inception to present. Examination of interrelationships between program forms, industrial paradigms, social trends, and culture. Starting with television’s hybrid origins in radio, theater, and film, contextualization, viewing, and discussion of key television shows, as well as Holly-wood films that comment on radio and television.
113. Film Authors. (5) Lecture/screenings, four hours; discussion, one hour. In-depth study of specific film author (director or writer). May be repeated for credit with topic change. P/NP or letter grading.

114. Film Genres. (5) Lecture/screenings, four hours; discussion, one hour. Study of specific film genre (e.g., Western, gangster cycle, musical, silent epic, comedy, social drama). May be repeated for credit with topic change. P/NP or letter grading.

M117. Chicanos in Film/Video. (5) Same as Chicana/o and Central American Studies M1114. Lecture/screenings, five hours; discussion, one hour. Goal is to gain nuanced understanding of Chicano cinema as political, social, cultural, economic, and aesthetic practice. Examination of representation of Mexican Americans and Chicanos in four Hollywood genres—silent greater films, social problem films, Westerns, and gang films—that are major genres that account for films about or with Mexican Americans produced between 1908 and 1980. Examination of recent Chichano-produced films that subvert or signify on these Hollywood genres, including Zoot Suit, Ballad of Gregorio Cortez, and Born in East L.A. Consideration of shorter, more experimental work that critiques Hollywood image of Chicanos. Guest speakers include both pioneers and up-and-coming filmmakers. P/NP or letter grading.

122D. Film Editing: Overview of History, Technique, and Practice. (4) Lecture, three hours. Exploration of film editing techniques, how they have evolved, and continue to evolve. Examination of history of editing, as well as current editing trends, terminology, and workflow. P/NP or letter grading.

122E. Digital Cinematography. (4) Lecture, three hours. With lectures, screenings, and demonstrations, study of principles of digital cinematography. How tools and techniques affect visual storytelling process. Topics include formats, aspect ratios, cameras, lenses, special effects, internal menu picture manipulation, lighting, composition, coverage, high definition, digital exhibits, film lab, digital projection, and multi-camera shooting. P/NP or letter grading.

122I. Writing for Animation Series. (5) Lecture, three hours. Introduction to craft and business of writing animation for television. Original feature animation produced specifically for this medium, along with its many formats. Business model has changed radically over past five decades, as have types of shows that have been created. Designed to put shows in historical perspective, with eye toward where industry is heading given changes in technology and continuing (and growing) scrutiny of outside forces such as corporations and FCC. Letter grading.

122J. Disney Feature: Then and Now. (5) Lecture, three hours; discussion, three hours. Study and analysis of Disney’s animated features. Evaluation of why Disney’s animated features have dominated until recently and ramifications of this dominance on animation and society. Letter grading.

122M. Film and Television Directing. (4) Lecture, three hours. Through discussions, screenings, demonstrations, and guest, exploration of script, previsualization, shooting acting and camera setup. Projects focus on relationship to story, practical on-set directing, and directing for camera. P/NP or letter grading.

122N. History of Animation in American Film and Television. (5) Lecture, three hours. History of animation from its precinematic origins to recent films of Disney, Pixar, DreamWorks, Ghibli, and others. Place of animation in pop culture, racial imagery and ethnicity, stereotypes, gender, and how it reflects American society. P/NP or letter grading.
126. Acting for Film and Television. (4) Studio, six hours. Projects in acting for television, video, and film. May be repeated twice for credit. P/NP or letter grading.

128. Media and Ethnicity. (4) Lecture, three hours. Utilizing an experiential, exploratory, and creative process in the study of the role of mass media in the processes and products of mass culture. Prerequisites: course 101A. Letter grading.

CM129. Contemporary Topics in Theater, Film, and Television. (2) (Same as Theater CM129.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of direction, production, and performance. Prerequisites: course 101A. Letter grading.

131. Introduction to Television Writing. (6 or 8) Lecture, three hours; laboratory, three hours; and seminar, three hours. Problems in film and television, with emphasis on uniqueness of computer-mediated expression. Letter grading.

132. Television Writing Workshop. (6) Laboratory, three hours. Students write first 10 pages of pilot for original one-hour drama or dramedy, or half-hour comedy series. Examination of topics such as pitching; television writing format and structure; current trends in television; how to develop characters and stories; and how to take idea from concept through logline, beat sheet, and outline to final professional first draft. Letter grading.

133A. Intermediate Television Writing Variety/Sketch Comedy. (8) Lecture, three hours. Recommended requisite: course 131. Examination of writing for sketch, talk, and other hybrid comedic television shows. Review of various types of parody including monologues, commercial parodies, slice-of-life comedy, character-driven comedy, physical comedy, comedy of absurd, and political and topical satire. Students write comedy two- or three-minute sketches and portfolios of monologue jokes. Offered every spring.

133B. Intermediate Television Writing One-Hour Drama/Half-Hour Dramedy Series. (6 or 8) Lecture, three hours. Recommended requisite: course 131. Examination of one-hour drama and dramedy formats, covering style, content, and structural analysis. Review of principles behind network needs and how pilots are chosen across networks: courses 101A, 185. Limited to Film and Television majors and designed for seniors. Prerequisites: courses in film and television writing. First act of original screenplay to be developed in course 135A, followed by second act in course 135B, and third act in course 135C. Concurrently scheduled with course C454C. Letter grading.

140. Interactive Expression. (4) Lecture, six hours. Introduction to history and practice of interactive media, with emphasis on uniqueness of computer-mediated expression. Letter grading.

141. Film and Television Sound Recording. (4) Lecture, three hours; laboratory, three hours. Techniques of sound design and recording in film and television. Offered in spring only. May be repeated twice for credit. Concurrently scheduled with course C452C. Letter grading.

143. Moving Digital Image. (4) Lecture, three hours; laboratory, three hours. Investigation of different ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical visualization environment. Students conceive and produce number of short projects. Concurrently scheduled with course C243C. Letter grading.

144. Interactive Multimedia Authoring. (4) Lecture, three hours; laboratory, three hours. Introduction to expressive and aesthetic potential of interactive digital media and its theoretical issues. Exploration of methodologies and tools for media integration, interaction design, and interactive audiovisual construction. Students conceive, produce, and master individual interactive multimedia projects. May be repeated once for credit. Concurrently scheduled with course C244C. Letter grading.

146. Art and Practice of Motion Picture Producing. (4) Lecture, three hours. Exploration of role of producer as both artist and business person. Comparative analysis of screenplays and shooting scripts. Emphasis on assembly of creative team and analysis of industrial context, both independent and studio. Screenplays viewed outside of class and reserve on Powell Library. Letter grading.

147. Production Management: Physical Production for Creatives. (4) Lecture, three hours; laboratory, one hour. Analysis of procedure, problems, and budgeting in planning feature-length script for film and television production, with emphasis on role of producer and creative organizational techniques of producing. Concurrently scheduled with course C247C. Letter grading.

148. Advanced Digital Media Workshop. (4) Laboratory, two hours; discussion, four hours. Designed for students with previous laboratory course experience to provide opportunity to create larger-scale digital media works with advanced software tools and techniques in small process-oriented, constructive workshop environment. May be repeated twice for credit. Concurrently scheduled with course C248C. Letter grading.

150. Cinematography. (4) Lecture, three hours; laboratory, three hours. Course 101A. Corequisite: course 154. Limited to Film and Television majors. Introduction to motion imaging photography for thorough understanding of fundamental tools and principles of cinematography to create images that support and enhance story of film, achieve comprehen- sion of principles of motion imaging photography through lectures, discussions, and screenings, develop skills of cinematography by shooting exercises during laboratory period, and acquire appreciation of art of cinematography. Language and skills of image construction provided, as well as image analysis and deconstruction. Letter grading.

151. Introduction to Experimental Filmmaking. (4) Lecture, three hours; laboratory, to be arranged. Limited to Film and Television majors. Introduction to principles and practices of film and television sound recording, including supervised exercises. P/NP or letter grading.

152. Film and Television Sound Production. (4) Lecture, three hours; laboratory, three hours. Enforced requisite: courses 101A, 185. Limited to Film and Television majors. Introduction to principles and tools of sound gathering in visual storytelling through lectures, discussions, and screenings. Creative listening to sound of everyday life. Introduction to sound techniques covering topics such as people, environment, spatial relationships, movement, color, special effects, and continuity. Letter grading.

153. Motion Picture Lighting. (4) Lecture, three hours; laboratory, three hours. Enforced requisite: courses 101A, 185. Limited to Film and Television majors. Introduction to principles and tools of lighting used in visual storytelling through lectures, discussions, and screenings. Techniques of lighting for both narrative and non-narrative films. Letter grading.

154B. Advanced Film Editing. (4) Lecture, three hours: laboratory, one hour. Preparation: submission of rough cut of existing project or proposal to edit work of another director. Enforced requisite: courses 154, 185. Limited to Film and Television majors. Introduction to artistic and technical problems of film editing, with practical experience in editing and synchronous sound. Letter grading.

154C. Letter grading.

157. Lighting for Film and Television. (4) Lecture, two hours; laboratory, six hours. Required: course 101A. Corequisite: course 152, 158. Limited to departmental majors. Through discussions, demonstrations, outside speakers, and laboratory assignments, demystification of ever-changing world of digital workflow. Students plan, schedule, and budget their overall workflow in preproduction. May be repeated once for credit. Concurrently scheduled with course C454C. Letter grading.

158. Digital Workflow. (2 to 4) Lecture, three hours; laboratory, two hours. Required: course 101A. Corequisite: course 152, 158. Limited to departmental majors. Through discussions, demonstrations, outside speakers, and laboratory assignments, demystification of the world of digital workflow. Students plan, schedule, and budget their overall workflow in preproduction. May be repeated once for credit. Concurrently scheduled with course C454C. Letter grading.

164B. Contemporary Topics in Theater, Film, and Television. (2) (Same as Theater CM129.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of direction, production, and performance. Prerequisites: course 101A. Letter grading.

165. Intermediate Digital Media Workgroup. (4) Lecture, three hours; laboratory, two hours. Students with previous laboratory course experience to acquire appreciation of digital image, technology, and aesthetics of digital image, in context of emerging digital culture. Students conceive and produce several digital image visualizations. May be repeated once for credit. Concurrently scheduled with course C242C. Letter grading.

166. Film Editing. (4) Lecture, three hours; laboratory, three hours. Enforced requisite: courses 101A, 185. Limited to Film and Television majors. Introduction to principles and tools of lighting used in visual storytelling through lectures, discussions, and screenings. Creative listening to sound of everyday life. Introduction to sound techniques covering topics such as people, environment, spatial relationships, movement, color, special effects, and continuity. Letter grading.

167. Lighting for Film and Television. (4) Lecture, two hours; laboratory, six hours. Required: course 101A. Corequisite: course 150. Limited to Film and Television majors. Introduction to digital media and tools with advanced software tools and techniques of virtual production environments and digital postproduction tools. Letter grading.

168. Digital Workflow. (2 to 4) Lecture, three hours; laboratory, two hours. Required: course 101A. Corequisite: course 152, 158. Limited to departmental majors. Through discussions, demonstrations, outside speakers, and laboratory assignments, demystification of the world of digital workflow. Students plan, schedule, and budget their overall workflow in preproduction. May be repeated once for credit. Concurrently scheduled with course C454C. Letter grading.

169. Lighting for Film and Television. (4) Lecture, two hours; laboratory, six hours. Required: course 101A. Corequisite: course 150. Limited to Film and Television majors. Introduction to digital media and tools with advanced software tools and techniques of virtual production environments and digital postproduction tools. Letter grading.
164. Directing Actors. (4) Laboratory, four hours. Ex-erises in analysis of script and character for purpose of directing actors. Emphasis on eliciting best possible performance from actors. May be repeated twice for credit. P/NP or letter grading.

C168. Creative Location Film Production. (8) Lecture, four hours; discussion, four hours; laboratory, to be arranged. Limited to directing or producer's program. Selected problems of location, production, direction, and editing. Emphasis on creative location techniques. Practical application of solving problems and communication within limitations of production. Concurrently scheduled with course C468. Letter grading.

175A-175B. Undergraduate Film Production. (12–4) Laboratory, four hours; discussion, eight hours. Prerequisite: course C175A. Completion of post-production (editing, creation of sound tracks) for short film begun in course C175A. P/NP or letter grading.

M177. Film and Television Acting Workshop. (2) (Same as Theater M178.) Laboratory, four hours. Workshop to provide acting opportunities for students to hear, perform, and evaluate scenes. Three different production styles to which performers may need to respond. Selected scenes from plays, screenplays, and one act plays. (1) single-camera experience, and (3) multiple-camera experience. May be repeated twice for credit. Letter grading.

178. Film and Television Production Laboratory. (2 to 8) Laboratory, to be arranged. Supervised laboratory experience in various aspects of film and television production. May be repeated for maximum of 12 units, but only 8 units may be applied toward Film and Television major. Letter grading.

179. Digital Film and Television Production. (2-8) Laboratory, six hours. Supervised laboratory experience in various aspects of film and television production. Offered in summer only. Letter grading.

180A. Animation Fundamentals. (5) Lecture, six hours; laboratory, six hours. Fundamentals of animation through exercises and preparation of short animated film. Students create 10-second film in one of traditional techniques (non-computer), with music and/or sound effects. Offered in summer only. Letter grading.

180B. Writing for Animation. (4) Lecture, two hours; laboratory, six hours. Analysis and practice of effective visual storytelling through creation of three production stories. Concurrently scheduled with course C180A. Letter grading.

180C. Stop Motion Fundamentals Workshop. (2 to 4) Lecture, six hours; laboratory, six hours. Exercises designed to teach technical skills, processes, and principles of motion and timing. Use of range of materials, building animation performance in split-second increments arranged to give illusion of movement. Exploration of early history of stop motion. Collaborative creation of stop-motion film with each student directing and animating portion of film. Offered in summer only. Letter grading.

C181B. Writing for Animation. (4 or 8) Lecture, six hours; studio, to be arranged. Prerequisite: required laboratory. Concurrently scheduled with course C181A. Experiences in creative writing and planning for animated film. May be repeated for maximum of 16 units. Concurrently scheduled with course C481B. P/NP or letter grading.

C181C. Animation Workshop. (4 or 8) Studio, six hours. Preparation for first class meeting. Required for students in course C181A. Organization and integration of various creative arts used in animation to form complete study of selected topic. May be repeated for maximum of 8 units. Concurrently scheduled with course C481C. P/NP or letter grading.

182. Power, Identity, and Justice. (4) Lecture, three hours. Examination of how politics, economics, labor, and identity intersect and affect representation, employment, and industry cultures, especially of groups long underserved in mainstream film, television, and media industry. Offered in summer only. P/NP or letter grading.

18A. Producing I: Film and Television Development. (4) Lecture, three hours. Open to nonmajors. Critical analysis of contemporary entertainment industries and practical approach to understanding and implementing development features of film and television scripts. Through scholarly and trade journal readings, in-class discussions, script analysis, and select guest speakers, exposure to various entities that comprise the entertainment development process. Basic introduction to story and exploration of technique for evolving screenplays and teleplays through writing of coverage. May be taken independent study. Letter grading.

18B. Producing II: Entertainment Economics. (4) Lecture, three hours. Open to nonmajors. Critical understanding of strategies and operating principles that drive flow of revenue in entertainment industry. Exploration of theoretical frameworks and development of critical perspective, while studying industrial processes through which movie and television properties are financed and exploited throughout all revenue streams. May be taken independently for credit. Letter grading.

183C. Producing III: Marketing, Distribution, and Exhibition. (4) Lecture, three hours. Open to nonmajors. Marketing and distribution of feature films across multiple exhibition platforms and subsequent reception and consumption by audiences. Focus on engagement between distributor, exhibitor, and audience and analysis of various conceptual frameworks and industrial strategies, with which these relationships are conceived and operate. May be taken independently for credit. Letter grading.

184B. Overview of Contemporary Television Industry. (4) Lecture, three hours. Examination of evolving economic structures and business practices in contemporary Hollywood television industry, with emphasis on operations of networks and cable companies, series development, and network branding from 1947 to present. Letter grading.

185. Intermediate Undergraduate Film Production. (6) Laboratory, six hours; Requisites: courses 52, 154, 155, 163. Limited to Film and Television majors. Instruction and exercises in all stages of film production. Letter grading.

C186A. Advanced Documentary Workshop. (4) Lecture, three hours; laboratory, three hours; fieldwork, four to six hours. Prerequisite: course 186A or equivalent experience. Concurrently scheduled with course C403B. Letter grading.

C186B. Advanced Documentary Workshop. (4) Lecture, three hours; laboratory, three hours; fieldwork, four to six hours. Prerequisite: course C186A. Intermediate viewing and discussion of selected documentaries and instruction in various production skills necessary to create video documentaries. Completion of series of exercises from conceptualization through postproduction, culminating in production of short documentary. Concurrently scheduled with course C403B. Letter grading.

C186C. Advanced Documentary Workshop. (4) Lecture, three hours; laboratory, three hours; fieldwork, four to six hours. Prerequisite: course C186B. Advanced viewing and discussion of selected documentaries and instruction in various production skills necessary to create video documentaries. Completion of series of exercises from conceptualization through postproduction, culminating in production of short documentary. Concurrently scheduled with course C403C. Letter grading.

187A. Global Film and Television Development. (4) Lecture, three hours. Exploration of film and television development practices in key international markets. Introduction to key international markets, prominent global development and production entities, and their properties and development strategies. Designed to blend theory with practical application. Students read both academic literature and trade publications addressing development in U.S. and around world, and gain understanding of mechanisms that drive development in domestic and international territories. P/NP or letter grading.

187B. Producing I: Domestic and Global Entertainment Industry Careers and Strategies. (4) Lecture, three hours. Exploration of select film and television career paths and strategies in U.S. and major international markets. Introduction to typical approaches and strategies of producers, screenwriters, directors, and creative executives in U.S. and abroad. Students take part in moderated discussions with domestic and international industry professionals. Read both academic literature and trade publications addressing current state of domestic and global media industries. Through readings and discussions, students gain understanding of rapidly changing global entertainment landscape, and current and future employment trends and project development strategies. P/NP or letter grading.

187C. Scripted and Unscripted Series Development for Domestic and Global Streaming Services. (4) Lecture, three hours. Designed to enhance students' understanding of processes involved in domestic and international fiction and nonfiction development of projects for streaming services. Students are acquainted with common business and creative practices, while expanding their critical and practical understanding of quickly evolving and transforming global streaming landscapes. Examination of creative development processes and strategies for scripted and unscripted series for streaming services in U.S., and similarities and differences in business as well as creative approaches in major international territories. Examination of latest trends in fiction and nonfiction development, including strategies to work with international coproduction partners and developing projects using pre-viz and virtual production techniques. Covers streaming markets in North America, Europe, Asia, and Central and South America. P/NP or letter grading.

188A. Special Courses in Film, Television, and Digital Media. (4) Lecture, three hours; discussion, one hour. Special topics in film, television, and digital media for undergraduate students taught on experimental or temporary basis. May be repeated for credit. P/NP or letter grading.

188A. Special Courses in Film, Television, and Digital Media. (4) Tutorial to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188B. Special Courses in Film, Television, and Digital Media. (4) Tutorial to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188C. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Revision of student content noted on transcript. P/NP or letter grading.
200. Seminar: Research, Methods, and Resources. (6) Seminar, three hours; laboratory, four to six hours. Additional screenings and/or video laboratory work as required. Designed for graduate students. Examination of and study of research methods, techniques, and resources related to film and television research, including development of computer skills for preparation of bibliographies, online database searching and retrieval, and, when appropriate, use of computer/digital technologies. Letter grading.

201A. Seminar: Media Industries and Cultures of Production—Foundations. (6) Seminar, three hours; film screenings, three hours. Critical survey of scholarly traditions and methods (ethnographic, sociological, cultural studies) that have been used to study film and television production practices as cultural, social, and industrial phenomena, as basis for individual student research projects. Letter grading.

201B. Seminar: Media Industries and Cultures of Production—Transmedia. (6) Seminar, three hours; film screenings, three hours. Examination of contemporary production research and transmedia practices, including innovations in marketing, licensing, distribution, industrial organization, digital culture, new technologies, and evolving relations between fans and producers in digital economy. Letter grading.

203. Seminar: Film and Other Arts. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies in interrelationships between film and other performing arts, or literature, with emphasis on ways these other arts have influenced film. May be repeated twice for credit. S/U or letter grading.

204. Seminar: Visual Analysis. (6) Seminar, three hours; film screenings, two to four hours. Study of visual analysis (or textual analysis), using DVD access to film and TV screenings as a means to learning what makes a film great and distinct art form. Exploration of role of visual style in narrative fiction filmmaking to attempt to understand some ways it can operate. Letter grading.

205. Seminar: Videographic Scholarship. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Critical study of reception and use of visual-style in narrative fiction filmmaking to attempt to understand some ways it can operate. Letter grading.

209A. Seminar: European Film History. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies in different periods of European cinema or movements. Topics may include French New Wave or French cinema, Soviet cinema, and Soviet silent cinema. Letter grading.

210. Seminar: History of Film. (6) Seminar, three hours; film screenings, four to six hours. Introduction to American film history. Letter grading.

211. Seminar: Historiography. (6) Seminar, three hours; film screenings, four to six hours. Examination of issues related to internship site through series of reading assignments constructed by faculty sponsor and student coordinator. May be repeated for credit with consent of Center for Community Engagement. Individual contract with supervising faculty member required. P/NP or letter grading.

199. Directed Research or Senior Project in Film, Television, and Digital Media. (2 or 4) Tutorial, one hour; fieldwork, eight to ten hours. Limited to juniors/seniors. Corporate internship in supervised setting in business related to film, television, and digital media industries. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

195. Corporate Internships in Film, Television, and Digital Media. (2) Tutorial, one hour; fieldwork, eight to ten hours. Limited to juniors/seniors. Corporate internship in supervised setting in business related to film, television, and digital media industries. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

193CE. Corporate Internships in Film, Television, and Digital Media. (4) Tutorial, one hour; fieldwork, eight to ten hours. Limited to juniors/seniors. Corporate internship in supervised setting in business related to film, television, and digital media industries. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

206B. Seminar: Selected Topics in American Film History. (6) Seminar, three hours; film screenings, four to six hours. Seminar with focus on specific topic or period in American film history. Letter grading.

206C. Seminar: American Film History. (6) Seminar, three hours; film screenings, four to six hours. Introduction to historical, industrial, and aesthetic history of American film. Letter grading.

206D. Seminar: Silent Film. (6) Seminar, three hours; film screenings, four to six hours. Discussion of silent film from its beginning in 1895 to transition to sound cinema in 1927 to 1930. Film viewings discussed in terms of genre, national cinema, formal developments, and directors. Readings on film historical and theoretical issues. Letter grading.

208A. Seminar: Film Structure. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Examination of film conventions, both fictional and nonfictional, and of role of structure in motion picture. S/U or letter grading.

208B. Seminar: Classical Film Theory. (6) Seminar, three hours; film screenings, four to six hours. Study of principal topics and lines of inquiry that characterize theoretical writings of Arnisn, Eisenstein, Bazin, Kraeuter, etc. Letter grading.

208C. Seminar: Contemporary Film Theory. (6) Seminar, three hours; film screenings, four to six hours. Required. Course 208B. Designed for graduate students. Study of redefinition of aims and methods of film theory through contemporary writings. S/U or letter grading.

209D. Animated Film. (6) Seminar, three hours; film screenings, three hours. Designed for graduate students. Fictional film and its relationship to contemporary culture. S/U or letter grading.

210D. Animated Film. (6) Seminar, three hours; film screenings, three hours. Designed for graduate students. Fictional film and its relationship to contemporary culture. S/U or letter grading.

210. Viewing and Reading Media. (4) Lecture, three hours; media viewings, three hours. Study engaged media originating on different platforms and deriving from different modes of production, cultural locations, and various critical approaches. Each approach considered in relation to role of media in society. May be repeated once for credit. S/U or letter grading.

211B. Seminar: Literature of Film. (6) Seminar, three hours; film screenings, three hours. Designed for graduate students. Studies in ways film affects and is affected by social behavior, belief, and value systems; considered in relation to role of media in society. May be repeated once for credit. S/U or letter grading.

220. Seminar: Television and Society. (6) Seminar, four hours; screenings/discussion, three hours. Designed for graduate students. Study of ways television forms affect and are affected by social behavior, belief,
and value systems; study of technological and economic aspects of medium. May be repeated once for credit. S/U or letter grading.

221. Seminar: Film Authors. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies of patterns, styles, and themes of such genres as Western, gangster, war, science fiction, comedy, etc. May be repeated twice for credit. S/U or letter grading.

222. Seminar: Film Genres. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies of patterns, styles, and themes of such genres as Western, gangster, war, science fiction, comedy, etc. May be repeated twice for credit. S/U or letter grading.

223. Seminar: Visual Perception. (6) Seminar, three hours; film screenings, three hours. Aesthetic, psychological, physiological, and phenomenological approaches to vision as they relate to ways in which viewers experience and see film, television, and digital media. Letter grading.

224. Computer Applications for Film Study. (6) Lecture, three hours; film screenings, three hours. Survey of computer applications relevant to film study, principally computer-vidiotic systems and image capture technology. S/U or letter grading.

225. Seminar: Videogame Theory. (6) Seminar, three hours; laboratory, three hours. Videogame theory, with exploration of new media, rather than looking at history, industrial practice, social effects, or any other of many interesting questions that games also raise. Acknowledgment of roots in film, television, and media and investigation of emerging videogame field. S/U or letter grading.

CM229. Contemporary Topics in Theater, Film, and Television. (2) (Same as Theater CM229.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate students. Designed for film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions and development of the medium. S/U or letter grading.

242. Digital Imagery and Visualization. (4) Lecture, three hours; laboratory, three hours. Interactive hands-on exploration of techniques of digital still imaging and aesthetics of digital image, in context of examining dynamics of cultural constructions and visual codes. Students conceive and produce several digital image artifacts. May be repeated once for credit. Concurrently scheduled with course C142. Letter grading.

243. Moving Digital Image. (4) Lecture, three hours; laboratory, three hours. Investigation of different ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical aspects of this production environment. Students conceive and produce number of short projects. Concurrently scheduled with course C143. Letter grading.

244. Interactive Multimedia Authoring. (4) Lecture, three hours; laboratory, three hours. Introduction to expressive and aesthetic potential of interactive digital media and its theoretical issues. Exploration of methodology and tools for media integration, interface design, and interactive audiovisual construction. Students conceive, produce, and master individual interactive multimedia projects. May be repeated once for credit. Concurrently scheduled with course C144. Letter grading.

246. Seminar: Issues in Electronic Culture. (6) Seminar, three hours; laboratory, three hours. Critical studies seminar with major hands-on laboratory component that explores digital technologies on contemporary culture and aesthetics. Students do laboratory projects using visualization, image manipulation tools, and Internet authoring tools. Letter grading.

248. Advanced Digital Media Workgroup. (4) Laboratory, two hours; discussion, four hours. Designed for students with previous laboratory course experience to provide opportunity to create larger-scale digital media works with advanced software tools and techniques in small process-oriented, creative workshop environment. May be repeated twice for credit. Concurrently scheduled with course C148. Letter grading.

270. Seminar: Film Criticism. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Focus on analysis and evaluation in relation to central works of cinema. May be repeated once for credit. S/U or letter grading.

271. Seminar: Television Criticism. (6) Seminar, four hours; screenings/discussion, three hours. Designed for graduate students. Analysis of major forms of television production and criticism it has elicited. May be repeated once for credit. S/U or letter grading.

272. Seminar: Contemporary Film and Television Criticism. (6) Seminar, three hours; film and television screenings, four to six hours. Limited to Film and Television PhD candidates. Study and practice of analytic and critical response, with emphasis on contemporary film and television. S/U or letter grading.

274. Research Design 1: Initial Research Design. (6) Seminar, three hours. Introduction to components of dissertation prospectus including development of fields of study, situating one's work in relation to fields of audio/visual material. Study helps prepare students for completion of research questions and analysis of data. Letter grading.

274A. Research Design 1: Initial Research Design. (8) Seminar, three hours. Development of fields of study, situating one's work in relation to fields of audio/visual material. Study helps prepare students for completion of research questions and analysis of data. Letter grading.

274B. Research Design 2: Bibliography. (6) Seminar, three hours. Designed for second-year Film and Television PhD students. Examination of general principles that govern formulation of major research projects and preparation of prospectus for PhD dissertation. S/U or letter grading.

274C. Research Design 3: Writing Prospectus. (6) Seminar, three hours. Designed for third-year Film and Television PhD students. Examination of general principles that govern formulation of major research projects and preparation of prospectus for PhD dissertation. S/U or letter grading.

276. Seminar: Non-Western Films. (6) Seminar, three hours (additional hours as required); film screenings, two hours. Designed for graduate students. Study of aesthetic and ideological impulses of selected films from Asia, Africa, and Latin America. S/U or letter grading.

282A. TV Development 1. (4) Seminar, three hours. Basic techniques and training in scriptwriting and contemporary industry production and business practices. Development of original show concepts and pitch for review and feedback by class, instructor, and guests. Letter grading.

282B. TV Development 2. (4) Seminar, three hours. Advanced analysis of contemporary shows and contemporary industry production and business practices. Continued development of original show concepts and series proposals for review and feedback by class, instructor, and guests. Letter grading.

283A. Fundamentals of Writing for Television. (4) Lecture, three hours. Comprehensive overview of today's television landscape for writers, with emphasis on new structures and formats ushered in by on-demand, digital television. Letter grading.

283B. Writing Half-Hour Comedy Pilot and Series Bible. (6) Seminar, three hours. Enforced requisite: course 430. Examination of basics of half-hour pilot format, style, and content, and learning of principles behind network needs and choices in writing pilots. Workshop in which to discuss ideas and issues with class and instructor. Weekly progress on original half-hour pilot and series bible required. Letter grading.

283C. Running Television Comedy Room. (4) Seminar, three hours. Enforced requisite: course 283B. Practical knowledge about skills necessary to be writer/executive producer of half-hour comedy show. Focus on community building, collaboration, and analysis and evaluation in relation to central works of writers' room, as well as breaking stories, writing, and rewriting television scripts. Letter grading.

284A. Writing One-Hour Drama Speculative Episode. (6) Seminar, three hours. Writing and analysis of television drama shows and contemporary industry production and business practices. Students write speculative (spec) episode for existing one-hour drama series. Letter grading.

284B. Writing One-Hour Drama Pilot and Series Bible. (6) Seminar, three hours. Enforced requisite: course 430. Examination of basics of drama pilot format, style, and content, and learning of principles behind network needs and choices in writing pilots. Workshop in which to discuss ideas and issues with class and instructor. Weekly progress on original drama pilot and series bible required. Letter grading.

284C. Seminar, four hours. Enforced requisite: course 284B. Practical knowledge about skills necessary to be writer/executive producer of one-hour drama show. Focus on community building, collaboration, and analysis and evaluation in relation to central works of writers' room, as well as breaking stories, writing, and rewriting television scripts. Letter grading.

287A. Introduction to Art and Business of Producing I. (4) Seminar, three hours. Enforced requisite: course 287A and presents continuation of study of development, production, and distribution of feature films for worldwide theatrical market, including identifying material, attracting elements, and understanding basics of studio and independent financing and distribution. S/U or letter grading.

287B. Introduction to Art and Business of Producing II. (4) Seminar, three hours. Enforced requisite: courses 287A, 287B. Builds on principles taught in course 287A and presents continuation of study of development, production, and distribution of feature films for worldwide theatrical market, including identifying material, attracting talent elements, and understanding basics of studio and independent financing and distribution. Minimum of two unproduced screenplays to be presented for review by class and instructor to begin identifying potential thesis projects. S/U or letter grading.

288A. TV Development 1. (4) Seminar, three hours. Basic techniques and training in scriptwriting and contemporary industry production and business
Completion of written outline for original projects and pitching of primary projects to panel of industry execu- tives for further feedback. S/U or letter grading.

282A-288B. Feature Film Development I, II, III (4-4-4) Lecture, 288A is requisite to 288B. Practical hands-on approach to understanding and implementing producer’s role in development of feature film screenplay and negotiating particulars of production process. Through in-class discussions, script analysis, story notes, and select guest speakers, exposure to various entities that comprise feature film development process. S/U or letter grading. 288B. Practical hands-on approach to understanding and implementing proper technique for evaluating screenplays through writing of coverage. 288B. Deeper evaluation of screenplay through writing of story notes.

289A. Current Business Practices in Film and Television. (4) Discussion. Three hours. Prerequisite: course C247. Designed for graduate students. Examination of current status of financing/production/distribution agreements, union agreements, music, copyright, etc., necessary to understand film and television industry. S/U or letter grading.

289B. Strategy. (4) Lecture, three hours. Course 289A is not requisite to 289B. Examination of business realities of industry, with focus on techniques for analyzing behavior, profitability, and overcoming obstacles to achieving results as producer, writer, or director. Assignments designed to assist students in articulating new goals and helping them effectively transition from classroom to their careers in entertainment industry. S/U or letter grading.

289C. Independent Spirit: Creative Strategies for Financing and Distributing Independent Features. (4) Lecture, three hours. Course 289B is not requisite to 289C. Key insights into financing and distribution of independent or specialty films. Topics include film finance, production, marketing, distribution, agents, and new technology, with emphasis on applying this knowledge to individual student projects. S/U or letter grading.

290A. Thesis Workshop 1. (4) Seminar, three hours. Forum for roundtable strategy sessions and mock story meetings with instructor, students, and various industry guests. Development of one story idea for thesis project. S/U or letter grading.

290B. Thesis Workshop 2. (4) Seminar, three hours. Forum for roundtable strategy sessions and mock story meetings. Students must have made concrete weekly progress on thesis project and adapt strategy based on feedback received. Development of marketing and business strategies, with every story idea set up in course 290A. S/U or letter grading.

290C. It’s a Wrap: Preparation for Your Entertainment Career. (4) Seminar, three hours. Final stages of thesis preparation for evaluation. Guidance provided by instructor on how to effectively present selected project. Requirements include industry-related book reports, script analysis, pitching selected concept, weekly research to understand marketplace, accumulation and updating of data, and justification for potential buyers comprised of industry professionals. S/U or letter grading.

291A. Studios versus Independents: Navigation Process. (4) Lecture, three hours. Tools necessary for producer to navigate entertainment industry. Topics discussed through lectures and guest speakers include impact of difficulty to navigate relationships between art and commerce in craft of filmmaking, rapid advance of new technology, demand for new means of building finance capital for emerging producing entities, and what future may hold for truly independent filmmaker. S/U or letter grading.

291B. Marketing and Distribution. (4) Lecture, three hours. Course 291A is requisite to 291B. Examination of numerous groups that are responsible for specific marketing components and make up marketing department, in-theater marketing, trailers, publicity, promotions, research, and media. Mechanics and levels of intuition required to make sure movies are seen by public. S/U or letter grading.

291C. Feature Film Distribution and Exhibition. (4) Lecture, three hours. Course 291B is not requisite to 291C. Investigation of philosophy, structure, and major players in film entertainment industry, with emphasis on film distribution and exhibition. Through lectures, readings, and guest speakers, exploration of interrelated arenas of production, marketing, business affairs, media, and impact of international market on distribution and exhibition of studio releases. S/U or letter grading.

292A. Overview of Network Television Management. (4) Lecture, three hours. Designed to expand basic understanding of network and cable television business. Exploration of role of showrunner, executives from networks and production companies, packaging agents, and studios responsible for developing and creating programming. S/U or letter grading.

294A. Contracts and Negotiation. (4) Lecture, three hours. Survey of range of contracts included in studio productions, including literary submission and option agreements, writer collaboration agreements, coproduction agreements, music rights license, etc. Actual studio agreements referenced to illuminate potential consequences of each transaction. Negotiation strategy exercises. S/U or letter grading.

294B. Entertainment Law, Business Practices, and Negotiation Strategies. (4) Lecture, three hours. Course 294A is not requisite to 294B. Introduction to feature-length motion picture business law from perspective of independent and studio producer. Students establish working knowledge of entertainment law and business practices through basic understanding of intellectual property and business considerations in connection with development, production and distribution, material terms of fundamental rights and talent agreements, and negotiation strategy. S/U or letter grading.

294C. International Financing and Distribution. (4) Lecture, three hours. Course 294B is not requisite to 294C. Legal-based course dealing with independent finance and distribution of feature films. Topics include fundamentals of film financing, domestic distribution, international distribution, European coproductions, role of foreign sales agents and of bankers and commercial coproduction. S/U or letter grading.

295A. Art of Presentation. (4) Lecture, three hours. Cultivation of skills needed for students to present themselves and their project goals with clarity and precision to industry professionals. Oral presentations designed to enhance student ability to deliver convincing arguments on range of topics. S/U or letter grading.

295B. Advanced Film and Television Producing Workshop for Producers, Writers, and Directors. (4) Lecture, three hours. Course 295A is not requisite to 295B. Designed to help producers, as well as screenwriters and directors, focus on networking opportunities and to develop strategies to bring their feature and television projects to marketplace. Case-study documents (drafts of screenplays, daily reports, etc.) from current or recently produced projects provided. S/U or letter grading.

295C. Advanced Producing: Role of Successful Producer. (4) Lecture, three hours. Designed to provide producers with comprehensive understanding of business acumen included in purchasing scripts for studio and independent projects, and an understanding of how to through script analysis and in-class discussions, students encouraged to examine not just story elements, but marketing assets inherent in pieces of material. S/U or letter grading.

296A. Role of Talent Agencies. (4) Lecture, three hours. Introductory overview of various departments at agencies, including motion picture literary, talent, staff writers, and television and advertisement of various interactions among each. Exercises encourage producers, writers, and directors to learn how to work effectively with individuals at talent agencies. S/U or letter grading.

296B. Who Represents Me? (4) Lecture, three hours. Course 296A is not requisite to 296B. In-depth analysis of different forms of representation offered by agents, managers, busines managers, and lawyers and detail of legal rights and responsibilities of each. Exercises require students to represent rights holders in series of potential projects. S/U or letter grading.

297A. Digital Media Producing 1. (4) Seminar, three hours. Overview of changing world of storytelling through development of new technologies and new media. Conceptualization and pitch of innovative, original digital media concepts with interactive or participatory story elements and feedback by instructor and producers. S/U or letter grading.

297C. Digital Media Producing 3. (4) Seminar, three hours. Overview of changing world of storytelling through development of new technologies and new media. Development of short teaser trailer or website using digital and web-based resources to promote student original digital media project proposal. S/U or letter grading.

298A. Special Studies in Film and Television. (2 to 6) Seminar, three hours; film screenings, three hours. Designed for graduate students. Seminar study of problems in film and television, organized on topic basis. May be repeated once for credit. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, etc. Teaching apprentices receive guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

400. Film Image Design Laboratory. (4) Lecture, two hours; laboratory, six hours. Limited to graduate film and television students. Conception and design of nonnarrative film imagery. One-minute experiments in relation of meaning to technique, including manipulation of optics, photchemistry, elements of electronic processes, and display of time and motion. May be repeated once for credit. S/U or letter grading.

400B. Introduction to Cinematography II. (2) Lecture, three hours; laboratory, three hours. Continuation study of cinematography with emphasis on lighting. Instructor meets individually with teams of director/cinematographer to prepare for shooting six-minute projects. Letter grading.

400F. Film Analysis for Filmmakers. (4) Lecture, screenings, five hours. Limited to graduate film and television students. Drawing heavily from array of historical examples, examination of many expressive screenwriting, directing, and digital art forms. Unifying theory and practice, presentation of approach to viewing great films of past that empowers filmmakers to use sound and images to tell original stories in present. Focus during present. Various exercises in openings in areas of writing, design, cinematography, editing, sound, and performance to enable filmmakers to discover their own personal style for telling stories on screen. Letter grading.
402A–402B. Advanced Narrative Directing Workshops. (4 or 8–8) Limited to nine graduate film and television students. Production of 10- to 15-minute fiction short. Letter grading. 402A. Laboratory, six hours; fieldwork, to be arranged. Requisites: courses 405, 409, 410A, 410B, 410C, 433. Students budget and preproduce their projects by end of first term. 402B. Laboratory, 12 hours; fieldwork, to be arranged. Concurrently scheduled with course 402A. In second term students must complete photography on location and/or in studio.

402C. Advanced Narrative Directing Workshop. (4) Laboratory, six hours; fieldwork, required. Courses 403A–403B–402B. Completion of preproduction on projects started in courses 402A and 402B. Letter grading.

C403A-C403B-C403C. Advanced Documentary Workshops. (4 to 8 each) Lecture/discussion/laboratory, 16 hours. Letter grading. Requisites: courses 409, 410A, 410B, 410C, 433. Limited to graduate film and television students. Production of advanced individual documentary film or video projects. Students conceptualize, research, write, shoot, edit (on location), and edit projects to completion. May be repeated once for credit. Concurrently scheduled with courses C186A-C186B-C186C. S/U or letter grading.

404. Emerging Techniques and Technologies in Cinematography. (4) Lecture, four hours; laboratory, two to four hours. Requisites: courses C186A-C186B-C186C. S/U or letter grading. May be repeated once for credit. Concurrently scheduled with course 404B. Limited to graduate film and television students. Production of 20-minute abstract or experimental film, video, or multimedia project. Students prepare and direct six-minute films and serve in preassigned crew positions for each other. Letter grading.

404A-404B. Advanced Abstract/Experimental Media Workshops. (8–8) Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Requisites: courses 405, 409, 410A, 410B, 410C, 433. Limited to 10 students per section. Production of 20-minute abstract or experimental film, video, or multimedia project. Students plan, design, and shoot their projects in first term and work as crew for each other in rotating assignments. Students must complete postproduction of their projects. S/U or letter grading.

404C. Advanced Abstract/Experimental Media Workshop. (8) Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Requisites: courses 404A, 404B. Completion of all stages of production and postproduction on projects started in courses 404A and 404B. Letter grading.

405. Digital Image and Manipulation on Set and Post Production. (4) Lecture, two hours; laboratory, one hour. Lecture, two hours; laboratory, one hour. Emphasis on principles of cinematography, with emphasis on electronic exposure control, and post-production. Requisite: course 417. Letter grading.

405A. Digital Editing. (4–4) Studio, four hours; laboratory, to be arranged. Individual instruction in Avid nonlinear editing system. S/U or letter grading.

405B. Avid Editing. (4–4) Studio, four hours; laboratory, to be arranged. Individual instruction in Avid nonlinear editing system. S/U or letter grading.

409. Directing Actors for Camera Workshop. (4) Workshop, six hours; laboratory, to be arranged; laboratory preparation, two to four hours. Limited to MFA production program students. Team-taught with five weeks designed to give director/actor/camera techniques, and five weeks to offer basic strategies to elicit good performances from actors. Emphasis on problems faced when directing actors for film. S/U or letter grading.

410A. Symposium. (2) Seminar, three hours. Limited to and required of first-year MFA production program students. Exploration of principal concepts of film and television production within the context of preproduction, production, and postproduction, providing forum for synthesis of knowledge gained in various first-year technical craft courses. Exploration of strategies for learning production within academic environment. May be repeated for credit. Letter grading.

410B. Cinematography. (2) Seminar, three hours. Limited to and required of first-year MFA production program students. Production workshop designed to give hands-on experience in all aspects of film production. Tools to be used include a complete digital tool kit. Seminar writes/directs/edits six-minute film. May be repeated for credit. Letter grading.

410C. Postproduction. (2) Seminar, three hours. Limited to and required of first-year MFA production program students. Production workshop designed to give hands-on experience in all aspects of film production (tools and practicum of medium) as each student writes/directs/edit six-minute film. May be repeated for credit. Letter grading.

410D. Postproduction Sound. (2) Seminar, three hours. Requisites: courses 405, 409. Limited to and required of first-year MFA production program students. Technical and aesthetic aspects of postproduction sound recording, editing, and mixing: focus for film and media production. Application of principles of sound design to student films while using UCLA’s John Candy Room and Scoring Stage for Automatic Dialogue Replacement (ADR) and Foley soundstage. Students record ADR, mixing, and selection and use of microphones and mixing consoles, and incorporation of Final Cut Pro and Pro Tools LE for recording, editing, and mixing. Emphasis on practical skill development, hands-on practices are contextualized and motivated by creative and conceptual goals. Letter grading.

411A. Modes of Making: Experimental. (4) Seminar, three hours: laboratory, one hour. Exploration of multiple and alternative modes of filmmaking and platforms for creative expression dedicated to wide variety of media types and invited to undertake their own experiments, paying equal attention to form and content. Each student completes series of short-to-longer assignments for each semester, which is contextualized and motivated by creative and conceptual goals. Letter grading.

411B. Modes of Making: Documentary. (4) Lecture, three hours: laboratory, one hour. Exploration of craft and form of documentary filmmaking through series of synchronous and asynchronous film projects. Viewing, discussion, and critique of video projects, interview, video, animation, and hybrid documentary approaches. Students work in partnerships and small crews to rotate and produce work in collaboration. Contemporary debates around documentary representation and film ethics are incorporated into classroom discussions and critiques. Letter grading.

411C. Modes of Making: Narrative Fiction. (4) Lecture, four hours. Students work individually and in teams to complete small-scale film projects and exercises to develop specific building blocks needed for narrative fiction filmmaking. Course modules provide students with each major element of narrative filmmaking, from preproduction to completion. Students gain experience with each key crew position and develop basic collaborative skills needed to work effectively with—and as part of—film crew. Letter grading.

412A. Tools and Techniques: Experimental. (8) Lecture, four hours; laboratory, four hours. Emphasis on both technical and aesthetic components of filmmaking, and building with each iteration toward increasingly sophisticated and nuanced uses of all components of filmmaking process. Works in tandem with course 411A to develop hands-on skills needed for craft of media making and narrative filmmaking. Taught by rotating group of specialist faculty. Topics and skills vary by term in coordination with assignments and skills needed to support course 411A. May also focus on practical skill development, hands-on practices are contextualized and motivated by creative and conceptual goals. Letter grading.

412B. Tools and Techniques: Documentary. (8) Lecture, four hours: laboratory, one hour. Emphasis on both technical and aesthetic components of filmmaking, with each iteration toward increasingly sophisticated and nuanced uses of all components of filmmaking process. Works in tandem with course 411B to develop hands-on skills needed for craft of media making in nonfiction mode. Taught by rotating group of specialist faculty. Topics and skills vary by term in coordination with assignments and skills needed to support course 411B. Although focus on practical skill development, hands-on practices are contextualized and motivated by creative and conceptual goals. Letter grading.

412C. Tools and Techniques: Narrative Fiction. (4) Laboratory, four hours. Provides hands-on support and technical knowledge for students in parallel with their crew-based productions in course 411C. Students deepen their skills in key production roles including cinematography, sound, and editing. Meetings are divided among lecture, individual presentations, and laboratory. Letter grading.

413. Themes and Issues. Foundations of Directing. (4) Lecture, three hours. Provides interpretive and creative toolkit for subsequent undertakings in filmmaking, media making, and audio-visual storytelling. These source materials are agnostic with regard to certain conventions of origin (genre, format, path, duration) and yet deeply rooted in politics and histories of representation that catalyze and inform racial, gendered, sexual, and ethnic lenses and visions. Letter grading.

C416. Intermediate Cinematography. (4) Lecture, two hours; laboratory, four hours. Intermediate study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses. Concurrently scheduled with course C118. Letter grading.

C417. Lighting for Film and Television. (4) Lecture, two hours; laboratory, six hours. Limited to graduate film and television students. Lectures, supervised exercises on stage or in exterior, screenings of scenes, and discussions aimed at learning to master lighting to create appropriate mood or atmosphere of premediated scene recorded on film or through electronic system. May be repeated twice for credit. Concurrently scheduled with course C157. Letter grading.

418. Cinematography and Directing. (4) Lecture, two hours; laboratory, six hours. Requisite: course 417. Limited to graduate film and television students. Supervised filming of short dramatic projects on sound stage and at exterior locations that explore complexity of process, emphasizing balance and collaboration enhanced by students’ mastery in its varied technical, production, and creative aspects. Letter grading.

419. Advanced Cinematography. (4) Lecture, two hours: discussion, one hour; laboratory, one hour. Requisites: courses 417, 418. Limited to graduate film and television students. Advanced study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses. S/U or letter grading.

423A. Direction of Actors for Film and Television. (4) Lecture, four hours; laboratory. Preparation: first film project. Limited to graduate film and television students. Advanced study of principles of cinematography, with emphasis on electronic exposure control, lighting, formats, selection of film, camera, and lenses. S/U or letter grading.

actors before camera. Emphasis on developing techniques to immediately enhance communication between director and actor on set in order to maintain continuity of scene. S/U or letter grading.

430. Introduction to Film and Television Writing. (6) Lecture, three hours. Introduction to film and television writing. S/U or letter grading.

435. Advanced Writing for Short Film and Television Screenplays. (4) Discussion, three hours. Requisite: course 410C. Limited to graduate film and television students. Conception, development, and writing of dramatic film script to be produced as advanced or thesis project. Letter grading.

437. Adaptation for Screen. (8) Seminar, three hours. Enforced requisite: course 430. Students analyze techniques of dramatic adaptation and apply them by writing their own adaptations. Students read selected texts and view their filmed versions in order to learn various approaches to adaptation. Students workshop their own screenplays adapted from preselected list of texts. Letter grading.

438. Advanced Screenwriting: Rewrite. (8) Seminar, three hours. Enforced requisite: courses 430, 434. Workshop in which students rewrite first draft of original screenplay that was written in course 434. Discussion of problems peculiar to rewriting: how to take notes and make them one's own; how to deep-read on line-by-line basis of script; overall rewriting strategies; what is best for situation and script. Reading and rewrite rewritings. Particular attention directed to how people talk about scripts that are not their own; how they avoid giving feedback based on how they might write something and how they move toward giving feedback that honors intention and integrity of script. May be repeated once for credit. Letter grading.

440. Festival Strategies. (4) Seminar, three hours. Exploration of film, television, streaming, and specialized festivals. Emphasis on strategies and practical knowledge necessary to navigate local, regional, and global festivals, whether as producer, director, animator, screenwriter, or scholar/programmer. Discussion and exchange of diverse ideas, perspectives and real-world experiences among students, faculty, and special industry guests. S/U or letter grading.

452B. Postproduction Sound. (2) Laboratory, three hours. Limited to Production MFA students. Technical and aesthetic aspects of postproduction sound recording, editing, and mixing for film and television. Letter grading.

C452C. Digital Audio Postproduction. (4) Lecture, three hours; laboratory, three hours. Limited to Film and Television majors. Through discussion, demonstrations, and laboratory assignments, exploration of digital audio tools and procedures available to today's filmmakers. Coverage of many technical, equipment, and software-related steps, with emphasis on creative process. Concurrently with course C152C. Letter grading.

453. Postproduction Sound Design. (2 to 4) Lecture, three hours. Designed to give film students insight into world of postproduction sound and to provide knowledge and tools necessary to complete postwork on their projects. Exploration of all areas of postproduction sound design from editing to final mixing. How to effectively use sound design to enhance storytelling capability of films, evaluate music choices, pick composer, music edit, create sound design to enhance story points, discover design opportunities, and select right sound effects. Concurrently with course C452C. Letter grading.

454B. Advanced Film Editing. (4) Lecture, three hours; laboratory, one hour. Preparation: submission of rough cut of existing project or proposal to edit work of another director. Limitations and limitations students in postproduction phase with advanced knowledge of organization and operation of postproduction process. Students may also propose to edit significant scene given to them by instructor. Concurrently scheduled with course C154B. Letter grading.

454C. Digital Workflow. (2 to 4) Lecture, three hours; laboratory, two hours. Limited to departmental majors. Through discussions, demonstrations, outside speakers, and laboratory assignments, demystification of ever-changing world of digital workflow. Students plan, schedule, and budget their overall workflow in preproduction. May be repeated once for credit. Concurrently scheduled with course C158. Letter grading.

459A–459B. Directing for Film and Television. (4–4) Lecture, three hours. Limited to graduate film and television students. Analysis and exploration, with specific scenarios, of different approaches in directing, in a classroom setting to approach same literary material in theater, film, and television. S/U or letter grading.

466. Creative Location Film Production. (8) Lecture, four hours; discussion, four hours; laboratory, to be arranged. Limited to graduate film and television students. Problems of location, production, direction, and cinematography in various real-life practical locations. Practical application of solving problems and communication within limitations. Concurrently scheduled with course C168. Letter grading.

468. Commercial Location Film Production. (8) Lecture, four hours; discussion, four hours; laboratory, to be arranged. Limited to directing or producing program students. Problems of location, production, direction, and cinematography in various real-life practical locations. Practical application of solving problems and communication within limitations. Concurrently scheduled with course C168. Letter grading.

469. Contemporary Topics: UCLA Filmmakers. (4) Seminar, four hours. Lecture and examination of both inside and within traditional studio system, identification of materials and tools utilized to such purposes, exploration of story and themes of works within larger political and cultural and social development and articulation of personal storytelling voice rooted in specific of history, background, and life experience. Designed as series of online master classes with visiting filmmakers, their collaborators, and occasional guest scholars participating in moderated discussions. Each class concludes with informal discussion with students. Weekly contextual readings and screenings. S/U or letter grading.

472. Commercials. (4) Lecture, four hours. Limited to MFA students. Designed to give students opportunity to explore one very specific kind of filmmaking. Through exploration of advertising, students gain insight about Commercials and exhibition in American and foreign markets and how to work with distinct confines of commercial genre. Letter grading.

C481B. Writing for Animation. (4 or 8) Lecture, six hours; studio, to be arranged. Requisite: course C481A or consent of instructor. Research and practice in creative writing and planning for animated film. May be repeated for maximum of 16 units. Concurrently scheduled with course C181B. S/U or letter grading.

C481C. Animation Workshop. (4 or 8) Studio, six hours. Enforced requisite: course 181A, 181B, 181C. Advanced organization and integration of various creative arts used in animation to form complete study of selected topic. May be repeated for maximum of 16 units. Concurrently scheduled with course C181C. S/U or letter grading.

482A–482B. Advanced Animation Workshops. (4 or 8 each) Lecture, three hours; studio, to be arranged. Requisites: courses 181A, 181B, 181C. Advanced organization and integration of various creative arts used in animation, resulting in production of complete animated film. May be repeated for maximum of 16 units. S/U or letter grading.

483A. Advanced Computer Animation. (4 to 8) Lecture, six hours; laboratory, four hours. Requisites: courses C481A, C481C, 489A. Recommended: course C481B. Course 483A is requisite to courses 483B, which is requisite to 483C. Creation and production of complete and original advanced computer animated film. Letter grading.

483B. Advanced Computer Animation. (4 to 8) Lecture, six hours; laboratory, four hours. Requisite: course 489A. Creation and production for complete and original advanced computer animated film. Letter grading.

483C. Advanced Computer Animation. (4 to 8) Lecture, six hours; laboratory, four hours. Requisite: course 489A. Creation and production for complete and original advanced computer animated film. Letter grading.

484A–484B. Visual Thinking and Organization for Animation. (4–4) Lecture, six hours; laboratory, four hours. Concurrently scheduled with course C484B. Systematic approach to analyzing and communicating two-dimensional and three-dimensional form and applying traditional compositional approaches to animation. May be repeated for maximum of 16 units. Letter grading.

485. Legal Issues in Animation. (4) Lecture, three hours; laboratory, three hours. Examination of legal issues in animation, including copyright, contracts, constitutional issues in animation, competing rights, employer-employee relationships, and representation in animation. S/U or letter grading.

486. Directed Individual Study: Preparation to Advance to Candidacy for MFA in Animation. (2 to 4) Tutorial, four to eight hours. Limited to MFA production program students. Specialized development and organization of proposed thesis project prior to advancement to candidacy. Letter grading.

487. Directed Individual Study: Postproduction Laboratory. (4) Laboratory, eight hours. Limited to MFA production program students. Preparation of projects in final stages of postproduction. May not be repeated. S/U or letter grading.

488A. Interactive Animation. (4 to 8) Lecture, six hours; laboratory, to be arranged. Requisite: courses C481A, C481C, 489A. Organization and integration of various creative arts used in animation and interactive media to form complete study of selective interactive animation project. May be repeated for maximum of 16 units. Letter grading.

488B. Advanced Interactive Animation. (4 to 8) Lecture, six hours; laboratory, to be arranged. Requisite: course 488A. Organization and integration of various creative arts used in animation and interactive animation to form complete project of selected interactive topic. May be repeated for maximum of 16 units. Letter grading.

489A. Computer Animation in Film and Video. (4 to 8) Lecture, six hours; laboratory, four hours; other, to be arranged. Preparation: completed animated film. Requisites: courses 181A, 181C. Instruc- tion in and supervised production of computer animation. May be repeated for maximum of 16 units. Letter grading.
Faculty Committee

Akhil Gupta, PhD (Anthropology)
Joseph F. Nagy, PhD (English)
Janet M. O’Shea, PhD (World Arts and Cultures/Dance)
Amy C. Rowat, PhD (Integrative Biology and Physiology)
Wendelin M. Slusser, MD, MS (Community Health Sciences)

Overview

The Food Studies minor uses food—its production, preparation, sharing, consumption, and disposal—as a lens for understanding individual, sociocultural, and global issues. The study of the role of food in multiple complex aspects of life builds bridges across all areas of the academy, including arts, anthropology, environment and sustainability, folklore and mythology, geography, history, humanities, law, psychology, public health, public policy, and other fields.

Undergraduate Minor

Food Studies Minor

Through interdisciplinary courses and a capstone experience, students in the minor acquire a unique insight of food studies and emerge with a new intellectual framework for understanding this expanding area of study.

The capstone requirement gives students the opportunity to either put their studies into practice through internship or complete independent research in a food-related area of interest.

Admission

To be eligible for the Food Studies minor, students must be in good academic standing. Applications for the minor will be accepted after students have completed 12 units with a minimum average of 2.0. Students must be accepted to the program advanced students. Internship at various food, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled. S/U or letter grading.

Undergraduate Minor

Food Studies Minor

Through interdisciplinary courses and a capstone experience, students in the minor acquire a unique insight of food studies and emerge with a new intellectual framework for understanding this expanding area of study.

The capstone requirement gives students the opportunity to either put their studies into practice through internship or complete independent research in a food-related area of interest.

Admission

To be eligible for the Food Studies minor, students must be in good academic standing and have completed or be enrolled in the required courses. Students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Food Studies

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

27. Critical Thinking about Food and Science Publications. (5) Lecture, two hours; discussion, one hour. Development of process of further thinking about stories behind conclusions from nutrition studies and food scientific literature. Exercises, discussions, reports, and readings designed to provide practices to become critical thinker in food science and literature. P/NP or letter grading.

35. Visual Representations of Food from Antiquity to Present. (5) Lecture, three hours; discussion, one hour. Examination of food imagery in visual art from antiquity to present. Introduction to major movements in Western art history, with primary focus on historical and sociological implications that can be derived from close analysis of visual representations of food, kitchens, markets, and agriculture over centuries. Topics of investigation include diets of ancient Romans as evidenced by floor mosaics and wall paintings of Pompeii; religious symbolism of food during Middle Ages; opulence of Renaissance banquet; common food of common folk; significance of still life paintings; what paintings can tell us about trade; turn-of-century tables; food and eroticism; economics, packaging, and advertising; and food presentations and plating as art form. P/NP or letter grading.

M79. Food Politics: Cultural Solutions to political Problems. (5) Same as World Arts and Cultures M79. Lecture, four hours; discussion, two hours. Examination of issues of environmental and public health effects of intensive and extensive agriculture, influence of corporations on government, animal ethics, food deserts and urban gardening, and food insecurity. Focus on representation of such issues in documentaries, public lectures, memoirs, novels, and visual art, as well as on initiatives to address such problems through policy and activism. P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or
other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per semester. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

M132. Food Cultures and Food Politics. (Same as English M132.) Three hours. Introduction to interdisciplinary field of food studies, with focus on how literature, art, science writing, and visual culture address political dimensions of food and agriculture in specific contexts. P/NP or letter grading.

133W. Historical Recipes and Recipe for History. (5) Lecture, two hours; discussion, one hour. Requisite: English Composition 3. Introduction to historical methods of studying cultural meaning of food in late Medieval and Early Modern Europe through lens of recipes. How recipes, as historical documents, are related to culture, social interactions, and historical ways of knowing. Introduction to ways that historians attempt to understand and recreate rhythms of daily life through interactive pedagogy and experimental recreation of historical recipes. Students gain working knowledge of historical food studies as interdisciplinary field from historical perspective. Research project documenting original research. Satisfies Writing II requirement. P/NP or letter grading.

M136. Eating Society: Science and Politics of Food from Individual to Planetary Health. (Same as Sociology M136 and M137.) Lecture, three hours; discussion, one hour. Questions of food and health are both individual and social. Students gain skills in understanding relationships between individual eaters, medicine, and social organization of food production and processing through set of research frameworks newly emergent in range of social and health sciences. Topics include individual and social ramifications of microbiome science; understanding how human gut microbes and health are shaped by pasterization, processing, and food safety practices; One Health approaches that encompass human and animal health, discussing examples such as antibiotic resistance and emerging infectious disease as effects of large-scale agriculture; planetary health frameworks that link individual human metabolic health to issues of sustainable agriculture, for example how pesticides and fertilizers tie diets to environmental degradation; and cultural food systems in face of environmental pollution as issue of reproductive health. Letter grading.

M157. Food: Molecules, Microbes, Environment. (4) (Same as Chemistry M157.) Lecture, three hours; discussion, one hour. Requisite: Chemistry 153A. Recommended requisites: Life Sciences 7A, 7B. Study of science of food. Study of food units physical, biological, environmental, social, and behavioral sciences. Use of scientific methods to explain properties of food. Covers range of topics that focus on science of cooking, critical role of microbes in transformation of foods, genetic and environmental concerns related to acquisition, preparation, and consumption of different dietary items on metabolism and physiology. Comprises four major interrelated topics: molecules of food and their sources, science of cooking, acquisition of food, eating, P/NP or letter grading.

159. Food and Health in Global Perspective. (4) Lecture, three hours. Study problematizes and adds depth to common-sense understandings of health and wellness by intervention on relationship between food and health, from critical and holistic perspective, that accounts for interplay of biology and culture within broader historical, societal, and global contexts. Topics include what is meant by healthy eating, epidemiological challenges between food practices and evolutionary biology, as well as particular environments of societies, cultural systems, lifeways, and daily practices; how major global foods have come to their dominance and consequences for health; and influences of food production, distribution, and preparation on health. P/NP or letter grading.

M167. Historical Sociology of Urban/Rural Relations and Food Production. (4) (Same as Sociology M137.) Lecture, three hours; discussion, one hour. Historical examination of food supply and food production in relation to urban and rural regions. Topics include food logistics such as storage, transportation, and distribution, as well as human population growth and migration, famine and hunger, and agricultural advances and environmental impacts. P/NP or letter grading.

M170XP. Food Studies and Food Justice in Los Angeles. (4) (Formerly numbered M170SL.) (Same as Community Engagement and Social Change M170XP) Seminar, three hours; fieldwork, two hours. Interdisciplinary seminar about food systems and justice issues faced by residents of lower-income communities. Reading of relevant disciplines, including but not limited to public health, environmental justice, and public policy. Service-learning component includes meaningful work with off-campus community partners selected by instructor and Center for Community Learning. Letter grading.

M176XP. Making Films about Food. (3) (Formerly numbered M176SL) (Same as Community Engagement and Social Change M176XP and Public Affairs M176XP) Lecture, three hours. Introduction to documentary video production and distribution. Students work on assignments in pairs and small groups to create 8- to 10-minute video about one of several Los Angeles partner organizations that advocate for healthy, local, sustainable food. Consideration, through video production, of challenges posed by existing farming, ranching, and distribution methods, and strategies these groups are pursuing to create more sustainable food pathways. Students look at social media communication strategies to help think through interventions for a food system. After this research, students present their findings on industrial food production and regulations that remain favorable to mass-produced, processed food items. P/NP or letter grading.

M177. Superfoods: Cultural and Global Perspectives. (Same as African Studies M177 and International Development Studies M177.) Seminar, four hours. Exploration of superfoods, which are nutrient rich foods considered beneficial for well-being, health, and longevity, as they are high in minerals, vitamins, and antioxidants. While superfoods have been part of cultures’ diets for centuries, in recent decades they have been researched in scientific and medical communities in connection to increasingly demand and consume foods that are nutritious, organic, and sustainable. It is important also to address issues such as marketing, misinformation, and hyper about superfoods. The modern fascination with superfoods is increasingly important in context of ongoing global inequalities with regards to food access and production. Study addresses paradox that communities cope simultaneously with malnutrition and obesity, and how farming practices for superfoods and staple crops are related. P/NP or letter grading.

M179. Food Activism in Los Angeles: Narrating Pastas, Imagining Futures. (4) (Same as World Arts and Cultures/L.A. Studies M179) Discussion, two hours. Introduction to history and praxis of local interventions into food insecurity and food oppression, such as community gardens, pop-up markets, and care farms. Through ethnographic and oral history methodologies, students learn how food activists organize themselves, and mobilize creativity to counteract injustice. Focus on relationships between food access, food oppression, food politics, and food ethics; and social histories of race, class, urban planning and housing discrimination. P/NP or letter grading.

181. Special Topics: Perspectives on Food and Society. (4) Lecture, 90 minutes; discussion, one hour. Variable topics that engage with current societal challenges through lens of food and transdisciplinary approach. Emphasis on food-related issues that impact society from social justice to food access to planetary health. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

187. Special Topics in Food Studies. (4) Lecture, three hours. Variable topics in one area within food studies. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

189. Advanced Honors Seminars. (1 Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

195C. Community and Corporate Internships in Food Studies for Capstone. (4) Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Learning (CCL). Students complete weekly written assignments, attend biweekly meetings with graduate student coordinator, and write final research paper. Faculty sponsor and graduate student coordinator construct series of reading assignments that examine issues related to internship site. Culminates capstone experience requirement for Food Studies minor. Individual contract with site supervisor; CCL coordinator, and faculty sponsor required. Letter grading.

195CE. Community and Corporate Internships in Food Studies. (4) Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Engagement (CCE). Students complete weekly written assignments, attend biweekly meetings with graduate student instructor, and write final research paper. Faculty mentor and graduate student instructor construct series of reading assignments that examine issues related to internship site. May be repeated for credit with consent of Center for Community Engagement. No more than 8 units may be applied toward major; units applied must be taken for letter grade. May not be applied toward concentration or distribution requirements. Individual contract with supervising faculty member required. P/NP or letter grading.

197. Individual Studies in Foodways, Diet, and Nutrition. (2 to 8) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings between faculty member and student. Assigned reading and tangible evidence of mass of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.
199. Directed Research or Senior Project in Food Studies. (4) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research projects in food studies under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Course

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

FOREIGN LITERATURE IN TRANSLATION

Overview

The following courses, offered in the departments of language and literature, do not require reading knowledge of any foreign language.

Courses

Ancient Near East (Near Eastern Languages and Cultures)

150A. Heroes, Gods, and Monsters: Literature and Epic in Mesopotamia
150B. Survey of Ancient Near Eastern Literatures in English: Egypt

Arabic (Near Eastern Languages and Cultures)

150. Classical Arabic Literature in English
M151. Modern Arabic Literature in English

Armenian (Near Eastern Languages and Cultures)

150A. Survey of Armenian Literature in English
C152. Modern Armenian Drama as Vehicle for Social Critique
C153. Art, Politics, and Nationalism in Modern Armenian Literature

Asian (Asian Languages and Cultures)

151. Buddhist Literature in Translation

Asian American Studies (Asian American Studies)

M173. Topics in Vietnamese Cinema and/or Literature

Central and East European Studies (Slavic, East European, and Eurasian Languages and Cultures)

91. Culture and Society in Central and Eastern Europe
M120. Women and Literature in Southeastern Europe
125. Intervar Central European Prose
C126. Coldwar Central European Culture
127. Central European Culture after Fall of Communism
130. Balkan Cultures in Film and Literature

Chinese (Asian Languages and Cultures)

70. Introduction to Traditional Chinese Literature
70W. Classics of Chinese Literature
131. World Sinophone Literature: Theories and Texts

C150A. Lyrical Traditions
C150B. Chinese Literature in Translation: Traditional Narrative and Fiction
151. Chinese Literature in Translation: Modern Literature
152. Topics in Contemporary Chinese Literature and Culture
M153. Chinese Immigrant Literature and Film

Comparative Literature (Comparative Literature)

All undergraduate courses except course M191P

C151. Valkyries and Dragonslayers: Völsung/Nibelung Tradition

French (European Languages and Transcultural Studies)

14. Introduction to French Culture and Civilization in English
14W. Introduction to French Culture and Civilization in English
16. Society And Self in Early Modern France
160. Francophone Cultures in English
161. French and Francophone Theater in Translation
163. French and Francophone Short Story in Translation
164. French and Francophone Novel in Translation
165. Eco-Citizenship: Encounters with Eco-Citizens in Translation
166. French and Francophone Autobiography in Translation
167. French and Francophone Intellectual History in Translation
170. Nantes: Shape of City in Translation
191A. Variable Topics Research Seminars in Translation

German (European Languages and Transcultural Studies)

50B. Great Works of German Literature in Translation: Romanticism to Present
56. Figures Who Changed World: Cosmopolitanisms within a Global Context
59. Holocaust in Film and Literature
61A. Modern Metropolis: Berlin
102. War, Politics, Art
103. German Film in Cultural Context: Early German Film
104. German Film in Cultural Context, 1945 to Present
109. Jewish Question and German Thought
110. Special Topics in Modern Literature and Culture
112. Feminist Issues in German Literature and Culture
113. German Folklore
114. Fairy Tales and Fantastic
117. German Exile Culture in Los Angeles

Hungarian (Slavic, East European, and Eurasian Languages and Cultures)

121. Survey of Hungarian Literature in Translation

Iranian (Near Eastern Languages and Cultures)

150A. Survey of Persian Literature in English
150B. Survey of Persian Literature in Translation

Italian (European Languages and Transcultural Studies)

42A. Italy through Ages in English: Saints and Sinners in Early Modern Italy
42B. Italy through Ages in English: Modern and Contemporary Italy
42C. Italy through Ages in English: Food and Literature in Italy
46. Italian Cinema and Culture in English
The Gender Studies curriculum challenges the pervasive theory/practice divide within the academy. In both undergraduate and graduate courses, students are taught a broad range of methodological and analytical skills. Core undergraduate courses contextualize foundational theories and key analytic concepts within the study of different historical periods and social movements. In designating these courses, power, knowledge, and bodies, the department identifies three primary areas in which feminist and queer inquiry has been concentrated over time, enabling students to trace grounding concepts, key controversies, and the emergence of new theoretical paradigms.

The department has long enjoyed recognition for its strengths in areas including women’s history, feminist science studies, and gender and the law. Over the past decade, it has become a leading program for interdisciplinary intersectional feminist scholarship on gender, sexuality, race, class, and nationality; and has built a strong reputation in transnational feminist studies, studies of settler colonialism, neoliberalism, racial violence, cultural politics, migration, social movements, affect, visual culture, and disability, as well as feminist policy studies, critical prison studies, women of color feminism, queer of color critique, and queer theory.

### Undergraduate Major

#### Gender Studies BA

The major in Gender Studies may be taken alone or in conjunction with another Letters and Science major. In the case of a double major, no more than five courses may be applied toward both majors.

#### Capstone Major

The Gender Studies major is a designated capstone major. Students are required to complete a senior seminar in which they conduct original research while studying readings that consider how disciplinary and interdisciplinary research has been conducted and critiqued. Through their senior seminar work, students produce a significant work that may include an original research paper, a media project, or an in-depth literature review. They are expected to demonstrate working knowledge of the field of gender studies; understand key theoretical approaches in the study of women, gender, and sexuality; have ability to construct well-written analytic essays and present their work orally; and conduct a research project that involves the consultation of scholarly literature and presentation of evidence to support an argument.

### Learning Outcomes

The Gender Studies major has the following learning outcomes:

- Demonstrated working knowledge of the field of gender studies
- Understanding of key theoretical approaches in the study of women, gender, and sexuality
- Demonstrated ability to construct well-written analytic essays and give an oral presentation
- Conduct a research project that involves the consultation of scholarly literatures and presentation of evidence to support an argument

### Entry to the Major

#### Admission

To be admitted to the major, students must have completed Gender Studies 10, be in good standing, and formally register with the department. They are encouraged to declare their major as early as possible and to discuss their proposed course of study with the undergraduate adviser.

Students are encouraged to draw on diverse UCLA resources in creating their program of study. They may pursue traditional and/or innovative subjects in fields ranging from the humanities and fine arts to the social and life sciences. In addition to courses on the gender studies approved list, students may petition to have diverse courses accepted, including courses outside the College of Letters and Science, independent studies, or field study courses.

Each course applied toward the major must be taken for a letter grade, and students must have a grade-point average of 2.0 or better in gender studies courses to receive credit for completing the program. Courses in which they receive grades of C– or lower may not be applied toward the required courses in the major.

#### Transfer Students

Transfer applicants to the Gender Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one multidisciplinary gender studies course and departmental lower-division required courses.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

### Requirements

#### Preparation for the Major

Required: Gender Studies 10. Students must also complete departmental lower-division requisites, as applicable, for upper-division gender studies courses.

#### The Major

The major is designed to (1) impart core concepts in theory and critical analysis, research design, and methods; and (2) provide students with exposure to a range of feminist and queer scholarship across disciplines. To achieve these goals, the major is divided into three categories.

Required: At least 11 upper-division courses (minimum of 4 units each) as follows: (1) three core courses—Gender Studies 102, 103, 104, (2) seven elective courses; one upper-division tutorial (minimum of 4 units) selected from course 195, 197, or 199 may be applied toward the elective requirement (this limit does not apply to course 198A or 198B), and (3) course 187 (capstone seminar).
Graduate Major

Gender Studies MA, PhD

The graduate program offers Master of Arts (for PhD students only, no terminal master’s degree) and PhD degrees.

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Gender Studies

Lower-Division Courses

10. Introduction to Gender Studies. (5) Lecture, three hours; discussion, one hour. Introduction to key concepts in study of sex and gender. Exploration of topics such as gender socialization, body image, sexualities, masculinities, and women's subordination. Special emphasis on interaction of gender with other identity markers such as race, nation, ethnicity, sexuality, class, and other differences. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 8 units. P/NP grading. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

101W. Writing Gender. (3) Lecture, three hours. Required: English Composition 3. Development of critical reading and writing skills necessary for academic success. Students engage assigned readings in conversation with week’s leading question. Generation and continuous development of paper topics as result of in-class discussions and formal writing exercises. Small writing groups assist students in understanding relationship between how written thoughts are presented and how they are comprehended by different readers. Students gain understanding of writing process, including topic conceptualization, objective of writing, research, organization of thoughts and resources, selection of objects of study, personal writing style, etc. Satisfies Writing II requirement. Letter grading.

102. Power. (4) Lecture, three hours; discussion, one hour (when scheduled). Enforced requisite: course 10. Consideration of how feminist social movements have identified and challenged traditional understandings of power and ways feminist theorists have conceived and critiqued traditional theories of power. How have women’s and other social movements defined and challenged, political, and economic subordination? How have feminist theorists addressed subject of power? How do empire, colonialism, liberalism, neoliberalism, and globalization produce distinctive forms of gendered violence, gendered knowledge, and gendered subjectivities? How are gender and sexuality produced and regulated by law, nation, and economy? P/NP or letter grading.

103. Knowledge. (4) Lecture, three hours; discussion, one hour (when scheduled). Enforced requisite: course 10. Exploration of social production of knowledge about gendered subjects and gender systems. Students engage key issues in feminist theory and feminist epistemology. How do feminist scholars identify and frame research questions? How is knowledge about marginalized subjects produced? How has feminism challenged dominant understandings of knowledge, rationality, objectivity, and scientific method? How have social movements sought to challenge traditional modes of knowledge production? P/NP or letter grading.

104. Bodies. (4) Lecture, three hours; discussion, one hour (when scheduled). Enforced requisite: course 10. Exploration of scholarly theories and histories of body, with focus on topics such as sex identities, sexuality, gendered violence, and reproductive politics. How has science, medicine, and culture sought to distinguish male from female in different historical periods and locations? How have meanings of terms sex and gender varied across time and place? How has gendered body been represented in different visual cultures? How have embodied identities been produced in different historical and geographic contexts? What is relationship between embodiment and desire? P/NP or letter grading.

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) Same as Chicana/o and Central American Studies M106B, Gerontology M104C, Public Affairs M103, and Social Welfare M104C.) Lecture, four hours. Exploration of complexity of variables related to diversity of aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in multidisciplinary perspective utilizing faculty from variety of fields to address issues of diversity. Letter grading.

105. Topics in Women and Medicine. (4) Lecture/discussion, three hours. Examination of medical conditions and topics of women in context of issues that impact women’s health. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M105A. Premodern Queer Literatures and Cultures. (8) Same as English M101A and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M101A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of discrete period of queer literature from beginning of modernity (circa 1890) up to present day. Works by such writers as Sappho, Plato, Marlowe, Shakespeare, and Thomas Gray may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M105B. Queer Literatures and Cultures, 1850 to 1970. (5) (Same as English M101B and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M101B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of discrete period of queer literature and culture from circa 1850 to 1970. Works by such authors as Walt Whitman, Radclyffe Hall, Gertrude Stein, Virginia Woolf, Langston Hughes, Tennessee Williams, Henry Blake Fuller, and James Baldwin may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Honors Program

The honors program is open to advanced junior and senior Gender Studies majors with a 3.6 grade-point average in gender studies courses and a minimum 3.4 overall GPA who have no outstanding Incomplete grades, and to majors who demonstrate ability to do honors work by submitting a paper to the department chair for approval.

To qualify for honors at graduation, students must successfully complete three successive terms of honors research (courses 198A, 198B, 198C) with their faculty sponsor and receive a grade of B+ or better on their research paper/project. Course 198A may be applied toward the elective requirement; courses 198B and 198C are in addition to the minimum required courses. More information is available from the under-graduate counselor in the department office.

Undergraduate Minor

Gender Studies Minor

The Gender Studies minor augments and enriches study in a traditional field. Students participating in this program are required to complete both a departmental major and the Gender Studies minor.

Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better and formally register with the department under-graduate advisers in 1120 Rolfe Hall. They are encouraged to declare the minor as early as possible.

The Minor

Required Lower-Division Course (5 units): Gender Studies 10. Students must also complete departmental lower-division requisites, as applicable, for upper-division gender studies courses.

Required Upper-Division Courses (24 units): (1) One core course from Gender Studies 102, 103, or 104, (2) 120SL or 187 or an equivalent senior research seminar approved in advance, and (3) four upper-division courses (minimum of 4 units each) from the approved gender studies course list.

Policies

No more than 4 units of courses 195 through 199 may be applied toward the minor requirements. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Courses in which students receive grades of C– or lower may not be applied toward the core requirements in the minor. Successful completion of the minor is indicated on the transcript and diploma.
M105G. Queer Literatures and Cultures after 1970. (Same as English M101C and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M101C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: English Composition 3; Examination of cultural production, specifically literature, produced by queers after Stonewall rebellion in New York in 1969, widely regarded as origins or beginning of modern LGBTQ movements in U.S. Films and writings by such authors as Andrew Hol leran, Leslie Feinberg, Achy Obejas, Essex Hemphill, Audre Lorde, and Alison Bechdel may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M105D. Studies in Queer Literatures and Cultures. (Same as English M101D and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M101D.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: English Composition 3; Variable specialized studies course in queer literatures and cultures. Topics focus on particular problem or issue in terms of its relationship to queer cultures and writings. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M106. Imaginary Women. (Same as Comparative Literature M106.) Lecture, three hours. Enforced requisites: English Composition 3. Focus of study on women writers that may include historical, regional, national, or thematic emphasis, with possible topics such as authorship, self-writing, sexuality, gender, and genre. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M107A. Studies in Women's Writing. (Same as English M107A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: English Composition 3; Examination of literary and cultural production through lens of gender and sexuality. Depending on instructor, emphasis may be historical, regional, national, comparative, or thematic and include other intersectional vectors of identity and representation such as race and ethnicity. May be repeated for credit with topic or instructor change. P/NP or letter grading.

108S. Violence against Women. (4) Lecture, three hours. Enforced requisites: course 10. Factual information and theoretical analyses regarding various forms of violence against women; gender and gendered social spaces; experiences, and communities through critical examination of social structures and social science research. Letter grading.

M109. Women in Jazz. (4) Same as African American Studies M109, Ethnomusicology M109, and Global Jazz Studies M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from 1890s to present. Survey of women vocalists, instrumentalists, composers, arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

M110C. Topics in Feminist Philosophy: Metaphysics and Epistemology. (Same as Philosophy M110C.) Lecture, three hours; discussion, one hour (when scheduled). Requisite for Gender Studies majors: course 10; for other students: one philosophy course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by new scholarship on women in philosophy, and philosophical concepts and principles that arise in discussion of women's rights and liberation. Philosophical approach to feminist theologies. May be repeated for credit with consent of instructor. P/NP or letter grading.

M111. Women and Film. (6) Same as Film and Television M111.) Lecture, eight hours; discussion, one hour. Historical issues and critical approaches to women and cinema that may include authorship, stardom, female genres, and images of women in Hollywood cinema, alternative cinema, and independent cinema from silent era to present. Letter grading.

112. Special Topics in Women and Arts. (4) Lecture, three hours. Enforced requisites: course 10. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they work. Approach to be comparative, cross-cultural, thematic, and feminist. How women practice by women in relation to issues of power, representation, and access. May be repeated twice, except for credit toward Gender Studies major. P/NP or letter grading.

113. Sex Work. (4) Lecture, three hours. Enforced requisites: course 10. Analysis of variety of contemporary sex work both in U.S. and abroad from feminist perspective. Examination of how race, class, and gender alter experience and perception of erotic labor, and consideration of critically feminist responses by range of authors to sex work. Topics include brothels, phone sex, strip clubs, sex tourism, military prostitution, and international traffic in persons. Reading of texts by sex workers, as well as articles from current philosophical and policy debates about prostitution. P/NP or letter grading.

M114. Introduction to Lesbian, Gay, Bisexual, Transgender, and Queer Studies. (Same as Lesbian, Gay, Bisexual, Transgender, and Queer Studies M114.) Lecture, three hours; discussion, one hour. Introduction to history, politics, culture, and social study of lesbians, gay men, intersex identities, and queer people; examination of sexuality and gender as categories for investigation; interdisciplinary theories and research on minority sexualities and genders. P/NP or letter grading.

M115. Topics in Sex of Sexual and Gender Orientation. (4) Same as Lesbian, Gay, Bisexual, Transgender, and Queer Studies M115.) Lecture/discussion, three hours. Requisite: course M114. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and/or bisexual issues; variable topics may include cultural, historical, political, and social perspectives and research. May be repeated for credit. Letter grading.

117. Introduction to Queer Latina/Latino Studies. (4) Lecture, three hours. Examination of production of Latina/Latino identity and its relationship to and influence within contemporary literature, music, film, and performance art. Engagement with texts that posit queer analytic approach to study how Latinidad is informed by modes of desire and identification that fall out of dominant notions of Latino in popular culture. Critical engagement of limits of knowledge production around Latina/Latino identity to develop new analytics that abide by question of Latinidad rather than positing answer or solving its political consequences in contemporary U.S. culture. Study draws upon feminist and queer artists such as Ana Mendieta, Nao Bustamente, Asco, Tania Bruguera, Tropicana, Ana Mendieta, Arcadia, Felix-Gonzales Torres, Gladys Amador, and Gregg Araki. P/NP or letter grading.

M118. Queering American History. (4) Same as Lesbian, Gay, Bisexual, Transgender, and Queer Studies M118.) Lecture, four hours. Enforced requisites: one prior lesbian, gay, bisexual, transgender, and queer studies course. History of sexual and gender minorities in U.S. Topics include changing norms, romantic tristesse, politics, gay the AIDS, post-Stonewall culture, AIDS migration, queer theory, and politics. P/NP or letter grading.

119. Racial Violence and Law. (4) Lecture, three hours. Requisite: course 10. Through feminist, anti-colonial, and anti-racist perspectives, analysis of racial violence and appropriate anti-violence strategies. Offers theoretical approach for understanding racial violence. Consideration of what is racial violence and racial terror; how feminists should respond to racial violence; connection between historical moments of extraordinary racial violence and our everyday world; how we understand violence at specific sites, e.g., concentration camps, racial violence between and in different historical contexts; how individuals come to participate in, remain indifferent to, or approve of violence; role of hegemonic masculinity and femininity in these processes; and in different forms. Exploration of these broad questions through consideration of anti-indigenous/colonial violence, anti-Black violence, and anti-Mexican violence of underpinning anti-migrant and anti-refugee movements, torture, terror, and state violence. 120SL. Feminist Praxis: Community-Based Learning. (4) Seminar, three hours; fieldwork, four hours. Prerequisite: at least two core courses. Requisites: course 10 and one course from 102, 103, or 104. Service-learning course combining seminar with practical experience working on gender issues and connecting these experiences to methodological and theoretical themes explored in gender studies core courses. Community partners selected in advance by instructor in consultation with Center for Community Learning. Letter grading.

M121. Topics in Gender and Disabilities. (4) Same as Disability Studies M121.) Lecture, three and one half hours. Limited to juniors/seniors. Ways in which issues of disability are affected by gender, with particular emphasis on various policies and experiences of women with disabilities. Approach is intersectional, exploring how social categories of class, race, ethnicity, religion, age, sexuality, nationality, and citizenship affect and are affected by disability. Topics may include law (civil rights, nondiscrimination), representation (arts, literature), education, public policy, health. May be repeated for credit with topic and instructor change. P/NP or letter grading.

122. Masculinities. (4) Lecture, three hours. Enforced requisites: course 10. Masculinity as theorized by feminists and shaped by race, class, age, and nation. Topics include femininities, masculinity, gender, race, body, childhood and adolescent socialization, sport, male violence, homophobia, black masculinity, globalization and masculinity, and men's movements in 19th and beyond. Special emphasis on social sciences approaches and methodologies. P/NP or letter grading.

123. Gender, Race, and Class in Latin American Literature and Film, 1850 to 1950. (4) Seminar, three hours. Intensive course in discussion in English. Comparative survey of cultural expression in Latin America, with emphasis on works produced or set in late-19th and early-20th centuries. Historical and social circumstances of women in different Latin American cultural contexts, with particular concentration on how gender, sexuality, race, and class are absorbed and reflected in literature and film. Within this genealogy, examination of how cultural production sustains or interrogates categories used to construct social, political, and cultural hierarchies. Topics include questions of authority and authorship such as women’s participation in formation of national cultures, engagement with artistic movements, and strategies of self-figuration. P/NP or letter grading.

M124. Sex, Race, and Difference in Transnational Film. (8) Same as Film and Television M124.) Lecture, three hours; discussion, one hour. Introduction to feminist method in media studies, training of students in media literacy so they acquire necessary skills to critically interrogate film as medium of communication and to appreciate how films provide lens to formation of national cultural contexts; and how we understand violence at specific sites, e.g., concentration camps, racial violence, and different critical issues of our time. Development of understanding of transnationality to examine how circulations of capital, labor, and commodities transact, render problematic, and sometimes resist national borders. Examination of role of film in both exemplifying and representing these conditions of transnationality. How films enable understanding of historical and contemporary relationships between those categories as nation, race, class, sex, citizenship, and migration; colonialism and settler colonialism; Orientalism, geopolitics, and sexuality; cultural identity and diaspora; transnational conceptions of sexual desire and
embodiment; immigration and religious difference; and criminalization of racial difference. P/NP or letter grading.

125. Perspectives on Women’s Health. (4) Lecture/discussion, three hours. Requisite: course 10. Examination in depth of various ways women provide healthcare in both paid and unpaid capacities and of political, economic, and social factors affecting women as recipients of healthcare. P/NP or letter grading.

M126. Feminist and Queer Theory. (5) Same as English M126 and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M126.) Lecture, four hours; discussion, one hour. Requisite: American Composition. Recommended: one course from 102, 103, 104, English 120, or 121. Investigation of key concepts and debates in study of gender, sexuality, and kinship, with focus on their interrelated significance for making of culture. Readings to be interdisciplinary, with possible emphasis on impact of changing ideas of gender and sexuality on specific historical cultures. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M127. Women in Russian Literature. (4) (Same as Russian M127.) Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Introduction to alternative tradition of women’s writings in Russia and Soviet Union. Emphasis on images of women expressed in this tradition as compared with those found in works of contemporary male writers. P/NP or letter grading.

129. Women and Gender in Caribbean. (4) Seminar, three hours. Requisite: course 10. Exploration of ways in which gender discourses have been central to making of Caribbean history and to some most enduring experiments in European empire, capitalist development, and coercive labor. Emphasis on women who lived through slavery and indentured servitude and who continue to live under systems of globalization and neoliberal exploitation. How Caribbean women have historically empowered themselves and their communities, working in various ways to survive, radicalize, and transform the world. What were in particular ideas about gender and sexuality have shaped emergence of new nations and national cultures in Caribbean, and consideration of some dominant images of women in Caribbean popular culture. Exploration of complicated ways in which gender, race, class, sexuality, and national identity intersect in different Caribbean contexts. P/NP or letter grading.

131. Feminist Politics in Korea and Diaspora. (4) Lecture, three hours. Requisite: course 10. Examination of religion and social movements in Korea and Korean diaspora through interdisciplinary feminist and critical area studies approach. Use of postcolonial, anti-racist, and intersectional frameworks. Emphasis on Korean and Korean diaspora as site of inquiry and field of knowledge. Close examination of several contemporary political issues, focusing on salient political ideologies and oppositions, and mobilized by religious groups, and wide range of ideas, institutions, and practices that are animated by complex politics of gender, sexuality, and religion. Topics include Korean and transcendentalist cosmologies; Korean imperialism, antimilitarism and communism; and nabolism; pro–democracy movements and labor organizing; Catholic and Buddhist solidarity and sanctioning; geographies; heteropatriarchy and urban mega-churches; faith-based pacification and conscientious objection to military conscription. P/NP or letter grading.

CM132A. Chicana Feminism. (4) Same as Chicana/o and Central American Studies M132A, Leslie, Gay, Bisexual, Transgender, and Queer Studies M132A.) Lecture, four hours. Enforced requisite: course 10 or Chicana/o and Central American Studies 10A. Examination of theories and practices of women who identify as Chicana feminists and of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequalities faced by Chicanas within both Chi- cana/Chicano community and dominant society. At- tention to Anglo- and Mexican-Chicano women. Concurrently scheduled with course CM232A, P/NP or letter grading.

M132B. Contemporary Issues among Chicanas. (4) (Same as Chicana/o and Central American Studies M132B.) Lecture, two and one half hours. Requisite: course 10. Overview of conditions facing Chicanas in U.S., including issues on family, immigration, reproduction, employment conditions, Comparative analy- sis with other Latinas. P/NP or letter grading.

M133A-M133B. History of Women in Europe. (4–4) (Same as History M133A-M133B.) Lecture, three hours; discussion, one hour (when scheduled). Requisite: for seniors/juniors. History of social, political, and cultural roles of women in Western Europe from early Middle Ages to present. P/NP or letter grading. M133A. 801: to 1300. M133B. 1301 to 1600. Letter grading.

M133C. History of Prostitution. (4) (Same as History M133C.) Lecture, three hours; discussion, one hour (when scheduled). Requisite: for seniors/juniors. History of prostitution from ancient times to present. Topics include tolerance in medieval Europe, impact of syphilis, birth of courtesan, regulation in 19th-cen- tury Europe, white slavery scare, and contemporary global sex trade. Readings include novels, primary sources, and testimony by sex workers. P/NP or letter grading.

M135C. Bilingual Writing Workshop. (4) (Same as Chicana/o and Central American Studies CM135 and Lesbian, Gay, Bisexual, Transgender, and Queer Studies CM135.) Seminar, four hours. Limited to juniors/seniors. Writing sample required; access to course writing center required. Focus on writing for Chicana/Latina women and Chicano/Latino men. Emphasis on classroom and electronic reading. P/NP or letter grading.

M136. Music and Gender. (4) (Same as Musicology M136.) Lecture, four hours; discussion, one hour. Analysis of gender ideologies in several musical cul- tures; representations of gender, body, and sexuality by both male and female musicians; contributions of women to Western musical traditions; and the role of feminism and gay/lesbian theory and criticism. Letter grading.

M137E. Work Behavior of Women and Men. (4) (Same as Psychology M137E.) Lecture, two and one half hours. Requisite: course 10 or Psychology 10. De- signed for seniors. Examination of work behavior of men and women. Topics include the impact of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job sat- isfaction, and independence of work and family life. P/NP or letter grading.

138. Gender and Popular Culture. (5) Lecture, three hours; screenings, two hours. Limited to juniors/se- niors. Conceptual tools and critical skills necessary to make critical interventions in gender and popular cul- ture in the U.S. context. Consideration of theories of popular culture and exploration of distinctive power and ideological force exerted by popular culture in public life. Examination of representa- tions of male and female bodies to understand vi- sual vocabulary of gender in popular culture, as well as relationship between visual stereotypes and re- flection in transformative potential of pop culture and exploration of capacity and limits of popular culture as agent of social change. Letter grading.

139. Women and Art in Contemporary U.S. (4) (Same as Art History M139.) Lecture, three hours; discussion, three hours. Requisite: course 10. Ex- ploration of some significant cultural issues of con- temporary American women’s art movement. Repre- sentation, resistance, and critical intervention in gender, race, and class as visual and performance arts as these reflect various perspec- tives of feminism. Letter grading.

M140C. Class and Gender in Care Work. (4) (Same as Asian American Studies M140C, Chicana/o and Cen- tral American Studies M140C.) Lecture, three hours; discussion, one hour. Requisite: for juniors. Examination of how gender, race, class, and citizenship shape status of domestic labor in U.S. Examination of domestic worker experiences through films, fiction, and traditional scholarship. Examination of why domestic work is in high demand, who employs domestic workers and why immigrants of color make up large percentage of this workforce. Examina- tion of how domestic workers navigate pay and working conditions, and how they build community and family networks in shadows of their privileged em- ployers. P/NP or letter grading.

141. Gender, Culture, and Capitalism. (4) Lecture, three hours. Dynamic investigation of culture as terrain of production—and reproduction—of and resistance to gendered, racialized, and capitalist relations through active analysis of advertisements, television serials, Disney fairy tales, and performative forms like fortune-telling. Focus on relationships between gender, culture, and capitalism through theoretical, feminist and queer cultural studies to explore gen- dered processes of production and consumption of culture under capitalism. P/NP or letter grading.

142. Race, Gender, and Punishment. (4) Seminar, three hours. Enforced requisite: course 10. Examination of what crisis scholars have called prison industrial complex. U.S. has largest prison population in world. How and why is this? Who is imprisoned? What were historical conditions and ideologies gave rise to this massive explosion in prisoner population? Does prison function as regime? How have politicians used imprisonment as response to economic transforma- tions and social disorders. How does a society analogous to or distinct from regimes of racialized punish- ment in prior historical moments? How do prisons change environments? How have people mobilized to reduce U.S. prison population? Why do some activists argue for reform and others for abolition? Examination of key topics, including policing and racial profiling, immigrant detention, privatization, spatial transforma- tion, gender violence, punishment, and political imprisonment. P/NP or letter grading.

CM143XP. Healing, Ritual, and Transformation. (4) (Formerly numbered CM143.) (Same as World Arts and Cultures CM143X.) Lecture, one hour. Requisite: De- signed for juniors/seniors. Examination of how various cultures think of health and wellness, not only individu- ally but collectively. Exploration of structural inequali- ties within healthcare and medical sciences. Students are required to contribute weekly to service learning.
component, working with individuals and organizations in fields of health and wellness including healers, non-profits, and organizations working for social justice. Offered concurrently with CM243XP. Letter grading.

M144. Women's Movement in Latin America. (4) (Same as Chicana/o and Central American Studies M144 and Labor Studies M144.) Lecture, four hours. Course requirements: interaction with individuals and organizations in Latin America and Caribbean to examine diverse social movements and locations from which women have launched political and gender struggles. Discussion of forms of resistance required. Examination of women's consciousness that have emerged out of indigenous rights movements, environmental struggles, labor movements, Christian-based communities, peasant and rural organizing, and new social movements. Offered in consultation with women, gender, sexuality, feminism, and human rights. Through comparative study of women's movements in diversity of political systems as well as national and transnational arenas, students gain understanding of historical contexts and political conditions that give rise to women's resistance, as well as major debates in field of study. P/NP or letter grading.

145. African American Women's History. (4) Seminar, three hours; discussion, course 10. Historical examination of black women's experiences in the U.S. from the antebellum era to present. By situating their experiences within major historical transitions in American history, exploration of key themes, including gender, race, ethnicity, class, culture, historical contexts. P/NP or letter grading.

M146. Feminist Geography. (4) (Same as Geography M144.) Lecture, three hours; discussion, one hour. Cultural engagement of gender as concept of geographic inquiry. Gender as spatial process, analysis of feminist geographic theory and methods, landscapes of gender, challenges of representing gender. Spaces of femininity, masculinity, and sexuality. P/NP or letter grading.

M147A. Psychology of Lesbian Experience. (4) (Same as Lesbian, Gay, Bisexual, Transgender, and Queer Studies M147A and Psychology M147A.) Lecture, three hours; discussion, one hour. Examination of gender as constructed through concrete experiences and discourses of gender. Challenging of gender, representing gender. Spaces of femininity, masculinity, and sexuality. P/NP or letter grading.

M147B. History of Women in Colonial British America and Early U.S., 1600 to 1860. (4) (Same as History M147C.) Lecture, three hours; discussion, one hour (when scheduled). Comparative study of women’s movements and feminism in Latin America and Caribbean to examine diverse social movements and locations from which women have launched political and gender struggles. Discussion of forms of resistance required. Examination of women’s consciousness that have emerged out of indigenous rights movements, environmental struggles, labor movements, Christian-based communities, peasant and rural organizing, and new social movements. Offered in consultation with women, gender, sexuality, feminism, and human rights. Through comparative study of women’s movements in diversity of political systems as well as national and transnational arenas, students gain understanding of historical contexts and political conditions that give rise to women’s resistance, as well as major debates in field of study. P/NP or letter grading.

M147C. Transnational Women's Organizing in Americas. (4) (Same as Chicana/o and Central American Studies M147C.) Seminar, four hours. Feminist theories of transnational organizing. Examination of gender and race as central to processes of globaliza- tion and essential to economic and political struggles encompassing a wide range of social movements. Examination of how processes of race and gender influence global economic policies and impact local actors and their communities. In time when people, capital, cultures, and technologies cross national borders with growing frequency, discussion of process of acceler- ated globalization has been linked to feminization of labor and migration, environmental degradation, ques- tions of diaspora, sexuality, and cultural displacement, as well as growing feminization of poverty. Problems and issues created by globalization and cultural, social, and political responses envisioned by transnational organizing. P/NP or letter grading.

M147D. History of Women in U.S., 1860 to 1980. (4) (Same as Women's History M147D.) Seminar, four hours; activity, one hour. Limited to majors and Labor Studies minors. Examination of the ways in which media culture induces people to per- ceive various dominant and dominated and/or colo- nized groups of people. Ways in which women, gay, lesbian, bisexual, transgendered, racial, and ethnic marginalized peoples, class relations, and other subal- tern or subordinate groups are presented and often misrepresenting them. Identification and employ- ment of practical applications of communications and feminist theories for understanding ideological nature of stereotyping and politics of representation through use of historical sources, lectures, class discus- sions, and readings. Introduction to theory and practice of cultural studies. Letter grading.

152. Gender, Disability, and Education. (4) Lecture, three hours. Drawing on critical theory, study engages intersec- tions of disability as it is theorized, con- structed, and lived as post/neocolonial condition. Study bridges disability scholarship between global and local. Topics include interdisciplinary fields of feminist disability studies—which assumes disability is always inextricably linked to other social markers, such as gender, race, sexuality, and class—gender and disability in multicultural society, changes in psychological theo- ries of disability, and disability studies. Examine ways in which media culture induces people to per- ceive various dominant and dominated and/or colo- nized groups of people. Ways in which women, gay, lesbian, bisexual, transgendered, racial, and ethnic marginalized peoples, class relations, and other subal- tern or subordinate groups are presented and often misrepresenting them. Identification and employ- ment of practical applications of communications and feminist theories for understanding ideological nature of stereotyping and politics of representation through use of historical sources, lectures, class discus- sions, and readings. Introduction to theory and practice of cultural studies. Letter grading.

153. Gender and Comics. (4) Seminar, three hours. Introduction to comics as a political and cultural form. Discussion of comics as a form of graphic storytelling and its role in social and political contexts. Course examines the nature of comics as a medium of expression and its impact on society. P/NP or letter grading.

154R. Women and Social Movements. (4) (Same as Anthropology M145R.) Lecture/discussion, three hours. Recommended preparation: prior gender studies or anthropology courses. Comparative studies of social movements (e.g., nationalist, socialist, liberal/ repressive). Women's movements in Latin America, including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women's participation in social transformations and the centrality of gender interests. P/NP or letter grading.

154T. Women's Voices: Their Critique of Anthropology of Japan. (4) (Same as Anthropology M145T.) Lecture, three hours. Preparation: introductory socio-cultural anthropology course. The anthropology of Japan has long viewed Japan as a homogenous whole. Restatement of diversity and contradiction in it by listening to voices of Japanese women in various historical contexts. P/NP or letter grading.

156A. History of Women in the U.S.: The Rebellious Woman. (4) Limited to juniors/seniors. Introduction to major and minor figures and movements for social change in the U.S., including themes from politics, sports, civil rebellion, and recovery. Examines dramatic challenges to gender roles over course of the 20th century through actions of rebellious women who led way for many women in the 21st century. Offered in summer only. P/NP or letter grading.

157C. Chicana Historiography. (4) (Same as Chica- na/o and Central American Studies M158 and His- tory M151D.) Lecture, four hours. Examination of Chi- cana/o and Central American history. Focus of course is on the dynamic and transformative nature of writing of history has placed Chicanas into particular narratives. Using Chicana feminist approaches to study of history, revisiting of specific historical periods and events such as Spanish Conquest, Mexican Period, American Conquest, Mexican Revolution, and Chicano Movement to excavate untold stories about women’s participation in and contribution to making of Chicanas and Chicanos history.

157X. Women, Gender, and Sexuality in Italian Cul- ture. (4) (Same as Italian M157X.) Lecture, three hours; discussion, one hour. Analysis of gender roles, images of femininity and masculinity, patriarchy, myths of Ma- donna and Latin lover, condition of women in Italian society through history, politics, literature, film, and other media. Italian majors required to read texts in Italian. P/NP or letter grading.

160. Sporting Bodies. (4) Lecture, three hours. Re- quirement: major or letter grading. From Don Imus’ “nappy-headed hos” comment to controversies about transgender athletes or athletes with prosthetics; from covers of magazines to game in Dodger’s Stadium paying footballers not singing national anthem, college men’s teams rating women’s teams in terms of sexual positions, unionization of athletes— discourses of sport draw heavily upon extant ideolo- gies of race, gender, sexuality, and class. Introduction to critical analyses of social categories and how they are represented and reproduced in various sports and media. Critical examination of historical social values and how they are reproduced through sport. P/NP or letter grading.

M161. Sports, Normativity, and Body. (4) (Same as Disability Studies M161.) Lecture, four hours. Since cour- ses like “Intersections of Sport and Disability” in 1994, athletes with disabilities have had, and been denied, formal opportunities to compete with able-bodied ath- letes. Overview of some major topics of discussion concern intersections of disability, addressing variety of perspectives and themes on disability and sport, such as passing, sports integration, competition versus charity, and mainstreaming. Sources include trade, television, and biographical writings that address sports, body and disability generally, and Special Olympics specifically. P/NP or letter grading.

M162. Sociology of Gender. (5) (Same as Sociology M162.) Lecture, three hours; discussion, one hour. En- forced requisite: course 10 or Sociology 10. Examina- tion of processes by which gender is socially con- structed. Topics include distinction between biological
sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

M163. Gender and Work. (4) (Same as Sociology M163.) Lecture, three hours. Requisite: course 10 or Sociology 1. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including materials. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality. P/NP or letter grading.

M164. Politics of Reproduction and Everyday Life. (4) (Same as Sociology M164.) Lecture, three hours. Discussion, one hour. Limited to juniors/seniors. Social and human reproduction is global policy issue. Government efforts to influence reproduction are important feature of modern state: political intervention into private life, intimacy, and sexuality. Exploration of politics of reproduction—intersection between politics and life cycle or between public sphere and private lives—and coverage of broad range of issues addressing prevention and promotion of reproduction from historical-comparative approach. Reading, discussion, and development of culminating project. P/NP or letter grading.

M164A. Women, Violence, Globalization: India, Philippines, Singapore, Vietnam. (4) (Same as Asian American Studies M164.) Lecture, four hours. Study of various forms of violence on women—both in and of themselves but in light of larger systems of oppression, with focus on Filipino, Vietnamese, Singaporean, and South Asian cultures. Letter grading.

M165. Psychology of Gender. (4) (Same as Psychology M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, and sex differences in intelligence abilities and achievement, and impact of gender on social interaction. P/NP or letter grading.

M167. Contested Sexualities. (4) (Same as Lesbian, Gay, Bisexual, Transgender and Queer Studies M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variable topics include identity and community; age, class, gender, and racial diversity; and analysis of contemporary issues affecting contested sexualities. Letter grading.

M168. Feminist Economics in Globalizing World. (4) Lecture, four hours. Preparation: satisfaction of Letters and Science Writing II requirement. Requisite: course 10. Designed for juniors/seniors. Overview of field of feminist economics, with emphasis on development economics and its globalization. Overview of gender inequalities such as gender division of labor in paid and unpaid work, patterns of employment and unemployment, and wage gaps between men and women in different world economy regions; feminist critiques of economics and of theoretical debates within gender and development field on topics such as structural adjustment, feminization of labor force, and poverty. Emphasis on top-down theorists; emphasis by governments, international policy-making institutions, and civil society organizations to make economic policies and structures gender-equitable. P/NP or letter grading.

M169. Common Thread: Garment Workers Past, Present, Future. (4) (Same as Chicana/o and Central American Studies M128C and Labor Studies M108.) Lecture, two hours. This hands-on class explores global economics, labor history, and ethnic studies to offer in-depth exploration of labor and experiences of garment industry workers from early 19th century to present. In contrast to traditional narratives, study locates garment workers—majority of whom are immigrant women—at vanguard of U.S. labor movement, showing how they pioneered new forms of worker education and other progressive programs by coming together. Exploration of garment work relationship to American culture, tracing how sweatshop became symbol of worker exploitation, how popular culture and fashion trends impacted lived realities of workers in those shops, and how racial and gendered expectations shaped public perceptions of garment workers. By doing so, study reveals garment work to be central thread that ties together histories of global trade, industrialization, gender and sexuality, immigration, radicalism, unionization, and American imperialism. P/NP or letter grading.

M170C. History of Women in China, AD 1000 to Present. (4) (Same as History M170C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Topics include women and family, women in Confucian ideology, women in literati culture, feminist movement, and women and communist revolution. P/NP or letter grading.

171A. Women, Gender, and Law: Jurisprudence of Sexual Equality. (4) One course. Enforced requisite: course 10. Recommended: course 102 or 103 or 104. Exploration of models of equality described and/or advocated by legal theorists primarily in U.S.—equality of opportunity, equality of outcome, equality of respect, etc.—using specific problems of women (e.g., sexual harassment, pregnancy leave policy, access to safe and effective reproductive control technology, problems of gender identity). Specific focus may vary by instructor (e.g., consideration of sexual equality theories to issues of gender equality and legal status outside U.S. or from perspectives of international human rights). May be repeated for credit with topic or instructor change. P/NP or letter grading.

M172. Afro-American Woman in U.S. (4) (Same as African American Studies M172 and Psychology M172.) Lecture, two and one half hours. Designed for juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of large society and as members of their biological and ethnic group. P/NP or letter grading.

M173B. Women in 20th-Century Japan. (4) (Same as History M173B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Japanese women in Japanese and world history through state documents, autobiographical voices, contemporary television, and other varying historical sources. Consideration of political and social changes (1900 to 1930), women, war, and empire (1930 to 1945), and women in consumer society (1960s to 1990s). P/NP or letter grading.

M174. Sociology of Family. (4) (Same as Sociology M174.) Lecture, three hours; discussion, one hour. Theory and research dealing with modern family, its structure, and functions, including historical changes, variant family patterns, family as institution, and influence of contemporary society on family. P/NP or letter grading.

M175. Women and Cities. (4) (Same as Urban Planning M175.) Lecture, three hours. Limited to juniors/seniors. Examination of relationships between women and cities: (1) how cities have affected women's opportunities for economic and social equality, (2) women's contributions to development of U.S. cities, and (3) contemporary strategies and efforts to create urban environments that reflect women's needs and interests. P/NP or letter grading.

CM178. Critical Media Literacy and Politics of Gender: Theory and Production. (4) (Same as Education CM178.) Seminar, three hours. Corequisite: course CM178L. Use of range of pedagogical approaches to theory and practice of critical media literacy that necessarily involves understanding of new technologies and media forms. Engagement in hands-on production and production of media to inform student analysis of media and critical media literacy projects. Concurrently scheduled with course CM278. Letter grading.

CM178L. Critical Media Literacy and Politics of Gender: Laboratory. (2) (Same as Education CM178L.) Laboratory, two hours. Corequisite: course CM178. Hands-on production experience as integral component of course CM178. Concurrently scheduled with course CM278L. Letter grading.

M180B. Historical Perspectives on Gender and Science. (4) (Same as History M180B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical cases illustrating how gender enters practices and concepts of science. Topics include gendered conceptions of nature, persons of man of science, role of women in scientific revolution, scientific investigations of women and feminine. P/NP or letter grading.

185. Special Topics in Gender Studies. (4) Lecture, three hours. Preparation: one prior gender studies course. Designed for juniors/seniors. Specialized or advanced study in one area within gender studies. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

M185A. Special Topics in American Indian and Gender Studies. (4) (Same as American Indian Studies M187A.) Lecture, three hours. Variable topics in American Indian and gender studies. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

M186A. Women and Gender, Prehistory to 1792. (4) (Same as History M186A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exploration of evolution of gender, and sexuality from prehistory to 1792. First half deals with period before written history and asks when did gender appear? How and why did patriarchy develop? Topics include evolution of women’s bodies, appearance of gender, women’s contribution to Neolithic revolution, significance of Goddess artifacts, creation myths, and women and sexuality in different religions. Consideration of effects of European conquest on Mesoamerican women, women’s power in monarchies, gender dimensions of Atlantic slavery, and first manifestations of feminist consciousness in second half. Objectives include creation of women’s bodies, appearance of women in those shops, and how racial and gendered expectations shaped public perceptions of garment workers. By doing so, study reveals garment work to be central thread that ties together histories of global trade, industrialization, gender and sexuality, immigration, radicalism, unionization, and American imperialism. P/NP or letter grading.

M188B. Global Feminism, 1850 to Present. (4) (Same as History M186B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to movements for women's rights (educational, political, economic, sexual, and reproductive) around world and over one and one half centuries. P/NP or letter grading.

187. Senior Research Seminar: Gender Studies. (4) Seminar, three hours. Requisite: courses 10, 102, 103, 104. Designed for advanced junior/senior Gender Studies majors or minors. In-depth study of major gender research. Research in groups. Research paper or from perspectives of international human rights). May be repeated for credit with topic or instructor change. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

M191D. Topics in Queer Literatures and Cultures. (5) (Same as English M191D and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M191D.) Seminar, three or four hours. Enforced requisite: English Composition 3. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M191E. Topics in Gender and Sexuality. (5) (Same as Disability Studies M191E.) Seminar, three or four hours. Enforced requisite: English Composition 3. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

189A. Advanced Honors Seminars. (4-18) Seminar, four hours. Limited to junior/senior gender studies honors program students. Three-term sequence to research and write honors thesis under direct supervision of faculty sponsor and in consultation with faculty co-sponsor. Individual contract required. 189A. Required: course 187. Letter grading. 189B. Enforced requisite: course 189A. In Progress grading (credit to be given only on completion of courses 189A, 189B, and 189C). Required. Letter grading.

199. Directed Research in Gender Studies. (2 or 4) Tutorial, to be arranged. Preparation: at least two upper-division gender studies courses, minimum 3.0 grade-point average. Limited to 103 or 104. Limited to junior/senior Gender Studies majors and minors. Supervised individual research or investigation under guidance of faculty mentor on specific subject matter required. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses

201. Introduction to Interdisciplinary Methods in Gender Studies. (4) Seminar, three hours. Examination of some of most influential feminists and/or feminists of color, feminist scholars from other countries, and recent so-called antifeminist discussions of future feminist sociology. Letter grading.

210. Topics in Women and Public Policy. (4) Seminar, three hours. Departmental topics course that offers in-depth aspects of field. Limited of investigation set by individual instructor. S/U or letter grading.

210. Topics in Women and Public Policy. (4) Lecture, four hours. Designed for graduate gender studies students. Introduction to background, decision-making processes, and current debates over public policy directly affecting women. May be repeated for credit with instructor change. Letter grading.

215. Topics in Study of Sexuality and Gender. (4) Seminar, three to four hours. Designed for graduate students. Multidisciplinary studies on aspects of sexual orientation, gender identity, queer and transgender theory, interdisciplinary research on minority sexualities, and social construction/deconstruction of gender. May be repeated for credit with topic or instructor change. Letter grading.

220. Cultural Studies in Gender, Race, and Sexuality. (4) Seminar, three hours. Designed for graduate students. In-depth study of representations of gender and sexuality in literature, film, performance, and culture, with special attention to race. Topics include flow of artistic cultural production across national borders, theorizing feminisme as diasporic or multicultural formation. Letter grading.

CM232A. Chicana Feminism. (4) (Same as Chicana/o and Central American Studies CM232A.) Lecture, four hours. Enforced requisite: course 10 or Chicana/o and Central American Studies CM232A. Examination of theories and practices of women who identify as Chicana feminist. Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within Chicana/o/Chicano community and dominant society. At- attention to Anglo-European and Third World women. Concurrently scheduled with course CM132A. S/U or letter grading.

MC233. Methodology of Gender and Sexuality. (4) (Same as Sociology M233.) Seminar, three hours. Designed for graduate students. Examination of current American feminist theory relevant to sociologists. Exploration of critiques of second wave feminism by working class feminism and/or feminist scholars from other countries, and recent so-called antifeminist feminists. Discussion of directions for future feminist sociology. Letter grading.

CM243XP. Healing, Ritual, and Transformation. (4) (Formerly numbered CM243J.) (Same as World Arts and Cultures CM243XP) Lecture, four hours. Designed for graduate students. Examination of how various cultures think of health and wellness, not only in- dividually but collectively. Exploration of structural in- equalities within health care and medical sciences. Students are required to contribute weekly to service learning component, working with individuals and or- ganizations in fields of health and wellness including healers, non-profits, and organizations working for so- cial justice. May be concurrently scheduled with CM114XP Letter grading.

M252. Selected Topics in Sociology of Gender. (4) (Same as Sociology M252.) Lecture, two hours; discussion, two hours. Designed for graduate students. Seminar on selected topics in sociology of gender. May be repeated for credit. Letter grading.

M253A. Seminar: Current Problems in Comparative Education. (4) (Same as Education M253A.) Seminar, two hours. Designed for graduate students. Seminar on selected topics in sociology of gender. May be repeated for credit. Letter grading.
M259A-M259B. History of Women. (4–4) Seminar, three hours. How does gender manifest itself in lives of different groups of women in U.S. and abroad? Are universal analytical categories or unified feminist movements possible or is gender too different cross-culturally? S/U or letter grading.

M259A-M259B. History of Women. (4–4) Seminar, three hours. What is universal gender representation to gendered politics via musical (de)codification of messages of resistance, and standing of gender in study of music as culture. Topics include gender, three hours. Designed to foster in-depth understanding of gender in study of music as culture. Topics range from gender and sexuality, to the (de)codification of messages of resistance, and gender representation to gendered politics via musical production. S/U or letter grading.

M261. Gender and Music in Cross-Cultural Perspective. (4) Seminar, three hours. Current theoretical developments in understanding gender systems cross-culturally, with emphasis on relationship between systems of gender, economy, ideational systems, and social inequality. Selection of ethnographic cases from recent literature. S/U or letter grading.

M266. Feminist Theory and Social Sciences Research. (4) Seminar, four hours. Examination of how diverse feminist social theories of last quarter century have both challenged and strengthened conventional social sciences theories and their methodologies. Introduction especially to feminist standpoint theory, distinctive critical theoretical methodology now widely used in social sciences. Letter grading.

CM278. Critical Media Literacy and Politics of Gender: Theory and Production. (4) Seminar, four hours. Corequisite: course CM278L. Use of range of pedagogical approaches to theory and practice of critical media literacy that especially involves understanding of new technologies and media forms. Study of both theory and production techniques to inform student analysis of media and critical media literacy projects. Concurrently scheduled with course CM278L. Letter grading.

CM278L. Critical Media Literacy and Politics of Gender: Laboratory. (2) Seminar, four hours. Corequisite: course CM278. Hands-on production experience as integral component of course CM278. Concurrently scheduled with course CM278L. Letter grading.

285. Special Topics in Women's Studies. (4) Lecture/discussion, four hours. Designed for graduate students. Special topics or special problems. In-depth study of aspects of feminist theory or research methods or gender analysis within disciplinary studies in social sciences, humanities, health sciences, arts, or professional programs. May be repeated for credit with topic or instructor change. Letter grading.

296. Doctoral Roundtable. (2) Research group meeting, two hours. Preparation: satisfactory completion of PhD program core courses. Corequisites: at least two courses from 201, 202, 203, 210. Limited to program PhD students. Interactive seminar with focus on disciplinary and interdisciplinary issues, feminist scholarship, research presentation, and professional development. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Prerequisite or corequisite: course 495. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Feminist Pedagogy. (2) Seminar, two hours. Preparation: appointment as teaching assistant in department. Introduction to feminist methods of teaching, with emphasis on reciprocity and dialogue and de-emphasis on hierarchy. Required of students while serving as teaching assistants (first time only) undergraduate gender studies courses. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Directed individual research and study in area related to women's studies/gender studies, arranged individually by student with instructor. May be repeated for credit. S/U or letter grading.

597. Preparation for MA Comprehensive Examination or PhD Qualifying Examinations. (2 to 12) Tutorial, eight hours. Limited to graduate gender studies students. Reading and preparation for written MA comprehensive examination or PhD qualifying field examinations. May be repeated for a maximum of 12 units. S/U grading.

598. Research for MA Thesis. (2 to 12) Tutorial, to be arranged. Requisites: courses 201, 202, 203. Directed individual research and study in area related to women's studies/gender studies, arranged individually by student with instructor. May be repeated for credit. S/U grading.

Juan C. Herrera, PhD
Kelly A. Kay, PhD
V. Kelly Turner, PhD

Assistant Professor
Shaina S. Potts, PhD

Overview

Geography is the study of the natural world and how humans have changed it. It examines the physical Earth and life on it, looking at the world’s diverse cultures, economies, and the environmental problems they produce.

Geography addresses many issues about the contemporary world. Some are local, such as documenting the development of ethnic neighborhoods within Los Angeles. Others are regional, such as determining the best locations for nature reserves in California. Many are global, such as the study of greenhouse gases and how they affect climates, culture and resource issues in developing countries, and the impact of information technologies on people in different places.

The work of geographers often takes them out of the classroom into the field to collect information on topics that range from the settlement of new immigrants to the distribution of endangered species, the erosion of shorelines, and the location of high-tech businesses. On other occasions, geographers work in laboratories, using techniques such as computer analysis of satellite photographs to look for changes in river courses and computer modeling of shifts in global vegetation patterns and the distribution of human populations. Research is also conducted in libraries and archives, probing documentary sources on human interaction with the natural world and how that world is imagined.

Career Prospects

Department of Geography graduates have a wide variety of career opportunities because of their combination of geographical/environmental perspectives and technical skills. UCLA geography students have gone on to become university scholars, school teachers, members of governmental and nongovernmental planning, development, and conservation agencies, business executives, lawyers, and specialists in geographical information analysis for government and private business. Because of its so-

510 / Geography
phisticated focus on the relationship of the global to the local, geography is particularly useful for those who wish to pursue careers with an international focus.

Undergraduate Majors

Geography BA

The Geography major allows students to combine a broad background in the field with more specific interests and career goals. Students can select classes in several areas of geography such as urban, economic, cultural, environmental, physical, or biogeography. They should consult with the undergraduate adviser to plan a program suitable to their personal objectives.

Learning Outcomes

The Geography major has the following learning outcomes:

- Comprehensive knowledge of the main strands of physical and human geography, including familiarity with major theoretical perspectives
- Command of various geographical methods and techniques such as remote sensing, cartography, and field methods
- Skills in collecting and analyzing geographical data
- Proficiency in written arguments drawing on appropriate sources and methods in the geographical literature

Entry to the Major

Admission

To declare the major, students must have completed two geography courses with a grade-point average of 2.0 or better.

Transfer Students

Transfer applicants to the Geography major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one physical geography or biogeography course, one cultural geography or economic geography course, and one statistics course.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Three courses (15 units) as follows: Geography 1 or 2, 3 or 4 or 6, and Statistics 12.

The Major

Required: Eleven upper-division geography courses (44 units minimum).

Honors Program

The departmental honors program is designed for Geography majors who are interested in completing a research project that culminates in an honors thesis. To qualify for graduation with departmental honors, students must have a cumulative grade-point average (GPA) of 3.5 or better in all upper-division geography courses and a 3.0 overall GPA. They must enroll in Geography 198A and 198B in two consecutive terms and earn grades of A– or better. They may elect to work with one or two faculty sponsors. Students are awarded highest honors, honors, or no honors based on an evaluation of the thesis by the faculty sponsor(s), and meeting GPA requirements. Contact the department advising office for more information.

Policies

Preparation for the Major

Each course must be taken for a letter grade.

The Major

Each course must be taken for a letter grade.

All geography upper-division courses numbered 100 and higher may be applied toward the major, with a few exceptions. Contact the advising office for more information.

Geography/Environmental Studies BA

The major in Geography/Environmental Studies develops and deepens students’ understanding of environmental issues; it explores problem-solving approaches from an interactive people/nature viewpoint and involves analysis of social, physical, and biotic environmental systems. The major’s uniqueness lies in its emphasis on its geographical perspective of human impacts on natural systems, as well as implications of global change on local and regional human systems.

Learning Outcomes

The Geography/Environmental Studies major has the following learning outcomes:

- Comprehensive knowledge of the main strands of physical and human geography, including familiarity with major theoretical perspectives
- Command of various geographical methods and techniques such as remote sensing, cartography, and field methods
- Familiarity with a range of environmental problems at different geographical scales, their analysis, modeling, and various policy responses to them
- Skills in collecting and analyzing geographical data
- Proficiency in written arguments drawing on appropriate sources and methods in the geographical literature

Entry to the Major

Admission

To declare the major, students must have completed two upper-division geography courses and a 3.0 overall GPA. They must enroll in Geography 174A, 175A, 175B, or 176A.

The Major

Honors Program

The departmental honors program is designed for Geography/Environmental Studies majors who are interested in completing a research project that culminates in an honors thesis. To qualify for graduation with departmental honors, students must have a cumulative grade-point average (GPA) of 3.5 or better in all upper-division geography courses and a 3.0 overall GPA. They must enroll in Geography 198A and 198B in two consecutive terms and earn grades of A– or better. They may elect to work with one or two faculty sponsors. Students are awarded highest honors, honors, or no honors based on an evaluation of the thesis by the faculty sponsor(s), and meeting GPA requirements. Contact the department advising office for more information.

Policies

Preparation for the Major

Each course must be taken for a letter grade.

The Major

Each course must be taken for a letter grade.

Geography/Environmental Studies majors are advised to complete the required courses in the...
intended for students interested in environmental studies and natural systems core.

**Undergraduate Minors**

**Geography Minor**

The Geography minor is designed for students who wish to deepen and/or broaden their major program of study with a distinctive yet flexible program of courses encompassing the relationship between environment and society. The minor allows students to develop a coherent strategy for understanding and explaining the manner in which people and the Earth interact. Students have the opportunity to explore the origins, development, morphology, and processes of landscapes inherited from nature, as well as those institutions and cultural, economic, political, and social patterns associated with the human development, occupancy, organization, perception, and use of these landscapes.

**Admission**

To enter the minor, students must have completed at least one geography course at UCLA with a grade of C or better, have an overall grade-point average of 2.0 or better, and file a petition in the Geography Department Advising Office, 1255 Bunche Hall.

**The Minor**

**Required Lower-Division Courses (10 units):** Two courses from Geography 1, 2, 3, 4, 6.

**Required Upper-Division Courses (20 units):** Any five upper-division geography courses, with a few exceptions. Contact the advising office for more information.

**Policies**

It is recommended that students take the lower-division courses before attempting upper-division courses.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least three of the five upper-division courses must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval.

Each minor course must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

**Geospatial Information Systems and Technologies Minor**

The Geospatial Information Systems and Technologies minor is designed to provide students with a strong background in the use, application, and development of geospatial/environmental research techniques and methods.

**Admission**

To enter the minor, students must have completed Geography 7 with a grade of B or better, have an overall grade-point average of 2.0 or better, and file a petition in the Geography Department Advising Office, 1255 Bunche Hall. For majors in Geography or Geography/Environmental Studies, only two upper-division courses may overlap between the major and this minor.

**The Minor**

**Required Lower-Division Courses (10 units):** Geography 7, Statistics 12.

**Required Upper-Division Courses (24 units minimum):** Geography 180, 181A, 181B, 182A, and any two courses selected from 181C, 182B, 184, M186, and 199 (4 units with approval of the faculty adviser).

**Policies**

Each upper-division course must be completed with a grade of C or better.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least three of the five upper-division courses must be taken in residence at UCLA. With the exception of Statistics 12, transfer credit is not accepted toward this minor except on rare occasions.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Majors**

**Geography MA, CPhil, PhD**

The department offers the PhD degree in Geography (an MA degree may be earned in the process of completing PhD requirements). Student research projects are conducted in collaboration with a faculty adviser and advisory committee. Graduate students work in most major areas of geography and on projects around the world. Graduate alumni of the department have teaching positions at many leading universities in the U.S. and abroad.

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Master of Applied Geospatial Information Systems and Technologies**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Geography Lower-Division Courses**

1. **Earth’s Physical Environment.** (5) Lecture, three hours; laboratory, two hours. Study of Earth’s physical environment, with particular reference to nature and distribution of landforms and climate and their significance to people. P/NP or letter grading.

2. **Biodiversity in Changing World.** (5) Lecture, three hours; discussion, two hours. Biogeographic exploration of plant and animal diversity and conservation issues on continents and islands around world. Study of physical, biotic, and human factors responsible for evolution, persistence, and extinction of species and ecological communities. Analysis of effects of human activity. P/NP or letter grading.
Upper-Division Courses

Environmental Studies and Natural Systems

101. Principles of Geomorphology. (4) Formerly numbered 100.) Lecture, three hours; reading period, one hour. Requisite: course 1. Study of processes that shape world’s landforms, with emphasis on weathering, mass movements, transport, deposition; energy and material transfers; space and time considerations. P/NP or letter grading.

102. Soils and Environment. (Formerly numbered M127.) Same as Ecology and Evolutionary Biology M127 and Environmental Science M120.) Lecture, three hours; discussion, one hour; field trips. General treatment of soils and environmental implications: soil development, morphotype, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. P/NP or letter grading.

102L. Soils and Environment: Field. (Formerly numbered M127L.) Same as Ecology and Evolutionary Biology M127L and Environment M120L.) Laboratory, one hour; field excursions. Corequisite: course 116. Reinforcement of key issues in supporting material in course M102, including excavating, describing, and naming soils in field, soil forming processes, geomorphology, and soils. P/NP or letter grading.

103. Soil and Water Conservation. (Formerly numbered M103.) Same as Environment M103.) Lecture, three hours; discussion, one hour. Enforced requisite: one course from course 1, 2, Environment 10, Life Sciences 7B. Designed for juniors/seniors. Systematic study of processes of and hazards posed by erosion, sedimentation, development, and pollution and techniques needed to conserve soil and maintain environmental quality. Scope includes agriculture, forestry, mining, and other rural uses of land. P/NP or letter grading.

106. World Vegetation. (Formerly numbered 108.) Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Characteristics, distribution, environmental and cultural relationships of world’s principal vegetation patterns. P/NP or letter grading.

107. Forest Ecosystems. (Formerly numbered 111.) Lecture, three hours; field trips. Requisite: course 1 or 2 or Life Sciences 7B. Designed for juniors/seniors. Evaluation of ecological principles as they apply to forests. Emphasis on constraints of physical environment, biotic interaction, disturbances, and long-term environmental change. P/NP or letter grading.

109. Biogeography of Plant and Animal Invasions. (Formerly numbered 116.) Lecture, three hours; reading period, one hour. Enforced requisite: courses 1 or 2 or Life Sciences 7B. Designed for juniors/seniors. Analysis of processes of expansion and contraction of distribution areas. P/NP or letter grading.

110. Ecosystem Ecology. (Formerly numbered M117.) Same as Ecology and Evolutionary Biology M121.) Lecture, three hours; field trips. Corequisite: course 1 or Life Sciences 7B. Designed for juniors/seniors. Development of principles of ecosystem structure and function. Emphasis on energy and water balances, nutrient cycling, plant-soil-microbe interactions, landscape heterogeneity, and human disturbance to ecosystems. P/NP or letter grading.

116. Climatology. (Formerly numbered 104.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of many relations between climate and world of man. Application of basic energy budget concepts to microclimates of relevance to ecosystems of agriculture, animals, man, and urban places. P/NP or letter grading.

117. Tropical Climatology. (Formerly numbered 102.) Lecture, three hours. Introduction to the development of tropical climate, with special reference to hurricanes, ENSO, and monsoons. Examination of human interaction with tropical climate processes and human response to climate change. Use of climatological information to foster sound environmental management of climate-related resources in tropics. P/NP or letter grading.

M116. Applied Climatology: Principles of Climate Impacts on Natural Environmental Systems. Formerly numbered M106.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Exploration of principles and tools to solve complex problems in contemporary applied climatology, including current practices, influence of climate on environment, and human influence on changing climates. P/NP or letter grading.

119. Global Climatology and Climate Change. (4) Lecture, three hours. Requisite: course 1. Survey of Earth’s climate system and factors that cause globe’s climate to change. Study of most important properties of Earth’s atmosphere and how they interact and connect geographically and over time. Examination of physical laws governing climate variations and interconnections to build base-level understandings of natural climate phenomenon and its impacts on human and biogeocultural activities. Explanation of source of Earth’s heat energy, determinants of temperature near surface and throughout atmosphere, and how observed seasonal and spatial variations are created. Introduction to various motion systems in atmosphere and ocean and their governing physical laws. Exploration of nature and causes of past changes in global climate evident in paleorecords. Survey of current understanding of ongoing human-caused climate change event, and how climate models are used to develop projections of future climate changes. P/NP or letter grading.

M125. Environmentalism: Past, Present, and Future. (Formerly numbered M115.) Same as Environment M125 and Urban Planning M165.) Lecture, three hours; discussion, one hour. Exploration of history and origin of major environmental ideas, movements or countermovements they spawned, and new and changing nature of modern environmentalism. Introduction to early ideas of environment, how rise of modern sciences reshaped environmental thought, and how this was later transformed by 19th-century ideas and rise of American conservation movements. Review of policies of American environmental thought and contemporary environmental questions as they relate to broader set of questions about nature of development, sustainability, and equity in environmental debate. Exploration of issues in broad context, including global climate change, rise of pandemics, deforestation, and environmental justice impacts of war. Letter grading.

M127. Environmental Change. (Formerly numbered M131.) Same as Environment M126.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of natural forces producing environmental changes; three hours; discussion, one hour. Limited to juniors/seniors. Examination of many relations between climate and world of man. Application of basic

3. Cultural Geography. (5) Lecture, three hours; discussion, two hours. Introduction to cultural geography of modern world, with examination of key concepts of space, art, and landscape as these have shaped and been shaped by connections between societies and their natural environments. Examples from variety of landscapes and places since 1800 and especially from Los Angeles region. P/NP or letter grading.

4. Global Development and World Economy. (5) Lecture, three hours; discussion, two hours. Economic geography explores spatial distribution of all forms of human productive activity at number of geographical scales—local, regional, national, and global. Key theme is impact of increasingly powerful global economic forces on organization of production. P/NP or letter grading.

5. People and Earth’s Ecosystems. (5) Lecture, three hours; laboratory, two hours. Exploration of ways in which human activity impacts natural environment and how modification of environment can have significant consequences for human activity. Examination, using case studies, of real environmental problems that confront us today. P/NP or letter grading.

7. Introduction to Geographic Information Systems. (5) Lecture, three hours; laboratory, two hours. Designed for freshmen/sophomores. Introduction to fundamental principles and concepts necessary to carry out sound geographic analysis with geographic information systems (GIS). Reinforcement of key issues in GIS, such as geographic coordinate systems, map projections, spatial analysis, and visualization of spatial data. Laboratory exercises use database query, manipulation, and spatial analysis to address real-world problems. P/NP or letter grading.

9. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of current topic on topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

88A-88Z. Lower-Division Seminars: Geography. (4 each) Discussion, three hours; reading period, one hour. Seminars designed to explore various issues and themes pertinent to environment and people. Seminar topics reflect the department during previous term. P/NP or letter grading.

88GE. Seminar Sequence: Special Topics in Geography. (5) Seminar, three hours. Enforced requisite: course 5. Designed for sophomores/juniors. Exploration of one topic through readings, images, and discussions. P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

90. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.
changing organization of production and resulting environment. Case studies from Africa, Latin America, Asia, and U.S. P/N or letter grading.

130. Food and Environment. (Formerly numbered M132.) Lecture; discussion; laboratory. Designed for juniors/ seniors. Thematic orientation to food systems and their role in environmental and cultural transformations. P/N or letter grading.

M131. Human Impact on Biophysical Environment. (Formerly numbered M108.) (Same as Environment M131.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of history, mechanisms, and consequences of interactions between humans and environment. Exploration in depth of three thematic topics (deforestation, desertification, and greenhouse gas increase and ozone depletion) and four major subjects (soil, biodiversity, water, and landforms). P/N or letter grading.

133. Humid Tropics. (Formerly numbered 113.) Lecture, three hours. Requisite: course 2 or 5 or Life Sciences 7B. Designed for juniors/seniors. Examination of humid tropics, with emphasis on rainforests, their ecological principles, and forms of land use. Letter grading.

135. Africa and African Diaspora in Americas. (Formerly numbered 114.) Lecture, three hours. Described for juniors/seniors. Analysis of historical, geographical, and cultural dimensions of African influence in the Americas, with emphasis on environment, agriculture, food systems, and medicinal plants. P/N or letter grading.

136. Health and Global Environment. (Formerly numbered 130 E-130 F.) Lecture, three hours; reading period, one hour. Impact of environment and lifestyle on individual health examined from geographical perspective, with examples from both developed and developing countries. P/N or letter grading.

138. Wildlife Conservation in Eastern and Southern Africa. (Formerly numbered 122.) Lecture, three hours; reading period, one hour. Requisite: course 5. In field trips to national parks and their natural and anthropogenic ecological dynamics. P/N or letter grading.

138B-139C. Problems in Geography, (4-4) (Formerly numbered 138B-139C.) Seminar: three hours; reading period, one hour. Preparation: completion of three courses in one concentration. Limited to seniors. Seminar course in which students carry out intensive research projects developed from courses within one concentration. P/N or letter grading. 139B. Biogeography 139C. Culture and Environment in Modern World.

Human Systems

140. Social Geography. (Formerly numbered 147.) Lecture, three hours; discussion, one hour. Study of spatiality of social phenomena such as race, class, gender, age, sexuality, location. Critical explorations of identity, social categories, and spatial structures. Importance of space and place in social life. P/N or letter grading.

141. Cultural Geography of Modern World. (Formerly numbered 133.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors and graduate students. Historical and structural approach to cultural geography of modern world with particular emphasis on structure and functioning of its core, semi-periphery, and periphery. P/N or letter grading.

M142. (When) Do Leaders Make Differences? (Formerly numbered M153.) (Same as Anthropology M148 and Honors Collegium M152.) Lecture, two hours; discussion, two hours. Examination of leaders who did or did not succeed in effecting change, as background to understanding the conditions under which leaders can make differences. Comparison of political leaders, business chief executive officers, sports coaches, and religious leaders. Letter grading.

M144. Feminist Geography. (Formerly numbered M146.) (Same as Gender Studies M146.) Lecture, three hours; discussion, one hour. Critical engagement of gender as concept of geographic inquiry. Gender as spatial process, analysis of feminist geographic theory and methods, landscapes of gender, challenges of representing gender. Spaces of femininity, masculinity, and sexuality. P/N or letter grading.

145. Slavery and Human Trafficking. (4) Lecture, three hours; discussion, one hour. Study of history and contemporary forms of slavery and human trafficking. Examination of the nature of slavery, its cultural significance, and its impact on present day society. P/N or letter grading.

146. Environmental Justice and Climate Change. (4) Lecture, three hours. Designed for juniors/seniors. Study of environmental justice in the context of climate change. Examination of how environmental justice is impacted by climate change and how climate change affects environmental justice. P/N or letter grading.

151. Uneven Development Geographies: Prosperity and Impoverishment in Third World. (4) (Formerly numbered 140.) Lecture, three hours; discussion, one hour. Study of historical, political, and economic differences between countries in the Global South. How development has shaped livelihood possibilities and practices, by global processes shaping back centuries, and transformative possibilities of Third World agency. World societies seek to transform Third World into their own image through theories and practices of colonialism, development, and globalization. Study of those theories and Third World alternatives to examine how they have shaped livelihood possibilities for Third World people. Social differences and stagnant livelihood possibilities for Third World majority and minorities that prosper massively, as well as geographical differences (cultural, environmentally, and socially) across the Third World. Examination of key terms and paradigms of Third World agency, ranging from inter-state collaboration to village activism, asking whether such agency or alternative imaginaries can enable Third World residents to break with First World developmentalism. P/N or letter grading.

153. Transportation Geography. (4) (Formerly numbered M149.) (Same as Urban Planning M150.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Study of geographical aspects of transportation, with focus on characteristics and functions of various modes and on complexities of intra-urban transport. P/N or letter grading.

158. Population Geography. (4) (Formerly numbered 142.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of social and behavioral perspectives influencing people in their pattern of life and geographic changes they impose, with special emphasis on spatial relationships and selected case studies. P/N or letter grading.

159. Population in Interacting World. (4) (Formerly numbered 143.) Lecture, three hours; discussion, one hour. Designed to provide multidisciplinary understanding of and application for human population phenomena and problems in different parts of the world and at different geographical scales—from local to global. Particular emphasis on understanding and critically reflecting on (1) contemporary population problems at local, national, and local scale, including both dramatic decline and persistence of high levels of fertility in parts of developing world, record low fertility and population aging in highly industrialized countries, increasing levels of international migration, refugee crises, massive rural to urban migrations, and creation of new cities, (2) policies adopted to address these problems, such as family planning policies to reduce fertility, immigration policies, and so on, and (3) gender dimension of contemporary population problems and policies. P/N or letter grading.

160. Urban Geography. (4) (Formerly numbered 150.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Analysis of development, functions, spatial patterns, and geographic problems of cities. P/N or letter grading.

161. Cities and Social Difference. (4) (Formerly numbered 151.) Lecture, three hours; discussion, one hour. City landscapes embody best and worst of U.S. society: diversity and poverty, racism and privilege. Study of urban spaces, social differences, inequality, and conflicts over uses and meanings of city space. Social urban geography. P/N or letter grading.

162. Ethnicity in American Cities. (4) (Formerly numbered 144.) Lecture, three hours; reading period, two hours. Limited to juniors/seniors. Designed to encourage and facilitate critical thinking about geographical aspects of ethnicity in contemporary America. Use of comparative perspective to explain changing distribution, social, economic, and political behavior, and adjustment problems ethnic groups face in adapting to city life. P/N or letter grading.

169A. Problems in Geography: Urban and Regional Development Studies. (4) (Formerly numbered 159A.) Seminar, three hours; reading period, one hour. Preparation: completion of three courses in one concentration. Limited to seniors. Seminar course in which students carry out intensive research projects developed from courses within one concentration. P/N or letter grading.

Regions

171A. North America. (4) (Formerly numbered 180.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Delimitation and analysis of major geographic regions of U.S. and Canada. P/N or letter grading.
171B. California. (4) (Formerly numbered 184.) Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Systematic and regional treatment of geographic distributions, physical, cultural, and economic aspects and detailed studies of various regions, P/NP or letter grading.

171C. Metropolitan Los Angeles. (4) (Formerly numbered 156.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of Los Angeles metropolitan area. P/NP or letter grading.

172A. Spanish South America. (4) (Formerly numbered 182.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding historical development of Spanish South America and contemporary economic and cultural geography of individual Spanish-speaking countries. P/NP or letter grading.

172B. Central America. (4) (Formerly numbered 181.) Seminar, two and one half hours. Located at center of American continent, Central America has been shaped by historical and contemporary interactions of culture and place in Japan. Exploration of how transnational migration has created expansive Central American diaspora that produces effects in isthmus and abroad. Letter grading.

172C. Brazil. (4) (Formerly numbered 182B.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding historical development of South America and contemporary economic and cultural geography of Brazil. P/NP or letter grading.

173A. Cities of Europe. (4) (Formerly numbered 152.) Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Urbanization of Europe, growth of city systems and internal spatial structure, functions, and geographic problems of contemporary European cities. Particular attention to historical development and landscapes of central European cities such as Rome, Paris, and Berlin. P/NP or letter grading.

174A. The Mediterranean World. (4) (Formerly numbered 183.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding historical development of Mediterranean region, with emphasis on 1500s to present. Introduction to great disputes in history and ecology centered on this region and character of two shores of Mediterranean basin. P/NP or letter grading.

175A. Japan in World: Culture, Place, and Global Connections. (4) (Formerly numbered 139.) Lecture, three hours; reading period, one hour. Focus on questions of culture and place in Japan. Exploration of ways that these questions—and Japan itself—have been shaped by historical and contemporary interactions involving both Japan and other parts of world. P/NP or letter grading.

175B. Contemporary China. (4) (Formerly numbered 186.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Systematic geographic analysis of elements of landscape, resources, population, and socioeconomic characteristics of People’s Republic of China. Dynamics that have led to China’s major role in East Asian and international scene, with special emphasis on China’s role in the Pacific region. Study of political relations and their geographic bases. P/NP or letter grading.

176A. Southeast Asia. (4) (Formerly numbered 185.) Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Regional synthesis with varying emphasis on people of South or Southeast Asia in their physical, biotic, and cultural environment and its dynamic transformation. P/NP or letter grading.

Procedures

178. Conservation Geography Field and Professional Practices. (3) Fieldwork, eight hours; research group meeting, three hours; one-, three-, and four-day field trips. Limited to senior Geography and Geographics/Economics. Emphasis by application. Field focus on California vegetation and its response to current and future climate change. Students learn to collect field data, and to conduct field vegetation research. Students learn to work as professional research consultants in teams, develop consulting research proposals, consultant assessment reports, and present those reports orally and in written form. Field sites include Mono Lake, Great Basin Desert, Great Basin Desert, pinyon pine woodland, pine-fire forest, alpine treeline, White Mountains, Sierra Nevada, and coastal pine and redwood forests. P/NP or letter grading.

181A. Intermediate Geographic Information Systems. (4) (Formerly numbered 170.) Lecture, four hours; laboratory, two hours; laboratory, two hours. Enforced requisite: course 7. Extensive study of basic concepts presented in course 7. How geographic and spatial analyses inform, integrate, and extend decision making across the life, and social sciences. Discussion of range of decisions and critical judgments necessary to carry out sound spatial analyses. Development of technical proficiency within geographic information systems (GIS) environment. P/NP or letter grading.

181B. Advanced Geographic Information Systems. (4) (Formerly numbered 170.) Lecture, three hours; discussion, one hour. Enforced requisite: course 181A. Introduction to full geographic information systems (GIS) functionality, using ARC/INFO on UNIX workstations. Spatial manipulation, query, and computation of datasets carried out in project-oriented approach. P/NP or letter grading.

181C. Geographic Information Systems Programming and Development. (4) (Formerly numbered 173.) Lecture, two hours; laboratory, two hours. Enforced requisite: course 181A. Introduction to fundamental concepts and architecture of programming objects in widely used geographic information systems (GIS), and programming in GIS environment. Topics include GIS customization and development using variety of programming languages. Lectures followed by laboratory exercises. P/NP or letter grading.

182A. Introduction to Remote Sensing. (4) (Formerly numbered 169.) Lecture, two hours; laboratory, one hour. Enforced requisite: course 181A. Introduction to fast-growing field of environmental monitoring from space. Application of Landsat, radar, Global Positioning System (GPS), and Earth Observing System satellites to land-use change, oceanography, meteorology, and environmental monitoring. Introduction to digital image-processing and imaging geographic information systems (GIS) software. P/NP or letter grading.

182B. Remote Sensing: Digital Image Processing and Analysis. (4) (Formerly numbered 172.) Lecture, three hours; laboratory, one hour. Enforced requisite: course 182A. Digital processing methods for manipulating and analyzing image data. Topics include statistical description, geometric and radiometric correction, classification, image enhancement and filtering, and change detection. Reinforcement procedures presented in lecture with laboratory exercises and student project. P/NP or letter grading.

182C. Advanced Remote Sensing. (5) (Formerly numbered 174.) Lecture, three hours; laboratory, two hours. Enforced requisite: course 182A. Remote sensing in visible and infrared wavelength regions to understand basic concepts of radiation propagation and interaction with matter, how digital remote sensing images are acquired, and constraints on available data and data analysis. P/NP or letter grading.

184. Environmental Modeling. (4) (Formerly numbered 166.) Lecture, one hour; laboratory, two hours. Presentation of basic concepts related to computer modeling of physical, geographic processes, and other phenomena relevant to changing Earth and its inhabitants. Laboratory exercises include building basic computer models and working with existing models. P/NP or letter grading.

185. Field Methods in Physical Geography. (5) (Formerly numbered 177.) Lecture, three hours; laboratory, three hours. Enforced requisite: course 182A. Examination of field procedures and concepts used in observation, measurement, analysis, and interpretation of physical phenomena pertinent to natural and built environment. Topics vary from year to year and may include soils, geomorphology, and field methods in geographic information science. May be repeated for credit with topic change. P/NP or letter grading.

M186. Introduction to Spatial Statistics. (4) (Formerly numbered M171.) (Same as Statistics 12, 13.) Introduction to methods of measurement and interpretation of geographic distributions and associations. P/NP or letter grading.

187. Research and Writing in Human Geography. (4) (Formerly numbered 161.) Seminar, three hours. Limited to seniors. Writing and research are two key aspects of what human geographers do. Students improve writing through proposing and conducting selective research projects, while also stepping into the role of student with idea of topic of interest. Students learn process of doing geography research, including how to ask good research questions, how to search for relevant sources, how to construct argument, how to build literature review, and how to properly cite and incorporate academic sources. Cullminating final paper on topic of choice. Weekly discussion workshops offer opportunity to exchange work with peers, giving useful feedback and opportunity to learn how to offer feedback and how to incorporate feedback into editing their work. Letter grading.

Special Studies

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced requisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contact with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE BSS course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors credit counted as transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual contract required. Honors content noted on transcript. Letter grading.
191. Variable Topics Research Seminars: Geography. (4) Seminar, three hours. Research seminars on selected topics in geography. Some sections may require prior permission. Consult Schedule of Classes for topics and instructors. May be repeated for credit and may be applied as elective units toward departmental majors and minors. P/NP or letter grading.

195. Community or Corporate Internships in Geography. (4) Lecture, four hours. Limited to juniors/seniors. Internship of eight to 10 hours per week in supervised setting in community agency or business. Students meet on regular basis with instructor and provide primary insight and experience of the field. May be repeated for credit. Individual contract with supervising faculty member required. P/NP grading.

198A-198B. Honors Research in Geography I, II. (4-4) Tutorial, to be arranged. Preparation: 3.5 grade-point average overall, at least five upper-division geography courses with 3.5 grade-point average. Limited to juniors/seniors. Development and completion of honors thesis or comprehensive research project under direct supervision of one or two faculty members. May be repeated for maximum of 16 units. Individual contract required. Letter grading.

199. Special Studies. (2 to 8) Tutorial, to be arranged. Limited to juniors with B average in major or seniors. May be repeated for maximum of 16 units. P/NP or letter grading.

Graduate Courses

Core

200A. History and Structure of Modern Geography. (4) Lecture, three hours; reading period, one hour. Evolution of field of geography in 19th and 20th centuries, with emphasis on professionalization of geography and its emergence as modern academic discipline. S/U or letter grading.

200B. Seminar: Geographical Inquiry. (1) Seminar, one hour. Discussion of geographical research within context of philosophical debates concerning nature of scientific inquiry. S/U grading.

Methods

211. Research Design in Geography. (4) Lecture, four hours. Introduction to logic of geographic inquiry. Topics include questions surrounding philosophy of science, research design issues, and range of methods of data collection. Use of rigorous data collection and analysis in geographical research. S/U grading.

212. Qualitative Methods and Methodology. (4) Seminar, three hours; laboratory, two hours. Examination of definition and use of qualitative methodology and methods in social-cultural geographic research. Exploration of relationship between methodology and epistemology; review of range of research methods and techniques, including interviewing and focus groups, observation, action research, ethnography, and interpretation of material culture, and consideration of ethical and practical issues of conducting qualitative research. S/U or letter grading.

215. Advanced Field and Laboratory Methods in Biophysical Geography. (4) Laboratory, five hours; fieldwork, five hours. Examination of advanced field and laboratory procedures used in contemporary biophysical geography research. May be repeated for credit with instructor change. S/U or letter grading.

216. Advanced Medical Geography. (4) Lecture, two hours; discussion, one hour. Field course. Requisite: course 118. In-depth study of selected topics in medical geography and intensive review of recent research. S/U or letter grading.

Human Geography

224. International Migration. (4) Same as Sociology, M236B. Lecture, three hours. Further exploration of key current theoretical debates in study of international migration, with emphasis on exploring both theoretical debates of field and empirical data and case studies on which those debates hinge, to encourage students to undertake research in field. S/U or letter grading.

229A. Development Theory. (4) Same as Urban Planning M235A. Lecture, three hours. Review of basic literature and schools of thought on development theory through analysis of impact of mercantilism, colonialism, capitalism, and socialism on various urban and rural social and economic structures in Third World. Presentation, through evaluation of theoretical writings and case studies, of complexity and diversity of development theories. Emphasis on linkages between policy and rural and urban impacts. Gives students important background for courses M229B, M239C, and many other planning courses addressing Third World issues. Letter grading.

239. Ecological Issues in Planning. (4) Same as Urban Planning M234B. Lecture, three hours. Recommended preparation: Urban Planning M265. Science and politics of modern environmentalism and planning in light of transformations inherent in global change, including how to address these questions in ways that go beyond green consumerism and bifurcation of wild, ecological, and human environments. American environmentalism has become dominant model for many conservation practices. Informed by Marxist model of idea of untrammeled nature with people-less set-asides for spiritual and scientific contemplation of nature. Approach used to cast in doubt the centrality of nature and as key idea in conservation and fragment biology. At opposite end is environmental planning devoted to infrastructural development of hyper-human habitats (cities). Exploration of these competing models and many reasons to be skeptical of both in 21st century. Letter grading.

229C. Resource-Based Development. (4) Same as Urban Planning M234C. Lecture, three hours. Recommended preparation: course M229A. Some major issues associated with development of specific natural resources. Topics include nature of particular resource or region associated with it, its previous management, involvement of state, corporations, and local groups, and environmental and social impact of its development. Letter grading.

230A. Theories of Regional Economic Development I. (4) Same as Public Policy M240 and Urban Planning M236A. Lecture, one hour. Introduction to theories of location of economic activity, trade, and other forms of contact between regions, process of regional growth and decline, reasons for different levels of economic development, relations between more and less developed regions. Letter grading.

235. Seminar: Social Geography. (4) Seminar, three hours; reading period, one hour. Process of doing social/cultural geography entails conceptualizing, adapting, and reformulating social and critical theories of space, subject, and power. Examination of this process by considering theoretical themes that shape concepts of social space and social research. Theoretical discussions of recent research in social/cultural geography, particularly around topics of gender, race sexuality, subjects and place and agency, and social difference and identity. S/U or letter grading.

236. Seminar: Cultural Geography. (4) Seminar, three hours; reading period, two hours. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit. S/U or letter grading.

237. Seminar: Historical Geography. (4) Seminar, three hours; reading period, two hours. Theory and practice of historical geography in North America and Europe. May be repeated for credit. S/U or letter grading.

238. Seminar: Urban Geography. (4) Seminar, three hours; reading period, two hours. Requisite: course 250. Related research projects growing out of course 250. May be repeated for credit. S/U or letter grading.

240. Seminar: Geographic Thought. (4) Seminar, three hours; reading period, two hours. Discussion and study of topics significant to growth of modern philosophy of geography. S/U or letter grading.

Human Geography Advanced

245. Advanced Political Geography: Geopolitics. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Intensive study of theories and principles of geopolitics. Selected regions used as examples of differing techniques of study in geopolitics. S/U or letter grading.
remotely sensed imagery and raster data with proprietary, open-source, and cloud-based remote sensing and image analysis platforms. Letter grading.

412. Programming for Geospatial Data Science I. (4) Lecture, two hours; laboratory, two hours. Requisite: course 401. Conceptual and practical instruction in use of scripting, automation, and computer programming within geospatial sciences. Students use Python programming language to develop geospatial processing scripts and applications, making use of popular geospatial data manipulation libraries. Introduction to statistical computing and tabular data processing and analysis techniques. Students learn to apply common spatial analysis methods in practical context. Emphasis on essential relationships, spatial autocorrelation analysis, cluster analysis, spatial regression analysis, pattern analysis, and space-time modeling. Letter grading.

413. Applied Geospatial Statistics. (4) Lecture, two hours; laboratory, two hours. Requisite: course 401. Concepts and techniques fundamental to spatial statistics and analysis and visualization of data with geographic dimension. Introduction to statistical computing and tabular data processing and analysis techniques. Students learn to apply common spatial analysis methods in practical context. Emphasis on essential relationships, spatial autocorrelation analysis, cluster analysis, spatial regression analysis, pattern analysis, and space-time modeling. Letter grading.

414. Programming for Geospatial Data Science II. (4) Lecture, two hours; laboratory, two hours. Requisite: course 401. Introduction to technologies and techniques that support growing field of interactive Web-based geographic information systems and mapping. Study of theory and concepts underlying this rapidly growing field. Applied training is provided in Web mapping, development, and program design. Students learn to develop sophisticated interactive Web maps and applications both by using existing Web mapping platforms and also by coding custom Web maps integrating HTML, CSS, JavaScript programming language, and Web mapping code libraries. Letter grading.

415. Geospatial Data Science Futures. (4) Seminar, two hours; laboratory, two hours. Requisite: course 401. Applied exploration of emerging technologies and methods in geospatial technology with focus on learning state-of-art geospatial data analysis and management techniques. Topics of interest introduced in seminar format by subject matter experts and faculty. Through discussions and biweekly applied project work, geospatial research methods are situated in their broader context. Application of innovative geospatial research methods to better understanding spatial dimension of data. Letter grading.

498. Capstone I: Geospatial Research Methods. (4) Seminar, two hours; laboratory, two hours. Requisite: course 401. Instruction in core geospatial project management and research design techniques, as well as geospatial technology research methods. Structured environment for students to propose and begin capstone project. Includes study of appropriate and ethical application of geospatial methods and technology. Projects proposed should be original analyses of geospatial data that solve pressing problem, optionally developed in conjunction with university or industry partner. Letter grading.

499. Capstone II: Geospatial Capstone Project. (4) Laboratory, four hours. Requisites: courses 401, 498. Completion of required capstone research project. Students meet weekly with faculty advisor to discuss progress, learn technical writing skills, and chart goals for timely completion of project. Successful completion and approval of capstone project is required for satisfactory completion of course. May be repeated for credit. Letter grading required to meet MAGIST program requirements. S/U or letter grading.

Special Studies

495. Teaching College Geography. (2) Seminar, one hour; laboratory, three hours. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

597. Preparation for PhD Qualifying Examinations. (2 to 8) Tutorial, to be arranged. Independent study. May be repeated for credit. S/U grading.

Overview

The worldwide expansion of the older adult population ensures that issues regarding aging will dominate our environmental, economic, social, political, psychological, and medical concerns and endeavors well into the twenty-first century. The undergraduate minor in Gerontology provides students with a foundation understanding of the current state of science related to human aging, enables students to assess longevity’s potential contribution and challenge to contemporary society, and provides students with an appreciation of opportunities to contribute, personally and professionally, to a diverse aging society.

Policies

Students who have completed Clusters 80A with a grade of B or better, and have an overall grade-point average of 2.0 or better, do not need to take Gerontology M108. Successful completion of this cluster sequence (Clusters 80A, 80BX, 80CW) counts for M108 and one elective course. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Gerontology

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

98. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrollment. Examination of gender and ethnicity within the context of both physical and social aging, in multidisciplinary perspective utilizing faculty from variety of fields to address issues of diversity. Letter grading.

M104D. Public Policy and Aging. (4) Same as Social Welfare M1104D.) Lecture, four hours. Examination of theoretical models and concepts of policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of current policy issues affecting elderly. P/NP or letter grading.

Upper-Division Courses

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) Same as Chicana/o and Central American Studies M1068, Gender Studies M124C, Public Affairs M124A, and Social Welfare M124A.) Lecture, four hours. Exploration of complexity of variables related to diversity of aging population and variability in aging process. Examination of gender and ethnicity within the context of both physical and social aging, in multidisciplinary perspective utilizing faculty from variety of fields to address issues of diversity. Letter grading.

M104D. Public Policy and Aging. (4) Same as Social Welfare M1104D.) Lecture, four hours. Examination of theoretical models and concepts of policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of current policy issues affecting elderly. P/NP or letter grading.

M104E. Social Aspects of Aging. (4) Same as Social Welfare M1064E.) Lecture, four hours. Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around key aspect of social gerontology. P/NP or letter grading.
M108. Biomedical, Social, and Policy Frontiers in Human Aging. (5) (Same as Public Affairs M130 and Social Welfare M108.) Lecture, four hours. Limited to juniors/seniors. Human aging charted in ways that are based on variety of recent research frontiers. Use of conceptual frameworks to increase relevance of aging to students’ lives and enhance their critical thinking—biopsychosocial approach that is based on recognition that aging is inherently interdisciplinary phenomenon, and life course perspective that is distinguished by analytical framework it provides for understanding interplay between human lives and changing social structures, and allows students to understand how events, successes, and losses at one stage of life can have important effects later in life. Focus on activities as they age within one particular sociohistorical context. Letter grading.

M119O. Psychology of Aging. (4) (Same as Psychology M119O.) Lecture, four hours. Requisite: Psychology 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement, others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximized and impact of detrimental alterations minimized. P/NP or letter grading.

M119X. Biology and Behavioral Neuroscience of Aging. (4) (Same as Psychology M119X.) Lecture, three hours. Limited to juniors/seniors. Biological mechanisms of aging process and its terminal phase, death, have been increasingly studied in recent years. Establishment of what is known experimentally about biology and behavioral neuroscience of aging and evaluation of theories developed to account for this knowledge, P/NP or letter grading.

120. Sex and Aging. (4) Lecture, three hours. Sexuality in aging from psychological, psychobiological, physical, and psychosocial perspectives, with emphasis on differences between females and males concerning physical and social changes that occur with aging and how this impacts on emotional well-being and human sexual response. P/NP or letter grading.

M142XP. Intergenerational Communication across Lifespan. (Formerly numbered M142SL) Lecture, three hours; fieldwork, one hour. Limited to juniors/seniors. What do you say to your parents in conversation? How do you talk to your grandparents? Does your family talk well to one another? How do you communicate well with boss who is 30 years older than you? How do you communicate with someone who is just the opposite group? How do you handle the conflict with another? Individuals of all ages interact with one another, and their interactions have significance throughout their lives. Introduction to psychological, interpersonal, and societal issues related to intergenerational communication across lifespan. Letter grading.

M150. Sociology of Aging. (4) (Same as Sociology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of aged; caregiving relations and institutions; professions concerned with aged and aging. Letter grading.

M165. Disability Policy and Services in Contemporary America. (4) (Same as Disability Studies M130 and Social Welfare M165.) Lecture, three hours. Limited to juniors/seniors. Growing numbers of people of all ages with disabilities are leading active and productive lives in American communities. Many others are struggling to lead such lives. Who are people with disabilities in contemporary America? How has U.S. response to people with disabilities changed over time? What do we know about extent to which public policies and programs are responsive to people in need? How do demographics, economics, and politics continue to influence evolving public policy responses? P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual student with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

195. Community or Corporate Internships in Gerontology. (2 to 10) Tutorial, six to 12 hours. Requisite: course M108, or Clusters 80A and 80BX. Limited to juniors/seniors. Students propose their own ideas for internship project and petition for its approval. Approval of internship is contingent on position having relevance in field of gerontology, may be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

199. Directed Research or Senior Project in Gerontology. (4) Tutorial, to be arranged. Requisites: course M108, or GE Clusters 80A and 80BX. Limited to juniors/seniors. Supervised individual research under guidance of gerontology faculty mentor. Submission of weekly writing assignments and research paper at end of term. Eight units of 199 (or 195CE) required for successful completion of minor. Individual contract required. Information and contracts may be obtained from Gerontology Advising Office. Letter grading.

GLOBAL HEALTH
Interdisciplinary Minor
College of Letters and Science
10256 Bunche Hall
Box 951487
Los Angeles, CA 90095-1487
Global Health
310-206-6571
Minor e-mail
Ippolytos A. Kalofonos, MD, PhD, MPH, Chair
Faculty Committee
Victor Agadianian, PhD (Sociology)
David H. Gere, PhD (World Arts and Cultures/Dance)
Ippolytos A. Kalofonos, MD, PhD, MPH (Anthropology, Psychiatry and Biobehavioral Sciences)
Michael F. Lofchie, PhD (Political Science)
Anne W. Rimoin, PhD (Epidemiology)
Overview
The Global Health minor allows students to develop an interdisciplinary understanding of health issues in a global context. Students take courses that provide opportunity to become familiar with approaches to global health from the perspective of the social sciences, arts, and humanities, as well as the physical and biobehavioral sciences. The minor is appropriate for students from all majors.

Undergraduate Minor
Global Health Minor
Admission
To be admitted to the minor, students must be in good academic standing (overall grade-point average of 2.0 or better) and have completed all lower-division minor courses with a GPA of 2.0 or better in those courses.

After satisfying these requirements, students may declare the minor in consultation with the academic counselor.

The Minor
Required Lower-Division Courses (10 units):
Two courses from Civil Engineering 58XB, Clusters 80A, 80BX, 80CW, Community Health Sciences 91, Global Studies 1, History 3D, Honors College 1, 14, 26, International and Area Studies 1, Molecular, Cell, and Developmental Biology 60, Nursing 50, Statistics 13, World Arts and Cultures 2, 33.

Required Upper-Division Courses (20 to 25 units): Global Health 100 and four courses from the following theme areas, with a maximum of two courses from any single area:

Art: World Arts and Cultures 144, C158, C159, 160.
Community Health: Community Health Sciences 100, 161, CM170, 187A, 187B, 195, Health Policy and Management 140, Psychiatry and Biobehavioral Sciences 175, Psychology 150.
Environmental Health: Environment 166, M167, Environmental Health Sciences 100, C185A, C185B.
Genetics: Honors Collegium 141, Society and Genetics 162, 163.
Health Humanities and Communication: English Composition 131C, History 179A, 179B.

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall
grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Global Health

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP or letter grading.

Upper-Division Courses

100. Global Health and Development. (4) Lecture, three hours; discussion, one hour (when scheduled). Interdisciplinary examination of key issues in area of global health, with focus on developing world. Provides basis for understanding current debates that frame global health problems and actions in and across nations with strikingly different political-economic contexts. Discussion of how local and international communities attempt to address challenges of global health problems and how interventions play out through range of policy and programmatic approaches. P/NP or letter grading.

110A-110B. Field Studies in Global Health. (4-4) Seminar, three hours. Enforced corequisite for course 110A: course 110B. Exploration of issues regarding global health in important locations around world. Hands-on experiential courses offered for students participating in UCLA Travel Study Program. Field trips included to gain first-hand experience. May be repeated with topic and/or location change. Offered in summer only. P/NP or letter grading.

140. Equity-Focused Program Evaluation in Global Health: Theory and Practice. (4) Lecture, three hours; discussion, one hour. Requisite: course 100. Interdisciplinary approach to providing solid understanding of equity-focused evaluation theories and practices. Discussions are guided by principles of equity and human rights-based approach to global health. Focus on evaluation of policies, programs, and equitable delivery of health services for most vulnerable and marginalized populations. Case studies to learn about equity-focused research and evaluation concepts and methodologies. Case study topics include impact of COVID-19 pandemic and response to it in relation to our students. For instance, COVID-19 has had greater impact on African American, Latin American, and indigenous communities than on white populations, and it has unmasked disparities in access to health care, education, and technology, which often reflect in student performance. Students are encouraged to examine relevance of class discussions in their own communities and in terms of their aspirations for creating better, more equitable, and healthier world. P/NP or letter grading.

150. Migration and Health. (4) Lecture, three hours; discussion, one hour. Introduction to history, current status, and future of migration and health using social determinants of health model to foster multidisciplinary analysis of status of migrant health around world. Exploration of social determinants of health affecting migrating populations, including gender, race, ethnicity, socioeconomic status, poverty, religion, politics, governance, and environment. Letter grading.

160. Selected Topics in Global Health. (4) Lecture, three hours; discussion, one hour (when scheduled). Examination of one or more topics related to global health. May be repeated for credit with topic change. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

Overview
The Bachelor of Arts (BA) degree in Global Jazz Studies is a capstone major designed to provide students with an interdisciplinary education that draws from various areas of the UCLA Herb Alpert School of Music, as well as from the arts and social sciences. The curriculum is designed around three major areas: (1) performance courses designed to advanced students’ skills individually and playing in small combos and larger ensembles; (2) musician- and music theory courses in which students master improvisation, basics of music theory, arranging, and composition; and (3) broad understanding of the historical and societal context of the development and advancement of jazz in the United States and globally.

Undergraduate Major

Global Jazz Studies BA

Capstone Major
The Global Jazz Studies major is a designated capstone major. The capstone project, usually done in the senior year, is tailored to each student and includes a seminar class (course 186A) and a capstone presentation such as a recital, lecture-demonstration, or lecture-recital (186B). The capstone experience provides an appropriate vehicle for the faculty to assess the students’ accomplishments during their tenure in the program.
Learning Outcomes
The Global Jazz Studies major has the following learning outcomes:

• Advanced-level performance of multiple jazz styles across historical periods and contemporary jazz performance practices
• Demonstrated proficiency in styles representative of Africa, the African diaspora, and at least one other world music culture
• Demonstrated advanced skill and understanding in improvisation, musical structure and instrumentation, composition, arranging, timbre, and expression
• Demonstrated basic proficiency in areas of programming, recording, and/or post-production
• Demonstrated interdisciplinary knowledge of global jazz as text and method
• Intereogtion of the concerns of jazz as a comprehensive practice, including its capacity to transform the musical, political, and socioeconomic world it engages

Entry to the Major
Admission
Applicants are reviewed individually, based on a questionnaire, grade-point average, test scores, a personal statement of purpose, and an on-campus audition. Applicants who are unable to travel to UCLA have the option of submitting a video audition in place of the on-campus audition.

Transfer Students
Transfer applicants to the Global Jazz Studies major with 90 or more units must complete the following introductory courses as required prior to admission to UCLA: one to 12 units of studio Performance (24 units); and Music M50A-M50B. Entering transfer students with fewer than 15 units of prior music theory must take the Music Theory Assessment Examination. Each course must be completed with a grade of C or better.

The Major
Each course must be taken for a letter grade and be completed with a grade of C or better. Students must have an overall grade-point average of 2.0 or better. No more than eight units from upper-division tutorials (195-199) may be applied toward the degree.

Global Jazz Studies
Lower-Division Courses
19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery. May be repeated. P/NP or letter grading.

M25. Global Pop. (5) (Same as Ethnomusicology M25.) Lecture, four hours; discussion, one hour. Development of world music or world beat, including its meaning and importance to contemporary culture as well as its history and impact. P/NP or letter grading.

M35. Blues, Society, and American Culture. (5) (Same as Ethnomusicology M35.) Lecture, four hours; discussion, one hour. Sociocultural history and survey of blues music tradition from its roots in West Africa to its emergence in African American oral culture, with emphasis on philosophical underpinnings and social and political impact of blues and its influence on development of country, jazz, gospel, rhythm and blues, rock, hip-hop music, and other mediums. P/NP or letter grading.

M50A-M50B. Jazz in American Culture. (5-5) (Same as Ethnomusicology M50A-M50B.) Lecture, four hours; discussion, one hour. Course M50A is not required to M50B. Survey of development of jazz in American culture. Discussion of different compositional/technique approaches and challenges that distinguish different sub-styles of jazz from one another, as well as key historical figures that shaped development of jazz during its early years. Important historical social issues (segregation, Depression, World War II, Civil Rights Movement) that intersect with history of U.S. and jazz music. P/NP or letter grading. M50A. Late 19th Century through 1940s. M50B. 1940s to Present.

66. Global Jazz Studies Composition Studio. (2) Studio, one hour per week to be arranged with instructor; outside study, five hours. Limited to Global Jazz Studies majors. One-on-one composition lessons with assignments and compositions tailored to student progress and level of achievement. Lessons address various, cross-cultural concepts in harmonic, melodic, and rhythmic construction, orchestration, analyses of global jazz masterworks, form, texture, style, notation, ornamentation, improvisation, and performance feasibility. May be repeated for credit. P/NP or letter grading.

71A-71L. Instruction in Jazz Performance. (2 each) Studio, one hour of individual instruction. Limited to Global Jazz Studies majors. Knowledge of jazz repertoire, concepts, and techniques gained through private lessons on specified instrument and voice. Students meet weekly with instructor to demonstrate their performance skills and receive assessment of their progress in learning material. May be repeated for maximum of 12 units. Letter grading.

Upper-Division Courses
101. Cross-Cultural Perspectives in Jazz. (4) Lecture, four hours. Exploration of assimilation and redefinition of jazz from U.S. in various countries, with particular emphasis on cultural and social features that form basis for new jazz-ethnic musical blends. Letter grading.

M103. Creating Musical Community. (4) (Same as Ethnomusicology M103, Music M103, and Musicology M103.) Seminar, four hours; discussion, one hour. Limited to school of music majors. Faculty and students make music together in different modes. Students learn certain repertoire, refine it, and bring it to concert performance. Students critically engage musical literacies and notion of social contract that forms basis of musical notation. Drawing from American music folk game traditions, highlights complex history of this country and way in which entire body is used as resource when instruments are unavailable. Letter grading.

M109. Women in Jazz. (4) (Same as African American Studies M109, Ethnomusicology M109, and Gender Studies M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from 1880s to present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

M110A-M110B. African American Musical Heritage. (5-5) (Formerly numbered M12A-M12B.) (Same as African American Studies M110A-M110B and Ethnomusicology M110A-M110B.) Lecture, four hours; discussion, one hour. Limited to M.A. level. P/NP or letter grading. M110A. Sociocultural history and survey of African American music covering Africa and its impact on America; music of 19th and 20th centuries; its influence on representation of blacks in film, television, and the other; religious music, including hymns, spirituals, and gospel; black music of Caribbean and Central and South America; and music of black Los Angeles. M110B. Sociocultural history and survey of African American music covering blues, pre-1947 jazz styles, rhythm ‘n’ blues, soul, funk, disco, hip-hop, and symbolic relationship between recording industry and effects of political movements on black popular music productions. Letter grading.

M111. Ellingtonia. (4) (Same as African American Studies M111 and Ethnomusicology M111.) Lecture, three hours. Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington’s music, known as Ellingtonia, is one of largest and perhaps most important bodies of music ever produced in U.S. Covers many contributions of other artists who
worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cooties Williams, and Mercer Ellington. P/NP or letter grading.

122A. Early Jazz to Swing Era, 122B. Bebop to Avant-garde, 122C. Jazz since 1970s.

125. Jazz Arranging and Orchestration. (4) Lecture, three hours. Limited to Global Jazz Studies majors. Study of specific instruments and their unique use and application in jazz (jazz notation and terminology, transposition, woodwind doublings, brass mutes, etc.). Analysis of different writing techniques and approaches that distinguish different sub-styles of jazz from one another. Assignments focus on writing for medium and large ensembles with final project of arrangement to be read by UCLA Jazz Orchestra. P/NP or letter grading.

125A-125B-125C. Jazz Styles and Analysis. (4–4–4) Lecture, four hours; outside study, eight hours. Limited to Global Jazz Studies majors. One-on-one composition lessons. Focus on technologically informed, 21st-century tendencies towards fluidity and hybridization of jazz genres and styles. Study of techniques with broad array of cultural hybridity. Students create new extended composition based on their extrapolations from series of analyses covered during quarter. May be repeated for credit. P/NP or letter grading.

171A-171L. Instruction in Advanced Jazz Performance. (2 each) Studio, one hour of individual instruction; outside study, seven hours. Limited to junior/senior Global Jazz Studies majors. Study of jazz repertoire and techniques for specific instruments and voice. Grades are assigned by studio instructor in fall and winter quarters and by jury examination in spring quarter. May be repeated for maximum of 12 units. Letter grading.

176A-176B-176C. Capstone Seminar. (3) Seminar, two hours; outside study, seven hours. Limited to junior/senior Global Jazz Studies majors. Individual intensive research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for maximum of 8 units. Individual contract required. Letter grading.

199. Directed Research in Global Jazz Studies. (2 to 4) Tutorial, to be arranged. Limited to junior/senior Global Jazz Studies majors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for maximum of 8 units. Individual contract required. Letter grading.

**Overview**

The Global Studies Interdepartmental Program provides undergraduate students with a rigorous interdisciplinary education in the processes of globalization and their consequences. Housed in the UCLA International Institute, Global Studies offers a research-oriented undergraduate major leading to a Bachelor of Arts (BA) degree, as well as an undergraduate minor. The curriculum features three thematic pillars that capture the principal dimensions of the unprecedented depth and breadth of interconnectedness among nation-states, ethnic and religious groups, and individuals. Cultural and society courses concentrate on the tensions between local ways of life with deep historical, linguistic, ethnic, and religious roots; and today's pressures for transnational cultures and multiple identities, fueled by the communic-
sion of ideas and the movement of people all around the world. Governance and conflict courses focus on challenges to the nation-state from forms of governance above (regional and global forms of governance) and below (autonomy and secessionist movements); and from security threats beyond interstate warfare (ethnogenic conflict, terrorism, civil war). Markets and resources courses address the interactions among global, regional, national, and subnational economic processes over resources and market dynamics; their effects on different societies with respect to economic growth, poverty, inequality, the environment; and the interactions among market forces, political institutions, and public policy.

The curriculum draws on insights from disciplines across the humanities and social sciences to give students the theoretical and methodological skills and knowledge base necessary to understand this complex and rapidly changing world.

Undergraduate Major

Global Studies BA

Capstone Major

The Global Studies major is a designated capstone major. As students progress through the major, they move from a set of broad themes, theories, and perspectives to give students the theoretical and methodological skills and knowledge base necessary to understand this complex and rapidly changing world.

Learning Outcomes

The Global Studies major has the following learning outcomes:

- Critical thinking about basic political processes, institutions, and concepts as they operate in different national and cultural contexts
- Impartial evaluation of arguments
- Application of mathematical and logical reasoning to political processes
- Use and evaluation of statistical and other types of evidence in arguments
- Recognition of limits of quantitative and non-quantitative analysis
- Knowledge of diverse theories of politics acquired through critical engagement with texts, media, and contexts
- Location, evaluation, and use of information and scholarship to place political events in broader historical, cross-national, and theoretical contexts
- Employment of cultural, hermeneutical, normative, and historical approaches
- Written and oral arguments using appropriate evidence, with sensitivity to opposing perspectives, about significant political processes, events, and concepts

Entry to the Major

Admission

Admission to the Global Studies major is by application only and is highly competitive, with only a limited number of students admitted each year. To be eligible to apply, UCLA students must have completed all nonlanguage preparation for the major courses and one modern foreign language equivalent to level 3 by the end of the term in which they are applying. Any remaining language courses may be completed after students have been accepted to the major. Each preparation for the major course must be taken for a letter grade, and the UC grade-point average for all preparation courses must be a minimum of 3.25. In addition, students must have earned a grade of B or better in Global Studies 1.

The application period is once per year, and students must apply no later than the end of fall quarter of their junior year.

Meeting the above minimums does not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration.

Pre-major

Incoming first-year and transfer students may be admitted as Global Studies pre-majors on acceptance to UCLA. Pre-major students must apply for the major at the end of fall quarter of their junior year; they are not automatically accepted into the major.

Transfer Students

Transfer applicants to the Global Studies pre-major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one modern world history course, one major world region languages and cultures course, one international politics course, one macroeconomics or microeconomics course, one statistics course, and demonstrated proficiency equivalent to level 3 at UCLA in one modern foreign language. Transfer students must apply for the major by the end of fall quarter of their junior year.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Global Studies 1 with a grade of B or better; one methods course selected from Political Science 6, 6R, 30, Statistics 10, 12, or 13; demonstrated proficiency equivalent to level 6 at UCLA in one modern foreign language; and five additional courses as follows: (1) one culture and society course selected from Anthropology 3, 4, Comparative Literature 1C or 2CW, 1D or 2D, 4CW or 4DW, Ethnomusicology M25, Gender Studies 10, Geography 3, 6, History 2B, World Arts and Cultures 20, or 33; (2) one governance and conflict course selected from History 10B, 22, Political Science 10, 20, 50, 50R, or Sociology 1, and (3) one markets and resources course selected from Economics 1, 2, Environment 12, Clusters M1A, or Sociology 51. The remaining two courses, taken from two separate categories, may be selected from the three lists above. One course from the following list may be applied toward the culture and society category: Asian 70C, Asian American Studies 10B, Chicana/o and Central American Studies 10B, French 14, 14W, History 8A, 9E, International and Area Studies 31, 33, 50, Italian 42A, 42B, 46, Middle Eastern Studies M50CW, Russian 90A, 90B, 90BW, Spanish 42, or 44.

The Major

Required: Global Studies 102, 103, 104, and six elective courses, two from each of the following categories:

- Culture and Society—Anthropology 146, M148, Asian American Studies M130C, 170, M172A, M172C, Chicana/o and Central American Studies 120, 143, CM147, Comparative Literature 100, M148, English 130, 131, 133, 134, Film and Television 106C, 112, French 121, 142, Gender Studies 102, M147C, M162, Geography 141, 151, 175A, Global Studies 125, 140, Political Science M184A, Religion M107, Southeast Asian 157, Society and Genetics 134, Sociology 151, 152, 154, M162, 191F

Required Summer Global Learning Institute: After successful completion of two courses from Global Studies 102, 103, 104, students are expected to attend a summer Global Learning Institute at one of several locations around the world in which they enroll in Global Studies 110A and 110B.

Required Capstone: During their senior year, students must also take two capstone courses—Global Studies 191 and research/field experience practicum: International and Area Studies 195CE or Global Studies 199.

Honors Program

In addition to completing all courses required for the major, students must take courses 199A and 199B, in which they research and write an honors thesis.

Policies

Preparation for the Major

Courses must be completed with a grade-point average of 3.25 or better.
Honors Program

 Majors who have completed Global Studies 102, 103, 104, 191, and who have a 3.5 grade-point average (GPA) in all courses offered for the major are eligible to formally apply for the honors program.

 To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 199A and 199B) and an overall GPA of 3.25. Highest honors may be granted at the discretion of the faculty sponsor. Students demonstrating exceptional ability on the senior thesis.

 Undergraduate Minor

 Global Studies Minor

 The Global Studies minor offers students a multidisciplinary curriculum in the humanities and social sciences through which they can explore the complex and multifaceted interconnections that shape the contemporary world. The minor is designed to complement and enrich studies in their major.

 Admmission

 To enter the minor, students must (1) be in good academic standing (minimum 2.0 grade-point average) and (2) have completed Global Studies 1 and one course in the following three categories: (a) culture and society—Anthropology 3, 4, Asian 70C, Asian American Studies 10, Chicana/o and Central American Studies 10B, Comparative Literature 1C or 2CW, 1D or 2D, 4CW or 4DW, Ethnomusicology M252, French 14, 14W, Gender Studies 10, Geography 3, 6, History 2B, 8A, International and Area Studies 31, Italian 42A, 42B, Middle Eastern Studies M50CW, Russian 90B, 90BW, Spanish 42, 44, World Arts and Cultures 20, or 33, (b) governance and conflict—History 10B, 22, Political Science 10, 20, 50, 50R, or Sociology 1, and (c) markets and resources—Economics 1, 2, Environment 12, Clusters M1A, or Sociology 51.

 The Minor

 After completing at least two courses from Global Studies 102, 103, 104, Global Studies minors are highly encouraged to participate in a summer Global Learning Institute at one of several locations around the world. The courses offered, Global Studies 110A and 110B, may be applied toward any two of the elective categories (culture and society, governance and conflict, and markets).

 Policies

 A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

 Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor.

 Successful completion of the minor is indicated on the transcript and diploma.

 Global Studies Lower-Division Courses

 1. Introduction to Globalization. (5) Lecture, three hours; discussion, one hour. Introduction to concept and history of globalization, and to political, economic, social, and environmental dimensions of global integration today. Topics include finance and trade, colonialism, Industrial Revolution, urbanization, immigration, and climate change, among others. P/NP or letter grading.

 10. International Diplomacy and Foreign Affairs. (2) Lecture, 15 hours; discussion, 15 hours. Limited to high school students participating in Model United Nations (UN) Summer Institute. One-week intensive summer course, including lectures in international relations and outside study. Development of position papers in simulation of United Nations and final presentation in respective UN committees. P/NP grading.

 110A. Globalization in Context. (5) Lecture, six hours. Requisite: course 100B. Corequisite: course 110B. Culture, economy, history, and politics of different locations around world and how they are affected by globalization. Field trips included to gain first-hand experience of these processes. Offered in summer only. P/NP or letter grading.

 112AD. Globalization in Context: Markets and Resources. (5) Lecture, six hours. Requisite: course 102. Corequisite: course 112BD. Examination of development of markets and businesses in globalized world. Field trips included to gain first-hand experience of these processes. Offered in summer only. P/NP or letter grading.

 113AD. Globalization in Context: Governance and Conflict. (5) Lecture, six hours. Requisite: course 103. Corequisite: course 113BD. History, politics, philosophy, and governance of global governance and how they are affected by globalization. Field trips included to gain first-hand experience of these processes. Offered in summer only. P/NP or letter grading.

 114AD. Globalization in Context: Culture and Society. (5) Lecture, six hours. Requisite: course 104. Corequisite: course 114AD. Culture, economy, history, and politics of race, gender, and religion and how they are affected by globalization. Field trips included to gain first-hand experience of these processes. Offered in summer only. P/NP or letter grading.

 114BD. Globalization in Context Seminar: World Culture and Society. (5) Seminar, six hours. Requisite: course 104. Corequisite: course 114AD. Individual research projects on different aspects of globalization process in locations around world, including racial and gender identities. Offered in summer only. P/NP or letter grading.
120. Introduction to International Business. (4) Lecture, three hours; discussion, one hour (when scheduled). Over last five decades, world has increasingly become a complex global marketplace for businesses and entrepreneurs. However, recent world events have demonstrated volatile nature of globalization and pitfalls that can also manifest for firms doing business in global setting. Students gain understanding of dynamic environment of international business, and how firms managers navigate complex world of international business to capitalize upon opportunities and mitigate against risks. P/NP or letter grading.

125. Los Angeles as Global City: Exporter and importer of Global Culture. (4) Lecture, three hours; discussion, one hour. Study of phenomenon of globalization through Los Angeles case. Focus on how city produces global culture, including filmed entertainment and culture of celebrity and food; how it absorbs cultural inputs from world over. Emphasis on interaction between export and import of global culture. City’s distinct cultural milieu influences nature of its cultural exports, but its viability as cultural capital depends on its ability to accommodate integration of diversity of cultures. Study creates immersive experience through films, guest speakers, and urban field trips. P/NP or letter grading.

140. Hollywood and America’s Global Image. (4) Lecture, three hours; discussion, one hour (when scheduled). Required: course 105. Hollywood movies and television shows are meant to unify global audiences by exporting stories and images that demonstrate our shared humanity. But they also reveal unpleasant truths about American attitudes towards foreign cultures as well as our own. Examination of critical aspects of Hollywood’s role in shaping America’s global image. Ques

145. Rethinking Global Capitalism: Race, Class, Gender, History. (4) Lecture, three hours; discussion, one hour (when scheduled). Required: course 105. Reconsideration of histories and geographies of global capitalism. Displacing industrial revolution from Britain out into colonial world, transatlantic slave trade, and attempted genocide of indigenous peoples in Americas; study of new map of global capitalism and new histories of globalization. Study covers capitalism; embodiment and gender; capitalism and environmental crisis; and new issues in digital capitalism. Gig economy. P/NP or letter grading.

160. Selected Topics in Global Studies. (4) Lecture, three hours; discussion, one hour (when scheduled). Examination of one or more topics related to global studies. May be repeated for credit with topic change. P/NP or letter grading.

M161. Special Topics in Global Studies and Public Policy. (4) (Same as Public Policy CM191G.) Seminar, three hours. Examination of one or more topics related to public policy and global studies. May be repeated for credit with topic change. P/NP or letter grading.

M177. Superfoods: Cultural and Global Perspectives. (4) (Same as Food Studies M177 and International Development Studies M177.) Seminar, four hours. Exploration of superfoods, which are nutrient rich foods considered beneficial for well-being, health, and longevity, as they are high in minerals, vitamins, and antioxidants. While superfoods have been part of cultures’ diets for centuries, in recent decades they have been researched in scientific and medical communities. Citizens globally have begun to increasingly demand and consume foods that are nutritious, organ

Graduate Course

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

385A. Teaching Assistant Pedagogy Seminar. (2) Seminar, two hours. Overview of evidence-based pedagogical theories, strategies, and best practices geared towards preparing first-time teaching assistants to teach at UCLA. Discussion, development, and implementation of pedagogical techniques to promote inclusive teaching and support student learning outcomes. S/U grading.

385B. Teaching as Research. (2) Seminar, 90 minutes. Required: course 496A or equivalent. Focus on teaching as research project. Suitable for grad student instructors designing courses from scratch and those modifying existing courses to teach. Culminating paper required. May be repeated for credit. S/U grading.

495A. Teaching Assistant Pedagogy Seminar. (2) Seminar, three hours. Introduction to evidence-based teaching practices. Strategy for creating effective learning environment. Development of graduate students.

495B. Collegium of University Teaching Fellows. (2) Seminar, 90 minutes. Required: course 495A or equivalent. Focus on teaching as research project. Suitable for grad student instructors designing courses from scratch and those modifying existing courses to teach. Culminating paper required. May be repeated for credit. S/U grading.

496A. Teaching Assistant Pedagogy Seminar. (2) Seminar, 90 minutes. Required: course 496A or equivalent. Focus on teaching as research project. Suitable for grad student instructors designing courses from scratch and those modifying existing courses to teach. Culminating paper required. May be repeated for credit. S/U grading.

496B. Teaching as Research. (2) Seminar, 90 minutes. Required: course 496A or equivalent. Focus on teaching as research project. Suitable for grad student instructors designing courses from scratch and those modifying existing courses to teach. Culminating paper required. May be repeated for credit. S/U grading.

496C. Implementing and Communicating Teaching as Research Project. (2 to 4) Tutorial, three to six hours. Development of research project. Culminating paper of 35 to 50 pages required. Individual contract required. Letter grading.

Graduate Education

130-205-3819
Overview

The Division of Graduate Education sponsors universitywide courses for the professional development of graduate students.

Graduate Student Professional Development

Graduate Courses

495A. Teaching Assistant Pedagogy Seminar. (2) Seminar, two hours. Overview of evidence-based pedagogical theories, strategies, and best practices geared towards preparing first-time teaching assistants to teach at UCLA. Discussion, development, and implementation of pedagogical techniques to promote inclusive teaching and support student learning outcomes. S/U grading.

496A. Teaching as Research. (2) Seminar, 90 minutes. Required: course 496A or equivalent. Focus on teaching as research project. Suitable for grad student instructors designing courses from scratch and those modifying existing courses to teach. Culminating paper required. May be repeated for credit. S/U grading.

496B. Teaching as Research. (2) Seminar, 90 minutes. Required: course 496A or equivalent. Focus on teaching as research project. Suitable for grad student instructors designing courses from scratch and those modifying existing courses to teach. Culminating paper required. May be repeated for credit. S/U grading.

496C. Implementing and Communicating Teaching as Research Project. (2 to 4) Tutorial, three to six hours. Development of research project. Culminating paper of 35 to 50 pages required. Individual contract required. Letter grading.
division students who may be new to field of inquiry and/or new to college-level research and writing. S/U grading.

497C. Approaches to Community-Engaged Teaching. (4) Formerly numbered 497CE. Seminar, two hours. Suitable for graduate students in any discipline. Introduction to best practices for community-engaged pedagogy and experiential learning, with emphasis on strategies for collaborating effectively with diverse communities of Los Angeles. S/U grading.

497R. Integrating Writing and Research in Teaching Practice. (4) Formerly numbered 497R. Seminar, two hours. Introduction to strategies for integrating writing and research in instruction, emphasizing research and information literacy skills instruction and UCLA’s context. This course is suited Designed for teaching assistants from all departments, and does not require any prior knowledge or teaching experience. S/U grading.

Steven M. Teutsch, MD, MPH
Leah J. Vriesman, MBA, MHA, PhD
Elizabeth M. Yano, MSPH, PhD

Adjunct Associate Professors
Sangeeta C. Ahiwalla, MPH, PhD
Aria Fallah, MD, MSc, FRCS, FAANS
Yvonne Flores, MPH, PhD
Richa Gidwani-Marszowski, DrPH
Z. John Lu, PhD
Stephanie L. Taylor, PhD, MPH

Adjunct Assistant Professors
Burton O. Cowgill, MPH, PhD
Julie A. Elginer, DrPH
Michelle S. Keller, MPH, PhD
Peter V. Long, PhD
Isomi M. Miake-Lye, PhD
Lori S. Pelliccioni, JD, PhD

Overview
The field of health policy and management examines the organization and financing of various health sector and wider social system activities to prevent and treat disease. This includes programs in both the public and private sectors at all levels—local, state, and federal. Faculty members come from such diverse fields as economics, management, law, statistics, operations research, planning, medicine, history, sociology, and political science. These diverse disciplines are harmonized by their devotion to solving problems—through quantitative, qualitative, and mixed method analyses—in the financing and delivery of health policy and management, with a focus on populations rather than individual patients.

Graduate Study
The Department of Health Policy and Management offers both practice-oriented and research-oriented graduate programs. The primary professional degree, the Master of Public...
Health Policy and Management

Executive Master of Public Health

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Majors

Executive Master of Public Health

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Health Policy and Management MS, PhD

Students have the opportunity to collaborate with the department’s seven existing centers by actively engaging in progressive health services research across a wide breadth of topics, examining issues and finding solutions to critical health care problems locally, nationally, and globally. Graduates pursue careers in universities, as well as in public and private agencies involved in health services research and health policy analysis.

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Master of Healthcare Administration

Students have the opportunity to collaborate with the department’s seven existing centers by actively engaging in progressive health services research across a wide breadth of topics, examining issues and finding solutions to critical health care problems locally, nationally, and globally. Graduates pursue careers in universities, as well as in public and private agencies involved in health services research and health policy analysis.

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Courses

400. Field Studies. (4) Fieldwork, to be arranged. Culmination of fieldwork process that takes approximately one year from internship search process, through actual field placement, to this integrative course. Deliberate consideration and reflection on relationship between summer practicum and principles and competencies of health-care management and policy learned during academic year. Students complete professional management or policy-related consulting report based on organizational problem or health policy issue on which students focused during summer. S/U or letter grading.

402. Management and Organizational Behavior in Health Systems. (4) Lecture, three hours; discussion, one hour. Application of contemporary management and organization behavioral theory to systems that provide personal health care services. Environmental characteristics, decision-making, structure and culture, and processes of health services organizations. Letter grading.

403. Health-Care Information Systems and Technology. (4) Lecture, three hours; discussion, one hour. Provides strong foundation in health information technology (HIT) for those working in health care, with emphasis on development of knowledge and skill to plan, manage, and implement HIT systems in health-care delivery organizations with clinical and business partners and evolving HIT spaces. Background and evolution of HIT; how it is planned, implemented, and managed; and how it influences health-care delivery organizations, external research organizations, regulatory organizations, providers, and patients/consumers. Fundamentals of technology, electronic medical records (EMR), electronic health records (EHR), personal health records (PHR), meaningful use, interoperability, and health information exchanges (HIE). Letter grading.

404. Health-Care Strategy. (4) Lecture, three hours; discussion, one hour. Conceptual, analytical, and technical aspects of environmental assessment and strategy formulation in health delivery organizations, biopharma, and medical technology. Special attention to structure and dynamics of competitive markets, corporate-level strategic planning and marketing, managerial ethics and values, organizational creativity and innovation. Letter grading.

405. Leadership and Ethics. (4) Lecture, three hours; discussion, one hour. Preparation: completion of immersion course 596. Examination of leaders and leadership in health care and other organizations to provide broad introduction to leadership behaviors, characteristics, and functions of organizational leaders. Relationship and importance of vision, values, change, strategy, and communication, identifying characteristics of successful leaders. Students evaluate their own leadership style and identify opportunities to further develop their leadership abilities. Letter grading.

406. Health-Care Marketing. (4) Lecture, three hours; discussion, one hour. Introduction to concepts of health-care marketing. Exploration of principles of market-driven decision-making process. Examination of development of key elements in annual marketing process and of consumer, competitor, company analysis, market segmentation, and target markets. Letter grading.

407. Digital Health Transformation. (4) Lecture, three hours; activity, one hour. Prepares students to lead digital health transformation by deepening knowledge of health technologies driving innovative health-care delivery. Ten learning modules and leadership competencies required to advance and accelerate digital health transformation in one’s organization, whether it is startup or large, mature health system. Letter grading.

411. Microeconomic Theory for Health Sector. (4) Lecture, three hours; discussion, one hour. Microeconomic aspects of health-care system, including health-care economics and financial management, demand for health care, and provider behavior. Letter grading.

412. Statistics for Health Management Decision-Making. (4) Lecture, three hours; discussion, one hour. Sampling situations, with special attention to those occurring in biological and social sciences. Topics include distributions, tests of hypotheses, estimation, types of errors, statistical confidence levels, and sample size. Letter grading.

413. Health Care Operations Management. (4) Lecture, three hours; discussion, one hour. Development of skills in analyzing and improving health care systems and processes by integrating systems analysis, quality management, operations research techniques, exploratory data analytics, and data visualization. Emphasis on use of organizational data, especially time-stamped data, to study processes and outcomes of care, particularly as it relates to flow analysis and improving flow. Hands-on use of computer-based modeling tools, including spreadsheets and spreadsheet add-ins focus on formulating, designing, and constructing models; drawing conclusions from model results; and translating results into written end-user reports to support process improvement and quality improvement efforts. Letter grading.

414. Health Care Financial Accounting. (4) Lecture, three hours; discussion, one hour. Examination of purpose and methods of financial accounting (including for profit, not for profit, and governmental), function and organization of financial department, and special industry characteristics affecting financial management (to include third party payers, price or rate-setting and cost-shifting, taxation and health care incentives, and emerging health care organizations). Letter grading.

415. Health Care Financial Management. (4) Lecture, three hours; discussion, one hour. Concepts of financial management and managerial accounting as applied within health care industry. Builds managerial financial decision-making skills and key analytical methods used in applications of health care financial management. Students develop understanding and respond to financial recommendations of advisers, lenders, investors, and other stakeholders by applying concepts such as time value of money, financing approaches, capital planning, and budgeting. Letter grading.

417. Health Care Analytics. (4) Lecture, three hours; discussion, one hour. Exploration of data sources and uses in health care, e.g., electronic medical records, social media, wireless biosensors, system and facility data. Review of hands-on techniques including data management, development of indexes and metrics, choosing and implementing...
Health Policy and Management

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminate many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial, to be arranged. Students must have faculty mentors on their research in area related to the student. May be repeated for credit. S/U and letter grading.

Upper-Division Courses

100. Health Care Systems and Health Policy. (4) Lecture; four hours; discussion, one hour. Limited to nonmajors. Not open for credit to students with credit for course 120. Structure and function of U.S. health care system, health care policy, and issues and forces shaping its future. P/NP or letter grading.

120. Health Care Systems: Structures, Functions, and Policies. (5) Lecture; four hours; discussion, one hour. Requisite: Public Health 50B. Limited to Public Health majors. Not open for credit to students with credit for course 100. Introduction to health policy and management focusing on basic concepts underlying health care organization, finance, and policy. Topics include development of U.S. health care system, comparisons to international health care systems, trends in health care spending, role of public and private insur-

197. Individual Studies in Health Services. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings between faculty member and student. May be repeated for credit. Individual contract required. P/NP or letter grading.

198SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced prerequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin prepa-

198SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced prerequisite: course 188SA. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

198SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced prerequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

198SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced prerequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin prepa-

198SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced prerequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

198SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced prerequisite: course 188SA. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

198SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced prerequisite: course 188SB. Limited to junior/senior USIE facilitators. On-campus study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

Graduate Courses

200A-200B. Health Systems Organization and Financing. (4) Lecture, three hours; discussion, one hour. Limitd to graduate health services students. In-depth analysis of health services systems in U.S., using relevant theories, concepts, and models. S/U or letter grading.

M203. Microeconomic Analysis for Public Health and Policy. (4) (Same as Public Policy M203A.) Lecture, two hours; laboratory, two hours. Overview of statistical and research methods for health services research. Preparation for consecutive course in statistics and leading independent research projects. Students learn to develop analytical skills involving data collection, probability, advanced statistics and how they can be applied to public health. S/U or letter grading.

M203A. Microeconomic Analysis for Public Health and Policy. (4) (Same as Public Policy M203A.) Lecture, four hours. Requisite: Mathematics 3A or 3B or 31A. Course M203A is requisite to M203B. Basic concepts of microeconomics, with emphasis on their application to actual situations and their use in problem solving. Extensive use of differential calculus. Letter grading.

M203B. Microeconomic Analysis for Public Health and Policy. (4) (Same as Public Policy M203B.) Lecture, four hours. Requisite: completion of one course from Mathematics 3A, 3B, or 31A. Basic concepts of microeconomics, with emphasis on their application to actual situations and their use in problem solving and focus on theories of firms and markets. Extensive use of differential calculus. Letter grading.

M204A-M204B-M204C. Seminars: Pharmaceutical Economics and Policy. (1–1–2) (Same as Economics M204L-M204M-M204N.) Seminar, three hours every other week. Topics include determinants of drug availability, and patient access to pharmaceuticals. Letter grading.

M205. Pharmaceutical Policy. (4) (Formerly numbered 205.) (Same as Public Policy M265.) Lecture, three hours. Policy issues pertaining to pharmaceutical sector. Topics include determinants of expenditures on drugs, price setting in industry, health insurance coverage for pharmaceuticals, and research and development process. Letter grading.

M210. Topics in Theoretical Epidemiology. (4) (Same as Epidemiology M203.) Lecture, three hours. Emphasis on methods that help to understand how systems operate and how to intervene on them. Exploration of how to characterize human-centered problems that arise, and how to handle complexity as core design and development challenge. Examination of different traditions of studying and modeling (repre-

191. Directed Individual Study or Research. (1 to 4) Tutorial, to be arranged. Independent study with faculty mentor required. May not be repeated. S/U and letter grading.

418. Health Reform: Policy and Implementation. (4) Lecture, four hours. Examination of politics of health policy process and how problems are considered for governmental action, how solutions are identified, and how political forces act on them. Emphasis on understanding how public policy is made, and how to influence process and how to un-
derstand formulation of policy in response to problems and political will of leaders. Covers how health policy is developed, adopted, and implemented; political, institutional, economic, social, and other factors that influence and shape process; and how health care managers can be engaged in policymaking or interpreting policy decisions they must comply with as health care leaders. Letter grading.

140. Foundations of Maternal and Child Health. (4) Seminar, four hours. Introduction to field of maternal and child health, with focus on major issues affecting health and well-being of children and families over life course including prevention of problems and support-

M168. Healthcare for American Indians. (4) (Same as American Indian Studies CM168.) Lecture, two hours; discussion, one hour. Identification of tradi-
tional health beliefs, health practices, and healthcare systems of American Indian tribes to understand role of U.S. government in healthcare services for Indian people. Description of health problems that have af-
fected American Indian people and definition of temporary health issues and measures taken to raise health status of American Indian people. Letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced prerequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin prepa-
ration of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced prerequisite: course 188SA. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced prerequisite: course 188SB. Limited to junior/senior USIE facilitators. On-campus study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

197. Individual Studies in Health Services. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter re-
quired. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Student Research Program. (1 to 2) Tutorial, to be arranged. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.
(QI) techniques such as performance measurement, rapid cycle testing, breakthrough series, and interorganizational collaboration benefit quality and productivity. Letter grading.

215B. Applied Methods for Improvement/Implementation Science. (4) Lecture, four hours. Planning and management of improvement programs in current work of students and future roles as change agents and leaders in healthcare systems. Training in process and analytic methods for applying improvement science in clinical settings and health systems. Compilation of improvement projects that demonstrate student competence in improvement science. Emphasis on case studies and applications so students gain skills in improvement project design and implementation. Analyses of cases, individual improvement projects, and student to allow students to apply and implement knowledge to organizational examples. Letter grading.

217. Evidence-Based Medicine and Organizational Change. (4) Lecture, three hours. Requisites: courses 220A, 220B, or 225A for graduate students. Emphasis on graduate students in public health or other health sciences disciplines. Participation of students in critical review and discussion of selected papers dealing with course topics, including clinical trials, meta-analysis, small and large area variations in care, and development and implementation of clinical guidelines. Emphasis on implications for practice and policy. Letter grading.

221. Tobacco: Prevention, Use, and Public Policy. (4) Lecture, four hours. Designed for juniors/seniors and graduate students. Study of tobacco use and its health consequences, including interplay of historical, biological, social/cultural, and economic forces with knowledge, attitudes, and behavior choices of individuals. Introduction to prevention interventions, cessation interventions, anti-tobacco efforts in U.S., and international trends in tobacco use. Current and scheduled with course C121. Letter grading.

222A-225B. Health Services Research Design. (6-6) Lecture, four hours; laboratory, two hours. Limited to departmental MS and PhD students. Letter grading.

225A. Introduction to scope of health services research, conceptualization and design of health services research, choice and assessment of measures for such research, and methods for studies involving direct observation, survey, and controlled experiments. Preparation for graduate students in public health or other health sciences disciplines. Participation of students in critical review and discussion of selected papers dealing with course topics, including clinical trials, meta-analysis, small and large area variations in care, and development and implementation of clinical guidelines. Emphasis on implications for practice and policy. Letter grading.

225B. Requisite: course 225A. Development of conceptual models for health services research, identification and use of secondary data sources, study design, and its operationalization through regression models.

225C. Research Methods for Improvement/Implementation Science. (4) Lecture, four hours. Enforced requisites: courses 221A or 215B. Design and implementation of studies of dynamic interventions, including improvement initiatives and pragmatic clinical trials. Focus on research methods for design and implementation in clinical settings (including community-based settings) and health systems. Compilation of improvement research projects that demonstrate student competence in design and implementation. Fundamentals in research design and methods for conducting rigorous inferential evaluation in real world of implementation science, with emphasis on critical analysis of results from design and implementation studies involving dynamic testing. Emphasis on case studies and applications so students gain skills in design and implementation. Letter grading.

226A-226B. Readings in Health Services Research. (2-2) Seminar, two hours. Limited to departmental MS and PhD students. Introduction to research literature in health services research, including literature on key conceptual models, classic empirical studies, and current research illustrating cutting-edge methods or findings. In Progress (226A) and S/U (226B) grading.

227A. Special Topics in Health Services: Seminar Series. (2-4) Formerly numbered 227B. Seminar, two hours. Designed for doctoral students. Presentation of proposed or ongoing research projects by faculty members and students, with discussion to determine methods, results, and implications for future work. S/U or letter grading.

227B. Special Topics in Health Services: Current Research Issues. (2) Formerly numbered 227A. Seminar, two hours. Designed for doctoral students. Review of articles from selected journals are selected as best published during previous year. Analysis of articles to determine contribution to theory, methods, and/or implications for management or policy in health services organizations. Current research illustrated. May be repeated for credit with topic change. Letter grading.

228. Introduction to Mixed Methods Research. (4) Same as Community Health Sciences M228. Seminar, three hours; discussion, one hour. Limited to graduate students. Highly recommended: courses 225A and 225B, or completion of coursework in basic research design and methods. Introduction to mixed methods research and its application to public health research. Equips students with skills to critique mixed method research designs and to design mixed methods research for investigation for health issues of interest. Study of different mixed methods research designs commonly used in public health and health services research, including feasibility studies, convergent parallel design, sequential mixed methods, and multiple strategies to evaluate public health. Letter grading.

231. History of Public Health. (4) Discussion, three hours. Designed for doctoral students. Emphasis on topics which illuminate current issues in public health policy. Discussion of historical perspectives on health-care, community health, and environmental health reformation movements, public health activities, childbirth, and AIDS. S/U or letter grading.

232. Leadership Capstone Seminar. (4) Seminar, four hours. Preparation: completion of summer internship requirement. Designed for graduate students completing their master’s training in health management and health policy. Examination of leaders and leadership in healthcare and other organizations to provide introduction to literature on skills, behaviors, and characteristics of organizational leaders. Relationship and importance of vision, values, change, and leadership in current health care environment. Characteristics of successful leaders. Students evaluate their own leadership style and identify opportunities to further develop their leadership abilities. Letter grading.

234. Health Services Organization and Management Theory. (4) Lecture, two hours; discussion, two hours. Preparation: two upper-division social sciences courses. Application of contemporary organization and management theories to applications in health services organizations. Social, political, and economic factors that influence health of populations and defined subgroups. Letter grading.

235. Law, Social Change, and Health Service Policy. (4) Lecture, four hours. Preparation: two upper-division political science or sociology courses. Requisite: course 100. Legal issues affecting policy formulation for environmental, preventive, and curative health service programs. S/U or letter grading.

M236. Microeconomic Theory of Health Sector. (4) Same as Public Policy M236B. Lecture, four hours; discussion, two hours. Designed for doctoral students. Emphasis on health economics, microeconomics, Microeconomic aspects of health care system, including health manpower substitution, choice of efficient methods of treatment, market efficiencies, and competition. S/U or letter grading.

237C. Issues in Health Services Methodologies. (6) Lecture, four hours; discussion, two hours. Requisites: courses 237A, 237B, Biostatistics 200A, 200B (or 201). Designed for doctoral students. Intended to train students in statistical and economic methods used in health services research, with focus on practical application of advanced regression models. Letter grading.

239A. Special Topics in Health Services: Introduction to Decision Analysis and Cost-Effectiveness Analysis. (4) Lecture, four hours. Requisite: course 200A, 200B, or M233. Techniques to assess broad spectrum of medical technologies: therapeutic and diagnostic tests and procedures, clinical practice patterns, etc. Emphasis on health economic and cost-effectiveness analysis. Demonstration of how decision analysis provides basic framework for conducting various economic evaluations. May be repeated for credit with topic change.

239B. Special Topics in Health Services: Advanced Topics in Decision Analysis and Cost-Effectiveness Analysis. (4) Lecture, four hours. Introduction to global health, from health policy and management perspective. Examination of institutions, from global to local, through lenses including governance, financing, history, and agenda-setting. Discussion of major topics in global health systems, such as human resources and health IT. Through series of short assignments, students will develop a culminating concept paper that examines these many dimensions of single topic in global health. S/U or letter grading.

240. Global Health Institutions, Policies, and Systems. (4) Lecture, four hours. Introduction to global health, from health policy and management perspective. Examination of institutions, from global to local, through lenses including governance, financing, history, and agenda-setting. Discussion of major topics in global health systems, such as human resources and health IT. Through series of short assignments, students will develop a culminating concept paper that examines these many dimensions of single topic in global health. S/U or letter grading.

241. Economics of Health Policy. (4) Lecture, four hours. Requisite: course 236 or doctoral standing. Second-year graduate students. Emphasis on health policy applications, designed to provide more nuanced view of health economics than does course M236. Provides more training for master’s students interested in policy, as well as material and insights for doctoral students who may find it useful in thinking about dissertation topics. Emphasis on special characteristics of health and healthcare and how these characteristics can result in unique policy and various policy tools that can be used to deal with these failures. Because U.S. is only developed country that has traditionally relied on private insurance, course goes into more detail on that topic. Alternative conceptual models to traditional market one, discussion of proposed U.S. reforms, and examination of systems in selected other countries. Letter grading.

M242. Determinants of Health. (4) Same as Community Health Sciences M242. Lecture, three hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and disease, both for health factors for environmental, genetic, health system, and other factors that influence health of populations and defined subgroups. Letter grading.

243. Population Health Approach to Autism Spectrum Disorder. (4) Lecture, three hours. Overview of impact that Autism Spectrum Disorder has on individuals, families, and communities, including access to
services, ongoing therapies, and adult vocational and residential placement. Covers opportunities for re-
structure and national policy. S/U or letter grading.

244. Telehealth and Technology. (4) Lecture, four hours. Preparation: working knowledge of Excel, PowerPoint, Internet, and smartphone devices. Connects multiple aspects of Telehealth and how to deploy them in health-care operations setting. Exploration of new de-

cives/technologies in wireless/telemedicine, delivery modalities, and user experience/Interface (UK/

design. Study teaches ways to apply new technology to facilitate efficient health-care business oper-

tions. Study of Telehealth in critical transport. Strengthen understanding of perils, challenges, and op-

mized data visualization for decision making. S/U or letter grading.

M248. Primary Health Care. (4) Same as Community

Health Sciences M248.) Lecture, four hours. Strongly recommended requisite: Public Health 200A, 200B. Recommended requisite: course 240 or Community Health Sciences 200. Primary Health care (PHC) is considered to be foundation of all health sys-
tems and should be able to resolve 80 percent or more of population’s health problems. Overview of organi-

zation, structure, and functions of primary health care with emphasis on course content and delivery. Letter grading.

M249. Advanced Research Topics in Health Policy and Management. (2 to 4) Seminar, three hours; outside study, one hour. Re-

designed for graduate students. Multidisciplinary intro-

duction to graduate level to epidemiology, physiology, and current state of preventive and therapeutic inter-

ventions for obesity in adults and children, including public health policy approaches to healthy nutrition and physical activity promotion. S/U or letter grading.

259. Smoking, Drinking, Shooting, and Driving: Understanding Public Health Policy in U.S. (4) (Same as Community Health Sciences M259.) Lec-
ture, two hours; discussion, two hours. Recommended requisite: course 286. Overview of essential themes, practices, and impact of public health policies in U.S. with emphasis on state and local governments. Students develop skills in public health policy research (laws, regula-
tions, and programs) and in critically analyzing evidence for different approaches currently used to address some of main causes of death and disability in U.S. including tobacco, alcohol, firearms, food, and work. Key areas include exposure to promising tools and approaches, and pitfall identification. Students learn comparative policy methods, analyze area of particular interest, and study what approaches and countries have taken in the past and im-

pact of these approaches. S/U or letter grading.

260. World Health. (4) Lecture, two hours. Designed for graduate students. Overview of world health, with emphasis on healthcare systems, health inequities, and major public health problems. Students learn comparative policy methods, analyze area of particular interest, and study what approaches and countries have taken in the past and impact of these approaches. S/U or letter grading.

261. Political Science: Health Policy and Health Care. (4) (Same as Community Health Sciences M260.) Lecture, four hours. Requisites: courses 200A, 200B. Limited to second-year graduate students. Overview of political science of implementing innovations and evidence-based approaches in real-world practice settings. In past two decades there have been four respi-

mendations: methods for public health research, designing surveys, and analysis of current topics in health policy and public health management, and Discussion of recent research and liter-

ature in research specialty of faculty member teaching course. May be repeated for credit with topic change. S/U or letter grading.

M274. Medicare Reform. (4) (Same as Public Policy M267.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and mana-
gerial skills learned earlier to be used to analyze prob-

erms with existing Medicare program and to develop specific options for reforming features of program to accommodate coming pressures generated by retire-

ment of baby-boom generation. Letter grading.

275. Health Status and Health Behaviors of Racial and Ethnic Minorities. (4) Same as Psychology M274.) Lecture, two hours; discussion, one hour. Limited to graduate students. Overview of physical and mental health behaviors and status of major racial/ethnic groups in U.S. Where appropriate, discus-

sion of international issues as well. S/U or letter grading.

280. Health Reform: Policy, Research, and Imple-
mentation Issues. (4) Seminar, three hours. Requi-
sites: courses 200A, 200B. Limited to second-year MPH and doctoral students. Analysis of components of major federal healthcare reform legislative initiative to identify important policy, research, and implementa-
tion issues. Students apply multiple research methods to analyze how and why this legislation was constructed and how it passed Congress. Con-

duction of policy analyses of selected components through completion of written assignments. Examina-
tion of respective roles of federal and state govern-

ment in implementing and administering various com-
ponents. Identification of significant implementation challenges, gaps, and state and federal actions and levels and development of possible strategies for ad-

dressing those challenges. Letter grading.

281. Policy Making amid Health, Economic, and So-
cial Disparities. (4) Seminar, four hours. Preparation:

one year of graduate course-

work. In past two decades there have been four respi-

ratory pandemics. While COVID-19 led to most devas-
tating and economic consequences for healthcare, this

resented is not unique. Climate change and environ-

mental degradation, increasing encroachment on an-

imal habitats are together increasing rate of emerging infectious disease outbreaks. In recent decades pandemics have highlighted and been worsened by underlying health, social, and economic inequalities. Focus on what can be done to address underlying inequalities, as well as what can be done to improve response to simultaneous health, economic, and social crises. Stu-

dents learn comparative policy methods, analyze area of particular interest, and study what approaches and countries have taken in the past and im-

pact of these approaches. S/U or letter grading.

284. Social Policy and Health: Case for Gender. (4) Lecture, four hours. Preparation: completion of core MPH curriculum. Masters students in other degree programs should have completed their core require-

ments. Doctoral students should have completed at least one year of doctoral coursework. Focus on rela-

tionships among gender inequality, restrictive gender norms, and health. Examination of evidence pulled to-

tgether by World Health Organization (WHO) Commission on social determinants of health and others on how gender inequality and restrictive gender norms impact health across sexes and genders. Examination of evidence of evidence on extent of gender inequality in other so-

cial determinants of health globally including educa-

tion, work, and poverty. Focus on policies to improve health. Discussion of examples of pro-

matically approaches to inequalities in education, work, family, and other spheres. Students have opportunity to dive deeper into area of choice. S/U or letter grading.

M285. Ethical Theory and Applications in Public Health. (4) (Same as Community Health Sciences M285.) Lecture, four hours. Requisites: courses 200A, 200B. Introduction to ethical theories and crit-

cal ethical issues pertaining to healthcare policy and healthcare management. Research, writing, and dis-

ussion on variety of topics related to health and health care. Topics include: health care delivery, ethical and administrative challenges at federal and state sites; and systems thinking and improving student sensitivity to needs of patients, coworkers, and fiduciary share-

holders. How ethics are foundation of leadership. Letter grading.

286. American Political Institutions and Health Poli-

cy. (4) Lecture, three hours; discussion, one hour. To effectively participate in policy process as analyst, pol-

icymaker, advocate, or citizen, it is necessary to un-

derstand institutional and political within which policy is made. Introduction to federal and state policy-

making, with focus on health policy. Discussion of federalism and constitutionalism. Examination of stake-

holders, public interest groups, and issue space for health policy. Structure and process of political institutions at federal level, Congress, Presi-

dent, executive agencies, courts, and administrative law. State responsibilities and federal functions. How analysis enters policy process with examination of roles of federal analytic agencies and private re-

search and advocacy groups. Letter grading.

M297. Politics of Health Policy. (4) (Same as Com-

munity Health Sciences M297 and Public Policy M297.) Lecture, three hours; discussion, one hour. Ex-

amination of politics of health policy process through analysis and evaluation of public opinion, social pro-

tection, pandemic preparedness, and response, pre-

ventive health services for women, and racial and in-

come inequality and health. Examination of framework for assessing evidence-based policy making and ef-

fants of political structure and current political division, including efforts such as to repeal and dismantle Affordable Care Act. Letter grading.

288. Role and Impact of Technology on Health Services, (4) Lecture, four hours. Examination of role and impact of technology on health services in the U.S. from the point of view of system itself. Exploration of various types of technologies for their policy, economic, and organizational impacts on health care delivery. Letter grading.

289. Healthcare Disparities, (4) Seminar, three hours. Limited to graduate students. Exploration of what constitutes and explains disparity in healthcare. Emphasis on understanding history of disparities in U.S. to understand the root causes of disparities, and on evaluating effectiveness of ongoing strategies to eliminate them, such as increasing insurance coverage and delivery of culturally competent healthcare. Examination of societal perspective on healthcare and evaluation and expansion on these models. Letter grading.

M290. Evolving Paradigms of Prevention: Interventions in Early Childhood, (4) (Same as Community Health Sciences M237.) Seminar, three hours; fieldwork, one hour. Designed for graduate students. Introduction to use of early childhood interventions as means of preventing adverse health and developmental outcomes. Concepts of developmental vulnerability, approaches to assessment, models of service delivery, evaluation and cost-benefit issues, funding, and other policy issues. Letter grading.

375. Teaching Professional Practicum, (1-4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

401. Public Health Informatics, (4) Lecture, three hours. Preparation: general familiarity and understanding of basic information technologies. Recommended prerequisite: course 251. Introduction to field of public health informatics and examination of impact of information technology on public health care delivery, from systems conceptualization and design to project planning and development to system implementation and use. Letter grading.

M411. Issues in Cancer Prevention and Control, (4) (Same as Community Health Sciences M411.) Lecture, four hours. Designed for juniors/seniors and graduate students. Introduction to causes and characteristics of cancer epidemic, cancer control goals for nation, and interventions designed to encourage smoking cessation, cancer screening, and other dietary, psychosocial, and lifestyle changes. Letter grading.

415. Organizational Analysis, (4) Seminar, four hours. Introduction to important questions and perspectives relevant to understanding organizational behavior and change in healthcare and public health environments. Active paradigms in organizational theory, particularly perspectives important for understanding delivery system reform. Focus on empirical research to clarify how important organizational constructs have been operationalized and to highlight methodology-related challenges of studying organizations in healthcare/public health. Letter grading.

M420. Children with Special Healthcare Needs: Systems Perspective, (4) (Same as Community Health Sciences M420 and Social Welfare M290L.) Lecture, three hours; fieldwork, one hour. Examination and evaluation of principles, policies, programs, and practices that have evolved to identify, assess, and meet special needs of infants, children, and adolescents with developmental disabilities or chronic illness and their families. Letter grading.

423. Advanced Evaluation Theory and Methods for Health Services, (4) Lecture, four hours. Designed for dispenser of practitioners. Familiarity with current theoretical concepts in evaluation to gain skills in integrating theory into program implementation and evaluation design. Development of student ability to apply various evaluation methodologies most appropriate to variety of settings both within and outside health care and public health, and consideration of advantages and disadvantages of potential design. Examination of shift in field of evaluation over past decade from principal focus on program efficacy (i.e., internal validity) to more balanced approach considering efficacy in content of feasibility, reach, cost, and sustainability (i.e., external validity) to more balanced approach considering efficacy in content of feasibility, reach, cost, and sustainability (i.e., external validity). Letter grading.

M428. Child and Family Health Program Community Leadership Seminar, (2) (Same as Community Health Sciences M428.) Seminar, two hours. Designed for graduate students. Examination of characteristics of community-based organizations (CBOs) and role leadership in decision-making process involved in major issues facing maternal and child health in Los Angeles County. Focus on specific leadership competencies and management skills needed to facilitate organizational change, and underscore community leadership concepts demonstrated by those CBOs. S/U or letter grading.

431. Organizational Behavior and Human Resources in Healthcare Organizations, (4) Lecture, four hours. Managerial skills and behaviors applied to components of organizations at several levels: individual, interpersonal, group, intergroup, and system. Core human resources skills required by managers. Unique features organizations face as stressed as applications are presented. Letter grading.

M434. Building Advocacy Skills: Reproductive Health Focus, (4) (Same as Community Health Sciences M430.) Seminar, three hours. Recommended prerequisite: one prior health policy course such as Community Health Sciences 230. Designed for School of Public Health graduate and doctoral students. Skills-building course to develop competency in assessing, developing, and implementing advocacy strategies for reproductive health initiatives. Introduction to legislative and community advocacy initiatives and to policymaking process, including policy analysis and development. Disciplines necessary for legislative advocacy. Identification of advocacy goals and objectives, development of advocacy plan, coalition building, organizational capacity building, media relations, and message development for various audiences. Students develop a range of former and current reproductive health advocacy campaigns. Letter grading.

435. Innovations and Current Trends in Ambulatory Care, (4) Lecture, three hours. Requisites: courses 200A, 200B. Examination of U.S. ambulatory care delivery system, with focus on more recent trends that are highlighted under Patient Protection and Affordable Care Act of 2010. Examination of relative delivery system infrastructure, challenges, financing and quality of care, role of healthcare reform in shaping future of ambulatory care, concepts of primary care/disease management, accountable care organizations, and accountable care organizations, measurement, implementation, and impact of these models. Letter grading.

438. Issues and Problems of Local Health Administration, (4) Lecture, three hours. Preparation: one health services course. Requisites: course 100, Epidemiology 100. Overview of issues currently faced by local health departments, including providing public health programs during fiscal constraint, quality improvement, interagency relationships and partnerships, and political and public interactions. Letter grading.

439. Data Software for Public Health Professionals, (4) Lecture, two hours; activity, one hour. Development of software skills around data analytics (e.g., Excel), including use of formulas and functions, formatting and manipulating datasets, developing visualizations including charts and tables, using lookup and data base functions, and implementing basic analytic models. Letter grading.

440A. Healthcare Information Systems and Technology, (4) Lecture, four hours. Preparation: completion of summer internship. Provides strong foundation in health information technology (HIT) for those working in healthcare with emphasis on development of knowledge and skill to plan, manage, and implement HIT systems in healthcare delivery organizations with clinical and business partners and evolving HIT spaces. Background and evolution of HIT; how it is planned, implemented, and managed; and how it can be productively used by healthcare delivery organizations to catalyze innovation and optimize outcomes and differentiate the care they provide. Letter grading.
health records (PHR), meaningful use, interoperability, and health information exchanges (HIE). Letter grading.

440B. Health Information Systems: Organization and Management. (4) Lecture, two hours; laboratory, three hours. Requisite: course 440A. Health and administrative research using clinical records. Principles of planning for routine and special studies. Individual investigation in methods of obtaining and processing data to meet needs of programs in institution and agency. Introduction to principles of medical auditing; analysis of medical and health services. S/U or letter grading.

441. Data Analytics: Identifying, Collecting, and Analyzing Data in Health Care. (4) Lecture, three hours. Requisite: course 439 or proof of waiver examination. Exploration of data sources and uses in health care, e.g., electronic medical records, social media, wireless biosensors, system and facility data. Review of hands-on techniques including data management, development of indexes and metrics, choosing and implementing analysis methods and visualizations. Discussion of role of data collection and processing within health care system. Letter grading.

446. Health-Care Operations Management. (4) Lecture, four hours. Health-care managers are charged with reducing costs and improving financial outcomes in their organizations while simultaneously improving patient service and satisfaction. Focus on operations improvement and how health-care organizations can get things done. Review of integrated, systematic approach and wide variety of operations improvement tools. Designed to further prepare students for entry into managerial positions in health-care organizations by making them aware of importance of operations techniques and strategies at all career levels, and providing them with sufficient knowledge of health-care operations so they can provide departmental input to organization’s leadership. S/U or letter grading.

M449A-M449B. Child Health, Programs, and Policies. (4-4) (Same as Community Health: Sciences M436A-M436B.) Lecture, four hours. Course M449A is requisite to M449B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations. Letter grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master’s degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 6) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward MPH and MS minimum total course requirement. May be repeated for credit. S/U or letter grading.

597. Preparation for Master’s Comprehensive or Doctoral Qualifying Examinations. (2 to 12) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master’s Thesis Research. (2 to 8) Tutorial, to be arranged. Only 4 units may be applied toward MPH and MS minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research. (2 to 12) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Faculty Roster

Professors
Andrew Apter, PhD
Sebouh D. Aslanian, PhD (Richard Hovannisian Professor of Modern Armenian History)
Eric R. Avila, PhD (Waldo W. Neikirk Term Professor)
Peter Baldwin, PhD
Stephen A. Bell, PhD
Joel T. Braslow, MD, PhD, in Residence
Fotis M. Higbie, PhD
Robin D.G. Kelley, PhD (Gary B. Nash Endowed Professor of U.S. History)
Vinay Lal, PhD
Kely A. Lytle Hernández, PhD (Thomas E. Likka Professor of History)
Valerie J. Matsumoto, PhD (George and Sakaye Aratani Professor of Japanese American Incarceration, Redress, and Community)
Michael Meranze, PhD
David N. Myers, PhD (Sady and Ludwig Kahn Professor of Jewish History)
Anthony R. Pagden, PhD
H. Glenn Penny, PhD (Henry J. Bruman Professor of German History)
Carla Gardina Pestana, PhD (Joyce Oldham Appleby Endowed Professor of America in the World)
David D. Phillips, PhD
Theodore M. Porter, PhD
Sanjay Subrahmanyan, PhD (Irv and Jean Stone Professor)
William R. Summerhill, PhD
Kevin B. Terraciano, PhD
Stefania Tutino, PhD (Peter Reill Professor of European History, 1450 to Modern)
Richard von Glahn, PhD
R. Bin Wong, PhD
Gregory D. Wolff, PhD (Ronald J. Melior Professor of Ancient History)
David K. Yoo, PhD

Professors Emeriti
Edward A. Alpers, PhD
Francis R. Anderson, BA
Stephen A. Aron, PhD (Robert N. Burr Endowed History Department Professor Emeritus)
Ivan T. Berend, PhD
Kathryn Bernhardt, PhD
Ruth H. Bloch, PhD
Robert P. Brenner, PhD
Giorgio Buccellati, PhD
Claus-Peter Clasen, PhD
Robert Dallek, PhD
Ellen C. DuBois, PhD
John B. Duncan, PhD
Christopher Ehret, PhD
Benjamin A. Elman, PhD
Robert G. Frank, Jr., PhD
Stephen R. Frank, PhD
Saul P. Friedländer, PhD (1939 Club Professor Emeritus)
Frank O. Gellatly, PhD
Patrick Geary, PhD
J. Arch Getty, PhD
Carlo Ginzburg, Laurea in lettere (Franklin D. Murphy Professor Emeritus of Italian Renaissance Studies)
Robert A. Hill, MSc
Thomas S. Hines, PhD
Richard G. Hovannisian, PhD (Armenian Educational Foundation Professor Emeritus of Modern Armenian History)
Daniel W. Howe, PhD
Philip C. Huang, PhD
Lynn A. Hunt, PhD (Eugen Weber Professor Emerita of Modern European History)
Margaret C. Jacob, PhD
Russell Jacoby, PhD
Nikki Keddie, PhD
Naomi R. Lamoreaux, PhD
John H. Laslett, DPhil
Peter J. Loewenberg, PhD
Afaq Masrot, DPhil
Lauro R. Martines, PhD
Ronald J. Melior, PhD

Michael A. Morony, PhD
Fred G. Noteleifer, PhD
Patricia O’Brien, PhD
Herman Ooms, PhD
Merrick Posnansky, PhD
Geoffrey Robinson, PhD
Teófilo F. Ruiz, PhD (Robert and Dorothy Wellman Professor Emeritus of Medieval History)
David Sabeau, PhD (Henry J. Bruman Professor Emeritus of German History)
Michael Salman, PhD
Overview

History is the study of the past of our own society and how it emerged out of the traditions that produced it. At the same time, self-knowledge for students of history comes not only from self-discovery, but from a comparison of their own tradition and experience with those of others. It is only by studying the history of other civilizations and cultures that we can hope to gain perspective on our own.

The course offerings in the Department of History are designed to bring about an understanding of the forces that have shaped the many cultures of this country and the world. UCLA has one of the largest, most distinguished, and most diverse history faculties in the country. Its main emphasis is on the many aspects of social history, but intellectual, cultural, and political history are also strongly represented.

Career Prospects

The undergraduate History major is flexible and far-reaching. Leading to a Bachelor of Arts (BA) degree, it is excellent preparation for a wide variety of careers—law, teaching, business, the communications media, public services, and medicine.

The graduate program leads to the Doctor of Philosophy (PhD) degree in History (a master’s degree may be earned in the process of completing PhD requirements). Traditionally, the Master of Arts (MA) and PhD in History have led to careers in high school, college, and university teaching. Increasingly, they are also being put to use in government service, international business, museum and archival work, and journalism.

Undergraduate Policies

Advanced Placement Credit in History

For entering first years, no course credit is granted for any AP examination.

Undergraduate Major

History BA

Capstone Major

The History major is a designated capstone major. Undergraduate students take a capstone seminar in which they demonstrate mastery of a specialized area of history and a critical understanding of current scholarly concerns, literature, and debate, then design and complete a research project using those primary sources and literature.

Learning Outcomes

The History major has the following learning outcomes:
- Demonstrated appropriate mastery of a specialized area of history
- Demonstrated critical understanding of current scholarly concerns, literature, and debates
- Identification and analysis of primary sources
- Design and execution of a research project, drawing on primary sources and appropriate scholarly literature
- Demonstrated ability to organize and present a brief oral presentation about research

Entry to the Major

Pre-major

While students are completing the lower-division preparation for the major courses, they may be classified as History pre-majors. After completing the six courses with a minimum grade-point average of 2.0, students should petition to enter the major in one of the undergraduate counseling offices, 6284 or 6290 Bunche Hall.

Transfer Students

Transfer applicants to the History major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one semester or two quarters of history of Western civilization or world history, one historical practice course, and three additional lower-division history courses.

Transfer credit for the pre-major courses is subject to department approval. Transfer students should consult with the undergraduate counselors before enrolling in any courses for the major.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Six lower-division history courses as follows: two history survey courses selected from History 1A, 1B, 1C, 2B, 2C, 3A, 3B, 3C, 3D, M4, 5, 8A, 8B, 8C, 9A, 9C, 9D, 9E, M10A, 10B, 11A, 11B, 12A, 12B, 12C, 13A, 13B, 13C, 14, 20, 21, or 22; one course selected from History 94, 96W, or 97A through 97O; three additional lower-division history courses (except History 19, 99, 89HC, 99).

The Major

Required: At least 10 upper-division history courses, including (1) two courses in U.S. history, (2) two courses in non-Western history from the same area (i.e., Latin America, Asia, Near East, Africa), (3) two courses in European history or in history of science, (4) one course from 187A through C187R, and (5) one capstone seminar from the History 191 series.

The requirements for U.S., non-Western, and European history may be fulfilled with either upper- or lower-division courses, but majors are required to take a minimum of 10 upper-division history courses.

Honors Program

The honors thesis must be completed in three terms, on the basis of work carried out in History 198A, 198B, and 198C.
Policies

Preparation for the Major
Each course must be taken for a letter grade.

The Major
Each course must be taken for a letter grade.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

Honors Program
The honors program is designed for History majors who are interested in completing a year-long research project that culminates in an honors thesis. A 3.5 departmental grade-point average is required for admission. To graduate with departmental honors, students must have a cumulative or overall GPA of at least 3.0 in all University-level coursework and at least a 3.5 GPA in all coursework required for the major.

The honors thesis must be completed in three terms, on the basis of work carried out in History 198A, 198B, and 198C. Students must register their intention to undertake an honors thesis with the undergraduate affairs vice chair no later than spring quarter of their junior year.

When students register for honors, they must provide the undergraduate affairs vice chair with a two-paragraph description of their thesis project, which must be approved in writing by the faculty member who agrees to act as their adviser. The undergraduate affairs vice chair must also approve the proposed project in writing.

The faculty adviser is primarily responsible for guiding the thesis work to its completion and assigns grades for the honors courses after the thesis is complete. The honors thesis should be 40 to 60 pages in length and be based on primary source material. Determination of the level of honors awarded (no honors, honors, or highest honors) is made by the undergraduate affairs vice chair, acting in conjunction with the honors committee, at the end of the term in which the thesis is completed.

Undergraduate Minors

History Minor
The History minor introduces students to historical processes and institutions.

Admission
To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Undergraduate office, 6284 Bunche Hall.

The Minor
Required Lower-Division Courses (10 units):
Any two lower-division history courses.

Required Upper-Division Courses (20 units):
Any five upper-division history courses.

History of Science, Technology, and Medicine Minor
The History of Science, Technology, and Medicine minor takes as its subject matter the ideas, practices, and people concerned with the knowledge of the natural and social world. Using the tools of historical analysis, it explores the development, significance, and impact of science, technology, and medicine around the world. The goal of the minor is to give undergraduates majoring in fields other than history the opportunity to pursue a rigorous program in the historical dimensions of science, technology, and medicine, and their place in society. Students will learn to think critically and write analytically about these subjects.

Admission
To enter the minor, students must be in good academic standing (2.0 grade-point average), have completed 45 units and at least one lower-division course in the history of science or medicine for a letter grade, and file a petition with an adviser in the History Department undergraduate counseling offices, 6284 or 6290 Bunche Hall.

The Minor
Students must take seven classes to satisfy the requirements for the minor. The lower-division requirement is designed to give the student a broad understanding (in time and space) of the historical development of science, technology, and medicine. The upper-division requirement allows students to choose from an array of more focused classes.

Required Lower-Division Courses (10 units):
Two courses from History 2B, 3A through 3D.

Required Upper-Division Courses (20 units):
Five courses on topics in history of science, technology, and medicine: History 179A, 179B, 179C, 180A, M180B, 180C, 187I, 191I.

Students are required to write at least one research paper on a topic in history of science, technology, or medicine. To this end, they must take at least one of the following: History 191I (capstone research seminar); History 199 (individual independent study approved by department adviser); or an honors collegium seminar with a required research paper.

Policies

History 191  and 199  may  be  applied only  once toward  the minor.

Honors collegium courses with significant history of science, technology, and medicine content may be applied toward the upper-division course requirement for the minor.

One upper-division course outside the department may be counted toward the minor, with approval of the history of science field coordinator. The course must address social, historical, and philosophical aspects of science, technology, and medicine.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must maintain an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Major

History MA, CPhil, PhD

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

History

Lower-Division Courses
1A. Introduction to Western Civilization: Ancient Civilizations, Prehistory to circa AD 843. (5) Lecture, three hours; discussion, one hour. Survey of diverse cultures that shaped foundation of Western civilization to onset of 9th century AD. Investigation of first civilizations in Near East and Egypt. Analysis of worlds of Greeks and Romans. Examination of ways in which western European societies created new syntheses through selective appropriation of Greek and Roman cultures and introduction of new cultural forms. P/NP or letter grading.

1AH. Introduction to Western Civilization: Ancient Civilizations, Prehistory to circa AD 843 (Honors). (5) Lecture, three hours; discussion, two hours. Honors sequence parallel to course 1A. P/NP or letter grading.

1B. Introduction to Western Civilization: Circa 843 to circa 1715. (5) Lecture, three hours; discussion, one hour. Introduction to history of the West and its connections to rest of world from 843 to 1715. Profound social, political, cultural, and intellectual changes that affected development of modern world. 132. Topics in European History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Integrated introduction to important aspects of European history, with emphasis on specific topic within broad framework. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

M133A-M133B. History of Women in Europe. (4-4) (Same as Gender Studies M133C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of social, political, and cultural roles of women in Western Europe from early Middle Ages to present. P/NP or letter grading. M133A, 800 to 1715; M133B, 1715 to present.

M133C. History of Prostitution. (4) (Same as Gender Studies M133C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of prostitution from ancient times to present. Topics include tolerance in medieval Europe, impact of syphilis, birth of courtesan, regulation in 19th-century Europe, changing scopophilia, and contemporary global sex trade. Readings include novels, primary sources, and testimony by sex workers. P/NP or letter grading.

134B-134C. Economic History of Europe. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. 134B, 1780 to 1914. Analysis of emergence of European world economy, first Industrial Revolution, revolutionary changes in technology, demographic patterns, education, transportation, and interrelationship between Western core and European peripheries, industrialization, 1940-20th Century. Changing European economy after World War I and II and in 1990s; impact of fourth and fifth Industrial Revolutions; Great Depression of centruy during 1930s; and changing nationalization strategies; import-substituting industrialization in peripheries; Soviet modernization dictatorship in East Central Europe and its collapse; integration processes in second half of century and rise of European Union; modernization model at end of century. P/NP or letter grading.

135A. Europe and World: Exploration and Conquest, 1400 to 1700. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. First phase of European expansion in Americas, Af-rica, and Eurasia. Analysis of motives and methods of expansion, differing patterns of European settlement, including plantation economy, and development of new commercial networks, including Atlantic slave trade. P/NP or letter grading.

135B. Europe and World: Colonialism, Slavery, and Revolution, 1700 to 1870. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Origins and gradual increase of Euro-pean dominance of world trade, impact of European colonialism, slavery, and revolution on social, economic, and political structures of both stability and change in 19th century. New revolutionary ideas that took shape in wake of Enlightenment of 18th century, and beginnings of indus-trialization. P/NP or letter grading.

136A-136B-136C. History of Britain. (4-4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Analysis of British society, economy, and polity, with focus on dynamics of both stability and change under industrializing, P/NP or letter grading.

137A-137B. British Empire since 1783. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of outstanding contributions to development of British Empire, including evolution of colonial nationalism, development of commonwealth idea, and changes in British colonial policy. P/NP or letter grading.

138A. Colonial America, 1600 to 1763. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of molding of European ideas, goods, wealth, and politics, as well as compar-ison of their expression in British Empire, including evolution of colonial nationalism, development of commonwealth idea, and changes in British colonial policy. P/NP or letter grading.

139A. Colonial America, 1763 to 1870. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Development of British Empire, including evolution of colonial nationalism, development of commonwealth idea, and changes in British colonial policy. P/NP or letter grading.

140A. U.S., Civil War and Reconstruction. (4) Lecture, three hours; discussion, one hour (scheduled). Designed for juniors/seniors. Survey of American cultural history since 1865, with emphasis on historical development of urban, consumer-oriented American mass culture that enveloped diverse groups of Americans as producers and consumers. Historical development of American popular culture according to changing set of political, economic, and social circumstances. Evolu-tion of national and global framework for mass circula-tion of popular cultural production as arrival of new technologies that enabled that development. P/NP or letter grading.

140B. U.S., 1875 to 1900. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of American political, social, and institutional conditions that have been important in this country, with emphasis on relating developments in religion and culture to other aspects of American culture. P/NP or letter grading.

140C. U.S., 1900 to 1929. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. American political, social, and institutional history in period of great change. Emphasis on altering concepts of role of government and responses to that alteration. P/NP or letter grading.

141A-141B. American Economic History. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Problems of interpretation of history. Emphasis on historical development of urban, consumer-oriented American mass culture that enveloped diverse groups of Americans as producers and consumers. Historical development of American popular culture according to changing set of political, economic, and social circumstances. Evolu-tion of national and global framework for mass circula-tion of popular cultural production as arrival of new technologies that enabled that development. P/NP or letter grading.

142A-142B. Intellectual History of U.S. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Principal ideas and events in the history of the United States, from its origins to the present. P/NP or letter grading.

142C. History of Religion in U.S. (4) (Same as Religion M142C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of the central religious ideas that have been part of American history. Sources of these ideas, their connections with one another, their relationship to American life, and their expression in major documents of American thought. P/NP or letter grading.

143A. Origins and Development of Constitution- alism in U.S. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. American political, social, and institutional history in period of great change. Emphasis on altering concepts of role of government and responses to that alteration. P/NP or letter grading.

144. America in World. (4) Lecture, three hours; discussion, one hour (scheduled). Designed for juniors/seniors. American political, social, and institutional history in period of great change. Emphasis on altering concepts of role of government and responses to that alteration. P/NP or letter grading.
nialism, Philippine nationalism, history of Filipino Americans, and Philippine diaspora in 20th century. P/NP or letter grading.

146A. American Working Class Movements. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Major episodes in the history of labor movements in U.S. labor history from the early 19th century to the present. Problems include the relationship of the labor movement to broader social and economic trends, the role of industrial unionism and trade unionism, and the relationship of labor movements to social change and political change.

146C. Migrant Nation: How Mobility Shapes American and Comparative Immigration from 1750 to Present. Special focus on Southern California. P/NP or letter grading. 147. American Women. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of women's roles in American history from the colonial period to the present.

148. Introduction to Public/Applied History. (4) Lecture, four hours. Introduction to the practice of writing of history. Focus on the development of the field of public history and applied history, including the role of historians in documenting and interpreting the past, the role of historians in public policy formulation, and the role of historians in the preservation and interpretation of cultural and historical resources.

150A. Comparative Slavery Systems. (4) Same as African American Studies M158A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of slavery systems in various New World slave societies, with emphasis on outlining similarities and differences among legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies. P/NP or letter grading.

150B-M150C. Introduction to Afro-American History. (4–4) Same as African American Studies M158B-M158C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of African-American experience, with emphasis on three general transitions of African-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieus. P/NP or letter grading.

150D. Recent African American Urban History: Funk Music and Politics of Black Popular Culture. (4) Same as African American Studies M150D.) Lecture, three hours; discussion, one hour (when scheduled). Study of African-American music from the 1940s to the present, with emphasis on the development of the funk genre and its role in the civil rights movement and the rise of black power politics.

151B, 151C. History of Chicano/a and Central American Studies. (4) Same as Chicana/o and Central American Studies M159B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey course on historical development of Mexican (Chicano) community and people of Mexican descent in U.S. through 20th century, with special focus on labor and politics. Survey also includes material on contemporary Chicano/a community and political involvement in U.S.

152. Asians in American History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of the history of Asian Americans in the United States, focusing on the role of immigration, labor, and politics in shaping the development of Asian American communities.

153. American West. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Seminar on the history of the American West, focusing on the development of the region from the 19th century to the present.

154. History of California. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of the political and social development of California from earliest times to present. P/NP or letter grading.

155. History of Los Angeles. (4) Same as Chicana/o and Central American Studies M155.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Social, economic, cultural, and political development of Los Angeles and its environs. Focus on the role of Los Angeles in the development of diverse peoples of the area, changing physical environment, various interpretations of the city, and Los Angeles' place among American urban centers. P/JP or letter grading.
156. Topics in U.S. History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designated for juniors/seniors. Examination of specific historical themes and/or major issues in U.S. history. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

157A. Early Latin America. (4) Lecture, three hours; discussion, one hour (when scheduled). Designated for juniors/seniors. Survey of social and cultural history of Latin American nations from their independence to around 1910. Emphasis on internal view of Indian groups and patterns on basis of records produced by Indians themselves. P/NP or letter grading.

159. Latin America in 19th Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designated for juniors/seniors. Intensive analysis of economic, social, and political problems of Latin American nations from their independence to around 1910. P/NP or letter grading.

160A. Latin American Elitelore. (4) Lecture, three hours; discussion, one hour (when scheduled). Designated for juniors/seniors. Elitelore (defined as oral or noninstitutionalized knowledge involving leaders' conceptual and personal views) in contrast to folklore (followers' traditional or popular views). Elitelore genres include oral history, literature, and cinema. P/NP or letter grading.

160B. Mexican Revolution since 1910. (4) Lecture, three hours; discussion, one hour (when scheduled). Designated for juniors/seniors. Examination of permanent crisis to describe and explain structure of permanent revolution under one-party democracy. Analysis of 19th and 20th-century problems and crises that have influenced modern-day Mexico, if in modified form. P/NP or letter grading.

161. Topics in Latin America History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designated for juniors/seniors. Examination of major issues in history of Latin America. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

164D. Topics in African History: Africa and Diaspora in Global and Comparative Perspective. (4) Lecture, three hours; discussion, one hour (when scheduled). Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Forced migration of Africans through overseas slave trade was formative event of modern world. Exploration of that experience and its lasting consequences by placing it in its global context, among the Africans, European, Islamic, and Asian. P/NP or letter grading.

164E. Topics in African History: Africa, 1945 to Present. (4) Lecture, three hours; discussion, one hour (when scheduled). Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. History of Africa south of Sahara from end of World War II to present. Last phases of colonial rule in Africa, African modern history: political, economic, social, and cultural development of African states and influence of Europe; and achievement of independence. Political, social, and economic change in colonies and in independent states of Africa. Neocolonialism, exploitation in national development, and in South Africa, ideological conflict in contemporary Africa, and Africa in world affairs since 1957. P/NP or letter grading.

165. Topics in African History. (4) Lecture, three hours; discussion, one hour (when scheduled). Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. elite (defined as oral or noninstitutionalized knowledge involving leaders' conceptual and personal views) in contrast to folklore (followers' traditional or popular views). Elitelore genres include oral history, literature, and cinema. P/NP or letter grading.

166A-166B. History of West Africa. (4–4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

167B. History of East Africa. (4) Lecture, three hours; discussion, one hour (when scheduled). Designated for juniors/seniors. Survey of cultural diversity of East Africa from earliest times to present. Emphasis on cultural and historical creation of categories, practices, and achievement of independence. P/NP or letter grading.

167C. History of Central Africa. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of history of central Africa from earliest times, with emphasis on establishment of agri- culture, economic development, and political regimes. P/NP or letter grading.

169A-169B. Thought and Society in China. (4–4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. 169A. To 1000. Recommended preparation: course 11A. Elite and popular expressions of Chinese cultural life examined in readings and lectures. Focus on diversities of thought in classical Chinese thought and emergence of a distinctive Chinese tradition in social and political, and economic conditions.

169B. Since 1000. Recommended preparation: course 11B. Elite and popular expressions of Chinese cultural life from 1000 to 20th century. Emphasis on social, political, and economic conditions within which Chinese society and culture have been shaped and changed. Evaluation of iconoclasm of Chinese intellectual life in 20th century in light of earlier currents of thought.

170. Culture and Power in Late Imperial China. (4) Lecture, three hours; discussion, one hour (when scheduled). Recommended preparation: courses 11A, 11B. Designed for juniors/seniors. Analysis of relations of power and cultural expressions of dominance and resistance in late imperial China (1000 to 1700), with emphasis on interplay of economic forces, ideas, and social and political institutions. Examination of institu- tions of rule, family, kinship; institutions of folk culture, death, family, and social identity, love, sexuality, and private life. P/NP or letter grading.

170B. Selected Topics in Chinese History from 1500. (4) Lecture, three hours; discussion, one hour (when scheduled). Recommended requisite: course 11B. Designed for juniors/seniors. Selected topics that may vary from year to year. May include law and legal institutions; imperial courts and culture; society; and rural China. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

170C. History of Women in China, AD 1000 to Present. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Topics include women and family; women in Confucian ideology, women in literati culture, feminist movement, and women and communist revolution. P/NP or letter grading.

170D. 20th-Century China. (4) Lecture, three hours; discussion, one hour (when scheduled). Recommended preparation: course 11B. Designed for juniors/seniors. Political and social events and their effects on Chinese history, economic, and cultural development of China from 1900 to the present day. P/NP or letter grading.

170E. Economic History of China. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of development of Chinese economy and social, technological, intellec- tual, and political dynamics that produced distinctive patterns in evolution of China's economy from antiquity to present day. P/NP or letter grading.

171. Variable Topics in Japanese History. (4) Lecture, three hours; discussion, one hour (when scheduled). Recommended preparation: course 11B. Important topics in Japanese history, including political change, economic development, social issues, and popular culture, as well as current trends and art forms and extensive reading materials. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

172A. Japan—Ancient and Medieval History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Political, economic, and cultural development of Japan from prehistory to 1600. P/NP or letter grading.

172B. Japanese History: Early Modern, 1600 to 1868. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Political, economic, and cultural development of Japan from 1600 to 1868. P/NP or letter grading.

172C. Modern Japanese History, 1850 to 1945. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Investigation of meaning of modern “Japan” for newly national (and imperial) Japan, and its impact on genealogies and political radical upheavals in daily experience, both in Japan and in Asia. Exploration of meaning of “modern” and fraught interplay of imperial and anti-imperial ambitions in domestic and foreign politics. World War II experience and radical and conservative effects of Allied Occupa- tion. Foregrounding of professional practice of history and historical creation of categories, practices, and perspectives that have become second nature (i.e., linear time, nation, and modern social norms).
also include gender, sexuality, aesthetics, fascism, eugenics and race, hygiene, bloodsucking, monsters, anarchism, time, colonialism, feminism, art, censorship, politics, and satire. A comic book can be seen as reflecting on and questioning place of women as embodiment of Indian culture; diasporic identities. P/NP or letter grading.

17A. Japanese Popular Culture. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of interplay of factors that, especially in terms of race and gender, between colonized and colonizers and to questions of resistance and nationalism. P/NP or letter grading.

174D. Indo-Islamic Interactions, 750 to 1940. (Same as Religion M174D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical introduction to Muslim communities of what eventually became nations of India, Pakistan, and Bangladesh. Topics include political, legal, religious, and cultural history. P/NP or letter grading.

174E. Indo-Islamic Interactions, 1750 to 1940. (Same as Religion M174E.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of interplay of factors that, from Christian missionaries to Islamic madrasa schools and colonial rebellions, gave shape to multifaceted Muslim nation-state in context of colonial modernity. P/NP or letter grading.

174F. Gandhi and Making of Modern India. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of life and ideas of Mohandas (Mohandas K. Gandhi) and their impact on the modern India. P/NP or letter grading.

175A. Cultural and Political History of Contemporary South Asia. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Problem of modernity; partition of India and emergence of Pakistan; political, social, ecological, and women's movements; struggle for rights and contracts of identity among Muslims, Hindus, and Sikhs; terrorism in Sri Lanka and Punjab; public culture, popular cinema, and street life. P/NP or letter grading.

175B. History of Southeast Asia since 1815. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Revolution in Southeast Asia from 1815 to 1945, including the evolution of modern nation-states. P/NP or letter grading.

175C. Special Topics in Contemporary Indian History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Topic may include identity and status, religious tolerance versus political and religious repression. May be repeated for maximum of 12 units with topic/instructor change. P/NP or letter grading.

176A. History of Southeast Asia to 1815. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Political and cultural history of peoples of Southeast Asia from earliest times to about 1815. P/NP or letter grading.

176B. History of Southeast Asia: Southeast Asia since 1815. (Same as Religion M176B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of modern Southeast Asia, with emphasis on exploration of evolution of national state, and economic, political, social, and cultural transformations. P/NP or letter grading.

176C. Philippine History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Social, cultural, and political history of Philippine societies from Spanish conquest through independence. Emphasis on questions of identity under colonialism, understanding Revolutions of 1898 and 1898, and political and Philippine nationalist discourse. Readings include introduction to major issues in Philippine historiography and literature. P/NP or letter grading.

176E. Vietnam Past and Present. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of history and culture of Vietnam from about 700 BC to present, including political, social, and economic developments, as well as international relations in post-1954 period. P/NP or letter grading.

177A. National Histories of Southeast Asia. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Variable topics with focus on history of one or more of Southeast Asia's nation-states: Indonesia, East Timor, Thailand, Cambodia, Burma, Laos, Malaysia, Singapore, Brunei, Philippines, Vietnam. P/NP or letter grading.

177B. Comparative Histories of Southeast Asia. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Variable topics with focus on history of Southeast Asia from thematic or comparative perspective. Topics may include history of human rights in Southeast Asia, gender and sexuality in island Southeast Asia, and economic history of Southeast Asia. P/NP or letter grading.

177C. Introduction to History and Culture of Iranian Jews. (4) (Same as Jewish Studies M177C.) Lecture, three hours. Introduction to political, intellectual, and cultural history of Iranian Jews. Exploration of history of Iranian Jews from ancient period throughout history, with focus on post-Middle Ages to present time. Topics, studied from perspective of Iranian cultural history, include identity and status, religious tolerance versus forced conversion, Iranian Jewish emancipation, and dynamic symbiosis between Iranian Jews and other Iranians. P/NP or letter grading.

178A. Variable Topics in History of Medicine. (4) Lecture, three hours. Designed for juniors/seniors. Topics may include global health, biomedical technologies, and medicine andindsay, chinese medicine, psychology, mental illness, modern medicine, epidemiology and infectious disease. May be repeated for maximum of 16 units with topic/instructor change. P/NP or letter grading.

M176. Historical Perspectives on Gender and Science. (4) (Same as Gender Studies M176B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical perspectives on gender and science. Topics may include gendered conceptions of nature, persona of man of science, role of women in scientific development, science and technology, and science and society. P/NP or letter grading.

180A. Topics in History of Science. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Topics may include science and colonialism, science and religion, environmental history, science in Enlightenment, development of theory of evolution, science and public policy, and public engagement in science. P/NP or letter grading.

M181. Topics in Jewish History. (4) (Same as Jewish Studies M181.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of major issues in Jewish history. May be repeated for maximum of 48 units with topic/instructor change. P/NP or letter grading.
M181SL. Jewish Thought, Politics, and Ethics: From Theory to Practice. (4) (Same as Jewish Studies M181SL.) Lecture, three hours; fieldwork, two hours. Designated History of Los Angeles with special emphasis on pivotal roles Jews have played in shaping Los Angeles and role that Los Angeles has played in reshaping of Jewish identities, communities, and cultures. Exploration of themes related to contemporary historical texts. Opportunity to contribute to body of historical work related to Los Angeles Jewish history through required service work with community partners and development of digital public history projects. P/NP or letter grading.

M182A. Ancient Jewish History. (4) (Same as Jewish Studies M182A and Religion M182A.) Lecture, three hours; discussion, one hour (when scheduled). Designated for juniors/seniors. Survey of social, political, and religious developments. P/NP or letter grading.

M182B. Medieval Jewish History. (4) (Same as Jewish Studies M182B and Religion M182B.) Lecture, three hours; discussion, one hour (when scheduled). Designated for juniors/senior. Exploration of unfolding of Jewish Christianity to evolution of Jews from Spain in 1492. P/NP or letter grading.

M182C. Modern Jewish History. (4) (Same as Jewish Studies M182C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of early modern Jewish history beginning with enormous repercussion of Jews from Spain in 1492, followed by transformations in Jewish society and identity over five centuries in Europe and Middle East, and concluding with nationalism. P/NP or letter grading.

M183A-183B. Third Reich and Jews. (4–4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

M184A. Jewish Civilization: Encounter with Great World Cultures. (4) (Same as Jewish Studies M184A and Religion M184A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of origins and historical development of anti-Semitism. P/NP or letter grading.

M184B. History of Anti-Semitism. (4) (Same as Jewish Studies M184B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exploration of history of Judaism in Mediterranean world of 1st century CE as context of developing Christian movement. Topics include Pharisees, Qumran, Philo, Stoics, Epicureans, traditional Greek and Roman religions, mysteries, astrology, magic, gnosticism, and emperor-worship. P/NP or letter grading.

M185A. Jesus of Nazareth in Historical Research. (4) (Same as Religion M186A.) Lecture, three hours; discussion, one hour (when scheduled). Recommended preparation: course M185F. Designed for juniors/seniors. Exploration of history of Jesus of Nazareth in his social, economic, political, and religious contexts. P/NP or letter grading.

M185B. Religions of South and Southeast Asia. (4) Lecture, three hours; discussion, one hour (when scheduled). Topics vary from year to year and include Buddhism in India; religions of Java and Bali; non-territorial traditions of India and Southeast Asia; Consideration of wide range of cases and specific topics. May be taken independently for credit. P/NP or letter grading.

M185D. Religions of Ancient Near East. (4) (Same as Ancient Near East M185D and Religion M185D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/senior. Topics vary from year to year and include Judaism in the Near East, with reference to religion of ancient Israel: varying concepts of divinity, hierarchies of gods, prayer and cult, magic, wisdom, and moral conduct. P/NP or letter grading.

M185E. Special Topics in History of Religions. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/senior. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

M185F. History of Early Christians. (4) (Same as Religion M186A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/senior. Christian movement from its origins to circa 160 CE, stressing its continuity/discontinuity with Judaism, and various responses to Jesus of Nazareth, written production during the period, movement’s encounter with its religious, social, and political world, and methods of research. P/NP or letter grading.

M185G. Religious Environment of Early Christians. (4) (Same as Religion M186B.) Lecture, three hours; discussion, one hour (when scheduled). Rich variety of religious and thought in Mediterranean world of 1st century CE as context of developing Christian movement. Topics include Platonists, Philo, Stoa, Epicureans, traditional Greek and Roman religions, mysteries, astrology, magic, gnosticism, and emperor-worship. P/NP or letter grading.

M186A. Women and Gender, Prehistory to 1792. (4) (Same as Gender Studies M186A.) Lecture, three hours; discussion, one hour (when scheduled). Recommended preparation: course M185F. Designed for juniors/senior. Exploration of history of women, gender, and sexuality from prehistory to 1792. First half deals with period before written history and asks when did gender appear? How and why did patriarchy develop? Designed for women’s bodies, appearance of gender, women’s contribution to Neolithic revolution, significance of Goddess art, facts, creation myths, and women and sexuality in different religions, especially in Native American, Hindu, and European conquest on Mesoamerican women, women’s power in monarchies, gender dimensions of Atlantic slavery, and first manifestations of feminist consciousness in second half. Offered by women when examined or read throughout. P/NP or letter grading.

M186B. Global Feminism, 1850 to Present. (4) (Same as Gender Studies M186B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/senior. Development of women’s rights (educational, political, economic, sexual, and reproductive) around world and over and one half centuries. P/NP or letter grading.

M187A-187M. Variable Topics Historiography Seminars. (4 each) Seminar, three hours. Seminars on historiography involving close reading and critical discussion of secondary scholarship and primary sources. Topic currently scheduled with course C200P; C167N, India. May be concurrently scheduled with course C200K; C187O, World. May be concurrently scheduled with course C200F; C167P. Theory of History. May be concurrently scheduled with course C200Q; C167R, Japan. May be concurrently scheduled with course C200M.

188A. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced co-requisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preperation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188B. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced co-requisite: course 188A. Designed for seniors. Exploration of history of Judaism in Mediterranean world of 1st century CE as context of developing Christian movement. Topics include Platonists, Philo, Stoa, Epicureans, traditional Greek and Roman religions, mysteries, astrology, magic, gnosticism, and emperor-worship. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

190A-190R. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

191A-191Q. Capstone Seminars: History. (4) Lecture, three hours. Designed for seniors. Limited to 15 students meeting with faculty member. Organized on topics basis with reading, discussion, and development of culminating project. May be repeated once for credit. P/NP or letter grading.

191A. Ancient History. (4) (Same as History M181M; Science/Tech- nology; 191M. Southeast Asia; 191Q. Digital History. History / 543
197. Individual Studies in History. (4) Tutorial, three hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Associated reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

198A. Honors Research in History. (4, tutorial), to be arranged. Requisite: course 198B. Limited to juniors/senior. Development of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for maximum of 16 units. Individual contract required. Letter grading.

198B. Honors Research in History. (4), tutorial, to be arranged. Requisite: course 198A. Limited to juniors/seniors. Continued development of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for maximum of 16 units. Individual contract required. In Progress grading (credit to be given only on completion of course 198C).

198C. Honors Research in History. (4), tutorial, to be arranged. Requisite: course 198B. Limited to juniors/senior. Completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for maximum of 16 units. Individual contract required. Letter grading.

199. Directed Research in History. (4) Tutorial, three hours. Limited to juniors/seniors. Supervised individual research or analysis under guidance of faculty member. Culuminating paper or project required. May be repeated for credit; History majors limited to 8 units. Individual contract required. P/NP or letter grading.

Graduate Courses

200A-200U. Advanced Historiography. (4 each) Seminar, three hours. May be repeated for credit.
200A. Ancient Greece; 200B. Ancient Rome; 200C. Medieval; 200D. Europe; 200H. U.S.; 200J. Latin America; 200K. Near East; 200L. China; 200N. Africa; 200Q. Science/technology; 200R. Theory of History; 200T. Jewish History; 200S. Armenia and Caucasus; 200U. Psychohistory; 200F-200G. Topics in Historiography. (4 each) Seminar, three hours. Designed for graduate students. Prosemnaries on historiography involving close reading and critical discussion of secondary scholarship and primary sources on selected topics. Reading, discussion, and analytical writing are required in one or several historiographical essays. May be repeated for credit. S/U or letter grading.

200H. Indian History; 200I. China; 200M. Ancient Egypt; 200O. Ancient Greece; 200P. Ancient Rome; 200Q. Science/Technology; 200R. Theory of History; 200T. Jewish History; 200S. Armenia and Caucasus; 200U. Psychohistory; 200F-200G. Topics in Historiography. (4 each) Seminar, three hours. Designed for graduate students. Prosemnaries on historiography involving close reading and critical discussion of secondary scholarship and primary sources on selected topics. Reading, discussion, and analytical writing are required in one or several historiographical essays. May be repeated for credit. S/U or letter grading.

200A. Ancient Greece; 200B. Ancient Rome; 200C. Medieval; 200D. Europe; 200H. U.S.; 200J. Latin America; 200K. Near East; 200L. China; 200N. Africa; 200Q. Science/technology; 200R. Theory of History; 200T. Jewish History; 200S. Armenia and Caucasus; 200U. Psychohistory; 200F-200G. Topics in Historiography. (4 each) Seminar, three hours. Designed for graduate students. Prosemnaries on historiography involving close reading and critical discussion of secondary scholarship and primary sources on selected topics. Reading, discussion, and analytical writing are required in one or several historiographical essays. May be repeated for credit. S/U or letter grading.

200H. Indian History; 200I. China; 200M. Ancient Egypt; 200O. Ancient Greece; 200P. Ancient Rome; 200Q. Science/Technology; 200R. Theory of History; 200T. Jewish History; 200S. Armenia and Caucasus; 200U. Psychohistory; 200F-200G. Topics in Historiography. (4 each) Seminar, three hours. Designed for graduate students. Prosemnaries on historiography involving close reading and critical discussion of secondary scholarship and primary sources on selected topics. Reading, discussion, and analytical writing are required in one or several historiographical essays. May be repeated for credit. S/U or letter grading.

200H. Indian History; 200I. China; 200M. Ancient Egypt; 200O. Ancient Greece; 200P. Ancient Rome; 200Q. Science/Technology; 200R. Theory of History; 200T. Jewish History; 200S. Armenia and Caucasus; 200U. Psychohistory; 200F-200G. Topics in Historiography. (4 each) Seminar, three hours. Designed for graduate students. Prosemnaries on historiography involving close reading and critical discussion of secondary scholarship and primary sources on selected topics. Reading, discussion, and analytical writing are required in one or several historiographical essays. May be repeated for credit. S/U or letter grading.
C208A-C208B. Variable Topics: Interdisciplinary Studies. (4–4) Lecture, three hours; discussion, one hour (when scheduled). Course C208A is not requisite to C208B except for credit in all modern European history graduate students. Introduction to topics, methods, and historiography of modern European history.

226A-226B. Seminars: Italian Renaissance. (4–4) Seminar, three hours. Course 226A is requisite to 226B. In Progress (226A) and letter (226B) grading.

227A-227B. Seminars: Reformations. (4–4) Seminar, three hours. Course 227A is requisite to 227B. In Progress (227A) and letter (227B) grading.

229A-229B. Seminars: Early Modern European History. (4–4) Seminar, three hours. Course 229A is requisite to 229B. In Progress (229A) and letter (229B) grading.

M230A-M230B. Seminars: Modern European History. (4–4) Same as Art History M230B-M230C. Seminar, three hours. Course M230A is requisite to M230B. May be repeated for credit with consent of advisor. In Progress (M230A) and letter (M230B) grading.

231A-231B. Seminars: Modern European Intellectual and Cultural History. (4–4) Seminar, three hours. Course 231A is requisite to 231B. In Progress (231A) and letter (231B) grading.

232A-232B. Seminars: French History of 19th and 20th Centuries. (4–4) Seminar, three hours. Course 232A is requisite to 232B. In Progress (232A) and letter (232B) grading.

233A-233B. Seminars: Russian/Soviet History. (4–4) Seminar, three hours. Course 233A is requisite to 233B. In Progress (233A) and letter (233B) grading.

234A-234B. Seminars: Modern History of Spain, Portugal, and Italy. (4–4) Seminar, three hours. Course 234A is requisite to 234B. In Progress (234A) and letter (234B) grading.

235A-235B. Economic History of Europe, 1780 to 1919. (4–4) Seminar, three hours. Course 235A is requisite to 235B. Analysis of internationalization of European economy, emergence of Western core and its relation with European peripheries. Comparative analysis on different regions, stressing main characteristics of postwar European economy. In Progress (235A) and letter (235B) grading.

235C-235D. Economic History of 20th-Century Europe. (4–4) Seminar, three hours. Course 235C is requisite to 235D. Cyclic trend, various economic regimes, and integration process of Europe. In Progress (235C) and letter (235D) grading.

M236A. Proseminar: Political Psychology. (4) Same as Political Science M261A and Psychology M228A. Seminar, three hours. Introduction to political psychology: psychology and politics, political behavior, social movements, public opinion, voting, and elite decision making.

238B-238C. Seminars: Psychobiology. (4–4) Seminar, three hours. Course 238B is requisite to 238C. Exploration of individual and group psychological processes and their uses in historical research. In Progress (238B) and letter (238C) grading.

239A-239B. Seminars: English History—Middle Ages. (4–4) Seminar, three hours. Course 239A is requisite to 239B. In Progress (239A) and letter (239B) grading.

240A-240B. Seminars: English History—Modern History. (4–4) Seminar, three hours. Course 240A is requisite to 240B. In Progress (240A) and letter (240B) grading.

241A-241B. Seminars: German History. (4–4) Seminar, three hours. Course 241A is requisite to 241B. Designed for graduate students. In Progress (241A) and letter (241B) grading.

244A-244B. Seminars: British Empire History. (4–4) Seminar, three hours. Course 244A is requisite to 244B. In Progress (244A) and letter (244B) grading.

245. Colloquium: U.S. History. (4) Seminar, three hours. Normally limited to and required of all entering graduate students in U.S. history. Critical introduction to historical method, with emphasis on new methodological and conceptual approaches. Use of source materials, and current state of U.S. historiography.

246A-246B-246C. Introduction to U.S. History. (4–4) Seminar, three hours. Graduate survey of significant literature dealing with U.S. history from the Colonial period to the present. Each course may be taken independently for credit. In Progress (246A) and letter (246B) grading.

247A-247B. Seminars: Early American History. (4–4) Seminar, three hours. Course 247A is requisite to 247B. In Progress (247A) and letter (247B) grading.

M248. Anthropology and History of Mediterranean. (Same as Anthropology M248 and Near Eastern Languages M248) Seminar, three hours. Introduction to historical and anthropological writings about Mediterranean peoples on various topics and to contempo- rary theories, histories, and ethnographies about Mediterranean Sea. Topics include geographical and imaginary boundaries, Mediterranean honor/shame concepts, colonial and post-colonial Mediterranean, Levantinism, thalassology, Mediterraneanism, French Mediterraneans, Jewish Mediterranean, colonial and post-colonial Mediterranean, and Mediterraneans. Focus on critical history of anthropological study of Mediterranean and scholarly literature that emphasizes southern shores of Mediterranean. Letter grading.

249A-249B. Seminars: Jacksonian America. (4–4) Seminar, three hours. Course 249A is requisite to 249B. In Progress (249A) and letter (249B) grading.

250A-250B. Seminars: U.S. History of Middle 19th Century. (4–4) Seminar, three hours. Course 250A is requisite to 250B. In Progress (250A) and letter (250B) grading.

251A-251B. Collaborative Research Seminars: American History. (4–4) Seminar, three hours. Research seminars taught jointly by two faculty members. In Progress (251A) and letter (251B) grading.

251A. Research, writing, and critical discussion of individual research projects. 251B. Required: course 251A. Research, writing, and critical discussion of draft papers.

252A-252B. Seminars: Recent U.S. History to 1930. (4–4) Seminar, three hours. Course 252A is requisite to 252B. In Progress (252A) and letter (252B) grading.

253A-253B. Seminars: Recent U.S. History since 1930. (4–4) Seminar, three hours. Course 253A is requisite to 253B. In Progress (253A) and letter (253B) grading.

254A-254B. Seminars: U.S. Social and/or Intellectual History. (4–4) Seminar, three hours. Course 254A is requisite to 254B. In Progress (254A) and letter (254B) grading.

255A-255B. Business Enterprise and American Culture. (4–4) Seminar, three hours. Course 255A is requisite to 255B. In Progress (255A) and letter (255B) grading.

256A-256B. Seminars: America in World. (4–4) Seminar, three hours. Course 256A is requisite to 256B. In Progress (256A) and letter (256B) grading.

M256. Political Economy of Race. (4) Same as African American Studies M200B.) Seminar, four hours. Examination of historiography of history of capitalism and history of African diaspora, especially in their overlapping concerns with organization of race and racial states in contemporary world, development of modern imperialism—and emergence of global Black resistance to both. Themes and topics considered may include capitalism and question of slavery; law, regulations, and legal pluralism in organization of markets and nations; uneven development and nature of Black sovereignty; history of regimes of gender and sexuality in social and capital reproduction; modalities of capital accumulation and production of space; racial violence and territorial expansion; emancipation and growth of empire; history of finance capital and its discourses of debt; capitalism and history of anti-Blackness; racism, neoliberalism, and governmentality, and emergence and radical black tradition and its critiques of racial capitalism. S/U or letter grading.

257A-257B. Seminars: U.S. Urban History. (4–4) Seminar, three hours. Course 257A is requisite to 257B. In Progress (257A) and letter (257B) grading.

Overview
The Honors Collegium is a series of courses with an interdisciplinary emphasis designed for students enrolled in College Honors. It encourages animated discussion among students, as well as between students and professors and seeks to promote scholarly exchange across the major disciplines at UCLA. And it offers small classes and individual attention.

Each Honors Collegium course is staffed by a director who is distinguished in teaching and scholarship and may include a variable number of guest lecturers and additional specialists in their fields. Some courses satisfy general education requirements and serve as preparation for numerous majors in the College of Letters and Science. Counselors are available in the Honors Programs Office, A311 Murphy Hall, to advise and help students plan an integrated academic program.

Courses in the Honors Collegium are mainly in the humanities and social sciences disciplines. And it offers small classes and individual attention. Honors Programs Office, A311 Murphy Hall, to advise and help students plan an integrated academic program.

Courses in the Honors Collegium are mainly in interdisciplinary seminars, and the courses vary significantly. Students improve their own writing. May be repeated for credit. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students. (4) Tutorial, three hours. Writing workshop on students' own work. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 12) Preparation: consent of UCLA graduate adviser and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Studies. (1 to 8) Limited to graduate students. Individual directed reading arranged with professor. MA candidates may take this course only once. Number of times PhD candidates may take this course is subject to consent of graduate studies committee. S/U or letter grading.

597. Directed Studies for Graduate Examinations. (1 to 8) Preparation for MA comprehensive examination or PhD qualifying examinations. S/U grading.

598. PhD Research and Writing. (1 to 8) Preparation: advancement to PhD candidacy. S/U grading.
1. Plague Culture. (5) Seminar, three hours. Study of episodes and metaphors of plague in Western culture from ancient times to the age of AIDS. Topics include scripture, ancient tragedy, Black Death, novelist realist, high aesthetic metaphors of plague, Nazi propaganda, existential and absurdist thought, postwar cinema, contemporary art, and modern science and medicine. P/NP or letter grading.

2. Comparative Genocide. (4) Lecture, four hours; discussion, one hour. Social comparative study of genocide, combining theoretical concepts with case studies (such as Armenia, the Holocaust, American Indians, Uganda under Amin and Obote, etc.). P/NP or letter grading.

3. Personal Brain Management. (5) Seminar, four hours. Designed for College Honors students. Exploration of various aspects of pathological human behavior and how they are portrayed in classic literary works. Focus on recurrent themes in history of human civilization. P/NP or letter grading.

4. Welcome to Dark Side: Human Pathology in World Literature. (5) Seminar, three hours. Designed for College Honors students. Exploration of various aspects of pathological human behavior and how they are portrayed in classic literary works. Focus on recurrent themes in history of human civilization. P/NP or letter grading.

5. Representing Cleopatra: History, Drama, and Film. (5) Seminar, three hours. Examination of legendary figure of Egyptian queen Cleopatra and her contemporaries and study of origins of myths about her and ways in which subsequent cultures and eras have imagined her. Study of Cleopatra's literary, visual, and cinematic representations. P/NP or letter grading.

6. Energy Issues: Before and Now. (5) Seminar, three hours. Review of physics and chemistry of concepts of energy, history over ages of turning of discoveries into products in this area, including use of fossil fuel, and discussion of current energy issues, including aggressive development of societies, evolution of revolutionary ideas and modern science and medicine. Science students learn innovative ways of presenting scientific data and design and discussion, media, and art students learn how to apply their skills to topics they might not usually address. P/NP or letter grading.

10. Language and Gender: Introduction to Gender Differences and Stereotypes. (5) Seminar, four hours; discussion, one hour. Designed for College Honors students. Examination of legacies of gender differences and stereotypes. P/NP or letter grading.

11W. Postmodern Literature and Culture. (5) Seminar, three hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Study of early and middle 20th-century's attempt to construct significance in a general climate of disillusionment by way of literature, literary criticism, and other intellectual movements. Satisfies Writing II requirement. Letter grading.

12. Sacred Form: Literature and Poetry in India from Bronze Age to Premodern Times. (4) Seminar, three hours. Enforced requisite: development of India from early religious poetry (prior to 1000 BC) to broad range of literary styles and diverse religious and philosophical movements through classical, medi eval, and premorden period. P/NP or letter grading.

13. Inquiry in Numbers. (5) Seminar, four hours. Preparation: high school algebra. Designed for College Honors students. Teaches nonmathematicians to love mathematics and to see mathematics as mathematicians do, not as means to end, but as beautiful and artful in its own right, including elementary number theory and study of whole numbers. Development of rich and elegant theory of prime numbers, factorization, and modular arithmetic. P/NP or letter grading.

18. Trial of Socrates. (5) Seminar, three hours. Examination of life and times of Socrates and trial that led to his execution, including in-class staging. P/NP or letter grading.

20. Introduction to History and Philosophy of Science. (5) Lecture, three hours; discussion, one hour. Exploration of difference between science and other systems of knowledge; study of history and philosophy of science and assessability as objective knowledge. P/NP or letter grading.

21W. Rise and Fall of Modernism. (6) Seminar, three hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Study of early and middle 20th-century's attempt to construct significance in a general climate of disillusionment by way of literature, literary criticism, and other intellectual movements. Satisfies Writing II requirement. Letter grading.

23. Political Dissidence Today and in Ancient Greece: Trial and Death of Socrates in Its Classical and Legal Context. (5) Seminar, three hours. Study of trial and death of Socrates by examining its relevance to political treatment of dissent and disobedience in the U.S. and to variety of contemporary theories and strategies of dissent. Introduction to Greek legal system, values that animated that system, and new ways to think about roles of law. P/NP or letter grading.

24. We Could Be Heroes: Race, Gender, and the Contemporary Hero Narrative. (5) Seminar, four hours. Ways in which hero narratives represent and work through complex issues of race, gender, and identity. P/NP or letter grading.

25. Politics and Passion: Judgment, Justice, and Emotions. (5) Seminar, four hours. How to combine judgment and emotions without them standing in way of justice, including our ability to listen and respond to pain of others. What should govern our political lives? Should it be our reason or our emotions? Or is there some way to combine the two? Exploration of these questions through debates on place of emotions in politics, from ancient to contemporary thinkers within philosophical framework. P/NP or letter grading.

26. Representing Medicine: Art, Literature, and Film. (5) Seminar, four hours. Limited to Freshman Summer Program students. Exploration of interdisciplinary dimensions of medical representation, with emphasis on cross-cultural 20th-century portrayals of profession, including representations of patient and professional relations, healthcare sites and circumstances, aging, alternative treatments, and mental health. Offered in summer only. P/NP or letter grading.

27. Varied Mathematics. (5) Seminar, four hours. In-depth approach to mathematics and engineering topics. Ideas through stories from historical and anthropological sources. Simplification of topics that cause difficulties in traditional mathematics. Examples emphasize practical solutions. In place of terms used in mathematics, relevant views from popular culture,
including gambling, playing card games, and student contributions. Sources include computer, control, space, and other contemporary scientific issues, and reckoning from Latin America, South America, and Polynesia. P/NP or letter grading.

28. Material Culture and the Museum: Introduction to Collections-Based Research. (5) Seminar, three hours. Examination of relationship between people, objects, and the way that human behavior has historically and contemporaneously created and conceived of things and their use and importance in daily life and in performance of cultural identity. Consideration of questions including how past and present intersect, how people have made sense of world over time and space, and how objects, heritage, collections, and museums converge, diverge, and intersect. P/NP or letter grading.

30. Vietnamese American Culture. (4) Seminar, three hours. Cultural, social, and political implications of the Vietnam War on American society through examination of photography, journalism, personal narrative, political commentary, drama, and fiction. P/NP or letter grading.

31. Poets and Prophets: Back to Future with Ray Bradbury and Rod Serling. (5) Seminar, three hours. Exploration of various aspects of human condition and how they are portrayed through genre of science fiction. Examination of authors as both poets reflecting on social issues of their time, as well as prophets of future dystopia of human making. Reading texts of Ray Bradbury and viewing original screen episodes of Rod Serling’s Twilight Zone to see that these artists forecast some of pressing issues facing humanity today: climate change and threat of ecological and planetary collapse of our human habitat. Artistic works thus are as much cautionary tale as fantasy. Letter grading.

32. Scientific Method: Critical Inquiry into Question of Extraterrestrial Life. (4) Lecture, three hours; discussion, one hour. Course does not presume to answer question of whether or not there is intelligent life in the universe but rather uses this question as a pedagogic tool to introduce central ideas, techniques, and limitations of the scientific method—what questions would need to be asked, what scientific knowledge would be needed, and what obstacles would have to be overcome just to address this question. P/NP or letter grading.

33. Geographies and Idea of Home. (5) Seminar, three hours. Designed for College Honors students. Home is potent symbolic notion across eras and cultures, locale from which we depart and to which we may return. Broader notions of space, place, longing, belonging, exile, and return, and through lighter vibrant works of literature, film, and performance. P/NP or letter grading.

34. Science, Rhetoric, and Social Influence. (6) Seminar, four hours. Enforced requisite: English Composition 3 or English as a Second Language 36. Science writing, particularly scientific texts, both contemporary and historical, that have been used to communicate science to and influence large groups of people. What do these texts tell us about certain scientific texts that change way we think and have potential to affect social policy? Texts cover variety of topics from evolution to nutrition and food industry to current debates about climate change. Students encouraged to practice science writing themselves. Satisfies Writing II requirement. Letter grading.

44. Society of Excess: On Waste, Consumer Culture, and Environment. (5) Seminar, three hours. Designed for College Honors students. Examination of waste in both real and virtual worlds, looking in interdisciplinary ways at various cultural representations of trash set against backdrop of society of excess and environment constantly threatened by overflowing and mismanaged waste, including social and cultural responses to physical waste and cyber battle against Internet debris. P/NP or letter grading.

46. Drugs in Society: Interdisciplinary Perspective on Drug Use, Abuse, Treatment, and Intervention. (5) Seminar, three hours. Examination of drug use and abuse and consequent social issues and policies both historically and in the contemporary U.S., including discussion of current research on neurobiological properties of different drugs and corresponding clinical interventions. P/NP or letter grading.

48. Politics of Reproduction. (4) Seminar, three hours. Examination of political strategies and approaches to teaching (interdisciplinary, experiential, integrative, illustrative), ways of being (inclusive, self-awareness, curiosity, independence, resilience, generosity, diversity), and habits of innovation, creativity, innovation). Incorporation of empirical research and writing from different academic disciplines to help students understand rationales behind those approaches and associated applications for undergraduate learning. Students design e-portfolios. Students develop personalized roadmap to guide their academic, personal, and professional growth during their undergraduate careers. May be repeated for maximum of 10 units. P/NP or letter grading.

51. Music and Society. (5) Seminar, four hours. Minimal experience reading music desirable but not required. Analysis of Western art music, with focus primarily, but not exclusively, on music from the 10th through early-20th centuries through multiple analytical prisms: sociological, historical, political, and musical. P/NP or letter grading.

52. Literature and History of Utopias. (4) Seminar, three hours. Study of major utopian writings from Thomas More’s classical text to recent ecological and feminist utopian texts, with purpose of uncovering social, intellectual, and cultural landscapes underlying quest for a more perfect society. P/NP or letter grading.

57. Language, Performance, and Culture. (5) Lecture, three hours. Mixure of lecture and discussion on topic of language and its relationship to performance across cultural in 19th and 20th century. Focus on historical imagination as it is expressed in such writers as Flaubert, Sartre, and Samuel Beckett, and films such as His Girl Friday and Monkey Business. P/NP or letter grading.

548 / Honors Collegium
Vladimir Nabokov, Russian-American writer, teacher, translator, lepidopterist, and composer of chess problems. Nabokov's eclectic writings lend themselves well to the criticism — and often the understanding — of modern and contemporary literature.

Reading and writing about art and science is integrated and/or disconnected. Examining the role of poetry in social justice movements, the relationship among politics, rhetoric, and literature in the early evolution of the universe.

Reading and writing about art and science is integrated and disconnected. Examining the role of poetry in social justice movements, the relationship among politics, rhetoric, and literature in the early evolution of the universe.

Lecture, three hours; discussion, two hours. Not open to students with credit for Life Sciences 70. Historical and scientific study of genetic engineering in medicine, agriculture, and law. No prerequisites.

Lecture, three hours; discussion, two hours. Not open to students with credit for Life Sciences 70. Historical and scientific study of genetic engineering in medicine, agriculture, and law. No prerequisites.

105. Ancient Rome and the Monuments of Washing- 
ton, D.C. (5) Seminar, three hours. Designed for College Honors students. Examination of political order and questions of violence, power, lead- ership, and ideology through the reading of literary texts, specifically Iliad by Homer, Julius Caesar and Henry IV, Part 1 by Shakespeare, and Brothers Karamazov by Dostoevsky. P/NP or letter grading.

106. Shakespeare, Dostoevsky. (5) Seminar, three hours. Designed for College Honors students. Examination of male homosexuality, and the structure of war heroes (Revolutionary and Civil), monuments to honor veterans of Vietnam, Korea, and Second World War conflicts, and American presidential and letter grading.

107. Literature and Political Order: Homer, Shake- speare, Dostoevsky. (5) Seminar, three hours. Designed for College Honors students. Examination of political order and questions of violence, power, leadership, and ideology through the reading of literary texts, specifically Iliad by Homer, Julius Caesar and Henry IV, Part 1 by Shakespeare, and Brothers Karamazov by Dostoevsky. P/NP or letter grading.

108. Ancient Rome and the Monuments of Washing- 
ton, D.C. (5) Seminar, three hours. Designed for College Honors students. Examination of political order and questions of violence, power, leadership, and ideology through the reading of literary texts, specifically Iliad by Homer, Julius Caesar and Henry IV, Part 1 by Shakespeare, and Brothers Karamazov by Dostoevsky. P/NP or letter grading.

109. Living Consciously: Philosophy in Everyday Life. (5) Seminar, three hours. What do decisions you make and activities you take say about who you are? What does it look like when you consciously inform your everyday life with your own mindfully developed way of seeing world? Through readings, discussions, exercises, and writing, exploration of practice and en- suing results of living consciously. Students develop and articulate their personal philosophies through in- tensively and personally exploring various ways of thinking about and acting in world, and through ex- ploring how social world influences and creates philosophies by which we live (whether we know it or not). Letter grading.

110. Marxist and Post-Marxist Approaches to Cul- 
tural Studies. (4) Seminar, four hours. Examination of Marxist and post-Marxist approaches to theory of culture, including classic texts, theoretical and empirical works, and the Marxists roots of postmodernism. P/NP or letter grading.

111. Stress and Coping. (4) Seminar, four hours. Ex- amination of research and theory on stress and coping, with emphasis on physical and mental conse- quences of stress and moderators of both social support and personality in coping strategies. P/NP or letter grading.

112. Chemical Communication across Tree of Life. (5) Seminar, three hours. Designed for College Honors students. Examination of male homosexuality, and the structure of war heroes (Revolutionary and Civil), monuments to honor veterans of Vietnam, Korea, and Second World War conflicts, and American presidential and letter grading.

113. Hyperconnected World: Society and Internet. (5) Seminar, three hours. Designed for College Honors students. Exploration of social, political, economic, psychological, and cultural dimensions of our hyper- connected world via Internet. Topics include transforma- tions of social relationships online, virtual versus real communities, identity and its creations, trust and deception in cyberspace, surveillance, privacy, economics, intellectual property, culture, edu- cation, and knowledge, and digital wellness. P/NP or letter grading.

114. Architecture from Los Angeles: Work of Frank Gehry, Thom Mayne, and Greg Lynn. (5) Seminar, three hours. Within last 30 years, body of architectural work originating in Los Angeles but reaching world both in material construction and aesthetic influence has emerged. Study of works of three seminal archi- tects—Frank Gehry, Thom Mayne, and Greg Lynn. Site visits and hands-on practice in how to read archi- tectural plans and how to use computers and mod- eling in architectural study and design. P/NP or letter grading.

115. Poetry and Society in England, 1588 to 1688: 
Verse, Politics, Religion, and Sexuality from Spanish 
Armada to Glorious Revolution. (5) Seminar, three hours. Designed for College Honors students. Poetry of England in century between 1588 and 1688 through prism of evolving political, philosophical, theological, sexual, economic, and scientific practices of that day and vice versa—understand poetry in cultural and historical context. Students research a range of subjects from alchemy to zoology and become class resource on some relevant topic such as Renais- sance medicine, alchemy, scholasticism, Cromwell and New Model Army, Elizabethan foreign policy, Stuart architecture, agricultural and dietary changes, and printing and publishing conventions. P/NP or letter grading.

116. Art Abie: Art and Improvisation in Museums. (4) (Same as Theater M187.) Seminar, four hours. Of- fered in collaboration with Los Angeles County Mu- seum of Art (LACMA). Interpretation of art in collection through acting, dialogues, movement, and music. Re- search into history and art history and production of creative performance piece required. P/NP or letter grading.

117. London and Culture of Male Homosexuality, 1870s to 1930s. (5) Seminar, four hours. Designed for College Honors students. Examination of male homo- sexual subculture that thrived in London during period when brilliant Irish writer Oscar Wilde (1854 to 1900) was to face his own homosexuality in prejudice and dis- cregacy. Study of Wilde trials, cultural consequences of Labouche Amendment criminalizing male homo- sexual acts, some of Wilde’s writings, and exciting new writings that have come to light offering insight into links that gay men in London had with theatrical world, prostitution, aristocrats, and underground pub- lishing. P/NP or letter grading.

118. Paths of Patriarchy: Ancient Goddesses and He- roines. (4) (Same as Gender Studies M128.) Lec- ture, three hours. Examination of ancient goddessesses and heroines—European, Neolithic, Near Eastern, Celtic, Sumerian, Middle Eastern, and Greco-Roman—using translations of ancient texts, ar- chaeological evidence, and feminist methodology in order to discover implications of ancient patriarchy on modern society. P/NP or letter grading.

119. Hollywood and Cultural Diversity in America. (5) Seminar, three hours. Designed for College Honors students. Hollywood filmmakers often produce movies where characters confront societal issues such as social and political ideologies of discrimina- tion. So it is surprising to see recent media cov- erage that turns magnifying glass around and exposes Hollywood’s own severe problems when it comes to racial and cultural representation of differing media representations—how they occur, why they persist, and what they can teach about current racial divides in America. Examination of how Hollywood represents different races, cultures, and groups. P/NP or letter grading.

120. Art and Performance: Interdisciplinary App- ror to Collections of Getty Center. (4) (Same as 
 Theater M109s) Lecture, four hours; discussion, one hour. Drawing from objects in five major collections at Getty Museum, focus on five parallel historical periods in which political, social, and aesthetic philosophy of art is examined in musical and dramatic perfor- mance. Letter grading.

121. Psychoanalysis before Freud, and a Little After. (5) Lecture, three hours; discussion, one hour. Ex- amination of different ways human beings have devel- oped concepts of themselves through history from early civilizations through Middle Ages, Renaissance, Reformation, scientific revolution, Enlightenment, ori- gins of modern world, Freud’s C. de Sèvres Vienna, and post-Freudian visions. Investigation of the perspec- tives of these different cultures in present day. P/NP or letter grading.

122. Chemical Communication across Tree of Life. (5) Seminar, three hours; discussion, two hours. De- signed for College Honors students. Chemical com- munication governs relationships among most biologi- cal entities, across entire tree of life from viruses to Homo sapiens. Biosynthetic devices are using knowl- edge gleaned from chemosensory systems to change face of robotics, with wide applications in consumer industries, homeland security, and space exploration. Chemical, physical, and biological principles to be combined as pedagogical tools for teaching larger lesson in science. Synthesis of information and con- cepts across disciplines to develop student hypoth- eses and conclusions. P/NP or letter grading.

124. Midwives, Mothers, and Medicine: Perspec- tives on History of Childbirth. (4) Seminar, three hours. Using examples from history and anthropology, exam- ination of variety of practices associated with child- birth over time and across cultures, addressing such themes as shifting roles among birthing women, midwives, and medical men and cultural meanings of birth. P/NP or letter grading.

125. Communities and Nations in Conflict: Theory and Practice of International Conflict Resolution. (5) Lecture, three hours; discussion, one hour. Intro- duction to theory and practice, with emphasis on international conflict. Transitional justice mechanisms, from international criminal tribu- nales to national courts, and the International Criminal Court to indigenous approaches such as communitarian justice systems. Examination of environmental conflict reso- lution, homeland security and terrorism, role of gender in conflict, and role of media in conflict. P/NP or letter grading.

126. Waves of Resistance: Race, Empire, and Social 
Justice in Asia and Pacific Islands. (5) Seminar, three hours. Designed for College Honors students. Exam- ination of historical and contemporary representations of ra- cial violence, empire, and social justice in Asia and Pa- cific Islands. Global forces such as capitalism, colo- nialism, and globalization played significant role in cultural, economic, and political changes, such as American Samoa, Guam, Hawai’i, Marshall Islands, Philippines, Okinawa, and South Korea. Explo- ration of how various groups of people have re- sponded to these forces to have better understanding of how race, empire, and social justice have con- nected these distant and diverse areas and peoples. P/NP or letter grading.

127. Citizenship, Leadership, and Service. (4) Sem- inar, three hours; field trips and participatory study of interactions between citizen- ship, leadership, and service, including both theoret- ical work in classroom and practical work in service organizations in the field. P/NP or letter grading.

128. Humor as Means of Social Control. (5) Sem- inar, four hours. Designed for College Honors stud- ents. Application of venerable humanist insights and social scientific thinking to contemporary social phe- nomenon of human laughter and humor. While Arist- otle and Hobbes thought humor was bad for society, Locke and Bahaftian would have disputed them for dif- ferent reasons. Integration of their ideas and ideas of contemporary anthropology and sociology, as well as social and biological science, to critically evaluate how social scientists investigate mass media political satire and letter grading.

129. Research in Psychology and Legacy of John 
Wooden. (5) Seminar, four hours. Designed for Col- lege Honors students. Exploration of life and work of Coach John Wooden, with particular attention to his pyramid of success, how he was viewed and is re- membered by his players, and relationships between his philosophy and academic research. His philosoph- ical approach as lens through which to explore re- search in fields of sport psychology. Connects different elements of Coach Wooden’s pyr- amid of success (and other aspects of his coaching philosophy) to research in psychology. P/NP or letter grading.

130. Speeding the Cure: Activists, Experts, and 
Health Care. (5) Seminar, four hours. Study of how ac- tivists, experts, and political movements shape public-health policy and biomedical science. What are best
ways to confront health challenges, from rare diseases to pandemics? Analysis of scientific, medical, social, economic, and political aspects of health inequities, drug policies, and global health policy, as well as the role of scientific expertise in formulating goals and strategies. Topics include viruses and vaccines, rare diseases, aging, autism, AIDS, breast cancer, clean water, gun violence, and prostate cancer. P/NP or letter grading.

131. Gender, Globalization, and Multicultural Storytelling (5) Seminar, three hours. Exploration of evolution of postcolonial studies through contemporary works of multilingual American literature. How do our personal formations of identity developed through their experience of global human capital and local development are impacting poor countries and poor people who reside in rich and poor countries. Examination of how different countries have used education to promote socio-equality and development and analysis of why some countries appear to be making more progress than others. Consideration of how factors such as history, particularly related to colonialism, political economy, and culture affect character and performance of schools. P/NP or letter grading.

132. New Women and Activism from America to Asia (5) Seminar, three hours. Designed for College Honors students. Focus of academic activities and regional boundaries by looking at women’s movements in U.S. and East Asia in early 20th century, with examination of how issues of women’s rights, labor rights, suffrage, prostitution, and disabilities united and divided women across classes and national borders. Examination of suffrage movement in 1913 New York and parallel movements in East Asia (Japan, Korea, China) that shared some of these same ideas with their own unique historical circumstances. Use of highly successful Reacting to Past historical role-playing game titled Greenwich Village, 1913: Suffrage, Labor, and New Woman. P/NP or letter grading.

133. Practice and Ethics of Ethnographic Fieldwork (5) Seminar, three hours. Examination of ethics and practices of ethnographic fieldwork. This is not a field methods course in anthropology but one intended to convey rich knowledge fieldwork can produce in many disciplines and kinds of ethical issues raised in doing fieldwork. P/NP or letter grading.

134. Democracy and Utopias (5) Seminar, three hours. Designed for College Honors students. Political culture of modern democracy fosters idea of progress and constant reform and is also wary of radical upheavals. Political culture of ancient Greek democracy made notion of human achieved unmatched superiority over any other society and birth of utopia. Democracy praised itself as perfect form of government, but it let flourish counter-factual idea for absolute, just, and blissful political order. Examination of this paradoxical link between democracy and utopia by tracing its history in works of Aristophanes, Plato, Thomas More, Tommaso Campanella, Francis Bacon, and Charles Fourier to show relevance to contemporary politics. P/NP or letter grading.

135. Poetry and Society in England, 1588 to 1688 (3) Seminar, four hours. Reading and discussion of poems to comprehend meaning and place in configurations of rapidly transforming society. Tensions and changes in that culture, and lives of authors, these works helped negotiate. How and why metaphorical and cavalier modes emerge in period of intense struggle. Interplay of form, content, and meaning within these modes. Evidence offered about personal psychology, gender politics, and status of several of these works. P/NP or letter grading.

136. Art, Entertainment, and Social Change (5) Seminar, three hours. Integrative examination of evolving impact of arts and entertainment industry on various aspects of society, including politics, self-concept, and experience of everyday life, among others. P/NP or letter grading.

137. Living Drama in America: Perspectives on Race and Buddhism (5) Seminar, three hours. Deconstruction of and deeper histories behind images of Afro-American slaves; interactions with embossed monochrome; ornate, golden temples with scent of incense; serene Zen meditation centers; and popular Buddhists from Richard Gere to Thich Nhat Hanh to the Dalai Lama. P/NP or letter grading.

138. European Encounters, Globalization, and Multicultural Storytelling (5) Seminar, four hours. Exploration of evolution of postcolonial studies through contemporary works of multilingual American literature. How do our personal formations of identity developed through their experience of global human capital and local development are impacting poor countries and poor people who reside in rich and poor countries. Examination of how different countries have used education to promote socio-equality and development and analysis of why some countries appear to be making more progress than others. Consideration of how factors such as history, particularly related to colonialism, political economy, and culture affect character and performance of schools. P/NP or letter grading.

139. Confucianism and His Legacies (5) Seminar, four hours. Examination of Confucian tradition, from Warring States period to popularization in 21st century. Society in which Confucius (551—479 BCE) lived. Study of Analects as core text of Confucianism. Confucius and his successors offered a new set of social relationships. Importance and impact of Confucius on Chinese and Asian culture. P/NP or letter grading.

140. Domains and Subordinates in Social Psychology of Privilege and Oppression in Public Education (6) Lecture, four hours; computer laboratory, one hour. Exploration of social behavior through computer simulations of human genomic project, comparative and functional genomics, transcriptomics, proteomics, pharmacogenomics, and metabolomics. P/NP or letter grading.

142. Free Will and Moral Responsibility: From Neuroscience to Philosophy (5) Seminar, four hours. Survey of motivations, methods, and conclusions of neuroscientific and psychological investigations of free will. Consideration of neuroscientific arguments that human beings are not free when they choose and philosophical arguments about what is required for freedom and what is required for responsibility. Discussion of extent to which philosophical investigations of free will are supported by experiments and how experiments could be designed and carried out to better correspond with philosophical and legal debate on free will. P/NP or letter grading.

M143. Latinx Immigration History and Politics (4) (Same as Chicana/o and Central American Studies M124.) Lecture, four hours. Critical introduction to U.S. immigration policies and politics, and their disproportionate impacts on Latinx community. Topics include some of root causes of Latin American migration; federal, state, and local immigration lawmaking; and how race, gender, and sexuality impact and are impacted by immigration. P/NP or letter grading.

144. International Development: Using Your Major For Doing Well and Doing Good (5) Seminar, three hours. The adoption of the internationally sustainable Development Goals (2015) called for addressing extreme poverty, disease, environmental degradation, gender inequities, unemployment, and other problems afflicting people. Sustainability enforces development solutions that endure and engage local people. The aim is to leverage local capacities to improve living conditions substantially. Students address questions such as whether your major relates to one or more of the goals? Which goal speaks to your interest? What key concept or passion do you have that can contribute to addressing one or more of the goals? P/NP or letter grading.
163. China’s Rise: Critical Issues and Global Implications. (5) Seminar, four hours. Study of ascendency of China in 21st century, with emphasis on global implications and how it may change, as background to understanding conditions under which leaders can make differences. Compari-
son of political leaders, business chief executive offi-
cers, sports coaches, and religious leaders. Letter grading.

155. Disease and Human Condition. (5) Seminar, four hours. Discussion and analysis of COVID-19. Ex- ploration of scientific characteristics and historical manifesta-
tions of disease; how diseases have shaped civilization: bubonic plague, smallpox, yellow fever, tuberculosis, cholera, influenza, polio, hernias, and non-Human/Non-Mammal Animal Relationships. (5) Seminar, three hours. Exploration of intimate and changing relationship between human and non-human animals. Examination of how we con-
ceptualize animals: as companions, food, workers, repre-
sentatives of self, and more; rights—or lack thereof—of animals; our animal industries: factory farming, shelters and rescues, animal workers, entre-
tainment forms, racing, hunting, medical research, and more; boundaries between human and non-
human animals; violence against animals, both indi-
vidualized and institutionalized; animals as concept; and social construction the difference between human and non-human animals. Letter grading.

165. Privacy versus National Security. (5) Seminar, four hours. Designed for College Honors students. Ed-
ward Snowden’s disclosures of extent of government surveillance conduces to the question: Is the National Security Agency’s program justified? What is the proper balance between privacy and national security in infor-
mation gathering? The constitution guarantees—values and moral responsibility, complicated by public fear, competing commercial interests, and interna-
tional legal and diplomatic quandaries. P/NP or letter grading.

166. Stories of Cultural Distance and Imposed Assimi-
lation. (5) Seminar, three hours. Interdisciplinary ap-
proaches to study of Los Angeles and its rise as global metropolis. Focus on art, architecture, literature, and other forms of cultural expression rooted in diverse communities of Los Angeles. P/NP or letter grading.

178. Secret Coups, Imperial Wars, and American Technology as well as social implications of this science. P/NP or letter grading.

176A. Context of Arab World: Cairo and Alexandria. (4) Seminar, three hours; fieldwork, eight hours. Em-
focused prerequisite: course 176B. Introduction to some key political developments in the Arab world, with special focus on Cairo and Alexandria. Offered in summer only, P/NP or letter grading.

176B. Reading Arab World: Cairo and Alexandria. (4) Seminar, four hours; fieldwork, eight hours. En-
focused prerequisite: course 176B. Introduction to some of most salient literature in contemporary Arab world, with focus on Cairo and Alexandria. Offered in summer only, P/NP or letter grading.

177. Biotechnology and Art. (5) Seminar, six hours. Examination of biotechnology, contemporary issues, and living tissues to bring to life ethical, social, and aes-
thetic issues of sciences. Study of how biotech blurs distinctions between science and art through combin-
ation of artistic and scientific advancement, creating wide public debate. Exploration of history of biotech-
nology as well as social implications of this science. P/NP or letter grading.

178. Secret Coups, Imperial Wars, and American Democracy since World War II. (5) Seminar, three hours. Study of U.S. involvement, both covert and overt, in expeditionary wars since World War II, in-
cluding involvement in Vietnam, Korea, Cuba, Iran,
Guatemala, Nicaragua, and Chile, and implication of these actions for vitality of American democracy. P/NP or letter grading.

M180. Structure, Patterns, and Polyhedra. (5) Same as Chemistry M117.) Lecture, four hours; activity, two hours. Exploration of structures and their geometric underpinnings, with examples and applications from architecture (space frames, domes), biology (enzyme complexes, viruses), chemistry (symmetry, molecular cages), design (tiling), engineering (space filling), and physics (crystal structures) to effect working knowledge of symmetry, two-dimensional patterns, and three-dimensional solids. P/NP or letter grading.

182. From Scientific Revolution to Industrial Revolution. (5) Seminar, four hours. Designed for College Honors students. Examination of most important development in making of Western power and hegemony: rise of new science and its relationship first to Britain, then European, Industrial Revolution. Once seen as solely product of material factors such as abundance of high wages, and available labor, Industrial Revolution is shown as also possessing critically important knowledge of components, one scientific culture derived from Newtonian science and mechanics, P/NP or letter grading.

M183. Being Human: Identity and Mental Illness. (5) (Same as Disability Studies M183 and Society and Genomics M183.) Seminar, three hours. Exploration of relationship between identity and mental illness through different approaches to nature and treatment of mental disorder, from biomedical accounts of brain-based pathology (and identity) to Mad Pride movement emphasizing mental diversity. Enduring philosophical questions regarding personal identity, consciousness, selfhood and mind-body relationship are investigated through consideration of conditions such as dissociative identity disorder, trauma, psychosis, autism, and depression. P/NP or letter grading.

184. Indian and Pakistan: Historic Roots of Conflict and Prospects for Cooperation. (5) Seminar, three hours. Designed for College Honors students. History of India and Pakistan from demise of British India’s Empire in mid-August 1947, with inept partition of India and Pakistan from demise of British India’s Empire. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

189A. Journal Club Seminars. (2) Seminar, two hours; discussion, two hours. Study of key research journals and important research articles. Presentations by program faculty members and other leading researchers. May be repeated for credit. P/NP grading.

193A. Journal Club Seminars: Arts and Humanities Summer Research Program. (2) Seminar, one hour; discussion, one hour. Limited to students selected for Humanities Summer Research Program. Study of humanities research journals and monographs. Weekly student research reports and presentations by humanities faculty members. May be repeated for credit. P/NP grading.

193C. Journal Club Seminars: Mellon Mays Undergraduate Research Scholarships. (2) Seminar, one hour; discussion, one hour. Limited to Mellon Mays undergraduate fellows. Study of key research journals and important research articles in arts, humanities, and social sciences. Weekly research reports and presentations by Mellon Mays students. Presentations by program faculty members and other leading researchers. P/NP grading.

199. Directed Honors Studies. (4) Tutorial, two hours; preparation: minimum of 4 units completed in Honors College with grade of B or better, overall UCLA grade-point average of 3.0 or better. Special research/writing tutorial with director of one Honors College course to pursue in greater depth significant topics from one collegium course. May be repeated for credit. P/NP or letter grading.

Rebecca L. LeShay Araujo, MS, CGC

Overview
The goal of the graduate program is to train the next generation of leaders in human genetics. This broad and rapidly evolving field of research incorporates multiple areas of modern experimental biology (including but not limited to molecular and behavioral genetics, epigenetics, biochemistry, cell and developmental biology, imaging, and large-scale omics approaches such as genomics, transcriptomics, and functional genomics) and of computational biology (including bioinformatics and biostatistics). In their research, students tackle Mendelian diseases and genetically complex traits of key relevance to human health.

A wide variety of courses is offered to equip future independent researchers with fundamental knowledge about state-of-the-art methods for generating experimental data on a genome-wide scale and computational and statistical approaches to draw from the data sound con-
Human Genetics Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

CM113. Ethical, Legal, and Societal Topics in Genetic Counseling. (2) (Same as Sociology and Cultural Anthro. 113.) Lecture, two hours. Discussion of social, cultural, ethical, and legal issues in genetics and genetic counseling. Concurrently scheduled with course C243. Letter grading.

CM124. Machine Learning Applications in Genetics. (4) (Same as Computer Science CM124.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Computer Science 32 or Program in Computing 100C with grade of C- or better, Mathematics 33A, and one course from Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, Mathematics 170E, or Statistics 106A. Designed for engineering students as well as students from biological sciences and medical school. Introduction to computational analysis of genetic variation and computational interdisciplinary research in genetics. Topics include introduction to genetics, identification of genes involved in disease, inferring human population history, technologies for obtaining genetic information, and genetic sequencing. Focus on formulating interdisciplinary problems and then solving those problems using computational techniques from statistics and computer science. Concurrently scheduled with course CM224. Letter grading.

CM136C. Societal and Medical Issues in Human Ge- netics. (5) (Same as Society and Genetics M102.) Lecture, three hours; discussion, two hours. Survey of key technologies and societal implications of genetic technology. Topics include introduction to genetics, identification of genes involved in disease, inferring human population history, technologies for obtaining genetic information, and genetic sequencing. Focus on formulating interdisciplinary problems and then solving those problems using computational techniques from statistics and computer science. Concurrently scheduled with course CM236C. Letter grading.

C144. Genomic Technology. (4) Lecture, three hours; discussion, one hour. Requisite: Life Sciences 4. Survey of key technologies that have led to successful application of genomics to medicine with focus on theory behind specific genome-wide technologies and their current applications. Concurrently scheduled with course C244. Letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topics, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

199. Special Studies in Human Genetics. (2 to 8) Tutorial, to be arranged. Students select instructor among eligible research faculty and carry out independent research project under instructor supervision. P/NP or letter grading.

Graduate Courses

M203. Stochastic Models in Biology. (4) (Same as Biostatistics M203.) Lecture, four hours. Required: Mathematics 170A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and variety of other biological and medical disciplines. S/U or letter grading.

M207A. Theoretical Genetic Modeling. (4) (Same as Biostatistics M207A and Biostatistics M207B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 115A, 131A, Statistics 100B. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

M207B. Applied Genetic Modeling. (4) (Same as Bio- mathematics M207B and Biostatistics M237.) Lecture, three hours; laboratory, one hour. Requisites: Biostatistics 205B, 206B (may be taken concurrently) or equivalent coursework or consent of instructor. Covers basic genetic concepts (prior knowledge of human genetics not required). Topics include statistical methodology underlying genetic analysis of both quantitative and qualitative complex traits. Laboratory for hands-on computer analysis of genetic data; laboratory report required. Course complements M207A; students may take either and are encouraged to take both. S/U grading.

210. Topics in Genomics. (2) Seminar, two hours. Survey of current biological theory and technology used in genomic research. Topics include genomic technologies, functional genomics, proteomics, statistical genetics, bioinformatics, and ethical issues in human genetics. S/U grading.

M211. Mathematical and Statistical Genomics. (4) (Same as Bioinformatics M211 and Biostatistics M211.) Lecture, three hours; discussion, one hour. Preparation: undergraduate course in statistics and probability. Theoretical models in molecular evolution focusing on phylogenetic techniques. Topics include evolutionary tree reconstruction methods, studies of viral evolution, phylogeography and coalescent approaches. Examples provided from evolutionary biology and evolutionary medicine, with unique focus on implications for human disease processes. Laboratory for hands-on computer analysis of sequence data. S/U or letter grading.

CM224. Machine Learning Applications in Genetics. (4) (Same as Bioinformatics CM224 and Computer Sci- ence CM224A.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Computer Science 32 or Program in Computing 10C with grade of C- or better, Mathematics 33A, and one course from Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, Mathematics 170E, or Statistics 106A. Designed for engineering students as well as students from biological sciences and medical school. Introduction to computational analysis of genetic variation and computational interdisciplinary research in genetics. Topics include introduction to genetics, identification of genes involved in disease, inferring human population history, technologies for obtaining genetic information, and genetic sequencing. Focus on formulating interdisciplinary problems and then solving those problems using computational techniques from statistics and computer science. Concurrently scheduled with course CM224. Letter grading.

Graduate Majors

Genetic Counseling MS

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Human Genetics MS, PhD

The program offers the MS and PhD degrees; graduate study leading to a PhD degree is emphasized. Under special circumstances, and only after consultation with and approval by the Department of Human Genetics, individuals may apply for admission to the MS program.

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Articulated Degree Programs

Articulated degree programs permit no credit overlap; students must complete degree requirements separately for each degree.

- Human Genetics PhD/Doctor of Medicine
those problems using computational techniques from statistics and computer science. Concurrently scheduled with course CM124. Letter grading.

M226. Machine Learning in Bioinformatics. (4) (Same as Bioinformatics M226 and Computer Science M226.) Lecture, four hours; outside study, eight hours. Enforced requisite: Computer Science 32 or Program in Computing 10C with grade of C– or better. Recommended: one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, or Statistics 100A. Familiarity with probability, linear algebra, and algorithms expected. Designed for engineering students as well as students from biological sciences and medical school. Biology has become data-intensive science. Bottle-neck in being able to make sense of biological processes has shifted from data generation to statistical models and inference algorithms that can analyze these datasets. Statistical machine learning provides important toolkit in this endeavor. Biological datasets offer new challenges to field of machine learning. Examination of statistical and computational aspects of machine learning techniques and their application to key biological questions. Letter grading.

M229S. Seminar: Current Topics in Bioinformatics. (4) (Same as Biological Chemistry M229S and Computer Science M229S.) Seminar, four hours; outside study, eight hours. Designed for graduate engineering students as well as students from biological sciences and medical school. Introduction to current topics in bioinformatics, genomics, and computational genetics and preparation for computational interdisciplinary research. Focus on genomic analysis, regulatory genomics, association analysis, association study design, isolated and admixed populations, population substructure, human structural variation, model organisms, and genomic technologies. Computational techniques include those from statistics and computer science. May be repeated for credit with topic change. Letter grading.

236A. Advanced Human Genetics: A Molecular Aspects. (4) Lecture, three hours. Recommended preparation: prior knowledge of basic concepts in molecular biology and genetics. Advanced topics in human genetics related to nucleic genetics, and relevant technologies. Topics include genomic technologies, human genome, mapping and identification of disease-causing mutations, transcriptomics, proteomics, functional genomics, epigenetics, and stem cells. Reading materials include original research articles and reviews or book chapters. Letter grading.

236B. Advanced Human Genetics: B Genetics and Genomics Aspects. (4) Seminar, four hours; discussion, four hours. In this course, human genetics is fundamental scientific field that studies inheritance in humans and therefore also has immediate practical value for human health and disease. Identification of genes and genetic variation involved in human diseases, traits, and behavior is one of main goals of human genetic studies. Genomic technologies are rapidly advancing and allow for comprehensive and in-depth analysis of human genome. Covers different themes in field of human genetics, including genetics of monogenic disorders, genetic mapping of complex traits, transcriptome analysis, and epigenomic studies of human disease. Course includes discussion of key topics in three-course series. Focus on medical approaches to clinical genetics. Topics include molecular basis of genetic disease, modes of inheritance, principles of cytogenetics, molecular techniques, disorders of chromosomes, and fundamentals of prenatal diagnosis and screening. Addresses application of medical and genetic information to genetic counseling scenarios, examinations, and written reflections. Grand Rounds/Seminar series attendance is required component. Letter grading.

400C. Principles and Practices in Medical Genetics 3. (3) Lecture, three hours. Limited to Genetic Counseling students, and open to medical genetics, molecular and cytogenetics fellows with permission. Third course in three-course series. Focus on medical approaches to clinical genetics, principles of mathematical and population genetics, multifactorial inheritance, risk assessment, teratology and dysmorphology. Addresses application of medical and genetic information to genetic counseling. Includes lectures, problem-based learning scenarios, examinations, and written reflections. Grand Rounds/Seminar series attendance is required component. Letter grading.

400D. Principles and Practices in Medical Genetics 4. (4) Lecture, four hours. Required: at least four hours’ observationshadowing at one or more clinical centers and at least four hours observing bereavement groups in past year. Limited to Genetic Counseling students. Focus on advanced psychosocial topics in genetic counseling along with social and legal issues in genetics and genetic counseling. Topics
including family dynamics, burden of disease, crisis intervention, dynamics of grief and bereavement, multicultural sensitivity, coping mechanisms, transference and countertransference, and disability organizations and advocacy. Practice exercises include role-playing in a range of advanced psychosocial situations, shadowing support groups and families, simulating patient full session under different scenarios including with intervention interpretations. Letter grading.

405. Professional Development in Genetic Counseling. (4) Lecture, four hours. Limited to Genetic Counseling students. Focus on professional development as genetic counselors are prepared to make the transition to practicing professionals in areas of job search, billing/insurance/coverage, service delivery, professional relationships and boundaries, clinical supervision experiences, and working with clients. Letter grading.

410. Translational Genomics. (3) Lecture, two hours. Limited to Genetic Counseling students, and open to medical genetics, molecular and cytogenetics fellows with permission. Introduction to next generation sequencing pipelines and bioinformatics pipelines for analyzing NGS data, clinical interpretation of variants using ACMG guidelines, various databases used for variant interpretation, interpretation of exome clinical reports, interpreting results to patients and families, and social, legal, and ethical implications of ELSI of genetic counseling. Hands-on laboratory-style experience to interpreting human exome/ge- nome variants for genetics professionals and trainees. Students acquire knowledge background to understand the technical and analytical aspects of exome/ge- nome test, make informed decisions about clinically relevant variants, and communicate results to patient or patient’s family. Attendance at weekly Genome Data Board meeting is required. Letter grading.

411. Foundations in Genetic Counseling Research. (2) Lecture, two hours. Limited to Genetic Counseling students. First of two-course series. Overview of research process, including literature review, research design, measurement methods, qualitative methods, and quantitative methods. Includes theory and elements of literature, data coding, data analysis tools, and interpretation of statistical results. Introduction to necessary tools to understand published research in genetic counseling and foundations necessary for design and conduct, and interpretation of their dissertation project. How to conduct human subjects research responsibly and understand informed consent process. Letter grading.

412. Research Applications in Genetic Counseling. (2) Lecture, two hours. Enforced requisites: course 411. Limited to Genetic Counseling students. Second of two-course series. Practical hands-on approach to conducting research. Offers more focused discussion on specific areas of research design and quantitative research. Students need to develop and conduct their capstone project and research in genetic counseling. Students brainstorm ideas for their capstone project, develop research questions, design and writing of MS thesis. May be repeated for credit. S/U grading.

413E. Ethical, Legal, and Societal Topics in Genetic Counseling. (2) Formerly numbered 413.) Lecture, two hours. Limited to Genetic Counseling students. Discussion of social, cultural, ethical, and legal issues in genetics and genetic counseling. Concurrently scheduled with course CM113. Letter grading.

414. Genetic Counseling Communication Seminar. (1) Seminar, one hour. Limited to Genetic Counseling students. Topics in communicating genetic counseling. A one-hour seminar to diverse audiences using various communication modalities, with emphasis on crafting presentations for health care, public, and advocacy audiences. Includes critical reading, review, and discussion of literature in context of creating effective communication for genetic counseling, medical management, genetic counseling, and genetics laboratory testing. S/U grading.

430. Clinical Applications of Cytogenetics and Molecular Techniques. (1) Lecture, one hour. Cyto- genetics and molecular laboratory techniques to diagnose human genetic disorders. Topics include types of abnormalities seen in human genetic disorders, patho- logical consequences associated with these abnormalities, recurrence risk, uses and limitations of common cytogenetic and molecular technologies in clinical testing, current nomenclature, and written components of laboratory reports. Includes laboratory tours. Letter grading.

431A. Fieldwork. (1) Fieldwork, three to four hours. Discussion, one hour. Limited to Genetic Counseling Students. First fieldwork rotation to establish basic skill sets of Genetic Counseling Students. Students are supervised by certified genetic counselors and medical geneticists. In group discussion setting, students present cases along with relevant psychosocial, ethical, and professional issues to engage in active reflection of clinical supervision experiences, understand dynamics and responsibilities of supervisor/supervisee relationship, and identify personal growth opportunities and limitations in scope of patient practice. S/U grading.

431C. Fieldwork. (5) Fieldwork, 15 to 20 hours; discussion, one hour. Limited to Genetic Counseling Students. Students use progressive genetic counseling skills with direct patient contact in different clinical settings. Students are supervised by certified genetic counselors and medical geneticists. In group discussion setting, students present cases along with relevant psychosocial, ethical, and professional issues to engage in active reflection of clinical supervision experiences, understand dynamics and responsibilities of supervisor/supervisee relationship, and identify personal growth opportunities and limitations in scope of patient practice. S/U grading.

431D. Fieldwork. (5) Clinical, 15 to 20 hours; discussion, one hour. Limited to Genetic Counseling Students. Students utilize progressive genetic counseling skills with direct patient contact in different clinical settings. Students are supervised by certified genetic counselors and medical geneticists. Students see complex cases, and activities include follow-up activities on genetic test orders, referrals, resources, explaining genetic test results to patients, presenting cases at relevant case conferences, follow-up of action items from case conference, and exploring and addressing psychosocial aspects of patient encounters. Responsibility for conducting genetic counseling session from beginning to end. In group discussion setting, students present cases along with relevant psychosocial, ethical, and professional issues to engage in active reflection of clinical supervision experiences, understand dynamics and responsibilities of supervisor/supervisee relationship, and identify personal growth opportunities and limitations in scope of patient practice. S/U grading.

431E. Fieldwork. (5) Clinical, 15 to 20 hours; discussion, one hour. Limited to Genetic Counseling Students. Students use progressive genetic counseling skills with direct patient contact in different clinical settings. Students are supervised by certified genetic counselors and medical geneticists. Students see complex cases, and activities include follow-up activities on genetic test orders, referrals, resources, explaining genetic test results to patients, presenting cases at relevant case conferences, follow-up of action items from case conference, and exploring and addressing psychosocial aspects of patient encounters. Responsibility for conducting genetic counseling session from beginning to end. In group discussion setting, students present cases along with relevant psychosocial, ethical, and professional issues to engage in active reflection of clinical supervision experiences, understand dynamics and responsibilities of supervisor/supervisee relationship, and identify personal growth opportunities and limitations in scope of patient practice. S/U grading.

588. MS Thesis Research and Writing. (2 to 12) Tutorial, to be arranged. Preparation of research data and writing of MS thesis. May be repeated for credit. S/U grading.

INDO-EUROPEAN STUDIES
Interdepartmental Program College of Letters and Science
100 Dodd Hall Box 951417
Los Angeles, CA 90095-1417

Indo-European Studies 310-825-4171
Brent H. Vine, PhD, Chair

Faculty Committee
David M. Goldstein, PhD (Linguistics)
Stephanie W. Jamison, PhD (Near Eastern Languages and Cultures)
Brent H. Vine, PhD (Classics)
Anthony D. Yates, PhD (Near Eastern Languages and Cultures)

Overview
The primary focus of the interdisciplinary Indo-European Studies program is the study of the ancient Indo-European languages and of their reconstructed ancestor, Proto-Indo-European, based on methods drawn from comparative-historical, theoretical, and computational linguistics. Goals of this study include the reconstruction of the Proto-Indo-European language, elucidating its subsequent development into the historical Indo-European languages, and showing how data from the archaic Indo-European languages contribute to a theory of language. There is also attention to other aspects of the nonmaterial culture of the speakers of Proto-Indo-European (such as social structure, religious beliefs, mythology, and po-
**Graduate Major**

**Indo-European Studies MA, CPhil, PhD**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Indo-European Studies Lower-Division Courses**

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illustrating many paths of discovery at UCLA. P/NP grading.

M20. Visible Language: Study of Writing. (5) (Same as Asian M20, Near Eastern Languages M20, Slavic M20, and Southeast Asian M20) Lecture, three hours; discussion, one hour. Consideration of concrete means of language representation in writing systems. Earliest representations of language known are those of Near East dating to end of 4th millennium BC. While litere civilizations of Egypt, Indus Valley, China, and Mesoamerica left little evidence of corresponding earlist development of writing, and, in case of China and Mesoamerica, their evident isolation mark these centers as loci of independent developments in writing. Basic characterstics of early scripts, assessment of modern alphabetic writing systems, and prentation of conceptual basis of semiotic language representation. Origins and development of early non-Western writing systems. How Greco-Roman alphabet arose in the 7th millennium BC and how it compares to other modern writing systems. P/NP or letter grading.

M70. Language and Evolution. (5) (Same as Linguistics M4.) Lecture, three hours; discussion, one hour. Homo Sapiens is only species on Earth with capacity to create arbitrary but meaningful utterances from small inventory of speech sounds. How and why our species developed this ability is question of fundamental scientific and humanistic importance. Survey of origin of human language from number of intellectual perspectives, including linguistics, anthropology, and evolutionnary biology. Exploration of relationship between language faculty and linguistic theory. P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-divi- sion lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities. May be repeated for credit. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-divi- sion students under guidance of faculty mentor. Stu- dents must be in good academic standing and en- rolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

**Upper-Division Courses**

131. European Archaeology: Neolithic to Bronze Age. (4) Lecture, four hours. Survey of European cultures from beginning of food-producing economy in 7th millennium BC to beginning of Bronze Age in 3rd millennium BC. P/NP or letter grading.

132. European Archaeology: Bronze Age. (4) Requi- rements: course 131. Lecture, four hours. Survey of European cultures from around 3000 BC to the period of destruction of the Mycenaean culture about 1200 BC. Aegean area and rest of Europe.

140. Food, Language and Myth. (4) Lecture, three hours; discussion, one hour. Introduction to study of food in fields of linguistics and mythology. What is special about language used to talk about food, what is history of food words, and how does language im- part appreciation of food? How do myths and narra- tives revolving around food function in different cul- tures? Students explore history of food words and learn how to analyze myths. Students become aware of how language in food is manipulated and how to tell more effective stories about food. P/NP or letter grading.

M150. Introduction to Indo-European Linguistics. (3) (Same as Linguistics M150.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requi- site: Linguistics 1 or 20. Indo-European languages (ancient and modern), including their relationships, chief characteristics, writing systems, and sociolin- guistic contexts; nature of reconstructed Indo-Euro- pean proto-language and proto-culture. One or more Indo-European languages may be investigated in detail. P/NP or letter grading.

C160. Indo-European Comparative Mythology and Poetics. (4) Seminar, three hours. Preparation: famili- arity with at least one ancient Indo-European lan- guage. Comparison of major Indo-European mytho- logical and poetic traditions and reconstruction of their common sources. Topics include divinities and their names; symbolic systems in social context; myths, folk narratives, belief systems; relations with linguistic morphology and syntax. P/NP grading.

M168A. Introductory Hittite. (4) (Formerly numbered M168A) Lecture, three hours. Recommended preparation: knowledge of language with case system. Introduction to Hittite grammar by series of graded lessons covering mor- phology and syntax and reading of selected texts from variety of genres. P/NP or letter grading.

M168B. Introductory Hittite. (4) Lecture, recommended: course M168A. Readings of selected Hittite texts from variety of genres and historical periods. Individual topics in synchronic and historical grammar of Hittite and in history and culture of Hittites are treated in detail. P/NP or letter grading.

M172. Elementary Luwian. (4) (Same as Ancient Near East M172.) Lecture, three hours. Recommended preparation: knowledge of language with case system. Introduction to Luwian grammar through lectures covering morphology and syntax, and readings of selected texts in Luwian language. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate upper-division lecture course. Exploration of topic in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible stu- dents. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. De- signed as adjunct to upper-division lecture course. In- dividual study with lecture course instructor to explore topics in greater depth through supplemental read- ings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract re- quired. Honors content noted on transcript. Letter grading.

**Graduate Courses**

238. Analyzing Historical Texts. (4) (Same as His- tory M266C and Linguistics M238) Seminar, four hours. Designed for graduate students. Analysis of lin- guistic structure and ethnohistorical context of legal and other documents written by native-speaking scribes and translators. Topics include paleographic technique and text analysis software. May be repeated for credit. S/U grading.

240. Comparative and Historical Grammar of Anatol- ian. (2 to 4) Lecture, three hours. Requisites: courses M150, M168A. Survey of comparative and historical grammar of Anatolian languages, with special focus on its implications for Indo-European reconstruction and for language change broadly. Grammatical fea- tures are observed in context through readings of rep- resentative texts from Anatolian languages including Hittite, Luwian, Lycian, and Palaic. S/U or letter grading.

250A-250B. European Archaeology. (4–4) Seminar, three hours. Studies in ancient European archaeologi- cal materials and their relationship to Near East, Western Siberia, and Central Asia. May be repeated for credit. In Progress (250A) and S/U or letter grading (250B) grading.

C260. Indo-European Comparative Mythology and Poetics. (4) Seminar, three hours. Preparation: ability to read original sources in at least one ancient Indo- European language. Comparison of major Indo-Euro- pean mythological and poetic traditions and recon- struction of their common sources. Topics include di- vinities and their names; symbolic systems in social context; myths, folk narratives, belief systems; rela- tions with other traditions; literary continuations of mythopoeic material. Concurrently scheduled with course C216. S/U or letter grading.

Overview
The Department of Information Studies has one of the top-ranked programs of its kind in the country and has developed an international reputation in the areas of information policy, information-seeking behavior, user interface development, archives, preservation, and cataloging. Whether students choose to pursue a master’s degree or a doctorate degree, they graduate with a broad understanding of both theory and practice.

For information about the Information Studies department and programs, see the department website.

Career Prospects
Students with Master of Library and Information Science (MLIS) degrees go on to careers as librarians, archivists, and information professionals in a variety of organizational settings. The Doctor of Philosophy (PhD) focuses on the preparation of scholars in the field.

Undergraduate Minor
Information and Media Literacy Minor
The Information and Media Literacy minor is designed for students who wish to augment their major program with a group of related courses that provide a systematic, focused, and critical introduction to information and media literacies. The core courses together with electives provide students with an understanding of the processes, dynamics, and societal implications of the production and dissemination of information and media and skills for their judicious evaluation, consumption, and productive use.

Admission
To enter the minor, students must have a cumulative grade-point average of 2.3 or better, have completed one required lower-division or upper-division course with a grade of B or better, and submit the minor application. Applications are available on the minor website.

The Minor
Required Lower-Division Core Courses (10 units):
Two courses selected from Information Studies 10, 20, 30.

Required Upper-Division Core Courses (9 units):
Information Studies C115, M121 (or Education M121).

Upper-Division Elective Courses (12-15 units):

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
Each minor course must be taken for a letter grade and be a minimum of 4 units. Students must have a cumulative grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Majors
Information Studies PhD
Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Master of Library and Information Science
Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Concurrent Degree Program
Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

• Master of Library and Information Science/Latin American Studies MA

Information Studies
Lower-Division Courses
10. Information and Power. (5) Lecture, four hours. Introduction to core concepts of information and power and relation between them in range of social, economic, political, cultural, technological, and institutional contexts. Topics include markets and economies; cultural and media institutions; state interests in information; conflict and warfare; information organization, classification, and access; power and technology infrastructure; and intellectual freedom. Letter grading.
19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and stimulating many paths of discovery at UCLA. P/NP grading.

20. Digital Cultures and Societies. (5) Lecture, four hours. Examination of social and cultural contexts of global digital networks and systems. Exploration of ethical, infrastructural, and political questions raised at intersection of technologies and cultures. Topics include data surveillance, algorithms, artificial intelligence (AI) systems, digital economies and labor, social media cultures and non-Western systems of technology, digital media literacies, and more. Letter grading.

30. Internet and Society. (5) Lecture, four hours. Introduction to key historical and sociotechnical developments that have given rise to today’s Internet and related information and communication technologies, from networks and telecommunication in 20th century to contemporary digital networks and platforms. Focus on economic, political, and cultural consequences of those developments and technologies in society today. Letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course(s). Four hours. Exploration of topic(s) in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

97. Variable Topics in Information Studies. (4) Seminar, four hours. Designed for freshmen/sophomores, but open to other students. Exploration of changing set of basic concepts and issues in study of information, information technology, and society and culture at introductory level. May be repeated for credit with consent of instructor. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students may use modules and data collected in units and rolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses C115. Introduction to Information Literacies. (4) Lecture, two hours. Introductory introduction to the present and historical role and impact of information literacy—ability to identify, locate, critically evaluate, use, and create information effectively and ethically, for personal, professional, and civic purposes. Topics include the practice and theory related to impact of economic, legal, and social/environmental issues on development of access to, use, and assessment of information, currently and historically; developing and refining information researching questions; conducting effective information researching; distinguishing among and critically evaluating information researching tools such as Google and databases, as well as types of items, such as ads, opinions, and factual studies; documenting sources used in information researching; effectively helping others learn information researching and critical thinking skills and abilities. Letter grading.

115. Data and Ethics in Society. (5) Seminar, four hours; discussion, one hour. Exploration of moral, social, political, and ethical ramifications of choices we make at different stages in social construction of data. Includes cultivation of ethical analysis of processes of data collection, data mining, data storage, and deployment of data affected by variety of different communities, publics, nation-states, and individuals. Students learn basics of data ethics frameworks to assess range of data-driven projects and platforms. Students gain understanding of social, historical, and political dilemma of big data, algorithmic decision-making, predictive analytics, and distinct challenges associated with ethical, civil-, human-, and sovereign-rights models of engaging modern digital information era. Letter grading.

M121. Introduction to Media Literacies. (5) Same as Education M121.) Seminar, four hours. Exploration of relationships between media, technology, and popular culture. Students guided to analyze media representations, question process of normalizing dominant ideologies, and communication messages. Through application of critical media literacy framework, students expand notions of literacy to be more inclusive of all types of texts; and deepen their abilities to read images, and resist or negotiate to represent social and environmental injustice. Letter grading.

M135. Environmental Justice through Lens of Media and Education. (5) Same as Education M135.) Seminar, four hours. Exploration of human relationships with natural world, historically and today. Students take critical look at ways information has been shaped, audiences positioned, and movements manipulated to promote commercial interests over public good. Exploration of progressive movements that have in past challenged—and currently challenge—neoliberal agendas, extractive policies, and unsustainable practices. Letter grading.

M137. Critical Digital Media Literacies. (4) Same as Education M137.) Lecture, four hours. Students question relationships with digital media and information technologies, evolution of literacy, development of communication technologies are improving society, strengthening democracy, and opening up opportunities for challenging hegemony and promoting social transformation. Problematization of social media and question process of normalizing dominant ideologies to create counter-hegemonic media messages. Combines theoretical foundations of cultural studies and critical pedagogy with practical applications of new digital technologies to present traditional print-based means of communication. Exploration of media representations of race, class, gender, sexual orientation, and other identity markers. Students analyze and create media projects related to education. Letter grading.

139. Letterpress Laboratory. (1) Laboratory, one hour. Hands-on printing experience in letterpress shop designed to give students in information studies, design, or other disciplines who do not have previous experience a basic instruction provided, and students work on group project for duration of term. May be repeated twice. P/NP grading.

160. Special Topics in Information Studies. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Selected topics or issues related to social, cultural, economic, or political aspects of information and information systems. Consult Schedule of Classes for topics and instructors. May be repeated once for credit with topic change. P/NP or letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar and preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 885 course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

191. Directed Research in Information Studies. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. Individual contract required. Letter grading.

Graduate Courses 200. Information in Society. (4) Lecture, two hours; discussion, two hours. Examination of processes by which information and knowledge are created, integrated, disseminated, organized, used, and preserved. Topics include technology, information professions, evolution of literacy, development of information professions, and social issues related to information access. Letter grading.

201. Ethics, Diversity, and Change in Information Professions. (4) Lecture, two hours; discussion, two hours. Service learning course that serves as forum to discuss, learn, and understand ethical challenges of modern information society and how it interacts with professional community, and individual views and impact professional practice, decision making, and public policy. Letter grading.

202. History of Books and Library Technologies. (4) Lecture, two hours; discussion, 90 minutes. Issues in history of books, writing, and literacy technologies. Investigation of invention of writing, diverse cultural concepts of literacy, earliest use of systematic notation systems in Mesopotamia, and current development of devices and practices that shape contemporary books and libraries. Discussion of processes and practices of bookmaking and printing in multiple traditions and cultures, as well as their influence on information access and its role in different societies. Letter grading.

206. Introduction to Economics of Information. (4) Seminar, three and one half hours. Introduction to key concepts, scholars, and studies in economics of information. Topics include economic value and measurement of information, information industries and markets, public goods theories of knowledge and information, network externalities, consequences of intellectual property regimes, information and economic development, and public policy issues, civil liberties and civil rights, censorship, and other restraints on access to information. Letter grading.

207. Information in Society. (4) Lecture, four hours. Preparation of processes by which information and knowledge are created, integrated, disseminated, organized, used, and preserved. Topics include theory, information professions, and social issues related to information access. Letter grading.

208. Scholarly Communication and Bibliometrics. (4) Lecture, four hours. Preparation: one inferential statistics course. Survey of current theory, method, and empirical studies at intersection of scholarly communication and bibliometrics, seeking to understand factors that determine how research is communicated, through printed, electronic, or other media. Letter grading.

210. Global Media and Information. (4) Lecture, three and one half hours. Question of what diversity and culture mean in era of distributed networks and massive information diffusion and socialization. Part of this involves problem of how to work with differing ways of knowing, with differing ontologies. It is now widely accepted that global cultures and communities differ in...
way they practice knowledge, understanding, and making meaning of their worlds. How do we draw boundaries around culture and community? How has this defined a sense of personal, cultural, and historical heritage? How does this understanding shape our present? How do we incorporate and use values. Letter grading.

21.1. Artifacts and Cultures. (4) Lecture, two hours; discussion, two hours. Exploration of social, cultural, and technological evolution through which information and evidence are authored, published, collocated, exchanged, preserved, and accessed. Examination of these artifacts and their properties, types, and relationships: media; categories; materials; structures; content, components, subjects, structures, functions, aesthetic qualities, roles, costs, affordances, and use values. Letter grading.

21.2. Values and Communities in Information Professions. (4) Lecture discussion, two hours. Forum to discuss, understand, and critique value systems and power structures embedded in information and work in diverse societies. Exploration of importance of thinking through grassroots, in design, evaluation, and engagement with information institutions and technologies, ranging from archives and libraries to Internet. Aspects of information society that shape Hu and, social, political, professional, and individual values, including exploration of impact of such values on professional practice, decision making, and public policy. Letter grading.

21.3. Current Issues in Librarianship. (4) Lecture, two and one half hours; discussion, one hour. Overview of historical and evolving conceptual foundations of librarianship, including social analysis of information systems, values and design, infrastructure dynamics, user experience, and prospective analysis. S/U or letter grading.

21.4. Informatics: Principles and Practices. (4) Lecture, three and one half hours. Theories, principles, and professional practices of informatics, including social analysis of information systems, values and design, infrastructural dynamics, user experience, and prospective analysis. S/U or letter grading.

21.5. Introduction to Information Literacy. (4) formerly numbered 446. Lecture, four hours. Instructional introduction to current and historical role and impact of information literacy—ability to identify, locate, critically evaluate, use, and create information effectively and ethically, for personal and scholarly uses. Topics include theory and practice related to impact of economic, legal, and social/environmental issues on development of, access to, and use of information. Emphasis on development and utilization of personal and professional knowledge, skills, and abilities of children through individualized reading guidance. S/U or letter grading.

21.6. Environmental Protection of Collections for Museums, Libraries, and Archives. (4) (Same as Conservation M238.) Lecture, two hours; laboratory, two hours. Emphasis on management of access, communication, and accountability of information, including the identification of strategic issues, challenges related to preserving born-digital/born-networked/digitized materials (e.g., electronic records, spreadsheets, scientific simulations, digital humanities environments, sound and moving image materials, social media and personal digital archives). Implications for digital preservation of new technologies and their applications. Letter grading.

21.7. Information Services in Culturally Diverse Communities. (4) Lecture, two hours. Examination of provision of information services in multicultural and multilingual society. Understanding role of information institutions in promoting cultural diversity and preserving ethnic heritage. Letter grading.

22. Assessment, Measurement, and Evaluation of Information Organizations and Services. (4) Lecture, four hours. Introduction to assessment and evaluation as formal processes of inquiry with individual components, including demonstration of research planning, decision making, and accountability in information organizations. Review and implementation of various methods appropriate to design of assessment and evaluation studies. S/U or letter grading.

22.9. Introduction to Slavic Bibliography. (2) (Same as Slavic M229.) Lecture, two hours. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined in relation to requirements of individual students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of online databases connected to Slavic studies. S/U grading.

232. Records and Information Resources Management. (4) Lecture, three hours. Introduction to records and information management resources in corporate, government, and other organizational settings, including analysis of organizational information flow, classification and filing systems, records retention scheduling, records protection and security, reprographics and image management technology, and litigation support. Letter grading.

238. Environmental Protection of Collections for Museums, Libraries, and Archives. (4) (Same as Conservation M238.) Lecture, two hours; laboratory, two hours. Emphasis on management of access, communication, and accountability of information, including the identification of strategic issues, challenges related to preserving born-digital/born-networked/digitized materials (e.g., electronic records, spreadsheets, scientific simulations, digital humanities environments, sound and moving image materials, social media and personal digital archives). Implications for digital preservation of new technologies and their applications. Letter grading.

239. Letterpress Laboratory. (1) Laboratory, two hours. Hands-on printing experience in letterpress shop designed to give students in information studies, design, or other disciplines understanding of printing process. Basic instruction provided, and students work on project group for duration of term. S/U grading.

240. Management of Digital Records. (4) Lecture, three hours. Introduction to systems management of digital administrative, information, communications, imaging, or research systems and records. Topics include electronic recordkeeping, enterprise and risk management, information privacy, and confidentiality. Letter grading.

241. Digital Preservation. (4) Lecture, three and one half hours. Nature of digital media and networking new systems and metadata that are specifically designed to manage preservation process; new ethical, rights, and collaborative frameworks; and economic, legal, and policy tools with which to manage digital information over long term. Introduction to strategies, techniques, and standards, as well as ongoing challenges related to preserving born-digital/born-networked/digitized materials (e.g., electronic records, spreadsheets, scientific simulations, digital humanities environments, sound and moving image materials, social media and personal digital archives). Implications for digital preservation of new technologies and their applications. Letter grading.

242. Collection Management for Archives, Libraries, and Museums. (4) (Same as Conservation M242.) Lecture, two hours; fieldwork, two hours. How conservators work together with curators, collections managers, mount makers, designers, and registrars to permit collections to be both accessed and preserved. Letter grading.

245. Information Access. (4) Lecture, two hours; discussion, one hour. Topics include: courses 200, 280, provides fundamental knowledge and skills enabling information professionals to link users with information. Overview of structure of literature in different fields; information seeking behavior and communication with users; development of search strategies using print and electronic sources. Letter grading.

246. Information-Seeking Behavior. (4) Lecture, three hours; discussion, one hour. Study of factors and influences, both individual and social, associated with human beings needing, using, and acting on information. Topics include information theory, human information processing, information flow among social and professional groups, and research on information needs and uses. Letter grading.

253. Medical Knowledge Representation. (4) (Same as Bioengineering M226.) Seminar, four hours; outside study, eight hours. Designed for graduate students. Issues related to medical knowledge represen- tation and its application in healthcare processes. Topics include data structures used for representing knowledge (conceptual graphs, frame-based models), different data models for representing spatio-temporal information, rule-based implementations, current statistical methods for database analysis, (data mining, statistical classifiers, and hierarchical classification), and basic information retrieval. Review of work in constructing ontologies, with focus on problems of content, standardization, and terminologies (SNOMED, UMLS). Letter grading.

254. Medical Information Infrastructures and In-ternet Technologies. (4) (Same as Bioengineering M226.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Introduction to networking, communications, and information infrastructures in medical environment. Emphasis on basic concepts related to networking at several levels: low-level (TCP/IP, services), medium-level (network topologies), and high-level (distributed computing, Web-based services) implementations. Commonly used medical communication protocols (HL7, DICOM) and current medical information systems (HIS, RIS, PACS). Advancement in networking, security, medical ontologies, peer-to-peer technologies, grid/cloud computing, introduction to security and encryption in networked environments. Letter grading.

255. Medical Decision Making. (4) (Same as Bioengineering M226.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Overview of issues related to medical decision making. Introduction to concept of evidence-based medicine and decision processes resulting from data and outcomes. Basic probability and statistics to understand research results and evaluations, and algorithmic methods for decision-making processes (Bayes theorem, decision trees). Study design, hy-

256A. Data Management and Practice. (4) Lecture, three and one half hours. Designed for MLIS and PhD students. Survey of landscape of data practices and services used by businesses and institutions. Analysis of theoretical and practical impacts of technology and services. Letter grading.

260. Description and Access. (4) Lecture, three and one half hours. Social, cultural, and technical prac-tices—formal and informal, institutional and per-sonal—through which documents, records, and other forms of information are organized and represented. Design, development, and evaluation of techniques and tools, including data models, metadata schemata, search engines, and management systems in support of curatorialship, stewardship, discovery, and use. Letter grading.

262A. Data Management and Practice. (4) Lecture, three and one half hours. Designed for MLIS students. Continuation of course 262A to address topics of data curation and policy in more depth. Data selection and ap-praisal, archives and repositories, economics of data management, data citation and metrics, technologies for data access and curation, provenance, intellectual property, policy roles of multiple stakeholders in data, and institutional challenges in curation and stewardship of research data. Assessment of data archives and repositories and group project to curate actual data of UCLA researchers in other academic depart-ments. Letter grading.

270. Systems and Infrastructures. (4) Lecture, four hours. Social, cultural, and technical practices through which digital information is collected, managed, and transmitted over the various infrastructure networking systems. Letter grading.

272. Human/Computer Interaction. (4) Lecture, four hours. Survey of social, behavioral, design, and evalu-ation issues in human-computer interaction, with read-ings from several disciplines. Extensive use of tech-nology demonstrations and class discussions. Recom-mended for students in any discipline involved in design or implementation of information technologies. Letter grading.

274. Database Management Systems. (4) Lecture, three hours; laboratory, two hours. Theories, prin-ciples, and practicalities of database systems, including data models, retrieval mechanisms, evaluation methods, and storage, efficiency, and security consider-ations. S/U or letter grading.

275. Community Media and Design. (4) Lecture, two hours; laboratory, two hours. Focus on information professionals, scholars, activists, and information creators/designers/architects focus on questions of culture and community to engage students in understanding infor-mation resources as cultural objects. Role of cultural heritage institutions within dynamics presented, but mostly fundamentally on how communities in partner-ship with information professionals can create, author, and represent information on their own and within their own terms. How new media can begin to serve as tool of empowerment rather than stratification. Study of impacts of technology on larger scales through read-al of core policies and practice. Letter grading.

276. Information and Visualization. (4) Lecture, two hours; discussion, 90 minutes. Access to and analysis of information through visualization has become in-creasingly prevalent as digital tools have made cre-ation of such visualizations easier and more popular. Many software tools for such visualizations come from statistical packages; others come from GIS or spatial mapping, while others are more diagrammatic in de-sign. Basic organization of data visualizations depends on visualization of function, structure of and assumptions about user experience, and other graph-ical features that embody models of information in daily life. This course will explore what visualization presents arguments about knowledge? What historical and critical tools can be brought into useful dialog with contemporary visualizations? Letter grading.

279. User Experience Design. (4) Seminar, four hours. Preparation: at least one course from 246, 272, 276, 277, 455. Requisite: courses 200, 260. Content from forthcoming book, focusing on speci-fied topics such as vocabulary control, file design, in-dexing, classification, text processing, measurement of relevance, evaluation of information systems, and social and policy visualization. Letter grading.

281. Historical Methodology of Information Studies. (4) Lecture, four hours. Prerequisite: course 200. In-trusion to historical research as it relates to library and information science. Identification of key primary and secondary source material for writing history in field. Critical analysis of selected histories of various areas in the profession. Problem-oriented approach. Letter grading.

282. Design as Research Method. (4) Seminar, three and one half hours. Theories, principles, and applica-tion of design as methods for discovery, exploration, and evaluation of user requirements, functionality, values, and system structure. S/U or letter grading.

286. Research Apprenticeship Course. (2 to 4) Sem-inar, two hours. Use of mentorship model of training graduate students in information studies, with focus on development of graduate student research topics. Assignment of common readings related to these topics; students have opportunity to offer and receive feedback. May be repeated for credit. S/U grading.

289. Seminar: Special Issues in Information Studies. (4) Seminar, three and one half hours. Identification, analysis, and discussion of critical intellectual, social, and technological issues facing the profession. Topics may include (but not limited to) expert systems, lit-eracy, electronic networks, youth at risk, information literacy, historical bibliography, digital archives, elec-tronic media, etc. May be repeated with topic change. Letter grading.

290. Research Seminar: Information Studies. (1 to 2) Seminar, one to two hours. Designed for PhD stu-dents. Emphasis on recent contributions to theory, re-search, and methodology. May be repeated for credit. S/U grading.

291A. Doctoral Seminar: Theoretical Traditions in In-formation Studies. (4) Seminar, four hours. Nature of information studies—ontological, epistemological, and ethical foundations of information arts and sciences. Conceptions, theories, and models of information; information-related artifacts, agents, con-texts, institutions, practices, properties, values, and relations. Letter grading.

291B-291C. Special Topics in Theory of Information Studies. (4–4) Seminar, four hours. Enforced requisite for course 291C; course 291A. Topics include informa-tion and evidence—record-keeping and memory-making, personal—through which documents, records, and other forms of information are organized and represented. Design, development, and evaluation of techniques and tools, including data models, metadata schemata, search engines, and management systems in support of curatorialship, stewardship, discovery, and use. Letter grading.

298A. Doctoral Seminar: Research Methods and Design. (4) Seminar, four hours. Survey of quantitative, qualitative, and historical research designs. Ethical is-sues; conceptualization and measurement; indexes, scales, and sampling; experimental, survey, field, and evaluation research; data analysis. Letter grading.

298B-298C. Special Topics in Methodology of Infor-mation Studies. (4–4) Seminar, four hours. Enforced requisite for course 298C; course 298A. Topics in-clude anthropological fieldwork methods, archival methodology, bibliographical studies, textual analy-sis, discourse analysis, historical methods, informa-tion visualization, network analysis—bibliometrics, in-formetrics, scientometrics, social network analysis. Letter grading.

375. Teaching Apprenticeship Practicum. (1 to 4) Sem-inar, to be arranged. Preparation: apprentice per-sonnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guid-ance and supervision of regular faculty member re-sponsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

400. Professional Development and Portfolio De-sign. (2 to 4) Lecture, two hours; discussion, two hours. Preparation: completion of information studies core courses. Drawing on literature from many fields, exploration of issues related to professional develop-ment, such as career planning, continuing education, mentoring, and reflexive practice; students also en-gage in process of guided portfolio design for MLIS degree. S/U grading.

410. Management Theory and Practice for Informa-tion Professionals. (4) Lecture, two hours; discussion, two hours. Principles and practice of management in all types of organizations where information profession-als work. Letter grading.

422. College, University, and Research Libraries. (4) Lecture, four hours. Organization, administration, col-lections, facilities, finances, and problems of college and university libraries and their relationships within institutions of which they are part. Functions of re-search libraries and work of their staffs in serving scholars. Letter grading.

425. Library Services and Programs for Children. (4) Lecture, two hours; discussion, two hours. Theory and practice of service to children in public libraries. Overview of professional library service to children aged 14 and under; provides opportunities for students to gain experience in particular skills needed to provide that service. Discussion of special challenges in working with young people and psychology of teenagers. S/U or letter grading.

427. Young Adult Services. (4) Lecture, 90 minutes; discussion, two hours. Theory and practice of service to teens and tweens in libraries. Overview of professional library service to youth aged 11 and over; opportunities for students to gain experience in particular skills needed to provide that service. Discussion of special challenges in working with young people and psychology of teenagers. S/U or letter grading.

431. Archives, Records, and Memory. (4) Lecture, four hours. Overview of historical and evolving conceptual foundations, major professional institutions, key practices, and contemporary issues and concerns of archival studies and American archival profession, as well as fields interested in archives, records, and memory. S/U or letter grading.

433. Community-Based Archiving. (4) Lecture, three and one half hours. Builds on student understanding of and experience with community-based development of practical strategies for documenting their activities; managing, collecting, and preserving their records and other historical and cultural materials; and non-centric community research. Students required to reflect critically on questions about definition, community memory and recordkeeping practices, motivations, positional and political advocacy, funding, and long-term sustainability, ownership, access and use, technological implementation, and collaborations. Letter grading.

434. Archival Use and Users. (4) Lecture, three and one half hours. Prerequisite: course 431. Examination of who uses archives and why, with ultimate goal of creating ways to better understand and meet needs of these users as well as engage new audiences in archival users. While students have traditionally conceived of their users as academic researchers, more thorough investigations explore this conception of users to include genealogists, artists, K-12 students and educators, families of victims of human rights abuse, community members, and members of general public. Methods for studying users, ways to conduct outreach to target user groups, and ways in which archivists can engage public. Letter grading.

438A. Seminar: Advanced Issues in Archival Science—Archival Appraisal. (4) Seminar, four hours. Prerequisite: course 431. Examination and evaluation of contributions of archival appraisal theory; identification and evaluation of distinct movements in archival appraisal; identification of cultural, political, sociological, and technological movements that can have impact on appraisal methodologies. Letter grading.

438B. Seminar: Advanced Issues in Archival Science—Archival Description and Access Systems. (4) Seminar, four hours. Prerequisite: course 431. Exploration of archival description and access systems in the U.S. and their development since World War II; data collection; access tools and implications of these issues in development of online archival access systems. Letter grading.

439. Seminar: Special Collections. (4) Seminar, two hours; discussion, 90 minutes. Students work with special collections materials on one focused theme or topic and have to think through research aspects of exhibit or symposium or collection assessments and then create well-focused and curbed agenda for presentation, exhibition, or preservation of materials. Letter grading.

463. Indexing and Thesaurus Construction. (4) Lecture, four hours. Prerequisites: design and methods of construction of thesauri. Evaluation and overview of thesauri used in manual and online environments. Basic professional techniques for indexing variety of types of materials and for preparing informative and indicative abstracts. Letter grading.

464. Metadata. (4) Lecture, four hours. Introduction to variety of metadata provided for digitized and other electronic information resources. Introductory theory and practice of designing and applying metadata. S/U or letter grading.

480. Introduction to Media Archiving and Preservation. (4) Seminar, four hours. Overview of history, conceptual foundations, policies, institutions, and professional methods that have shaped collections of audiovisual materials from early 20th century to present. Introduction to fundamental archival concepts and key practices, including collection development, appraisal, preservation, restoration, arrangement and description, and critical analysis of their specific application to media collections and materials. Discussion of classical and emergent models for media archive administration, including funding, programming, outreach, access, and reuse; changing role of technology in media creation, collection, and preservation; ethics and community standards; different roles of public, private, and national media archives; and cultural impact of historical and contemporary audiovisual media. Letter grading.

495. Teaching Assistant Training Seminar. (2) Seminar, two hours. Limited to departmental doctoral students. Preparation for teaching assistant appointments in departmental undergraduate courses. Principles of instructional design and evaluation, curriculum development, instructional technology use, and key teaching issues (diversity, students with disabilities, academic integrity, copyright). S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (1 to 8) Tutorial, to be arranged. Directed special studies in fields of bibliography, librarianship, and information science. Variable conference time depending on nature of study or complexity of research. No more than 8 units may be applied toward course requirement for MLS degree. S/U grading.

597. Directed Studies for PhD Qualifying Examinations. (2 to 12) Tutorial, to be arranged. S/U grading.

598. MLS Thesis Research and Writing. (2 to 8) Tutorial, to be arranged. Designated for graduate library and information science students. Supervised independent research for candidates in MLS thesis option. S/U grading.

599. PhD Research and Writing. (2 to 12) Tutorial, to be arranged. S/U grading.

Faculty Roster

Professors
Gene D. Block, PhD, Chancellor
Scott H. Chandler, PhD
Rachel H. Crosbie, PhD
Mark A. Frye, PhD
David L. Glanzman, PhD
Fernando Gómez-Pinilla, PhD, In Residence
Walter H. Metzner, PhD
Ketema N. Paul, PhD
Patricia E. Phelps, PhD
Gina R. Poe, PhD (Eleanor Leslie Professor of Innovative Brain Research)

Overview

The cornerstone of the Physiological Science major is vertebrate physiology, with emphases on integrative functions. The research and educational programs of the Department of Integrative Biology and Physiology focus on integrative physiology at several levels of organization from molecules to living organisms, microscopic structures to macroscopic organization, and cellular properties to organ functions. Students receive comprehensive instruction in all areas of physiological science, while elective courses reflect faculty research expertise, including developmental neurobiology, gene regulation/neural development, cellular neurobiology, molecular neurobiology, neuromuscular physiology, neuroendocrine physiology, cardiac physiology, diet and degenerative disease, auditory and visual behavior, biomechanics of rehabilitative medicine, muscle cell biology, inflammatory cell biology, vascular biology, cardiac electrophysiology, neuromotor control, and social control of neuronal plasticity.

Undergraduate Major

Physiological Science BS

Learning Outcomes

The Physiological Science major has the following learning outcomes:

- Demonstrated broad-based knowledge of the fundamentals of anatomy and vertebrate physiology
- Demonstrated ability to address scientific questions or solve problems using quantitative and inquiry-related skills, including developing hypotheses, designing and performing experiments, analyzing data, and interpreting results
- Reading and understanding of primary scientific literature
- Understanding key questions and hypotheses
- Interpretation of results and conclusions
- Discrimination of quality through critique
- Appreciation for research by participating in one or more laboratory experiences
- Value science and research and their relevance to one's own life and society

Entry to the Major

Admission

To enter the Physiological Science major, students must complete Chemistry and Biochemistry 14A, 14B, and 14C, or 20A, 20B, and 30A, Life Sciences 7A, 7B, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, or Life Sciences 30A, 30B, and 40, or Statistics 13, and Physics 1A or 5A, with a minimum grade of C in each course and a grade-point average of 2.5 or better in all before fall quarter of their third year. Repetition of more than one of these nine preparation courses results in denial of admission to the major. After successful completion of the courses, students must contact the Undergraduate Advising Office to declare the major.

Transfer Students

Transfer applicants to the Physiological Science major with 90 or more quarter units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 7A, 7B, and 7C, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Transfer credit for UCLA Extension coursework and for any departmental courses is subject to prior approval by the department; consult with the undergraduate counselor before enrolling in any courses for the major.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Life Sciences Core Curriculum

Required: Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 5A, 5B, and 5C.

Graduate Major

Physiological Science MS

Applicants interested in pursuing graduate study may apply directly to the interdepartmental Molecular, Cellular, and Integrative Physiology PhD program or the interdepartmental Neuroscience PhD program.

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.
Physiological Science

Lower-Division Courses

3. Introduction to Human Physiology. (5) Lecture, three hours; laboratory, two hours. Not open to Physiological Science majors. Courses 3 and 5 may be taken independently, concurrently, or in either sequence. Understanding human body, its organization from molecular to cellular to tissues and organs, and how component parts function in integrated manner to permit life as we know it. P/NP or letter grading.

5. Issues in Human Physiology: Diet and Exercise. (5) Lecture, three hours; discussion, 30 minutes; laboratory, 90 minutes. Not open to Physiological Science majors. Basic introduction to principles of human biology, with special emphasis on roles that exercise and nutrition play in health, and prevention and management of such illnesses as hypertension, diabetes, and heart disease. P/NP or letter grading.

6. The Human Machine: Physiological Processes. (4) Not open to Physiological Science majors. General introduction to human musculoskeletal, cardiovascular, and respiratory systems and their function, with special emphasis on anatomy, physiological and psychological aspects of homeostasis and environmental interaction. Application of physical principles in selected areas of biomechanics, hemodynamics, ergonomics, orthopedics, and kinesiology. PGR or 4B.

7. Science and Food: Physical and Molecular Origins of What We Eat. (5) Lecture, three hours; laboratory, two and one half hours. Preparation: high school chemistry, mathematics, physics. What makes lettuce crispy and some cuts of meat chewier than others? Exploration of origins of food texture and flavor, using concepts in physical sciences to explain macroscopic properties such as elasticity and phase behavior, as well as physical role of food molecules in plants and animals we eat. Letter grading.

13. Introduction to Human Anatomy. (5) Lecture, four hours; laboratory, five hours. Not open to Physiological Science majors. Structural survey of human body, including skeletalmouscular, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens. Letter grading.

15. Fiat Lux: Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many patterns emerging. (LA) P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Directed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. P/NP or letter grading.

90. Introduction to Physiological Science. (2) Lecture, one hour; discussion, one hour. Limited to freshmen/sophomores. Introduction to current topics in physiological science by a team of departmental faculty members.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must complete: grade standing and enrollment in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

100. Experimental Statistics. (4) Lecture, four hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. P/NP or letter grading.

M106. Neurobiology of Bias and Discrimination. (4) (Same as Neuroscience M187 and Psychology M166.) Lecture, four hours. Limited to junior/senior neuroscience, physiological science, and psychology students. Exploration of aspects of mammalian brain function that generate preference, bias, and discrimination. Consideration of research at multiple levels of analysis and its relationship to behavior. Discussion of societal implications of these research findings, including their relevance to public policies and criminal justice system. Letter grading.

107. Systems Anatomy. (8) Lecture, four hours; laboratory, three hours; discussion, one hour. Requisites: courses 111A and 111B. Students must receive grade of C or better to proceed to next course in sequence. Systems anatomy focused primarily on human anatomy. Topics include: cardioroppressory, reproductive, nervous, and skeletalmuscular systems, with introduction to biomechanical principles. Letter grading.

108. Head and Neck Anatomy; Evolutionary, Biomechanical, Developmental, and Clinical Approach. (4) Lecture, three hours; laboratory, two hours. Requisites: course 107. Strongly recommended; course 153. Prior to first meeting, complete Bloodborne Pathogens training course through UCLA Environ- ment, Health and Safety. Introduction to head and neck anatomy. Dissection of head and neck, with focus on functional anatomy and musculature to put them in three-dimensional context. Coverage of evolutionary, developmental, physiological, and biomechanical aspects of skull, including comparative anatomy, human cranial development, and muscle attachment. P/NP or letter grading.

110. How Cancer Co-Opts Normal Physiology. (4) Lecture, three hours; discussion, one hour. Requisites: courses 111A and 111B. Discussion of cellular and molecular players involved in cancer morphogenesis, postnatal heart growth, and cellular regeneration, to better understand emergence of cardiac disease such as congenital heart disease, coronary artery disease, and atherosclerosis. Use of primary literature to highlight modern genetic tools such as transgenic animal models and sequencing technology in cancer research. Various cancer cell lineages and/or gene perturbations contribute to cardiopathophysiology such as cardiovascular death, cardiac fibrosis, and vascular dysfunction. Letter grading.

111A-111B. Foundations in Physiological Science. (4-6) Lecture, four hours; discussion, two hours. Letter grading. 111A: Requisites: course 107, Chemistry 14C or 16, Physics 1A, Chemistry 153A, Life Sciences 1, 2, 3, 4, 23L, or 7A, 7B, 7C, and 23L. Discoveries of new science of aging biology, with examination of aging as plastic trait modulated by genes and physiological processes. Development of methods to integrate with nutritional modification of lifespan and profound relationship between under-lying aging process and diseases of aging. Topics include dietary restriction, mitochondria, insulin/GF signaling, and link between tumor suppression and organ-specific aging. Letter grading.

111L. Physiological Science Laboratory. (3) Lecture, four hours. Requisites: courses 111A and 111B, with grades of C– or better. Required of Physiological Science majors. Designed to illustrate physiological principles studied in courses 111A, 111B. Letter grading.

120. Kidney: Understanding It from Development to Disease to Therapy. (4) Lecture, three hours. Enforced requisites: courses 111A and 111B. View of basic renal function, with emphasis on broad range of renal diseases and their molecular mechanisms. Introduction to research methods typically employed in studies of kidney disease. Exploration of state-of-art research on kidney repair and regeneration. Letter grading.

121. Disease Mechanisms and Therapies. (5) Lecture, three hours; discussion, one hour. Requisites: Chemistry 135A, and Life Sciences 2, 3, and 4 or 7A, 7B, and 7C. Designed for junior/senior Biochemistry and life sciences majors. Use of disease mechanisms as pedagogical tools to develop higher-order knowledge of basic scientific concepts. Integration of concepts from genetics, molecular and cell biology, physiology, and biochemistry to create molecular solutions to problem of inherited renal disease. Letter grading.

122. Biomedical Technology and Physiology. (4) Lecture, four hours. Requisites: courses 111A, 111B, Life Sciences 2 or 7C, Physics 1A, 1B, and 1C, or 5A, 5B, and 5C, or 6A, 6B, and 6C. Developments in biomedical technology and their impact on the human treatment of disease, basic engineering principles, and design that lend themselves to deciphering physiological states, and application of new technologies in clinical practice and biomedical research. Letter grading.

CM123. Neurobiology of Sleep. (4) (Same as Neurosci- ence CM123.) Lecture, three hours; discussion, one hour. Requisites: courses M101A and M101B or 111A and 111B or consent of instructor. Detailed look into science of sleep. Cellular and molecular mechanisms of falling asleep; many discrete brain structures involved in control of sleep/wake cycle; homeostatic regulation of sleep, How our sleep needs shaped by our evolutionary history, age, and gender. Latest insights into question of function of sleep, critical role sleep plays in memory formation and, close association between sleep and metabolism. Sleep disorders are considered as they provide insights into mechanisms underlying sleep. For background on science of sleep and circadian regulation of course C126 is highly recommended. Concurrently scheduled with course CM223. Letter grading.

124. Molecular Biology of Aging. (4) Lecture, three hours. Requisites: Chemistry 135A, Life Sciences 1, 2, 3, and 4 or 7A, 7B, and 7C. Analytical description of molecular systems that underlie myriad phenotypes in living cells. Topics include various -omics fields and high-throughput technologies, network biology, and synthetic biology. Introductory lecture courses on molecular biology, emerging bioinformatics approaches, and systems modeling integrated with discussions of their applications in disease-related research. Review of recent literature gain overall perspective about new science of systems biology. Letter grading.

C126. Biological Clocks. (4) Lecture, three hours; dis- cussion, one hour. Requisites: courses 111A and 111B. Letter grading.
cadian oscillations. Exploration of molecular, cellular, and system-level organization of these timing systems. Temporal role of these variations in maintaining homeostatic mechanisms of body and impact on nervous system. Concurrently scheduled with course C226. Letter grading.

128. Me, Myself, and Microbes: The Microbiome in Health and Disease. (5) Lecture, four hours; discussion, 90 minutes. Requisites: course 107 or Chemistry 153A, Life Sciences 2 and 3, or 7A, 7B, and 7C. Exploration of host-microbial interactions in health and disease, drawing upon basic properties for microbial communities, intersections with immunology, metabolism, and neurobiology. Letter grading.

C130. Sex Differences in Physiology and Disease. (4) Lecture, four hours; discussion, one hour. Enforced requisites: course 111B, Life Sciences 7A, 7B, 7C. Investigation of biological origins of sex differences in physiology (mostly vertebrate), and consequences of these differences. Emphasis on development of concepts to define sex, and interface between biological factors and effects of gendered environments. Topics include evolution of sex chromosomes, molecular and environmental determinants of gonadal type, dosage compensation, gonadal steroid hormone effects on tissues, physiology of reproduction as it applies to sex differences, interaction of genetic and environmental components in differentiation of two sexes, defining sex and gender, gendered environments and their influence on physiology, and policies of financial support for research of sex and gender differences in disease. Concurrently scheduled with course C230. Letter grading.

M135. Dynamical Systems Modeling of Physiological Processes. (5) (Same as Neuroscience M135.) Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical model of physiological systems and of dynamical principles inherent in physiological systems. Letter grading.

140. Hormones and Behavior in Humans and Other Animals. (4) Formerly numbered M140.) Lecture, three hours; discussion, one hour. Examination of hormones, and physiology and genetics involved in hormonal processes and function. Interactions among hormonal levels, environmental stimuli, and behavior. Sexual behavior, pregnancy, and lactation, parental behavior, development and emigration, stress, social behavior, dominance relationships, aggression, chemical communication, and reproductive suppression. Critique of primary literature on behavioral endocrinology about humans and other species. Consideration of spectrum of noninvasive to highly invasive endocrine sampling methods, and which types of questions can be answered in laboratory and field, as well as ethics of hormonal studies and their implications for humans and other animals. Letter grading.

C144. Neural Control of Physiological Systems. (4) Lecture, three hours; seminar, one hour. Requisite: course 111B, M143. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control.

Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C244. Letter grading.

M145. Neural Mechanisms Controlling Movement. (5) (Same as Neuroscience M145.) Lecture, four hours; discussion, two hours. Requisites: course 111A or M180A or Neuroscience M101A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Letter grading.

146. Principles of Nervous System Development. (5) Lecture, three hours; discussion, two hours. Requisites: courses 107 (or Neuroscience 102) and 111A (or M180A). Examination of structural and functional development of the nervous system as a series of integrated steps beginning with several embryonic cells and culminating as complex highly ordered system. Topics include neural crest formation, neural tube closure, neural outgrowth, and synapse formation. Letter grading.

147. Neurobiology of Learning and Memory. (5) Lecture, four hours; discussion, one hour. Requisite: course 111A or M180A. Changes in central nervous system that accompany learning, with emphasis on cellular mechanisms.

148. Physiological Regulation of Metabolism and Nutrient Sensing. (4) Lecture, two and one half hours; discussion, one hour. Requisite: course 111B. Study of energy metabolism and processing of macronutrients like carbohydrates, lipids, and proteins in mammals. Students gain tools and knowledge for synthesizing ideas in relation to research to add to basic understanding of macronutrient metabolism. Use of clinical case studies to understand how human mutations in metabolic pathways lead to metabolic diseases such as diabetes, obesity, and familial hypercholesterolemia. Understanding of glycogen storage disease, inborn errors of metabolism, mitochondrial disorders, and lysosomal storage diseases. Study of how cells sense nutrients and adapt metabolism to avoid nutrient sufficiency—e.g., how cells respond to excess cholesterol. Discussion of mechanisms involved in import, export, and synthesis of nutrients. Use of primary literature to analyze and critically evaluate topics related to concepts covered in lectures. Letter grading.

149. Systems Biology and Mechanisms of Major Cardiometabolic Diseases. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 7A, 7B, 7C. Strongly recommended: Chemistry 153A. Designed for juniors/seniors. Introduction of principles gained through basic science curriculum with modern systems biology concepts, approaches, and presently underdeveloped models. Focus on mechanisms of diseases like atherosclerosis, glycogen storage disease, inborn errors of metabolism, mitochondrial disorders, and lysosomal storage diseases. Study of how cells sense nutrients and adapt metabolism to avoid nutrient sufficiency—e.g., how cells respond to excess cholesterol. Use of primary literature to analyze and critically evaluate topics related to concepts covered in lectures. Letter grading.

153. Dissection Anatomy. (5) Lecture, two hours; laboratory, five hours; discussion, one hour. Requisite: courses 111B and 1107. Prior to first meeting, students must complete Bloodborne Pathogens training course through UCLA Environment, Health and Safety. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculoskeletal and neurovascular supply. Letter grading.

154. Cellular Communication and Regulation of Physiological Processes. (4) Lecture, three hours. Limited to students with consent of instructor. Emphasis on cell signaling, with focus on role of receptors, G proteins, and intracellular messengers such as cyclic AMP and calcium. Integration of these concepts with variety of physiological processes, including stimulus-secretion coupling, vascular smooth muscle contraction, and role of growth factors. Emphasis on contemporary scientific research articles used as basis for material presented. Students required to present journal article for discussion. Letter grading.

155. Development and Mechanisms of Musculoskeletal System. (4) Requisite: course 111B. Development, histology, cell biology, and biochemistry of musculoskeletal soft tissues. Integration of knowledge of molecular bases of connective tissue function with emphasis on each of these levels to understand organization and physiological behavior of the intact system.

156. Molecular Mechanisms and Therapies for Muscular Dystrophy. (4) Lecture, three hours; discussion, one hour. Enforced requisites: course 111A (may be taken concurrently), Life Sciences 4 with grade of B or better. Causes and pathogenesis of Duchenne muscular dystrophy and some fundamental scientific findings underpinning therapies aimed at individual stages of pathogenic disease as method to develop critical expert-like thinking skills. Lectures based on experiments from primary scientific literature expected to understand genetic and phenotypic animal models of muscular dystrophy, to design experiments, and to predict outcomes from research data. Letter grading.

165. Comparative Animal Physiology. (5) Lecture, three hours; lab, one hour. Requisites: Life Science 1, 2, 3, and 23L, or 7A, 7B, 7C, and 23L. Physiological response and function at molecular, cellular, tissue, and whole organism levels of variety of animals in response to environmental conditions. Major topics include neural and muscular structure and function, hormones, gas exchange, energetics, and thermoregulation. Examination of wide variety of vertebrates and invertebrates to understand how animals solve physiological challenges presented by physical environment. Letter grading.

166. Animal Physiology. (6) Lecture, three hours; lab, one hour. Requisites: Chemistry 14B and 14BL, or 20B and 30AL, 153A, Life Sciences 7A, 7B, 7C, Physics 1C and 4BL, or 5C. Not for open to students with credit for Ecology and Evolutionary Biology 170 or to Physiological Science majors. Introduction to physiological principles, with emphasis on organ systems and intact organisms. Letter grading.

167. Physiology of Nutrition. (4) Lecture, four hours. Enforced requisites: Chemistry 14A, 14B, and 14C, and 20B or 30AL. Focus on the mechanisms by which Food Science and Technology 170A, 170B, 170C, and 22L, and Physiological Science majors and Food Studies minors. Topics include physiological adaptation to starvation and physiological responses to oxidants/antioxidants, vitamins, minerals, pigments, and antibiotics. Examination of wide variety of vertebrates and invertebrates to understand how animals utilize during aerobic and anaerobic exercise. Letter grading.

M171. Variable Topics Research Seminars: Contempor ary Biology. (2) (Same as Neurobiology M171.) Seminar, two hours. Limited to undergraduate fellows in Integrated and Interdisciplinary Undergraduate Research Program. Presentations of scientific data from primary research articles and from students’ own research. May be repeated for credit. P/NP grading.

173. Anatomy and Physiology of Sense Organs. (4) Lecture, three hours; discussion, one hour. Requisites: course 111A or M180A. Molecules, Cells, and Developmental Biology M175A and M175B. Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sense organs in both invertebrates and vertebrates. Letter grading.

174. Cell Biophysics in Physiology and Disease. (5) Lecture, three hours; discussion, two hours. Requisites: Chemistry 153A, Life Sciences 2, 3, and 23L, or 7A, 7B, 7C, and 23L. Emphasis on physical principles of cell biology as they have received so much less attention in research. For example, mechanical properties of cells determine how physical forces alter gene expression and can signal

Integrative Biology and Physiology / 565
transformation in physiological state of cells, such as in malignant transformation. Exploration of cell biology in health and disease from basic physical principles that underlie and control function of the neuron. Topics range from examination of how bees and ants signal about food sources to whether structured songs of birds, whales, and monkeys contain compositional elements that contribute to the development of anthropology, biopsychology, linguistics, molecular genetics, neuroscience, and physiology. Letter grading.

M176. Auditory Neuroscience of Speech Perception and Vocal Communication. (4) (Same as Neuroscience M176.) Lecture, two and one-half hours; discussion, one hour. Requisite: course 111A or Neuroscience M101A. Homo sapiens are only species currently on planet to possess language. Exploration of whether other species possess vocal communication blocks for language. Topics range from examination of how bees and ants signal about food sources to whether structured songs of birds, whales, and monkeys contain compositional elements that contribute to the development of anthropology, biopsychology, linguistics, molecular genetics, neuroscience, and physiology. Letter grading.

188A. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilita- tors. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin prepa- ration of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188C. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while writing course indi- vidual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Des- signed as adjunct to upper-division lecture course. Indi- vidual study with focus on innovative and advanced topics in greater depth through supplemental read- ings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract re- quired. Honors content noted on transcript. Letter grading.

191H. Honors Seminars: Current Topics in Physiolo-gy. (4) Seminar, four hours. Requisites or corequisites: courses 198A, 198B, or 198C. Limited to seniors. Supple- mentary study with focus on innovative and advanced topics in greater depth through supplemental read- ings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract re- quired. Honors content noted on transcript. Letter grading.

194A. Research Group Seminars: Physiological Sci- ence. (2) Seminar, two hours. Required of undergrad- uate students in research traineeships such as MARC and UC Leads programs. Discussion of research methods and current literature in field or of research of faculty members or students. May be repeated for credit. Letter grading.

194B. Research Group Seminars: Physiological Sci- ence. (1) Seminar, two hours. Required of undergrad- uate students in research traineeships such as MARC and UC Leads programs. Discussion of research methods and current literature in field or of research of faculty members or students. May be repeated for credit. Letter grading.

195. Field Studies in Physiological Science. (4) Tuto- rial, one hour; fieldwork, eight hours. Limited to se- niors. Supervised field study of topics related to careers re- lated to physiological science. May not be repeated for credit and may not be applied toward elective re- quirements for major. Individual contract with super- vising faculty member required. Letter grading.

196. Research Apprenticeship in Physiological Sci- ence. (2 to 4) Tutorial, three hours per week per unit. Limited to juniors/seniors. Entry-level apprenticeship program for undergraduate students under supervision of graduate faculty mentor. May be repeated for credit; consult department. Individual contract required. P/NP grading.

198A. Honors Research in Physiological Science. (4) Tutorial, 12 hours. Requisites: courses 111A, 111B, 133 (193 may be taken concurrently). Limited to junior/ senior physiological science honors program students. Directed independent research for depart- mental honors with faculty member, involving defini- tion of research topic and extensive reading and re- search in field of proposed honors thesis. May be repeated for credit. Individual contract required. In Physiological Science degree can be given only on comple- tion of course 198B).

198B. Honors Research in Physiological Science. (4) Tutorial, 12 hours. Requisites: courses 198A, 198B, 198C may be repeated for credit. Limited to junior/senior physiological science honors program students. Cont- inued reading and research that culminate in final honors thesis. May be repeated for credit. Individual contract required. Letter grading.
Graduate Courses

200. Advanced Experimental Statistics. (4) Lecture, four hours; laboratory, one hour. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods introduced to analyze physiological data. S/U or letter grading.

M202. Cellular Neurophysiology. (Same as Neuroscience M200F and Neuroscience M202F.) Lecture, three hours; discussion, two hours. Required: courses 111A or M180A or Physics 5C, 166. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, receptor-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

M210. Molecular and Cellular Mechanisms of Neu- ronal Integration. (Same as Neuroscience M210T and Physiology M210T.) Lecture, four hours; discussion, one hour. Required: Neuroscience M202. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and organizing principles in development and sexual differentiation. Letter grading.

211. Exercise Cardiovascular Physiology. (4) Attention to cardiovascular adaptations to acute exercise as well as adaptations associated with regular exercise training.

215. Molecular and Cellular Foundations of Physiol- ogy. (5) Lecture, three hours; discussion, two hours. Application of molecular and cellular approaches to systems level questions. Basic foundation for study of major physiological systems, with emphasis on levels of organization from molecular to macroscopic. Letter grading.

CM223. Neurobiology of Sleep. (Same as Neuroscience CM223.) Lecture, three hours; discussion, one hour. Detailed look into science of sleep. Cellular and molecular mechanisms of falling asleep, many discrete brain structures involved in control of sleep wakefulness. Regulation of sleep, interpretation of sleep stages. How our sleep needs shaped by our evolutionary history, age, and gender. Latest insights into question of function of sleep, critical role sleep plays in memory formation and, close association between sleep and metabolism. Sleep disorders are considered as they provide insights into mechanisms underlying sleep. For background on science of sleep and circadian rhythms, course CM226 is recommended. Concurrently scheduled with course CM123. Letter grading.

CM226. Biological Clocks. (4) Lecture, three hours; discussion, one hour. Required: courses 111A and 111B, 198C, and M180A or M180B. Most organisms, including humans, exhibit daily rhythms in physiology and behavior. In many cases these rhythms are generated from within organisms and are called circadian rhythms. Biological basis of these daily rhythms or circadian oscillations. Exploration of molecular, cellular, and system-level organization of these timing systems and their control mechanisms. Discussion in maintaining homeostatic mechanisms of body and impact on nervous system. Concurrently scheduled with course C126. Letter grading.

250A. Muscle Dynamics. (4) Lecture, four hours. Required: course 111B, Life Sciences 7A, 7B, 7C. Investigation of biological origins of sex differences in physiology (mostly vertebrate), and susceptibility to disease, including history of development of concepts to define sex, and intersex and gender difference in reproductive and other system functions. Emphasis on basic research on the molecular and cellular basis of sex. Letter grading.

C260. Sex Differences in Physiology and Disease. (4) Lecture, three hours. Required: course 111B, Life Sciences 7A, 7B, 7C. Exploration of biological origins of sex differences in physiology (mostly vertebrate), and susceptibility to disease, including history of development of concepts to define sex, and intersex and gender difference in reproductive and other system functions. Emphasis on basic research on the molecular and cellular basis of sex. Letter grading.

272. Neuroimaging and Brain Mapping. (4) Same as Neuroscience CM272 and Psychology M213.) Lecture, four hours; laboratory, two hours. Examination of art and making and evaluating dynamical models of physiological systems and of dynamical systems inherent in physiological systems. Letter grading.

C244. Neural Control of Physiological Systems. (4) Lecture, four hours. Required: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material required for examination to be developed by combina- tion of lecture and open discussion. Concurrently scheduled with course C144. Letter grading.

245. Neural Mechanisms Controlling Movement. (5) Lecture, four hours. Required: course 111A or M180A or Neuroscience M101A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Letter grading.

250A. Muscle Dynamics. (4) Lecture, four hours. Integrated study of electrical and dynamic parameters of muscle-action, including topics in length-tension and force-velocity interrelationships; critical analysis of electromyographic and digital computer techniques. Letter grading.

263. Neuronal Mechanisms Controlling Rhythmic Movements. (4) Lecture, four hours. Required course M145. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on functional neurophysiology and neural mechanisms underlying the behavior. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn. S/U or letter grading.

270A-270B. Modern Concepts in Physiology. (4–4) Lecture, two hours; discussion, two hours. Study and evaluation of primary research literature. Study of focus on topics of modern research. Introduction to research, analysis of research design. Letter grading.

270A. Highly recommended requisite or corequisite: course 111A. Foundation for experimental study of principles of muscular and neural physiology and cellular and systems neuroendocrinology, including factors controlling membrane excitation, neuronal circuits, sensory-motor regulation, special senses, cortical function, and neural control. Highly recommended requisite or corequisite: course 111B. Foundation for experimental study of principles of systems physiology, including endocrinology, transport physiology, and neural, cardiovascular, and pulmonary physiology.

289A–289B. Honing Your Skills as Researcher in Integrative Biology and Physiology. (2–3) Seminar, one hour. Limited to graduate students in Physiological Science master’s program. Scientific method and analytical tools of research in physiology and biology; evaluation of research literature in physiology, scientific communication—written and oral presentations; scientific ethics; and professional development. Writing curriculum vitae (CV) and cover letter. Letter grading.

289B. Required: course 289A.

M290. Seminar: Comparative Physiology. (Same as Ecology and Evolutionary Biology M290.) Seminar, two and one half hours. Discussion of specific topics in comparative physiology of animals. Topics vary from year to year, with emphasis on systems physiology, neuroendocrinology, or behavioral physiology. S/U or letter grading.

291A–291B–291C. Seminars: Cardiovascular Func- tion and Adaptation. (2 to 4 each) Seminar, two to four hours. Selected topics on cardiovascular function and adaptation. Students required to present two-hour seminar presentation. Letter grading.

292. Evolution and Development of Auditory Sys- tem. (2 or 4) Seminar, two hours. Discussion of specific topics related to evolution, embryology, morpho- genesis, cytodifferentiation, and onset of function of auditory system, with special attention to centrifugal and centripetal pathways. Emphasis on primary literature sources as
well as current methodological approaches. Two-hour seminar presentation required for 2 units; seminar paper and two-hour seminar presentation required for 4 units. S/U or letter grading.

293A-293B-293C. Seminars: Musculoskeletal Function and Adaptation. (2 to 4 each) Seminar, one hour. Requisites: courses 138, 260. Selected topics on muscular determinants of movement, metabolic aspects of exercise, and mechanics of connective tissue. Students required to present two-hour seminar. S/U or letter grading.

294. Recent Advances in Neurophysiology. (1) Seminar, one hour. Requisite: Life Sciences 2 or under-graduate degree in science. Critical examination and discussion of recent data and publications that focus on synaptic function. Student presentations, readings, and participation in discussions required. S/U grading.

296. Research Seminar: Physiological Science. (2) Review of literature, discussion of original research, and analysis of current topics in physiological science. May not be applied toward MS or PhD course requirements. May be repeated for credit. S/U grading.

297. Seminar: Muscle Cell Biology. (2 to 4) Seminar, two hours. Selected topics in muscle cell biology. Students required to present two-hour seminar. May be repeated for credit. S/U grading.

298. Seminar: Nervous System Development. (1 to 2) Seminar, two hours. Selected topics in developmental neurobiology, such as neuronal migration, axonal guidance, gene expression, and synaptogenesis. Weekly primary literature student presentations. One-hour seminar presentation on assigned weekly reading required of all students; students enrolled for 2 units must also complete written analysis of additional primary literature papers. May be repeated for credit. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. In-Service Practicum for Teaching Assistants in Physiological Science. (2) Seminar, to be arranged. Required of all teaching assistants. Supervised practicum in teaching laboratory courses in physiological science material and use of teaching aids. May not be applied toward degree requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

595. Research for and/or Preparation of PhD Dissertation. (2 to 16) Tutorial, to be arranged. May not be applied toward MS course requirements. May be repeated as necessary. S/U grading.

Michael F. Thies, PhD (Political Science)

Overview

The International Institute offers a variety of area studies majors and minors through the International and Area Studies Interdepartmental Program (IDP). The overarching goal of each of these programs is to address the need for students to have a broad understanding of the international nature of the world and guide them through a course of study that allows them to apply that knowledge to a particular region of interest. The majors are structured so that area-specific content proceeds in tandem with instruction in the humanities and social sciences disciplines that provide the tools for analyzing the cultures, social structures, politics, and histories of the regional areas.

Emphasizing the contemporary world since 1750, the majors establish a common conceptual and thematic basis for study of regional areas. Students take a common core course that illuminates the international character of the contemporary world and introduces a set of contemporary issues and challenges that cross borders and regions. Thematic and conceptual courses equip students with a variety of disciplinary tools they can use to study a particular area or region. Studies culminate in a capstone seminar.

Undergraduate Study

Students considering a major or minor in the interdepartmental program should consult with the academic counselor as soon as possible in their UCLA career, but in no case later than the point at which they are about to begin taking upper-division courses. Students should select courses to fulfill major or minor requirements in consultation with the academic counselor.

Undergraduate Majors

African and Middle Eastern Studies BA

The African and Middle Eastern Studies major allows students to analyze the area or a sub-region (e.g., Middle East, North Africa, Arab states, sub-Saharan Africa) from an interdisciplinary and modern perspective. The major seeks to ground students in broad international issues that they can then use to focus on particular concerns of that part of the world.

Study Abroad

African and Middle Eastern Studies majors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year).

Students may partially fulfill the area studies elective requirement by participating in an International Institute Summer Travel Study program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

More information about study abroad programs is available through the UCLA International Education Office by e-mail, in person at 1332 Murphy Hall, or by phone at 310-825-4995.

Capstone Major

The African and Middle Eastern Studies major is a designated capstone major. Students must complete a capstone seminar or study-abroad program in which they engage in an in-depth analysis of a specific region or a thematic subject that spans regions. Through conceiving and executing a project, students demonstrate their working knowledge of scholarly discourse relative to a specialized topic. Student research, analytic, and writing skills are exhibited through their capstone work, along with their collaborative and oral communication skills.

Learning Outcomes

The African and Middle Eastern Studies major has the following learning outcomes:

- In-depth analysis of a specific region or a thematic subject that spans regions
- Demonstrated critical understanding of issues relevant to a specific region or theme
- Demonstrated skills, including research, analysis, and writing
- Identification and analysis of appropriate sources, material evidence, and other forms of primary documents
- Demonstrated proficiency at collaborative engagement with peers through constructive
feedback on written drafts and oral presentations
• Demonstrated proficiency at using peer feedback to enhance student’s own work
• Effective communication of complex ideas in a seminar setting
• Demonstrated effective oral and written communication of research findings
• Conception and execution of a project that identifies and engages with a specialized topic
• Working knowledge of scholarly discourse relative to a specialized topic

Entry to the Major
Admission
To be eligible to declare the African and Middle Eastern Studies major, students must have completed all nonlanguage preparation for the major courses and the foreign language courses through at least level 3 (elementary level). Any remaining language courses may be completed after students have been accepted to the major.

Pre-major
Incoming first-year and transfer students may be admitted as African and Middle Eastern Studies pre-majors on acceptance to UCLA. Pre-major students must apply for major standing at the end of fall quarter of their junior year; they are not automatically accepted into the major.

Transfer Students
Transfer applicants to the African and Middle Eastern Studies pre-majors on acceptance to UCLA. Pre-major students must apply for major standing at the end of fall quarter of their junior year; they are not automatically accepted into the major.

Entry to the Major
Admission
To be eligible to declare the African and Middle Eastern Studies major, students must have completed all nonlanguage preparation for the major courses and the foreign language courses through at least level 3 (elementary level). Any remaining language courses may be completed after students have been accepted to the major.

Pre-major
Incoming first-year and transfer students may be admitted as African and Middle Eastern Studies pre-majors on acceptance to UCLA. Pre-major students must apply for major standing at the end of fall quarter of their junior year; they are not automatically accepted into the major.

Transfer Students
Transfer applicants to the African and Middle Eastern Studies pre-major with 90 or more units must complete the following introductory level courses from sociocultural anthropology, cultural geography, contemporary world history, and world literature and two courses from comparative politics, economic geography, macroeconomics, microeconomics, and introductory sociology. Transfer students must apply for the major by the end of fall quarter of their junior year.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Policies
Each preparation for the major course must be taken for a letter grade, and students must have a UC grade-point average of 2.0 or better in those courses. In addition, students must have earned a grade of C or better in International and Area Studies 1.

Requirements
Preparation for the Major
Required: (1) International and Area Studies 1, (2) one area studies course from Art History 28, History 9D, 10B, 97F, 97J, Middle Eastern Studies M50CW, or Portuguese 40A, (3) two international politics and markets courses from Economics 1, 2, Geography 4, 6, Political Science 50 (or 50R), Sociology 1, (4) two international societies and cultures courses from Anthropology 3, Comparative Literature 1D (or 2D or 4D), Ethnomusicology 5, M25, Geography 3, History 2B, 22, World Arts and Cultures 20, 33, and (5) one area-related foreign language sequence through the intermediate level (e.g., Arabic 102C, Armenian 102C, Hebrew 102C, Iranian 102C, Turkic Languages 102C, 112C, 116C). The language requirement can also be fulfilled in part or in total by taking a placement examination given through the appropriate language department.

The Major
The major consists of International and Area Studies 191 (capstone seminar) and 11 upper-division courses divided among area studies and international themes courses. International and Area Studies 191 (capstone seminar) and 11 upper-division courses divided among area studies and international themes courses. International and Area Studies 191 (capstone seminar) and 11 upper-division courses divided among area studies and international themes courses. International and Area Studies 191 (capstone seminar) and 11 upper-division courses divided among area studies and international themes courses. International and Area Studies 191 (capstone seminar) and 11 upper-division courses divided among area studies and international themes courses.
Asian Studies BA

The Asian Studies major allows students to analyze the area or a subregion (e.g., Central Asia, East Asia, South Asia, Southeast Asia) from an interdisciplinary and modern perspective. The major seeks to ground students in broad international issues that they can then use to focus on particular concerns of that part of the world.

Study Abroad

Asian Studies majors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year).

Students may partially fulfill the area studies elective requirement by participating in an International Institute Summer Travel Study program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

More information about study abroad programs is available through the UCLA International Education Office by e-mail, in person at 1332 Murphy Hall, or by phone at 310-825-4995.

Capstone Major

The African Studies major is a designated capstone major. Students must complete a capstone seminar or study-abroad program in which they engage in an in-depth analysis of a specific region or a thematic subject that spans regions. Through conceiving and executing a project, students demonstrate their working knowledge of scholarly discourse relative to a specialized topic. Student research, analytic, and writing skills are exhibited through their capstone work, along with their collaborative and oral communication skills.

Learning Outcomes

The Asian Studies major has the following learning outcomes:

- In-depth analysis of a specific region or a thematic subject that spans regions
- Demonstrated critical understanding of issues relevant to a specific region or theme
- Demonstrated skills, including research, analysis, and writing
- Identification and analysis of appropriate sources, material evidence, and other forms of primary documents
- Demonstrated proficiency at collaborative engagement with peers through constructive feedback on written drafts and oral presentations
- Demonstrated proficiency at using peer feedback to enhance student’s own work
- Effective communication of complex ideas in a seminar setting
- Demonstrated effective oral and written communication of research findings
- Conception and execution of a project that identifies and engages with a specialized topic
- Working knowledge of scholarly discourse relative to a specialized topic

Entry to the Major

Admission

To be eligible to declare the Asian Studies major, students must have completed all non-language preparation for the major courses and the foreign language courses through at least level 3 (elementary level). Any remaining language courses may be completed after students have been accepted to the major.

Pre-major

Incoming first-year and transfer students may be admitted as Asian Studies pre-majors on acceptance to UCLA. Pre-major students must apply for major standing at the end of fall quarter of their junior year; they are not automatically accepted into the major.

Transfer Students

Transfer applicants to the Asian Studies pre-major with 90 or more units must complete the following introductory courses prior to admission:

- At least two lower division courses from sociocultural anthropology, cultural geography, contemporary world history, and world literature and two courses from comparative politics, economic geography, macroeconomics, microeconomics, and introductory sociology. Transfer students must apply for the major by the end of fall quarter of their junior year.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Policies

Each preparation for the major course must be taken for a letter grade, and students must have a UC grade-point average of 2.0 or better in those courses. In addition, students must have earned a grade of C or better in International and Area Studies 1.

Requirements

Preparation for the Major

Required: (1) International and Area Studies 1, (2) one area studies course from Art History 29, 31, Asian 30, Chinese 40, 50 (or 50W), M60 (or M60W), 80, Clusters 25A, History 9A, 9C, 9E, 11B (or 11BH), 97G, 97M, 97N, International and Area Studies 31, 33, Japanese 50, 70, 75, 80, Korean 40W, 50, M60, 70, 80, South Asian M60, Southeast Asian M20, 50, 70, or Vietnamese 40, (3) two international politics and markets courses from Economics 1, 2, Geography 4, 6, Political Science 50 (or 50R), Sociology 1, (4) two international societies and cultures courses from Anthropology 3, Comparative Literature 1D (or 2DW or 4DW), Ethnomusicology 5, M25, Geography 3, History 28B, 22, World Arts and Cultures 20, 33, and (5) one area-related foreign language sequence through the intermediate level (e.g., Chinese 6 or 6A, Filipino 6, Hindi-Urdu 100C, Indonesian 6, Japanese 6, Korean 6, Thai 6, Vietnamese 6). The language requirement can also be fulfilled in part or in total by taking a placement examination given through the appropriate language department.

The Major

The major consists of International and Area Studies 191 (capstone seminar) and 11 upper-division courses divided among area studies and international themes courses.

Honors Program

The honors program is designed to offer highly motivated majors the opportunity to design and conduct their own independent research under the guidance of a faculty adviser and consists of a three-term directed-study series of courses—International and Area Studies 198A, 198B, 198C—culminating in an honors thesis.

Policies

Preparation for the Major

Each course must be taken for a letter grade.

The Major

To count as one 4-unit course, 2-unit courses must either be taken twice or two courses from the same category (if applicable) may be taken. Each course must be taken for a letter grade, with a minimum overall grade-point average of 2.0.

Honors Program

Admission

To enter the honors program, students must (1) have completed all preparation for the major requirements with a minimum 3.5 grade-point average in those courses, (2) have a 3.5 grade-point average in all upper-division coursework for the major, (3) obtain agreement from a faculty member to supervise their honors thesis, and (4) formally submit an application to the honors program. Application should normally be made during the junior year so as to best plan for completion of the honors thesis during the senior year. Contact the academic counselor for more details about the application, thesis requirements, and guidelines regarding the selection of a faculty thesis adviser.

Requirements

Honors are awarded to students who (1) complete all requirements for the major with a cumulative grade-point average of 3.5 or better in upper-division courses required for the major, (2) successfully complete courses 198A, 198B, and 198C, and (3) produce an honors thesis (approximately 35 to 50 pages) determined to be of honors quality by a committee of two faculty members—the chair of International and Area Studies and the faculty adviser of the student.

Highest honors are awarded to students who (1) complete all requirements for the major with a cumulative grade-point average of 3.75 or better in upper-division courses required for the major, (2) successfully complete courses 198A, 198B, and 198C, and (3) produce an exceptional honors thesis (approximately 35 to 50 pages) determined to be of highest honors quality by a committee of two faculty members—the chair of International and Area Studies and the faculty adviser of the student.

Honors and highest honors are recorded on the final transcript and diploma after students successfully complete the program.

European Studies BA

The European Studies major allows students to analyze the area or a subregion (e.g., Central and Eastern Europe, Mediterranean Europe, Scandinavia, Western Europe/European Union) from an interdisciplinary and modern perspective. The major seeks to ground students in broad international issues that they can then use to focus on particular concerns of that part of the world.

Capstone Major

The European Studies major is a designated capstone major. Students must complete a capstone seminar or study-abroad program in which they engage in an in-depth analysis of a specific region or a thematic subject that spans regions. Through conceiving and executing a project, students demonstrate their working knowledge of scholarly discourse relative to a specialized topic. Student research, analytic, and writing skills are exhibited through their capstone work, along with their collaborative and oral communication skills.

Study Abroad

European Studies majors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year). Students may partially fulfill the area studies elective requirement by participating in an International Institute Summer Travel Study Program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

More information about study abroad programs is available through the UCLA International Education Office by e-mail, in person at 1332 Murphy Hall, or by phone at 310-825-4995.

Learning Outcomes

The European Studies major has the following learning outcomes:

- In-depth analysis of a specific region or a thematic subject that spans regions
- Demonstrated critical understanding of issues relevant to a specific region or theme
- Demonstrated skills, including research, analysis, and writing
- Identification and analysis of appropriate sources, material evidence, and other forms of primary documents
- Demonstrated proficiency at collaborative engagement with peers through constructive feedback on written drafts and oral presentations
- Demonstrated proficiency at using peer feedback to enhance student’s own work
- Effective communication of complex ideas in a seminar setting
- Demonstrated effective oral and written communication of research findings
- Conception and execution of a project that identifies and engages with a specialized topic
- Working knowledge of scholarly discourse relative to a specialized topic

Entry to the Major

Admission

To be eligible to declare the European Studies major, students must have completed all non-language preparation for the major courses and the foreign language courses through at least level 3 (elementary level). Any remaining language courses may be completed after students have been accepted to the major.

Pre-major

Incoming first-year and transfer students may be admitted as European Studies pre-majors on acceptance to UCLA. Pre-major students must apply for major standing at the end of fall quarter of their junior year; they are not automatically accepted into the major.

Transfer Students

Transfer applicants to the European Studies pre-major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two courses from sociocultural anthropology, cultural geography, contemporary world history, and world literature and two courses from comparative politics, economics, and introductory sociology. Transfer students must apply for the major by the end of fall quarter of their junior year.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Policies

Preparation for the Major

Required: (1) International and Area Studies 1, (2) one area studies course from Central and East European Studies, Comparative Literature 1C, 2CW, 4CW, Dutch 10, English 88G, French 12, 14 (or 14W), 41, 60, German 50B, 59, 61A, History 1C (or 1CH), 97C, International and Area Studies 40, Italian 42B, 46, 50B, Portuguese 40A, Romanian 90, Russian 25 (or 25W), 30, 51, 52, 90B (or 90BW), Scandinavian 50 (or 50W), Slavic 90, Spanish 42, (3) two international politics and markets courses from Economics 1, 2, Geography 4, 6, Political Science 50 (or 50R), Sociology 1, (4) two international societies and cultures courses from Anthropology 3, Comparative Literature 1D (or 2DW or 4DW), Ethnomusicology 5, M25, Geography 3, History 2B, 2Z, World Arts and Cultures 2B, 33, and (5) one area-related foreign language sequence through the intermediate level (e.g., Czech 102C, Dutch 103C, French 6, German 6, Hungarian 102C, Italian 6, Polish 102C, Portuguese 3, Romanian 102C, Russian 6, Scandinavian 5, Serbian/Croatian 102C, Spanish 5, Ukrainian 102C, Yiddish 102C). The language requirement can also be fulfilled in part or in total by taking a placement examina-
tion given through the appropriate language department.

**The Major**

The major consists of International and Area Studies 191 (capstone seminar) and 11 upper-division courses divided among area studies and international theme courses.

**Area Studies:** (1) Three humanities and arts group 1 courses from Art History 127B, M127C, Central and East European Studies 125, C126, Comparative Literature C163, C164, Dutch 113, 131, English 115B, 164A, 164B, 164C, Ethnomusicology 133, Film and Television 106B, French 114C, 119, 120, 138, 139, 141, German 102, 103, 104, 110, 112, 173, Italian 102C, 120, 121, 150, M158, 139, 141, German 102, 103, 104, 110, 112, 173, Italian 102C, 120, 121, 150, M158, Polish 152B, 152C, Russian 107B, 120, 121, 122, 125, 126, M127, 128, 130A, 130B, 130C, 131, M132, 140A through 140D, 150, Scandi

**Capstone Major**

The Latin American Studies major is a designated capstone major. Students must complete a capstone seminar or study-abroad program in which they engage in an in-depth analysis of a specific region or a thematic subject that spans regions. Through conceiving and executing a project, students demonstrate their working knowledge of scholarly discourse relative to a specialized topic. Student research, analytic, and writing skills are exhibited through their capstone work, along with their collaborative works.

**Learning Outcomes**

The Latin American Studies major has the following learning outcomes:

- In-depth analysis of a specific region or a thematic subject that spans regions
- Demonstrated critical understanding of issues relevant to a specific region or theme
- Demonstrated skills, including research, analysis, and writing
- Identification and analysis of appropriate sources, material evidence, and other forms of primary documents
- Demonstrated proficiency at collaborative engagement with peers through constructive feedback on written drafts and oral presentations
- Demonstrated proficiency at using peer feedback to enhance student’s own work
- Effective communication of complex ideas in a seminar setting
- Demonstrated effective oral and written communication of research findings
- Conception and execution of a project that identifies and engages with a specialized topic
- Working knowledge of scholarly discourse relative to a specialized topic

**Latin American Studies BA**

The Latin American Studies major allows students to analyze the area or a subregion (e.g., Amazonia, Caribbean, Central America, South America, Southern Cone) from an interdisciplinary and modern perspective. The major seeks to ground students in broad international issues that they can then use to focus on particular concerns of that part of the world.

**Study Abroad**

Latin American Studies majors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year).

Students may partially fulfill the area studies elective requirement by participating in an International Institute Summer Travel Study program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

More information about study abroad programs is available through the UCLA International Education Office by e-mail, in person at 1332 Murphy Hall, or by phone at 310-825-4995.

**Honors Program**

Each course must be taken for a letter grade.

**The Major**

To count as one 4-unit course, 2-unit courses may either be taken twice or two courses from the same category (if applicable) may be taken. Each course must be taken for a letter grade, with a minimum overall grade-point average of 2.0.

**Honors Program**

**Admission**

To enter the honors program, students must (1) have completed all preparation for the major requirements with a minimum 3.5 grade-point average in those courses, (2) have a 3.5 grade-point average in all upper-division coursework for the major, (3) obtain agreement from a faculty member to supervise their honors thesis, and (4) formally submit an application to the honors program. Application should normally be made during the junior year so as to be best plan for completion of the honors thesis during the senior year. Contact the academic counselor for more details about the application, thesis requirements, and guidelines regarding the selection of a faculty thesis adviser.

**Requirements**

Honors are awarded to students who (1) complete all requirements for the major with a cumulative grade-point average of 3.5 or better in upper-division courses required for the major, (2) successfully complete courses 198A, 198B, and 198C, and (3) produce an excep-

**Capstone Major**

The Latin American Studies major is a designated capstone major. Students must complete a capstone seminar or study-abroad program in which they engage in an in-depth analysis of a specific region or a thematic subject that spans regions. Through conceiving and executing a project, students demonstrate their working knowledge of scholarly discourse relative to a specialized topic. Student research, analytic, and writing skills are exhibited through their capstone work, along with their collaborative works.

**Learning Outcomes**

The Latin American Studies major has the following learning outcomes:

- In-depth analysis of a specific region or a thematic subject that spans regions
- Demonstrated critical understanding of issues relevant to a specific region or theme
- Demonstrated skills, including research, analysis, and writing
- Identification and analysis of appropriate sources, material evidence, and other forms of primary documents
- Demonstrated proficiency at collaborative engagement with peers through constructive feedback on written drafts and oral presentations
- Demonstrated proficiency at using peer feedback to enhance student’s own work
- Effective communication of complex ideas in a seminar setting
- Demonstrated effective oral and written communication of research findings
- Conception and execution of a project that identifies and engages with a specialized topic
- Working knowledge of scholarly discourse relative to a specialized topic

**Latin American Studies BA**

The Latin American Studies major allows students to analyze the area or a subregion (e.g., Amazonia, Caribbean, Central America, South America, Southern Cone) from an interdisciplinary and modern perspective. The major seeks to ground students in broad international issues that they can then use to focus on particular concerns of that part of the world.

**Study Abroad**

Latin American Studies majors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year).

Students may partially fulfill the area studies elective requirement by participating in an International Institute Summer Travel Study program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

More information about study abroad programs is available through the UCLA International Education Office by e-mail, in person at 1332 Murphy Hall, or by phone at 310-825-4995.
Entry to the Major

Admission
To be eligible to declare the Latin American Studies major, students must have completed all nonlanguage preparation for the major courses and the foreign language courses through at least level 3 (elementary level). Any remaining language courses may be completed after students have been accepted to the major.

Pre-major
Incoming first-year and transfer students may be admitted as Latin American Studies pre-majors on acceptance to UCLA. Pre-major students must apply for major standing at the end of fall quarter of their junior year; they are not automatically accepted into the major.

Transfer Students
Transfer applicants to the Latin American Studies pre-major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two courses from socio-cultural anthropology, cultural geography, contemporary world history, and world literature and two courses from comparative politics, economic geography, macroeconomics, microeconomics, and introductory sociology. Transfer students must apply for the major by the end of fall quarter of their junior year.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Policies
Each preparation for the major course must be taken for a letter grade, and students must have a UC grade-point average of 2.0 or better in those courses. In addition, students must have earned a grade of C or better in International and Area Studies 1.

Requirements
Preparation for the Major
Required: (1) International and Area Studies 1, (2) one area studies course from History 8A (or 8AH), 8B, 8C, 97E, International and Area Studies 50, Portuguese 40B, 46, Spanish 44, (3) two international politics and markets courses from Anthropology 6, Comparative Literature 1D (or 2DW or 4DW), Ethnomusicology 5, M23, Geography 2, History 2B, 22, World Arts and Cultures 20, 33, and (5) two area-related foreign language sequences through the intermediate level (e.g., Portuguese 3 or 11B, Spanish 5 or 7A, an indigenous language of Latin America such as Nahua, Quechua, or Zapoteco, through that level). The language requirement can also be fulfilled in part or in total by taking a placement examination given through the appropriate language department.

The Major
The major consists of International and Area Studies 191 (capstone seminar) and 11 upper-division courses divided among area studies and international themes courses.

The area studies electives listed above (group I) focus on contemporary issues of that region after 1750. Students may substitute a maximum of three upper-division courses with focus on earlier historical aspects of the region or on diasporas with origins related to the region toward the area studies electives as long as the distribution between humanities and arts and social sciences is maintained. They may be selected from either of the following lists: humanities and arts group 2: Art History CM139A, C139B, CM141, Chicana/o and Central American Studies M105D, M105E, 109, 142, Ethnomusicology M116, Portuguese 143A, or social sciences group 2: Anthropology 114P, 114Q, Chicana/o and Central American Studies M119, M159B, 184, M187, History 157B.

Each course must be taken for a letter grade, with a minimum overall grade-point average of 2.0.

Honors Program
Admission
To enter the honors program, students must (1) complete all preparation for the major requirements with a minimum 3.5 grade-point average in those courses, (2) have a 3.5 grade-point average in all upper-division coursework for the major, (3) obtain agreement from a faculty member to supervise their honors thesis, and (4) formally submit an application to the honors program. Application should normally be made during the junior year so as to best plan for completion of the honors thesis during the senior year. Contact the academic counselor for more details about the application, thesis requirements, and guidelines regarding the selection of a faculty thesis adviser.

Requirements
Honors are awarded to students who (1) complete all requirements for the major with a cumulative grade-point average of 3.5 or better in upper-division courses required for the major, (2) successfully complete courses 198A, 198B, and 198C, and (3) produce an honors thesis (approximately 35 to 50 pages) determined to be of honors quality by a committee of two faculty members—the chair of International and Area Studies and the faculty adviser of the student.

Highest honors are awarded to students who (1) complete all requirements for the major with a cumulative grade-point average of 3.75 or better in upper-division courses required for the major, (2) successfully complete courses 198A, 198B, and 198C, and (3) produce an exceptional honors thesis (approximately 35 to 50 pages) determined to be of highest honors quality by a committee of two faculty members—the chair of International and Area Studies and the faculty adviser of the student.

Honors and highest honors are recorded on the final transcript and diploma after students successfully complete the program.

Undergraduate Minors

African and Middle Eastern Studies Minor
The African and Middle Eastern Studies minor is designed for students who wish to augment their major with concerted study of the history, culture, and society of the Africa and the Middle East from an interdisciplinary and modern perspective.

Study Abroad
African and Middle Eastern Studies minors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year).

Students may partially fulfill the area studies elective requirement by participating in an International Institute Summer Travel Study pro-
Admission
To enter the minor, students must be in good academic standing (overall grade-point average of 2.0 or better) and have completed all lower-division minor courses with a GPA of 2.0 or better in those courses.

Study Abroad
African Studies minors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year). Students may partially fulfill the area studies elective requirement by participating in a Summer Study Abroad program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

Policies
One upper-division language course (advanced level) may be applied to item 3 above by petition to the chair of the program. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Study Abroad
African Studies minors study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year). Students may partially fulfill the area studies elective requirement by participating in an International Study Abroad summer travel study program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

Policies
One upper-division language course (advanced level) may be applied to item 3 above by petition to the chair of the program.

Study Abroad
African Studies minors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year). Students may partially fulfill the area studies elective requirement by participating in an International Study Abroad summer travel study program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

Policies
One upper-division language course (advanced level) may be applied to item 3 above by petition to the chair of the program.
Study Abroad

European Studies minors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year).

Students may partially fulfill the area studies elective requirement by participating in an International Institute Summer Travel Study program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

More information about study abroad programs is available through the UCLA International Education Office by e-mail, in person at 1332 Murphy Hall, or by phone at 310-825-4995.

Admission

To enter the minor, students must be in good academic standing (overall grade-point average of 2.0 or better) and have completed all area studies group 1 courses as follows:

1. one course from the Humanities group
2. two courses from the language group
3. one course from the area studies electives listed above (group 2), or from the group 2 list below.

The area studies electives listed above (group 1) focus on contemporary issues of that region after 1750. Students may substitute a maximum of one upper-division course with focus on earlier historical aspects of the region or on diasporas with origins related to the region toward the area studies additional elective category (item 3 above). The course may be selected from the following group 2 list:

- Anthropology 116Q

Policies

One upper-division language course (advanced level) may be applied to item 3 above by petition to the chair of the program.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in those courses.

If a minor student is unable to complete the minor in the academic year:

Students may partially fulfill the area studies elective requirement by participating in an International Institute Summer Travel Study program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

More information about study abroad programs is available through the UCLA International Education Office by e-mail, in person at 1332 Murphy Hall, or by phone at 310-825-4995.

Admission

To enter the minor, students must be in good academic standing (overall grade-point average of 2.0 or better) and have completed all lower-division minor courses with a GPA of 2.0 or better in those courses.

The Minor

Required Lower-Division Courses (13 to 15 units): International and Area Studies 1 and two international societies and cultures courses from Anthropology 3, Comparative Literature 1D (or 2WD or 4WD), Economics 1, 2, Ethnomusicology 5, M25, Geography 3, 4, 6, History 2B, 22, Political Science 50 (or 50R), Sociology 1, World Arts and Cultures 20, 33. Students may substitute one area studies preparation course (from Comparative Literature 1C, 2CW, 4CW, Dutch 10, English 88G, French 12, 14, 14W, 41, 60, German 50B, 59, 61A, History 1C, 1CH, 97C, International and Area Studies 40, Italian 42B, 46, 50B, Portuguese 40A, Romanian 90, Russian 25, 25W, 30, 31, 32, 90B, 90BW, Scandinavian 50, 50W, Slavic 90, or Spanish 42) toward the international societies and cultures preparation requirement.

Required Upper-Division Courses (20 to 25 units): Five area studies group 1 courses as follows:

The area studies electives listed above (group 1) focus on contemporary issues of that region after 1750. Students may substitute a maximum of one upper-division course with focus on earlier historical aspects of the region or on diasporas with origins related to the region toward the area studies additional elective category (item 3 above). The course may be selected from the following group 2 list:

Policies

One upper-division language course (advanced level) may be applied to item 3 above by petition to the chair of the program. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Latin American Studies Minor

The Latin American Studies minor is designed for students who wish to augment their major with concerted study of the history, culture, and society of Latin America from an interdisciplinary and modern perspective.

Study Abroad

Latin American Studies minors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year).

Students may partially fulfill the area studies elective requirement by participating in an International Institute Summer Travel Study program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

More information about study abroad programs is available through the UCLA International Education Office by e-mail, in person at 1332 Murphy Hall, or by phone at 310-825-4995.
The Minor

Required Lower-Division Courses (13 to 15 units): International and Area Studies 1 and two international societies and cultures courses from Anthropology 3, Comparative Literature 1D (or 2DW or 4DW), Economics 1, 2, Ethnomusicology 5, M25, Geography 3, 4, 6, History 2B, 22, Political Science 50 (or 50R), Sociology 1, World Arts and Cultures 20, 33. Students may substitute one area studies preparation course from Clusters 26A, History 8A, 8AH, 8B, 8C, 97E, International and Area Studies 50, Portuguese 40B, 46, or Spanish 44) toward the international societies and cultures preparation requirement.

Required Upper-Division Courses (20 to 25 units): Five area studies group 1 courses as follows: (1) two humanities and arts group 1 courses from Art History C142A, C142B, 144, Comparative Literature 177, English 135, Ethnomusicology M108A, 108B, 161K (must be taken twice to equal one 4-unit course), Film and Television 106C, Portuguese 130A, 130B, 141B, 142A, 142B, Spanish 120, World Arts and Cultures C139, (2) two social sciences group 1 courses from African American Studies M154C, M154D, M178, Anthropology 161, 162, Chicana/o and Central American Studies 111, 117, M125, M132, C141, 143, 151, 169, Community Health Sciences 132, Gender Studies 129, M144, M147C, Geography 135, 172A, 172C, History 159, 160A, 160B, 162A, 162B, 162C, Political Science 124C, 154A, 154B, Public Health M106, Sociology 186, 191J, and (3) one additional elective course selected from the group 1 lists above or from the group 2 list below.

The area studies electives listed above (group 1) focus on contemporary issues of that region after 1750. Students may substitute a maximum of one upper-division course with focus on earlier historical aspects of the region or on diasporas with origins related to the region toward the area studies additional elective category (item 3 above). The course may be selected from the following group 2 list: Anthropology 114P, 114Q, Art History CM139A, CM139B, CM141, Chicana/o and Central American Studies M105D, M105E, 109, M119, 142, M159B, 184, M187, Ethnomusicology M116, History 157A, 157B, or Portuguese 143A.

Policies

One upper-division language course (advanced level) may be applied to item 3 above by petition to the chair of the program.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

South Asian Studies Minor

The South Asian Studies minor is designed for students who wish to augment their major with concerted study of the history, culture, and society of South Asia from an interdisciplinary and modern perspective.

Study Abroad

South Asian Studies minors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year).

Students may partially fulfill the area studies elective requirement by participating in an International Institute Summer Travel Study program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

More information about study abroad programs is available through the UCLA International Education Office by e-mail, in person at 1332 Murphy Hall, or by phone at 310-825-4995.

Admission

To enter the minor, students must be in good academic standing (overall grade-point average of 2.0 or better) and have completed all lower-division minor courses with a GPA of 2.0 or better in those courses.

The Minor

Required Lower-Division Courses (13 to 15 units): International and Area Studies 1 and two international societies and cultures courses from Anthropology 3, Comparative Literature 1D (or 2DW or 4DW), Economics 1, 2, Ethnomusicology 5, M25, Geography 3, 4, 6, History 2B, 22, Political Science 50 (or 50R), Sociology 1, World Arts and Cultures 20, 33. Students may substitute one area studies preparation course from Art History 31, History 9A, 97N, or South Asian M60) toward the international societies and cultures preparation requirement.

Required Upper-Division Courses (20 to 21 units): Five area studies group 1 courses as follows: (1) two humanities and arts group 1 courses from Art History C154C, 154D, Asian 151, 153, Comparative Literature C178, Ethnomusicology 146, 147, South Asian 150, 155, (2) two social sciences group 1 courses from Asian American Studies 172C, Gender Studies M164A, History 174B, 174C, 175A, 175C, and (3) one additional elective course selected from the group 1 list above or from the group 2 list below.

The area studies electives listed above (group 1) focus on contemporary issues of that region after 1750. Students may substitute a maximum of one upper-division course with focus on earlier historical aspects of the region or on diasporas with origins related to the region toward the area studies additional elective category (item 3 above). The course may be selected from the following group 2 list: Anthropology 116P, Art History 154A, 154B, Asian 164, Asian American Studies M172A, 172B, History 174A, South Asian CM160, or 185.

Policies

One upper-division language course (advanced level) may be applied to item 3 above by petition to the chair of the program.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Southeast Asian Studies Minor

The Southeast Asian Studies minor is designed for students who wish to augment their major with concerted study of the history, culture, and society of Southeast Asia—Brunei, Cambodia, East Timor, Indonesia, Laos, Malaysia, Myanmar (Burma), Philippines, Singapore, Thailand, and Vietnam—from an interdisciplinary and modern perspective.

Study Abroad

Southeast Asian Studies minors are highly encouraged to study abroad. Students can travel to all areas through a variety of programs with various lengths (summer or during the academic year).

Students may partially fulfill the area studies elective requirement by participating in an International Institute Summer Travel Study program consisting of two courses in and on a particular region of the world. Contact the academic counselor for more information on available programs.

More information about study abroad programs is available through the UCLA International Education Office by e-mail, in person at 1332 Murphy Hall, or by phone at 310-825-4995.

Admission

To enter the minor, students must be in good academic standing (overall grade-point average of 2.0 or better) and have completed all lower-division minor courses with a GPA of 2.0 or better in those courses.

The Minor

Required Lower-Division Courses (13 to 15 units): International and Area Studies 1 and two international societies and cultures courses from Anthropology 3, Comparative Literature 1D (or 2DW or 4DW), Economics 1, 2, Ethnomusicology 5, M25, Geography 3, 4, 6, History 2B, 22, Political Science 50 (or 50R), Sociology 1, World Arts and Cultures 20, 33. Students may substitute one area studies preparation course from Art History 31, History 9A, 97N, or South Asian M60) toward the international societies and cultures preparation requirement.

Required Upper-Division Courses (20 to 21 units): Five area studies group 1 courses as follows: (1) two humanities and arts group 1 courses from Art History C154C, 154D, Asian 151, 153, Comparative Literature C178, Ethnomusicology 146, 147, South Asian 150, 155, (2) two social sciences group 1 courses from Asian American Studies 172C, Gender Studies M164A, History 174B, 174C, 175A, 175C, and (3) one additional elective course selected from the group 1 list above or from the group 2 list below.

The area studies electives listed above (group 1) focus on contemporary issues of that region after 1750. Students may substitute a maximum of one upper-division course with focus on earlier historical aspects of the region or on diasporas with origins related to the region toward the area studies additional elective category (item 3 above). The course may be selected from the following group 2 list: Anthropology 116P, Art History 154A, 154B, Asian 164, Asian American Studies M172A, 172B, History 174A, South Asian CM160, or 185.
Policies

One upper-division language course (advanced level) may be applied to item 3 above by petition to the chair of the program.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

International and Area Studies

Lower-Division Courses

1. Introduction to International and Area Studies. (5) Lecture, three hours; discussion, one hour. Introduction to international and area studies from interdisciplinary framework, covering themes related to international politics and markets, as well as international societies and cultures, to illuminate and clarify profoundly international character of world we live in and to introduce set of contemporary issues and challenges that cross borders and affect every region of the world. P/NP or letter grading.

2. M6A-M6B-M6C. Elementary Amharic. (4-4-4) (Same as African American Studies M94-M98-M99.) Lecture, five hours. Course M6A is required, which is requisite to M6C. Introduction to Amharic, Semitic language that is official language of Ethiopia. Coverage of basic Amharic grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

3. M7A-M7B-M7C. Elementary Yoruba. (4-4-4) (Same as African American Studies M7A-M7B-M7C.) Lecture, five hours. Course M7A is requisite to M7B, which is requisite to M7C. Introduction to Yoruba, one of major languages of West Africa, which is spoken widely throughout Nigeria, Benin, and Togo. Coverage of basic Yoruba grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

4. Explorations in International Studies. (2) Lecture, two hours. Exploration of key international events through active learning, designed to develop understanding of international issues and diverse skill set, including persuasive speaking, critical thinking, research skills, problem solving, teamwork, expository writing, and leadership skills. May be repeated for credit without limitation. P/NP grading.

5. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

6. Introduction to Southeast Asia. (5) Lecture, three hours; discussion, one hour (when scheduled). Interdisciplinary survey designed as introduction to modern Southeast Asia. P/NP or letter grading.

7. Introduction to East Asia. (5) Lecture, three hours; discussion, one hour (when scheduled). Interdisciplinary survey designed as introduction to modern East Asia. P/NP or letter grading.

8. Introduction to Europe. (5) Lecture, three hours; discussion, one hour (when scheduled). Interdisciplinary survey designed as introduction to modern Europe. P/NP or letter grading.

9. Introduction to Latin America. (5) Lecture, three hours; discussion, one hour (when scheduled). Interdisciplinary survey designed as introduction to modern Latin America. P/NP or letter grading.

10. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities. May be repeated for credit with topic change. Letter grading.

11. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. In-depth study with lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

12. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP or letter grading.

13. Art of Citizen Diplomacy. (2) Seminar, two hours. Examination of theory, tools, and practice of civic engagement by highlighting student leadership. Provides practical tools in leadership, civic responsibility, and conflict resolution in order to tackle global issues such as changing gender equality, income equality, and human rights. Class activities to understand how ordinary citizens can build bridges between cultures. Letter grading.

14. Introduction to Experiential Learning Abroad. (2) Seminar, two hours. Intended for students planning to participate in international study abroad program during upcoming summer. Practical tools in effective listening, intercultural understanding, understanding multiple narratives, sharpening leadership skills, and articulating thoughts. Prepares students for study abroad experiences and offers them tools to appreciate their travel. Letter grading.

15. Engaging Global Cultures: Reflecting on Fieldwork. (2) Seminar, three hours. Academic venue for students who have attended study abroad programs to reflect on and share their experiences in order to enhance benefits of program in which they participated. Practical tools in active listening and applying knowledge acquired during international travel. Students analyze complex layers of intercultural communication, world affairs, and conflict. Post-study abroad follow-up activities, including presentations on campus and in community, other on-campus education activities, and writing journal article. Letter grading.

Graduate Course

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

Overview

Through an interdisciplinary lens, the International Development Studies major offers students the opportunity to study, analyze, and critically assess the social, political, and economic forces that, throughout history, have shaped inequality in the modern world. The central objective of the program is to engage students with debates around the widening patterns of disparities of wealth, power, privilege, and access to social justice that occur both within and between the countries of the global north and global south.

Undergraduate Major

International Development Studies BA

The curriculum introduces students to key theoretical debates around development and to detailed case studies of successful and failed interventions; and provides methodological training. Core and elective courses illuminate the extent to which realities that affect people often arise owing to economic class, gender, race, ethnicity, religion, migrant status, and other identities, and investigate the impact of policy solutions and forms of citizen engagement on communities and the environment. Students are trained to both think critically about these issues and explore ways to engage with development work at home and abroad through experiential learning, internships, immersive study abroad programs, independent faculty-guided research, and collaborative group projects.

Study Abroad

International Development Studies majors are highly encouraged to study abroad in developing areas of the world. Students can do so through a variety of programs with various lengths (summer or during the academic year). More information about study abroad programs is available through the UCLA International Education Office. Contact the office by e-mail, in person at 1332 Murphy Hall, or by phone at 310-825-4996.

Capstone Major

The International Development Studies major is a designated capstone major. Seniors must complete an advanced seminar that provides unique opportunity to work closely with a faculty member on a focused topic of research. Students completing the capstone should be able to demonstrate skills and expertise acquired in earlier coursework; identify, analyze, and select relevant data from primary and secondary sources; acquire a working knowledge of broader scholarly discourse; conceive and execute an original research paper; and engage with a community of scholars, presenting their work to peers as well as providing feedback on peers’ work. The seminar culminates in a written paper or project and a formal class report.

Learning Outcomes

The International Development Studies major has the following learning outcomes:

- Demonstrated specific skills and expertise, including original research, data analysis, clear and cogent writing, and general knowledge/critique of major issues in the field
- Identification, analysis, selection, and use of relevant data from primary and secondary sources
- Working knowledge and formation of an opinion about diverse perspectives and discourses
- Design of an original research project that identifies, engages, and addresses a focused problem
- Active engagement with a community of scholars by expressing viewpoints through robust and informed discourse

Entry to the Major

Admission

Admission to the International Development Studies major is by application only. To be eligible to apply, students must have first completed all nonlanguage preparation courses and the foreign language courses through at least level 10 (elementary level). Any remaining language courses may be completed after students have been accepted to the major.

Pre-major

Incoming first-year and transfer students may be admitted as International Development Studies pre-majors on acceptance to UCLA. Pre-major students must apply for major standing at the end of fall quarter of their junior year; they are not automatically accepted into the major.

Transfer Students

Transfer applicants to the International Development Studies pre-major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two introductory macroeconomics, microeconomics, and/or economic geography courses; one statistics course; three courses, each from a separate category, selected from sociocultural anthropology, cultural or economic geography, cultural area studies, world history, comparative politics, and introductory sociology; and demonstrated proficiency equivalent to level 3 at UCLA in one modern foreign language. Transfer students must apply for the major by the end of fall quarter of their junior year.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Entry to the Major Policies

Each preparation for the major course must be taken for a letter grade, and students must have a UC grade-point average of 2.0 or better in those courses.

The application period is once per year, and students must apply no later than the end of fall quarter of their junior year.

Meeting the above minimums does not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration.

Requirements

Preparation for the Major

Required: (1) International Development Studies 1; (2) one course from Economics 1, 2, Geography 4, Public Affairs 30, or 40; (3) one methods course from Economics 41, Education 35, History 96W, Political Science 6, 6R, Public Affairs 60, Sociology 20, Statistics 10, or 12; (4) three social sciences/area studies courses, each from a different category, selected from (a) Anthropology 3, (b) Gender Studies 10, (c) Geography 3, 5, 6, (d) Global Studies 1, International and Area Studies 1, 31, 33, 50, (e) History 8A, BB, 8C, 9A, 9D, 9E, 10B, 10BW, 11B, 12B, 12C, 22, (f) Political Science 20, 50, (g) Sociology 1, (h) Comparative Literature 4DW, Spanish 44; and (h) demonstrated proficiency in one modern foreign language equivalent to level 6 at UCLA.

The Major

Required: (1) Three core courses selected from International Development Studies 110, M120, 130, and 140; (2) capstone seminar course. International Development Studies 191; (3) one research methodology course from Anthropology 138P, Asian American Studies 103, C142A,
International Development Studies / 579

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

110. Culture, Power, and Development. (4) Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 1. Broad introduction to theoretical traditions in development studies, with focus on dynamics of culture, power, markets, states and social movements, with selected case studies in developing nations and comparative case analysis across Global South and North. Letter grading.

M120. Political Economy of Development. (4) (Same as Political Science M167C.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 1. Political economy approach to puzzle of why some countries are rich and others are poor and why, among latter, some have been able to achieve rapid rates of economic growth while others have not. Explanation and logic behind most important arguments that have been advanced to account for differences across countries in rates and levels of economic development. Letter grading.

130. Theory and History in International Development. (4) Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 1. Social scientific survey of debates and theories contributing to economic development and underdevelopment. Topics include measurement and statistics, social and industrial policies, inequality, poverty, and historical differences for development paths across Europe, Asia, Africa, and Latin America. Letter grading.

140. Decolonizing Political Economy: Colonialism and Development. (4) Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 1. Introduction to approaches and intellectual traditions of critical development studies. Violence of colonization and struggle for decolonization were two of definining processes of 20th century. Consideration of how developments of global and North-South divide. Linking of political and economic systems to challenge of mitigating, rather than adapting—or not addressing—extraordinary challenges of international relations. Letter grading.

M152. Political Economy of Food Change. (4) (Same as Political Science M152.) Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 1. Exploration of superfoods, which are nutrient rich foods considered beneficial for well-being, health, and longevity, as they are high in minerals, vitamins, and antioxidants. While superfoods have been part of cultures’ diets for centuries, in recent decades they have been researched in scientific and medical communities. Citizens globally have begun to increasingly demand and consume foods that are nutritious, organic, and sustainable. It is

International Development Studies

Lower-Division Courses

1. Introduction to International Development Studies. (5) Lecture, three hours; discussion, one hour. Exploration of how understandings of development—cultural, political, and economic realms of development—diffuse differences for development. Lecture and discussion about topics in greater depth. Letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. May be repeated for credit with topic change. P/NP grading.

89H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. May be repeated for credit with topic change. P/NP grading.

Honors Program

In addition to completing all courses required for the major, students must take courses 198A, 198B, and 198C, in which they research, write, and present an honors thesis.

Policies

Preparation for the Major

Each course must be taken for a letter grade.

The Major

Each course must be taken for a letter grade. Students must earn a grade of C or better in an International Development Studies 110, M120, 130, and 140; no more than one of these three courses may be repeated. All three core courses must be taken prior to the capstone senior seminar 191 course.

Honors Program

 Majors who have completed International Development Studies 110, M120, and 130 and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program.

To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 198A, 198B, 198C) and an overall GPA of 3.0.

Highest honors are awarded to students who complete the major (including courses 198A, 198B, 198C) with a 3.75 GPA and who produce an exceptional thesis.

International Development Studies

East Asia and Pacific Islands, Sub-Saharan Africa and one disciplinary elective listed below:

Eastern Europe and West Central Asia: Anthropology 163Q, Central and East European Studies 125, C126, Gender Studies M127, History 107C, 120B, 120D, 127B, 127C, Political Science 128B, 156A, Russian 120, 121, 122, M127, 131.

Honors Programs

Majors who have completed International Development Studies 110, M120, and 130 and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program.

To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 198A, 198B, 198C) and an overall GPA of 3.0.

Highest honors are awarded to students who complete the major (including courses 198A, 198B, 198C) with a 3.75 GPA and who produce an exceptional thesis.

Upper-Division Courses

110. Culture, Power, and Development. (4) Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 1. Broad introduction to theoretical traditions in development studies, with focus on dynamics of culture, power, markets, states and social movements, with selected case studies in developing nations and comparative case analysis across Global South and North. Letter grading.

M120. Political Economy of Development. (4) (Same as Political Science M167C.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 1. Political economy approach to puzzle of why some countries are rich and others are poor and why, among latter, some have been able to achieve rapid rates of economic growth while others have not. Explanation and logic behind most important arguments that have been advanced to account for differences across countries in rates and levels of economic development. Letter grading.

130. Theory and History in International Development. (4) Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 1. Social scientific survey of debates and theories contributing to economic development and underdevelopment. Topics include measurement and statistics, social and industrial policies, inequality, poverty, and historical differences for development paths across Europe, Asia, Africa, and Latin America. Letter grading.

140. Decolonizing Political Economy: Colonialism and Development. (4) Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 1. Introduction to approaches and intellectual traditions of critical development studies. Violence of colonization and struggle for decolonization were two of defining processes of 20th century. Consideration of how developments of global and North-South divide. Linking of political and economic systems to challenge of mitigating, rather than adapting—or not addressing—extraordinary challenges of international relations. Letter grading.

M152. Political Economy of Food Change. (4) (Same as Political Science M152.) Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 1. Exploration of how governments at international, national, and regional levels are addressing—or not addressing—extraordinary challenges of international relations. Letter grading.

M157. Superfoods: Cultural and Global Perspectives. (4) (Same as Food Studies M177 and Global Studies M177) Seminar, four hours. Exploration of superfoods, which are nutrient rich foods considered beneficial for well-being, health, and longevity, as they are high in minerals, vitamins, and antioxidants. While superfoods have been part of cultures’ diets for centuries, in recent decades they have been researched in scientific and medical communities. Citizens globally have begun to increasingly demand and consume foods that are nutritious, organic, and sustainable. It is
important also to address issues such as marketing, misinformation, and hyper about superfoods. Surge of interest in superfoods is increasingly important in content of ongoing research with regards to food access and production. Study addresses paradox that communities cope simultaneously with malnutrition/hunger and obesity, and how farming practices for superfoods and staple crops are related. P/NP or letter grading. 188. Special Courses in International Development Studies. (4) Seminar, three hours. Program-sponsored experimental or temporary courses on selected contemporary topics in international development taught by visiting instructors or affiliated faculty members. May be repeated for credit with topic change. P/NP or letter grading. 189HC. Honors Contracts. (1) Tutorial, three hours. Limited to 20 students. Designed as adjunct to undergraduate course lecture. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading. 189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate course lecture. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

Graduate Course

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

International Migration Studies

Interdisciplinary Minor

College of Letters and Science

H. Glenn Penny, PhD (History)
Roger Waldinger, PhD (Sociology)
J. Christopher Zepeda-Millán, PhD (Chicana/o and Central American Studies, Public Policy, Sociology)

Overview

International migration is a global phenomenon comprising broad and deep linkages within and between the developed and developing worlds. As the issues surrounding global migration processes cross manifold intellectual boundaries, understanding demands insights and methods from a broad array of disciplines. Standard models in economics or demography offer powerful explanations of why people migrate and how migration might have an effect on wages and employment in both sending and receiving societies. However, migration is ultimately about the lived experience of people—those moving and those they encounter. Understanding migrants’ emergent identities and the problems of belonging and acceptance that migration generates requires attention, both to the micro level, as well as to the specific historical and cultural contexts surrounding both migration flows and societal responses.

Undergraduate Minor

International Migration Studies Minor

The minor in International Migration Studies orients students toward comparative, historical, and international dimensions, providing structured exposure to the relevant scholarship. It aims to build an appreciation of international migration and its dilemmas as it draws on the insights generated from a broad array of disciplines and methodological approaches needed for grappling with a vast social and intellectual phenomenon.

Admission

Admission to the International Migration Studies minor is by application and is competitive, using courses, grades, grade-point averages, and personal statements as minimum standards for consideration. To better ensure that they can be successful in their research, students must also secure a faculty member who serves as their thesis adviser, generally to be chosen from the list of affiliated faculty. Applicants must be in good academic standing with an overall grade-point average of 2.0 or better and demonstrate a genuine interest in the subject matter. Applicants are not automatically accepted into the minor and only a limited number of students are admitted each year. Applications must be submitted no later than spring quarter of the junior year.

The Minor

Required Upper-Division Courses (28 to 32 units): (1) one core course: Sociology 151 or 152; (2) four elective courses, from at least two departments, selected from Asian American Studies M130C, M166A, 167, Chicana/o and Central American Studies 120, M124, M126, 164XP, C179, Economics 103, 151, English 134, German 175, History 145A, M146B, 146C, Political Science 143C, M181B, Psychology 129C, 133G, Slavic CM114, Sociology 116, 154, 156, Urban Planning 141; (3) two courses, International Migration Studies 155 and 199, to include an advanced theory course, and a thesis tutorial culminating in a thesis.

Students who take both core courses may apply the second course toward the elective requirement.

This minor culminates in a thesis.

Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade of C– or better. Successful completion of the minor is indicated on the transcript and diploma.
International Migration Studies

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

190. Colloquia and Speaker Series. (2) Seminar, two hours. Introduction to current scholarship in field of international migration studies. Attendance at selected presentations with required response papers. May be repeated for credit. P/NP grading.

Career Prospects

Graduates with a bachelor’s degree in Labor Studies are prepared for careers in nonprofit advocacy, public service, and labor and social movements broadly defined. With ample opportunities to develop and apply a variety of research modalities through coursework, students are also prepared to succeed in graduate and professional school programs in a wide variety of fields.

Undergraduate Study

Labor Studies is interdisciplinary by its nature, drawing on a variety of fields for instructors and researchers. Labor Studies majors and minors become part of an existing interdisciplinary research community with strong ties to researchers and teachers in the social sciences and professional schools.

Requirements

Preparation for the Major

Required: Labor Studies 10 and two lower-division courses selected from African American Studies 1, M5, Asian American Studies 10, 20, 40, 50, Chicana/o and Central American Studies 10B, Gender Studies 10, Geography 4, History 2B, 8B, 12A, 12B, 12C, Honors Collegium 82, Political Science 60, Public Policy 10A, 10B, Sociology M5, 51, Spanish 44, or Labor Studies M1A, M1B, M1CW.

The Major

Required Core Course (4 units): Labor Studies 101.

Capstone Research and/or Community-Engaged/Internship Experience (8 units): During their senior year, students must complete research-intensive capstone courses, community-engaged/internship experiences, or a combination of both, selected from Labor Studies 191A, 194A, 194B, 195A, 195B, 199, or an approved internship through the Center for Community Learning.

Policies

Preparation for the Major

Students may petition, prior to enrollment in the course, to apply other topical courses with substantial labor-related content.

The Major

Students may petition, prior to enrollment in the course, to apply other topical upper-division courses with substantial labor-related content.

Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

Undergraduate Minor

Labor Studies Minor

The Labor Studies minor augments study in a traditional field. Students are required to complete both a departmental major and this minor. The faculty adviser certifies completion of the program.

Admission

To enter the minor, students must be in good academic standing, have a 2.5 grade-point average or better, have completed 45 units, and files a petition and meet with the faculty adviser and minor coordinator in 9244 Bunche Hall, 310-206-0812. Students are encouraged to meet early with the academic adviser to declare the minor and design a coherent program of coursework.

The Minor

Required Core Course (4 units): Labor Studies 101.

Policies

Students may petition, prior to enrollment in the course, to apply other topical courses with substantial labor-related studies content.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Labor Studies

Lower-Division Courses

M1A-M1B-M1CW. Work, Labor, and Social Justice in U.S. (6-6-6) (Formerly numbered Labor and Work-Place Studies M1A-M1B-M1CW) (Same as Clusters M24A-M24B-M24CW.) Course M1A is enforced required to M1B, which is enforced required to M1CW. Limited to first-year freshman. Letter grading. M1A-M1B. Lecture, three hours; discussion, two hours. Exploration of ways in which work has been transformed over last century, impact of this transformation on people, and role of labor movement as force for social justice. M1CW. Special Topics. Seminar, three hours. Enrollment limited to course M1B. Topics include labor law/history, gender, race, and workplace. Satisfies Writing II requirement.

10. Introduction to Labor and Workplace Studies. (8) (Formerly numbered Labor and Workplace Studies 10.) Lecture, three hours. Exploration of workplace social assumptions about work, including why some work is favored, whether those with good jobs really are better people than those without, and how this understanding of work and value came to be common sense. Unpacking of these and other assumptions about work, value, and power, with focus on low-wage workers, their communities, and their place in contemporary society. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

98. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division course lecture. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

98HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Des- signed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental read- ings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

97. Introduction to Labor Studies Research. (4) Seminar, three hours. Designed for freshmen/sopho- mores. Study of current topics and particular research methods in labor studies through readings and other assignments at introductory level. Consult Schedule of Classes for specific topics to be offered for next regularly scheduled offering. May be repeated for credit with topic change. P/NP or letter grading.

99. Student Research Program. (1 to 2) Tutorial (su- pervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-divi- sion students under guidance of faculty mentor. Stu- dents must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

101. Introduction to Labor and Social Movements in Los Angeles. (4) (Formerly numbered Labor and Workplace Studies 101.) Lecture, three hours; discussions, one hour. Students gain an understanding of social justice, social movements, and labor and labor issues in context of global city of Los Angeles. In-depth examination of experience of workers and role of labor movement in Los Angeles, both histori- cally and currently. Topics include changing organiza- tion of work in U.S. and reconfiguration of employ- ment relationships; response of labor movement, histori- cally and in present, to managerial initiatives; way in which organized labor has handled issues of class, race, ethnicity, gender, and immigration status; and challenges facing workers in 21st century and their in- ternational responses in Los Angeles. P/NP or letter grading.

M105. American Working Class Movements. (4) (Same as History M146B.) Lecture, three hours; dis- cussion, one hour (when scheduled). Designed for ju- niors/seniors. Major episodic events of trade union, and cultural history of American working class from Colonial times to present, with emphasis on both or- ganized and unorganized labor, history of Knights of Labor, AFL-CIO, and development of labor politics. P/NP or letter grading.

M108. Common Thread: Garment Workers Past, Present, Future. (4) (Same as Chicana/o and Central American Studies M128C and Gender Studies M169.) Lecture, three hours. Study blends frameworks from economics, labor history, and ethnic studies to offer in-depth exploration of lives and experiences of gar- ment industry workers from early 19th century to present. In contrast to traditional narratives, studies locates garment workers—majority of whom are immi- grant women—at vanguard of U.S. labor movement, showing how they pioneered new forms of worker ed- ucation and other social welfare programs, and be- came leaders in fight for women’s, civil, and immigrant rights. Exploration of garment work relationship to American culture, tracing how sweatshop became symbol of worker exploitation, how popular culture and fashion trends impacted lived realities of workers in those shops, and how racial and gendered expecta- tions shaped and transformed garment workers. By doing so, study reveals garment work to be central thread that ties together histories of global trade, in- dustrialization, gender and sexuality, immigration, radicalism, unionization, and American imperialism. P/NP or letter grading.

M114C. African American Political Thought. (4) (For- merly numbered Labor and Workplace Studies M114C.) (Same as African American Studies M114C and Political Science M180A.) Lecture, three or four hours; discussion, one hour (when scheduled). Inten- sive introduction to African American political thought, with focus on major ideological trends and political philosophies as they have been applied and inter- preted by African Americans. Debates and conflicts in black political thought, historical contest of African American social movements, and relationship be- tween black political thought and major trends in Western thought. P/NP or letter grading.
M115. We Gone Be Alright: Developing Next Generation of Black Organizers. (4) (Same as African American Studies M115.) Seminar, four hours. Learning from and building on Black labor and community organizing traditions, students develop skills and mindsets needed for transformative leadership. Students connect with leaders of community organizations, student organizers, and prepare for more intensive community-based work. P/NP or letter grading.

M116. Asian American Social Movements. (4) (Formerly numbered Labor and Workplace Studies M116.) (Same as Asian American Studies M116.) Lecture, three hours. Designed for juniors/seniors. Examination of several dimensions of Asian American social movements, including grassroots, mass movement, and student organizers, and prepare for more intensive community-based work. P/NP or letter grading.

M117. Negotiation. (4) (Formerly numbered Labor and Workplace Studies M117.) (Same as Communica-
tion M117.) Lecture, four hours. Art and science of negotiation in securing agreements between independent parties. Theory and practice that underlies success- ful negotiation. Students learn broad array of negotiation skills, including identifying one’s own (and others’) communication style, identifying and incorporating components of successful negotiation. Experiential course in which students participate linked struggle for change with own personal and mindsets needed for transformative leadership.

M118. Learning from and building on Black labor and community organizing traditions, students learn broad array of negotiation skills, including identifying one’s own (and others’) communication style, identifying and incorporating components of successful negotiation. Experiential course in which students participate linked struggle for change with own personal experience, and to improve working conditions for them and various strategies for social change and economic equity pursued through organized labor and other means. Letter grading.

M129. Community-Engaged Research Methods. (4) (Same as Chicana/o and Central American Studies M129 and Public Affairs M117C.) Lecture, four hours. Students are trained in designing, drafting, piloting, and administering new survey focused on transitions to adulthood. Written with labor and community partners serving Latinx, Asian Americans and Pacific Islanders, Black, and Indigenous youth and low-wage workers, this survey gathers data on work in diverse fields and labor, education, health, mental health, and civic engagement of young people residing in Black, Indigenous, and people of color communities. Students are exposed to historical dynamics of race and economic inequality in contemporary life, and critical quantitative science. Includes testing questions on racial identity and attitudes, gender identity, workforce development, labor rights, healing and well-being, and social justice issues. P/NP or letter grading.

M134XP. Engaging Immigrants and Their Families. (5) (Formerly numbered M134SL.) (Same as Chicana/o and Central American Studies M134.) Lab Seminar, four hours; discussion, two hours; field placement, two hours. Survey and exploration of immigrant languages in Los Angeles and role that cultural competence plays in acting in part to buffer, settle, and incorporate immigrants in daily life. Focus on civil society to explore multiple forms of interventions and impacts that take place in multiple communities across Los Angeles’ basin. Service learning partnerships focus on organizations addressing immigration concerns. Letter grading.

M136. Working Families and Educational Inequalities in Urban Schools. (4) (Formerly numbered Labor and Workplace Studies M136.) (Same as Education M136.) Seminar, three hours; fieldwork, five hours. Exploration of complex relationship between working-class and immigrant communities in American urban schools. Drawing on multiple disciplinary frameworks that address issues of race, ethnicity, and immigration, schools viewed as sites where inequalities are produced and resisted. Review of history of exclusionary treatment and divergent conceptual frames that educational researchers have used to understand notion of inequality, access to quality public education, and how race, ethnicity, and class affect school experiences for working-class and poor communities. Look inside schools through community service learning opportunity to examine systems, structures, and policies that sustain and reproduce inequality and policies that intend to remedy educational inequalities in urban schools. Opportunity to investigate issues of working-class families and in- educationally they relate to communities and experiences. P/NP or letter grading.

M140. Working It: Women, Work, and Family. (4) (Formerly numbered Labor and Workplace Studies 140.) Lecture, three hours; discussion, one hour. Examination of working women in U.S. history from 19th-century midwives to 21st-century sex workers through film, oral history, and traditional forms of scholarship. Exploration of personal and work life of women from various intersections of class, gender, race, ethnicity, sexuality, and immigration status with focus on systems that have shaped workplace experiences for women over time, including gender discrimin- ations, sexual harassment, sexualization, and reproductive health. Special attention given to strategies women have utilized to shape their work ex- perience, and to improve working conditions for them and their working-class sisters. P/NP or letter grading.

M143. Class and Gender in Care Work. (4) (Same as Asian American Studies M162, Chicana/o and Central American Studies M128B, and Gender Studies M140C) Lecture, three hours; discussion, one hour. Examination of how gender, race, class, and citizenship status shape domestic labor in U.S. Examination of domestic worker experiences through film, fiction, and traditional scholarship. Investigation of why do-
mestic workers, and why immigrants and women of color make up large percentage of this workforce. Exploration of how domestic workers navigate pay and working conditions, and how they build community and family networks in shadows of their privileged employers. P/NP or letter grading.

M144. Women’s Movement in Latin America. (4) (Formerly numbered Labor and Workplace Studies M144.) Lecture, four hours. Course on women’s movements and feminism in Latin America and Caribbean to examine diverse social movements. Emphasis on historical context and political conditions that led to women’s resistance, as well as social movements and policies that women have launched political and gender struggles. Discussion of forms of feminism and women’s consciousness that have emerged out of indigenous rights movements, environmental struggles, labor movements, Christian-based communities, peasant and rural organizing, and new social movements that are concerned with race, sexuality, feminism, and human rights. Consideration of class as intersectional category of race, sexuality, feminism, and class discussions, and readings. Introduction to elements of effective storytelling. Analysis and investigation of stories in contemporary American life. Students practice telling stories in collaborative, workshop-style environment. P/NP or letter grading.

M165. Sociology of Race and Labor. (4) (Formerly numbered Labor and Workplace Studies M165.) (Same as African American Studies M165 and Sociology M165.) Lecture, one hour. Limited to juniors/seniors. Exploration of relationships between race/ethnicity, employment, and U.S. labor movement. Analysis of underlying racial and gendered inequalities historically and currently. Consideration of circumstances under which workers and unions have excluded people of color from jobs and unions, as well as circumstances under which women and men in organized labor have used color into unions in efforts to improve their wages and working conditions. Impact of globalization on these dynamics. P/NP or letter grading.

M166A. Immigration, Labor, and Higher Education. (4) (Formerly numbered Labor and Workplace Studies M166A.) (Same as Asian American Studies M166A and Chicana/o and Central American Studies M166A.) Lecture, one hour. New immigrant rights movement, with focus on historical context and political conditions that led to rights of migrants at center of current political and social justice struggles in U.S. P/NP or letter grading.

M166B. Research on Immigration Rights, Labor, and Higher Education. (4) (Formerly numbered Labor and Workplace Studies M166B.) (Same as Asian American Studies M166B and Chicana/o and Central American Studies M165B.) Seminar, two hours. Required course: course M166A. Expansion of research conducted by students in course M166A involving oral histories, research on immigration/labor/higher education, and evaluation of legislation and legal issues impacting undocumented students. Letter grading.

M166C. Research on Immigrant Students and Higher Education. (4) (Formerly numbered Labor and Workplace Studies M166C.) (Same as Asian American Studies M166C and Chicana/o and Central American Studies M166C.) Seminar, three hours. Enrollment of theoretical and practical understanding of worker center movement, with focus on historical factors that have led to emergence and growth of worker centers. Role of worker centers in promoting multi-racial, multi-cultural, and multi-cultural economic justice. Transnational cross-border solidarity issues and rights of undocumented workers. P/NP or letter grading.

M170. History and Politics of Immigration: Migrants and Inevitable Evolution of Collective and Individual Rights. (4) (Formerly numbered Labor and Workplace Studies M170.) Lecture, three hours. With immigration as rights of migrants at center of current political and legal debates throughout world, study offers critical introduction to inevitable evolution of law and policy resulting from—and in reaction to—movement of immigrants and refugees. Study also asks how labor activists and organizers might harness power of storytelling in service of social justice, and equitable and diverse society. Introduction to elements of effective storytelling. Analysis and investigation of stories in contemporary American life. Students practice telling stories in collaborative, workshop-style environment. P/NP or letter grading.

M171. Labor and Economic Development. (4) (Formerly numbered Labor and Workplace Studies M171.) (Same as Community Health Sciences CM171.) Lecture, three hours; fieldwork, two hours. Examination of economic development and identification of ways that labor and labor unions directly and indirectly influence shape economic development. Wide range of roles that labor plays, and could play, in promoting and supporting economic development for all. Letter grading.

M173. Nonviolence and Social Movements. (4) (Formerly numbered Labor and Workplace Studies M173.) (Same as African American Studies M173 and Chicana/o and Central American Studies M173.) Lecture, three hours; discussion, one hour. Overview of nonviolent and its impact on social movements both historically and in present day. Use of nonviolent tools with which to engage current political debates about immigration. Using historical and modern texts, while incorporating elements of art, popular culture, and storytelling, study encourages discussion, debate, and analysis about immigrants’ role in development of rights and modern political debates about immigration. Exploration of themes of inclusion, exclusion, integration, and multiculturalism. Students describe shortcomings of status-quo policies while also imaging and prescribing arguments about where law can and should go. P/NP or letter grading.

M174. Labor and Employment Law. (4) (Formerly numbered Labor and Workplace Studies M174.) Lecture, three hours. Use of combination of cases, statutes, news articles, films, and oral history, introduction to history of organized labor; current debates and trends; and basic structure of laws, regulations, and cases that govern organizing to improve workplace conditions. Study covers primary federal acts and court cases that govern strikes, picketing, boycotts, and union elections. Examination of challenges to organizing labor from inside and outside labor movement, including right-to-work legislation; dismantling of public sector unions; and racism, sexism, and anti-immigrant sentiment in labor movement. Students present cases, including labor law case studies. Topics include new trends in labor organizing. Offers mix of guest speakers, oral history, case excerpts, scholarly articles, news articles and blogs, videos, small-group work, and community engagement. P/NP or letter grading.

M175. Agitational Communication. (4) (Formerly numbered Labor and Workplace Studies M175.) (Same as Communication M175.) Lecture, four hours; discrete; one hour (when scheduled). Theory of
tation; agitation as force for change in existing institutions and policies in democratic society. Intensive study of selected agitational movements and techniques and content of their communications. Letter grading.

M176. Visual Communication and Social Advocacy. (4) (Formerly numbered Labor and Workplace Studies M176). (Same as Communication M176.) Lecture, four hours. Exploration of role of spirituality and social justice in visual communication as a medium of grassroots politics that have organized immigrant rights movements. Focus on teachings of St. Francis of Assisi, Mahatma Gandhi, Martin Luther King, Thich Nhat Hanh, and other spiritual leaders. Uses specific case studies and workshop experiences. Includes videos and guest lectures by scholars and activists who integrate their spirituality into their daily work. P/NP or letter grading.

179A. Neoliberalism, Social Justice, and Community Organizing. (4) (Formerly numbered Labor and Workplace Studies 179A.) Lecture, three hours. Study of intersection of neoliberalism, democracy, and rise of social justice movements in U.S. Theory of depth, theoretically rigorous, and empirically-based understanding of dynamics that have produced specific form of crisis that envelopes contemporary politics. Focus on understanding and explaining development and current structures of neoliberalism as both ideological frame and form of governance. Examination of some of main works on democratic theory and their relevance to social justice to demonstrate how specific patterns of development of neoliberalism in U.S. since 1980 has undermined democratic governance and produced conditions that have deepened inequality and poverty and/or booty. Examination of emergence of grassroots politics that have organized around issues that challenge or contest neoliberal dominance and attempt to reassert principles of democratic inclusion through their struggles for social change. P/NP or letter grading.

179B. Doing Democracy: Social Movements, Grassroots Politics, and Community Organizing. (4) (Formerly numbered Labor and Workplace Studies 179B.) Lecture, three hours. Focus on community organizing and social movements as mechanisms that have been adopted by marginalized or excluded sectors and groups of society to promote their interests and express their desires. Emphasis on fundamental characteristics of effective and responsive democratic regime. Summarization of critiques that describe means by which those elements are being undermined in current period and the efforts to promote social justice as basis for inclusive and responsive form of popular sovereignty through politics of social movements and community organizing. Study of various forms of social movements and different models of and approaches to community organizing and their relationship to democratic governance. P/NP or letter grading.

M180. Southern California Regional Economy. (4) (Formerly numbered Labor and Workplace Studies M180.) (Same as Urban Planning CM137.) Lecture, three hours. Introduction to regional economy, with emphasis on understanding and analyzing labor market composition, and review of conflicting portrayals depicting dynamics of region. Two all-day bus tours of key economic regions and guest lectures by regional experts included. Letter grading.

181. Local and Global Social Science Research Principles, Methods, and Practices. (4) (Formerly numbered Labor and Workplace Studies 181.) Lecture, three hours. Introduction to basic social science research methods. Through comparison of lectures, key readings, and participation in hands-on research project, students develop understanding of critical debates regarding role of research in socioeconomic context that impacts workers and their organizations and communities at large. Introduction to several research method techniques that are highly effective in producing sound and rigorous studies about and for labor movement, including important data that can be used for political action. Special emphasis given to understanding research that has supported different labor movements. P/NP or letter grading.

182. Oral History for Social Change. (4) (Formerly numbered Labor and Workplace Studies 180.) Three hours. Introduction to field of oral history and its role in social movements. Students receive hands-on experience through independent fieldwork where they design, execute, and process oral history research project on contemporary topics such as immigration, work, housing, incarceration, and social movements. Through reading and discussion students learn oral history research techniques, such as interviewing and working with human subjects. Emphasis on innovative uses of oral history interviews that bring silenced voices to wide public audience for social justice. No knowledge or experience about interviewing and processing required. P/NP or letter grading.

183. Special Courses in Labor and Workplace Studies. (4) (Formerly numbered Labor and Workplace Studies 187.) Lecture, three hours; discussion, one hour. Program-sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

184. Special Courses in Labor and Workplace Studies. (4) (Formerly numbered Labor and Workplace Studies 188.) Seminar, four hours. Program-sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

185A. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus under faculty mentor's instruction. May not be repeated. Letter grading.

185C. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 185B. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

186. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to upper-division lecture course. In-depth study of specific topics. Conduct preparatory research, and begin preparation of syllabus under faculty mentor while facilitating USIE 88S course. Individual study in regularly scheduled meetings with faculty mentor. May be repeated for credit. P/NP or letter grading.

187. Special Courses in Labor and Workplace Studies. (4) (Formerly numbered Labor and Workplace Studies 187.) Lecture, three hours; discussion, one hour. Program-sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

188A. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus under faculty mentor's instruction. May not be repeated. Letter grading.

188C. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188B. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to upper-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for credit. P/NP or letter grading.

189C. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as an upper-division research seminar. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 credits. Letter grades required. Honors content noted on transcript. P/NP or letter grading.

190. Research Group Seminars: Labor Summer Research Program. (1) Seminar, three hours. Open to students who are part of Labor Summer Research Program. Seminar covers research methods used by union researchers and scholars engaged in labor relations and workplace studies. Through combination of lectures, key readings, and active participation in hands-on research fieldwork, development of understanding of critical doing research with community residents and organizations, our responsibilities when conducting research in historically disenfranchised communities, and relationship between socially-just research outcomes and methodologies. P/NP or letter grading.

M190A. Community-Engaged Research in Practice: Community Scholars. (4) (Same as Community Engagement and Social Change M190B.) Seminar, three hours. Enforced corequisite: course 194A. Designed for students participating in Astin Community Scholars Program. Students learn from faculty, community stakeholders, graduate students, and key academic experts about emerging organizing models, best practices, and changing landscape in chosen topic. Provides students with opportunity to work with leaders from key community and labor organizations across six-month dynamic participatory research project. Focus on current topic affecting Angelenos and neighboring communities. Key outcomes may include production of policy reports, popular education events, and/or book publication by UCLA Labor Center and collaborative partners. Primary focus on engaging policy makers and other change agents. P/NP or letter grading.

M190C. Community-Engaged Research in Practice: Community Scholars. (4) (Same as Community Engagement and Social Change M190C.) Seminar, three hours. Requisites: courses M190A, M190B. Enrollment limited to students participating in Astin Community Scholars Program. Students learn from faculty, community stakeholders, graduate students, and key academic experts about emerging organizing models, best practices, and changing landscape in chosen topic. Provides students with opportunity to work with leaders from key community and labor organizations across Los Angeles as research lens. P/NP or letter grading.

191. Research Group Seminars: Labor Summer Research Program. (1) Seminar, three hours; fieldwork, five hours. Enforced corequisite: course 191A. Second part of Labor Studies capstone senior research project series with focus on fundaments of social science research methods. Through lectures, key readings, and in-class exercises, students develop understanding of critical debates regarding role of research within socioeconomic and political contexts that impact organizations, and communities at large. Overview of various research methods and techniques, literature review, data collection, analysis, and final paper. Focus on workers, labor, and community organizing, policy initiatives, and/or political action in Los Angeles as research lens. P/NP or letter grading.

191A. Labor Studies: Research Principles, Methods, and Practices. (4) (Formerly numbered 191.) Seminar, three hours. Focus on labor studies capstone senior research project series with focus on research methods in action. Through lectures, key readings, in-class exercises, and field work, students develop understanding of critical debates regarding role of research within socioeconomic and political contexts that impact organizations, and communities at large. Overview of various research methods and techniques, literature review, data collection, analysis, and final paper. Focus on workers, labor, and community organizing, policy initiatives, and/or political action in Los Angeles as research lens. P/NP or letter grading.

191B. Labor Studies: Research in Action. (4) Seminar, three hours; fieldwork, five hours. Requisite: course 191A. Second part of Labor Studies capstone senior research project series with focus on research methods in action. Through lectures, key readings, in-class exercises, and field work, students develop understanding of critical debates regarding role of research within socioeconomic and political contexts that impact organizations, and communities at large. Overview of various research methods and techniques, literature review, data collection, analysis, and final paper. Focus on workers, labor, and community organizing, policy initiatives, and/or political action in Los Angeles as research lens. P/NP or letter grading.
debates regarding role of research and socioeconomic contexts that impact low-wage workers and their families. May be repeated for credit. Offered in summer only, P/NP or letter grading.

194B. Research Group Seminars: Labor and Workplace Studies. (Formerly numbered Labor and Workplace Studies 194B.) Seminar, three hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field of labor studies or of research of faculty members and/or students. May be repeated for credit. P/NP or letter grading.

194C. Field Research Group Seminar. (4) Seminar, one hour; fieldwork, 15 hours. Designed for undergraduate students who are part of Labor Summer Research program. Offers opportunity for immersion in applied research in field of labor studies. Field research and analysis contributing to research project. Students learn how to conduct surveys, analyze data, and contribute their analysis to research brief. Students develop understanding of critical debates regarding role of research and socioeconomic contexts that impact low-wage workers and their families. May be repeated for credit. Offered in summer only. P/NP or letter grading.

195A. Community or Corporate Internships in Labor and Workplace Studies. (4) (Formerly numbered Labor and Workplace Studies 195A.) Tutorial, one hour; fieldwork, 15 hours. Enforced corequisite: course 194A. Limited to juniors/seniors. Internship in supervised setting in community agency, labor union, or other organization concerned with work and employment issues. Placements to be arranged by instructor. Students meet on regular basis with instructor and provide periodic written reports on their experience. May be repeated for credit. Individual contract with supervising faculty member required. Offered in summer only. P/NP or letter grading.

195B. Community or Corporate Internships in Labor and Workplace Studies. (2 to 5) (Formerly numbered Labor and Workplace Studies 195B.) Tutorial, to be arranged; internship, up to 15 hours. Limited to juniors/seniors. Internship in supervised setting in community agency, labor union, or other organization concerned with work and employment issues. Placements to be arranged by instructor. Students meet on regular basis with instructor and provide periodic written reports on their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

195CE. Worker and Community Organizing for Social Change: Research Justice Internship. (4) Tutorial, to be arranged; fieldwork, eight to 10 hours. Students work intensively with community organization on structured activity that supports organization’s mission and student’s intellectual development. Students meet regularly with graduate student instructor to reflect on internship experience, assigned readings, and reflective writing assignments. Students complete final paper that links research and experience. May be repeated for credit with consent of Center for Community Engagement. No more than 8 units may be applied toward major; units applied must be taken for letter grade. Letter grading.

199. Directed Research in Labor and Workplace Studies. (2 to 4) (Formerly numbered Labor and Workplace Studies 199.) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Course

375. Teaching Apprentice Practicum. (1 to 4) (Formerly numbered Labor and Workplace Studies 375.) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

Overview
For more than 60 years, UCLA has been a leader among U.S. universities in teaching and research on Latin America. The Master of Arts (MA) program in Latin American Studies offers graduate students the unique opportunity to pursue interdisciplinary research. Students design their own programs by choosing courses from various fields of study that focus on Latin America. Students can work with leaders in various disciplines that study Latin America, with guest lecturers from various fields. (Latin American Studies core course.)

250B. Interdisciplinary Seminar: Latin American Studies. (4) Seminar, three hours. Problem-oriented seminar on critical areas stressed in University’s cooperative programs in Latin America.

250C. Interdisciplinary Topics in Latin American Studies. (4) Reading knowledge of Spanish or Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature.

Undergraduate Study

Information on the undergraduate program in this discipline, which offers a major and a minor in Latin American Studies, can be found in the International and Area Studies section.

Graduate Majors

Latin American Studies MA

Students are able to complete the degree in one to two years, and can choose to write a final thesis or submit three revised seminar papers in partial satisfaction of the degree.

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Articulated Degree Programs

Articulated degree programs permit no credit overlap; students must complete degree requirements separately for each degree.

• Latin American Studies MA/Master of Education
• Latin American Studies MA/Master of Library and Information Science
• Latin American Studies MA/Master of Public Health

Concurrent Degree Programs

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

• Latin American Studies MA/Master of Business Administration
• Latin American Studies MA/Master of Urban and Regional Planning

Latin American Studies Graduate Courses

205. Latin Americanist Scholarship. (4) Lecture, three hours. Panoramic introduction to methods and issues in various disciplines that study Latin America, with guest lecturers from various fields. (Latin American Studies core course.)

250B. Interdisciplinary Seminar: Latin American Studies. (4) Seminar, three hours. Problem-oriented seminar on critical areas stressed in University’s cooperative programs in Latin America.

250C. Interdisciplinary Topics in Latin American Studies. (4) Reading knowledge of Spanish or Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature.

M268, HIV/AIDS and Culture in Latin America. (4) (Same as Community Health Sciences M250.) Seminar, three hours. Exploration of cultural, political, and public health context for people living with and at risk for HIV/AIDS and their families in Latin America. Public health aspects, including epidemiology, comorbidity concerns and community interventions, medical anthropological study of experience of those impacted, and grassroots responses, as well as political/economic context addressing poverty and structural violence. Letter grading.

M264, Latin America: Traditional Medicine, Shamanism, and Folk Illness. (4) (Same as Anthropology M233Q and Community Health Sciences M264.) Lecture, three hours. Recommended preparation: Community Health Sciences 132; bilingual English/Spanish skills. Examination of role of traditional medicine and shamanism in Latin America and exploration of how indigenous and mestizo groups diagnose and treat folk illness and Western-defined diseases with variety of health-seeking methods. Examination of art, music, and ritual and case examples of religion and healing practices via lecture, film, and audiotape. Letter grading.

M268A-M268B. Seminars: Recent Latin American History. (4) (Same as History M268A-M268B) Seminar, three hours. Course M268A is requisite to M268B. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of interdisciplinary nature. In Progress (M268A) and letter (M268B) grading.

291A-291B. Variable Topics in Latin American Studies. (4-4) Seminar, three hours. Selected topics on Latin America. May be repeated for credit with topic change. S/U or letter grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. May be repeated, but only 4 units may be applied toward minimum graduate course requirement. S/U or letter grading.

597. Preparation for MA Comprehensive Examination. (4) Tutorial, to be arranged. Ordinarily taken only during term in which student is being examined. S/U grading.

598. Research for and Preparation of MA Thesis. (4) Tutorial, to be arranged. Only 4 units may be applied toward minimum graduate course requirement. S/U grading.

Faculty Roster

Professors

Khaled M. Abou El Fadl, JD, MA, PhD (Omar and Azmardala Alfi Endowed Professor of Islamic Law)
E. Tendayi Achiume, JD (Alicia Miriana Professor of Law)
Iman Anabtawi, JD, MA

Stephen M. Bainbridge, JD, MS (William D. Warren Professor of Law)
LaToya J. Baldwin Clark, JD, MA, PhD, Acting
Steven A. Bank, JD (Paul Hastings Endowed Professor of Business Law)
Stuart A. Banner, JD (Norman Abrams Endowed Professor of Law)
Mario Biagioli, MFA, MA, PhD
William C. Boyd, JD, MA, PhD (Michael J. Klein Professor of Law)
Taimie L. Bryant, JD, MA, PhD
Daniel J. Bussel, JD
Devon W. Carbado, JD (Honorable Harry Pregerson Endowed Professor of Law)
Ann E. Carlson, JD (Shirley Shapiro Professor of Environmental Law)
Kimberly A. Clausing, MA, PhD (Eric M. Zolt Professor of Tax Law and Policy)
Beth A. Crogan, JD
Kimberly W. Crenshaw, JD, LLM (Promise Institute Professor of Human Rights)
Scott L. Cummings, JD (Robert Henigson Endowed Professor of Legal Ethics)
Joshua F. Dienstag, MA, PhD (Shapiro Family Endowed Professor of Modern Political Theory)
Sharon Dolovich, JD, Phd
Ingrid V. Eagly, JD
Blake E.B. Emerson, JD, MA, MPhil, PhD
Joseph R. Fishkin, JD, MPhil, DPhil
Carly C. Franklin, JD, M Sti, DPhil (McDonald/Wright Professor of Law)
Meirav Furth-Matzkin, LLM, SJD, Acting
Fanna Gamali, JD, Acting
Stephen A. Gardbaum, JD, CPE, MSc, PhD (Stephen Yeazell Endowed Professor of Law)
Laura E. Gomez, JD, MA, PhD (Rachel F. Moran Endowed Professor of Law)
Mark D. Greenberg, JD, DPhil (Michael H. Schill Endowed Professor of Law)
Ariel J. Gross, JD, PhD
Cheryl I. Harris, JD (Rosalinde and Arthur Gilbert Foundation Endowed Professor of Civil Rights and Civil Liberties)
Richard L. Hasen, JD, MA, PhD
Barbara Herman, MA, PhD (Gloria and Paul Griffin Professor of Philosophy)
Jill R. Horwitz, JD, MA, PhD (David Sanders Professor of Law and Medicine)
Leslie N. Johns, MA, MS, PhD, Acting
Jenny Kang, JD
Sung Hui Kim, JD, MA
Russell Korobkin, JD (Richard C. Maxwell Professor of Law)
Maximo Langer, SJD, LLB (David G. Price and Dallas P. Price Professor of Law)
Douglas G. Lichtman, JD
Aaron M. Littman, JD, MPhil, Acting
Timothy F. Malloy, JD (Frank G. Wells Endowed Professor of Environmental Law)
David W. Marcus, JD
Mark P. McKenna, JD
Jon D. Michaels, JD, MA
Hirosi Motomura, JD (Susan Westerberg Prager Endowed Professor of Law)
Neil W. Netanel, JD, JSD (Pete Kameron Endowed Professor of Law)
Jason S. Oh, JD (Lowell Milken Professor of Law)
James J. Park, JD
Edward A. Parson, MSc, PhD (Dan and Rae Emmett Endowed Professor of Environmental Law)

Sunita Patel, JD, Acting
Mark A. Peterson, AM, PhD
Kal Rauatia, JD, PhD (Promise Institute Professor of Comparative and International Law)
Fernáñ Restrepo, JSD, LLB, MSc, LLM, PhD, Acting
Angela R. Riley, JD
James Salzman, JD, MSc
Richard H. Sander, JD, MA, PhD (Jesse Dukeminier Professor of Law)
Joanna C. Schwartz, JD
Andrew D. Selbst, JD, MEng, Acting
Seana Shiffrin, JD, DPhil (Pete Kameron Professor of Law and Social Justice)
Anna K. Spain Bradley, JD
Clyde S. Spillenger, JD, MA, MPhil
Kirk J. Stark, JD (Barral Family Endowed Professor of Tax Law)
Richard H. Steinberg, JD, PhD (Jonathan D. Varat Endowed Professor of Law)
Rebecca Stone, JD, MPhil, DPhil
Xiyin Tang, JD, Acting
Sherod Thaxton, JD, MA, PhD
Lauren V. van Schilfgaarde, JD, Acting
Andrew Verstein, JD
John D. Villasenor, MS, PhD
Eugene Volokh, JD (Gary T. Schwartz Endowed Professor of Law)
Alex L. Wang, JD
Lindsay F. Wiley, JD, MPH
Adam D. Winkler, JD, MA (Connell Professor of Law)
Jonathan M. Zasloff, JD, MA, MPhil, PhD
Noah D. Zatz, JD, MA

Professors Emeriti

Richard L. Abel, PhD, LLB, LL.D (Connell Professor Emeritus of Law)
Norman Abrams, JD
Alison G. Anderson, JD
Peter L. Arenella, JD
Michael R. Asimow, JD
Paul B. Bergman, JD
Gary L. Blasi, MA
Grace Ganz Blumberg, JD, LLM
Susan Fletcher French, JD
Carole E. Goldberg, JD (Jonathan D. Varat Endowed Professor Emerita of Law)
Robert D. Goldstein, JD, MED
Mark F. Grady, JD
Kenneth W. Graham, Jr., JD
Kenneth N. Klee, JD
William A. Klein, LLB (Richard C. Maxwell Professor Emeritus of Law)
Christine A. Littleton, JD
Gerald P. López, JD
Lynn M. LoPucki, JD, LLM (Security Pacific Bank Professor Emeritus)
Daniel H. Lowenstein, LLB
Henry W. McGee, Jr., JD, LLM
Albert J. Moore, JD
Stephen R. Munzer, JD
Grant S. Nelson, JD
Frances E. Olsen, JD, SJD
Susan Westerberg Prager, JD, MA (Arjay and Frances Fearing Miller Professor Emerita of Law)

Russell Korobkin, JD, Interim Dean
in interdisciplinary research and training, and is at the forefront of efforts to link research to its effects on society and the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

The law school is unique in that it also offers students an opportunity to specialize in six specific areas of law: business law and policy; critical race studies; international and comparative law; law and philosophy; media, entertainment, and technology law and policy; and public interest law and policy.

Graduate Study

The school offers a three-year curriculum leading to the Juris Doctor (JD) degree and three advanced degrees—Master of Laws (LLM), Master of Legal Studies (MLS), and Doctor of Juridical Science (SJD).

Courses

The undergraduate courses offered by the School of Law are designed for undergraduate students only. For information about the legal curriculum of the School of Law, see the school website.

Graduate Majors

Doctor of Juridical Science

Information about the Juridical Science program, how to apply, and requirements is available on the school website.

Juris Doctor

Information about the Juris Doctor program, how to apply, and requirements is available on the school website.

Concurrent Degree Programs

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

- Juris Doctor/African American Studies MA
- Juris Doctor/Asian Pacific Islander Studies MA
- Juris Doctor/Doctor of Education
- Juris Doctor/Education MA, PhD
- Juris Doctor/Master of Business Administration
- Juris Doctor/Master of Social Welfare
- Juris Doctor/Master of Urban and Regional Planning
- Juris Doctor/Philosophy PhD

Master of Laws

Information about the Master of Laws program, how to apply, and requirements is available on the school website.

Master of Legal Studies

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Articulated Degree Programs

Articulated degree programs permit no credit overlap; students must complete degree requirements separately for each degree.

- Master of Legal Studies/Doctor of Medicine
Alien Land Laws aimed at Japanese residents of California, relocation of Japanese citizens after Pearl Harbor, California’s response to U.S. immigrants from dust bowl during great depression, post-World War II through 1960s measured aimed at equal access to things like home ownership, employment, and rental housing, and uses of initiative in modern era. P/NP or letter grading.

173. Topics in American Constitutional History. (4) Lecture, three hours. Introduction to major themes, events, and cases in American constitutional history. U.S. Supreme Court decisions and other sources of constitutional meaning, including popular movements and expressions of constitutional principle from actors in other branches of federal government and in states. Emphasis on historical background and ideological context for particular constitutional controversies at various points in American history, with more formal analysis of particular decisions and competing methods of constitutional interpretation considered. Topics include origins of judicial review, debates over meaning of federalism in early republic, slavery and constitution, Reconstruction Amendments, laissez-faire constitutionalism, citizenship and empire, origins of civil liberties, New Deal constitutionalism, and pre-history of Brown versus Board of Education. P/NP or letter grading.

175. Seminar: Individual Rights Protected by U.S. Constitution. (3) Seminar, two hours. Limited to juniors/seniors. Breadth introduction to and examination of individual rights protected under Bill of Rights and 14th Amendment to U.S. Constitution, including freedom of speech and press, religious freedom, right to privacy (including procreative rights) and due process of law, constitutional protection against discrimination based on race and gender, and basic criminal procedure protections. Emphasis on principal Supreme Court cases establishing scope of those rights and their limits. Letter grading.

176. Special Topics in Law. (4) Lecture, four hours. Topics of special interest to undergraduate students. Specific topics may vary each term depending on particular interest of instructors or students. May be repeated for credit. P/NP or letter grading.

182. Law and Popular Culture. (4) Lecture, four hours. Focus on interface between two important subjects—law and popular culture. Students view series of films or television shows related to law, lawyers, and legal system. Discussion of pop culture treatment of subjects such as adversary system, good and bad lawyers, female lawyers, lawyers from lesbian, gay, bisexual, and transgender community, minority lawyers, work life of lawyers, legal education, ethical issues, jury system, and criminal and civil justice, drawing on film theory and filmmaking technique to deepen understanding of interrelationship between law and popular culture. Illumination of ways in which pop culture products both reflect and change social views about law and lawyers. Offered in summer only. P/NP or letter grading.

183. Corporate Mock Trial. (4) Lecture, four hours. Introduction to basic principles of business law, such as how law applies to various business entities, duties and liabilities of corporate officers and directors, and shareholder derivative suits. American legal system and how litigation progresses from filing of complaints through trial. Students participate in mock trial at end of course. P/NP or letter grading.

186. Law and Order. (4) Lecture, four hours. Introduction to basic principles of criminal law. How to read and interpret judicial cases and provisions of penal code to learn how American criminal justice system works. Discussions structured to simulate experience of typical law school classroom. P/NP or letter grading.

187A. Legal History Colloquium. (3) Seminar, two hours. Corequisite: course 193. Reading of scholarly papers prepared by school faculty members and other scholars in fields of legal history, economics, and political science. Preparation of critiques and discussion of major research paper presented in seminar setting with author of paper. P/NP or letter grading.

187B. Politics and International Law Colloquium. (3) Seminar, two hours. Corequisite: course 193. Limited to College Honors students. Lectures on alternative theoretical approaches (including realism, institutionalism, and constructivism) to understand relationship between politics and international law. Weekly presentations on topic by 10 leading law and political science scholars from the U.S. and abroad. Reading of scholarly papers, preparation of critiques, and discussion of issues in seminar setting with authors of papers. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

191. Variable Topics Research Seminars: Law—California Legal History. (4) Seminar, two hours. Prerequisite: course 170. Research project, selected in consultation with faculty member and using original and secondary materials, to be conducted, followed by major presentation of student work to class and writing of major research paper. Letter grading.

193. Journal Club Seminars: Law. (1) Seminar, one hour; discussion, two hours. Corequisite: course 187A. Adjunct course limited to undergraduate students taking law colloquium. Intensive review and follow-up of scholarly papers presented in colloquium series. Reading of legal cases and supplemental material to provide legal framework for each scholarly paper presented in colloquium. Supervised by faculty member in charge of colloquium series. May be repeated for credit. P/NP grading.

199. Directed Research in Law. (1 to 6) Tutorial, three hours per week per unit. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating scholarly paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Overview

Although the initial focus in lesbian, gay, bisexual, transgender, and queer (LGBTQ) studies is usually on minority sexualities and transregendism, it is impossible to study them in any meaningful way without raising questions about gender, race, ethnicity, economics/class, globalization, and the construction of scientific knowledge. Thus lesbian, gay, bisexual, transgender, and queer studies, which may at first seem to concern the private practices of a small number of people, inevitably leads to the much larger study of sexuality and culture. The Lesbian, Gay, Bisexual, Transgender, and Queer Studies program represents an important vantage point from which to investigate the social construction of sexual identity, social control of behavior, changing definitions of the family, and the place of sexual and gender expression in the public and private spheres. Because of the
kinds of questions asked, LGBTQ studies is the site of some of the most exciting work being done today on the relationship between sexuality and culture.

Undergraduate Minor

Lesbian, Gay, Bisexual, Transgender, and Queer Studies Minor

The minor in Lesbian, Gay, Bisexual, Transgender, and Queer Studies offers students the opportunity to study sexuality from a variety of cultural and disciplinary perspectives meant to engage students in some of the most cutting-edge research in the field. In addition, seniors in the minor are expected to do a capstone internship in an international, national, or community organization, thereby acquiring invaluable firsthand knowledge, experience, and data. After completing the minor, students should be familiar with the theoretical tools that different disciplines employ to study sexuality. They should be acquainted with some of the many different ways sexuality has been organized in the past and is organized in different cultures in the present and should have an enhanced understanding and appreciation both of the sexual diversity of the world in which they live and of the complex ways in which sexuality intersects with other categories of identity and practice.

Admission

To enter the Lesbian, Gay, Bisexual, Transgender, and Queer Studies minor, students must have an overall grade-point average of 2.0 or better.

The Minor

Required Upper-Division Courses (28 units):
- Lesbian, Gay, Bisexual, Transgender, and Queer Studies M114, 180XP, and five additional Required Upper-Division Courses (28 units):
- Lesbian, Gay, Bisexual, Transgender, and Queer Studies

Lower-Division Courses

19. Flat Lux Freshman Seminars. (1 Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.
89. Honors Seminars. (1 Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.
89HC. Honors Contracts. (1 Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.
99. Student Research Program. (1 to 2 Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

M101A. Premodern Queer Literatures and Cultures. (Same as English M101A and Gender Studies M105A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of discrete period of queer literature from beginning to circa 1850. Works by such writers as Sappho, Plato, Marlowe, Shakespeare, and Thomas Gray may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.
M101B. Queer Literatures and Cultures, 1850 to 1970. (Same as English M101B and Gender Studies M105B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of discrete period of queer literature and culture from circa 1850 to 1970. Works by such authors as Walt Whitman, Radclyffe Hall, Gertrude Stein, Virginia Woolf, Langston Hughes, Tennessee Williams, Henry Blake Fuller, and James Baldwin may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.
M101C. Queer Literatures and Cultures after 1970. (Same as English M101C and Gender Studies M105C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Examination of cultural production of queer literatures and culture from 1970 to the present. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Policies

Students may petition to apply one non-listed course to the minor if they can show that lesbian, gay, bisexual, transgender, or queer issues represent a significant part (at least 25 percent) of the course content. Students are strongly urged to keep in close contact with the student services adviser, who can help them plan their course of study.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Students are strongly urged to keep in close contact with the student services adviser, who can help them plan their course of study.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.
132. Border Consciousness. (4) (Same as Chicana/o and Central American Studies M132.) Lecture, three hours; discussion, one hour (when scheduled). Investigation of cultural and mass media of bilingual and bicultural identities produced by geographical and cultural space between Mexico and U.S. Special attention to border consciousness as site of conflict and resistance. Letter grading.

133. Chicana/Latina Literature. (4) (Same as Chicana/o and Central American Studies M133 and Gender Studies M133.) Lecture, four hours. Exploration of intersection of radical First and Third World feminism, Chicana/Latina identity and continuity to Chicana identity, representation of lesbianism in Chicana literature, meaning of *familia* in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana literature. Letter grading.

135. Bilingual Writing Workshop. (4) (Same as Chicana/o and Central American Studies CM135 and Gender Studies M135C.) Seminar, four hours. Limited to juniors/seniors. Writing sample required; access to course web page mandatory; need not be bilingual to enroll. Technical instruction, analysis, and theoretical discussion of bilingual creative expression through genre of short fiction. Bilingualism as both politics and aesthetic achievement. Discussion and analysis of Chicana/Latina short story collections. Peer critique of weekly writing assignments. Emphasis on narrative techniques such as character construction, setting, point of view, and dialogue, and magical realism as prevailing Chicana/Latina style. Some attention to process and product of instructor. P/NP or letter grading.

136. Censored! Art on Trial. (4) (Same as Chicana/o and Central American Studies M136.) Lecture, four hours. Examination of censorship in visual arts, particularly of queer Chicana/Chicano and Latina/Latino artists such as Alma Lopez, Ester Hernández, and Alex Donis. Other censored artists include feminist artist Yolanda López, queer artists Robert Mapleton, and Sarahnitte Lepard, painter Christ Off. Photographers Sally Mann and Andres Serrano, printmaker Enrique Chagoya, muralist Non Olubisi, writer Daniel Shale, and four performance artists—Karen Finley, Tim Miller, John Fleck, and Holly Hughes—whose work was vetted by chair of National Endowment for Arts (NEA) in 1990 after they had successfully passed through NEA’s peer review process and who came to be known as NEA Four. P/NP or letter grading.

137. Lesbian, Gay, Bisexual, Transgender, and Queer Perspectives in Pop Music. (5) (Same as Musicology M137.) Lecture, four hours; discussion, one hour. Study of queer Chicana/Latina and Latina/Latino music 20th century, with focus on lesbians, gay men, and members of other sexual minorities as creators, performers, and audience members. Letter grading.

141. African American Women’s History. (4) (Same as African American Studies M141.) Lecture, four hours. Historical examination of black women’s experiences in U.S. from antebellum era to present. By situating black women’s experiences within major historical transitions in American history, exploration of key themes, including gender formation, sexuality, labor and class, collective action, gender and sexual violence, reproduction, and role of law. How have intersecting oppressions impacted black women’s experiences in historical lives? How is difference constructed through interrelated and overlapping ideologies of race and gender? How do historically uncover black women’s historical experiences? What are challenges to such discoveries? Examination of black women’s individual and collective struggles for freedom from racism, sexism, and heteropatriarchy, as well as black women’s role in political movements, including suffrage, women’s liberation, civil rights, and black power. Investigation of black women’s role in contemporary society, including their cultural productions. Letter grading.

142. Race, Gender, and Punishment. (4) (Same as African American Studies M142.) Seminar, four hours. Interdisciplinary examination of historical and contempor ary development of modern prison industrial complex in U.S., with attention to impact of prison indus trial complex on immigrants, including undocumented residents, homeless populations, women, African Americans, and transgender nonconforming and lesbian, gay, bisexual, and transgender communities. Why does U.S. have some of highest population in world? What historical conditions and ideologies gave rise to this massive explosion in U.S. prisoner population? What policies have fueled mass imprisonment? Who is imprisoned? How do imprisoned bodies contribute to and become resistance to economic transformations and perceived social disorders? How is current crisis analogous to or distinct from regimes of racialized punishment in historical moments? Letter grading.

147A. Psychology of Lesbian Experience. (4) (Same as Gender Studies M147A and Psychology M147A.) Lecture, two hours; discussion, one hour. Literature review of research on psychology and psychology studies to examine various aspects of lesbian experiences, impact of heterosexism/stigma, gender role socialization, minority status of women and lesbians, identity development within a multicultural society, changes in psychological theories about lesbians in sociocultural context. P/NP or letter grading.

165SSL. Queer Activism and Engagement. (4) Lecture, three hours; fieldwork, five hours. Benefits students pursuing minor in Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) Studies, those passionate about social justice; fundamental skills about community engagement. Offers opportunity to work in LGBTQ-related community organizations, to reflect on political and theoretical issues involved in such work, and such organizations, and to develop skills about community engagement. May be repeated for credit with consent of instructor. P/NP or letter grading.

167. Contested Sexualities. (4) (Same as Gender Studies M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgender identities. Women’s and men’s reproduction, identity, difference, and community; age, class, gender, and racial identity; and analysis of contemporary issues affecting contested sexualities. Letter grading.

189P. Lesbian, Gay, Bisexual, and Transgender Institutions and Organizations. (4) Formerly numbered 189PSL. Lecture, three hours; fieldwork, five hours. Preparation: one prior lesbian, gay, bisexual, and transgender studies course. Service-learning course that offers opportunity for students to work in Lesbian, gay, bisexual, and transgender-related community organizations, to reflect on political and theoretical issues involved in such work and such organizations, and to draw ideas from various courses they have already taken and test them in settings outside UCLA. P/NP or letter grading.

191D. Topics in Queer Literatures and Cultures. (5) (Same as English M191D and Gender Studies M191D.) Seminar, three or four hours. Enforced requisite: English Composition 3. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

191E. Topics in Gender and Sexuality. (5) (Same as English M191E and Gender Studies M191E.) Seminar, three or four hours. Enforced requisite: English Composition 3. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**LETTERS AND SCIENCE COLLEGEWIDE PROGRAMS**

**College of Letters and Science**

A311 Murphy Hall
Box 951414
Los Angeles, CA 90095-1414

Honors Programs 310-825-1553

**Overview**

Highly motivated students who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit.

**Undergraduate Majors**

**Individual Field of Concentration BA in Letters and Science**

Highly motivated students who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit.

**Learning Outcomes**

The Individual Field of Concentration major has the following learning outcomes:

- Design of a course of study that shows a deep understanding of how the disparate disciplines are connected
- Demonstrated understanding of how the research and creative methodologies of different disciplines can interface with and illuminate the understanding of another
- Demonstrated ability to read in the scholarly discourse and style of different disciplines
- Development of a voice in written thesis for an interdisciplinary audience
- Written thesis that demonstrates mastery of diverse fields as a result of research sources and production of scholarly work outside of traditionally defined academic boundaries

**Overview**

Students who wish to study life sciences have a choice of eight majors, all of which lead to a Bachelor of Science (BS) degree: Biology; Ecology, Behavior, and Evolution; and Marine Biology (Ecology and Evolutionary Biology Department); Microbiology, Immunology, and Molecular Genetics (Microbiology, Immunology, and Molecular Genetics Department); Molecular, Cell, and Developmental Biology (Molecular, Cell, and Developmental Biology Department); Neuroscience (Neuroscience Interdepartmental Program); Physiological Science (Integrative Biology and Physiology Department); and Psychobiology (Psychology Department). This choice reflects the diversity of undergraduate instruction in life sciences at UCLA. Despite this diversity, all of these majors require a common core of introductory courses that forms the foundation for any study of life sciences and that is required for more advanced courses in each major. The common core includes courses in chemistry, physics, and mathematics, as well as introductory courses in evolution.
and biodiversity, cellular and organismal biology, molecular biology, and genetics. During the first two years, students may also gain experience in a research laboratory through the **Student Research Program**. For more information on each major, see the individual departments in this chapter. For additional information on the Life Sciences core curriculum, see the **curriculum website**.

Students considering one of the life sciences majors are encouraged to declare a major as early as possible, even in their first year. In this way, they are identified by the life sciences advising offices and receive important curricular and other information. Because the core curriculum prepares them for any of the eight majors, they have the flexibility to switch to another life sciences major at any time during their progression through the core curriculum. Note: The Marine Biology and Psychobiology majors may require some courses in addition to the life sciences core curriculum as part of the preparation. Consult the course requirements for both majors.

**Undergraduate Study**

**Life Sciences Core Curriculum**

**Required:** Chemistry and Biochemistry 14A, 14B, 14BL, 14C, and 14D, or 20A, 20B, 20L, 30A, 30AL, and 30B; Life Sciences 7A, 7B, 7C, 23L, 107; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 5A, 5B, and 5C.

Each core curriculum course must be passed with a grade of C− or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

**Transfer Students**

Transfer applicants with 90 or more units must complete the following introductory courses for majors, preferably in separate courses or repetitions of the same course, are subject to dismissal from the major.

**Life Sciences**

**Lower-Division Courses**

**3H. Introduction to Molecular Biology (Honors).** (5) Lecture, two and one half hours; discussion, 90 minutes; movie section, two and one half hours. **Enforced requisites:** course 2, and Chemistry 14C or 30A. Honors course parallel to course 3, but at a more advanced level. Letter grading.

**4A. Collaborative Learning Workshop.** (1) Lecture, two hours. **Enforced corequisite:** course 4. **Development of problem-solving skills and intuition in genetics in collaborative learning context.** P/NP grading.

**7A. Cell and Molecular Biology.** (5) Lecture, three hours; discussion, 75 minutes. **Introduction to basic principles of cell structure and cell biology, biochemistry, and molecular biology.** P/NP or letter grading.

**7B. Genetics, Evolution, and Ecology.** (5) Lecture, three hours; laboratory, 80 minutes. **Enforced requisite:** course 7A. **Principles of Mendelian inheritance and population genetics.** Introduction to principles and mechanisms of evolution by natural selection, population, behavioral, and evolutionary ecology, and molecular and biodiversity, including major taxa and their evolutionary, ecological, and physiological relationships. Letter grading.

**7C. Physiology and Human Biology.** (5) Lecture, three hours; discussion, 75 minutes. **Enforced requisite:** course 7B. **Organization of cells into tissues and organs and principles of physiology of organ systems.** Introduction to human genetics and genomics. Letter grading.

**15. Life: Concepts and Issues.** (5) Lecture, two and one half hours; discussion, 75 minutes. **Introduction to important concepts and issues in the field for non-life sciences majors.** Topics include chemistry of life, genetics, physiology, evolution, and ecology—all explored in lecture and debates, with writing component. P/NP or letter grading.

**15L. Life: Concepts and Issues Laboratory.** (2) Laboratory, two hours. **Enforced requisite or corequisite:** course 15. **Broad introduction to biology, with focus on scientific literacy and thinking.** Topics include scientific thinking and decision making to interpret and analyze data, evolution and genetics, physics (chemistry, nutrition, reproduction, endocrinology, and neurobiology), and human behavioral biology. Letter grading.

**19. Flat Lux Freshman Seminars.** (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**20. Quantitative Concepts for Life Sciences.** (5) **Lecture, three hours; discussion, two hours. Preparation:** three years of high school mathematics (to algebra II), some basic familiarity with computers. **Introduction to variety of quantitative concepts that are relevant to biology.** Designed to enhance quantitative skills that are essential for success in life sciences, chemistry, mathematics, and physics courses that make up core curriculum for life sciences majors at UCLA. Biological examples used throughout to gain appreciation of relevance of mathematics to biology. Letter grading.

**23L. Introduction to Laboratory and Scientific Methodology.** (3) Lecture, one hour; laboratory, three hours. **Requisite:** course 2 or 7B. **Recommended to be taken concurrently with Introduction to Laboratory life sciences laboratory designed for undergraduate students.** Opportunity to conduct wet-laboratory and cutting-edge bioinformatics laboratory experiments. Students work in groups of three, conduct experiments in areas of physiology, metabolism, cell biology, molecular biology, genotyping, and bioinformatics. Letter grading.

**30A. Mathematics for Life Scientists.** (5) Lecture, three hours; laboratory, two hours. **Preparation:** three years of high school mathematics (to algebra II), some basic familiarity with computers. **Mathematical modeling as tool for understanding dynamics of biological systems.** Fundamental concepts of single-variable calculus and development of single- and multi-variable differential equation models of dynamical processes in ecology, physiology, and other subjects in which quantities change with time. Use of free computer program Sage for problem solving, plotting, and dynamical simulation in laboratory. Letter grading.

**30B. Mathematics for Life Scientists.** (5) Lecture, three hours; laboratory, two hours. **Enforced requisite:** course 30A. **Introduction to concept of matrices and linear transformations to equip students with some basic tools to understand dynamics of multivariable nonlinear systems.** Examples from ecological, physiological, chemical, and other systems. Letter grading.
M32. Essential Calculus for Mathematical Biologists. (4) (Same as Computational and Systems Biology M32 and Mathematics M32T) Lecture, three hours; discussion, one hour. Limits, differentiation (single and several variables), introduction to optimization, integration and methods of integration, Taylor polynomials and applications to approximation, Taylor and Maclaurin series, vector valued functions, limits, derivatives, gradients, and Lagrange multipliers. P/NP or letter grading.

40. Statistics for Biological Systems. (5) Lecture, three hours; laboratory, two hours. Requisite: course 39A. Designed for life sciences students. Introduction to statistics with emphasis on computer simulation of chance probabilities as replacement for traditional formula-based approach. Simulations allow for deeper understanding of statistical concepts, and are applicable to wider class of distributions and estimators. Students learn simple programming language to carry out statistical simulations, and apply them to classic problems in biological and physical sciences. Letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities. May be repeated for credit. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for credit. P/NP or letter grading.

97. Variable Topics in Life Sciences. (1 to 4) Seminar, two to four hours. Current issues in research and/or development in life sciences. Consult Schedule of Classes for topics and instructors. May be repeated once for credit with consent of instructor. P/NP or letter grading.

98XA. PEERS Collaborative Learning Workshops for Life Sciences Majors. (1) Seminar, three hours. Corequisite: associated undergraduate lecture course in life sciences. lint Program for Excellence in Education and Research in Science (PEERS) students. Development of intuition and problem-solving skills in collaborative learning environment. May be repeated three times, but only 1 unit may be applied toward graduation. P/NP grading.

98XB. PEERS Collaborative Learning Workshops for Life Sciences Majors. (1) Seminar, three hours. Corequisite: associated undergraduate lecture course in life sciences. lint Program for Excellence in Education and Research in Science (PEERS) students. Development of intuition and problem-solving skills in collaborative learning environment. May be repeated three times, but only 1 unit may be applied toward graduation. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week for one term. Entry-level research for lower division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contracts require consent of Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

101. Understanding Scientific Literature and Content. (2 to 4) Seminar/discussion, one to two hours. Introduction to set of skills proven to help students read and understand scientific research papers. Offers opportunities to practice skills while interacting with scientists at UCLA. Reading and understanding scientific research papers is skill. It can develop quickly and be refined/practiced for rest of scientific journey. Uses CREATE learning framework, Consider, Read, Elucidate hypotheses, Analyze and interpret data, and Think of next Experiment. At UCLA, CRE- ATE includes additional dimensions of final Synthesis and Social context. Students work within learning pod and are guided by lead instructors. P/NP or letter grading.

107. Genetics. (5) Lecture, three hours; discussion, 75 minutes. Requisite: Chemistry M14A (or 20A), 14C or 30A. Not open for credit to students with credit for course 4. Advanced Mendelian genetics, recombination, biochemical genetics, mutation, DNA, genetic code, gene regulation, genes in populations. Letter grading.

110. Career Exploration in Life Sciences. (2) Seminar, two hours. Recommended for all students interested in exploring career options in life sciences, including income transfers. Designed to increase confidence and skills, and expand awareness through self-reflection and guest speakers. Networking, interviewing, resume, and cover letter building. P/NP grading.

130. Science Classroom Observation and Participation. (1) Seminar, one hour. Preparation: completion of three mathematics and/or science courses at level required of science majors. Observation, participation, and assist in classroom management, middle, and secondary schools. May be repeated for credit. P/NP grading.

M174. Health Disparities. (4) Same as Psychology M174. Lecture, three hours. Examination of health disparities and ways in which societal responses to race and ethnicity in combination with variety of other factors create differential quality and access to health-care resulting in poor health outcomes in racial/ethnic minorities. Basic foundation for critical thinking about assumptions that shape life sciences, medical research, clinical practice, and social and behavioral sciences. Apply related to racial and ethnic minority populations and to students to teach integrated concepts of culture and health disparities into other social, biological, political, psychological, genetic, and clinical health interests. P/NP grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators, individual study in regularly scheduled meetings with faculty mentor to discuss USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize syllabus, individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize syllabus, individual contract with faculty mentor required. May not be repeated. Letter grading.

188SD. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SC. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize syllabus, individual contract with faculty mentor required. May not be repeated. Letter grading.

192A. Methods and Application of Collaborative Learning Theory and Practice. (1) Seminar, one hour; clinic, six hours. Requisites: course 192 (may be taken concurrently) and at least one term of prior experience in same course in which collaborative learning theory is practiced and refined under supervision of instructors. With instructor guidance, students apply pedagogical principles based on current educational research, assist with development of innovative instructional materials, and receive frequent feedback on their progress. May be repeated three times for credit. Combination of courses 192A, 192B, 192C, 192D, and 192E may not be taken for more than total of 4 times or 4 courses. Letter grading.

192B. Methods and Application of Collaborative Learning Theory in Life Sciences. (4) Seminar, three hours; clinic, three hours. Requisite: course 192 (may be taken concurrently) and at least one term of prior experience in same course in which collaborative learning theory is practiced and refined under supervision of instructors. With instructor guidance, students apply pedagogical principles based on current educational research, assist with development of innovative instructional materials, and receive frequent feedback on their progress. May be repeated three times for credit. Combination of courses 192B, 192C, 192D, and 192E may not be taken for more than total of 4 times or 4 courses. Letter grading.

192C. Methods and Application of Collaborative Learning Theory in Life Sciences. (4) Seminar, three hours; clinic, three hours. Requisite: course 192 (may be taken concurrently) and at least one term of prior experience in same course in which collaborative learning theory is practiced and refined under supervision of instructors. With instructor guidance, students apply pedagogical principles based on current educational research, assist with development of innovative instructional materials, and receive frequent feedback on their progress. May be repeated three times for credit. Combination of courses 192B, 192C, 192D, and 192E may not be taken for more than total of 4 times or 4 courses. Letter grading.

192D. Methods and Application of Collaborative Learning Theory in Life Sciences. (4) Seminar, three hours; clinic, three hours. Requisite: course 192 (may be taken concurrently) and at least one term of prior experience in same course in which collaborative learning theory is practiced and refined under supervision of instructors. With instructor guidance, students apply pedagogical principles based on current educational research, assist with development of innovative instructional materials, and receive frequent feedback on their progress. May be repeated three times for credit. Combination of courses 192B, 192C, 192D, and 192E may not be taken for more than total of 4 times or 4 courses. Letter grading.

192E. Methods and Application of Collaborative Learning Theory in Life Sciences. (4) Seminar, three hours; clinic, three hours. Requisite: course 192 (may be taken concurrently) and at least one term of prior experience in same course in which collaborative learning theory is practiced and refined under supervision of instructors. With instructor guidance, students apply pedagogical principles based on current educational research, assist with development of innovative instructional materials, and receive frequent feedback on their progress. May be repeated three times for credit. Combination of courses 192B, 192C, 192D, and 192E may not be taken for more than total of 4 times or 4 courses. Letter grading.

192F. Undergraduate Practicum in Life Sciences. (4) Seminar, two hours; clinic, nine hours. Requisite: one course from 1, 2, 5, 9, 17A, 17B, 7C, 20, 23L, 30A, 30B, 107, 110. Limited to sophomores/juniors/seniors. Advanced training and supervised practicum for experienced undergraduate students. Under guidance of faculty members, students will develop professional skills and take leadership roles in mentoring students. May be repeated for credit. Letter grading.

192G. Collaborative Learning Theory and Practice: Anti-Racism Discourse. (3) Three hours; discussion, one hour. Students engage in anti-racism discourse. Peers circulate through, engage, and reflect on various topics that target systemic racism surrounding our communities through proactive small-group conversation and weekly action plans. Peers
practice communication skills with frequent assessment and feedback with facilitators. May be repeated three times for credit. Letter grading.

199. Directed Research or Senior Project in Life Sciences. (2) Seminar, two hours. Enforced requisite: course 3. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper/project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Preparation for College-Level Teaching in Life Sciences. (2) Seminar, two hours. Corequisite: course 375. Designed for graduate students who are teaching assistants in Life Sciences Core Curriculum for first time and to be taken concurrently in term in which they teach. Prepares students for college-level teaching in large enrollment undergraduate courses, and provides professional development to support students pursuing diverse careers in life sciences. Study of inclusive, student-centered, and evidence-based teaching methodologies that include active learning, group work, formative assessment, backward course design, and reflective teaching practices that incorporate peer observations and constructive feedback. May not be repeated for credit. S/U grading.

Laurel L. Perkins, PhD
Ethan J. Poole, PhD

Lecturer
Benjamin J. Lewis, MA

Overview

The goal of the Department of Linguistics is the enrichment of knowledge about the nature, grammar, and history of human language. Linguistics is a theoretical discipline, akin to philosophy, anthropology, and cognitive psychology. It is important for prospective students to understand that studying linguistics is not a matter of learning to speak many languages. Linguistics courses draw examples from the grammars of a wide variety of languages, and the more languages linguists know about in depth (as distinct from possessing fluency in the use of them), the more likely they are to discover universal properties. It is also possible to pursue these universal aspects of human language through the intensive in-depth study of a single language. This accounts for the high proportion of examples from English and familiar European languages found in linguistics courses and research publications.

The core areas of linguistic theory are phonology (phonetics), morphology, syntax, and semantics. A grammar is a system of rules that characterize the phonetics, phonology, morphology, syntax, and semantics of a natural language. The properties of grammars are the central focus of linguistic theory.

Because language is central to all humanistic disciplines, as well as to several social sciences areas, it is studied from many points of view. Linguistics itself cannot be said to recognize a single optimal approach to the subject. Hence, the courses provide a variety of approaches that reflect the diversity of the field.

The Linguistics Department has consistently been ranked among the very best linguistics departments in the country. It offers programs leading to the Bachelor of Arts (BA), Master of Arts (MA), and Doctor of Philosophy (PhD) degrees.

Undergraduate Study

The undergraduate majors are of three types: (1) a major that concentrates entirely on general linguistics, (2) several majors that combine the basic courses of the general program with a language concentration or other related fields, and (3) a major in Applied Linguistics.

Graduate Study

The department offers MA and PhD degree programs in Linguistics, and its faculty participate in the programs for American Indian Studies, Computer Science, International Institute, Philosophy, and Psychology. Both the faculty and graduate program are internationally acclaimed, and attract some of the best and brightest graduate students from this country and abroad, with a current graduate student population of 40 students from 10 countries.

The goal of the department’s graduate program is to train students as university teachers and as researchers in the major areas of linguistics.

Theoretical Orientation

The Linguistics Department has a strong theoretical orientation committed to research in formal linguistic theory, addressing questions in the fields of phonetics, phonology, morphology, syntax, and semantics, and at the interfaces of these fields with the fields of psycholinguistics, computational linguistics, mathematical linguistics, historical linguistics, and the linguistic study of particular language areas (especially African languages and Indigenous languages of the Americas).

Field Work

Linguistics as an empirical science uses cross-linguistic evidence to develop and test theories of human language. In keeping with this goal, the program is committed to training graduate students to analyze primary data in the Field Methods sequence, in which the students work with a native speaker consultant of a little-studied language.

Substantial opportunities to develop fieldwork skills and to test theoretical ideas against novel data are provided, along with department funding for native speaker consultants. Several of the faculty have long experience in fieldwork and provide practical guidance to students embarking on their own field study. Los Angeles is probably the most linguistically diverse city in the U.S., thus providing a living laboratory for field work research.

Undergraduate Majors

Linguistics BA

Linguistics is the scientific study of languages as a general phenomenon. It aims to help answer broad questions concerning the nature of human cognition and communication. Students will learn about language universals as well as the ways in which languages differ from one another in terms of their sound patterns,
They will also learn about the linguistic theories explaining and constraining linguistic knowledge, informed in part by experimental investigations of child language acquisition and adult language processing. Successful graduates will receive a cognitive science education with a focus on language; they will develop skills in data analysis, analytic reasoning, and experimental methods.

Learning Outcomes
The Linguistics major has the following learning outcomes:

- Ability to apply critical thinking skills through linguistic data analysis in phonetics, phonology, syntax, semantics, and at least one other subfield
- Understanding of advanced theoretical concepts and/or analytical techniques in at least one subfield
- Ability to write technical material in linguistics, including language description and theory-based analysis
- Ability to access scholarly literature on language structure and use it in research

Entry to the Major
Transfer Students
Transfer applicants to the Linguistics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of one foreign language or one year of two different foreign languages, including language teaching, speech pathology, knowledge to a wide variety of practices in language use from a variety of perspectives and experiences, and will be able to apply this knowledge to a wide variety of practices including language teaching, speech pathology, and translation and interpretation.

Requirements
Preparation for the Major
Required: Linguistics 20; two of the following: Anthropology 4, Philosophy 31, Psychology 10 (or 100A); completion of the equivalent to the sixth level of one foreign language or the equivalent to the third level of two different foreign languages.

The Major
Required: Eleven upper-division or graduate courses including Linguistics 103, 120A, 120B, 120C, two courses from C104, 110, 130, or 132, and two courses from 165A, 165B, 165C (students may substitute courses 200A, 200B, and 200C for 165A, 165B, and 165C respectively if they receive grades of A in 120A, 120B, and 120C respectively and have consent of instructor); and three upper-division elective courses from the Linguistics Department (minimum 4 grade units each).

Honors Program
Departmental honors are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 198A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Computing Specialization
Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A and 10B and 10C (or Computer Science 31 and 32), Linguistics 185A, Mathematics 61, and one course selected from Linguistics C104, 127, 132, 165A, 165B, 165C, 180, 185B. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies
Preparation for the Major
Linguistics 20 must be passed with a letter grade of C or better prior to beginning upper-division coursework in the major.

The Major
No more than one course from 197, 198A, 198B, and 199 may be applied toward the major.

Applied Linguistics BA
The Applied Linguistics major investigates linguistic issues relevant to the everyday world, shedding light on the nature of language and language use. Students will learn linguistic theory, the study of the structure of human language generally. With its focus on service learning, students will also learn linguistic practice, engaging in the community, schools, and work places of our geographic setting. Successful graduates will be well acquainted with language use from a variety of perspectives and experiences, and will be able to apply this knowledge to a wide variety of practices including language teaching, speech pathology, and translation and interpretation.

Learning Outcomes
The Applied Linguistics major has the following learning outcomes:

- Ability to apply critical thinking skills through linguistic data analysis in phonetics, phonology, syntax, and at least one other subfield
- Understanding of advanced theoretical concepts and/or analytical techniques in at least one subfield
- Ability to write technical material in linguistics, including language description and theory-based analysis
- Ability to access scholarly literature on language structure and use it in research

Entry to the Major
Transfer Students
Transfer applicants to the Applied Linguistics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of one foreign language or one year of two different foreign languages, including language teaching, speech pathology, and translation and interpretation.

Requirements
Preparation for the Major
Required: Anthropology 4 or Psychology 10, Linguistics 20, and completion of the equivalent to the sixth level of one foreign language or the equivalent to the third level of two different foreign languages.

The Major
Required: Ten upper-division courses as follows: Linguistics 102 (or 103), 119A (or 120A), 119B, 119C (or Computer Science 31 and 32), Linguistics 185A, Mathematics 61, and one course selected from Linguistics C104, 115, 120C, 130, 140, 141, 144, 146, 170, two upper-division elective courses taken in the Linguistics Department (minimum 4 graded units each), and one course selected from Anthropology 151, M132P, 132Q, 132R, 135, 154P, 154Q, M156, M159, Arabic 180, 181, Armenion 110, Chicano/o and Central American Studies 164XP, M167XP, M170XP, Communication 119, M125, M144A, French 105, German 140, Hebrew 180A, 180B, Italian 131, Linguistics M116, M146, M176A, M176B, M177, M178, Portuguese 100A, 100B, Slavic CM114, Spanish 100A, 100B, 160, or a linguistics-related course (minimum 4 graded units) offered by another department in consultation with the Linguistics Department undergraduate student affairs officer.

Honors Program
Departmental honors are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 198A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Computing Specialization
Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A and 10B and 10C (or Computer Science 31 and 32), Linguistics 185A, Mathematics 61, and one course selected from Linguistics C104, 127,
The Linguistics and Anthropology major combines the basic courses of the general linguistics program with that of anthropology, the study of humankind. Students will learn linguistic theory, the study of the structure of human language generally. They will also learn the many ways in which language affects human history, social identity, social interaction, and politics. Successful graduates will be well acquainted with linguistic structure, language diversity, and language typology, as well as the anthropological and social consequences of the nature of human language.

Learning Outcomes

The Linguistics and Anthropology major has the following learning outcomes:

- Ability to apply critical thinking skills through linguistic data analysis in phonetics, phonology, syntax, and at least one other subfield
- Understanding of advanced theoretical concepts and/or analytical techniques in at least one subfield
- Ability to write technical material in linguistics, including language description and theory-based analysis
- Ability to access scholarly literature on language structure and linguistic anthropology, and use it in research

Entry to the Major

Transfer Students

Transfer applicants to the Linguistics and Anthropology major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course and two years of one foreign language or one year of two different foreign languages. One cultural and communication course is strongly recommended.

Linguistics and Asian Languages and Cultures BA

The major combines the basic courses of the general linguistics program with that of East Asian languages and cultures, focusing on one of the three language tracks (Chinese, Japanese, Korean). Students are able to study the civilizations of China, Korea, Japan, and India; and enrich their knowledge about the nature, grammar, and history of human language at the same time.

Learning Outcomes

The Linguistics and Asian Languages and Cultures major has the following learning outcomes:

- Ability to apply critical thinking skills through linguistic data analysis in phonetics, phonology, syntax, and at least one other subfield
- Understanding of advanced theoretical concepts and/or analytical techniques in at least one subfield
- Ability to write technical material in linguistics, including language description and theory-based analysis
- Ability to access scholarly literature on language structure and use it in research

Entry to the Major

Transfer Students

Transfer applicants to the Linguistics and Asian Languages and Cultures major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of either Chinese, Japanese, or Korean, introduction to linguistics course, one cultural anthropology course, one Chinese, Japanese, or Korean civilization course, and one year of a second foreign language.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Anthropology 4, Linguistics 20, and completion of the equivalent to the sixth level of any foreign language or the equivalent to the third level of two different foreign languages.

The Major

Required: Eleven upper-division courses as follows: Linguistics 102 (or 110), 110, 119A (or 120A), 120B or 127, M146 (or Anthropology M150); two courses from 114, 120C, 144, 160, 161, 170; one course from Anthropology 151 or Sociology CM124A (or Communication M144A); and three upper-division electives from the Anthropology 130 series (one course only), the 150 series (one course only), the 160 series (one course only), Sociology CM124A (or Communication M144A), CM125 (or Communication M125).

Honors Program

Departmental honors are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 198A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Computing Specialization

Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A and 10B and 10C (or Computer Science 31 and 32), Linguistics 185A, Mathematics 61, and one course selected from Linguistics C104, 127, 132, 165A, 165B, 165C, 180, 185B. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Linguistics and Asian Languages and Cultures BA

The major combines the basic courses of the general linguistics program with that of East Asian languages and cultures, focusing on one of the three language tracks (Chinese, Japanese, Korean). Students are able to study the civilizations of China, Korea, Japan, and India; and enrich their knowledge about the nature, grammar, and history of human language at the same time.

Learning Outcomes

The Linguistics and Asian Languages and Cultures major has the following learning outcomes:

- Ability to apply critical thinking skills through linguistic data analysis in phonetics, phonology, syntax, and at least one other subfield
- Understanding of advanced theoretical concepts and/or analytical techniques in at least one subfield
- Ability to write technical material in linguistics, including language description and theory-based analysis
- Ability to access scholarly literature on language structure and use it in research

Entry to the Major

Transfer Students

Transfer applicants to the Linguistics and Asian Languages and Cultures major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of either Chinese, Japanese, or Korean, introduction to linguistics course, one cultural anthropology course, one Chinese, Japanese, or Korean civilization course, and one year of a second foreign language.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Anthropology 4, Linguistics 20, and either Chinese 50, Japanese 50, or Korean 50, as appropriate; completion of the equivalent to the sixth level in either Chinese, Japanese, or Korean, and the equivalent to the third level of a second foreign language.

The Major

Required: Eleven upper-division courses as follows: Linguistics 103, 110, 120A, 120B, 165A (or 165B), one upper-division elective course in the Linguistics Department (minimum 4 graded units); for the Chinese track: Chinese 100A, 100B, 100C (or 100D, 100E, 100F, or 100G), two courses from Asian 104, Chinese 101A, 101B, 101C, 103, 110A, 110B, 110C, C120, 130A, 130B, 165; for the Japanese track: Japanese 100A, 100B, 100C (or 100D, 100E, 100F, or 100G), two courses from Asian 104, Japanese 101A, 101B, 101C, 110A, 110B, M120, CM123 (or CM127), 130A, 130B; for the Korean track: Korean 100A, 100B,

Honors Program
Departmental honors are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 198A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the facility as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Computing Specialization
Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A and 10B and 10C (or Computer Science 31 and 32), Linguistics 185A, Mathematics 61, and one course selected from Linguistics C104, 127, 132, 165A, 165B, 165C, 180, 185B. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies

Preparation for the Major
Linguistics 20 must be passed with a letter grade of C or better prior to beginning upper-division coursework in the major.

Students who complete an advanced upper-division language course are considered to have completed the equivalent of whatever courses are requisite to that advanced language course (e.g., if students complete German 152, they have automatically satisfied the requirement of the sixth level of work in German).

The Major
A 2.0 grade-point average in linguistics courses is required for the major.

Linguistics and Computer Science BA

The major combines the basic courses of the general linguistics program with that of computer science, accommodating students who want professional preparation in computer science but do not necessarily have a strong interest in computer systems hardware. The goal of linguistics is the enrichment of knowledge about the nature, grammar, and history of human language. Linguistics is a theoretical discipline, akin to philosophy, anthropology, and cognitive psychology.

Learning Outcomes

The Linguistics and Computer Science major has the following learning outcomes:

- Ability to apply critical thinking skills through linguistic data analysis in phonetics, phonology, syntax, and at least one other subfield
