- Understanding of advanced theoretical concepts and/or analytical techniques in at least one subfield
- Ability to write technical material in linguistics, including language description and theory-based analysis
- Ability to access scholarly literature on language structure and use it in research
- Understanding of human language systems as computational devices
- Understanding of fundamental concepts applicable to engineering problems in natural language processing

Entry to the Major

Transfer Students
Transfer applicants to the Linguistics and Computer Science major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, two calculus courses, four computer programming courses, and two years of one foreign language or one year in each of two foreign languages. One discrete structures course and one probability theory course are recommended.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Linguistics 20, Computer Science 31, 32, 33, 35L, Mathematics 31A or 31AL, 31B, 61, 70, completion of the third term in one foreign language.

The Major

Required: Eleven upper-division courses as follows: Linguistics 102 (or 103), 119A (or 120A), 120B, 120C, 165A (or 165B or 165C), 185A, one course selected from C104, 127, 132, 165A, 165B, 165C, 180, 185B; Computer Science 131, 132 or 161, 180, 181.

Honors Program

Departmental honors are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 198A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the facility as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Policies

Preparation for the Major
Linguistics 20 must be passed with a letter grade of C or better prior to beginning upper-division coursework in the major.

The Major
A 2.0 grade-point average in linguistics courses is required for the major.

Honors Program
Departmental honors are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 198A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the facility as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Linguistics and English BA

The major combines the basic courses of the general linguistics program with that of English. Students are able to study the literatures and cultures of those parts of the world in which English is the primary language, the history and structure of the English language itself, and enrich their knowledge about the nature, grammar, and history of human language at the same time.

Learning Outcomes

The Linguistics and English major has the following learning outcomes:

- Ability to apply critical thinking skills through linguistic data analysis in phonetics, phonology, syntax, and at least one other subfield
- Understanding of advanced theoretical concepts and/or analytical techniques in at least one subfield
- Ability to write technical material in linguistics, including language description and theory-based analysis
-Ability to access scholarly literature on language structure and use it in research

Entry to the Major

Transfer Students
Transfer applicants to the Linguistics and English major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, one critical reading and writing course, one year of English literature survey courses, and two years of one foreign language or one year of two different foreign languages.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Linguistics 20, English 4W (or 4HW), 10A, 10B, 10C, completion of the equivalent to the sixth level of one foreign language or the equivalent to the third level of two different foreign languages.

The Major

Required: Eleven upper-division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper-division elective in the Linguistics Department (minimum 4 graded units), two courses selected from English 113A, 120, 141B, or Linguistics 170, and three elective courses selected from English 113A, 120, 140A, 140B, 141B, 150A, 150B, 151, the 150 series (one course only), the 160 series (one course only), the 170 series (one course only).

Honors Program

Departmental honors are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 198A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the facility as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Policies

Preparation for the Major

Linguistics 20 must be passed with a letter grade of C or better prior to beginning upper-division coursework in the major.

The Major
A 2.0 grade-point average in linguistics courses is required for the major.

Literary Specialization

Students may select a specialization in Language Processing or one in each of two foreign languages.

Transfer Students

Transfer applicants to the Linguistics and English major must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, one critical reading and writing course, one year of English literature survey courses, and two years of one foreign language or one year of two different foreign languages.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Linguistics 20, English 4W (or 4HW), 10A, 10B, 10C, completion of the equivalent to the sixth level of one foreign language or the equivalent to the third level of two different foreign languages.

The Major

Required: Eleven upper-division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper-division elective in the Linguistics Department (minimum 4 graded units), two courses selected from English 113A, 120, 141B, or Linguistics 170, and three elective courses selected from English 113A, 120, 140A, 140B, 141B, 150A, 150B, 151, the 150 series (one course only), the 160 series (one course only), the 170 series (one course only).

Honors Program

Departmental honors are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 198A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the facility as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.
Computing Specialization
Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A and 10B and 10C (or Computer Science 31 and 32), Linguistics 185A, Mathematics 61, and one course selected from Linguistics C104, 127, 132, 165A, 165B, 165C, 180, 185B. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies

Preparation for the Major
Linguistics 20 must be passed with a letter grade of C or better prior to beginning upper-division coursework in the major.

Students who complete an advanced upper-division language course are considered to have completed the equivalent of whatever courses are requisite to that advanced language course (e.g., if students complete German 152, they have automatically satisfied the requirement of the sixth level of work in German).

The Major
A 2.0 grade-point average in linguistics courses is required for the major.

The same course may not be used to satisfy more than one upper-division major requirement.

Linguistics and Philosophy BA

The major combines the basic courses of the general linguistics program with that of philosophy, for students who are reflective about their beliefs or who wish to become so. Students enrich their knowledge about the nature, grammar, and history of human language, and are given the opportunity to ponder the foundations of almost any other subject to which they are exposed—whether history, religion, government, law, or science.

Learning Outcomes

The Linguistics and Philosophy major has the following learning outcomes:

- Ability to apply critical thinking skills through linguistic data analysis in phonetics, phonology, syntax, semantics, and at least one other subfield
- Understanding of advanced theoretical concepts and/or analytical techniques in at least one subfield
- Ability to write technical material in linguistics, including language description and theory-based analysis
- Ability to access scholarly literature on language structure and use it in research

Entry to the Major

Transfer Students
Transfer applicants to the Linguistics and Philosophy major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, one symbolic logic course and two courses from Philosophy 7, 8, 21, 23, M24 (or Linguistics M7), and completion of the equivalent to the sixth level of one foreign language or the equivalent to the third level of two different foreign languages.

Branching

Students may select a specialization in Computing, Computing Specialization, and a specialization in Computing.

Linguistics and Psychology BA

The major combines the basic courses of the general linguistics program with that of psychology. Students are able to study and explain human and animal behavior, both normal and abnormal, as well as enrich their knowledge about the nature, grammar, and history of human language.

Learning Outcomes

The Linguistics and Psychology major has the following learning outcomes:

- Ability to apply critical thinking skills through linguistic data analysis in phonetics, phonology, syntax, and at least one other subfield
- Understanding of advanced theoretical concepts and/or analytical techniques in at least one subfield
- Ability to write technical material in linguistics, including language description and theory-based analysis
- Ability to access scholarly literature on language structure and use it in research

Entry to the Major

Transfer Students
Transfer applicants to the Linguistics and Psychology major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, one introduction to psychology course, one introduction to cognitive science course, one psychological statistics course, one psychology research methods course, and two years of one foreign language or one year of two different foreign languages. One introduction to programming course is strongly recommended.

Branching

Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A and 10B and 10C (or Computer Science 31 and 32), Linguistics 185A, Mathematics 61, and one course selected from Linguistics C104, 127, 132, 165A, 165C, 180, 185B. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies

Preparation for the Major
Linguistics 20 must be passed with a letter grade of C or better prior to beginning upper-division coursework in the major.

Students who complete an advanced upper-division language course are considered to have completed the equivalent of whatever courses are requisite to that advanced language course (e.g., if students complete German 152, they have automatically satisfied the requirement of the sixth level of work in German).

The Major
A 2.0 grade-point average in linguistics courses is required for the major.
Honors Program
Departmental honors are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 198A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Computing Specialization
Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A and 10B and 10C (or Computer Science 31 and 32), Linguistics 185A, Mathematics 61, and one course selected from Linguistics C104, 127, 132, 165A, 165B, 165C, 180, 185B. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies
Preparation for the Major
Linguistics 20 must be passed with a letter grade of C or better prior to beginning upper-division coursework in the major.

Students who complete an advanced upper-division language course are considered to have completed the equivalent of whatever courses are requisite to that advanced language course (e.g., if students complete German 152, they have automatically satisfied the requirement of the sixth level of work in German).

The Major
A 2.0 grade-point average in linguistics courses is required for the major.

Linguistics and Spanish BA
The major combines the basic courses of the general linguistics program with that of Spanish. Students are able to study the Spanish language, literatures, and cultures of the Hispanic heritage, as well as enrich their knowledge about the nature, grammar, and history of human language.

Learning Outcomes
The Linguistics and Spanish major has the following learning outcomes:

- Ability to apply critical thinking skills through linguistic data analysis in phonetics, phonology, syntax, and at least one other subfield
- Understanding of advanced theoretical concepts and/or analytical techniques in at least one subfield
- Ability to write technical material in linguistics, including language description and theory-based analysis
- Ability to access scholarly literature on language structure and use it in research

Entry to the Major
Transfer Students
Transfer applicants to the Linguistics and Spanish major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of Spanish; one Spanish composition course; one Spanish, Portuguese, and nature of language course; one Spanish civilization course or one Spanish American civilization course; one introduction to linguistics course; and one year of a second foreign language.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements
Preparation for the Major
Required: Linguistics 20, Spanish 25 (or 27), M35, 42 (or 44), and completion of the equivalent to the fifth level of Spanish, and completion of the equivalent to the third level of a second foreign language.

The Major
Required: Eleven upper-division courses as follows: Linguistics 103, 110, 120A, 120B, 165A (or 165B), one upper-division elective course in the Linguistics Department (minimum 4 graded units), Spanish 100A, 100B, 119, 160, and one additional upper-division Spanish course.

Honors Program
Departmental honors are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 198A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Computing Specialization
Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A and 10B and 10C (or Computer Science 31 and 32), Linguistics 185A, Mathematics 61, and one course selected from Linguistics C104, 127, 132, 165A, 165B, 165C, 180, 185B. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies
Preparation for the Major
Linguistics 20 must be passed with a letter grade of C or better prior to beginning upper-division coursework in the major.

Students who complete an advanced upper-division coursework in the major.

The Major
Required Lower-Division Course (5 units): Linguistics 20.
Required Upper-Division Courses (27 to 30 units): Six courses, which must include Linguistics 102 (or 103), 119A (or 120A), 120B, two elective courses selected from C104 through 185B, and an additional elective linguistics course, which may be upper- or lower-division.

Students who plan to complete the 165 course series must first take the corresponding 120 course series.

Policies
Linguistics 20 must be passed with a letter grade of C or better prior to beginning upper-division coursework in the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Major
Linguistics MA, CPhil, PhD
Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.
American Sign Language

Lower-Division Courses

8. Intermediate American Sign Language. (15) Lecture, 20 hours. Not open to students with credit for course 3 or students who have learned, from whatever source, enough American sign language to qualify for more advanced courses. Intensive elementary instruction in American sign language equivalent to courses 1, 2, and 3. Offered in summer only. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

98HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

99HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for a maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

M115. Enforcing Normalcy: Deaf and Disability Studies. (4) Same as Disability Studies M115. Lecture, three hours. Exploration of historical, medical, social, political, philosophical, and cultural influences that have constructed categories of normalcy, disability, and deafness. Building on writing of Michel Foucault and critical work in field of disability studies, inquiry into institutions that have enforced standards of normalcy throughout 19th and 20th centuries to present. Explores critical and cultural approaches to language and culture in West, history of eugenics, and contemporary bioethics issues confronting disability and deaf communities. P/NP or letter grading.

M120. History of Deaf Communities in America. (4) (Same as History M147E.) Lecture, three hours; discussion, one hour (when scheduled). Designed for junior/seniors. Study of history and culture of deaf communities in America (circa 1800 to present) by exploring major events impacting deaf people, including development of sign language, deaf education, autism, politics of deafness, eugenics, deaf revolution movements, and role of deaf organizations in development of emergence, growth, and survival of America’s deaf community and development of deaf identity over time. P/NP or letter grading.

121. History of Mass Media and Deaf Community. (4) Lecture, three hours. Historical survey of mass media (print, film, television, and Internet) as sources and interpreters of deafness and deaf people within context of U.S. children’s childhood and communication of historical changes in products of mass media within deaf community and ways of criticizing media sources. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

Linguistics

Lower-Division Courses

1. Introduction to Study of Language. (5) Lecture, three hours; discussion, one hour. Summary for general undergraduates of what is known about human language; biological basis of language, scientific study of language and human cognition; uniqueness of human language, its structure, universality, its diversity; language in social and cultural setting; language in relation to other aspects of human inquiry and knowledge. P/NP or letter grading.

3. American Sign Language: Structure and Culture. (5) Lecture, four hours; discussion, one hour (when scheduled). Introduction to linguistic diversity of world and to such core areas of linguistics as study of sound production and patterning (phonetics and phonology), word formation (morphology), and sentence formation (syntax). Structural characteristics of world languages and methods of classifying languages into families. Detailed discussion of representative languages with audiovisual illustrations to acquaint students with distinctive features of several key language families. Discussion of such linguistic concepts as pidgin and creole, un- affiliated languages, language contact, and language endangerment, together with related sociopolitical issues. P/NP or letter grading.

6. Out of Mouths of Babes. (4) Lecture, six hours. How children acquire complex tapestry of human cognitive achievements. Look at amazing linguistic abilities of infants and their first perception and production of speech sounds, then investigation of how children learn to comprehend and produce meaningful utterances. Understanding sentences. Language acquisition in special populations such as children acquiring sign languages, bilingual children, and people acquiring language beyond critical period. Focus mainly on English, with consideration of other languages. Offered in summer only. P/NP or letter grading.

M7. Language and Identity. (5) Same as Philosophy M242. Lecture, four hours; discussion, one hour (when scheduled). How do we project or project our own identity? How do we use it to perceive or shape identity of others? Introduction to speech act theory and various claims that speech act theory can account for systematic of human; marginalization of racial minorities; and, in some cases, incitement to violence through hate speech. Provides foundation for students of linguistic theory, philosophy, sociology, anthropology, and communication studies. P/NP or letter grading.

8. Language in Context. (4) Lecture, four hours; discussion, one hour (when scheduled). How is meaning of language influenced by world around us? Introduction to pragmatics, speech acts, ordinary language philosophy, and linguistic relativity. Good foundation for students of linguistic theory, philosophy, sociology, anthropology, and communication studies. P/NP or letter grading.

9W. Linguistic Humor: Amusing and Abusing with Language. (5) Seminar, five hours. Requisite: English Composition 3. Study of how principles of science of linguistics are applied in analyzing language structure. Data from humor and other amusements, such as secret languages (Pig Latin and more). Introduction to basics of linguistics analysis, including language sound systems, syntactic structure, language, word meaning, and pragmatics. Focus on nature of language as innate part of human biology that allows people from all cultural and linguistic backgrounds to acquire language for human communication and what is shaped by culture as to what counts as funny. Satisfies Writing II requirement. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

20. Introduction to Linguistic Analysis. (5) Lecture, four hours; discussion, one hour (when scheduled). Introduction to theory and methods of linguistics: universal properties of human language; phonetic, phonological, morphological, syntactic, and semantic structures and analysis; nature and form of grammar. P/NP or letter grading.

40W. Language and Gender: Introduction to Gender and Stereotypes. (5) Formerly numbered Applied Linguistics 40W. Lecture, four hours; discussion, two hours. Enforced requisite: English Composition 3. Prior knowledge of foreign languages not required. Introduction to language from sociopolitical perspective of gender. Use of research and examples in English and other languages to frame discussion of male and female gendered languages and gendered language, as reflected in lexicon, language behavior, phonetics and intonation, and language acquisition and linguistic change. Satisfies Writing II requirement. P/NP or letter grading.

88A-88B. Lower-Division Seminars. (4–4) Seminar, three hours. Limited to freshmen/sophomores. Variable topics; consult Schedule of Classes, College of
Letters and Science, or department for topics to be offered in specific term. May be repeated for credit. P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 as an upper-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as an upper-division lecture course, individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

97. Variable Topics in Linguistics. (1 to 4) Seminar, three hours; fieldwork, two hours. Variable topics offered by departmental faculty members. May be repeated for credit with topic change. P/NP or letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research for other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in course, excluding honors level. Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

102. Introduction to Applied Phonetics. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: course 20. Not open for credit to students with credit for course 103. Phonetics of variety of languages and phonetic phenomena that occur in language of world. Extensive practice in perception and production of such phenomena. P/NP or letter grading.

104. Experimental Phonetics. (5) Formerly numbered 104.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: course 20. Not open for credit to students with credit for course 102. Phonetics of variety of languages and phonetic phenomena that occur in language of world. Extensive practice in perception and production of such phenomena. Survey of principal techniques of experimental phonetics. Use of laboratory equipment to investigate acoustic properties of speech. Topics include experimental design; theoretical basis of acoustic structure of speech sounds; computer-based speech processing and analysis. Concurrently scheduled with course C204A. P/NP or letter grading.

105. Morphology. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: course 20. In linguistics, morphology is study of word structure. Morphological theory seeks to answer questions such as how should words and their component parts (roots, prefixes, suffixes, vowel changes) be classified crosslinguistically? how do speakers store, produce, and process complex words (words with affixes, compounds)? how do speakers know how to produce correct word forms even when they have not previously heard them and how do speakers know that particular words are well-formed or ill-formed? is there principled distinction in traditional division between inflection and derivation? lecture is designed to develop basic competence in analysis of word structure.Letter grading.

110. Introduction to Historical Linguistics. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 20, 102 or 103, 119A or 120A. Methods and theories appropriate to historical study of language, such as comparative method and method of internal reconstruction. Sound change, grammatical change, semantic change. P/NP or letter grading.

110G. Introduction to Historical Linguistics for Graduate Students. (2) Lecture, four hours. Limited to and designed for entering linguistics graduate students. Enforced requisite: course 119A or 120A. Survey of theories of historical linguistics. Methodologies and theories appropriate to historical study of language, such as comparative methods and method of internal reconstruction. Sound change, grammatical change, semantic change. S/U grading.

111. Introduction. (5) Formerly numbered 111.) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 102 or 103, and 119A or 120A or 120B. Recommended requisite: course C104. Survey of intonational theory for English and other languages, with particular emphasis on phonological models of intonation. Students learn to transcribe intonational elements. Concurrently scheduled with course C211. P/NP or letter grading.

114. American Indigenous Linguistics. (5) Lecture, four hours; discussion, one hour (when scheduled). Strongly recommended preparation: course 20. Survey of major classifications of American indigenous languages; writing systems for American indigenous languages; American indigenous languages in social and historical context. One or more topics may be investigated in detail. P/NP or letter grading.

115. Linguistics and Speech Pathology. (2 or 4) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 102 or 103, and 119A or 120A. Introduction to field of speech pathology. Topics include biological foundations of speech, language, and hearing; and disorders of speech production, language, voice, and hearing, affecting children and adults. In-class presentation and final term paper required if taken for 4 units. P/NP or letter grading.

116. Introduction to Japanese Linguistics. (4) (Same as Japanese M120.) Lecture, three hours; discussion, one hour (when scheduled). Enforced requisite: one or two of Japanese 3 or Japanese placement test. Introduction to Japanese grammar and sociolinguistics through reading, discussion, and problem solving in phonology, syntax, semantics, and descriptive pragmatics. Letter grading.

119A. Applied Phonology. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 20, and 102 or 103. Not open for credit to students with credit for course 102. Sound structures and sound patterns in world’s languages. Rules, rule ordering, features, syllable, and higher structure. Comparison of sound patterns of different languages. Tools of phonology as applicable to other fields. P/NP or letter grading.

120A. Phonology I. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 20, 102 or 103. Introduction to phonological theory and analysis, Rules, representations, underlying forms, derivations, Justification of phonological analyses. Emphasis on practical skills with problem sets. P/NP or letter grading.

120B. Syntax I. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: course 20. Course 120A is not requisite to 120B. Descriptive analysis of morphological and syntactic structures in natural languages; emphasis on insight into nature of such structures rather than linguistics formalization. P/NP or letter grading.

120C. Semantics I. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisite: course 119B or 120B. Survey of most important theoretical and descriptive claims about nature of meaning. P/NP or letter grading.

127. Syntactic Typology and Universals. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: course 119B or 120B. Emphasis on how theories in formal models of intonation are applied to intonational structures in a range of languages presented and analyzed. P/NP or letter grading.

C110. Romance Syntax: French. (4) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: course 120B. Aspects of structure of French language, with emphasis on properties of construction not found in English. Concurrently scheduled with course C228A. P/NP or letter grading.

C128B. Romance Syntax: French. (4) Lecture, four hours. Preparation: some knowledge of French (or one Romance language). Enforced requisite: courses 120B, C128A. Aspects of structure of French language, with emphasis on properties of construction not found in English. Concurrently scheduled with course C228B. P/NP or letter grading.

130. Language Development. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 20, 119A or 120A, 119B or 120B. Survey of research and theoretical perspectives in language development in children. Discussion and examination of child language data from English and other languages. Emphasis on universal aspects of development. Topics include infant speech perception and production, development of phonology, morphology, syntax, and semantics. P/NP or letter grading.

132. Language Processing. (5) Lecture, four hours; laboratory, one hour (when scheduled). Requisites: courses 20, 119A or 120A, 119B or 120B. Central issues in language comprehension and production, with emphasis on how theories in formal processing models. Topics include word understanding (with emphasis on spoken language), parsing, anaphora and inference, speech error models of sentence production, and computation of syntactic structure during production. P/NP or letter grading.

135. Neurolinguistics. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 20, 119A or 120A, 119B or 120B. Examination of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and atypical hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C235. P/NP or letter grading.

140. Bilingualism and Second Language Acquisition. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 119A or 120A, 119B or 120B. Introduction to study of childhood bilingualism and adult and child second language (L2) acquisition. Survey of theories of L2 grammar and grammatical processes underlying L2 bilingual acquisition. Discussion of neurolinguistic and social aspects of bilingualism. Concurrently scheduled with course C244. P/NP or letter grading.

M141. Current Methods of Language Teaching. (5) (Same as English Composition M141.) Lecture, four hours; discussion, one hour. Enforced requisite: course 20. Survey of theory and practice in teaching second languages, including (1) past and present methods used to teach second languages, (2) current theory and practice underlying skills-based instruction of an integrated approach, (3) the affect second language acquisition and learning. Development of knowledge base in and rational base for design, development, implementation, and evaluation of second language instruction programs. P/NP or letter grading.

M146. Language in Culture. (5) (Same as Anthropology M150.) Lecture; three hours, discussion; one hour, fieldwork, two hours. Requisite: course 20 or Anthropology M150 or equivalent as assigned. Study of the relationship of habitual thought and behavior to language; and language and classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archeology. P/NP or letter grading.

M150. Introduction to Indo-European Linguistics. (5) (Same as Indo-European Studies M150.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: course 1 or 20. Indo-European languages (ancient and modern), including their relationships, chief characteristics, writing systems, and sociolinguistics. Study of reconstructed Indo-European proto-language and proto-culture. One or more Indo-European languages may be investigated in detail. P/NP or letter grading.

160. Field Methods. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 102 or 103, 119A or 120A, 119B or 120B. Analysis of language unknown to members of class from data elicited from native speaker of that language. P/NP or letter grading.

161. Language Documentation. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 20 (enforced), and 105 or 119A or 120A. Issues in language documentation, including collection of primary data using linguistic field methods, organizing data into documents (annotated texts, dictionaries, multimedia presentations, technical articles), auditing and supervising students (speakers of target languages, linguists, scholars outside linguistics, general public), presentation and storage of documents (paper publication, online publication, electronic and physical archives), documenting endangered languages, and organizations and initiatives for documenting endangered languages. Presentations focus on case studies. Student projects in assembling primary data and creating annotated texts with commentary. P/NP or letter grading.

165A. Phonology I. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisite: course 120A. To be taken in term following completion of course 120A or as soon as possible thereafter. Further study in phonological theory and analysis: autosegmental theory, syllable structure, metrical theory, interface of phonology and grammar. P/NP or letter grading.

165B. Syntax II. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisite: course 120B. To be taken in term following completion of course 120B or as soon as possible thereafter. Further study in syntax, selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. P/NP or letter grading.

168. Mathematical Structures in Language I. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisite: courses 120B, Program in Computing 10C (or Computer Science 32). Exposition of the techniques of formal computational ideas underling kinds of grammars used in theoretical linguistics and psycholinguistics, and some connections to applications in natural language processing. Topics include recursion, relations between probabilities and grammars, and parsing algorithms. P/NP or letter grading.

165A. Computational Linguistics I. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisite: course 185A, with emphasis on computational analysis of current tools and frameworks used in linguistic theory and their cognitive interpretations. P/NP or letter grading.

165B. Computational Linguistics II. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisite: course 185B. Further study in formal computational ideas used in theoretical linguistics and psycholinguistics, and some connections to natural language processing. Topics include recursion, relations between probabilities and grammars, and parsing algorithms. P/NP or letter grading.

185B. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 185A. Extension of material in course 185A, with emphasis on computational analysis of current tools and frameworks used in linguistic theory and their cognitive interpretations. P/NP or letter grading.

185B. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 185A. Extension of material in course 185A, with emphasis on computational analysis of current tools and frameworks used in linguistic theory and their cognitive interpretations. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate course. Exploration of topics in greater depth through assigned readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

185HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to undergraduate core course. Individual study with course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for credit for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

191A. Variable Topics Research Seminars: Linguistics. (4) Seminar, three hours. Requisite: course 1 or 20, Research seminar on selected topics. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

191B. Variable Topics Research Seminars: Linguistics. (2 or 4) Seminar, three hours. Research seminar on selected topics. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

192A-192B. Undergraduate Practicum in Linguistics. (4–2) Seminar, seven hours (course 192A) and six hours (course 192B). Limited to junior/senior majors. Training and supervised practicum for advanced undergraduate students to assist in linguistics courses. Students assist in preparation of materials and development of innovative projects. Participation of faculty members and teaching assistants. May not be applied toward course requirements for any Linguistics Department major. Individual contract required. Information about credit will be determined by Linguistics Department. P/NP grading.

194. Research Group Seminars: Laboratory Research in Linguistics. (1 to 2) Seminar, one hour; laboratory, one hour. Laboratory research in various kinds of relevant research methods, with application of results to specific problems. May be repeated for credit. P/NP grading.

195. Community or Corporate Internships in Linguistics. (2 to 4) Tutorial, to be arranged. Preparation: 3.0 grade-point average in major. Limited to junior/senior majors. Internship in supervised setting in community agency or business related to linguistics and/or applied linguistics. Students meet on regular basis with instructor and provide evidence of mastery of subject matter required. Additional supervision to be provided by internship site supervisor. Individual contract with supervising faculty member required. P/NP grading.

197. Individual Studies in Linguistics. (2 to 4) Tutorial, four hours. Requisite: course 185A. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

198A. Honors Research in Linguistics I. (4) Tutorial, to be arranged. Preparation: 3.0 grade-point average. Requisite or corequisite: course 165A (or 200A) or 165B (or 200B). Recommended: completion of both courses 165A and 165B (or 200A and 200B) before or during term in which course 198A is taken. Limited to juniors/seniors. Development of honors thesis or comprehensive research project on linguistic topic selected by student under direct supervision of faculty mentor. Consult professor in charge to enroll. May be repeated for credit. Individual contract required. In Progress grading (credit to be given only on completion of course 198B).

198B. Honors Research in Linguistics II. (2) Tutorial, to be arranged. Requisite: course 198A. Limited to juniors/seniors. Completion of honors thesis or comprehensive research project begun in course 198A under direct supervision of faculty mentor. Consult professor in charge to enroll. May be repeated for credit. Individual contract required. Letter grading.
### Graduate Courses

#### 200A. Phonological Theory I. (4) Lecture, four hours. Preparation: graduate linguistics student or grade of A in course 210A or equivalent course in phonology. Courses 200A and 201A form two-course survey of current research in phonological theory. Interaction of phonology with morphology and syntax, syllable structure, stress, S/U or letter grading.

#### 200B. Syntactic Theory I. (4) Lecture, four hours. Preparation: graduate linguistics student or grade of A in course 210B or equivalent course in syntax. In-depth introduction to selected topics in theory of constituent structure and syntax of predicates, arguments, and grammatical relations. Topics include level of representation, X-bar theory, case theory, thematic roles, component grammar, function-changing rules, head-complement relations. S/U or letter grading.

#### 200C. Semantic Theory I. (4) Lecture, four hours. Overview of current research in semantic and pragmatic theory. Topics include segmentalism (tone, tiers, segment structure), feature theory, underspecification, prosodic morphology. S/U (2-unit course) and S/U or letter (4-unit course) grading.

#### 201A. Phonological Theory II. (2 or 4) Lecture, four hours. Requisite: course 200A. Continuation of course 200A. Second course in two-course survey of current research in phonological theory. Topics include autosegmentalism (tone, tiers, segment structure), feature theory, underspecification, prosodic morphology. S/U (2-unit course) and S/U or letter (4-unit course) grading.

#### 201B. Syntactic Theory II. (2 or 4) Lecture, four hours. Requisite: course 200B. In-depth introduction to selected topics in theory of movement processes and topics selected from following areas: WH-movement and related rules, subjacency and other constraints on movement; ECP and related conditions on distribution of empty categories; resumptive pronoun constructions; parametric variation in movement constructions; LF WH-movement; filters; reconstruction; parasitic gaps; barriers theory; control theory; null subject parameter. S/U (2-unit course) and S/U or letter (4-unit course) grading.

#### 201C. Semantic Theory II. (2 or 4) Lecture, four hours. Requisite: course 200C. Survey of current approaches to model-theoretic semantics and its relation to current linguistic theory. Approaches include generalized categorial grammars, Montague grammar, Boolean-based systems, generalized quantifier theory, logical form. S/U (2-unit course) and S/U or letter (4-unit course) grading.

#### 203. Phonetic Theory. (4) Requisite: course 120A. Preliminaries to speech analysis. Functional anatomy of vocal organs; fundamental principles of acoustics and of acoustic theory of speech production; issues in perception of speech; nature and design of feature systems for phonetic and phonological analysis.

#### C204A. Experimental Phonetics. (5) Formerly numbered 204A. Lecture, four hours; discussion, one hour (when scheduled). Requisite: course 102 or 103. Survey of principal techniques of experimental phonetics. Use of laboratory equipment to investigate acoustic properties of speech sounds. Topics include perceptual study of speech sounds; computer-based speech processing and analysis. Concurrently scheduled with course C104. S/U or letter grading.

#### 204B. Speech Production. (4) Lecture, three hours; laboratory, one hour. Requisite: course 104 or 204A. Survey of topics in speech production research, especially in laboratory methods. Topics include physiology of vocal tract and models of speech production and articulatory/acoustic relations. Emphasis on use of laboratory methods such as aerodynamic transducers, electroglottography, static and electropalatography, electromyography, and imaging techniques. S/U or letter grading.

#### 204C. Speech Perception. (2 or 4) Lecture, four hours. Recommended requisite: course 104 (or 204A) or 111 (or 210A). Survey of topics in speech perception research. Topics include auditory physiology and psychophysics, categorical speech perception, and cross-linguistic speech perception. Emphasis on use of experimental methods such as lexical decision, gating, priming, eye tracking, phoneme monitoring, and word spotting. S/U or letter grading.

#### 207. Pragmatic Theory. (2 or 4) Lecture, four hours. Requisites: courses 200C, 201C. Introduction to formal pragmatic theory. Topics include speech act theory, presupposition, and conversational maxims; at-issue_at-issue distinction and other projective content; Gricean implicature, conversational implicature, and local implicature; and formal treatments of discourse, including game-theoretic pragmatics. S/U or letter grading.

#### 209A. Computational Linguistics I. (5) Lecture, four hours; laboratory, one hour. Overview of formal computational ideas underlying kinds of grammars used in theoretical linguistics and psycholinguistics. Themes include role of recursion, relationship between structure and interpretation (both PF and LF), relationship between grammars and probabilities, and relationship between derivations and parsing. S/U or letter grading.

#### 209B. Computational Linguistics II. (5) Lecture, four hours; laboratory, one hour. Requisite: course 209A. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to theories of linguistic sophistication and psychological plausibility. S/U or letter grading.

#### 209C. Computational Semantics. (4) Lecture, four hours. Preparation: basic knowledge of semantics. Requisite: course 185A or 209A. Study of algorithms to compute and reason with meanings of sentences and texts. Phenomena such as anaphor resolution, presupposition projection, and tracking time, objects, and spatial relations. S/U or letter grading.

#### 210A. Field Methods I. (4) Lecture, four hours. Preparation: grade of B or better in course 103 in or examination on practical phonetics. Requisites: courses 200A, 200B. Analysis of a language unknown to members of class from data elicited from a native speaker of the language. Term papers to be relatively full descriptive sketches of the language. May be repeated for credit with topic change. S/U or letter grading.

#### 210B. Field Methods II. (4) Lecture, four hours. Requisite: course 210A. Survey of techniques and problems with different languages are investigated in different years, different languages may be surveyed in different years. Course 210B may be taken by native speakers of the language. May be repeated for credit with topic change. S/U or letter grading.

#### C211. Intonation. (Formerly numbered 211.) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 102 or 119A or 120A or 120B. Recommended requisite: course C204A. Survey of intonational theory for English and other languages, with particular emphasis on phonological models of intonation. Students learn to transcribe intonational elements of a given language and to write them in the standard notation. Concurrently scheduled with course C111. S/U or letter grading.

#### 212. Learnability Theory. (4) Lecture, four hours. Survey of some of most significant results on capabilities of learners, given precise assumptions about their memory, time, and computational power, and precise assumptions about information provided by environment. S/U or letter grading.

#### 213A. Grammatical Development. (7) Requisites: courses 200A, 200B. Requisites: courses 130 or 233. Survey of theoretical perspectives and contemporary empirical research in development of syntax and other components of grammar, with particular emphasis on acquisition theory, linguistic theory, and issues of learnability.

#### 214. Survey of Current Syntactic Theories. (4) Lecture, four hours. Requisite: course 200B. Survey of several current syntactic theories, compared with one another and with theory discussed in course 201B, from point of view of theories' relative descriptive and explanatory power. S/U or letter grading.

#### 215. Syntactic Typology. (2 or 4) Lecture, four hours. Requisite: course 200B. Current results in word-order universals; genetic classification of world languages; cross-language properties of specific construction types, including relative clauses, passives, positive and negative coreference systems, agreement systems, deixis systems, and types of sentence complement; S/U or letter grading.

#### 216. Syntactic Theory III. (2 or 4) Lecture, four hours. Requisite: course 200B. Selected topics on syntactic theories of anaphora and quantification from the following areas: typology of binding categories (pro- nouns, adverbs, other elements); features and positions in binding theory; parametric variation in binding; quantifier movement; existential quantification and unselective binding; strong and weak crossover; superiority; scope interactions; complements. S/U (2-unit course) or letter (4-unit course) grading.

#### 217. Experimental Phonology. (4) Lecture, four hours. Requisite: course 200A. Survey of experimental work that bears on claims about speakers' knowledge of phonology, including theories of lexicon, relation between perception and phonology, and universal markedness relations. Letter grading.

#### 218. Mathematical Structures in Language II. (4) Lecture, four hours. In-depth study of generalized quantifier theory; selected topics from distinction feature theory, formal syntax, partial orders and lattices, formal language theory, variable binding operators. May be repeated for credit with consent of instructor. S/U or letter grading.

#### 219. Phonological Theory III. (2 or 4) Lecture, four hours. Requisite: course 201A. Current research and issues in phonological theory. Topics include structure of different representations, architecture of grammar, and explanations for phonological typology. S/U (2-unit course) or letter (4-unit course) grading.

#### 220. Linguistic Areas. (4) Requisites: courses 120A, and courses 120B or 127. Recommended: courses 135 or 200A, 165B or 200B. Analysis and classification of languages spoken in a particular area (e.g., Africa, the Balkans, South Asia, Southeast Asia, Australia, Ab-
original North America, Aboriginal South America, Far East, etc.) may be repeated for credit with topic change.

222. Semantic Theory III. (2 or 4) Lecture, four hours. Requisites: courses 201C, 202, 203. Introduction to the theory of meaning, focusing on defining research topics, selecting appropriate research design and measurements, designing student experiments, recording, analyzing, and interpreting data. S/U or letter grading.

224. Bilingualism and Second Language Acquisition. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 119A or 120A, 119B or 120B. Introduction to study of childhood bilingualism in adult and child second language of L2 and L1 acquisition, with focus on understanding nature of L2 grammar and grammatical processes underlying L2/bilingual acquisition. Discussion of neurolinguistic and social aspects of bilingualism. Concurrently scheduled with course C140. Graduate students expected to read more advanced literature, do in-class presentation, and submit graduate-level term paper. S/U or letter grading.

251A. Topics in Phonetics and Phonology. (4) Seminar, four hours. Requisite: course 200A. Course 201A, 203, or 204A may be required. Specialized topics in phonetics and phonology. Meetings with course 251B. May be repeated for credit. S/U or letter grading.

251B. Topics in Phonetics and Phonology. (2) Seminar, four hours. Requisite: course 200A. Course 201A, 203, or 204A may be required. Specialized topics in phonetics and phonology. Meetings with course 251A. May be repeated for credit. S/U grading.

252A. Topics in Syntax and Semantics. (4) Seminar, four hours. Requisite: course 200B. Course 201B, 201C, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. Meetings with course 252B. May be repeated for credit. Letter grading.

252B. Topics in Syntax and Semantics. (2) Seminar, four hours. Enforced requisite: course 200B. Course 214, 215, or 216. Specialized topics in syntax and semantics. May not be applied toward MA degree requirements. Meetings with course 252A. May be repeated for credit. S/U grading.

253A. Topics in Language Variation. (4) Seminar, four hours. Requisite: course 210. Course 202 may be required. Specialized topics in language variation. Meetings with course 253B. May be repeated for credit. Letter grading.

253B. Topics in Language Variation. (2) Seminar, four hours. Requisite: course 210. Course 202 may be required. Specialized topics in language variation. May not be applied toward MA degree requirements. Meetings with course 253A. May be repeated for credit. S/U grading.

254A. Topics in Linguistics. (4) Seminar, four hours. Requisites: courses 200A, 200B. Course 201A, 201B, 201C, 202, 203, 204A, 205, 208, 209A, 209B, 212, 213A, 213C, 214, 215, 216, or 218 may be required. Individual seminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. Meetings with course 254B. May be repeated for credit. Letter grading.

254B. Topics in Linguistics. (2) Seminar, four hours. Requisites: courses 200A, 200B. Course 201A, 201B, 201C, 202, 203, 204A, 205, 208, 209A, 209B, 212, 213A, 213C, 214, 215, 216, or 218 may be required. Individual seminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May not be applied toward MA degree requirements. Meetings with course 254A. May be repeated for credit. S/U grading.

260A-260B-260C. Seminars: Phonetics. (2 or 4 each) Seminar, three hours. Each course may be taken independently for credit. May not be applied toward MA or PhD degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

261A-261B-261C. Seminars: Phonology. (2 or 4 each) Seminar, three hours. Each course may be taken independently for credit. May not be applied toward MA or PhD degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

262A-262B-262C. Syntax Seminar. (2 or 4 each) Seminar, three hours. Each course may be taken independently for credit. May not be applied toward MA or PhD degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

263. Seminar: Semantics. (2 or 4) Seminar, two hours. Graduate students and faculty present ongoing work; review recent research in field; collaborate on joint projects. S/U grading.

264A-264B-264C. Seminars: Psycholinguistics/Neurolinguistics. (2 or 4 each) Seminar, three hours. Special topics may include child language, neurolinguistics, psycholinguistics, sociolinguistics, etc. Each course may be taken independently for credit. May not be applied toward MA degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

265A-265B-265C. American Indian Linguistics Seminars. (1 or 4 each) Seminar, two hours: fieldwork, four hours. Presentation of research on American Indian linguistics. Each course may be taken independently for credit. May not be applied toward MA or PhD degree requirements when taken for 1 unit. May be repeated for credit. S/U grading.

266. Seminar: Sociolinguistics. (2 or 4) Seminar, two hours. Graduate students, faculty, and visitors present ongoing work; review recent research in field; and prepare for conference. S/U grading.

275. Linguistics Colloquium. (4) Preparation: completion of MA requirements. Varied linguistic topics, generally presentations of new research by students, faculty, and visiting scholars. S/U grading.

276. Linguistics Colloquium. (No credit) Designed for graduate students. Same as course 275, but taken without credit by students not presenting a colloquium. S/U grading.

411A-411B. Research Orientation. (2–2) Designed for graduate students. Specialized orientation to research skills, including preparation of theses and written work for publication. Students must obtain permission from their faculty advisor. S/U grading.

422. Practicum: Phonetic Data Analysis. (2) Designed for graduate students. A practicum course in the analysis of phonetic data, such as sound spectrograms, oscillographic records, and computer output. May not be applicable toward MA or PhD degree requirements. S/U grading.

444. MA Thesis Preparation Seminar. (4) Seminar, two hours. Regular student presentations of MA thesis topics and progress, with discussion and criticism by other students and faculty. Presentations by faculty and guest speakers on topics relevant to professional development, such as abstract writing and conference presentations, preparing manuscripts for publication, curriculum vitae and personal websites, academic and non-academic careers in linguistics. May not be applied toward MA or PhD degree requirements. S/U grading.

495. College Teaching of Linguistics. (2) Seminar, to be arranged. Designed for graduate students. Required of all new teaching assistants. Seminars, workshops, and apprentice teaching. Selected topics, including curriculum development, various teaching strategies and their effects, teaching evaluation, and other topics on college teaching. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

501. Cooperative Program. (2 or 4) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and
Swahili

Lower-Division Courses

9. Fiat Lux Freshman Seminars. (1 Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

98. Honors Seminars. (1 Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1 Tutorial, three hours. Limited to students in College Honors Program. Enforced prerequisite: course 89. Honors content noted on transcript. Letter grading.

189. Advanced Honors Seminars. (1 Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

Undergraduate Minors

Accounting Minor

The Accounting minor provides students with a comprehensive accounting background.

Admission

To enter the minor, students must (1) have a minimum cumulative UCLA grade-point average of 3.0, (2) complete all required pre-admission courses with a minimum grade-point average of 3.0, and (3) receive grades of B or better in Management 1A and 1B. Repetition of more than one pre-admission course or of any pre-admission course more than once results in automatic denial of admission to the minor. Satisfying these requirements does not guarantee admission to the program, as only a limited number of students are admitted each year.

Applications are accepted in fall, winter, and spring quarters. Nontransfer students must apply subsequent to completing 90 units. Transfer students must apply after completing two academic quarters (excluding summer sessions) at UCLA. Decisions are made by the Anderson School Accounting Area.
Fully Employed Master of Business Administration

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Global Executive Master of Business Administration for Asia Pacific
The Anderson Graduate School of Management offers a dual degree program with the National University of Singapore Business School.

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Management MS, CPhil, PhD

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Entrepreneurship Minor
See the Entrepreneurship section for a description of the minor.

Graduate Majors

Business Analytics MS

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Executive Master of Business Administration

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Master of Business Administration

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Concurrent Degree Programs
Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

- Master of Business Administration/Computer Science MS
- Master of Business Administration/Doctor of Dental Surgery
- Master of Business Administration/Doctor of Medicine
- Master of Business Administration/Juris Doctor
- Master of Business Administration/Latin American Studies MA
- Master of Business Administration/Master of Library and Information Science
- Master of Business Administration/Master of Public Health
- Master of Business Administration/Master of Public Policy
- Master of Business Administration/Master of Science in Nursing
- Master of Business Administration/Master of Urban and Regional Planning

Master of Financial Engineering

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Management Lower-Division Courses

1A-1B. Principles of Accounting. (4–4) Lecture, three hours; discussion, one hour. Not open to freshmen. P/NP or letter grading. 1A. Introduction to financial accounting principles, including preparation and analysis of financial transactions and financial statements. Valuation and recording of asset-related transactions, including cash, receivables, marketable securities, inventories, and long-lived assets. Current liabilities. 1B. Requisite: course 1A. Completion of balance sheet with emphasis on debt and equity, including in-depth introduction to time value of money concepts. Introduction to partnership and individual income tax accounting.

19. Fiat Lux Freshman Seminars. (1 Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

88. Lower-Division Seminar: Special Topics in Management. (1 to 4) Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Entry-Level Writing requirement. Variable topics seminar that examines specific issues or problems and ways that professionals in management approach study of them. Students define, prepare, and present their own research projects with guidance of professional school faculty member. Letter grading.

89. Honors Seminars. (1 Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1 Tutorial, three hours. Limited to students in College Honors and departmental honors programs. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor.
Students must be in good academic standing and enrolled in at least one of the following courses:

108. Business Law. (4) Lecture, three hours. Students must be in good academic standing and enrolled in this course. Study of business law, contracts, agency, partnerships, and other laws of a business environment. P/NP or letter grading.

120A. Intermediate Financial Accounting I. (5) Lecture, four hours. Study of financial accounting and control; job costing and process costing; accounting for manufacturing overhead; cost budgeting; cost reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis. P/NP or letter grading.

121. Ethical Leadership in Accounting. (4) Lecture, seven and one-half hours. Study of ethical considerations in business decisions involving individuals, corporations, society, and international business. Analysis of cases for presentation and discussion. What is ethical dilemma posed? What is range of possible decisions and band of ethical choices supporting them? Offered in summer only. Letter grading.

122. Management Accounting. (4) Lecture, three hours. Requisites: course 1B, one statistics course. Nature, objectives, and procedures of cost accounting and control; budgeting and cost accounting; cost accumulation; cost reporting; cost-volume-profit relationships; and break-even analysis. P/NP or letter grading.

123. Auditing. (4) Lecture, three hours. Requisites: course 120B. Comprehensive study of procedures used in verification of financial statements and related information. Topics include control, legal, and other professional issues. Auditing of a complete set of financial statements. P/NP or letter grading.

127A. Tax Principles and Policy. (4) Lecture, three hours. Requisite: course 1B. Study of fundamental income tax principles and policy as they are applied by individuals and other entities in analyzing business, investment, employment, and personal decisions. Special emphasis on role of tax rules in capital transactions and decision making. P/NP or letter grading.

127B. Corporate and Partnership Taxation. (4) Lecture, three hours. Requisite: course 1B. Recommended: course 127A. Study of tax issues arising in formations and operations of corporations and partnerships. Special emphasis on closely held enterprises, including S corporations. P/NP or letter grading.

127C. International Taxation. (4) Lecture, three hours. Requisite: course 127A or permission of instructor. Study of two principle areas of international taxation from U.S. regulatory perspective: taxation of American citizens and companies conducting business in international arena (outbound transactions) and taxation of foreign nationals and companies who invest or conduct business in the U.S. (inbound transactions). P/NP or letter grading.

128. Special Topics in Accounting. (4) Lecture, three hours. Requisite: course 1B. Selection of topics in public accounting, such as audit and fraud examination, mergers and acquisitions, public-company status and going-public process, role of partner, serving entrepreneurial clients, and fund accounting. Discussion of case study of current interest in accounting profession. Business plan preparation. P/NP or letter grading.

129. Principles of Managerial Finance. (4) Lecture, four hours. Requisites: course 1B, one statistics course. Not open to students with credit for Econ 106F. Study of financial decision making by business firms, with emphasis on applications of economic and accounting principles in financial analysis, planning, and control. Extensive use of problems and cases to illustrate analytical techniques employed in decision making. P/NP or letter grading.

142A. Analytics in Accounting I. (4) Lecture, three hours. Requisite: course 142A. Preparation: intermediate Excel user. Not open to first-years. Topics include data cleaning and analyzing data, and advanced financial analysis, to evaluate accounting data. All applications are related to accounting and finance. Includes developing analytics mindset, data scrubbing and preparation, and data quality. Emphasis on graphical and written techniques to communicate results. Letter grading.

142B. Analytics in Accounting II. (4) Lecture, three hours. Requisite: course 142A. Preparation: intermediate Excel user. Not open to first-years. Topics include data cleaning and analyzing data, and advanced financial analysis, to evaluate accounting data. All applications are related to accounting and finance. Includes developing analytics mindset, data scrubbing and preparation, and data quality. Emphasis on graphical and written techniques to communicate results. Letter grading.

142C. Analytics in Accounting III. (4) Lecture, three hours. Requisite: course 142A. Preparation: intermediate Excel user. Not open to first-years. Topics include data cleaning and analyzing data, and advanced financial analysis, to evaluate accounting data. All applications are related to accounting and finance. Includes developing analytics mindset, data scrubbing and preparation, and data quality. Emphasis on graphical and written techniques to communicate results. Letter grading.

159. Foundations of Business and Entrepreneurship. (4) Lecture, three hours. Introductory overview of core areas of business and entrepreneurship including accounting, finance, marketing, operations, organization behavior, and entrepreneurship concepts in context of large existing organizations, small businesses, and new entrepreneurial ventures. Students gain solid foundational knowledge of components of business as well as how organizations are managed in increasingly competitive and global economy. Letter grading.

160. Entrepreneurship and Venture Initiation. (4) Lecture, three hours; off-campus. Introduction to key concepts of entrepreneurship, including new product development, finance, business plan development, and technology commercialization. Basic topics include character traits required for entrepreneurship. Terminology used by lawyers, accountants, venture capitalists, and other investors who form and financing new companies are to be developed. Includes start-ups, spin-off, and acquisition of existing company (or its assets). Assessment of feasibility of business concept and communication of concept to potential investors, employees, and business partners. Discussion of technology feasibility, intellectual property, and licensing. Letter grading.

161. Business Plan Development. (4) Lecture, three hours. Enforced requisite: course 160. Fundamentals of developing effective business plans, both in presentation and written form. Basic principles of designing and articulating plans for sales, marketing, product or service, operations, financials, management, and strategic considerations of new venture. How to develop well-written investment-quality business plans and business plan presentations, understand various analytical processes to produce such plans, improve student plans, oral presentation skills, and formally present their business plans to audience of angel and venture capital investors. Letter grading.

162. Entrepreneurship and Technology Commercialization. (4) Lecture, three hours. Designed for juniors/seniors. Introduction to transformation of new knowledge and inventions into viable commercial products and services. Focus on particular stage of technology being developed at major research universities like UCLA. Initial emphasis on assessment and protection of intellectual property and early evaluation of technology and determining potential for commercialization. How intellectual property in its various forms is protected and how rights to these assets are negotiated by parties involved. Examination of nature of contracts and negotiation between university technology transfer offices, researchers, technical experts, and early investors in commercialization that might lead to patent, licenses, or new business development. Letter grading.

163. Entrepreneurship and New Product Development. (4) Lecture, three hours. Designed for juniors/seniors. Introduction to new product innovation and management. Students assume role of product manager, from identifying, developing, and commercializing new products through cases, businesses currently in news, team project, and readings to develop critical thinking, decision-making skills, and creativity in launch of successful new product (team project). Letter grading.

164. Entrepreneurial Finance and Accounting. (4) Lecture, three hours. Designed for juniors/seniors. Introduction to fundamental concepts of financial management of early-stage companies, with particular emphasis on capital formation of new ventures. Relationships between entrepreneurs and investors and discussion of different goals of founders and investors, including nature of negotiation and relationship between parties over time. Letter grading.

167. Social Entrepreneurship. (4) Lecture, three hours. Designed for juniors/seniors. Examination of fundamental social challenges and opportunities of developing and managing enterprises with social missions. Use of framework to develop strategic implementation plan that incorporates external analysis, organizational assessment, strategy development, and actionable steps and draws on expertise and experience of faculty members and alumni as well as experts in
fields of social entrepreneurship, nonprofit management, and strategic philanthropy who present select topics of interest. Letter grading.

185. Personal Financial Health: Theory and Practice. (4) Lecture, four hours; fieldwork, eight hours. Enrollment by instructor consent. Capstone for undergraduate minor in Entrepreneurship. Application of critical thinking, research skills, and education to one of a follower and then to run a new business. Specific topics covered include budgeting, time value of money, installment purchases, protection of assets, principles of investing, retirement and estate planning, psychological aspects of decision making, behavior, and credit. Topics from behavioral finance include suboptimal spending, mistakes investors make, and money and happiness. Letter grading.

186. Entrepreneurial Leadership and Practical Experience. (4) Lecture, three hours; fieldwork, eight hours. Enrollment by instructor consent. Capstone for under

187. Real Estate Finance and Investments. (4) Lecture, three hours. Exploration of fundamentals of residential and commercial real estate finance, investment, and development. Study of qualitative concepts and quantitative tools necessary to develop real estate decision-making skills. Analysis of variety of case studies of real estate investments, and development proj

188A. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin prepara

188C. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188B. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth than provided in regular seminars, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible stud

190. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors and departmental honors programs. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors contract requires faculty advisor approval. May be repeated for credit. Individual contract required. P/NP or letter grading.

194. Anderson School of Management Research Group Seminar. (2) Seminar, two hours. Study and analysis of current topics in management and business. Discussion of current research and literature in research specialty of faculty instructor. P/NP grading.

195. Community or Corporate Internships in Management. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor to monitor and discuss periodic reports of their experience. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

199. Directed Research. (2 to 6) Tutorial, to be arranged. Limited to juniors/senors. Supervised individual research or investigation of selected research topic under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

201B. Econometrics and Business Forecasting. (4) Lecture, three hours. Development of standard topics in applied econometric modeling. Emphasis on techniques of model building and choice, common behavioral biases of managers and consumers, and corrective tools and procedures, drawing heavily on disciplines of psychology and behavioral economics. Topics include decision structuring, chance processes, forecasting, confidence, likelihood judgment, risk perception and risk-taking, decision under uncertainty, multiattribute choice, framing and mental accounting, intertemporal choice, allocation decisions, organizational decision making, choice architecture, happiness, and well-being. S/U or letter grading.

204A-204B. Managing Complex Business Deals. (4 or 6) Lecture, three hours. Prepar

209A-209B. Managing Complex Business Deals. (4 or 6) Lecture, three hours. Preparation: familiarity with basic vocabulary and concepts, including basic principles of accounting and valuation. Course 209A is enforced requisite to 209B. Advanced course in business transactions that have first-order effects on management practices and business opportunities around world. Global managers need to develop keen sense of these evolutions in order to lead successful businesses that adapt to and take advantage of global trends. Study improves student's preparedness of these trends to become better managers. Letter grading.

209. Managing Complex Business Deals. (4 or 6) Lecture, three hours. Preparation: familiarity with basic vocabulary and concepts, including basic principles of accounting and valuation. Advanced course in business organization. Examination of structure of business transactions and allocation of control, risk, and returns. Topics include venture capital investments, debt and loan agreements, empirical model, special problems in application, and international distribution and marketing agreements (including franchising), motion picture production/finance/distribution agreements, and joint ventures. Assigned reading and focus on documents that incorporate terms of business transactions of deals. Concurrently scheduled with Law 239. S/U or letter grading.

210A. Business Forecasting: Turning Numbers into Knowledge. (4) Discussion, three hours. Preparation: familiarity with linear regression. Examination of one approach to analytical thinking—forcing numerical and textual data into carefully formulated alternative models. Data studied include macroeconomic vari

211. Behavioral Economics. (4) Lecture, three hours. Study of the psychological foundations of economic behavior and thinking. Topics include decision making, framing and mental accounting, intertemporal choice, allocation decisions, organizational decision making, choice architecture, happiness, and well-being. S/U or letter grading.

214. Managerial Decision Making. (4) Lecture, three hours. Preparation: familiarity with basic vocabulary and concepts, including basic principles of accounting and valuation. Course 209A is enforced requisite to 209B. Advanced course in business organization. Examination of structure of business transactions and allocation of control, risk, and returns. Topics include venture capital investments, debt and loan agreements, empirical model, special problems in application, and international distribution and marketing agreements (including franchising), motion picture production/finance/distribution agreements, and joint ventures. Assigned reading and focus on documents that incorporate terms of business transactions of deals. Concurrently scheduled with Law 239. In Progress (209A) and S/U or letter (209B) grading.

215A. Negotiations Analysis. (4) Lecture, three hours. Preparation: negotiation exercises and development of students' negotiation skills and experience. Use of economic concepts and simple analyses in exercise debriefs to gain insight and to develop framework applicable to business negotiations. S/U or letter grading.

216. Tools and Analysis for Business Strategy. (4) Lecture, three hours. Goal is for students to become more comfortable with design, execution, and interpretation of data analysis that can meaningfully inform business strategy formulation. Conceptual framework is firmly rooted in learning by doing. Use of variety of real-world examples to gain practice with quantitative methods.
methods that can be deployed in business settings to analyze underlying predictors and causes of firm success. Letter grading.

220. Corporate Financial Reporting. (4) Lecture, three hours. In-depth study of significant corporate financial reporting issues to enhance understanding of financial statements and student ability to interpret and use information contained in these disclosures. Emphasis on economic substance of transactions. S/U or letter grading.

222. Corporate Decision Making and Incentives. (4) Lecture, three hours. Requisites: course 403. Use of basic microeconomics to answer what information is needed to make managerial decisions, what incentives are needed to motivate managers, and how information should be recorded to facilitate both, essentials for careers in consulting, private equity, and general management. Letter grading.

223. Choice Architecture. (4) Lecture, three hours. Emphasis on economic principles that can be deployed in business settings to help individuals make better decisions. Historical development of behavioral insights in microeconomics and psychology. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor approval. S/U or letter grading.

226. Special Advanced Topics in Accounting. (4) Lecture, three hours. Requisites: courses 230 (or 430), 403, 408. Designed for second-year graduate students. Exploration of operating issues involved in managing entrepreneurial enterprises. Integrative course, building on methodological, principles, and concepts provided in requisite functional and strategic core courses. Use of extensive readings and case studies to develop skills and philosophical basis for applying managerial concepts to entrepreneurial operating settings. S/U or letter grading.

230. Business Law for Managers and Entrepreneurs. (4) Lecture, three hours. Introduction to the legal environment that includes contract law, litigation process and alternatives, intellectual property law, business formation, corporate law, employment law, collateralized lending, and bankruptcy reorganizations. How to deal with potential legal issues before they become serious problems. S/U or letter grading.

M225. Law and Management of Nonprofit Organizations. (4) (Same as Public Policy M229.) Lecture, three hours. Introduction to important legal, financial, and management issues confronting nonprofit organizations. Topics include how to start nonprofit tax-exempt organizations, qualifying and maintaining tax-exempt status under IRC Code Section 501(c)(3), corporate governance, political and legislative activity restrictions. S/U or letter grading.

231E. Managing Finance and Financing Emerging Enterprises. (4) Lecture, three hours. Requisites: courses 230 (or 430), 403, 408. Process by which corporate control transactions take place; role of market for corporate control in leading to economic restructuring and shifts in resource allocation by corporations. Emphasis on understanding the market for control and reactions to control transactions and to defensive measures by management. Focus on interaction of strategic planning, firm value maximization, and investment decisions in life cycle of growth of firms. S/U or letter grading.

231E. Managing Finance and Financing Emerging Enterprises. (4) Lecture, three hours. Requisites: courses 230 (or 430), 403, 408. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor approval. S/U or letter grading.

231E. Managing Finance and Financing Emerging Enterprises. (4) Lecture, three hours. Requisites: courses 230 (or 430), 403, 408. Designed for second-year graduate students. Exploration of operating issues involved in managing entrepreneurial enterprises. Integrative course, building on methodological, principles, and concepts provided in requisite functional and strategic core courses. Use of extensive readings and case studies to develop skills and philosophical basis for applying managerial concepts to entrepreneurial operating settings. S/U or letter grading.

232A. Investment Management. (4) Lecture, three hours. Requisites: courses 230 (or 430), 403, 408. Topics include application of portfolio theory to investment decisions, introduction to fixed-income markets; institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

232B. Fixed-Income Markets. (4) Lecture, three hours. Preparation: demonstrable training in statistics. Requisites: courses 230 (or 430), 403, 408. Topics include application of portfolio theory to investment decisions, introduction to fixed-income markets; institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

232E. Market and Credit Risk Management. (4) Lecture, three hours. Requisites: courses 230 (or 430), 403, 408. Topics include application of portfolio theory to investment decisions, introduction to fixed-income markets; institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

232E. Market and Credit Risk Management. (4) Lecture, three hours. Requisites: courses 230 (or 430), 403, 408. Topics include application of portfolio theory to investment decisions, introduction to fixed-income markets; institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

233A. International Financial Markets. (4) Lecture, three hours. Requisites: courses 230 (or 430), 403, 408. Topics include application of portfolio theory to investment decisions, introduction to fixed-income markets; institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

234A. International Financial Markets. (4) Lecture, three hours. Requisites: courses 230 (or 430), 403, 408. Topics include application of portfolio theory to investment decisions, introduction to fixed-income markets; institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

234A. International Financial Markets. (4) Lecture, three hours. Requisites: courses 230 (or 430), 403, 408. Topics include application of portfolio theory to investment decisions, introduction to fixed-income markets; institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

235. Venture Capital and Private Equity. (4) Lecture, three hours. Requisites: course 408. Use of cases to study entrepreneurial finance and venture capital. Analysis of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

238. Special Topics in Finance. (4) Lecture, three hours. Requisites: courses 230 (or 430), 403, 408. Topics include application of portfolio theory to investment decisions, introduction to fixed-income markets; institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

240F. Global Supply Chain Management. (4) Lecture, three hours. Requisites: course 410. Business environment today is characterized by globalization, intense competition, rapid technological change, and shorter product life cycles. Firms can no longer afford to operate in isolation. In many industries competition has moved from firm level to supply chain level. Provides understanding of strategic, tactical, and operational issues involved in supply chain management, with generous attention to emerging digital economy. S/U or letter grading.

241A. Technology Management. (4) Lecture, three hours. Requisites: courses 410, 411. Management of high-technology firm, including acquisition, creation, and utilization of technology and knowledge assets. Research and product development, product and process technologies, technology regimes, high-technology markets, competition, and technology strategy. Examples include nanotechnology, advanced transportation systems, telecommunications, e-business, medical devices, nanotechnology, advanced transportation systems, and electronics. S/U or letter grading.

246A. Business and Environment. (4) Lecture, three hours. Requisites: course 410. Introduction to environmental issues that impact business decisions, including environmental issues interact with main functional areas of business: finance, marketing, strategy, operations, accounting. Basic introduction to background of environmental issues, with focus primarily on business aspects. Specific topics vary from year to year, but course details what every manager should know about environmental issues in business. S/U or letter grading.

M247. Intellectual Property for Technology Entrepreneurs and Managers. (2) (Same as Electrical and Computer Engineering M293.) Seminar, two hours; outside study, four hours. Introduction to intellectual property (IP) in context of technology products and markets. Topics include best practices to put in place before product development starts, how to develop high-value patent portfolios, patent licensing, offering IP as a competitive weapon, and how to defend IP. Topics include selected topics from open source software, trademarks, managing copyright in increasingly complex content ecosystems, and adopting IP strategies to globalized marketplaces. Includes case studies inspired by complex IP questions facing technology companies today. S/U or letter grading.

250D. Patterns of Problem Solving. (4) Lecture, three hours. Acquisition of strategies that enhance adaptive problem solving and real-time planning, based on findings from brain studies and cognitive research. Design of
tools to respond to emergent uncertainties and to address situations where intense pressures of time and cost are present. Letter grading.

252. Persuasion and Influence. (4) Lecture, three hours. Required course; course 409. Designed for individuals interested in improving their ability to persuade and influence others. Consideration of number of well-studied persuasion and influence strategies that result in greater buy-in for one’s ideas, initiates, proposals, products, and requests. Letter grading.

254. Incentives and Motivation in Organizations. (4) Lecture, three hours. Course 254 is open to MBA, EMBA, and FEMBA students. Focus on strategic management of employee motivation. Development of theories and tools that help students to excel in communicating their vision, inspiring and gaining commitment from stakeholders, and impressing interviewers and investors. Course materials are grounded in empirical research. Skills and techniques learned are broadly generalizable. Experiential exercises to enhance students’ abilities in oral and written communications. Letter grading.

259. Performance Management. (2) Lecture, three hours. Focus on understanding how to use performance reporting and communication tools and skills that can be applied to reward systems for different types of organizations and for different types of employees. Analysis of issues and actions with experts in human resource management and compensation practices to develop skills needed to design and implement optimal reward systems for organizations. S/U or letter grading.

265. Leadership and Ethics. (4) Lecture, three hours. Series of real-life business situations that pose complex problems of leadership and ethics, so students develop better understanding of how they can successfully address business situations that define their leadership and ethical positions. Letter grading.

269. Performance Management. (2) Lecture, three hours. Focus on understanding how to use performance reporting and communication tools and skills that can be applied to reward systems for different types of organizations and for different types of employees. Analysis of issues and actions with experts in human resource management and compensation practices to develop skills needed to design and implement optimal reward systems for organizations. S/U or letter grading.

261B. Global Marketing Management. (4) Lecture, three hours. Required course; 411. Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods. Letter grading.

262. Price Policies. (4) Lecture, three hours. Required course; 411. Consideration of environment of pricing decision—costs, customer, channels, competition, and cost-benefit analysis. Methods and tools required to develop pricing policies that assure major returns. May be repeated for credit. S/U or letter grading.

270C. Web Business. (4) Lecture, three hours. Doing business on Web, Web infrastructure and ecology, Web business models and strategies, Web business development, operation, and marketing. New frontiers, such as Web services, social networking, and semantic Web. S/U or letter grading.

271A. Medtech Innovation I: Prototyping and New Venture Development. (Same as Bioengineering M233B ) Lecture, three hours; outside study, nine hours. Required course; 411. Study of graduate and professional students in engineering, dentistry, design, law, management, and medicine. Focus on understanding how to identify unmet clinical needs, properly filtering through these needs using various acceptance criteria, and selecting promising needs for which potential medtech solutions are explored. Students work in groups to expedite traditional research and development processes to invent and implement new med-tech devices that increase quality of clinical care and result in improved patient outcomes in hospital system. Introduction to intellectual property basics and various medtech business models. Letter grading.

271B. Medtech Innovation II: Prototyping and New Venture Development. (Same as Bioengineering M233B ) Lecture, three hours; outside study, nine hours. Required course; 411. Study of graduate and professional students in engineering, dentistry, design, law, management, and medicine. Development of medtech solutions for unmet clinical needs that are not clearly identified in course M271A. Letter grading.

273. Current Topics in Entertainment, Media, and Sports. (2) Seminar, two hours. Designed for graduate students. Examination in depth of current issues in entertainment, media, and sports. Topics vary. May be repeated for credit. S/U or letter grading.

275. Current Topics in Emerging Technologies and Markets. (2) Seminar, two hours. Designed for graduate students. Examination in depth of current issues in emerging technologies and related market developments. Topics vary. May be repeated for credit. S/U or letter grading.

277A-277B. Real Estate Finance Law. (1 to 8) (Same as Law M209) Lecture, three hours. Concentrated study of real estate financing law by focusing on fundamentals from both national and California perspectives. Topics include California deed of trust, installment land contracts and other mortgage substitutes, assignments of rents, receivables, prepayment, foreclosure, priorities, California antideficiency legislation, impact of borrower bankruptcy on mortgage lenders, construction lending, future advances lending, and secondary market. Concurrently scheduled with Law 209. In Progress (277A) and S/U or letter (277B) grading.

278B. Cases in Real Estate Investments. (4) Lecture, three hours. Required courses: 408, 430. Development of understanding of principal issues involved in real estate investment and finance. Topics include real estate financial analysis and valuation in variety of contexts (single and multifamily residential, commercial/industrial, shopping center, and hotel properties), real estate taxation, real estate development process, securitization, REITs, and leasing and workout of troubled properties. S/U or letter grading.

279A. Entrepreneurial Real Estate Development. (4) Lecture, three hours. Required courses: 278A (or 278B), 408, 430. Introduction to various aspects of real estate development from perspectives of entre-

293C. Ethical Considerations in Business. (4) Lecture, three hours. Examination of ethical considerations in business decisions involving the individual, corporation, society, and international business. Analysis of cases for classroom presentation and discussion. S/U or letter grading.

294. Law and Economics Workshop. (2 or 3) Seminar, two hours. Requisite: course 405 or Economics 201A. Knowledge of empirical methods and basic calculation required. Interdisciplinary speaker series on legal topics and related empirical research in economics. Topics include contracts, torts, intellectual property, and business law. Students write grade-reaction papers. May be repeated for credit. Concurrently scheduled with Economics 206 and Law 648. S/U or letter grading.

295A. Entrepreneurship and Venture Initiation. (4) Exploration in entrepreneurship particularly concerned with the development of new product or process developments, and effective new venture management in a corporate context. S/U or letter grading.

295C. Corporate Entrepreneurship. (4) Inquiry into nature of entrepreneurship and effective implementation of entrepreneurial strategies in large industrial enterprises. Emphasis primarily on managerial effects aimed at identification, development, and exploitation of technical and organizational innovations, management of new product or process developments, and effective new venture management in a corporate context.

295F. Social Entrepreneurship. (4) Lecture, three hours. Exposes future change leaders to diverse business models for social impact and to fundamental opportunities and challenges of scaling, managing, and scaling enterprises with social mission. Through lectures, readings, case studies, speakers and research project, exploration of competitive advantages and barriers, and different approaches to creating social impact across sectors—private/for profit, public, and nonprofit. Introduction of frameworks for understanding and analyzing problems facing society and cultivation of critical thinking skills to identify diverse ways to address those problems through sustainable programs and enterprises. Letter grading.

296. Social Impact Consulting. (2) Lecture, three hours. Builds skills and competencies of students interested in field of social impact consulting. Through lectures, readings, videos, speakers, and consulting project with social impact organization, students learn and then apply key consulting skills—both consulting-focused and client management, and nonprofit-focused, such as governance and strategy, impact measurement, and sources of funding. Readings and discussion expose students to best practices in the field and provide the chance to work on consulting projects.

297C. International Business Law. (4) Requisite: courses 205A, 296A. Legal environments in which international business operates, including business relationships and organizations; antitrust, taxation, transfer of capital, and technology regulations; patents, trademark, and copyright safeguards; arbitration of international disputes; origins of foreign investments; international business and government relations.

297D. International Business Negotiations. (4) Requisite: course 296A. Exploration of international business negotiations of multinational enterprises with governmental agencies and foreign-based firms on a wide range of issues, such as establishment/dissolution of joint ventures, extent of foreign ownership/management control, tax conditions for technology transfer, investment incentives.

297E. Business and Economics in Emerging Markets. (4) Lecture, three hours. Requisite: course 205A or equivalent. Analysis of key aspects of business environment, such as economic, demographic, and sociocultural conditions in developing countries as they affect the business environment. Process of economic growth, market-oriented reforms, and creation of domestic capital markets. Inflation and stabilization programs, identification of business risks and opportunities, as well as tools needed to manage firms under these conditions. S/U or letter grading.

298D. Special Topics in Management. (4) Lecture, three hours. Designed for graduate students. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. Letter grading.

298E. Special Topics in Management. (2) Lecture, ninety minutes. Designed for graduate students. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. Letter grading.

298F. Special Topics in Management. (1) Lecture, one hour. Designed for graduate students. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. S/U grading.

298G. Special Topics in Management. (4) Lecture, three hours. Designed for graduate students. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. S/U grading.

298H. Special Topics in Management. (2) Lecture, ninety minutes. Designed for graduate students. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. S/U grading.

298I. Special Topics in Management. (1) Lecture, one hour. Designed for graduate students. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

406. Global Macroeconomy. (4) Lecture, three hours. Requisites: courses 402, 403, 405. Provides analytical framework required for understanding ways changing macroeconomic conditions in world economy affect economic growth, inflation, exchange rates, unemployment, and trade account. Provides skills to
enable students to assess critically how developments in world economy affect particular industry environments. Letter grading.

407. Business Analytics with Spreadsheets. (4) Lecture, three hours, Requisite course 402. Introduction to uses of analytical methods for making strategic, tactical, and operational decisions arising from accounting, finance, marketing, and production, with focus on problem solving; terminology, problem definition, spreadsheet model formulation, alternatives evaluation. Letter grading.

422. Analysis and Communications. (4) Discussion, three hours. Designed for graduate students. Study and practice of written and oral management communications, with focus on students' written communications and oral presentations.

424. Strategic Business Presenting. (2) Lecture, one hour; fieldwork, one hour. Four-term course. Faculty-guided portfolio-management implementation. Back testing of investment strategy. Visits to portfolio management firms to gain expert guidance. In Progress grading (credit to be given only on completion of courses 457C, 457D).

457B. Fieldwork in Investment Management. (2) Seminar, two hours; fieldwork, one hour; Four-term course. Faculty-guided portfolio-management implementation. Back testing of investment strategy. Visits to portfolio management firms to gain expert guidance. In Progress grading (credit to be given only on completion of courses 457C and 457D).

457C. Fieldwork in Investment Management. (2) Seminar, two hours; fieldwork, one hour. Four-term course. Monitoring of implemented strategy. Documentation and analysis of portfolio performance. Development of new strategy for incoming class. In Progress grading (credit to be given only on completion of course 457D).

457D. Fieldwork in Investment Management. (2) Seminar, two hours; fieldwork, one hour. Four-term course. Culmination and transition of portfolio management project. Formal presentation of new strategy to incoming class and delivery of annual report. Trains in focus on individual student presentations. Letter grading.

457. Leadership Communication. (4) Lecture, three hours. Study centers on communicative dimensions of leadership, executive presence, and persuasion. Frameworks allow for emerging and current leaders to excel in presenting sticky messages to investors, executives, boards, clients, and others. Hands-on nature of course allows for considerable communication practice. Student presentations are videotaped and analyzed. Topics include communicating with executive presence, strategic networking, designing compelling messages in both written and spoken forms, and persuasive tools, which may be appropriate to securing money requirements or ideas. Letter grading.

458B. Global Immersion: Two-Quarter Plan. (2–2) Emerging Enterprises: 458A, lecture, three hours; presentations, sites visits, and discussion, 20 hours; for course 458B: fieldwork, three hours; presentations, sites visits, and discussion, 20 hours. Course 458A is enforced requisite to 458B. Taught in English. Designed for MBA, EMBA, FEMBA, and GEMBA students. Four on-campus academic sessions and one intensive week in another country for blend of lectures, guest speakers, panel discussions, and company site visits. Focus on doing business in other countries. Exposure to economy, legal and political environment, major industries and businesses, local culture, key historical events, and many aspects of conducting business outside U.S. Taught by school faculty members in conjunction with courses by faculty members from top institutional partners, as well as local and regional government officials and ministers, local business executives, and influential leaders from country of focus. May be repeated for credit based on program requirements. In Progress (458A) and letter (458B) grading.

459E. International Exchange. (2 to 4) Lecture, 15 hours; discussion and assignments, up to 30 hours (2-unit course). Preparation: completion of first-year core courses. Taught in English. Open to EMBA and FEMBA students. Intensive one-week study at international universities and institutions in destination country. Topics vary but are tailored to MBA curriculum. S/U or letter grading.

460A-D. Managing Finance and Financing Emerging Enterprises. (2–2) Lecture, three hours. Course 460A is enforced requisite to 460B. Designed for second-year graduate students. Emphasis on financial, control, and investment issues confronting rapidly growing companies in entrepreneurial settings. Consideration and selection of financing vehicles that may be appropriate to securing money requirements of organizations. In Progress (460A) and letter (460B) grading.

466B. Advanced Financial Policy for Managers. (4) Lecture, four hours. Limited to Executive MBA program students. Modern financial management deals with decision making for corporate financial management, portfolio investment decisions, financial institutions, and international financial management. Focus on learning sound theoretical tools and applying them in casework. S/U or letter grading.

468. Macroeconomics and Economic Forecasting. (4) Lecture, four hours. Limited to Executive MBA program students. Macroeconomic theory and its application to business forecasting. Major economic indicators and their historical development in the U.S. economy; theoretical tools that business economists use to analyze impacts of monetary and fiscal policy; macroeconomic techniques applicable to business decisions. S/U or letter grading.

472B. Customer Information Strategy. (4) Lecture, four hours. Limited to Executive MBA program students. Exploration of innovation and marketing of products and services to customers. Use of creativity tools, customer research, and marketing science to create value and allocate resources so as to maximize revenues and profits that result. S/U or letter grading.

479E. International Exchange: Executive MBA Pro- gram. (2 to 4) Lecture, three hours; discussion and site visits, 20 hours. Preparation: completion of first-year core courses in Executive MBA program. Intensive one-week program in one foreign country, with coursework taught by faculty from their institutions in destination country. Topics vary but are tailored to MBA curriculum, including but not limited to finance, marketing, global economics, strategy, human resources, operations, and technology management. Exposure to local business practices, company site visits, and exploration of local cultural and historical sites. S/U or letter grading.

481A-481B. Negotiations Behavior. (2–2) Lecture, three hours. Course 481A is enforced requisite to 481B. Limited to Global Executive MBA students. Presentation of theoretical principles and concepts from psychology, sociology, and economics through lectures and readings, with focus primarily on improving practical negotiating skills through experiential learning (i.e., negotiations simulations). Participants learn to enhance their individual abilities in dynamic and ambiguous situations and to analyze and arrive at the most effective application of these skills. In Progress (481A) and letter (481B) grading.

484A-484B. Management of Technology and Innovation. (2–2) Lecture, three hours. Course 484A is enforced requisite to 484B. Limited to Executive MBA students. Problems of managing technological innovation in Asia. Topics include incorporation of traditional consideratio into strategy, adoption of technological innovation, promoting innovation through organizational design and leadership, e-business, and m-business. In Progress (484A) and letter (484B) grading.

495. Corporate Entrepreneurship. (4) Lecture, three hours. Managerial efforts aimed at identification, development, and exploitation of technical and organizational innovations, management of new product or process developments, and effective new venture management in context of large corporations in manufacturing and service industries. Development of awareness and understanding of range, scope, and potentiality of issues related to organizational environment that is supportive of entrepreneurial endeavors, and insight concerning effective implementation of technological and organizational innovations in corporate settings. Letter grading.

488. Business Plan Development. (4) Lecture, four hours. Enforced requisites: courses 487A, 487B. Limited to Executive MBA program students. How to develop business plans, understanding of analytical processes required to produce plans, improvement of student writing and oral presentation skills, and review of business plans of other entities. Writing of one complete business plan and presentation of it to experienced investors. Letter grading.

489. Entrepreneurship and Venture Initiation. (4) Lecture, 90 minutes. Limited to Executive MBA program students. Introduction to basic tools and jargon required for entrepreneurial financing or management of intellectual property. Terminology used by lawyers, accountants, venture capitalists, and other investors when forming and financing new companies. Assessment of feasibility of business concept and communication of concept to potential investors, employees, and business partners. S/U or letter grading.

495. Teaching Assistant Training Seminar. (4) Seminar, three hours. Preferred as teaching assistant, associate, or fellow in Anderson-based course. Required of all new teaching apprentices. Designed to prepare students for graduate-level teaching and provide practical teaching assistant training. Discussion of practical and theoretical issues about teaching in graduate business school. Emphasis on adult learning theory and pedagogy, theory versus practice in business, and electronic data interchange.
Management—Executive MBA

Graduate Courses

405. Economic Analysis for Managers. (4) Limited to Executive MBA program students. Policy-oriented problems in antitrust, tax securities, and environmental regulation. Concepts of microeconomic theory illustrated in topics such as antitrust regulation, new trends in antitrust, private versus government antitrust, securities regulation, environmental regulations, and a business firm’s optimal response to regulation. S/U or letter grading.

406. Financial Policy for Managers. (4) Lecture, four hours. Limited to Executive MBA program students. Modern financial management deals with decision making under uncertainty for corporate financial management, portfolio investment decisions, financial institutions, and international financial management. Focus on learning sound theoretical tools and applying them in coursework. S/U or letter grading.

409. Organizational Behaviors. (4) Lecture, three hours. Limited to Executive MBA program students. Introduction to organizational behavior for executives, including but not limited to optimal decision making, fostering motivation, and other topics on psychology of leadership. Lecture, discussion, and experiential applications of course concepts. S/U or letter grading.

411. Marketing Strategy and Policy. (4) Lecture, four hours. Limited to Executive MBA program students. Strategic marketing decisions, including development of marketing objectives and strategies and implementation of these strategies through pricing, channel, promotion, and new product decisions. S/U or letter grading.

414A. Leadership Foundations I. (2) Lecture, two hours. Limited to Executive MBA program students. Focus on individual problem-solving and decision-making skills. Alternative conceptual frameworks presented for augmenting diagnostic and decision-making skills of individuals. Emphasis on decision simulations, and discussions to explore areas of charting job and career progress, working with others, and shaping work culture. S/U or letter grading.

414B. Leadership Foundations II. (1) Lecture, one hour. Limited to Executive MBA students. Continuation of course 414A, with focus on development of self-assessment and self-reflection skills. Facilitation of self-evaluation of leadership strengths and weaknesses, with emphasis on individual peer coaching, conflict management, individual goal setting, and goal achievement. Readings, cases, decision simulations, peer coaching, and discussions. In Progress grading (credit to be given only on completion of course 414C).

414C. Leadership Foundations III. (1) Lecture, one hour. Limited to Executive MBA program students. Continuation of course 414C. Examination of leadership strengths and weaknesses, with emphasis on individual leadership and organizational change. Readings, cases, decision simulations, peer coaching, and discussions. In Progress grading (credit to be given only on completion of course 414D).

414E. Leadership Foundations IV. (1) Lecture, one hour. Limited to Executive MBA program students. Continuation of course 414D. Examination of leadership strengths and weaknesses, with emphasis on individual leadership and organizational change. Readings, cases, decision simulations, peer coaching, and discussions. In Progress grading (credit to be given only on completion of course 414E).

420. Competitive Strategy and Business Policy. (4) Limited to Executive MBA program students. Study of general management tools for forging a corporate competitive strategy. Emphasis on economics of business rivalry within a variety of industrial settings and implications of changes in competition. S/U or letter grading.

421. International Business Residential. (4) Seminar, six hours. Limited to Executive MBA program students. Continuation of course 414E. Examination of leadership strengths and weaknesses, with emphasis on individual leadership and organizational change. Readings, cases, decision simulations, peer coaching, and discussions. In Progress grading (credit to be given only on completion of course 414F).

422. Leadership in Practice. (4) Lecture, six hours. Limited to Executive MBA program students. Examination of problems and issues in area of current concern in management. S/U or letter grading.

423. Selected Topics in Management. (4) Seminar, six hours. Limited to Executive MBA program students. Examination of selected problems and issues in area of current concern in management. Letter grading.

424. Selected Topics in Management. (4) Seminar, six hours. Limited to Executive MBA program students. Examination of selected problems and issues in area of current concern in management. Letter grading.

Management—Full-Time MBA

Graduate Courses

401A-401B. Foundations of Inclusive Leadership. (1–1) Lecture, limited hours. Course 401A is requisite to 401B. Designed to increase student knowledge of, and competency in, leadership. Conceptual framework is grounded in principles of individual, group, and organizational behavior. Offers different perspectives on topics of leadership, with emphasis on. S/U or letter grading.

405. Managerial Economics. (4) Lecture, three hours. Designed for graduate students. Analysis of consumer, producer, and market behavior. Market structure, pricing, and resource allocation. Applications to managerial strategy and public policy, with emphasis on relationships among individuals, groups, and organizational units as they influence managerial process and development of prospective general managers. Letter grading.

410. Operations Technology Management. (4) Lecture, three hours. Requisites: courses 402, 403. Principles and decision analysis related to effective utilization of facilities in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, facilities design, and design of control systems for production operations. Letter grading.

420. Business Strategy. (4) Lecture, three hours. Fieldwork, eight hours. Must be taken in second year (or its equivalent for part-time students). Supervised study of an organization, including client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. Letter grading.

421A. Communication Development for Leaders. (2) Lecture, three hours. Course 421A is requisite to 421B. Focus on communication basics and tailored to students’ needs—entrepreneurship, interpersonal communications, or public speaking. Students learn skills required to become successful presenter; how to present differing types of materials, apply communication theory and strategy to organize informative and persuasive content, deliver presentations to varied audiences; how to apply visual and verbal reasoning and how to analyze audiences, organize and manage messages for maximum persuasive impact, and communicate these messages in persuasive manner. Letter grading.

421B. Communication Development for Leaders II. (2) Lecture, three hours. Requisite: course 421A. Focus on providing tools and skills that allow students to excel in communicating their vision, inspiring and gaining commitment from stakeholders, and impressing interviewers and investors. Course materials are grounded in empirical research. Skills and techniques learned are broadly generalizable. Experiential exercises to enhance students’ abilities in oral and written communications. Study builds on managerial communication skills developed in Communication Development for Leaders (course 421A). Letter grading.

422. Applied Management Research. (B) Fieldwork, eight hours. Must be taken in second year (or its equivalent for part-time students). Supervised study of an organization, including client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. Letter grading.

423A. Introduction to Applied Management Research. (2) Lecture, two hours. Limited to full-time MBA program students. Must be taken after completion of first year in program. Projects include: (1) faculty-guided consulting project with private companies, nonprofit organizations, or government agencies; (2) establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development of comprehensive business plan, and formal presentation of findings and recommendations or (2) faculty-guided implementation of new business (3) pursuit of one faculty-led special research project worthy of publication in recognized academic research journal. In Progress (423B) and S/U or letter (423C) grading.

425B–425C. Applied Management Research: Two-Quarter Plan. (4–4) Fieldwork, four hours. Limited to full-time MBA program students. Must be taken after completion of first year in program. Projects include: faculty-guided consulting project with private companies, nonprofit organizations, or government agencies; establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development of comprehensive business plan, and formal presentation of findings and recommendations or (2) faculty-guided implementation of new business (3) pursuit of one faculty-led special research project worthy of publication in recognized academic research journal. In Progress (423B) and S/U or letter (423C) grading.

426. Fieldwork in Organizations. (4) Fieldwork, to be arranged. Preparation: completion of at least two terms of MBA program. Required of all full-time MBA students. Under direction of MBA program senior associate dean or other supervising faculty advisor, students perform supervised practical experience or fieldwork in organization as intern or fellow. Execution of predetermined assignment(s) pursuant to defined program of study that includes reporting and assessment of fieldwork experience through combination of written or oral presentations and may include preparation of evaluations or consulting report correlating to defined program of study. S/U grading.

428A–428B. Business Strategy Capstone. (6–4) Lecture, three hours; fieldwork, three hours. Limited to full-time MBA program students. Designed for students interested in launching their own business. Students work closely with a faculty advisor to develop comprehensive strategy for launching that business. Fulfills MBA comprehensive examination requirement. In Progress (428A) and letter (428B) grading.

Management–Fully Employed MBA Graduate Courses

401. Leadership Foundations. (2) Lecture, three hours. Designed to enhance student knowledge of, and competency in, leadership. Conceptual framework is grounded in principles of individual, group, and organizational behavior. Offers different perspectives on topic of leaderships, with emphasis on development of skills that support effective leadership in diverse situations. Combination of readings, lectures, cases, experiential exercises, and class discussion allows entering MBA students to determine their own leader strengths and limitations; and to develop plan for maintaining or improving their strengths and identifying potential challenges. Letter grading.

402. Data and Decisions. (4) Lecture, three hours. Topics include probabilities, random variables (expectation, variance, covariance, normal random variables), decision trees, estimation, hypothesis testing, and multiple regression models. Emphasis on actual business problems and data. Letter grading.

408. Foundations of Finance. (4) Lecture, three hours. Fieldwork, three hours. Requisites: courses 402, 403. Principles and decision analysis related to effective utilization of facilities in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, facilities design, and design of control systems for production operations. Letter grading.

410. Operations Technology Management. (4) Lecture, three hours. Requisites: courses 402, 403. Principles and decision analysis related to effective utilization of facilities in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, facilities design, and design of control systems for production operations. Letter grading.

420. Business Strategy. (4) Lecture, three hours. Fieldwork, eight hours. Must be taken in second year (or its equivalent for part-time students). Supervised study of an organization, including client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. Letter grading.

421A. Communication Development for Leaders. (2) Lecture, three hours. Course 421A is requisite to 421B. Focus on communication basics and tailored to students’ needs—entrepreneurship, interpersonal communications, or public speaking. Students learn skills required to become successful presenter; how to present differing types of materials, apply communication theory and strategy to organize informative and persuasive content, deliver presentations to varied audiences; how to apply visual and verbal reasoning and how to analyze audiences, organize and manage messages for maximum persuasive impact, and communicate these messages in persuasive manner. Letter grading.

421B. Communication Development for Leaders II. (2) Lecture, three hours. Requisite: course 421A. Focus on providing tools and skills that allow students to excel in communicating their vision, inspiring and gaining commitment from stakeholders, and impressing interviewers and investors. Course materials are grounded in empirical research. Skills and techniques learned are broadly generalizable. Experiential exercises to enhance students’ abilities in oral and written communications. Study builds on managerial communication skills developed in Communication Development for Leaders (course 421A). Letter grading.

422. Applied Management Research. (B) Fieldwork, eight hours. Must be taken in second year (or its equivalent for part-time students). Supervised study of an organization, including client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. Letter grading.

401. Leadership Foundations. (2) Lecture, three hours. Designed to enhance student knowledge of, and competency in, leadership. Conceptual framework is grounded in principles of individual, group, and organizational behavior. Offers different perspectives on topic of leaderships, with emphasis on development of skills that support effective leadership in diverse situations. Combination of readings, lectures, cases, experiential exercises, and class discussion allows entering MBA students to determine their own leader strengths and limitations; and to develop plan for maintaining or improving their strengths and identifying potential challenges. Letter grading.

402. Data and Decisions. (4) Lecture, three hours. Topics include probabilities, random variables (expectation, variance, covariance, normal random variables), decision trees, estimation, hypothesis testing, and multiple regression models. Emphasis on actual business problems and data. Letter grading.

408. Foundations of Finance. (4) Lecture, three hours. Fieldwork, three hours. Requisites: courses 402, 403. Principles and decision analysis related to effective utilization of facilities in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, facilities design, and design of control systems for production operations. Letter grading.

410. Operations Technology Management. (4) Lecture, three hours. Requisites: courses 402, 403. Principles and decision analysis related to effective utilization of facilities in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, facilities design, and design of control systems for production operations. Letter grading.

420. Business Strategy. (4) Lecture, three hours. Fieldwork, eight hours. Must be taken in second year (or its equivalent for part-time students). Supervised study of an organization, including client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. Letter grading.
Management – Global Executive MBA Asia Pacific Graduate Courses

402A-402B. Business Creation Capstone. (6–4) Lecture, three hours; fieldwork, three hours. Limited to fully employed MBA program students. Designed for students interested in launching their own business. Student teams work on business idea and develop comprehensive strategy for launching that business. Fulfills FEMBA comprehensive examination requirement. In Progress (402A) and letter (402B) grading.

404. Negotiations Behavior. (4) Lecture, three hours. Presentation of theoretical principles and concepts from psychology, sociology, and economics through lectures and readings, with focus primarily on improving practical negotiating skills through experiential learning (i.e., negotiations simulations). Participants learn to enhance their individual abilities in dyadic and group situations and to analyze contexts for most effective application of these skills. Letter grading.

406. Strategic Leadership and Implementation. (4) Formerly numbered 406A. Lecture, three hours. Designed to address several fundamental aspects of leading complex organizations, with emphasis on important tasks of developing well-aligned, high-performance organizations and on challenges of leading change in organizations. Enables students to develop organized point of view on strategic leadership and to increase their awareness of themselves as leaders. Letter grading.

407A-407B. Entrepreneurship and Venture Initiation I, II. (2–2) Lecture, 90 minutes. Course 407A is requisite to 407B. Limited to UCLA-NUS Executive MBA program students. Introduction to basic tools and jargon of entrepreneurship that underlies new organization creation and the evaluation of new business ideas. Fulfills FEMBA comprehensive examination requirement. In Progress (407A) and letter (407B) grading.

408. Fixed-Income Markets. (4) Lecture, three hours. Limited to Master of Financial Engineering program students. Quantitative and computational tools used in finance, including numerical techniques such as implementation of binomial and trinomial pricing, lattice algorithms for computing derivative prices, interest rate models, simulation-based algorithms for pricing American options, and numerical solution of partial differential equations that appear in financial engineering. S/U or letter grading.

410A. Logistics and Operations Management. (2) Formerly numbered 410). Lecture, three hours. Limited to UCLA-NUS Executive MBA program students. Analysis of strategic and operating policies and decision-making systems that produce goods and services. Examination of role of comprehensive planning, inventories, scheduling of resources, distribution systems, and system location. Comprehensive operating problems. Letter grading.

410B. Logistics and Operations Management. (2) Lecture, three hours. Limited to UCLA-NUS Executive MBA program students. Analysis of strategic and operating policies and decision-making systems that produce goods and services. Examination of role of comprehensive planning, inventories, scheduling of resources, distribution systems, and system location. Comprehensive operating problems. Letter grading.

411. Management of Technology and Innovation. (4) Lecture, three hours. Problems of managing technological innovation in Asia. Topics include incorporation of technological consideration into strategy, adoption of technological innovation into technological processes through organizational design and leadership, e-business, and m-business. Letter grading.

412. Selected Topics in Management. (4) Seminar, six hours. Limited to UCLA-NUS Executive MBA program students. Examination of selected problems and issues in area of current concern in management. Letter grading.

415. Corporate Finance. (4) Lecture, six hours. Limited to UCLA-NUS Executive MBA program students. Examination of selected problems and issues in area of current concern in management. Letter grading.

Management – Master of Financial Engineering Graduate Courses

403. Stochastic Calculus. (4) Lecture, three hours. Limited to Master of Financial Engineering program students. Economic, statistical, and mathematical foundations of derivatives and contingent and continuous-time paradigms used in derivatives finance, including introduction to stochastic processes, stochastic differential equations, Ito’s lemma, and key elements of stochastic calculus, including Brownian motion, and applications of it to financial decision problems such as portfolio selection. Letter grading.
Management—Master of Science in Business Analytics

Graduate Courses

402. SQL and Basic Data Management. (2) Lecture, three hours. Limited to Master of Science in Business Analytics students. Introduction to and practice in Structured Query Language and construction of data definitions, data manipulation, and data controls in relational databases using MySQL and important concepts of data management including data analysis and modeling for relational database management systems (RDBMS). Letter grading.

408. Operations Analytics. (4) Lecture, three hours. Limited to Master of Science in Business Analytics students. Application of operations analytics to examine competitive conditions in industry or market. S/U or letter grading.

411. Fieldwork/Research in Business Analytics. (4) Fieldwork, to be arranged. Preparation: completion of one term of MFE program. Limited to Master of Financial Engineering program students. Supervised, nonpaid practical research experience or fieldwork assignment as intern or fellow. Execution of predetermined assignment(s) pursuant to defined program of study that may include formal coursework. May not be applied toward MFE degree requirements. S/U grading.

412. Trading, Market Frictions, and FinTech. (4) Lecture, three hours. Examination of financial market infrastructure and mechanism of price formation and discovery. Development and development of different perspectives on critical phenomena such as bubbles and crashes, short squeezes, and mutual fund runs. Case studies of FinTech unicorns demonstrate how those firms profit from resolving market frictions and how recent technology changes landscape of trading. Discussion of new implications of these technological advancements in stock market (i.e., high-frequency trading) and alternative markets (i.e., bond market and cryptocurrency market). Letter grading.

415A–415B. Career Development Series. (2 to 4) Lecture, three hours. Career search process requires active engagement on part of job candidate. Preliminary action is self-assessment, recognizing and valuing one’s own strengths and skills to present oneself to employers as top candidate for target roles. Students identify industry and employers that are aligned with their career goals and utilize career strategies covered, including presenting oneself professionally, networking, strong application documents (résumé, cover letter, e-mail, etc.), and availability to communicate their value, during internship process. S/U or letter grading.

431. Special Topics in Financial Engineering. (2 to 4) Lecture, three hours. Limited to Master of Financial Engineering program students. In-depth examination of problems or issues in one area of current concern in financial engineering. May be repeated for credit. S/U or letter grading.

432. Entertainment Analytics. (2) Lecture, three hours. Limited to Master of Science in Business Analytics students. Focuses on strategic and tactical issues that come up after foundational training, specifically those related to customer acquisition and customer retention. Introduction of analytics frameworks, data structures, and models needed to support best practices around these issues. S/U or letter grading.

433. Entertainment Analytics. (2) Lecture, three hours. Limited to Master of Science in Business Analytics students. Focuses on strategic and tactical issues that come up after foundational training, specifically those related to customer acquisition and customer retention. Introduction of analytics frameworks, data structures, and models needed to support best practices around these issues. S/U or letter grading.

434. Advanced Workshop on Machine Learning. (2) Lecture, three hours (five weeks). Limited to Master of Science in Business Analytics students. Introduction to business analytics and data science. Topics: statistics, machine learning, and data science. Focus on building models and understanding model performance in real-world settings. Students hone their communication skills by delivering a talk about both industry investment needed to produce and disseminate content, and how revenues are being extracted covered at each stage. S/U or letter grading.

435. Data Visualization. (2) Lecture, three hours (five weeks). Limited to Master of Science in Business Analytics students. Focuses on strategic and tactical issues that come up after foundational training, specifically those related to customer acquisition and customer retention. Introduction of analytics frameworks, data structures, and models needed to support best practices around these issues. S/U or letter grading.

436. Fraud Analytics. (2) Lecture, three hours (five weeks). Limited to Master of Science in Business Analytics students. Focuses on strategic and tactical issues that come up after foundational training, specifically those related to customer acquisition and customer retention. Introduction of analytics frameworks, data structures, and models needed to support best practices around these issues. S/U or letter grading.

437. Forecasting and Time Series. (2) Lecture, three hours (five weeks). Limited to Master of Science in Business Analytics students. Focuses on strategic and tactical issues that come up after foundational training, specifically those related to customer acquisition and customer retention. Introduction of analytics frameworks, data structures, and models needed to support best practices around these issues. S/U or letter grading.

438. Industry Seminar II. (2) Seminar, 90 minutes to three hours. Required of Master of Science in Business Analytics students. Industry guest speaker presentations. S/U or letter grading.

439. Fraud Analytics. (2) Lecture, three hours (five weeks). Limited to Master of Science in Business Analytics students. Focuses on strategic and tactical issues that come up after foundational training, specifically those related to customer acquisition and customer retention. Introduction of analytics frameworks, data structures, and models needed to support best practices around these issues. S/U or letter grading.

Management—PhD Graduate Courses

200. Economics of Decision. (4) Discussion, three hours. Preparation: basic probability theory. Basics of single-person decision theory and introduction to non-cooperative game theory. Examination in some detail of von Neumann/Morgenstern expected utility theory. Other topics in decision theory include subjective expected utility theory and departures from expected utility theory and departures from expected utility theory. S/U or letter grading.

202A-202B-202C. Accounting Workshops. (1–1–2) Seminar, three hours. Recommended requisites: course 201A. Designed for PhD students. Introduction to topics and issues of modern accounting research. S/U or letter grading.

209A-209B-209C. Management Strategy and Policy Workshops. (1–1–2) Lecture, three hours. Designed for PhD students. Intended to develop ability to critically evaluate research in fields relevant to study of management strategy and policy. Papers presented in colloquium format by leading scholars in management strategy and policy. Active participation and intellectual interchange encouraged through discussion of papers during colloquium. May be repeated for credit. S/U or letter grading.

213. Introduction to Multivariate Analysis. (4) Lecture, three hours. Designed for PhD students. Survey course to (1) lay foundations for more advanced study of multivariate analysis models; (2) present exploratory models (e.g., principal axes and factor analysis); (3) present confirmatory factor models. S/U or letter grading.

233. Introduction to Multivariate Analysis. (4) Lecture, three hours. Course 236A is requisite to 236B. Designed for PhD students in their second through fourth year. Intended to help students bridge gap between coursework and research. Students select academic topic for presentation, and develop and present talk. To be presented in colloquium format by leading scholars in accounting, finance, and organizational behavior. S/U or letter grading.

260A-260B-260C. Research Seminars: Management and Organizational Behavior. (1–1–2) Seminar, two hours. Designed for PhD students. Development of ability to critically evaluate research in fields relevant to study of problems or issues of current concern in management and organizational behavior. Papers presented in colloquium format by leading scholars in organizational behavior. Active participation and intellectual interchange encouraged through discussion of papers during colloquium. May be repeated for credit. S/U or letter grading.

270A-270B-270C. Workshops: Marketing. (1–1–2) Lecture, three hours. Required of all students during first two years of their PhD work. Series consists of number of leading scholars in marketing and related disciplines who make presentations to faculty and PhD students. Active participation and intellectual interchange that helps students gain rich perspective on field of study. In Progress (207A, 207B) and S/U or letter (207C) grading.

290A-290B-290C. Management Strategy and Policy Workshops. (1–1–2) Lecture, three hours. Designed for PhD students. Intended to develop ability to critically evaluate research in fields relevant to study of management strategy and policy. Papers presented in colloquium format by leading scholars in management strategy and policy. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U or letter grading.

291. Network Flows and Integer Programming. (4) Lecture, three hours. Lecture, two hours. Linear programming Survey course to (1) lay foundations for more advanced study of graphs, network flow models, and integer programming models and their applications; (2) establish connections between these technical foci and real problems drawn from many areas of management; and (3) build professional skills needed to apply these tools. S/U or letter grading.

292. Behavior under Uncertainty. (4) Lecture, three hours. Designed for PhD students. Exploration of foundational research and current controversies in behavioral literature on judgment and decision making under uncertainty. S/U or letter grading.

293. Introduction to Multivariate Analysis. (4) Lecture, three hours. Advanced course. Working knowledge of differential and integral calculus of several variables, basic probability theory, and univariate mathematical statistics. Introduction to use of multivariate models in management research to organize and represent information; interpretation of coefficients from multivariate exploratory models (e.g., principal axes and factor analysis models); survey of multivariate statistical procedures (e.g., multiple discriminance analysis, multivariate analysis of variance, canonical correlation, and confirmatory factor models). S/U or letter grading.

294. Special Topics in Accounting. (4) Lecture, three hours. Preparation: doctoral standing or consent of instructor. Examination in depth of topics in current interest in accounting, such as application of information economics and principal-agent model to accounting (S/U or letter grading).

237. Introduction to Financial Economics. (4) Lecture, three hours. Preparation: doctoral standing or consent of instructor. Introduction to empirical evidence and economic theory of asset pricing. Emphasis is on continuous time mathematics as applied to pricing of financial assets. S/U or letter grading.

238. Macroeconomics and Finance. (4) Lecture, three hours. Introduction to introduction to study of financial market systems. Emphasis is on continuous time mathematics as applied to pricing of financial assets. S/U or letter grading.

239. Empirical Asset Pricing. (4) Lecture, three hours. Focus on measuring and understanding risk premiums in financial markets. Study of evidence pertaining to pricing kernel and applied theoretical developments that are motivated by evidence. S/U or letter grading.

241A. Models for Operations Planning, Scheduling, and Control. (4) Lecture, three hours. Designed for PhD students with some knowledge of mathematical programming and stochastic processes. Foundations of operations planning, scheduling, and control, with emphasis on formal modeling and its applications. Aggregate planning, work force scheduling, inventory management, and operations planning and control. S/U or letter grading.

242. Special Topics in Decisions, Operations, and Technology Management. (4) Lecture, three hours. Designed for MSA and PhD students. Studies of advanced subjects of current interest in decisions, operations, and technology management. Emphasis on recent developments and management knowledge. Topics vary each term and have included strategy for information intensive industries, empirical research in operations management, analytical models and computerization of operations management in information economy, and models for medical management. May be repeated for credit with topic change. S/U or letter grading.

M243. Foundations of Organizational Behavior. (4) (Same as Psychology M222E.) Lecture, three hours. Designed for graduate students. Doctoral-level survey of classical and emerging theories and research in field of organizational behavior, with focus on micro-level topics related to individuals and interpersonal processes within organizations. Exploration of how individual behaviors, cognitions, and perceptions are affected by organizational context, structure, and culture. S/U or letter grading.

244. Advanced Studies in Organizational Behavior. (4) Lecture, three hours. Designed for graduate students. Doctoral-level survey of research literature assessing how organizations utilize human resources to enhance individual, group, and organizational effectiveness. Current theory and research in psychology, anthropology, organization behavior, and economics, including topics such as careers, participation, negotiations, and technology systems. S/U or letter grading.

245. Research in Organizations. (4) Seminar, three hours. Designed for graduate students. Doctoral-level seminar on major topics in the field of organizational behavior, with focus on macro-level organizational topics related to study of organizational systems and organizational environments. Topics may include demography, organizational change, organizational structure, and network. S/U or letter grading.
246. Theory in Marketing. (4) Lecture, three hours. Serves as mechanism to introduce students to development of marketing thought. Issues pertaining to general topics in marketing development are presented. Preparing students for conducting theoretically grounded research in marketing. S/U or letter grading.

247. Research in Marketing Management. (4) Lecture, three hours. Designed for PhD students. Study of research issues associated with marketing management decisions. Recent research in areas of strategic marketing, market segmentation, new product development and introduction, pricing strategies, channel policy, product decisions, and sales force management examined critically. Review of both quantitative and behavioral approaches to studying these issues. S/U or letter grading.

248. Quantitative Research in Marketing. (4) Lecture, three hours. Designed for PhD students in management and related fields. Students are assumed to have good background in marketing principles and to be familiar with probability, statistics, mathematical programming, and econometrics. Review of a range of quantitative models as applied in marketing research. S/U or letter grading.

249. Behavioral Research in Marketing. (4) Seminar, three hours. Designed for PhD students who are conducting research in consumer behavior or related areas. Empirical research in consumer behavior surveyed and critically evaluated from theoretical as well as practical perspectives. S/U or letter grading.

250. Special Research Topics in Marketing. (4) Lecture, three hours. Designed for PhD students. Advanced selected topics in marketing, with emphasis on thorough examination of one or two topics in current research and theory. May be repeated for credit. S/U or letter grading.

M251. Research and Development Policy. (4) (Same as Public Policy M280A.) Lecture, three hours. Examination of research and development as process and as element of goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of and forecasting technological futures. S/U or letter grading.

252. Special Topics in Management Theory. (4) Lecture, three hours. Designed for PhD students. Examination in depth of problems or issues of current concern in management theory. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced PhD candidates, academic staff or distinguished visiting faculty. May be repeated for credit. S/U or letter grading.

253. Field Research in Organizations and Management. (4) Seminar, three hours. Designed for PhD students. Immersion in discipline and practice of using field data to conduct management research. Students become more informed users and reviewers of variety of methodological approaches. Students gain familiarity with approaching companies to partner on research, gathering and preparing to analyze field data, and what to expect in review process for paper that uses field data. Content of research discussed could extend to other fields (e.g., strategy, psychology, judgment and decision making). S/U or letter grading.

255. Information and Trading in Financial Markets. (4) Lecture, three hours. Consideration of research on how information is processed in financial markets. Emphasis on classical models, as well as psychological approaches to stock price movements. Review of behavioral interpretations of trading behavior and price patterns in financial markets. S/U or letter grading.

260. Behavioral Economics: Individuals, Organizations, and Markets. (4) Lecture, three hours. Study of how predictions of behavior and optimal economic policy differ when traditional economic assumptions (often selfish, unbounded rationality) are replaced with more psychologically realistic assumptions drawn from lab and world. Special attention to way in which these modified assumptions can be incorporated into broadly applicable and parsimonious models of human behavior, and what they imply for markets, management, and public policy. Letter grading.

261. Judgment and Decision Making. (4) Lecture, three hours. Introduction to behavioral research on judgment and decision making, with special attention to conditions of uncertainty. Includes research by Daniel Kahneman and Amos Tversky for which Kahneman was awarded 2002 Nobel Memorial Prize in Economics, and some of work for which Richard Thaler was cited in his Nobel Memorial Prize in 2017. Examination of recent descriptive models of judgment and decision making using rational choice theory as point of departure. Examination of classic articles and current controversies. Letter grading.

262. Applied Analysis for Behavioral Research. (4) Lecture, three hours. Provides foundation for statistical analyses that are conducted as part of career as behavioral researcher. Heavy focus on understanding and using statistical analyses, not deriving proofs. Letter grading.

263. Choice Architecture and Nudging in Field. (4) Lecture, three hours. Application of behavioral science to field experimentation. Designed to bridge crucial educational gap for PhD students. Includes identifying research partners, achieving scale, dealing with logistical challenges, and collaborating with outside institutions who may have different goals. Letter grading.

270. Political Economy of Economic Development. (4) Lecture, three hours. Use of historical and comparative approach to understanding evolution and development of societies. Examination of research that asks whether differences in economic development today have historical roots. Study of different mechanisms and channels through which historical matters. Particular attention to role of domestic institutions and culture in explaining historical persistence. Letter grading.

Yu Huang, PhD, Chair
Jaime Marian, PhD, Vice Chair
Ya-Hong Xie, PhD, Vice Chair

Faculty Roster

Professors
Gregory P. Carman, PhD (Ben Rich–Lockheed Martin Professor of Advanced Aerospace Technologies)
Jane P. Chang, PhD (William Frederick Seyer Professor of Materials Electrochemistry)
Yong Chen, PhD
Bruce S. Dunn, PhD (Nippon Sheet Glass Company Professor of Materials Science)
Mark S. Goorsky, PhD
Vijay Gupta, PhD
Yu Huang, PhD (Traugott and Dorothea Frederking Endowed Professor)

Subramanian S. Iyer, PhD (Charles P. Reames Endowed Professor of Electrical Engineering)
Ioanna Kakoulli, DPhil
Richard B. Kaner, PhD
Xiaochun Li, PhD (Raytheon Company Professor of Mechanical Engineering)
Jaime Marian, PhD
Ali Mosleh, PhD, NAE (Evelyn Knight Professor of Engineering)
Qibing Pei, PhD
Gaurav N. Sant, PhD (Pritzker Professor of Sustainability)
Dwight C. Streit, PhD, NAE
Sarah H. Tolbert, PhD
Kang L. Wang (Raytheon Company Professor of Electrical Engineering)
Yinmin (Morris) Wang, PhD
Paul S. Weiss, PhD (Presidental Professor of Chemistry)
Ya-Hong Xie, PhD
Jenn-Ming Yang, PhD (Collins Aerospace Term Professor of Excellence)
Yang Yang, PhD (Carol and Lawrence E. Tannas, Jr., Endowed Professor of Engineering)

Professors Emeriti
Alan J. Ardell, PhD
Nasr M. Ghoniem, PhD
Kanji Ono, PhD
Benjamin M. Wu, DDS, PhD

Associate Professor
Ximin He, PhD

Assistant Professors
Amartya S. Banerjee, PhD
Laura Kim, PhD
Aaswath P. Raman, PhD

Lecturer
Magdalena Balonis-Sant, PhD

Adjunct Associate Professors
Eric P. Bescher, PhD
Sergey Prikhodko, PhD

Adjunct Assistant Professor
Marta Pozuelo, PhD

Overview
At the heart of materials science and engineering is the understanding and control of the microstructure of solids. Microstructure is used broadly in reference to electronic and atomic structure of solids—and defects within them—at size scales ranging from atomic bond lengths to airplane wings. The structure of solids over this wide range dictates their structural, electrical, biological, and chemical properties. The phenomenological and mechanistic relationships between microstructure and the macroscopic properties of solids are, in essence, what materials science is all about. Materials engineering builds on the foundation of materials science and is concerned with the design, fabrication, and optimal selection of engineering materials that must simultaneously fulfill dimensional, property, quality control, and economic requirements.
Undergraduate Major

Materials Engineering BS

The materials engineering program is designed for students who wish to pursue a professional career in the materials field and desire a broad understanding of the relationship between microstructure and properties of materials. Metals, ceramics, and polymers, as well as the design, fabrication, and testing of metallic and other materials such as oxides, glasses, and fiber-reinforced composites, are included in the course contents.

Students are introduced to the basic principles of metallurgy and ceramic and polymer science as part of the Materials Engineering major.

The department also has a program in electronic materials that provides a broad-based background in materials science, with opportunity to specialize in the study of those materials used for electronic and optoelectronic applications. The program incorporates several courses in electrical engineering in addition to those in the Materials Science curriculum.

The materials engineering program is accredited by the Engineering Accreditation Commission of ABET.

Capstone Major

The Materials Engineering major is a designated capstone major. Students undertake two individual projects involving materials selection, treatment, and serviceability. Successful completion requires working knowledge of physical properties of materials and strategies and methodologies of using materials properties in the materials selection process. Students learn and work independently and practice leadership and teamwork in and across disciplines. They are also expected to communicate effectively in oral, graphic, and written forms.

Learning Outcomes

The Materials Engineering major has the following learning outcomes:

- Application of knowledge of mathematics, natural science, and engineering to analysis of materials and other systems
- Learn and work independently
- Practice leadership and teamwork in and across disciplines
- Design of a system, component, or process to meet desired needs
- Effective oral, graphic, and written communication
- Identification, formulation, and solution of engineering problems

Requirements

Materials Engineering Option

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering 101, 102; Computer Science 31 or Mechanical and Aerospace Engineering 20; Materials Science and Engineering 10, 90L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B (or Mechanical and Aerospace Engineering 82); Physics 1A, 1B, 1C.

The Major

Required: Civil and Environmental Engineering 91 (or Mechanical and Aerospace Engineering 101), 108, Electrical and Computer Engineering 100, Materials Science and Engineering 104, 110, 110L, 120, 130, 131L, 132, 143A, 150, 160; one upper-division mathematics course selected from Civil and Environmental Engineering 103, Electrical and Computer Engineering 102, Mathematics 132, Mechanical and Aerospace Engineering 12B, 182; two laboratory courses (4 units) from Materials Science and Engineering 121L, 141L, 143L, 161L, or up to 2 units of 199; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; two capstone design courses (Materials Science and Engineering 140A and 140B); and two major field elective courses (8 units) from Chemical Engineering CM114, Civil and Environmental Engineering 130, Electrical and Computer Engineering 2, 123A, 123B, Materials Science and Engineering 105, C111, C112, 121, 122, 151, 161, 162, Mechanical and Aerospace Engineering 156A, 166C, plus at least one elective course (4 units) from Chemistry and Biochemistry 30A, 30AL, Electrical and Computer Engineering 131A, Materials Science and Engineering 170, 171, Mathematics 170A, or Statistics 100A.

For information on UC, school, and general education requirements, see the Samueli school section in College and Schools.

Electronic Materials Option

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering M20 or Computer Science 31 or Mechanical and Aerospace Engineering M20; Materials Science and Engineering 10, 90L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B (or Mechanical and Aerospace Engineering 82); Physics 1A, 1B, 1C.

The Major

Required: Electrical and Computer Engineering 100, 101A, 121B, Materials Science and Engineering 104, 110, 110L, 120, 121L, 122, 130, 131, 131L, 132, Mechanical and Aerospace Engineering 101; one upper-division mathematics course selected from Civil and Environmental Engineering 103, Electrical and Computer Engineering 102, Mathematics 132, Mechanical and Aerospace Engineering 182B, 182C; either Materials Science and Engineering 150 or 160 and one course (4 units) from Electrical and Computer Engineering 123A, 123B, Materials Science and Engineering 150, 160; 4 laboratory units from Materials Science and Engineering 141L, 161L, or up to 2 units of 199; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; two capstone design courses (Materials Science and Engineering 140A and 140B); and one major field elective course (4 units) from Electrical and Computer Engineering 110, 131A, Materials Science and Engineering 105, C111, C112, 143A, or 162.
ploration of ancient engineering materials (their micro/nano structure and physical, chemical, and mechanical properties), and their durability and sustainability as time-processed science. Printables and methods of materials characterization in conservation: optical and electron microscopy, X-ray and electron spectroscopy, X-ray diffraction, infrared spectroscopy, reflectance spectroscopy and multispectral imaging. Comparison of results with theory. Letter grading.

99. Student Research Program. (1 to 2) Supervised research or other scholarly work, three hours per week per semester for two semesters, required for lower division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in a minimum of 12 units (excluding this course). Individual project. Consent: Undergraduate Research Center. May be repeated, P/NP grading.

Upper-Division Courses

104. Science of Engineering Materials. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: Chemistry 20A, 20B, 20L, Physics 1A, 1B, 1C. Corequisite: General introduction to some of the different types of materials used in engineering designs: metals, ceramics, plastics, and composites, relationship between structure (crystals and microstructure) and properties of technological materials. Illustration of their fundamental differences and their applications in engineering. Letter grading.

105. Principles of Nanoscience and Nanotechnology. (4) Formerly numbered M105. Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: Chemistry 20A, 20B, Physics 1C. Introduction to underlying science encompassing structure, properties, and fabrication of nanoscale and mesoscale systems. New phenomena that emerge in very small systems typically with feature sizes below a few hundred nanometers explained using basic concepts from physics and chemistry. Techniques for producing materials with controllable properties, electron transport, structural stability, self-assembly, templated assembly and applications of various nanostructures such as quantum dots, nanoparticles, quantum wires, quantum wells and multilayers, carbon nanotubes. Letter grading.

110. Introduction to Materials Characterization A (Crystal Structure, Nanostructures, and X-Ray Scattering). (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 104. Modern methods of materials characterization: fundamentals of crystallography, properties of X-rays, X-ray scattering; powder method; Laue method; determination of crystal structure; phase diagram determination; high-resolution X-ray diffraction methods; X-ray spectroscopy; design of materials characterization procedures. Letter grading.

110L. Introduction to Materials Characterization B Laboratory. (2) Laboratory, four hours; outside study, two hours. Enforced requisite: course 104. Experimental techniques and analysis of materials through X-ray scattering techniques; powder method, crystal structure determination, high-resolution X-ray diffraction methods, and special projects. Letter grading.

111. Introduction to Materials Characterization B (Electron Microscopy). (4) Formerly numbered 111.) Lecture, four hours; outside study, eight hours. Characteristics of microstructure and microchemistry of materials; transmission electron microscopy; reciprocal lattice, electron diffraction, stereographic projection, direct observation of defects in crystals by scanning electron microscopy: emissive and reflective modes; chemical analysis; electron optics of both instruments. Concurrently scheduled with course 221L. Letter grading.

111L. Introduction to Materials Characterization B Laboratory. (2) Laboratory, four hours; outside study, two hours. Enforced requisite: course 111. Experimental techniques and analysis of materials through electron microscopy: evaluation of morphology, microstructure, and crystallinity of samples. Letter grading.

120. Physics of Materials. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: courses 104, 110 (or Chemistry 113A). Introduction to electrical, optical, and magnetic properties of solids. Free electron model, introduction to band theory and Schrödinger wave equation. Crystal bonding and lattice vibrations. Mechanisms and characterization of electrical conductivity, optical absorption, magnetic behavior, dielectric properties, and p-n junctions. Letter grading.

121. Materials Science of Semiconductors. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 120. Structure and properties of III-V and II-VI semiconductors. Electrical and optical properties, defect chemistry, and doping. Electronic materials analysis and characterization, including electrical, optical, and ion-beam techniques. Heterostructures, band-gap engineering, development of new materials for optoelectronic applications. Letter grading.

121L. Materials Science of Semiconductors Laboratory. (2) Lecture, 30 minutes; discussion, 30 minutes; laboratory, two hours; outside study, three hours. Enforced requisite: course 121. Experiments conducted on materials characterization, including measurements of contact resistance, dielectric constant, and thin film biaxial modulus and CTE. Letter grading.

130. Phase Relations in Solids. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 104. Summary of thermodynamic laws, equilibrium criteria, solution thermodynamics, and first order phase diagrams, glass transitions. Letter grading.

131. Diffusion and Diffusion-Controlled Reactions. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 130 or Chemistry 113A. Diffusion of atoms and vacancies in solids, nucleation and growth theory; precipitation from solid solution, eutectoid decomposition, design of heat treatment processes of alloys, growth of intermediate phases, gas-solid reactions, design of oxidation-resistant alloys, recrystallization, and grain growth. Letter grading.

131L. Diffusion and Diffusion-Controlled Reactions Laboratory. (2) Laboratory, two hours; outside study, four hours. Enforced corequisite: course 131. Design of heat-treating cycles and performing experiments to study interdiffusion, growth of intermediate phases, recrystallization, and grain growth in metals. Analysis of data. Comparison of results with theory. Letter grading.

140A. Materials and Engineering Design A. (3) Lecture, two hours; laboratory, two hours; outside study, five hours. Enforced requisites: two courses from 132, 150, 160. Explicit guidance among myriad materials available for design in engineering. Properties and applications of steels, nonferrous al-
ceramics and packaging; magnetic ceramics; ferroelectric ceramics and electro-optic devices; optical waveguide applications and designs. Letter grading.

CM163. Electrochemical Processes. (4) (Same as Chemical Engineering CM114.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 130 (or Mechanical and Aerospace Engineering 105A), Chemical Engineering 102B. Fundamentals of electrochemical reactions and applications to industrial electrochemical processes. Primary emphasis on fundamental approach to analyze electrochemical processes. Specific topics include electrochromic reactions on metal and semiconductors, electrodeposition, electrowetting, fuel cells, aqueous and nonaqueous batteries, solid-state electrochemistry. May be concurrently scheduled with course CM263. Letter grading.

170. Engaging Elements of Communication: Oral Communication. (2) Lecture, one hour; discussion, one hour; outside study, four hours. Comprehensive oral presentation and communication skills provided by building on strengths of individual personal styles in creation of positive interpersonal relations. Skill set prepares students for different types of academic and professional settings. Students for wide range of audiences. Learning environment is highly supportive and interactive as it helps students creatively develop and greatly expand expressiveness of their communication and presentation skills. Lecture grading.

171. Engaging Elements of Communication: Writing for Technical Community. (2) Lecture, one hour; discussion, one hour; outside study, four hours. Comprehensive technical writing skills on subjects specific to field of materials science and engineering. Students write review term paper in selected subject field of materials science and engineering from given set of journals. Selected literature through several crucial steps, including brainstorming, choosing title, coming up with outline, concise writing of abstract, conclusion, and final polishing. Other subjects include writing style, word choices, and grammar. Letter grading.

CM180. Introduction to Biomaterials. (4) (Same as Bioengineering CM178.) Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: course 104, or Chemistry 20A, 20B, and 20L. Engineering materials used in medicine and dentistry for repair and/or restoration of damaged natural tissues. Topics include relationships between material properties, surface chemistry, processing, and experimental details of physical vapor deposition. Letter grading.

188. Special Courses in Materials Science and Engineering. (4) Seminar, four hours; outside study, eight hours. Special topics in materials science and engineering for undergraduate students taught on experimental or temporary basis, such as those taught by resident and visiting faculty members. May be repeated once for credit with topic or instructor change. Letter grading.

194. Research Group Seminars: Materials Science and Engineering. (4) Seminar, four hours; outside study, eight hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field of research or research group. May be repeated for credit. Letter grading.

200. Principles of Materials Science I. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 120. Lattice dynamics and thermal properties of solids, classical and quantized free electron theory, electrons in a periodic potential, transport in semiconductors, dielectric and magnetic properties of solids. Letter grading.

C211. Introduction to Materials Characterization B (Electron Microscopy). (4) (Formerly numbered 211.) Lecture, four hours; outside study, eight hours. Characterization of microstructure and microchemistry of materials; transmission electron microscopy; reciprocal lattice, electron diffraction, stereographic projections, direct observations of defects in crystals, replicas; scanning electron microscopy; emissive and reflective modes; chemical analysis; electron optics of both instruments. Concurrently scheduled with course C111. Letter grading.

M213. Cultural Materials Science I: Analytical Imaging and Documentation in Conservation of Materials. (4) (Same as Conservation M215.) Lecture, two hours; laboratory, two hours. Basic and advanced techniques on digital photography, computer-aided recording tools, and scientific imaging to determine and document condition (defects) and technological features of archaeological and ethnographic materials. Development of basic technical knowledge in imaging and photometrics technology and practical skills in conservation photo-documentation, analytical (for research) photography, and advanced imaging new imaging technologies. Letter grading.

214. Structure, Properties, and Deterioration of Materials: Rock Art, Wall Paintings, Mosaics. (2) (Formerly numbered M214.) Lecture, three hours. Recommended preparation: general chemistry and materials science. Introduction to materials and techniques of rock art, wall paintings (including painted surfaces on cement and composite decorative architectural surfaces), and mosaics. Archeological, historical, and ethnographic materials and techniques, pigments, colors, and binding media. Chemical, optical, and structural properties. Restoration and conservation between chemical, structural, and physical surfaces, treatment of scratches, tissue, substrates, crystalline morphology, and surface chemistry, structure (crystals, molecular arrangement, and microstructure), and properties explained using basic concepts from physics and chemistry. Intrinsic attributes and resistance to weathering, causes, sources, and mechanisms of deterioration (physical, chemical, and bio-chemical). Letter grading.

216. Science of Conservation Materials and Methods I. (4) (Formerly numbered M216.) Lecture, two hours; laboratory, two hours. Recommended requisite: laboratory safety fundamental concepts course by Office of Environment, Health, and Safety. Introduction to physical, chemical, and mechanical properties of conservation materials (employed for preservation of archaeological and cultural materials) and their aging characteristics. Science and application methods of traditional organic and inorganic systems and introduction to novel technology based on biomimetic processes and nanostructured materials. Letter grading.

222. Growth and Processing of Electronic Materials. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 120, 131. Fabrication, processing, and properties of thin films used in microelectronics, semiconductors, and photonic processing. Topics include film deposition, interfacial properties, stress and strain, electromigration, phase changes and kinetics, reliability. Letter grading.

224. Deposition Technologies and Their Applications. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Examination of physics behind major of modern thin film deposition technologies based on vapor phase transport. Basic vacuum technology and gas kinetics. Deposition methods used in high-technology applications. Theory and experimental details of physical vapor deposition (PVD), chemical vapor deposition (CVD), plasma-enhanced chemical vapor deposition processes. Letter grading.

226. Si-CMOS Technology: Selected Topics in Materials Characterization. (4) Lecture, four hours; discussion, one hour; outside study, eight hours. Recommended preparation: Electrical Engineering 221B. Requisites: courses 130, 131, 200, 221, 222. Selected topics in materials science from modern Si-CMOS technology,
including technological challenges in high k/metal gate stacks, strained Si FETs, SOI and three-dimensional FETs, source/drain engineering including transient-enhanced, PoL M2.0, and metallization for ohmic contacts. Letter grading.

243C. Dislocations and Strengthening Mechanisms in Solids. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 143A. Elastic and plastic behavior of crystals, geometrical, mechanical, and physical aspects of yield, work hardening, and other strengthening. Letter grading.

246A. Mechanical Properties of Nonmetallic Crystalline Solids. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 143A. Materials and environmental factors affecting mechanical properties of nonmetallic crystalline solids, including atomic bonding and structure, atomic-scale defects, structural defects, thermal stresses, temperature, stress state, strain rate, size and surface conditions. Letter grading.

248D. Electronic and Optical Properties of Ceramics. (4) Lecture, four hours; discussion, one hour; outside study, four hours. Requisite: course 160. Prerequisites govern the electronic properties of ceramic single crystals and glasses and effects of processing and microstructure on these properties. Electronic conductance, ferroelectricity, and photochromism. Magnetic ceramics. Infrared, visible, and ultraviolet transmission. Unique application of ceramics. Letter grading.

247. Nanoscale Materials: Challenges and Opportunities. (4) Lecture, four hours; discussion, eight hours. Limited to graduate students. Literature studies of up-to-date subjects and their potential applications, including nanoscale materials and biomaterials. Letter grading.

248. Materials and Physics of Solar Cells. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Comprehensive introduction to materials and physics of photovoltaic cell, covering basic physics of semiconductors in photovoltaic devices, physical mechanisms of charge generation, characteristics and design of common types of solar cells, and approaches to increasing solar cell efficiency. Recent progress in solar cells, such as organic solar cell, thin-film solar cells, and multiple junction solar cells. Petition forms to increase student knowledge. Tour of research laboratory included. Letter grading.

251. Chemistry of Soft Materials. (4) Lecture, four hours. Introduction to organic soft materials, including essential basic organic chemistry and polymer chemistry. Topics include modern first-principles electronic structure calculations for various types of modern materials. Properties of electrons and interatomic bonding in materials, crystals, and liquids, with emphasis on practical methods for solving Schrödinger equation and using it to calculate physical properties such as elastic constants, equilibrium structures, bonding energies, vibrational frequencies, electronic band gaps and band structures, electrical properties of defects, surfaces, interfaces, and magnetism. Extensive hands-on experience with modern density-functional theory code. Letter grading.

272. Theory of Nanomaterials. (4) Lecture, four hours; outside study, eight hours. Strongly recommended requisite: course 200. Introduction to properties and applications of nanoscale materials, with emphasis on understanding of basic principles that distinguish nanomaterials (with feature size below 100 nm) from more common microstructured materials. Explanation of new phenomena that emerge only in very small systems, using simple concepts from quantum mechanics and thermodynamics. Topics include structure and electronic properties of quantum dots, wires, nanotubes, and multilayers, self-assembly on surfaces and in liquid solutions, mechanical properties of nanomaterials, molecular electronics, spintronics, and potential applications of quantum computing. Discussion of current and future directions of this rapidly growing field using examples from modern scientific literature. Letter grading.

M250. Introduction to Biomaterials. (4) (Same as Bioengineering CM274.) Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: course 104, or Chemistry 20A, 20B, and 20L. Engineering materials used in medicine, including overview of properties and characterizations, and real-life applications. Letter grading.

261. Risk Analysis for Engineers and Scientists. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Topics include definition and functional concepts of risk, sociotechnical context of risk assessment and risk management, perception and reality of risk, risk-informed decision-making, domains of application (safety, health, security, economy, and environment), risk communication, risk assessment, including overview of probability and statistics, how to identify risk scenarios, techniques modeling failures of complex systems (e.g., fault tree and event analysis), database and model integration and computational algorithms for risk calculation and identification of risk drivers, simulation approach to risk modeling, uncertainty analysis, examples of risk assessment of engineered systems (e.g., space and aviation, nuclear power, petrochemical plants), other applications (risk of medical procedures, financial risk, natural hazards risk). Letter grading.

M265A. Electrochemical Processes. (4) (Same as Chemical Engineering CM214.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 130 (or Mechanical and Aerospace Engineering 105A, 105B, 105BD). Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes. Topics include electrochemical reactions on metal and semiconductor surfaces, electrodeposition, electroless deposition, electrolysis, fuel cells, aqueous and nonaqueous batteries, solid-state electronics. May be concurrently scheduled with course CM163. Letter grading.

270. Computer Simulations of Materials. (4) Lecture, four hours; outside study, eight hours. Preparation: basic knowledge of quantum mechanics. Recommended requisite: course 200. Introduction to modern first-principles electronic structure calculations for various types of modern materials. Properties of electrons and interatomic bonding in materials, crystals, and liquids, with emphasis on practical methods for solving Schrödinger equation and using it to calculate physical properties such as elastic constants, equilibrium structures, bonding energies, vibrational frequencies, electronic band gaps and band structures, electrical properties of defects, surfaces, interfaces, and magnetism. Extensive hands-on experience with modern density-functional theory code. Letter grading.

597A. Preparation for MS Comprehensive Exam. (1 to 4) Seminar, to be arranged. Limited to graduate students. Petition forms to arrange. Tutorial, to be arranged. Limited to graduate students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprenticeship personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596. Directed Individual or Tutorial Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate materials science and engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of independent technical problems. Letter grading.

597A. Preparation for MS Comprehensive Examination. (2 to 12) Tutorial, to be arranged. Limited to graduate materials science and engineering students. Reading and preparation for MS comprehensive examination. S/U grading.

Adjunct Professor
Christian Ratsch, PhD

Adjunct Assistant Professor
Mary P. Greene, MS

Overview
Gauss called mathematics the “queen of the sciences.” It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics offers courses of study that introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

Undergraduate Study
In addition to its seven majors, the department also hosts the Mathematics/Economics Interdepartmental Program, which offers a Mathematics/Economics major.

Undergraduate Policies

Preliminary Examination in Mathematics

If students wish to enroll in Mathematics 1, 3A, 31A, or 31AL they must pass the Mathematics Diagnostic Test.

For specific information about the online test, refer to the Schedule of Classes or the department website; or contact the Mathematics Student Services Office, 6356 Mathematical Sciences.

Advanced Placement in Calculus

Students who have taken the Advanced Placement (AP) Calculus AB Test and obtained a score of 5 receive 4 units of credit and Mathematics 31A equivalency; those with a score of 4 receive 4 units of calculus and analytic geometry credit. They may petition for 31A equivalency or they may take course 31A or 31AL at UCLA, although they must still satisfy the course requisites (Mathematics Diagnostic Test). Students who take the BC Test and obtain a score of 5 receive 8 units of calculus and Mathematics 31A, 31B equivalency; those with a score of 4 receive 4 units of calculus and Mathematics 31A equivalency. They may petition for 31A equivalency or they may take courses 31A or 31AL at UCLA, although they must still satisfy the course requisites (Mathematics Diagnostic Test). Students receiving a score of 4 or lower on the AB examination, or 3 or lower on the BC examination, should consult with the undergraduate mathematics counselor prior to enrolling in a calculus course at UCLA.

Credit Limitations
Credit is given for at most one course in each of the following groups: (1) 3A, 31A, 31AL; (2) 3B, 31B, 31E; (3) 110A, 117; (4) 170A, 170E.
Courses from only one of the following statistics sequences may be applied toward any mathematics major: (1) Statistics 100A (or Mathematics 170A or 170E), 100B (or Mathematics 170S), 100C or (2) former Statistics 110A, 110B.

Mathematics 132 is not open for credit to students with credit for Physics 132.

Mathematics 151A is not open for credit to students with credit for Electrical and Computer Engineering 133A.

Mathematics 170A, 170E, and Statistics 100A are not open for credit to students with credit for Electrical and Computer Engineering 131A.

Mathematics 170S is not open for credit to students with credit for Statistics 100B.

Mathematics 174E is not open for credit to students with credit for Economics 141.

For lower-division mathematics courses, students may not take or repeat a course for credit if it is a prerequisite for a more advanced lower-division course for which they already have credit. This applies in particular to the repetition of courses (e.g., if students wish to repeat Mathematics 31B, they must do so before completing course 32B; if students wish to repeat Mathematics 3B or 31B or 32A, they must do so before completing course 33A).

For upper-division mathematics courses, students may not take or repeat a lower sequence course for credit if it is part of a sequence for which they already have credit. This applies in particular to the repetition of courses (e.g., if students wish to repeat Mathematics 131A, they must do so before completing course 131B or 131B(H)).

Students may not receive credit for both a course and the honors version of that course (e.g., they may not receive credit for both Mathematics 131A and 131AH).

Honors Courses

The department offers lower-division honors courses in calculus, and upper-division honors courses in algebra and analysis. The courses are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics.

Program in Computing Courses

Program in Computing 1 is designed for students who wish a broad, general introduction to the topic of computers and computation, but who have no prior experience in computing.

Courses 10A, 10B, and 10C provide an extensive introduction to programming, using the C++ language. Courses 16A, 16B, 20A, and 40A cover Python, Java, and Internet programming. They are of interest to majors in many fields, including those completing a specialization in Computing. Students should consult with their major department regarding enrollment in these courses, their relevance to their program, and suitability for use in fulfilling requisites.

Subject Matter Preparation Program for Single-Subject Credential in Mathematics

Students interested in obtaining a single-subject secondary school credential in mathematics should consult with a departmental counselor regarding the requirements for a waiver from the Mathematics California Subject Examination for Teachers (CSET), which is required by the California Commission on Teacher Credentialing. Students should meet with a departmental counselor as early in their undergraduate careers as possible because the program does require additional courses beyond the major requirements. See the Curtis Center website for details on teaching credential requirements. For additional information, contact the Education Department credentialing specialist at 310-825-8328.

Undergraduate Majors

Mathematics BS

The Mathematics major is designed for students whose basic interest is mathematics.

Learning Outcomes

The Mathematics major has the following learning outcomes:

• Strong mathematical content knowledge of single and multivariate differential and integral calculus, and differential equations
• Ability to synthesize material, solve problems, and think abstractly
• Familiarity with linear algebra, techniques of proof, and foundations of real analysis
• Ability to perform basic computer programming, especially in C++

Entry to the Major

Admission

Current UCLA students need to apply for the Mathematics major by filing a petition with the Student Services Office in 6356 Mathematical Sciences. All students are identified as Mathematics pre-majors until they satisfy the following minimum requirements for the major: (1) achieve grades of C or better in all pre-major mathematics sequenced courses (Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B); (2) achieve a minimum 2.5 grade-point average in the calculus sequence with no more than two repeats; (3) complete one 12-unit term in residence in regular session at UCLA, (4) be enrolled in UCLA regular session at the time of application, and (5) file a petition to declare the major before completing 160 quarter units.

Pre-major

Students entering UCLA directly from high school or first-term transfer students who want to declare the Mathematics pre-major at the time they apply for admission are automatically admitted to the pre-major.

First-Year Students

To enter the major, students must petition after they have completed the six sequenced courses with a 2.5 minimum overall grade-point average, have completed one 12-unit term in residence in regular session at UCLA, are enrolled in UCLA regular session at the time of application, and before completing 160 quarter units.

Transfer Students

Transfer applicants to the Mathematics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one calculus-based physics (mechanics) course, one C++ programming course, and two courses from general chemistry for majors, economics, symbolic logic, and calculus-based physics.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Student Services Office after completing one 12-unit term in residence in regular session at UCLA, and while enrolled in UCLA regular session at the time of application.

Requirements

Preparation for the Major

The Major

Required: Mathematics 110A, 110B, 115A, 120A, 131A, 131B, 132, and at least five elective courses from 106 through 199 and Statistics 100A through 102C.

Honors Program

The program entails taking a specified sequence of courses as part of the major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper-division and graduate mathematics courses.

Computing Specialization

Majors may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Mathematics 61 or 180, Program in Computing 10A, 10B, two courses from 10C, 15, 16A, 20A, 40A, and at least two courses from Mathematics 149 through 159, with a minimum grade of C- in each course and a combined grade-point average of at least 2.0. Students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office).
Students graduate with a bachelor’s degree in their major and a specialization in Computing.

**Policies**

**Preparation for the Major**

Each course must be taken for a letter grade. The mathematics sequenced courses (Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B) are calculated separately from the other preparation for the major courses and must be completed with a minimum overall 2.5 grade-point average and a grade of C or better in each course. The other preparation courses must be completed with a minimum overall 2.0 grade-point average and a grade of C– or better in each course.

Repetition of more than two mathematics sequenced courses or of any mathematics sequenced course more than once results in automatic dismissal from the major.

**The Major**

Each course must be taken for a letter grade. The 12 courses must be completed with a minimum overall grade-point average of 2.0, with grades of C– or better in Mathematics 115A and 131A.

**Honors Program**

Students who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. They may apply any time after completing four courses from the calculus sequence or from upper-division mathematics courses with an overall grade-point average of 3.6 or better. Students completing the program are awarded honors at graduation; if they demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper-division mathematics courses taken for the major), they are awarded highest honors. Contact the department for more information.

**Applied Mathematics BS**

The Applied Mathematics major concerns applications of mathematics to the sciences, including the life, social and physical sciences, and engineering.

**Learning Outcomes**

The Applied Mathematics major has the following learning outcomes:

- Strong mathematical content knowledge of single and multivariate differential and integral calculus, and differential equations
- Ability to synthesize material, solve problems, and think abstractly
- Familiarity with linear algebra, techniques of proof, and foundations of real analysis
- Ability to perform basic computer programming, especially in C++

**Entry to the Major**

**Admission**

Current UCLA students need to apply for the Applied Mathematics major by filing a petition with the Student Services Office in 6356 Mathematical Sciences. All students are identified as Applied Mathematics pre-majors until they satisfy the following minimum requirements for the major:

1. Achieve grades of C or better in all pre-major mathematics sequenced courses (Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B).
2. Achieve a minimum 2.5 grade-point average in the calculus sequence with no more than two repeats.
3. Complete one 12-unit term in residence in regular session at UCLA. (4) be enrolled in UCLA regular session at the time of application, and (5) file a petition to declare the major before completing 160 quarter units.

**Pre-major**

Students entering UCLA directly from high school or first-term transfer students who want to declare the Applied Mathematics pre-major at the time they apply for admission are automatically admitted to the pre-major.

**First-Year Students**

To enter the major, students must petition after they have completed the six sequenced courses with a 2.5 minimum overall grade-point average, have completed one 12-unit term in residence in regular session at UCLA, are enrolled in UCLA regular session at the time of application, and before completing 160 quarter units.

**Transfer Students**

Transfer applicants to the Applied Mathematics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, two calculus-based physics courses, one C++ programming course, and one course from general chemistry for majors or calculus-based physics.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Student Services Office after completing one 12-unit term in residence in regular session at UCLA, and while enrolled in UCLA regular session at the time of application.

**Requirements**

**Preparation for the Major**

Required: Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B, Physics 1A, 1B, Program in Computing 10A, and one course from Chemistry and Biochemistry 20A, 20B, Physics 1C.

**The Major**

Required: Mathematics 115A, 131A, either 131B or 132, 142; two two-term sequences from two of the following categories: numerical analysis—courses 151A and 151B, probability and statistics—courses 170A and 170B, or Statistics 100A and 100B, differential equations—courses 134 and 135; four courses from 106 through 199 and Statistics 100A through 102C (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken).

**Honors Program**

The program entails taking a specified sequence of courses as part of the major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper-division and graduate mathematics courses.

**Computing Specialization**

Majors may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Mathematics 61 or 180, Program in Computing 10A, 10B, two courses from 10C, 15, 16A, 20A, 40A, and at least two courses from Mathematics 149 through 159, with a minimum grade of C– in each course and a combined grade-point average of at least 2.0. Students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

**Policies**

**Preparation for the Major**

Each course must be taken for a letter grade. The mathematics sequenced courses (Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B) are calculated separately from the other preparation for the major courses and must be completed with a minimum overall 2.5 grade-point average and a grade of C or better in each course.

Repetition of more than two mathematics sequenced courses or of any mathematics sequenced course more than once results in automatic dismissal from the major.

**The Major**

Each course must be taken for a letter grade. The 12 courses must be completed with a minimum overall grade-point average of 2.0, with grades of C– or better in Mathematics 115A and 131A.

**Honors Program**

Students who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. They may apply any time after completing four courses from the calculus sequence or from upper-division mathematics courses with an overall grade-point average of 3.6 or better. Students completing the program are awarded honors at graduation; if they demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper-division mathematics courses taken for the major), they are awarded highest honors. Contact the department for more information.
Data Theory BS

Learning Outcomes
The Data Theory major has the following learning outcomes:

- Understanding of mathematical and statistical bases of most common methods of data science
- Ability to explain in writing, with examples, how concepts of statistics and mathematics together solve real-world problems involving data
- Skillfully manage data
- Development, comparison, and testing of data-driven models to solve problems
- Understanding and explanation of variability when fitting and interpreting models of real-world systems
- Carrying out of reproducible data analysis using accepted practices of research community
- Written and verbal communication of findings of analyses
- Identification of areas of active research in data science
- Insightfully address problems concerning ethics of data use and storage, including data privacy and security
- Demonstrated mastery of concepts and skills of machine learning, modeling and supervised learning, dimension reduction and unsupervised learning, and deep learning
- Demonstrated familiarity with numerous software tools used in statistical and data science work and research
- Demonstrated knowledge of mathematical foundations, including pure and applied linear algebra, basic analysis, probability, and optimization theory
- Study and evaluation of proofs of mathematical and statistical results employed in data theory
- Work effectively in a team on a data science problem
- Demonstrated eligibility for graduate study in applied mathematical science or statistical science

Entry to the Major

Pre-major
Students entering UCLA directly from high school or first-term transfer students who want to declare the Data Theory pre-major at the time they apply for admission are automatically admitted to the pre-major. Students must visit the student services office of either the Mathematics Department or Statistics and Data Science Department in order to petition to enter the major. All students are identified as Data Theory pre-majors until they satisfy the following minimum requirements for the major.

First-Year Students
To enter the major, students must petition after they have completed the preparation for the major courses. Students who have an overall grade-point average (GPA) of at least 3.3 in the preparation for the major courses, and have completed all preparation for the major courses before the fall quarter of their third year at UCLA, will be admitted to the major.

Students whose overall GPA is between 2.7 and 3.3, or who fail to complete the preparation courses before the fall quarter of their third year, are admitted only if space is available. All students must petition before they have earned 160 units, or by the winter quarter of their junior year, whichever comes first. Only grades for courses that are taken at the University of California, including UC summer schools, are counted for this GPA computation.

Transfer Students
Transfer applicants to the Data Theory major are admitted to the pre-major. Applicants with 90 or more units must have completed the following by the end of the spring term prior to entry to UCLA: two years of calculus for physical science and/or engineering majors, one linear algebra course, one C++ programming course, one statistics course.

Transfer students must have completed all preparation for the major coursework, and must have passed Mathematics 42, 115A, and at least 4 units of upper-division coursework required for this major with at least a 3.3 GPA, in order to be eligible to petition to enter the major. Transfer students will be admitted to the major if they satisfy these requirements. Transfer students who fail to meet these criteria for automatic admission will be admitted only if resources allow. Transfer students must petition to enter the major no later than the spring quarter of their third year at UCLA.

Transfer students are admitted to the pre-major. Applicants with 90 or more units must have completed the following by the end of the spring term prior to entry to UCLA: two years of calculus for physical science and/or engineering majors, one linear algebra course, one C++ programming course, one statistics course.

Financial Actuarial Mathematics BS

Learning Outcomes
The Financial Actuarial Mathematics major has the following learning outcomes:

- Strong mathematical content knowledge of single and multivariate differential and integral calculus, and differential equations
- Demonstrated knowledge of how to synthesize material, solve problems, and think abstractly
- Familiarity with linear algebra, techniques of proof, and foundations of real analysis
- Working knowledge of probability and financial and insurance mathematics at the level needed to pass of the first three preliminary actuarial examinations by the Society of Actuaries
- Strong content knowledge of the fourth and fifth preliminary examinations.
- Familiarity with basic statistical analysis including probability distributions, random variables, survey sampling, testing, data summary, sums of squares principle, testing general linear hypothesis in regression, and inference procedures
- Ability to perform basic computer programming, especially in C++

Entry to the Major

Admission
Current UCLA students need to apply for the Financial Actuarial Mathematics major by filing a petition with the Student Services Office in
6356 Mathematical Sciences. All students entering UCLA directly from high school are pre-majors until they satisfy the following minimum requirements for the major: (1) achieve grades of C or better in all pre-major mathematics, economics, or accounting sequence courses (Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A) with a minimum 2.5 grade-point average and no more than two repeats, (2) achieve grades of C or better in all pre-major economics courses (Economics 1, 2, 11, Management 1A, 1B) with a minimum 2.5 grade-point average and no more than one repeat, (3) complete one 12-unit term in residence in regular session at UCLA, (4) be enrolled in UCLA regular session at the time of application, and (5) file a petition to declare the major before completing 160 quarter units.

Pre-major

Students entering UCLA directly from high school or first-term transfer students who want to declare the Financial Actuarial Mathematics pre-major at the time they apply for admission are automatically admitted to the pre-major.

First-Year Students

To enter the major, students must petition after they have completed the six sequenced courses with a 2.5 minimum overall grade-point average, have completed one 12-unit term in residence in regular session at UCLA, are enrolled in UCLA regular session at the time of application, and before completing 160 quarter units.

Transfer Students

Transfer applicants to the Financial Actuarial Mathematics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one C++ programming course, one microeconomic theory course, one macroeconomics course, and two terms of accounting principle.

Transfer credit for any of the above is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major.

Pre-major students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies

Preparation for the Major

Each course must be taken for a letter grade. The economics preparation for the major courses (Economics 1, 2, 11, Management 1A) are calculated separately from the mathematics preparation for the major courses (Mathematics 11N or 42 or 61 or 70, 31A or 31AL, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, 10B or 16A).

The economics preparation courses must be completed with a minimum overall 2.5 grade-point average and a grade of C or better in each course, as must the mathematics preparation courses.

Preparation credit for any of the above is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major.

Pre-major students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Entry to the Major

Admission

Current UCLA students need to apply for the Mathematics of Computation major by filing a petition with the Student Services Office in 6356 Mathematical Sciences. All students are identified as Mathematics of Computation pre-majors until they satisfy the following minimum requirements for the major: (1) achieve grades of C or better in all pre-major mathematics sequences courses (Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B), (2) achieve a minimum 2.5 grade-point average in the calculus sequence with no more than two repeats, (3) complete one 12-unit term in residence in regular session at UCLA, (4) be enrolled in UCLA regular session at the time of application, and (5) file a petition to declare the major before completing 160 quarter units.

Pre-major

Students entering UCLA directly from high school or first-term transfer students who want to declare the Mathematics of Computation pre-major at the time they apply for admission are automatically admitted to the pre-major.

First-Year Students

To enter the major, students must petition after they have completed the six sequenced courses with a 2.5 minimum overall grade-point average, have completed one 12-unit term in residence in regular session at UCLA, are enrolled in UCLA regular session at the time of application, and before completing 160 quarter units.

Transfer Students

Transfer applicants to the Mathematics of Computation major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one discrete structures course, two calculus-based physics courses, three programming courses, and one course from general chemistry for majors or calculus-based physics.

Preparation for the Major

Each course must be taken for a letter grade. Transfer credit is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major.

To graduate, the ten Mathematics Department courses must be completed with an overall grade-point average of 2.0, with grades of C– or better in Mathematics 115A and 131A, as must the two elective courses.

Mathematics of Computation BS

The Mathematics of Computation major is for mathematics students who have a secondary interest in computing.

Learning Outcomes

The Mathematics of Computation major has the following learning outcomes:

- Strong mathematical content knowledge of single and multivariate differential and integral calculus, and differential equations
- Ability to synthesize material, solve problems, and think abstractly
- Familiarity with linear algebra, techniques of proof, and foundations of real analysis
- Ability to perform basic computer programming, especially in C++
The Major

Required: Eleven Mathematics Department courses, including Mathematics 115A, 131A, 131B or 132, 151A, 151B, and six courses from 106 through 199 and Statistics 100A through 101C; three upper-division computer science courses (12 units).

Honors Program

The program entails taking a specified sequence of courses as part of the major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper-division and graduate mathematics courses.

Policies

Preparation for the Major

Each course must be taken for a letter grade. The mathematics sequenced courses (Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B) are calculated separately from the other preparation for the major courses and must be completed with a minimum overall 2.5 grade-point average and a grade of C or better in each course. The other preparation courses must be completed with a minimum overall 2.0 grade-point average and a grade of C– or better in each course.

Repetition of more than two mathematics sequenced courses or of any mathematics sequenced course more than once results in automatic dismissal from the major.

The Major

Each course must be taken for a letter grade. The 14 courses must be completed with a minimum overall grade-point average of 2.0, with grades of C– or better in Mathematics 115A and 131A.

Honors Program

Students who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. They may apply any time after completing four courses from the calculus sequence or from upper-division mathematics courses with an overall grade-point average of 3.6 or better.

Students completing the program are awarded honors at graduation; if they demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper-division mathematics courses taken for the major), they are awarded highest honors. Contact the department for more information.

Mathematics/Applied Science BS

The Mathematics/Applied Science major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty adviser, design their own program. They may also select one of the established programs: mathematics/history of science plan or medical and life sciences plan. In the past, Mathematics/Applied Science majors have combined the study of mathematics with fields such as atmospheric and oceanic sciences, biochemistry, biology, chemistry, economics, geography, physics, psychology, and statistics.

Students interested in designing an individual program should meet with the undergraduate adviser, 6356 Mathematical Sciences, during their sophomore year. A proposed program is drawn up, then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

Learning Outcomes

The Mathematics/Applied Science major has the following learning outcomes:

- Strong mathematical content knowledge of single and multivariate differential and integral calculus, and differential equations
- Familiarity with linear algebra, techniques of proof, and foundations of real analysis
- Ability to synthesize material, solve problems, and think abstractly
- Ability to perform basic computer programming, especially in C++
- Familiarity with basic statistical analysis including probability distributions, random variables, survey sampling, testing, data summary, sums of squares principle, testing general linear hypothesis in regression, and inference procedures

Entry to the Major

Admission

Current UCLA students need to apply for the Mathematics/Applied Science major by filing a petition with the Student Services Office in 6356 Mathematical Sciences. All students are identified as Mathematics/Applied Science pre-majors until they satisfy the following minimum requirements for the major:

1. (1) achieve grades of C or better in all pre-major mathematics sequenced courses (Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B), (2) achieve a minimum 2.5 grade-point average in the calculus sequence with no more than two repeats, (3) complete one 12-unit term in residence in regular session at UCLA, (4) be enrolled in UCLA upper-division Honors Collegium course with history of science, and (5) file a petition to declare the major before completing 160 quarter units.

Pre-major

Students entering UCLA directly from high school or first-term transfer students who want to declare the Mathematics/Applied Science pre-major at the time they apply for admission are automatically admitted to the pre-major.

First-Year Students

To enter the major, students must petition after they have completed the six sequenced courses with a 2.5 minimum overall grade-point average, have completed one 12-unit term in residence in regular session at UCLA, are enrolled in UCLA regular session at the time of application, and before completing 160 quarter units.

Transfer Students

Transfer applicants to the Mathematics/Applied Science major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors and one C++ programming course. Additional courses are required for each concentration plan.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Student Services Office after completing one 12-unit term in residence in regular session at UCLA, and while enrolled in UCLA regular session at the time of application.

Requirements

Preparation for the Major

Required: Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Additional preparation, varying with the individual program, may be required.

The Major

Required: Fourteen courses, seven in the Mathematics Department selected from Mathematics 106 through 199 and seven upper-division courses in a related field selected from one or two other departments.

Mathematics/History of Science Plan

Preparation for the Major

Required: Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, and three courses from History 2B, 3A through 3D.

The Major

Required: Eight mathematics courses, including Mathematics 106, 115A, 131A, 134, 170A, and three courses from 110A through 199; six outside courses to be selected from History 107, Physiological Science 100, and any upper-division Honors Collegium course with history of science/media content.

Medical and Life Sciences Plan

Preparation for the Major

The Major

Required: Seven mathematics courses, including Mathematics 115A, 131A, 134, 151A, 170A, 170B, and one course from 110A through 199 and Statistics 100B through 101C; six outside courses, including Neuroscience M101A, M101B, and M101C, and three courses from Biostatistics 100A, Chemistry and Biochemistry CM160A, Computer Science CM186, Ecology and Evolutionary Biology C115A, 133, 135, Life Sciences 107, Physiological Science 100, M135, and any additional upper-division course
from these fields with consent of the administering department and the Mathematics Department.

**Computing Specialization**

 Majors may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Mathematics 61 or 180, Program in Computing 10A, 10B, two courses from 10C, 15, 16A, 20A, 40A, and at least two courses from Mathematics 149 through 159, with a minimum grade of C– in each course and a combined grade-point average of at least 2.0. Students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

**Policies**

**Preparation for the Major**

 Each course must be taken for a letter grade. The mathematics sequenced courses (Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B) are calculated separately from the other preparation for the major courses and must be completed with a minimum overall 2.5 grade-point average and a grade of C or better in each course. The other preparation courses must be completed with a minimum overall 2.0 grade-point average and a grade of C– or better in each course.

 Repetition of more than two mathematics sequenced courses or of any mathematics sequenced course more than once results in automatic dismissal from the major.

**History of Science Plan**

 Each course must be taken for a letter grade. The eight Mathematics Department courses must be completed with a minimum overall grade-point average of 2.0, with grades of C– or better in Mathematics 115A and 131A, as must the six outside courses from history, philosophy, or physiological science.

**Medical and Life Sciences Plan**

 Each course must be taken for a letter grade. The seven Mathematics Department courses must be completed with a minimum overall grade-point average of 2.0, with grades of C– or better in Mathematics 115A and 131A, as must the six outside courses.

**Mathematics for Teaching BS**

 The Mathematics for Teaching major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students planning to pursue graduate studies in mathematics or related fields are encouraged to enter the Mathematics, Applied Mathematics, or Mathematics of Computation major.

**Capstone Major**

 The Mathematics for Teaching major is a designated capstone major. In their senior year students complete a year-long course sequence that culminates in a model lesson presentation, paper, and portfolio. Through their capstone work, students demonstrate their familiarity with research and current issues in mathematics education, as well as their capacities to problem solve; reason quantitatively, geometrically, and algebraically; construct viable arguments; critique others’ reasoning; and use tools strategically.

**Learning Outcomes**

 The Mathematics for Teaching major has the following learning outcomes:

- Strong mathematical content knowledge
- Sound theoretical and practical background for mathematics expected to be taught in secondary schools
- Understanding of the importance of mathematical thinking to design teaching to imbue students with a problem-solving and analytical spirit
- Familiarity with pedagogical research and ability to apply it to classroom work
- Ability to effectively plan lessons
- Preparation and experience in different modes of instruction
- Ability to use mathematical sophistication to shape lessons

**Entry to the Major**

**Admission**

 Current UCLA students need to apply for the Mathematics for Teaching major by filing a petition with the Student Services Office in 6356 Mathematical Sciences. All students are identified as Mathematics for Teaching pre-majors until they satisfy the following minimum requirements for the major: (1) achieve grades of C or better in all pre-major mathematics sequenced courses (Mathematics 31A, 31B, 32A, 32B, 33A, 33B); (2) achieve a minimum 2.5 grade-point average in the calculus sequence with no more than two repeats; (3) complete one 12-unit term in residence in regular session at UCLA; (4) be enrolled in UCLA regular session at the time of application, and (5) file a petition to declare the major before completing 160 quarter units.

**Pre-major**

 Students entering UCLA directly from high school or first-term transfer students who want to declare the Mathematics for Teaching pre-major at the time they apply for admission are automatically admitted to the pre-major.

**First-Year Students**

 To enter the major, students must petition after they have completed the six sequenced courses with a 2.5 minimum overall grade-point average, have completed one 12-unit term in residence in regular session at UCLA, are enrolled in UCLA regular session at the time of application, and before completing 160 quarter units.

**Transfer Students**

 Transfer applicants to the Mathematics for Teaching major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one discrete structures course, one C++ programming course, and three courses from calculus-based physics, general chemistry for majors, and computing.

 Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

 After satisfying the preparation for the major requirements, students need to petition to enter the major at the Student Services Office after completing one 12-unit term in residence in regular session at UCLA, and while enrolled in UCLA regular session at the time of application.

**Requirements**

**Preparation for the Major**

 Required: Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B, 61, Physics 1A or 5A, Program
in Computing 10A, and two courses from Chemistry and Biochemistry 20A, 20B, Physics 1B, 1C, 5B, 5C, Program in Computing 10B through 97.

The Major

Required: Mathematics 106, 110A or 117, 115A, 120A or 123, 131A, 170A or Statistics 100A, Statistics 100B, one course from Mathematics 110B through 191H or Statistics 100C, one course from Mathematics 131B through 136, one course from 142 through 167, and a capstone series in the senior year (courses 105A, 105B, 105C).

Computing Specialization

Majors may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Mathematics 61 or 180, Program in Computing 10A, 10B, two courses from 10C, 15, 16A, 20A, 40A, and at least two courses from Mathematics 149 through 159, with a minimum grade of C– in each course and a combined grade-point average of at least 2.0. Students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies

Preparation for the Major

Each course must be taken for a letter grade. The mathematics sequenced courses (Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B) are calculated separately from the other preparation for the major courses and must be completed with a minimum overall 2.5 grade-point average and a grade of C or better in each course. The other preparation courses must be completed with a minimum overall 2.0 grade-point average and a grade of C– or better in each course. Repetition of more than two mathematics sequenced courses or of any mathematics sequenced course more than once results in automatic dismissal from the major.

The Major

Each course must be taken for a letter grade. The 13 courses must be completed with a minimum overall grade-point average of 2.0, with grades of C– or better in Mathematics 115A and 131A.

Undergraduate Minors

Mathematics Minor

The Mathematics minor is designed to provide students with the opportunity to widen their background and general comprehension of the role of mathematics in various disciplines.

Admission

To enter the minor, students must have completed all of the lower-division minor courses with grades of C or better (an overall grade-point average of 2.0 or better) and at least one upper-division mathematics course.

The Minor

Required Lower-Division Courses (12 units): Mathematics 32A, 33A, 33B.

Required Upper-Division Courses (20 units): At least five courses (20 units) selected from Mathematics 106 through 199.

Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade. Students must complete all lower-division courses with grades of C or better. Upper-division courses must have an overall grade-point average of 2.0 or better that is calculated separately from the lower-division courses. Successful completion of the minor is indicated on the transcript and diploma.

Mathematics for Teaching Minor

The Mathematics for Teaching minor is designed for students majoring in fields other than mathematics who plan to teach secondary mathematics after graduation. The minor recognizes completion of requisite coursework for the Joint Mathematics Education Program and also prepares students for the contents of the California Subject Examination for Teachers (CSET). Post-bachelor credentialing programs will see students with this minor have taken coursework on secondary mathematics from an advanced standpoint that is recommended by the Conference Board of the Mathematical Sciences and the California Commission on Teacher Credentialing. This minor is not open to students in any Mathematics Department major.

Admission

To enter the minor, students must have completed Mathematics 115A with a grade of C or better. If Mathematics 115A was not completed at UCLA, students must show proof that they completed an equivalent course with a grade of C or better.

The Minor

Required Upper-Division Courses (29 units): Mathematics 105A, 105B, 105C, 110A or 117, 115A, 120A or 123, 131A.

Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade with a grade of C– or better in each, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Majors

Mathematics MA, CPhil, PhD

Requirements

Offical, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Mathematics MAT

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Mathematics

Lower-Division Courses

3A. Calculus for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Preparation: three and one half years of high school mathematics (including trigonometry). Enforced requires: successful completion of Mathematics Diagnostic Test (score of 48 or better) or course 1 with grade of C– or better. Not open for credit to students with credit in another calculus sequence. Modeling with functions, limits, and derivatives, decisions and optimization in biology, derivative rules and tools. P/NP or letter grading.

3B. Calculus for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Requisite: course 3A with grade of C– or better. Not open for credit to students with credit for course 31B. Applications of differentiation, integration, differential equations, linear models in biology, phase lines and classifying equilibria. Trigonometric functions, bifurcations. P/NP or letter grading.

3C. Ordinary Differential Equations with Linear Algebra for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Requisite: course 3B with grade of C– or better. Multivariable modeling, matrices and vectors, eigenvalues and eigenvectors, linear and nonlinear systems of differential equations, probabilistic applications of integration. P/NP or letter grading.

11N. Gateway to Mathematics: Number Theory. (4) Lecture, three hours; discussion, one hour. Requisites: courses 31A, 31B. Introductory number theory course for freshmen and sophomores. Topics include prime number theory and cryptographic applications, factorization theory (in integers and Gaussian integers), Pythagorean triples, Fermat descent (for sums of squares and Fermat quartic), Pell’s equation, and Diophantine approximation. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.
31A. Differential and Integral Calculus. (4) Lecture, three hours; discussion, one hour. Preparation: at least three and one-half years of high school mathematics (including trigonometry). Requisite: successful completion of Mathematics Diagnostic Test or course 1 with grade of C– or better. Differential and integral calculus; applications; introduction to integration. P/NP or letter grading.

31BH. Integration and Infinite Series (Honors). (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 31A with grade of B or better. Honors course parallel to course 31B. P/NP or letter grading.

31E. Calculus for Economics Students. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 31A with grade of C– or better. Not open for credit to students with credit for course 3B, 3C, or 31B. Calculus for applications to economics. Partial differentiation, implicit functions, exponential and logarithmic functions, extreme optimization, constrained optimization. P/NP or letter grading.

32A. Calculus of Several Variables. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 31A with grade of C– or better. Introduction to differential calculus of several variables, vector field theory; P/NP or letter grading.

32AH-32BH. Calculus of Several Variables (Honors). (4-4) Lecture, three hours; discussion, one hour. Enforced requisite: course 32A with grade of B or better; for 32BH: courses 31B and 32A, with grades of B or better. Honors sequence parallel to courses 32A, 32B, P/NP or letter grading.

32B. Calculus of Several Variables. (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 31B and 32A, with grades of C– or better. Introduction to the calculus of several variables, line and surface integrals. P/NP or letter grading.

M32T. Essential Calculus for Mathematical Biologists. (4) (Same as Computational and Systems Biology M32 and Life Sciences M32) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 30A, 30B. Not open to students with credit for course 31A, 31B, 32A, or 32B. Designed for life sciences students. Methods and results of single and multivariable calculus essential for quantitative training in biology. Limits, differentiation (single and several variables), optimization, integration and methods of integration, Taylor polynomials and applications to approximation, Taylor series, power series, vector valued functions, gradients, and Lagrange multipliers. P/NP or letter grading.

33A. Linear Algebra and Applications. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 3B or 31B or 32A with grade of C– or better. Introduction to linear algebra: systems of linear equations, matrix algebra, linear independence, subspaces, bases and dimension, orthogonality, least-squares approximations, eigenvalues and eigenvectors, matrix diagonalization, and symmetric matrices. P/NP or letter grading.

33AH. Linear Algebra and Applications (Honors). (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 3B or 31B or 32A with grade of B or better. Honors course parallel to course 33A. P/NP or letter grading.

33B. Differential Equations. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 31B with grade of C– or better. Highly recommended: course 32B. Differential equations of second-order, linear differential equations with constant coefficients; power series solutions; linear systems. P/NP or letter grading.

42. Introduction to Data-Driven Mathematical Modeling. (4) Lecture, three hours; discussion, one hour. Requisites: courses 31A, 31B, 32A, 32B, 33A, one statistics course from Statistics 10 or 12, one programming course from Computer Science 10A, 10B, 10E, 67A, 67B, 67E, and 70A. Data-driven mathematical modeling involving correlation of phenomena from various applications, from experimentation to formulation of data visualization, nondimensionalization and order-of-magnitude physics, introduction to discrete and continuous dynamical systems, and introduction to discrete and continuous stochastic models. Examples drawn from many fields and practice problems from Mathematical Contest in Modeling. P/NP or letter grading.

61. Introduction to Discrete Structures. (4) Lecture, three hours; discussion, one hour. Requisites: courses 31A or 32A, 31B, 32B, 33A. Introduction to discrete mathematics, including sets and relations, permutations and combinations, graphs and trees, algorithms and formal language theory. P/NP or letter grading.

70. Introduction to Probability. (4) Lecture, three hours; discussion, one hour. Requisites: courses 31A, 31B, 32A, 32B, 33A. Introduction to probability through applications and examples. Topics include laws of large numbers, statistical independence, Bayes’ rule, continuous and discrete random variables, jointly distributed random variables, multivariate normal and conditional distributions. In-depth discussion of betting schemes in gambling, occurrence of rare events, coincidences, and statistical predictions. P/NP or letter grading.

73XP. Key Issues in K-12 Mathematics. (3) Formerly numbered 73SCL). Seminar, two hours; fieldwork, two hours. Introduction to K-12 mathematics activity in U.S. Cultivation of interest in teaching through exploration of sequences of mathematical content and habits of mind taught in K-12. Analysis of sequences of topics in current California State Standards in Mathematics (CCSS-M), mathematical structures that underlie these sequences, and cognitive aspects of learning mathematics with pre-service and practicing mathematician’s habits of mind outlined in CCSS-M (including proof and mathematical modeling), and effective strategies for teaching mathematics to diverse student populations. Taught in mathematics classroom arranged by Cal Teach program. P/NP grading.

74XP. Mathematics and Pedagogy for Teaching Elementary Mathematics. (3) (Formerly numbered 74SCL). Seminar, two hours; fieldwork, two hours. Development of professional mathematical and pedagogical understandings required to teach California’s K-5 mathematics curriculum. Exploration of K-5 mathematics, practice of effective teaching strategies for all learners, and discussion of current research and standards in mathematics education. Fieldwork in local mathematics classrooms (observation and presenting lesson plan) arranged by Cal Teach program. P/NP grading.

75XP. Mathematics and Pedagogy for Teaching Middle School Mathematics. (3) Seminar, two hours; off-campus classroom observation and participation, two hours. Facilitating development of professional mathematical and pedagogical understandings required to teach California middle school mathematics curriculum. Exploration of topics in grades six through eight. Includes personal and pedagogical reflective practice with effective teaching strategies for all learners, and discussion of current research and standards in mathematics education. Clinical practice in local middle school classrooms arranged by Cal Teach program. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

90HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics of greater depth. Dependent readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grade only.

94. Mathematical Outreach: Explorations of Mathematics in the Physical World. (6) Lecture, twelve hours; discussion one hour. Preparation: three years of high school mathematics (to algebra II), some basic familiarity with computers. Uses inquiry-based mathematical modeling as a tool for understanding dynamics of physical systems and chemical processes. Fundamental concepts of single-variable calculus and models of dynamical processes in physics, chemistry, and other subjects in which quantities change with time. Use of computer program C++ for problem solving, plotting, and dynamical simulation in the laboratory. Preparation of correlation of phenomena from various applications, from experimentation to formulation of data visualization, nondimensionalization and order-of-magnitude physics, introduction to discrete and continuous dynamical systems, and introduction to discrete and continuous stochastic models. Examples drawn from many fields and practice problems from Mathematical Contest in Modeling. P/NP or letter grading.

95. Transition to Upper-Division Mathematics. (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 32A, 32B. Not open for credit to students with credit for course 131A or 132. Transition to rigorous methods of proof-based upper-division mathematics courses. Basic logic; structure of mathematical proofs; sets, functions, and cardinality; natural numbers and induction; construction of real numbers; topology of real numbers; sequences and convergence; continuity. May not be applied toward major requirements. P/NP or letter grading.

97. Variable Topics in Mathematics. (4) Lecture, three hours; discussion, one hour. Study of selected topics in mathematics at introductory level. P/NP or letter grading.

98XA. PEERS Collaborative Learning Workshops for Life Sciences Majors. (1) Laboratory, three hours. Corequisite: associated undergraduate lecture course in mathematics for life sciences majors. Limited to Program for Excellence in Education and Research in Sciences (PEERS) students. Introduction to intuition and problem-solving skills in collaborative learning environment. May be repeated four times, but only 1 unit may be applied toward graduation. P/NP grading.

98XB. PEERS Collaborative Learning Workshops for Physical Sciences and Engineering Majors. (1) Laboratory, three hours. Corequisite: associated undergraduate lecture course in mathematics for physical sciences and engineering majors. Limited to Program for Excellence in Education and Research in Science (PEERS) students. Development of intuition and problem-solving skills in collaborative learning environment. May be repeated four times, but only 1 unit may be applied toward graduation. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

General and Teacher Training

100. Problem Solving. (4) Lecture, three hours. Requisites: course 31B with grade of C– or better. Problem solving techniques and mathematical modeling useful as preparation for Putnam Examination and similar competitions. Continued fractions, inequalities, modular arithmetic, closed form evaluation of sums and products.

634 / Mathematics

current research for teaching secondary school mathematics. May be repeated for maximum of 12 credits. P/NP or letter grading.

121. Introduction to Topology. (4) Requisite: course 131A. Metric and topological spaces, completeness, compactness, connectedness, functions, continuity, homeomorphisms, topological properties.

Analysis

131AH-131BH. Analysis (Honors). (4–4) Lecture, three hours; discussion, one hour. Requisite for course 131AH: courses 32B and 33B, with grades of B or better. Recommended: course 115A. Honors sequence parallel to courses 131A, 131B. P/NP or letter grading.

131C. Topics in Analysis. (4) Lecture, three hours; discussion, one hour. Requisites: courses 131A, 131B. Advanced topics in analysis, such as Lebesgue integral, integration on manifolds, harmonic analysis. Content varies from year to year. May be repeated by credit by petition.

132. Complex Analysis for Applications. (4) Lecture, three hours; discussion, one hour. Requisite: courses 32B, 33B. Introduction to basic formulas and calculations of complex analysis of one variable relevant to applications. Topics include Cauchy/Plancherel formulas, Cauchy integral formula, power series expansion, contour integrals, residue calculus.

132H. Complex Analysis (Honors). (4) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B, and 131A, with grades of B or better. Specifically designed for students who have strong commitment to pursue graduate studies in mathematics. Introduction to complex analysis, with more emphasis on proofs. Honors course parallel to course 132. P/NP or letter grading.

133. Introduction to Fourier Analysis. (4) Lecture, three hours; discussion, one hour. Requisites: courses 33B, 33A, 131A. Fourier series, Fourier transform in several variables, and several applications. Applications, in particular, to solving differential equations. Fourier inversion formula, Plancherel theorem, convergence of Fourier series, convolution. P/NP or letter grading.

136. Partial Differential Equations. (4) Lecture, three hours; discussion, one hour. Requisites: courses 33A, 33B. Linear partial differential equations, boundary and initial value problems; wave equation, heat equation, and Laplace equation; separation of variables; trigonometric expansions; selected topics, as method of characteristics for nonlinear equations.

Applied Mathematics

142. Mathematical Modeling. (4) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Introduction to fundamental principles and spirit of applied mathematics. Emphasis on manner in which mathematical models are constructed for physical problems. Illustrations from many fields of endeavor, such as physical sciences, biology, economics, and traffic dynamics.

146. Methods of Applied Mathematics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Integral equations, Green's function, and calculus of variations. Selected applications from control theory, optics, dynamical systems, and other engineering problems. P/N or letter grading.

M148. Experience of Data Science. (4) (Same as Statistics M148) Lecture, four hours. Requisites: courses 118, 131A, 156 or Statistics 101C, 170S or Statistics 100B, Statistics 101A. Students solve real data science problems for community- or campus-based clients. Students work in small groups with faculty member and client to frame client's question in a data science context, using mathematical models, analyzing data, and reporting results. Students may elect to undertake research on foundations of data science, studying advanced topics and writing senior thesis with discussion of findings or survey of literature on chosen foundational topic. Development of collaborative skills, communication principles, and discussion of ethical issues. Letter grading.

151AH. Experience of Data Science. (4) Lecture, four hours. Requisites: courses 118, 131A, 156 or Statistics 101C, 170S or Statistics 100B, Statistics 101A. Students solve real data science problems for community- or campus-based clients. Students work in small groups with faculty member and client to frame client's question in a data science context, using mathematical models, analyzing data, and reporting results. Students may elect to undertake research on foundations of data science, studying advanced topics and writing senior thesis with discussion of findings or survey of literature on chosen foundational topic. Development of collaborative skills, communication principles, and discussion of ethical issues. Letter grading.

151AH. Experience of Data Science. (4) Lecture, four hours. Requisites: courses 118, 131A, 156 or Statistics 101C, 170S or Statistics 100B, Statistics 101A. Students solve real data science problems for community- or campus-based clients. Students work in small groups with faculty member and client to frame client's question in a data science context, using mathematical models, analyzing data, and reporting results. Students may elect to undertake research on foundations of data science, studying advanced topics and writing senior thesis with discussion of findings or survey of literature on chosen foundational topic. Development of collaborative skills, communication principles, and discussion of ethical issues. Letter grading.

151AH. Experience of Data Science. (4) Lecture, four hours. Requisites: courses 118, 131A, 156 or Statistics 101C, 170S or Statistics 100B, Statistics 101A. Students solve real data science problems for community- or campus-based clients. Students work in small groups with faculty member and client to frame client's question in a data science context, using mathematical models, analyzing data, and reporting results. Students may elect to undertake research on foundations of data science, studying advanced topics and writing senior thesis with discussion of findings or survey of literature on chosen foundational topic. Development of collaborative skills, communication principles, and discussion of ethical issues. Letter grading.

151AH. Experience of Data Science. (4) Lecture, four hours. Requisites: courses 118, 131A, 156 or Statistics 101C, 170S or Statistics 100B, Statistics 101A. Students solve real data science problems for community- or campus-based clients. Students work in small groups with faculty member and client to frame client's question in a data science context, using mathematical models, analyzing data, and reporting results. Students may elect to undertake research on foundations of data science, studying advanced topics and writing senior thesis with discussion of findings or survey of literature on chosen foundational topic. Development of collaborative skills, communication principles, and discussion of ethical issues. Letter grading.

151AH. Experience of Data Science. (4) Lecture, four hours. Requisites: courses 118, 131A, 156 or Statistics 101C, 170S or Statistics 100B, Statistics 101A. Students solve real data science problems for community- or campus-based clients. Students work in small groups with faculty member and client to frame client's question in a data science context, using mathematical models, analyzing data, and reporting results. Students may elect to undertake research on foundations of data science, studying advanced topics and writing senior thesis with discussion of findings or survey of literature on chosen foundational topic. Development of collaborative skills, communication principles, and discussion of ethical issues. Letter grading.

151AH. Experience of Data Science. (4) Lecture, four hours. Requisites: courses 118, 131A, 156 or Statistics 101C, 170S or Statistics 100B, Statistics 101A. Students solve real data science problems for community- or campus-based clients. Students work in small groups with faculty member and client to frame client's question in a data science context, using mathematical models, analyzing data, and reporting results. Students may elect to undertake research on foundations of data science, studying advanced topics and writing senior thesis with discussion of findings or survey of literature on chosen foundational topic. Development of collaborative skills, communication principles, and discussion of ethical issues. Letter grading.
Science 180. Graphs, greedy algorithms, divide and conquer algorithms, dynamic programming, network flow. Emphasis on designing efficient algorithms useful in diverse areas such as bioinformatics and allocation of resources. P/NP or letter grading.

Special Studies

188A. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188C. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188B. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 883 course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate seminar course in modern mathematics. Exploration of topics greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

190HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

203. Master’s Linear Algebra. (4) Lecture, four hours; discussion, one hour. Rigorous treatment of fundamental results of pure and applied linear algebra over fields. Application to cryptography. Preparation for linear algebra portion of UCLA Mathematics Basic Examination that is required of MA and PhD students. S/U or letter grading.

204. Master’s Analysis. (4) Lecture, four hours; discussion, one hour. Rigorous treatment of fundamental results of pure and applied linear algebra over fields. Application to cryptography. Preparation for linear algebra portion of UCLA Mathematics Basic Examination that is required of MA and PhD students. S/U or letter grading.

Number Theory

205A-205B-205C. Number Theory. (4–4–4) Lecture, three hours. Requisites: courses 210A, 246A. Algebraic number theory, including ideal theory, valuations, local fields, cyclotomic fields. Introduction to classical field theory, analytic number theory, L-functions and class number formulas, and modular forms. S/U or letter grading.

207A-207B-207C. Topics in Number Theory. (4–4–4) Lecture, three hours. Admission to analysis on GL(1) and GL(2), especially Tate thesis and Hecke theory, automorphic representations. Special values of L-functions and p-adic L-functions, arithmetic theory of modular forms, advanced topics in analytic number theory. Arithmetic geometry, especially of modular curves. S/U or letter grading.

M209. Cryptography. (4) (Same as Computer Science M282A) Lecture, four hours; outside study, eight hours. Introduction to theory of cryptography, stressing rigorous definitions and proofs of security. Topics include notations of basic principles, advanced cryptosystems, domain-specific principles based on current education research, assist
Algebra

210A-210B-210C. Algebra. (4–4–4) Requisites: courses 110A, 110B, 110C. Students with credit for courses 110B and/or 110C cannot receive MA degree credit for courses 210B and/or 210C. Group theory, including the theory of rings and Jordan/Hermitian/Riemannian forms. Groups and rings, ideals, factorization theory in integral domains, modules over principal ideal rings, Galois theory of fields, multilinear algebra, structure of algebras.

211. Structure of Rings. (4) Requisite: course 210A. Radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

212B. Homological Algebra. (4) Lecture, three hours. Requisites: courses 210A, 210B, 210C, 212A. Advanced topics in modern homological algebra, such as triangulated categories, differential graded algebras as dg-categories, tilting theory and applications of group cohomology to representation theory, stack categories and modular representation theory, and other current topics. S/U or letter grading.

213A-213B. Theory of Groups. (4–4) Requisite: course 210A. Topics include representation theory, transfer in Abelian groups, free products and presentations of groups, soluble and nilpotent groups, classical groups, algebraic groups.

M217. Geometry and Physics. (4) (Same as Physics M236.) Lecture, three hours. Interdisciplinary course on topics at interface between mathematics and physics, quantum fields and superstrings and mathematics of differential and algebraic geometry. Topics include supersymmetry, Seiberg/Witten theory, conformal field theory, Calabi/You manifold, mirror symmetry and duality, integrable systems. S/U grading.

218C. Topics in Discrete Mathematics. (4) Lecture, three hours. Emphasis on algebraic and Jordan/Hermitian/Riemannian methods and character methods, and applications of group cohomology to representation theory, stack categories and modular representation theory, and other current topics. S/U or letter grading.

Logic and Foundations

220A-220B-220C. Mathematical Logic. (4–4–4) Lecture, three hours. Requisite: course M114S. Fundamental methods and results in mathematical logic, using mathematical methods to reason about existence or nonexistence of proofs and computations in many different settings. Topics include compactness theorem, saturation of models, completeness and incompleteness theorems of Godel, Turing computability and degrees, recursion in Baire space, Zermelo-Fraenkel axioms, universe of constructible sets, and related equiconsistency results in set theory. S/U or letter grading.

222A-222B. Lattice Theory and Algebraic Systems. (4–4) Lecture, three hours. Requisite: course 210A. Partially ordered sets, lattices, distributivity, modularity; completeness; interplay between combinatorics, topology, and logic; algebraic systems, congruence lattices, subdirect decomposition, congruence lattices, equationable bases, applications to lattices.

223C. Topics in Computability Theory. (4) Lecture, three hours. Requisites: courses 220A, 220B. Degrees of unsolvability, recursively enumerable sets; undecidable theories; inductive definitions, admissible sets and ordinals; recursion in higher types; recursion and complexity. Topics vary from year to year. May be repeated for credit with consent of instructor. S/U or letter grading.

223D. Topics in Descriptive Set Theory. (4) Lecture, three hours. Requisites: courses 220A, 220B. Classical and effective results on Borel and projective sets; infinitary games of perfect information and principle of determinacy; consequences of determinacy, including periodicity, structure theory of pointclasses, and partition properties. Topics vary from year to year. May be repeated for credit with consent of instructor. S/U or letter grading.

223M. Topics in Model Theory. (4) Lecture, three hours. Requisites: courses 220A, 220B, 220C. Classical and effective results on Borel and projective sets; infinitary games of perfect information and principle of determinacy; consequences of determinacy, including periodicity, structure theory of pointclasses, and partition properties. Topics vary from year to year. May be repeated for credit with consent of instructor. S/U or letter grading.

Geometry and Topology

225A. Differential Topology. (4) Lecture, three hours. Focus on differential topology, including topics such as smooth manifolds, vector fields and integral curves, Sard theorem, function spaces of polynomials and tensor product methods, eigenvalues of graphs and their application, combinatorial Nullstellensatz and Chevalley/Warning theorem. May be repeated for credit with consent of instructor. S/U or letter grading.
Functional Analysis

255B-255C. Topics in Functional Analysis. (4) Requisite: course 255A. Topics include Banach algebras, operators on Banach and Hilbert space, semigroups of operators, linear topological vector spaces, and other related remarks. Cauchy integral formula and residue calculus in a complex course.

Applied Mathematics

266D-266E. Applied Differential Equations. (4) Requisites: courses 266A, 266B, 266C. Advanced topics in linear and nonlinear partial differential equations, with emphasis on energy estimates, numerical methods, and applications to fluid mechanics. Additional topics include dispersive waves, systems with multiple time scales, and applications to fluid mechanics.

267A. Tensor Analysis. (4) Requisite: course 268A. Tensor analysis in Euclidean space and its applications to geometry and differential equations. Topics may vary from year to year. May be repeated for credit by petition.

271D. Wave Mechanics. (4) General concepts of mechanical systems (states, space-time, logic, etc.). Classical and quantum examples. Correspondence principle.

272B. Mathematical Aspects of Fluid Mechanics. (4) Lecture, three hours. Requisite: course 272A. Review of basic theory of moving continua, fluid equations, similarity solutions, WKB theory created by slowly moving bodies, flows where viscosity is negligible, vortices, boundary layers and their separation, water waves, ship waves, compressional waves, shock waves, turbulence theory (overview).

273C. Optimization and Calculus of Variations: Numerical Optimization. (4) Lecture, three hours. Derivation, analysis, and implementation of numerical methods for constrained and unconstrained optimization problems of variety of types and with data at different scales. S/U or letter grading.

Probability and Statistics

275E. Stochastic Particle Systems. (4) Lecture, three hours. Requisite: course 275C. Interacting particle systems, including contact process, stochastic Ising model, and exclusion processes; percolation theory. S/U or letter grading.

276. Topics in Network Science. (4) Lecture, three hours. Requisites: courses 115A, 170A. Interesting and popular areas of network science. Topics vary from year to year and may include dynamical processes on networks, structure of social networks, time-dependent networks, multilayer networks, applications of networks, data analysis in networks, spatial networks, and others. Discussion of recent review articles and proposed statements by students. Project joint topic on network science possibly leading to publication. S/U or letter grading.

Special Studies

280. Programming++ for Mathematics Graduate Students. (4) Lecture, three hours. Preparation: programming experience in at least one programming language. Limited to graduate students. Students gain knowledge of core programming language concepts, core operating system constructs, and core computational hardware constructs in order to become proficient in object-oriented software construction and design in compiled language, and be able to rapidly learn new programming language for future activities. Students go beyond writing short programs or scripts that invoke preexisting high-level functionality to capability of creating any high-level functionality using object oriented software constructs and techniques. Emphasis on practice of programming rather than theory of problem solving algorithms. Emphasis on programming environment details, both software and hardware. S/U grading.

285A-285N. Seminars. (4–4) Seminar, three hours. No more than two 285 courses may be applied toward MA degree requirements. Prior consent of graduate vice chair. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with staff members. S/U or letter grading.

285B. Probability. Emphasis on algorithmic efficiency; advanced features of functional hardware constructs in order to become proficient in object-oriented software construction and design in compiled language, and be able to rapidly learn new programming language for future activities. Students go beyond writing short programs or scripts that invoke preexisting high-level functionality to capability of creating any high-level functionality using object oriented software constructs and techniques. Emphasis on practice of programming rather than theory of problem solving algorithms. Emphasis on programming environment details, both software and hardware. S/U grading.

290A. Introduction to Programming. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. No prior programming experience assumed. Basic principles of programming, using C++, algorithmic, procedural problem solving; program design and development; basic data types, control structures and functions; functional arrays and pointers; introduction to classes for programmer-defined data types. P/NP or letter grading.

290B. Intermediate Programming. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Requisite: course 10A or Computer Science 31. Abstraction and data structuring techniques; additional emphasis on algorithmic efficiency; advanced features of C++, such as inheritance and virtual functions; graph algorithms. P/NP or letter grading.

Program in Computing Lower-Division Courses

10A. Introduction to Programming. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. No prior programming experience assumed. Basic principles of programming, using C++, algorithmic, procedural problem solving; program design and development; basic data types, control structures and functions; functional arrays and pointers; introduction to classes for programmer-defined data types. P/NP or letter grading.

10B. Intermediate Programming. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Requisite: course 10A or Computer Science 31. Abstraction and data structuring techniques; additional emphasis on algorithmic efficiency; advanced features of C++, such as inheritance and virtual functions; graph algorithms. P/NP or letter grading.
110. Parallel and Distributed Computing. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Requisite: course 10B or equivalent familiarity with programming in C or C++ language. Introduction to programming of parallel computers. Shared and distributed memory parallel architectures; currently available parallel machines; parallel algorithms and program development; estimation of algorithmic performance; distributed computing; selected advanced topics. P/NP or letter grading.

130. Cryptography. (4) Lecture, three hours; discussion, one hour; laboratory, three hours. Requisites: course 108, Mathematics 115A. Design and analysis of cryptosystems for confidentiality and authentication. Classical cryptosystems and their security, modern private-key cryptosystems and applications, public-key cryptography and applications; generating prime numbers, factoring integers, discrete logarithms, digital signatures, perfect secrecy. P/NP or letter grading.

187. Advanced Variable Topics in Programming. (4) Lecture, three hours; discussion, one hour. Variable topics in programming and mathematics of programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

285G. Participating Seminar: Logic and Theory of Computation. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for seminar and discussion by staff and students. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for seminar and discussion by staff and students. S/U grading.

Graduate Courses
Entry to the Major

Admission
Current UCLA students need to apply for the Mathematics/Economics major by filing a petition with the Student Services Office in 6356 Mathematical Sciences. All students are identified as Mathematics/Economics pre-majors until they satisfy the following minimum requirements for the major: (1) achieve grades of C or better in all pre-major mathematics sequenced courses (Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A) with a minimum 2.7 grade-point average and no more than two repeats, (2) achieve grades of C or better in all pre-major economics courses (Economics 1, 2, 11) with a minimum 2.7 grade-point average and no more than one repeat, (3) complete one 12-unit term in residence in regular session at UCLA, (4) be enrolled in UCLA regular session at the time of application, and (5) file a petition to declare the major before completing 160 quarter units.

Pre-major
Students entering UCLA directly from high school or first-term transfer students who want to declare the Mathematics/Economics pre-major at the time they apply for admission are automatically admitted to the pre-major.

First-Year Students
To enter the major, students must petition after they have completed the six sequenced courses with a 2.7 minimum overall grade-point average, have completed one 12-unit term in residence in regular session at UCLA, are enrolled in UCLA regular session at the time of application, and before completing 160 quarter units.

Transfer Students
Transfer applicants to the Mathematics/Economics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one introduction to discrete structures course, one microeconomic theory course, one macroeconomic course, and one C++ programming course.

Transfer credit for any of the above is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Student Services Office after completing one 12-unit term in residence in regular session at UCLA, and while enrolled in UCLA regular session at the time of application.

Requirements

Preparation for the Major
Required: Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B, 61, Economics 1, 2, 11, Program in Computing 10A, one Writing II course.

The Major
Required: Eight mathematics courses, including Mathematics 115A, 131A, 131B, 164, 170E, 170S, 174E (or Economics 141 or Statistics C183), and one elective course from Mathematics 134, 135, 136, or 171; six economics courses, including Economics 101, 102, 103, 103L, and two additional courses from 106E through 199B.

Honors Program
To qualify for honors at graduation, students must (1) complete Mathematics 115AH, 131AH, and 131BH, (2) complete Economics 198A and 198B (the thesis process requires enrollment in a two-term sequence for economics courses), (3) present the thesis in Economics 198B, and (4) complete the major requirements with a minimum 3.5 grade-point average in both the upper-division economics and mathematics courses.

Computing Specialization
Majors in Mathematics/Economics may select a Computing specialization by (1) satisfying all the requirements for a bachelor’s degree in the major; and (2) completing Mathematics 61 or 180, Program in Computing 10A, 10B, two courses from 10C, 15, 16A, 20A, 40A, and at least two courses from Mathematics 149 through 159, with a minimum grade of C– in each course and a combined grade-point average of at least 2.0. Students must petition for admission to the program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Mathematics Department Student Services Office).

Students graduate with a bachelor’s degree in mathematics/economics and a specialization in Computing.

Policies

Preparation for the Major
Each course must be taken for a letter grade. The economics preparation for the major courses (Economics 1, 2, 11) are calculated separately from the mathematics preparation for the major courses (Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A). The economics preparation courses must be completed with a minimum overall 2.7 grade-point average and a grade of C or better in each course, as must the mathematics preparation courses. Students must receive a grade of C or better in the Writing II course.

Repetition of more than one economics preparation course, more than two mathematics preparation courses, or of any economics or mathematics preparation course more than once results in automatic dismissal from the major.

The Major
Each course must be taken for a letter grade. Transfer credit is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major.

To graduate, the eight Mathematics Department courses must be completed with an overall grade-point average of 2.0, with grades of C– or better in Mathematics 115A and 131A, as must the five courses from the Economics Department, with grades of C– or better in Economics 101 and 102.

Honors Program
Students who wish to graduate with departmental honors should apply for admission to the honors program in the Mathematics Department Student Services Office. They may apply any time after completing the preparation for the major courses and meeting the following requirements: (1) be officially enrolled in the Mathematics/Economics major, (2) complete all the preparation for the major courses, (3) achieve a minimum 3.5 grade-point average in the mathematics preparation for the major courses, (4) achieve a minimum 3.5 grade-point average in the economics preparation for the major courses, and (5) achieve a minimum 3.5 grade-point average in Economics 11, 101, and 102.

Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

The Department of Mechanical and Aerospace Engineering offers curricula in Aerospace Engineering and Mechanical Engineering at both the undergraduate and graduate levels. The scope of the departmental research and teaching program is broad, encompassing design, robotics, and manufacturing; fluid mechanics; micro-nano engineering; structural and solid mechanics; systems control; and thermal science and engineering. The applications of mechanical and aerospace engineering are quite diverse, including aircraft, spacecraft, automobiles, energy and propulsion systems, robotics, machinery, manufacturing and materials processing, microelectronics, biological systems, and more.

Overview

The aerospace engineering program is concerned with the design and construction of various types of fixed-wing and rotary-wing (helicopters) aircraft used for air transportation and national defense. It is also concerned with the design and construction of spacecraft, the exploration and utilization of space, and related technological fields.

Aerospace Engineering is characterized by a very high level of technology. The aerospace engineer is likely to operate at the forefront of scientific discoveries, often stimulating these discoveries and providing the inspiration for the creation of new scientific concepts. Meeting these demands requires the imaginative use of many disciplines, including fluid mechanics and aerodynamics, structural mechanics, materials and aeronautical, and control and guidance, propulsion, and energy conversion.

The aerospace engineering program is accredited by the Engineering Accreditation Commission of ABET.

Capstone Major

The Aerospace Engineering major is a designated capstone major. Within their capstone courses, Aerospace Engineering students are exposed to the conceptual and design phases for aircraft development and produce a structural design of a component, such as a light-weight aircraft wing. Graduates should be able to apply their knowledge of mathematics, science, and engineering in technical systems; design a system, component, or process to meet desired needs; function as productive members of a team; identify, formulate, and solve engineering problems; and communicate effectively, both orally and in writing.

Learning Outcomes

The Aerospace Engineering major has the following learning outcomes:

• Application of knowledge of mathematics, science, and engineering
• Function as a productive member of a team that considers multiple aspects of an engineering problem
• Design of a system, component, or process to meet desired needs
• Effective oral and written communication
• Identification, formulation, and solution of engineering problems

Requirements

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A; Mechanical and Aerospace Engineering M20 (or Computer Science 31), 82; Physics 1A, 1B, 4A, 4BL.

The Major

Required: Mechanical and Aerospace Engineering 1, 101, 102, 103, 105A, 105D, 107, 150A, 157, 166A, 171A; two departmental breadth courses (Electrical and Computer Engineering 100 and Materials Science and Engineering 104—if one or both of these courses are taken as part of the technical breadth requirement, students must select a replacement upper-division course or courses from the department—except for Mechanical and Aerospace Engineering 156A—or, by petition, from outside the department); one of the following two tracks (16 units): aeronautics (150B, C150P, 154A, 154S) or space (C150R, 161A, 161B, 161C); three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; one capstone design course (Mechanical and Aerospace Engineering 157A); one major field elective course (4 units) from the track not chosen (150B or C150P; C150R or 161A) and one major field elective course (4 units) from Mechanical and Aerospace Engineering 150B, C150R, 154S, 161A, 161B, 161C (unless taken as a required course), or from 94, 131A, C131G, 133A, 135, C136, C137, C138, CM140, 150C, 150G, 154B, 155, 156B, 162A, C162B, C163A, C163B, C163C, 166C, M168, 169A, 171B, 172, 174, C175A, 181A, 182B, 182C, 183A, M183B, C183C, 185, C186, C187L.

For information on UC, school, and general education requirements, see the Samueli school section in College and Schools.

Mechanical Engineering BS

The mechanical engineering program is designed to provide basic knowledge in thermodynamics, fluid mechanics, heat transfer, solid mechanics, mechanical design, dynamics, control, mechanical systems, manufacturing, and materials. The program includes fundamental subjects important to all mechanical engineers.
The mechanical engineering program is accredited by the Engineering Accreditation Commission of ABET.

**Capstone Major**

The Mechanical Engineering major is a designated capstone major. Within their capstone courses, Mechanical Engineering students work in teams to propose, design, analyze, and build a mechanical or electromechanical device. Graduates should be able to apply their knowledge of mathematics, science, and engineering in technical systems; design a system, component, or process to meet desired needs; function as productive members of a team; identify, formulate, and solve engineering problems; and communicate effectively, both orally and in writing.

**Learning Outcomes**

The Mechanical Engineering major has the following learning outcomes:

- Application of knowledge of mathematics, science, and engineering
- Function as a productive member of a team that considers multiple aspects of an engineering problem
- Design of a system, component, or process to meet desired needs
- Effective oral and written communication
- Identification, formulation, and solution of engineering problems

**Requirements**

**Preparation for the Major**

*Required:* Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A; Mechanical and Aerospace Engineering M20 (or Computer Science 31), 82, 94; Physics 1A, 1B, 1C, 4AL, 4BL.

**The Major**

*Required:* Electrical and Computer Engineering 110L, Mechanical and Aerospace Engineering 101, 102, 103, 105A, 105D, 107, 131A or 133A, 156A, 157, 162A, 171A, 183A (or M183B); two departmental breadth courses (Electrical and Computer Engineering 100 and Materials Science and Engineering 104)—if one or both of these courses are taken as part of the technical breadth requirement, students must select a replacement upper-division course or courses from the department—except for Mechanical and Aerospace Engineering 166A—or, by petition, from outside the department; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; two capstone design courses (Mechanical and Aerospace Engineering 162D, 162E); and two major field elective courses (8 units) from Mechanical and Aerospace Engineering 131A (unless taken as a required course), C131G, 133A (unless taken as a required course), 135, C136, C137, C138, C1410, 150A, 150B, 150C, C150G, C150P, C150R, 154B, 154S, 155, C156B, 157A, 161A, 161B, 161C, C162B, C163A, C163B, C163C, 166C, 166B, 166A, 171B, 172, 174, C175A, 181A, 182B, 182C, 183A (unless taken as a required course), M183B (unless taken as a required course), C183C, 185, C186, C187L.

For information on UC, school, and general education requirements, see the Samuels book section in College and Schools.

**Graduate Majors**

**Aerospace Engineering MS, PhD**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Manufacturing Engineering MS**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Mechanical Engineering MS, PhD**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Mechanical and Aerospace Engineering Lower-Division Courses**

1. **Undergraduate Seminar.** (1) Seminar, one hour; outside study, two hours. Introduction by faculty members and industry lecturers to mechanical and aerospace engineering disciplines through current and emerging applications in aerospace, medical instrumentation, automotive, entertainment, energy, and manufacturing industries. P/NP grading.
2. **Fiat Lux Freshman Seminars.** (1) Seminar, one hour: Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating topics of current intellectual importance. Offered concurrently to General Education M20. P/NP grading.

**Mechanical and Aerospace Engineering Upper-Division Courses**

**2. Dynamics of Particles and Rigid Bodies.** (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 101, Mathematics 33A, Physics 1A. Fundamental concepts of Newtonian mechanics and Newton’s laws of motion. Kinematics and dynamics of particles and rigid bodies in two and three dimensions. Impulse-momentum and work-energy relationships. Applications. Letter grading.

**3. Elementary Fluid Mechanics.** (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Mathematics 32B, 33A, Physics 1B. Introductory course dealing with application of principles of mechanics to flow of compressible and incompressible fluids. Letter grading.

**4. Introduction to Engineering Thermodynamics.** (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Chemistry 20B, Mathematics 32B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. Letter grading.

**5. Transport Phenomena.** (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 82, 103, 105A. Transport phenomena: heat conduction, mass species diffusion, convective heat and mass transfer, and radiation. Engineering applications in thermal and environmental control. Letter grading.

**6. Introduction to Modeling and Analysis of Dynamic Systems.** (4) Lecture, four hours; discussion, one hour; laboratory, two hours; outside study, five hours. Enforced requisites: courses M20 (or Computer...
C131G. Microscopic Energy Transport. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses M20 (or Civil Engineering M20 or Computer Science 31), B2, 105D. Steady conduction; transient, large signal response; Black diagram representation and response of interconnected systems. Hands-on experiments reinforcement. Letter grading.

C131A. Intermediate Heat Transfer. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses M20 (or Civil Engineering M20 or Computer Science 31), B2, 105D. Steady conduction; transient, large signal response. Block diagram representation and response of interconnected systems. Hands-on experiments reinforcement. Letter grading.

C150R. Experimental Illustration of Important Physical Concepts. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses M20 (or Civil Engineering M20 or Computer Science 31), B2, 105D. Steady conduction; transient, large signal response. Block diagram representation and response of interconnected systems. Hands-on experiments reinforcement. Letter grading.

C154S. Flight Mechanics, Stability, and Control of Aircraft. (4) Lecture, four hours; discussion, two hours; outside study, seven hours. Requisites: courses 150A, 150B. Aircraft performance, flight mechanics, stability, and control; some basic ingredients needed for design. Emphasis on shape flexibility on stability derivatives. Letter grading.

C155. Intermediate Dynamics. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 102. Axioms of Newtonian mechanics, Lagrange equation, variational principles; central force motion; kinematics and dynamics of rigid bodies. Euler equations, motion of rotating bodies, oscillatory motion, non-coordinate relativity. Letter grading.

C156A. Advanced Strength of Materials. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 201, 202. Not open to students with credit for course 166A. Concepts of stress, transducers, recording equipment, signal processing, data analysis. Letter grading.

C161A. Introduction to Aeronautics. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 102. Recommended: course 150A or 150B, 156A, 156B. Experimental Illustration of Important Physical Concepts. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 150A or 156A. Material selection, design using composite materials. Design for fatigue prevention and structural optimization. Field trips to aerospace companies. Letter grading.

C161B. Preliminary Design and Analysis of Spacecraft. (4) Lecture, four hours; discussion, two hours; outside study, eight hours. Requisite: course 102 or equivalent. The design of hardware for spacecraft and related structures. External loads, internal stresses. Applied theory of thin-walled structures. Material selection, design using composite materials. Design for fatigue prevention and structural optimization. Field trips to aerospace companies. Letter grading.

C150P. Aircraft Propulsion Systems. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 102. Axioms of Newtonian mechanics, Lagrange equation, variational principles. Vertical and horizontal flight. Space mission design involving computer-aided design (CAD) and finite element analysis (FEA) modeling. Letter grading.

C162B. Compliant Mechanism Design. (4) Lecture, four hours; outside study, eight hours. Requisite: Linear algebra. Design of compliant mechanisms that mimic biological systems. Modeling techniques, optimization tools. Fundamentals of flexible constraint theory, principles of constraint-based design, projective geometry, solid mechanics and freedom models.CAD and FEA simulation tools. Hands-on exercises include build-your-own flexure kits, CAD and FEA simulations, and term project. Concurrently scheduled with course C199A. Letter grading.

162D. Mechanical Engineering Design I. (4) Lecture, two hours; laboratory, four hours; outside study, six hours. Enforced requisites: courses 94, 156A (or 183A) or M183B, 162A (or 171A). Limited to seniors. First of two mechanical engineering capstone design courses. Lecture, system dynamics, design of thermal systems, mechatronics, mechanical systems, and mechanical components. Students work in teams to begin their two-term design project. Laboratory modules include CAD design, CAD analysis, mechatronics, and conceptual design for team project. Letter grading.

162E. Mechanical Engineering Design II. (4) Lecture, two hours; laboratory, four hours; outside study, six hours. Enforced requisites: course 162D. Limited to seniors. Second of two mechanical engineering capstone design courses. Student groups continue design project begun in course 162D, making use of CAD design laboratory, CAD analysis laboratory, and mechatronics laboratory. Design theory, design tools, economics, marketing, manufacturability, quality, intellectual property, design for manufacture and assembly, design for safety and reliability, and engineering ethics. Students conduct hands-on design, fabrication, and testing. Culminating project demonstration includes final presentation of design project solutions in both oral and written formats. Letter grading.

C163A. Kinematics of Robotic Systems. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses 155, 171A. Kinematic models of serial robotic manipulators, including spatial descriptions and transformations (Euler angles, Denavit-Hartenberg/ DH parameters, equivalent algebraic vector frame), kinematic procedure, direct kinematics, inverse kinematics (geometric and algebraic approaches), mechanical design topics. Concurrently scheduled with course C263A. Letter grading.

C163B. Dynamics of Robotic Systems. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course C163A. Dynamics models of serial and parallel robotic manipulators, including review of spatial descriptions and transformations and inverse kinematics, linear and angular velocities, Jacobian matrix (velocity and force), velocity propagation method, force propagation method, explicit formulation of Jacobian matrix, manipulator dynamics (Newton/Euler formulation, Lagrangian formulation), trajectory generation, introduction to parallel manipulators. Concurrently scheduled with course C263B. Letter grading.

165C3. Control of Robotic Systems. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course C163B. Sensors, actuators, and control schemes for robotic systems, including computer control of feedback control, impedance and force feedback control, and advanced control topics from nonlinear and adaptive control, hybrid control, nonholonomic systems, vision-based control, and perception. Concurrently scheduled with course C263C. Letter grading.

166A. Analysis of Aerospace Structures. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses B2, 101. Not open to students placed for course 156A. Introduction to two-dimensional, elasticity, stress-strain laws, yield and fatigue; bending of beams; torsion of beams; warping; torsion of thin-walled cross sections: shear flow, shear lag; combined bending torsion of thin-walled, stiffened beams; design: selection of elements of plate theory; buckling of columns. Letter grading.

166C. Design of Composite Structures. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 156A or 166A. History of composites, stress-strain relations for composite materials, bending and extension of symmetric laminates, design examples and design studies, buckling of composite components, non-symmetric laminates, micromechanics of composites. Letter grading.

M169. Introduction to Finite Element Methods. (4) Lecture, four hours; discussion, two hours; outside study, six hours; discussion, one hour; outside study, seven hours. Enforced requisites: course 156A or 166A or Civil Engineering 130. Introduction to basic concepts of finite element analysis and applications to structural and solid mechanics and heat transfer. Direct matrix structural analysis; weighted residual, least squares, and Ritz approximation methods; shape functions; convergence properties; geometric, density and dimensional formulation of multidimensional heat flow and elasticity; numerical integration; Practical use of FEM software; geometric and analytical modeling; preprocessing and postprocessing techniques; term projects with computers. Letter grading.

169A. Introduction to Mechanical Vibrations. (4) Lecture, four hours; discussion, two hours; outside study, six hours; discussion, one hour; outside study, ten hours. Fundamentals of vibration theory and applications. Free, forced, and transient vibration of one and two degrees of freedom systems, including damping phenomena. Normal modes, stability, and normal coordinates. Vibration isolation devices, vibrations of continuous systems. Letter grading.

171A. Introduction to Feedback and Control Systems: Dynamic Systems Control I. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 107. Introduction to feedback principles, control systems design, and system stability. Modeling of physical systems in engineering and science fields; control system design using Nyquist, Bode, and root locus methods; compensation; computer-aided analysis and design. Letter grading.

172. Control in Manufacturing. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Enforced requisites: course 171A. Introduction to loop shaping controller design with application to process control systems. Power spectral models of noise and disturbances, and performance trade-offs imposed by conflicting requirements. Constraints on sensitivity function and complementary sensitivity function imposed by nonimproper phase plants. Lecture topics supported by weekly hands-on laboratory work. Letter grading.

174. Probability and Its Applications to Risk, Reliability, and Quality Control. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: Mathematics 33A. Introduction to probability theory; random variables, distributions, functions of random variables, models of failure of components, reliability, redundancy, complex systems, stress-strength models, fault tree analysis, statistical quality control by variables and by attributes, acceptance sampling. Letter grading.

171A. Complex Analysis and Integral Transforms. (4) Lecture, four hours; discussion, two hours. Enforced requisites: course 172. Complex variables, analytic functions, conformal mapping, contour integrals, singularities, residues, Cauchy integrals; Laplace transform; properties, convolution, inversion; Fourier transform: properties, convolution, FFT, applications in dynamics, vibrations, structures, and heat conduction. Letter grading.

M183B. Introduction to Microscale and Nanoscale Manufacturing. (4) (Same as Bioengineering M153, Chemical Engineering M153, and Electrical and Computer Engineering M153.) Lecture, four hours; laboratory, four hours; outside study, five hours. Enforced requisites: Chemistry 20A, Physics 1A, 1B, 1C, 4AL. Introduction to general manufacturing methods, mechanisms, constrains, and microfabrication and nanofabrication. Focus on concepts, physics, and instruments of various microfabrication and nanofabrication techniques that have been broadly applied in industry and academia, including various photolithography technologies, physical and chemical deposition methods, and physical and chemical etching methods. Emphasis on fabrication of microstructures and nanostructures in modern clean-room environment. Letter grading.

C183C. Rapid Prototyping and Manufacturing. (4) Lecture, four hours; laboratory, two hours; outside study, five hours. Enforced requisites: course 183A. Rapid prototyping (RP), solid freeform fabrication, or additive manufacturing has emerged as popular manufacturing technology to accelerate product creation in less than two decades. Machine for layered manufacturing builds parts directly from CAD models. This novel manufacturing technology enables building of parts that have traditionally been impossible to fabricate using conventional methods. Rapid Prototyping enables the fabrication of novel manufacturing technology to accelerate product creation in less than two decades. Machine for layered manufacturing builds parts directly from CAD models. This novel manufacturing technology enables building of parts that have traditionally been impossible to fabricate using conventional methods. Rapid Prototyping enables the fabrication of parts that have traditionally been impossible to fabricate using conventional methods. Rapid Prototyping enables the fabrication of parts that have traditionally been impossible to fabricate using conventional methods. Rapid Prototyping enables the fabrication of parts that have traditionally been impossible to fabricate using conventional methods.
188SC. Individual Studies for USEI Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USEI facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USEI 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

194. Research Group Seminars: Mechanical and Aerospace Engineering. (2 to 8) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit with school approval. Individual contract required; enrollment permits available in Office of Academic and Student Affairs. Letter grading.

Graduate Courses

231B. Radiation Heat Transfer. (4) Lecture, four hours; outside study, eight hours. Requisite: course 105D. Radiative properties of materials and radiative energy transfer. Emphasis on fundamental concepts, including energy levels and electromagnetic waves as well as analytical methods for calculating radiative properties and radiation transfer in absorbing, emitting, and scattering media. Applications cover laser-material interactions, radiative phenomena, such as combustion and thermal insulation. Letter grading.

C231G. Microscopic Energy Transport. (4) Lecture, four hours; outside study, eight hours. Requisite: course 105D. Exploration of basic principles of transport of energy in condensed matter. Analysis of models and fabricated structures by three carriers: electrons, phonons, and molecules. Study of statistical properties of heat carriers, common Landauer framework for heat flow; scattering and propagation of heat carriers, derivation of classical laws from microscopic transport equations, and deviation from classical laws at small scale. Term project. Concurrently scheduled with course C131G. Letter grading.

233. Nanoscience for Energy Technologies. (4) Lecture, four hours; outside study, eight hours. Introduction to fundamental principles of energy transport, conversion, and storage at nanoscale, and recent developments for their efficient exploitation in nanotechnology. Focus on basics of thermal science, solid state, quantum mechanics, electromagnetics, and statistical physics. Topic discussions given for examples that connect technology-application, fundamental challenge, and scientific-solution-based nanotechnology to improve device performance and energy efficiency. Letter grading.

235A. Nuclear Reactor Theory. (4) Lecture, four hours; outside study, eight hours. Underlying physics and mathematics of nuclear reactor (fission) core design. Diffusion theory, reactor kinetics, slowing down and thermalization, multigroup methods, introduction to transport theory. Letter grading.

C236. Energy and Environment. (4) Lecture, four hours; discussion; two hours; outside study, six hours. Enforced requisite: course 105A or equivalent. Global energy use and supply, electrical power generation, fossil fuel and nuclear power plants, renewable energy such as hydropower, biomass, geothermal, solar, wind, ocean; fuel cells, transportation, energy conservation, air and water pollution, global warming. Concurrently scheduled with course C136. Letter grading.

C237. Design and Analysis of Smart Grids. (4) Lecture, four hours; outside study, eight hours. Smart grid concepts; transactive response; transactive-price-based load control; home area network, smart energy profile; advanced metering infrastructure; renewable energy integration; smart grid generation: photovoltaic, wind, fuel cells; microgrids; grid stability; energy storage and electric vehicles; monitoring; distribution and transmission grids; consumer-centric technologies; sensors, communications, and computing; wireless, wireline, and powerline communications for smart grids; grid modeling, stability, and control; frequency and voltage regulation; ancillary services; wide-area situational awareness, phasor measurements; analytical methods and tools for monitoring and control. Concurrently scheduled with course C137. Letter grading.

C238. Introduction to Statistical Thermodynamics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 105A, 105D. Introduction to basic concepts and tools of statistical thermodynamics. Abstract concepts of entropy, temperature, and chemical potential are explained by developing these concepts from the ground up using analytical and statistical principles. Discussion of equilibrium properties of thermodynamic systems and associated distributions. Provides sound foundation for further studies in transport phenomena, plasma physics, and mesoscopic or nanoscale science and technology, and other related subjects. Concurrently scheduled with course C138. Letter grading.

239B. Seminar; Current Topics in Transport Phenomena. (2 to 4) Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, student presentations, and projects in areas of current interest in transport phenomena. May be repeated for credit. S/U grading.

239F. Special Topics in Transport Phenomena. (2 to 4) Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Current and advanced study of one or more aspects of heat and mass transfer, such as turbulence, stability and transition, buoyancy effects, variational methods, and measurement techniques. May be repeated for credit with topic change. S/U grading.

239G. Special Topics in Nuclear Engineering. (2 to 4) Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced study and current study of one or more aspects of heat and mass transfer, such as turbulence, stability and transition, buoyancy effects, variational methods, and measurement techniques. May be repeated for credit with topic change. S/U grading.
239H. Special Topics in Fusion Physics, Engineering, and Technology. (2 to 4) Seminar, two to four hours; outside study, four to eight hours. Recommended for graduate programs in aerospace engineering. Enforced requisites: courses 105A, 150A, 155A. Designed for graduate students. Introduction to research topics selected from areas in fusion science and engineering, such as instabilities in burning plasmas, alternative fusion confinement concepts, inertial confinement fusion, fusion reactors, and fusion reactor safety. May be repeated for credit with topic change. S/U grading.

CM240. Introduction to Biomechanics. (4) Same as Bioengineering M240. Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 101, 102, and 156A or 166A. Introduction to biomechanical functions of human body; skeletal adaptations to locomotion; posture, mobility, and function. Kinematics and Dynamics of Mechanical. Fluid mechanics applications. Heat and mass transfer. Power generation. Laboratory simulations and tests. Concurrently scheduled with course CM140. Letter grading.

242. Introduction to Multiferroic Materials. (4) Lecture, four hours; outside study, eight hours. Overview of different types of multiferroic materials, including strain mediated. Basic crystal structure of single-phase materials as well as fundamental physics underlying ferroelectricity and ferromagnetism. Material science description of these materials, with focus on linear and nonlinear behavior with associated mechanisms and measurements. Presentation of analytical tools necessary to predict material response ranging from constitutive relations to governing equations, including elastodynamics and Maxwell’s. Analytical and physical descriptions used to explain several devices manufactured with multiferroics, including magnets, memory devices, motors, and antennas. Letter grading.

250B. Viscous and Turbulent Flows. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Fundamental principles of fluid dynamics applied to study of fluid resistance. States of fluid motion discussed in order of advancing Reynolds number. Integration of subject matter from physical sciences and mechanics. Integration of subject matter from physical sciences and mechanics. Introduction to van der Waals interactions, electrical double layer, and zeta potential. Basics of non-Newtonian fluid mechanics. Letter grading.

250C. Compressible Flows. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 105A, 150A. Thermodynamic properties of gases, aircraft jet engine cycle analysis, component performance, component matching, advanced aircraft engine topics. Concurrently scheduled with course C150P. Letter grading.

252P. Plasma and Ionized Gases. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A or 166A. Fluid dynamics and transport phenomena ranging from constitutive relations to governing equations, including elastodynamics and Maxwell’s. Analytical and physical descriptions used to explain several devices manufactured with multiferroics, including magnets, memory devices, motors, and antennas. Letter grading.

252A. Variational principles and Lagrange equations. (4) Lecture, four hours; discussion, two hours; outside study, eight hours. Requisites: courses 155, 150A. Mechanics of continuous media, fluid mechanics, and electric arcs. Letter grading.

252S. Spectroscopy and Molecular Gas Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Concepts of stability; state-space interpretation of stability; application by simulation, linearization, and Lyapunov direct method; the Hamiltonian as a Lyapunov function; nonautonomous systems; averaging and perturbation methods of nonlinear analysis; polynomial expansions. Application to mechanical systems. Letter grading.

252A. Linear Elasticity. (4) Same as Civil Engineering M230A. Lecture, four hours; outside study, eight hours. Requisite: course 150A or 166A. Linear elastostatics. Cartesian tensors; infinitesimal strain tensor; Cauchy stress tensor; strain energy; equilibrium equations; constitutive relations; plane elastostatic problems, holes, corners, inclusions, cracks; three-dimensional problems of Kelvin, Boussinesq, and Cerruti. Introduction to boundary integral equation method. Letter grading.

252B. Nonlinear Elasticity. (4) Same as Civil Engineering M230B. Lecture, four hours; outside study, eight hours. Requisite: course 150A or 166A. Linear elastostatics. Cartesian tensors; infinitesimal strain tensor; Cauchy stress tensor; strain energy; equilibrium equations; constitutive relations; plane elastostatic problems, holes, corners, inclusions, cracks; three-dimensional problems of Kelvin, Boussinesq, and Cerruti. Introduction to boundary integral equation method. Letter grading.

252C. Plasticity. (4) Same as Civil Engineering M230C. Lecture, four hours; outside study, eight hours. Requisites: courses M256A, M256B. Classical rate-dependent viscoplasticity, and hyperelasticity; finite element methods. Letter grading.

256F. Analytical Fracture Mechanics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 252A. Review of modern fracture mechanics, elementary stress analysis, analytical and numerical methods for calculation of crack tip stress intensity factors; engineering applications in stressed structures, pressure vessels, plates, and shells. Letter grading.

257A. Elastodynamics. (4) Same as Earth, Planetary, and Space Sciences M224A. Lecture, four hours; outside study, eight hours. Requisites: courses M256A, M256B. Equations of linear elasticity, Cauchy equation of motion, constitutive relations, boundary and initial conditions, principle of energy. Sources and
waves in unbounded isotropic, anisotropic, and dissipative solids. Half-space problems. Guided waves in layered media. Applications to dynamic fracture, non-destructive evaluation (NDE), and mechanics of earthquakes. Lecture, two hours.

258A. Nanomechanics and Micromechanics. (4) Lecture, four hours; outside study, eight hours. Requisite: course M256A. Analytical and computational modeling of mechanics of nanoscale systems at scales ranging from atomic through microstructure or transitional and up to continuous. Discussion of atomistic simulation methods (e.g., molecular dynamics, Liquid Kinetics Monte Carlo), and their applications at nanoscale. Developments and applications of dislocation dynamics and statistical mechanical methods in areas of nanoscale and microstructure. Heterogeneous plastic deformation, material instabilities, and failure phenomena. Presentation of technical applications of these emerging modeling techniques to surfaces and interfaces, grain boundaries, dislocations and defects, surface growth, quantum dots, nanotubes, nanoclusters, thin films (e.g., optical thermal barrier coatings and ultrasonar nanolayer materials), nano-identification, smart structures, nano-membrane bending and torsion. Letter grading.

259A. Seminar: Advanced Topics in Fluid Mechanics. (4) Seminar, four hours; outside study, eight hours. Enforced requisite: course 225A. Topics in fluid mechanics, with intensive attention on dislocation involving assignments in research problems leading to term paper or oral presentation (possible help from guest lecturers). Letter grading.

259B. Seminar: Advanced Topics in Solid Mechanics. (4) Seminar, four hours; outside study, eight hours. Advanced study in various fields of solid mechanics topics on which may vary from term to term. Topics include dynamics, elasticity, plasticity, and stability of solids. Letter grading.

260. Current Topics in Mechanical Engineering. (2 to 4) Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, and student presentations and projects in areas of current interest in mechanical engineering. May be repeated for credit. S/U grading.

261B. Finite Element Analysis for Solids and Structures. (4) Lecture, four hours; outside study, eight hours. Requisite: course 156A or M256A, or consent of instructor. Strongly recommended requisites: courses M168, M256B, 261A. Application of finite element method to classical and state-of-art modeling and design problems for solids and structures. Introduction of commercial mainstream finite element program—ABAQUS—and demonstration of how to use it in advanced way. Topics include review of finite element method, static and dynamic linear elasticity, finite deformable material, initial and boundary-value problems, analysis, fracture, and implementation of user-defined subroutines in ABAQUS. Term projects using computers. Letter grading.

262. Mechanics of Intelligent Material Systems. (4) Lecture, four hours; outside study, eight hours. Recommended requisite: course 166C. Constitutive relations for electro-magneto-mechanical materials. Fiber optic sensor technology. Micro/macro analysis, including classical theory, shear lag theory and the concentric cylinder analysis, hexagonal models, and homogenization techniques as they apply to active materials. Active systems design, non-invasive, and biomorph. Letter grading.

263A. Kinematics of Rotating Systems. (4) (Formerly numbered 263A.) Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisites: courses 155, 171A. Kinematical models of serial robotic manipulators, including spatial descriptions and transformations (Eulerian angles, Denavit-Hartenberg/DH parameters, equivalent angle vector), forward and inverse problems, kinematics, inverse kinematics (geometric and algebraic approaches), mechanical design topics. Concurrently scheduled with course C163A. Letter grading.

263B. Dynamics of Robotic Systems. (4) (Formerly numbered 263B.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite course C263A. Recommended: course 255B. Dynamics models of serial and parallel robotic manipulators (kinematic and dynamic models, and redundancy issues and manipulator design). Half-space problems. Guided waves in structures. Lecture, two hours; outside study, eight hours. Enforced requisite course C263A. Letter grading.

263C. Control of Robotic Systems. (4) (Formerly numbered 263C.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course C263B. Sensors, actuators, and control schemes for robotic systems. Guidelines for computing torque control, linear feedback control, impedance and force feedback control, and advanced control topics from nonlinear and adaptive control, hybrid control, and combined control and perception. Concurrently scheduled with course C163B. Letter grading.

263D. Advanced Topics in Robotics and Control. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course C263C. Current and advanced topics in robotics and control, including kinematics, dynamics, control, mechanical design, advanced sensors and actuators, flexible links, manipulability, redundant manipulators, human-robot interaction, teleoperation, haptics. Letter grading.

263E. Bionic Systems Engineering. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: courses M20, B2, or equivalent. Introduction to design principles for bionic systems, including wearable robotics and implantable devices. Neural control of movement, neuromusculoskeletal modeling, actuator design, sensor integration, robotic control, neural interfacing, surgical techniques for amputation, and fundamentals of orthopaedic implants. Letter grading.

263F. Mechanics of Flexible Structures and Soft Robots. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: courses 259B, 261, or equivalent. Introduction to mechanics and modeling of rods, plates, shells, and robots. Rod and shell-like structures appear across wide range of length-scale from nanometer size macroscale to undersize cables at kilometer-scale. Covers algorithms for numerical simulation of such structures, inspired by recent advances in field of computer graphics and machine learning. Specifically, discrete differential geometry and neural ordinary differential equations are used for modeling of highly deformable structures. Such simulations are widely used in movies and video games for animation of hair and clothes. Final project involves design and simulation of soft robot (or any other complex structure agreed upon by instructor and student). Topics include elastic stress-strain relations for rod, plate, and shell models of equilibrium, discrete differential geometry-based numerical simulation; neural ordinary differential equations. Letter grading.

M270A. Linear Dynamic Systems. (4) (Same as Chemical Engineering M220A and Electrical and Computer Engineering M220A.) Lecture, four hours; outside study, eight hours. Requisite: course 171A or Electrical and Computer Engineering 141. State-space description of linear time-invariant (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem. Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer functions and poles/zeros. Letter grading.

270B. Linear Optimal Control. (4) Lecture, four hours; outside study, eight hours. Requisite: course M270A or Electrical Engineering M240A. Existence and uniqueness of (nonlinear) quadratic (LQ) optimal control problems for continuous- and discrete-time systems, finite-time and infinite-time problems; Hamiltonian systems and optimal control; algebraic and differential Riccati equations; implications of controllability, stabilizability, observability, and detectability solutions. Letter grading.

M270C. Optimal Control. (4) (Same as Chemical Engineering M220C and Electrical and Computer Engineering M220C.) Lecture, four hours; outside study, eight hours. Requisite: course 270B. Applications of variational methods, Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programing) to optimal control of dynamic systems modeled by nonlinear ordinary differential equations. Letter grading.

C271A. Probability and Stochastic Processes in Dynamical Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: courses 225A, 261, or equivalent. Stochastic sequences and random variables, stochastic processes and operations, conditional expectation, Gaussian/Markov sequences, and minimum variance estimator (Kalman filter) with applications. Concurrently scheduled with course C175A. Letter grading.

271B. Stochastic Estimation. (4) Lecture, four hours; outside study, eight hours. Enforced requisite course C271A. Linear and non-linear estimation theory, orthogonal projection lemma, Bayesian filtering theory, conditional mean and risk estimators. Letter grading.

271D. Seminar: Special Topics in Dynamical Systems Control. (4) Seminar, four hours; outside study, eight hours. Seminar on current research topics in dynamic systems modeling, control, and applications. Topics selected from process control, differential games, nonlinear estimation, adaptive filtering, industrial and aerospace applications, etc. Letter grading.

273A. Robust Control System Analysis and Design. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 171A, M270A. Graduate-level introduction to analysis and design of multivariable control systems. Multivariable loop-shaping, performance requirements, model uncertainty representations, and robustness covered in detail from frequency domain perspective. Structured singular value and its application to robust control. Letter grading.

275A. System Identification. (4) Lecture, four hours; outside study, eight hours. Methods for identification of dynamical systems from input/output data, with emphasis on identification of discrete-time (digital) models of sampled-data systems. Coverage of conversion to continuous-time models. Models identified include transfer functions and state-space models. Discussion of topics in mechanical, aerospace, and acoustical systems, including identification of flexible structures, microelectromechanical systems (MEMS) devices, and acoustic ducts. Letter grading.

277. Advanced Digital Control for Mechatronic Systems. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Requisites: courses 171B, M270A. Digital signal processing and control analysis of mechatronic systems. System inversion-based digital control algorithms and robustness properties. Youla parameterization and stabilizing controller design are viewed optimal feedforward compensator, repetitive and learning control, and adaptive control. Real-time control investigation of topics to selected mechatronic systems. Letter grading.

279. Dynamics and Control of Biological Oscillations. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 107, M270A. Analysis and design of dynamical mechanisms underlying biological oscillations. Topics include neuronal information processing through action potentials (spike train), central pattern generator, coupled nonlinear oscillators, optimal gait (periodic motion) for animal locomotion, and entrainment of natural oscillations via feedback control. Letter grading.

M290B. Microelectromechanical Systems (MEMS) Fabrication. (4) (Same as Bioengineering M295B and Electrical and Computer Engineering M295B.) Lecture, four hours; discussion, one hour; outside study, eight hours. Enforced requisite: course M183B. Advanced discussion of micromachining processes used to construct MEMS. Topics: MEMS design, deep photolithographic, deep etch, and etching processes, as well as their combination in process integration technology. Materials issues such as chemical resistance, corrosion, mechanical properties, and reliability. Letter grading.

281. Microsciences. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 102, 103D, 105D. Fundamental issues of being in microscopic world and mechanical engineering of microscopic devices. Topics include scale issues, surface tension, superhydrophobic surfaces and applications, and electrowetting and applications. Letter grading.

M292. Microelectromechanical Systems (MEMS) Device Physics and Design. (4) (Same as Bioengineering M252 and Electrical and Computer Engineering M252J.) Lecture, four hours; discussion, one hour; outside study, seven hours. Introduction to MEMS design rules (MEMS sizes), and actuation mechanisms, microsensors, and micro-actuators. Designing MEMS to be produced with both foundry and nonfoundry processes. Computer-aided design for MEMS. Design project required. Letter grading.

285. Interfacial Phenomena. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 82, 103, 105A, 105D. Introduction to fundamental physical phenomena occurring at interfaces and application of their knowledge to engineering problems. Fundamental concepts of interfacial phenomena, including surface tension, surfactants, interfacial thermodynamics, interfacial forces, interfacial hydrodynamics, and dynamical behavior of liquid films. Applications of interfacial phenomena, including wetting, change of phase boiling and condensation), forms and emulsions, microelectromechanical systems, and biological systems. Letter grading.

M287. Nanoscience and Technology. (4) (Same as Electrical and Computer Engineering M287L.) Lecture, four hours; outside study, eight hours. Introduction to fundamentals of nanoscale science and technology. Basic physical principles, quantum mechanics, chemical bonding and nanostructures, top-down and bottom-up (self-assembly) nanofabrication; nanocharacterization; nanomaterials, nanoelectronics, and nanobiodetection technology. Introduction to new scientific principles behind nanotechnology and inspire students to create new ideas in multidisciplinary nanofabrication. Letter grading.

289L. Nanomaterial Characterization, and Biodetection Laboratory. (4) Lecture, two hours; laboratory, three hours; outside study, seven hours. Multidisciplinary course that introduces laboratory techniques to students. Topics include: nanomaterial characterization, and biodetection. Basic physical, chemical, and biological principles related to these techniques, top-down and bottom-up (self-assembly) nanofabrication, and bio-characterization. Students design, characterize, and interpret optical, electrical, and electrochemical biosensors. Students encouraged to create their own ideas in self-designed experiments. Concurrently scheduled with course C187L. Letter grading.

C294A. Compliant Mechanism Design. (4) (Formerly numbered 294A.) Lecture, four hours; outside study, eight hours. Requisite: linear algebra. Advanced compliant mechanism synthesis approaches, modeling techniques, and optimization tools. Fundamentals of flexible constraint theory, principles of constraint-based design, projective geometry, screw theory kinematics, and freedom and constraint topologies. Applications: precision motion stages, general purpose flexible mechanisms, micromachined, MEMS, optical mounts, and nanoscale positioning systems. Hands-on exercises include build-your-own flexure kits, CAD and FEA simulations, and term project. Concurrently scheduled with course C162B. Letter grading.

C297A. Rapid Prototyping and Manufacturing. (4) Lecture, four hours; laboratory, two hours; outside study, eight hours. Recommended prerequisite: course 166A or equivalent. Review of stress and strain equilibrium of solids, interfaces, plasticity, and residual/intrinsic stress. Letter grading.

M297B. Mechanical Design for Power Transmission. (4) (Same as Materials Science M297.) Lecture, four hours; outside study, eight hours. Enforced requisite: course 156A or equivalent. Review of elasticity and continuum thermodynamics, multiaxial plasticity, flow rules, cyclic plasticity, viscoplasticity, creep, creep damage in cyclic loading. Damage mechanics: thermodynamic, ductile, creep, fatigue, and fatigue-creep interaction damage analyses: elastic and elasto-plastic analysis. J-integral, brittle fracture, ductile fracture, fatigue and creep crack propagation. Applications in design of high-temperature components such as turbine blade, heat exchangers, connecting rods. Design project involving CAD and FEM modeling. Letter grading.

C297B. Mechanical Design for Power Transmission. (4) (Same as Materials Science M297B.) Lecture, four hours; outside study, eight hours. Enforced requisite: course 156A or equivalent. Review of elasticity and continuum thermodynamics, multiaxial plasticity, flow rules, cyclic plasticity, viscoplasticity, creep, creep damage in cyclic loading. Damage mechanics: thermodymanics, ductile, creep, fatigue, and fatigue-creep interaction damage analyses: elastic and elasto-plastic analysis. J-integral, brittle fracture, ductile fracture, fatigue and creep crack propagation. Applications in design of high-temperature components such as turbine blade, heat exchangers, connecting rods. Design project involving CAD and FEM modeling. Letter grading.

C297C. Composites Manufacturing. (4) (Same as Materials Science M297C.) Lecture, four hours; outside study, eight hours. Enforced requisite: course 138A. Thermodynamics, principles of material processing: phase equilibrium and transitions, transport mechanisms of heat and mass, nucleation and growth of microstructure. Applications: welding, consolidation, chemical vapor deposition, infiltration, composites. Letter grading.
298. Seminar: Engineering. (2 to 4) Seminar, to be arranged. Limited to graduate mechanical and aerospace engineering students. Seminars may be organized in areas of technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

M299A. Seminar: Systems, Dynamics, and Control Topics. (2) Same as Chemical Engineering M299 and Electrical and Computer Engineering M248B.) Seminar, two hours; outside study, six hours. Limited to graduate engineering students. Presentations of research topics by leading academic researchers from fields of systems, dynamics, and control. Students who work in these fields present their papers and results. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching Assistant Training Seminar. (2) Seminar, two hours; outside study, four hours. Preparation: appointment as teaching assistant in department. Seminar on communication of mechanical and aerospace engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of visual aids; grading, advising, and rapport with students. S/U grading.

596. Directed Individual or Tutorial Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for MS Comprehensive Examination. (2 to 12) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Reading and preparation for MS comprehensive examination. S/U grading.

597B. Preparation for PhD Preliminary Examinations. (2 to 16) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Reading and preparation for PhD preliminary examinations. S/U grading.

597C. Preparation for PhD Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of MS Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Supervised independent research for MS candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of PhD Dissertation. (2 to 16) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Jodi L. Friedman, MD, Vice Chair, Education

Overview
The principal goal of the Department of Medicine is to educate students in the expert diagnosis and compassionate management of human illness. Building on the biochemical, physiological, and behavioral foundations of the preclinical experience, students are taught information acquisition through history taking, physical examination, and laboratory evaluation; information synthesis through achieving a differential diagnosis and evaluative plan; and medical decision making for continued evaluation and therapy. Students are encouraged and guided in developing a caring physician/patient relationship.

In the department is provided in all four years of medical school, with the third and fourth years constituting a continuum of clinical experience. Students become integrated into a ward team and have significant ambulatory care experiences. They apply and extend their clinical skills, medical knowledge, and judgment in the care of patients assigned to them under the immediate supervision of house officers and attending staff.

The department offers a broad range of advanced clinical clerkships in general and subspecialty ambulatory and hospital-based intern and internal medicine at all the major affiliated centers.

For more details on the Department of Medicine and courses offered, see the department website.

Medicine faculty information is available from the department.

Medicine
Lower-Division Courses
19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

160C. Health Outreach and Education to At-Risk Populations. (4) Seminar, two hours; fieldwork, six to eight hours. Requisites: courses M160A, M160B. Processes involved with designing, delivering, and assessing community health education programs, under supervision of professional staff. S/NP or letter grading.

180. Special Topics in Medicine. (4) Lecture, four hours; discussion, one hour. Medical topics of special interest to undergraduate students. Specific subjects may vary each term depending on particular interest of instructors and students. Topics may include East-West medicine and global medicine. May be repeated for credit with topic or instructor change. P/NP or letter grading.

185. Integrative East-West Medicine for Health and Wellness. (5) Lecture, five hours. Introduction to integrative health care and wellness, particularly therapeutically oriented topics originating from traditional Chinese medicine. Study of theories underlying integrative medicine and traditional Chinese medicine, management of personal well-being through experiential learning of various therapeutic modalities, and evidence-based integrative medicine. Topics include integrative East-West medicine and its role in prevention and health cultivation; herbs, diet, and nutritional supplements; pain management using acupuncture, acupressure, massage, and other self-help techniques; integrative medicine research and evidence-based modalities; chronic stress and implications on sleep, inflammation, and maintaining health. Incorporates hands-on practice and interactive sessions. P/NP or letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 885 course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

199. Directed Research in Medicine. (2 to 8) Tutorial, two hours. Limited to junior/senior students. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper may be required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M256. Interdisciplinary Response to Infectious Disease Emergencies: Medicine Perspective. (4) (Same as Community Health Sciences M256, Nursing M298, and Oral Biology M256.) Lecture, three hours; discussion, one hour. Designed to instill in professional students ideas of common emergency health problems and coordinated response, with specific attention to bioterrorism. Examination of tools to help students prevent, detect, and intervene in infectious disease emergencies. Interdisciplinary sessions also attended by students in Schools of Dentistry, Nursing, and Public Health during weeks two through five. Letter grading.
M260A-M260B. Methodology in Clinical Research I, II (4) (Same as Biostatistics M260A-M260B.) Lecture, four hours. Recommended preparation: MD, PhD, or dental degree. Requisites: Biostatistics 170A, 265A. Course M260A is requisite to M260B. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

M260C. Methodology in Clinical Research III. (4) (Same as Biostatistics M260C.) Discussion, four hours. Recommended preparation: MD, PhD, or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

M261. Responsible Conduct of Research Involving Humans. (2) (Same as Biostatistics M261.) Lecture, two hours; discussion, two hours. Preparation: completion of one basic course in protection of human research subjects through Collaborative Institutional Training Initiative. Discussion of current issues in responsible conduct of clinical research, including reporting of research, basis for authorship, issues in genetic research, principles and practice of research on human, conflicts of interest, Institutional Review Board (IRB), and related topics. S/U or letter grading.

M263. Clinical Pharmacology. (2) (Same as Biostatistics M263 and Psychiatry M263.) Lecture, two hours. Preparation: completion of professional health sciences degree (MD, DDS, DSCs, or Ph.D). Overview of principles of clinical pharmacology, especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targetting, gene therapy, and genomics. Letter grading.

M270C. Advanced Modeling Methodology for Dynamic Biomedical Systems. (4) (Same as Bioengineering M270C and Computer Science M270C.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 141 or 142 or Mathematics 115A or Mechanical and Aerospace Engineering 171A. Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems. Control system, multicompartamental, noncompartmental, and output/input models, linear and nonlinear. Emphasis on model applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory. Letter grading.

M270D. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4) (Same as Bioengineering M270D and Biomedical Engineering M270D.) Lecture, four hours; outside study, eight hours. Requisite: course M270C or Bioengineering CM270D. Estimation methodology and model parameter estimation algorithms for fitting dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on optimal sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment design via applications in physiology and pharmacology. Letter grading.

M296A-M296B. Methodology in Clinical Research I, II (4) (Same as Biostatistics M296A-M296B.) Lecture, four hours. Recommended preparation: MD, PhD, or dental degree. Requisites: Biostatistics 170A, 265A. Course M296A is requisite to M296B. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

M296C. Methodology in Clinical Research III. (4) (Same as Biostatistics M296C.) Discussion, four hours. Recommended preparation: MD, PhD, or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

Zulema Romero Garcia, PhD
Jing Wen, PhD

Overview
Microbiology at UCLA is a diverse science that includes bacteriology, virology, immunology, genetics, molecular biology, and the study of single cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides students with opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate Major
Microbiology, Immunology, and Molecular Genetics BS

Undergraduate students majoring in Microbiology, Immunology, and Molecular Genetics prepare for careers in biomedical research, medicine, dentistry, or other health professions, bio-
technology and genetic engineering, industrial microbiology, agricultural or environmental sciences, public health, and law or bioethics, among others. The courses presented by the department lead to a Bachelor of Science degree and depend heavily on preparation in the biological sciences, chemistry, physics, and mathematics.

Learning Outcomes

The Microbiology, Immunology, and Molecular Genetics major has the following learning outcomes:

- Demonstrated knowledge of key disciplinary concepts
- Address scientific questions or solve problems using quantitative, computational, and inquiry-related skills, including developing hypotheses, designing and performing experiments, analyzing data, and interpreting results
- Execution of database searches for scientific literature and bioinformatics data related to investigatory tasks
- Reading, analysis, and use of scientific papers in the development of research projects, in discussions with peers and mentors, and as evidence to substantiate conclusions in written assignments
- Effective written and oral communication skills
- Work effectively in individual and collaborative contexts
- Value research and its relevance to one’s own life and society

Entry to the Major

Transfer Students

Transfer applicants to the Microbiology, Immunology, and Molecular Genetics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences or 3A, 7B, and 7C; one year of calculus; one year of general chemistry with laboratory for majors; and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Students intending to major in Microbiology, Immunology, and Molecular Genetics may seek counseling and petition to enter the major in the Student Affairs Office, 1602B Molecular Sciences.

Requirements

Preparation for the Major

Life Sciences Core Curriculum

Required: Chemistry and Biochemistry 1DA, 14B, 14BL, 14C, and 14D, or 20A, 20B, 20L, 30A, 30AL, and 30B; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, 3C, and Statistics 13, or 31A, 31B, 32A, and Statistics 13; Physics 1A, 1B, 1C, 4AL, and 4BL, or 5A, 5B, and 5C.

The Major

Two plans are offered by the department.

Plan I—Research Immersion Laboratory

Required: Ten courses as follows: (1) Five foundation courses: Chemistry and Biochemistry 153A, 153B or Microbiology, Immunology, and Molecular Genetics 132, Life Sciences 107, Microbiology, Immunology, and Molecular Genetics 101, C185A, (2) two courses from one of the following groups: (a) Microbiology, Immunology, and Molecular Genetics 103AL and 103BL or (b) 109AL and 109BL, (3) two focus elective courses selected from Chemistry and Biochemistry 153L, Microbiology, Immunology, and Molecular Genetics 102, 105, 106, 107, 132, CM156, 158, 168, CM256, Molecular Cell, and Developmental Biology 138, 165A, and (4) one general elective course selected from any course under item 3 above, Bioengineering 100, CM145, CM178, Biostatistics 100A, Chemistry and Biochemistry 103, 110A, M117, 136, C140, 153B, 153C, 153L, 154, 156, CM160A, 171, C172, C181, Computer Science CM121, C122, CM124, Ecology and Evolutionary Biology 121, C135, 137, 162, Epidemiology 100, Human Genetics C144, Microbiology, Immunology, and Molecular Genetics C122, 174, C185B, 191H, 198C, 199 (may be taken once), Molecular Cell, and Developmental Biology 100, 104AL, 138, M140, C141, 143, 144, C150, 165A, 168, 172, M175A, M175B, M175C, 187AL, Neuroscience M101A, M101B, M101C, Physiological Science 121, 124, 125, 128, Statistics 100A, 100B.

Plan II—Advanced Independent Research

Required: Twelve courses as follows: (1) five foundation courses: Chemistry and Biochemistry 153A, 153B or Microbiology, Immunology, and Molecular Genetics 132, Life Sciences 107, Microbiology, Immunology, and Molecular Genetics 101, C185A, (2) Microbiology, Immunology, and Molecular Genetics 196A, 196B or Molecular Cell, and Developmental Biology 196A, 196B, (3) Microbiology, Immunology, and Molecular Genetics 180A, 180B or Molecular Cell, and Developmental Biology 180A, 180B, (4) two focus elective courses selected from Chemistry and Biochemistry 153L, Microbiology, Immunology, and Molecular Genetics 102, 105, 106, 107, 132, CM156, 158, 168, CM256, Molecular Cell, and Developmental Biology 138, 165A, and (5) one general elective course selected from any course under item 3 above, Bioengineering 100, CM145, CM178, Biostatistics 100A, Chemistry and Biochemistry 103, 110A, M117, 136, C140, 153B, 153C, 156, CM160A, 171, C172, C181, Computer Science CM121, C122, CM124, Ecology and Evolutionary Biology 121, C135, 137, 162, Epidemiology 100, Human Genetics C144, Microbiology, Immunology, and Molecular Genetics C122, 174, C185B, 191H, 198C, 199 (may be taken once), Molecular Cell, and Developmental Biology 100, 104AL, 138, M140, C141, 143, 144, C150, 165A, 168, 172, M175A, M175B, M175C, 187AL, Neuroscience M101A, M101B, M101C, Physiological Science 121, 124, 125, 128, Statistics 100A, 100B.

Graduate Major

Microbiology, Immunology, and Molecular Genetics MS, PhD

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host/parasite relationships, medical mi-
Microbiology, Immunology, and Molecular Genetics

Lower-Division Courses

6. Microbiology for Nonmajors. (4) Lecture, four hours. Not open for credit to students with credit for course 101. Designed for nonscience students; introduction to biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs. P/NP or letter grading.

10. Medical Microbiology for Nursing Students. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 30A or 30B or Mathematics 3A or 31A. Limited to nursing majors. Introduction to biology of microbial pathogens, their role in development of human immune response, and presentation of symptoms and disease caused by microbial infections. Letter grading.

18. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth with supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial, supervised research (one week to five weeks only). Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

100L. Microbiology Laboratory for Professional Schools. (3) Lecture, two hours; laboratory, four hours. Disease factors. Letter grading.

101. Advanced Virology. (4) Lecture, 26 hours; discussion, one hour. Requisites: Life Sciences 3 and 4, or 7A, 7B, and 23L. Historical foundations of microbiology, introduction to bacterial structure, physiology, biochemistry, genetics, and ecology. Letter grading.

102. Advanced Virology. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, or 7A, 7B, and 23L with grades of C- or better. Biological properties of bacterial and animal viruses, replication, methods of detection, interactions with host cells and multicellular hosts. Letter grading.

103AL. Research Immersion Laboratory in Microbiology. (8) Lecture, two and one half hours; laboratory, eight hours. Requisites: course 101, Life Sciences 3, 4, and 23L, or 7A, 7B, and 23L. Course 103AL is requisite to 103BL. Limited to Microbiology, Immunology, and Molecular Genetics premajors and majors. Designed to provide students authentic, discovery-based research experience in all fields of biology and biomedicine. Seminar forum whereby students use bioinformatics or mathematical modeling software to interpret, expand, or refine datasets. Use of graphics software to prepare figures and illustrations for presentations, posters, and websites (database entries). Research accomplishments discussed in seminar-style meetings in which student groups create PowerPoint slides and formally present results to class. Production of team poster and final report describing entire research project required. P/NP or letter grading.

105. Biological Microscopy. (4) Lecture, four hours; laboratory, three hours (five weeks only). Requisite or corequisite: Physics 1C or 5B or 6C. Introduction to modern microscopy technology (fluorescence, confocal, electron microscopy, electron tomography, and three-dimensional cryo-electron microscopy) and other scanning probe microscopy modalities. Practical experience in research provided through five carefully designed electron microscopy laboratory modules. P/NP or letter grading.

109AL. Research Immersion Laboratory in Microbi- ology. (3) Lecture, three hours; laboratory, eight hours. Requisites: course 101, Life Sciences 3, 4, and 23L, or 7A, 7B, and 23L. Course 109AL is enforced requisite to 109BL. Limited to Microbiology, Immunology, and Molecular Genetics premajors and majors and Molecular, Cell, and Developmental Biology majors. Research-oriented laboratory experience designed to promote discovery of novel pathogens. Working in teams, students conduct research projects that incorporate techniques in microbiology and molecular biology and involve use of bioinformatics tools and phylogenetics software for data analysis. Emphasis on reading and understanding scientific literature as well as improving critical thinking skills such as ability to create and evaluate hypotheses or experimentally address scientific questions. Critical aspects of research process, including record keeping, ethics, laboratory safety and citizenry, mechanics of scientific writing, and project responsibilities and ownership. Letter grading.

109BL. Advanced Research Analysis in Microbiologi- y. (4) Laboratory, six hours. Requisites: course 109AL, Life Sciences 40 or Statistics 13. Limited to Microbiology, Immunology, and Molecular Genetics premajors and majors and Molec- ular, Cell, and Developmental Biology majors. Research-oriented laboratory experience designed to promote discovery of novel pathogens. Working in teams, students conduct research projects that incorporate techniques in microbiology, virology, and molecular biology and involve use of bioinformatics tools and computational analysis software. Emphasis on reading and understanding scientific literature as well as improving critical thinking skills such as ability to create and evaluate hypotheses or experimentally address scientific questions. Critical aspects of research process, including record keeping, ethics, laboratory safety and citizenry, mechanics of scientific writing, and project responsibilities and ownership. Letter grading.

112. Mouse Molecular Genetics. (2) Seminar, two hours. Requisites: Life Sciences 4, or 7A, 7B, and 7C. Designed for students doing research with mice. During past 25 years, molecular revolution has greatly increased power and scope of mouse genetics, and today mouse is primary experimental model in virtually all fields of biology and biomedicine. Seminar forum for in-depth discussion of tools and technologies of mouse genetics, and their application to understand the functional genomics, complex traits, stem cell biology, development biology, epigenetics, and genetic dissection of diseases. Concurrently scheduled with course 222Z. P/NP or letter grading.

123. Advanced Annotation and Comparative Ge- nomics. (4) Lecture, two and one half hours; computer laboratory, six hours. Requisite: course 103AL or Molecular, Cell, and Developmental Biology 187AL with grade of B- or better. Participation in discovery-
based research experience, working as research team to analyze microbial genomes using bioinformatics techniques involving variety of online databases. Investigation of organism and structures as means to discover novel genes and unusual variations in classical systems. Results of high-quality annotation efforts may lead to publication in peer-reviewed science journal. Part of DOE Joint Genome Institute Undergraduate Education and Training program. Offered in summer only. Letter grading.

C134. Ethics and Accountability in Biomedical Research. (2) Seminar, two hours. Designed for graduate students and undergraduates who have credit for life sciences or biomedical individual studies 199 course. Responsibilities and ethical conduct of investigators in sciences or biomedical individual studies 199 course. Limited to junior/senior USIE facilitators. May be repeated for credit. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating life sciences course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Design of individual study to meet requirements. Individual study with course lecture instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture instructor. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

191H. Honors Research Seminars: Microbiology, Immunology, and Molecular Genetics. (2) Seminar, two hours. Enforced corequisite: course 180A or 189A or 189B. Limited to senior microbiology, immunology, and molecular genetics honors program students. Discussion of current research literature, with emphasis on thesis topics areas that students are working on as part of departmental honors requirements. One-hour presentation of student thesis research and current literature associated with it required. May be repeated for credit. P/NP or letter grading.

192. Undergraduate Practicum in Microbiology, Immunology, and Molecular Genetics. (2) Seminar, six hours. Limited to junior/senior departmental majors. Training and supervised practicum for advanced undergraduate students. Seminar, one hour and life sciences major or major grade-point average, and at least one term of prior experience in laboratory of departmental faculty. May not be repeated. Letter grading.

193. Journal Club Seminars: Microbiology, Immunology, and Molecular Genetics. (1) Seminar, one hour. Limited to undergraduate students. Discussion of readings selected from current literature in microbiology, immunology, and molecular genetics field. P/NP or letter grading.

194. Research Group Seminars: Microbiology, Immunology, and Molecular Genetics. (1) Seminar, one hour. Designed for undergraduate students who are part of research group in department faculty laboratory. Discussion of research methods and current literature in field or of research of faculty members or students. Enforced corequisite: Honors Seminar, six hours. Limited to senior microbiology, immunology, and molecular genetics honors program students. One-hour presentation of student thesis research and current literature associated with it required. May be repeated for credit. P/NP or letter grading.

199. Undergraduate Research in Microbial Genome Annotation efforts may lead to publication in peer-reviewed science journal. Part of DOE Joint Genome Institute Undergraduate Education and Training program. Offered in summer only. Letter grading.

M178. Quantitative Regulatory Biology and Signal Transduction. (4) Same as Computational and Systems Biology M178 and Physiological Science M178. Lecture, five hours; discussion, one hour. Requisites: Life Sciences 7A, 7B, 7C, 30A, 30B. Introduction to key biological regulatory circuit motifs and systems biology concepts that are critical to understanding how cellular responses are controlled. Letter grading.

180C. Journal Club Seminars: Microbiology, Immunology, and Molecular Genetics. (2) Seminar, two hours. Enforced corequisite: course 196A or 196B. Students read and discuss scientific articles and give presentations, introducing research topics to the community literature. Critical aspects of research process, including record keeping, ethics, laboratory safety and citizenship, mechanics of scientific writing, diverse approaches to research, and project responsibilities and ownership. Acquisition of in-depth and broad knowledge about student research projects, improvement of oral and written communication skills, and full appreciation of process of doing good science and becoming skilled researchers. Letter grading.

180B. Scientific Analysis and Communication II. (2) Seminar, two hours. Enforced requisites: course 180A and Life Sciences 40 or Statistics 13. Enforced corequisite: 196A or 196B. Students present different topics such as research posters and present scientific posters. Production of deliverables that demonstrate research achievements and creation of sense of pride for work accomplished as skilled researchers. Letter grading.

1885C. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 1885B. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topics, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

Military Science – Army ROTC

Faculty Roster

Professor
Don D. Sheppard, MA, Lieutenant Colonel

Adjunct Assistant Professors
Christopher Z. Barra, MBA, MA, Brigadier General
Katie Carrigan, BS, First Lieutenant
Casey L. Coyle, BA, Captain
Michael G. Crosen, BA, Captain
William N. Ritch, MA, Major
Anthony K. Tavantzis, BA, Captain

Overview

In accordance with the National Defense Act of 1920 and with the concurrence of the Regents of the University of California, a unit of the Army Senior Division Reserve Officers’ Training Corps (ROTC) was established on the Los Angeles campus of in July 1920. Navy and Air Force units were established in 1938 and 1949 respectively.

This voluntary training in the Army ROTC program allows students to qualify for an officer’s commission in the Army while completing their college education. The ROTC curricula are not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of a major. For students contracted in the Military Science Department, 26 units of military science credit may be applied toward the requirements for the bachelor’s degree. The ROTC program is also available through UCLA Extension.

All three ROTC departments offer voluntary four- and three-year programs for first years
Students may select a branch of the Army in which to be commissioned from 16 specialty fields, including military intelligence, aviation, signal communications, finance, logistics, nursing, and engineering. Prior to completion of the ROTC program, students may request to go on active duty or serve part-time in the Army Reserve or National Guard.

Undergraduate Study
Students aspiring to become Army officers follow prescribed course sequences with the Military Science Department and a physical fitness program. Generally, the courses consist of one 2- to 4-unit course per term and physical fitness sessions one to three times per week, depending on the participation-level requirements.

The military science curriculum is divided into two parts: (1) the Basic Course, two years of lower-division study during which students must complete all military science courses and (2) the Advanced Course, two years of upper-division study consisting of six military science courses, one military history course, and a five-week summer camp.

Army ROTC students must satisfy the military history requirement by completing Military Science 110 or another history course approved by the chair.

Transfer students and others who were unable to enroll in the Basic Course can receive equivalent credit in several different ways (see Two-Year Program below).

Admission to the Advanced Course is limited to selected students who meet all academic and physical requirements. Students in this course receive a subsistence allowance of $420 per month for 10 months during each of the two academic years, plus military science uniforms. After completion of the Advanced Course and graduation, students have the opportunity to be commissioned as second lieutenants in one of the Army's 16 specialty areas in either the Army National Guard, Reserves, or Active Army. Students' preferences are a major factor in determining which specialty is awarded.

Students selected for Advanced ROTC must attend a five-week leadership development and assessment course before entrance into the Advanced Course (see Two-Year Program below).

Four-Year Program
Students are enrolled in the Basic Course (freshman and sophomore years) on a voluntary basis. After completion of the Basic Course and before entrance into the Advanced Course (junior and senior years), students are required to execute a contract with the Department of the Army agreeing to complete the Advanced Course and accept a commission if offered.

Two-Year Program
The two-year program is designed for students who receive placement credit for two years of ROTC and directly enter the Advanced Course. Placement credit may be given for completing three years of high school Junior ROTC, attending a paid ROTC Leader's Training Course, membership in the Army Reserves or National Guard, completing two years of college-level Air Force or Navy ROTC, or previous active duty military service. The Army also allows enrollment in the two-year program while students attend graduate school.

Commissioning
Successful completion of the Advanced Course program and a bachelor's degree may lead to a commission as a second lieutenant in the Army Reserves, National Guard, or Active Army.

Military Science
Lower-Division Courses

2. Leadership Laboratory. (No credit) Laboratory, three hours (lower-division cadets) or four hours (upper-division cadets). All cadets must be concurrently enrolled in a military science course; upper-division cadets must also be under a contracted obligation with department. Designed to allow cadets to apply leadership techniques and military skills taught in classroom and to develop their confidence as future military officers. No grading.

11. Foundations of Officership. (2) Lecture, one hour. Introduction to issues and competencies that are central to commissioned officer's responsibilities. Framework established to understand officership, leadership, military customs, briefings, and life skills such as physical fitness, nutrition, and time management. P/NP or letter grading.

12. Basic Military Leadership. (2) Lecture, one hour. Required: course 11. Introduction to fundamentals of leadership, Army leadership values, ethics, and counseling techniques. Foundation of basic leadership fundamentals central to commissioned officer's responsibilities established. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual interest, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.
sent for leadership development. Introduction to and application of military planning process in developing operations orders. P/NP or letter grading.

23. Subordinate Development and Army Organization. (3) Lecture, two hours. Requisite: course 22. Discussion/application of team-building techniques and subordinate development, through combined lecture, discussion, and experiential learning, with additional focus on commissioned officer, branches, and Army organization. Application of counseling techniques, motivation, and consideration of ethics and values for modern leaders. P/NP or letter grading.

Upper-Division Courses

110. U.S. Military History. (3) Lecture; three hours; discussion, one hour. Survey of American military history from 1860 to the present. Causes of war, strategy, tactics, and technological developments set against economic, political, and diplomatic concerns. Impact of warfare on society.

131. Tactical Planning and Analysis. (4) Lecture, three hours; laboratory, four hours. Introduction to basic principles of tactics. Emphasis on conducting individual and small unit training as well as evaluation of syllabus. Individual contract with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

133. Leadership and Problem Solving. (4) Lecture, three hours; laboratory, four hours. Examination of roles and responsibilities of leaders in various contexts. Focus on general communication theory as well as written and spoken communication skills. Examination of communication abilities and leadership development and assessment. P/NP or letter grading.

141. Leadership and Management. (4) Lecture, three hours; laboratory, four hours. Interactive course to enhance student understanding of organizational culture, leadership, and ethics. Understanding and enhancement of leader-member relations, assessment of organizational culture and ethical climate, and how to effect change in organizations. Examination of foundations of military law and law of war. P/NP or letter grading.

142. Leadership, Ethics, and Military Law. (4) Lecture, three hours; laboratory, four hours. Interactive course to enhance student understanding of organizational culture, leadership, and ethics. Understanding and enhancement of leader-member relations, assessment of organizational culture and ethical climate, and how to effect change in organizations. Examination of foundations of military law and law of war. P/NP or letter grading.

144. Officerhood: Professional Military Leadership. (4) Lecture, three hours; laboratory, four hours. Capstone interactive leadership course to prepare students for challenges of being commissioned officers in U.S. Army by discussing various leadership challenges and case studies. Study of military units, with specific emphasis on joint operations involving Army, Navy, Air Force, and Marine Corps assets, military operations other than war, and global war on terror. Other topics include personnel administration, maintenance management, and financial planning. P/NP or letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced requisite: course 188SA. Enforced corequisite: Honors College 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 885 cd. Individual contract with faculty mentor required. May not be repeated. Letter grading.

197. Individual Studies in Military Science. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Tikvah K. Hayes, PhD
Oluwatayo Ikotun, PhD
Tara TeSlaa, PhD
Hans David S. Ulmert, PhD, in Residence

Adjunct Professors
Vathilingara Arumugaswami, PhD
Robert D. Damoiseaux, PhD

Adjunct Associate Professors
Linsey Stiles, PhD
Graduate Major
Molecular and Medical Pharmacology, MS, PhD

The Department of Molecular and Medical Pharmacology offers Master of Science (MS) and Doctor of Philosophy (PhD) degrees in Molecular and Medical Pharmacology, but does not admit applicants who seek only an MS degree.

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Molecular and Medical Pharmacology

Overview
The Department of Molecular and Medical Pharmacology offers an opportunity for gifted students to work with accomplished faculty members toward making novel discoveries in basic and clinical research. Departmental research interests span a broad range of studies by integrating biological, physical, engineering, and medical sciences to explore mechanisms of disease in biological systems from in silico through a single cell to the whole organism level, while encompassing patient studies. Faculty members strive to understand basic biological systems and disease states and, where appropriate, to use these observations to develop both new molecular diagnostic technologies and new molecular therapeutics.

Graduate Study
The department also offers two MD/PhD programs concurrently with the Geffen School of Medicine. One is the Medical Scientist Training Program (MSTP) in which candidates are medical students that have been accepted into MSTP by the School of Medicine in order to qualify. The second is the Specialty Training and Advanced Research (STAR) program in which candidates are post-MD house-staff (interns, residents, or fellows) who have been accepted into the STAR Program by its selection committee in order to qualify. The department, together with the Division of Laboratory Animal Medicine, offers PhD or postdoctoral training combined with residency training for veterinarians (with DVM or DVM/PhD degrees) in the Veterinary Investigator in Scientific Training and Advancement (VISTA) program.

Note: There is no degree program in pharmacy at UCLA.

Institutes and Centers
With the department as home to the Crump Institute for Molecular Imaging; and the Ahmanson Translational Imaging Division—with its nuclear medicine and positron emission tomography (PET) imaging research and clinical service—students have access to state-of-the-art science and technology, and the opportunity to make a direct impact on patient care. In addition, the department is home to the Business of Science Center. This program supplies education, experience, and industry mentorship to graduate students in the department and in other academic programs to prepare them for professional careers.

Graduate Courses

200. Introduction to Laboratory Research. (8) Laboratory, eight to 20 hours. Individual projects in laboratory research for beginning graduate students. At end of each term students submit to their supervisor reports covering research performed. Pharmacology graduate students must take this course three times during their first two years in residence. Letter grading.

M205A. Introduction to Chemistry/Biology Interface. (2) (Same as Chemistry CM205A.) Lecture, three hours; discussion, one hour. Examination of current importance in pharmacology. Emphasis on recent contributions of special interest to advanced PhD candidates and faculty. Letter grading.

M205B. Issues on Chemistry/Biology Interface. (2) (Same as Chemistry CM205B.) Seminar, one hour. Required of all first year students. May be repeated for credit. Letter grading.

M227. Business of Science, (2) Seminar, two hours. Emphasis on principles of business and entrepreneurship in technology sectors. Basic business skills taught to effectively perform in commercial environment and within academic environment. Application of course material by performing feasibility studies that have potential to receive funding and become actual companies. Exploration of entrepreneurship, particularly formation and operation of new business ventures. Presentations by and questioning of successful technology entrepreneurs, identifying and evaluating new ventures, opportunities, development of financing, and entry and exit strategies. S/U grading.

M228. Gene Therapy. (4) Lecture, three hours; discussion, one hour. Examination of current importance in pharmacology. Emphasis on recent contributions of special interest to advanced PhD candidates and faculty. Letter grading.

M229. Special Topics in Pharmacology. (4) Lecture, four hours. Examination of current importance in pharmacology. Emphasis on recent contributions of special interest to advanced PhD candidates and faculty. Letter grading.

M237. Introduction to Toxicology. (4) (Same as Pathology M237.) Lecture, two hours; discussion, two hours. Required of all first year students. May be repeated for credit. Letter grading.

M238. Pathologic Changes in Toxicology. (4) (Same as Pathology M238.) Lecture, two hours; discussion, two hours. Required of all first year students. May be repeated for credit. Letter grading.

M256. Business of Science: Exploring Entrepreneurship Seminar. (2) Seminar, one hour. Limited to graduate students. Required of all first- and second-year students. Preparation and presentation of graduate student research progress. Letter grading.

M257. Introduction to Toxicology. (4) (Same as Pathology M237.) Lecture, two hours; discussion, two hours. Required of all first year students. May be repeated for credit. Letter grading.

M258. Pathologic Changes in Toxicology. (4) (Same as Pathology M238.) Lecture, two hours; discussion, two hours. Required of all first year students. May be repeated for credit. Letter grading.

M284. Introduction to Molecular Imaging. (4) (Same as Bioengineering M284.) Lecture, three hours; discussion, two hours. Required of all first year students. May be repeated for credit. Letter grading.

M285. Cancer Imaging. (4) Lecture, three hours; discussion, one hour. Required of all first year students. May be repeated for credit. Letter grading.

M286. Business of Science: Exploring Entrepreneurship Seminar. (2) Seminar, one hour. Limited to graduate students. Required of all first- and second-year students. Preparation and presentation of graduate student research progress. Letter grading.
new hypotheses, and construct research projects, un- derstand balance of importance, novelty, and feasibility, and develop ability to think independently, cre- atively, and comprehensively. Letter grading.

Faculty Committee
Hilary A. Coller, PhD (Molecular, Cell, and Developmental Biology)
Feng Guo, PhD (Biological Chemistry)
Elissa A. Hallerm, PhD (Microbiology, Immunology, and Molecular Genetics)
Alvaro Sagasti, PhD (Molecular, Cell, and Developmental Biology)
Thomas A. Vallim, PhD (Biological Chemistry, Medicine-Cardiology)

Overview
The Doctor of Philosophy (PhD) in Molecular Biology is offered under the supervision of an interdepartmental committee. The Molecular Biology Institute serves this committee and the various departments concerned in support of faculty research and teaching associated with the PhD program. Staff members are from participating departments and from the Molecular Biology Institute. Areas for study include cell biology, developmental biology and neurobiology, nucleic acid biochemistry, gene regulation, immunobiology, microbiology/virology and pathogenesis, molecular evolution and paleobiology, oncogenes and signal transduction, plant molecular biology, protein and enzyme structure and function, genomics, bioinformatics, and structural biology.

Graduate Major

Molecular Biology MS, PhD

Requirements

Official, specific degree requirements are de- tailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more de- tailed guidelines may be outlined in announce- ments, other publications, and websites of the schools, departments, and programs.

Molecular Biology

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of recovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (su- pervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-divi- sion students under guidance of faculty mentor. Students must be in good academic standing and enroll in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Graduate Courses

M202. Advanced Topics in Cryogenic Electron Mi- croscopy. (3) Same as Biological Chemistry M202. Lecture, two hours; discussion, one hour. Students master advanced topics in membrane protein biology, and learn both theory and practice of cryogenic electron microscopy (cryo-EM) as emerging technology in structural biology. Cryo-EM methodologies covered include cryotomography, single particle reconstruc- tion, electron crystallography, and microcrystal elec- tron diffraction. Letter grading.

235. Rigor and Reproducibility. (2) Lecture, one hour; discussion, one hour. Two cornerstones of science advance- ment are rigor in designing and performing sci- entific research and ability to reproduce biomedical re- search findings. Applications of rigor ensure robust and unbiased experimental design, methodology, analysis, interpretation, and reporting of results. When results can be reproduced by multiple scientists, it val- idates original results and readiness to progress to next phase of research. Scientific rigor is strict appli- cation of scientific method to ensure unbiased and well-controlled experimental design, methodology, analysis, interpretation, and reporting of results. Covers literature and videos on rigor and reproduc- ibility in biomedical research. Discussion of issues raised by lecture, or case-studies, with training pro- gram faculty. Students learn that reproducibility is a common problem in biomedical research and how to improve it. S/U grading.

252. Writing for Science (1) Seminar, one hour. Core- quisite: Biological Chemistry 251A or 251B or 251C. Limited to first-year Molecular Biology PhD students. Development of specific skills in scientific writing within context of one advanced course on mechanics of gene transcription. Letter grading.

254A. Concepts in Molecular Biosciences. (3) Lecture, three hours; discussion, two hours. Limited to human genetics and molecular biology graduate stu- dents. Five-week course covering four basic experi- mental approaches of biochemistry and molecular bi- ology in context of various specific topics, including (1) structural biology, with protein and nucleic acid structure and molecular recognition, (2) use of cell-free and purified in vitro systems to dissect reaction mech- anisms, (3) biochemical approaches to dissecting complex reactions/pathways in cells, and (4) enzymo- logy and protein chemistry. Letter grading.

254B. Concepts in Molecular Biosciences. (3) Five- week course. Lecture, three hours; discussion, two hours. Enforced requisites: courses 254A, 254B, 254C. Application of biochemical, molecular biolog- ical, genetic, and cell biological approaches to under- stand specialized topics in life and biomedical sci- ences, including developmental disease, stem cell bi- ology, synaptic transmission in nervous system, cancer, and heart disease. Letter grading.

255. Scientific Writing. (3) Lecture, two hours; discus- sion, one hour. Limited to first-year Molecular Biology PhD students. Improvement of academic literacy through development of specific skills in scientific writing. Review of principles of effective writing using practical examples and exercises. Topics include prin- ciples of good writing, tricks for writing faster and with less anxiety, format of scientific manuscripts, art of editing, and issues in publication and peer review. Letter grading.

256. Current Topics in Molecular Biology. (2) Student presentation/seminar, two hours. Students present oral critiques and participate in discussions on as- signed topics. S/U grading.

300. Entering Mentoring Training Program. (1) Sem- inar/discussion, 90 minutes. Limited to 25 graduate students. Offers formal training on effective mentoring of undergraduate students in science laboratories. Pri- ority given to those who either have prior experience as mentor or are currently mentoring undergraduates; however, all are encouraged. Exploration of mentoring strategies through lecture, collaborative learning, and case studies. Topics include maintaining effective communication, aligning expectations, addressing eq- uity and inclusion, fostering independence, cultivating ethical behavior, and articulating mentoring philos- ophy. S/U grading.

596. Directed Individual Studies. (2 to 12) Tutorial, to be arranged. Directed individual research or study. May be repeated for maximum of 12 units. S/U grading.

599. PhD Dissertation Research and Writing. (2 to 12) Tutorial, to be arranged. Directed individual studies for students who have advanced to candidacy. May be repeated for maximum of 12 units. S/U grading.
Overview

The revolution in modern biology that began with the elucidation of the structure of DNA by Watson and Crick in the 1950s has had a profound effect not only on biological research, but on the way biology is taught as a subject. The field of biology spawned by this discovery, generally called molecular biology, has provided an entirely new framework within which to approach questions in cell and developmental biology. The specializations, both technical and conceptual, demanded by this field have led to the growth of molecular biology and its related disciplines into an essentially separate branch of scientific inquiry.

Students who complete the requirements for the Bachelor of Science (BS) degree in the Department of Molecular, Cell, and Developmental Biology are exceptionally well prepared to pursue careers in cellular and subcellular biological research, biomedical research, or medicine or allied health fields. The degree combines essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as in-depth exposure to key topics in molecular, cell, and developmental biology. The PhD degree offers opportunity for advanced concentrated study and requires independent and innovative research that ultimately results in publishable dissertation materials.

Undergraduate Major

Molecular, Cell, and Developmental Biology BS

The Bachelor of Science degree in Molecular, Cell, and Developmental Biology (MCDDB) is designed especially for students who intend to go on to postgraduate work in biology or medicine and for students aiming for entry-level positions in biotechnology-related fields. Students are exposed to basic biological and molecular concepts underlying recent technical advances in molecular, cell, and developmental biology of animals and plants. Areas of emphasis include cell biology, immunology, molecular biology, plant biology, developmental biology, and neurobiology, among others.

Learning Outcomes

The Molecular, Cell, and Developmental Biology major has the following learning outcomes:

- Broad knowledge of the fundamental tenets of molecular, cell, and developmental processes
- Through use of the scientific method, demonstrated ability to test questions and solve problems using quantitative and inquiry-related skills
- Demonstrated ability to ask questions about primary scientific literature within the discipline
- Demonstrated analytical skills to evaluate primary scientific literature within the discipline
- Effective written and oral communication of laboratory findings
- Demonstrated appropriate awareness of issues associated with responsible conduct of research

Entry to the Major

Transfer Students

Transfer applicants to the Molecular, Cell, and Developmental Biology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 7A, 7B, 144, and 145, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Life Sciences Core Curriculum

Required: Chemistry and Biochemistry 14A, 14B, 14BL, 14C, and 14D, or 20A, 20B, 20L, 30A, 30AL, and 30B; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4A, and 4BL, or 5A, 5B, and 5C.

The Major

Required Courses: Chemistry and Biochemistry 153A, Life Sciences 107, Molecular, Cell, and Developmental Biology 138, 144, 165A, and one laboratory course from Molecular, Cell, and Developmental Biology 104AL, 150AL, 187AL, or 198B. Students completing the Biomedical Research minor may satisfy the laboratory requirement with Molecular, Cell, and Developmental Biology 198C.

Electives: A total of 20 upper-division elective units must be completed. At least 10 units must be taken from molecular, cell, and developmental biology (except 100, 104AL, 138, 144, 145, 150AL, 165A, 187AL, 192A, 192B, 193, 194A, 194B, or 199), Chemistry and Biochemistry C100, 153C, 153L, C159, CM160A, Computer Science CM124, CM186, Microbiology, Immunology, and Molecular Genetics 100L, 101, 102, 105, 158, 168, 174, C185A, Physiological Science 121, 125, or 174, of which at least 5 units must be molecular, cell, and developmental biology courses. The remaining 10 units may be taken from the above courses or from Biostatistics 100A or Statistics 100A, Ecology and Evolutionary Biology 110, 121, 162, Human Genetics C144, or Physiological Science 166.
Honors Program

The core of the program consists of at least one approved undergraduate seminar course from Molecular, Cell, and Developmental Biology 145, 180A, 180B, 191, Biomedical Research 193H, or 194H, and three research courses (12 units minimum) from Molecular, Cell, and Developmental Biology 198A, 198B, and 198C, culminating in a thesis. Biomedical Research 193H and 194H are not accepted as electives for the major.

Computing Specialization

Majors in Molecular, Cell, and Developmental Biology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the major, (2) completing Program in Computing 10A, 10B, 10C, 16A, and Life Sciences 40 or Statistics 13, and (3) completing one course from Computer Science CM124, CM156, Chemistry and Biochemistry C100, CM160A, Molecular, Cell, and Developmental Biology 187AL, or Physiological Science 125. A grade of C or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Student Affairs Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Policies

Preparation for the Major

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving grades below C– in two required courses (12 units minimum) from Molecular, Cell, and Developmental Biology 198A, 198B, and 198C, culminating in a thesis. Biomedical Research 193H and 194H are not accepted as electives for the major.

The Major

Credit for a maximum of two upper-division courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Honors Program

Admission

The honors program provides exceptional Molecular, Cell, and Developmental Biology majors with the opportunity to do research culminating in an honors thesis. Junior and senior majors who have completed all university-level coursework, including all preparation courses and requirements for the major with an overall grade-point average of 3.0 or better and a 3.5 GPA or better in the required major courses, may apply for admission to the honors program. Students must have the sponsorship of an approved faculty adviser.

For more information, students should contact the Student Affairs Office, 128 Hershey Hall, early in their educational planning.

Requirements

To qualify for graduation with honors, students must satisfactorily complete all requirements for the honors program and the major and obtain at least an overall 3.0 grade-point average and a 3.5 GPA or better in coursework required for the major. On recommendation by the faculty sponsor and with approval of the thesis by the departmental honors committee, students are awarded no honors or departmental honors.

Graduate Majors

Molecular, Cell, and Developmental Biology MS

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Molecular, Cell, and Developmental Biology CPhil, PhD

Applicants interested in studying with faculty in the department are encouraged to apply to an appropriate home area in Graduate Programs in Bioscience.

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Molecular, Cell, and Developmental Biology Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

30H. Collaborative Undergraduate Research Laboratory in Yeast, Genetics, and Molecular Biology. (5) Lecture, two hours; laboratory, six hours. Limited to 24 students in Collaborative Undergraduate Research Laboratory (CURL), sponsored by Howard Hughes Medical Institute Professors Program. Basic training in biological research, covering topics in molecular genetics, molecular biology, model organism biology, and data analysis. Letter grading.

50. Stem Cell Biology, Politics, and Ethics: Teasing Apart Issues. (5) Lecture, three and one half hours; discussion, 90 minutes. Developmental biology of various types of human stem cells. Important functional differences between embryonic, hematopoietic, and adult stem cells, as well as differences in their biomed- ical potentials. Discussion of history of debate surrounding embryos, as well as various social, ethical, political, and economic aspects of stem cell research. P/NP or letter grading.

60. Biomedical Ethics. (5) Lecture, three hours; discussion, one hour. Examination of importance of ethics in research and exploration of how and why bioethics is relevant to reproductive screening, policy formation, public regulation, and law. Provides foundation in traditional ethics, consideration of subcategories of bioethics, neoethics, and eugenics, and how to apply ethics to contemporary issues in research and technology. P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. In- dividual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

90. Human Stem Cells and Medicine. (5) Lecture, three and one half hours; discussion 90 minutes. Stem cells have potential to revolutionize medicine is practiced today. Some stem cell therapies are already used successfully to treat thousands of people worldwide. Other stem cell therapies are considered experimental; therefore treatments must be monitored by Food and Drug Administration to ensure safety and efficacy. Some stem cell therapies are offered with minimal scientific justification, relying on hope and hype rather than scientific fact. Exploration of use of stem cells in medicine today to take close look at science behind some of today’s most famous and infamous stem cell medical applications. P/NP or letter grading.

99. Student Research Program. (1 to 2) Tutorial (su- pervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.
Upper-Division Courses

100. Introduction to Cell Biology. (5) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4, and 23L, or 7A, 7B, 7C, and 23L. Not open for credit to Developmental Biology majors or to students with credit for course 165A. Analysis of cell organization, structure, and function at molecular level. Cell membranes and organelles, membrane signaling, protein translocation, and cell movement, intracellular trafficking, cell energetics. Letter grading.

104AL. Research Immersion Laboratory in Developmental Biology. (5) Lecture, two hours; laboratory, eight hours. Prerequisites: Sciences 4, 4, and 23L, or 7A, 7B, 7C, 23L, and 107. Course 104AL is requisite to 104BL. Limited to Molecular, Cell, and Developmental Biology and Microbiology, Immunology, and Molecular Genetics majors. Discovery-based research using sea urchins as model system. Students determine expression of unstudied sea urchin genes using combination of molecular biology and computation techniques. May not be repeated for credit. Letter grading.

104BL. Advanced Research Analysis in Developmental Biology. (5) Laboratory, six hours. Enforced requisite: course 104AL. Limited to Molecular, Cell, and Developmental Biology majors. Investigation and evaluation to be primarily computational in nature whereby students use bioinformatics or mathematical modeling software to interpret, expand, or refine datasets. Use of graphics software to prepare figures and illustrations for presentations, posters, reports, and websites (database entries). Research accomplishments discussed in weekly seminar-style meetings in which student groups present slides and format and present results to class. Production of team poster and final report describing entire research project required. Letter grading.

130. Fundamentals of Digital Imaging and Image Processing. (5) Lecture, four hours; laboratory, two hours. Prerequisite: Sciences 3A, 3B, and 3C, or Mathematics 3A, 3B, and 3C, or Mathematics 31A, 31B, and 32A or 32A. Digital imaging has become integral tool to our everyday lives and to nearly every field of life sciences. Quantitative approach to learning about basic properties of digital images and surveying fundamental methods for processing and analyzing images. Letter grading.

138. Developmental Biology. (5) Lecture, three hours; discussion, one hour. Prerequisites: Life Sciences 3, 4, and 23L, and 107. Developmental understanding of fundamental molecular mechanisms and cellular activities guiding formation of complex organism from single fertilized egg. Development of model organisms to understand and conserved nature of developmental decisions across animal kingdom, distinct features that lead to diversification of animal shape and form during evolution. Origin and roles of stem and progenitor cells in development and maintenance of specific organ systems. Roles of cell shape change, cell death, proliferation, and migration in generating shape of embryo, organs, and tissues. Mechanisms by which cells become different from and communicate with one another to coordinate their activities in time and space in embryo. Special emphasis on experimental approaches used to address these fundamental questions to determine how organs and organs are formed and maintained throughout lifetime of organism. Letter grading.

140. Cancer Cell Biology. (5) Same as Biological Chemistry M140L. Lecture, three hours; discussion, one hour. Requisite: course 165A. Cancer causes and genetics. Effects of cell transformation on cell growth and metabolism. Altered cell cycle, metabolism, and differentiation pathways in cancer cells. Tumor microenvironment contributions to cancer malignancy, including angiogenesis, metastasis, and immune system evasion. Letter grading.

141. Molecular Basis of Plant Differentiation and Development. (5) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 3A, 3B, and 3C, or 7A, 7B, 7C, 23L, and 107. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of variety of plant systems, with focus on developing critical understanding of current experimental research for this exciting area. Concurrently scheduled with course C239. Letter grading.

143. Developmental Biology: Genetic Control of Organogenesis. (5) Lecture, three hours; discussion, one hour. Requisites: course 138, Life Sciences 3, 4, and 23L, or 7A, 7B, 7C, 23L, and 107. Not open for credit to students with credit for Chemistry 155B. Development through understanding of fundamentals of modern molecular biology both from perspective of known molecular mechanisms for regulating fundamental processes in cellular, tissue, and organismal development and from theoretical applied perspective for understanding of unstudied sea urchin genes using combination of bioinformatics or mathematical modeling software to interpret, expand, or refine datasets. Use of graphics software to prepare figures and illustrations for presentations, posters, reports, and websites (database entries). Research accomplishments discussed in weekly seminar-style meetings in which student groups present slides and format and present results to class. Production of team poster and final report describing entire research project required. Letter grading.

144. Molecular Biology of Cellular Processes. (5) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4, and 23L, or 7A, 7B, 7C, 23L, and 107. Not open for credit to students with credit for Chemistry 155B. Development through understanding of fundamentals of modern molecular biology both from perspective of known molecular mechanisms for regulating fundamental processes in cellular, tissue, and organismal development and from theoretical applied perspective for understanding of unstudied sea urchin genes using combination of bioinformatics or mathematical modeling software to interpret, expand, or refine datasets. Use of graphics software to prepare figures and illustrations for presentations, posters, reports, and websites (database entries). Research accomplishments discussed in weekly seminar-style meetings in which student groups present slides and format and present results to class. Production of team poster and final report describing entire research project required. Letter grading.

145. Appreciation and Critical Review of Biomedical Research. (4) Lecture, three hours; discussion, one hour. Corequisite: one course from 188B, 189C, 189B, 199C. Designed to offer students perspectives on how to appreciate independent research conducted in faculty mentor’s laboratory, and allow them to gain wider understanding of fundamental, cellular, and developmental biology. Through free-form Socratic learning method, class participation of classmates is encouraged, while students gain understanding of process and value of peer evaluation, and improved verbal and written presentation skills. Letter grading.

150. Plant Communication. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4, and 23L, or 7A, 7B, 7C, 23L, and 107. Most people think of plants as static organisms, yet they live in a world of symbiosis and community. Plants change atmosphere, enrich soil, and communicate with insects, bacteria, and each other—Earth’s ultimate symbiote. Just as science has revealed over time misconceptions about how things work at deeper level, scientists and economists now recognize that beyond obvious need to grow above-ground biomass for fuel production, we must better understand how to maintain sustainable natural and artificial resources that sustain our existence. Experimental exploration of plant communication mechanisms and responses to microbial infection. Letter grading.

150BL. Limited to Molecular, Cell, and Developmental Biology majors. Introductory plant-microbe biology laboratory to give students hands-on experience doing experiments and making their own observations about plants and microorganisms. Letter grading.

CM156. Human Genetics and Genomics. (5) Same as Microbiology CM156E. Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4, and 23L, or 7A, 7B, and 7C. Application of genetic principles in human populations, with emphasis on human genetics, family studies, positional cloning, Mendelian and common diseases, cancer genetics, animal models, cytogenetics, pharmacogenetics, population genetics, genetic counseling. Letter grading. In literature, with focus on current questions in fields of medical and human genetics and methodologies appropriate to answer such questions currently scheduled with course CM256. Letter grading.

160. Principles of Light Microscopy. (4) Lecture, three hours; laboratory, two hours. Requisites: Life Sciences 7A, 7B, 7C, 23L. Over last two decades, there has been explosion of use of light microscopy which has provided us with invaluable tools for biological research. Study of light microscopy techniques currently used in research laboratories. Lecture examinations to discuss modern scientific applications, availability, and limitation of light microscopy. Letter grading.

165A. Biology of Cells. (5) Lecture, three hours; discussion, one hour. Requisites: Chemistry 140 or 30B, Life Sciences 3, or 7A, 7B, and 7C. Not open for credit to students with credit for course 165A. Development through understanding of fundamental cellular structure and function, with focus on each individual cellular organelle, as well as interaction of cells with extracellular environment and with other cells. Emphasis on stating context of experimental questions and answers to incorporate concept of scientific method and recent advances in cell biology research. Exposure in discussions to recent scientific articles directed to information examined in lectures. Letter grading.

165B. Molecular Biology of Cell Nucleus. (5) Lecture, three hours; discussion, two hours. Requisite: course 165A. Introduction of course 165A. Molecular biology of eukaryotic cell nucleus, with focus on structure, organization, replication, and repair of eukaryotic genome; eukaryotic gene expression, including transcription, translation, and regulation, as well as cancer and stem cells. Development of advanced specialized topics to allow integrated approach to molecular cell biology. Material presented in context of experimental questions and answers to incorporate concept of scientific method and recent advances in cell biology research. Exposure in discussions to current scientific articles that directly relate to information examined in lectures. Letter grading.

167. Genetic Engineering: History, Science, and Applications in Medicine, Agriculture, and Law. (6) Lecture four hours; discussion two hours. Requisites: Life Sciences 7A, 7B. Not open for credit to students with credit for course 70 or Honors Collegium 70A. Provides historical and scientific perspective on field of genetic engineering with emphasis on social, legal, and ethical issues that arise from emerging genetic technologies. Provides historical and social context for field of genetic engineering, and puts genetic engineering into historic and social perspective so that students can make objective decisions about how this technology should be used. Highly interactive, team-oriented, problem-based, and teaches students how to think critically about experimental science, societal issues raised by advances in genetic engineering, genetic counseling, and DNA reproduction. Includes interactive, media-oriented lectures with hands-on experiments and demonstrations, and seminar style discussions focusing on seminal articles in history of genetic engineering and contemporary issues. Letter grading.

168. Stem Cell Biology. (5) Lecture, three hours; discussion, one hour. Requisites: courses 138, 165A. State-of-art education of embryonic and adult stem cells and how these pluripotent/multipotent cells can be used to treat congenital defects, diseases, or injury in humans. Review of current knowledge of human

172. Genomics and Bioinformatics. (5) Lecture, three hours; discussion, one hour. Requisite: course 144 or 165B or Chemistry 153B or Microbiology 132. Genomics is study of complete repertoire of molecules in cells. The human and yeast genomes and genetic approaches to study function of individual genes, fundamental bioinformatics algorithms used to study relationship between nucleotide and protein sequence. Use of their evolution, use of microarray technologies to measure changes in gene expression, analysis of microarray data including clustering and promoter analysis, proteomics topics including protein expression and interactions, epigenetic study of DNA methylation and chromatin modification, and systems biology, or computational approaches to integrating varied genomic data to gain more complete understanding of cellular biology. Letter grading.

M175A. Neuroscience: From Molecules to Mind—Cellular and Systems Neuroscience. (5) Same as Neuroscience M101A, Physiological Science M180A, and Psychology M117B. Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14C or 30A (14C may be taken concurrently), Life Sciences 7C, Physics 1B or 1BC or 5C or 6B. Students must receive grade of C or better to proceed to next course in sequence. Cellular and molecular neuroscience, molecular and cellular mechanisms of behavior. Letter grading.

M175B. Neuroscience: From Molecules to Mind—Molecular and Developmental Neuroscience. (5) Same as Neuroscience M101B, Physiological Science M180B, and Psychology M117C. Lecture, four hours; discussion, 90 minutes. Requisites: course M175A (with grade of C– or better), Life Sciences 7C. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptor signaling. Neurotransmitters and neuromodulators. Synaptic mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

180A. Scientific Analysis and Communication I. (2) Seminar, two hours. Enforced corequisite: course 196A. Students read and discuss scientific articles and give presentations, introducing research topics using relevant primary literature, critical aspects of research process, including record keeping, ethics, laboratory safety and citizenry, mechanics of scientific writing, diverse approaches to research, and project respecification. Introduction of hands-on exposure to the publication of preprints and how to communicate your research project findings, improvement of oral and written communication skills, and full appreciation of process of doing good science and becoming skilled researchers. Letter grading.

180B. Scientific Analysis and Communication II. (2) Seminar, two hours. Enforced corequisites: courses 180A, 196A. Enforced corequisite: course 196B. Students give presentations similar to laboratory meeting or research symposium talk in which speakers discuss project goals, methodological approaches, results, and conclusions. Writing research papers as well as prepare and present scientific posters. Production of deliverables that demonstrate research achievements and creation of sense of pride for work accomplished as skilled researchers. Letter grading.

187AL. Research Immersion Laboratory in Genomic Biology. (5) Lecture, three hours; laboratory, six hours. Requisites: Life Sciences 4 or 107, 23L. Course 187AL is requisite to 187BL. Limited to Molecular, Cell, and Developmental Biology majors. Introduction to cutting-edge genomic technologies and bioinformatics methods and resources for genome annotation. Students propose original research projects related to gene expression, evolution, and functions using bioinformatics tools. Students are provided fragments of genome from relatively poorly studied organism that has been sequenced at UCLA. May not be repeated for credit. Letter grading.

188. Special Courses in Molecular, Cell, and Developmental Biology. (2) Seminar, two hours. Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit with topic change. Letter grading.

188A. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E or 101F. Enforced corequisite: Senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188C. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188B. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 885 course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to students in College Honors Program. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for credit. Enforced requisite: senior research contract required. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for credit. Enforced requisite: senior research contract required. Honors content noted on transcript. Letter grading.

191. Variable Topics Research Seminars: Molecular, Cell, and Developmental Biology. (2) Seminar, two hours. Limited to majors. Intended for students with strong commitment to pursue graduate studies in molecular, biochemical, physiological, and biomedical fields. Weekly variable topics course with regular discussion and presentation of paper selected from current literature. May be repeated once for credit. P/NP or letter grading.

192A. Undergraduate Practicum in Molecular, Cell, and Developmental Biology. (5) Seminar, two hours. Limited to junior/senior Molecular, Cell, and Developmental Biology majors. Training and supervised practicum for advanced undergraduate students. Students assist in preparation of materials and development of innovative programs under guidance of faculty member in small course settings. Consult Undergraduate Office for further information. May not be applied toward course requirements for Molecular, Cell, and Developmental Biology major. May be repeated once for credit. P/NP or letter grading.

192B. Undergraduate Practicum: CityLab. (2) Seminar, two hours. Limited to juniors/seniors in any life sciences major. CityLab training and supervised practicum for advanced undergraduate students. Students assist in preparation of materials and development of innovative programs under guidance of faculty member in small course settings. May not be applied toward course requirements for Molecular, Cell, and Developmental Biology major. May be repeated once for credit. P/NP or letter grading.

193. Journal Club Seminars: Molecular, Cell, and Developmental Biology: Applied Biology. (3) Seminar, two hours. Enforced corequisites: course 199A or 199B or 199C or 199A or 199B or 199C. Limited to juniors/seniors. Development of in-depth understanding of and ability to discuss current literature in one’s own research. May be repeated for credit. P/NP grading.

194A. Research Group Seminars: Current Topics in Biomedical Sciences. (2) Seminar, two hours. Limited to juniors/seniors in research traineeships or those who have strong commitment to pursue graduate studies in molecular, biochemical, physiological, or biomedical fields. Weekly presentation and discussion of paper selected from current literature. May be repeated for credit. P/NP grading.

194B. Research Group Seminars: Current Topics in Biomedical Sciences. (2) Seminar, two hours. Limited to juniors/seniors in research traineeships or those who have strong commitment to pursue graduate studies in molecular, biochemical, physiological, or biomedical fields. Weekly presentation and discussion of paper selected from current literature. May be repeated for credit. P/NP grading.
required to 196B. Designed for undergraduate students who are interested in pursuing inquiry-based and hypothesis-driven research experience in laboratory of department of preclinical pathology. Guided research course to be taken in conjunction with course 180A, followed by continuation research course 196B. Technical aspects vary depending on specific laboratory; however, all students learn how to apply scientific method: propose hypothesis, design experiments to address hypothesis, perform experiments, and analyze results. How to record information from experimental data. Computer filtering; three-dimensional reconstruction. Harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. "S/U or letter grading.

Graduate Courses

M230B. Structural Molecular Biology. (4) (Same as Chemistry M230B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure; structures of globular proteins and RNA; structures of fibrous proteins, nucleic acids, and polysaccharides; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. "S/U or letter grading.

M230D. Structural Molecular Biology, Laboratory. (2) (Same as Chemistry M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. "S/U or letter grading.

C234. Genetic Control of Development. (4) (Same as Biological Chemistry M234.) Lecture, four hours. Topics consist of developmental biology, focusing on experimental approaches in molecular biology, including problems in oogenesis and early embryogenesis, pattern formation, axis determination, and development of the nervous system. "S/U or letter grading.
nervous system development, cellular morphogen-
esis, and cell-cell and cell-matrix interactions. S/U or
letter grading.

C239. Molecular Basis of Plant Differentiation and De-
velopment. (4) Lecture, three hours; discussion, one hour. Requi-
sites: Life Sciences 1, 3, 4, and 23L or 7A, 7B, 7C, 23L, and 107. In-depth study of basic pro-
cesses of growth differentiation and development in plants and molecular mechanisms underlying these pro-
cesses. Discussion of variety of plant systems, with focus on develop-
ing critical understanding of cur-
cient experimental basis of research in this field. Con-
currently scheduled with course C141. Preparation and pre-
presentation of term paper, in addition to other coursework,
required of graduate students. Letter grading.

242. Topics in Neurobiology. (4) Lecture, three hours; dis-

cussion, two hours. Designed for graduate students.

250. Plant Communication. (4) Lecture, three hours; dis-

cussion, one hour. Requisites: Life Sciences 3, 4, and 23L, or 7A, 7B, 7C, 23L, and 107. Most people
think of plants as static organisms, yet they live in
world of symbiosis and community. Plants change at-
mosphere, enrich soil, and communicate with insects,
and other—Earth’s ultimate symbiote. Just as science has disclosed over time misconcep-
tions about static level, scientists and economists now recognize that beyond obvious need to grow above ground biomass for fuel produc-
tion, we must better understand how to make that bio-

mass in sustainable manner. Introductory course in
chemical ecology and how natural compounds affect
gene expression. Emphasis on role of natural com-

pounds in plant/microbe, plant/plant, and plant/herbi-
vore interactions. System of principles of plant de-
fense mechanisms and responses to microbial infec-
tions. Concurrently scheduled with course C150. S/U or
letter grading.

254. Seminar: Plant Morphogenesis. (2) Seminar, two hours; dis-

cussion, one hour. Letter grading.

255. RNA Editing. (4) Lecture, two hours; discussion, one hour. Prepara-
tion: knowledge of molecular biology and molecular genetics. Discussion of diverse set of
novel RNA modification phenomena known as RNA editing. Topics include U insertion/deletion type of ed-
it ing in trypanosome mitochondria, C to U substitution editing in apo B mRNA and plant mitochondria, C in-
sertion editing in Physarum mitochondria, etc. Discus-
sion of mechanism, function, and evolution of these phenomena. S/U grading.

CM256. Human Genetics and Genomics. (5) [Same as Biochemistry: CM286.] Lecture, three hours; dis-

cussion, one hour. Requisites: Life Sciences 3, 4, and 23L, or 7A, 7B, and 7C. Application of genetic principles in
human populations, with emphasis on genomics, family studies, positional cloning, Mendelian and
common diseases, cancer genetics, animal models, cyto-
genetics, pharmacogenetics, population genetics, and
genetic counseling. Lectures and readings in liter-
ature, with focus on current questions in fields of med-
ical and human genetics and methodology appro-
riate to answer such questions. Concurrently sched-
ulated with course CM156. Independent research project
designed for graduate students. Letter grading.

266A-266B-266C. Seminars: Development, Stem

Cells, and Disease Mechanisms. (2–2–2) Seminar, two hours. Limited to graduate students. Advanced courses based on research papers on fundamental cellular mechanisms governing development and disease.

M272. Stem Cell Biology and Regenerative Medi-
cine. (4) [Same as Pathology M272.] Lecture, two hours; discussion, two hours. Designed for graduate
students. Presentation of current knowledge of em-

bryonic and adult stem cells and factors that regulate
their growth and development. Major emphasis on
how advances in cell and molecular biology and tissue
engineering can be applied to use of stem cells in re-
generative medicine. Bioethical and legal issues re-

lated to stem cell research, S/U or letter grading.

276. Seminar: Molecular Genetics. (2) Seminar, two hours; S/U or letter grading.

277. Seminar: Genetics. (2) Seminar, two hours; S/U or
letter grading.

278. Seminar: Molecular Genetics of Development. (2) Seminar, two hours. Designed for graduate stu-
dents. Topics vary from year to year, to focus on es-

tablishment of position and pattern during embryo-
genesis by interaction of signal transduction systems
and transcription factors. S/U or letter grading.

283. Seminar: Topics in Cell Biology. (2) Seminar, two hours. Discussion of various topics on biology of
eukaryotic cells. Topics vary from year to year and in-
clude bioenergetics, motility, organelle DNA, mem-
brane structure and function, oncogenic transforma-
tion, nuclear organization and function. S/U or letter grading.

284. Seminar: Structural Macromolecules. (2) Seminar, one hour; discussion, three hours. Prepara-
tion and discussion of current topics in extracellular active structural macromolecules—their synthesis, struc-
ture, and roles in cell and developmental biology. Letter grading.

285. Seminar: Plant Development. (2) Seminar, one hour; discussion, two hours. Preparation: one plant physiology course and at least one advanced under-
graduate or graduate plant development or biochem-
istry course. Seminar on specific topics in plant devel-

opment. Content varies each term. S/U grading.

299. Current Topics in Plant Molecular Biology. (2) Discussion, one hour. Recent research developments in field of plant molecular biology. Opportunities for

graduate students to discuss individual research work.

S/U grading.

295. Seminar: Molecular, Cell, and Developmental Biology. (2) Seminar, two hours. In-depth surveys of recent developments in molecular, cell, and develop-

mental biology research. Reading and presentation of
primary research articles to learn to critically evaluate
research papers and to organize and present seminars on specific research topics. S/U or letter grading.

296. Advanced Topics in Molecular, Cellular, and De-
velopmental Biology. (2) Seminar, three hours. Ad-

dvanced study and analysis of current topics in cell,
molecular, and developmental biology. Discussion of
current research and literature in research specialty of
faculty member teaching course. S/U grading.

297. Advances in Molecular Analysis of Plant Devel-

opment and Plant/Microbe Interactions. (2) Discus-
sion, two hours. Recent advances in plant molecular biology, with emphasis on control of gene expression
both during plant development and in plant/microbe

375. Teaching Apprentice Practicum. (1 to 4) Semi-
inar, to be arranged. Preparation: apprentice per-
sonnel employment as teaching assistant, associate, or
fellow. Teaching apprenticeship under active guid-
ance and supervision of regular faculty member re-
sponsible for curriculum and instruction at UCLA. May
be repeated for credit. S/U grading.

405. Preparation for Teaching Molecular, Cell, and De-
velopmental Biology in Higher Education. (2) Seminar, two hours. Designed for graduate students.

Study of problems and methodologies in teaching mo-

elocular, cell, and developmental biology, including
workshops, seminars, apprentice teaching, and pre-
observation, S/U grading.

597. Preparation for MA Comprehensive Examina-
tion or PhD Qualifying Examinations. (2 to 12) Tuto-
rial, to be arranged. May not be applied toward MA or
PhD course requirements. S/U grading.

598. MA Thesis Research and Writing. (2 to 12) Tu-
torial, to be arranged. S/U grading.

599. PhD Dissertation Research and Writing. (2 to
12) Tutorial, to be arranged. S/U grading.

Overview

Physiology is the study of the functional pro-
cesses that collectively constitute life. The studies usually employ quantitative analyses of normal life processes, of pathological defects in normal life processes, of model systems to clarify and test basic physiological principles, and of functional specializations of organisms that have evolved under the influence of differ-
ing selective forces. Thus, physiology contrib-
utes importantly to advances in knowledge both in the basic biological sciences and in bio-
medicinal sciences; and provides an essential
foundation for the practice of medicine.

The primary objective of the interdepartmental Molecular, Cellular, and Integrative Physiology program is to train a new generation of physi-
ologists who apply modern knowledge in
molecular and cellular biology and systems
physiology to important questions in organism-

Molecular, Cellular, and Integrative Physiology / 665
physiological questions across several levels of organization and to understand how research strategies incorporating each of the levels of analysis can be formulated. This approach to physiology education is responsive to the need for physiologists who can intellectually and technically span disciplines related to physiol-

ogy that are typically separated.

Coursework consists of formal instruction in the most current information in molecular biology, cell biology, and the molecular and cellular foundations of physiology. In addition, students identify an area of emphasis in biophysics, cellular and molecular biology, or integrative/comparative physiology in which additional studies are pursued. The heart of the program, however, is the research that leads to the dissertation, which is performed under the guidance of a faculty mentor. The program faculty includes more than 115 professors in the Geffen School of Medicine and College of Letters and Science. Collectively they have been recently ranked by the National Research Council in the top five in the U.S. for their quality as an academic faculty.

Graduate Major

Molecular, Cellular, and Integrative Physiology PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Molecular, Cellular, and Integrative Physiology

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Graduate Courses

214. Research Grant Writing in Biomedical Sciences. (4) Lecture, three hours. Designed for Molecular, Cellular, and Integrative Physiology program students. Training in designing, writing, and evaluating research project and fellowship grants. How grant applications are structured and what features contribute to grant application success. How individual research project grants (RO1) and exploratory/development research grants (R21) to National Institutes of Health (NIH) are structured and differ. How applications for predoctoral fellowships from NIH (F31) and American Heart Asso-

ciation (AHA) are organized. Development and writing of students’ own RO1, R21, F31, or AHA grant appli-
cation. Letter grading.

248. Seminar: Molecular Basis of Physiological Function. (2) Seminar, two hours. Application of mo-

lecular approaches in investigation of physiological processes of biological systems. Critical thinking and experimental design strategies learned through primary literature review and in-class presentation-discussion. Letter grading.

249. Seminar: Pathogenic Mechanisms in Muscle Disease. (2) Seminar, two hours. Recent advances have been made in genetic identification of molecular basis of muscle disease, and some mechanisms in-
volved have been elucidated. Focus on muscle dis-
eases in which substantial mechanistic information has been obtained, including particular cellular locations and diseases associated with those locations. Topics include Duchenne muscular dystrophy, congenital muscular dystrophy, limb girdle dystrophy, Ullrich myopathy, and other forms of genetically inherited muscle disease. S/U grading.

250. Current Topics in Molecular, Cellular, and Integrative Physiology. (2) Seminar, two hours. Designed for molecular, cellular, and integrative physiology students. Reading, analysis, critique, and discussion of current research literature in field of molecular, cellular and integrative physiology. Student presentation of assigned paper. Variable topics. May be repeated for credit. S/U grading.

251. Integrative Genomics for Studying Complex Diseases. (2) Seminar, two hours. Requisite: course 252A. Lectures and supervised student presentations to offer graduate students opportunity to acquire deep understanding of advanced integrative genomic approaches and how these approaches can be applied to help understand molecular basis of diverse com-
plex diseases. Topics include transcriptomics, genetics, functional genomics, network biology, and high-level integration. Letter grading.

252. Molecular Mechanisms of Human Diseases I. (6) Lecture, four hours; discussion, two hours. Prepa-
rating: prior satisfactory molecular and cell biology coursework. Fundamental concepts and methodolo-
gies in modern biology and medicine, with emphasis on systems-based research and mechanistic under-
standing to human diseases and therapies as they apply to neural, immune, cardiovascular, and meta-

bolic systems. Reading, review, and discussion of pri-
mary research literature addressing fundamental con-
cepts and methodologies in related topic areas of human biology and diseases. Emphasis on development of scientific skills in critical analysis, knowledge acquisition and self-learning, as well as effective artic-
ulation in scientific debate and exchange. Letter grading.

262. Molecular Mechanisms of Human Diseases II. (6) Lecture, four hours; discussion, two hours. Prepa-
rating: prior satisfactory molecular biology course-
work. Requisite: course 252. Fundamental concepts and methodologies in modern biology and medicine, with emphasis on systems-based research and mecha-

nistic understanding to human diseases and therape-
ties as they apply to neural, cardiovascular, and meta-

bolic systems. Includes reading, review, and discus-
sion of primary research literature addressing fundamen-
tal concepts and methodologies in related topic areas of human biology and diseases. Emphasis on development of scientific skills in critical analysis, knowledge acquisition and self-learning, and effective articulation in scientific debate and exchange. Letter grading.

290A-290B-290C. Tutorials. (4-4-4) Tutorial, two hours. Discussion, analysis, and critique of original research literature. Letter grading. 290A, Cellular and Molecular Physiology; 290B, Biophysics; 290C, Integrative and Comparative Physiology.

296. Research Seminar. (2) Seminar, to be arranged. Review of literature, discussion of original research, and analysis of current topics in molecular, cellular, and integrative physiology. May not be applied toward PhD course requirements. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice per-

sonnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guid-
ance and supervision of regular faculty member re-

sponsible for curriculum and instruction at UCLA. May not be applied toward PhD course requirements. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 10) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

997. Preparation for PhD Qualifying Examinations. (2 to 10) Tutorial, to be arranged. May not be applied toward PhD course requirements. May be repeated for credit. S/U grading.

599. Research for PhD Dissertation. (2 to 10) Tuto-

rial, to be arranged. May not be applied toward PhD course requirements. May be repeated for credit. S/U grading.

Overview

Faculty from 19 departments from six schools at UCLA, including chemistry and biochemistry, environmental health sciences, epidemiology, medicine, molecular and medical pharmacology, and pathology and laboratory medicine, have joined forces to create an interdisciplinary PhD program in Molecular Toxicology that is administered through the Fielding School of Public Health.

Specialties within the program include, but are not limited to, neurotoxicology, developmental toxicology, genetic toxicology, and carcinogen-
esis. There is a particular emphasis on mechani-

ms of toxicity, since it is now widely accepted that understanding mechanisms will provide the means for accurately determining risk.

New chemicals have been the basis for most of the technological developments during the past century, and there is no question that soci-
eity has reaped enormous benefits from the creation and growth of the chemical industry. However, major health and environmental problems have also been the legacy of the synthesis of new chemical species. The discipline of toxicology, which seeks to characterize and elucidate the mechanisms of the problems related to exposure of chemical agents, has also developed from a purely descriptive to a mechanistic science whose objective is to understand the basis of toxic action, predict the toxicity of new chemical entities, and protect organisms from them. Toxicology has used the basic disciplines of chemistry, biochemistry, and cell biology to advance understanding of toxicological phenomena, and the growth of the sophistication of toxicology has paralleled the increase in knowledge derived from the basic chemical and biological sciences.

Graduate Major

Molecular Toxicology PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Molecular Toxicology

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial, guided study under direct faculty supervision. May not be applied toward degree course requirements. May be repeated for credit. S/U or letter grading.

Upper-Division Course

197. Individual Studies in Molecular Toxicology. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

211A-211B-211C. Molecular Toxicology Seminars. (1-1-1) Seminar, one hour twice per semester. Participation is required with topics relevant to molecular toxicology. In Progress (students, postdoctoral fellows, and faculty) and deals with members of UCLA molecular toxicology community (students, postdoctoral fellows, and faculty) and deals with topics relevant to molecular toxicology. In Progress (211A, 211B and S/U(211C) grading.

242. Advanced Molecular Toxicology. (4) Formerly numbered M242.) Lecture, two hours; discussion, two hours. Requisite: Environmental Health Sciences C240. Preparation: undergraduate biology and chemistry courses. Examination of recent literature on mechanisms of toxicity. Didactic lectures and student presentation of papers selected by instructor on various aspects of toxic mechanisms, including free radical generation, oxidative stress and adaptive pathways; mechanisms of cell death, inflammation and fibrosis, autophagy and diseases, metal toxicity/ homeostasis, carcinogenesis, DNA damage and repair, cancer and gene environment interactions, toxicity testing and radiation carcinogenesis, toxicology of major pollutants including air pollution, persistent organic pollutants and dioxins, toxicology of major organ including liver, kidney, immune, reproductive and nervous system, and nanotoxicology. Discussion of various papers. Letter grading.

M247. Advanced Concepts in Gene-Environment Interactions. (4) Same as Environmental Health Sciences M241.) Lecture, three hours; discussion, one hour. Comprehensive and practical examination of emerging science of gene-environment interaction. Discussion of primary components of field, including role of metabolic pathways in modifying environmental responses and importance of environmental influences in human disease. Exploration of selected hot topics in field, such as importance of epigenetics and of microbiome. S/U or letter grading.

296B-296F. Research Topics in Molecular Toxicology. (2-2) Research group meeting, two hours. Advanced study and analysis of current topics in molecular toxicology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading: 296B. Molecular Carcinogenesis. 296F. Genetic Toxicology.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged. Individual guided studies under direct faculty supervision. May not be applied toward degree course requirements. May be repeated for credit. S/U or letter grading.

597. Preparation for PhD Qualifying Examinations. (2 to 12) Tutorial, four hours. May not be applied toward degree course requirements. May be repeated for credit. S/U grading.

599. PhD Dissertation Research. (8 to 12) Tutorial, to be arranged. May not be applied toward degree course requirements. May be repeated for credit. S/U grading.

Music / 667
Undergraduate Majors

Music BA

Capstone Major

The Music major is a designated capstone major. Through preparation for and execution of their senior capstone projects or recitals, students demonstrate mastery of program learning outcomes as well as a level of proficiency appropriate for their role in the recitals and their understanding of performance practices appropriate to the repertory being performed, as acquired in previous coursework and through research. Students also display their ability to assemble an effective program in terms of pacing and variety and demonstrate requisite stage presence along with an ability to communicate with their audience in performance.

Learning Outcomes

The Music major has the following learning outcomes:

- Proficiency appropriate for role in the recital
- Understanding of performance practices, as acquired through coursework and research, appropriate to the repertory being performed
- Ability to assemble an effective program in terms of pacing and variety
- Requisite stage presence and ability to communicate with audience in performance

Entry to the Major

Admission

Applications for the Music BA are not being accepted at this time.

Requirements

Preparation for the Major

Required: Music M6A, M6B, M6C, with grades of C– or better, 20A, 20B, 20C, with grades of C or better, 12 units from courses 60A through 61A, and two years (12 units) of performance organizations utilizing students’ major instruments (courses C185A through 185H and C186A through C186C), as assigned by the chair or designated faculty member.

The Major

Required: Music 120A, 120B, 120C, 140A, 140B, 140C, with grades of C or better, and six theory courses selected in consultation with a faculty adviser.

Policies

Preparation for the Major

All entering first years are required to take the Music Theory Assessment Examination either during New Student Sessions or during zero week of fall quarter. The examination score is used to determine eligibility and placement in first-year music core courses (Music M6A, M6B, M6C and 20A, 20B, 20C). Examination results may require enrollment in Music 3 as a requisite to both courses M6A and 20A. Entering transfer students with fewer than 15 units of prior music theory must take the Music Theory Assessment Examination.

Music Composition BA

Capstone Major

The Music Composition major is a designated capstone major. Through preparation for and execution of their senior capstone projects or recitals, students demonstrate mastery of program learning outcomes; as well as a level of proficiency appropriate for their role in the recitals and their understanding of performance practices appropriate to the repertory being performed, as acquired in previous coursework and through research. Students also display their ability to assemble an effective program in terms of pacing and variety, and demonstrate requisite stage presence along with an ability to communicate with their audience in performance.

Learning Outcomes

The Music Composition major has the following learning outcomes:

- Demonstrated artistic proficiency on a primary instrument or in voice
- Demonstrated excellent aural musicianship skills and a working knowledge of music theory and music history
- Composition of vocal, instrumental, and/or electronic music in varied genres and forms
- Demonstrated knowledge and application of vocal, instrumental, and electronic performance techniques and acoustical properties to scoring and orchestration, including proficiency with notation and sequencing software
- Demonstrated knowledge of counterpoint and polyphonic styles and textures in Renaissance, Baroque, Classical-Romantic, and/or contemporary practice
- Demonstrated fundamentals of conducting an ensemble, including basic patterns and gestures, principles, scores analysis skills, and rehearsal techniques
- Composition of at least one substantial piece of music and presentation of it in a concert setting, such as a senior recital

Entry to the Major

Admission

For new and change-of-major applicants, students must submit a portfolio of compositions prior to the required audition and interview with the composition faculty.

Requirements

Preparation for the Major

Required: (1) Musicianship—Music M6A, M6B, M6C, with grades of C– or better; (2) Theory—Music 20A, 20B, 20C, with grades of C or better; (3) Instrumental studio—12 units from Music 60A through 60U in one instrument; (4) Composition studio—6 units of Music 66; (5) Large conducted ensembles—12 units from Music C185A through 185H using the student’s major instrument, as assigned by the chair or designated faculty member.
The Major

Required: (1) **Theory**—Music 120A, 120B, 120C, with grades of C or better; (2) **History**—Musicology 125A, 125B, 125C, with grades of C or better; (3) **Advanced composition studio**—10 units of Music 166; (4) **Advanced composition concepts and techniques**—Music 104A or 104B, 106A, 106B, 116, 124A or 124B or 124C, C176; (5) **Electives**—at least 4 units selected from all upper-division ethnomusicology, global jazz studies, music, music industry, or musicology courses; (6) **Capstone composition recital**—Music 169. In senior year, each student must present a senior recital as part of the capstone course to be preceded by a scoring course (Music 124A or 124B or 124C); the 30-minute recital includes a printed program with notes. All recitals are videotaped and archived. Performances are evaluated by a jury.

Policies

Preparation for the Major

All entering first years are required to take the Music Theory Assessment Examination either during New Student Sessions or during zero week of fall quarter. The examination score is used to determine eligibility and placement in first-year music core courses (Music M6A, M6B, M6C and 20A, 20B, 20C). Examination results may require enrollment in Music 3 as a requisite to both courses M6A and 20A. Entering transfer students must take the Music Theory Assessment Examination to determine placement in the appropriate music theory sequence.

Music Education BA

Capstone Major

The Music Education major is a designated capstone major. Through preparation for and execution of their senior capstone projects or recitals, students demonstrate mastery of program learning outcomes; as well as a level of proficiency appropriate for their role in the recitals and their understanding of performance practices appropriate to the repertory being performed, as acquired in previous coursework and through research. Students also display their ability to assemble an effective program in terms of pacing and variety, and demonstrate requisite stage presence along with an ability to communicate with their audience in performance.

Learning Outcomes

The Music Education major has the following learning outcomes:

- Demonstrated artistic proficiency on a primary instrument or in voice
- Demonstrated excellent aural musicianship skills and a working knowledge of music theory and music history
- Demonstrated knowledge of a varied repertoire of music that includes Western, non-Western, and/or large conducted ensembles
- Development of pedagogical skills, assessment strategies, and musical leadership abilities in classroom, instrumental, and choral settings
- Demonstrated basic skills in secondary performance areas and music technology
- Identification and description of major concepts and theories of educational psychology
- Development of the flexibility necessary to teach music in traditional and non-traditional settings

Entry to the Major

Admission

Applicants are required to audition in their primary performance medium and interview with the music education faculty.

Requirements

Preparation for the Major

Required: (1) **Music M6A, M6B, M6C**, with grades of C– or better; (2) **Theory**—one of the following series approved by the division chair: Music 20A, 20B, and 20C, or 21A, 21B, and 21C with grades of C or better; (3) **Instrumental or vocal studio**—12 units from Music 60A through 60U for instrumentalists or 15 units of Music 61A and 61C for vocalists; (4) **Large conducted ensembles**—18 units from Music C185A through 185H, as assigned by the chair or music education faculty member.

The Major

Required: (1) **Music M6A, M6B, M6C**, with grades of C– or better; (2) **Theory**—Music 111A, 111B, 111C, with grades of C or better; (3) **History**—Musicology 125A, 125B, 125C, with grades of C or better; (4) **Music education**—Music 110A, 110B, 110C, 110D, 114A, 114B, 114C, 114D, 115A, 115B, 115C, 116, 117; (5) **Advanced instrumental or voice studio**—4 units from Music 160A through 160U for instrumentalists or 5 units of Music 161A and 161C for vocalists; (6) **Public recital**—2 units from Music 163A through 163V (vocalists must also enroll in Music 161C as corequisite to 163V) taken in the primary performance area; students must consult and receive approval from the music education faculty member before scheduling recital, which may be scheduled as early as fall quarter of the junior year; and (7) **Capstone project**—Music 110D. All capstone projects in music education take the form of an electronic portfolio demonstrating mastery of program learning outcomes. The student’s portfolio must be submitted before Music 110D is completed.

Policies

Preparation for the Major

All entering first years are required to take the Music Theory Assessment Examination either during New Student Sessions or during zero week of fall quarter. The examination score is used to determine eligibility and placement in first-year music core courses (Music M6A, M6B, M6C, and 20A, 20B, and 20C or 21A, 21B, and 21C). Examination results may require enrollment in Music 3 as a requisite to both courses M6A and 20A/21A. Entering transfer students must take the Music Theory Assessment Examination to determine placement in the appropriate music theory sequence.

Music Performance BM

Capstone Major

The Music Performance major is a designated capstone major. Through preparation for and execution of their senior capstone projects or recitals, students demonstrate mastery of program learning outcomes; as well as a level of proficiency appropriate for their role in the recitals and their understanding of performance practices appropriate to the repertory being performed, as acquired in previous coursework and through research. Students also display their ability to assemble an effective program in terms of pacing and variety, and demonstrate requisite stage presence along with an ability to communicate with their audience in performance.

Learning Outcomes

The Music Performance major has the following learning outcomes:

- Demonstrated artistic proficiency on a primary instrument or in voice
- Demonstrated excellent aural musicianship skills and a working knowledge of music theory and music history
- Demonstrated artistic proficiency and flexibility as performer and collaborator in varied settings, including chamber ensembles and large conducted ensembles
- Demonstrated knowledge of history and performance repertoire for a primary instrument or voice and representative works for chamber and large conducted ensembles from the majors periods of Western classical music, including contemporary compositions
- Demonstrated ability to apply knowledge of compositional form, historical context, performance practices, extended techniques, non-traditional notation, and current issues to performance of Western classical music
- Demonstrated knowledge about genres other than Western classic music or the scholarly study of music and/or the business practices associated with the music industry
- Conceptual, preparation, and performance of a public solo recital of Western classical music, including a printed program and program notes

Entry to the Major

Admission

Applicants are required to audition in their principal performance medium and interview with the music performance faculty.

Requirements

Preparation for the Major

Required: (1) **Music M6A, M6B, M6C**, with grades of C– or better; (2) **Theory**—one of the following series approved by the area head/division chair: Music 20A, 20B, and 20C, or 21A, 21B, and 21C, with grades of C or better.
Based on instrument or voice, one concentration selected below:

Brass, percussion, and woodwinds: (1) **Instrumental studio**—12 units from Music 60A through 60J; (2) **Chamber ensembles**—4 units from Music C175A through C175G; (3) **Large conducted ensembles**—12 units from Music C185D through 185H.

**Keyboard:** (1) **Instrumental studio**—12 units from Music 60S, 60T, or 60U; (2) **Chamber ensembles**, **keyboard literature**, and accompanying—8 units from Music C171, C175A through C175G, or C186A; (3) **Large conducted ensembles**—6 units from Music C185A through 185H.

**Strings:** (1) **Instrumental studio**—12 units from Music 60K through 60R; (2) **Chamber ensembles**—6 units from Music C175A through C175G; (3) **Large conducted ensembles**—6 units from Music C185D through 185H.

**Voice:** (1) **Voice studio and voice coaching**—18 units of Music 61A and 61B; (2) **Singing dictionary**—Music 74A, 74B, 74C; (3) **Large conducted ensembles**—12 units from Music C185A through 185H; (4) **Electives**—at least 8 units of upper-division electives from ethnomusicology, global jazz studies, music, music industry, or musicology; (5) **Capstone instrumental recital**—one course from Music 167K through 167R. In senior year, each student must present a senior recital as part of the capstone course; the 45–55-minute recital will include a printed program with notes.

**Policies**

**Preparation for the Major**

All entering first years are required to take the Music Theory Assessment Examination either during New Student Sessions or during zero weeks of fall quarter. The examination score is used to determine eligibility and placement in the appropriate music theory sequence. Choice of theory course series to be approved by area head/division chair.

**Strings**

For classical guitar, harp, and string bass, students may petition to substitute alternative courses if there are no suitable chamber ensembles offered during the academic year. For classical guitar, students may petition to substitute Music C185A, C185B, or C185C; (4) **Electives**—at least 4 units of upper-division electives from ethnomusicology, global jazz studies, music, music industry, or musicology; (5) **Capstone voice recital**—Music 161B and 168. In senior year, each student must present a senior recital as part of the capstone course; the 45–55-minute recital will include a printed program with notes.

**Graduate Majors**

**Master of Music**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Music DMA**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Music MA, CPhil, PhD**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Music**

**Lower-Division Courses**

3. **Preparatory Music Theory.** (4) Lecture, four hours; laboratory, one hour. Course in music fundamentals, including musicianship, theory, and terminology. Letter grading.

4. **Musicology M3.** (Same as Ethnomusicology M6A-M6B-M6C and Musicology M6A-M6B-M6C) Laboratory, four hours. Preparation: placement examination. Course M6A is enforced requisite to M6B, which is enforced requisite to M6C. Students must receive grade of C– or better to proceed to next course in sequence. Introduction to musicianship through in-depth exploration of basic common musical elements and training in aural recognition, sight singing, dictation, and keyboard skills. Focus on topics such as tonal and modal harmony, rhythm, improvisation, composition, notation, and ear training to prepare students for later theory courses, participation in music ensembles, advanced study in music, and professional careers. Letter grading.

7. **Understanding Movie Music.** (4) Lecture, four hours; outside study, eight hours. Musical experience helpful, but not required. Brief historical survey of film music, with strong emphasis on recent development: Japanese animation, advertising, and MTV, as well as computer tools and digital scoring methods. Designed to inspire and inform those interested in movie music. Offered in summer only. P/NP or letter grading.

14. **Introduction to Classical Music.** (5) (Same as Musicology M3) Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition, with emphasis on historical context, musical meanings, and creation of tradition itself. P/NP or letter grading.
15. Art of Listening. (5) Lecture, three hours; discussion, one hour; outside study, 11 hours. Acquisition of listening skills through direct interaction with live performances, performers, and composers. Relationship to practice of listening to theoretical, analytical, historical, and cultural frameworks. Music as aesthetic experience and cultural practice. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion and critical thinking about topics of current intellectual importance, taught by faculty members with expertise and enthusiasm. Exploring many paths of discovery at UCLA. P/NP grading.

20A. Music Theory I. (3) Lecture, four hours. Preparation: passing score on departmental examination. Course 10B, which is enforced requisite to 20C. Students must receive grade of C or better to proceed to next course in sequence. Theory: species counterpoint through fifth species; description of triads and inversions. P/NP or letter grading.

20B. Music Theory II. (3) Lecture, four hours. Enforced requisite: course 20A with grade of C or better. Theory: diatonic harmony through secondary dominants and modulation; major and relative keys; writing of four-part chorales; style composition in baroque dance forms; introduction to figured bass notation. P/NP or letter grading.

20C. Music Theory III. (3) Lecture, four hours. Enforced requisite: course 20B with grade of C or better. Theory: chromatic harmony including development of tonality, 1800 to 1850; appropriate analysis and style composition. P/NP or letter grading.

21A-21B-21C. Project Approach to Music Theory I, II, III, (3–3–3) Lecture, 10 hours. Preparation: passing score on departmental examination. Course 21A is enforced requisite to 21B, which is enforced requisite to 21C. Students must receive grade of C or better to proceed to next course in sequence. Theory fundamentals through project approach. Letter grading.

30A-30B. History, Listening, and Survey of Piano Literature I, II. (2–2) Seminar, two hours. Strongly recommended for undergraduate piano and music education majors with piano as their main instrument. Survey course covering standard piano literature and composers throughout listening and reading. Letter grading. P/NP or letter grading.

40. Alexander Technique. (2) Lecture, four hours; outside preparation and practice, two hours. Limited to Ethnomusicology, Music, and MusicoLOGY majors. Introduction to the essentials of Alexander technique. Study of musician’s postural attitude at instrument, including physical movement as application of theory. Designed to help instrumentalists and vocalists prevent injuries and performance anxiety. May be repeated with consent of instructor. Letter grading.

60-60U. Instrumental Studio. (2 each) Studio, one hour; outside practice, up to eight hours. Limited to freshmen/sophomore Music Performance majors and junior and senior Music Composition majors. Students must perform in one practicum during academic year. Grades are assigned by applied instructor in fall and winter quarters and by jury examination in spring quarter. May be repeated for maximum of 12 units. P/NP or letter grading. 60A. Flute. 60B. Oboe. 60C. Bassoon; 60D. Clarinet; 60E. Saxophone; 60F. Trumpet; 60G. Trombone; 60H. Tuba; 60I. Percussion. 60K. Cello; 60L. Viola; 60M. Violin; 60N. String Bass; 60O. Harp; 60P. Guitar; 60Q. Lute; 60R. Viola da Gamba; 60S. Piano; 60T. Organ; 60U. Harpsichord.

61A. Voice Studio. (2 each) Studio, one hour; outside practice, six hours. Corequisite: course 61B or 61C. Limited to lower-division Music Performance majors specializing in voice and Music Education majors. Emphasis on repertoire and improving vocal performance. Grades are assigned by studio instructor in conjunction with student’s vocal coach for fall and winter quarters and by jury examination in spring quarter. May be repeated for maximum of 12 units. P/NP or letter grading.

61B. Voice Coaching. (1) Studio, one hour; outside practice, three hours. Corequisite: course 61A. Limited to lower-division Music Performance majors specializing in voice and Music Education majors. Emphasis on repertoire and improving vocal performance. Grades are assigned by studio instructor in conjunction with student’s vocal coach for fall and winter quarters and by jury examination in spring quarter. May be repeated for maximum of 12 units. P/NP or letter grading.

61C. Voice Coaching for Music Education Specialists. (5) Studio, 30 minutes; outside practice, 90 minutes. Corequisite: course 61A. Limited to lower-division Music Education majors. Emphasis on repertoire and improving vocal performance. Grades are assigned by studio instructor in conjunction with student’s vocal coach for fall and winter quarters and by jury examination in spring quarter. May be repeated for maximum of 12 units. P/NP or letter grading.

66. Composition Studio. (2) Studio, one hour per week to be arranged with instructor; outside study, five hours. Enforced requisites: courses 20A, 20B, 20C. Limited to Music Composition students and designed to be a basic introduction to composition lessons with assignments and compositions tailored to student progress and level of achievement. Lessons address counterpoint, voice-leading, harmonic and melodic construction, form, texture, style, notation, and performance feasibility. May be repeated twice for credit. P/NP or letter grading.

74A-74B-74C. Introduction to Singing Diction. (2–2–2) Studio/demonstration/performance, 90 minutes; outside study, four to five hours. Development of International Phonetic Alphabet (IPA) transcription skills, along with addressing issues of translation. Exploration of variety of repertoire including folk, art songs, early music, recitative, and folk songs. Transcription, translation, speaking, and singing of texts from pieces assigned in course, as well as from repertoire being prepared for jury. May be repeated for credit in spring only. P/NP or letter grading.

80. Beginning Keyboard. (4) Laboratory, five hours; preparation/practice, seven hours. Enforced requisite: course 102B or 102C. Basic keyboard skills together with basic aspects of music theory and its practical application to keyboard: sight-reading, tonality, chords, scales, cadences, simple compositions, and improvisations. May be repeated for credit without limitation. Offered in summer only. P/NP or letter grading.

80A. Beginning Guitar Class. (4) Laboratory, five hours; preparation/practice, seven hours. Introduction to guitar techniques, accompanying, and arranging for guitar; coverage of note reading and tablature. May be repeated for credit without limitation. Offered in summer only. P/NP or letter grading.

80S. Beginning Saxophone. (4) Laboratory, five hours; preparation/practice, seven hours. Fundamentals of playing saxophone, basic music theory and terminology necessary for reading music notation, and basic overview of instrument’s history. Offered in summer only. P/NP or letter grading.

80V. Vocal Technique for Beginners. (4) Laboratory, six hours; preparation/practice, six hours. Voice in-studio study for singers at intermediate level. Exploration of fundamentals of vocal technique, including overview of basics of proper breath control, resonance, care of voice, dictation, and interpretation. Begins vocal repertoire and aids in understanding these concepts. May be repeated for credit without limitation. Offered in summer only. P/NP or letter grading.

80W. Woodwind Technique for Beginners. (4) Laboratory, six hours; preparation/practice, six hours. Woodwind instruction designed to give students knowledge of fundamental concepts and techniques of saxophone, clarinet, oboe, bassoon, and flute. Offered in summer only. P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and leveraged expertise. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

M90T. Early Music Ensemble. (4) Same as Musicology M90T. Activity, four hours. Preparation: audition. Group performance of Western vocal and instrumental music from historical periods prior to 1600. Early instruments may be used at instructor’s discretion. May be repeated for credit without limitation. P/NP or letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated, P/NP grading.

Upper-Division Courses

102A-102B-102C. Advanced Musicianship I, II, III. (2–2–2) Laboratory, four hours. Enforced requisites: courses M60A, M60B, M60C. Course 102A is enforced requisite to 102B, which is enforced requisite to 102C. Students must receive a grade of C- or better to proceed to next course in sequence. Advanced-level sight singing, sight reading, rhythm, melodic and harmonic dictation, tonal and modal improvisation, keyboard skills. Letter grading.

M103. Creating Musical Community. (4) Same as Ethnomusicology M103, Global Jazz Studies M103, and Musicology M103.) Seminar, four hours; discussion, one hour. Limited to school of music majors. Faculty and students make music together in different modes. Students learn certain repertoire, refine it, and bring it to concert performance. Students critically engage musical literacies and notion of social contract that forms basis of musical notation. Drawing from American music folk game traditions, highlights complex history of this country and way in which entire body is used as mediator when instruments are unavailable. Letter grading.

104A. Modal Counterpoint. (3) Lecture, three hours. Requisite: course 120C (accelerated section). In-depth exploration of styles and techniques of counterpoint of 15th and 16th centuries through written and analysis of important forms of period, including species, canon, free counterpoint, cantus, firmus, point of imitation, motet, ricercare, etc. Letter grading.

104B. Special Topics in Counterpoint. (3) Lecture, three hours. Requisite: course 120C (accelerated section). In-depth exploration of polyphonic styles and textures since 1750, with emphasis on late-19th- and 20th-century modes of expression, through writing and sight reading letter grading.
106A. Orchestration I. (4) Discussion, three hours. Requisites: courses 120C (accelerated section), 123C. Ranges and characteristics of instruments, with exercises in scoring for ensembles and orchestra. P/N or letter grading.

106B. Orchestration II. (4) Discussion, three hours. Requisites: courses 106A, 120C (accelerated section), 123C. Scoring and analysis for ensembles and orchestra. P/N or letter grading.

C109A. Oboe Reed Making. (1) Activity, one hour; outside study, two to three hours. Enrollment by consent of instructor. Discussion, one hour; outside study, two to three hours. Enrollment by consent of instructor. Introduction and overview of oboe reed making, including hands on training with tools and techniques necessary to develop and maintain oboe reeds. May be repeated for credit. May be concurrently scheduled with course C209A. P/N or letter grading.

C109B. Bassoon Reed Making. (1) Activity, one hour; outside study, two to three hours. Enrollment by consent of instructor. Discussion, one hour; outside study, two to three hours. Enrollment by consent of instructor. Introduction and overview of bassoon reed making, including hands on training with tools and techniques necessary to develop and maintain bassoon reeds. May be repeated for credit. May be concurrently scheduled with course C209B. P/N or letter grading.

110A. Learning Approaches in Music Education. (4) Lecture, two hours; activity, two hours; outside study, eight hours. Enforced requisite: course 20A. Introduction to music education with an emphasis on the development of understanding of teaching/learning of music. Consideration of issues and directions in teaching and learning of music. P/N or letter grading.

110B. Musicality and Creativity in Childhood. (4) Lecture, two hours; activity, two hours; outside study, eight hours. Requisites: courses 20A, 20B, 20C, 110A, 120A, 120B, 120C. Preparation of music education students and children for teaching music at preschool and elementary school levels. Development of understanding of developmental characteristics, diverse cultures, and learning needs of children and design of effective instructional strategies that are age-appropriate and responsive to children’s background. Focus on practice of student-centered curriculum where students are active learners and teachers are facilitators to become proficient in planning and activating learning environment that is conducive to optimal growth in their musicality and creativity. Frequent field visits. Letter grading.

110C. Comparative Study of Choral Music Education. (4) Lecture, two hours; activity, one hour; fieldwork, one hour; outside study, eight hours. Enforced requisite: courses 20A, 20B, 20C, 110A, 110B, 110C, 120A, 120B, 120C. Preparation for teaching choral music at middle and high school levels. Development of understanding of developmental characteristics, diverse cultures, and learning needs of adolescents and design of effective instructional strategies that are age-appropriate and responsive to students’ background. Diverse practices and learning processes in choral music of American and world serve as basis of study. May be repeated once for credit. P/N or letter grading.

111B. Music Creation and Analyses through Technology. (4) Lecture, four hours; discussion, one hour. Requisites: courses M6A, M6B, M6C, 111A (111A with grade of C or better), and 20A, 20B, and 20C, or 21A, 21B, and 21C. Students must receive grade of C or better to proceed to next course in sequence. Theory through improvisation, technology, and arranging for ensembles. Letter grading.

111C. Arranging Music for Educational Settings. (3) Lecture, four hours. Requisites: courses M6A, M6B, M6C, 111A (111A with grade of C or better), and 20A, 20B, and 20C, or 21A, 21B, and 21C. Theory through improvisation, technology, and arranging for ensembles. Letter grading.

111D. Guided Field Experiences in Music Education. (1) Field studies, three hours. Initial field experiences for students preparing to teach and earn single subject certification in music. Novice teachers work under direct guidance of UCLA music education faculty members and practicing public school instructor to develop and deliver instruction in K-12 settings. P/N or letter grading.

114A-114B. Study of Instrumental Techniques. (1-1) Studio, two hours; outside study, one hour. Enforced requisite: course 40A. Applied studies in basic performance techniques and tutorial materials. Each course may be repeated once for credit. Letter grading. 114A. High Strings. 114B. Low Strings.

114C-114D. Vocal Techniques for Music Education I, II. (1-1) Studio, two hours; outside study, one hour. Letter grading. 114C. Introduction to basic vocal techniques, breath and body, vocal mechanism, health and care of voice, and instrumental techniques. 114D. Requisite or corequisite: course 114C. Introduction to art of teaching voice, focusing on vocal instruction in choral classroom. Focus on application of vocal techniques to choral music teaching at K-12 school settings.

114J. Piano Skill in Classroom. (1) Activity, two hours. Designed for Music Education majors. Development of piano skills and competencies that enable students to function successfully in general music, instrumental ensemble, and choral ensemble classrooms. Letter grading.

115A-115B-115C. Study of Instrumental Techniques. (2-2) Studio, four hours; outside study, two hours. Enforced requisite: course 114C. Applied studies in basic performance techniques and tutorial materials designed to give music education students knowledge to teach basic instrument concepts. Letter grading.

115A. Woodwinds. 115B. Brass. 115C. Percussion.

117. Study and Conducting of Instrumental and Choral Literature. (2) Lecture, three hours. Requisite: course 116. Study and practice of conducting both instrumental and choral repertoire. In addition to further development of conducting gestures, focus on score study techniques, rehearsal techniques, style, and interpretation as applied to choral and instrumental repertoire. Letter grading.

C118A. Advanced Choral Conducting. (2) Lecture, one hour; studio, two hours. Requisites: courses 116, 117. Conducting basics, baton technique, beat patterns, dynamics, score preparation and analysis. May be repeated once for credit. Concurrently scheduled with course C218B. P/N or letter grading.

C118B. Choral Techniques and Methods. (2) Lecture, one hour; studio, two hours. Requisites: courses 116, 117. Conducting basics, baton technique, beat patterns, dynamics, score preparation and analysis. May be repeated once for credit. Concurrently scheduled with course C218B. P/N or letter grading.

119. Jazz and Technology Pedagogy. (3) Lecture, two hours; activity, two hours; outside study, five hours. Enforced requisite: courses 20A, 20B, 20C, 110A, 120A, 120B, 120C. Foundations for teaching jazz by development of understanding of curriculum, rehearsal techniques, improvisation, and uses of technology in jazz education. Technology understanding includes basic concepts of sequencing, composition, ensemble performance, and creation of multimedia presentations using tablet (iPad) technology. Letter grading.

120A. Music Theory V. (4) Lecture, four hours; discussion, four hours; preparation, four hours; pass/fail grading. Requisites: course 20C with grade of C (2.0) or better. Theory: baroque counterpoint including chorale prelude; two-part invention; three-part invention; canonic principles; analysis of inventions, canons, and fugues. Musicianship: sight-singing of extended chromatic melodies; advanced harmonic dictation (diatonic and chromatic); keyboard harmonization of modulating melodies; elementary score reading. P/N or letter grading.

120B. Music Theory VI. (4) Lecture, four hours; discussion, four hours; preparation, four hours; pass/fail grading. Requisites: course 120A with grade of C (2.0) or better. Theory: advanced harmonic dictation; preparation for departmental first-year examination. Requisite: course 20C with grade of C (2.0) or better. Theory: advanced harmonic dictation; preparation for departmental first-year examination. P/N or letter grading.

120C. Music Theory VII. (4) Lecture, four hours; discussion, two hours; preparation, two hours. Requisite: course 120B with grade of C (2.0) or better. 20th-century harmonic language: including voice leadings, chord progression features and their effects on the harmonic structure of music. Emergent and extended harmonic practice in harmonic, polytonal, free atonality, serialism, and minimalism. P/N or letter grading.

121. Special Topics in 20th-Century Music. (4) Lecture, four hours; preparation, four hours; pass/fail grading. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. In-depth study of certain aspects of 20th-century music ranging from individual composers and schools to ideological or stylistic concerns. May be repeated once for credit. P/N or letter grading.

124A. Scoring for Symphony Orchestra. (4) Discussion, three hours. Requisites: courses 106B, 120C (accelerated section). Research papers and schools to ideological or stylistic concerns. May be repeated once for credit. P/N or letter grading.

124B. Scoring for Wind Ensemble. (4) Discussion, three hours. Requisites: courses 106B, 120C (accelerated section). Research papers and schools to ideological or stylistic concerns. May be repeated once for credit. P/N or letter grading.

M131. Development of Latin Jazz. (4) (Same as Ethnomusicology M131 and Global Jazz Studies M131.) Lecture, three hours. Some amount of formal music study and experience as vocalist or instrumentalist desirable but not essential. Introduction to history, tradition, and social and cultural context of music of different genres and approaches, and interactions between music and culture, society, and history. P/N or letter grading.

M132. Introduction to Armenian Music. (4) (Same as Ethnomusicology M132.) Lecture, three hours. Some amount of formal music study and experience as vocalist or instrumentalist desirable but not essential. Introduction to history, tradition, and social and cultural context of music of different genres and approaches, and interactions between music and culture, society, and history. P/N or letter grading.
dent’s vocal coach for fall and winter quarters and by jury examination in spring quarter. May be repeated for maximum of 1.5 units. P/NP or letter grading.

163A-163V. Recital for Music Education Majors. (2 each) Studio, one hour; outside study, five hours. Limited to junior/senior Music Education majors. Preparation for capstone recital comprising 35 to 55 minutes of music, including printed program. Recital is videotaped, archived, and evaluated by jury; written feedback is provided to student within two weeks of recital. Letter grading. 163A. Flute. 163B. Oboe. 163C. Bassoon. 163D. Clarinet. 163E. Saxophone. 163F. French Horn. 163G. Trumpet. 163H. Trombone. 163J. Tuba/Euphonium. 163K. Percussion. 163L. Violin. 163M. Cello. 163N. String Bass. 163O. Harp. 163P. Guitar. 163Q. Lute. 163R. Viola da Gamba. 163S. Piano. 163T. Organ. 163U. Harpsichord.

168. Capstone Voice Recital. (2) Studio, one hour; outside practice, six to eight hours. Corequisite: course 161B or 161C. Limited to upper-division Music Education majors and Music Performance majors specializing in voice. Voice techniques and health, including breath control, pitch accuracy, range, resonance, and flexibility. May be repeated for credit for maximum of 10 units. P/NP or letter grading.

169. Capstone Composition Recital. (2) Studio, one hour; outside study, five hours. Enforced requisite: courses 124A or 124B or 124C, and 166 (at least 10 units). Limited to senior Music Composition majors. Planning and completion of senior capstone recital comprising at least 30 minutes of music including printed program. Recital is videotaped, archived, and evaluated by jury; written feedback is provided to student within two weeks of recital. Letter grading.

171. Selected Topics in Keyboard Literature. (2) Lecture, two hours. Enforced corequisite: one course from 60S, 60T, 60U, 60S, 160T, 160U. In-depth study of selected topics in keyboard literature, concentrating on one composer, one genre, or one historical period. Analysis of musical and theoretical works, and actual performances by participants. May be repeated for credit. May be concurrently scheduled with course C271J. P/NP or letter grading.

CM182. Music Industry. (4) Same as Ethnomusicology CM182, Musicology CM186, and Music Industry M182.) Lecture, four hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM252. Letter grading.

C158A. UCLA Chorale. (2) Activity, four hours. Preparation: audition. Large ensemble performing choral music of all periods appropriate for concert choral ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C480B. P/NP or letter grading.

C158B. Chamber Singers. (2) Activity, four hours. Preparation: audition. Designed primarily for Music Performance majors. Select mixed ensemble performing repertoire of vocal music of all periods. May be repeated for credit without limitation. May be concurrently scheduled with course C480B. P/NP or letter grading.

C185C. Opera Workshop. (Activity, six hours. Preparation: audition. Large ensemble performing scenes, orchestral literature, and open performances as well as concert and opera performance and rehearsals. May be repeated for credit without limitation. May be concurrently scheduled with course C480C. P/NP or letter grading.

C167G. Symphony Orchestra. (2) Activity, three hours. Preparation: audition. Group performance of symphonic orchestra literature. May be repeated for credit without limitation. May be concurrently scheduled with course C480D. P/NP or letter grading.

C158E. Philharmonia. (2) Activity, six hours. Preparation: audition. Designed primarily for Music Performance majors. Group performance of oratorio literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C480E. P/NP or letter grading.

C185G. Wind Ensemble. (2) Activity, six hours. Preparation: audition. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C480G. P/NP or letter grading.

C185H. Marching and Varsity Bands. (2) Activity, six hours. Preparation: audition. Group performance of special band arrangements for football and basketball games. May be repeated for credit without limitation. May be concurrently scheduled with course C480H. P/NP or letter grading.

C186A. Piano/Keyboard Accompaniment. (2) Activity, four hours; outside study, two hours. Collaboration with large ensembles, instrumentalists, and/or vocalists in role of accompanists. Limited to all instrumentalists and/or vocalists. Collaboration includes, but is not limited to, lessons, rehearsals, special studio performance projects, master classes, concerts, auditions, juries, and recitals. May be repeated for maximum of 12 units. Concurrently scheduled with course C484A. P/NP or letter grading.

C186B. Guitar Accompanying. (2) Activity, four hours; outside study, two hours. Collaboration with instrumentalists and/or vocalists in role of accompanists.
Performance includes, but is not limited to, lessons, rehearsals, special studio performance projects, master classes, concerts, auditions, juries, and recitals. May be repeated for credit without limitation. Concurrently scheduled with course C494B. P/NP or letter grading.

C186C. Harp Accompaniment. (2) Activity, four hours; outside study, two hours. Collaboration with instrumentalists. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of a final paper. Performance includes, but is not limited to, lessons, rehearsals, special studio performance projects, master classes, concerts, auditions, juries, and recitals. May be repeated for credit without limitation. Concurrently scheduled with course C494C. P/NP or letter grading.

C188. Seminar: Special Topics in Music. (4) Formerly numbered 188.) Seminar, three hours. Exploration of topics in music through variety of approaches that may include projects, performances, readings, discussions, research papers, and oral presentations. Topics announced in advance. May be repeated for credit. May be concurrently scheduled with C292. P/NP or letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of a final paper. Performance includes, but is not limited to, lessons, rehearsals, special studio performance projects, master classes, concerts, auditions, juries, and recitals. May be repeated for credit without limitation. Concurrently scheduled with course C494C. P/NP or letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be arranged by advisor and student. Tangible evidence of mastery of subject matter (research project) required. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP grading.

195. Community or Corporate Internships in Music. (2 to 4) Tutorial, six hours. Limited to juniors/seniors. Internship option is open to students in community agency or business. Students meet on regular basis with supervising instructor and submit periodic reports of their work experiences. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP grading.

201. Comprehensive Examination. (2) Seminar, two hours. Examination of student’s work in major area. May be repeated for credit. May be repeated for credit. May be repeated for credit. SU or letter grading.

M201. Repertory and Analysis. (2) Same as Musico 3201.) Seminar, two hours. Required or corequisite: Musicology 200a. Exploration of defined repertory through readings and analysis. Specific topics vary. May be repeated for credit. SU or letter grading.

202. Analysis for Performers. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Survey of analytical techniques and approaches required for professional performers, including phrase structure, harmonic rhythm and prolongation, small and large forms, theories of musical coherence, and understanding of styles. Letter grading.

203. Notation and Performance. (4) Lecture, three hours; studio study, nine hours. Designed for graduate music students. Survey of evidence of performers use to make their interpretive decisions in performance of vocal and instrumental music of European and American traditions; composition, tempo indications, expressive notation, use and influence of recordings, composer-performer relationship, and nonstandard notation. Letter grading.

204. Music Bibliography for Performers. (4) Lecture, three hours; outside study, nine hours. Designed for graduate music performance students. Survey of general bibliographic techniques in music, with emphasis on materials for performing musicians. Letter grading.

C209A. Oboe Reed Making. (1) Activity, one hour; outside study, two hours. Enrollment by consent of instructor. Introduction and overview of oboe reed making, including hands on training with tools and techniques necessary to develop and maintain oboe reeds. May be repeated for credit. May be concurrently scheduled with course C109A. S/U or letter grading.

C209B. Bassoon Reed Making. (1) Activity, one hour; outside study, two hours. Enrollment by consent of instructor. Introduction, overview, and hands-on training with tools and techniques necessary to develop and maintain bassoon reeds. May be repeated for credit. May be concurrently scheduled with course C109B. S/U or letter grading.

C218A. Advanced Choral Conducting. (2) Lecture, one hour; studio, two hours. Requisites: courses 116, 117. Conducting basics, baton technique, beat patterns, dynamics, score preparation and analysis. May be repeated once for credit. Concurrently scheduled with course C218A. Letter grading.

C218B. Choral Techniques and Methods. (2) Lecture, one hour; studio, two hours. Requisites: courses 116, 117, C218A. Vocal and choral pedagogy, vocalizing and warm-up techniques, diction, and rehearsal and audition techniques. May be repeated once for credit. Concurrently scheduled with course C218B. S/U or letter grading.

C226. Electronic Music Composition. (4) Lecture, three hours; laboratory, three hours. Preparation: advanced experience and accomplishment in serious composition (art music), two years of music theory. Designed for graduate students. Limited enrollment. Exercises in electroacoustic orchestration, meta-pitch composition, notation software (Sibelius), sequencing and scoring computer collage (Pro-Tools), and final project. May be concurrently scheduled with course C176S. S/U or letter grading.

252. Seminar: Composition. (4) Seminar, three hours. Compositional projects for varying acoustic instrumental and vocal ensembles. Students expected to perform their compositions from sketches at piano or present notation files of work-in-progress with playback file, where appropriate. Performance of completed works in graduate composition concerts by UCLA student performers. S/U or letter grading.

253. Seminar: Special Topics in Composition and Non-Western Musics; Jazz. (4) Seminar, four hours; outside study, nine hours. Designed for graduate students. Limited enrollment. Exercises in electroacoustic orchestration, meta-pitch composition, notation software (Sibelius), sequencing and scoring computer collage (Pro-Tools), and final project. May be concurrently scheduled with course C176S. S/U or letter grading.

254. Advanced Music Analysis: Pre-Tonal Music. (4) Seminar, three hours. One hour on general graduate composition students with in-depth exposure to complex and rich works of late Middle Ages through dawn of baroque era. Exploration of analytical techniques and methods not covered in analysis of works of tonal and post-tonal periods, and approaches to musical structures used by composers before modern tonal harmonic syntax had fully developed. Letter grading.

255. Advanced Music Analysis: Tonal Music. (4) Seminar, three hours. Discussion of theoretic approaches to and analysis of selected works of practice era. Among study pieces using various theoretic approaches discussed and presentation of analyses in class. Letter grading.

256. Advanced Music Analysis: Post-Tonal Music. (4) Seminar, three hours. Designed for graduate music analysis class. Discussion of the role of composition treatises as related to period; analytical reports into unrealistic effect when they merge, as in MTV, dream sequences, or montages. Study of three principal areas of film-making—preproduction, production (shooting), and postproduction. Examples from classic movies and discussion of their scores. Composition of actual cues for acoustic instruments coordinated to picture to be term project. Separate cues involve dialogue, melo-drama, comedy, chase, memory montage, and tension. Letter grading.

260B. Seminar: Composition for Motion Pictures and Television. (6) Seminar, three hours; laboratory, three hours. Focus on task of completing entire theme music assignment as part of course. Discussion of recent television shows. Composition of one original title song and short cues to someone else’s song required. Term assignment involves studio orchestra recording cue. Project to approximate actual conditions of completing professional Hollywood assignment, from spotting to scoring. Letter grading.

261A-261J. Problems in Performance Practices. (4 each) Seminar, three hours; outside study, nine hours. Limited to graduate performance students. Investigation of primary source readings in performance practice as related to period; analytical reports into practical applications in class demonstrations. May be repeated for credit. Letter grading. 261A. Medieval. 261B. Renaissance; 261C. Baroque; 261D. Classical; 261E. Romantic; 261F. Contemporary; 261G. Jazz.

266. Graduate Composition Studio. (4) Studio, one hour arranged with instructor; outside study, 11 hours. Limited to graduate composition students. One-on-one composition lessons, with assignments and comments tailored to each student’s level of achievement, addressing counterpoint, voice-leading, harmonic and melodic construction, orchestration, form, texture, style, notation, and performance feasibility of composition.ability to composition on advanced level. Presentation of at least one composition composed during course in graduate composition concert during academic year. May be repeated for credit without limitation. S/U or letter grading.

270A-270G. Seminars: Music Education. (6 each) Seminar, three hours; May be repeated for credit without limitation. S/U or letter grading. 270A. History; 270B. Non-Western Musics; 270C. Curriculum Inno-vations; 270D. Tests and Measurements; 270E. Choral Literature; 270F. Instrumental Literature; 270G. General Topics.

C271. Selected Topics in Keyboard Literature. (2 Lecture, two hours. Enforced corequisite: course 4805 or 480T or 460U. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be repeated for credit. May be concurrently scheduled with course C171. S/U or letter grading.

CM282. Music Industry. (4) Same as Ethnomusi-con 288 and Musicology 288.) Lecture, four hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used. Historical approach taken, beginning with music published in 18th century
and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM182. Letter grading.

290. Composition Forum. (2) Seminar, two hours. Weekly forum to present professional composers of a range of mediums, including large ensemble vocal and/or instrumental works, chamber music, electronic music, and film/television, as guest lecturers. Letter grading.

C292. Seminar: Special Topics in Music. (4) Formerly numbered 292.) Seminar, three hours. Exploration of topics in music through variety of approaches that may include projects, performances, readings, discussions, and/or presentations. Topics announced in advance. May be repeated for credit. May be concurrently scheduled with C188. S/U or letter grading.

330. Introduction to Orff Schulwerk. (2) Lecture, 10 hours; discussion, five hours; laboratory, 15 hours. Intended for teachers of music, church musicians, and music therapists who have had little or no previous experience with Orff Schulwerk. Introduction to Orff Schulwerk, including history, philosophy, and teaching processes of this approach to music instruction for children. Offered in summer only. S/U or letter grading.

331A-331B-331C. Orff Schulwerk Training Courses. (4–4–4) Lecture, four hours; discussion, one hour. Requisite: course 330. Course 331A is requisite to 331B, which is requisite to 331C. In-depth courses in teaching of Orff Schulwerk approach to music instruction for those who successfully complete each course are eligible for certification at that level through American Orff Schulwerk Association. S/U or letter grading. 331A. Level I (Beginning); 331B. Level II (Intermediate); 331C. Level III (Advanced).

341. Conducting for High School and College Band/ Wind Ensemble Teachers. (2) Lecture, two and one half hours. Comprehensive view of current trends in band/wind ensemble programs, including nonverbal communication, conducting, and rehearsal techniques. Study of new and recently published literature and discussions of administration of band/wind ensemble programs. May be repeated for credit without limitations. S/U or letter grading.

342. Contemporary Marching Band. (1) Lecture. Two hours. Innovative approaches to marching band programs for high school and college teachers, including creative approaches to charging and drill design and use of microcomputers in schools. Courseware to be experienced and reviewed, jargon defined and illustrated, and practical hands-on experience obtained. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

350B. Exploration of MIDI Computer Resources: Lecture, two hours; study of, two hours; laboratory, three hours. Creative use of MIDI-based synthesizers under computer control. Exploration of available hardware resources allied with various software sequences for music composition and score printing. Hands-on experience. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

371. Marching Band in Secondary Education. (2) Lecture, two hours; study of, two hours; laboratory, two hours. A survey of marching band as component of music curriculum in secondary education, including current approaches, practices, and problems associated with marching bands, as well as and discussion of student teaching. Concurrently scheduled with course CM182. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, one hour. May be repeated for credit. Concurrently scheduled with course C188. S/U or letter grading.

401. New Music Forum. (2) Tutorial/laboratory, two hours; study of, four hours. Presentation of undergraduate student study in music at UCLA. Interactive course in preparation and performance of premiere work especially composed for graduate performer or performers by graduate composers. May be repeated for credit. S/U grading.

450. Keyboard Skills for Pianists. (2) Activity, two hours; outside study, four hours. Applied music course with focus on necessary skills for piano performance. Areas include sight playing, score reading, transcription, figured bass, harmonization, improvisation, score reduction, and ensemble issues. Concurrently scheduled with course C150. Letter grading.

455S. Instrumental and Piano Duo Repertoire. (2) Activity, two hours; outside study, four hours. Performance-based course that develops repertoire and experience in collaborative performance for pianists and instrumentalists. Activities include weekly score preparation, weekly rehearsals, regular coaching, and performances for lessons, juries, recitals, master classes, auditions, and other activities. Regular coaching with faculty members, weekly performance workshop, and rehearsals. Concurrently scheduled with course C150. Letter grading.

458A–458G. Advanced Vocal Repertoire, Diction, and Interpretation. (2) Activity, two hours; outside study, four hours. Performance-based course that develops repertoire and experience in collaborative performance for pianists and instrumentalists. Activities include week score preparation, weekly rehearsals, regular coaching, and performances for lessons, juries, recitals, master classes, auditions, and other activities. Regular coaching with faculty members, weekly performance workshop, and rehearsals. Concurrently scheduled with course C150. Letter grading.

461B. Graduate Voice Coaching. (1) Studio, one hour; outside practice, three hours. Corequisite: course 461A. Limited to graduate voice students. Emphasis on repertoire and improving performance. Grades are assigned by studio instructor in consultation with student’s vocal coach for fall and winter quarters and by jury examination in spring quarter. Letter grading.

466. Graduate Instruction in Performance: Jazz. (6) Lecture, two hours; study of, two hours; laboratory, two hours; outside study and preparation, nine hours. Preparations: advanced proficiency on one musical instrument. Designed for graduate music students. Study of art of teaching jazz; musical interpretation; group discussion of philosophy of teaching, learning process itself, and teaching of musical interpretation. Individualized study of various considerations, such as physical/technical aspects and pedagogical repertoire, peculiar to teaching student’s primary instrument. Letter grading.

471. Vocal Pedagogy. (4) Lecture, three hours; discussion, one hour. Preparation: advanced proficiency in voice. Designed for graduate music students. Study of art of teaching voice; musical interpretation; group discussion of vocal technique, teaching of singing, and performance of repertoire. Letter grading.

472. Master Class in Opera. (6) Studio, three hours; outside study, 15 hours. Limited to graduate performance students. Intensive study and preparation of opera literature. May be repeated for credit. S/U or letter grading.

475. Master Class in Conducting. (6) Studio, three hours; outside study, 15 hours. Limited to graduate performance students. Intensive study and preparation of conducting repertoire. May be repeated for credit. S/U or letter grading.

480A. UCLA Chorale. (2) Activity, four hours. Preparation: audition. Large mixed ensemble performing choral music of all periods appropriate for concert choral ensemble. May be repeated for credit without limitations. May be concurrently scheduled with course C185A. S/U or letter grading.

480B. Chamber Singers. (2) Activity, four hours. Preparation: audition. Select mixed ensemble performing choral music of all periods. May be repeated for credit without limitation. May be concurrently scheduled with course C185B. S/U or letter grading.

480C. Opera Workshop. (2) Activity, six hours. Preparation: audition. Rehearsal and performance of scenes and complete operas, as well as repertoire, staged, in preparation for large language diction coaching. May be repeated for credit without limitation. May be concurrently scheduled with course C185C. S/U or letter grading.

480D. Symphony Orchestra. (2) Activity, four hours. Preparation: audition. Group performance of symphonic orchestra literature. May be repeated for credit without limitation. May be concurrently scheduled with course C185D. S/U or letter grading.

480E. Philharmonia. (2) Activity, four hours. Preparation: audition. Group performance of symphonic orchestra literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C185E. S/U or letter grading.

480G. Wind Ensemble. (2) Activity, six hours. Preparation: audition. Group performance of wind ensemble literature, as well as orchestral ensemble performance. May be repeated for credit without limitation. May be concurrently scheduled with course C185G. S/U or letter grading.

484A. Piano/Keyboard Accompanying. (2) Activity, four hours; outside study, two hours. Collaboration with large ensembles, instrumentalists, and/or vocalists in role of accompanists. Performance includes, but is not limited to, lessons, rehearsals, special studio
performance projects, master classes, concerts, auditions, juries, and recitals. May be repeated for maximum of 12 units. Concurrently scheduled with course C166A. S/U or letter grading.

C484B. Guitar Accompanying. (2) Activity, four hours; outside study, two hours. Collaboration with instrumentalists and/or vocalists in role of accompanists. Performance includes, but is not limited to, lessons, rehearsals, special studio performance projects, master classes, concerts, auditions, juries, and recitals. May be repeated for credit without limitation. Concurrently scheduled with course C166B. S/U or letter grading.

C484C. Harp Accompanying. (2) Activity, four hours; outside study, two hours. Collaboration with instrumentalists and/or vocalists in role of accompanists. Performance includes, but is not limited to, lessons, rehearsals, special studio performance projects, master classes, concerts, auditions, juries, and recitals. May be repeated for credit without limitation. Concurrently scheduled with course C166C. S/U or letter grading.

495. Introductory Practicum for Teaching Apprentices in Music. (2) Eight weekly two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Music Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

496. Technology Seminar. (2) Seminar, two hours; laboratory, one hour; outside study, three hours. Introduction to departmental and campuswide technology resources, exploration of applications of technology in education, and development of means of using technology to assess and document teaching competence. S/U grading.

596A. Directed Individual Studies in Orchestration and Composition. (2, 4, or 6) Tutorial, to be arranged. Only 4 units may be applied toward MA or MM degree requirements. May be repeated for credit. S/U or letter grading.

596C. Directed Individual Studies in Music Education. (2, 4, or 6) Tutorial, to be arranged. Only 4 units may be applied toward MA or MM degree requirements. May be repeated for credit. S/U or letter grading.

596D. Directed Individual Studies in Performance Practices. (2 to 12) Tutorial, to be arranged. Only 4 units may be applied toward MA or MM degree requirements. May be repeated for credit. S/U or letter grading.

597. Preparation for Master's Comprehensive Examination or PhD Qualifying Examinations. (2 or 4) Tutorial, to be arranged. S/U grading.

598. Guidance of MA Thesis. (4, 8, or 12) Tutorial, to be arranged. Only 4 units may be applied toward degree requirements. May be repeated for credit. S/U grading.

599. Guidance of PhD or DMA Dissertation. (4, 8, or 12) Tutorial, to be arranged. May be repeated for credit. S/U grading.

Overview
The Music Industry Interdepartmental Program prepares students for transformative, creative career paths in and around an ever-evolving music industry. Committed to diversity and justice in the music industry, the program provides challenging historical, critical, and global perspectives through diverse collaboration with the Herb Alpert School of Music’s departments of Music, Musicology, and Ethnomusicology, and with other UCLA professional and arts schools. Fostering students’ intellectual and musical creativity equips them to recognize and develop the creativity of others. Balanced programs of courses and projects build the technical, computational, fiduciary, communicative, and marketing skills necessary for success in any part of the professional music world. Internships, mentoring, and individualized capstone projects give students direct experience with working music communities, and forge lifelong connections between our students and faculty, engaged industry professionals and the world.

Undergraduate Major
Music Industry BA
Capstone Major
Music Industry is a designated capstone major. Undergraduate students must complete a senior thesis that demonstrates the skills and expertise they have acquired in earlier coursework. This requirement may be fulfilled through a written research paper, but, given the experiential nature of the Music Industry degree, it may also be fulfilled by the honoring of creative expression for personal or political effect (songwriting, production, etc.), by problem solving or entrepreneurial initiatives in the music industry (music tech start-up, record label, etc.), or by experiential learning in an organization outside of academia (entrepreneurial, community, or corporate project with formal reporting). Students in the capstone are expected to work together to curate their collective work and experience in a formal and public capstone event, which may include online and virtual components as well as a live performance showcase for creative work.

Learning Outcomes
The Music Industry major has the following learning outcomes:

• Understanding of basics of economics and accounting, and master advanced financial concepts relevant to the entertainment and concert industry, including the management of intellectual property rights
• Understanding through study and performance of basic parameters of music, and how it works as a communicative language and a cultural force
• Displayed familiarity with the current practices of music and law, artist management, digital marketing, music publishing, concert and tour promotion, and other key tasks of the music and entertainment industries
• Demonstrated working understanding of acoustics, audio technology, audio engineering, studio production, and electronic music making
• Effective spoken and written communication and negotiation
• Understanding of how to plan, organize, and budget complex projects
• Development of techniques for managing and motivating collaborative and creative teams
• Engagement with analytical and historical research to development broad critical understanding of social, economic, and historical underpinnings of the global music industry, with special attention given to race/gender equity and music as a force for social justice
• Creation of collaborative networks with others in the music industry
• Acquisition of direct experience in characteristic music industry working environments, and reflection on that experience
• Participation in sustained mentoring relationships
• Assembling of a portfolio of relevant work experience and achievements

Entry to the Major
Admission
Applicants are reviewed individually, based on a questionnaire, grade-point average, test scores, a personal statement of purpose, a portfolio review, and an interview.

Transfer Students
Transfer applicants to the Music Industry major with 90 or more units must complete as many
of the following introductory courses as possible prior to admission to UCLA: at least two quarters of musicianship or music theory training equivalent to Music Industry 20A and 20B, and at least two quarters of study in finance and accounting equivalent to Music Industry 10A and 10B.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: (1) Music Industry core—Music Industry 1 (three quarters), 2, 10A, 10B, 20A, 20B, 25; (2) Ensemble—four units in one ethnomusicology, music, or music industry ensemble; (3) History and Culture of Music—one course from Ethnomusicology 20A, 20B, M25, 30, M35, 40, 45, M50A, M50B, M110A, M110B, Music Industry 29, 55, MusicoLOGY 5, 7, 8, 13, 60, 61, 64, 65, 68, 94; (4) Race, Culture and American Music—one course from Ethnomusicology M35, M50A, M50B, M110A, M110B, Musicology 64, 65, 75; (5) Communication Fundamentals—Communication 1 or equivalent.

The Major

Policies

Preparation for the Major

Each course must be taken for a letter grade.

Undergraduate Minor

Music Industry Minor

The Music Industry minor is intended to provide students with an introduction to the history, theory, and practice of music as a calling and a business; and to provide opportunities for students to work with practitioners on real-world projects in the music industry.

Admission

To apply to the minor, transfer students must have completed a minimum of one term of residency at UCLA, and students admitted as first years must have completed a minimum of three terms of residency at UCLA. Students must be in good academic standing with an overall grade-point average of at least 2.0.

In addition, students who are not enrolled in a major within the Herb Alpert School of Music must complete at least one performance or ensemble course selected from Ethnomusicology 91A through 91Z, Global Jazz Studies 176A through 176G, Music M90T, C185A through C186C prior to application to the minor. The performance requirement may also be fulfilled through successful completion of Music Industry 91A, 91B, 111A, 111B, or through an equivalent music industry course by petition.

The Minor

Required Courses (28 units): Music Industry 101, 195CE (8 units), and five additional courses (20 units) selected from Ethnomusicology M25, 30, M35, C100, 105, M110B, 117, C155, C184, Music C176, Musicology 128, M137, 140, 164, 165, 177, 185, Music Industry 29, 55, 95, M103 through 188, 195CE, 197.

Music Industry

Lower-Division Courses

1. Music Industry Forum. (1) Lecture, one hour. Introduction to conceptual and contemporary issues in global music industry through interaction with instructor, guest lecturers. May be repeated for credit. P/NP grading.

2. Music Industry Fundamentals. (4) Formerly numbered 102. Lecture, three hours; discussion, one hour. Introduction to current music industry. Overview of career paths, monetization strategies, organizational behavior, and entrepreneurial thinking. Designed to serve as gateway for music industry degree programs. Students familiarize themselves with basic functions of industry that are covered in greater detail in upper-division coursework. Letter grading.

4. Reel Beatles: Understanding Beatles through Film and Media. (5) Lecture, three hours; discussion, one hour. Designed to tell story of the Beatles through visual media. Covers over 80 years of their lives, their journey, and enormous impact they had on world. Focus on how the Beatles were seen on television and in film. Examination of their most impactful filmed performances, movies they made as group, their promotional videos, their landmark broadcast moments, documentaries made about them while still they were together, television interviews they did after group broke up, best documentaries made about them since 1970, and official and unofficial documentaries about the Beatles they did together as well as Peter Jackson’s 2021 documentary. Letter grading.

10A-10B. Finance and Accounting in Music Industry I, II. (4–4) Lecture, three hours. Introduction to how money works in both nonprofit and for-profit music industries, including practical management of funds, budgeting, (including tour budgets), fees, scales, service agreements, issues pertaining to trade unions, and various modes of accounting for salary, royalties, local and international taxation, streaming revenues, licensing payments, and other income and expenditure. Letter grading. 10B. Requisite: course 10A.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

20A-20B. How Music Works I, II. (4–4) Lecture, four hours; recitation, one hour. One accession to real-world applications of music in technological era of mass culture, and reconsideration of music theory for global 21st century music professional. How organized sound can become source of pleasure, mode of communication, strategy of resistance, and (sometimes) source of intellectual property. No particular style of music or type of notation is privileged, and no traditional musical training is required. Letter grading. 20B. Requisite: course 20A.

25. Fostering Musical Creativity: Artists and Repertoires. (4) Lecture, four hours; outside study, eight hours. Beginning from psychology of creativity (James, D. & D. Csikszentmihalyi, Transcendence, literature, exploration of creative process and how to foster and control it; and collaborative process with producer, manager, labels, and other executives. Topics include path of individual development versus collective; individuality; structure and freedom; collaboration and how teams work, including inside and outside concert hall and recording studio; focus on career building; feed-back and evaluation. Special attention to musical creativity and its rhythms. Letter grading.

29. Docs that Rock: Music Documentary in History and Practice. (5) Lecture; three hours; discussion, one hour. One hour look at history of popular music documentaries. Viewed through very specific focus of story and storytelling. Students may develop their own documentary project as part of coursework. P/NP or letter grading.

55. Songwriters on Songwriting. (4) Lecture, three hours; discussion, one hour. With special focus on songwriting renaissance of rock era, examination of work of important songwriters of post-World War II generation (circa 1952–1994) and those they have influenced. Practical industry guidance from current and noteworthy practitioners. Coverage of songwriting, arrangement and record production, music publishing, and record business in 20th and 21st centuries. Guest music industry professionals demonstrate individual creative processes and paths to songwriting and their place in world of music. Course is not workshop or tutorial on how to write songs. (See course 112.) P/NP or letter grading.

70. Apprenticeship in Music Industry. (2 or 4) Tutorial, to be arranged. Under general supervision of UCLA faculty member, students work with various UCLA faculty and staff in production of live concert events, in UCLA recording studio, or as part of media production team led by UCLA faculty or staff. Written evaluation of apprenticeship work is provided by those supervising it directly. May be repeated for credit. Individual Contract with workplace supervisor required. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through small groups, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

91A-91B. Rock/Pop Studio Ensemble I, II. (2–2) Activity, five hours. Course 91A is requisite to 91B. Performance-based introduction to popular music styles, forms, and competencies through immersion in studio performance techniques. Students perform in groups to develop ensemble, create material, and produce recordings. P/NP or letter grading.

95. Introduction to Community or Corporate Internships in Music Industry. (4) Tutorial, eight hours. Entry-level community or corporate internship for lower-division students who have completed 90 or
fewer units. Internship in supervised setting in community organization, agency, or private business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised regularly), four hours; outside study, eight hours. Individual contract required; consult Undergraduate Research Center. May be repeated, P/NP grading.

Upper-Division Courses

101. Seminar in Music Industry. (4) Seminar, four hours; outside study, eight hours. Required of Music Industry minors. Introduction to intellectual and theoretical frameworks that form Music Industry minor and that scholars of music and music industries have developed to analyze, understand, and perhaps judge what happens out there, including how music business works in financial, social, and artistic terms, and how music technologies of recording, reproduction, and consumption operate, and how basic music science from acoustics to brain biology to music perception affects how music is produced and heard. Letter grading.

M103. Music, Mind, and Brain. (4) Same as Neuroscience M170.) Seminar, three hours; outside study, nine hours. Multidisciplinary approach to understanding brain mechanisms mediating music perception, performance, and cognition. Students’ natural interest in music serves as springboard for learning basic concepts about brain and mind, and how brain works to determine perception of harmony and rhythm, emotion and meaning in music, and musical creativity. Designed to help students understand methodologies currently used to investigate brain-behavior correlates. Broad understanding of research topics in cognitive neuroscience; introduction to fundamental principles in neurophysiology, psychophysiology, and neuropsychology. Letter grading.

104A. Music and Law. (4) Seminar, three hours; outside study, nine hours. Fundamentals of American law as it applies to entertainment business, with special attention to music and its use in film, television, and new media. Legal aspects of stewardship in entertainment business and basic business practices. Exploration of legal aspects of process of producing works in entertainment field, from acquisition of rights and talent through production and distribution. Letter grading.

104B. Legal and Business Aspects of Music Publishing. (4) Seminar, three hours. Exploration of legal and business aspects surrounding creation and distribution of musical compositions in today’s evolving marketplace. Detailed exploration of rights afforded songwriters under Copyright Act of 1976, and practical review of ability of these authors to control and monetize these rights, review and practical analysis of agreements involved from inception to global exploitation of compositions including co-writer agreements, registration of songs, administration agreements, public performance agreements, and samplers. Exploration of financial implications for songwriters of these agreements. Letter grading.

104C. Legal and Business Aspects of Sound Recordings. (4) (Formerly numbered 104B.) Seminar, three hours; outside study and research, nine hours. Exploration of legal and business aspects of production and distribution of sound recordings. More detailed practical focus on legal aspects of recording process itself, from initial recording through assembly of material to distribution and collection of royalties, with material covered also relevant to audio-visual recordings. Introductory presentation on contract, copyright, and trademark law as background to step-by-step process of securing agreements necessary for production and commercial distribution of recordings. Letter grading.

107A. Engineering and Production Fundamentals. (4) Lecture, two hours; studio, one hour; outside study, nine hours. Introduction to basic acoustic principles, practical and working procedures for equipment used in contemporary music production, including microphones, mixers, recorders, synthesizers, and sequencers. Basic sound processing operations (equalization, compression, distortion, reverberation) and basic operating procedures of music production software and hardware. Letter grading.

107B. Engineering and Production for Musicians. (4) Seminar, four hours; outside study, eight hours. Enforced requisite: course 107A. Examination of selected technological elements in greater depth than in course 107A, while applying established concepts to broad range of creative scenarios and applications. Basic familiarity with standard audio workstation software in use in music industry and introduction to fundamental theoretical concepts in audio engineering, psychoacoustics, mixing, mastering, and sound recording. Development of critical listening skills through in-class and assigned listening. Letter grading.

108. Founding and Sustaining Performing Arts Organizations. (4) Seminar, four hours. Examination of principles and practices of founding performing arts organizations, beginning with inspiration to do so, clarifying organization mission, and mechanics of becoming nonprofit corporations; issues of funding, press relations, fundraising, setting up accounting; me- chanics, legal, and routine of running arts businesses; establishing relationships with other organizations in field; issues of making and distributing recordings. Students create on paper one performing arts organization, including developing mission statement, preparing bylaws, and writing sample grant proposals. Letter grading.

110. Music Business Now. (4) Seminar, three hours. Hands-on introduction to business of music, with emphasis on marketing and media. Students work in teams to develop strategies for real-world artists. P/NP or letter grading.

111A-111B. Rock/Pop Studio Ensemble I, II, (4-6) Studio, four hours; outside study, four hours. Performance-based introduction to popular music styles, forms, and competencies through immersion in studio performance techniques. Students play in groups to develop ensemble, create material, and produce recordings. May be repeated for credit. P/NP or letter grading. 111A. (Formerly numbered 111.) 111B. Requisite: course 111A.

112A. Introductory Songwriting. (4) Seminar, four hours; outside study, eight hours. Learning and employment of craft of songwriting. Examination, analysis, and implementation of song structure, lyric and melody writing, song revising, and song recording techniques. Evolution of songwriting in modern society since advent of phonograph player/ radio; how songs and society affect and reflect one another; how this has informed songs and songs and songwriting. Letter grading.

112B. Advanced Songwriting. (4) Seminar, four hours; outside study, eight hours. Enrollment by consent of instructor. Seminar in contemporary songwriting practices for intermediate to advanced songwriter. Emphasis on collaboration, flexibility, and working within teams to master specific songwriting challenges. All genres and styles of music accommodated. Letter grading.

112C. Songwriter’s Workshop. (1 or 2) Seminar, three hours. Enforced requisite: course 112A or 112B or permission of instructor. Provides supportive community for songwriters to work together under the supervision of Music Industry faculty. Students present their songs in progress, form teams for collaboration, and may undertake professionalization exercises like portfolio construction, song presentation, writing to synchronization, etc. Main focus is individual musical growth. May be repeated for credit. P/NP or letter grading.

113A. Music Supervision. (4) (Formerly numbered 113.) Seminar, three hours. Examination of role of music supervisor and creative, logistical, and budget considerations of music supervision. Development of theoret-
124B. Music Industry Entrepreneurship and Innovation. (4) Formerly numbered 124.) Seminar, four hours. Principles of entrepreneurship and fundamental business management. Moving forward with critical thinking and project-based group assignments. Students develop business plans, pitch them, and build out infrastructure for startups that focus on technology and innovation in music industry. Students are encouraged to make connections at MusicBiz, MIEEA, and startup.ucla.edu. Letter grading.

125. Artist Management. (4) Seminar, four hours. Holistic principles of artist management including articulating and advancing artistic vision, coordinating multiple revenue streams, psychology of managing artists and creative mind, and ethical practices in artist management. Basics of negotiation and compensation; artist promotion; career shaping; legal aspects of artist management; contemporary Internet-based strategies for artist promotion; merchandising and monetizing fandom. Students work to discover, sign, and break local artists across numerous genres. Letter grading.

128. Global Music Industry. (4) Seminar, three hours. Introduction to global music industry through contemporary research, case studies, and trends. Survey of developing and emerging markets; regional marketing and moving beyond U.S.-based thinking; multi-national approaches to career building. Special topics may include international standards for linguistic issues including publishing, censoring, and dubbing. Letter grading.

130. Music Industry. (4) Seminar, three hours. Recommended prerequisite or corequisite: Musicology 13. Do it yourself (DIY) as a practical alternative mode of organization for social justice activism and nonprofit arts collectives. Ethical issues in capitalism, labor issues, politics. How to work with gender, class, race, and orientation. Students interface with existing radical social justice/art organizations in Los Angeles area, and strive to facilitate real change. Letter grading.

132. Music and Activism. (4) Seminar, three hours. Outside study, nine hours. History and practice of music in and as activism. Artist-run labels and collectives, social justice organizing and media, art and activism in both entrepreneurial and non-profit settings. Students develop and execute music-related business plan with social awareness and potential for measurable impact. P/NP or letter grading.

134. Psycholgy and Music Management. (4) Seminar, three hours. Theoretical and sociological approaches to management of artist, fame, and music management, including effects of fame, addiction, fandom, and managing legacies. Focus on careers of significant musical artists according to instructor specialty. Letter grading.

136. Music Journalism. (4) Seminar, three hours. Limited to senior Music Industry majors. Preparation, creation, and presentation of senior capstone project. Letter grading. 187A. Developing Project/Connections. 187B. Seminar, three hours. Limited to students in Music Industry for undergraduate students interested in working in music industry for undergraduate students interested in career opportunities in the music and entertainment industries. May be repeated for credit with topic change. Letter grading.

188. Special Courses in Music Industry. (4) Seminar, four hours; outside study, eight hours. Special topics in various aspects of music and music industry for undergraduate students interested in exploring on experimental or temporary basis. May be repeated for credit with topic change. Letter grading.

189. Advanced Honors Seminars. (4) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students who meet the content noted on transcript. P/NP or letter grading.

195. Community or Corporate Internships in Music Industry and Technology. (4) Tutorial, eight hours. Preference given to juniors/seniors in Music Industry minor with minimum cumulative 3.0 grade-point average. Internship in supervised setting in community agency or private business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for a maximum of 8 units. Individual contract with supervising faculty member required. P/NP grading.

195CE. Community and Corporate Internships in Music Industry. (4) Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Engagement. Students complete weekly written assignments, attend biweekly meetings with graduate student instructor, and write final research paper. Faculty mentor and graduate student instructor construct series of readings assignments that examine issues related to internship site. May be repeated for credit with consent of Center for Community Engagement. No more than 8 units may be applied toward major. May not be applied toward concentration or distribution requirements. Individual contract with supervising faculty member required. P/NP or letter grading.

196. Directed Mentorships in Music Industry. (2 or 4) Tutorial, one hour. Limited to senior Music Industry majors with minimum cumulative 3.0 grade-point average. Supervised individual research under guidance of faculty and industry mentoring team. Culminating industry project required. May be repeated for a maximum of 8 units. Individual contract required. P/NP or letter grading.

M176. Music and Capitalism in West. (4) Same as Ethnomusicology M176.) Lecture, four hours. Follows history of western capitalism and how it has shaped the music industry and listening to present time. P/NP or letter grading.

M181. Forensic Musicology. (4) Formerly numbered 181.) (Same as Musicology CM181.) Seminar, three hours. Survey of critical issues and recent developments in forensic musicology and application of musical analysis to law of music copyright. Instructors include professionals in music industry. Focus on fundamentals of music analysis and copyright law, review of key music copyright infringement cases from basic musical and legal and musico-sociological perspectives, outlining of procedural aspects of copyright case, and defining of working relationship between attorney and musicologist. Letter grading.

M182. Music Industry. (4) Same as Ethnomusicology CM182, Music CM182, and Musicology CM186.) Lecture, four hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music publishing in 18th century and continuing through development of audio recordings to MTV and popular music today. Letter grading.

189. Advanced Honors Seminars. (4) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students who meet the content noted on transcript. P/NP or letter grading.

195. Community or Corporate Internships in Music Industry and Technology. (4) Tutorial, eight hours. Preference given to juniors/seniors in Music Industry minor with minimum cumulative 3.0 grade-point average. Internship in supervised setting in community agency or private business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for a maximum of 8 units. Individual contract with supervising faculty member required. P/NP grading.

195CE. Community and Corporate Internships in Music Industry. (4) Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Engagement. Students complete weekly written assignments, attend biweekly meetings with graduate student instructor, and write final research paper. Faculty mentor and graduate student instructor construct series of readings assignments that examine issues related to internship site. May be repeated for credit with consent of Center for Community Engagement. No more than 8 units may be applied toward major. May not be applied toward concentration or distribution requirements. Individual contract with supervising faculty member required. P/NP or letter grading.

196. Directed Mentorships in Music Industry. (2 or 4) Tutorial, one hour. Limited to senior Music Industry majors with minimum cumulative 3.0 grade-point average. Supervised individual research under guidance of faculty and industry mentoring team. Culminating industry project required. May be repeated for a maximum of 8 units. Individual contract required. P/NP or letter grading.

197. Individual Studies in Music Industry and Technology. (2 or 4) Tutorial, six to 12 hours. Limited to juniors/seniors in Music Industry minor with minimum cumulative 3.0 grade-point average. Individual intensive study in music industry and technology, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter resulting in research project/paper required. May be repeated for a maximum of 6 units. Individual contract with supervising faculty member required. Letter grading.

Overview

The Department of Musicology curricula allow students to gain a broad understanding of the history and culture of music, as well as a practical introduction to issues and skills relevant to the music and entertainment industries. Courses cover virtually every period, style, and genre, including jazz and other popular musics. The department is aligned with the departments of Ethnomusicology and Music and, shares curriculum with the free-standing minor in Music Industry. It aspires to promote produc-
tive collaboration between performance and scholarship, a cross-cultural global understanding of the art of music, and preparatory training for a broad range of careers in music and the music industry after students graduate.

**Undergraduate Majors**

**Musicology BA**

The BA in Musicology appeals to undergraduate students with musical backgrounds whose interests and principal career goals lie in areas other than professional performance. This undergraduate program prepares students for graduate programs in music and related fields and offers training within the broader context of the humanities.

**Capstone Major**

The Musicology major is a designated capstone major. Undergraduate students must complete a senior thesis that demonstrates the skills and expertise they have acquired in earlier coursework. Students are expected to conceive and execute a project that identifies and engages with a problem within a specialized topic, identify and analyze appropriate primary sources both textual and musical, and have a working knowledge of scholarly discourse relative to a specialized topic. While an extended essay is the default expectation for a completed project, students are encouraged to seek alternative formats, such as a lecture-recital, business or marketing plans, set of lesson plans, website, studio sound recording, or video/audio presentation. Students discuss and critique the work of their peers and present their work to other students and, if they choose, to the public as part of a student-organized live event and conference.

**Learning Outcomes**

The Musicology major has the following learning outcomes:

- Demonstrated specific skills and expertise, including research, analysis, writing, and general knowledge of music and music history
- Identification and analysis of appropriate primary sources and musical scores
- Conception and execution of a project that proposes and supports an original argument about a specialized topic
- Working knowledge of scholarly discourse relative to a specialized topic
- Engagement with peers through presentation, discussion, and critique of student work

**Entry to the Major**

**Admission**

The Musicology program assumes that students have some musical background before entering UCLA. Although auditions are not required, prospective majors should be sufficiently competent on an instrument or in voice to participate in a performance group, as required by the program.

**Transfer Students**

Transfer applicants to the Musicology major with 90 or more units should complete one year of music theory and musicianship prior to admission to UCLA. Experience in music performance is strongly recommended. Transfer students are required to take Musicology 12W at UCLA.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

**Requirements**

**Preparation for the Major**

**Required:** Musicology 1, M6A, M6B, M6C, 12W, Music 20A, 20B, 20C, and 6 units total of performance organizations selected from Ethnomusicology 68A through 68O, 91A through 91Z, 168A through 168O, Global Jazz Studies 176A through 176H, Music 157A through 157C, 185A through 185H, Musicology CM90T, or Music Industry 111A; one lower-division humanities elective (minimum of 4 units).

**The Major**

**Required:** Musicology 125A, 125B, 125C, 126, 127, 128 (in a given year, the department may designate individual Musicology seminars in the range 160-185, 188, or 191 as equivalent to 126 and 127); one additional upper-division ethnomusicology, global jazz studies, music, or music industry seminar elective course (minimum of 4 units); and the department capstone sequence, Musicology 187A, 187B, 187C.

**Policies**

**Preparation for the Major**

Enrollment in Musicology M6A, M6B, M6C and Music 20A, 20B, 20C requires taking the Music Theory Placement Examination administered by the Music Department during New Student Sessions or week 0. Students who do not pass the examination are required to take Music 3 prior to taking Music 20A.

**The Major**

Each course applied toward the major must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable).

**Music History and Industry BA**

The BA in Music History and Industry is not a technical or business degree; it is a liberal arts degree in musicology whose subject is the music industry, combining the focus on music as an art form with practical training and experiential learning based in the music industry. It includes courses that help students develop their skills in popular music creation and production as well as practical skills appropriate to the fiscal, entrepreneurial, and legal needs of the contemporary music world. A required internship in the Los Angeles music industry is a distinctive feature.

**Capstone Major**

The Music History and Industry major is a designated capstone major. Undergraduate students must complete a senior thesis that demonstrates the skills and expertise they have acquired in earlier coursework. Students are expected to conceive and execute a project that (a) identifies an issue, problem, or opportunity in the music industry and engages with it practically and critically, or (b) brings to fruition a substantial creative project in contemporary music with tangible results. While an extended essay is the default expectation for a completed project, students are encouraged to seek alternative formats, such as a lecture-recital, business or marketing plans, set of lesson plans, website, studio sound recording, or video/audio presentation. Students discuss and critique the work of their peers and present their work to other students and, if they choose, to the public as part of a student-organized live event and conference.

**Learning Outcomes**

The Music History and Industry major has the following learning outcomes:

- Development of basic musicianship and music literacy and fluency in music theory to accurately and efficiently communicate about musical concepts across multiple repertoires in popular music; basic competence with music technology
- Demonstrated general knowledge of the histories and repertories of Western European and US—American traditional, popular, and classical musics, as well as the influence of other world traditions
- Engagement with live ensemble performance in at least one area of music
- Working knowledge of scholarly and critical discourse relative to music history and the music industry
- Conception and execution of project that proposes and supports an original argument about a specialized topic or addresses a specific cultural question or presents and analyzes a case study of actual practice in the music industry
- Engagement with peers through presentation, discussion, and critique of their work
- Demonstrated basic understanding of how culture is theorized and interpreted, and the ability to place musical experiences and structures in rich cultural contexts, and to link music with social justice, diversity, and equity goals
- Demonstrated basic economic literacy and basic understanding of the economic and legal organization of creative industries
- Ability to find, evaluate, and apply high-quality data to support executive and entrepreneurial decisions
- Experiential learning in real-world corporate, creative, or entrepreneurial situations with written report

**Entry to the Major**

**Admission**

The Music History and Industry major assumes that students have some musical background before entering UCLA, although Western art music is not privileged. Auditions are not required, but prospective majors should be sufficiently competent on an instrument, in produc-
tion, or in voice to participate in a performance group, as required by the program.

Transfer Students
Transfer applicants to the Music History and Industry major with 90 or more units should complete one year of music theory and musicology prior to admission to UCLA. Experiencing in group music performance (any genre) is strongly recommended. Transfer students are required to take Musicology 12W at UCLA. Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major
Required: Music 20A, 20B, 20C; Musicology 1, M6A, M6B, M6C, 12W; and 4 units total of performance organizations selected from Ethnomusicology 68A through 68O, 91A through 91Z, 161A through 161Z, Global Jazz Studies 176A through 176H, Music 175A through 175G, 185A through 185H, Musicology 111A; one lower-division musicology or music industry elective (minimum of 4 units).

The Major
Required: Musicology 125A, 125B, 125C, 128, Music Industry 101, 2 or 112A, 112B, 195 or 195CE, two additional upper-division music industry elective courses; and the Music History and Industry capstone sequence, Musicology 187A, 187B, 187C.

Policies

Preparation for the Major
Enrollment in Music 20A, 20B, 20C, and Musicology M6A, M6B, M6C requires taking the Music Theory Placement Examination administered by the Music Department or an equivalent assessment administered by the Musicology Department during New Student Sessions or week 0. Students who do not pass the examination are required to take Music 3 prior to taking Music 20A.

The Major
Each course applied toward the major must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable).

Undergraduate Minor
Musicology Minor
The Musicology minor provides undergraduates with an overview of music history and the study of music. Students may select from a wide variety of undergraduate courses that range through the history of European and American music.

Admission
To enter the minor, students must have an overall grade-point average of 2.0 or better and complete the Musicology minor application. For more information, see the minor website.

The Minor
Required Lower-Division Courses (14 units):
Musicology 1 and two lower-division musicology courses (minimum of 10 units total) with grades of C or better.
Required Upper-Division Courses (20 units):
Two upper-division musicology seminar courses (minimum of 8 units total), and three additional upper-division ethnomusicology, global jazz studies, musicology, or music industry courses (minimum of 12 units total).

Policies
Enrollment in some courses may be limited; check with the department or instructor.
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
Each minor course must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Major
Musicology MA, CPhil, PhD
The graduate program in Musicology offers courses leading to the MA and PhD degrees. It is designed to equip students to pursue careers not only in teaching but also in other areas that require bibliographical skills and training in research methodologies. The department offers teaching and research assistantships each year for qualified students.

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in departmental handbooks, other publications, and websites of the schools, departments, and programs.

Musicology
Lower-Division Courses
1. Issues and Methods in Musicology. (4) (Formerly numbered 101.) Seminar, three hours. Introduction for Musicology majors and minors to practical aspects and fundamental issues of musicology as academic discipline. How musicologists go about establishing, editing, performing, analyzing, and interpreting musical texts. Exposure to kinds of activities, philosophies, and styles of scholarship that continue to shape the field of musicology. Letter grading.
M3. Introduction to Classical Music. (5) (Formerly numbered Musicology 3.) (Same as Music M14.) Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition, with emphasis on historical context, musical meanings, and creation of tradition itself. P/NP or letter grading.
5. History of Rock and Roll. (5) Lecture, four hours; discussion, one hour. Analysis of forms, practices, and meanings of rock and roll music, broadly conceived, from its origin to present. Emphasis on how this music has reflected and influenced changes in sexual, racial, and class identities and attitudes. Credit for both courses 5 and 185 not allowed. Letter grading.
M6A-M6B-M6C. Introduction to Musicianisms. (2–2–2) (Same as Ethnomusicology M6A-M6B-M6C and Music M6A-M6B-M6C.) Laboratory, four hours. Preparation: placement examination. Course M6A is enforced requisite to M6B, which is enforced requisite to M6C. Students must receive grade of C– or better to proceed to next course in sequence. Introduction to musicianship through in-depth exploration of basic common musical elements and training in aural recognition, sight singing, dictation, and keyboard skills. Focus on topics such as tonal and modal harmony, rhythm, improvisation, composition, notation, and ear training to prepare students for later theory courses, participation in music ensembles, advanced study in music, and professional careers. Letter grading.
7. Film and Music. (5) Lecture, four hours; discussion, one hour. History of music and cinema, particularly ways music is used to produce meanings in conjunction with visual image. Credit for both courses 7 and 177 not allowed. P/NP or letter grading.
8. History of Electronic Dance Music. (5) Lecture, four hours; discussion, one hour. Survey of groove-based electrified dance music from its origins in 1960s psychology and soul to present day. House, techno, ambient, rave, and jungle. Emphasis on interaction of technology, musical structures, psychoactive drugs, and club culture to induce altered states of musical consciousness; promise (versus reality) of political and spiritual transformation; electronic dance music as new art music. P/NP or letter grading.
9. American Popular Song. (5) Lecture, four hours; discussion, one hour. American popular music before advent of rock and roll in 1950s, with special emphasis on song tradition of Tin Pan Alley, P/NP or letter grading.
12W. Writing about Music. (5) Lecture, four hours; laboratory, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Emphasis on learning specific skills, incorporating technical description, historical contextualization, subjective reaction, and certain stylistic conventions necessary in writing about music. Satisfies Writing II requirement. Letter grading.
13. Punk: Music, History, Subculture. (5) Lecture, four hours; discussion, one hour. Developments in punk music in their historical and subcultural contexts. Survey of punk and musical antecedents in 1960s, rise of punk in 1970s, and tracing of its expressive trajectories to present day. P/NP or letter grading.
19. Flat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP or letter grading.
28A. Medieval Period; 28B. Renaissance Period; 28C. 17th and 18th Centuries.
35. Introduction to Opera. (5) Lecture, four hours; discussion, one hour. Exploration of history of opera from its origins in Florentine Camerata in Italy in early 17th century, through heyday of Enlightenment and Romanticism, and ending with modern era of early 20th century. History of opera, biography of composers and singers, operatic conventions, dramaturgy, plot, staging, and musical style, with focus on learning appreciation of music of opera within rich context of its compelling history. P/NP or letter grading.
60. American Musical. (5) Lecture, four hours; discussion, 90 minutes. Survey of American musical in 20th century, beginning with its roots in operetta, vaudeville, and Gilbert and Sullivan, and focusing on its connections to politics, technology, film, opera, and variety of popular musical styles, including Tin Pan Alley, jazz, and rock. Credit for both courses 60 and 160 not allowed. P/NP or letter grading.
61. Music in Los Angeles. (5) Lecture, four hours; discussion, one hour. Exploration of history of music in Los Angeles. From Spanish missions and history of Los Angeles to emphasis on music in the 21st century, with special focus on European émigrés, inter­ national and postwar history of Japanese American community, Chicano and Mexican American music to present, African American traditions including jazz on Central Avenue, 1940s Doors, Motown Records, Stax, and other rhythm and blues, funk, and soul music cen­ ters of production. Lectures. Letter or P/NP grading.

62. Mozart. (5) Lecture, four hours; discussion, one hour. Designed for students who do not read music. Life, works, and mythology of Wolfgang Amadeus Mo­ zart, in context of both his age and our own. Credit for both courses 62 and 162 not allowed. P/NP or letter grading.

63. Bach. (5) Lecture, four hours; discussion, one hour. Designed for undergraduate students. Life and works of Johann Sebastian Bach. Credit for both courses 63 and 163 not allowed. P/NP or letter grading.

64. Motown and Soul: African American Popular Music of 1960s. (5) Lecture, four hours; discussion, one hour. Survey of development in post-World War II African American popular music, with special attention to musical developments in Motown Records, Stax, and other rhythm and blues, funk, and soul music cen­ ters of production. Lectures. Letter or P/NP grading.

65. Blues in American Music. (5) Lecture, four hours; discussion, one hour. History of blues, both as specific genre and as range of techniques and approaches that have been central to American music and culture, from 19th-century roots to present. Exploration of commonly accepted blues mainstream exemplified by figures like Bessie Smith, Robert Johnson, and B.B. King, but also central role blues has played in jazz, folk, country, gospel, rock, soul, and rap. Following evolution of music through 20th century, ex­ amination of how blues has served as metaphor for African American culture as it permeates American traditions. Credit for both courses 65 and 165 not allowed. P/NP or letter grading.

66. Getting Medieval. (5) Lecture, four hours; discussion, one hour. Exploration of ideas of medievalism in music and culture from film to video games. Course cov­ ered includes film scores, opera, Gregorian chant, early music revival, folk songs, progressive rock, and Goth. Credit for both courses 66 and 166 not allowed. Letter grading.

67. Popular Jewish and Israeli Music. (5) (Same as Jewish Studies M67.) Lecture, four hours; discussion, one hour. Music of Jews is diverse. With history of several thousand years and series of developments in modernity, music in Jewish life covers variety of styles found in many contexts. Exploration of music of Jews within last 100 years, with focus on popular music of Jews in America and Israel. Examination of music in Israel, with focus on song, and last Israeli, Israeli rock, and Muzika Mizrahit (Middle Eastern popular music). P/NP or letter grading.

68. Beatles. (5) Lecture, four hours; discussion, one hour. Examination of life and music of Beatles within social and historical context of 1960s. Credit for both courses 68 and 168 not allowed. P/NP or letter grading.

69. Music and Politics. (5) Lecture, four hours; discussion, one hour. Exploration of democratic and authoritarian pro­ cesses of various ways in which music is informed by and in­ forms politics. From individual performances to mass demon­ strations, music is recognizable as a political act and tool that is not simply representative, but also constitutive, meaning that music creates belief sys­ tems (politics). Exploration of development and use of music by social movements, political parties, and nations, and its function to both reflect and create the world around us and sounds that compose its futures. P/NP or letter grading.

70. Beethoven. (5) Lecture, four hours; discussion, one hour. Designed for undergraduate students. Life and works of Ludwig van Beethoven. Credit for both courses 70 and 170 not allowed. P/NP or letter grading.

71. Listening. (5) Lecture, four hours; discussion, one hour. Introduction to humanistic study of listening, as perceptual modality for engaging others and world, with focus on exploration of theories, ethics, and politics of listening. Hearing is shared perceptive faculty among able-bodied people, but listening practices are shaped by history, society, and culture. Hearing people listen differently depending on when, where, and how they live, as well as who they are as individu­ als, P/NP or letter grading.

72. Sacred Music. (5) Lecture, four hours; discussion, one hour. Study of forms and liturgies of Western church music. Credit for both courses 72 and 172 not allowed. P/NP or letter grading.

73. Music and Religion in Popular Culture. (5) (Same as Ethnomusicology M73.) Lecture, four hours; discussion, one hour. Survey of popular music in reli­ gious traditions since the 1970s. Growth of music in Jewish denominations, including Orthodox, Reform, and Conservative, and Christian contemporary music, from evangelical to cross-over artists performing in mainstream pop. M73 and M173 not allowed. P/NP or letter grading.

74. History of Jazz. (5) Lecture, four hours; discussion, one hour. History and analysis of variety of jazz styles. Focus on late 20th century to present, with emphasis on social meanings of musical prac­ tices. Letter grading.

75. Dancehall, Rap, Reggaeton: Beats, Rhymes, and Routes in African Diaspora. (5) Lecture, four hours; discussion, one hour. Analysis of histories of three closely connected music genres: Jamaican dancehall, U.S. rap, and Puerto Rican/Panamanian reggaeton. Introduction to major performers in each genre, compar­ isons of stylistic traits with each music, and exploration of technologies associated with con­ temporary music production. P/NP or letter grading.

76. Jewish American Experience through Music. (5) (Same as Ethnomusicology M80 and Jewish Studies M80.) Lecture, four hours; discussion, one hour. In synagogue and on stage, and from LP record­ ings to YouTube, Jews in America have varied musical experiences. Music of synagogue, celebrations at home, in community, and in all interesting de­ velopments of Jewish music. New Opportunities in entertainment industry brought new possibilities for Jews in popular music, rock, and film scores. Explora­ tion of various ways corresponding and adapting to their American context and becoming American through music. Exploration of different music genres and the role they play by guest composers and performers. Letter grading.

77. Music and Holocaust: Individual Experience. (5) (Same as Jewish Studies M82.) Lecture, three hours; discussion, one hour. Roles of music during Holocaust are as varied as people who experienced it. Music was composed and performed by prisoners in almost every concentration camp; music was means for some individuals to gain favorable treatment, while others weaponized it. Traces development of Euro­ pean musical culture under Nazi regime (1933–45), fo­ cusing on how individuals interacted with music throughout Holocaust. Study of some of newest de­ velopments in Holocaust music research, including role American and European non-governmental orga­ nizations played in creation of artistic hubs in campus of southern France. Exploration also of cultural repre­ sentations of Holocaust and role of music in society’s collective memory. Letter grading.

78. Sophomore Seminars: Music History. (2) Sem­ inar, two hours. Designed for sophomore Musicology majors or students interested in pursuing Musicology major. Topics may include introduction to academic dis­ cipline, with particular emphasis on musicology at UCLA. Study of music and its history and consider­ ation of theoretical issues central to musicology as it is practiced current day. Reading assignments, written assignments, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract re­ quired. Honors content noted on transcript. Letter grading.

79. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjacent to lower-divi­ sion lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible stu­ dents. Honors content noted on transcript. P/NP or letter grading.

80. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. De­ signed as adjacent to lower-division lecture course. In­ dividual study with lecture course instructor to explore topics in greater depth through supplemental read­ ings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract re­ quired. Honors content noted on transcript. Letter grading.

81. CM100T. Early Music Ensemble. (4) (Same as Music M90T) Activity, four hours. Preparation: audition. Group performance of Western vocal and instrumental music from historical periods prior to 1800. Early in­ struments may be used at instructor’s discretion. May be repeated for credit without limitation. May be con­ currently scheduled with course C490T. P/NP or letter grading.

82. Music and Internet. (5) Lecture, four hours; dis­ cussion, one hour. Survey of changes undergone by music in digital environment. As music becomes in­ creasingly pervasive—found everywhere, yet living no­ where—in the digital context, where creative freedoms and disinterest are equally apparent? What does In­ ternet sound like? P/NP or letter grading.

83. Student Research Program. (1 to 2) (1 to 2) Supervised research or other scholarly work, three hours per week per unit. Exploration of multi-disci­ plinary students under guidance of faculty mentor. Stu­ dents must be in good academic standing and en­ rolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

**Upper-Division Courses**

M103. Creating Musical Community. (4) (Same as Ethnomusicology M103, Global Jazz Studies M103, and Music M103.) Seminar, four hours; discussion, one hour. Limited to school of music majors. Faculty and students make music together in various modes. Students learn certain repertoire, refine it, and bring it to concert performance. Students critically engage musical literacies and non-musical content that forms basis of musical notation. Drawing from Amer­ ican music folk game traditions, highlights complex history of this country and way in which entire body is used as resource when instruments are unavailable. Letter grading.

M112. Disability and Musical-Dramatic Arts: Repre­ sentation, Embodiment, Themes, and Practices. (5) (Same as Disability Studies M112.) Lecture, four hours; discussion, one hour. Exploration of ways dis­ ability and impairment factor into musical and mus­ ical-dramatic creation and performance, considered historically and aspirationally in terms of representa­ tion, embodiment, themes, and developing prac­ tices. P/NP or letter grading.

M113. Variable Topics on Music and Disability. (4) (Same as Disability Studies M113.) Seminar, four hours. Analysis and critique of depiction of disability and music. Topics may include introduction to dis­ ability studies; exploring work and creative strategies of disabled musicians; music technologies and instru­ ment design; representation of disability in music; and others. May be repeated with topic or in­ structor change. P/NP or letter grading.

M125A. Music, History, and Culture: Era of Church and Patron. (5) Lecture, four hours; discussion, one hour. Requisite: course M6A (may be taken concur­ rently). Course 125A is required. Requisite 125 is req­ uisite to 125C. Students must receive grade of C or better to proceed to next course in sequence. Intro­ duction to history, culture, and structure of Western
Musicology / 683

Music, in era of church and court patronage, through selected topics, repertoires, and analytical techniques. Letter grading.

125B. Music, History, and Culture: Era of Empires and Marketplaces. (5) Lecture; four hours discussion, one hour. Requisite: course M68 (may be taken concurrently). 125A. Course 125A is requisite to 125B, which is requisite to 125C. Students must receive grade of C or better to proceed to next course in sequence. Introduction to history, culture, and structure of Western music, in era of empires and marketplaces, through selected topics, repertoires, and analytical techniques. Letter grading.

125C. Music, History, and Culture: Modern and Postmodern Era. (5) Lecture; four hours; discussion, one hour. Requisite: course M6C (may be taken concurrently). 125B. Course 125B is requisite to 125B, which is requisite to 125C. Students must receive grade of C or better to proceed to next course in sequence. Introduction to history, culture, and structure of Western music, in modern and postmodern eras, through selected topics, repertoires, and analytical techniques. Letter grading.

126. Musics, Cultures, and Their Interpretation. (5) Lecture; four hours; discussion, one hour. Requisite or corequisite: M6A. Designed to supplement broad historical and analytical knowledge and critical thinking by focusing on interlocking questions of how cultures make music, and how music makes cultures. Letter grading.

127. Music, Sound, and Structure. (5) Lecture, four hours; discussion, one hour. Requisite or corequisite: M6A. Designed to supplement broad historical survey in Musicology 125 series by focusing on interlocking questions of musical structure and meaning. Letter grading.

128. History of Popular Music. (5) Lecture; four hours; discussion, one hour. Requisite or corequisite: M6A. Introduction to study of popular music through American history, with emphasis on music of Americas, Afro-diasporic music, and socioeconomic structure of music making in industrial society. Letter grading.

M136. Music and Gender. (5) Same as Gender Studies M136.) Lecture; four hours; discussion, one hour. Analysis of gender ideologies in several musical cultures; representations of gender, body, and sexuality by both male and female musicians; contributions of women to Western art and popular musics; methods of gender and gay/lesbian theory and criticism. Letter grading.

M137. Lesbian, Gay, Bisexual, Transgender, and Queer Perspectives in Pop Music. (5) Same as Lesbian, Gay, Bisexual, Transgender, and Queer Studies M137.) Lecture; four hours; discussion, one hour. Survey of English-language popular music in 20th century, with focus on lesbians, gay men, and members of other sexual minorities as creators, performers, and performers. Letter grading.

140. Music, Media, and Consumer Society. (4) Lecture, four hours. Consideration of impact of recording technologies (gramophone, tape recorder, Walkman, sampler); broadcast media (radio, television, MTV, Internet); digital recording (record label bidding, advertising, Muzak) on way we consume and are consumed by music. How music functions and malfunctions on record, under movies, behind ads, and in semiotic fabric of everyday life. Letter grading.

165. Blues and Individual Expression. (5) Seminar, two hours. Enforced corequisite: attendance, but not enrollment, in course 65 lecture. Intensive discussion in seminar setting of selected topics associated with credit for both courses 66 and 166 not allowed. Letter grading.

166. Medievalism and Music History. (5) Seminar, two hours. Enforced corequisite: attendance, but not enrollment, in course 66 lecture. Exploration of ways in which specific approaches and attitudes to past shape music history, composition, and performance, with special focus on folk music and early music renaissance. Credit for both courses 66 and 166 not allowed. Letter grading.

170. Beethoven: Study of Selected Works. (5) Seminar, 90 minutes. Corequisite: attendance, but not enrollment, in course 70 lecture. Designed to meet needs of students who read music and wish to examine Beethoven’s music in greater depth. Credit for both courses 70 and 170 not allowed. Letter grading.

172. Selected Topics in Sacred Music. (5) Seminar, two hours. Enforced corequisite: attendance, but not enrollment, in course 72 lecture. Introduction to some ways that music, within the religious service, is used to construct a sense of sacredness, of the sacred, and the sacred. Letter grading.

177. Selected Topics in Film and Music. Seminar, two hours. Enforced corequisite: attendance, but not enrollment, in course 77 lecture. In-depth analysis of issues in commercial and critical aspects of music in film. Credit for both courses 77 and M177 not allowed. Letter grading.

CM181. Forensic Musicology. (4) Same as Music Industry M181.) Seminar, three hours. Survey of critical issues and recent developments in field of forensic musicology—how to analyze and authenticate law of music copyright. Instructors include professionals in music industry. Study of fundamentals of music analysis and copyright law, review of current law in music copyright infringement cases from both legal and musicological perspectives, outlining of procedural aspects of copyright, and defining of working relationship between attorney and musicologist. Concurrently scheduled with course C281. Letter grading.

185. Selected Topics in Rock and Roll. (5) Seminar, two hours. Enforced corequisite: attendance, but not enrollment, in course 5 lecture. Intensive discussion in seminar setting of selected topics in rock and roll. Credit for both courses 5 and 185 not allowed. Letter grading.

CM186. Music Industry. (4) Same as Ethnomusicology CM182, Music CM182, and Music Industry M182.) Lecture; four hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influences of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 18th century and continuing through development of recordings, radio, television, and music today. Concurrently scheduled with course CM288. Letter grading.

188. Special Courses in Music History. (4) Lecture, four hours. Special topics in music history for undergraduate students taught on temporary basis. Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to develop USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grade.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to upper-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by faculty mentor. May be applied toward honors credit for eligible students. Honors content noted on transcript. Letter grading.
Graduate Courses

200A. Introduction to Music Scholarship. (6) Seminar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Introduction to history and different methodologies (with strong focus on musicology) and to selected debates in those fields. Practical tools for research, logic and structure of arguments, evidence, critical thinking and critical theory, historiography, voice, and archival and ethnographic research. Introduction to practical written forms such as abstract, grant proposal, paper/book proposal, and review. Letter grading.

200B. Critical, Cultural, and Social Theory. (6) Seminar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Introduction to issues surrounding music as social, cultural, and historical, with special emphasis on critical, cultural, and social theory. May include introduction to social theory, materialist theories of culture, postcolonialist, critical theory, or overview of cultural theory or of group of theories selected by instructor, including feminism, performance studies, sociology, cultural studies, musicology, urban studies, anthropology, philosophy, psychoanalysis, poststructuralism, gender, race, and sexuality studies, lesbian/gay/bisexual/transgender, and queer studies, disability studies, and so on. Introduction to set theory of body in relation to study of music. Letter grading.

200C. Music Industry, Economics, Analysis, and Philosophy. (6) Seminar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Exploration of selected philosophical, aesthetic, and/or analytical perspectives of practices that give insight into selected analytical and philosophical approaches to phenomena of music and to acquire skills in analyzing and interpreting variety of repertoires. Letter grading.

M201. Repertory and Analysis. (2) Seminar, two hours. Requisite or corequisite: course 200A. Exploration of defined repertory through readings and analysis. Specific topics vary. May be repeated for credit. P/NP grading.

245. Seminar: Analytical/Repertoire Topics. (4) Seminar, three hours. Designed for graduate musicology students. Coverage of analytical topics that vary from year to year. May be repeated for credit. Meets with course 246; concurrent enrollment in both courses not allowed. Letter grading.

246. Seminar: Special Topics in Musicology. (4) Seminar, three hours. Exploration of topics in musicology through variety of approaches that may include historical, theoretical, or analytical approaches to subjects within musicology. Topics announced in advance. May be repeated for credit. Letter grading.

250. Seminar: Theoretical Topics. (4) Seminar, three hours. Designed for graduate musicology students. Coverage of theoretical topics that vary from year to year. May be repeated for credit. Meets with course 251; concurrent enrollment in both courses not allowed. Letter grading.

251. Audit Seminar: Theoretical Topics. (2) Seminar, three hours. Requisite or corequisite: course 200A. Specific topics vary from year to year. May not be applied toward MA or PhD degree requirements. May be repeated for credit. Meets with course 255; concurrent enrollment in both courses not allowed. S/U grading.

255. Seminar: Historical Topics. (4) Seminar, three hours. Designed for graduate musicology students. Coverage of historical topics that vary from year to year. May be repeated for credit. Meets with course 256; concurrent enrollment in both courses not allowed. Letter grading.

256. Seminar: Historical Topics. (2) Seminar, three hours. Requisite or corequisite: course 200A. Specific topics vary from year to year. May not be applied toward MA or PhD degree requirements. May be repeated for credit. Meets with course 255; concurrent enrollment in both courses not allowed. S/U grading.

259. Audit Seminar: Mapping Sonic Urban Geography of Los Angeles in 1940s. (2) Seminar, three hours. Limited to departmental graduate students and those in Urban Humanities Certificate Program. Exploration of methodologies and conceptual frameworks for mapping sonic urban geography of Los Angeles in 1940s. In-depth critical discussion of current theories of music and space and of most recently developed methodologies for undertaking ethnographic or anthropological study of sound, including recording and mapping soundscapes. May not be applied toward MA or PhD degree requirements. May be repeated for credit. Meets with course 256; concurrent enrollment in both courses not allowed. S/U grading.

260. Mapping Sonic Urban Geography of Los Angeles in 1940s. (4) Seminar, three hours. Limited to departmental graduate students and those in Urban Humanities Certificate Program. Exploration of methodologies and conceptual frameworks for mapping sonic urban geography of Los Angeles in 1940s. In-depth critical discussion of current theories of music and space and of most recently developed methodologies for undertaking ethnographic or anthropological study of sound, including recording and mapping soundscapes. May not be applied toward MA or PhD degree requirements. May be repeated for credit. Meets with course 260; concurrent enrollment in both courses not allowed. S/U grading.

261. Topics in Performance Practice. (4) Seminar, three hours. Designed for graduate students. Investigation of primary sources of performance practices across history of Western music; analytical reports and practical applications in class demonstrations. May be repeated for credit. Letter grading.

291. Forensic Musicology. (4) Seminar, three hours. Survey of critical issues and recent developments in field of forensic musicology—application of musical analysis to law of music copyright. Instructors include practitioners in music industry underpinning of music analysis and copyright law, review of key music copyright infringement cases from both legal and musicological perspectives, outlining of procedural aspects of copyright case, and defining of working relationship between attorney and musicologist. Concurrently scheduled with course CM181. Letter grading.

CM288. Music Industry. (4) Same as Ethnomusicology CM288 and Music CM282. Lecture, four hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 19th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM186. Letter grading.

291. Teaching Western Musical Canon. (1) Seminar, three hours. Workshop series designed to prepare graduate musicology students to teach Western musical canon at undergraduate level. May be repeated for credit. S/U grading.

296. Research Topics in Musicology. (2 to 4) Seminar, two to four hours. Preparation: consultation with instructor. Designed for grad students in musicology. Specific topics vary from year to year. May be repeated for credit. S/U grading.

296. Research Topics in Ethnomusicology. (2 to 4) Seminar, two to four hours. Preparation: consultation with instructor. Designed for grad students in musicology. Specific topics vary from year to year. May be repeated for credit. S/U grading.
Undergraduate Study
College Program
(Nonscholarship)

Students attending UCLA who meet Navy/Marine Corps requirements but who do not have an NROTC scholarship may enroll in the College Program during their freshman or sophomore year. These students have the opportunity to compete for scholarships. If they do not win a scholarship, or choose not to compete for one, they must compete for advanced standing prior to their junior year. All College Program students receive uniforms, naval science textbooks and, once selected for advanced standing, monthly subsistence pay in their junior and senior years.

Marine Corps Option
Highly motivated NROTC students may request designation as Marine Corps option students and may also pursue any UCLA academic degree. The final summer training, and a requirement to be commissioned as an officer in the Marine Corps, involves intensive Marine training at Officer Candidate School in Quantico, Virginia. Marine Corps option students also participate, on a limited basis, in field training exercises during the academic year.

Naval Science
Lower-Division Courses

Z. Naval Science Laboratory. (No credit) Laboratory, to be arranged. Mandatory for and limited to Naval Science ROTC midshipmen. Provides midshipmen with general military training and practical command and staff leadership experiences through classroom instruction and performance of various tasks and interactive processes within framework of organized midshipmen-run military unit, with oversight by active-duty military staff. As integral part of naval science curriculum, provides professional experiences designed to develop leadership potential and orientation for active duty. No grading.

1A. Introduction to Naval Science. (3) Lecture, three hours. Introduction to organization of Naval Service, various components of Navy, career opportunities, shipboard damage control, fire fighting, Naval and Marine Corps operations, and some customs and traditions of Naval Service. Letter grading.

1B. Naval Ship Systems I. (4) Lecture, four hours. Introduction to naval engineering, with emphasis on steam, nuclear, diesel, and gas turbine propulsion systems and their associated auxiliary components. Basic thermodynamic theory, electrical theory, stability, and buoyancy. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

20A. Naval Ship Systems II. (4) Study of naval weapon systems, with emphasis on infrared, radar, and sonar principles. Target designation and acquisition, methods of solving fire control problem, target detection systems. Analysis of transfer and feedback functions inherent in weapon systems. P/NP or letter grading.

20B. Seapower and Maritime Affairs. (3) Lecture, three hours. Conceptual study of seapower, with emphasis on historical development of naval and commercial power. Seapower examined in relation to economic, political, and cultural strengths, with focus on current abilities of specific nations to use oceans to attain national objectives. P/NP or letter grading.

Naval Science – Naval ROTC / 685
Upper-Division Courses

102B. Naval Leadership and Management. (4) Lecture, four hours. Examination of current and classical leadership and management theories, with emphasis on their application to junior military officer’s role as a leader/manager. Topics include managerial functions, performance appraisal, motivation theories, group dynamics, leadership theories, and communication. P/NP or letter grading.

102C. Leadership and Ethics. (4) Lecture, four hours. Recommended requisite for Naval Science ROTC midshipmen: course 102B. Capstone and second of two core leadership courses that provide academic foundation of NROTC leadership development. Integration of intellectual exploration of Western moral traditions and ethical philosophy with military leadership, core values, professional ethics, Uniform Code of Military Justice, and Navy regulations. Provides midshipmen with basic understanding of major moral traditions, including relativism, utilitarianism, Kantian ethics, natural law theory, divine command theory, and virtue ethics. Letter grading.

103. Evolution of Warfare. (4) Study of evolution of warfare, including historical and comparative consideration of influence that leadership, political, economic, and sociological and technological development factors have had on warfare and influence they continue to exert in age of limited warfare.

104. Fundamentals of Maneuver Warfare. (4) Seminar, four hours. Study of fundamentals of maneuver warfare, with particular emphasis on doctrine, tactics, and equipment used. Examination of topics through study of political and military objectives by focusing on historical examples from Revolutionary War to modern times. Examination of contemporary doctrine through study of recent operations. Letter grading.

197. Individual Studies in Naval Science. (1 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Overview
The department offers instruction in the major modern and ancient languages of the Near East: Akkadian, ancient Egyptian, Arabic, Aramaic, Armenian, Berber, Coptic, Hebrew, Persian, and Turkic. To meet increasing demands for a knowledge of this area and its past and present, it treats each language in a wide perspective—as a means of communication, as a vehicle of a cultural heritage, as a research tool for the area, and as an object of research itself.

Mission
The mission of the department is the discovery, interpretation, dissemination, and preservation of human values created over a period of five or more thousand years in an area that was the cradle of all civilization.

Undergraduate Study
Undergraduate majors may be taken in Ancient Near East and Egyptology, Arabic, Iranian Studies, Jewish Studies, and Middle Eastern Studies. In each of these fields students must meet the requisites and take the courses prescribed. Their adviser assists in selecting a plan of study developed around their interests.

Students may combine their major with one in another department (double major) to enhance their educational opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career and in consultation with program advisers in both majors.

Graduate Study
Master of Arts (MA) and Doctor of Philosophy (PhD) programs are offered in Ancient Near Eastern Civilizations, Arabic, Armenian, Hebrew, Iranian, Islamic Studies, Semitics, and Turkic.

Career Prospects
Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.
Undergraduate Majors

Ancient Near East and Egyptology BA

Study Abroad

Students are encouraged to spend time abroad either to (1) study with an education abroad program or (2) work on a UCLA-affiliated archeological excavation in the broader Middle East. For information on studying abroad, contact the Education Abroad Program, 1332 Murphy Hall, 310-825-4995; for UCLA-affiliated excavations, contact the departmental academic counselor at 310-825-4165.

Learning Outcomes

The Ancient Near East and Egyptology major has the following learning outcomes:

- Demonstrated mastery of the ancient Near East and its history
- Demonstrated skills and expertise, including research, analysis, and writing
- Identification, evaluation, and analysis of historical monuments, time periods, vocabulary, concepts, and historical figures

Entry to the Major

Transfer Students

Transfer applicants to the Ancient Near East and Egyptology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one civilization course on Mesopotamia, Egypt, Near Eastern archaeology, or Middle Eastern cultures.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

The Major

Students must complete 10 courses as follows:

Required Core Courses: One course selected from four of the following five areas (total of four courses):

History: Ancient Near East M103A through M104D, M110A, M110B, M110C, or Jewish Studies M182A.

Required Elective Courses: Any six courses (no more than three may be from Anthropology) selected from the categories above or from Ancient Near East 121A, 121B, 121C, C123A, C123B, 124, 125A, M125B, M125C, 175, C177, M179, Anthropology 110, CM110Q, 111, 112R, 130, M150, English 111A, 111B, 111C, Greek 130, Hebrew 125, 130, 135, 186FL, Study of Religion M186A, M186B, M186C, Semitics 130, 141, 142.

Policies

The Major

No more than two upper-division four-unit independent study or directed research courses (197, 198, 199) may be applied toward the major. Other courses, including extra-departmental courses, may be applied with consent of the adviser.

Iranian Studies BA

Students majoring in Iranian Studies may combine the major with specialization in other fields to enhance their career opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career.

Learning Outcomes

The Iranian Studies major has the following learning outcomes:

- Demonstrated written and oral mastery of Persian language
- Demonstrated specific skills and expertise, including research, analysis, and writing
- Ability to read texts in Persian and analyze the language and cultural context
- Identification, evaluation, and analysis of historical monuments, periods in time, vocabulary, concepts, and historical figures

Entry to the Major

Transfer Students

Transfer applicants to the Iranian Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Persian.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Iranian 1A, 1B, and 1C, or 20A, 20B, and 20C, or equivalent, and Iranian 55 or M60.

The Major

Policies

The Major
A maximum of two Iranian 197 or 199 courses (8 units total) may be applied toward the major.

Jewish Studies BA

Study Abroad
Students are encouraged to spend up to one year in Israel either to (1) study with an education abroad program or (2) study at an Israeli university. For information on studying in Israel, contact the Education Abroad Program, 1332 Murphy Hall, 310-825-4889.

Learning Outcomes
The Jewish Studies major has the following learning outcomes:

- Demonstrated written and oral mastery of the Hebrew language
- Demonstrated specific skills and expertise, including research, analysis, and writing
- Ability to read texts in Hebrew and analyze the language and cultural context
- Identification, evaluation, and analysis of historical monuments, periods in time, vocabulary, concepts, and historical figures

Entry to the Major

Transfer Students
Transfer applicants to the Jewish Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one social, cultural, and religious institution of Judaism course.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major
Required: Jewish Studies M10, one course selected from Ancient Near East 10W, 12W, Jewish Studies M67, M80, M82, Middle Eastern Studies M50A, M50B, M50CW, and demonstrated proficiency equivalent to level 3 at UCLA in one foreign language (Arabic, Amharic, Hebrew) in consultation with the department.

The Major

Policies

The Major
Students are encouraged to take a research tutorial within Jewish Studies 197 or 199. A maximum of two 197 or 199 courses (8 units total) may be applied toward the major.

Middle Eastern Studies BA

Study Abroad
Students are encouraged to spend time abroad either to (1) study with an education abroad program or (2) work on a UCLA-affiliated archaeological excavation in the broader Middle East. For information on studying abroad, contact the Education Abroad Program, 1332 Murphy Hall, 310-825-4889; for UCLA-affiliated excavations, contact the departmental academic counselor at 310-825-4165.

Learning Outcomes
The Middle Eastern Studies major has the following learning outcomes:

- Demonstrated written and oral mastery of a Middle Eastern language
- Demonstrated specific skills and expertise, including research, analysis, and writing
- Identification, evaluation, and analysis of historical monuments, periods in time, vocabulary, concepts, and historical figures

Entry to the Major

Transfer Students
Transfer applicants to the Middle Eastern Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Arabic, Armenian, Hebrew, Persian, Turkish, or another language (Uzbek) 112A, 112B, 112C, Turkic Languages (Turkish) 102A, 102B, 102C, Turkic Languages (Uzbek) 112A, 112B, 112C, Turkic Languages (Azerbaijani) 116A, 116B, 116C.

Policies

The Major
Students may petition to substitute a core or elective course with a department independent study/directed research course (197, 198, or 199) as long as it covers a topic relevant to Middle Eastern studies. No more than two 197, 198, or 199 courses (8 to 10 units) may be applied toward the major.

Undergraduate Minors

Ancient Near East and Egyptology Minor
Admission
To enter the Ancient Near East and Egyptology minor, students must have an overall grade-point average of 2.0 or better and file a petition in 378 Kaplan Hall, 310-825-4165.
The Minor

Required Lower-Division Courses (10 units):

Required Upper-Division Core Courses (12 to 15 units):

Required Elective Courses (8 to 10 units):

Policies

A maximum of 4 graded units of special studies courses (197, 198, 199) approved by the advisor may be applied toward the minor. No course for the minor or preparation for the minor may be taken on a P/NP grading basis.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Armenian Studies Minor

The Armenian Studies minor is designed for students who wish to augment their major program with a group of courses that provide a systematic introduction to the study of Armenian culture.

Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 378 Kaplan Hall.

The Minor

Required Lower-Division Courses (15 units):
Arabic 1A, 1B, 1C, or equivalent.

Required Upper-Division Courses (20 units):
Five courses in Arabic or Islamic studies; 199 courses may not be applied. Courses recommended as electives for the major in Arabic (Anthropology M166Q, Art History 119A, 119B, C120, Comparative Literature 100, History 105A, 105B, 105C, M106, 108B, 111A, 111B, 111C, 130, Political Science 132A, M132B, 157, 165) may be applied.

Policies

With consent of the undergraduate adviser, two of the five courses may be taken outside the department. Other courses may be applied with consent of the adviser.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Hebrew and Jewish Studies Minor

Admission

To enter the Hebrew and Jewish Studies minor, students must have an overall grade-point average of 2.0 or better and file a petition in 378 Kaplan Hall.

The Minor

Required Lower-Division Courses (15 units):
Hebrew 1A, 1B, 1C, or 8, or equivalent.

Required Upper-Division Courses (20 units):
Five courses from the Hebrew or Jewish studies section of the department; 199 courses may not be applied. With consent of the undergraduate adviser and based on course content, two of the five courses may be taken outside the department.

Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Iranian Studies Minor

Admission

To enter the Iranian Studies minor, students must have an overall grade-point average of 2.0 or better and file a petition in 378 Kaplan Hall.

The Minor

Required Lower-Division Courses (10 to 11 units):
Iranian 1C or 20C or equivalent and one course from Iranian 55 or M60.

Required Upper-Division Courses (20 to 23 units):

Policies

Course 199 may not be applied. With consent of the undergraduate adviser, two of the five courses may be taken outside the department. Ordinarily, the following courses may be applied: History 107A through 107E, Indo-European Studies M150.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Israel Studies Minor

The Israel Studies minor is designed for students interested in adding a particular focus on Israel to their major. Comprised of coursework that serves to create a broad introductory foundation of familiarity with Israeli history, society, politics, and culture, the minor is appropriate
Graduate Majors

Islamic Studies MA, CPhil, PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Near Eastern Languages and Cultures MA, CPhil, PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Ancient Near East

See Semitics for Akkadian, Aramaic, Phoenician, Syriac, and Ugaritic courses.

Lower-Division Courses

10W. Jerusalem: Holy City. (5) Lecture; three hours; discussion, one hour. Enforced requisite: English Composition 3. Not open for credit to students with credit for course 12W. Survey of religious, political, and cultural history of Jerusalem over three millennia as symbolic focus of three faiths: Judaism, Christianity, and Islam. Transformation of sacred space as reflected by literary and archaeological evidence through examination of testimony of artifacts, architecture, and iconography in relation to written word. Study of creation of mythic Jerusalem through event and experience. Satisfies Writing II requirement. Letter grading.

12W. Jerusalem: Holy City. (5) Seminar, four hours. Enforced requisite: English Composition 3. Not open for credit to students with credit for course 10W. Survey of religious, political, and cultural history of Jerusalem over three millennia as symbolic focus of three faiths: Judaism, Christianity, and Islam. Transformation of sacred space as reflected by literary and archaeological evidence through examination of testimony of artifacts, architecture, and iconography in relation to written word. Study of creation of mythic Jerusalem through event and experience. Development of advanced writing skills and critical thinking. Satisfies Writing II requirement. Letter grading.

14W. Medicine, Magic, and Science in Ancient Times. (5) Lecture; three hours; discussion, one hour. Requisite: English Composition 3. Overview of history of medicine and sciences, focusing especially on Ancient Near East, China, and Mesopotamia. Satisfies Writing II requirement. Letter grading.

15S. Women and Power in Ancient World. (5) Lecture; four hours; discussion, one hour. Not open for credit to students with credit for course 15W. Examination of how feminine power confronts masculine dominance within complex social systems in ancient world. To gain political power, some female rulers used their sexuality to gain access to important men. Other women gained their position as regents and helpers of masculine kings who were too young to rule. Others
to discipline of history that allow conceptualizing is- sues of diversity and othering in ancient world. P/NP or letter grading.

M60W. Achaemenid Civilization and Empire of Alex- ander. (Same as History M60W and Iranian M60W.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Political and cultural institutions of ancient Egypt and ideas on which they were based. P/NP or letter grading. Consent of instructor required.

M610A. Art and Architecture of Ancient Egypt, New Kingdom to Greco-Roman Period. (See Art History M110A.) Lecture, three hours. Study of architecture, sculpture, painting, and minor arts during Pre-dynastic period and Old Kingdom. May be repeated for credit with consent of instructor. Concurrently scheduled with course C267B. P/NP or letter grading.

M70D. Demons, Fear, and Uncanny in Ancient World. (Same as Religion M70D.) Lecture, three hours; dis- cussion, one hour. Consideration of place of demons and fear in several different societies and cultures in ancient world: Mesopotamia; ancient Egypt, Greece, and Rome; and Biblical and early Jewish contexts. In- vestigation into why demons and monsters exist in these contexts; how they were conceptualized and protected against; and what different societies feared, and how that fear was represented. As demons and mon- sters are reflections of particular culturally specific fears and norms, studying them allows for examination of societies that constructed them. Examination of how fear of threats such as disease, illness, and death were constructed alongside fears of foreign and non-Western others and the ways in which these themes were transmitted across and within a wide range of or- dinary source texts, addressing core question of how different societies construct unique fears—and what fears shape those societies in turn. P/NP or letter grading.

M50A. First Civilizations. (5) (Same as Middle Eastern Studies M50A.) Lecture, three hours; discussion, one hour. Survey of great civilizations of ancient Near East—from Sumer to Con- nection of Prehistory, Old and Middle Kingdom. M103B. New Kingdom and Late period until 332 BC.

M104A. History of Ancient Mesopotamia and Syria. (4) (Same as History M104A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Political and cultural development of Fertile Crescent, including Palestine, from Late Uruk to neo-Babylonian period. P/NP or letter grading.

M50B. Origins of Judaism, Christianity, and Islam. (5) (Same as Middle Eastern Studies M50B and Reli- gion M50B.) Lecture, three hours; discussion, one hour. Examination of three major monotheisms of Western cultures—Judaism, Christianity, and Islam—histori- cally and comparatively. Development, teachings, and ritual practices of each tradition up to and including medieval period. Composition and development of various sacred texts, highlighting key themes and ideas within different historical and literary strata of traditions, such as mechanisms of revelation, struggle for religious authority, and common theological issues such as origin of evil and status of nonbelievers. Letter grading.

M50C. History of Achaemenid Empire. From (same as History M50C and Iranian M50C.) Lecture, three hours; discussion, one hour. Overview of Sumeria and related cultures of Greater Mesopotamia in 4th and 3rd mil- lennium BCE, with focus on rich cultural history of region and integration of archaic and historical, and written records. P/NP or letter grading.
Lecture, three hours. Requisite: 121A-121B-121C. Intermediate Ancient Egyptian Readings. (5–5–5) Lecture, three hours. Requisite: course 120B. Course 120C is requisite to 121B, which is requisite to 122B, which is requisite to 121C. Thematic readings in ancient Egyptian hieratic and literary texts. May be repeated for credit. P/NP or letter grading.

122. Elementary Egyptian: Intensive. (12) Lecture, 10 hours; discussion, 10 hours. Not open to students who have studied ancient Egypt, enough Egyptian to qualify for more advanced courses. Intensive course equivalent to courses 120A, 120B, and 120C. Introduction to hieroglyphic script and phonology and morphology of Middle Egyptian, with emphasis on grammatical forms, reading, and grammar. Offered in summer only. P/NP or letter grading.

123A-123B. Egyptian Archaeology. (5–5) Lecture, three hours. Requisite: course 123A. Introduction to Coptic, final phase of Egyptian language, which is attested in writing from circa 300 to 1400 CE. Concurrently scheduled with courses C223A-C223B. P/NP or letter grading. 123A. Devoted to learning Coptic alphabet, grammar, and vocabulary (Sahidic dialect), with particular emphasis on historical linguistics. 123B. Requisite: course 123A. Introduction to variety of Coptic textual genres, from hagiographies to homilies, exegeses from biblical letters, legal tracts, and Gnostic Gospels found in Nag Hammadi. Readings in texts in dialects other than Sahidic (Bohairic, Fayumic, Akhmimic).

124. Middle Egyptian Technical Literature. (4) Lecture, three hours. Requisite: course 111C. Reading of Middle Egyptian technical literature in hieroglyphic transcription. Medical, veterinary, mathematical, and astronomical texts included. P/NP or letter grading.

125A. Digital Cultural Mapping Core Course A: Place, Time, and Digital World. (4) Lecture, three hours; discussion, one hour. Introduction to how emerging digital mapping technologies like geographic information systems (GIS), virtual globes, and three-dimensional modeling are being utilized as new means of inquiry in the humanities and social sciences. Provides students with critical apparatus needed to reason about cultural and historical use technology in digital cultural mapping projects. Analysis of different forms of visual presentation, with focus on data representation through mapping, reasoning, and critical thinking. Students learn to critically assess map-based presentations. Tracing of history of mapping and spatial representation of place to learn how mapping has always been connected with societal structures, and how the control over access to these maps do not merely represent reality, but also produce reality by structuring world and organizing knowledge about it. Part of Digital Cultural Mapping Project supported by W.M. Keck Foundation. P/NP or letter grading.

125B. Digital Cultural Mapping Core Course B: Google Earth, Geographic Information Systems, Hypertexts, and Timelines. (4) Same as Architecture and Urbanism 142B. Lecture, three hours; discussion, one hour. Enforced requisite: course 125A. Hands-on laboratory-based investigation of emerging digital mapping technologies, including instruction in Web-based mapping applications, virtual globes, and geographic information systems (GIS). Critique and creation of maps of cultural phenomena, applying skills students learned in course 125A to real-world datasets and archaeological scenarios. By mastering emerging technologies in field of digital cultural mapping, students take part in evaluation and production of sophisticated visual representations of complex data, becoming active participants in development of new dataset and neogeography tools. Fostering of creative approaches to and engagement with mapping technologies: What new questions can be asked and answered using these technologies? How does one reason, argue, and solve real-world problems through digital cultural mapping? Design, development, and implementation of student mapping-based research projects. Part of Digital Cultural Mapping Project supported by W.M. Keck Foundation. P/NP or letter grading.

125C. Digital Cultural Mapping Core Course C: Summer Research. (4) Same as Architecture and Urban Design 125C. Lecture, three hours; field research, one hour. Enforced requisite: course 125B or Architecture and Urban Design 125B. Participation in collaborative geographic information systems (GIS) research project in which students use skills learned in courses 125A and 125B. Gathering and input of datasets from real-world sources, creating visual representations of data through production of digital maps, and performing analysis of larger dataset to answer specific research questions. Final oral presentation that details student work and provides critical analysis of source material and technologies. Students are expected to be proficient in type of GIS used for investigation. Part of Digital Cultural Mapping Project supported by W.M. Keck Foundation. Offered in summer only. P/NP or letter grading.

130. Ancient Egyptian Religion. (3) Same as Religion 131B. Lecture, two hours; discussion, one hour. Introduction to religious beliefs, practices, and sentiments of ancient Egypt to study Egyptian religion as coherent system of thought and sphere of action that once served as religious and political foundation of Egypt. Study of religious and political foundation of Egypt through textual evidence and archaeological remains. May be repeated for credit. P/NP or letter grading.

140A. Elementary Sumerian. (4) Lecture, three hours; tutorial, one hour. Introduction to Sumerian, oldest cuneiform language, with examples attested in Mesopotamia from 3rd millennium BCE to 1st century CE. Elementary grammar, syntax, and vocabulary overviewed by Sumerian. Focus on structure of nominal and verbal chain, reading of basic royal inscriptions and other texts. P/NP or letter grading.

140B-140C. Elementary Sumerian. (4–4) Lecture, three hours. Requisite: Semiotics 140A, 140B. Elementary grammar and reading of royal inscriptions, letters, and administrative texts from Ur III period. P/NP or letter grading.

141A. Elementary Akkadian. (4) Same as Semitic Languages 141A. Lecture, three hours. Elementary grammar and reading of texts in standard Babylonian. P/NP or letter grading.

150A. Heroes, Gods, and Monsters: Literature and Epic in Mesopotamia. (5) same as Literature 150A. Lecture, three hours. Survey of literary texts and traditions the ancient Near East, specifically Mesopotamia, from Old Akkadian (circa 2300 BCE) to Neo-Babylonian (circa 600 BCE) period. Texts read in English translation include literary texts, royal inscriptions, incantations, royal and divine hymns, with focus on literary epics, particularly first millennium BCE Epic of Gilgamesh. Discussion of texts, their narratives, and their divine and human actors. Discussion of sociohistorical context for cuneiform (Sumerian and Akkadian) texts and royal, religious, and cultural roles of different texts. P/NP or letter grading.

150B. Survey of Ancient Near Eastern Literatures in English: Egypt. (4) Lecture, three hours. Preparation: familiarity with Egyptian history. Enforced requisite: courses M103A, M103B. Survey of 3,000 years of ancient Egyptian literature. Readings of Egyptian texts in translation to study Egypt's intellectual history and trace transformations in its construction of cultural identity. Topics include invention of writing, autobiographical texts, religious texts, narrative, hymns, and consolations. Discussion of text analysis such as narratology. May be taken independently for credit. P/NP or letter grading.

162. Archaeology, Identity, and Bible. (5) Lecture, three hours; discussion, one hour. Introduction of archaeological record of sources of ancient Israel (from Bronze Age through Achaemenid Period (circa 2500–332 BC) in combination with current understandings of genre, authorship, and historical value of ancient Israel. Ancient Israelite identities are traced through combination of archaeological and textual sources. Social, religious, and political traditions of ancient Israel and Judah are interpreted in context of both eastern Bronze Age traditions and Israel's Iron Age neighbors. Archaeological and textual data for identities, such as Amorites, Canaanites, Phoenicians, Egyptians, Assyrians, and Babylonians, form basis for evaluation of construction and interpretation of various biblical identities. Introduction to theoretical and methodological issues involving historical archaeology of ancient Israel and Levant, and possibilities for investigating identity in archaeological record. P/NP or letter grading.

163. Archaeology of Iran. (4) Same as Iranian Literature 163. Lecture, three hours. Designed to introduce students to Iranian archaeology from prehistoric through Achaemenid periods. Concurrently scheduled with course CM259. P/NP or letter grading.

164. Archaeology of Levant. (4) Lecture, three hours. Survey of archaeology of Levant from late fifth millennium BCE to Neo-Babylonian Period (circa 4500–332 BC). Examination of social, economic, political, and cultural developments through archaeological finds from geographic region bounded by Anatolia and Mesopotamia on north, Egypt to south, and Arabian Peninsula to east. Archaeological methods, theory, and practice are addressed; and geographic, environmental, climatological, and textual data are employed to establish broader context for Levantine history. P/NP or letter grading.

165. Egyptian Archaeology. (4) Lecture, three hours. Seminar. Three hours. Opportunity to research aspects of topics in ancient Egyptian archaeology. Topics vary each year. May be repeated for credit. Concurrently scheduled with course C265. P/NP or letter grading.

166. Art and Death in Ancient Egypt. (4) (Formerly numbered 166) Same as Art History M110D.) Lecture, four hours. Ways of death, burial, funerary ritual, and afterlife beliefs in ancient Egypt, as well as in ancient Near East and Nubia, with focus on ancient visual materials—both objects and architecture—from Predynastic to Roman periods. P/NP or letter grading.

167. Magic in Ancient World. (4) Same as Classics M167.) Lecture, three hours; discussion, one hour (when scheduled). Requisite: Classics 10 or 20. Exploration of art of influencing natural course of events by occult means as practiced in ancient world at large. Coverage of beliefs in supernatural forces, rites aimed at controlling these forces effectively, and character
and social roles of ritual experts in various cultures of ancient world. Source material includes types of magi-
ical spells, literary texts about magic and magicians, and arts such as amulets and ritual implements. P/NP or letter grading.

M168A. Introductory Hittite. (Formerly numbered M168B.) (Same as Indo-European Studies M168A.) Lecture, three hours. Recommended preparation: knowledge of language with case system. Introduction to Hittite grammar by series of graded lessons covering morphology and syntax, followed by readings of selected texts from variety of genres. P/NP or letter grading.

M168B. Introductory Hittite. (Same as Indo-European Studies M168B.) Lecture, three hours. Recommended requisite: course M168A. Readings of selected Hittite texts from variety of genres and historical periods. Individual topics in synchronic and historical grammar of Hittite and in history and culture of Hittites are treated in detail. P/NP or letter grading.

CM169. Introduction to Archaeological Sciences. (4) (Same as Anthropology CM110Q.) Lecture, three hours. Majors in archaeology are treated in detail. P/NP or letter grading.

M170. Bible and Its Interpreters. (4) (Same as Religion M172.) Lecture, three hours. Knowledge of original languages not required. Bible (Old and New Testaments) as book, canon, text, and versions, Linguistic, literary, historical, and religious approaches to Bible study, Survey of history of interpretation from antiquity to present. P/NP or letter grading.

M172. Elementary Luwian. (4) (Same as Indo-European Studies M172.) Lecture, three hours. Recommended preparation: knowledge of language with case system. Introduction to Luwian grammar through lectures covering morphology and syntax, and readings of selected hieroglyphic and cuneiform texts. P/NP or letter grading.

175. Conceptions of Race in Ancient Egypt. (4) Lecture, three hours; discussion, one hour. Exploration of how racial hierarchies are created and maintained within ancient Egyptian culture. The notion that all of ancient Egyptians is still at stake and tied to larger issues of racial and ethnic inequalities, prejudices, and oppression. Examination of modern issues invites comparison with conception of race in ancient Egypt, and which was not necessarily equivalent to our own. By consulting diverse group perspectives, including those of early scholars, contemporary anthropologists, Afrocentrist scholars and artists, Hebrew Bible, ancient Egyptian evidence, and ancient Nubian evidence, conception of race is revealed to be complex, fluid, and contradictory. These conceptions were and are used to construct variety of equally contradictory hierarchies. Often based on same evidence. P/NP or letter grading.

C177. Variable Topics in Ancient Near East. (4) Lecture, three hours; discussion, one hour. Variable topics; subject, schedule, and classes for topics to be offered in specific term. Concurrently scheduled with course C277. P/NP or letter grading.

M179. Cultural Heritage and Identity Representation: Creating Fowler and Virtual Exhibit. (4) (Same as Art History M179.) Lecture, three hours; course and laboratory, one hour. Exploration of what it takes to run museum and create exhibit. Introduction to different types of museum work, ranging from collecting and curation, to research, conservation, presentation, visitor experience, and management. Students jointly create exhibit based on Fowler Museum collection. Students research and discuss context and different stakeholders that relate to current project; consider representation. Consideration of narrative exhibit and how objects and their arrangement convey deliberate or accidental messages. Consideration of audiences as well as original context of each object. Focus on people behind objects, technologies, or material characteristics. P/NP or letter grading.

M185D. Religions of Ancient Near East. (4) (Same as History M185D and Religious Studies M185D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Main polytheistic systems of ancient Near East, with emphasis on Mesopotamia and Syria and with reference to religion of ancient Israel: varying concepts of divinity, hierarchies of gods, prayer and cult, magics, wisdom, and moral conduct. P/NP or letter grading.

186. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with course lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

197. Individual Studies in Ancient Near East. (2 to 4) Tutorial, one hour. Enrolled with departmental consent. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Ancient Near East. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under preceptor. Only a paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M201. Archaeological Research Design. (4) (Same as Anthropology M201C and Archaeology M201C.) Seminar, two hours; research group meeting, one hour. Preparation for original research. It would form basis for extensive paper, grant application, or oral examination. Students work closely with faculty members and report weekly on their progress. Preparation of at least two oral presentations. It will be on theoretical framework and one on practical aspects of project. Final written research design that incorporates theoretical and practical aspects of research and formulates argument, may be repeated for credit. S/U or letter grading.

M208. Topics in Ancient Iranian History. (4) (Same as History M210 and Iranian M210.) Seminar, three hours. Varying topics on Elamite, Achaemenid, Arsacid, and Sassanian history. May be repeated for credit. S/U or letter grading.

210. Late Egyptian. (4) Lecture, three hours. Required: courses 121A, 121B, 121C. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. May be repeated for credit. S/U or letter grading.

215. Readings in Middle Kingdom Literature. (4) Seminar, three hours. Enforced requirement: courses 120A, 120B, 120C. Survey of Middle Kingdom literature through close readings of texts in original language and evaluation of current scholarship on these texts. Students hone their knowledge of Middle Egyptian grammar and become familiar with philological methods in study of Egyptian literature. S/U or letter grading.

220. Seminar: Ancient Egypt. (4) Seminar, three hours. Majors in Art History 210 or Art History 211 required. Letter grading.

221A-221B. Demotic. (4–4) Lecture, three hours. Required course 121C. Course 221A is requisite to 221B. Introduction to Demotic grammar and orthography. Reading of texts from various genres. May be repeated for credit with topic change. S/U or letter grading.

C223A-C223B. Coptic. (5–5) Lecture, three hours. Introduction to Coptic, final phase of Egyptian language, which is attested in writing from circa 300 to 1400 CE. Concepts covered in scheduled course are C223A-C223B. S/U or letter grading. C223A. Devoted to learning Coptic alphabet, grammar, and vocabulary (Sahidic dialect), with particular emphasis on historical linguistics. S223B. Required: course C223A. Introduction to variety of Coptic textual genres, from hagiographies to homilies, magical spells, private letters, legal contracts, and Gnostic Gospels found in Nag Hammadi. Readings in texts in dialects other than Sahidic (Boharic, Fayumic, Akhmimic).

230. Seminar: Ancient Syria/Palestine. (4) Seminar, three hours. Examination of selected topics on political, social, and intellectual history of ancient Israel. Exploration of how historical, social, and political contexts shaped and influenced interpretation and use of biblical texts. May be repeated for credit. S/U or letter grading.

240A-240B-240C. Seminars: Sumerian Language and Literature. (4–4–4) Seminar, two hours. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis and literary history. S/U or letter grading.

CM259. Archaeology of Iran. (4) (Same as Iranian CM259.) Lecture, three hours. Designed to introduce students to Iranian archaeology from prehistoric through Achaemenid times. Concurrently scheduled with course CM165. S/U or letter grading.

260. Seminar: Ancient Near Eastern Archaeology. (2 to 4) Seminar, two hours. May be repeated for credit. S/U or letter grading.

261. Practical Field Archaeology. (2 to 8) Fieldwork, two hours. Participation in archaeological excavations or other archaeological research in Near East under staff supervision. May be repeated for credit. S/U or letter grading.

262. Seminar: Object Archaeology. (4) Seminar, two hours; fieldwork, one hour. Examination in analysis and interpretation of Near Eastern archaeological finds in museum collections. Students work with objects in Heerannak Collections of Los Angeles County Museum of Art (S). S/U or letter grading.

263. Seminar: Egyptian Monuments. (4) Seminar, two hours. Selected monuments and sites in Egypt, including Delta, Nile Valley, desert sites, wadis, oases, and border regions. Architecture and decoration of temples and tombs, statuary and monuments, settlement and use history, text translation of appropriate documents, including stele, monumental inscriptions, or pertinent socioeconomic texts. May be repeated. S/U or letter grading.

264. Egyptian Museum Collections. (4) Seminar, two hours; research group meeting, one hour. Ancient Egyptian museum collections around world, data sets, provenance and dating studies, collection history and agenda, museology, and exhibition history. May be repeated for credit with consent of instructor. S/U or letter grading.

M265. Depositional History and Stratigraphic Analysis. (4) (Same as Archaeology M265.) Lecture, two hours. Theoretical understanding of depositional processes ("laws") which lead to site formation and of stratigraphic procedures to be used in recovery of buried materials. Study of issues covered in literature, with specific test cases from actual excavations and site reports. Coverage of theoretical implications of such disciplines as surveying and pedology with help of specialists. S/U or letter grading.

Near Eastern Languages and Cultures / 693
19. Flat Lux Fresherman Seminars. (Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members. Participation in seminars involving many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth than 102A, 102B, 102C and other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

98HC. Honors Contracts. (Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics of potential interest. Additional readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students develop a research topic and academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

102A-102B-102C. Intermediate Standard Arabic. (4-4-4) Lecture, four hours. Enrolled required: course 1C or 8. Course 102A is requisite to 102B, which is requisite to 102C. Not open to students who have learned, from whatever source, enough Arabic to qualify for more advanced courses. Intermediate formal Arabic, including listening, speaking, reading, and writing. P/NP or letter grading.

103A. Advanced Arabic. (4) Lecture, four hours. Enrolled required: courses 102A, 102B, 102C. Not open to students who have learned, from whatever source, enough Arabic to qualify for more advanced courses. Advanced formal Arabic, including grammar, composition, and readings from classical and modern texts. P/NP or letter grading.

103B. Advanced Arabic. (4) Lecture, four hours. Enrolled required: courses 102A, 102B, 102C. Not open to students who have learned, from whatever source, enough Arabic to qualify for more advanced courses. Advanced formal Arabic, including grammar, composition, and readings from classical and modern texts. P/NP or letter grading.

103C. Advanced Arabic. (4) Lecture, two and one half hours. Enrolled required: courses 1C or 102B. 102C. Not open to students who have learned, from whatever source, enough Arabic to qualify for more advanced courses. Advanced formal Arabic, including grammar, composition, and readings from classical and modern texts. P/NP or letter grading.

105. Introduction to Qur’anic and Islamic Arabic. (4) Lecture, three hours. Requisites: courses 1A, 1B, 1C. Introduction to Arabic used in Qur’an, Hadith (traditions of Prophet Muhammad’s companions) and early Islamic literature (biographies of Prophet and historical narratives). P/NP or letter grading.

106. Qur’an. (4) Formerly numbered M106. Lecture, three hours. Introduction to Quran, its early history, and form and function as scripture in Muslim history, civilization, and culture. Focus also on Qur’anic interpretation, its relationship to Islamic thought. In contemporary discussions such as human rights, feminism, and contemporary reform movements. Primary sources include excerpts from Qur’an, Qur’anic interpretation, and selected writings of Muslim thinkers and reformists. Strong focus on analytical and writing skills through in-class assignments and discussion. Concurrently scheduled with course C206. Letter grading.

107. Islam in West. (5) Same as Islamic Studies CM107 and Religion M107. Lecture, three hours. Discussion, one hour. Acquisition of understanding of basic doctrines and practices of Islam. Survey of history of Islam in West, with focus on U.S. and France. Analysis of issues relevant to growth and development of new religious Muslim communities (e.g., Muslims of African descent) in diverse expressions of Islam through independent research on Muslim communities and institutions in U.S. Development of strong analytical writing and speaking skills. P/NP or letter grading.

108. Summer Intensive Intermediate Arabic. (12) Lecture, and discussion, 20 hours. Enrolled requisite: course 1C. Not open to students who have learned, from whatever source, enough Arabic to qualify for more advanced courses. Necessary for completion to courses 102A, 102B, and 102C. Intermediate formal Arabic, including listening, speaking, reading, and writing. Offered in summer only. P/NP or letter grading.

M101. One Thousand and One Nights/All Layla Wa-Layla. (4) Same as Comparative Literature M110. Lecture, three hours. Knowledge of Arabic not required. Since its appearance in Europe in 1704, One Thousand and One Nights is most well-known work of Arabic literature in West. Examination of cycle of tales more commonly known as Arabian Nights, including history of its translation, contemporary oral performances of tales in Arabic literature, literary emergence of vernacular language in relation to classical Arabic, and Western appropriations of tales in music, film, and novels (Ravel, Rimsky-Korsakov, Sartre, Pinter, and Walt Disney). May be applied toward honors credit. P/NP or letter grading.

111S. Summer Intensive Elementary Egyptian Arabic. (4-4-4) Lecture, three hours. Knowledge of Arabic not required. Taught in Egyptian colloquial Arabic for heritage speakers or students who have completed courses 1A, 1B, 1C. P/NP or letter grading.

115. Studies in Arabic A dialectology. (4) Lecture, three hours. Introduction to one spoken dialect of Arabic, with emphasis on speaking and listening comprehension. Dialects vary from year to year based on student interest and instructor availability and may include Iraqi Arabic, Levantine, North Africans, or Gulf Arabic. May be repeated for credit. P/NP or letter grading.

112A-112B-112C. Advanced Spoken Egyptian Arabic. (4-4-4) Lecture, three hours. Knowledge of Arabic not required; not suitable for heritage speakers. Advanced Spoken Egyptian colloquial Arabic for heritage speakers or students who have completed courses 1A, 1B, 1C. P/NP or letter grading.

120. Islamic Texts. (4) Lecture, four hours. Requisite: course 103C. Readings from Qur’an, Tafsir, Hadith, Fiqh. May be repeated for credit. Offered in Arabic and English. P/NP or letter grading.

130. Classical Arabic Texts. (4) Lecture, four hours. Requisite: course 103B. Introduction to premodern literary texts, with grammatical and syntactical analysis. May be repeated for credit. Letter grading.

140. Readings in Modern Standard Arabic. (4) Lecture, four hours. Requisite: course 103A, or consent of instructor. Development of reading, speaking, and
writing abilities in modern standard Arabic, as well as
cultural knowledge, through film screenings,
discussions, written compositions, verbal presentations, and
reading and translation exercises from Arabic-speaking
world. Prepares students for more advanced literary
Arabic courses. P/NP or letter grading.

C141. Modern Arabic Literature. (4) Lecture, three
hours. Requisite: course 102C. Conducted in English and
Arabic to study major works of modern status Arabic
literature of all Arab countries. Coverage of various
genres, periods, and themes in Arabic literature. May be
repeated for credit. S/U or letter grading.

M231. Texts in Judeo-Arabic. (4) (Same as Hebrew
M148.) Lecture, three hours. Requisite: course 102C.
Hebrew 102C. Reading of Judeo-Arabic texts by Mai-
monides (medieval religion, medicine, philosophy) and
more recent texts in Judeo-Arabic dialects of Iraq and
Egypt, with discussion of grammar and deviations
from norms of classical Arabic. S/U or letter grading.

240A. Seminar: Arab Historians. (4) Seminar, three
hours. Introduction to very large body of literature on
medieval Islamic history. Selected readings in Arabic
that represent cross-section of Islamic historical writ-
ings, including Ibn Ishaq’s Sirat, Wajidji’s Maghazhi,
Baladurhi’s Futuh, Tabari’s Tarikh, digest of Ya’qubi
and Mas’udi, Ibn Khalidun’s Muqaddima, and Maghrizi’s
topography. Historians studied either to determine
their reliability as sources or their view of history and
its theoretical foundations. Exploration of sources,
search tools, and problems in Islamic history. May be
repeated for credit. S/U or letter grading.

240B. Seminar: Arab Geographers. (4) Seminar, three
hours. Introduction to large body of literature on medi-
 eval Islamic geographers. Selected readings in Arabic
that represent cross-section of Islamic geographical
writings distributed over number of disciplines and
various aspects of geography, such as Surat al-ard,
Kitab al-Buldun, al-Masalik wal-mamalk, topography,
and travel accounts. May be repeated for credit. S/U
or letter grading.

C241. Modern Arabic Literature. (4) Lecture,
three hours. Requisite: course 102C. Conducted in
English and Arabic, with all required readings in orig-
inal Arabic only. Readings in modern Arabic literature,
variably organized across or around particular trends,
genres, topics, canonical authors, regional, or national
literatures, mixing thematic and formal analyses of lit-
erature and critical texts in German, English, and
Arabic. May be repeated for credit. S/U or letter grading.

C145. Arabic Media. (4) Lecture, four hours. Requisite:
course 103A. Development of facility with language of
Arabic press and broadcasting. Activities include
monitoring current materials via Internet; transcribing,
translating, and summarizing; writing original reports
in Arabic; and oral presentations and discussions.
May be repeated for credit. P/NP or letter grading.

M148. Contemporary Arab Film and Song. (4)
(Same as Comparative Literature M148.) Seminar, three
hours. Lectures and discussion of world cinema,]
most of which are in Arabic. Focus on films and
song that represent cross-section of Islamic historical
writings, including Ibn Ishaq’s Sirat, Wajidji’s Maghazhi,
Baladurhi’s Futuh, Tabari’s Tarikh, digest of Ya’qubi
and Mas’udi, Ibn Khalidun’s Muqaddima, and Maghrizi’s
topography. Historians studied either to determine
their reliability as sources or their view of history and
its theoretical foundations. Exploration of sources,
search tools, and problems in Islamic history. May be
repeated for credit. S/U or letter grading.

240A. Seminar: Arab Historians. (4) Seminar, three
hours. Introduction to very large body of literature on
medieval Islamic history. Selected readings in Arabic
that represent cross-section of Islamic historical writ-
ings, including Ibn Ishaq’s Sirat, Wajidji’s Maghazhi,
Baladurhi’s Futuh, Tabari’s Tarikh, digest of Ya’qubi
and Mas’udi, Ibn Khalidun’s Muqaddima, and Maghrizi’s
topography. Historians studied either to determine
their reliability as sources or their view of history and
its theoretical foundations. Exploration of sources,
search tools, and problems in Islamic history. May be
repeated for credit. S/U or letter grading.

240B. Seminar: Arab Geographers. (4) Seminar, three
hours. Introduction to large body of literature on medi-
 eval Islamic geographers. Selected readings in Arabic
that represent cross-section of Islamic geographical
writings distributed over number of disciplines and
various aspects of geography, such as Surat al-ard,
Kitab al-Buldun, al-Masalik wal-mamalk, topography,
and travel accounts. May be repeated for credit. S/U
or letter grading.

C241. Modern Arabic Literature. (4) Lecture,
three hours. Requisite: course 102C. Conducted in
English and Arabic, with all required readings in orig-
inal Arabic only. Readings in modern Arabic literature,
variably organized across or around particular trends,
genres, topics, canonical authors, regional, or national
literatures, mixing thematic and formal analyses of lit-
erature and critical texts in German, English, and
Arabic. May be repeated for credit. S/U or letter grading.

C245. Arabic Media. (4) Lecture, four hours. Requisite:
course 103A. Development of facility with language of
Arabic press and broadcasting. Activities include
monitoring current materials via Internet; transcribing,
translating, and summarizing; writing original reports
in Arabic; and oral presentations and discussions.
May be repeated for credit. P/NP or letter grading.

C141. Modern Arabic Literature. (4) Lecture, three
hours. Requisite: course 102C. Conducted in English and
Arabic to study major works of modern status Arabic
literature of all Arab countries. Coverage of various
genres, periods, and themes in Arabic literature. May be
repeated for credit. S/U or letter grading.

M231. Texts in Judeo-Arabic. (4) (Same as Hebrew
M148.) Lecture, three hours. Requisite: course 102C.
Hebrew 102C. Reading of Judeo-Arabic texts by Mai-
monides (medieval religion, medicine, philosophy) and
more recent texts in Judeo-Arabic dialects of Iraq and
Egypt, with discussion of grammar and deviations
from norms of classical Arabic. S/U or letter grading.

240A. Seminar: Arab Historians. (4) Seminar, three
hours. Introduction to very large body of literature on
medieval Islamic history. Selected readings in Arabic
that represent cross-section of Islamic historical writ-
ings, including Ibn Ishaq’s Sirat, Wajidji’s Maghazhi,
Baladurhi’s Futuh, Tabari’s Tarikh, digest of Ya’qubi
and Mas’udi, Ibn Khalidun’s Muqaddima, and Maghrizi’s
topography. Historians studied either to determine
their reliability as sources or their view of history and
its theoretical foundations. Exploration of sources,
search tools, and problems in Islamic history. May be
repeated for credit. S/U or letter grading.

240B. Seminar: Arab Geographers. (4) Seminar, three
hours. Introduction to large body of literature on medi-
 eval Islamic geographers. Selected readings in Arabic
that represent cross-section of Islamic geographical
writings distributed over number of disciplines and
various aspects of geography, such as Surat al-ard,
Kitab al-Buldun, al-Masalik wal-mamalk, topography,
and travel accounts. May be repeated for credit. S/U
or letter grading.

C241. Modern Arabic Literature. (4) Lecture,
three hours. Requisite: course 102C. Conducted in
English and Arabic, with all required readings in orig-
inal Arabic only. Readings in modern Arabic literature,
variably organized across or around particular trends,
genres, topics, canonical authors, regional, or national
literatures, mixing thematic and formal analyses of lit-
erature and critical texts in German, English, and
Arabic. May be repeated for credit. S/U or letter grading.

C245. Arabic Media. (4) Lecture, four hours. Requisite:
course 103A. Development of facility with language of
Arabic press and broadcasting. Activities include
monitoring current materials via Internet; transcribing,
translating, and summarizing; writing original reports
in Arabic; and oral presentations and discussions.
May be repeated for credit. P/NP or letter grading.
19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through readings, discussions, and other activities. Credit by permit of the instructor. May be repeated for credit.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honor content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

101A-101B-101C. Elementary Modern Western Armenian. (5-5-5) Lecture, five hours. Course 101A is recommended requisite to 101C. Students with knowledge of Armenian should contact instructor to determine appropriate enrollment level. Armenian grammar, conversation, and exercises. P/NP or letter grading.

102A-102B-102C. Intermediate Modern Western Armenian. (5-5-5) Lecture, five hours. Recommended requisite: course 1C. Students with knowledge of Eastern or Western Armenian (from elementary or high school) should contact instructor to determine appropriate enrollment level. Reading of selected texts, composition, and conversation. Each course may be taken independently for credit. P/NP or letter grading.

151. Armenian Literature and Canon Formation. (4) Lecture, four hours. Discussion of fundamental themes and genres around which Armenian literary tradition evolved and modalities by which this has been transformed in course of last two centuries as result of exposure to European thought and expressive forms. Concurrently scheduled with course C251. P/NP or letter grading.

152. Modern Armenian Drama as Vehicle for Social Critique. (4) Lecture, four hours. Readings of selected plays from 1860s to 1930s and main genres of tragedy, comedy, and serious drama and featuring works by most significant Armenian playwrights, with focus on their role as commentators on contemporary mores and as agents for social reform. Concurrently scheduled with course C252. Letter grading.

153. Art, Politics, and Nationalism in Modern Armenian Literature. (4) Lecture, four hours. Examina- tion of role of literature in construction of Armenian society in service to cause or causes, as propaganda for various ideologies, as art for art’s sake, etc. Exploration of contrasting aesthetics implicit in these differing interpretations. Concurrently scheduled with course C253. P/NP or letter grading.

Variable Topics in Armenian Studies. (4–4) Lecture, three hours. Requisite: course 1C or 4C. Overview of process behind creation of range and variety of poetic expression that developed in new literary formats and genres from late 18th to early 20th centuries. Special attention to crafting of central images and toaya and their development. Concurrently scheduled with course letter grading.

M176. Armenian Film and Culture. (5) Lecture, six hours. Requisite: course 1C or 4C. Overview of process behind creation of range and variety of poetic expression that developed in new literary formats and genres from late 18th to early 20th centuries. Special attention to crafting of central images and toaya and their development. Concurrently scheduled with course letter grading.

Armenian Poetry, 1880 to 1930. (4) Lecture, three hours. Requisite: course 1C or 4C. Overview of process behind creation of range and variety of poetic expression that developed in new literary formats and genres from late 18th to early 20th centuries. Special attention to crafting of central images and toaya and their development. Concurrently scheduled with course letter grading.

170. Armenian Poetry, 1880 to 1930. (4) Lecture, three hours. Requisite: course 1C or 4C. Overview of process behind creation of range and variety of poetic expression that developed in new literary formats and genres from late 18th to early 20th centuries. Special attention to crafting of central images and toaya and their development. Concurrently scheduled with course letter grading.

M172. Medieval Armenian Art. (4) (Same as Art History M118A.) Lecture, three hours. Overview of development of modern Armenian painting and sculpture out of its matrix in 17th and 18th centuries. P/NP or letter grading.

173. Armenian Painting, 17th to 20th Century. (4) (Same as Art History M118B.) Lecture, three hours. Overview of development of modern Armenian painting and sculpture out of its matrix in 17th and 18th centuries. P/NP or letter grading.

Variable Topics in Armenian. (4) Lecture, four hours. Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit with topic change. P/NP or letter grading.

Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Independent study with lecture course instructor. May be repeated for credit. Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP or letter grading.

180. Armenian Film and Culture. (5) Lecture, six hours. Requisite: course 1C or 4C. Overview of process behind creation of range and variety of poetic expression that developed in new literary formats and genres from late 18th to early 20th centuries. Special attention to crafting of central images and toaya and their development. Concurrently scheduled with course letter grading.

C224. Art, Politics, and Nationalism in Modern Armenian Literature. (4) Lecture, four hours. Examination of role of literature in modern Armenian society in service to cause or causes, as propaganda for various ideologies, as art for art’s sake, etc. Exploration of contrasting aesthetics implicit in these differing interpretations. Concurrently scheduled with course C151. S/U or letter grading.

C225. Issues in Armenian American Literature and Culture. (4, 2) Lecture, four hours. Preparation: reading knowledge of modern Eastern and Western Armenian. Theoretically informed exploration of some of most salient questions related to Armenian American community as reflected in its literature and other cultural artifacts in interaction with its pluralistic American ambience. Concurrently scheduled with course C155. P/NP or letter grading.

C226. 17th to 20th Century. (4) Lecture, three hours. Requisite: course 1C or 4C. Overview of development of modern Armenian painting and sculpture out of its matrix in 17th and 18th centuries. P/NP or letter grading.

M173. Armenian Painting, 17th to 20th Century. (4) (Same as Art History M118B.) Lecture, three hours. Overview of development of modern Armenian painting and sculpture out of its matrix in 17th and 18th centuries. P/NP or letter grading.

Armenian Film and Culture. (5) Lecture, six hours. Requisite: course 1C or 4C. Overview of development of modern Armenian painting and sculpture out of its matrix in 17th and 18th centuries. P/NP or letter grading.

Directed Research or Senior Project in Armenian Literature. (1) Seminar, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and a course paper or term paper. Individual contract required. P/NP or letter grading.

Directed Research or Senior Project in Armenian. (2 to 4) Seminar, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP or letter grading.

Upper-Division Courses

102A-102B-102C. Intermediate Hebrew. (5–5–5) Lecture, five hours. Enforced requisite: course 1C or Hebrew placement test. Course 102A is enforced requisite to 102B, which is enforced requisite to 102C. Not open to native speakers. Amplification of grammar; reading of texts from modern literature. P/NP or letter grading.

103A-103B-103C. Advanced Hebrew. (4–4–4) Lecture, five hours. Enforced requisites: courses 102A, 102B, and 102C, or Hebrew placement test. Students with prior knowledge of Hebrew who did not take courses 102A, 102B, and 102C should contact instructor to determine appropriate enrollment level. Not open to native speakers. Designed for students with intermediate speaking fluency and reading abilities in Hebrew. Introduction to modern Hebrew literary texts. P/NP or letter grading.

110C. Readings in Biblical Hebrew. (4) Lecture, three hours. Vocabulary, phonology, morphology, and structure of biblical Hebrew. Introduction to certain aspects of historical grammar of biblical Hebrew. Reading and translation of variety of texts from different historical periods of Hebrew language, including texts from Aramaic, Standard, and Late periods. Increased understanding of Hebrew biblical system, including different verbal patterns, their morphology, and syntactic function in biblical Hebrew prose. P/NP or letter grading.

111A. Israel Society through Hebrew Song and Video. (4) Lecture, three hours; laboratory, one hour. Requisite: course 1C. Use of contemporary Israeli song and video to explore Israeli collective imagination and various Israeli sociocultural issues to familiarize students with different aspects of Israeli daily life and popular culture, while the songtext and video to explore Israeli collective imagination and various Israeli sociocultural issues using different kinds of media, such as video, Internet, and newspapers. P/NP or letter grading.

Near Eastern Languages and Cultures / 697
112. Readings in Modern Scholarly Hebrew. (2) Seminar, two hours. Requisite: course 102C. In-depth reading and discussion of selected scholarly articles in modern Hebrew disciplines. Bible study, Jewish history and folklore, sociology, and literary criticism. Development of student proficiency in vocabulary, terminology, and ideas in these fields while enhancing comprehension of complex syntactical structures in Hebrew. May be repeated for credit. P/N/P or letter grading.

M113. Contemporary Israeli Short Stories/Novellas and Films in English. (5) Same as Jewish Studies M113.) Lecture, two hours. Exploration of Israeli short stories/novellas and films (translated into English) written since mid-1980s that use, each to varying degree, postmodernist techniques to undermine predominate of modernist-Zionist narrative. Recycling and reexamination of Israeli condition and Zionist condition and skepticism about legitimacy of meta-narratives to redefine blurred outline of Israeli identity and subvert its underpinning formations. They simultaneously display loss of faith in representative dimension of language, including ability of texts to penetrate to its hidden meaning. Using periphery discourses, these texts strive to change modernist aesthetic and power paradigm. P/N/P or letter grading.

125. Hebrew Bible with Medieval Commentaries. (4) Lecture, three hours. Requisite: course 103C. Hebrew Bible with commentaries of Rashi, Ibn Ezra, and/or Nahmanides. May be repeated for maximum of 16 units. Letter grading.

130. Rabbinic Texts. (4) Lecture, three hours. Requisites: courses 103A, 103B, 103C. Readings in Mishnah, Talmud, and/or Midrash. May be repeated for maximum of 16 units. Letter grading.

135. Medieval Hebrew Texts. (4) Lecture, three hours. Requisites: courses 103A, 103B, 103C. Readings in medieval Hebrew prose and poetry. May be repeated for maximum of 16 units. P/N/P or letter grading.

C140. Modern Hebrew Poetry and Prose. (4) Lecture, three hours. Requisites: courses 103A, 103B, and 103C, or equivalent knowledge of Hebrew. Study of major Hebrew writers of past 100 years. May be repeated for credit. Concurrently scheduled with course C240. Letter grading.

170. Dead Sea Scrolls. (4) Lecture, three hours. Requisite: course 110C. Readings in Hebrew scrolls from Dead Sea caves; description of Scrolls with emphasis on literary, biblical interpretation in Dead Sea Scrolls. May be repeated for credit. P/N/P or letter grading.

180A-180B. Survey of Hebrew Grammar. (4–4) Lecture, three hours. Requisites: courses 102A, 102B, 102C. Descriptive and comparative study of Hebrew grammar: phonology and morphology. Topics include development of Hebrew language from biblical times to present day, its relation to Arabic and other Semitic languages, methods of language expansion in ancient Israel, traditional pronunciation of Hebrew by various Jewish communities, Hebrew contribution to other Jewish languages (Yiddish, Ladino, Judeo-Arabic), P/N/P or letter grading.

188FL. Special Studies: Readings in Hebrew. (2) Seminar, two hours. Requisite: course 102C. Students must be concurrently enrolled in an affiliated main course. Supplementary readings and advanced training in Hebrew, additional work in Hebrew to enrich and augment work assigned in main course, including reading, writing, and other exercises in Hebrew. P/N/P or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other adequate coursework. Instructor may be applied toward honors credit for eligible students. Honors credit noted on transcript. P/N/P or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual student may explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

197. Individual Studies in Hebrew. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/N/P or letter grading.

199. Directed Research or Senior Project in Hebrew. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Intensive individual research or investigation under guidance of faculty mentor. Culuming paper or project required. May be repeated for credit. Individual contract required. P/N/P or letter grading.

Graduate Courses

225. Studies in Dead Sea Scrolls. (2 or 4) Seminar, three hours. Requisite: course 120. Critical study of Dead Sea Scrolls, with attention to history of biblical interpretation and Hebrew Semantics in formationative Judaism. Reading in original manuscripts from Dead Sea Scrolls. May be repeated for credit. S/U or letter grading.

230. Rabbinic Hebrew Literature. (4) Seminar, three hours. May be repeated for credit. S/U or letter grading.

M231. Texts in Judeo-Arabic. (4) Same as Arabic M231.) Lecture, three hours. Requisites: course 102C, 103C, or equivalent knowledge of Hebrew. Study of Medieval Arabic texts by Malmonides (medieval religion, medicine, philosophy) and more recent texts in Judeo-Arabic dialects of Iraq and Egypt, with discussion of grammar and deviations from classical Arabic. S/U or letter grading.

235. Hebrew Literature of Second Temple Period. (4) Seminar, three hours. Designed for students who have basic language skills and capacities necessary for reading Biblical Hebrew or Rabbinic Hebrew. Reading, analysis, and interpretation of Hebrew literature composed during Second Temple period. Relevant sources include Chronicles, Ezra-Nehemiah, Ecclesiastes, Ben Siria, Daniel, Dead Sea Scrolls, and other documents from Judean desert, and various apocrypha and pseudopigrapha. Special attention to historical development of Hebrew language and literature in relation to both earlier biblical sources, styles, grammatical paradigms and to subsequent Rabbinic writings. Course builds following skills: reading unpointed texts, mastering distinctive elements of vocabulary, idiom, and syntax of Second Temple Hebrew, and analyzing relationships between biblical and postbiblical sources. May be repeated for credit. S/U or letter grading.

C240. Modern Hebrew Poetry and Prose. (4) Lecture, three hours. Requisites: courses 103A, 103B, and 103C, or equivalent knowledge of Hebrew. Study of major Hebrew writers of past 100 years. May be repeated for credit. Concurrently scheduled with course C140. Letter grading.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Iranian Lower-Division Courses

1A—1B—1C. Elementary Persian. (5—5—5) Lecture, six hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Not open to students with prior knowledge of Persian. P/N/P or letter grading.

5. Elementary Persian: Intensive. (15) Lecture, 10 hours; discussion, 10 hours. Not open to students who have learned, from whatever source, enough Persian to qualify for more advanced courses. Intensive course equivalent to courses 1A—1B—1C. Introduction to fundamentals of Persian, including pronunciation, grammar, and Persian script, with emphasis on all four basic language skills—speaking, listening comprehension, reading, and writing. Offered in summer only. P/N/P or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/N/P grading.

20A—20B—20C. Accelerated Elementary Persian. (6—6—6) Lecture, four hours; discussion two hours; lab work, 30 minutes per day. Preparation: some knowledge of spoken Persian. Course 20A is enforced requisite to 20B, which is enforced requisite to 20C. Intensive and thorough study of fundamental structure of Persian grammar; reading from a wide range of classical and modern poetry and prose compositions. P/N/P or letter grading.

55. Gender and Sexuality in Arts and Literatures of Iran and Middle East. (5) Lecture, three hours; discussion, one hour. Multidisciplinary introduction to Persian poetry, recognized as jewel of Persian culture, and to pictorial, architectural, performative, cinematographic, and photographic dimensions of artistic milieu spanning between Balkans, India, and Central Asia from 10th century CE to present. With consideration of centrality of discourses on identity, desire, and spirituality to core of Persian aesthetics, study of broad variety of socioanthropological, ethical and critical issues stemming from both mainstream topics characterizing extensive field of Iranian studies and most controversial conversations on nature of sexuality, ethnocity, and religion. The seminar will focus on the development of Islamic legal traditions, their interaction with other religious traditions, and their impact on contemporary society. Concurrently scheduled with course CM107. Letter grading.

221A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Introduction to Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

221B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Continuation of study of Jewish thought, focusing on later developments and contemporary issues. Concurrently scheduled with course CM107. S/U or letter grading.

221C. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Further exploration of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

221D. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

222A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

222B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

222C. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

222D. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

223A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

223B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

223C. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

223D. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

224A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

224B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

224C. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

224D. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

225A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

225B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

225C. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

225D. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

226A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

226B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

226C. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

226D. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

227A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

227B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

227C. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

227D. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

228A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

228B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

228C. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

228D. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

229A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

229B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

229C. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

229D. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

230A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

230B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

230C. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

230D. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

231A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

231B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

231C. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

231D. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

232A. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.

232B. Jewish Thought. (4) Lecture, two hours; discussion, one hour. Advanced study of Jewish thought and its historical development, focusing on key figures and movements. Concurrently scheduled with course CM107. S/U or letter grading.
order to decipher features and functions of magic, mysticism, and apocalypse in antiquity and modernity. P/NP or letter grading.

M162. Israel Seen through Its Literature. (4) Same as Comparative Literature M162.) Lecture, three hours. Attempt to impart profound understanding of Israel as seen through its literature. Examination of variety of literary texts—stories, novels, and poems—and reading them in context of their historical backgrounds. P/NP or letter grading.

175. Modern Israeli Literature Made into Films. (5) Lecture, four hours; discussion, one hour. M182B. Modern Jewish History I. (4) (Same as History M182B and Religion M182B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exploration of unfolding of Jewish history from rise of Christianity to expulsion of Jews from Spain in 1492. P/NP or letter grading.

M182C. Modern Jewish History. (4) (Same as History M182C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of early modern Jewish history beginning with enormous repercussions of expulsion of Jews from Spain in 1492, followed by transformations in Jewish society and identity over five centuries in Europe and Middle East, and concluding with nationalism. P/NP or letter grading.

M184A. Jewish Civilization: Encounter with Great World Cultures. (4) (Same as History M184A and Religion M184A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exploration of dynamic and millennia-old interaction of Jews with great world cultures. Creative adaptations that have lent Jewish culture its distinct and various forms. P/NP or letter grading.

M184B. History of Zionism and State of Israel. (4) (Same as History M184B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Experience of Jews in America, both historical and contemporary. P/NP or letter grading.

M184D. History of Zionism and State of Israel. (4) (Same as History M184D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of history of State of Israel from 1948 to present. P/NP or letter grading.

M187. Holocaust in Literature. (4) (Same as Comparative Literature M165.) Lecture, three hours. Investigation of how Holocaust informs variety of literary and cinematic works and raises wide range of aesthetic and moral questions. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Independent study with course lecture instructor to explore topics of greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

191. Variable Topics Research Seminars: Jewish Studies. (4) Seminar, three hours. Research seminar on selected topics. Reading, discussion, and development of project required. May be repeated for credit. P/NP or letter grading.

197. Individual Studies in Jewish Studies. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. As signed reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Jewish Studies. (2 to 4) Tutorial, one hour. Limited to juniors/ seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Course

Upper-Division Courses

M111. Introduction to Islamic Archaeology. (4) (Same as History M111.) Lecture, three hours. From earliest monuments of Islam in Arabia and Jerusalem to humble remains of small Egyptian port, broad focus on archaeological and standing remains in central Islamic lands (primarily Syria, Egypt, and Iraq, Turkey, Iran, North Africa, and Spain). Profound cultural transformations occurred from birth of Islam in 7th century to early Ottoman period in 16th and 17th centuries, which are traceable in material records. Assessment of effectiveness of tools afforded by historical archaeology to aid understanding of past societies. P/NP or letter grading.

M112. Archaeology and Art of Christian and Islamic Egypt. (4) (Same as Archaeology M112, Art History M119D, and Islamic Studies M112.) Lecture, three hours. Culture of Egypt transformed gradually after Muslim conquest of Egypt in 642 AD, with indications to material evidence such as ceramics, textiles, architectural forms, and building techniques, it is functionally impossible to separate pre-Islamic Christian Egypt from early Islamic Egypt. Although population may have become largely Muslim by 10th century, Egypt remained Coptic in many senses even to 14th century and retains sizeable Christian minority to present. Some architectural, epigraphic, and artistic traditions of archi- tecture of Egypt from 6th to 19th century, charting changes and continuities in material culture and shifts in human geography and land use. P/NP or letter grading.

Middle Eastern Studies Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of a critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP or letter grading.

M50A. First Civilizations. (5) (Same as Ancient Near East M50A.) Lecture, three hours; discussion, one hour. Survey of great civilizations of ancient Near East—Egypt, Israel, and Mesopotamia—with attention to emergence of writing, monotheism, and urban societies. Letter grading.

M50B. Origins of Judaism, Christianity, and Islam. (5) (Same as Ancient Near East M50B and Religion M50B.) Lecture, three hours; discussion, one hour. Examination of three major monotheisms of Western cultures—Judaism, Christianity, and Islam—historically and comparatively. Development, teachings, and ritual practices of each tradition up to and including medi- eval period. Composition and development of various sacred texts, highlighting key themes and ideas within different historical and literary strata of traditions, such as narratives of revelation, concept of religious authority, and common theological issues such as origin of evil and status of nonbelievers. Letter grading.

M50CW. Making and Studying Modern Middle East. (5) (Same as Anthropology M50W.) Lecture, three hours; discussion, one hour. Requisite: English Composition 3. Survey of modern Middle Eastern cultures through readings and films from Middle East and North Africa. Satisfies Writing II requirement. Letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics of greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.
May be applied toward honors credit for eligible stu-
dents. Honors content noted on transcript. P/NP or letter grading.

169HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. De-
signed as adjunct to upper-division lecture course. In-
dividual study with lecture course instructor to explore topics in greater depth through supplemental read-
ings, papers, oral activities, or other activities. May be repeated for credit. P/NP grading.

200. Bibliography and Method of Near Eastern Lan-
guages and Literatures. (4) Lecture, two hours. Re-
troduction to the bibliography and methods of research in vari-
ous fields of Near Eastern studies. P/NP or letter grading.

201. Study of Religion: Theory and Method. (4) Sem-
nar, three hours. Preparation: familiarity with at least two major world religions. Designed for advanced un-
dergraduate and graduate students. Introduction to various theoretical approaches to the study of religion. In 
discover how to develop a strong research component as an honors student in the College Honors Program. As 
designed as adjunct to upper-division lecture course. Independent study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for honors credit for eligible stud-
dents. Honors content noted on transcript. P/NP or letter grading.

90HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. De-
signed as adjunct to lower-division lecture course. In-
dividual study with lecture course instructor to explore topics in greater depth through supplemental read-
ings, papers, or other activities. May be repeated. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (su-
upervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-
division students under guidance of faculty mentor. Students must be in good academic standing and en-
rolled in a minimum of 15 units per semester. Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Near Eastern Languages and Cultures / 703

Near Eastern Languages

201. Study of Religion: Theory and Method. (4) Seminar, three hours. Preparation: familiarity with at least two major world religions. Designed for advanced under-
dergraduate and graduate students. Introduction to various theoretical approaches to the study of religion. In 
discover how to develop a strong research component as an honors student in the College Honors Program. As 
designed as adjunct to upper-division lecture course. Independent study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for honors credit for eligible stud-
dents. Honors content noted on transcript. P/NP or letter grading.

200. Bibliography and Method of Near Eastern Lan-
guages and Literatures. (4) Lecture, two hours. Re-
troduction to the bibliography and methods of research in vari-
ous fields of Near Eastern studies. P/NP or letter grading.
Seminics

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

199. Directed Research or Senior Project in Seminics. (2 to 4) Tutorial, one hour. Limited to seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

215B. Syriac. (4) Lecture, two hours. Morphology and syntax of Syriac language; readings in Syriac translations of Bible and Syriac literature. May be repeated for credit. S/U or letter grading.

239. Seminar on Northwest Semitic Languages and Literatures. (4) Seminar, two hours. May be repeated for credit. S/U or letter grading.

240. Seminar: Akkadian Language. (4) Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit. S/U or letter grading.

240X. Seminar: Akkadian Language. (4) Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. Course for students who participate regularly in class meetings but without the homework required in course 240. May be repeated for credit. S/U grading.

241. Seminar: Akkadian Literature. (4) Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit. S/U or letter grading.

280A. Seminar: Comparative Semitics. (4) Seminar, two hours. S/U or letter grading.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Turkic Languages

Lower-Division Courses

18. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

199. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199H. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.
May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

101A-101B-101C. Elementary Turkish. (5–5–5) Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

101A-101B-101C. Elementary Turkish. (5–5–5) Lecture, five hours. Course 101A is requisite to 101B, which is requisite to 101C. Grammar; reading, conversation, and elementary composition drills. P/NP or letter grading.

111A-111B-111C. Elementary Uzbek. (4–4–4) Lecture, three hours; laboratory, two hours. Elementary grammar, reading, and composition exercises; elementary conversation.

112A-112B-112C. Advanced Uzbek. (4–4–4) Lecture, three hours; laboratory, two hours. Descriptive Uzbek grammar, reading, and analysis of Uzbek literary and folkloric texts. High-style composition and conversation.

M115A-M115B-M115C. Elementary Azeri. (4–4–4) (Same as Iranian M115A-M115B-M115C.) Lecture, five hours. Knowledge of Russian, Turkish, and Iranian helpful. Grammatical competence at elementary level; knowledge of basic facts of Azeri grammar; reading competence with help of dictionary; ability to write simple compositions; basic conversational skill. P/NP or letter grading.

160. Turkish Tradition. (4) Lecture/discussion. Preparation: entrance examination. Survey of cultural history of the Turks, as seen primarily through their literature, from their early history to the present.

165. Islamic Literary Heritage of Central Asia. (4) Lecture, two hours; discussion, one hour. Systematic survey of Islamic documents produced in Turkish and Persian in Central Asia, with reading of primary sources. English translation. Study of special characteristics of Central Asian Islam.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

197. Individual Studies in Turkic. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Turkic. (2 to 4) Tutorial, to be arranged. S/U grading.

Graduate Courses

210A. Readings in Ottoman I. (4) Lecture, three hours. Examination of printed texts in Ottoman from 19th and 20th centuries to improve student competence to read, transliterate, and translate Ottoman texts. Readings include selections from newspapers, almanacs, travel books, and literary and historical texts. S/U or letter grading.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

**Overview**

The Department of Neurobiology is a premier research department and a leading force in neuroscience discovery and education at UCLA and worldwide. Department faculty with diverse research backgrounds in cellular and molecular biology, psychology, and engineering; utilize the most sophisticated technologies available to work in concert with colleagues throughout UCLA and the world to enhance the understanding of the brain and its role in health and disease.

**Neurobiology faculty information** is available from the department.

**Medical History**

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

107A-107B. Historical Development of Medical Sciences. (4–4) Lecture, three hours. Major contributions of medical and medical personalities from earliest times. P/NP or letter grading. 107A. Contributions of medicine and medical personalities from earliest times through 1650. 107B. Subject in the period from 1650 through the 19th century. Illustrated lectures, class discussion, and required readings from selected texts.

M169. History of Neurosciences. (4) (Same as Neurobiology M169.) Lecture, one hour; discussion, two hours. Development of neurosciences, especially neuroanatomy and neurophysiology, from Enlightenment era through latter 20th century. Emphasis on fundamental nerve functions, cell communication, and technological, conceptual, and cultural influences that have shaped understanding of brain and nervous system. P/NP or letter grading.

Graduate Course

596. Directed Individual Studies in Medical History. (2 to 12) Tutorial, to be arranged. Investigation of subjects in medical history selected by students with advice and direction of instructor. Individual reports and conferences. S/U or letter grading.

Neurobiology

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

M169. History of Neurosciences. (4) (Same as Medical History M169.) Lecture, one hour; discussion, two hours. Development of neurosciences, especially neuroanatomy and neurophysiology, from Enlightenment era through latter 20th century. Emphasis on fundamental nerve functions, cell communication, and technological, conceptual, and cultural influences that have shaped understanding of brain and nervous system. P/NP or letter grading.
neurological, conceptual, and cultural influences that have shaped understanding of brain and nervous system. P/NP or letter grading.

M171. Variable Topics Research Seminars: Contemporary Biology. (2) Same as Physiological Science M171.) Seminar, two hours. Limited to undergraduate fellows in Integrated and Interdisciplinary Undergraduate Research Program. Presentations of scientific data from primary research articles and from students’ own research. May be repeated for credit. P/NP grading.

197. Individual Studies in Neurobiology. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned readings and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research in Neurobiology. (2 to 8) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Studies in neuroscience and related subject areas appropriate for training of particular students, which includes reading assignments or laboratory work leading to final oral or written report. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M200F. Cellular Neurophysiology. (4) (Same as Neuroscience M202 and Physiological Science M202.) Lecture, three hours; discussion, two hours. Required: Physiological Science 111A or 118B or Physics 11B. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

M200G. Biology of Learning and Memory. (4) (Same as Neuroscience M220 and Psychology M208.) Lecture, four hours. Molecular, cellular, circuit, systems, neuroanatomy, theory, and models of learning and memory. Cross-disciplinary focus on learning and memory to provide integrative view of subject that emphasizes connections and findings that take advantage of novel groundbreaking models. Letter grading.

225. Functional Organization of Visual System. (2) Seminar, three hours. Preparation: basic neuroscience course. Recommended: neuroanatomy, neurophysiology, and/or neural systems courses. Designed for neuroscientists, cell biologists, and psychologists. Basic organizational, physiological, and functional principles of visual system and how visual information is processed at different levels of nervous system. Structure, microcircuitry organization and function of retina, central visual nuclei, and primary cortical areas mediating visual behavior. S/U or letter grading.

270. Joint Seminar: Neuroscience Lectures. (1) Seminar, one hour. Formal lectures on current research topics in neuroscience by speakers from national, international, and local neuroscience communities. S/U grading.

Overview

Neurology is the medical science dealing with the normal and diseased nervous system. Neurological disorders are often associated with significant disability, morbidity, and mortality. Their higher incidence in association with greater longevity of the population, increased awareness, improved diagnostic methods, and other factors place neurological disorders among the major medical problems today. The Department of Neurology and the Reed Neurological Research Center provide a coordinated basic science and clinical research approach to neurological disorders, patient care, and neurological education.

The department instructs medical students throughout the four years. Emphasis in the first year is on basic aspects of neuroanatomy, chemistry, and physiology; in the second year, neurological history taking and neurological examination of afflicted patients are stressed. The third year consists of a clerkship, and the fourth year provides electives in neurology, including an advanced clinical clerkship.

Graduate students and postdoctoral candidates are trained in both the basic and clinical laboratories.

For more details on the Department of Neurology and courses offered, see the department website.

Neurology faculty information is available from the department.

Neurology

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors College 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced requisite: course 188SA. Enforced corequisite: Honors College 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

219. Directed Research in Neurology. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Overview
Neuroscience seeks to understand the brain in health and in disease. Topics of fundamental interest include perception, cognition, learning, memory, motor control, and regulation of body function. The undergraduate interdepartmental program seeks to explore the principles and concepts of this broad range of nervous system function at many levels of analysis, including molecular, cellular, synaptic, network, computational, and behavioral.

Information on the graduate program in this discipline can be found in the Neuroscience graduate interdepartmental program section.

Undergraduate Major
Neuroscience BS

Capstone Major
The Neuroscience major is a designated capstone major. Undergraduate students have the option of conducting two terms of independent research within a faculty laboratory, applying to participate in Project Brainstorm or DOPA-Team, or completing an advanced laboratory methods course with a series of research modules. Through their capstone work, students demonstrate ability to generate testable scientific hypotheses and develop a research plan to test such hypotheses; work on research projects independently and in small groups; evaluate and discuss primary literature and the validity of hypotheses generated by others; communicate effectively orally and in writing; and demonstrate creative thinking.

Learning Outcomes
The Neuroscience major has the following learning outcomes:

- Generation of testable scientific hypotheses and development of a research plan to test such hypotheses
- Work on research projects independently and in small group settings
- Evaluation and discussion of primary literature
- Evaluation of the validity of hypotheses
- Effective written and oral communication
- Demonstrated creative thinking

Entry to the Major
Transfer Students
Transfer applicants to the Neuroscience major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory, one year of organic chemistry, one year of general chemistry with laboratory, and one statistics course. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements
Preparation for the Major

Life Sciences Core Curriculum
Required: Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, 3C, and Statistics 10 or 13, or Mathematics 31A or 31AL, 31B, 32A, and Statistics 10 or 13; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 5B, and 5C.

The Major
The Neuroscience major consists of 10 courses (approximately 43 units). Consult respective department or program sections for course descriptions.

Required Core: Neuroscience M101A (with grade of C– or better), M101B, M101C, 102, Chemistry and Biochemistry 153A. Physiological Science 111A and Psychology 115 cannot be substituted for Neuroscience M101A.

Elective Options: One course from each of the following three options:

Capstone Research Options: (1) Neuroscience 101L, M116A, Psychology M116A, or 116B, (2) Neuroscience C177 and 192CX (for DOPA-Team) or two quarters of Neuroscience 192BX (for Project Brainstorm), or (3) Neuroscience 198A and 198B, or 199A and 199B.

Honors Program
The honors program provides exceptional Neuroscience majors with the opportunity to do research culminating in an honors thesis.

Polices
Preparation for the Major
Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving grades below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

The Major
No more than eight courses may be from any one department. A maximum of 8 units of Neuroscience 198 or 199 in any combination may be applied toward the major. Each course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in all upper-division courses taken for the major.

Capstone
Students who select the Neuroscience 101L, M116A, Psychology M116A, or 116B capstone research option must take four upper-division electives, with at least one from each of the three elective options. Students who select the Neuroscience C177 and 192CX, two quarters of 192BX, 198A and 198B, or 199A and 199B options must take three upper-division electives, one from each elective option.

Honors Program
Majors who have completed all preparation courses with a grade-point average of 3.0 or better and an overall GPA of 3.2 or better may apply for admission to the honors program. Applications and program requirements are available in the Neuroscience Undergraduate Office. Students must submit the application before beginning their upper-division honors requirements. After completion of all requirements and with the recommendation of the faculty sponsor and a second reader of the thesis, the chair confers honors at graduation.

Undergraduate Minor
Neuroscience Minor
The Neuroscience minor is designed to allow students in other majors an opportunity to explore the interdisciplinary field of neuroscience in a structured and rigorous way, while pursuing a major field of study in another discipline at the same time.

Admission
To enter the minor, students must have an overall grade-point average of 2.0 or better and a 2.5 GPA in the requisite courses for Neuroscience M101A and M101B.

The Minor
Nonscience majors wishing to minor in Neuroscience should be aware that preparation courses in chemistry, life sciences, and physics are requisites to the upper-division course requirements.
Required Upper-Division Courses (approximately 31 units): Neuroscience M101A (with grade of C– or better), M101B, M101C (5 units each) and four elective courses selected from 101L, 102, 199A and 199B, and from any of the three elective options listed under the Neuroscience major.

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Neuroscience
See the Neuroscience graduate interdepartmental program for graduate courses.

Lower-Division Courses
10. Brain Made Simple: Neuroscience for 21st Century. (4) Lecture, four hours. Preparation: high school background in either biology or chemistry. Not open for credit to students with credit for course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M118A or Psychology M117A) or Physiological Science 111A or Psychology 115. General overview and introduction to most exciting and fundamental topics encompassing field of neuroscience. P/NP or letter grading.

17. Science of Music. (4) Lecture, three hours; discussion, one hour. General overview of basic principles of neuroscience, cognitive psychology, and psychoacoustics to relation of music perception. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

20. Introduction to Neuroscience Methods: Art and Science of Studying Brain. (4) Lecture, four hours; discussion, 90 minutes. Preparation: high school background in either biology or chemistry. General overview of field of neuroscience to serve as introduction to Neuroscience major. Topics covered include brief history of field, basic neurophysiology and neuroanatomy, research methods, experimental design, data analysis, and career prospects. May not be applied toward elective requirements for major. Letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

101L. Neuroscience Laboratory. (4) Lecture, two hours; laboratory, three hours. Requisites: courses M101A, M101B (M101B may be taken concurrently). Not open for credit to students with credit for Psychology 115. Introduction to laboratory methods in neuroscience. Laboratory exercises range from molecular and cellular biological to behavioral. Hands-on experience with important methodology and experimental approaches are noted. P/NP or letter grading.

116A. Behavioral Neuroscience Laboratory. (4) Lab, one hour; laboratory, three hours. Requisites: courses M101A and M101B (M101B may be taken concurrently), or Psychology 10, 100A, 100B, and 115. Not open for credit to students with credit for Psychology 116B. Laboratory for students with credit for Psychology 116B. Designed for Psychology, Biology, and Neuroscience majors. Laboratory experience with various techniques in behavioral neuroscience. Hands-on experience with important methodology and experimental approaches in neuroscience. P/NP or letter grading.

119L. Human Neuropsychology. (4) Same as Psychology M119L. Lecture, three hours. Recommended prerequisites: courses M101A and M101C (or Psychology 115), Psychology 120A or 120B. Designed for juniors and seniors. Survey of experimental and clinical human neuropsychology; neural basis of higher cognitive functions. P/NP or letter grading.

119N. Visual System. (4) Same as Psychology M119N. Lecture, three hours. Requisite: course M101A or Physiological Science 111A or Psychology 115. Ability to image and analyze visual world is truly remarkable feat. Course investigates physiology of visual processing from retina to visual cortex through lectures, extensive reading, and discussions. P/NP or letter grading.

123. Neurobiology of Sleep. (4) Same as Physiological Science CM123. Lecture, three hours; discussion, one hour. Requisites: courses M101A and Molecular and Cell Biology M117A or consent of instructor. Detailed look into science of sleep. Cellular and molecular mechanisms of falling asleep, many discrete brain structures involved in control of sleep wakefulness, and homeostatic regulation of sleep by our bodies. Evolutionary, phylogenetic, and developmental history of sleep and metabolism. Sleep disorders are considered as they provide insights into mechanisms underlying sleep. For background on science of sleep and circadian rhythms, completion of Physiological Science C126 is strongly recommended. Concurrently scheduled with course CM123. Letter grading.

M135. Dynamical Systems Modeling of Physiological Processes. (5) Same as Physiological Science M135. Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Letter grading.

140. Brain Injury and Recovery of Function. (4) Seminar, four hours. Requisite: course 102 or Psychology 116A or 116B. Inquiry into how recovery from brain injury specifically means, and if all recovery is same. Addresses history of how science develops from basic localization of function to understanding more about brain functional recovery. Increase awareness of limitations and surprising potential of brain to adapt to a wide variety of brain traumas. Interests and exciting cases and experiments that have molded current understanding of brain’s potential for recovery. P/NP or letter grading.

142. Neurophilosophy: Introduction and Assessment from Neuroscience Perspective. (4) Lecture, three hours. Requisite: course M101A. Overview of philosophical issues and theories surrounding nature of mind and its relationship with body. Examination of case for relevance of current theoretical and experimental results in neuroscience and cognitive science to philosophy of mind. In particular, focus on variety of approaches to understanding and explaining human consciousness and current lively debates about whether scientific understanding of it is possible. Neuropohilosophy is relatively new interdisciplinary subject. Study is approached as two-way flow of information, from neuroscience to philosophy and vice versa. Examination of traditional philosophical problems given input of recent neuroscience findings as well as application of philosophical problems and techniques to determine which scientific projects related to human consciousness are genuinely new and interesting and which have potential to yield conceptually novel answers. P/NP or letter grading.

M145. Neural Mechanisms Controlling Movement. (5) Same as Physiological Science M145). Lecture, four hours. Requisite: course M101A or Physiological Science 111A or M100A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Letter grading.

150. Biotechnology in Neuroscience. (4) Lecture, three and one half hours. Requisites: courses M101A, M101B, preparation: background in biochemistry. Designed for third- and fourth-year Neuroscience majors. Science advances through development and adaptation of new tools and technologies. Students learn commonly used techniques in neuroscience research, from classic RT-PCR, immunohistochemistry to newly emerged optogenetics, single cell RNAseq, and CRISPR. Students gain better understanding of various advanced methods in field to advance their own potential research in future. Letter grading.

C151. Computational Neuroscience for Interdisciplinary Scientists. (4) Lecture, two hours; laboratory, one hour. Requisites: courses Psychology 115; Life Sciences 30A and 30B, or Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Life Sciences 40 or Psychology 100A or Statistics 10 or 13. Designed for students in both experimental and computational tracks to acquire significant breadth and depth in
computational neuroscience. Highly interdisciplinary study in computational neuroscience. Integrates data-driven modeling, simulations, and analyses of neural dynamics to study brain in hypothesiss-driven approach to computational modeling. Students can immediately apply acquired knowledge and skills in research or industry settings. Concurrently scheduled with course C251, P/NP or letter grading.

M161. Integrated Research in Neuroscience Management. (Same as Psychiatry M182.) Seminar, four hours. Basic overview of brain function and consideration of some management methods that exist already, and what future may hold. Nurturing our own brain's capacity for modeling what if scenarios that might alter risks and benefits of different courses of action, based on individual genetic background and other elements of personal history and environment exposures. Introduction to key principles from science of behavior change, illustrating how important health-related behavioral habits are and how difficult these can be to change and why. Coverage of series of topics that center on personal enhancement of well-being through consideration of stress management, long-term goal and value identification, mapping of long-term goals onto immediate actions, reinforcement learning, meditation, neurofeedback, and time management. Critical appraisal of tools to help students distinguish scientifically validated procedures. Offered in summer only. Letter grading.

M170. Music, Mind, and Brain. (4) (Same as Music Industry M103.) Seminar, three hours; outside study, nine hours. Multidisciplinary approach to understanding brain mechanisms mediating music perception, production, and appreciation. Students' natural interest in music serves as springboard for learning basic concepts about theories of mind, and how brain works to determine perception of harmony and rhythm and interacting with music, and musical creativity. Designed to help students understand methodologies currently used to investigate brain-behavior correlates. Broad understanding of research topics in music neuroscience; introduction to fundamental principles in neurophysiology, psychophysics, and neuroanatomy. Letter grading.

M176. Auditory Neuroscience of Speech Perception and Vocal Communication. (4) (Same as Physiological Science M176.) Lecture, two and one hour; discussion, 90 minutes. Prerequisite: course M101A or Physiological Science 107. Interdisciplinary approach to understanding how animals and other human communicators encode meaning and meaning using sound. Weekly research topics in disciplines of systems neuroscience, cognitive neuroscience, psychophysics, and psycholinguistics. Emphasis on fundamental principles in neurophysiology, neuroanatomy, neuroimaging, and psycholinguistics. Letter grading.

C177. Drugs of Abuse: Translational Neurobiology. (4) Lecture, four hours. Prerequisite: course M101A. Course ranges from synapse to society. Provides intensive didactic and current neuroscientific basis for understanding substance abuse and blends that material with relevant topics such as epidemiology, co-occurring disorders, treatment options, prevention, and public policies, with emphasis on communication of course content. General public welcome. Concurrently scheduled with course C277. Letter grading.

178. Human Electrophysiology and Evoked Potentials in Research and Clinical Diagnosis. (4) Seminar, three hours; laboratory, one hour. Prerequisites: course M101A. Not open for credit to students with credit for course 191A, seminar 1. Emphasis on human electroencephalogram (EEG) and various forms of sensory-evoked potentials. Introduction to number of experimental paradigms that allow for recording of different brain signals from brainstem to cortex. Letter grading.

180. Genetic, Molecular, and Genomic Approaches to Neuronal Development and Disease. (4) Seminar, three hours. Enforced prerequisite: course M101A, M101B. Not open for credit to students with credit for course 191C, seminar 1. In-depth study of genetic, molecular, and genomic approaches to studying nervous system development and disease. Overview of current methodologies currently used to generate mouse models for genetic and phenotypic analysis. Review of techniques for studying development and disease. Integration of genomic approaches for identifying and characterizing gene(s) involved in these processes. Emphasis on mouse models, but other model organisms considered as well. Letter grading.

186. Neural Stem Cells: Biology, Diseases, and Therapies. (4) Lecture, two and one half hours. Preparation: background in biology and biochemistry. Enforced prerequisite: courses M101A, M101B. Designed for third- and fourth-year Neuroscience majors. Comprehensive coverage of stem cells of nervous system during development and adulthood, involvement of stem cells in diseases (e.g., brain tumors, Alzheimer's, Parkinson's), and use of stem cells for therapy. P/NP or letter grading.

M187. Neurobiology of Bias and Discrimination. (4) Same as Physiological Science M106 and Psychology M165. Limited to junior/senior neuroscience majors. Comprehensive coverage of cognitive processes that affect group behavior, and discrimination. Consideration of research at multiple levels of analysis from genetics to neural circuits to behavior. Discussion of societal implications of these research findings, including their relevance to public policies and criminal justice system. Letter grading.

188A. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. Letter grading.

188C. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188B. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 885 course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

190. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics related to greater depth than lecture course readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

191A-191B-191C. Variable Topics Research Seminars: Neuroscience. (4–4–4) Seminar, three hours. Topics on one or more aspects of neuroscience. Reading, discussion, and development of culminating project. Students assist faculty members and graduate teaching assistants in laboratory only. May not be applied toward elective requirements and may not be repeated for credit. P/NP or letter grading.

191H. Honors Seminars: Neuroscience. (4) Seminar, four hours. Preparation: one statistics course (Statistics 10 or equivalent), Limited to neuroscience honors program students. Instruction in principles of scientific methodology, ethics, effective communication; critique of current journal articles and research projects. Presentation of individual research. May not be applied toward elective requirements for majors. Must be taken during Winter Quarter of academic year that students enroll in courses 198A and 198B. Letter grading.

192A. Practicum in Neuroanatomy for Undergraduate Assistants. (2) Seminar, three hours; laboratory, one hour. Prerequisites: courses M101A and 102, with grades of A. Limited to senior Neuroscience majors. Training and supervised practicum in neuroanatomy for undergraduate assistants. Students assist faculty members and graduate teaching assistants in laboratory only. May not be applied toward elective requirements and may not be repeated for credit. P/NP or letter grading.

192B. Project Brainstorm: Neuroscience K-12 Outreach. (4) (Formerly numbered 192B.) Seminar, one hour; fieldwork, three hours. Limited to juniors/senior Neuroscience majors selected for Project Brainstorm Capstone. Completion of Project Brainstorm Capstone and spring quarters is required for successful completion of Project Brainstorm Capstone. Course to be supervised by faculty and teaching assistant advisers. Project Brainstorm is K-12 science education outreach program of Brain Research Institute (BRI) and Neuroscience PhD and undergraduate programs that stimulates interest in science for children and young adults in grades K-12 by providing hands-on learning experiences that emphasize function and importance of brain. Students are expected to prepare age-appropriate lesson plans to be used in Project Brainstorm classroom visits. Students meet once a week with supervisors and provide periodic reports of their experience. May be repeated once for credit. Letter grading.

192CC. Drug Abuse and Society: Conveying Concepts to High School Students. (4) (Formerly numbered 192CC.) Seminar, four hours (seven weeks); fieldwork, four hours (three weeks). Enforced prerequisite: courses M101A, C177. Limited to junior/senior Neuroscience majors selected for DOPA Team capstone option. Preparation of students to give accurate, knowledgeable, and age-appropriate lectures in areas of drug abuse. Students are to be selected as followup to course C177 where students learned didactic material on mechanisms of action and translational aspects of drugs of abuse. Students meet on regular basis with supervisors and provide periodic reports of their experience. Letter grading.
Overview

The interdepartmental Neuroscience PhD program prepares students for careers in neuroscience research and education. The hallmark of the program is an integrated approach to study of the nervous system, using the multilevel analytical tools of molecular, cellular, systems, and/or behavioral biology, as well as quantitative approaches from the fields of mathematics, physics, and engineering. Students working at one or two analytical levels nevertheless learn to appreciate the methods and advantages of other levels of analysis. Emphasis is both on mechanisms of neural function and the biological basis of disease. Students select their research mentor from the list of all neuroscience faculty at UCLA.

Information on the undergraduate program in this discipline can be found in the Neuroscience undergraduate interdepartmental program section.

Graduate Major

Neuroscience PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees available at the Graduate Divisions, Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Neuroscience

See the Neuroscience undergraduate interdepartmental program for more undergraduate courses.

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Graduate Courses

201. Cell, Developmental, and Molecular Neurobiology. (6) Formerly numbered M201.) Lecture, six hours. Fundamental topics concerning cellular, developmental, and molecular neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotrophic factors. S/U or letter grading.

M202. Cellular Neurophysiology. (4) Same as Neurobiology M200F and Physiological Science M202.) Lecture, three hours; discussion, two hours. Requisites: Physiological Science 111A (or M180A or Physics 5C), 112A. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

M203. Anatomy of Central Nervous System. (4) (Same as Bioengineering M263.) Lecture, 75 minutes; discussion/laboratory, two hours. Prior to first laboratory meeting, students must complete Bloodborne Pathogens training course through UCLA Environment, Health and Safety. Study of anatomical locations of and relationships between ascending and descending sensory and motor systems from spinal cord to cerebral cortex. Covers cranial nerves and brain-stem anatomy along with anatomy of ventricular and vascular systems and of the spine. Subfields including topics covered in detail. Integrated anatomy laboratory includes brain dissections and tools of MRI analysis. Letter grading.

305. Systems Neuroscience. (4) Lecture/discussion, four hours. Introduction to fundamental systems of neuroscience, with emphasis on integration of molecular mechanisms, cellular processes, anatomical circuits, and behavioral analysis to understand function of neural systems. Letter grading.

M206. Neuroengineering. (4) (Same as Bioengineering M260 and Electrical and Computer Engineering M255S.) Lecture, four hours; laboratory, three hours; outside study, five hours. Requisites: Mathematics 32A, Physics 18B or 5C. Introduction to principles and technologies of bioelectricity and neural signal recording, processing, and stimulation. Topics include bioelectricity, electrophysiology (action potentials, local field potentials, EEG, EOG), intracellular and extracellular recording, microelectrode technology, neural signal processing (neural signal frequency bands, filtering, spike detection, spike sorting, stimulation artifact removal), brain-computer interfaces, deep-brain stimulation, and prosthetics. Letter grading.

207. Integrity of Scientific Investigation: Education, Research, and Career Implications. (2) Discussion, two hours. Designed for graduate students. Debate on topics related to ethical conduct of scientific investigation, with emphasis on critical thinking. Topics include scientific misconduct, mentoring, data ownership, authorship, peer review, use of animals and humans in biomedical research, conflicts of interest, technology, and scientific integrity. S/U grading.

215. Variable Topics Research Literature Seminars: Neurosciences. (1) Seminar, two hours. Critical discussion and analysis of current literature for various neurosciences topics. Only one topic may be taken twice for credit and applied toward neurosciences graduate requirements. S/U grading.

M220. Biology of Learning and Memory, (Same as Neurobiology M200G and Psychology M228.) Lecture, four hours. Cross-disciplinary focus on learning and memory to provide integrative view of subject that emphasizes research findings that take advantage of novel groundbreaking models. Letter grading.

222. Brain Imaging and Brain Stimulation, (4) Lecture, four hours. Limited to graduate students in neuroscience, bioengineering, psychology, and School of Medicine. Introduction to fields of brain imaging and brain stimulation, including various imaging modalities and neurostimulation strategies. Introduction to use of brain imaging in isolation or in combination with brain stimulation to understand neural circuitry, systems, and networks in health and disease. Encourages critical thinking about opportunities and limitations of two fields, and how to overcome them by combining two approaches for or integration of brain systems and functions. S/U or letter grading.

CM223. Neurobiology of Sleep, (4) (Same as Physiological Science CM223.) Lecture, three hours; discussion, one hour. Requisite: course M223. Consider many discrete brain structures involved in control of sleep/wakefulness, and homeostatic regulation of sleep. Approaches to the fundamentals shaped by evolutionary history, age, and gender. Latest insights into function of sleep, critical role sleep plays in memory formation and, close association between sleep and psychiatric disorders are considered as they provide insights into mechanisms underlying sleep. For background on science of sleep and circadian rhythms, completion of Physiological Science C122 is recommended. Concurrently scheduled with course CM123. Letter grading.

M230. Molecular and Cellular Mechanisms of Neural Integration, (5) (Same as Physiological Science M210 and Physiology M210.) Lecture, four hours; discussion, one hour. Requisite: course M202A, Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and pharmacology of receptors, cellular basis of neurotrans- mission in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation. Letter grading.

M233. Mechanisms and Relief of Pain, (2) (Same as Oral Biology M226, Surgery M226.) Lecture, two hours. This course is designed for treatment of neuroanatomical, neurophysiological, and biochemical bases of pain perception. Topics include classical pain pathways, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmacological basis for treatment of pain disorders. Letter grading.

240. Phenotypic Measurement of Complex Traits, (4) Lecture, three hours. Preparation: background in human genetics helpful. Integrative approach to understanding gene to behavior pathways by examination of levels of phenotype expression across systems (cell, brain, behavior, species, individual, mouse, human), and throughout development across varying environmental milieus. Using examples from human disorders such as schizophrenia and Alzheimer’s disease, these diverse approaches in genetic research to map out integrative system of understanding of complex human behavior. Emphasis on basic understanding of methods used at each level of analysis, along with major sources that can be accessed to gain insight to gene-behavioral links. Letter grading.

245. Optical Approaches in Neuroscience, (4) Lecture, four hours. State-of-art, light-microscopy-based approaches in neuroscience. Background material on basic optical principles and microscope design, as well as certification in use of lasers. Technical approaches commonly used in study of nervous system, including imaging modalities such as two-photon microscopy, methods for imaging and stimulating neural activity, and advanced microscopy approaches such as FRET and FLIM. Letter grading.

M248. Brain and Behavioral Development during Adolescence, (Same as Psychology M249.) Lecture, three hours. Foundational and emerging work on adolescent brain and behavioral development. Topics include cognition, risk taking, emotion, identity, stress, neuropsychiatric disorders, systems of the phenomena of assigned readings and presentations by guest faculty and scientists. S/U or letter grading.

250. Neural Development and Repair, (4) Lecture, four hours. Specific training in neural development and repair. Each week tackles different topic with topophysiology and provides perspective on its relevance to human diseases, treatments, and unmet needs for future research. Letter grading.

C251. Computational Neuroscience for Interdisciplinary Scientists, (4) Lecture, two hours; laboratory, one hour. Requisites: course M101A or Psychology 115; Life Sciences 30A and 30B, or Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Life Sciences 40 or Psychology 100A or Statistics 10 or 13. Designed for students in both experimental and computational tracks to acquire significant breadth and depth in computational neuroscience. Highly interdisciplinary study in computer science integrates data-driven modeling, simulations, and analyses of neural dynamics to train students in hypothesis-driven approach to computational modeling. Students can immediately apply new skills in research or industry settings. Concurrently scheduled with course C151. S/U or letter grading.

255. Functional Organization of Behavior, (2) Lecture, four hours. Functional changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning, and molecular mechanisms of neurotransmission. S/U or letter grading.

259. Introduction to Dynamical Systems, (4) Lecture, two hours; discussion, one hour. Introduction to essential concepts of modeling and dynamics, with applications at various levels of physiology and neurosciences, S/U grading.

260. Introduction to Signal Processing for Neuroscientists, (4) Lecture, four hours. Limited to Neuroscience graduate students. Introductory principles for handling some common types of time-varying data used to measure brain activity (spikes, local field potentials, calcium transients). Analysis of data with simple computer scripts for team-based projects. May not be repeated for credit.

265. Essentials of Neuro-Oncology, (4) Lecture, 90 minutes; discussion, 90 minutes. Preparation: competence in general statistics, neurobiology, and neuroanatomy. Introduction to topics in clinical neuro-oncology and neuro-oncology research. Exposure to multidisciplinary field of neuro-oncology through weekly meetings consisting of lectures from expert faculty and in-depth journal club or topical discussions on both fundamental and contemporary topics in neuro-oncology. Students learn various types of central nervous system tumors, and how they are diagnosed, treated, and monitored. The aspects of treating neuro-oncology patients, including issues associated with changes in quality of life, neurocognition, and psychological concerns. Discussion of current and new approaches to neuro-oncology. Letter grading.

270. Brain Architecture, (4) Lecture, two hours; discussion, one hour. Preparation: first-year neuroscience graduate core courses. Overview of brain architecture, including structural and functional neuroimaging for brain connectomic research. Evolution and development of nervous system, comparative neuroanatomy and behavioral neuroanatomy as well as cellular and molecular development, methods, imaging processing pipelines for neuroanatomical data, and neuroinformatics principles. S/U or letter grading.

M273. Neural Basis of Memory, (4) (Same as Psychology M270.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrating models for how memory is formed and how it is stored. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

275. Advanced Techniques in Neurobiology, (2) Lecture, four hours. Preparation: introductory knowledge in physiology, biochemistry, and general biology. Designed to provide introduction and, when possible, practical demonstration of a number of techniques used in neurochemical research, with emphasis on techniques used for identification, measurement, and visualization of compounds thought to be important as mediators of intercellular communication in central nervous system. S/U or letter grading.

M284A-M284B. Principles of Neuroimaging I, II, (4–6) (Same as Psychology M284A-M284B and Psychological Science M284A-M284B.) Lecture, three hours. In-depth examination of activation imaging, including fMRI, evoked potential and functional magnetic resonance imaging methods for study of nervous system, with emphasis on quantitative understanding and data interpretation and features common to modalities. X-ray computed tomography, magnetic resonance imaging, positron emission tomography, magnetoencephalography, transcranial magnetic stimulation, near infrared imaging. Letter grading.

286A. Electroencephalography Methods and Analysis I, (4) Lecture, three hours. Recommended preparation: one term of graduate level statistics, biostatistics. Understanding of neural origins of electroencephalography (EEG), common and advanced methods for experiment design, EEG recording and noise reduction, data analysis, feature extraction, and biomarker development. Students design simple experimental paradigms to answer some fundamental perceptual and cognitive questions. They record EEG and extract useful information using popular EEG processing interfaces such as EEGLAB and BrainStorm, perform some common statistical tests on the extracted features and explain achieved results, and navigate through state-of-the-art analyses and applications of EEG recording. Letter grading.

Neurosurgery

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1 Seminar, one hour. Discussion of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Course

199. Directed Research in Neurosurgery. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised research or other scholarly work, three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP grading.

Young Kee Markham, RN, MN, GNP-C
Nancy E. McGrath, RN, MN, CPNP-AC/PC
Silvia L. Mieure, RN, MSN, CCRN, CNL

Overview

Neurosurgery is a discipline of medicine that provides operative and nonoperative management (i.e., critical care, prevention, diagnosis, evaluation, treatment, and rehabilitation) of disorders of the central, peripheral, and autonomic nervous systems, including their supporting structures and vascular supply; the evaluation and treatment of pathological processes that modify the function or activity of the nervous system, including the hypophysis; and the operative and nonoperative management of pain.

As such, neurosurgery encompasses treatment of adult and pediatric patients with disorders of the nervous system—disorders of the brain, meninges, and skull and their blood supply, including the extracranial carotid and vertebral arteries, disorders of the pituitary gland, disorders of the spinal cord, meninges, and vertebral column, including those that may require treatment by spinal fusion or instrumentation, and disorders of the cranial and spinal nerves throughout their distribution.

For more details on the Department of Neurosurgery, see the department website.

Neurosurgery faculty information is available from the department.
Adjunct Professors
Mary Lynn Brecht, PhD
Nancy Jo Bush, RN, MN, MA, AOCN, ONP, FAAN
Catherine L. Carpenter, PhD

Adjunct Associate Professors
Nancy T. Blake, RN, PhD, CCRN-K, NHDP-BC, NEA-BC, FAAN
Anita R. Bralock, RN, PhD, CNM
Denice Economou, PhD, CNS, CHPN
Kathleen McDermott, RN, APRN, MSN, DNP, PMH-NP-BC
Benissa E. Salem, RN, MSN, PhD, CNL, PHN
Rita L. Secola, RN, PhD
Ali Tayyab, RN, PhD, NPD-BC, PHN
Elizabeth Anne Thomas, RN, PhD, ANP-BC, COHN-S, FAAOHN

Adjunct Assistant Professors
Theresa A. Brown, RN, DNP, MSN, ACNP-BC, AACC, FAAN
Emma Lyn M. Cuenca, RN, DNP, CCRN, CSC, CNS

Overview
A strong scientific basis underlies the teaching of nursing practice, leadership, and research. Related clinical experiences are arranged within the Reagan UCLA Medical Center, its affiliates, other major medical centers, or in selected community sites.

At the bachelor’s level, nurses are prepared as generalists with special skills in primary, secondary, and tertiary prevention and care within a population-based context, leadership, and evidence-based practice. At the master’s level, nurses are prepared as generalists in hospital-based care or for advanced nursing practice as nurse practitioners, or clinical specialists, or administrators in a variety of settings and specialized areas of healthcare. The Doctor of Philosophy (PhD) program prepares scholars who do original research, generate new theories, and build the scientific basis for professional nursing practice. Research is both basic and applied.

Undergraduate Major
Nursing BS Prelicensure
The focus of the prelicensure program is on the preparation of nurse generalists with special skills in primary, secondary, and tertiary prevention and care within an individual- and population-based context while developing the basics for a strong leadership role. Students learn the art and science of nursing using the latest research findings to guide their practice.

Capstone Major
The Nursing (Prelicensure) major is a designated capstone major. Students complete a clinically based scholarly project that is approved by a designated faculty member. In completing the capstone course, students should select, evaluate, and apply appropriate theory and research findings concerning individual- and population-based health promotion and disease prevention, biobehavioral and health systems, and social environmental, cultural, and human diversity to the nursing process. They should utilize the nursing process to promote biopsychosocial health and disease prevention and to support the resources of culturally diverse clients and families in community- and/or hospital-based settings.

Through their work, students should demonstrate effective communication and collaboration skills with clients and their families, research participants, other health professionals, colleagues, and policymakers. They also should identify practice-based problems and hypotheses and critique research on issues of importance to nursing and health care delivery; participate effectively in relevant professional and community organizations and/or interest groups; demonstrate leadership as a member of the health team to plan, manage, and evaluate care of individuals, families, and communities for culturally diverse populations; and practice their work based on the principles of ethics, social justice, and law.

Learning Outcomes
The Nursing major has the following learning outcomes:

- Selection, evaluation, and application of appropriate theory and research findings concerning individual- and population-based health promotion and disease prevention, biobehavioral and health systems, social environmental, and cultural and human diversity to the nursing process with a variety of clients, families, and communities from diverse cultural backgrounds
- Use of the nursing process to promote biopsychosocial health and disease prevention, and to support client resources in community and hospital settings
- Demonstrated effective communication and collaboration skills with clients, families, research participants, health professionals, and policymakers
- Identification of practice-based problems and hypotheses, and critique research on issues of importance to nursing and health care delivery within hospital and community settings
- Effective participation in professional and community organizations and interest groups relevant to health care delivery and modification of nursing standards and practices in keeping with current trends
- Demonstrated leadership as a health team member to plan, manage, and evaluate care of individuals, families, and communities
- Practice of hospital- and community-based nursing using principles of ethics, social justice, and law

Entry to the Major
Admission
The School of Nursing strives to attract a culturally and ethnically diverse student population. Admission is designed for first-year students and transfer students at the junior level. First-year applicants are expected to fulfill the University of California admission requirements. Transfer applicants are expected to fulfill the Intersegmental General Education Trans-
13. Introduction to Human Anatomy. (5) Lecture, three hours; laboratory, two hours. Structural presenta-
tion of human body, including musculoskeletal, ner-
vous, circulatory, respiratory, digestive, and re-
productive systems. Laboratory uses virtual cadaver
anatomy and dissection and examination. Letter grading.

15. Social Determinants of Health and Social Jus-
tice: Introduction to Professional Nursing Roles. (4) Lecture, three hours; discussion, two hours. Interna-
tional and domestic nursing practice requires rich his-
tory of changing roles within context of ethics, and so-
cial justice. Analysis of ethical principles of justice, au-
tonomy, beneficence, and confidentiality of human dig-
ity, integrity, and social justice in relation to nursing
practice across lifespan development and across health-
illness continuum. Examination of determinants of
human body within context of cultural, social, cul-
tural, and political forces and traditions of paternalism
affecting professional nursing in diverse populations.
Letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one
hour. Discussion of and critical thinking about topics of
current intellectual importance, taught by faculty
members in their areas of expertise and illuminating
many paths of discovery. Corequisite: courses 10, 20, 50,
and availability as well as consumption are linked to
nutritional patterns. Exploration of food production in
relation to climate change. Inequality of food choice
and availability as well as consumption are linked to
health disparities. Letter grading.

20. Introduction to Nursing and Social Justice II. (2)
Lecture, two hours. Prerequisite: course 10. Advanced
discussion on history of nursing, with focus on role of
contemporary nursing in relation to ethics and social
justice. Analysis of ethical principles of justice, au-
tonomy, beneficence, and confidentiality of human dig-
ity, integrity, and social justice in relation to nursing
practice throughout history in health/illness and end-
of-life contexts. Evaluation of social, cultural, legal,
and political forces in relation to paternalism for pro-
fessional nurses working with diverse patient popula-

50. Fundamentals of Epidemiology. (4) Lecture, three
hours; laboratory, three hours. Epidemiology focuses
on distribution and determinants of health-related
states or events in specified populations. Fundamen-
tally, epidemiology seeks to control health problems in
communities and institutions. Letter grading.

54A. Pathophysiology I. (3) Lecture, three hours.
Prerequisites: courses 3, 13 taken within past three
days. Designed to provide students with basic under-
standing of pathophysiological changes that occur
within internal environment of individual. Concepts un-
derlying pathologic changes across all body systems are
reviewed. Laboratory alterations is basic to providing quality nursing care. System varia-
tions across lifespan are addressed. Letter grading.

54B. Pathophysiology II. (2) Lecture, two hours. Req-
uisite: course 54A. Designed to provide students with understanding of clinical
concepts of relevant physiological changes that
occur at cellular, tissue, and organ level across se-
lected body systems within internal environment of
individual. Presence of dysfunction or disease of se-
lected systems is provided as rationale for nursing di-
agnosis and therapeutic interventions. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (su-
pervised research or other scholarly work), three to
four hours per week per unit. Entry-level research for lower-
division students under guidance of faculty mentor.
Students must be in good academic standing and en-
rolled in minimum of 12 units (excluding this course).
Individual research projects, approved by Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

115. Pharmacology and Therapeutics. (5) Lecture,
four hours. Prerequisites: courses 54A, 54B. Clinical
pharmacology for undergraduate nursing students,
begins with fundamental basic pharmacologic
principles. Focus on major drug classes and their
mechanism of action, pharmacokinetics, adverse ef-
tects, and clinical issues. Letter grading.

140. Advanced Growth and Development in Cultur-
ally Diverse Populations. Five hours. In-
truction of primary prevention strategies as they
pertain to health and wellness across lifespan, using
population-based approach to nursing care of diverse
populations. Includes priorities in reproductive health
including issues related to contraception and par-
enting, well child care, school-age health, and chronic
illness prevention strategies for young and middle-
aged adults and elderly who live independently in
communities or within institutions. Letter grading.

141. Nutrition for Health Care Providers. (5) Lecture,
four hours; laboratory, three hours. Critical analysis of
nutrition prevention strategies for young and middle-
aged adults and elderly who live independently in
communities or within institutions. Letter grading.

150A. Fundamentals of Professional Nursing I. (4)
Lecture, three hours; laboratory, three hours. Requi-
sites: courses 10, 20, 50. Conceptual, theoretical
foundations of primary, secondary, and tertiary pre-
vention as they relate to nursing care management in
acute care settings for Nursing BS students. Em-
phasis is placed on clinical and interpersonal roles of
Nursing BS practice roles in health care systems through case
study examples, with focus on application to clinical
practice settings that include culturally diverse popu-
lations. Concepts of communication, caring, critical
thinking skills as clinical decision-making strategy, and critical
thinking skills are introduced as essential to practice of professional
nursing. Learning experiences in nursing skills laboratory and
clinical settings are integral components. Introduction to mathematics cal-
culations and terminology used in clinical setting.
Letter grading.

150B. Fundamentals of Professional Nursing II. (4)
Lecture, three hours; laboratory, three hours. Requi-
sites: courses 150A, 152A, 152B, 174. Continuation of
course 150A. Expansion of student knowledge on
nursing skills laboratory and in clinical settings are in-
tegration of mathematics calculations and terminology used in clinical setting.
Letter grading.

152A. Health Promotion: Growth and Develop-
ment in Culturally Diverse Populations. (2) Lecture,
two hours. Introduction to primary prevention strategies as they
pertain to health and wellness across lifespan, using
population-based approach to nursing care of diverse
populations. Priorities in growth and develop-
ment are reproductive health and related to contraception and parenting; well-child care,
school-age health, and chronic illness prevention strategies for young and middle-aged adults; elderly who live independently in communities or within
institutions. Analysis of influence of overarching political,
social, and governmental systems within U.S. Letter
grading.

152B. Health Promotion: Nutrition in Culturally Di-
versified Populations. (2) Lecture, two hours. Examina-
tion of primary prevention strategies involving nutrition
using population-based and clinical approaches to
nursing care of diverse populations. Investigation of
nutrition in relation to prevention and recov-
ery from disease. Covers biological, public health,
and clinical aspects of major macro- and micronutri-
ents, obesity, malnutrition, dietary assessment, nutri-
tional therapies, and exercise using candidate disease
approach. Examination of influences of overarching
C155. Global Health Elective: Globalization, Social Justice, and Human Rights. (3) Seminar, two hours. Exploration of theories, issues, debates, and pedagogy associated with globalization, social justice, and human rights and how these perspectives influence human health and well-being. Provides students with unique opportunity to explore these topics within classroom, via Internet and other technologies, and in other classrooms located around globe. Students, through small groups and with peers across the world, reflect on how globalization shapes and transforms local communities and national cultures. Concurrently scheduled with course C255. Letter grading.

160. Secondary Prevention. (4) Lecture, four hours. Reflection and assessment. Focus placed on prevention of chronic or acutely deteriorating illness. Expanding on concepts of health and human development and using nursing science to identify and intervene with care to individuals and their families to screen, diagnose, and treat illness at earliest possible time to prevent disability or premature mortality. Examination of health of individuals within context of family, social and community systems, and interdisciplinary healthcare systems. Emphasis on differences in developmental stages in response to screening for early assessments and symptoms of illness in ambulatory and acute care settings, community agencies, rehabilitation units, outpatient specialty clinics and surgical units, and home and community settings. Letter grading.

161. Psychiatric Mental Health Nursing. (5) Lecture, three hours; clinical, six hours. Requisites: course 160, 162B. Knowledge development and skill assessment to the health and well-being of individuals with psychiatric disorders. Application of basic knowledge of pathophysiology, pharmacology, and diagnostic data for purposes of planning, implementing, and evaluating course of care for patients. Letter grading.

162C. Tertiary Prevention and Care of Complex Medical Issues. (5) Lecture, four hours (10 weeks); clinical, five hours (five weeks). Requisite: course 162B. Nursing assessment and management of acute and chronic health problems of older adults. Focus on integration of basic knowledge of pathophysiology, pharmacology, and diagnostic data for purpose of planning, implementing, and evaluating course of care for patients. Letter grading.

163. Nursing Care of Geriatric Patients and Families. (5) Lecture, one hour; discussion, one hour. Requisite: course 162A. Addresses prevention and management of acute and chronic health problems of older adults. Theory content emphasizes assessment, goal setting, and evaluation of nursing care to care of older adults and their families with emphasis on psychosocial, cultural, and developmental influences. Students integrate knowledge of pathophysiology, pharmacology, and diagnostic data for purpose of planning, implementing, and evaluating course of care for patients. Letter grading.

164. Maternity Nursing. (5) Lecture, three hours; clinical, six hours. Requisites: courses 160, 160B. Nursing assessment and management for selected acute and emergent problems in maternity/newborn patients, with emphasis on social, cultural, and developmental influences. Integration of basic knowledge of pathophysiology, pharmacology, and diagnostic data for purposes of planning, implementing, and evaluating course of care for patients. Letter grading.

169. Clinical Internship: Introduction. (12) Clinical, 36 hours. Requisites: courses 161, 162C, 163, 164, 165. Supervised practicum experience within clinical setting as part of interdisciplinary health care team. Focus on application of clinical reasoning and critical thinking to the interpretation of assessment and diagnostic data for purposes of planning, implementing, and evaluating course of care for patients, both as individuals and cohorts. Focus on design and complete quality improvement project that contributes to unit’s goals and objectives. Students implement advanced-level assessment, health maintenance, and management of symptoms across lifespan. P/N grading.

171. Public Health Nursing. (6) Lecture, three hours; clinical, nine hours. Requisites: courses 161, 162C, 163, 164, 165. Theoretical content focuses on population-based approach to public health nursing in relation to community promotion and prevention of illness at the level of individuals, families, communities, and systems. Clinical practicum concentrates on population-based public health nursing in culturally diverse settings. Focus on health outcomes, policies, federal, state, local, and public service agencies. Clinical practicum activities include health promotion and disease prevention education at the level of communities, populations, and systems, both domestically and globally. Letter grading.

M172. Care Work: Disability Justice and Health Care. (2) Same as Disability Studies M172. Lecture, one hour; discussion, one hour. Exploration of nature, history, models, and propositions of care, work, disability, disability justice movement, and health care. Consideration of intersections, interdependence, and complexities of formal and informal care webs and care economies between caregivers and receivers, which includes kin, advocates, disability communities, and health professionals. Use of multi-media, scholarly texts, and theoretical frameworks from disability justice, disability studies, film, gender studies, health, labor studies, law, nursing, and public policy to investigate the concepts of care and care work. Letter grading.

M172XP. Care Work: Disability Justice and Health Care. (3) Same as Disability Studies M172XP. Seminar, one hour. Corequisite: course M172. Exploration of nature, history, models, and propositions of care, work, disability, disability justice, disability studies, film, gender studies, health, labor studies, law, nursing, and public policy to investigate the concepts of care and care work. Focus on community engagement with collaborative frameworks and governmental policies and programs in community-based organizations, or health-care networks of disability care. Letter grading.

173W. Introduction to Nursing Research and Writing II. (5) Lecture, five hours. Requisite: English Compositio- nal Writing I. Research, critical thinking, and qualitative research project based on simple question. Review of components of research activities: specific aims and study purposes, variables, sampling, data collection tools, data analyses, and ethical conduct in research studies. Exploration of research design and methodology. Focus on implementation of research process as related to nursing practice. Emphasis on comprehensive research transformation and dissemination of findings. Students critically evaluated
research. Study by example of relationship between theory and nursing research. Satisfies Writing II requirement. Letter grading.

174. Physical Assessment. (4) Lecture, four hours; laboratory, three hours. Prerequisites: courses 3, 13. Designed to provide in-depth review and synthesis of physical assessment skills and knowledge covering lifespan. Individual study, use of audiovisual aids, physical assessment laboratory, and required text are mandatory. Letter grading.

177. Physical Health Nursing. (6) Lecture, three hours; clinical, three hours. Theoretical content focuses on health promotion and disease prevention at level of communities, populations, and health policy institutions, and public service agencies. Clinical practicum activities include health promotion and disease prevention at level of communities, populations, and health policy institutions, both domestically and globally. Letter grading.

175. Physical Assessment for Advanced Practice. (4) Lecture, three hours; laboratory, three hours. Comprehend the physical assessment skills and knowledge covering lifespan and in diverse populations. Emphasis on history-taking related to general health status and specific complaints, as well as development of new knowledge through technical individual study, use of audiovisual aids, physical assessment skills practice in laboratory, and required text are mandatory. Letter grading.

188. Special Topics in Nursing. (4) Lecture, three hours; discussion, one hour. Limited to junior/senior Nursing majors. Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit. Individual contract required. P/NP or letter grading.

196. Research Apprenticeship in Nursing. (2 to 4) Tutorial, four hours per week per unit. Limited to juniors/seniors. Entry-level research apprenticeship for upper-division students under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

197. Individual Studies in Nursing. (2 to 4) Tutorial, one hour. Limited to junior/senior Nursing majors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Nursing. (2 to 4) Tutorial, one hour. Individual contract required. P/NP or letter grading.

Graduate Courses

202. Philosophy of Nursing Science. (4) Lecture, four hours. Focus on philosophy of nursing science by exploring genealogies of thought that underpin epistemological, historical, ethical, and cultural assumptions for nursing knowledge. Analysis of contemporary schools of thought (modern and postmodern) in relation to nursing scholarship as well as role of nurse scientist as leader in policy development in greater health care milieu. Letter grading.

204. Research Design and Critique. (4) Lecture, 90 minutes; discussion, 90 minutes. Complex research designs and analysis of multiple variables and research utilization. Emphasis on techniques for control of variables, data analysis, and interpretation of results. Focus on depth of understanding of interrelationships among theoretical frameworks, design, sample selection, data collection instruments, and data analysis techniques. Content discussed in terms of clinical nursing research problems and application to clinical settings. Letter grading.

205A. Introduction to Qualitative Methods in Research. (4) Lecture, four hours. Requisites: course 202. Introduction to qualitative research design in nursing science. Examination of major methodologies that guide qualitative research in relation to various strategies for data collection (interviews, participant observation, focus groups), data analysis, and data interpretation. Scientific rigor and ethical concerns for research with human participants critically examined. Letter grading.

205B. Advanced Qualitative Research: Grounded Theory Methodology I. (4) Lecture, four hours. Requisites: course 205A or equivalent as approved by instructor. Students design and implement qualitative project study based on grounded theory methodology. Synthesize research findings with grounded theory as guide to recruit small sample, collect data through interviews and observations, and simultaneously analyze data through inductive coding and theoretical sampling (constant comparison). Application of principles of constant comparison and examination of key elements of self-reflexivity and research ethics. Letter grading.

205C. Advanced Qualitative Research: Grounded Theory Methodology II. (4) Lecture, four hours. Requisites: course 205B or equivalent. Students design and implement qualitative project study based on grounded theory methodology. Synthesize research findings with grounded theory as guide to recruit small sample, collect data through interviews and observations, and simultaneously analyze data through inductive coding and theoretical sampling (constant comparison). Application of principles of constant comparison and examination of key elements of self-reflexivity and research ethics. Letter grading.

206A. Nursing Concept Development. (2) Lecture, two hours. Requisites: course 202 or philosophy of science (may be taken concurrently), four units of nursing theory. Examination of history of conceptual and theoretical thinking on health and illness. Identification of conceptual issues that continue to influence development of nursing knowledge and nursing science. Application of skills fundamental to concept analysis and development in nursing and use in nursing research and theory. Letter grading.

206B. Nursing Theory Development. (2) Lecture, two hours. Requisites: courses 202 or philosophy of science (may be taken concurrently), 206A. Preparation: 4 units of nursing theory. Critical analysis of role of theory and theoretical frameworks in developing nursing research. Application of skills fundamental to development of theory in nursing and integral to use of theory in nursing research. Letter grading.

207. Quantitative Research Designs of Clinical Phenomena. (3) Lecture, two hours; discussion, one hour. Requisites: courses 202, 206A, 210A, 210B, Biostatistics 100B. Introduction to array of quantitative research study designs. In-depth examination of dynamic interaction between research question and process and theoretical approaches to experimental- and many quasi-experimental- and non-experimental- study designs. Examination of potential threats to validity of and other design characteristics that are associated with research-study designs. Letter grading.

209. Human Diversity in Health and Illness. (4) Lecture, four hours. Human diversity in response to illness that nurses diagnose and treat, centering on culture and human belief systems associated with diverse orientations related to ethnicity and gender. Provides conceptual base that nurses can use in clinical practice, research, teaching, and administration. Letter grading.

210. Critical Review of State of Science in Nursing Research. (3) Lecture, three hours. Requisite: doctoral standing or consent of instructor. In-depth exploration of state of science for health service, biological, vulnerable populations, and biobehavioral topics. Students explore research on particular phenomena, analyze current and historical scholarly findings in literature, critique significance of focus on this phenomenon for nursing promotion of social and meaningful gaps in knowledge through systematic review of research literature, and provide recommendations for future nursing research in biologic, biobehavioral, vulnerable populations, and health services research. Letter grading.

210B. State of Science in Nursing: Critical Synthesis of Literature. (3) Lecture, three hours. Requisite: doctoral standing or consent of instructor. In-depth analysis of published research in health service, biological, vulnerable populations, and biobehavioral topics. Students deepen and refine understanding of state of science and scholarship relevant to research questions. Provides broad analysis of identified gaps in current knowledge through advancing systematic review, critique, and synthesis of research literature. Letter grading.

211. Women’s Health Primary Care. (2 to 4) Lecture, three hours; discussion, one hour. Theory and research on assessment and management of women’s health issues during reproductive years. Clinical topics include gynecology, family planning, pregnancy, and parenthood, and issues related to prevention and promotion of women during reproductive years in primary care settings. Letter grading.

212. Family Healthcare Perspectives. (2) Lecture, two hours. Overview of conceptual frameworks related to contemporary family structure and functioning, with particular emphasis on health. Family is defined broadly to include nontraditional families; consideration of cross-cultural views of families as well. Identification of limitations of current theory and research related to family study and applicability of current knowledge to various problems encountered in care of families. Letter grading.

216A-216B-216C. Adult/Gerontology Concepts for Advanced Practice Registered Nurses. (3) Lecture, four hours. Requisites: courses 202, 231. Corequisite for course 216A: course 224. Course 216A is requisite to 216B, which is requisite to 216C. Assessment and management of health problems affecting adult/gerontology population from late adolescence to senescence in acute care settings. Synthesis of knowledge from advanced courses
in pathophysiology, pharmacotherapeutics, health promotion, and evidence-based psychosocial care and cultural constraints. Letter grading.

220. Theories of Instruction and Learning in Nursing. (3) Lecture, two hours. Theories of learning, curriculum and program development, and principles and techniques of evaluation. Examination of educator role of advanced practice nurse in variety of settings and with diverse cultural and socioeconomic groups. Opportunities provided for skill development in use of computer-based information systems and development of instructional aids. Letter grading.

224. Advanced Pharmacology for Advanced Practice Registered Nurses. (3) Lecture, five hours. Requires: course 221A. Basic pharmacological principles in additional to clinical knowledge and skills necessary for patient-centered care with stable acute or chronic conditions. Letter grading.

225A-225B. Advanced Pharmacology I, II (3–2) Lecture, three hours (course 225A) and two hours (course 225B). Lecture, five hours. Requisite: course 225B. Basic pharmacological principles in addition to clinical knowledge and skills necessary for patient-centered care with stable acute or chronic conditions. Focus on major pharmacotherapeutics to include mechanisms of action, pharmacokinetics, indications, and adverse effects. Discussion of quality and safety of pharmacological interventions in clinical practice, with emphasis on collaboration and communication of pharmacists and evidence-based practice (e.g. current guidelines). Letter grading.

229A-229B-229C. System-Based Healthcare I, II, III (1–1–1) Seminar, two hours. System-based healthcare where students focus on context of medical decision-making, including team, hospital, culture, politics, economics, law, and personal bias. Topics include legal, political, and moral aspects of sexual assault and abuse, and health disparities. Letter grading.

230B. Advanced Pathophysiology II. (2) Lecture, two hours. Requisite: course 230A. In-depth examination of pathophysiologic processes that underlie human illness and disease across all body systems including cardiovascular, renal, endocrine, musculoskeletal, respiratory, gastrointestinal, immunologic, and nervous systems. Letter grading.

231. Advanced Pathophysiology for Advanced Practice Registered Nurses. (4) Lecture, four hours. In-depth examination of pathophysiological processes that underlie human illness and disease, with detailed study of key concepts in primary care. Letter grading.

232. Human Responses to Aging and Chronic Illness. (2 or 4) Lecture/discussion, four hours. Focus on understanding human responses to aging and chronic illness. Letter grading.

233. Human Responses to Chronic and Critical Care. (3) Lecture, four hours. Focus on understanding human responses to chronic and critical care. Letter grading.

234. Pediatric Primary Care for Family Nurse Practitioners. (4) Lecturer, three hours. Requisite: course 200. Preparation of family nurse practitioners to assume responsibility for health promotion and illness prevention, and maintenance and management of common developmental, behavioral, acute, and chronic health problems. Letter grading.

235. Assessment and Management in Pediatric Acute Care I, II (2–3) Lecture, three hours. Two-course sequence. Focus on the student as a family nurse practitioner. Focus on child health assessment, diagnosis, and management of common pediatric conditions. Letter grading.

237A-237B. Assessment and Management in Pediatric Acute Care I, II (3–3) Lecture, three hours. Two-course sequence. Focus on the student as a family nurse practitioner. Focus on child health assessment, diagnosis, and management of common pediatric conditions. Letter grading.

238A. Assessment and Management in Pediatric Primary Care. (4) Lecture, four hours. Requisite: course 237B. Focus on child health assessment, diagnosis, and management of common pediatric illnesses. Letter grading.

239A-239B-239C. Adult/Gerontology Primary Healthcare for Advanced Practice Registered Nurses I, II, III (4–4–4) Lecture, four hours. Requisites: courses 200, 224, 231. Course 239A is requisite to 239B, which is requisite to 239C. Focus on assessment, diagnosis, and management of common episodic and chronic adult health problems and conditions, including urgent care, for family and adult/gerontology primary care. Letter grading.

242F. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (4) Lecture, four hours. Biobehavioral research from variety of disciplines, including nursing, for application to treatment of neurological dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a biobehavioral nursing approach. Letter grading.

243. Theoretical Foundations of Clinical Nurse Specialist Practice. (4) Lecture/discussion, four hours. Theoretical foundations of clinical nurse specialist practice, including systems theory, behavioral theory, and decision-making models of research utilization. Emphasis on application of relevant theories to clinical nurse specialty practice roles in healthcare systems through case-study analysis, with emphasis on application in settings which include culturally diverse populations. Letter grading.

245. Meeting Health-Related Needs in Underserved Populations. (4) Lecture, four hours. Examination of systematic barriers within healthcare settings that limit access to those in greatest need of culturally appropriate interventions. Unmet healthcare needs often result in health disparities and compromised quality of life among underserved, low income, and marginalized populations. Analysis of current evidence-based strategies and interventions designed to address these clinical problems and improve outcomes in culturally competent manner. Preparation of students to function within context of healthcare financing, limited access, and public policy. Letter grading.

250. Ethical Issues, Social Justice, and History of Nursing. (5) Lecture, five hours. Interplay of social, economic, cultural, and historical forces that have shaped and continue to influence the U.S. form background for study of ethical issues related to role of nurses as advocates for social justice and safe, effective, high-quality patient-centered care in contemporary society. Situated within context of history of nursing, with emphasis on human rights, civil rights, and patient rights. Discussion of role of professional nursing within healthcare arenas in relation to ethical principles, cultural competence, evidence-based practice, and human diversity. Letter grading.

255. Global Health Elective: Globalization, Social Justice, and Human Rights. (2 or 4) Lecture, two hours. Exploration of theories, issues, debates, and pedagogy associated with globalization, social justice, and human rights and how these perspectives influence human health and well-being. Provides students with unique opportunity to explore these topics within classroom, via Internet and other technologies, and in other classrooms located around globe. Students, through collaborative projects around world, reflect on how globalization shapes and transforms local communities and national cultures. Concurrently scheduled with course C155. Letter grading.

256. Secondary Prevention. (4) Lecture, four hours. Requisites: courses 252A, 252B. Focus on prevention of chronic disease and evidence-based secondary prevention screening strategies for early detection of disease to reduce morbidity and mortality across lifespan and to develop nursing care interventions. Use of integrated conceptual frameworks addressing individual, family, community, health care systems factors, social environmental systems, and policies to identify factors influencing screening and resulting health disparities in order to adapt plans for care. Nursing interventions for promoting screening address barriers and facilitators, controversies, as well as utilize existing strengths and supportive mechanisms and orientations. Discussion and application of specific micro-level factors including screening for physical health and mental health disorders along with associated behavioral factors and macro-level, built environment influences. Letter grading.

256. Professional Role Issues in Advanced Practice Registered Nursing. (3) Lecture, three hours. Requisites: courses 411A or 411B. Focus on development of organizational, legal, ethical, and healthcare policy issues in relation to delivery of healthcare services by advanced practice registered nurses in evolving healthcare system. Letter grading.

267. Health Care Policy. (3) Lecture, three hours. Requisites: for MEON students, courses 266, 268, 269; for dual NP/CNS students, courses 245, 269, 445. Analysis of healthcare policies and how policies impact patient outcomes, clinical practice, health care
delivery, and clinician well-being. Concepts related to policy making, formulating health care policy, how to affect political processes, and stakeholder involvement in policy decision making are covered. Development of understanding of increasing levels of public, governmental, and third party participation in and scrutiny of health care system. Discussion of assembly bills effect on nursing, emphasis on clinical nurse leadership and advocacy. Satisfies course requirement for CNL certification. Letter grading.

286. Variable Topics in Nursing. (4) Lecture, three hours; discussion, one hour. Variable topics; consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit. SU grading.

291A. Applied Statistics and Analytics for Health Sciences Research I. (4) Lecture, three hours; labora- tory, one hour. Requisite: doctoral standing or consent of instructor, introductory statistics course. Introduction to applied statistics that gain skills to understand, conduct analyses, and interpret results of analyses to answer simple comparative and relationship research questions relevant to health science research. Topics include general inference and probability, distributions, effect size, analyses for description, data visualization, parametric and nonparametric tests for simple comparisons and relationships, and research design and management. Students conduct analyses with statistical software and interpret results from their analyses and from research reports in literature. Letter grading.

291B. Applied Statistics and Analytics for Health Sciences Research II. (4) Lecture, three hours; discus- sion, one hour. Requisites: course 291A, doctoral standing, or consent of instructor. Focus on linear statistical models and other analytic techniques to examine complex relationships and comparisons. Approach primarily from applications and interpretation perspective. Students evaluate statistical/analytical results from research literature, analyze data using quantitative multivariate techniques, and interpret results. Introduction of concepts and interpretation of broad range of multivariate statistical and analytical approaches is provided (linear and logistic regression and survival models), factor analysis, multi-factor and repeated measures analysis of variance, mixed effects models, machine-learning analytic techniques for big data, and other selected approaches. Students utilize several of approaches to analyze research data. Letter grading.

291C. Special Topics in Applied Statistics and Ana- lytics for Health Sciences Research III. (4) Lecture, three hours; discussion, one hour. Requisites: course 291B, doctoral standing, or consent of instructor. Focus on statistical models and analytic techniques to examine complex relationships and comparisons. Approach primarily from applications and interpretation perspective. Students evaluate analytical results from research literature, data sets and interpret results using selected quantitative approaches. Introduction of concepts and interpretation of results from selected quantitative models can address complex nursing and other health sciences research questions. Approaches to be studied include selected topics from mediation models, interactions and effect modification, structural equation modeling, mixed effect models, multilevel modeling, mixed data, secondary analysis, weighted survey data, meta analysis, genomic statistics, artificial intelligence/machine learning approaches for data modeling. Letter grading.

295A. Grant Writing I: Scientific Proposal Develop- ment. (3) Seminar, three hours. Requisites: courses 202, 205A, 206A, 210A, Biostatistics 100B. Introduction to grant writing, with focus on preparing application for National Student Research Award (NSRA) or similar award. Discussion of requirements of various extramural and specialty organization funding sources and identification of evaluation criteria. Emphasis on preparing application to facilitate doctoral and postdoctoral research, research activi- ties, and professional development. Letter grading.

295B. Grant Writing II: Scientific Proposal Develop- ment. (4) Seminar, four hours. Requisites: courses 202, 205A, 206A, 210A, Biostatistics 100B. Developed to design proposals to request for proposals (RFPs) from federal or state level and non-profit organizations. Incorporation of requirements of various extramural and specialty organizations, intramural funding sources, and evaluation criteria in grant writing. Emphasis of role of external funding to facilitate doctoral and post-doctoral research, research activity, and professional development. Letter grading.

295C. Nursing Science Seminars. (2) Seminar, two hours. Requisite: course 295A. Introduction to grant writing, with focus on preparing applications for National Student Research Award. Discussion of requirements of various extramural and specialty organization funding sources, and evaluation criteria identified. Role of external funding to facilitate doctoral and post-doctoral research, research activities, and professional development. SU grading.

M298. Interdisciplinary Response to Infectious Dis- ease Emergencies: Nursing Perspective. (4) (Same as Community Health Sciences M256, Medicine M210A). Lecture, three hours; discussion, one hour. Designed to instill in professional students ideas of common emergency health problems and coordinated response, with specific at- tention to bioterrorism. Examination of tools to help students prevent, detect, and intervene in infectious disease emergencies. Interdisciplinary sessions also attended by students in Schools of Dentistry, Medicine, and Public Health during weeks two through five. Letter grading.

299A. Ethical Conduct in Research. (2) Seminar, two hours. Examination of historical and current issues of ethical integrity at each stage of research process in relation to scientific underpinnings and responsibilities of authorship, data management, and handling of misconduct in research with both human and animal subjects. Systematic instruction on ethical and responsible conduct of research and protection of research subjects as students create their own application for research. Letter grading.

299B. Nursing Research Mentorship. (1) Seminar. Discussion of nursing research, three hours. Requisites: courses 202, 205A, 206A, 207, 208, 210A, 210B, 295A, Biostatistics 100A, 210A. Special topics course for doctoral students who have completed required coursework and are ready to advance to doctoral candidacy. Discussion topics range from identifying areas of research/laboratory experiences, and engagement in planning for and evaluation of students’ mentored experiences on weekly basis. Letter grading.

299C. Nursing Research/Laboratory Experiences. (4) Seminar/discussion, one hour; research/laboratory, three hours. Requisites: courses 202, 206. Seminars and research/laboratory-based experiences to assist students to prepare for the dissertation, with focus on research methodology and mentorship. S/U grading.

299D. Nursing Education Seminar. (2) Seminar, two hours. Requisite: doctoral standing. Seminar to assist students to prepare for careers in academic settings, with focus on teaching. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Sem- inar, to be arranged. Preparation: apprentice per- sonnel development as teaching assistant, associate, or fellow. Teaching apprentice under active guid- ance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. SU grading.

Clinical Scholarship for Evidence-Based Pract- ice. (3) Lecture/seminar, three hours. Requisite: doctoral standing. Provides interdisciplinary experiences in sciences of quality improvement and patient safety within health care settings. Addresses history and evolution of quality movement, theories and thought leaders, current quality of care issues, emerging health disparities and unmet needs. Students are exposed to professional services, research and innovations, national and international centers and organizations, and academic/specialty organizations, intramural and specialty organizations, intramural funding sources, and evaluation criteria in grant writing. Emphasis on role of external funding to facilitate doctoral and post-doctoral research, research ac- tivity, and professional development. Letter grading.

406. Clinical Prevention and Population Health. (3) Lecture/seminar, three hours. Requisite: doctoral standing. Enables DNP students to integrate, synthe- size, and apply key concepts introduced in previous coursework in order to incorporate core components into practice. Evidence-based practice, clinical preven- tive service and health promotion, health systems policy, and population and community aspects of practice are emphasized through focus on current health issues. Letter grading.

407. Clinical Innovation and Systems Leadership for Quality Improvement. (3) Lecture/seminar, three hours. Requisite: doctoral standing. Provides interdisciplinary perspective on organizational leadership and systems thinking that is focused on organizational leadership and systems thinking in health care. Students learn to formulate and execute strategies in related to scientific underpinnings for DNP practice. Letter grading.

409. Analytical Methods for Evidence-Based Pract- ice. (3) Lecture/seminar, three hours. Requisite: doctoral standing. Advanced concepts on research methods and measurement strategies that are applica- ble to support advanced practice practice. Evaluate, and utilize data from various sources in- cluding research, quality improvement initiatives, and implementation of technology. Students are introduced to the use of strategic planning, organizational culture, program de- velopment and implementation. Special focus placed on role of DNP leader in developing and leading clin- ical quality and safety initiatives. Letter grading.

410. Analytical Methods for Evidence-Based Pract-ice. (3) Lecture/seminar, three hours. Requisite: doc- toral standing. Advanced concepts on research methods and measurement strategies that are applica- ble to support advanced practice practice. Evaluate, and utilize data from various sources in- cluding research, quality improvement initiatives, and implementation of technology. Students are introduced to the use of strategic planning, organizational culture, program de- velopment and implementation. Special focus placed on role of DNP leader in developing and leading clin- ical quality and safety initiatives. Letter grading.

411. Information Technology for Nursing Practice. (2) Lecture, two hours. Requires: doctoral standing. Prepares students to obtain knowledge and skills related to information technology and patient care technology. Preps DNP graduates to apply new knowledge, manage individual and aggregate information, and assess efficacy of patient care technology appropriate to specialized area of practice. Allows students to use information technology to implement quality improvement initiatives, support practice administrative decision-making. Students gain ability to perform basic computer skills to appropriately process data and extract from practice systems and databases. Letter grading.

416A-416B. Adult/Gerontology Acute Care Nurse Practitioner Practicum I, II. (2-6) Clinic practicum, six hours (course 416A) and 16 hours (course 416B). Enforced requisite: course 440. Course 416A is enforced to 416B. Assessment and therapeutic interventions for selected health problems in adult/gerontology populations. Developmental, health promotion, and maintenance needs of clients in relation to family, social, and cultural structures. Students complete minimum of 160 direct clinical hours. Letter grading.

416C-416D. Adult/Gerontology Acute Care Nurse Practitioner Practicum III, IV. (6 each) Clinic practicum. Course 416C is enforced to 416D. Clinical experiences for the third and fourth of five clinical practica designed to prepare family nurse practitioners with knowledge, skills, and competencies necessary to assume role of primary healthcare provider for families and individual patients across lifespan. Use of family-focused framework of care for those who experience common acute and chronic illness, disability, and developmental transitions. Emphasis on health promotion, maintenance, and risk reduction interventions across wide range of diverse populations. Focus on context of community, cultural awareness, and practice in interdisciplinary teams. Students complete minimum of 80 direct clinical hours. Letter grading.

429B. Family Nurse Practitioner Practicum II. (4) Clinic practicum, 12 hours. Requires: course 429A. Second of five clinical practica designed to prepare family nurse practitioners with knowledge, skills, and competencies necessary to assume role of primary healthcare provider for families and individual patients across lifespan. Use of family-focused framework of care for those who experience common acute and chronic illness, disability, and developmental transitions. Emphasis on health promotion, maintenance, and risk reduction interventions across wide range of diverse populations. Focus on context of community, cultural awareness, and practice in interdisciplinary teams. Students complete minimum of 80 direct clinical hours. Letter grading.

429C. Adult/Gerontology Acute Care Nurse Practitioner Practicum III, IV. (6-9) Clinic practicum, 18 hours (courses 429C, 429D) and 27 hours (course 429E). Requires for course 429C; course 429B; for 429D: courses 429C, 429E; for 429E: fourth, fifth of five clinical practica designed to prepare family nurse practitioners with knowledge, skills, and competencies necessary to assume role of primary healthcare provider for families and individual patients across lifespan. Use of family-focused framework of care for those who experience common acute and chronic illness, disability, and developmental transitions. Emphasis on health promotion, maintenance, and risk reduction interventions across wide range of diverse populations. Focus on context of community, cultural awareness, and practice in interdisciplinary teams. For courses 429C and 429D, students complete minimum of 160 direct clinical hours; for course 429E, they complete minimum of 240 direct clinical hours. Letter grading.

438A. Primary Care Pediatric Nurse Practitioner Clinical Practicum I, I (3 to 4) Clinic practicum, 10 to 12 hours. Corequisite: course 238A. Comprehensive assessment and anticipatory guidance for children and families to promote child wellness. Clinical practicum, seminar, and other learning activities demonstrate application and evaluation of evidence-based research and clinical guidelines in promotion of pediatric wellness. Students complete minimum of 100 direct clinical hours. Letter grading.

438B. Primary Care Pediatric Nurse Practitioner Clinical Practicum II. (3 to 6) Clinic practicum, 10 to 12 hours. Corequisite: course 238A. Advanced comprehensive assessment, diagnosis, and management of common pediatric illnesses and disabilities. Students complete minimum of 160 direct clinical hours. Letter grading.

438C. Primary Care Pediatric Nurse Practitioner Clinical Practicum III. (6 to 10) Clinic practicum, 20 to 32 hours. Corequisite: course 238C. Third course in three clinical practicum sequence with emphasis on advanced comprehensive assessment, diagnosis, and management of chronic and acute pediatric illnesses in ambulatory setting. Clinical practicum, seminar, and other learning activities demonstrate application and evaluation of evidence-based research and clinical guidelines in pediatric chronic and acute illnesses. Letter grading.

439B. Adult/Gerontology Primary Care Nurse Practitioner Practicum II. (6) Clinic practicum, 18 hours. Requires: course 439A. Corequisite: course 239B. Continuation of course 439A for advanced practice nurses, with emphasis on nursing management of acute and chronic health problems in selected populations. Developmental needs of clients in relation to family, social, and cultural structures. Students complete minimum of 80 direct clinical hours. Letter grading.

439C. Adult/Gerontology Primary Care Nurse Practitioner Practicum III. (6) Clinic practicum, 18 hours. Requires: course 439A. Corequisite: course 239C. Third clinical practicum course for advanced practice nurses, with focus on nursing assessment and intervention in common illness-associated symptoms and conditions. Developmental, health promotion, and maintenance needs of clients in relation to family, social, and cultural structures. Students complete minimum of 160 direct clinical hours. Letter grading.

439D. Adult/Gerontology Primary Care Nurse Practitioner Practicum IV. (6) Clinic practicum, 18 hours. Requires: courses 239C, 439C. Residence in advanced practice role where student assumes primary responsibility for assessment, diagnosis, management, and evaluation of care provided to children and families in acute care setting under supervision of faculty and preceptors. Complete minimum of 220 direct clinical hours. Letter grading.
knowledge in advanced practice role. Students complete minimum of 160 direct clinical hours. Letter grading.

439E. Adult/Gerontology Primary Care Nurse Practitioner Practicum V. (5) Clinic practicum, six hours. Prerequisites: courses 439A through 439D. Designed to prepare adult/gerontology primary care nurse practitioners with knowledge, skills, and competencies necessary for role of primary health care providers for young adults, adults, and older adults. Use of patient-centered framework of care for those who experience common acute and chronic illness, disability, and complex health conditions. Emphasis on diverse clinical settings to implement evidence-based practice guidelines and to critically analyze and adapt healthcare interventions based on individualized assessments, with emphasis on context of community, cultural awareness, and practice in interdisciplinary teams. Students complete minimum of 240 direct clinical hours. Letter grading.

441. Advanced Pediatric Diagnostics. (3) Lecture/clinical practicum, three hours. Requisite: course 441. Designed for advanced-care pediatric nurse practitioner students. Advanced diagnostic reasoning and skills in management of infants, children, and adolescents with complex acute, critical, and chronic health conditions. Focus on evidence-based knowledge for pediatric assessment and management of selected health conditions as attributes of diagnostic tests, test interpretation, and invasive procedures to stabilize or monitor acute, critical, or chronic patient. Lectures and other learning activities demonstrate application and evaluation of evidence-based research and clinical guidelines in pediatric population. Letter grading.

444. Adult/Gerontology Acute Advanced Assessment and Clinical Diagnosis II. (2) Clinic practicum, six hours. Enforced requisite: course 440. Practice foundations for advanced physical assessment and clinical diagnostic reasoning, with focus on diagnostic or therapeutic or therapeutic-related complications, and follow-up care in clinical setting. S/U grading.

462. Maternity Nursing. (5) Lecture, three hours; clinical, six hours. Prerequisites: courses 204, 260, 465A, 465B, 465C. Pathophysiological and psychosocial aspects of assessment and management for selected acute and emergent problems of maternity-newborn patients, clinical decision making in relation to pathophysiological and psychosocial aspects of assessment and management of newborn infants, children, and adolescents with complex acute, critical, and chronic health conditions. Focus on evidence-based knowledge for clinical decision making in relation to pathophysiological and psychosocial aspects of assessment and management of newborn infants, children, and adolescents with complex acute, critical, and chronic health conditions. Focus on evidence-based knowledge for clinical decision making in relation to pathophysiological and psychosocial aspects of assessment and management of selected health conditions as attributes of diagnostic tests, test interpretation, and invasive procedures to stabilize or monitor acute, critical, or chronic patient. Lectures and other learning activities demonstrate application and evaluation of evidence-based research and clinical guidelines in pediatric population. Letter grading.

465B. Tertiary Prevention and Care of Medical-Surgical Patients and Families. (6) Lecture, four hours; clinical, six hours. Requisites: courses 225A, 230A, 230B, 252A, 252B, 465A. Pathophysiological and psychosocial aspects of assessment and management for selected acute and emergent problems of adult patients with complex illness including multifaceted assessment, health history, and diagnostic reasoning skills, emphasis on social, cultural, and developmental influences. Integration of knowledge of pathophysiology, diagnostics, pharmacology, therapeutic interventions, and communication concepts as applied to care of adult patients and their families. Emphasis on concept of nurse as scientist with critical and contextual thinking skills and diagnostic reasoning. Integration of knowledge of pathophysiology, pharmacology, stress and adaptation, adult development theory, therapeutic interventions, patient safety, evidence-based practice, and concepts as applied to care of complex medical-surgical patients, with complex and comorbid conditions, and their families. Concept of nurses as bedside scientists, with emphasis on critical and contextual thinking skills and diagnostic reasoning. Nursing process, ethical principles, clinical research, evidence-based practice, and clinical thinking that maximize patient safety and quality care for complex and comorbid conditions. Letter grading.

467. Clinical Internship: Integration. (12) Clinical, 36 hours. Requisites: courses 268, 461, 462, 463, 464, 465A, 465B, 465C. Supervised practicum experience within clinical setting as part of interdisciplinary clinical care team, with focus on application of theory in clinical setting and interpretation of assessment and diagnostic data for purpose of planning, implementing, and evaluating course of care for patients, both as individuals and cohorts. Students design and complete quality improvement project that contributes to unit’s goals and objectives. Students implement advanced-level assessment, health history, and diagnostic reasoning skills, and emphasis on social, cultural, and developmental influences. Integration of knowledge of pathophysiology, diagnostics, pharmacology, therapeutic interventions, family-centered care, and ethical and legal principles as applied to pediatrics. Students demonstrate leadership, evidence-based practice, problem-solving, and critical thinking strategies to improve patient safety, care quality, and health outcomes. Supervised practicum experience in interdisciplinary team in clinical interpretation of assessment and diagnostic data for purpose of planning, implementing, and evaluating nursing care in pediatrics. Emphasis on collaborative practice across complex health care systems. Integration of information management and technology to facilitate effective communication and support clinical decision making. Letter grading.

465A. Foundational Concepts for Tertiary Prevention and Care of Medical-Surgical Patients and Families. (4) Lecture, three hours; clinical, three hours. Requisites: courses 174A, 230A, 250, 254A. Examination of nursing management of medical-surgical patients with common health problems of adults. Theory content in basic assessment, health history, and diagnostic reasoning for selected health problems, with emphasis on social, cultural, and developmental influences. Integration of basic knowledge of pathophysiology, stress and adaptation, adult development theory, therapeutic interventions, and communication concepts as applied to care of medical-surgical patients and their families across adult lifespan. Introduction to concept of nurse as bedside scientists, with emphasis on critical and contextual thinking skills and diagnostic reasoning. Integration of knowledge of pathophysiology, diagnostics, pharmacology, therapeutic interventions, and communication concepts as applied to care of medical-surgical patients and their families. Letter grading.

470A. DNP Scholarly Project Course I: Project Conceptualization and Planning. (2) Lecture, two hours; clinical, four hours. Requisites: courses 202, 402, 403, 404, 405, 408. Preparation: successful completion of first year of DNP didactic coursework. DNP students gain knowledge, skills, and abilities necessary to develop evidence-based project proposal and plan, which addresses practice issue affecting chosen microsystem. Provides structured didactic content and application of student’s DNP scholarly project. Letter grading.

470B. DNP Scholarly Project Course II: Project Proposal. (8) Lecture, two hours; clinical, six hours. Requisite: course 470A. DNP students develop full DNP scholarly project proposal that reflects synthesis of student’s knowledge base, conceptual framework and work in an area of interest or expertise under direction of faculty mentor. Provides structured didactic content and application of student’s DNP scholarly project. Letter grading.

470C. DNP Scholarly Project Course III: Project Implementation. (8) Lecture, two hours; clinical, six hours. Requisite: course 470B. Continued development of evidence-based practice project, and continues to implement chosen DNP scholarly project proposal. Students assume role of leadership in interprofessional collaboration, consultation, and partnership. Students receive feedback from faculty committee chair and peer feedback as they become engaged in microsystem where...

Overview

The medical student program in the Department of Obstetrics and Gynecology is designed to provide students with firm background in the essentials of women’s reproductive health. The educational objectives are set forth by the Association of Professors of Gynecology and Obstetrics (APGO). Through a combination of didactic instruction and supervised clinical experience, students acquire the relevant clinical skills of history taking and physical examination and learn reproductive physiology from infancy to the postmenopausal period; antepartum, intrapartum, and postpartum obstetric care; and recognition and management of various gynecologic disorders. Students work in ambulatory clinics and on inpatient services during a four-week core clerkship. Greater depth of experience is provided by elective clerkships during the fourth year that emphasize subspecialties such as maternal/first medicine, reproductive endocrinology and infertility, gynecologic oncology, and reproductive health.

For more details on the Department of Obstetrics and Gynecology, see the department website.

Obstetrics and Gynecology

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

199. Directed Research in Obstetrics and Gynecology. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Overview

Ophthalmology is the medical science that encompasses knowledge concerning the eyes and the visual system. Derived from many basic and clinical fields, this knowledge must be synthesized by the physician and applied to the prevention, diagnosis, medical management, and surgical therapy of ocular disease.

In response to the steadily increasing incidence and growing importance of ocular disorders, the Department of Ophthalmology as well as the Stein Eye Institute and Doheny Eye Institute are closely coordinated to form a comprehensive center for research in the sciences related to vision, for the care of patients with disease of the eyes and related structures, and for education in the broad field of ophthalmology, all with community outreach.

The Department of Ophthalmology provides instruction and electives to medical students during the first, second, third, and fourth years at the Stein Eye Institute and the Doheny Eye Centers UCLA. Through lectures, demonstrations, discussions, and the opportunity to observe patients and review data on cases with a variety of ocular conditions, students gain knowledge and experience in ophthalmology.

For more details on the Department of Ophthalmology and courses offered, see the department website.

Ophthalmology faculty information is available form the department.
Overview

Oral biology is the area of knowledge that deals with the development, structure, and function of the oral tissues and their interrelationships with other organ systems in normal and disease states. It is a multidisciplinary field that includes cell biology, bone biology, molecular biology, biochemistry, neuroscience, immunology, microbiology, and virology. The objective of the graduate program is to provide students with a sound foundation in these areas in order to pursue an academic or research career.

Graduate Study

A combined DDS/Oral Biology MS or PhD, or advanced certificate training/Oral Biology MS or PhD, is also offered.

Graduate Major

Oral Biology MS, PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Oral Biology

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP or letter grading.

Upper-Division Course

205A. Methodology in Research Design and Data Analysis. (2) Lecture, two hours. Designed for graduate oral biology students. Integration of didactic lectures in descriptive and inferential statistics and in research design (emphasis on experimental design), presentations of statistical software, and open discussion of specific needs of oral biology students when they design their research. Letter grading.

205C. Advanced Seminar: Comparative Effectiveness and Evidence-Based Research. (2) Seminar, one hour; discussion, one hour. Requisites: courses 205A, 205B (may be taken concurrently). Hands-on experience in process of systematic review, as shared mechanism in comparative effectiveness and evidence-based research. Specialized topics include level and quality of evidence assessments, acceptable sampling analysis, meta-analysis and meta-regression, and Bayesian-derived decision making following utility versus logic models. Students work on examples of their choice and interest in oral biology, medicine, and orthodontics. Letter grading.

206. Current Topics in Oral Immunology. (2) Lecture, two hours. Preparation: basic immunology. Discussion and analysis of current research dealing with immunological issues related to oral health, including HIV, opportunistic oral infections, periodontal pathology, oral immunopathology, caries immunology, endodontic immunology, etc. Letter grading.

207. Development and Regeneration of Craniofacial Complex. (2) Lecture, two hours. Focus on cell biology and molecular mechanisms that direct formation of different vertebrate head structures during embryonic development, as well as their abilities to regenerate in adults. Examination of genetic and signaling regulation of craniofacial patterning, morphogenesis, cell differentiation, evolution, and stem cell-based organ regeneration, through both didactic lectures and critical reading of primary research literature. Letter grading.

208. Genomics and Proteomics in Oral Biology Research. (2) Lecture, one hour; discussion, one hour. Introduction to fundamentals and technical aspects of genomics and proteomics and analysis of data derived thereof. Discussion of implications and applications of genomics and proteomics in diagnostic protocols such as salivary diagnostics. Letter grading.

209. Scientific Ethics. (2) Seminar, two hours. Required course in scientific ethics for graduate students in Oral Biology MS and PhD programs and for NRSA trainees in School of Dentistry. Letter grading.

211. Biology of Temporomandibular Joint. (2) Lecture, two hours. Anatomy, histology, physiology, and biomechanics of temporomandibular joint (TMJ) and related musculature. Pain mechanisms, sensorimotor integration, and motor mechanisms in TMJ function, and current methods of TMJ imaging. S/U or letter grading.

212. Proseminar: Oral Biology Research. (2) Seminar, one hour; discussion, one hour. Focus on basic, translational, and clinical advances of salivary and related musculature. Genomics and proteomics and analysis of data derived thereof. Discussion of implications and applications of genomics and proteomics in diagnostic protocols such as salivary diagnostics. Letter grading.

Faculty Roster

Professors

Shen Hu, PhD, MBA
Anahid Jewett, MPH, PhD
Mo K. Kang, DDS, MS, PhD (Jack A. Weichman Professor of Endodontics)
Reuben H. Kim, DDS, PhD (Naomi and Jim Elision Endowed Professor)
Yong Kim, PhD, in Residence
Renate Lux, PhD
Diana V. Messadi, DDS, MMSc, DMSc
Ichiro Nishimura, DDS, DMSc, DMD
Igor Spigelman, PhD
Sotiris Tetradas, DDS, PhD
Cun-Yu Wang, DDS, PhD (Dr. No-Hee Park
Lux, PhD in Residence

Associate Professor

Alireza Moshaverinia, DDS, MS, PhD, FACP
David T. Wong, DMD, DMSc

Assistant Professor

Jimmy K. Hu, PhD

Adjunct Professor

Ki-Hyuk Shin, MS, PhD

Adjunct Associate Professor

Fang Wei, PhD

Professor of Clinical Dentistry

Fariba S. Younai, DDS
munology, bone biology, microbiology, cancer, and salivary genomics), followed by discussions led by course chair. Letter grading.

214. Current Research in Osteoimmunology. (2) Seminar, one hour; discussion, one hour. Exploration of oral bone biology and immunology and how both systems talk to each other. Topics include immune modulation of bone metabolism, osteoblastic niche for hematopoietic progenitors, adult bone marrow stem cell changes, and osteoimmunology in at-risk populations. Letter grading.

215A. Fundamentals of Immunology. (2) Lecture, two hours. Basic cellular and molecular mechanisms involved in responses mediated by immune effectors, with emphasis on immunopathology involved in autoimmunity, cancer, and immunodeficiency syndromes. Letter grading.

215B. Current Advanced Research Topics in Immunology. (2) Seminar, one hour; discussion, one hour. Overview of rapidly changing discoveries in very important field of immunology. Directed and student-led discussions of current cutting-edge research developments in immunology. Letter grading.

220. Integrative Biology and Biomaterials Science in Relation to Dentistry. (2) Lecture, one hour; laboratory, 90 minutes. Introduction to integrative biology and biomaterials science by bringing together diversity of disciplines that complement one another to unravel complexity of biology in biomaterials in relation to dentistry. Integration of bioengineering, materials science, cell biology, and dentistry. Fundamentals of materials science in relation to dentistry, stem cell biology, and knowledge necessary to participate in dental and biomedical research, innovation, and product development. Letter grading.

221. Advanced Dental Materials. (2) Lecture, one hour; laboratory, 90 minutes. Preparation of individuals for academic and research careers in dental materials science or broader area of biomaterials relevant to clinical dental practice. Fundamentals of dental materials and knowledge necessary to participate in research and product development. Introduction to materials science, with focus on major classes of materials used in dentistry, including polymers, metals, and ceramics, and providing up-to-date information on dental materials currently used in clinical dentistry. Letter grading.

228. Craniofacial Growth and Development. (2) Lecture, two hours. Preparation: strong background in histology, anatomy, and physiology. Students acquire, from scientific literature discussed in lecture/seminar format, advanced knowledge of relevant aspects of human biology as they relate to craniofacial growth and development. Craniofacial region. Students required to present seminars on assigned topics that aid their understanding and analysis of a given topic that has application to their specific and professional fields. Letter grading.

227. Dental Embryology and Histology. (2) Lecture, two hours. Description and interpretation of important stages in development of orofacial apparatus and histological features of its component tissues. Critique of scientific literature relevant to course content and analysis of current state of knowledge about selected features of orofacial apparatus that are of significance to clinical dental specialists. S/U or letter grading.

228A. Culture, Ethnicity, and Health: Implications for Oral Biology and Medicine. (2) Seminar, one hour; discussion, one hour. Examination of sociocultural, biologic, and genetic factors that influence health and well-being, experience and distribution of illness, prevention and treatment of disease, health disparities, human resource management, and utilization of public health systems. Theory, perspectives, and methods from public health sciences. Letter grading.

229B. Anthropological Perspectives on Global Health: Implications for Oral Biology and Medicine. (2) Seminar, one hour; discussion, one hour. What factors determine health, illness, and disease in global context, including political ecology of infectious diseases, child health issues, women’s health and reproductive health, global trade in legal and illegal drugs, demography and health transition, structural adjustment problems, and global climate change. Letter grading.

234. Seminar: Developmental Neuroendocrin-immunology. (2) Lecture, two hours. Designed for graduate students. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of the current literature on neuroimmune interaction from developmental perspective. S/U or letter grading.

273. Research in Clinical Immunology and Lymphology. (2) Lecture, one hour; discussion, one hour. Forum for discussion of cutting-edge topics in immunology and lymphology from clinical perspective. Emphasis on immune surveillance and lymphatic drainage of oral pathologies associated with AIDS and other diseases. Letter grading.

275. Molecular and Cell Biology for Oral Biology Graduate Students. (3) Lecture, two hours; literature review, one hour. Advanced course on prokaryotic and eukaryotic molecular and cell biology, with emphasis on applications in dental research. Letter grading.

19. Fial Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research of student majoring in or weekly, three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required. Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Course

199. Directed Research in Orthopaedic Surgery. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Orthopaedic Surgery 310-825-6557
Nicholas M. Bernthal, MD, Interim Chair
Sharon L. Hame, MD, Director, Medical Student Education

Overview

The medical student program in the Department of Orthopaedic Surgery is designed to provide students with experience in understanding the diagnosis and management of disorders of the musculoskeletal system. Through a combination of didactic instruction and supervised clinical experience, students acquire the clinical skills of history taking and physical examination of the musculoskeletal system. Diagnosis and orthopaedic management of bone and soft tissue trauma, skeletal development defects, tumor, spinal disorders, hand and foot disorders, and arthritis are primary objectives. Third-year students work in ambulatory clinics and in inpatient services during their core surgical clerkship. Fourth-year electives provide the opportunity for in-depth experience on rotations at the Reagan UCLA Medical Center and affiliated institutions and emphasize subspecialties such as joint replacement, sports medicine, orthopaedic oncology, metabolic bone disorders, hand and foot surgery, spinal surgery, and pediatric orthopaedics.

For more details on the Department of Orthopaedic Surgery and courses offered, contact the Education Office at 310-825-6557 or see the department website.

Orthopaedic Surgery faculty information is available from the department.

**Overview**

Pathology is the branch of medicine concerned with the causes and development of disease. Coursework is designed so that students gain an in-depth knowledge of cell and molecular biology, genetics, and disease mechanisms. Didactic instruction is complemented by participation in seminars and training in the design and execution of original laboratory research. As a result, graduates obtain the expertise to translate and answer questions defined in the clinical area to the laboratory bench and vice versa. For more information, see the Pathology and Laboratory Medicine website.

Pathology and Laboratory Medicine faculty information is available from the department.

Pathology and Laboratory Medicine

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar; one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating easy paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work); three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

110. Introduction to Cytogenetics. (4) Lecture, two hours; discussion, two hours. Limited to upper-division biology, genetics, and disease mechanisms. Students should have a basic understanding of genetics and be familiar with chromosome abnormalities. Preparation: knowledge of basic genetics.

118SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisites: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88B course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

199. Directed Research in Pathology. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Course requires one hour per week per unit. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

222. Hematopoiesis: Basic Biology and Clinical Implications. (4) Lecture, three hours; discussion, one hour. Senior undergraduate students considered on case by case basis. Basic concepts and paradigms in hematopoietic development. Mammalian hematopoiesis and normal development, with focus on molecular regulation of cellular development and essential emphasis on conceptual and experimental aspects of knowledge in field. Discussion of important pathological states within hematopoietic system, as well as established and novel avenues for therapy. Topics include hematopoietic stem cells and niche, transcriptional and epigenetic regulation of hematopoiesis, B- and T-lymphocyte development, myeloid, erythroid, and platelet development, immune responses, myeloid and lymphoid neoplasia, and bone marrow transplantation/gene therapy. S/U or letter grading.

M229. Molecular Mechanisms of Host/Pathogen Interaction. (4) Same as Microbiology M229. Lecture, two hours; discussion, one hour. Preparation: Enforced requisites: Molecular Biology 254A through 254D. Molecular mechanisms of microbial interactions with eukaryotic host cells that result in disease or pathogen survival. Topics include bacterial and viral pathogenesis, bacterial, fungal, and parasitic diseases, basic mechanisms of microbial pathogenesis, and clinical relevance of microbial pathogenesis. Letter grading.

M237. Cellular and Molecular Basis of Disease. (4) Same as Molecular, Cell, and Developmental Biology M237. Lecture, two hours; laboratory, two hours. Preparation: one course each in molecular biology, cell biology, and microbiology. Discussions of key issues in disease mechanisms, with emphasis on understanding of the mechanisms, identification of important questions still remaining unanswered. Letter grading.

238. Histology and Pathology for Graduate Students. (2) Laboratory, two hours. Designed for UCLA ACCESS or Cellular and Molecular Pathology PhD students. Basic knowledge of normal tissue, histologic processes, and animal models as observed by light microscopy. Letter grading.

240. Transplantation Immunology from Benchside to Bedside. (4) Lecture, three hours; laboratory, one hour. Preparation: knowledge of host immune response. Limited to graduate students. New developments in organ transplantation, updates on basic science of immune mechanisms, integration of basic science principles into clinical practice. Letter grading.

M255. Mapping and Mining Human Genome. (3) (Same as Human Genetics M255). Lecture. Three hours. Basic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of human genome are studied through analysis of gene families and clusters of genes that have remained linked from mouse to human. Discussion of localization of genetic diseases. S/U or letter grading.

256. Seminar: Viral Oncology. (2) Seminar, two hours. Advanced research seminar designed to consider current developments in field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation. S/U grading.

M257. Introduction to Toxicology. (4) Same as Pharmacology M257. Requirements: Pharmacology M241. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems.

258. Pathologic Changes in Toxicology. (4) Same as Pharmacology M258. Designed to give students experience in learning normal histology of tissues which are major targets of toxicity or the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

260. Immunopathology. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Preparation: Microbiology 261. Advanced information for graduate and advanced undergraduate students regarding immune system anatomy, lymphocytic development, acute and chronic inflammation, hypersensitivity, and autoimmunity. Letter grading.

262. Cytogenetics and Genomics. (3) Lecture, three hours. Comprehensive guide so students gain sufficient knowledge in core areas to perform state-of-art cytogenetic and genomic principles and techniques and their utility in clinical and research applications. Focus on relationship between various chromosomal and genetic abnormalities in human as identified by basic and advanced technologies such as fluorescence in situ hybridization (FISH), chromosomal microarray analysis (CMA), and next-generation sequencing (NGS). All aspects of molecular cytogenetics and advanced technologies through didactic teaching sessions, journal clubs, and interactive discussions. S/U or letter grading.

270. Basic and Clinical Aspects of Developmental Hematology. (4) Lecture, two hours. Graduate- and postgraduate-level course that covers broad range of topics in both basic and clinical aspects of developmental hematology. Pediatric hematologic disorders provide important paradigms in human and animal hemopoietic systems. Subjects include hematopoiesis, basic stem cell biology, angiogenesis, alternative models to study developmental hematology (zebrafish, Drosophila), basic mechanisms of normal and abnormal red blood cells, platelets, and white cells, leukemogenesis and novel therapeutics to treat leukemia, basic and clinical stem cell transplantation, state-of-the-art methods in developing cell and tissue engineering, and design of clinical trials, and biomedical modeling and statistics in developmental hematologic pathology. Letter grading.

M274. Molecular Cell Biology and Regenerative Medicine. (4) Same as Molecular, Cell, and Developmental Biology M274. Lecture, two hours; discussion, two hours. Designed for graduate students. Presentation of current knowledge of embryonic and adult stem cells and factors that regulate their growth and development. Major emphasis on how advances in cell and...
molecular biology and tissue engineering can be applied to use of stem cells in regenerative medicine. Bioethical and legal issues related to stem cell research, S/U or letter grading.

289. Clinical Aspects and Molecular Biology of Bone Marrow Failure Syndromes. (4) Lecture, two hours. Limited to graduate students. Coverage of broad range of topics on both clinical aspects and molecular pathogenesis of bone marrow failure syndromes. Studies provide important paradigms to understand fundamental mechanisms of human disease in addition to normal and abnormal blood cell development. Topics include basic biology and clinical features of aplastic anemia, myelodysplastic syndromes, Diamond Blackfan anemia, Schwachman-Diamond Syndrome, Fanconi anemia, Dyskeratosis Congenita, Paroxysmal Nocturnal Hemoglobinuria, flow cytometry, and research approaches to study bone marrow failure syndromes. Journal club sessions include discussion of two journal articles per meeting—one clinical and one basic/translational. Students present at least one journal article and lead group discussion. S/U or letter grading.

296. Research Topics in Pathology. (1 to 2) Research group meeting, one to two hours. Limited to departmental graduate students. Advanced study and analysis of current topics in pathology. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (4 to 12) Tutorial, to be arranged. Individual research with members of the staff or of other departments, the latter for purpose of supplementing programs available in department. S/U grading.

**Pediatrics**

**David Geffen School of Medicine**

22-412A Marion Davies Children's Center Box 951752
Los Angeles, CA 90095-1752

**Pediatrics**

310-825-5095

Sherin U. Devaskar, MD, Executive Chair
Peter G. Szilágyi, MD, MPH, Executive Vice Chair and Vice Chair, Research

**Overview**

For first year medical students, exposure to pediatrics starts with the early authentic experiences and the activities of the pediatric interest group.

For second-year medical students, the required four-week clinical clerkship in pediatrics is offered at seven sites: Cedars-Sinai, Harbor-UCLA, Kaiser Permanente Los Angeles, Olive View-UCLA, UCLA, and UCLA Santa Monica medical centers; and Miller and UCLA Mattel children’s hospitals.

In their third year, it is anticipated that many medical students participate in research projects in the department of pediatrics before starting their fourth year where they can further their pediatric knowledge and clinical experiences by choosing in-depth subspecialty electives and subinternships offered by department.

For more details on the Department of Pediatrics and courses offered, see the department website.

**PEDIATRICS**

**Lower-Division Courses**

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

**Upper-Division Courses**

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

199. Directed Research in Pediatrics. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

The Philosophy major has the following learning outcomes:

- Development of oral and written skills that display skill at argument and the ability to engage honestly with difficult and controversial topics

Entry to the Major

Transfer Students
Transfer applicants to the Philosophy major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one philosophy of mind or skepticism and rationality course, one ethical theory course, one symbolic logic course, and one additional philosophy course.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major
Required: Four lower-division courses, including Philosophy 7 or 21, 22, 31, and one other lower-division philosophy course.

The Major
Required: Thirteen upper-division (100 series) or graduate (200 series) philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided—history of philosophy (numbered 101–119, 201–219); logic, semantics and philosophy of science (120–139, 220–239); ethics and value theory (150–169, 240–259); and metaphysics and epistemology (170–187, 270–289). Students must take two courses in each of three of the groups and one course in the remaining group.

Honors Program
Students must satisfy the honors directed study requirement by taking Philosophy 198A and 198B in conjunction (usually, but not necessarily concurrently) with two different regular upper-division philosophy courses supervised by the instructors of those courses.

Policies

The Major
Contract courses (199) may be applied toward the major but not toward a group requirement. A maximum of 8 units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Honors Program
Admission
To be admitted to the honors program, students must have an overall grade-point average of 3.7.

Undergraduate Minor

Philosophy Minor

The benefits of an undergraduate education in philosophy are those Francis Bacon attributed to reading, conversation, and writing: reading gives us material for our own thought; conversation, facility at sharing and debating ideas; and writing, the ability to fix ideas with precision. A typical philosophy course involves reading: from the center and margins of the major world traditions, to modern thinkers framing today’s urgent issues. It also involves conversation, as philosophers like to test ideas out in company and learn from those who see things differently to them. The final test of a philosophical theory or argument is to submit it to the rigor of writing. Philosophical writing, in the ideal, is clear, exact, and free of the rhetoric that may be able to temporarily sway an opponent in the heat of conversation.

Admission
To enter the Philosophy minor, students must have an overall grade-point average of 2.0 or better.

The Minor

Required Lower-Division Courses (10 units): Philosophy 7 or 21, and 22 or 31.

Required Upper-Division Courses (24 units): Five courses, including at least one from each of three of the four groups into which the undergraduate and graduate courses are divided—history of philosophy (numbered 101–119, 201–219); logic, semantics and philosophy of science (120–139, 220–239); ethics and value theory (150–169, 240–259); and metaphysics and epistemology (170–187, 270–289); one additional upper- or lower-division philosophy course.
Policies
Philosophy 100A, 100B, and 100C apply toward Group I. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Major
Philosophy MA, CPhil, PhD
The aim of the graduate program is to produce philosophers of high quality. A graduate degree in philosophy is the usual path to becoming a professional academic philosopher, but the skills attained in the study and practice of philosophy are highly transferable and sought after by enlightened employers across the globe.

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Concurrent Degree Program
Concurrent degree programs allow students to reduce the number of courses required for two degrees. Since some courses may apply to both degrees:

- Philosophy PhD/Justus Doctor

Philosophy
Lower-Division Courses
1. Beginnings of Western Philosophy. (5) Lecture, three hours; discussion, one hour. Historical introduction to Western philosophy based on classical texts dealing with philosophy in Greece and studied in chronological order: properties of rational argument, existence of God, problem of knowledge, nature of causality, relation between mind and body, possibility of justice, and others. P/NP or letter grading.

2. Introduction to Philosophy. (5) Lecture, four hours; discussion, one hour. Introductory study of topics such as nature and grounds of religious belief, relation between religion and ethics, nature and existence of God, problem of evil, and what can be learned from religious experience. P/NP or letter grading.

3. Historical Introduction to Philosophy. (5) Lecture, three hours; discussion, two hours. Historical introduction to Western philosophy based on classical texts dealing with philosophy in Greece and studied in chronological order: properties of rational argument, existence of God, problem of knowledge, nature of causality, relation between mind and body, possibility of justice, and others. P/NP or letter grading.

4. Philosophical Analysis of Contemporary Moral Issues. (5) Lecture, three hours; discussion, one hour. Critical study of principles and arguments advanced in discussion of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, rights of women. P/NP or letter grading.

5. Philosophy in Literature. (5) Lecture, three hours; discussion, one hour. Philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and meaning of life through examination of great literary works in Western tradition. P/NP or letter grading.

6. Introduction to Political Philosophy. (5) Lecture, three hours; discussion, one hour. Study of some classical or contemporary political philosophers. Questions that may be discussed include What is justice? Why obey the law? What form of government is best? How much religious belief should be allowed in society? P/NP or letter grading.

7. Introduction to Philosophy of Mind. (5) Lecture, three hours; discussion, one hour. Introductory study of philosophical issues about nature of the mind and its relation to the body, including matters of functionality, behaviorism, determinism and free will, nature of psychological knowledge. P/NP or letter grading.

8. Introduction to Philosophy of Science. (5) Lecture, three hours; discussion, one hour. Nature of arguments: how to analyze them and assess soundness of reasoning they represent. Common fallacies that often occur in argumentation discussed in light of which counts as good deductive or inductive inference. Other topics include use of language in argumentation to arouse emotions as contrasted with conveying thoughts, logic of scientific experiments and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting). P/NP or letter grading.

9. Principles of Critical Reasoning. (5) Lecture, four hours; discussion, one hour. Introduction to study of topics such as reasoning about causes, properties of reasoning, and the role of inductive or deductive reasoning in our thought. Other topics include use of language in argumentation to arouse emotions as contrasted with conveying thoughts, logic of scientific experiments and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting). P/NP or letter grading.

10. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

11. Skepticism and Rationality. (5) Lecture, four hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? Introduction to study of these and related questions through works of some of the greatest philosophers of modern period, such as Descartes, Hume, Leibniz, or Berkeley. P/NP or letter grading.

12. Introduction to Ethical Theory. (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 22. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. Letter grading.

13. Logic, First Course. (5) Lecture, four hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in logic. Elements of symbolic logic, sentential and quantificational forms of reasoning and structure of language. P/NP or letter grading.

19. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

21. Skepticism and Rationality. (5) Lecture, four hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? Introduction to study of these and related questions through works of some of the greatest philosophers of modern period, such as Descartes, Hume, Leibniz, or Berkeley. P/NP or letter grading.

22. Introduction to Ethical Theory. (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 22. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. Letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses
100A. History of Greek Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Survey of origins of Greek metaphysics from pre-Socratic through Plato and Aristotle. P/NP or letter grading.

100B. Medieval and Early Modern Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100A. Survey of development and transformation of Greek metaphysics and epistemology within context of philosophical theology, and transition from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes. P/NP or letter grading.

100C. History of Modern Philosophy, 1650 to 1800. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100B. Survey of development and transformation of Greek metaphysics and epistemology within context of philosophical theology, and transition from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes. P/NP or letter grading.

100D. History of Modern Philosophy, 1800 to 1900. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100B. Survey of development and transformation of Greek metaphysics and epistemology within context of philosophical theology, and transition from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes. P/NP or letter grading.

100E. History of Modern Philosophy, 1900 to 1980. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100B. Survey of development and transformation of Greek metaphysics and epistemology within context of philosophical theology, and transition from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes. P/NP or letter grading.
physics and theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include: history of these (and perhaps other) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowledge, and philosophical foundations of modern science. P/NP or letter grading.

Group I: History of Philosophy

M101A. Plato—Earlier Dialogues. (4) (Same as Classics M146A.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected topics in early and middle dialogues of Plato. P/NP or letter grading.

M101B. Plato—Later Dialogues. (4) (Same as Classics M146B.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected topics in middle and later dialogues of Plato. P/NP or letter grading.

M102. Aristotle. (4) (Same as Classics M147.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected works of Aristotle. P/NP or letter grading.

M103A. Ancient Greek and Roman Philosophy. (4) (Same as Classics M145A.) Lecture, three hours. Study of some major Greek and Roman philosophical texts, including the works of Empedocles, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues. P/NP or letter grading.

M103B. Later Ancient Greek Philosophy. (4) (Same as Classics M145B.) Lecture, three hours; preparation: one course from 100A, 101B, 102, or 103A. Study of some major texts in Greek philosophy of Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

104. Topics in Islamic Philosophy. (4) Lecture, three to four hours, discussion, one hour (when scheduled). Preparation: one philosophy course. Development of philosophy within orbit of Islam from beginning of interaction of Islam with ancient philosophy to period of hegemony of Ottoman Empire. Figures examined may vary but usually include many of the kindi, Ibn Sina (Avicenna), al-Ghazali, ben Maimon (Maimonides), Ibn Rushd (Averroes), and Suhrawardi. Topics include central issues in Islamic philosophy and epistemology. May be repeated for credit with consent of instructor. P/NP or letter grading.

106. Later Medieval Philosophy. (4) Preparation: one philosophy course. Metaphysics, theory of knowledge, and language. Preparation: one course in philosophy, including philosophy of science, epistemology, and language. May be repeated for credit with consent of instructor. P/NP or letter grading.

107. Topics in Medieval Philosophy. (4) Lecture, four hours; discussion, one hour. Preparation: one philosophy course. Recommended requisite: course 105 or 106. Study of philosophy and theology of one medieval philosopher such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham, or study of one single area such as logic or theory of knowledge in several medieval philosophers. Topic announced each term. May be repeated for credit with consent of instructor. P/NP or letter grading.

110. Hobbes. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes' political philosophy, especially Leviathan, with attention to its relation to contemporary political philosophy. May be concurrently scheduled with course C208. P/NP or letter grading.

110. Descartes. (4) Lecture, four hours; discussion, one hour. Requisite: course 21 or two philosophy courses. Study of two works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C209. P/NP or letter grading.

111. Spinoza. (4) Lecture, three hours; discussion, one hour (when scheduled). Preparation: one philosophy course. Selected topics in philosophy of Spinoza. May be concurrently scheduled with course C210. Limited to 30 students when concurrently scheduled. P/NP or letter grading.

111. Leibniz. (4) Lecture, three hours; discussion, one hour. Requisite: course 21. Study of philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled with course C212. P/NP or letter grading.

112. Locke and Berkeley. (4) Lecture, four hours. Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C212. P/NP or letter grading.

114. Hume. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics from metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214. P/NP or letter grading.

115. Kant. (4) Lecture, three hours; discussion, one hour. Requisite: course 21 or 22. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor. Concurrently scheduled with course C215. P/NP or letter grading.

117. Late 19th- and Early 20th-Century Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in work of one or more of following philosophers: Bolzano, Frege, Husserl, Meinong, G. Moore, early Russell, and Wittgenstein. May be repeated for credit with consent of instructor.

118. Theories of Perception and Analysis. (4) Preparation: one philosophy course. Philosophical study of some major works of Kierkegaard, with emphasis on interpretation of the texts. P/NP or letter grading.

118B. Kierkegaard and Philosophy of Religion. (4) (Same as Religion M118B.) Lecture, three to four hours; discussion, one hour (when scheduled). Preparation: one philosophy course. Study of selected works of Kierkegaard on philosophy of religion, with emphasis on interpretation of texts. P/NP or letter grading.

119. Topics in History of Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Philosophical issues arising from psychological theories. Nature of perception and issues about perceptual psychology and development of important types of representation (e.g., of body, cause, agency) in early childhood. Relevance of contemporary cognitive psychology to account of mind and meaning; relations between semiological theory and learning theory; psychological aspects of theory of syntax. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C228A. P/NP or letter grading.

120. Philosophy of Psychology. (4) Lecture, three to four hours; discussion, one hour (when scheduled). Preparation: one or more philosophy courses. Selected philosophical issues arising from psychological theories. Nature of perception and issues about perceptual psychology and development of important types of representation (e.g., of body, cause, agency) early in childhood. Relevance of contemporary cognitive psychology to account of mind and meaning; relations between semiological theory and learning theory; psychological aspects of theory of syntax. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C228B. P/NP or letter grading.

121. Topics in Philosophy of Science. (4) Lecture, three hours; discussion, one hour (when scheduled). Preparation: one philosophy course. Philosophical investigation into one aspect of scientific practice (e.g., theory formation, explanation, prediction). May be repeated for credit with consent of instructor. P/NP or letter grading.

122. Philosophy of Science: Historical. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Historical introduction to philosophy of science. Several general topics discussed in context of actual scientific history from Galileo to natural sciences. May be repeated for credit with consent of instructor.

123. Philosophy of Science: Contemporary. (4) Lecture, three hours; discussion, one hour. Requisite: course 31 or 124. Introduction to contemporary philosophy of science, focusing on problems of central importance. May be repeated for credit with consent of instructor.

126. Philosophy of Science: Social Sciences. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Discussion of topics in philosophy of social sciences (e.g., methods of social sciences in relation to physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, nature of social laws). P/NP or letter grading.

127A. Philosophy of Language. (4) Lecture, four hours; discussion, one hour. Enforced requisite: course 31. Syntax, semantics, pragmatics. Semantical concepts of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor. Concurrently scheduled with course C228A. P/NP or letter grading.

127B. Philosophy of Language. (4) Lecture, four hours; discussion, one hour. Requisite: course 31. Course C127A is not requisite to C127B. Selected topics similar to those considered in course C127A, but with focus on contemporary figures. May be repeated for credit with consent of instructor. Concurrently scheduled with course C228B. P/NP or letter grading.

128. Topics in Philosophy of Mathematics. (4) Lecture, four hours. Requisites: courses 31, 132, and preferably one additional logic course. Introduction to philosophy of mathematics. Survey of philosophy of mathematics from Kant through Frege and Russell to Quine, and development of three main schools of logicism, formalism, and intuitionism in their historical context. Study of original texts of philosophy such as Kant, Frege, and Russell, and how their philosophy interacted with contemporary developments in mathematics and logic. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C323. P/NP or letter grading.

129. Philosophy of Psychology. (4) Lecture, three to four hours; discussion, one hour (when scheduled). Preparation: one or more philosophy courses. Selected philosophical issues arising from psychological theories. Nature of perception and issues about perceptual psychology and development of important types of representation (e.g., of body, cause, agency) in early childhood. Relevance of contemporary cognitive psychology to account of mind and meaning; relations between semiological theory and learning theory; psychological aspects of theory of syntax. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C328. P/NP or letter grading.

130. Philosophy of Space and Time. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses or one philosophy course and one philosophy course. Selected philosophical problems concerning nature of space and time. Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include nature of geometry, foundationalism, relativist views of space and time, philosophical impact of relativistic theory.

131. Science and Metaphysics. (4) Lecture, three to four hours; discussion, one hour (when scheduled). Preparation: one or two philosophy courses. Recommended some background in basic calculus and physics. Intensive study of one or two metaphysical topics on which results of modern science have been thought to bear. Topics may include nature of causation, reality and direction of time, time-travel, backwards causation, realism, determinism, absolute view of space, etc. May be repeated for credit with consent of instructor. P/NP or letter grading.

133. Topics in Logic and Semantics. (4) Lecture; four hours; discussion, one hour. Enforced requisite: course 31. Possible topics include formal theories definitions, alternative theories of descriptions, many-valued logics, deviant logics. May be repeated for credit with consent of instructor. P/NP or letter grading.

133B. Probability and Inductive Logic. (4) Lecture; three hours; discussion, one hour (when scheduled). Requisite: course 31, or background in logic, computer science, statistics, or mathematics. Topics may include interpretations of probability, Bayesian and non-Bayesian confirmation theory, paradoxes of confirmation, coherence, and conditioning. May be concurrently scheduled with course C225. P/NP or letter grading.

133C. Topics in Probability and Inductive Logic. (4) Lecture; three hours; discussion, one hour (when scheduled). Requisite: course 31, or background in logic, computer science, statistics, or mathematics. Topics may include interpretations of probability, Bayesian and non-Bayesian confirmation theory, paradoxes of confirmation, coherence, and conditioning. May be concurrently scheduled with course C225. P/NP or letter grading.

M134. Introduction to Set Theory. (4) (Same as Mathematics M114S.) Lecture; three hours; discussion, one hour. Enforced requisite: course 135 or Mathematics 110A or 131A. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

135. Introduction to Metalogic. (4) Lecture; four hours; discussion, one hour. Enforced requisite: course 31. Strongly recommended requisite: course 132 (or Mathematics 33A or 33B). Metah theory sentential logic and first-order logic. Introduction to formal language, formal deductive systems, and models. Compactness and completeness theorems that concern comp lexity of notion of logical consequences. P/NP or letter grading.

136. Modal Logic. (4) Lecture; four hours. Requisites: courses 31 (enforced), 135. Introduction to model theory of modal logic (family of systems that includes logics of necessity, possibility, tense, temporal, epistemic logics, and logics of actions/programs). Topics include invariance results, definability theory, completeness theory, game-theoretic methods, and related uses of combinatorial game theory (classical) first- and second-order logic. P/NP or letter grading.

137. Philosophy of Biology. (4) Lecture; three to four hours; discussion, one hour (when scheduled). Preparation: one philosophy course. Intensive study of one or two current topics in philosophy of biology, which may include structure of evolutionary theory, fitness, taxonomy, reductionism, concept of biological species, and biological explanation. P/NP or letter grading.

138. Philosophy of Visual Representation. (4) Lecture; four hours. Preparation: one philosophy course (in philosophy of mind or language recommended). Investigation of philosophical questions relating to visual representation. Possible topics include visual perception, mental image, image versus language, semantics, pictorial representation, comics and film, diagrams, and data visualization. P/NP or letter grading.

Group III: Ethics and Value Theory

150. Society and Morals. (4) Lecture; three hours; discussion, one hour. Requisite: course 22. Critical study of principles and arguments advanced in discussion of current moral and social issues. Topics similar to those in course 4, but familiarity with some basic philosophical concepts and methods presupposed. May be repeated for credit with consent of instructor.

151A-C151B-151C. History of Ethics. (4–4–4) Lecture; three hours; discussion, one hour. Preparation: two philosophy courses. Each course may be taken independently or in combination. 151A: Selected Classics in Ancient Ethical Theories; Plato, Aristotle. C151B. Modern. Intensive study of Kant's ethical theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C245. 151C: Selected Classics of Medieval Ethics.

152A. Topics in Moral Philosophy. (4) Lecture; three to four hours; discussion, one hour (when scheduled). Study of philosophical issues raised by topic of evil actions and/or evil people. Issues may include nature and scope of evil, theodicy, responsibility for evil and evil of free will, causes and motivations for evil actions, and variant responses to evil such as forgiveness and punishment. P/NP or letter grading.

152B. Topics in Moral Philosophy: Evil. (4) (Same as Religion M179.) Lecture; three to four hours; discussion, one hour (when scheduled). Preparation: one philosophy course. Course 152A is not requisite to 152B. Exploration of philosophical issues raised by topic of evil actions and/or evil people. Issues may include nature and scope of evil, theodicy, responsibility for evil and evil of free will, causes and motivations for evil actions, and variant responses to evil such as forgiveness and punishment. P/NP or letter grading.

153A. Topics in Ethical Theory: Normative Ethics. (4) Lecture; three hours; discussion, one hour. Requisite: course 22. Study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, principles of culpability and praiseworthiness (criteria of right action). May be repeated for credit with consent of instructor. P/NP or letter grading.

153B. Topics in Ethical Theory: Metaethics. (4) Lecture; three hours; discussion, one hour. Requisite: course 22. Study and analysis of basic concepts, selected problems, and contemporary issues in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, tree will, moral motivation, etc. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C225B. P/NP or letter grading.

154. Topics in Value Theory: Rationality and Action. (4) Lecture; three hours; discussion, one hour. Requisite: course 6 or 7 or 22. Selected topics concerning normative issues in practical rationality or philosophy of action. Topics may include: logical paradoxes, peer opposition, additiveness, nature of reasons for action, rationality of morality and prudence, weakness of will, freedom of will, and decision theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C224B. P/NP or letter grading.

154B. Topics in Value Theory: Moral Responsibility and Free Will. (4) (Formerly numbered 154B) Lecture; three hours; discussion, one hour. Preparation: one philosophy course. Examination of philosophical problems surrounding moral responsibility and free will, using contemporary or classical readings in attempt to better understand kind of freedom required for moral agents. May be repeated for credit. May be concurrently scheduled with course C224B. P/NP or letter grading.

155A. Medical Ethics. (4) Lecture; three to four hours; discussion, one hour (when scheduled). Course 155A is not requisite to 155B. Examination of philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and medical experimentation. May be repeated for credit with consent of instructor. P/NP or letter grading.

155B. Topics in Medical Ethics. (4) Lecture; three to four hours; discussion, one hour (when scheduled). Course 155A is not requisite to 155B. Intensive investigation of one or two topics or philosophical issues in medical ethics, such as paternalism, truth-telling, physician-patient relationship, distributive justice, autonomy and medical decision making, and research ethics. Topics announced each term. May be repeated for credit with consent of instructor. P/NP or letter grading.

156. Topics in Political Philosophy. (4) Lecture; three hours; discussion, one hour. Analysis of some basic concepts in political theory. May be repeated for credit with exception of instructor. P/NP or letter grading.

157A-157B. History of Political Philosophy. (4–4) Lecture; three hours; discussion, one hour. Preparation: two philosophy courses. May be repeated with consent of instructor. 157A: Reading and discussion of classic works in earlier political theory, especially those by Hobbes, Locke, Hume, and Rousseau. 157B: Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx.

161. Topics in Aesthetic Theory. (4) Lecture; three hours; discussion, one hour. Preparation: one philosophy course. Philosophical theories about nature and importance of art and art criticism, aesthetic experience, and aesthetic values. May be repeated for credit with consent of instructor.

166. Philosophy of Law. (4) Lecture; three hours; discussion, one hour. Preparation: one philosophy course. Examination, through study of recent philosophical writings, of such topics as nature of law, relationship of law and morals, legal reasoning, punishment, and obligation to obey law. May be repeated for credit. P/NP or letter grading.

167. Feminist Issues in Value Theory. (4) Lecture; three hours; discussion, one hour (when scheduled). Preparation: one philosophy course. Study of ethical dimensions of feminist issues. Issues discussed may include contemporary social issues, different models of gender identity and gender equality; gender discrimination, subordination, hierarchy, and resistance; gender equality in family and workplace; sexual harassment and violence; reproductive freedom and just and unjust institutional arrangements as they affect gender. P/NP or letter grading.

168. Philosophy of Race. (4) Lecture; three hours; discussion, one hour (when scheduled). Preparation: one philosophy course. Exploration of theories of race and racism and intersection of race with other social structures. Topics may include metaphysics of race, social construction, racial identity, racial injustices, and implications of racial solidarity, and relationships between race and ethnicity, race and class, and race and gender. P/NP or letter grading.

Group IV: Metaphysics and Epistemology

170. Philosophy of Mind. (4) Lecture; three hours; discussion, one hour. Preparation: two relevant philosophy courses. Analysis of various problems concerning nature of mind and mental phenomena, such as relation between mental and physical kinds of knowledge, and relation of knowledge of other minds. May be repeated once for credit with consent of instructor.

172. Philosophy of Language and Communication. (4) Lecture; three hours; discussion, one hour. Theories of meaning and communication; how words refer to things; limits of meaningfulness; analysis of speech acts; relation of everyday language to scientific discoveries. P/NP or letter grading.

173. Philosophy of Medicine. (4) Lecture; three to four hours; discussion, one hour (when scheduled). Focus on questions like what is health, what is well-being, what is mental disorder, and what is disability. Consideration of naturalistic, normative, and social constructivist types of answers, and error theories. Consideration of roles that fact, value, statistical norms, normative variation, normal function, and harm might have in these concepts. Study of consequences of different accounts of these concepts for people with minority bodies, minds, and sexualities, and for decisions about cure, enhancement, and reproduction. P/NP or letter grading.

174. Topics in Theory of Knowledge. (4) Lecture; three to four hours; discussion, one hour (when scheduled). Preparation: one philosophy course. Intensive investigation of one or two selected topics or works in theory of knowledge, such as a particular knowledge problem of induction, memory, knowledge as justified true belief. Topics announced each term. May be repeated for credit with consent of instructor. P/NP or letter grading.
**Philosophy**

M175. Topics in Philosophy of Religion. (4) (Same as Religion M175.) Lecture; three hours; discussion, one hour. Prerequisite: course 21 or 22. Intensive investigation of one or two topics or works in philosophy of religion, such as attributes of God, arguments for or against existence of God, or relation between religion and ethics. Topics announced each term. May be repeated for credit with consent of instructor.

176. Metaphysics. (4) Lecture, four hours. Requisite: courses 31, 132. Highly recommended: course 136. Second course in two-term sequence (also see course 136). Metaphysical foundations of modal logic, essential and actualistic basis of modal theory of modal logic. What are possible worlds? What is accessibility relation? Is modal logic one logic or one theory? Is its focus logical or metaphysical necessity? Are both modalities in play? How many modalities are involved (quantified) modal logic? What is its connection to doctrines of (1) Haecceitism and (2) Aristo- telian Essentialism? P/N or P/NP or letter grading.

177A. Existentialism. (4) Lecture; three hours; discussion, one hour. Preparation: one philosophy course. Analysis of methods, problems, and views of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, Marcel, and Camus. Possible topics include metaphysics, epistemology, nature of reality, freedom, problem of self, other people, ethics, existential psychoanalysis. May be repeated for credit with consent of instructor. P/N or letter grading.

177B. Historical Phenomenology. (4) Preparation: one philosophy course. Study of central philosophical texts of one of the following: Nietzsche, Heidegger, Jaspers, Buber, Sartre, or Camus. Emphasis on explanation and interpretation of the texts. May be repeated for credit with consent of instructor.

178. Phenomenology. (4) Lecture; three hours; discussion, one hour. Preparation: two philosophy courses. Introduction to phenomenological method of approaching philosophical problems via works of some of the following: Brentano, Husserl, Heidegger, Scheler, Sartre, Merleau-Ponty, Ricoeur. Topics include ontology, epistemology, and particularly philosophy of mind.

179. Asian Philosophy. (4) Lecture; three hours; discussion, one hour. Examination of central concepts and arguments in Buddhist or Chinese philosophy. Appropriate parallels to social concepts in Western tradition. May be repeated for credit with consent of department. P/N or letter grading.

180. Philosophy of Action. (4) Lecture; three to four hours; discussion, one hour (when scheduled). Preparation: two philosophy courses. Study of various theories of action employed in understanding human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception. May be repeated for credit with consent of instructor. P/N or letter grading.

182. Elements of Metaphysics. (4) Lecture; three hours; discussion, one hour. Requisite: course 21. Study of basic metaphysical questions: nature of physical world, of minds, and of universals; and answers provided by (e.g., phenomenism, materialism, dualism). P/N or letter grading.

183. Theory of Knowledge. (4) Lecture; three hours; discussion, one hour. Requisite: course 21. Problem-oriented study of contemporary classics of epistemology on topics such as skepticism, justification, foundationalism, epistemic intuitions, tracking, closure, reliabilism, internalism, and externalism, among others. May be repeated for credit with consent of instructor. P/N or letter grading.

184. Topics in Metaphysics. (4) Lecture; three hours; discussion, one hour. Requisite: course 21. Intensive investigation of one or two topics or works in metaphysics, such as: identity, nature of dispositions, possibility and necessity, universals and particulars, causality. Topics announced each term. May be repeated for credit with consent of instructor. P/N or letter grading.

185. Major Philosophers of 20th Century. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Study of writings of one or more philosophers of the 20th century (e.g., Moore, Wittgenstein, Carnap, Quine). May be repeated for credit with consent of instructor. P/N or letter grading.

187. Topics in Feminist Philosophy: Metaphysics and Epistemology. (4) Preparation: courses 131, 132, 110LC, 110CC. Lecture; three hours; discussion, one hour (when scheduled). Requisite for Gender Studies majors: Gender Studies 10; for other students: one philosophy course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by new scholarship on women in philosophy. May be repeated for credit with consent of instructor. P/N or letter grading.

Special Studies

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors College 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of original research project. May be repeated for credit with consent of instructor. P/N or letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SA. Individual study in regularly scheduled meetings with faculty mentor to identify course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 888 course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, one hour. Limited to 20 students. Designed as adjunct to upper-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for credit with consent of students. May not be applied toward departmental honors. May be repeated for credit. Honors content noted on transcript. P/N or letter grading.

189CH. Honors Contracts. (1) Tutorial, one hour. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May not be applied toward departmental honors. May be repeated for credit with consent of instructor. P/N or letter grading.

190. Honors in Philosophy. (2 to 4) Seminar, four hours. Limited to junior/senior philosophy honors students. Preparation: one philosophy course. Each course to be taken in conjunction with one upper-division philosophy lecture course, either concurrently or in subsequent term, under direct supervision of lecture course instructor. Advanced work related to lecture course, further reading, and preparation of 12- to 15-page paper representing original research. Courses 198A and 198B must be taken in conjunction with two different lecture courses, and both must satisfy departmental honors requirement. May be repeated for credit. Individual contract required. Letter grading.

190C. Honors Research in Philosophy. (4) Tutorial, four hours. Limited to junior/senior philosophy honors program students. Development and completion of an original research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

199. Directed Research in Philosophy. (2 to 4) Tutorial, to be arranged. Limited to individual research under guidance of faculty mentor. Culuminating paper or research project required. Up to 8 units may be applied toward degree requirements, but no course may be substituted for course in one of four groups on basis of similarity of subject matter. May be repeated for credit. Individual contract required. P/N or letter grading.

Graduate Courses

200A-200B-200C. Seminar for First-Year Graduate Students. (1–4) Seminar, three hours. Limited to and required of all first-year graduate philosophy students. Selected topics in metaphysics and epistemology, history of philosophy, and ethics. Letter (200A, 200B) or S/U or letter (200C) grading.

Group I: History of Philosophy

203. Seminar: History of Ancient Philosophy. (4) Seminar, four hours. Selected problems and philosophers. May be repeated for credit with consent of instructor. S/U or letter grading.

206. Topics in Medieval Philosophy. (4) Lecture, four hours. Study of philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, Eckhart, or Ockham or study of single area such as logic or theory of knowledge in several medieval philosophers. Topics announced each term. May be repeated for credit with consent of instructor. S/U or letter grading.

207. Seminar: History of Medieval and Renaissance Philosophy. (4) Seminar, four hours. Selected problems and philosophers. May be repeated for credit with consent of instructor. S/U or letter grading.

212. Locke and Berkeley. (4) Lecture, four hours. Preparation: one philosophy course. Hobbes’ political philosophy, especially Leviathan, with attention to its relevance to contemporary political philosophy. May be repeated for credit with consent of instructor. S/U or letter grading.

219A-219B. Honors Research in Philosophy. (2–2) Tutorial, two hours. Limited to junior/senior philosophy honors students. Each course to be taken in conjunction with one upper-division philosophy lecture course, either concurrently or in subsequent term, under direct supervision of lecture course instructor. Advanced work related to lecture course, further reading, and preparation of 12- to 15-page paper representing original research. Courses 219A and 198B must be taken in conjunction with two different lecture courses, and both must satisfy departmental honors requirement. May be repeated for credit. Individual contract required. Letter grading.

220A-220B-220C. Seminar for First-Year Graduate Students. (4–4) Seminar, three hours. Limited to and required of all first-year graduate philosophy students. Selected topics in metaphysics and epistemology, history of philosophy, and ethics. Letter (200A, 200B) or S/U or letter (200C) grading.

C209. Descartes. (4) Lecture; four hours; discussion, one hour. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C101. S/U or letter grading.

C210. Spinoza. (4) Lecture; three hours; discussion, one hour (when scheduled). Selected topics in philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C212. S/U or letter grading.

C211. Leibniz. (4) Lecture; three hours. Selected topics in philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students. S/U or letter grading.

C212. Locke and Berkeley. (4) Lecture, four hours. Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C212. S/U or letter grading.

C214. Hume. (4) Lecture; three hours; discussion, one hour. Selected topics in philosophy of Hume. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C114. S/U or letter grading.
C215. Kant. (4) Lecture, three hours; discussion, one hour. Requisite: course 21 or 22. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor. Concurrently scheduled with course C115. S/U or letter grading.

216. 19th-Century Philosophy. (4) Seminar, four hours. Topics in 19th-century philosophy. May be repeated for credit with consent of instructor. S/U or letter grading.

C219. Topics in History of Philosophy. (4) Lecture, three hours; discussion, one hour. Study of selected philosophers or themes in history of philosophy from different periods (ancient, medieval, and early modern). May be repeated for credit with consent of instructor. Concurrently scheduled with course C119. S/U or letter grading.

220. Seminar: Topics in History of Philosophy. (4) Seminar, four hours. Topics in history of philosophy. May be repeated for credit with consent of instructor. S/U or letter grading.

Group II: Logic, Semantics, and Philosophy of Science

221A. Topics in Set Theory. (4) Lecture, three hours. Requisite: Mathematics M114S. Sets, relations, functions, partial and total orderings; well-orderings. Ordinal and cardinal numbers, cardinality, Cantor's theorem, and continuum hypothesis, inaccessible numbers. Formalization of set theory; Zermelo/Fraenkel; von Neumann/Goedel theory. May be repeated for credit with consent of instructor. S/U or letter grading.

221B. History of Set Theory. (4) Lecture, four hours. Development of concept of set and axiomatic set theory by examining selected writings of Frege, Cantor, Russell, Zermelo, Goedel, and several others. Origins and significance of certain key ideas, such as set theory as logic, axiomatic set theory as reaction to paradoxes, formal first-order axiomatic set theory as opposition to Cantor's set theory, type theory as reaction to hierarchy, ramification and predicativity, proper classes and sets as small classes, and particular Zermelo/Fraenkel axiomatic theory. Emphasis on actual expressed ideas and views of various influential authors. S/U or letter grading.

223. Topics in Philosophy of Mathematics. (4) Lecture, four hours. Introduction to philosophy of mathematics. Survey of philosophical problems of mathematicians from Kant to Hilbert. Study of content and development of three main schools of logicism, formalism, and intuitionism in their historical context. Study of original texts of philosophy such as Kant, Frege, and Russell, and how their philosophy interacted with contemporary developments in mathematics and logic. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C128. S/U or letter grading.

224. Philosophy of Physics. (4) Seminar, three hours. Selected philosophical topics related to physical theory, depending on interests and background of participants, including space and time; observation in quantum mechanics; foundations of statistical mechanics. May be repeated for credit with consent of instructor. S/U or letter grading.

225. Probability and Inductive Logic. (4) Formerly numbered 225B. Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 31, or background in logic, computer science, statistics, or mathematics. May include interpreters of probability, Bayesian and non-Bayesian confirmation theory, paradoxes of confirmation, coherence, and conditioning. May be concurrently scheduled with course C133B. S/U or letter grading.

226. Topics in Mathematical Logic. (4) Lecture, four hours. Content varies from term to term. May be repeated for credit with consent of instructor. S/U or letter grading.

227. Philosophy of Social Science. (4) Lecture, four hours. Examination of philosophical problems concerning concepts and methods used in social sciences. Topics may include relation between social research and social theory, the nature of the interpretation in social sciences, determinism and spontaneity in history, interpretation of cultures radically different from one's own. Students with primary interest in and advanced preparation in social sciences are encouraged to enroll. May be repeated for credit with consent of instructor. S/U or letter grading.

228A. Philosophy of Language. (4) Lecture, four hours; discussion, one hour. Enforced requisite: course C22B. Topics include concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor. Concurrently scheduled with course C127A. S/U or letter grading.

228B. Philosophy of Language. (4) Lecture, four hours; discussion, one hour. Requisite: course 21. Recommended: course C22B. Selected topics similar to those considered in course C228A, but at more advanced and technical level. May be repeated for credit with consent of instructor. Concurrently scheduled with course C127B. S/U or letter grading.

228C. Philosophy of Language. (4) Lecture, four hours; discussion, one hour. Authorized requisite: course 31. Recommended: course C228A or C228B. Selected topics similar to those considered in course C228B, but with focus on contemporary figures. May be repeated for credit with consent of instructor. Concurrently scheduled with course C127C. S/U or letter grading.

229. Seminar: Critical Thinking. (4) Seminar, three hours. Selected topics in history, theory, and pedagogy of critical thinking. May be repeated for credit with consent of instructor. S/U or letter grading.

230. Seminar: Logic. (4) Seminar, four hours. May be repeated for credit with consent of instructor. S/U or letter grading.

231. Seminar: Intensional Logic. (4) Seminar, four hours. Topics may include logic of sense and denotation, modal logic, logic of demonstratives, epistemic logic, intensional logic of Principia Mathematica, possible worlds semantics. May be repeated for credit with consent of instructor. S/U or letter grading.

232. Philosophy of Science. (4) Seminar, three hours. Topics selected in philosophy of science. May be repeated for credit with consent of instructor. S/U or letter grading.

233. Seminar: Philosophy of Physics. (4) Seminar, four hours. May be repeated for credit with consent of instructor. S/U or letter grading.

234. Topics in Philosophy of Science. (4) Seminar, three hours. One or more selected topics in philosophy of science. May be repeated for credit with consent of instructor. May not be used to satisfy special area requirement. S/U or letter grading.

235. Philosophy of Mathematics. (4) Seminar, three hours. Topics selected in philosophy of mathematics. May be repeated for credit with consent of instructor. S/U or letter grading.

Group III: Ethics and Value Theory

241. Topics in Political Philosophy. (4) Seminar, four hours. Topics selected in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor. S/U or letter grading.

244. Topics in Value Theory: Rationality and Action. (4) Seminar, three hours. Selected topics on normative issues in practical rationality or philosophy of action. Topics may include moral and practical dilemmas, nature of reasons for action, rationality of morality and prudence, weakness of will, freedom of will, and decision theory. May be repeated for credit with consent of instructor. S/U or letter grading.

244B. Topics in Value Theory: Moral Responsibility and Free Will. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Examination of philosophical problems surrounding moral responsibility and free will, using contemporary or classical readings in attempt to understand kind of freedom required for moral agents. May be repeated for credit. May be concurrently scheduled with course C154B. S/U or letter grading.

245. History of Ethics: Modern. (4) Lecture, three hours; discussion, one hour. Requisite: one of Kant's ethical theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C151B. S/U or letter grading.

246. Seminar: Ethical Theory. (4) Seminar, four hours. Selected topics. Content varies from term to term. May be repeated for credit with consent of instructor. S/U or letter grading.

247. Topics in Political Philosophy. (4) Lecture, three hours; discussion, one hour. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C156. S/U or letter grading.

248. Problems in Moral Philosophy. (4) Seminar, four hours. Intensive study of significant problems or problems similar to those considered in course C228B, selected problems, and contemporary issues in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, free will, moral motivation, etc. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C153B. S/U or letter grading.

254. Legal Theory Workshop. (1 to 8) Seminar, three hours. Students engage in readings, discussion, and analysis of philosophical issues in law of leading scholars from around country. Presentation of works in progress by visiting scholars every two weeks. Study by students of papers to be presented to gain background in relevant topics and to be prepared for speakers' presentations. Presentation of student papers to class for discussion. Substantial analytical paper required. Concurrently scheduled with Law 555. In Progress (254A) and letter (254B) grading.

255. Seminar: Aesthetic Theory. (4) Seminar, four hours. Selected topics. May be repeated for credit with consent of instructor. S/U or letter grading.

256. Topics in Legal Philosophy. (4) Same as Law M217.) Lecture, three hours. Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor.

257. Philosophy Legal Theory. (1 to 8) Same as Law M257A. Seminar, three hours. Selected topics in philosophy of law. May be repeated for credit with consent of instructor. S/U or letter grading.

257A-257B. Philosophy Legal Theory. (1 to 8) (Same as Law M524.) Seminar, two hours. Course M257A is enforced. Selected topics in philosophy of law. May be repeated for credit with consent of instructor. In Progress (M257A) and S/U or letter (257B) grading.

258. Contemporary Philosophy of Law. (4) Seminar, three hours. Limited to graduate students. Recent contributions to theoretical literature on contract law.
Possible topics include purpose or function of contract law, relationship of contracts to promises, whether fault should play larger (or smaller) role in contract law remedial approaches to breach including larger role for unjust enrichment, and contract law's treatment of fraud and deception. Readings from legal and philosophical literature. S/U or letter grading.

259. Philosophical Research in Ethics and Value Theory. (G) (4) Seminar, two hours. Preparation: completion of proposition requirement. Presentation of ongoing research by graduate students. Participants make presentations, analyze and discuss presentations, and select and discuss philosophical texts related to presentations. Must be taken for 4 units in quarters in which students present their own research. May be repeated for credit with consent of instructor. S/U or letter grading.

Group IV: Metaphysics and Epistemology

270. Epistemology of Science. (4) Seminar, three hours. Selected philosophical topics at intersection of epistemology and philosophy of science including scientific knowledge, inference to best explanation, understanding, cognitive attitudes in science, probabilistic reasoning, and social epistemology of science. May be repeated for credit with consent of instructor. S/U or letter grading.

271. Seminar: Topics in Metaphysics and Epistemology. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

272. Topics in Philosophy of Mind and Language. (4) Seminar, three hours. One or more selected topics in philosophy of mind and/or language. May be repeated for credit with consent of instructor. May not be used to satisfy special area requirement. S/U or letter grading.

275. Human Action. (4) Preparation: two upper-division philosophy courses. Examination of theories, concepts, and problems concerning human actions. Topics may include analysis of intentional actions; determinism and freedom; nature of explanations of intentional actions. May be repeated for credit with consent of instructor.

280. 20th-Century Continental Philosophy. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

281. Seminar: Philosophy of Mind. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

282. Seminar: Metaphysics. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

283. Seminar: Theory of Knowledge. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

284. Seminar: Philosophy of Perception. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

285. Philosophy of Psychoanalysis. (4) Seminar, three hours. Examination of topics such as nature and validity of psychoanalytic explanations and interpretations, psychoanalysis and language, metapsychological concepts such as the unconscious, ego, id, superego, defense mechanisms, and psychoanalytic conception of human nature. S/U or letter grading.

286. Philosophy of Psychology. (4) Seminar, four hours. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology. S/U or letter grading.

287. Seminar: Philosophy of Language. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

288. Seminar: Wittgenstein. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

289. Seminar: Philosophy of Religion. (4) Seminar, four hours. May be repeated for credit with consent of instructor. S/U or letter grading.

Special Studies

290. Workshop: Philosophy of Language. (2 or 4) Seminar, two hours. Ongoing discussion of current issues in philosophy of language based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor. S/U grading.

291. Workshop: Philosophy of Mathematics. (4) Seminar, three hours. Ongoing discussion of current issues in philosophy of mathematics based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor. S/U or letter grading.

292. Philosophical Research in History of Philosophy. (2 to 4) Seminar, two hours. Prerequisite: graduate standing or consent of instructor. Ongoing discussion of current issues in history of philosophy based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor. S/U grading.

299. Seminar: Philosophical Research. (4) Seminar, three hours. Preparation: advancement to candidacy. Presentation of ongoing research by graduate students or faculty members. Participants make presentations, analyze and discuss presentations of others, and read and discuss philosophical texts related to presentations. May be repeated for credit with consent of instructor. S/U grading.

495. Teaching College Philosophy. (2 to 4) Seminar, to be arranged. Seminars, workshops, and apprentice teaching. Selected topics, including evaluation scales, various teaching strategies and their effects, and other topics in college teaching. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Studies. (2 to 12) Tutorial, to be arranged. Properly qualified graduate students who wish to pursue one problem through reading or advanced study may do so if their proposed project is acceptable to one staff member. May be repeated for credit. S/U or letter grading.

597. Directed Studies for Graduate Examinations. (2 to 12) Tutorial, to be arranged. Preparation for MA comprehensive examinations or PhD oral qualifying examinations. S/U grading.

599. Research for PhD Dissertation. (2 to 12) Tutorial, to be arranged. Preparation: advancement to PhD candidacy. May be repeated for credit. S/U grading.
affinity has existed between astronomy and physics, and the intellectual development of the two disciplines has often proceeded synergistically. Newton’s discovery of the laws of mechanics and universal gravitation not only explained motion on Earth, but brought the heavens and Earth into a single quantitative framework in which both are governed by the same laws. The revolutionary discoveries of twentieth-century physics—quantum mechanics and nuclear physics—were rapidly adopted by astronomers to interpret the spectroscopic observations of the stars and to construct accurate models of stellar structure. Einstein’s general theory of relativity predicted the expansion of the universe and that most awesome compaction of matter—the black hole.

Today astronomers study the accretion of matter onto supermassive black holes in quasars and search the most distant regions of the universe to learn about the exotic physical conditions that existed when the universe’s expansion was only fractions of a second old. By measuring the gravitational interactions on distance scales from galaxies to the vast superclusters of galaxies, astronomers have concluded that most of the universe’s matter is dark or nonluminous; physicists have speculated that this dark matter may consist of yet-undiscovered exotic particles that are predicted by the most advanced theories of elementary particle physics.

Department of Physics and Astronomy faculty members and students are able to study the universe in the holistic manner that is demanded by the breadth of these two disciplines.

### Undergraduate Study

#### Astronomy Courses

Astronomy 3 is the fundamental one-term course for students who do not major in physical sciences and should be taken in the first or second year. Astronomy 4, 5, and 6 develop the topics covered in course 3 to somewhat greater depths but are still aimed at nonscience majors. Course 4 discusses stellar and supermassive black holes; course 5 concentrates on the problem of life in the universe; course 6 discusses the structure and evolution of the universe. Astronomy 81, 115, and 117 are general survey courses recommended for science majors in their second year. They systematically introduce astrophysics and require a good background in physics and mathematics (at least two terms of the Physics 1 series and two terms of the Mathematics 31 and 32 series).

### Physics Courses

Students who wish to use physics to satisfy part of the general education requirements in the physical sciences and who have no mathematics background beyond the high school mathematics required for admission to UCLA may take Physics 10.

Physics 1A, 1B, and 1C, or 1AH, 1BH, and 1CH form sequences of courses in general physics for majors in Physics.

The department takes into account prior preparation in physics. If students feel their background would permit acceleration, they may be exempted from one course in the 1A, 1B, 1C sequence by taking the final examination with a class at the end of any term. This serves as a placement examination. A satisfactory score on the College Board Advanced Placement Physics C Mechanics Test may also serve as a placement examination, but placement is not automatic. Students should discuss such possibilities with their departmental adviser.

Physics 5A, 5B, 5C form a one-year sequence of courses in basic physics for students in the biological and health sciences.

Any two or more courses from Physics 1A, 1AH, and 5A are limited to a total of 6 units of credit.

### Undergraduate Majors

#### Astrophysics BS

#### Learning Outcomes

The Astrophysics major has the following learning outcomes:

- Ability to apply knowledge of classical mechanics, electromagnetism, quantum mechanics, and thermal physics to understand and analyze a broad variety of physical phenomena
- Application and improvement of proficiency in mathematics skills in calculus, differential equations, and linear algebra
- Understanding and analysis of phenomena in astronomy and astrophysics including planets, stars, galaxies, and cosmology
- Ability to make accurate and precise physical measurements using modern laboratory instruments and computerized data acquisition
- Ability to critically analyze and interpret data in order to draw valid scientific conclusions
- Ability to present clear written and oral accounts of scientific results
- Scientific, mathematical, computing, and laboratory skills that enable pursuit of career objectives in graduate or professional schools, in a teaching career, or in a scientific career in government or industry

#### Entry to the Major

##### Transfer Students

Transfer applicants to the Astrophysics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two astrophysics courses, two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one programming course.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.
Learning Outcomes

Requirements

Preparation for the Major

Required: Astronomy 81; Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 32; Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B; and one course from Computer Science 30, 31, or Program in Computing 10A, or demonstrated ability to program.

Recommended: Chemistry and Biochemistry 20A.

The Major

Honors Program

In addition to completing all courses required for the major, students must complete two terms of Astronomy 199.

Policies

The Major

Each course taken to fulfill any of the requirements for the major must be taken for a letter grade.

Honors Program

Senior majors in Astrophysics with a 3.5 grade-point average in all upper-division courses are eligible for the honors program. To receive honors and highest honors at graduation, the grade-point average must remain at 3.5 and 3.75 or better, respectively.

Biophysics BS

The goal of the Biophysics major is to provide students with a broad training that allows them to enter competitive graduate programs in biophysics, molecular biology, and biological physics. It also aims at providing students with a solid, quantitative background for careers in the medical field of the future as well as in molecular biology, neuroscience, and biological physics which are all emerging as important and rapidly developing areas of physics. The major is designed to provide students with a flexible scientific/technical training that allows them to explore different career paths and tailor their class work to their scientific interests. The program aims at providing an opportunity to the students to become scientific leaders, bringing the analytic and experimental techniques of different fields to bear on the fascinating world of the physics of living systems.

Learning Outcomes

The Biophysics major has the following learning outcomes:

- Ability to apply knowledge of classical mechanics, electromagnetism, quantum mechanics, and thermal physics to understand and analyze a broad variety of physical phenomena
- Application and improvement of proficiency in mathematics skills in calculus, differential equations, and linear algebra
- Ability to understand and analyze basic phenomena in biological science
- Ability to make accurate and precise physical measurements using modern laboratory instruments and computerized data acquisition
- Ability to critically analyze and interpret data in order to draw valid scientific conclusions
- Ability to present clear written and oral accounts of scientific results
- Scientific, mathematical, computing, and laboratory skills that enable pursuit of career objectives in graduate or professional schools, in a teaching career, or in a scientific career in government or industry

Each course taken to fulfill any of the requirements for the major must be taken for a letter grade.

An overall 2.0 grade-point average in all upper-division courses is required.

Honors Program

Senior majors in Biophysics with a 3.5 grade-point average in upper-division major courses are eligible for the honors program in biophysics. To receive honors and highest honors at graduation, the grade-point average must remain at 3.5 and 3.75 or better, respectively.

Physics BS

The Physics BS major should be pursued if students intend to continue toward the PhD in Physics.

A detailed brochure on the major is available from the Undergraduate Office, 1-707A Physics and Astronomy Building.

Learning Outcomes

The Physics major has the following learning outcomes:

- Ability to apply knowledge of classical mechanics, electromagnetism, quantum mechanics, and thermal physics to understand and analyze a broad variety of physical phenomena
- Application and improvement of proficiency in mathematics skills in calculus, differential equations, and linear algebra
- Ability to understand and analyze physical phenomena in one or more specialized areas of physics of choice, which facilitates subsequent research
- Ability to make accurate and precise physical measurements using modern laboratory instruments and computerized data acquisition
- Ability to critically analyze and interpret data in order to draw valid scientific conclusions
- Ability to present clear written and oral accounts of scientific results
- Scientific, mathematical, computing, and laboratory skills that enable pursuit of career objectives in graduate or professional schools, in a teaching career, or in a scientific career in government or industry

Entry to the Major

Transfer Students

Transfer applicants to the Physics BS major with 90 or more units must have completed the following introductory courses prior to admission to UCLA: two years of calculus, one and one half years of calculus-based physics with laboratory for majors, one year of general biology with laboratory for majors, and one year of general chemistry with laboratory for majors.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 32; Chemistry and Biochemistry 20A, 20B; Life Sciences 7A; Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B. Recommended: Physics 18L.

The Major

Required: Physics 105A, 110A, 110B, 112, 115A, 115B, M180G, C187A, C187B; three additional upper-division elective courses selected from one group or among the three groups.

Group C (Molecular and Cellular Biophysics): Chemistry 153A, 153L, Molecular, Cell, and Developmental Biology 100 or 165A.

Honors Program

In addition to completing all courses required for the major, students must complete two 4-unit terms of Physics 199.

Policies

The Major

Students will be advised when a course has additional lower-division requirements.
Senior majors in Physics with a 3.5 grade-point average in upper-division mathematics and physics courses are eligible for the honors program in physics.

**The Major**

*Required:* Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 115C. The remainder of the course of study consists of a plan, to be worked out by students in consultation with their designated departmental adviser, that details which courses they take to complete the degree. There are four overall requirements: (1) the plan must be worked out five terms before students expect to graduate; (2) there must be one course in the Physics 170 series and one course in the Physics 180 series, or two courses in the Physics 180 series; (3) there must be three additional upper-division courses in the plan, preferably selected from Physics 108, 114, 117, M122, 123, 124, 126, 127, 128, 132, 140A, 140B, 144, 150, C186, C187A; (4) there must be written rationale for the plan. Except for the Physics 180 laboratories, the courses need not be in the Physics and Astronomy Department. However, it is expected that the courses fit into a coherent structure. It is important that the structure and rationale are thought out carefully, as the plan must be endorsed by the designated adviser and be approved by the departmental academic affairs committee. Pre-approved plans of study are available from the undergraduate advisers.

Students preparing for graduate school should take additional courses in physics and mathematics. Physics 108, 114, M122, 123, 124, 126, 132, 140A, and 140B are recommended.

**Honors Programs**

In addition to completing all courses required for the major, students must complete one of the two honors program options.

*Research-based:* students must complete two 4-unit terms of Physics 199.

*Course-based:* students must take 4 units of Physics 197—an in-depth individual study of a physics topic of interest to the student under the guidance of a faculty member and resulting in a written report—and are also required to take Mathematics 115A and two courses selected from Mathematics 120A, 120B, Physics 221A, or 221B.

**Policies**

The Major

Each course taken to fulfill any of the requirements for the major must be taken for a letter grade.

A C average is required in all courses taken to satisfy the major requirements.

**Honors Programs**

Senior majors in Physics with a 3.5 grade-point average in upper-division mathematics and physics courses are eligible for the honors program in physics.

**Physics BA**

The Physics BA major is intended to provide students with a strong background in physics, yet allow students flexibility to study other fields as well. It should be of particular interest to students who want to double major or who want to teach science. Students who intend to continue work toward the PhD in Physics are advised to pursue the Physics BS.

A detailed brochure on the major is available from the Undergraduate Office, 1-707A Physics and Astronomy Building.

**Learning Outcomes**

The Physics major has the following learning outcomes:

- Ability to apply knowledge of classical mechanics, electromagnetism, quantum mechanics, and thermal physics to understand and analyze a broad variety of physical phenomena
- Application and improvement of proficiency in mathematics skills in calculus, differential equations, and linear algebra
- Ability to critically analyze and interpret data in order to draw valid scientific conclusions
- Ability to present clear written and oral accounts of scientific results
- Scientific, mathematical, computing, and laboratory skills that enable pursuit of career objectives in graduate or professional schools, in a teaching career, or in a scientific career in government or industry

**Entry to the Major**

**Transfer Students**

Transfer applicants to the Physics BA major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one general chemistry course for majors.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

**Requirements**

**Preparation for the Major**

*Required:* Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AH, 4BL, 17, 32, Chemistry and Biochemistry 20A; Mathematics 31A or 31AL, 31B, 32A, 32B, 33A, 33B; Program in Computing 10A or Computer Science 30 or 31.

**The Major**

**Policies**

Each course taken to fulfill any of the requirements for the major must be taken for a letter grade.

A C average in the upper-division physics courses is required.

**Graduate Majors**

**Astronomy and Astrophysics MAT**

**Requirements**

Official, specific degree requirements are detailed in official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Astronomy and Astrophysics MS, PhD**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Master of Quantum Science and Technology**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Physics MAT**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Physics MS, PhD**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.
3. Nature of the Universe. (5)
Lecture, three hours; laboratory, two hours. Not open to students with credit for or currently enrolled in course 81 or 82. No special mathematical preparation required beyond that necessary for admission to UCLA in freshman standing. Course for general UCLA students, normally not intending to major in physical sciences. Introduction to vast range of cosmic phenomena including planets in our solar system and beyond, stars, supernova explosions, black holes, galaxies, and universe as whole. P/NP or letter grading.

4. Black Holes and Cosmic Catastrophes. (4)
Lecture, three hours; discussion, one hour. No mathematical preparation required beyond that necessary for admission to UCLA in freshman standing. Course for general UCLA students, normally not intending to major in physical sciences. Introduction to exotic cosmic phenomena such as black holes, and their bizarre effects on fabric of space and time. Some black holes form in violent events that terminate lives of stars, while formation of much more massive black holes at centers of galaxies is still mysterious. Covers cosmic catastrophes including stellar explosions and mergers, supernovae, gamma-ray bursts, and gravitational waves. Discussion of black holes in popular culture. P/NP or letter grading.

5. Life in the Universe. (4)
Lecture, three hours; discussion, one hour. No special preparation required. Topics include formation and evolution of Earth and Sun, life on Earth, origin and evolution of life, solar system, habitability, extra-solar planets, search for intelligent life in universe, and interstellar travel. Draws primarily from biology and chemistry but includes some astronomy, geology, and physics. P/NP or letter grading.

Lecture, three hours; discussion, one hour. No special mathematical preparation required beyond that necessary for admission to UCLA in freshman standing. Course for general UCLA students, normally not intending to major in physical sciences. Cosmology is study of large-scale properties of universe. Consideration of origin, fate, composition, and shape of universe, and its past and future. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1)
Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members. Open to students of all levels and majors, and open to students who have expressed interest in many paths of discovery at UCLA. P/NP grading.

81. Fundamentals of Astrophysics.
Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, and Physics 1A or 1AH. Open to qualified sophomores and upper-division students. Students develop understanding of fundamental physical concepts such as gravity and rotation, and how these concepts connect to stars and planets. Overview of stars and stellar evolution, and tools and methods important to astrophysics such as telescopes and spectroscopy. P/NP or letter grading.

82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology.
Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, and Physics 1A or 1AH. Recommended: course 81, Physics 1B and 1C (or 1BH and 1CH). Open to qualified sophomore and upper-division students. Basic principles of stellar structure and evolution. Rotation and magnetic fields, novae, supernovae, neutron stars, and black holes. Pulsars and galactic X-ray sources. Milky Way galaxy and interstellar medium. Galactic and extragalactic nuclear activity. Introduction to cosmology: Hubble law, thermal history of Big Bang, and earliest moments of universe. P/NP or letter grading.

88A. Lower-Division Seminar: Cosmic Evolution. (2)
Seminar, two hours. Limited to freshmen. Varied astronomical and physical processes of evolution; discussion of how, over vast spans of time, the structure and composition of cosmic evolution have transformed universe from fiery origin at Big Bang into abode for intelligent life. P/NP or letter grading.

89. Honors Seminars. (1)
Seminar, three hours. Limited to students enrolled in lower-division astronomy. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for maximum of 4 units. Individual honors content required. Honors content noted on transcript. Letter grading.

89HC. Honors Contracts. (1)
Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

110. Introduction to Galactic Astronomy. (4)
Lecture, three hours; discussion, one hour. Requisites: course 81, Mathematics 31A, 31B, and Physics 1A or 1AH. Open to qualified sophomores and upper-division students. Introduction of principles important for understanding components and evolution of Milky Way galaxy. Topics include interstellar medium, star and planet formation, examination of basic physical processes governing compact stellar remnants such as white dwarfs, neutron stars, and black holes. Overview of structure and properties of Milky Way galaxy. P/NP or letter grading.

117. Introduction to Extragalactic Astrophysics. (4)
Lecture, three hours; discussion, one hour. Requisites: courses 81, 115, Mathematics 31A, 31B, and Physics 1A or 1AH. Open to qualified sophomore and upper-division students. Examination of basic processes governing expansion of universe from Big Bang to structure formation and galaxy evolution. Development of physics behind processes of galaxy formation and evolution. P/NP or letter grading.

127. Stars from Birth to Death. (4)
Lecture, three hours; discussion, one hour. Requisites: courses 81, 115, 117. In-depth exploration into lives and deaths of stars. Covers production of energy and physics of stellar interiors and atmospheres. Topics include star formation, evolution, and death. P/NP or letter grading.

140. Galaxies. (4)
Lecture, three hours; discussion, one hour. Requisites: courses 115, 117. Designed for upper-division Astrophysics and Physics majors. Focus on basic unit of structure in universe: galaxies. Consideration of physics governing their structure and evolution, and how galaxy population has evolved over history of universe. Other topics include Milky Way, spiral dynamics, active galactic nuclei, and galaxy clusters. P/NP or letter grading.

141. Cosmology. (4)
Lecture, three hours; discussion, one hour. Requisites: courses 115, 117. Designed for upper-division Astrophysics and Physics majors. In-depth exploration of Big Bang model for universe. Examination of data and theory and how cosmologists measure its properties, and how universe has changed since Big Bang. P/NP or letter grading.

142. Data and Computation in Astrophysics. (4)
Lecture, three hours; discussion, one hour. Requisites: courses 81, 115, 117, and Computer Science 30 or 31 or Programming in Computing 10A. Designed for upper-division Astrophysics and Physics majors. Project-based introduction to data and computation in astrophysics context. Students develop core computational toolkit for data retrieval, processing, analysis, visualization, and interpretation. Topics include analysis of large, heterogeneous datasets; high-performance computation; numerical simulations; and scientific numerical methods. P/NP or letter grading.

143. Planets and Exoplanets. (4)
Lecture, three hours; discussion, one hour. Requisites: courses 81, 115, 117. Designed for upper-division Astrophysics and Physics majors. Focus on detection and characterization of planets orbiting other stars, and on physical processes that determine their formation, structure, and evolution. Topics of discussion include formation of terrestrial planet systems, extrasolar planets, and composition and evolution of solar system properties. P/NP or letter grading.

144. Star Formation and Interstellar Medium. (4)
Lecture, three hours; discussion, one hour. Requisites: courses 81, 115, 117. Designed for upper-division Astrophysics and Physics majors. Focus on formation and evolution of stars and interstellar clouds in galaxies, including dust, and neutral, ionized, and molecular gas. Consideration of dynamical processes, such as shocks and expanding supernova remnants. Covers processes of star formation and interstellar medium. Computational techniques are presented. P/NP or letter grading.

145. High-Energy Astrophysics. (4)
Lecture, three hours; discussion, one hour. Requisites: Physics 17, 115, 117, 118. Designed for upper-division Astrophysics and Physics majors. Introduction to high-energy universe, with overview of sources of high energy (X-ray and gamma-ray) emission. Covers important energetic particles in galaxy and connection of high-energy astrophysics to cosmology and particle physics. P/NP or letter grading.

146. Astronomical Instrumentation. (4)
Lecture, three hours; discussion, one hour. Requisites: courses 81, 115, 117. Designed for upper-division Astrophysics and Physics majors. Focus on modern observational techniques for astronomy. Topics include optical and infrared techniques, integration of telescope design, charge-coupled devices, and infrared detectors. These also include adaptive optics systems and high contrast detection methods. Covers all other electromagnetic windows from near-infrared to gamma rays. Other topics include neutrino, dark matter, and gravitational wave detection. P/NP or letter grading.

150. Astrophysics Laboratory. (4)
Lecture, two hours; laboratory, four hours. Designed for juniors/seniors in astrophysics, physics, or related field. Topics include statistical methods in astrophysics, instrumentation, data reduction, and optics. Laboratory experiments include observation of Sun, stars, and other astronomical objects. Emphasis on use of computer software for making measurements from two-dimensional astronomical images. P/NP or letter grading.

198. Advanced Honors Seminars. (1)
Seminar, three hours. Limited to students 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

198HC. Honors Contracts. (1)
Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.
196. Research Colloquia in Astrophysics. (2) Seminar, two hours. Designed to bring together students undertaking supervised tutorial research in seminar setting with other or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

194. Research Group Seminars: Astrophysics. (1) Research group meeting, one hour. Designed for undergraduate students who are part of research group/laboratory. Discussion of research of faculty members or students with regard to understanding methodology in field and/or laboratory equipment. May be repeated for credit. P/NP grading.

196. Research Apprenticeship in Astrophysics. (2 to 4) Tutorial, three hours per week per unit. Limited to juniors/seniors with overall 3.0 grade-point average. Entry-level research apprenticeship for upper-division students under guidance of faculty mentor. May be repeated for credit. Individual contract required. P/NP grading.

197. Individual Studies in Astronomy. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Asigned reading and tangible evidence of mastery of subject matter. S/U grading. May be repeated for credit. Individual contract required. P/NP or letter grading.

198. Honors Research in Astrophysics. (2 to 4) Tutorial, 12 hours. Limited to juniors/seniors with minimum overall 3.0 grade-point average. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

199. Directed Research or Senior Project in Astronomy. (2 to 4) Tutorial, two hours. Limited to junior/seior Astrophysics and Physics majors. Supervised individual research or investigation under guidance of faculty mentor. Current paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

277A-277B. Astronomy Research Project. (6-4) Tutorial, to be arranged. Designed for second-year graduate astronomy students. Two-term research project planned by student and faculty advisor. Any suitable research topic in astronomy or astrophysics, culminating in written report at end of second term. S/U (277A) and letter (277B) grading.

278. Special Topics in Astronomy. (2 or 4) Seminar, to be arranged. Informal course with lecture/seminar format, focusing on one of set of specific topics in astronomy. S/U (2-unit course) or letter (4-unit course) grading.

279. Seminar: Current Astronomical Research. (2) Seminar, one hour. Astronomy and astrophysics colloquium with lectures on current research by local and visiting researchers. S/U grading.

281. Quantum Mechanics for Astrophysicists. (4) Lecture, four hours. Designed for departmental graduate students. Quantum mechanical topics in areas of interest for astrophysics applications. Hydrogen atom, relativistic transitions, closed atomic, molecular spectroscopy including electronic, vibrational, and rotational transition, nuclear reaction theory. Letter grading.

283. Numerical and Statistical Methods. (4) Lecture, three hours. Topics selected by instructor in mathematical, numerical, and statistical methods of relevance to modern astrophysical research topics. Include Fourier transforms, filtering, and power spectra, numerical algorithms, N-body codes, maximum likelihood, Bayesian inference, and error estimation. Letter grading.

284. Order of Magnitude Astrophysics. (4) Lecture, three hours. Practice in real-time problem solving covering all fields of astrophysics. Topics selected by instructor. Students work together and individually to solve problems on blackboard using basic physics and order of magnitude estimations. Letter grading.

M285. Origin and Evolution of Solar System. (4) (Same as Earth, Planetary, and Space Sciences 285B) Lecture, four hours. Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; Origin and evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

287. Practice of Scientific Presentations in Astronomy. (2) Formerly numbered M297. Lecture, one hour. Training and practice in giving scientific presentations in context of astronomy and astrophysics. Includes brief review of relevant scientific communication. Students give talks on their research and/or other topics and receive detailed feedback from both peers and instructor. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprentice guid- ance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596A. Directed Individual Studies. (4 to 10) Tutorial, to be arranged. May be repeated at discretion of department. S/U grading.

596L. Advanced Study and Research at Lick Observatory. (4 to 12) Tutorial, to be arranged. Designed for graduate students who require observational experience, as well as those working on observational problems for their thesis. May be repeated at discretion of department. S/U grading.

599. PhD Research and Writing. (10 to 12) Tutorial, to be arranged. May be repeated at discretion of department. S/U grading.

Physics

Lower-Division Courses

1A. Physics for Scientists and Engineers: Mechanics (Honors). (5) Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: Mathematics 31A, 31B. Enforced corequisite: Mathematics 32A. Enriched preparation for upper-division physics courses. Same material as course 1A but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

1BH. Physics for Scientists and Engineers: Oscil- lations, Waves, Electric and Magnetic Fields (Honors). (5) Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: course 1A or 1B, Mathematics 31B, 32A. Enriched corequisite: Mathematics 32B. Enriched preparation for upper-division physics courses. Same material as course 1B but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

105B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisite: course 105A. Conserved quantities, collisions and scattering, special relativity, non-inertial reference frames, rigid bodies, coupled oscillators, and normal modes. P/NP or letter grading.

108. Optical Physics. (4) Lecture, three hours; discussion, one hour. Requisite: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). Interaction of light with matter; dispersion theory, oscillator strength, line intensities, interferences, and few other topics. Electromagnetic theory, coherence and noncoherence, Kirchhoff formula, diffraction, Huygens principle. P/NP or letter grading.

130. Electricity and Magnetism. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Corequisite: course 105B. Maxwell's equations, electromagnetic waves, energy and momentum, radiation, Lorentz invariance. P/NP or letter grading.

114. Mechanics of Wave Motion and Sound. (4) Lecture, three hours; discussion, one hour. Requisite: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). 105A, 105B. Mathematics 32B, 33A, 33B. Vectors and fields; operators and matrices; waves, sound, light, and optics; interactions of waves and sound. P/NP or letter grading.

105B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisite: course 105A. Conserved quantities, collisions and scattering, special relativity, non-inertial reference frames, rigid bodies, coupled oscillators, and normal modes. P/NP or letter grading.

108. Optical Physics. (4) Lecture, three hours; discussion, one hour. Requisite: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). Interaction of light with matter; dispersion theory, oscillator strength, line intensities, interferences, and few other topics. Electromagnetic theory, coherence and noncoherence, Kirchhoff formula, diffraction, Huygens principle. P/NP or letter grading.

130. Electricity and Magnetism. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Corequisite: course 105B. Maxwell's equations, electromagnetic waves, energy and momentum, radiation, Lorentz invariance. P/NP or letter grading.

114. Mechanics of Wave Motion and Sound. (4) Lecture, three hours; discussion, one hour. Requisite: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). 105A, 105B. Mathematics 32B, 33A, 33B. Vectors and fields; operators and matrices; waves, sound, light, and optics; interactions of waves and sound. P/NP or letter grading.

105B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisite: course 105A. Conserved quantities, collisions and scattering, special relativity, non-inertial reference frames, rigid bodies, coupled oscillators, and normal modes. P/NP or letter grading.

108. Optical Physics. (4) Lecture, three hours; discussion, one hour. Requisite: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). Interaction of light with matter; dispersion theory, oscillator strength, line intensities, interferences, and few other topics. Electromagnetic theory, coherence and noncoherence, Kirchhoff formula, diffraction, Huygens principle. P/NP or letter grading.

130. Electricity and Magnetism. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Corequisite: course 105B. Maxwell's equations, electromagnetic waves, energy and momentum, radiation, Lorentz invariance. P/NP or letter grading.

114. Mechanics of Wave Motion and Sound. (4) Lecture, three hours; discussion, one hour. Requisite: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). 105A, 105B. Mathematics 32B, 33A, 33B. Vectors and fields; operators and matrices; waves, sound, light, and optics; interactions of waves and sound. P/NP or letter grading.

105B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisite: course 105A. Conserved quantities, collisions and scattering, special relativity, non-inertial reference frames, rigid bodies, coupled oscillators, and normal modes. P/NP or letter grading.

108. Optical Physics. (4) Lecture, three hours; discussion, one hour. Requisite: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). Interaction of light with matter; dispersion theory, oscillator strength, line intensities, interferences, and few other topics. Electromagnetic theory, coherence and noncoherence, Kirchhoff formula, diffraction, Huygens principle. P/NP or letter grading.
123. Atomic Structure. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Theory of atomic structure, interaction of radiation with matter. P/NP or letter grading.

124. Nuclear Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Nuclear properties, nuclear forces, nuclear structure, nuclear decays, and nuclear reactions. P/NP or letter grading.

125. Elementary Particle Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Introduction to particle physics. The four basic interactions: strong, electromagnetic, weak, and gravitational. Properties of baryons, mesons, quarks, and leptons; conservation laws, symmetries and broken symmetries; the Standard Model; experimental techniques; new physics at the new accelerators. P/NP or letter grading.

128. Cosmology and Particle Astrophysics. (4) Lecture, three hours; discussion, one hour. Requisites: course 110A. Introduction to cosmology and high-energy particle astrophysics, based on latest developments of both experiment and theory. Special emphasis on unified picture of universe that emerges from particle interactions, QCD, and cosmology. Intensive discussion of unsolved problems and future prospects to help students determine their opportunities in future. Letter grading.

130. Mathematical Methods of Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Vectors and fields in space, linear transformations, matrices, and determinants; Fourier series and integrals. P/NP or letter grading.

132. Mathematical Methods of Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 131, Mathematics 32B, 33A, 33B. Functions of a complex variable, including Riemann surfaces, analytic functions, Cauchy theorem and formula, Taylor and Laurent series, calculus of residues, and Laplace transforms. P/NP or letter grading.

140A. Introduction to Solid-State Physics. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 112. Introduction to basic theoretical concepts of solid-state physics with applications. Crystal symmetry; cohesive energy; diffusion of electron, neutron, and electromagnetic waves in a lattice; reciprocal lattice; phonons and their interactions; free electron theory of metals; energy bands. Letter grading.

144. Polymer Physics. (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 105A, 110A, and 112 or Chemistry 110A. How physical properties of polymers can be derived from mathematical models. Comparison of models to calculations based on random walk problem and used to predict mechanical characteristics of large molecules. Study of networks of polymers and poly-nuclear chains, with focus on their viscoelastic properties. Discussion of movement of individual polymers within melts. Study of examples of more complex structures, such as polymer fractals. Consideration of applications of all of the above to biology, with focus on their potential role in evolution and current hypothesis of origins on life. P/NP or letter grading.

170A. Electronics for Physics Measurement. (4) Formerly numbered 117) Lecture, two hours; laboratory, four hours. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Hands-on experimental course to develop understanding of design principles in modern electronics for physics measurements. Broad introduction to analog and digital electronics from practical viewpoint, followed by examination of typical circuits for scientific instrumentation and of thy of methods of computer data acquisition and signal processing. Letter grading.

170E. Introduction to Symbolic Computation. (4) Lecture, one hour; laboratory, three hours. Corequisite: course 105A. Students learn to use Mathematica or other computer programs for mathematics problems that arise in physics. Use of skills developed to solve complicated systems, model behavior, and explore in greater depth other advanced physics topics. P/NP or letter grading.

C170M. Machine Learning for Physical Sciences Laboratory. (4) Formerly numbered 170M.) Lecture, two hours; laboratory, four hours. Requisites: courses 1A, 1B, 1C (or 1AH, 1BH, 1CH), Mathematics 32A, 33A, or equivalent. Preparation: some experience in programming using Python. Project-based course designed for students with no previous experience in machine learning to learn about methods and algorithms in machine learning and their application to scientific problems in physical sciences. Development of experience in compilation, analysis, and cleaning of data. Machine learning topics include classification, regression, dimensionality reduction, clustering, and kernel methods. Concurrently scheduled with course C270M. P/NP or letter grading.

170N. Computational Physics and Astronomy Laboratory. (4) Formerly numbered 190N.) Lecture, two hours; laboratory, four hours. Requisites: courses 105B, 110B, 112 (or Astronomy 115), 115B. Prior experience in working with computers is helpful but not required. Project-based course to design and experience in solving physics and astronomy problems on computers. Project-based course, with projects selected from core areas of classical mechanics, electrodynamics, quantum mechanics, statistical mechanics, and astronomy. Introduction to problems and to required numerical methods in lectures, so students can write programs in one modern programming language of their choice (Python recommended) and carry out laboratory experiments with it, with results documented in reports. P/NP or letter grading.

180A. Nuclear Physics Laboratory. (4) Lecture, two hours; laboratory, four hours. Recommended: course 124. Students conduct experiments about cosmic ray counting and statistics, radioactive decay law measurement, beta decay spectrometer, and Compton scattering. Experiment perform data analyses of experimental data; and write scientific report for each experiment. P/NP or letter grading.

180C. Solid-State Laboratory. (4) Lecture, two hours; laboratory, four hours. Recommended: course 140A. Laboratory experiments explore real and collective phenomena in solids, such as quantum oscillations, superconductivity, and ferroelectricity. Use of introduced methods to investigate bulk properties, such as magneto-transport, dielectric, and magnetic responses. P/NP or letter grading.

180D. Acoustics Laboratory. (4) Lecture, two hours; laboratory, four hours. Recommended: courses 112, 114. Study of waves and sound propagation in different media, including gases, liquids, and superfluids. Description of experiments in terms of hydrodynamic theory. Students gain experience in basic electronics, amplifiers, microphones, cymographs, and fast Fourier transforms. P/NP or letter grading.

180E. Plasma Physics Laboratory. (4) Lecture, two hours; laboratory, six hours. Recommended: course 110B. Students gain experience with computer programming, especially Python, is helpful but not required. Provides hands-on experience in measuring key properties of weak and electromagnetic interactions using cosmic ray muons. Provides exposure to common experimental techniques in particle physics. Overview of standard methods for tractation of basic particle detection techniques, introductory probability and statistics, and analysis with Python and ROOT. P/NP or letter grading.

180F. Elementary Particle Laboratory. (4) Lecture, two hours; laboratory, six hours. Recommended: courses 110A, 115B. Students gain experience of conducting independent research in experimental biological physics. Construction of modern microscope. Use of microscope to image biological specimens. Students learn optics, diffraction, imaging, microscopy, computational physics, and/or fluorescence correlating. P/NP or letter grading.

180Q. Quantum Mechanics Laboratory. (4) Lecture, two hours; laboratory, six hours. Requisites: courses 110B, 115A. Students gain experience of conducting independent research in experimental biological physics. Construction of modern microscope. Use of microscope to image biological specimens. Students learn optics, diffraction, imaging, microscopy, computational physics, and/or fluorescence correlating. P/NP or letter grading.

C186. Neurophysiology: Brain-Mind Problem. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 5A, 5B, and 5C, or 6A, 6B, and 6C. Chemistry 14A or 20A, Mathematics 3A, 3B, 3C, 33A. How does mind emerge from brain? Provides summary of basic biophysics of neurons, synapses, and plasticity. Introduction to commonly used experimental and theoretical methods, including measuring, quantifying, and modeling neural activity, and their relative strengths and weakness and use of them to understand link between neural circuits, their emergent
neural dynamics, and behavior in example model systems. Discussion of mechanisms of interaction between neural circuits and their role in cognition, learning, and memory. Research and development of computational neuroscience, 741BA. Biological Physics: Life at Rest. (4) Lecture, three hours. Limited to seniors/graduates. Departmentally sponsored special topics courses such as pilot courses or those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

C187B. Biological Physics II: Life in Motion. (4) Lecture, three hours; discussion, one hour. Limited to junior/senior Astrophysics majors. Departmentally sponsored special topics courses such as pilot courses or those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

188B. Special Courses in Physics. (4) Lecture, three hours; discussion, one hour. Limited to junior/senior Astrophysics majors. Departmentally sponsored special topics courses such as pilot courses or those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188BA. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory or laboratory component, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar. Three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities, under direct course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities, under direct course instructor. May be repeated for credit. Maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

190. Research Colloquia in Physics. (2) Seminar, two hours. Designed to bring together students under-taking supervised tutorial research in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

191. Variable Topics Research Seminars: Physics and Astronomy. (4) Seminar, three hours. Participating research seminar on advanced topics in physics and astronomy. May be repeated for credit by petition. P/NP or letter grading.

192. Undergraduate Practicum in Physics. (2 to 4) Seminar, three hours. Limited to seniors. Training and supervised practicum for advanced undergraduate students. Students assist in preparation of materials and development of innovative programs with guidance of faculty members. Small course setting. May be repeated for credit. P/NP or letter grading.

192M. Methods and Application of Collaborative Learning Theory in Physical Sciences. (2 to 4) Seminar, two hours. Limited to seniors. Course from 1A, 1B, 1C, 5A, 5B, SC, or 131, course 192S (may be taken concurrently), and at least one term of prior experience in same course in which collaborative learning theory is practiced and refined under supervision of instructors. With instructor guidance, students apply pedagogical principles based on current education research, assist with the development of innovative instructional materials, and give frequent feedback on their progress. May be repeated four times for credit. Letter grading.

192S. Introduction to Collaborative Learning Theory and Practice. (1) Seminar. Limited to seniors. Course from 1A, 1B, 1C, 5A, 5B, SC, or 131, course 192S (may be taken concurrently), and at least one term of prior experience in same course in which collaborative learning theory is practiced and refined under supervision of instructors. With instructor guidance, students apply pedagogical principles based on current education research, assist with the development of innovative instructional materials, and give frequent feedback on their progress. May be repeated four times for credit. Letter grading.

193A. Atomic, Molecular, and Optical Physics. (2) Lecture, one hour. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory or laboratory component, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

194. Discussion, one hour.限于2014年或2015年。在UCLA开展的研究项目的成果。Letter grading.

196. Research Apprenticeship in Physics. (2 to 4) Tutorial, three hours. Limited to seniors with overall 3.0 grade-point average. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

210. Modern Physics Research Areas. (2) Review of modern physics research areas, with emphasis on those actively pursued at UCLA. S/U grading.

221B. Quantum Mechanics. (4) Lecture, four hours; discussion, one hour. Requisite: course 221A. Symmetries and conservation laws, perturbation theory, scattering theory. Special topics such as Berry’s phase and related geometric and topological aspects. Letter grading.
221C. Quantum Mechanics. (4) Lecture, four hours. Requisites: courses 221A, 221B. Quantum theory of radiation, introduction to relativistic quantum mechanics, elements of many-body theory, and special topics. S/U or letter grading.

229E. Particle Astrophysics: Exploring Earliest and Extreme Universe. (4) Lecture, three and one half hours. Requisites: courses 210A, 210B, 221A, 221B. Recommended: course 226A. Introduction to high-energy astrophysics with discussion of latest developments in both experiment and theory. Special emphasis on unified picture of universe that emerges from particle physics, astronomy, and cosmology. S/U or letter grading.

230A. Quantum Field Theory. (6) Lecture, four hours. Requisite: course 221C or equivalent and knowledge of basic special relativity. Introduction to relativistic quantum field theory starting from first principles. Topics include particles as unitary representations of Poincare group, fields as finite-dimensional representations of Lorentz group; discrete space-time symmetries; quantization of free scalar, spinor, and gauge fields; Casimir effect; classical interacting scalar, spinor, and gauge fields; and LSZ formalism for calculation of S-matrix from quantum field theory correlators. S/U or letter grading.

230D. Quantum Field Theory. (4) Lecture, four hours. Requisites: courses 221A, 221B, 221C. Topics in modern quantum field theory, gauge and group theory, instantons, and other topological defects, large N methods, finite temperature field theory, lattice field theory, effective field theory methods and classical Lagrangians, conformal field theory, and topological aspects of anomalies. S/U or letter grading.

231A. Methods of Mathematical Physics. (4) Lecture, four hours. Widely used mathematical methods and their applications to physics including basic topology, complex analysis, Fourier analysis, elliptic functions, linear differential operators, Green functions, and special functions associated with eigenvalue problems of ordinary and partial differential operators on flat and curved spaces. Letter grading.

232A-232B. Relativity. (4-4) Special and general theories with applications to elementary particles and astrophysics.

232C. Special Topics in General Relativity. (4) Lecture, four hours. S/U or letter grading.

232M. Geometry and Physics. (4) Same as Mathematics 221M. Lecture, three hours. Interdisciplinary course on topics at interface between physics, quantum fields and superstrings and mathematics of differential and algebraic geometry. Topics include supersymmetry, Seiberg/Witten theory, conformal field theory, Calabi-Yau geometry and duality, integrable systems. S/U grading.

237B. String Theory. (4) Lecture, four hours. Requisite: course 237A. Current topics in string theory, which may include anti-deSitter/conformal field theory (AdS/CFT) correspondence, string dualities, compactifications and connections to quantum information. S/U or letter grading.

243M. Statistical Mechanics of Living Systems from Active Matter to Immune System. (2 to 4 Seminar, four hours. Exploration of how concepts and models from statistical physics can be used to gain quantitative and intuitive understanding of biological phenomena. Introduction to analytical and computational methods for describing stochastic complex systems, with application to problems in mechanics and dynamics of active matter and evolutionary dynamics of immune system. S/U or letter grading.

266. Seminar: Propagation of Waves in Fluids. (2 to 4) Seminar, three hours. S/U or letter grading.

268. Seminar: Spectroscopy. (2 to 4) Seminar, three hours. S/U or letter grading.

269A. Seminar: Nuclear Physics. (2 to 4) Seminar, three hours. S/U or letter grading.

269B. Seminar: Elementary Particle Physics. (2 to 4) Seminar, three hours. S/U or letter grading.

269C. Seminar: Accelerator Physics. (2 to 4 Seminar, three hours. Requisites: courses 241A, 241B, 241C, 242A, 242B. Covers advanced topics in condensed matter physics with focus on topology (both in real and momentum space), topological insulators, topological superconductors, quantum Hall effects and topological phenomena in two and three dimensions. Insights drawn from quantum pumping and bulk-edge correspondence, especially emphasized. Range of topics based on topological defects in magnetic and superconducting systems and exploration of notions of topology for quantum transport and quantum information applications. S/U or letter grading.

270D. Strobe Seminar: Frontiers in Imaging and Microscopy. (4 Seminar, one hour. Discussion with leading figures of frontiers of imaging and microscopy fields, including multi-dimensional electron microscopy at atomic resolution, real-time functional three-dimensional X-ray imaging of advanced materials, advanced optical nano-imaging, and integrative approaches and underpinning technologies for different imaging modalities. May be repeated twice for credit. S/U grading.

270M. Machine Learning for Physical Sciences Laboratory. (4) Lecture, two hours; laboratory, four hours. Requisites: courses 1A, 1B, 1C or (1AH, 1BH, 1CH). Mathematics 32A, 32A, or equivalent. Preparations covering experience with Python and Jupyter. Project-based course designed for students with no previous experience in machine learning to learn about methods and algorithms in machine learning and their application to scientific problems in physical sciences. Development of experience in compilation, analysis, and cleaning of data. Machine learning topics include classification, regression, dimensionality reduction, clustering, and kernel methods. Concurrently scheduled with course 170M. S/U or letter grading.
290. Research Tutorial: Plasma Physics. (2 or 4) Three terms required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students directed toward problems of current research interest in plasma physics group, both experimental and theoretical. May be repeated for credit. S/U grading.

292. Research Tutorial: Spectroscopy, Low-Temperature, and Solid-State Physics. (2 or 4) Required of each graduate student doing research in these fields, ordinarily during second or third year. Seminar and discussion by staff and students on problems of current research interest in spectroscopy, low-temperature, and solid-state physics. May be repeated for credit. S/U grading.

293. Research Tutorial: Current Topics in Physics. (2) Lecture, one hour. Seminar and discussion by staff and students on current topics in physics, both experimental and theoretical topics not limited to one field of physics. Strongly recommended for graduate students in physics. May be repeated for credit. S/U grading.

294. Research Tutorial: Accelerator Physics. (2 or 4) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

295. Research Tutorial: Soft Matter/Biological Physics. (2) Tutorial, one hour. Required of each graduate student doing research in this field. One-hour presentation by teaching assistant on general ongoing research or on agreed on topic. Students answer critical questions and participate in critical examination of research. May be repeated for credit. S/U grading.

296. Research Topics in Physics. (2) Advanced study and analysis of current topics in physics. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

297. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under the guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

490. Scientific Writing. (2) Seminar, 90 minutes. Practical guidelines for improved scientific writing and oral presentation. Writing of several short papers with subsequent analysis in class. Short blackboard and/or viewgraph presentations. Topics vary. S/U grading.

495. Teaching College Physics. (2) Seminar; two hours; multi-day intensives training at beginning of Fall Quarter. Required of all new teaching assistants. Special course for teaching assistants designed as an introduction to teaching college physics, with emphasis on applying discussed techniques in classroom. Ideas and skills learned are evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading.

596. Directed Individual Studies. (2 to 12) Tutorial, to be arranged. May be repeated for credit. S/U grading.

597. Preparation for Master’s Comprehensive Examination or PhD Qualifying Examinations. (4) Tutorial, to be arranged. May be repeated twice for credit. S/U grading.

598. Master’s Thesis Research and Writing. (4) Tutorial, to be arranged. May be repeated twice for credit. S/U or letter grading.

599. PhD Research and Writing. (4 to 12) Tutorial, to be arranged. May be repeated for maximum of 18 units. S/U grading.

Quantum Science and Technology Graduate Courses

M205. Quantum Programming. (4) Same as Computer Science M238.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: Mathematics 115A. History of quantum computing; notion of qubit; four postulates that provide interface to quantum mechanics; concepts of quantum circuit and universal gate set; quantum teleportation; superdense coding; no-cloning theorem; suite of fundamental quantum algorithms including Shor's algorithm; Grover's algorithm, and quantum approximate optimization algorithm; several quantum programming languages and how they compare; quantum simulations; quantum cryptography; quantum error correction; quantum advantage. Students implement several quantum algorithms in multiple languages and run them on both simulators and quantum computer. Letter grading.

402. Quantum Information. (4) Lecture, three hours; discussion, one hour. Requisite: Physics 245. Density matrix evolution, decoherence, characterization of quantum states, distance measures between quantum states, fidelity, quantum error correction, entropy and information, and quantum information theory. May not be repeated for credit. Letter grading.

403. Theory of Quantum Devices. (4) Lecture, four hours. Requisites: course 402, Physics 245. Study advanced theories, with some elements of quantum transport and advanced many-body physics. Introduction and comparison of different types of physical building blocks available for quantum computing. Addresses practical issues, such as scalability and comparison between different physical platforms and associated devices. Letter grading.

410. Quantum Optics Laboratory. (4) Laboratory, eight hours. Limited to Master of Quantum Science and Technology students. Examination and use of modern optics, including lasers, optics, fibers, polarization manipulation, and photon counting. Use of techniques of quantum optics to demonstrate concepts of quantum mechanics, including superposition, quantum measurement, hidden variable theories, and Bell's inequality. Application of quantum optics to quantum information science. Letter grading.

411. Ensemble Quantum Computing Laboratory. (4) Laboratory, four to eight hours. Limited to Master of Quantum Science and Technology students. Introduction to and applications of ensembles of quantum mechanical spins, theoretical description in language of density matrices, and experimental techniques using nuclear magnetic resonance to prepare, manipulate, and measure their properties. Letter grading.

412. Solid State Quantum Computing Laboratory. (4) Laboratory, four to eight hours. Requisites: courses 410, 411. Introduction to materials, devices, and techniques of semiconductor-based qubit technology. Students choose total of 10 weeks of laboratory modules from among following list according to their interests and availability: semiconductor device processing and metrology; transmission electron microscopy (TEM); pulsed control of NV centers in diamond; quantum options and single photon interferometry; quantum key distribution and quantum random number generation; quantum zero effects. Letter grading.

597. Master of Quantum Science and Technology Comprehensive Examination Preparation. (4) Tutorial, to be arranged. Limited to Master of Quantum Science and Technology students. Students conduct an independent research project in the field of quantum science and technology in a supervised setting, either a research group at UCLA (or other affiliated and approved university setting) or through an internship at a company, national laboratory, or similar institution. S/U grading.

Overview
The Physics and Biology in Medicine Master of Science (MS) and Doctor of Philosophy (PhD) Program is a CAMPEP-accredited interdepartmental graduate program supported by the
departments of Molecular and Medical Pharmacology, Radiation Oncology, and Radiological Sciences. It offers training in four specialties: medical imaging, molecular and cellular oncology, molecular imaging, and therapeutic medical physics.

**Facilities**

Specialized facilities for training and research are available in the departmental laboratories, as well as in the Crump Institute for Molecular Imaging, Center for Medical Countermeasures against Radiation, and Center for Computer Vision and Imaging Biomarkers, among others. Highly specialized equipment includes state-of-the-art medical imaging modalities such as MRI, CT angiography, and PET/CT in both clinical and preclinical settings, as well as advanced radiotherapy treatment and planning facilities. The program prepares students for careers as independent researchers or professional medical physicists, and graduates pursue academic, industrial, government, and clinical careers, regardless of which specialty they pursue.

**Career Prospects**

Graduates in physics and biology in medicine can expect to engage in any combination of research, teaching, clinical service, and consultation. Biomedical physicists are usually employed in hospitals frequently associated with a medical school, where they are members of the academic staff. They are also in demand in high-technology private industry engaging in research and development of diagnostic equipment. In government agencies, biomedical physicists are involved in the formulation and enforcement of regulations applied to the use of radiation in health care delivery.

**Graduate Major**

**Physics and Biology in Medicine MS, PhD**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Physics and Biology in Medicine**

**Lower-Division Courses**

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

**Upper-Division Course**

199. Directed Research in Biomedical Physics. (2 to 4) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**Graduate Courses**

200A. Physics and Chemistry of Nuclear Medicine. (4) Lecture, three hours; discussion, one hour. Nuclear structure, statistics of radioactive decay, nuclear radiations and their interaction with matter, nuclear decay processes, nuclear reactions, and compartment models. Physical and chemical properties of radioactive preparations used in nuclear medicine. Basic principles of nuclear medicine imaging, SPECT, and PET. S/U or letter grading.

200B. Nuclear Medicine Instrumentation. (4) Lecture, one hour; laboratory, three hours. Requisite: course 200A. Introduction to nuclear medicine instrumentation, including gamma chambers, probe and well scintillation detectors, scintillation cameras, and single photon and positron emission computed tomography. S/U or letter grading.

201. Medical Radiation Accelerator Design. (4) Lecture, three hours. Requisite: course 216. Overview of physical principles involved in design of current particle accelerators (electron, proton, heavy particle) and analysis of characteristics of current accelerators and facility design. S/U or letter grading.

204. Introductory Radiation Biology. (4) Lecture, three hours. Effect of ionizing radiation on radiation-resistant and radiation-sensitive organisms, with topics centered on instrumentation, measurement techniques, and basic radiation damage. S/U or letter grading.

205. Physics of Diagnostic Radiology. (4) Lecture, three hours; laboratory, one hour. Production of X rays, basic interactions between X rays and matter, X-ray system components, physics principles of medical radiography, radiographic image quality, fluoroscopy, image intensifiers, special procedures, X-ray protection. Laboratory experiments illustrate basic theory. S/U or letter grading.

206. Advanced Instrumentation. (4) Lecture, three hours; discussion, one hour. Requisite: course 205. Introduction to recent advances in digital diagnostic imaging systems, with topics centered on instrumentation including digital radiography, computed radiography, computed tomography, magnetic resonance imaging, and positron emission tomography. S/U or letter grading.

208A. Medical Physics Laboratory: Medical Imaging. (4) Discussion, two hours; laboratory, four hours. Requisite: course 203. Hands-on experience performing acceptance testing and quality control checks of imaging equipment such as fluoroscopy, digital subtraction angiography, mammography, ultrasound, magnetic resonance imaging, computed tomography, and computed radiography. S/U or letter grading.

208B. Medical Physics Laboratory: Radiation Therapy. (4) Discussion, two hours; laboratory, four hours. Requisite: course 203. Hands-on experience calibrating treatment planning and radiation therapy equipment. S/U or letter grading.

210. Modern Vision in Medical Imaging. (4) Lecture, three hours; discussion, one hour. Recommended requisites: Mathematics 155, Program in Computing 10A. Study of image segmentation, feature extraction, object recognition, classification, and visualization with biomedical applications. Topics include region-growing, edge detection, mathematical morphology, clustering, neural networks, and volume rendering in lectures, case studies, and programming projects. S/U or letter grading.

211. Medical Ultrasound. (4) Lecture, 90 minutes; laboratory, two hours. Preparation: one calculus course. Production of real-time ultrasound images, traditional and 3D modeling and design, Doppler and color flow instrumentation, biohazards of ultrasound, ultrasound phantom design, and ultrasound tissue characterization techniques. Laboratory included. S/U or letter grading.

212. Biochemical Basis of Positron-Emission Tomography (PET). (4) Lecture, three hours; discussion, one hour. Introduction to biochemical processes and application of radionuclides to study metabolism noninvasively by positron-emission tomography (PET). Validation of kinetic models to derive quantitative information from PET. Introduction to clinical and experimental application of PET. S/U or letter grading.

213. Quantitative Autoradiography. (4) Lecture, three hours; discussion, one hour. Application of quantitative autoradiography for estimating brain and heart functions. Topics include 2-deoxyglucose method for metabolic ratio; iododeoxyuridine method for blood flow; amino acid method for protein synthesis; quantitative receptor autoradiography; neuroanatomy and neurophysiology of autoradiogram and PET scan interpretation. S/U or letter grading.

214. Medical Image Processing Systems. (4) Lecture, three hours; discussion, one hour. Requisites: courses 209, 210. Advanced image processing and image analysis techniques applied to medical images. Discussion of approaches to computer-aided diagnosis and image quantitation, as well as application of pattern classification techniques (neural networks and discriminant analysis). Examination of problems from several imaging modalities (CT, MRI, CR, and mammography). S/U or letter grading.

**Physics and Biology in Medicine / 743**

218. Radiologic Functional Anatomy. (4) Lecture, three hours; discussion, one hour. Introduction to human anatomy, cellular, tissue, and physiological function as visualized through microscopy, molecular imaging, radiog- raphy, CT, MRI, ultrasonography, PET, and SPECT. Letter grading.

220A-220D. Laboratory Rotations in Biomedical Physics. (2–2) Laboratory, two hours. Laboratory proj- ects to provide students with introduction to field. One oral and one written presentation required. S/U grading.

220A. Biophysics; 220B. Medical Imaging; 220C. Therapeutic Medical Physics; 220D. Radiation Biology and Experimental Radiation Therapy.

221. Applied Health Physics. (4) Lecture, three hours; discussion, one hour. Requisite: course 216. Basics of radiation safety as applied to medical applications. In- troduction to all legal requirements pertaining to med- ical use of radioactivity. Letter grading.

223. Seminar: Radiation Biology. (4) Seminar, four hours. Exploration of physiological and molecular mechanisms that impact on response of normal and malignant tissues to ionizing radiation, with particular emphasis on critical and high in-depth analysis of ap- proaches through which such responses can be mod- ified in therapeutic setting. Understanding of rationale for integrating biological information into process of treatment planning and delivery. S/U grading.

225. Contrast Mechanisms and Quantification in Magnetic Resonance Imaging. (4) Lecture, four hours. Requisite: course M219. Introduction to magnetic res- onance contrast mechanisms and quantification tech- niques in magnetic resonance imaging. Topics include exogenous and endogenous contrast mechanisms, measuring tissue perfusion and permeability, ad- vanced diffusion and q-space analysis, chemical ex- change and magnetization transfer imaging, and re- laxometry. Letter grading.

227. Human Disease: Current and Future Role of Biomedical Physics. (4) Lecture, three hours; discus- sion, one hour. Present and future roles of biomedical physics in diagnosis and treatment of human disease, with focus on interdisciplinary nature of this field. Ex- ploration of two diseases in depth with detailed de- scription of roles of physics-based diagnostic imaging and therapeutic options for each disease. Description of current and future developments as well as tech- niques that exploit intersection between diagnosis and therapy. Letter grading.

M229. Advanced Topics in Magnetic Resonance Imag- ing. (4) Same as Bioengineering M229.) Lecture, four hours. Requisite: course M219. Designed for stu- dents interested in pursuing research related to devel- opment or translation of new magnetic resonance im- aging (MRI) techniques. Basic tools and understanding of recent MRI developments that have had high im- pact on field, involve novel pulse sequence design or image reconstructions, and enable imaging of anatomy or function in way that surpasses what is currently possible with any modality. Topics include in- depth sequence simulation, RF pulse design, rapid image acquisition, parallel imaging, compressed sensing, image reconstruction and processing, motion encoding and compensation, chemical-shift imaging and understanding, and understanding/avoiding arti- facts. Programming exercises in MATLAB to provide hands-on experience. Letter grading.

231. Advanced Treatment Planning in Radiation Therapy. (3) Lecture, four hours. Enforced requisites: courses 203, 216. Designed to provide theoretical and practical understanding of treatment planning tech- niques utilized in radiation therapy. Topics include clin- ical treatment planning workflow, general planning principles and strategies, and specific considerations for various treatment delivery modalities and ad- vanced treatment techniques. Detailed discussion on dose calculation algorithms and inverse planning and optimization. Clinical treatment planning demonstra- tion using commercial treatment planning systems used to provide planning of clinical applica- tions and implementation. S/U or letter grading.

M248. Introduction to Molecular Imaging. (4) Same as Bioengineering M248 and Pharmacology M248.) Lecture, three hours; laboratory, one hour; outside study, seven hours. Exploration of role of molecular imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging and molecular techniques. Practical experience provided through series of im- aging laboratories. Letter grading.

269. Seminar: Medical Imaging. (1) Seminar, two hours; discussion, two hours. Preparation: successful comple- tion of Multidisciplinary Biomedical Image Registration II (M268) or equivalent. Letter grading.

Overview

Physiology is the science of the functional activ- ities of living systems. This covers a wide
range, including observations on humans and experiments on animals and model systems in order to understand principles. Physiology is the science most directly relevant to human medicine in all its specialties and to understanding all environmental factors affecting human life. It is also a pure science of great challenge because of the complexity of its problems and its extensive interaction with mathematical, physical, biochemical, and engineering sciences, as well as with other branches of biology.

Within the prescribed curriculum, students may specialize in cellular and molecular physiology, theoretical and mathematical physiology, and organ systems and integrative phenomena, including neuroscience and behavioral physiology.

The Department of Physiology offers post-doctoral training in research and welcomes students interested in articulated MD/PhD programs.

Applicants interested in pursuing graduate study may apply directly to the interdepartmental Molecular, Cellular, and Integrative Physiology Doctor of Philosophy (PhD) program. Physiology faculty information is available from the department.

### Graduate Courses

**M210. Molecular and Cellular Mechanisms of Neural Integration.** (5) (Same as Neuroscience M230 and Physiological Science M210.) Lecture, four hours; discussion, one hour. Requisite: Neuroscience M202. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation. Letter grading.

**220. Methods in Cell Physiology.** (8) Linear circuit analysis, including admittance, transfer admittance, transfer function, and filters using transform methods. Application of these concepts to electronic analog circuits in lectures and laboratory, with emphasis on operational amplifiers. Applications to electrophysiology include microelectrode amplifiers, voltage clamp and patch clamp techniques, with circuit analysis and noise considerations. Digital electronics cover logic gates, sequential circuits, and A/D and D/A conversion, with introduction to sampling theory.

**221. Cell Physiology: Excitability.** (6) Requisite: course 220. In-depth coverage of general properties of excitable cells, linear conductance changes, and generation and propagation of the nerve impulse. Voltage gating and gaging currents, as well as relationship between macroscopic conductance and single channel properties discussed in analytical detail using original publications.

**298. Current Topics in Physiology.** (2 to 4) Lecture, one hour; discussion, one hour. Designed for graduate students. Students read primary literature in a specified area and conduct or participate in discussions on these papers. May be repeated for credit. S/U or letter grading.

**596. Directed Individual Study or Research.** (2 to 12) Tutorial, to be arranged. S/U grading.

**597. Preparation for MS Comprehensive Examination or PhD Qualifying Examinations.** (2 to 12) Tutorial, to be arranged. S/U grading.

**598. Thesis Research for MS Candidates.** (2 to 12) Tutorial, to be arranged. S/U grading.

**599. Dissertation Research for PhD Candidates.** (2 to 12) Tutorial, to be arranged. S/U grading.

### Upper-Division Courses

**188SA. Individual Studies for USIE Facilitators.** (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators.** (1) Tutorial, to be arranged. Enforced requisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators.** (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 885 course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**199. Directed Research in Physiology.** (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

### Lower-Division Courses

**19. Fiat Lux Freshman Seminars.** (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**99. Student Research Program.** (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Faculty Roster

**Professors**

Matthew A. Barreto, PhD
Kathleen Bawn, PhD
Michael S.Y. Chwe, PhD
Joshua F. Dienstag, PhD (Shapiro Family Endowed Professor of Modern Political Theory)
Lorrie A. Frasure, PhD (Ralph Bunche Professor of International Studies)

Leslie N. Johns, PhD
Jeffrey B. Lewis, PhD
Michael F. Lotfchi, PhD
Susanne Lohmann, PhD
Kirstie M. McClure, PhD
Barry O’Neill, PhD
Karen J. Orren, PhD
Anthony R. Pagden, PhD

**Overview**

Political science investigates the nature, causes, and consequences of politics. The Department of Political Science has gained dis-
tinction in political economy, electoral behavior, comparative politics, and political theory. The department is strongly committed to teaching as well as research, with the primary goal of providing the best possible education for students seeking to develop an expertise in the field of political science by instilling skills in research and analytic reasoning.

Undergraduate Major

Political Science BA

The undergraduate major in the Department of Political Science aims to provide students with understanding of basic political processes and institutions as these operate in different national and cultural contexts. It also covers the interaction between nation states, the changing character of the relations between citizens and governments, and the values and criteria by which the quality of political life is judged. The program may be individually focused to serve the needs of the liberal arts major, the student seeking preparation for graduate work in political science, public administration, law, and other professional fields, and the student preparing for specialized roles in political and public organizations.

Learning Outcomes

The Political Science major has the following learning outcomes:

- Critical thinking about basic political processes, institutions, and concepts as they operate in different national and cultural contexts
- Impartial evaluation of arguments
- Application of mathematical and logical reasoning to political processes
- Use and evaluation of statistical and other types of evidence in arguments
- Recognition of limits of quantitative and non-quantitative analysis
- Knowledge of diverse theories of politics by engaging critically with texts, media, and contexts
- Employment of cultural, hermeneutical, normative, and historical approaches
- Location, evaluation, and use of information and scholarship needed to place particular political events in broader historical, cross-national, and theoretical contexts
- Demonstrated familiarity with various approaches to the study of politics, and their application to specific questions, puzzles, and debates
- Written and oral arguments using appropriate evidence, with sensitivity to opposing perspectives, about significant political processes, events, and concepts

Entry to the Major

Pre-major

All students intending to major in Political Science must enroll as Political Science pre-majors. After completion of preparation for the major courses, they need to petition to enter the major in the Undergraduate Office, 4269 Bunche Hall.

Transfer Students

Transfer applicants to the Political Science major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one statistics course and four courses from political theory, world politics, game theory, American politics, or comparative politics.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Policies

Students must complete all pre-major courses with a 2.0 grade-point average by the time they attain 135 units. Admission to the major is granted only after successful completion of all lower-division requirements.

Requirements

Preparation for the Major

Required: Four lower-division courses from Political Science 10, 20, 30, 40, 50. Students must also take Political Science 6 or 6R. Statistics 10 or 12 may be substituted for course 6 or 6R.

The Major

Required: Ten upper-division courses (40 units) selected from Political Science M105 through 199.

Upper-division political science courses are organized into six fields: Field I: Political Theory (numbered 111–119), Field II: International Relations (120–139), Field III: American Politics (140–149), Field IV: Comparative Politics (150–169), Field V: Methods and Models (170–179), and Field VI: Race and Ethnic Politics (180–187).

In fulfilling the requirement of 10 upper-division political science courses, students must satisfy the following:

1. A concentration in one field consisting of at least three upper-division courses in that field
2. A distribution requirement of at least one upper-division course in each of three different fields outside the field of concentration; multifield courses from the concentration field may not satisfy a distribution field
3. Four additional political science courses

Honors Program

To qualify for departmental honors at graduation, students must complete a senior thesis. Highest honors are awarded at the discretion of the honors program director and are based on both cumulative grade-point average in the major and the quality of the honors thesis to students who graduate with a final GPA in the major of at least 3.85, and who complete the senior honors thesis with a letter grade of A+.

Policies

The Major

Each course must be taken for a letter grade. Students are required to maintain a 2.0 overall grade-point average in all upper-division political science courses.

Courses 191H, 195CE, 198, and 199 may not be applied toward either the concentration or distribution requirement.

Honors Program

The department honors program is open to seniors and to students who (1) have completed five upper-division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper-division political science courses, and (3) are eligible for College of Letters and Science honors. Students should have substantial experience in writing research papers before they enter the honors program or course 191H.

Successful completion of the honors program is indicated on the transcript and diploma.

Graduate Major

Political Science MA, CPhil, PhD

The graduate program leads to the PhD degree in Political Science (a master’s degree may be earned in the process of completing PhD requirements). It is designed to give students a strong foundation in the discipline while enabling them to acquire additional skills for advancing their professional careers.

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announce ments, other publications, and websites of the schools, departments, and programs.

Political Science

Lower-Division Courses

6. Introduction to Data Analysis. (5) Lecture, three or four hours; discussion, one hour (when scheduled). Not open for credit to students with credit for course 6R. Introduction to collection and analysis of political data, with emphasis on application of statistical reasoning to study of relationships among political variables. Use of computer as aid in analyzing data from various fields of political science, among them comparative politics, international relations, American politics, and public administration. P/NP or letter grading.

6R. Introduction to Data Analysis—Research Version. (5) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced corequisite: course 50R. Not open for credit to students with credit for course 6. Introduction to collection and analysis of political data, with emphasis on application of statistical reasoning to study of relationships among political variables. Use of computer as aid in analyzing data from comparative politics. P/NP or letter grading.

10. Introduction to Political Theory. (5) Lecture, three hours; discussion, one hour. Exposition and analysis of selected political theorists and concepts from Plato to the present. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.
20. World Politics. (5) Lecture, three hours; discussion, one hour. Required of all students concentrating in Field II. Introduction to problems of world politics. P/NI or letter grading.

30. Politics and Strategy. (5) Lecture, three or four hours; discussion, one hour (when scheduled). Introduction to study of strategic interaction in political applications. Use of game theory and other formal modeling strategies to understand politics. P/NI or letter grading.

40. Introduction to American Politics. (5) Lecture, three hours; discussion, one hour. Basic institutions and processes of democratic politics. Treatment of themes such as constitutionalism, representation, participation, and leadership. Course coupled with particular emphasis on the American case. P/NI or letter grading.

50. Introduction to Comparative Politics. (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 200. Comparative study of constitutional principles, governmental institutions, and political processes in selected countries. P/NI or letter grading.

59. Introduction to Comparative Politics—Research Version. (5) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced corequisite: course 6R. Not open for credit to students with credit for course 200. Comparative study of constitutional principles, governmental institutions, and political processes in selected countries, with emphasis on presentation and evaluation of quantitative evidence. P/NI or letter grading.

60. Ethics and Governance. (5) Lecture, three or four hours; discussion, one hour (when scheduled). Study of ethical and political thought in selected countries, with emphasis on issues of justice in the economic, social, and political spheres. Course designed as adjunct to lower-division lecture course. In-Field II. Introduction to problems of world politics. P/NP or letter grading.

60C. Honors Contracts. (1 to 2) Tutorial, three hours. Limited to 20 juniors. Designed as a tutorial in political thought. May be repeated for credit. P/NI or letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NI grading.

Field I: Political Theory

M111A. Ancient and Medieval Political Theory. (4) Same as Classics M121A. Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exposition and critical analysis of major thinkers such as Machiavelli, Montesquieu, Locke, Rousseau, Smith, Condorcet, and Kant and questions such as representation, property, autonomy, and political economy. P/NP or letter grading.

111B. Early Modern Political Theory. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exposition and critical analysis of major thinkers such as Ben-tham, De Tocqueville, Hegel, Mill, Marx, Nietzsche, Arendt, and Foucault and questions such as alienation, power, participation, and difference. P/NP or letter grading.

112A. Democratic Theory. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for seniors. Critical analysis of selected major authors, issues, and arguments in contemporary democratic theory.

M112B. Invention of Democracy. (5) Same as Classics M125B. Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exposition and critical analysis of major thinkers such as Smith. Democracy was invented in ancient Greece as a political form grounded on equality before law, citizenship, and freedom. It came into existence as struggle by demos, people, aware of its excellence and proud of its power, kratos. It became only regime capable of including all members of community while disregarding wealth, status, and differing interests. Exploration of history and theory of ancient democracy. P/NP or letter grading.

113A. Problems in 20th-Century and Contemporary Political Theory. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study and interpretation of theorists who have focused their analyses on social and political problems of 20th century. P/NI or letter grading.

113B. Politics, Theory, and Film. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: course 10. Designed for juniors/seniors. Intense and individualized examination of politically significant films with respect to central issues in political philosophy, such as power and truth in light of relevant political theorists. P/NI or letter grading.

114A. American Political Thought I, 1620 to 1865. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exposition and critical analysis of American political thinkers from Puritan period to Civil War. P/NI or letter grading.

114B. American Political Thought II, 1865 to Present. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Course 114A is not requisite to 114B. Designed for juniors/seniors. Exposition and critical analysis of American political thinkers from Reconstruction to present day. P/NI or letter grading.

115C. Citizenship and Public Service. (4) Same as Community Engagement and Social Change M115. Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: course 10. Designed for juniors/seniors. Study of ways in which political thinkers have conceived of ideas of citizenship and public service, how these ideas have changed over time, and frameworks for thinking about citizenship in era of markets and globalization. P/NI or letter grading.

115D. Diversity, Disagreement, and Democracy: Can’t We All Just Get Along? (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors. Can’t we all just get along? Study of diversity, disagreement, and democracy. Diversity covers individual differences, cultural differences, and human universals; groupism, factionalism, and identity politics; multiculturalism and one-world ethics. Disagreement includes moral, ideological, and diversity-political irreconcilable and irresolvable kinds of disagreement; groupthink and group polarization; herding and information cascades. Democracy stands for political mechanisms of information aggregation; political mechanisms to resolve differences, or to keep peace among people with irresolvable differences; emergence and spread of democracy, liberty, and rule of law. P/NI or letter grading.

115E. Humanist Practice and Civic Culture. (4) Seminar, three hours. Designed for courses 10, 115C. Designed for juniors/seniors. Exploration of connection between humanist practices (philosophy, sociology, science, republican self-fashioning) and promotion of civic ethics—culture that would promote flourishing civil society. How has humanism informed our Western understanding of republicanism and civic responsibility? What aspects of our humanist heritage maintain relevance for world that many describe as posthumanist? What form of civic culture is most appropriate for North American citizens in 21st century? P/NI or letter grading.

116A. Marxism. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Critical analysis of origins, nature, and development of Marxist political theory. P/NP or letter grading.

116B. Continental Political Thought. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of important text in continental political theory, including relationship between politics and reason, skepticism, and political freedom. P/NP or letter grading.

117. Jurisprudence. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Development of law and legal systems. Examination of influential legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. Letter grading.

118. Laws of War and Peace from Conquest of America to Declaration of Human Rights (1948). (4) Lecture, three hours; discussion, one hour (when scheduled). Enforced requisite: course 10. Designed for juniors/seniors. Examination of theories of international relations and international law, with special emphasis on warfare, from conquest of America to end of World War II. P/NI or letter grading.

119. Special Studies in Political Theory. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to political theory. Sections offered on regular basis, with topics announced in preceding term. May be repeated for credit with topic change. P/NI or letter grading.

M119A. Modern Receptions of Ancient Political Thought. (4) Same as Classics M124A. Lecture, three hours. Designed for juniors/seniors. Study of how Western culture has conceived and reinterpreted political thought of ancient Greeks and Romans. Topics include reception of important figures of modern modern re-ception of classical antiquity. P/NI or letter grading.

Field II: International Relations

120A. Foreign Relations of U.S. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of factors and forces entering into formation and implementation of American foreign policy, with special emphasis on contemporary issues. P/NP or letter grading.

120B. World Politics and U.S. Foreign Policy after September 11. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Video lectures by leading scholars as well as live lectures and discussion on complex policy problems such as terrorism, nuclear proliferation, and Arab-Israeli conflict. P/NI or letter grading.
Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of problems of international system seen as community capable of cooperation and development. P/NP or letter grading.

M122B. Global Environment and World Politics, (4) (Same as Environment M161.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: course 20. Politics and policy of major global environmental issues such as climate change, integrating law, policy, and political science perspectives. P/NP or letter grading.

122C. Global Catastrophic Risk: Clash of Science, Politics, and Ethics (6) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Global catastrophic risks pose challenge to modern civilization because of their superhuman extension in space, time, and knowledge realm. Their reach is global; their impact is personal and immediate. The risks are complex. Human interests and outlooks are local, regional, and national as well as egoistical, particularistic, and tribal. Overcoming spell international conflicts among living—young, middle-aged, and old—and between ancestors and descendants. Deeply and vary specializes skilled struggle to communicate across scientific disciplines, across nat-ural and human sciences, and across pure and applied sciences—only to hit brick wall in their communications with lay public, which is variously represented by elected political representatives, organized interest groups, and fluid social movements. Study of ensuing clash of science. P/NP or letter grading.

123A. International Law, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of nature and place of international law in conduct of international relations. P/NP or letter grading.

123B. International Organizations, (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Overview of both theory and functioning of international organizations in promoting international cooperation. Required readings include both statistical and formal models. P/NP or letter grading.

124A. International Political Economy, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of political aspects of interna-tional economic issues. P/NP or letter grading.

124B. Politics of Latin American Economic Develop-ment, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/se-niors. Interaction of international and domestic factors in political and economic evolution of Latin America. P/NP or letter grading.

125A. Arms Control and International Security, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Arms control in context of international security in nuclear age. Nuclear arms race; relationship between deter-rence doctrines and nuclear war; roles of technology and ideology; nuclear proliferation; outer space. P/NP or letter grading.

126. Peace and War, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Required: course 20. Emphasis on historical and contemporary theory and research on causes of war and conditions of peace.

127A. Atlantic Area in World Politics: Western Eu-rop.e, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. External relations of United Kingdom, West Germany, France, Italy, and other European members of NATO, in regard to European security in context of Atlantic Alli-ance. P/NP or letter grading.

128B. International Relations of Post-Communist Russia, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of foreign policy of post-Communist Russia, with special em-phasis on Russia’s relations with NATO, the former communist states of Eastern Europe, China, and the Commonwealth of Independent States.

129. Diplomacy and War, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requi-site: course 20 or 137A. Designed for juniors/seniors. Analysis of role of diplomacy in great power politics; history of diplomatic institutions, advantages of public and private diplomacy, bilateral and multilateral settings, and theory and practice of deterrence and coercion. Use of game theoretic reasoning and histor-i cal analysis. Prior exposure to both useful but not required. P/NP or letter grading.

132A-M132B. International Relations of Middle East, (4–4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Requisite: course 40. Designed for juniors/seniors. Study of those factors which affect character of the legislative process and capacity of representative institutions to govern in contemporary society. 140B. The Presidency. Study of various policies of one hour (when scheduled), em-phasizing impact of the bureaucracy, congress, public opinion, interest groups, and party system on the presidency and national policy-making. 140C. Su-preme Court. Introduction to American constitutional law and role of Supreme Court as interpreter of the U.S. Constitution. Reading of Supreme Court cases as well as various historical and current com-memoratives.

M141A. Electoral Politics: Political Psychology, (4) (Same as Psychology M138) Lecture, three or four hours; discussion, one hour (when scheduled). Requi-site: course 40. Designed for juniors/seniors. Exami nation of political behavior from the perspective of per-sonality and politics, racial conflict, and psychological analysis of public opinion on these issues. P/NP or letter grading.

141B. Electoral Politics: Public Opinion and Voting Behavior, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Required: course 40. De-signed for juniors/seniors. Study of character and for-mation of political attitudes and public opinion. Role of public opinion in elections and its relationship to atti-tudes to vote decision, and influence of public opinion on public policy formulation. P/NP or letter grading.

141C. Electoral Politics: Political Behavior Analysis, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: courses 6, 40, 141B. Designed for juniors/seniors. Advanced course in use of quantitative methods in study of political behavior, especially in relation to voting behavior, socialization, participation, and techniques of political action. Students conduct computer-aided analyses of issues and problems treated in course 141B and similar courses. P/NP or letter grading.

141E. Electoral Politics: Elections, Media, and Strat-egy, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Required: course 30. De-signed for juniors/seniors. Analysis of elections and media, including game-theoretic analysis. Downs spa-tial model of elections, valence characteristics in elec-tions, campaign finance, endogeneity problems in so-cial sciences, liberal bias in media, industrial organiza-tions of news industry, and effects of media on voter decisions. May be applied toward Field III or V, P/NP or letter grading.

142A. Political Parties and Interest Groups, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Required: course 30. Designed for juniors/seniors. Organization and activities of political parties in the U.S. Attention to historical development of the parties, nature of party change, campaign func-tions and electoral role of both parties, party membership problems and party activists, political finance, and policy formulation practices. P/NP or letter grading.

M142D. Understanding Public Issue Life Cycle, (4) (Same as Public Policy M127.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended preparation: courses 10, 40, and one course from Economics 1, 2, 5, 11, or 101. Examina-tion of how public issue life cycle is shaped by (1) eco-nomic and political incentives of various actors—busi-ness, news media, mass public, organized interests, Congress, the president, regulatory agencies, and courts and (2) ideology, collective biases, and ethical reasoning. P/NP or letter grading.

143B. Metropolitan Governance, (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of how po-llitical, social, economic, and cultural factors influence metropolitan governance in both U.S. central cities and suburban areas. Study of the role of the federal government in metropolitan governance through classic and contem-porary readings on political power, political economy

Field III: American Politics

140A-140B-140C. National Institutions, (4–4–4) Lecture, three or four hours; discussion, one hour (when scheduled). Required: course 40. Designed for jun-iors/seniors. 140A. Congress. Study of those factors which affect character of the legislative process and capacity of representative institutions to govern in contemporary society.
of cities, and racial/ethnic segregation, as well as political incorporation and racial/ethnic coalitions. P/NP or letter grading.

143C. Politics of American Suburbanization. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of political, social, and economic evolution of American suburbs, particularly in post-WWII era. Dominant themes focus primarily on historical patterns and implications of U.S. racial/ethnic inclusion and exclusion; class conflict and gender roles; classic and contemporary theories of metropolitan governance; and civic/political implications of American suburbanization. Relevant topics and case studies include housing, schools, and taxes; immigrant and ethnic minority suburbanization; suburban sprawl and uneven growth; suburban decline and revitalization. P/NP or letter grading.

145A. Public Law and Judicial Process: Anglo-American Legal System. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Evolution of English common law courts and their legal system, with emphasis on development of basic concepts of law which were received from that system in U.S. and remain relevant today. P/NP or letter grading.

145C. Public Law and Judicial Process: Constitutional Law—Civil Liberties. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Protection of civil and political rights and liberties under constitutional law. P/NP or letter grading.

145D. Public Law and Judicial Process: Judicial Overview. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Legal controls of administration action. Substantive and procedural limits on administrative discretion imposed by legislation, executive and judicial agencies, and sources of legal powers of administrative bodies within these limits. P/NP or letter grading.

146D. Organization Theory, Public Policy, and Administration: Theories of Organization and Decision Making. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of theoretical frameworks for studying public and private bureaucracies, with emphasis on organizational theories, values, behavioral patterns, and concepts of organization. P/NP or letter grading.

146E. Organization Theory, Public Policy, and Administration: Experimental Development and Implementation. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Investigation of complex process of policy development and implementation in U.S., including roles of federal, state, and local agencies as well as private organizations. Subsections offered on particular policy areas, with topics announced in preceding term. P/NP or letter grading.

147A. American Political Development: Overview. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Introduction to historical development of American politics and ideas and institutions that defined American domestic processes during core 50. Development of political parties, two-party system, government, and political culture. P/NP or letter grading.

147B. American Political Development: Institutional Development. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of one period in American political history. Critical features fostering stability and change. Discussion of contributions to each period. May be repeated for credit with topic change. P/NP or letter grading.

147C. American Political Development: Institutional Development. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Investigation of core 50. Designed for juniors/seniors. Evolution of English common law courts and their legal system, with emphasis on development of basic concepts of law which were received from that system in U.S. and remain relevant today. P/NP or letter grading.

147D. American Political Development: Period Overview. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Constitutional questions concerning separation of powers, federalism, and relationships between government and property. P/NP or letter grading.

147E. American Political Development: Period Overview. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of one period in American political history. Critical features fostering stability and change. Discussion of contributions to each period. May be repeated for credit with topic change. P/NP or letter grading.

Field IV: Comparative Politics

150. Political Violence. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of one or several different uses of violence in revolutionary process: demonstrations, riots, coup d’etat, assassinations, and terrorism. P/NP or letter grading.

151A. African Politics: Government and Politics of Africa. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical and contemporary political processes in African countries, with special attention to state/society relations, interaction of politics and economic development, political institutions, and conflict and conflict resolution. Letter grading.

151B. African Politics: Political Economy of Africa. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of economic and political factors in African development. Special attention to political basis of inappropriate economic policy during early post-independence period and change toward a more appropriate economic strategy in recent times. Letter grading.

151C. African Politics: Special Topics in African Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Consult with instructor to design topics to be offered in a specific term. Letter grading.

M152. Political Economy of Climate Change. (4) Same as International Development Studies M150. Lecture, three hours; discussion, one hour (when scheduled). Examination of ways in which governments at international, national, and regional levels are addressing—or not addressing—extraordinary challenge of climate change. Use of combination of readings, lectures, and discussions to better understand causes, consequences, and policies to address most important political problem of our time—not just in U.S., but in other major countries as well. Concentration on challenges of mitigating, rather than adapting to, climate change, and concentration on the use of agriculture, forestry, and land use. Letter grading.

153A. Comparative Government and Politics of Western Europe: West European Government and Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparison of constitutional and political structure of Western European states, with particular attention to contemporary problems. P/NP or letter grading.

154A-154B. Government and Politics in Latin America. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparative study of governmental and political development, cooperation, and practices. P/NP or letter grading.

154A. States of Middle America. Enforced requisite: course 50 or 50R. 154B. States of South America.

156A. Government and Politics of Post-Communist States: Russia. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Intensive study of institutions and political development in Russia, with special attention to liberalization of 1980s and development of democracy. P/NP or letter grading.

157. Government and Politics in the Middle East. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparative study of government and politics of Arab states, Turkey, Israel, and Iran. P/NP or letter grading.

158. Southeast Asian Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 50. Designed for juniors/seniors. Survey of political environment in major Southeast Asian states. Use of comparative analysis to address major problems confronting region, including democratization, economic growth, drug trade, deforestation, and security threats. Letter grading.

159A. Government and Politics of China: Chinese Revolution and Age of Mao Zedong. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of modern Chinese politics from decline of Manchu dynasty and rise of revolutionary nationalism to death of Mao Zedong, with emphasis on socioeconomic foundations and political dynamics of revolution in modern China.

159B. Government and Politics of China: in Age of Reform. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of political and ideological transformation in post-Mao era. Assessment of impact of changing socioeconomic conditions on revolutionary policies and programs of Chinese Communist Party and the role of Deng Xiaoping.。

160. Government and Politics of Japan. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of political environment in Japan. Focus on domestic political forces and problems.

163A. Discurso before Democracy. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Regularities in language used to talk about politics across states preceding emergence of democracy in Europe, the United States, and Latin America. Focus on language used to describe collective action in oppression, contribution of shared identities to organizing collective action, role of discourse in cueing awareness of shared identity, evidence across time and space of association between discourse and distancing political rule (monarchy, exclusive republics, dictatorship). Letter grading.

163B. Colonialism, Discourse, and Democracy. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Transformation of language used to talk or write about politics during era of European colonialism and resulting shifts in identity ensuing in political change. Theories of democracy, dynamics of colonial encounter between Europeans and peoples of different cultures, and changes in political discourse.
living outside Europe, problems of collective action in tyranny and democracy, consequences of sharing identity for collective action, transformation of discourse in East and West, and ensuing enfranchisement in Europe, North America, and Southwest Pacific, spread of enfranchisement following discursive transformations in Russia and in selected states emerging in formerly colonized territories. Letter grading.

164A. Roots of Democracy. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of development of democracy around world from its beginnings in ancient Greece to present day. Techniques of comparative politics used to evaluate major arguments about why different countries become democratic at different times and why some remain authoritarian. P/NP or letter grading.

164B. Fascism and Right-Wing Extremism: Historical and Present Day. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical rise of Fascism in Germany, Italy, Japan, and Eastern Europe; its social and political ideology. Focus on Germany, including Nazi economic policy (Tööse, Wages of Destruction). Do today’s xenophobic movements in Europe resemble earlier Fascism in ideology and social base? P/NP or letter grading.

165. Islam and Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparison of major political institutions such as clericalism and secularism versus parliamentarism, unclericalism versus bicameralism, two-party versus multiparty systems, federal versus unitary systems, plurality versus proportional electoral systems, etc. Method of analysis is rational choice (political actors are assumed to optimize their results given institutional constraints and action of other actors). Result is that institutions affect political outcomes in systematic ways. P/NP or letter grading.

M167C. Political Economy of Development. (4) (Same as International Development Studies M120.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. An examination of major theories such as dependency, modernization versus postmodernization, capitalism and socialism. How do political, economic, and social factors affect political outcomes? How do problems of poverty and wealth distribution affect political stability? P/NP or letter grading.

170A. Studies in Statistical Analysis of Political Data. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced requisite: course 6 or 6R. Designed for juniors/seniors. Use of statistical methods to analyze the relationship of various fields in political science and use of quantitative evidence in construction of convincing and truthful arguments related to world of politics. Consult Schedule of Classes for topics to be offered in specific term. P/NP or letter grading.

171A. Applied Formal Models: Collective Action and Social Movements. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 30. Designed for juniors/seniors. How do social and political movements convince people to participate? Consideration of various theoretical perspectives, including game-theoretical, social network, structural, and identity approaches, illustrated by case studies. P/NP or letter grading.

171B. Collective Choice and Majority Rule. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 30. Designed for juniors/seniors. How do political decisions get made? How do political outcomes arise from system of voting and casting votes affect political decisions? When can voting rules be manipulated by leaders and voters? Examples from legislative, electoral, and judicial politics. P/NP or letter grading.

171C. Legislative Strategy. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 30. Designed for juniors/seniors. How do political leaders get what they want from legislatures? Relationships among power centers, the influence of interest groups, and direct appeals to the public. P/NP or letter grading.

171D. Negotiation. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 30. Designed for juniors/seniors. Study of negotiation and bargaining in different contexts. Experimental exercises with emphasis on various aspects of negotiation, including negotiation tactics, negotiation strategies, and role of agents. P/NP or letter grading.

172. Strategy and Conflict. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced requisite: course 30. Designed for juniors/seniors. Intermediate topics in game theory applied to political problems, with special attention to strategic consequences of incomplete information and information asymmetries. P/NP or letter grading.

179. Special Topics in Methods and Models. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 30. Designed for juniors/seniors. Intensive study of one or more special problems related to methods and models in political science. Consult Schedule of Classes for topics announced in preceding term. May be repeated for credit with topic change. P/NP or letter grading.

Field VI: Race and Ethnic Politics

M180A. African American Political Thought. (4) (Same as African American Studies M114C.) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced requisite: course 6 or 6R or 30. Designed for African Americans. Debates and conflicts in black political thought, historical context of African American social movements, and relationship between black political thought and major trends in Western thought. P/NP or letter grading.

181A. Politics of Latino Communities. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: one 140-level course or one upper division course in race or ethnicity from historical, psychological, or sociological perspective. Requisite: course 40. Designed for juniors/seniors. Focus on understanding relationships of power and interaction between institutional contexts of race in economic, political, and cultural conditions of Latino life in the United States. P/NP or letter grading.

M181B. U.S. Latino Politics. (5) (Same as Chicana/o and Central American Studies M155B.) Lecture, four hours; discussion, one hour (when scheduled). Examination of historical and contemporary politics in U.S. political system. Topics include historical analysis of Latino immigration and migration; civil rights movements; increases in citizenship, registration, and voting in 1960s and 1990s; new wave of immigrationattitudes in California, Texas, and other Southwest states. Role of Latinos in U.S. elections. P/NP or letter grading.

182. Ethnic Politics: African American Politics. (4) (Same as African American Studies M1414.) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: one 140-level course or one upper division course in race or ethnicity from historical, psychological, or sociological perspective. Requisite: course 40. Designed for juniors/seniors. Emphasis on dynamics of minority group politics in U.S., touching on conditions facing racial and ethnic groups, with black Americans being primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students’ analytical skills. P/NP or letter grading.

M183. Experiments in Racial and Ethnic Politics. (4) (Same as Psychology M136C.) Lecture, three hours; laboratory, one hour. Research practice consisting of designing, analyzing, and reporting effective research results. Topics include studying people’s political attitudes, beliefs, and behaviors through carefully-designed experiments. P/NP or letter grading.

M184A. Black Experience in Latin America and Caribbean I (4) (Same as African American Studies M154D.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Cultural, history, politics, and identity of African Americans in Caribbean, Latin America, and Central America. Exploration of issues of identity in context of Afro/Latino migration to U.S. P/NP or letter grading.

M184B. Black Experience in Latin America and Caribbean II. (4) (Same as African American Studies M154D.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of issues regarding race and ethnicity in Latin America, with emphasis on comparisons to U.S. and within Latin America, with focus on African and indigenous origins, with emphasis on former. P/NP or letter grading.

186. Special Studies in Race, Ethnicity, and Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced requisite: course 30. Designed for juniors/seniors. Intensive study of one or more special problems related to race, ethnicity, and politics in political science. Sections offered on regular basis, with topics announced in preceding term. May be repeated for credit with topic change. P/NP or letter grading.

Special Studies

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SA. Designed for juniors/seniors. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus.
ulty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limit: eight. Directed and supervised by one supervising faculty member. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as an upper-division lecture course. Individual study with lecturer, instructor or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

190. Research Colloquium in Political Science. (1) Seminar, one hour. Designed to bring together students enrolled in seminar. Seminar could be supervised by one or more faculty to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP or letter grading.

190H. Honors Research Colloquium in Political Science. (1) Seminar, one hour. Designed to bring together students writing departmental honors theses in seminar format. Seminar could be supervised by one or more faculty members to discuss their thesis work in progress. Led by one supervising faculty member. P/NP grading.

191A-191F. Variable Topics Research Seminars for Majors. (4 each) Seminar, three hours. Preparation: two upper-division courses in field in which seminar is offered. Limited to junior/senior Political Science majors with 3.25 grade-point average in upper-division political science courses. Consult Schedule of Classes for topics to be offered in specific term. Reading, discussion, and development of culminating project. May be applied toward distribution or concentration requirement. May be repeated for credit. P/NP or letter grading. 191A. Political Theory; 191B. International Relations; 191C. Politics; 191D. Comparative Government; 191E. Methods and Models; 191F. Race, Ethnicity, and Politics.

191DC. CAPPP Washington, DC, Research Seminars. (8) (Same as Communication M191DC, History M191DC, Public Affairs M191DC, and Sociology M191DC) Seminar, three hours. Limited to CAPPP Program students. Designed to focus on development and execution of original empirical research based on experiences from Washington, DC-based field placements. Study of variety of qualitative methods. Opportunity for discussion and comparison to quantitative analysis. Examination of features of solid and significant research; intensive writing. Letter grading.

191H. Research Design Seminar for Honors Thesis. (4) Seminar, four hours. Preparation: one course in 191 series, 3.5 grade-point average in upper-division political science courses, eligibility for Letters and Science honors. Required of all students who wish to write honors thesis. Students define their research topic, select suitable research method, determine appropriate sources of information, prepare research proposal, find thesis director, begin their research, and submit progress reports or preliminary drafts. Class sessions emphasize critical and constructive discussions of research design and methods, and problem-solving research, as well as general consideration of political science research topics and methods of current or continuing interest. May be repeated for credit. Letter grading.

193. Journal Club Seminars: Political Science. (1) Seminar, two hours. Limited to undergraduate students. Discussion of readings selected from current literature of field. Consult Schedule of Classes for topics of discussion in specific term. May be repeated for credit. P/NP grading.

194. Research Group Seminars: Political Science. (2) Seminar, three hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field of research of faculty members or students. May be repeated for credit. P/NP grading.

M194DC. Quarter in Washington, DC, Research Seminar. (4) (Same as History M194DC and Sociology M194DC) Seminar, four hours. Preparation: two upper-division courses in field in which seminar is offered. Seminar could be supervised by one supervising faculty member. May be repeated for credit. P/NP grading.

M195DC. Internships in Political Science. (4) (Same as History M195DC, History M195DC, Public Affairs M195DC, and Sociology M195DC) Tutorial, four hours. Preparation: one course in 191 series. Seminar setting with one or more faculty members to discuss their own work or related work in discipline. Seminar could be supervised by one or more faculty members to discuss their thesis work in progress. Led by one supervising faculty member. P/NP or letter grading.

195CE. Community and Corporate Internships in Political Science. (4) Tutorial, to be arranged; field work, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Engagement. May be repeated for credit with consent of Center for Community Engagement. No more than 8 units may be applied toward major; units applied must be taken for letter grade. May not be applied toward concentration or distribution requirement. Individual contract with supervising faculty member required. P/NP or letter grading.

195Q. Quarter in Washington, DC, Internships. (4) (Same as Community Engagement and Social Change M195/QC, History M195/QC, Public Affairs M195/QC, and Sociology M195/QC) Tutorial, four hours. Preparation: one course in 191 series. Seminar setting with one or more faculty members to discuss their own work or related work in discipline. Seminar could be supervised by one supervising faculty member. May be repeated for credit with consent of Center for Community Engagement. No more than 8 units may be applied toward major; units applied must be taken for letter grade. May not be applied toward concentration or distribution requirement. Individual contract with supervising faculty member required. P/NP or letter grading.

198. Honors Research in Political Science. (1 to 4) Tutorial, two hours. Requisite: course 191H. Limited to juniors/seniors. Individual contract with supervising faculty member. May be repeated for credit. P/NP or letter grading.

199. Directed Research in Political Science. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project project required. May be repeated for maximum of 16 units. Individual contract required. P/NP or letter grading.

199H. Honors Research Seminar. (1 to 4) Tutorial, two hours. Requisite: course 191H. Limited to juniors/seniors. Individual contract with supervising faculty member. May be repeated for credit. P/NP or letter grading.

199Q. Quarter in Washington, DC, Internships. (4) (Same as Community Engagement and Social Change M199/QC, History M199/QC, Public Affairs M199/QC, and Sociology M199/QC) Tutorial, four hours. Preparation: one course in 191 series. Seminar setting with one or more faculty members to discuss their own work or related work in discipline. Seminar could be supervised by one supervising faculty member. May be repeated for credit. Individual contract required. Letter grading.

199D. Directed Research in Political Science. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project project required. May be repeated for maximum of 16 units. Individual contract required. P/NP or letter grading.

Graduate Courses

Formal Theory and Quantitative Methods

200A. Probability and Inference for Social Science. (4) Lecture, three hours; discussion, one hour; field work, eight hours. Basic topics in probability, the mathematical framework developed to help us think systematically and logically in face of uncertainty. Letter grading.

200B. Regression Analysis for Social Science. (4) Lecture, three hours; discussion, one hour; field work, eight hours. Requisite: course 200A. Preparation: prior exposure to coding in R. Introduction to regression design and regression analysis. Basic tools of statistical inference and application to practice of regression analysis. Emphasis on relationship of these statistical tools for drawing causal inferences; prediction methods; conceptual and descriptive also covered. Focus on principles of statistical inference, difference between design-based inference and model-based inference, identification versus estimation, building blocks of causal inference, characterization of regression model, diagnostics and extensions of regression model, threats to validity of our estimates. Students become comfortable coding in statistical programming language R. S/U or letter grading.

200C. Causal Inference for Social Science. (4) Lecture, three hours; discussion, one hour; field work, eight hours. Requisites: courses 200A, 200B. Preparation: familiarity with basic statistics and inferential statistics, multivariate calculus, basic linear/matrix algebra. Clarification of conditions under which estimates made using non-experimental data can be given causal interpretation, preposing and modeling, maximizing credibility of causal claims made from non-experimental evidence. Designs and methods, including experiments, matching, regression, panel methods, difference-in-difference control methods, instrumental variable estimation, regression discontinuity designs, and sensitivity analyses. Reinforcement of some basic skills from probability and statistics. S/U or letter grading.

200D. Maximum Likelihood for Social Science. (4) Seminar, three hours; field work, eight hours. Introduction to theory and practice of maximum likelihood analysis in political science, including discrete choice models, count data models, event history models. Lectures combine traditional formal mathematical derivations of various estimators and their properties with Monte Carlo simulations and discussion of applications in practice. S/U or letter grading.

200E. Experimental Design for Social Science. (4) Seminar, three hours; field work, eight hours. Preparation: familiarity with statistics of causal inference at least to the level of course 200C. Open to students: course 200C. Individual contract with supervising faculty member. May be repeated for credit. S/U or letter grading.

200F. Advanced Statistical Topics for Social Science. (4) Seminar, three hours; field work, eight hours. Preparation: courses 200A through 200E. Topics vary according to student interests. May be repeated for credit. S/U or letter grading.

200X. Data Analysis Workshop. (4) Seminar, three hours. Enforced requisite: course 200C. Not open for credit to students with credit for course 200Y. Practice in applying statistical techniques to political science data. S/U or letter grading.

200Y-200Z. Data Analysis Workshops. (2-2) Seminar, two hours. Enforced requisite: course 200C. Course 200Y is enforced requisite to 200Z. Open to students: course 200C. Not open for credit to students with credit for course 200X. Practice in applying statistical techniques to political science data. S/U or letter grading.

201A. Introduction to Formal Political Analysis. (4) Seminar, three hours. Survey of major theoretical and computational tools for enhancing literacy and provide analytical tools without presupposing mathematical background. Model building, collective goods, unanimity and the social contract, voting rules, paradoxes and impossibility theorems, stability, individual liberty and decentralization, strategic manipulation representation, vote voting.

201B. Theory of Collective Choice. (4) Seminar, three hours. Preparation: recommended preparation for political science students: course 201A. Open to any student of politics, economics, philosophy, or mathematics with ability for deductive reasoning. Introduction to abstraction, collective choice models and other collective-choice processes. Axiomatic method applied to politics and political economy, concept of rationality, and agenda control, choice-set or solution concepts.

203A. Economic Theory and Methods for Political Science I. (4) Discussion, three hours. Preparation: knowledge of elementary calculus. Introduction to techniques of economic analysis and survey of major
topics in formal political economy. Investigation of models of regulation, trade protection, collective bargaining, and economic growth as time permits.

23B. Economic Theory and Methods for Political Science II (4) Discussion, three hours. Prerequisite: course 23A. Continuing survey of microeconomic techniques used in formal political science, with focus on market failures and on modeling individual and collective choice in normative situations. Topics include utility, public goods and allocation mechanisms, collective action, spatial models, structure-induced equilibrium, and information asymmetries.

20A. Game Theory in Politics I, (4) Seminar, three hours. Surveys research in political science with emphasis on utilizing mathematical models to understand political and economic phenomena. Applications concern political participation, public goods, legislatures, industrial regulation, bureaucracies, interest groups, and party competition. Designed to help students become informed consumers of game-theoretical literature in political science. S/U or letter grading.

20B. Game Theory in Politics II, (4) Seminar, three hours; fieldwork, eight hours. Prerequisite: course 20A. Intermediate game theory course. Topics include games of incomplete information, cheap talk games, and bargaining theory. Applications concern political participation, public goods, legislatures, bureaucracies, conflict, and communication. Designed to help students use game theory in their research. S/U or letter grading.

20C. Game Theory in Politics III, (4) Seminar, three hours; fieldwork, eight hours. Prerequisites: courses 20A, 20B. Advanced game theory course, with emphasis on new and/or advanced techniques. Topics include tugs of war games, stochastic games, and mechanism design. Applications concern bureaucracies, conflict mediation, and political transitions. Designed to help students use advanced game theory in their research. S/U or letter grading.

M208B. Topics in Applied Game Theory, (4) Seminar, three hours; tutorial meetings, to be arranged. Principal phases of political development and problems in Western European politics. S/U or letter grading.

M210A. Seminar: Game Theory. (4) Seminar, three hours; tutorial meetings, to be arranged. Principal phases of political development and problems in the Middle East. S/U or letter grading.

210B. Political Theory Field Seminar 1, 2, 3–4 Seminar, three hours; field work, eight hours; S/U or letter grading. Designed to help students writing or preparing to write dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Research paper of publishable length and quality required. S/U or letter grading.

210C. Political Theory Field Seminar 2, 3, 4 Seminar, three hours. Survey of contemporary research approaches and problems in South Asian politics. S/U or letter grading.

211. African Politics, (4) Seminar, three hours. Seminar, two hours. Preparation: successful completion of major field examinations. Workshops for students writing or preparing to write dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Research paper required. In Progress (213A, 213B) and letter (213C) grading.

215. Liberalism and Its Critics, (4) Seminar, three hours; discussion, one hour (when scheduled). Examination of works of one or more major contemporary liberal theorists (Rawls, Dworkin, Habermas, Nussbaum, etc.) in light of alternatives which have been proposed to the liberal position (communitarianism, post-structuralism, group rights theories, etc.). S/U or letter grading.

217. Selected Texts in Political Theory, (4) Seminar, three hours; discussion, one hour (when scheduled). Examination of works of one or more major contemporary liberal theorists (Rawls, Dworkin, Habermas, Nussbaum, etc.) in light of alternatives which have been proposed to the liberal position (communitarianism, post-structuralism, group rights theories, etc.). S/U or letter grading.

International Relations

220A. International Relations Core Seminar I, (4) Seminar, three hours. Introduction to international relations: main schools of thought, methods of analysis, and research styles. Letter grading.

220B. International Relations Core Seminar II, (4) Seminar, three hours. Further analysis of academic work in international relations and introduction to design of research project in this area. Letter grading.

220C. International Relations Research Seminar, (4) Seminar, three hours; tutorial meetings, to be arranged. Design, implementation, and presentation of research project in international relations within combination of seminar and tutorial settings. Letter grading.

222. Seminar: Strategic Interaction, (4) Seminar, three hours. A strategic model influences the other person’s choice by affecting his expectations of how we will behave. Discussion of theories of deterrence, coercive diplomacy, crisis management, war termination, and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psychology, bargaining theory, and game theory.

223. Politics and Strategies of Modern War, (4) Seminar, three hours. Analysis of various national security problems in both their military/technical and political dimensions. Letter grading.

225. American Foreign Policy, (4) Discussion, three hours. Discussion of approaches used to explain foreign policy-making at individual, small group, bureaucratic, and national levels. Application to selected cases in American foreign policy. S/U or letter grading.

227. Foreign Policy Process, (4) Seminar, three hours. Prerequisite: courses 225, 220A, 220B, 220C. Political science and policy science approaches to national foreign policy process, with primary focus on formulation and implementation of American foreign policy. S/U or letter grading.

230. Contending Perspectives on International Political Economy, (4) Discussion, three hours. Survey of various theoretical approaches to international political economy.

231. International Political Economy I, (4) Seminar, three hours. Discussion of international trade and investment and domestic political economies of both industrialized and industrializing societies.

232. International Political Economy II, (4) Seminar, three hours. Survey of various theoretical approaches to international political economy, with special emphasis on new and/or advanced techniques used in formal political science, with focus on utilizing mathematical models to understand political and economic phenomena. Applications concern political participation, public goods, legislatures, industrial regulation, bureaucracies, interest groups, and party competition.
the specific techniques necessary to gain competence. The great variety of resources makes both the individualized choice and the acquisition of skills possible. Students interested in this program should contact the program office, 37-357 Semel Institute, 310-206-5110.

Psychiatry and Biobehavioral Sciences

Lower-Division Courses

19. Flat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

79. Applied Positive Neuroscience: Skills for Improving Productivity and Well-Being. (8) Lecture, three hours; discussion, one hour. Not open to students with credit for Community Health Sciences 179. Intrapersonal, interpersonal, and extrapersonal contributions to well-being, and how activity and chemistry of key neurotransmitter regions contribute to each, e.g., influences of mindfulness on prefrontal cortex activity, or how oxytocin system is altered by social interaction. Students learn to recognize relationships between cognitive, social, and emotional competence for healthy development, and how to apply it to their own lives. Through neuroscientific context, introduction to multidisciplinary perspectives on variety of topics that are widely considered significant developmental tasks for young adults, including emotion regulation, managing healthy relationships, enhancing productivity, and identity development. Letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to students enrolled in programs officially affiliated with UCLA, and students registered concurrently through UCLA Extension. Students who meet these requirements, but who are not affiliated with a departmental training program, may also meet required course requisites determined by specific educational programs.

Doctoral Internship Program in Clinical Psychology

The department offers a 12-month Doctoral Internship Program in Clinical Psychology. Students enrolled in clinical psychology doctoral programs at APA-approved universities are eligible to apply. Applications are accepted from September 1 through November 1. The primary goal of the internship is to provide a year of intensive exposure to a wide variety of clinical environments. The training is designed to maximize the personal growth of each intern. Interns are expected to develop proficiency in an area of focus as well as gain experience outside of their specific area of interest. At the beginning of the year, trainees design a program, both to supplement and complement previous development. Within the learning settings chosen by the trainee, every effort is made to teach
ical actions of phytocannabinoids (focusing on THC and CBD) and synthetic cannabinoids and evidence-based research of potential benefits and harms of different cannabinoid analogs, including a comparison of USIE facilitators. (1) Seminar, three hours. Limited to juniors/seniors. Individual contract with faculty mentor required. May not be repeated. Individual letter grading.

198SA. Advanced Honors Seminars. (1) Seminar, two hours. Limited to seniors. Designed as an extension to undergraduate coursework. Exploration of topics in greater depth through supplemental readings, papers, or other activities, and led by a course instructor. May be repeated for credit. Individual contract required. Individual letter grading.

198SC. Seminar on Special Topics (1) Seminar, three hours. Limited to graduate students. Individual contract with faculty mentor required. May not be repeated. Individual letter grading.

198HC. Honors Contracts. (1) Tutorial, two hours. Limited to students in Honors Program. Designated as an introduction to an upper-division course. Individual study with a course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for credit. Individual contract required. Honors content noted on transcript. P/NP or letter grading.

199. Directed Research in Psychiatry and Biobehavioral Sciences. (2 to 4) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under the guidance of a faculty mentor. Culminating projects may be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M210. Editorial Board Apprenticeship. (2) Same as Health Policy and Management M249Q. Seminar, two hours. Designed for postdoctoral fellows and advanced PhD students. Participation in peer-review process for academic journal, Health Psychology, with consideration of interface between behavioral science, health, and medicine. Reading and discussion of submissions and assignments are geared toward suitability for full review. S/U or letter grading.

226A-226B. Childhood Psychopathology Research Seminars. (2 to 3) Seminar, 90 minutes. Current research in causes and behavioral manifestations of childhood psychopathology with emphasis on diagnosis and etiology of childhood disturbances.

M230. Communication of Science. (2) Same as Bio- mathematics M262L. Lecture, two hours; discussion, one hour. Presentation of various types of scientific and their purpose. Details of writing specific articles: methods, results, discussion. Writing of review article. Grant submissions: aims, background, results, design, Risks of amendments. Communication with lay public. S/U or letter grading.

M232. Causal Inference. (4) Same as Biostatistics M235S. Lecture, three hours; discussion, one hour. Requisites: Biostatistics 200C, 202B, or equivalent. Philosophy of causal inference, graph analysis, selection bias, confounding, ecological paradox, historical developmental potential outcomes, Rubin causal model, propensity scores, competing perspectives of causal and graphical/structural-equation models, experiments with noncompliance, principal stratification, decision making when causality is disputed, role of ethics in decision making. S/U or letter grading.

M234. Affective Disorders, (2 or 4) Same as Psychology M280. Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for 4 units are assigned a more intensive reading list and required to make a presentation or prepare a research paper. S/U or letter grading.

236A-236B-236C. Psychology Interns Seminars. (1–1–1) Seminar, 90 minutes. Discussion of invertebrate memory, vertebrates, and discussion of research literature, with focus on specific diseases such as HIV/AIDS, substance abuse, depression, and breast and prostate cancer. Discussion of myths and myths about healthcare of minority groups, especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targeted, gene therapy, and genomics. Letter grading.

254. Health and Mental Health Disparities from Psychosocial and Cultural Perspectives. (4) Seminar, three hours. Designed for graduate and medical students, resident physicians, and junior/seniors (with consent of instructor) interested in learning about gen- eral, cultural, and medical disparities. Survey course to introduce students to health disparities that exist for ethnic minorities and factors that may contribute to disproportionate prevalence rates. Review and discussion of research literature, with focus on specific diseases such as HIV/AIDS, substance abuse, depression, and breast and prostate cancer. Discussion of stereotypes and myths about healthcare of minority groups, especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targeted, gene therapy, and genomics. Letter grading.

M270. Neural Basis of Memory. (4) Same as Neuroscience M252T. Seminar, two hours; discussion, one hour. Requisites: Biostatistics 200C, 202B, or equivalent. Philosophy of causal inference, graph analysis, selection bias, confounding, ecological paradox, historical developmental potential outcomes, Rubin causal model, propensity scores, competing perspectives of causal and graphical/structural-equation models, experiments with noncompliance, principal stratification, decision making when causality is disputed, role of ethics in decision making. S/U or letter grading.

M272. Psychological Anthropology. (4) Same as Anthropology M237. Seminar, three hours. Designed for graduate students. Topics related to the cultural contexts of mental health, including cultural contexts as potential or contributing factors. S/U or letter grading.

M276. Survey Research Techniques in Psychocultural Studies. (4) Same as Psychology M236S. Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.

M240. Assessment and Treatment of African American Families. (3) Same as African American Studies M230. Seminar, three hours. Designed for graduate students. Course aims mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructors and invited guests form basis for supervised evaluation and case management with African American children and families. Letter grading.

253. Seminar: Child Development. (1) Theories of development, systems of child development, and chronological ages of child development. Presentation of assigned readings by students plays major role in each session.

256. Basic Clinical Child Psychopathology. (1) Seminar, three hours. Overview of basic clinical aspects of child psychopathology. Readings provided for basis of discussion; topics include interviewing of parents and children, diagnosis, and related syndromes. S/U grading.

259. Legal and Ethical Issues with Vulnerable Populations. (3) Lecture, 90 minutes; laboratory, three and one half hours. Discussion of ethical issues involving children, developmentally disabled people, elderly people; philosophies, ethics, cultural codes, issues, and how to resolve them. Use of videotapes and discussion of cases.

M263. Clinical Pharmacology. (2) Same as Biostatistics M263 and Medicine M263. Lecture, two hours. Preparation: completion of professional health sciences degree (MD, DDS, DNP, or PhD). Overview of pharmacology of clinical drugs, especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targeted, gene therapy, and genomics. Letter grading.

1. Seminar, one hour. Topics to be centered around current research directions in psychoneuroimmunology (PNI), including social genomics, inflammation, and biological aging. Common molecular and immunological protocols used in PNI and current directions in PNI research, with emphasis on basic immunology and immunomodulatory mechanisms and role of behavioral and psychological factors on immune and cell-aging processes. S/U grading.
293. Professional Development: Presentations and Preparation for Academic Interviews. (2) Seminar, two hours. Exposure to range of professional development opportunities, including scientific presentation skills. Hands-on skills and practice in preparing and delivering presentations for various audiences, and preparing research and/or teaching statements for job applications. S/U grading.

294. Essentials in Clinical Investigation. (2) Lecture, two hours; discussion, two hours. Designed for graduate students. Introduction to initial steps in clinical research through preparation of research proposal. Small working groups develop grant proposal on specific topic. S/U grading.

295A. Substantive Issues in Substance Abuse I. (2) Seminar, two hours; discussion, one hour. Neurobiology and pharmacology of drug abuse, as well as evidence on pathways to and from drug dependence. S/U grading.

295B. Substantive Issues in Substance Abuse II. (2) Seminar, two hours; discussion, one hour. Drug use patterns and treatment issues in specific populations such as women, children, and families, and specific ethnic populations. Exploration of linkages between drug abuse, sexuality, and HIV/AIDS. S/U grading.

295C. Substantive Issues in Substance Abuse III. (2) Seminar, two hours; discussion, one hour. Theoretical perspectives on drug use and abuse as well as policy and ethical aspects of research. Research design and analysis issues pertinent to drug abuse research. S/U grading.

296. Research Group Seminar: Practicum. (2) Research group meeting, three hours. Designed for graduate students who are conducting research studies. Coverage of (1) publishing process—submitting manuscripts to journals, selecting appropriate journals, frequent reasons for journal rejection of manuscripts, and key points in journal publication; (2) overview of National Institutes of Health (NIH), including organization structure and mission, grant application process, funding mechanisms, and review process; (3) preparing writing grants for submission to NIH, including review of components of successful applications, criteria by which applications are judged, and what to emphasize in each section; (4) grant mechanisms specifically designed for new investigators; (5) human subjects section for grant applications and IRB issues, and (6) preparation of budgets (modular and detailed) and budget justification for NIH submissions. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or faculty. Teaching apprenticeship fund, active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

402. Journal Club. (1) Seminar, two hours; outside study, two hours. Presentation of participants’ current research. Critical review of recent articles on drug abuse. Training sessions included in areas in which fellows believe they have a recognized need. S/U grading.

403. Individual Case Supervision. (1 to 4) Preparation: submission of written proposal to be structured by instructor and student prior to enrollment; additional information and proposal forms available in Office of Education, 38-216 Semel Institute. One-to-one supervision of individual therapy cases, including analyses of patient data, supervision of ongoing treatment, informal didactic sessions on personality theory, and applications to patient management. S/U or letter grading.

404. Trauma and Sexual Abuse Research Seminar. (4) Seminar, three hours; discussion, one hour. Designed for graduate students working with and/or treating clients interested in learning about behavior therapy research. Introduction to DSM-V TR diagnostic criteria for posttraumatic stress disorder (PTSD), as well as biopsychosocial sequelae. Examination of context of being causative precursors of acute and chronic causes of PTSD. Evaluation of allostatic load, among other biologic variables, within context of physiological markers for PTSD. Review of current modes of treatment, including therapeutic and pharmacological interventions. Research methods particularly important for trauma research. S/U or letter grading.

407A-407B-407C. Clinical Hypnosis Seminars. (2–2–2) Two two-hour introductory oriented sequence with lecture, discussion, demonstration, practice, and assigned readings. Guest speakers with expertise in specific hypnotic applications and practices, and video presentations. Faculty members in healthcare professions as well as licensed healthcare providers from community (MCEP credit available) encouraged to enroll. For trainees in social work, psychiatry, completion of minimum of one year of supervised training in psychotherapy or behavior therapy required. S/U grading.

407A. Critical and historical context for hypnosis; development of technical competence in trance induction, deepening, memory, and re-altering; and gaining familiarity with trance experiences. 407B. Fundamentals of trance utilization, including diagnosis, creating, manipulating trance states, and facilitating exploratory trance experiences. 407C. Application of hypnotic interventions in specific clinical situations with specific populations.

431A-431B-431C. Pediatric Neuropsychology: Assessment, Diagnosis, and Treatment Planning. (1–1–1) Seminar, one hour. Presentation of didactics on development of normal and abnormal behavior, and core clinical syndromes. Discussion of assessment from previous two terms in case presentation format, supplemented with various guest speakers. 431A. Development of normal behaviors, including autism, Asperger’s, mental retardation, specific learning disabilities, and Attention Deficit/Hyperactivity Disorder. Current conceptualizations of these disorders used to form assessment techniques, including choice of instruments and interpretation of results. Practical issues in pediatric neuropsychology, including ethics, educational law, and inter-disciplinary interventions. 431B. Neurodevelopmental disorders, head injury, low birth weight, tumors, and epilepsy. 431C. Implementation of research from previous two terms in case presentation format, supplemented with various guest speakers.
plines, such as cognition and psychopharmacology, cognitive remediation, ecological validity of neuropsychological assessment, cognition and genomics, and psychometrics/test development. Focus in odd years on current models of human neuropsychology, such as models of working memory, neuropsychology of emotion and social cognition, models of implicit versus explicit learning, types of attention, and models of executive processes. S/U grading.

468. Translational Neuroscience of Drug Addiction. (1) Lecture, one hour. Designed for graduate students. Students need cross-disciplinary knowledge to understand drug abuse etiology, behavior, consequences, and treatment. Coverage of major topics in drug addiction by emphasizing use of animal models to understand human addiction and to disclose how findings derived from human studies can be used to expand development of animal models. S/U grading.

479. Genetics Clinic Presentation. (No credit) Weekly clinical teaching session on patients seen in preceding genetics clinic. In-depth discussion on genetics of each disorder.

480. Analysis of Human Chromosome Studies. (1) Chromosome karyotypes prepared in cytogentic laboratory during preceding week presented and discussed with reference to clinical findings. Teaching includes interpretation of abnormal karyotypes and technical aspects of routine and special chromosome stains.

482. Clinical Practicum in Childhood Anxiety and Related Disorders. (2) Clinic, two hours. Training in cognitive/behavioral assessment and treatment of children and adolescents with anxiety and related disorders. Didactic and experiential training, including direct patient care, clinical supervision, and participation in weekly team meetings. Letter grading.

485. Human Genetics Seminar. (No credit) Seminar, one hour. Preparation: introductory genetics course. Weekly lecture series intended for those interested in human genetics or in specific topic to be presented. Speakers are invited for their expertise or research in some special area related to human genetics and may be from UCLA or elsewhere. No grading.

M490. Educational Advocacy. (2) (Same as Law M431.) Clinic, two hours (12 weeks). How to provide educational advocacy based on IDEA, ADA, and Section 504 of Rehabilitation Act on behalf of children with learning disabilities, behavior disorders, and mental retardation. S/U or letter grading.

596P. Individual Studies in Psychiatry. (2 to 12) Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms available in Office of Education, 38-216 Semel Institute. Directed individual research and study in psychiatry at graduate level. S/U or letter grading.

Faculty Roster
Professors
Howard S. Adelman, PhD
Robert F. Asarnow, PhD, in Residence (Della Martin Professor of Psychiatry)
Carrick E. Bearden, PhD, in Residence
Robert M. Bilder, PhD, in Residence (Michael E. Tennenbaum Family Endowed Professor of Creativity Research)
James W. Bisley, PhD (Ethel Scheibel Professor of Neuroscience)
Hugh T. Blair, PhD
Aaron P. Blaisdell, PhD
Susan Y. Bookheimer, PhD, in Residence (Joaquin M. Fuster Professor of Cognitive Neuroscience)
Julienne E. Bowler, PhD
Thomas N. Bradbury, PhD
Dean V. Buonomano, PhD
Li Cai, PhD
Alan D. Castel, PhD
Denise A. Chavira, PhD
Patricia Cheng, PhD
Bruce F. Chorpita, PhD
Michelle G. Craske, PhD (Kevin Love Fund Centennial Professor)
Naomi I. Eisenberger, PhD
Craig K. Enders, PhD
Christopher J. Evans, PhD, in Residence (Stefan Hatos Endowed Professor of Psychiatry and Biobehavioral Sciences)
Craig R. Fox, PhD (Harold Williams Professor of Management)
Andrew J. Fuligni, PhD, in Residence
Adriana Galván, PhD
Noah J. Goldstein, MA, PhD (Ho-Su Wu Professor of Management)
Patricia M. Greenfield, PhD
Martie G. Haselton, PhD
Hal E. Hershfield, PhD
Keith Holyoak, PhD
Yuen J. Huo, PhD
Michael R. Irwin, MD, in Residence (Norman Cousins Endowed Professor of Psychoneuroimmunology)
Alicia Izquierdo, PhD
Keri L. Johnson, PhD
Scott P. Johnson, PhD
Jaana H. Juvonen, PhD
Benjamin R. Karney, PhD
Philip Kelman, PhD
Barbara Knowlton, PhD
Anna S. Lau, PhD
Steve S. Lee, PhD
Matthew D. Lieberman, PhD
Zili Liu, PhD
Hongjing Lu, PhD
Vickie M. Mays, PhD
David J. Miklowitz, PhD, in Residence
Martin M. Monti, PhD
Keith H. Nuechterlein, PhD, in Residence
Efrén O. Pérez, PhD
Benjamin O. Redd, PhD
Lara A. Ray, PhD
Steven P. Reise, PhD
Dario L. Ringach, PhD

Jennifer A. Silvers, PhD (Bernice Wenzel and Wendell Jeffrey Term Endowed Professor of Behavioral Neuroscience)
Nanthia A. Suthana, PhD, in Residence

Assistant Professors
Avishek Adhikari, PhD

Psychology / 757
Three undergraduate majors are offered: a Bachelor of Arts (BA) in Psychology, a Bachelor of Science (BS) in Cognitive Science, and a BS in Psychobiology. While the majors overlap in certain fundamental and basic knowledge bases, they differ considerably in their focus (i.e., the extent to which certain areas of psychology and related disciplines are studied) and in terms of the different student interests and needs they satisfy. For nonmajors, the department offers many courses that provide students with new and valuable insights into the understanding of human behavior, including their own.

Honors Courses
Each year the department offers a selection of honors courses, designated with an H suffix. The courses provide close contact with faculty members, emphasize readings in the original literature, student reports, and small group discussions, and may include field or research experience. Contact the College of Letters and Science for information on requirements for College Honors.

Graduate Study
At the graduate level, the department offers training leading to the PhD degree with emphasis in the areas of behavioral neuroscience, clinical, cognitive, cognitive neuroscience, computational cognition, developmental, health, learning and behavior, social and affective neuroscience, and quantitative psychology. The graduate program is designed to prepare future psychologists for careers as scientific investigators, college and university teachers, and clinical scientists.

Fieldwork and Research Opportunities
Many research and fieldwork opportunities are open to students who wish to expand their knowledge and broaden their background in the field of psychology. These experiences can be enriching and help bring undergraduate students closer to understanding the importance of research and internships, including their applications in the everyday world. At least one of the following courses is recommended for students planning postgraduate study: Psychology 99, 185, 192, 194A through C194D, 195A, 195B, 196A, 196B, 199A, or 199B. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward the undergraduate degree. Information about these courses and programs is available from the Undergraduate Advising Office.

The Psychology Research Opportunity Programs (PROPS) represent a vital effort to identify and mentor underrepresented minority and/or low-income students. The purpose of PROPS is to encourage such students to participate in research and pursue graduate studies leading to careers in academia. The recruitment and application process for PROPS takes place each fall quarter. Students selected to participate are awarded stipends for winter and spring quarters, during which time they do research under the mentorship of a psychology faculty member. In addition, students are required to attend weekly seminars covering such topics as graduate school, careers in academia, and research opportunities in various fields of psychology. Prior research experience is not required. This is an excellent opportunity for students to begin their research careers and acquire the needed experience to pursue advanced studies.

Infant Development Program
The Megan E. Daly Infant Development Program (IDP), established in May 1983, is located at the Fernald Center at 320 N. Charles E. Young Drive and has two primary functions: (1) to offer quality group care for infants and toddlers of the students, staff, and faculty of the Psychology Department and other UCLA departments, and (2) to serve as a teaching and research facility for the Psychology Department and the UCLA community. The program’s two classrooms each serve children from three months to three years old and accommodate both cross-sectional and longitudinal investigations of infants, toddlers, their families, and caregivers. In addition, the program serves as a primary internship site for students in the Applied Developmental Psychology (ADP) minor, enabling ADP students to acquire firsthand experience observing and caring for infants and toddlers in a professional group setting.

UCLA Psychology Clinic
The UCLA Psychology Clinic in the Department of Psychology is a major training center for students in the clinical psychology PhD program, one of the top-ranked programs in the country. It provides a broad range of psychological services to children and adults, including assessment and individual, couples, family, and group therapy. Clients cover the entire age range and represent diverse populations in the community.

Student therapists receive very close supervision and utilize research-based cutting-edge psychological interventions. Students and faculty members are also involved in a variety of research projects through the clinic.
Undergraduate Majors

Psychology BA

The Psychology major is the most general of the three majors and offers both broad and in-depth coverage of the fundamental and traditional areas of psychology. It provides students with a strong foundation for postgraduate education in psychology and can serve as excellent background to prepare them for further training in such fields as law, education, government and public policy, business, and many of the health-related professions. Its basic liberal-arts orientation also provides students with an excellent foundation for immediate postbaccalaureate careers in many areas, particularly ones in which an understanding of human behavior and its diversity of expression would be an asset.

The requirements described below represent the minimum requirements in satisfaction of the preparation and the major. Additional courses in psychology, statistics, and related sciences, as well as other types of research and fieldwork experiences, are highly recommended if students plan to pursue graduate work in psychology and related fields. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office.

Learning Outcomes

The Psychology major has the following learning outcomes:

- Demonstrated ability to design an experiment in a field of psychology
- Ability to formulate a hypothesis based on knowledge of current literature
- Demonstrated application of principles of control groups and appropriate methodology
- Demonstrated awareness of major research methods in chosen area of psychology
- Demonstrated ability to apply appropriate statistical methods in analyzing data
- Demonstrated ability to write up results of an experiment
- Ability to relate finding to current literature and interpret them in this context
- Ability to discuss results in front of a group of other students
- Ability to verbally communicate ideas motivating experiments
- Ability to clarify experiment to those not familiar with the methods and answer questions

Entry to the Major

Pre-major

Students need to file a petition in the Undergraduate Advising Office to declare the Psychology pre-major. Psychology pre-majors can petition to declare the Psychology major once they have (1) satisfied all the preparation for the major requirements and (2) are accepted into the major through a competitive application process (for students who entered UCLA as first years) or file a petition to declare the Psychology major (for students who entered UCLA as transfers).

First-Year Students

Students may declare the Psychology pre-major once they have established a 2.5 grade-point average in at least one preparation for the major course.

Students must petition to declare the Psychology major and can do so once they complete all seven preparation for the major courses and submit an application to enter the major by the end of the fall quarter of their third year at UCLA. Admission into the major is based on student academic performance in the preparation courses. Students who have a grade-point average of 2.9 or higher in the preparation coursework and have met all other Psychology pre-major requirements are guaranteed entry into the major after they submit the application by the above deadline. Students with a grade-point average between 2.5 and 2.89 in the preparation coursework enter a competitive application pool and are admitted only if there is space available in the major. Students with a grade-point average below 2.5 in the preparation coursework are not eligible to apply for admission to the major.

Transfer Students

Transfer applicants to the Psychology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one biology course equivalent to Life Sciences 7A or 15 or Physiological Science 3, one general chemistry or general physics course, one philosophy course, one introduction to psychology course, and one course from statistics (recommended), finite mathematics, calculus, computer science theory, or computer programming in C++.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Policies

Students who repeat more than two preparation courses or any preparation course more than once are denied admission to the major.

Requirements

Preparation for the Major

Required: Life Sciences 7A or 15 or Physiological Science 3; Chemistry and Biochemistry 14A or 17 or 20A or Physics 1A or 5A or 10 or 11; one course from Program in Computing 10A, Statistics 10, or one term of calculus; one course from Philosophy 1, 2, 3, 4, 5, 6, 7, 8, 9, 21, 22, 22W, 23, 31; Psychology 10, 100A, 100B.

The Major

Required: (1) Five core courses, with at least two from each category and a fifth course from either category: (a) Psychology 110, 115 (or M117A, M117B, and M117C), 120A, 120B, and (b) 127A or 127B or 127C, 130 (or one course from 133A through 133I or 161), 135, 150; (2) one laboratory/fieldwork course from 101, 111, M116A, 116B, 121, 126, 131, 136A, 136B, M136C, 151, 186A through 186D; (3) four additional upper-division elective courses (16 units) in psychology.

Honors Program

Students work for one year (fall through spring quarters) with a Psychology Department faculty sponsor on a research project that is the basis of a formal honors thesis. During that year they also participate in a weekly seminar (Psychology 191AH, 191BH, 191CH) in which thesis projects are presented and discussed and other topics of interest are explored with invited faculty members and other guests. Other requirements may apply.

Policies

Preparation for the Major

Each of the courses must be taken for a letter grade (C or better in Psychology 10, 100A, and 100B, C– or better in the remaining courses). Students cannot take Psychology 100B until they have passed course 100A with a grade of C or better. Psychology 100A and 100B are only open to students who have declared the Psychology pre-major before the term in which they plan to enroll. It is recommended that students with no background in introductory statistics take Statistics 10 before enrolling in course 100A.

The Major

Students who complete Psychology M117A, M117B, M117C receive equivalent credit for course 115 and two upper-division psychology electives. All three courses must be completed to receive psychology elective credit.

Each upper-division course must be taken for a letter grade. A C– or better is required in each core course and in at least one laboratory/fieldwork course. Students must have a 2.0 grade-point average in all upper-division courses elected to satisfy major requirements.

Honors Program

Majors intending to continue study at the graduate level are encouraged to apply for the departmental honors program. Contact the Undergraduate Advising Office during spring quarter for more information and application forms. Satisfactory completion of the program and the other requirements for the major leads to awarding of the degree with honors or high honors.

Cognitive Science BS

The Cognitive Science major focuses on the study of intelligent systems, both real and artificial. While including a strong foundation in the traditional areas of psychology, the major is interdisciplinary in nature and emphasizes subject matter within cognitive psychology, computer science, mathematics, and related disciplines.

The requirements described below include sufficient preparation if students plan to pursue graduate work in cognitive science or related
fields; however, they may want to include additional advanced courses in psychology and fields related to cognitive science (e.g., computer science, linguistics, mathematics, philosophy, and statistics) as well as other types of research and fieldwork experiences.

Capstone Major
The Cognitive Science major is a designated capstone major. Students are required to produce a paper based on each term of their experience in a research laboratory or approved fieldwork site. Through completion of the capstone experience students are expected to identify a research topic and hypothesis to be tested or a fieldwork project and goals, show that they can organize and integrate information related to the topic or project in a clear manner in their own words, demonstrate ability to find and utilize supporting literature relevant to their project or topic, and successfully relate the paper to their experience in the laboratory or fieldwork setting.

Learning Outcomes
The Cognitive Science major has the following learning outcomes:

- Ability to identify a research topic and hypothesis to test, or a fieldwork project and goals
- Demonstrated organization and integration, in a clear manner and in the student’s own words, of information related to a topic or project
- Demonstrated ability to find and utilize supporting literature relevant to a project or topic
- Successful relation of the paper to the student’s laboratory or fieldwork experience
- Ability to discuss results in front of a peer group; verbally communicate ideas motivating the experiment, make the experiment clear to those not familiar with the methods, and answer questions

Entry to the Major

Pre-major
Students need to file a petition with the Undergraduate Advising Office to declare the Cognitive Science pre-major. They are then identified as Cognitive Science pre-majors until they (1) satisfy the preparation for the major requirements and (2) are accepted into the major through a competitive application process (for students who entered UCLA as first years) or file a petition to declare the Cognitive Science major (for students who entered UCLA as Cognitive Science pre-major transfers). Questions about the major should be directed to the Undergraduate Advising Office.

First-Year Students
Students may declare the Cognitive Science pre-major once they have established a 2.9 grade-point average (GPA) in at least one preparation for the major course.

Students must petition to declare the Cognitive Science major and can do so once they complete all preparation for the major courses and submit an application to enter the major by the end of the fall quarter of their third year at UCLA. Admission into the major is based on student academic performance in the preparation courses. Students must have a minimum 2.9 GPA in preparation coursework and submit the application by the above deadline in order to be admitted to the major. A minimum 3.2 GPA is required for guaranteed admittance to the major.

Students with a GPA between 2.9 and 3.19 in the preparation coursework enter a competitive application pool and are admitted only if there is space available in the major. Students with a GPA below 2.9 in the preparation coursework are not eligible to apply for admission to the major.

Transfer Students
Transfer applicants to the Cognitive Science major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one biology course, one general chemistry or general physics course, two calculus/analytical geometry courses, one general physics course, one philosophy course, one introduction to psychology course, one introduction to cognitive science course, one psychological statistics course, one psychology research methods course, one computer programming course in C++ and, one other computer programming course.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Policies
Students who repeat more than two preparation courses or any preparation course more than once are denied admission to the major. Each of the required courses must be taken for a letter grade (C or better in each course and a 2.5 overall grade-point average in the preparation courses) by the end of the summer quarter of the third year to be eligible to petition to declare the Cognitive Science major.

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Requirements

Preparation for the Major
Required: Life Sciences 7A or 15 or Physiological Science 3; Chemistry and Biochemistry 14A or 17 or 20A or Linguistics 1 or 2 or Physics 1A or 5A or 10 or 11; Mathematics 3A, 3B, and 3C, or 31A or 31AL and 31B; Philosophy 7 or 8 or 9 or 23 or 31; Program in Computing 10A and two courses from 10B, 10C, 15, 16A, 20A, 40A, Psychology 20A, 20B, 30, Statistics 20, 21, and Psychology 10, 85, 100A, 100B.

The Major
Required: (1) Psychology 115 (or M117A, M117B, and M117C), 120A or 120B, and one course from 124A through 124K; (2) one course from 111, M116A, 116B, 121, 186A through 186D, Computer Science 161; (3) five upper-division elective courses (20 units) from Psychology 110, 111, 112A through 116B, 118 through 119Y, 120A, 120B, 121, 124A through 124K (if taken for the major, may not be applied as an elective), 130, 133B, 133C, 133E, 135, 137A, M137B, 137G, 142H, 161, M166, 186A through 186D, 196B (one quarter may be applied if course has not been applied toward capstone requirement), 191CH (if content is approved by the Undergraduate Advising Office and course has not been applied toward the Psychology 195B or 196B requirement); Anthropology 124Q, M124R, 136A, M150, Communication 115, 118, 119, 122, 126, M127, 129, 130, 131, 155, Computer Science 111 through CM186, Linguistics 103 through 185B, Mathematics 110A through 171, Music Industry M103, Neuroscience 102, M145, C177, 180, 181, 182, Philosophy 124 through 138, 154, C154B, 170, 172, 174, 180, 181, Psychiatry M182, Statistics 100A, 100B, 100C, 101B, 101C, 115, C161, C160; and (4) in the junior or senior year, one capstone term of Psychology 195B or 196B (may be fulfilled by taking any one course from 195B or 196B or 196B/194C, provided content is approved by the Undergraduate Advising Office).

Honors Program
Students work for one year (fall through spring quarters) with a Psychology Department faculty sponsor on a research project that is the basis of a formal honors thesis. During that year they also participate in a weekly seminar (Psychology 191AH, 191BH, 191CH) in which thesis projects are presented and discussed and other topics of interest are explored with invited faculty members and other guests. Other requirements may apply.

Computing Specialization
Majors may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major, (2) completing four courses from Program in Computing 10A, 10B, 10C, 15, 16A, 20A, 40A, Psychology 20A, 20B, 30, Statistics 20, 21, and (3) completing at least two courses from Psychology 85, 121, 142H, 186A through 186D (one 199 course may be substituted for one of these courses provided project has been approved by vice chair). A grade of C or better is required in each course. Students graduate with a bachelor’s degree in their major and a specialization in Computing. Students planning to enter this specialization should contact the Undergraduate Advising Office.

Policies
Preparation for the Major
Each of the required courses must be taken for a letter grade, and complete with a C or better. Students cannot take Psychology 100B until they have passed course 100A with a grade of C or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Cognitive Science pre-major before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

The Major
Students who complete Psychology M117A, M117B, M117C receive equivalent credit for course 115 and two upper-division cognitive science 11...
Learning Outcomes
The Psychobiology major has the following learning outcomes:

- Demonstrated ability to use working knowledge of the nervous system to deduce the consequence of nervous system dysfunctions
- Demonstrated ability to relate work in literature in meaningful ways, explaining the motivation for the study and the interpretation of the results
- Demonstrated understanding of molecular events at a cellular level by describing the physiological consequences of such events in qualitative and quantitative terms
- Demonstrated ability to utilize knowledge of sensory systems by describing their processes in both quantitative and phenomenological terms
- Demonstrated ability to choose and apply the appropriate quantitative analysis tools to a data set and meaningfully interpret the results of the analysis
- Demonstrated ability to read primary literature in the field and evaluate the validity of conclusions in light of the methodology and statistical analyses used as well as the logic of assertions presented
- Demonstrated ability to communicate the results of laboratory work orally or in writing with appropriate graphic depictions of the data
- Demonstrated ability to analyze the behavior of neurons in polarized or hyperpolarized circuits and predict how other neurons in the circuit will react when other neurons are depolarized or hyperpolarized
- Demonstrated thorough knowledge of neuroanatomy, including lobes of the brain, major anatomical landmarks, cranial nerves, and major subcortical structures
- Demonstrated thorough knowledge of the sequence of events that results in an action
- Demonstrated thorough knowledge of sensory systems, including signal transmission, neuroanatomical connections, and response properties of neurons in primary cortical areas

Entry to the Major
Pre-major
Students need to file a petition in the Undergraduate Advising Office to declare the Psychobiology major. They are then identified as Psychobiology pre-majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Psychobiology major.

Transfer Students
Transfer applicants to the Psychobiology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 7A, 7B, and 7C; one year of calculus; one year of general chemistry with laboratory for majors; one semester of organic chemistry with laboratory; one introduction to psychology course; one psychological statistics course; one psychology research methods course. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Policies
Student must complete all preparation for the major courses by the end of the summer quarter of their junior year to be eligible to petition to declare the Psychobiology major.

Students who repeat more than two preparation courses or any preparation course more than once are denied admission to the major. After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Requirements
Preparation for the Major
Required: Psychology 10, 100A, 100B, and the Life Sciences Core Curriculum.

Life Sciences Core Curriculum
Required: Chemistry and Biochemistry 1A, 1B, 14B, 14L, 14C, and 14D, or 20A, 20B, 20L, 30A, 30AL, and 30B; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, and 3C, or 31A or 31AL, 31B, and 32A; Physics 1A, 1B, 1C, 4A, and 4B, or 5A, 5B, and 5C.

The Major
Required: (1) Ecology and Evolutionary Biology 100 or 129 or Psychology 118, and Psychology 110, 115 (or M117A, M117B, and M117C), M116A or 116B or Neuroscience 101L, 120A or 120B; (2) one course from Psychology 127A, 127B, 127C, 130, 133A through 133L, 135, 150, 161; (3) 16 units of graded elective courses from the following list: Ecology and Evolutionary Biology 112, 113A, 114A (no more than one from this group), Psychology 111, 112A through 112E, M117A, M117B, M117C, 119A through 119Y, 124K, 137A, 137G, 152, 161, 162, 164, M166, 186D, 191CH (only if content is approved by the undergraduate vice chair), Chemistry and Biochemistry 153A, 153L, Computational and Systems Biology M187, Ecology and Evolutionary Biology 100, 102, 105, 106, 110, 111, 115, 117, C119A, 120, 121, 122, 124A (only 4 units may be applied toward the major), 129, C135, 164, 170, Life Sciences 107, Microbiology, Immunology, and Molecular Genetics C18A, Molecular, Cell, and Developmental Biology 100, 104AL, 138, M140, CM156, Neuroscience 102, Physiological Science C130, C144, 146, 147, 166, 173.

Honors Program
Students work for one year (fall through spring quarters) with a Psychology Department faculty sponsor on a research project that is the basis of a formal honors thesis. During that year they also participate in a weekly seminar (Psychology 191AH, 191BH, 191CH) in which thesis projects are presented and discussed and other topics of interest are explored with invited faculty members and other guests. Other requirements may apply.

Policies
Preparation for the Major
Each of the preparation for the major courses must be taken for a letter grade (C or better in Psychology 10, 100A, and 100B, C– or better in the remaining courses) with a 2.0 overall grade-point average.

Students cannot take Psychology 100B until they have passed course 100A with a grade of C or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Psychobiology pre-major before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

The Major
Students who complete Psychology M117A, M117B, M117C receive equivalent credit for course 115 and 10 units of upper-division psychobiology electives. All three courses must be completed to receive psychobiology elective credit.

Students must have a 2.0 grade-point average in all upper-division courses selected to satisfy major requirements, and each must be taken for a letter grade.
Honors Program

Majors intending to continue study at the graduate level are encouraged to apply for the departmental honors program. Contact the Undergraduate Advising Office during spring quarter for more information and application forms. Satisfactory completion of the program and the other requirements for the major leads to awarding of the degree with honors or high-est honors.

Undergraduate Minors

Applied Developmental Psychology Minor

The Applied Developmental Psychology (ADP) minor is designed to (1) provide a coherent, challenging academic program focused on investigating, understanding, and supporting the development of young children and their families, (2) teach undergraduate students how to apply theories, research methods, and research findings to practical concerns, and (3) prepare students to join or receive further training in various child-related professions.

Admission

The minor is open to all enrolled UCLA students (including Cognitive Science, Psychobiology, and Psychology majors) who have an overall grade-point average of 2.0 or better and have applied and been accepted into the program. Qualified students are admitted into one of two annual cohorts (one beginning in fall, the other in spring) to complete three consecutive terms of specialized coursework alongside a hands-on teaching internship (86 hours per term) at one of several UCLA child care centers. For more information about applying to the minor, contact the ADP academic coordinator by e-mail or see the department website. For questions about additional course requirements for the minor, contact a counselor in the Undergraduate Advising Office.

The Minor

Required Lower-Division Course (4 units): Psychology 10.

Required Upper-Division Courses (24 units): Psychology 134A (must be taken concurrently with course 134D), 134B (must be taken concurrently with course 134E), and four additional courses from Education 120, 132, Psychology 127C, 129F, 130, 131, 132A, 132B, 133B through 133I, 134F, 134G, 134I, 134J, 134K, 161, 167, 199A or 199B (content must be approved by the Undergraduate Advising Office), Sociology M174. One of the four additional courses must include either Psychology 130 or one course from 133B through 133I.

Internship Requirement/Fieldwork Component (8 units): Psychology 134C, 134D (must be taken concurrently with course 134A), 134E (must be taken concurrently with course 134B). Students work as interns for three consecutive academic terms at one of several UCLA child care centers serving infants, toddlers, and/or preschool-age children. The internship provides hands-on experience working with young children and opportunities to closely observe children and teachers.

Policies

No more than two courses may be applied toward both this minor and a student's major.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course, except for the fieldwork component of the internship courses, must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Cognitive Science Minor

The Undergraduate Council of the UCLA Academic Senate voted to suspend admissions to the Cognitive Science minor effective Fall Quarter 2021. Students currently in the minor are not affected by the admissions suspension.

The Cognitive Science minor is designed to introduce students to cognitive science topics as addressed in a number of different disciplines, such as biology, computer science, engineering, linguistics, mathematics, philosophy, and psychology, while allowing them to pursue a more in-depth study of cognitive science topics within specific areas of their own choice.

The minor consists of two parts. In the first part students complete background courses and satisfy a computer programming experience requirement. In the second part they select courses from three clusters of upper-division courses that have been organized to reflect different aspects of cognitive science. Students take five courses from three clusters, with no more than three courses from any one cluster.

Admission

The minor is open to all enrolled UCLA students, other than Cognitive Science majors, who have an overall grade-point average of 2.0 or better. After completing two background courses, students must make an appointment with an adviser in the Psychology Undergraduate Advising Office by e-mail to declare the minor. The three background courses must be completed by the end of the summer quarter of the third year.

The Minor

Required Courses (32 units): Psychology 85; one course from 15, 100B, Linguistics 1, or 20; and either Program in Computing 10A or Psychology 20A.

Students must complete five total courses from the following three clusters, with no more than three courses from any particular cluster: (1) bi- ological basis of cognition cluster—Linguistics C135, Music Industry M103, Neuroscience 102, M145, C177, 180, 181, 182; Psychology 110, 112E, 115, M116A or 116B, M117C (or Molecular, Cell, and Developmental Biology M175C or Neuroscience M101C or Physiological Science M180C, 119C, 119F, M119L, M119N, 137A, 137G, 161, M166; (2) human cognition cluster—Anthropology 124Q, 136A, Communication 129, Psychology 120A, 120B, 121, 124A through 124K, 133B, 133C, 133E, 186A through 186D; (3) mind and language cluster—Anthropology M150, Communication 118, 119, 126, M127, Linguistics 120A, 120B, 120C, 130, 132, C135, 185A, Philosophy 124, 125, 126, C127A, C127B, 129, 170, 172, Psychology 124A.

Policies

No more than two courses may be applied toward both this minor and a student's major.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Major

Psychology MA, CPhil, PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Psychology

Lower-Division Courses

10. Introductory Psychology. (4) Lecture, four hours. General introduction including topics in cognitive, experimental, personality, developmental, social, and clinical psychology; six hours of psychological research and a grade of C or better required of all departmental premajors. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

20A. MATLAB Programming for Behavioral Sciences. (4) Lecture, two hours; laboratory, one hour. Prior programming experience not required. Introduction to MATLAB and programming methods useful in experimental psychology. Reading and writing of code for conducting experiments, analyzing data, and modeling. P/NP or letter grading.

20B. Advanced Topics in MATLAB Programming for Behavioral Sciences. (4) Lecture, two hours; laboratory, one hour. Requisite: course 20A. Introduction of advanced topics in MATLAB programming for behavioral sciences, including Psychtoolbox, advanced MATLAB graphics and input/output, simulations and

110. Fundamentals of Learning. (4) Lecture, three hours; discussion, one hour. Requisite: courses 10, 100A. Designed for juniors/seniors. Experimental findings on animal and human conditioning; retention and transfer of training; relation of learning and motivation; intended to provide empirical basis for theory and research in this area. P/NP or letter grading.

111. Learning Laboratory. (4) Lecture, two hours; laboratory, three hours. Requisites: courses 10, 100A, 100B. 110. Designed for departmental majors. Laboratory experience with techniques in study of learning, especially with animals. Letter grading.

112A. Basic Processes of Motivated Behavior. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 100A, 100B. Designed for juniors/seniors. Examination of some basic processes underlying motivated behavior, stressing environmental determinants of behaviors such as feeding, drinking, and reproduction-reproduction of physiological mechanisms that contribute to such behaviors. Consideration of topics such as reinforcement, conditioned motivated responding. Evaluation of evidence obtained in laboratory studies conducted with animals. P/NP or letter grading.

112B. Psychobiology of Fear and Anxiety. (4) Lecture, three hours. Requisites: courses 10, 100A, 110. Recommended for juniors/seniors. Presentation of biological and behavioral approaches to fear and anxiety, taken from laboratory and applied research. In addition to overview of major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research. P/NP or letter grading.

112C. Psychobiology of Anxiety and Depression. (4) Lecture, two and one half hours; discussion, 30 minutes. Requisites: courses 110 and 115, or Neuroscience M101A, M101B, and M101C. Limited to juniors/seniors. Topics include biological and behavioral approaches to anxiety and depression, taken from laboratory and applied research. In addition to overview of major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research. P/NP or letter grading.

112D. Animal Cognition. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 100A, 110. Designed for juniors/seniors. Investigation of scientific study of cognition and behavior in animals. Topics include perception and attention, working and reference memory, spatial cognition, timing and counting, concept formation, and abstract reasoning. Most discussions focus on laboratory findings with animals, as viewed from evolutionary framework concerned with natural histories of animals. P/NP or letter grading.

115. Principles of Behavioral Neuroscience. (4) Lecture, three hours; discussion, one hour. Requisite: course 100A. Life Sciences 2 or 7A or 15. Not open to students with credit for course M117A (or Molecular, Cell, and Developmental Biology M117A or Neuroscience M101A or Physiological Science M180A). Designed for juniors/seniors. Topics in neurochemistry, neurophysiology, pharmacology, and their relationship to behavior. P/NP or letter grading.

M116A. Behavioral Neuroscience Laboratory. (4) (Formerly numbered 116A.) (Same as Neuroscience M116A.) Lecture, one hour; laboratory, three hours. Requisites: courses 10, 100A, 100B, and 115, or Neuroscience M110A and M110B. Not open for credit to students with credit for course 116B. Designed for Psychobiology, Psychology, and Neuroscience majors. Laboratory experience with various topics in behavioral neuroscience. Hands-on experience with important methodological and experimental approaches in neuroscience. P/NP or letter grading.

116B. Human Neuroscience Laboratory. (4) Laboratory, four hours. Requisites: courses 10, 100A, 100B, 115. Not open for credit to students with credit for 116A. Focus on human neural function in health and disease. Concentration on neural underpinnings of behaviors unique to humans. Hands-on empirical investigations of neural functions in which students themselves serve as subjects. Incorporation of neural bases of language and cognition in field of neuropsychology, and human neuroanatomy. Adresses disorders of nervous system that have profound impacts on human function such as stroke and central nervous system damage, dementia, mental illness, and pain. P/NP or letter grading.

M117A. Neuroscience: From Molecules to Mind—Cellular and Systems Neuroscience. (5) (Same as Molecular, Cell, and Developmental Biology M175A, Neuroscience M110A, and Physiological Science M180A.) Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14A or 30A (14C may be taken concurrently), Life Sciences 7C, Physics 1B or 1B or 52B. Students must receive grade of C– or better to proceed to next course in series. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons form complex information and control movement. P/NP or letter grading.

M117B. Neuroscience: From Molecules to Mind—Molecular and Developmental Neuroscience. (5) (Same as Neuroscience M101B, Molecular, Cell, and Developmental Biology M175B, and Physiological Science M180B.) Lecture, four hours; discussion, 90 minutes. Requisites: course M117A (with grade of C– or better), Life Sciences 7C. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of neurotransmission, neurotransmitter release, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in behavioral neuroscience. P/NP or letter grading.

119A. Neuropsychopharmacology of Emotion and Cognition. (4) Lecture, four hours; discussion, 90 minutes. Requisite: course 115 or M117C. Limited to juniors/seniors. Analysis of basic pharmacologic principles, with emphasis on neurochemical modulation of emotional regulation and cognitive processes in normal and diseased state. P/NP or letter grading.

119B. How Brains Learn to Construct Models of Environment. (4) Lecture, three hours. Requisite: course 115 or M117C. Designed for juniors/seniors. Every day we encounter something new. As result of these experiences, our brain builds cognitive models of our environment. This allows us to respond flexibly and efficiently when we encounter something similar in future. Design of typical building blocks that afford this flexible behavior, and how different regions of brain contribute in different ways to model building. Discussion of how different psychological
disorders can be accounted for by disruptions in this process, providing key neural targets for pharmacological treatments. P/NP or letter grading.

119C. Cognitive Neuroscience. (4) Lecture, three hours. Requisite: course 115 or M117C. Understanding complex mental functions depends on interplay of cognitive processes and neural basis of mind may be understood using neuroscience techniques. P/NP or letter grading.

119F. Neural Basis of Behavior. (4) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Presentation of current data and theory concerning how neuron circuits produce behavior. Mechanisms of perception, response selection, motor pattern generation, learning, and motivation, with emphasis on operation of these processes in well-defined neural circuits in animals and humans. P/NP or letter grading.

119I. Integration of Face and Brain. (4) Seminar, three hours. Requisite: course 115 or M117C. Faces play major role in social interactions in both humans and nonhuman primates and in other animals as well. Exploration of neuroanatomical, neurophysiological, and neurofunctional underpinnings of face processing (attractiveness, emotional expressions, facial skin, identity recognition). Emphasis on empirical studies that use behavioral responses in neuroimaging techniques, in effects of types of brain damage, in physiological responses to faces, and in biological studies. Discussion of evolutionary approaches to faces, as well as relationship between specific genetic mutations affecting both brain and facial appearance. P/NP or letter grading.

115J. Brain Bugs: Understanding Brain through Its Flaws. (4) Lecture, three hours. Requisite: course 115 or M117C. Designed for juniors/seniors. Psychology of brain flaws and limitations to understand how brain works by doing. Does well understanding neuroscience of why brain is poorly suited to perform some tasks such as numerical calculations, memorizing lists and names, and making unbiased decisions. Includes memory (types, 120A: memory false memories, misinformation and memory, memory capacity) and cognitive biases (framing, anchoring, and temporal discounting). Exploration of underlying neural causes of brain flaws and limitations in context of brain's associative architecture. Basic neurophysiology, synaptic plasticity, cortical plasticity, neural basis of learning and memory, and some computational neural network learning. P/NP or letter grading.

119K. Neurophilosophy. (4) Lecture, three hours. Requisite: course 115. Philosophy of mind has relied on introspection and thought experiments to explore consciousness, self, and free will. Field of neurophilosophy explores the methods and foundations of neuroscience to investigate these seemingly impenetrable constructs. Provides students with foundation in neurophilosophy, which includes basic understanding of philosophy of mind, consideration of phenomena including consciousness, volition, and self, and examination of scientific methods available for studying these phenomena. Exploration of student experiences of world and themselves within and demonstration of how alterations in brain functioning due to injury, psychiatric drugs, and dreaming result in alterations in these phenomena. P/NP or letter grading.

119M. Neural Circuits of Learning and Memory. (4) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Designed to classify current literature on mechanisms of learning and memory from individual brain systems to circuits. P/NP or letter grading.

M119N. Visual System. (4) (Same as Neuroscience M119N.) Lecture, three hours. Requisite: course 115 or Neuroscience M101A or Physiological Science 111A. Ability to image and analyze visual world is truly remarkable feat. Coverage of anatomy and physiology of visual processing from retina to visual cortex through lectures, extensive reading, and discussions. P/NP or letter grading.

M119Q. Psychology of Aging. (4) (Same as Gerontology 119Q.) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement, others are detrimental to processes. Exploration of mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/NP or letter grading.

119P. Emerging Topics in Neuroscience. (4) Lecture, two hours; discussion, one hour. Requisite: course 115. Emerging advanced topics on recent developments in neuroscience given by visitors speaking, with additional lectures by instructor on relevant background material. Reading of published scientific articles. P/NP or letter grading.

119Q. Psychobiology of Sleep and Dreams. (4) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Study of sleep, comparison of sleep in mammalian species and sleep in subhuman animals. Circadian rhythms and circadian control of sleep, development and aging of sleep, brain chemistry and sleep, effects of sleep deprivation, sleep in psychiatric disorders, human sleep disorders, and properties of dream material. P/NP or letter grading.

119U. Neural Correlates of Psychotic Disorders. (4) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Exploration of genetic, cellular, structural, and functional abnormalities associated with psychiatric states, including those seen in schizophrenia spectrum disorders, bipolar disorder, and drug-induced psychosis. Focus on common and unique neural findings associated with these abnormal states. Study includes view of clinical aspects of disorders covered. P/NP or letter grading.

119V. Brain and Art. (4) Lecture, three hours. Requisite: course 115. Multiple forms of art express uniqueness of human brain and mind. Discussion of neural underpinnings of art in artist and viewer and links to evolutionary, biological, aesthetic, cognitive, and social roots of art. P/NP or letter grading.

M119X. Biology and Behavioral Neurosience of Aging. (4) (Same as Gerontology M119X.) Lecture, three hours. Requisite: course 115. Designed to provide an understanding of aging processes and its terminal phase, death, which have been increasingly studied in recent years. Establishment of what is known experimentally about biology and behavior of aging and evaluation of theories developed to account for this knowledge. P/NP or letter grading.

119Y. Psychobiology of Sexual Behavior. (4) Lecture, three hours. Requisite: course 115. In-depth knowledge of scientific study of sexual behavior, with emphasis on evolutionary, biological, psychological, and social considerations. Topics include historical antecedents of sex research, evolution of sex, influence of sex hormones on brain and behavior, sexual development, and roles of genes and hormones on sexual orientation. P/NP or letter grading.

120A. Cognitive Psychology. (4) Lecture, three hours; discussion, one hour. Requisite: courses 10, 100A. Designed for juniors/seniors. Survey of cognitive psychology: how people acquire, represent, transform, and use verbal and nonverbal information. Perception, attention, imagery, memory, representation of knowledge, language, action, decision making, thinking, P/NP or letter grading.

120B. Sensation and Perception. (4) Lecture, three hours; discussion, one hour. Requisite: courses 10, 100A. Designed for juniors/seniors. Acquisition of information about physical world through basic sensory mechanisms and perceptual processes. Perception of objects, surfaces, space, motion, and connections. Connections between information, computations, and logical mechanisms in vision, audition, and other systems. P/NP or letter grading.

121. Laboratory in Cognitive Psychology. (4) Laboratory, one hour. Requisite: courses 10, 100A, 100B or 120A. Designed for Psychology and Cognitive
127A. Clinical Psychological Science. (4) Lecture, three hours; discussion, one hour. Requisite: course 10. Not open for credit to students with credit for course 127B or 127C. Study of psychological disorders, substance use disorders, schizophrenia, across lifespan, including role of biological, behavioral, social, cognitive, and cultural factors, diagnosis and treatment approaches. Discussion of stigma and practices that support inclusiveness. P/NP or letter grading.

127B. Abnormal Psychology; Biological Bases. (4) Lecture, three hours; discussion, one hour. Requisite: course 10. Not open for credit to students with credit for course 127A or 127C. Study of biological processes involved in etiology, presentation, and course of psychiatric disorders, and biological targets or mechanisms of treatment. Emphasis on clinical neuroscience and behavioral genetics as scientific modalities to understand mood disorders, substance use disorders, psychosis, and others. P/NP or letter grading.

127C. Abnormal Psychology: Developmental Perspectives. (4) Lecture, three hours; discussion, one hour. Requisite: course 10. Introduction to study of culture and human behavior in general, and culture and mental health in particular. Emphasis on cultural groups that comprise major U.S. ethnic groups (i.e., African Americans, Latinos/Chicanos, Asian Americans, and American Indians). P/NP or letter grading.

129F. Clinical Psychology of Childhood and Adolescence. (4) Lecture, two hours; discussion, one hour. Requisite: courses 10, 100A. Survey of child and adolescent psychopathology and psychotherapy from a developmental perspective. Coverage includes such conditions as anxiety disorders, depression, conduct and attention problems, eating disorders, autism spectrum disorder, eating disorders, and autism spectrum disorder. P/NP or letter grading.

130. Developmental Psychology. (4) Lecture, three hours; discussion, one hour. Requisite: courses 10, 100A. Designed for juniors/seniors. Elaboration of developmental aspects of physical, mental, social, and emotional growth from birth to adolescence. P/NP or letter grading.

131. Research in Developmental Psychology. (4) Discussion, one hour; laboratory, three hours. Requisites: courses 10, 100A, 100B, and 130 or one course from 133A through 133I. Designed for Psychology and Cognitive Science majors. Forms of scientific writing; ethics of research, especially with minors; special advantages and problems of asking developmental research questions; relevant methodologies for experimental and observational work; data analyses and data presentation options. P/NP or letter grading.

132A. Learning Problems, Schooling Problems: Policy and Practice. (4) Lecture, three hours. Designed for junior/elective or different orientations to persons with learning problems, emphasizing assessment and intervention approaches and psychological impact of such approaches. Topics include interaction of learner and environment, sociopolitical na-

ture of classroom, psychological impact of schooling, grades, and evaluations, process versus goal focus in learning. P/NP or letter grading.

133A. Adolescent Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Examination of cognitive, social, physical, and physiological development of the adolescent. P/NP or letter grading.

133B. Cognitive Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Major theories, approaches, and issues in study of cognitive development. Readings include original research on important topics such as development of perception, language, thinking, and problem solving, and acquisition of concepts and domain-specific language. P/NP or letter grading.

133C. Language Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Application of principles of cognitive development, learning, and perception to study of language development. Topics include first and second language acquisition (sounds, meanings, grammatical structures), learning mechanisms, communication skills, and relation between language and thought in children. P/NP or letter grading.

133D. Social and Personality Development. (4) Lecture, three hours; discussion, one hour. Requisite: courses 10, 100A. Theory and research on social and personality development during childhood. Topics include parent/child attachment, temperament, self-control, aggression, sex-typing, self-concept, moral reasoning and behavior, social status and social skills, and peer group relations. P/NP or letter grading.

133E. Perceptual Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Topics include origins and development of perceptual abilities, origins of knowledge about functionally important aspects of the environment, ecological and computational issues in perception, research and theory about initial perceptual capacities, and some sensory foundations. P/NP or letter grading.

133F. Psychology and Education. (4) Lecture, three hours. Requisites: courses 10, 100A. Application of principles of cognitive development, learning, and perception to educational problems. Topics include general instructional issues, psychology of reading and mathematics, exceptional children, early childhood education, and the education of the disadvantaged. P/NP or letter grading.

133G. Culture and Human Development. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Role of culture in human development through psychology, anthropology, and autobiography. Students relate material from lectures and readings, through empirical research projects, to diverse cultural backgrounds in class, at UCLA, and in the broader community. P/NP or letter grading.

133H. Applied Developmental Psychology. (4) Lecture, three hours. Requisites: courses 10, 100A. Applied development of psychology to support and illustrate, in applied setting, theories and research findings presented in lecture. P/NP or letter grading.

134D. Fieldwork in Applied Developmental Psychology. (2) Fieldwork, 86 hours per term. Enforced corequisite: course 134A. Designed for Applied Developmental Psychology majors. Fieldwork in applications of developmental psychology to support and illustrate, in applied setting, theories and research findings presented in lecture. P/NP grading.

134F. Infant Care and Development. (4) Lecture, three hours. Requisite: course 10, one course from 130 or 133B through 133I, one statistics course. In-depth study of research methods, current research findings, and theories used to understand infant development from conception through infancy, including cross-cultural application of this knowledge to various populations. P/NP or letter grading.

134G. Early Childhood Curriculum. (4) Lecture, three hours. Requisite: course 10, one course from 130 or 133B through 133I, one statistics course. Examination of methods, materials, and philosophies that enhance development of children in context of childcare settings. Topics include issues of multiculturalism, antibias curriculum, and special needs adaptations. P/NP or letter grading.

134H. Child, Family, and Community. (4) Lecture, three hours. Requisite: course 10, one course from 130 or 133B through 133I, one statistics course. Examination of role of early childhood educators within context of diverse racial, ethnic, economic, and cultural backgrounds and impact of these dynamics on children’s development. P/NP or letter grading.

135A. Dynamic Perspectives on Parenting. (4) Lecture, three hours. Overview of key tasks of parenting and of changes in parent-child relationship from birth through young adulthood. Overview of theories, discussion of principal components of parenting, and examination of parenting across developmental stages. Examination of how parenting and parent-child relationship are affected by family dynamics and contextual factors. Studies of specific child-caregiver relationships and their theoretical and empirical foundations to meet children’s developmental needs; build positive and mutually respectful parent-child relationships; and provide positive guidance to promote self-regulation, competence, and socially responsible behavior. P/NP or letter grading.

135E. Effects of Early Adversity and Trauma. (4) Lecture, three hours. Examination of extensive evidence of disruptive impacts of adversity. Study offers insights into causal mechanisms that link early adversity to later impairments in learning, behavior, and both physical and psychological well-being. Review of research on common childhood stressors, individual and contextual factors that put children at risk for developmental deficits, and protective factors that promote successful coping and healthy adjustment. P/NP or letter grading.

135F. Social Psychology. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Interrelationships between the individual and his social environment. Social influences on motivation, perception, and behavior. Development and change of attitudes and opinions. Psychological analysis of small groups, social stratification, and mass phenomena. P/NP or letter grading.
136A. Social Psychology Laboratory. (4) Lecture, one hour; laboratory, four hours. Requisites: courses 10, 100A, 100B, 135. Designed for Psychology majors. Introduction to designs and methods used to test social psychological hypothesis, including experiments, observation, content analysis, and/or questionnaires. P/N or letter grading.

136B. Nonexperimental Methods in Social Psychology. (4) Lecture, laboratory, four hours. Requisites: courses 10, 100A, 100B, 135. Designed for Psychology majors. Research experience with nonexperimental methods for study of social attitudes or behaviors, including fieldwork with survey research, naturalistic observation, or questionnaires. P/N or letter grading.

M136C. Experiments in Racial and Ethnic Politics. (Same as Political Science M183.) Lecture, three hours; laboratory, four hours. Requisite: course 10. Study of theory and research that addresses influence and persuasion from social psychological perspective. Particular attention given to reviewing theory and empirical research on conformity, factor analysis, generalizability, item response, optimal scaling, ordinal measurement, computer-adaptive, and related theories. Construction of tests and measures and their reliability, validity, and bias. P/N or letter grading.

M147A. Psychology of Lesbian Experience. (4) (Same as Gender Studies M147A and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M147A.) Lecture, two hours; discussion, one hour. Requisite: course 10 or Gender Studies 10 or Lesbian, Gay, Bisexual, Transgender, and Queer Studies 114. Designed for juniors/seniors. Review of research and theory in gender studies and psychology to examine various aspects of lesbian experience, impact of heterosexism/stigma, gender role socialization, minority status of women and lesbians, identity development within a multicultural society, changes in psychological theories on lesbians in sociocultural context. P/N or letter grading.

M149. Language Development and Socialization. (Same as Anthropology M152P) Lecture, three hours; discussion, one hour (when scheduled). Explores how social structures and practices of language and language behavior can produce and reproduce the social worlds through which children develop. Emphasis on construction, maintenance, and reproduction of cultural, social, and cognitive constructs. Bridges work from anthropology, psychology, linguistics, and cognitive science to examine cross-cultural perspectives on child development and wide range of methodological approaches. Examination of ways in which language development and socialization interface with culture, social status, inequality, education, and cognition. P/N or letter grading.

150. Introduction to Health Psychology. (4) Lecture, three hours. Requisite: course 10. Areas of health, illness, treatment, and delivery of treatment that can be elucidated by understanding of psychological concepts and research, psychological perspective on these problems, and how psychological perspective might be enlarged and extended in medical area. P/N or letter grading.

151. Research Methods in Health Psychology. (4) Laboratory, four hours. Enforced requisites: courses 10, 100A, 100B, 150. Research methods used in health psychology, including experimental, quasi-experimental, and nonexperimental designs, examples and projects from health psychology. P/N or letter grading.

152. Mind-Body Interactions and Health. (4) Lecture, three hours. Designed for junior/senior Psychology and Psychobiology majors. Examination of bidirectional interactions between mind and body and how these interactions influence physical health. Topics include impact of stress, emotions, personality, and social world on biological systems and health. Discussion of mind-body interventions designed to reduce stress and improve health, including scientific research. P/N or letter grading.

161. Behavior and Brain Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Limited to juniors/seniors. Exploration of relationship between brain development and behavior. Examination of how cognitive neuroscience can inform study of development and how developmental approach can advance progress in cognitive and developmental sciences. P/N or letter grading.

164. Puberty and Sleep. (4) Lecture, three hours. Requisite: course 10. Limited to juniors/seniors. Exploration of how normative biological and hormonal changes during puberty affect adolescent behavior and well-being. Focus specifically on puberty and sleep, which both lead to consequential effects on behavior, health, and brain development. P/NP or letter grading.

M165. Biology of Gender. (4) (Same as Gender Studies M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and psychological differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction. P/NP or letter grading.

M166. Neurobiology of Bias and Discrimination. (4) (Same as Neuroscience M187 and Physiological Science M160.) Lecture, four hours. Limited to junior/senior neuroscience, physiological science, and psychology students. Exploration of aspects of mammalian brain function that generate preference, bias, and discrimination. Consideration of research at multiple levels of analysis from genetics to neural circuits to behavior. Discussion of societal implications of these research findings, including their relevance to public policies and criminal justice system. Letter grading.

167. Digital Media and Human Development. (4) Lecture, three hours. Laboratory, one hour. Open to juniors/senior students. Examination of social science research on media and technology during development to understand positive and negative roles of technology and media in children’s lives. Topics include social media, video games, brain development, and learning with technological tools from age 2 through 18 (and through emerging adulthood). May be repeated for credit. P/NP or letter grading.

168. Organizational Psychology. (4) Lecture, three hours. Introduction to variety of topics within field of organizational psychology, examining organizational behavior from variety of perspectives. Focus on individuals: what motivates them, how do they learn best, how can they manage their careers in this rapidly changing organizational landscape, and how can they develop leadership skills. Focus on groups, entire organizations, or relationships between organizations and external environment: what makes some groups work effectively and some not, how can organizations be sensitive to diversity and inclusion in workplace, what types of leadership are found in different organizations today, and what are best ways to bring about change in organizations. P/NP or letter grading.

M172. Afro-American Woman in U.S. (4) (Same as African American Studies M172 and Gender Studies M172.) Lecture, three hours, plus half hours letter. Open to juniors/senior or other activities and led by lecture course instructor. Designed to bring together students under supervising faculty member. May be repeated for credit. P/NP or letter grading.

M174. Health Disparities. (4) (Same as Life Sciences M174.) Lecture, three hours. Examination of health disparities and ways in which societal responses to race and ethnicity in combination with variety of other factors create differential quality and access to healthcare resulting in poor health outcomes in racial/ethnic minority populations due to critical thinking about assumptions that shape life sciences, medical research, clinical practice, and social and behavioral sciences as they relate to racial and ethnic minority populations and to better students to integrate concepts of culture and health disparities into other social, biological, political, psychological, genetic, and clinical health interests. P/NP or letter grading.

175. Community Psychology. (4) Designed for junior/senior Psychology majors. Application of psychological principles to understanding and solution of community problems. Topics include community development, community mental health problems, drugs, racism, and rehabilitation of prisoners.

M175SL. Addressing Social Determinants in Racial/ Ethnic Minority Communities to Reduce and Prevent Health Disparities. (4) (Same as Community Engagement M175SL; Seminar, one hour; fieldwork, 10 hours.) Examination of how addressing social determinants in racial/ethnic minority communities can reduce or eliminate physical and mental health disparities. Currently in racial and ethnic minority communities, social determinants of individuals can be function of built environment, exposure to pollutants and toxins, scarcity of supermarkets or stores with fresh produce and nutritional food, noise levels, and variety of other stressors and unhealthy conditions. Health interventions are often focused on individual-level change or increases in access to health care with little in way of changing risk environments. Designed to identify and provide opportunities to understand how to address social determinants related to negative health outcomes in racial/ethnic minority neighborhoods and communities and to experience the variety of approaches to community-based and participatory research. P/NP or letter grading.

177. Counseling Relationships. (4) Lecture, two hours; discussion, two hours. Requisites: courses 10, 100A, and 127A or 127B or 127C. Designed for junior/senior Psychology majors. Conceptual and empirical foundations of psychological counseling: comparison of alternative counseling models, emphasis on counseling approaches in community mental health areas such as drug abuse, suicide prevention, and crisis intervention. P/NP or letter grading.

182A-182B-182C. Principles of Research in Relationship Science. (1-1-1) Seminar, one hour. Introduction to research foundation of relationship science e.g., leading theories, common measures and research designs, key statistics. Students learn important professional skills in conducting research and in applying to graduate school. P/NP grading.

184A-184B. Psychology Research Opportunity Program Seminars. (2-2) Seminar, 90 minutes. Designed to bring together Undergraduate Research Opportunity Program (PROPS) students undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. P/NP grading.

185. Research Pracicum in Psychology. (3) Laboratory, seven hours. Corequisite: course C194D. Limited to juniors/seniors. Practical applications of psychology in research and assistance of faculty mentor. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward core course requirement in psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

186A. Cognitive Science Laboratory: Introduction to Theory and Simulation. (4) Laboratory, four hours. Requisites: courses 10, 85, 100A, 100B, Program in Computing 10A, 10B. Designed for junior/senior departmental majors. Models of cognition within framework of explanation at multiple levels of abstraction. Examples of elementary models in multiple psychological domains (e.g., visual perception, categorization, learning, reasoning, and problem solving). Types of models include neural networks and symbolic models. Lectures and discussions interwoven with computer simulations written in MATLAB. P/NP or letter grading.

186C. Cognitive Science Laboratory: Psychophysiological Theories and Methods. (4) Lecture, two hours; laboratory, two hours. Requisites: courses 10, 85, 100A, 100B. Designed for junior/senior departmental majors. Lectures and laboratory work that examine perceptual measurement procedures (psychophysical methods) and cognitive processing and decision models on which procedures are based, with particular emphasis on signal detection theory and its applications. Letter grading.

186D. Laboratory in Functional Neuroimaging. (4) Lecture, four hours. Enforced requisites: courses 10, 85, 100A, 100B. Limited to departmental majors. Introduction to study of brain with functional imaging (fMRI). All major aspects to be discussed, from physical basis of MR signal to data analysis. Letter grading.

188A. Special Seminars: Psychology. (4) Seminar, three hours. Limited to juniors/senior. Departmentally sponsored experimental or temporary seminars on selected topics in psychology, such as those taught by visiting faculty members. Reading, discussion, and development of culminating project. May be repeated for credit. P/NP or letter grading.

188B. Special Courses in Psychology. (4) Lecture, three hours. Designed for junior/senior majors. Departmentally sponsored experimental or temporary courses on topics of psychological interest, such as those taught by visiting faculty members. Consult Schedule of Classes. P/NP or letter grading. May be repeated for credit. P/NP or letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Contract noted on transcript. Letter grading.

190. Research Colloquia in Psychology. (1) Seminar, one hour. Designed to bring together students undertaking supervised tutorial research in seminar setting with lecture course instructor to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP or letter grading.

191. Advanced Topics Research Seminars: Psychology. (1) Seminar, one hour. Limited to juniors/senior. Research seminar on selected topics in psychology. Reading, discussion, and development of culminating project. May be repeated for credit. P/NP grading.
191A-H 191BH-191CH. Departmental Honors Research Seminars. (2-2-2) Seminar, two hours. Enforced corequisite: course 198. Course 191AH is required to 191CH, which is requisite to 191CH. Limited to psychology honors program students. Opportunity for development and analysis of creative ideas through individual research projects with faculty sponsor and discussion of student and faculty research presentations. Information and applications may be obtained from Undergraduate Advising Office, 1531 Franz Hall. If approved in advance by Undergraduate Advising Office, 1531 Franz Hall, and 198 may be applied toward elective course requirement for any Psychology Department major. Letter grading.

192. Education Practices in Psychology. (4) Seminar, three hours. Limited to juniors/seniors. Training and supervised seminar for advanced undergraduate students to assist in courses related to psychology. Students assist in preparation of materials and development of innovative programs under guidance of faculty members and teaching assistants. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

193. Journal Club Seminars: Psychology. (1) Seminar, one hour. For advanced undergraduate students. Discussion of readings selected from current literature of particular field or attendance at and write-ups of speakers series. May be repeated for credit. P/NP grading.

194A. Internship Seminars: Psychology. (2) Seminar, two hours. Corequisite: course 195A. Forum for advanced undergraduate students to discuss their internship experiences and learn about career development. Students are exposed to professional literature in clinical science and related fields. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

194B. Research Group Seminars: Psychology. (1) Seminar, one hour. Corequisite: course 196A (3-unit option). Limited to juniors/senior Cognitive Science majors who are part of research group. Discussion of research methods and current literature in field or of research of faculty members or students. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

194C. Research Group Seminars: Cognitive Science. (1) Seminar, one hour. Corequisite: course 196B (3-unit option). Limited to junior/senior Cognitive Science majors who are part of research group. Discussion of research methods and current literature in field or of research of faculty members or students. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

195A. Community Internships in Psychology. (2) Tutorial (approved community setting), six hours. Corequisite: course 194A. Limited to juniors/seniors. Internship experience for Psychology majors supervised setting in community agency or business. Students meet on regular basis with supervisor and provide periodic reports of their experience. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract with supervising placement sponsor required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

195B. Corporate Internships in Cognitive Science. (4) Tutorial, eight hours. Limited to junior/senior Cognitive Science majors. Practical applications of cognitive science through internship experience in supervised setting. Students meet on regular basis with supervisor and provide periodic reports of their experience. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May be applied toward course requirements for Cognitive Science major. Individual contract with supervisor required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

196A. Research Apprenticeship in Psychology. (3 to 4) Tutorial, eight hours. Corequisite: course 194B. Limited to juniors/senior Psychology majors. Practical applications of psychology through research under guidance of faculty mentor. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

196B. Research Apprenticeship in Cognitive Science. (3 to 4) Tutorial, eight hours. Corequisite: course 194C. Limited to junior/senior Cognitive Science majors. Practical applications of cognitive science through research under guidance of faculty mentor. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May be applied toward course requirements for Cognitive Science major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

Graduate Courses

200A. Pavlovian Processes. (4) Lecture, three hours. Basic principles and characteristics of learning and behavior, including Pavlovian conditioning, instrumental learning, and species-specific behavior. S/U or letter grading.

200B. Instrumental Conditioning. (4) Lecture, three hours. Topics include animal learning and conditioning and application of learning principles to goal-directed behavior, motivational processes, and goal selection in nonhuman animals. S/U or letter grading.

201. Current Issues in Learning and Behavior. (1) Discussion, 90 minutes. Designed for graduate students. Topics may be selected from any Psychological Science major. May be repeated for credit. Credit/No Credit grading.

204A. Basic Motivational Processes. (4) Lecture, three hours. Designed for graduate students. Analysis, using behavioral systems approach, of basic motivational behavior such as feeding, drinking, foraging, and reproduction. Same approach also applied to phenomena such as acquired motivation, reinforcement, and drug addiction. Historical survey of behavioral analysis of motivation and goal-directed behavior. S/U or letter grading.

204B. Fear and Anxiety. (4) Lecture, three hours. Preparation: graduate training. Presentation of theoretical and empirical advances, from biological and psychological perspectives, in fear and anxiety. Integration of animal and human research.

205A. Cortical Plasticity and Perceptual Learning. (2) Lecture, three hours. Designed for graduate students. Examination of neural basis of perceptual learning. Review of cortical plasticity and how it relates to different forms of perceptual learning in visual, auditory, and somatosensory modalities. Review of mechanisms of cortical plasticity, including basic features of long-term synaptic plasticity and computational models of cortical processing. Letter grading.

205E. Neural Basis of Reward and Value. (2) Five-week course. Lecture, three hours. Designed for graduate students. Overview of neural systems underlying reward and value. Emphasis on mechanisms of reinforcement learning and cost/benefit or value-based decision making. Readings drawn from primary literature in animal research. Letter grading.

205F. Physiology of Learning. (2) Lecture, three hours. Designed for graduate students. Search for anatomical loci of engrams. Cell biology of plasticity, including electrophysiological and molecular approaches. Theories of how neural circuitry might be organized to make learning possible. Letter grading.

205M. Neuropsychology of Perception. (2) Lecture, three hours (five weeks). Designed for graduate students. Examination of neural substrates of high-level visual processes. Include agnosia, prosopagnosia, and characteristics of electrophysiological responses recorded in primate temporal lobe. Discussion of issues regarding neural representation of knowledge. Letter grading.

205N. Dopamine Prediction Error: Case Study of Reinforcement Learning Theory. (2) Seminar, three hours. Overview of dopamine prediction error—signal exhibited when there is difference between expected outcome and actual outcome—perceptual and the underlying neural mechanisms. Letter grading.

206B. Introduction to Biological Signal Processing. (4) Lecture, three hours. Designed for graduate students dissecting anxiety, fear, and panic circuits.

205O. Neurobiology of Defensive Behaviors. (2) (TDRL), and challenges to this theory by recent work. Application to temporal difference reinforcement learning used to describe it. Discussions of papers describing reinforcement learning theory and its application to neural representation of knowledge. Letter grading.

206D. Psychology of Aging and Health. (4) Seminar, three hours. Limited to graduate students. Theories and methods in study of aging and adult development. Focus on concepts, theories, and major problems in social psychology. Letter grading.

216G. Critical Problems in Political Psychology. (4) Seminar, three hours. Exploration of nascent field of social vision, with emphasis on how observers utilize visible cues in constructing impressions of other people and how these perceptions are moderated by existing knowledge structures and motivations. S/U or letter grading.

220A. Social Psychology. (4) Lecture, three hours. Designed for graduate psychology students. Intensive consideration of concepts, theories, and major problems in social psychology.

222A. Interpersonal Relations. (4) Discussion, three hours. Requires: course 220A. Critical review of theory and research on interpersonal relations, with emphasis on friendship, dating, and marriage.

222C. Psychology of Intergroup Relations. (4) Lecture, three hours. Designed for graduate students. In-depth and comprehensive exposure to major theoretical and methodological issues within domain of intergroup relations research. Approaches not simply restricted to work within psychology but also cross-disciplinary studies in general, including anthropology, political science, and sociology. S/U or letter grading.

M222E. Foundations of Organizational Behavior. (4) (Same as Management-PhD M243.) Lecture, three hours. Designed for graduate students. Doctoral-level survey of classic and emerging theories and research in field of organizational behavior, with focus on micro-level topics related to individual and organizational processes within organizations. Exploration of how individual behaviors, cognitions, and perceptions are affected by organizational context, structure, and culture. S/U or letter grading.

222F. Professional Issues in Psychology. (4) Seminar, three hours. Acquisition of skills essential for success in graduate school and academia more broadly, including transition to graduate school, writing, manuscript reviewing, grant writing, teaching and mentoring, academic job market, job negotiating, and giving job talks. Involves combination of guest speakers, lectures, discussions, readings, written exercises, and practical experience. S/U or letter grading.

226A–226B/226C. Current Literature in Social Psychology. (2–2–2) Discussion, 90 minutes. Course 226A is limited to first-year social psychology students. Courses 226B and 226C are open to nonsocial psychology students with consent of instructor. Recent and current research papers in social psychology presented by members of seminar and their significance and methodology discussed and critiqued in depth. S/U grading.

M228A. Proseminar: Political Psychology. (4) (Same as History M236A and Political Science M261A.) Seminar, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making. S/U grading.

M228B. Seminar: Political Psychology. (4) (Same as Political Science M261D.) Discussion, three hours. Requires: course 220A. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion. S/U or letter grading.

222B. Seminar: Psychological Assessment. (4) (Same as Political Science M261E.) Discussion, three hours. S/U or letter grading.
M236. Interdisciplinary Relationship Science. (4) (Same as Anthropology M295S, Education M297, and Sociology M270.) Lecture, three hours. Limited to graduate students. Approaches to describing and analyzing social science in fields of anthropology, education, psychology, and sociology. Focus on theme of understanding biological, behavioral, and cultural aspects of relationships through diverse theoretical and methodological approaches. Use of broad definition of interpersonal relationships, including relationships such as parent-child, teacher-student, sibling, peer, kin, romantic relationships, marriages, and friendships. S/U or letter grading.

236B. Methods in Social and Affective Neuroscience. (4) Seminar, three hours. Designed for graduate students. Provides insight into how to conduct research in social and affective neuroscience. S/U or letter grading.

M238. Survey Research Techniques in Psychocultural Studies. (4) (Same as Psychiatry M238.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.

239. Qualitative and Mixed Methods in Psychology, Education, and Social Sciences. (4) Seminar, three hours. Designed for graduate students. Substantive examples of qualitative and mixed-method research in culture and human development, both behavioral and neural. Examples include qualitative research techniques and diverse relations between qualitative and quantitative data useful for research. S/U or letter grading.

240A. Language and Cognitive Development. (4) Lecture, three hours. Preparation: one undergraduate developmental psychology course in cognitive or language development. Designed for graduate students. Consideration of major topics and concepts, key theories, latest methods, and research findings in development of language and cognition. S/U or letter grading.

240B. Social and Emotional Development. (4) Lecture, three hours. Preparation: one undergraduate developmental psychology course in social development or related topic. Designed for graduate students. Consideration of major topics and concepts, key theories, latest methods, and research findings in social and emotional development. S/U or letter grading.

240C. Developmental Psychobiology. (4) Lecture, three hours. Limited to graduate students. Introduction to emerging field of developmental psychobiology, including cognitive and affective neuroscience. Consideration of major topics and concepts, key theories, latest methods, and research findings. S/U or letter grading.

242A-242B-242F. Seminar: Developmental Psychology. (4-4-4) Seminar, three hours. Requisites: courses 240A, 240B. Designed to repeat in order and may be repeated for credit. S/U or letter grading. 242A. Perceptual Development. 242B. Cognitive Development. 242F. Development of Language and Communication.

242G. Seminar: Developmental Psychology—Adolescent Development. (4) (Same as Education M217F) Seminar, four hours. Designed for graduate students. Review of recent research on physical, cognitive, social, and psychological development during second decade. Emphasis will include published developmental changes in parent/adolescent relationships, role of peers, identity development, high-risk behaviors, stress and coping, and school adjustment. Letter grading.

244. Critical Problems in Developmental Psychology. (4) Lecture, three hours. Requisites: courses 240A, 240B. Current problems; content varies depending on interest of class and instructor. May be repeated for credit with consent of instructor.

247. Culture, Brain, and Development. (4) (Same as Sociology M248) Lecture, three hours. General introduction to interrelations of culture, brain, and development, including both social and cognitive development. Special attention to effects of social change on culture and human development. S/U or letter grading.

248. Brain and Behavioral Development during Adolescence. (4) (Formerly numbered 248J.) (Same as Neuroscience M248J.) Seminar, three hours. Foundational and emerging work on adolescent brain and behavioral development, including cognition, risk taking, emotion, identity, stress, relationships, and population diversity. Discussions of assigned readings and presentations by guest faculty and scientists. S/U or letter grading.

249. Current Issues in Quantitative Psychology. (1) Seminar, 90 minutes. Designed for quantitative graduate students and minors. Research presentations and discussions of current topics in quantitative psychology. May be repeated for credit. S/U grading.

250C. Advanced Psychological Statistics. (4) Lecture, three hours; discussion, two hours. Requisite: course 250A. Limited to graduate students. Review of traditional topics in correlation and regression analysis, including model comparison strategies, evaluation of model assumptions, testing mediation and moderation hypotheses, working with categorical variables, general linear model, and logistic regression. Letter grading.

251A-251B-251C. Research Methods. (4-4-4) Tutorial, to be arranged. Substance graduate students. Subjects design and conduct original research projects under supervision of instructor in charge. It is anticipated that many students will complete their project in two terms. Three terms usually allowed. S/U (251A, 251B) and S/U or letter (251C) grading.

254A. Mediation, Moderation, and Conditional Processes. (4) Lecture, three hours. Requisite: course 250C. Designed for students with previous experience with regression analysis. Application of linear and logistic regression to assess how (mediation) and when (moderation) the effect of one variable on another variable changes when certain processes occur (conditional process analysis). S/U or letter grading.

254C. Bayesian Statistics. (4) Lecture, three hours. Requisite: course 258A. Introduction to Bayesian inference, effective approaches to Bayesian modeling and computation, and Bayesian methods that can be used by applied researchers to solve real-life problems. Covers basic Bayesian inference. S/U or letter grading.

255A. Quantitative Aspects of Assessment. (4) Lecture, four hours. Requisites: courses 250A, 250B. Introduction to issues concerning empirical measurement of abstract constructs using both classical and modern empirical techniques. Hands-on approach allows students to develop practical experience. In addition to discussion of issues concerning reliability and validity, topics include exposure to analytic approaches, including item response theory, multiple regression, principal components analysis, exploratory factor analysis, confirmatory factor analysis, path analysis, and structural equation modeling. S/U or letter grading.

255B. Item Response Theory. (4) Lecture, three hours. Requisites: courses 250A, 250B. Introduction to item response theory (IRT) measurement models and application to educational and psychological data. Coverage of major IRT models, including models for dichotomous and polytomous formats. S/U or letter grading.

256B. Advanced Multilevel Modeling. (4) Lecture, four hours. Requisite: course 256A. Topics in analysis of clustered and longitudinal data, including multilevel models, multilevel mediation, nonhierarchical data structures, meta-analysis, modeling random processes, and mixture models. Readings in both qualitative and substantive multilevel modeling literature. S/U or letter grading.

257. Multivariate Analysis with Latent Variables. (4) (Same as Political Science M234B and Statistics M242.) Lecture, three hours. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structural-means factory analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications, S/U or letter grading.

259. Quantitative Methods in Cognitive Psychology. (4) Requisites: courses 250A, 250B. Number of nonstatistical mathematical methods and techniques commonly used in cognitive psychology. Topics include Markov chains, other stochastic processes, queueing theory, information theory, frequency analysis, etc.

260A-260B. Proseminars: Cognitive Psychology. (1–1) Presentation of research topics by students, faculty, and visiting scholars. May be repeated for credit. S/U grading.

261. Perception. (4) Lecture, three hours. Concepts, theories, and research in study of perception. Considers the questions: Why do things look, sound, taste, or feel as they do? What is the structure of perceptual systems? How do these systems process information?

262. Human Learning and Memory. (4) Lecture, three hours. Contemporary theory and research in human learning and memory, including classical conditioning and more recent learning and memory processes, structure and organization of short- and long-term memory, S/U or letter grading.

263. Psycholinguistics. (4) Lecture, three hours. Language allows humans to transfer thoughts across minds. To elucidate mental structures and processes that underlie this feat, exploration of relationship between language and mind. How does the language system itself, how mental labor is divided across distinct subcomponents. Critical examination of both classic and cutting-edge findings from experimental cognitive psychology, computational modeling, and neuroscience. Topics include relationship
between linguistic structure and meaning; parallels between language and other cognitive domains (e.g., statistical learning, Bayesian inference, prediction, etc.), on online language understanding; influences of language on thought; language-related dissociations; and efficient coding information, S/U or letter grading.

273A-273B-273C. Professional and Ethical Issues in Clinical Psychology. (2–2–2) Lecture, one hour; dis- cussion, one hour. Designed for graduate clinical psychology students. Year-long course sequence cov- ering a variety of topics necessary for clinical psycholo- gists in their clinical work, including legal and ethical issues, child abuse, suicide assessment, issues in em- pirically validated treatments, psychiatric consultation and psychotherapy, working with diverse client populations, etc. Letter grading.

M274. Health Status and Health Behaviors of Racial and Ethnic Minority Populations. (4) Same as Health Policy and Management M274.) Seminar, two hours; dis- cussion, one hour. Limited to graduate students. Overview of physical and mental health behaviors and status of major racial/ethnic groups in U.S. Where appropriate, discussion of international issues as well. S/U or letter grading.

M277. Functional Neuroimaging: Techniques and Applications. (4) Seminar, two hours. General topics related to neuroimaging methods, data acqui- sition and analysis, experimental design, and results ob- tained thus far in human systems. Strong focus on un- derstanding technologies, how to design activation imaging paradigms, and how to interpret results. Lab- oratory visits and discussion of functional MRI experiment. S/U or letter grading.

M280. Affective Disorders. (2 or 4) (Same as Psychi- atry M234.) Seminar, two hours. General topics related to depression and related mood disorders. Depressive illness, including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for 4 units are as- signed a more intensive reading list and required to make a presentation or prepare a research paper. S/U or letter grading.

M285. Cognitive Behavior Therapy with Children: Treatment and Systems of Care. (2 or 4) (Same as Psycho- therapy C296B. Research Group Seminars: Practicum. (1) Seminar, one hour. Designed for graduate students. Training of students in applica- tion of (1) child treatment outcome literature, (2) cli- nical monitoring and feedback tools, and (3) common clinical strategies from evidence-based practices to prepare for assessment, monitoring, planning, and evaluation of children and adolescents with cognitive-behavioral problems, with the purpose of enhancing children's and adolescents' abilities to function more effectively in the home, school, and community. S/U or letter grading.
402. Clinical Research Practicum. (2) Fieldwork, two hours. Faculty and graduate students who share interests discuss current literature, new ideas, methodological issues, and preliminary findings. Meetings include research presentations and opportunities for feedback on current and proposed research to encourage, support, and facilitate student research expertise. Assigned reading included. S/U grading.

403. Special Topics Study Course. (1 to 4) Discussion, one to four hours. Under faculty supervision, group of students meets each week for quarter in self-study group to pursue specific topic of their choice that is not covered in other department courses. S/U grading.

410A-410B-410C. Clinical Teaching and Supervision. (4–4–4) Clinic, four hours. Preparation: completion of PhD comprehensive examinations, advancement to candidacy or preparation for dissertation research actively under way. Study and practice of knowledge, concepts, and theories on teaching and supervision of applied clinical psychology. Letter grading.

410D-410E-410F. Clinical Assessment Supervision. (4–4–4) Clinic, two hours; other, one hour. Designed for third-year graduate clinical psychology students. Study and practice of knowledge, concepts, and theories on teaching and supervision of psychological assessment. Letter grading.

421. Research in Social Psychology. (2) Discussion, two hours; reading and group work, four to six hours. Forum for faculty and graduate students pursuing research on a common topic to share research ideas, make research presentations, and obtain feedback on study designs, procedures, and results to foster collaborative investigations in common research areas. S/U grading.

495. Presentation of Psychological Materials. (4) Seminar, to be arranged. Supervised practicum in undergraduate teaching. Students serve as discussion section leaders in selected undergraduate courses. S/U grading.

495A. Teaching Assistant Training Seminar: Presentation of Psychological Materials I. (1) Seminar, 90 minutes. Supervised practicum in undergraduate teaching. Focus on discussion and implementation of evidence-based teaching practices. Topics include facilitating active learning, presenting material, providing constructive feedback, and teaching diverse students. Students serve as teaching assistants in course 10. S/U grading.

495B. Teaching Assistant Training Seminar: Presentation of Psychological Materials II. (1) Seminar, one hour. Requisite: course 495A. Supervised practicum in undergraduate teaching. Advanced training in use of evidence-based teaching practices. Topics include designing course materials, setting pedagogical goals, and developing teaching statements. Students serve as teaching assistants in various courses. S/U grading.

596. Directed Individual Research and Study in Psychology. (1 to 12) Tutorial, to be arranged. One 596 course is required during second year of graduate study, and one 596 or 599 course is required during each succeeding year of graduate study. (Terminal MA candidates are exempt from this requirement.) S/U grading.

597. Individual Studies. (1 to 12) Tutorial, to be arranged. Designed primarily as preparation for PhD qualifying examinations. May be required by some area committees as requisite for taking examinations. S/U grading.

599. Research for PhD Dissertation. (1 to 12) Tutorial, to be arranged. Preparation: successful completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations. S/U grading.

**Public Affairs Minor**

**Overview**

The Public Affairs minor teaches undergraduate students the skills of policy analysis and exposes them to many of the local, state, national, and international issues facing today’s policymakers and opinion leaders. Courses explore the public (governmental) and nonprofit sectors and provide a theoretical, conceptual, and practical foundation for students. Particular attention is given to the vexing issues facing urban areas and urban planners, social welfare and social workers, and public policies that affect individuals and groups of people in their public and private lives.

**Undergraduate Minor**

**Public Affairs Minor**

**Admission**

To enter the Public Affairs minor, students must have an overall grade-point average of 2.0 or better and complete Public Affairs 10 with a grade of B or better. For more information, contact the Undergraduate Advising Office by e-mail.

**The Minor**

**Required Lower-Division Courses (10 units):**

Public Affairs 10, and 40 or 60.

**Required Upper-Division Courses (20 to 25 units):**

(1) Two or three theory and/or methods courses selected from Public Affairs M109, 110, 111, 112, 113, 114, 115, 116; (2) two or three elective courses selected from upper-division, undergraduate courses (100-199) within the four academic units of the Luskin School of Public Affairs: public affairs, public policy, social welfare, and urban planning. Students must complete five upper-division courses. If three theory/methods courses are selected, two electives are required; if two theory/methods...
courses are selected, three electives are required.

**Policies**

Lower-division courses may not be substituted. If a student has taken a non-public affairs course in statistics or microeconomics, it is recommended that the other public affairs course be taken to satisfy the second lower-division requirement.

By petition only, students may request to use one outside course (not from a Luskin School of Public Affairs unit) as an elective for the minor.

Fieldwork and internship courses, such as Social Welfare 130A, 130B, and Urban Planning M165, may not be applied toward the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

José C. Loya, PhD (Urban Planning)
Meredith Phillips, PhD (Public Policy, Sociology)
Ananya Roy, PhD (Social Welfare, Urban Planning)

**Overview**

The Public Affairs major offers students a rigorous conceptual and empirical foundation that prioritizes capacity for action by students exhibiting high motivations for public service and social change. It combines interdisciplinary training in the social sciences with practical experience addressing public problems. Students will learn theoretical, empirical, and critical foundations of applied social science, qualitative and quantitative research methods, and the history and practice of community engagement.

Public Affairs students traverse the boundary between the classroom and the world through instruction in public engagement and experiential learning that develop students’ capacity to work collaboratively with communities, government agencies, nonprofit organizations, and businesses.

The major serves as a pathway for students pursuing careers serving the public interest in civil society, business, government, or through advanced graduate training in academic or professional programs.

---

**Undergraduate Major**

**Public Affairs BA**

**Capstone Major**

The Public Affairs major is a designated capstone major. Students pursuing the major are required to complete a three-quarter experiential learning opportunity. The experiential learning capstone consists of three parts: an internship, seminar, and capstone project.

Internships can range from internships in community-based organizations, social enterprise businesses, or regional governments to UCLA Global Internship Program, UCLA Quarter in Washington, or UC Center Sacramento (UCSS) programs.

These experiences are accompanied by a seminar that enables students to reflect on and share their engagement experience with classmates, apply what they have learned in their coursework to their community or public engagement, and analyze how the engagement experience conforms with or differs from what they learned in coursework.

This experiential learning opportunity culminates with a capstone project that integrates what students have learned at their internship site with theory and methods learned in their major coursework.

**Learning Outcomes**

The Public Affairs major has the following learning outcomes:

- Understanding of how different contexts, institutions, and/or environments influence individual and public life and can create, exacerbate, or reduce inequality and injustice
- Demonstrated familiarity with economic, political, and/or civil society responses to social problems and public issues
- Location of, use of, and critical thinking about quantitative and qualitative evidence for understanding societal problems and/or their solutions
- Formulation of clear and convincing written and oral arguments for varied audiences
- Effective communication with collaborators, policymakers, and/or the public
- Application of theoretical knowledge, analytical methods, and communication skills to an experiential learning capstone

---

**Entry to the Major**

**Admission**

Students must apply to declare the Public Affairs major. Admission into the major is based on student academic performance and an application process. Consult with Luskin School of Public Affairs undergraduate advisers for any additional admission requirements.

**Pre-major**

Students entering UCLA directly from high school can select the Public Affairs pre-major on the UCLA admission application, or complete a petition to enter the pre-major once in attendance at UCLA. Transfer students are automatically admitted to the major if they select Public Affairs on the UCLA admission application. See the Transfer Students section for more details.

The Public Affairs major includes six lower-division courses and ten upper-division courses. Students identified as Public Affairs pre-majors have the opportunity to formally apply to declare the Public Affairs major after completing four of the required lower-division courses and the school quantitative reasoning and Writing I requirements. Two of the four required lower-division courses must be Public Affairs 40 and 60, both of which serve as requisites for upper-division coursework.

Students may only apply to the Public Affairs major during winter quarter of their first or second year, once they have satisfied the following criteria: (1) Must be in good standing at the time of application. This means students cannot be on probation or subject to dismissal status when they apply. (2) Have completed, with a C or better, at least four of the six required lower-division public affairs courses (including courses taken winter quarter). Completed courses must include Public Affairs 40 and 60. The remaining two courses, if not yet taken, must be taken as soon as possible, and during the third year at the latest. All courses for both the pre-major and the major must be taken for a letter grade, and receive a B grade or better. Students entering UCLA directly from high school have the opportunity to formally apply to declare the Public Affairs major. Admission into the major is based on student academic performance and an application process. Consult with Luskin School of Public Affairs on student academic performance and an application process. Consult with Luskin School of Public Affairs undergraduate advisers for any additional admission requirements. (3) Have completed at least 45 letter-graded units (including AP and transfer units, if needed) by the end of winter quarter of the year they apply. (4) Have not exceeded 135 units of coursework (not including AP or other transfer units), by the end of winter quarter of the year they apply.

**Transfer Students**

Transfer applicants to the Public Affairs major with 90 or more units are considered for admission based on successful completion of the preparation for the major coursework. Students must take all preparation for the major courses for a letter grade, and receive a B grade or better in these courses to be competitive. Transfer credit is subject to department approval. Consult an undergraduate counselor before enrolling in any courses for the major. Transfer Students refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.
Requirements

Preparation for the Major

Required: Public Affairs 40, 60, 80, and three courses selected from Public Affairs 10, 20, 30, 50, or 70.

The Major

Required: (1) Two theory courses selected from Public Affairs M109, 110, 111, 112, 113, 114; (2) both research methods courses Public Affairs 115, 116; (3) three-term capstone sequence Public Affairs 187AX, 187BX, 187CX; (4) three additional upper-division public affairs courses.

Honors Program

Students who wish to complete an original research thesis, driven by student-defined interests and independent work, may apply to the Public Affairs honors thesis program in the spring of junior year. Students who are admitted to programs begin background research for their project over the summer and enroll in three contract research courses with their Luskin thesis adviser during their senior year. The sequence (Public Affairs 198A-198B-198C) must be completed over three consecutive quarters, starting in the fall. Students must earn at least a B in Public Affairs 198A to continue with the sequence.

Policies

Preparation for the Major

Each course must be taken for a letter grade. Preparation for the major courses must be completed with a C grade or better.

The Major

Each course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the major.

Honors Program

Admission

To apply to the honors thesis program students must (1) have senior standing by the beginning of the fall quarter in which Public Affairs 198A is taken, (2) have an overall minimum grade-point average of 3.60 or better in the major at the end of winter quarter in the year prior to beginning the thesis, (3) have completed Public Affairs 115 and 116 by the end of spring quarter in the year prior to beginning the thesis with grades of A– or better, (4) have agreement from a faculty member to serve as thesis adviser.

To apply, students submit an application containing a short research proposal, information on their academic and research preparation, and confirmation that a Luskin faculty member has agreed to advise their honors thesis during the fall, winter, and spring of the subsequent year. The Public Affairs honors committee selects applicants based on the promise of their proposed research, research-related coursework, and research experience. The selection process is competitive.

Requirements

To qualify for graduation with departmental honors, students must complete a Public Affairs honors thesis deemed to meet the standards of honors or highest honors by the Public Affairs honors committee, and have a cumulative grade-point average of 3.60 or better in the major.

The Public Affairs honors committee, with input from thesis advisers, determines whether students’ theses merit honors or highest honors.

Students may count one honors contract course toward their Public Affairs major elective requirement (with the understanding that no more than one contract course in total may count toward the Public Affairs elective requirement).

Public Affairs

Lower-Division Courses

10. Social Problems and Social Change. (S) Lecture, three hours; discussion, one hour. Introduction to social scientific approaches to study of social problems and their solutions. Using selected contemporary social problems as cases and drawing on variety of sources (such as scholarly readings, video clips, and guest speakers), exploration of how social problems and their solutions come to be defined, roles that economic, political, educational, and cultural institutions play in perpetuating or solving social problems, and how individuals, social advocates, and communities can lead or impede social change. Letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. Pass/No Pass grading.

20. Power, Politics, and Policy Change. (S) Lecture, three hours; discussion, one hour. Introduction to key institutions of government, politics, and policy in U.S., covering their history, contemporary forms, and internal dynamics. Includes various scales and branches of government as well as institutions that exercise power and influence in public decision making and social action, such as corporations, unions, media, social movements, and civil society. Letter grading.

30. Comparative Analysis of Wealth, Policy, and Power. (S) Lecture, three hours; discussion, one hour. Exploration of strategic interactions that give rise to social problems as well as the causes and mechanisms of variation in their politics, policies, and social change outcomes and their trajectories. Topics may include: historical, cross-national, and global economic, political, and social processes and factors that give rise to empirical regularities and anomalies that can be addressed. Letter grading.

40. Microeconomics for Public Affairs. (S) Lecture, three hours; discussion, one hour. Introduction to principles of microeconomics with focus on social and policy problems. Study of decisions by firms and individuals, and implications for allocation of resources. Application of economic models to public issues such as social safety net, minimum wage, education, inequality, and poverty. Letter grading.

50. Foundations and Debates in Public Thought. (S) Lecture, three hours; discussion, one hour. Introduction to core concepts of democracy and equality and challenges to implementation posed by race, class, and gender inequality. Review of standards by which political systems can be judged to be democratic and identification of obstacles to their mutual implementation. Focus on inequality, its historical causes and modern consequences. Letter grading.

60. Using Data to Learn about Society: Introduction to Empirical Research and Statistics. (S) Lecture, three hours; discussion, two hours. Not open for credit to students with credit for Economics 41, Political Science 6, Statistics 10, 12, 13, or 15. Introduction to statistical methods for analysis using statistical software. Students learn how to find and organize quantitative data; summarize, display, and interpret data; draw inferences from samples (including understanding margins of error, standard errors, and confidence intervals); test hypotheses about the associations between two variables (including tests of proportion, t-tests, chi-squared, correlation); and communicate findings to lay audiences. Letter grading.

70. Information, Evidence and Persuasion. (4) Lecture, three hours; discussion, one hour. Examination of sources and varieties of knowledge produced in social sciences. Evaluation of types of evidence, arguments, and biases in various social science disciplines and the manipulation of evidence in social issues. Examination of public life of evidence and arguments by different actors in social policy-making, persuasion, and propaganda process. Letter grading.

80. How Social Environments Shape Human Development. (4) Lecture, three hours; discussion, one hour. Overview of major theoretical, conceptual, and empirical traditions in study of human development. Exploration of how diverse cultural, social, socioeconomic, and historical contexts interact with biological, cognitive, and psychological processes to affect individuals across key developmental periods (such as early childhood, adolescence, early adulthood, middle adulthood, and late adulthood). Topics may include: historical changes in families, schools, neighborhoods, and workplace; economic conditions of families, schools, and neighborhoods; enduring effects of childhood on adult well-being; and impact of ascribed characteristics such as gender, race, and nationality on individuals’ environments, pathways, and outcomes. Letter grading.

Honors Seminars

(1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or projects and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

88HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for a maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

95. Introduction to Community or Corporate Internships in Public Affairs. (2 or 4) Tutorial, two hours; fieldwork, eight hours. Limited to freshmen/sophomores. Entry-level internship in supervised setting in corporate, governmental, or nonprofit/community organization setting related to public affairs. Students meet on regular basis with instructor and provide periodic reports of their experience. Individual contract with supervising faculty member required. May be repeated for credit. May not be used toward Public Affairs major capstone requirement; consult with undergraduate advisor. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly activity), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enroll in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

M109. Introduction to Cities and Planning. (4) (Same as Urban Planning M120.) Lecture, three hours; discussion, one hour. Survey of urban history and evolution in U.S., urban social theory, current growth trends, system of cities, urban economy and economic restructuring, traditional and alternative location theories, urban transportation, and residential location and segregation. Letter grading.
110. Urban Revolution: Space and Society in Global Context. (4) Lecture, three hours; discussion, one hour. Examination of potentialities and challenges of 21st-century urban revolution in global context. Introduction of theoretical frameworks and conceptual methods used by urban studies and planning to study cities and urban transformations, and historical and contemporary analysis of urbanization to learn about key urban transformation processes, including urbanization, gentrification, and suburbanization. Students learn about institutions and policies governing transport, space, and forms of community organizing and civil society that seek to redress urban inequalities. Introduction to key theories of space and utopian visions of urbanism. Letter grading.

111. Microeconomics: Market Failures and Inequality. (4) Lecture, three hours; discussion, one hour. Introduction to economic theory for policy analysis. Broad focus on evaluating rationale for government intervention in economy, in particular to address market failures and issues of economic inequality. Major emphasis on market failures in context of environmental sustainability, and economic inequality arising from markets for human capital, health, housing, and labor. Students are expected to have working knowledge of basic statistical and economic concepts. Letter grading.

112. Social Movements. (4) Lecture, three hours; discussion, one hour. Introduction to theory of social movement, emphasizing and contributing to social movements. Examination of how and why social movements emerge; how and why people join, lead, stay, or drop out of movements; and strategies and tactics by which social movements enact change. Draws upon wide range of social movements inside and outside of U.S. Letter grading.

113. Policy Analysis: Approaches to Addressing Social Problems. (4) Lecture, three hours; discussion, one hour. Policy analysis is designed to train students in logic of public policy analysis, introduce them to general skills required to do policy analysis, and to prepare them in persuasive presentation of their work. Development of skills fundamental to effective policy analysis and argumentation. Letter grading.

115. Using Quantitative Methods to Understand Social Problems and Their Potential Solutions. (5) Lecture, three hours; discussion, two hours. Requisite: course 60 or equivalent introductory statistics course. Course in R preferred. Introduction to multivariate quantitative research models used to answer questions in social science. Students gain practical and intuitive understanding of multivariate regression, program evaluation, and research methods, and apply knowledge by analyzing real world data. Focus on practical analytical tools using statistical software. Letter grading.

116. Using Qualitative Methods to Understand Social Problems and Their Potential Solutions. (5) Lecture, three hours; discussion, two hours. Introduction to qualitative research methods with focus on ethnographic observations, interviewing, and focus groups. Students practice conducting variety of qualitative methods. Letter grading.

117B. Network Science Using R. (4) (Same as Public Policy CM177.) Lecture, three hours. No prior knowledge of R required. Designed for juniors and seniors. Network analysis offers framework for understanding how relationships between people, places, and institutions affect public policy outcomes. For example, why individuals decide to protest or vote, amount of education they pursue, or effect of human interaction in ecosystem can all be considered using network analysis. Weekly introduction of concept from network analysis, followed by working through it using popular statistical programming language R. Letter grading.

M117C. Community-Engaged Research Methods. (4) (Same as Chicana/o and Central American Studies M129 and Labor Studies M129) Lecture, four hours. Students are trained in designing, drafting, piloting, fielding, administering, and reporting field research to adulthood. Written in collaboration with labor and community partners serving Latinx, Asian Americans and Pacific Islanders, Black, and Indigenous youth populations in Central and Northern California. Students gain historical and theoretical background on multi-racial and inclusive organizing. California. Students gain historical and theoretical background on multi-racial and inclusive organizing. Students learn how to collect and analyze data per- forming to pressing organizing issues. Study and critical analysis of youth organizing strategies. Weekly training modules on data collection and grassroots organizing strategies that prepare students for internships in grassroots youth organizing groups serving Asian American, Black, Latinx, and Native American communities. P/NP or letter grading.

M124. Child Welfare Policy. (4) (Same as Social Welfare M151.) Lecture, three hours. Limited to juniors/seniors. Examination of public child welfare system in the U.S. Review of social policies and programs that impact children. History of social policies and programs for children, including discussion of orphanages, foster care, and adoptions. Transformation of public child welfare system into child protection system. Impact of welfare reform on child policies and programs in the U.S. Major programs designed to provide safety net for disadvantaged children, including welfare, food stamps, child care, child support, and children’s allowances programs. Review of research and analysis in this area. Overview of social policies and programs that impact children in U.S. Examination of comparative policies in other countries. P/NP or letter grading.

M125. Creating Safe and Welcoming Schools. (4) (Same as Chicana/o and Central American Studies M125, and Labor Studies M125) Lecture, two hours; discussion, one hour. Examination of historical context and causes of school violence, theories, and diverse perceptions of school climate and safety. Special emphasis on impact of school climate on oppressed groups and how social contexts such as poverty and how neighborhood resources influence school safety. Letter grading.

M129XP. Intergenerational Communication across Lifespan. (4) (Same as Gerontology M142XP and Social Welfare M142XP) Lecture, three hours; fieldwork, one hour. Limited to juniors/seniors. Do you say to your parents in conversation? How do you talk to your grandparents? Does your family talk well to another as group? How do you communicate well with boss who is 30 years older than you? Individuals of all ages interact with one another, and their interactions have significance throughout their lives. Introduction to psychological, interpersonal, and societal issues related to intergenerational communication across lifespan. Letter grading.

M130. Biomedical, Social, and Policy Frontiers in Human Aging. (5) (Same as Gerontology M108 and Social Welfare M108) Lecture, four hours. Limited to juniors/seniors. Course of human aging charted in ways that are based on variety of recent research frontiers. Use of conceptual frameworks to increase relevance of aging to students’ lives and enhance their appreciation for that is based on recognition that aging is inherently interdis- ciplinary phenomenon, and life course perspective that is distinguished by analytical framework it provides for understanding how individual and social lives and changing social structures, and allows students to understand how events, successes, and losses at one stage of life can have important effects later in life. Focus on individuals and groups that are part of one particular sociocultural context. Letter grading.

134. Politics of U.S. Health Policy. (4) Lecture, three hours. Students gain formative experience in process of health policy making in U.S. primarily through lens of debate over national health care reform culminating in passage of Patient Protection and Affordable Care Act (ACA, 2010) and growing opposition of opponents to repeal or overturn it. Letter grading.

135. Firearm Violence Prevention Policy. (4) Lecture, three hours. Exploration of range of topics connected to contemporary debates about firearm violence in U.S. Examination of causes and current evidence of firearm violence in different contexts. Letter grading.

136. Cannabis Policy and Society. (4) Lecture, three hours. Designed to enable students to formulate re- sponsible opinions on cannabis legalization, industry,
regulation, and taxation; to defend them with good analysis; and to understand logic behind opinions that may differ from their own. Letter grading.

137. Gangs, Criminal Justice, and Mass Incarceration. (4) Lecture, three hours. Exploration of the historical and political justice policies that surround gangs, sentencing, prisons, incarceration, and rehabilitation. Students develop understanding of how to communicate knowledge and research regarding criminal justice system, gangs, and mass incarceration. Letter grading.

140. Race, Rights, and Citizenship: Encounters with Bureaucracies. (4) Lecture, three hours. Examination of role of bureaucracies in emergence of, persistence of, and expansion of inequality. Exploration of dilemmas that bureaucrats face as they do their jobs, and experiences of residents who interact with bureaucrats. Consideration of how peoples’ experience of bureaucracies is associated with socioeconomic standing, and reflection on how experiences with bureaucracies convey messages about race, citizenship, and belonging. Letter grading.

M142. Latino Social Policy. (4) Same as Chicana/o and Latin American Studies CM177.) Lecture, three hours; discussion, one hour (when scheduled). Examination of social welfare of Latinos (Chicanos, Puerto Ricans, and Cubans) in U.S. through assessment and critical analysis of social issues affecting them. Survey of social, economic, cultural, and political circumstances affecting ability of Latinos to access public benefits and human services. Letter grading.

148. U.S. Housing Policy and Geography of Opportunity. (4) Lecture, three hours. Exploration of contemporary levels of racial inequality through lens of U.S. housing policy. Study includes historical overview of federal policies and housing policies by which lives in racially segregated, high-poverty neighborhoods constrain opportunity and social mobility; exploration of most prevalent affordable housing policies; and evaluation of various innovative policy designs and outcomes. Letter grading.

149. International Housing Policy. (4) Lecture, three hours; discussion, one hour. Study of housing policies in diverse range of countries, comparing those with U.S. housing policy. Exploration of policies in different contexts to better understand how institutional, economic, legal, and cultural contexts shape housing policies around the world. Letter grading.

M153. Parking and City. (4) Same as Urban Planning CM151.) Lecture, three hours. Requisites: course 40 or Economics 1 or 11. Parking is misunderstood link between transportation and land use. Transportation engineers practice free parking simply because there is end of most trips, while urban planners treat parking as transportation issue that engineers must study. No profession is intellectually responsible for parking, and everyone seems to assume that someone else is doing hard thinking. Mistakes in planning for parking help to explain why planning for transportation and land use has in many ways gone slowly, subtly, incrementally wrong. Study of theory and practice of planning for parking and examination of how planning for parking in U.S. has become planning for free parking. Exploration of new ways to improve planning for parking, transportation, and land use. Letter grading.

154. Green Transportation. (4) Lecture, three hours. Introduction to transportation planning and policy from environmental perspective. How to encourage alternative modes of transportation such as walking and biking? How to reduce emissions of greenhouse gas emissions. Planning for autonomous vehicles, bicycle, parking, pedestrian, and transit. Environmental justice in transportation. Letter grading.

M157. Built Environment and Health. (4) Same as Urban Planning CM157.) Lecture, three hours. Exploration of important linkages between urban-built environment and public-health outcomes using ecological, urban planning, and community-based lenses through theory and series of case studies. Knowledge of these linkages is used to propose ecological solutions to issues at nexus of built environment and public health. Letter grading.

158XP. Trees in City. (4) Lecture, three hours. Introduction of foundational urban ecological concepts using case of urban trees. Includes wide range of disciplines as well as practitioner and community organizers to understand social and ecological implications of urban vegetation. Students partner with environmental-non-profit located in Los Angeles. Letter grading.

M159. Politics of Water. (4) Same as Urban Planning M151W. Lecture, three hours. On-going debate over whether there is, or where there should be, a regulatory body to allocate water. Reading of the history of water rights and the development of the U.S. Federal Water Policy Act. Letter grading.

M160. Urban Sustainability. (4) Same as Urban Planning M161.) Lecture, three hours. In 21st century, majority of Earth’s population now lives in urban areas and virtually no part of globe remains untouched by human activities. Cities constitute crucibles of most pressing social and environmental challenges but are also potential centers of innovation for addressing those challenges. Examination of theory and practice from urban sustainability and urban planning perspectives. Letter grading.

M161. Environmental Justice through Multiple Lens. Lecture, three hours. Examination of intersection of race, economic class, and environment in U.S., with focus on issues related to social justice. Course environment is an invitation to explore how forms and quality is a highly complex phenomenon, multidisciplinary and multi-population approach taken, using alternative ways of understanding, interpreting, and taking action. P/NP or letter grading.

M164. Science, Technology, and Public Policy. (4) (Same as Electrical and Computer Engineering CM182 and Public Policy CM182.) Lecture, three hours. Recent and continuing advances in science and technology are raising profoundly important public policy issues. Consideration of selection of critical policy issues, each of which has substantial ethical, social, economic, political, scientific, and technological aspects. Letter grading.

M165. Advanced Technology: Public Policy: Public Policy, Regulation, and Law. (4) (Same as Public Policy CM175.) Lecture, three hours. Examination of cutting-edge public policy and regulatory issues implicated by advanced technologies such as artificial intelligence, drones, autonomous vehicles, blockchain/Biotech, etc. Exploration of whether and how such new technologies should be regulated. Exploration of how policymakers should balance need to promote investment and innovation against need to protect public against potential misuse and abuse of these new technologies. Exploration of many issues raised by these technologies such as privacy, national security, network neutrality, intellectual property rights, and more. Letter grading.

170. Civil Society, Nonprofit Organizations, and Philanthropy: Comparative Perspectives. (4) Seminar, three hours. Increased importance of nonprofits and philanthropy, and (re-)discovery of civil society have moved this set of institutions closer to center of policy agendas. Introduction of historical and historical background. Examination of organizational performance and impact. Exploration of key policy issues. Comparative perspective between U.S. and other countries and fields. Letter grading.

172. Development and Its Governance. (4) Lecture, three hours. Exploration of how economics, institutions, and politics interact to constrain and shape development strategies—emphasizing tension between normative visions of good economic policy and good governance and practical challenge of identifying practical ways of fostering change in specific settings. Focus on challenges of development in low- and middle-income settings, with exploration of governance challenges within U.S. Letter grading.

174. Cultural Policy and Cultural Diplomacy: Soft Power, Creative Economy, Innovation, and Arts. (4) Lecture, three hours. Culture is one of most complex conveners of cultural and political policies at international, national, and local levels. Exploration of culture as system of meaning and identity, as well as culture as art and creative expression. Exploration of role of cultural relations and cultural diplomacy. Letter grading.

175. Communications and Conflict in Public Affairs. (4) Lecture, four hours. Interactive course that prepares students for successful work with collaborators, policymakers, and public. Students gain interpersonal skills, cultural competency; learn effective communication, conflict resolution, and negotiate their interests successfully; learn to engage constituencies and build community around shared goals. P/NP or letter grading.

M176XP. Making Films about Food. (5) (Formerly numbered M176SL.) (Same as Community Engagement and Social Change M176XP and Food Studies M176.) Lecture, three hours. In this course, students learn to document video production and distribution. Students work on assignments in pairs and small groups to create 8-10 minute video about one of several Los Angeles-based partnership organizations that work towards healthy, local, sustainable food. Consideration, through video production, of challenges posed by existing farming, ranching, and distribution methods, and strategies these groups are pursuing to create more sustainable food pathways. Students look at social media communication strategies to help think through intervention in face of historically entrenched industrial food production and regulations that remain favorable to mass-produced, processed food items. P/NP or letter grading.

M179A. Social Movements in Theory and Practice. (4) (Same as Public Policy M179.) Lecture, three hours. Social movement is group of people pressuring for political or social change over long periods of time. Study focuses on how mass movements form, when and where they are likely to form, what types of tactics they choose, how those tactics affect their success, and role new technologies play. Weekly focus on one specific topic, such as nonviolence or social media, with historic and current movements used as case studies. Letter grading.

180. Lawyers, Law, and Public Affairs. (4) Lecture, three hours. Interplay between public affairs, public policy, and law represents one of most significant and fundamental aspects of American democracy. Students gain tools necessary for understanding how law shapes public policy, and how public policy shapes law. Covers key skills for understanding legal reasoning and shows how those skills operate in various substantive legal policy areas. Letter grading.

187AX-187BX-187CX. Experimental Learning Capstone. [5–5–5] (Formerly numbered 187A-187B-187C.) Lecture, two hours; discussion, one hour. Course 187AX is requisite to 187BX, which is requisite to 187CX. Limited to and required for Senior Public Affairs majors. Students apply public affairs course content and methods to issues they care about; refine understanding of concepts and methods based on internship experience; gain new knowledge about specific topics related to their internship; and develop new skills needed to complete capstone project. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supervised research, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.
199. Directed Research or Senior Project in Public Affairs. (2 to 6) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for maximum of 16 units. Individual contract required. P/NP or letter grading.

Overview
The profession of public health is responsible for the protection, preservation, and promotion of the health of communities and populations. Although the health problems of today differ from those of the past and will differ from those of the future, the professionals who make up the field need to be trained to respond to broad community problems utilizing the basic ideas of prevention of disease and promotion of well-being. This goal can be achieved only with assessments of the health status of the population through data gathering and analysis, as well as knowledge of how health risk and protective factors such cultural, social, environmental, individual factors influence rates of disease and death in societies and communities.

Undergraduate Study
Through the completion of program requirements, including a culminating capstone experience, students demonstrate mastery of foundational domains and competencies as established by the Council on Education in Public Health (CEPH). Students trained in public health practices and core concepts are well-equipped to support the development of programs, policies, practices, advocacy, research and data analysis that can improve overall public health. Graduate-level study in public health and its related fields is highly encouraged for motivated students.

Learning Outcomes
The Public Health major has the following learning outcomes:

- Demonstrated knowledge of concepts and applications of basic statistics
- Demonstrated knowledge of foundations of biological and life sciences
- Demonstrated knowledge of history and philosophy of public health; and its core values, concepts, and functions across the globe and in society
- Demonstrated knowledge of basic concepts, methods, and tools of public health data collection, use, and analysis; and why evidence-based approaches are an essential part of public health practice
- Demonstrated knowledge of concepts of population health; and basic processes, approaches, and interventions that identify and address major health-related needs and concerns of populations
- Demonstrated knowledge of underlying science of human health and disease, including opportunities for promoting and protecting health across the life course
- Demonstrated knowledge of socioeconomic, behavioral, biological, environmental, and other factors that impact health and contribute to health disparities
- Demonstrated knowledge of fundamental concepts and features of project implementation including planning, assessment and evaluation
- Demonstrated knowledge of fundamental characteristics and organizational structures of the U.S. health system and differences between systems in other countries
- Demonstrated knowledge of basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public health policy; and the roles, influences, and responsibilities of different agencies and branches of government
- Demonstrated knowledge of basic concepts of public health-specific communication, including technical and professional writing and use of mass media and electronic technology
- Demonstrated proficiency in oral and written communication of public health information through a variety of media to diverse audiences
- Demonstrated proficiency locating, using, evaluating, and synthesizing public health information

Undergraduate Majors
Public Health BA
Capstone Major
The Public Health major is a designated capstone major. The goal of the capstone is to provide a culminating experience for students in which they complete an integrative, scholarly, or applied project that reflects the knowledge and skills gained in the program to a public health problem or issue.

198HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

191A. Variable Topics Seminar: Public Affairs. (4) Seminar, three hours; outside study, nine hours. Emerging issues in public affairs. May be repeated for credit. Letter grading.

M191DC. CAPPP Washington, DC, Research Seminar, three hours; outside study, nine hours. Limited to CAPPP Program students. Seminars for undergraduate students in Center for American Politics and Public Policy’s program in Washington, DC. Focus on development and execution of original empirical research based on experiences from Washington, DC-based field placements. Study of variety of qualitative methods (observation, interviewing, etc.), with comparison to quantitative analysis. Examination of features of solid and significant research; intensive writing. Letter grading.

M191F. Variable Topics Seminar: Public Policy. (4) (Same as Public Policy CM191F.) Seminar, three hours; when scheduled outside study, eight hours. Emerging issues in public policy. May be repeated for credit. P/NP or letter grading.

195. Community or Corporate Internships in Public Affairs. (2 or 4) Tutorial, to be arranged; fieldwork, six to 12 hours. Limited to juniors/seniors. Internship in supervised setting in corporate, governmental, or nonprofit/community organization setting related to Public Affairs. Students meet with instructor and provide periodic reports of their experience. Individual contract with supervising faculty member required. May be repeated for credit. May not be used toward Public Affairs major capstone requirement; consult with undergraduate adviser. P/NP or letter grading.

195CE. Community or Corporate Internships in Public Affairs. (4) Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit settings coordinated through Center for Community Engagement. Students complete weekly written assignments, attend biweekly meetings with graduate student instructor, and write final research paper. May be repeated for credit. P/NP or letter grading. No more than 8 units may be applied toward major; units applied must be taken for letter grade. May not be applied toward concentration or distribution requirements. Individual contract with supervising faculty member required. P/NP or letter grading.

M195DC. Quarter in Washington, DC, Internships. (4) (Same as Community Engagement and Social Change M195DC, History M195DC, Political Science M195DC, and Sociology M195DC.)Tutorial, four hours. Limited to junior/senior Quarter in Washington program students. Internships in Washington, DC, through Center for American Politics and Public Policy. Students meet on regular basis with instructor and provide periodic reports of their experience. Individual contract with supervising faculty member required. P/NP grading.

196. Research Apprenticeship in Public Affairs. (2 to 4) Tutorial, three hours per week per unit. Limited to juniors/seniors. Research apprenticeship for upper-division students under guidance of faculty mentor. May be repeated for credit. Individual contract required. P/NP grading.

198A-198B-198C. Honors Research in Public Affairs. (4–4–4) Tutorial, to be arranged. Limited to seniors. Honors research in major. Requisites: courses 115, 116. Course 198A is requisite to 198B, which is requisite to 198C. Development and completion of research project and thesis under direct supervision of faculty member. Individual contract required. Letter grading.
Entry to the Major

Admission
Admission to the Fielding School of Public Health is by application and competitive—using courses, grades, grade-point averages, and essays as minimum standards for consideration. Only a limited number of students are admitted each year. Applicants are not automatically accepted into the major.

First-year applicants must apply for major standing at the end of winter quarter of their sophomore year. Late applications are not accepted. While recommended, pre-major standing is not required to apply for the major. A copy of the major application is available on the program website.

Transfer students admitted to UCLA under another major are not eligible to apply for the Public Health BA. Transfer students interested in public health are encouraged to pursue the minor instead.

Pre-major

Incoming first-year students may be admitted as pre-majors. All other students admitted as first years must first meet with an academic advisor in the Undergraduate Student Services Office, A1-269 Center for Health Sciences, before requesting pre-major standing.

Transfer Students
Transfer applicants to the Public Health BA major with 90 or more units must complete the following preparatory courses prior to admission to UCLA: one general biology course with laboratory, one general chemistry course, and one introductory statistics course. Public Health 50A and 50B must be taken at UCLA upon admission to the University.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major
Required: (1) Introduction to Public Health—Public Health 50A, 50B; (2) Principles of Scientific Knowledge—Chemistry and Biochemistry 14A or 17, Life Sciences 7A or 15, Statistics 10 or 13; (3) Health and Society—one course from an approved list available on the school website; (4) Cultural Competency—one course from an approved list available on the school website; (5) Communication Fundamentals—Communication 1 or any approved Writing II course.

The Major
Required: (1) Foundations of Public Health Knowledge and Practice—Biostatistics 120, Community Health Sciences 120, Environmental Health Sciences 120, Epidemiology 120, Health Policy and Management 120; (2) Public Health Electives—three upper-division courses (minimum of 12 units) selected from the school’s undergraduate course offerings; (3) Community Engagement—Public Health 195CE or an approved course; (4) Capstone Experience—Public Health 185A, 185B.

Honor Program
To receive School Honors, students must complete all upper-division courses in the major with an overall grade-point average of 3.5 or better. For highest School Honors, students must also complete a senior thesis. The senior thesis may be satisfied by completing either Public Health 198 or a departmental 198 course. The 198 course may not be counted as an elective course toward the major and must be supervised by an Academic Senate faculty member from the school. Highest honors is awarded if the faculty sponsor deems the work superior.

Policies

Preparation for the Major
Each course must be taken for a letter grade.

The Major
No more than 4 units from courses numbered 195 to 199 may be applied toward the elective requirement.

Public Health BS

Capstone Major
The Public Health major is a designated capstone major. The goal of the capstone is to provide a culminating experience for students in which they complete an integrative, scholarly, or applied project that reflects the knowledge and skills gained in the program to a public health problem or issue.

Learning Outcomes
The Public Health major has the following learning outcomes:

- Demonstrated knowledge of concepts and applications of basic statistics
- Demonstrated knowledge of foundations of biological and life sciences
- Demonstrated knowledge of history and philosophy of public health; and its core values, concepts, and functions across the globe and in society
- Demonstrated knowledge of basic concepts, methods, and tools of public health data collection, use, and analysis; and why evidence-based approaches are an essential part of public health practice
- Demonstrated knowledge of concepts of population health; and basic processes, approaches, and interventions that identify and address major health-related needs and concerns of populations
- Demonstrated knowledge of underlying science of human health and disease, including opportunities for promoting and protecting health across the life course
- Demonstrated knowledge of socioeconomic, behavioral, biological, environmental, and other factors that impact human health and contribute to health disparities
- Demonstrated knowledge of fundamental concepts and features of project implementation including planning, assessment and evaluation
- Demonstrated knowledge of fundamental characteristics and organizational structures of the U.S. health system and differences between systems in other countries
- Demonstrated knowledge of basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public health policy; and the roles, influences, and responsibilities of different agencies and branches of government
- Demonstrated proficiency in oral and written communication of public health information through a variety of media to diverse audiences
- Demonstrated proficiency locating, using, evaluating, and synthesizing public health information

Entry to the Major

Admission
Admission to the Fielding School of Public Health is by application and competitive—using courses, grades, grade-point averages, and essays as minimum standards for consideration. Only a limited number of students are admitted each year. Applicants are not automatically accepted into the major.

First-year applicants must apply for major standing at the end of winter quarter of their sophomore year. Late applications are not accepted. While recommended, pre-major standing is not required to apply for the major. A copy of the major application is available on the program website.

Transfer students admitted to UCLA under another major are not eligible to apply for the Public Health BS. Transfer students interested in public health are encouraged to pursue the minor instead.

Pre-major

Incoming first-year students may be admitted as pre-majors. All other students admitted as first years must first meet with an academic advisor in the Undergraduate Student Services Office, A1-269 Center for Health Sciences, before requesting pre-major standing.

Transfer Students
Transfer applicants to the Public Health BS major with 90 or more units must complete the following preparatory courses prior to admission to UCLA: one general biology course with laboratory, one year of general chemistry and one year of calculus—both with laboratory. A second semester of or beyond basic organic chemistry and one year of calculus—both with laboratory. A second semester of or beyond basic organic chemistry.

To receive School Honors, students must complete all upper-division courses in the major with an overall grade-point average of 3.5 or better. For highest School Honors, students must also complete a senior thesis. The senior thesis may be satisfied by completing either Public Health 198 or a departmental 198 course. The 198 course may not be counted as an elective course toward the major and must be supervised by an Academic Senate faculty member from the school. - Demonstrated proficiency locating, using, evaluating, and synthesizing public health information
Requirements

Preparation for the Major

Required: (1) Introduction to Public Health—Public Health 50A, 50B; (2) Advanced Foundations of Scientific Knowledge—Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, 14D, or 20A, 20B, 20L, 30A, 30AL, 30B; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, 3C, and Statistics 10 or 13; Physics 1A, 1B, 1C, 4A, and 4BL, or 5A, 5B, and 5C; (3) Health and Society—one course from an approved list available on the school’s website; (4) Cultural Competency—one course from an approved list available on the school website; (5) Communication Fundamentals—Communication 1 or any approved Writing II course.

The Major

Required: (1) Foundations of Public Health Knowledge and Practice—Biostatistics 120, Community Health Sciences 120, Environmental Health Sciences 120, Epidemiology 120, Health Policy and Management 120; (2) Public Health Electives—three upper-division courses (minimum of 12 units) selected from the school’s undergraduate course offerings; (3) Community Engagement—Public Health 195 to 199 may be applied. Students may complete all five department 100-level courses required for the minor. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Each minor course must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Policies

Preparation for the Major

Each course must be taken for a letter grade.

The Major

No more than 4 units from courses numbered 195 to 199 may be applied toward the elective requirement.

Undergraduate Minor

Public Health Minor

The Public Health minor is designed for students who wish to learn more about core public health functions, including the assessment and monitoring of the health of communities and populations at risk to identify health problems and priorities, the formulation of public policies designed to solve identified local and national health problems and priorities, the assurance that all populations have access to appropriate and cost-effective care, and the evaluation of the effectiveness of that care.

Admission

To enter the Public Health minor, students must be in good academic standing with an overall grade-point average of 2.0 or better, have completed 90 or more units, and apply to the Fielding School of Public Health Student Affairs Office, A1-269 Center for Health Sciences. Acceptance to the minor is competitive and based on grade-point average and an application essay.

The Minor

Required Lower-Division Courses (10 units): Introduction to Public Health—Public Health 50A, 50B.

Required Upper-Division Courses (20 units): Foundations of Public Health Knowledge—three courses selected from Biostatistics 100A, Community Health Sciences 100, Environmental Health Sciences 100, Epidemiology 100, or Health Policy and Management 100; (2) Public Health Electives—two upper-division courses (minimum of 8 units) selected from the school’s undergraduate course offerings.

Articulated Degree Programs
Articulated degree programs permit no credit overlap; students must complete degree requirements separately for each degree.

Concurrent Degree Programs
Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

Public Health
Lower-Division Courses
19. Flat Fax Freshman Seminars. (1 Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

50A. Introduction to Public Health I. (5 Lecture, four hours; discussion, one hour. Systematic exploration of history, philosophy, development, and scope of public health in U.S. and globally. Emphasis on scientific, social, and legal basis for public health practice, including strategies for advancing individual, community, and environmental public health. Survey of core public health functions and essential services with special focus on population health, health equity, environmental justice, and financing of health services. Letter grading.

50B. Introduction to Public Health II. (5 Lecture, four hours; discussion, one hour. Requisite: course 50A. Exploration of contemporary public health issues and challenges in U.S. and elsewhere with goal to acquaint students with current public health functions, issues, policies, practices, and current strategies for advancing people’s health. Letter grading.

99. Student Research Program. (1 to 2 Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses
M106. Health in Chican/o/Latino Population. (4) (Same as Chicano/o and Central American Studies CM106) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Examination of Chicano/Latino health status through life expectancy, causes of death, reportable diseases, services utilization, provider supply, and risk behaviors within demographic/immigration changes. Binarational view of health effects in U.S. and Mexican borderland. Letter grading.

C150. Fundamentals of Public Health. (4) (Formerly numbered 150) Lecture, four hours; discussion, one hour. Limited to nonmajors. Not open for credit to students with credit for course 50A. Exploration of foundational public health by examining public health challenges at local, national, and global levels, and current strategies for advancing population health. Analysis of current public health issues and modern public health policies and practices. May be concurrently scheduled with course C201. Letter grading.

185A. Public Health Capstone I. (4) Seminar, three hours; discussion, one hour. Limited to Public Health majors. Enrollment by consent of school. Culminating experience for students to apply acquired content, knowledge and skills to public health problem or issue. Students bring accumulated public health knowledge, skills, and experience to individual or group project theme that is approved by instructor. Required weekly written assignments, participation in review and discussion of other students’ work, and development of scope of work and outlines what is to be completed in course 185B. In Progress grading (credit to be given only on completion of course 185B).

185B. Public Health Capstone II. (4 Seminar, three hours; discussion, one hour. Enforced requisite: course 185A. Students continue independent, or group work related on theme developed in course 185A. Students share in-progress work and continue to receive guidance from instructor and peer feedback. Students participate in school-sponsored poster session by presenting project outcomes to school and campus community. Letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalze course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

195CE. Community and Corporate Internship in Public Health. (4) Tutorial, to be arranged. Work, eight to 10 hours. Limited to Public Health minors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Engagement. Students complete weekly written assignments, attend biweekly meetings with graduate student coordinator, and write final research paper. Faculty of record and graduate student instructor construct series of reading assignments that examine issues related to working in field of public health. Individual contract with supervising faculty member required. Letter grading.

198. Honors Research in Public Health. (4) Tutorial, one hour. Limited to Public Health majors or minors. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

199. Directed Research in Public Health. (4) Tutorial, one hour. Limited to Public Health majors or minors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses
2004-2008. Foundations in Public Health. (3-5) Lecture, seven hours; discussion, one hour. Introduction to foundational concepts, definitions, historical milestones, and methods related to five core disciplines of public health. Using traditional lecture presentations, active-learning case-based classroom discussions, lab sessions, and community projects, students learn essential knowledge about public health as well as skills needed to be effective public health professionals including oral and written presentation skills for relevant audiences, data analytic and presentation skills, and multidisciplinary team-building skills working with students from throughout school of public health. Letter grading.

C201. Fundamentals of Public Health. (4) Lecture, four hours; discussion, one hour. Limited to school of public health graduate students. Exploration of foundations of public health by examining public health challenges at local, national, and global levels, and current strategies for advancing population health.
Analysis of current public health issues and modern public health policies and practices. May be concurrently scheduled with course C150. Letter grading.

**M273. Responsible Conduct of Research in Global Health** (Same as Epidemiology M273.) Lecture, two hours. Requisite: Community Health Sciences 200. Introduction to fundamental principles of public health ethics, current ethical procedures, guidelines, and requirements, and ethical issues facing public health professionals working in developing countries. History of public health issues, unique ethical issues of research in developing countries, analysis of ethical implications of informed consent, responsibility to study community, mechanisms of study approval, role of funders, and role and responsibilities of review boards. S/U or letter grading.

**299. Strategies for Success for Doctoral Students.** (2) Seminar, two hours. Interactive seminar, with focus on research process, tips for success in academia, and important tools for leadership designed for all doctoral students in School of Public Health. S/U grading.

**375. Teaching Apprentice Practicum.** (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**401. Public Health as Profession.** (4) Lecture, four hours. Limited to Fielding School of Public Health graduate students. Introduction to interprofessional collaboration, team building, leadership, communication, cultural humility, and implicit bias, while supporting professional development and growth of Master of Public Health (MPH) students. Focus on development of strong collaborative skills with opportunities to practice benefiting students entering public health workforce. MPH students participate in systems-based health-care course with dental, medical, and nursing students. Letter grading.

**475. Pedagogy: Essential Skills and Innovative Strategies.** (2) Seminar, two hours. Designed for School of Public Health doctoral students. Interactive seminar with focus on developing teaching materials for courses and acquisition of skills and tools that help students to become successful and innovative instructors. Active learning methodologies and competencies-based approach to instruction. S/U or letter grading.

**490. Public Speaking Mastery for Public Health Professionals.** Lecture, two hours. Lectures with in-class exercises, or in-class presentations followed by coaching feedback. Topics focus on developing range of communication skills necessary for students to become confident and effective public speakers. Master’s and doctoral students in programs housed in School of Public Health who are interested in learning how to prepare and deliver impactful, compelling presentations with confidence and professionalism are encouraged to enroll. S/U or letter grading.

**495. Preparation for Teaching Public Health.** (2) Seminar, two hours. Designed for graduate students. Prepares individuals who will serve as teaching assistants for courses in Fielding School of Public Health. Study of methodologies in teaching public health, including implementing active learning strategies, effectively communicating goals for student learning, developing course materials that are consistent with expectations for student learning, creating inclusive teaching environment, and dealing with difficult situations. S/U or letter grading.

**Adjunct Assistant Professors**

- Siddharth Kara, MBA, GDL
- Joshua Schank, PhD

**Overview**

The Department of Public Policy is an interdisciplinary unit composed of faculty members from various disciplines, some of whom hold joint appointments in other UCLA departments. Its goal is to foster an understanding of the theory and practice of public policy in the many fields in which it applies. Examples include education, health care, unemployment and training, drug policy and crime, economic development, national security, and the environment. The department offers the Master of Public Policy (MPP) degree and participates in the undergraduate minor in Public Affairs.

**Undergraduate Study**

The undergraduate minor in Public Affairs familiarizes students with key issues in public policy. Both programs have a heavy applied orientation. For additional information on the minor, see the Public Affairs minor.

**Graduate Study**

The MPP degree program is designed to train professionals in both public- and private-sector policy analysis and implementation, and offers coursework in such areas as microeconomics, statistics, political processes, and public and nonprofit management.

Concurrent degree programs allow students to combine study for an MPP with work toward a JD in the School of Law, an MBA in the Anderson Graduate School of Management, an MD in the Geffen School of Medicine, an MPH in the Fielding School of Public Health, or an MSW in the Department of Social Welfare.

**Graduate Major**

**Master of Public Policy**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Concurrent Degree Programs**

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

- Master of Public Policy/Doctor of Medicine
- Master of Public Policy/ JD
- Master of Public Policy/Master of Business Administration
- Master of Public Policy/Master of Public Health
10A. Introduction to Public Policy. (5) Lecture, three hours; workshops and outside study, twelve hours. Overview of principal topics of contemporary policy analysis, developing their applications with examples from instructor’s own research, visitors, small student projects, or field trips. P/NP or letter grading.

10B. California Policy Issues. (4) Lecture, three hours; outside study, nine hours. Application of policy analysis to California issues. Guest lectures from practitioners and academics along with readings and videos. Student written reports and oral presentations required. Letter grading.

10C. Public Policy for Crime, Cannabis, and Other Drugs. (5) Lecture, three hours; outside study, twelve hours. Application of policy analysis, including critical analysis, problem solving, and substantive policy research, to develop knowledge and understanding about drug and crime policy, with focus on cannabis. Guest lectures by instructors and guest academics provide personalized instruction in public policy analysis, to California issues. Guest lectures from local policymakers. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students as assigned as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors and departmental honors programs. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. Consult Undergraduate Research Center. May be repeated. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours, per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

105. Leadership in Public Interest. (4) Lecture, three hours. Examination of prevailing models, theories, and practices of leadership in public settings and application of them through case studies, films, and situational articles. Participation in group projects and discussions designed to improve understanding of role of leadership in mobilizing people groups to do difficult work. Introduction to theory and theory on leadership, examination of leadership and group dynamics, and challenge of leadership in times of stress and change. Letter grading.

112. Politics of U.S. Health Policy. (4) Lecture, three hours. Every modern nation faces similar health system challenges, such as promoting health and longevity, providing effective treatments, balancing benefits and burdens of medical technology, and controlling healthcare costs that grow faster than national income. U.S. seems uniquely disadvantaged with lower life expectancy, problematic quality of medical services, lack of millions, and highest costs in world, hampering families, businesses, and government. What political dynamics produced this result and influence possibility and direction of ongoing policy change? Examination of meaning of health and health care system; current status, organization, and financing of U.S. health-care system; and factors that affect national health policies. C213. Health and Medicine in Modern Society: Framing of problems, role of public opinion, influence of interest groups, competition and organization of Congress, and opportunities for and applications of presidential leadership. P/NP or letter grading.

M120. Race, Inequality, and Public Policy. (4) (Same as African American Studies M1520) Lecture, three hours; discussion, one hour. Background in economics, sociology, or urban studies preferred but not required. Survey course to examine major debates and current controversies concerning public policy responses to social problems in urban America. Letter grading.

CM126. Data Analysis for Educational Equity and Improvement. (4) (Same as Public Affairs M171D) Lecture, three hours. Requisite: Public Affairs 60. Exploration of challenge of making data useful for decision-making from cleaning data and deciding which analyses to conduct; to conducting those analyses carefully, thoughtfully, and in reproducible way; to displaying results, interpreting them, and communicating them clearly. Focus on challenge of making survey data useful to educators so that they can use those data to influence the school and district policies and practices and, ultimately, use information to improve students’ school experiences. Concurrently scheduled with course CM226. Letter grading.

M127. Understanding Public Issue Life Cycle. (4) (Same as Political Science M142D) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended preparation: Political Science 10, 40, and one course from courses 15, 11, or 101. Examination of how public issues life cycle is shaped by (1) economic and political incentives of various actors—business, news media, mass public, organized interests, Congress, state and regulatory agencies, and courts and (2) ideology, cognitive biases, and ethical reasoning. P/NP or letter grading.

C135. Crime and Public Policy. (4) Seminar, three hours. Crime is one of most costly social problems faced by societies across world. Examination of crime trends, criminogenic factors that influence them, and policy initiatives that influence them, largely in U.S. context. Criminal justice policy community is increasingly focused on best and evidence-based practice, and often derives inspiration and policy recommendations from existing empirical research. Focus on basic empirical and theoretical research on determinants of crime, offending, and effects of policies and policies interventions meant to address criminal offending. Concurrently scheduled with course C235. Letter grading.

CM171. International Development. (4) (Same as Economics M112A) Lecture, three hours. Requisites: Economics 102 or 111. Why are some countries rich, while other countries are poor? What can policymakers do to reduce the current level of current research on these questions. Study of both methodologies used to answer questions in development economics, like natural experiments and randomized control trials, as well as political economy between developing countries and institutions, education, growth, culture, and gender. Reading intensive, seminar-style course. Students are expected to read academic articles in economics and actively participate in discussions. Students also learn how to use data to evaluate policies. Concurrently scheduled with course C271. P/NP or letter grading.

CM175. Advanced Technology: Public Policy, Regulation, and Law. (4) (Same as Public Affairs M165) Lecture, three hours. Examination of cutting-edge public policy and regulatory implications of advanced technologies such as artificial intelligence, drones, autonomous vehicles, blockchain/bitcoin, etc. Exploration of whether and how these new technologies should be regulated. Exploration of how policymakers should balance need to promote investment and innovation against need to protect against potential misuse and abuse of these new technologies. Exploration of many issues raised by these technologies such as privacy, national security, network neutrality, intellectual property rights, and more. Concurrently scheduled with course C275. Letter grading.

CM177. Network Science Using R. (4) (Same as Public Affairs M171B) Lecture, three hours. Three prior knowledge of R required. Designed for juniors and seniors. This course offers framework for understanding how relationships between people, places, and institutions affect public policy outcomes. For example, why individuals decide to protest or vote, amount of education or police force, or even how they may have been influenced by social networks. Game on influence in social networks, to develop skills in network science and expertise by considering three overlapping themes: social conditions that affect production of scientific knowledge, debates about expertise and democracy in technical and policy decision-making, and current controversies about expertise and autonomy of science (e.g., conflicts of interest in funding of biomedical research and recent charges of politicization of science). Concurrently scheduled with course C283. Letter grading.

C183. Science Policy and Expertise. (4) Lecture, three hours. Introduction to social analysis of science and expertise by considering three overlapping themes: social conditions that affect production of scientific knowledge, debates about expertise and democracy in technical and policy decision-making, and current controversies about expertise and autonomy of science (e.g., conflicts of interest in funding of biomedical research and recent charges of politicization of science). Concurrently scheduled with course CM282. Letter grading.

C185. Science Policy and Expertise. (4) Lecture, three hours. Introduction to social analysis of science and expertise by considering three overlapping themes: social conditions that affect production of scientific knowledge, debates about expertise and democracy in technical and policy decision-making, and current controversies about expertise and autonomy of science (e.g., conflicts of interest in funding of biomedical research and recent charges of politicization of science). Concurrently scheduled with course C283. Letter grading.

187. Research Seminar: Public Policy. (4) Seminar, three hours; outside study, nine hours. Requisite: course 10A or Public Affairs 10. Limited to and required of seniors in Public Affairs minor. Production of research project that examines in depth one particular policy issue in its social context, including political pressures involved and problems of implementation. Emphasis on skills of data acquisition, analysis, conceptualization, and written analysis and presentation. Letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enrolled corequisite: Honors seminar in 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.
201. Principles of Microeconomic Theory 1. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. First course in two-term sequence (see course 204) to prepare students for economic analysis of public policy, with review of economic principles and basic microeconomic theory and policy applications. Consumer theory and demand, producer theory and supply, equilibrium of product and factor markets. Letter grading.

201A. Microeconomic Analysis for Public Health and Policy. (4) (Same as Health Policy M203A.) Lecture, four hours. Requisites: Mathematics 3A or 3B or 113, Economics 11A or 11B. Concepts of microeconomics, with emphasis on their application to actual situations and their use in problem solving and focus on theory of choice. Extensive use of differential calculus. Letter grading.

202. Political Economy of Development. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Designed to provide background necessary to develop strategies for shaping policy through different institutional means: legislatures, bureaucracies, courts, and media. Consideration of models of decision-making and delegation and their application to real-world cases. Letter grading.

203. Statistical Methods of Policy Analysis I. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. First course in two-term sequence (see course 208). Review of statistical principles useful to policy research and analysis. Topics include descriptive statistics, expectation, univariate and multivariate distribution, probability, covariance and correlations, statistical independence, random sampling, estimators, unbiasedness and efficiency, statistical inference, confidence intervals, and hypothesis testing. Letter grading.

204. Principles of Microeconomic Theory II. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 201. Second course in two-term sequence (see course 201) covering both theory and policy applications. Topics include monopoly, factor markets, general equilibrium, welfare economics, externalities, public goods, uncertainty, and intertemporal optimization. Letter grading.

204A. Microeconomic Analysis for Public Health and Policy. (4) (Same as Health Policy M203B.) Lecture, four hours. Requisites: course 201A, and one course from Mathematics 3A, 3B, or 31A. Basic concepts of three hours; discussion, one hour; outside study, eight hours. Requisite: course 201. Second course in two-term sequence (see course 201) covering both theory and policy applications. Letter grading.

205. Qualitative Methods for Policy Analysis. (4) Lecture, three hours; introduction to use of qualitative methods in policy analysis. Students gain exposure to techniques of interviewing, participant observation/ethnography, comparative-case studies, and archival research. Consideration of research design matters including questions and situations for which qualitative methods are ideally suited, and how to use qualitative data when they are best available. Focus maintained on ethnographic qualitative methods and policy research including sampling and inferences, instrument design, directed inductive analysis, data gathering and coding under time pressure, and professional ethics. Letter grading.

206. Political Economy of Policy Adoption and Implementation. (4) Lecture, three hours; outside study, nine hours. Analysis of how policy is formed, adopted, and implemented. How policies are formulated, by whom, how policy agendas are set, how to define relationships between politicians, bureaucrats, lobbyists, and media experts. Letter grading.

209. Management in the 21st Century. (4) Lecture, three hours; outside study, nine hours. Focus on practical management skills to prepare students for work-place, entrepreneurial, and leadership of teams in organizational settings, decision-making strategies in face of challenges, and negotiation as invaluable skill. Examples from public and private sectors, as well as experiential learning through exercises, cases, and simulations. Letter grading.

210. Methods of Policy Analysis. (4) Lecture, three hours; discussion, one hour; outside study, nine hours. Preparatory course that precedes three-term sequence 298A, 298B, 298C sequence in which students prepare major public policy projects and papers that are case studies of policy evaluation and implementation and are equivalent to professional master’s theses. Papers build on prior core courses, internship experience, and policy-related work. Letter grading.

212. Child Welfare Policy. (4) (Same as Social Welfare M290J.) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in policy. Child welfare policy as conduit of development of infrastructure to support needs of children and families. S/U or letter grading.

213. Mental Health Policy. (4) (Same as Social Welfare M290K.) Lecture, three hours. Examination of evolution of social policies for mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of mentally ill and services they are provided. S/U or letter grading.

215. Health Policy. (4) (Same as Social Welfare M290M.) Lecture, three hours. Introduction to contemporary issues in healthcare financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

216. Public Policy for Children and Youth. (4) (Same as Social Welfare M290N.) Lecture, three hours. Policy issues that affect children and youth and their families in relation to their interaction with schools and communities, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

217. Graduate Seminar in Environmental Economics and Policy. (4) (Same as Health Sciences M217.) Seminar, four hours. Preparation: under-graduate-level statistics, basic undergraduate microeconomics. Introduction to applied scholarship in environmental economics. Engages students to become more proficient consumers and producers of social science research that explores questions of environmental policy and sustainability broadly constructed. Topics include health and economic impacts of climate change, adaptation to climate change, efficient and equitable design of environmental policies (e.g., cap and trade, carbon taxes). Development of detailed student research proposal and short presentation. Letter grading.

218. Research Design and Methods for Social Policy. (4) (Same as Urban Planning M204.) Lecture, three hours; outside study, nine hours. Limit to graduate students. How to become more sophisticated consumers and producers of qualitative and quantitative policy research. In first half of course, formal principles of research design; in second half, various data collection methods, including ethnography, interviewing, and survey design. Letter grading.

220. Transportation, Land Use, and Urban Form. (4) (Same as Urban Planning M250.) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in strong central cities and polycentric city, neotraditional town and urban form, transit finance; current issues in highway finance; private and public child welfare system. Examination of development of public child welfare system. Examination of development of Social Welfare M290L and Urban Planning M246E.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward poor in U.S. S/U or letter grading.

221. Travel Behavior Analysis. (4) (Same as Civil Engineering M287 and Urban Planning M283.) Lecture, three hours. Requisites: courses 201 or 201A, and 203, or Urban Planning 207 and 220B. Descriptions of travel patterns in metropolitan areas, recent trends and projections into future, overview of travel forecasting methods, trip distribution, mode split traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis. Letter grading.

222. Transportation, Land Use, and Urban Form. (4) (Same as Urban Planning M250.) Lecture, three hours. Overview of transportation finance and economics; concepts of efficiency and equity in transportation finance; historical evolution of highway and transit finance; current issues in highway finance; pri-
vate participation in road finance, toll roads, road costs and cost allocation, truck charges, congestion pricing; current issues in transit finance; transit fare and subsides and the privatization and privatization of transit services. Letter grading.

M223. Transportation and Climate Change. (4) (Same as Urban Planning M258.) Lecture, three hours. How to reduce greenhouse gas emissions from transportation. Topics to include greenhouse economy, promote electric vehicles, and reduce vehicle travel. History and legal frameworks of environmental regulation. Analytical methods to quantify carbon emissions and estimating emissions reductions. Focus on climate change, but consideration of other environmental consequences of transportation, from air pollution to stormwater runoff. Letter grading.

224A. Introduction to Geographic Information Systems. (4) Lecture, three hours. Preparation: one graduate-level statistics course, familiarity with one packaged statistics program. Principles of Geographic Information Systems (GIS) and applied techniques of using spatial data for mapping and analysis. Topics include data quality, data manipulation, spatial analysis, and information systems. Use of mapping and spatial analysis to address planning problem. Letter grading.

225. Education Policy and Education Inequality. (4) Seminar, three hours; outside study, nine hours. Preparation: statistics background through multiple regression analysis. Limited to graduate students. Examination of the role of education in reducing socioeconomic and ethnic disparities in educational success. Topics include international and national comparisons of educational outcomes, private and public school choice, school accountability and school interventions to improve school or teacher quality, parenting and pre-school interventions, and supplemental educational services. Letter grading.

226. Data Analysis for Educational Equity and Improvement. (4) Lecture, three hours; outside study, nine hours. Preparation: College 160. Exploration of challenge of making data useful for decision-making from cleaning data and deciding which analyses to conduct; to conducting those analyses carefully, thoughtfully, and in reproducible way; to displaying results, interpreting them, and communicating them clearly. Focus on challenge of making survey data useful to educators so that they can use this data to make decisions on school and district policies and practices and, ultimately, use information to improve students’ school experiences. Concurrently scheduled with course CM126. Letter grading.

227. Power, Politics, and Vulnerability: Introduction to Social Welfare and Public Policy (Same as Social Welfare M290S and Urban Planning M287.) Lecture, three hours; outside study, nine hours. Use of political economy perspective to analyze forces that have shaped rise and characteristics of nonprofit sector and its constituent elements. Examination of social history of nonprofit sector in U.S. Exploration of legal and policy environments and distinct organizational forms. Comparative perspective between U.S. and other countries. S/U or letter grading.

M229. Law and Management of Nonprofit Organizations. (4) (Same as Management M225.) Lecture, three hours. Introduction to important legal, financial, and management issues confronting nonprofits. Topics include start-up and tax-exempt organizations, qualifying and maintaining tax-exempt status under IRC Code Section 501(c)(3), corporate governance, activity limitations, internal control, restrictions, and strategic planning, fundraising, nonprofit accounting, and employment law. S/U or letter grading.

M230. Immigration Policy and Activism. (4) (Same as Chicana/o and Central American Studies M278.) Seminar, three hours. Highlighting roles of race, gender, sexuality, and citizenship status, exploration of how immigrant rights activists organize for legalization and against detention, deportation, and border militarization. Letter grading.

M231. Politics of Hood. (4) (Same as Chicana/o and Central American Studies M206.) Seminar, three hours. Limited to graduate students. Study of research on shifting political identities and experiences of people within hood. Preface and examination of critical problems impacting people who live in hood including poverty, incarceration, gentrification, welfare, public education, health disparities, and segregation, among other political issues. S/U or letter grading.

M232. Chicana/o and Intersectional Marxism. (4) (Same as Chicana/o and Central American Studies M257.) Seminar, three hours. Examination of relationship between Chicana/o intellectual identity, creativity, and early Chicana/o Marxist influenced intellectual thought. Focus on key debates and texts on connections between race, gender, sexuality, and capitalism. Review of key articles and books examining Chicana/o identity, labor, family, sexuality, and activism through Marxist theoretical framework. S/U or letter grading.

233. Immigration Policy and Politics. (4) Seminar, three hours. Introduction to policies of immigration. Examination of development and dynamics of immigration policymaking in historical and contemporary perspective. Focus on issues including creation of illegal immigration, border militarization, detention, deportation, public affairs, political behavior, and assimilation. Letter grading.

234B. Voting Rights Policy and Law II. (4) (Formerly numbered M296B.) Clinic, three hours. Requisite course 234A. Collaborative course taught from perspective of social science research, civic rights, and voting rights. Exposes students to voting rights act theory, case law, history, research, and implementation. Faculty guest experts will provide their perspective on how to study, research, and document various aspects related to voting rights. Includes factors such as history of discrimination against minority group in areas of employment, education, housing, and political representation. Focus on practical aspects of voting rights laws. Students learn in greater detail legal theory relevant to bringing successful voting rights challenges, and how to assemble and present social science evidence. Students read case law on prior Voting Rights Acts decisions, review accompanying expert reports, and work in teams on aspects of lawsuit. S/U or letter grading.

234C. Voting Rights Policy and Law III. (Formerly numbered M296C.) Clinic, three hours. Requisites: courses 234A, 234B. Collaborative course taught from perspective of social science research, civic rights, and voting rights. Exposes students to voting rights act theory, case law, history, research, and implementation. Faculty guest experts will provide their perspective on how to study, research, and document various aspects related to voting rights. Includes factors such as history of discrimination against minority group in areas of employment, education, housing, and political representation. Students continue work on all aspects of voting rights cases including preparation of expert research reports, legal argumentation and filings, depositions, and other case-related matters. S/U or letter grading.

C235. Crime and Public Policy. (4) Seminar, three hours. Crime is one of most costly social problems faced by societies across world. Examination of crime trends, criminogenic factors that lead to crime, and policy initiatives that influence, largely in U.S. context. Criminal justice policy community is increasingly focused on best and evidence-based practice, and criminal justice implications in development from existing empirical research. Focus on basic empirical and theoretical research on determinants of criminal offending and effectiveness, and effects of policy interventions meant to deter or reduce criminal offending. Concurrently scheduled with course C135. Letter grading.

236. Criminal Justice Policy on Trial. (4) Seminar, three hours. Survey of several criminal justice policy areas including labor market effects of incarceration, bias in policing and sentencing, cash bail, and drug policy. Introduction to recent research. Students engage in discussions about critical issues. Includes factors such as history of discrimination against minority group in areas of employment, education, housing, and political representation. Focus on practical aspects of voting rights laws. Students learn in greater detail legal theory relevant to bringing successful voting rights challenges, and how to assemble and present social science evidence. Students read case law on prior Voting Rights Acts decisions, review accompanying expert reports, and work in teams on aspects of lawsuit. S/U or letter grading.

237. Urban Planning M231.) Lecture, three hours; outside study, nine hours. Preparation: principles of social welfare and urban planning. Examination of key debates and texts on connections between race, gender, sexuality, and capitalism. Review of key articles and books examining Chicana/o identity, labor, family, sexuality, and activism through Marxist theoretical framework. S/U or letter grading.

238. Changeways: Algorithms and Transport. (4) (Formerly numbered M238A.) Seminar, three hours. Examination of role of technology in contemporary urban transport systems. Topics include how to start nonprofit tax-exempt organizations. Letter grading.

239. Law and Management of Nonprofit Organizations. (4) (Same as Chicana/o and Central American Studies M278.) Seminar, three hours. Examination of relation between Marxist, intersectionality, and early-Chicana/o influenced intellectual thought. Focus on key debates and texts on connections between race, gender, sexuality, and capitalism. Review of key articles and books examining Chicana/o identity, labor, family, sexuality, and activism through Marxist theoretical framework. S/U or letter grading.

240. Theories of Regional Economic Development I. (4) (Same as Geography M230A and Urban Planning M236A.) Lecture, three hours; discussion, one hour. Introduction to theories of location of economic activity, trade, and other forms of contact between regions, process of regional growth and decline, reasons for different levels of economic development, relations between more and less developed regions. Letter grading.

241. Introduction to Regional Planning. (4) (Same as Urban Planning M236L.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory, practice, and planning and the ways in which these roles affect relations between regional planning and development within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space. Letter grading.

242. Community Development and Housing Policies: Roles of State, Civil Society, and Nonprofits. (4) (Same as Social Welfare M280U and Urban Planning M275J.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of role of U.S. housing policy and role of government agencies and community organizations in problem of housing or economic development? Should interventions be directed toward inner city housing markets or through neighborhood strategies? What lessons can be learned from experiences of other countries? Letter grading.

243B. Housing Policy and Planning. (4) (Same as Urban Planning M296.) Lecture, three hours. Study of housing policy and planning focused partly on California and partly on the consideration of experiences from other states and countries and to what extent they are relevant here. Specific topics likely include policies such as social housing, rent control, and housing finance, issues of household formation, housing supply, housing submarkets, and gentrification, as well as planning processes related to housing production and Affirmatively Furthering Fair Housing. Letter grading.
M244. Shared Mobility Policy and Planning. (4) (Same as Urban Planning M255.) Lecture, three hours. Introduction to planning, analysis, and management of shared mobility, with particular focus on public transit. Overview of shared mobility policy and planning context; introduction to transportation planning and project evaluation processes; high-speed rail and airports and aviation; public transit policy and planning; bicycle- and scooter-share; implications of vehicle automation; shared mobility in the years ahead. Letter grading.

M247B. Comparative Perspective on States, Markets, and Civil Society. (4) (Same as Social Welfare M240X and Urban Planning M210B.) Lecture, two and one half hours. Focus is on understanding how aging societal problems, such as climate change, poverty, migration, security, mobility, pollution, or trade relations. Contemporary governance is complex set of laws, rules, and regulations involving rights and responsibilities of three institutional complexes of modern societies (state, market, and civil society), interests that guide them, and legitimacy and resources they command. Actors often reach across institutional, jurisdictional, and national boundaries; their relationships can be cooperative, neutral, or fraught with conflict, and governance outcomes can vary significantly. These dynamics involve fundamental challenges that, consequently, require significant governance readiness. Lectures, debates, in-class exercises, and student presentations. Exploration of several issues in more depth. Topics include state capacities, democracy, crisis management, governance innovation, and specific policy fields such as infrastructure or global finance. S/U or letter grading.

CM250. Economic Principles and Economic Development. (4) Lecture, three hours. Requisites: courses 204 and 208, or Urban Planning 207 and 220B. Survey of ways economics is used to define, analyze, and resolve problems of allocation. Overview of analytical questions addressed by environmental economists that bear on public policies. Concurrently scheduled with course C115. Letter grading.

251. Public Budgeting and Finance. (4) Lecture, three hours; outside study, nine hours. Limited to graduate students. How financial resources are allocated through budget processes at federal, state, and local level of governments in the U.S. and how each level of government finances its operations and capital investment programs, with particular attention to California. Students are organized into small groups to facilitate review of assigned readings and to report key insights. Students strengthen critical analysis of empirical data to evaluate policies. Concurrently scheduled with course C115. Letter grading.

C171. International Development. (4) (Same as Urban Planning M262B and Policy and Management M267.) Lecture, two hours. Focus is on understanding how development and institutional structures in each of these sectors advance or constrain progress; how Los Angeles addresses issues such as transportation, real estate development, affordable housing, homelessness, poverty, and health care, among others; and how it can better do so. Letter grading.

M253. Lesbian, Gay, Bisexual, and Transgender Law and Public Policy Research. (4) (Same as Law M2675.) Lecture, three hours. In-depth examination of the social science research that has informed various areas of LGBT law. Themes include doctrinal and other reasons why research has become more central to LGBT legal advancements in past decade, different types of public policy research, limitations of current data and research, and research gaps in transnational social science research into evidence in courtroom, imp- pact that dominant LGBT rights frame of equality has on social science research, challenges in conducting objective research, and effective presentation of social science research findings to non-academic juries, media, and other audiences. S/U or letter grading.

M256. Politics of Health Policy. (4) (Same as Community Health Sciences M257 and Health Policy and Management M258.) Lecture, three hours; discussion, one hour. Examination of politics of health policy process through analysis of case studies such as environmental protection, pandemic preparedness and response, preventive health services for women, and racial and economic inequality and health. Examination of framework for how policy making and effects of political structure and current political divisions, including efforts such as to repeal and dismantle Affordable Care Act. Letter grading.

M265. Pharmaceutical Policy. (4) (Same as Policy M259.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and managerial skills learned earlier to be used to analyze problems with existing Medicare program and to develop specific policy strategies of short-term plan to accommodate coming pressures generated by retire- ment of baby-boom generation. Letter grading.

M268. Microeconomic Theory of Health Sector. (4) (Same as Health Economics, hours, discussion, two hours. Preparation: intermediate microeconomics. Microeconomic aspects of health-care system, including health manpower substitution, choice of efficient modes of treatment, market eficiency, and competition. Letter grading.

M269. Healthcare Policy and Finance. (4) (Same as Health Policy M269.) Seminar, three hours; outside study, nine hours. Exploration of demand for health in- surance, policies for public insurance (Medicaid and Medicare), uninsured, and health insurance reform. Examination of effects of managed care on health and costs, consumer protection movement, and rise of competitive health care grading.

M270. Economic Principles and Economic Development in Indigenous Communities. (4) (Same as American Indian Studies M269.) Seminar, two hours; discussion, one hour. Limited to graduate students. Familiarization with fundamental concepts, themes, and principles of economic development. Focus on in- digenous communities broadly and contrasted with other regions, countries, and communities. Introdu- cion to important concepts such as opportunity cost, economic trade-offs, adverse selection, moral hazard, and discount rates through use of existing research and case studies. These basic concepts are important for graduate students who will be analyzing and evalu- ating research conducted on and for indigenous peo- ple and governments. S/U or letter grading.

C171. International Development. (4) Lecture, three hours; outside study, nine hours. Focus is on understanding how development and institutional structures in each of these sectors advance or constrain progress; how Los Angeles addresses issues such as transportation, real estate development, affordable housing, homelessness, poverty, and health care, among others; and how it can better do so. Letter grading.

M256. Politics of Health Policy. (4) (Same as Community Health Sciences M257 and Health Policy and Management M258.) Lecture, three hours; discussion, one hour. Examination of politics of health policy process through analysis of case studies such as environmental protection, pandemic preparedness and response, preventive health services for women, and racial and economic inequality and health. Examination of framework for how policy making and effects of political structure and current political divisions, including efforts such as to repeal and dismantle Affordable Care Act. Letter grading.

M265. Pharmaceutical Policy. (4) (Same as Policy M259.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and managerial skills learned earlier to be used to analyze problems with existing Medicare program and to develop specific policy strategies of short-term plan to accommodate coming pressures generated by retire- ment of baby-boom generation. Letter grading.

M268. Microeconomic Theory of Health Sector. (4) (Same as Health Economics, hours, discussion, two hours. Preparation: intermediate microeconomics. Microeconomic aspects of health-care system, including health manpower substitution, choice of efficient modes of treatment, market eficiency, and competition. Letter grading.

M269. Healthcare Policy and Finance. (4) (Same as Health Policy M269.) Seminar, three hours; outside study, nine hours. Exploration of demand for health in- surance, policies for public insurance (Medicaid and Medicare), uninsured, and health insurance reform. Examination of effects of managed care on health and costs, consumer protection movement, and rise of competitive health care grading.

M270. Economic Principles and Economic Development in Indigenous Communities. (4) (Same as American Indian Studies M269.) Seminar, two hours; discussion, one hour. Limited to graduate students. Familiarization with fundamental concepts, themes, and principles of economic development. Focus on in- digenous communities broadly and contrasted with other regions, countries, and communities. Introdu- cion to important concepts such as opportunity cost, economic trade-offs, adverse selection, moral hazard, and discount rates through use of existing research and case studies. These basic concepts are important for graduate students who will be analyzing and evalu- ating research conducted on and for indigenous peo- ple and governments. S/U or letter grading.

C171. International Development. (4) Lecture, three hours; outside study, nine hours. Focus is on understanding how development and institutional structures in each of these sectors advance or constrain progress; how Los Angeles addresses issues such as transportation, real estate development, affordable housing, homelessness, poverty, and health care, among others; and how it can better do so. Letter grading.

M253. Lesbian, Gay, Bisexual, and Transgender Law and Public Policy Research. (4) (Same as Law M2675.) Lecture, three hours. In-depth examination of the social science research that has informed various areas of LGBT law. Themes include doctrinal and other reaons why research has become more central to LGBT legal advancements in past decade, different types of public policy research, limitations of current data and research, and research gaps in transnational social science research into evidence in courtroom, imp- impact that dominant LGBT rights frame of equality has on social science research, challenges in conducting objective research, and effective presentation of social science research findings to non-academic juries, media, and other audiences. S/U or letter grading.

M256. Politics of Health Policy. (4) (Same as Community Health Sciences M257 and Health Policy and Management M258.) Lecture, three hours; discussion, one hour. Examination of politics of health policy process through analysis of case studies such as environmental protection, pandemic preparedness and response, preventive health services for women, and racial and economic inequality and health. Examination of framework for how policy making and effects of political structure and current political divisions, including efforts such as to repeal and dismantle Affordable Care Act. Letter grading.

M265. Pharmaceutical Policy. (4) (Same as Policy M259.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and managerial skills learned earlier to be used to analyze problems with existing Medicare program and to develop specific policy strategies of short-term plan to accommodate coming pressures generated by retire- ment of baby-boom generation. Letter grading.

M268. Microeconomic Theory of Health Sector. (4) (Same as Health Economics, hours, discussion, two hours. Preparation: intermediate microeconomics. Microeconomic aspects of health-care system, including health manpower substitution, choice of efficient modes of treatment, market eficiency, and competition. Letter grading.

M269. Healthcare Policy and Finance. (4) (Same as Health Policy M269.) Seminar, three hours; outside study, nine hours. Exploration of demand for health in- surance, policies for public insurance (Medicaid and Medicare), uninsured, and health insurance reform. Examination of effects of managed care on health and costs, consumer protection movement, and rise of competitive health care grading.

M270. Economic Principles and Economic Development in Indigenous Communities. (4) (Same as American Indian Studies M269.) Seminar, two hours; discussion, one hour. Limited to graduate students. Familiarization with fundamental concepts, themes, and principles of economic development. Focus on in- digenous communities broadly and contrasted with other regions, countries, and communities. Introdu- cion to important concepts such as opportunity cost, economic trade-offs, adverse selection, moral hazard, and discount rates through use of existing research and case studies. These basic concepts are important for graduate students who will be analyzing and evalu- ating research conducted on and for indigenous peo- ple and governments. S/U or letter grading.

C171. International Development. (4) Lecture, three hours; outside study, nine hours. Focus is on understanding how development and institutional structures in each of these sectors advance or constrain progress; how Los Angeles addresses issues such as transportation, real estate development, affordable housing, homelessness, poverty, and health care, among others; and how it can better do so. Letter grading.

M253. Lesbian, Gay, Bisexual, and Transgender Law and Public Policy Research. (4) (Same as Law M2675.) Lecture, three hours. In-depth examination of the social science research that has informed various areas of LGBT law. Themes include doctrinal and other reaons why research has become more central to LGBT legal advancements in past decade, different types of public policy research, limitations of current data and research, and research gaps in transnational social science research into evidence in courtroom, imp- impact that dominant LGBT rights frame of equality has on social science research, challenges in conducting objective research, and effective presentation of social science research findings to non-academic juries, media, and other audiences. S/U or letter grading.
M280A. Research and Development Policy. (4) (Same as Management-PhD M251.) Lecture, three hours. Examination of research and development process and as element of goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of and forecasting technology; organizational and behavioral considerations. Concurrently scheduled with course CM179. Letter grading.

M280B. Growth, Science, and Technology. (4) (Same as Management M292B.) Lecture, three hours. Examination of research and development process and as element of goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of and forecasting technological futures. S/U or letter grading.

M291C. Special Topics in Public Affairs. (4) (Same as Social Welfare M203X and Urban Planning M210A.) Seminar, three hours; outside study, nine hours. Advancement of seminar on emerging issues across public policy, social welfare, and urban planning. May be repeated for credit. Credit/No Credit grading. Concurrently scheduled with course CM191B. S/U or letter grading.

C279. Social Movements in Theory and Practice. (4) Lecture, three hours. Social movement is group of people pressuring for political or social change over long periods of time. Study focuses on how mass movements form, when and where they are likely to form, what types of tactics they choose, how those tactics affect their success, and role new technologies play. Weekly focus on one specific topic, such as non-violence or social media, with historic and more recent movements used in discussion. Concurrently scheduled with course CM177. Letter grading.

M297A. Public Policy Special Topics. (2) Lecture, three hours. Study of emerging issues in public policy. May be repeated for credit. S/U grading.

C291G. Special Topics in Global Studies and Public Policy. (4) Seminar, three hours. Examination of one or more topics related to public policy and global studies. May be repeated for credit with topic change. Concurrently scheduled with course CM191B. S/U or letter grading.

M297P. Public Policy Seminar Series. (2) (Formerly numbered 297C.) Seminar, two hours. Preparation: membership in MPP core curriculum, two policy cluster courses, and internship (unless waived). Requisite: course 298B. Fourth course in four-course sequence in which students prepare major public policy projects and papers that are case studies of policy evaluation and implementation and are equivalent to professional master's theses. Papers build on prior core courses, internship experience, and policy cluster courses. Conclusion of written report started in course 298B. Letter grading.

M298D. Applied Policy Project IV. (2) (Formerly numbered 298C) Seminar, two hours. Preparation: completion of MPP core curriculum, two policy cluster courses, and internship (unless waived). Requisite: course 298B. Fourth course in four-course sequence in which students complete research and report writing for their year-long projects, conduct oral presentations of their applied policy projects, and give written feedback on other student presentations. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

496. Public Policy Internships. (4) Fieldwork, four hours. Public policy internships for Master of Public Policy (MPP) and MPP/dual degree students. May not be repeated for credit. S/U grading.

596. Directed Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual programming for selected students to permit pursuit of a subject in greater depth. S/U or letter grading.

maps). Students become proficient in programming concepts through weekly problem sets, completed in groups. S/U or letter grading.

C277. Network Science Using R. (4) Lecture, three hours. Preparation: course 210. Design for graduate students. Network analysis offers framework for understanding how relationships between people, places, and institutions affect public policy outcomes. For example, when people decide to protest or vote, amount of education they pursue, or effect of human interference in ecosystem can all be considered using network analysis. Weekly introduction of concept from network analysis, followed by working through it using popular statistical programming language R. Concurrently scheduled with course CM177. Letter grading.

C279. Social Movements in Theory and Practice. (4) Lecture, three hours. Social movement is group of people pressuring for political or social change over long periods of time. Study focuses on how mass movements form, when and where they are likely to form, what types of tactics they choose, how those tactics affect their success, and role new technologies play. Weekly focus on one specific topic, such as non-violence or social media, with historic and more recent movements used in discussion. Concurrently scheduled with course CM177. Letter grading.

M280A. Research and Development Policy. (4) (Same as Management-PhD M251.) Lecture, three hours. Examination of research and development process and as element of goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of and forecasting technology; organizational and behavioral considerations. Concurrently scheduled with course CM179. Letter grading.

M280B. Growth, Science, and Technology. (4) (Same as Management M292B.) Lecture, three hours. Examination of research and development process and as element of goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of and forecasting technological futures. S/U or letter grading.

M291C. Special Topics in Public Affairs. (4) (Same as Social Welfare M203X and Urban Planning M210A.) Seminar, three hours; outside study, nine hours. Advancement of seminar on emerging issues across public policy, social welfare, and urban planning. May be repeated for credit. S/U or letter grading.

C291B. Variable Topics Seminar: Public Policy. (4) Seminar, three hours. Examination of emerging issues in public policy. May be repeated for credit. Credit/No Credit grading. Concurrently scheduled with course CM191B. S/U or letter grading.

C291G. Special Topics in Global Studies and Public Policy. (4) Seminar, three hours. Examination of one or more topics related to public policy and global studies. May be repeated for credit with topic change. Concurrently scheduled with course CM191G. Letter grading.

C291A. Public Policy Special Topics. (2) Lecture, three hours. Study of emerging issues in public policy. May be repeated for credit. S/U grading.

C297B. Public Policy Analysis Lectures. (2) Lecture, two hours. Limited to second-year MPP students. Venue for policymakers, practitioners, and academics to present, discuss, and analyze current policy questions. Attending, formally analyzing, and engaging with policy professionals at these lectures adds to pedagogical and intellectual maturity of students as they gain greater understanding of broad range of policy-related topics. S/U grading.

M297C. Current Issues in Public Affairs. (2) (Same as Social Welfare M297B and Urban Planning M297B,) Lecture, one to two hours. Introduction to wide range of current issues in public affairs. Luskin school faculty present material from their research and teaching. Assigned readings are distributed in advance of each meeting. S/U grading.

C297D. Public Policy Student-Initiated Special Topics. (2) Seminar, three hours. Student-initiated and -facilitated special topics on emerging issues in public policy. May be repeated for credit. S/U grading.

M297F. Career Planning and Management. (2) (Same as Social Welfare M297F and Urban Planning M297F,) Tutorial, six hours. Designed to meet professional development needs of first-year Public Policy, Social Welfare, and Urban Planning students. Development of career management skills while balancing busy life of graduate student. More than just deciding on chosen career path, career planning and management involves taking concrete steps to become career ready. Students gain fundamental career management skills to be competitive on job market, including creating competitive résumé and practicing interviewing articulately. Offers opportunity to learn professional development skills that assist with career planning strategies. S/U grading.

297P. Public Policy Seminar Series. (2) (Formerly numbered 297C.) Seminar, two hours; discussion, one hour. Weekly social science research lectures covering range of policy-relevant topics and discussion of research findings with professor. Examination of quality and relevance of research findings and connections between research, public policy curriculum, and real-world policy problems. S/U grading.

298A. Applied Policy Project I. (2) Seminar, 90 minutes; outside study, four and one half hours. Requisite: course 210. Limited to MPP students. First course of year-long sequence designed to ensure that students and their teams are fully prepared to launch their projects at start of Winter Quarter. Students form teams that are assigned to seminars and instructors, identify clients, select and refine policy questions motivating their projects, develop and refine basic work plans, learn about various methods of data collection, and complete and submit all necessary forms required for human subjects research. S/U grading.

298B. Applied Policy Project II. (4) Seminar, three hours; outside study, nine hours. Preparation: completion of MPP core curriculum, two policy cluster courses, and internship (unless waived). Requisite: course 298B. Second course in four-course sequence in which students prepare major public policy projects and papers that are case studies of policy evaluation and implementation and are equivalent to professional master’s theses. Papers build on prior core courses, internship experience, and policy cluster courses. In Progress grading (credit to be given only on completion of course 298C).
Radiology is a four-year program for residents who are medical, dental, basic science (biology and physics), nursing, and radiation therapy students, and community and postgraduate physicians; there also is a four-year program for residents who are qualifying for certification in radiation oncology by the American Board of Radiology.

For more details on the Department of Radiation Oncology and courses offered, see the department website.

Radiation Oncology faculty information is available from the department.

Radiation Oncology

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Course

199. Directed Research in Radiation Oncology. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Overview

The Department of Radiology is committed to offering its trainees high-level instruction, unique experience, and comprehensive evaluation necessary to succeed in all systems practicing diagnostic radiology, combining outstanding patient care and excellence in clinical imaging, research, and educational programs with state-of-the-art technology.

The Diagnostic Radiology program currently has 48 resident positions and is conducted at five major teaching hospitals within and associated with the Geffen School of Medicine. Rotating through all five facilities, the resident gains a broad exposure to all types of disorders, both the commonplace and unusual. The 48-month program leads to eligibility for examination and certification by the American Board of Radiology.

The Interventional Radiology Integrated residency program offers quality medical educational experience in image-based diagnosis, image-guided procedures, and peri- and post-procedural patient care. The five-year residency curriculum concentrates on diagnostic radiology during the first three years and interventional radiology during the last two years, leading to dual certification in interventional and diagnostic radiology.

The programs aim to guide residents in attaining mastery of the clinical skills needed to become highly accomplished radiologists. Residents are provided with outstanding and comprehensive education and educational experiences with the purpose of developing advocates for the practice of radiology, who will serve as critical interdisciplinary team members by providing ethical, professional, and valuable medical expertise to patients and colleagues.

For more details on the Department of Radiological Sciences, see the department website.
Undergraduate Major

Study of Religion BA

Capstone Major
The Study of Religion major is a designated capstone major. Students must complete an advanced seminar that provides unique opportunity to work closely with a faculty member on a focused topic of research. Through their capstone work students are expected to demonstrate their ability to plan and carry out a major project, apply subject matter and research methods knowledge to produce a paper or other research project, and organize information into a coherent and persuasive form for oral presentation to their peers.

Learning Outcomes
The Study of Religion major has the following learning outcomes:

• Demonstrated ability to plan a major project that concludes with writing a cogent and convincing document
• Application of knowledge of a wide-ranging bibliography and of methods of research to thoroughly prepare for seriously engaging an interviewee or for writing the prospectus describing the major project
• Development of skills essential to taking oral histories or doing field research in Los Angeles’ multicultural population
• Ability to organize research data into a coherent and persuasive form for oral presentation to peers
• Demonstrated empathy as a critic of a wide array of religious traditions, institutions, and practices

Entry to the Major

Transfer Students
Transfer applicants to the Study of Religion major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one history of religions course, one philosophy of religion course, and two courses from sociocultural anthropology, Buddhism, history of Western civilization, Asian civilizations, civilizations of Africa, and history of China.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Study of Religion M4 or 11, and two courses from Ancient Near East 10W, Anthropology 3, Asian M60, History 1A, 1B, 1C, 9A, 9C, 9D, 9E, M10A, 10B, 11A, 11B, Philosophy 2, 21, Study of Religion M10, M50, M60A through M60E, M60W, M61, M61W.

The Major

Student are encouraged to select courses that focus on a specific religious tradition or traditions, or on a set of thematic issues important to the study of religion.

Honors Program
Students admitted to honors should take three Study of Religion 198 courses under the guidance of the sponsoring professor. The first 198 course should be taken in spring quarter of the junior year, the second during the following fall quarter, and the third during winter quarter of the senior year. The three courses count as part of the regular requirement of 12 upper-division courses. The program culminates in an honors thesis.

Policies

The Major
During their senior year students must complete the capstone seminar, Study of Religion 191.

A course may be taken twice, on different topics, for credit toward the major where repetition is allowed by the department offering the course. A maximum of two upper-division courses in an ancient language relevant to the course of study may be applied toward the major requirements with consent of the adviser.

A maximum of 12 units of special studies courses (197, 198, 199) approved by the adviser may be applied toward the major. Each course for preparation for the major and the major must be taken for a letter grade.

Honors Program
The honors program provides exceptional students with an opportunity to do independent research under the tutorial guidance of a faculty member.

To qualify for admission students should have a minimum grade-point average of 3.4. The 198 courses designed for the program and the thesis topic should be approved by the committee in charge of the major.

For more information, contact the student affairs officer or the faculty adviser at the program address.

Undergraduate Minor

Study of Religion Minor

Admission
To enter the Study of Religion minor, students must have an overall grade-point average of 2.0 or better.

The Minor

Required Lower-Division Courses (4 to 10 units): Study of Religion M4 or 11, or M50 and M60A or M60W.

Student are encouraged to select courses that focus on a specific religious tradition or traditions, or on a set of thematic issues important to the study of religion.

Policies

A course may be taken twice, on different topics, for credit toward the minor where repetition is allowed by the department offering the course. A maximum of 4 units of special studies courses (197, 198, 199) approved by the adviser may be applied toward the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Study of Religion

Lower-Division Courses

M4. Introduction to History of Religions. (5) (Same as History M4.) Lecture, three hours; discussion, two hours. Comparative study of eight major religious traditions, with emphasis on their beginnings and subsequent decisive changes in their respective historical developments and interactions. Equips students with intellectual tools necessary for thinking analytically, empathetically, and comparatively about fascinating human phenomena identified as religious, such as sa-
cred acts, places, words, and persons in their varied historical contexts. Development of student skills in critical thinking, analyzing documents, and making persuasive arguments based on historical evidence. P/NP or letter grading.

M10. Introduction to Judaism. (5) Same as Jewish Studies M101. Lecture, three hours; discussion, one hour. Judaism’s basic beliefs, institutions, and practices. Development of biblical and rabbinic Judaism; concepts of god, sin, repentance, prayer, and the messiah; history of Talmud and synagogues; evolution of folk beliefs and year-cycle and life-cycle practices. P/NP or letter grading.

11. Religion in Los Angeles. (5) Lecture, four hours. Introduction to varieties of religious experience in Los Angeles and its environs. Presentations, required readings, and (where possible) site visits to examine selected faith and spiritual practices throughout Southern California and provide deeper understanding of myriad ways that sacred is made manifest and encountered. Foundational academic orientations within study of religion (anthropological, historical, psychological, sociological, etc.) used as framework to examine and interpret almost unparalleled religious diversity of City of Angels. Recognizing that spiritual traditions of region’s ever-changing demographics, emphasis on role of ethnicity, gender, nationality, and race in shaping of religious landscape. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP or letter grading.

M20. Introduction to Islam. (5) Same as Islamic Studies M202. Lecture, three hours; discussion, one hour. Genesis of Islam, its doctrines, and practices, with readings from Qur’an and Hadith; schools of law and thought; beliefs in God; reform and modernism. P/NP or letter grading.

M40. Christians East and West. (5) (Same as Slavic M40.) Lecture, three hours; discussion, one hour. Survey of three major historical branches of Christianity—Eastern Orthodox, Roman Catholic, and Protestantism, contrasting how history, dogma, culture, and community structures develop in those three traditions. P/NP or letter grading.

M50. Origins of Judaism, Christianity, and Islam. (5) Same as Islamic Studies CM50B and Middle Eastern Studies M50B.) Lecture, three hours; discussion, one hour. Examination of three major monotheisms of Western religion: Christianity (A.D. 1 to present), Islam (622 to present), and Judaism (586 B.C. to present). Focus on religious doctrines, practices, and historical development and persecution of Bahá’í communities in West. Exposure to different Muslim communities in West. Analysis of how study of religion to situate them within their own historical, philosophical, and social contexts. Critical consideration of changes in meanings of term religion and its relationship to such categories as science and magic, as well as to other domains of social experience. Examination of how study of religion has been understood and has developed, especially biblical studies, anthropology, sociology, psychology, and evolutionary biology. P/NP or letter grading.

M105A. Bahá’í Faith in Iran: Historical and Sociological Survey. (4) (Same as Iranian M105A.) Lecture, three hours. A historical survey of Bahá’í communities in 19th century Iran. Focus on personalities of Báb, Bahá’u’lláh, and ‘Abdu’l-Bahá. May be taken independently for credit. P/NP or letter grading.

M105C. Bahá’í Faith in Iran: 20th-Century Iran and the Baha’is. (4) (Same as Iranian M105C.) Lecture, three hours. Readings in English. Focus on history of 20th-century Iran beginning with constitutional revolution, development and persecution of Bahá’í community, and latter’s relation to reform movements in Iran. May be taken independently for credit. P/NP or letter grading.

M106A. Premodern Islam. (4) (Same as History M106.) Lecture, three hours; discussion, one hour (when scheduled).Designed for juniors/seniors. Examination of early development of Islam with special attention to the development of major theories, methods, and approaches to study of religion to situate them within their own historical, philosophical, and social contexts. Critical consideration of changes in meanings of term religion and its relationship to such categories as science and magic, as well as to other domains of social experience. Examination of how study of religion has been understood and has developed, especially biblical studies, anthropology, sociology, psychology, and evolutionary biology. P/NP or letter grading.

98. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students may be required to consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

101. History of Study of Religion. (4) Lecture, four hours. Recommended: All M104, M106, and M107. Survey of major modern theories, methods, and approaches to study of religion to situate them within their own historical, philosophical, and social contexts. Critical consideration of changes in meanings of term religion and its relationship to such categories as science and magic, as well as to other domains of social experience. Examination of how study of religion has been understood and has developed, especially biblical studies, anthropology, sociology, psychology, and evolutionary biology. P/NP or letter grading.

M510C. Bahá’í Faith in Iran: 20th-Century Iran and the Baha’is. (4) (Same as Iranian M510C.) Lecture, three hours. Readings in English. Focus on history of 20th-century Iran beginning with constitutional revolution, development and persecution of Bahá’í community, and latter’s relation to reform movements in Iran. May be taken independently for credit. P/NP or letter grading.

M510A. Premodern Islam. (4) (Same as History M510A.) Lecture, three hours; discussion, one hour (when scheduled).Recommended for juniors/seniors. Examination of early development of Islam with special attention to the development of major theories, methods, and approaches to study of religion to situate them within their own historical, philosophical, and social contexts. Critical consideration of changes in meanings of term religion and its relationship to such categories as science and magic, as well as to other domains of social experience. Examination of how study of religion has been understood and has developed, especially biblical studies, anthropology, sociology, psychology, and evolutionary biology. P/NP or letter grading.

790 / Religion, Study of contemporary discourses such as human rights, feminism, and contemporary reform movements. Primary sources include excerpts from Qur’an, Qur’anic interpretation, Coptic, and Muslim themes, thought, and reformists. Strong focus on analytical and writing skills through in-class assignments and discussion. Letter grading.

M115. Islam and Other Religions. (5) (Same as Islamic Studies CM115.) Lecture, three hours; discussion, one hour. Students gain familiarity with historical cases and modes of interaction between Muslims and non-Muslims in plural societies. Consideration of axis questions such as how does Qur’an reflect religious pluralism to shape a single Islamic politico-spiritual identity; what encounters did rapid expansion of Islam bring about in diverse societies; how did Islam and other religions change through debate, war, and exchange of ideas; role of political power plays in conditioning interreligious interaction; how have conversion and hybridity affected what it means to be Muslim; what is different about interreligious interactions in secular Western societies; and how is past invoked to justify opinions and policies today. Investigation of these questions by conducting microstudies: close readings of sources through theoretical lens. P/NP or letter grading.

118B. Kierkegaard and Philosophy of Religion. (4) (Same as Philosophy M118B.) Lecture, three to four hours; discussion, one hour (when scheduled). Preparation: one philosophy course. Study of selected works of Kierkegaard on philosophy of religion, with emphasis on interpretation of texts. P/NP or letter grading.

M132. Ancient Egyptian Religion. (5) (Same as Ancient Near East M130.) Lecture, three hours; discussion, one hour (when scheduled). Preparation: one course in religious beliefs, practices, and sentiments of ancient Egypt to study Egyptian religion as coherent system of thought and sphere of action that once served as meaningful and relevant framework for understanding physical reality and human life for inhabitants of Nile Valley. General principles as well as developments through time (circa 3000 BC to 300 CE). Topics include mythology, temple and cult, magic, and personal piety. P/NP or letter grading.

M133. Bible and Qur’an. (4) (Same as Middle Eastern Studies M133.) Lecture, three hours. Survey of Hebrew Bible/Old Testament, New Testament, and Qur’an to familiarize students with content of scriptures of Judaism, Christianity, and Islam, and socio-cultural background from which these multifarious texts emerged, and to explore major themes and consider various interpretations. Examination of role scripture plays in these religious systems and in American culture and society. P/NP or letter grading.

M135. Religion in Ancient Israel. (4) (Same as Ancient Near East M135.) Lecture, three hours. Introductory survey of various ancient Israelite religious beliefs and practices, their origin, and development, with special attention to diversity of religious practice in ancient Israel and Judah during 1st millennium BCE. P/NP or letter grading.

140. Undergraduate Seminar: Study of Religion. (4) Seminar, three hours. Interdisciplinary approach to some major topics in study of religion, such as religion and politics, mysticism, ideas of revelation, myth and religion, worship and ritual. May be repeated for credit with consent of instructor. P/NP or letter grading.

M142C. History of Religion in U.S. (4) (Same as History M142C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Consideration of people's experience in U.S. Examination of number of religious traditions that have been important in this country, with emphasis on relating developments in religion to other aspects of American culture. P/NP or letter grading.

150D. Islam and Modernity, four hours. Investigation and consideration of roles, status, and representations of women and gender in one or more religious traditions. Examination of how cultural concepts of gender as well as social realities (as far as they can be known) for women and men in particular historical periods shape and are shaped by these religious traditions, including discussions regarding ritual practices, sexual reproduction, religious authority, marriage and family life, fertility, conceptions of body, public life, and/or literary representations of gender (including those of divine). Variety of approaches to be included, including feminist, literary, historical, sociological, and anthropological. P/NP or letter grading.

155. Angels, Demons, and End of World: Magic, Mysticism, and Apocalypse in Jewish Traditions. (4) (Same as Jewish Studies M155.) Lecture, three hours; discussion, one hour. Focus on popular Jewish traditions of magic, mysticism, apocalypse, and various contours of Judaism's textual and material traditions in antiquity. Examination of texts from Hebrew Bible to modern discussion of Kabbalah and end of world, concentrating on Jewish apocalyptic discourse. Of texts, including Hebrew Bible, Dead Sea Scrolls, extra-biblical Jewish texts, New Testament, and rabbinic and later Jewish literature. Discussion of sociohistorical context in order to decipher features and functions of magic, mysticism, and apocalypse in antiquity and modernity. P/NP or letter grading.

160. Religion, Film, and Media. (4) Lecture, four hours. Examination of complex relationship between religious traditions and various media (e.g., print, film, photography, comics) as they have intersected in specific historical and cultural contexts. Illumination of role of media in forming and expressing religious ideas, practices, and identities. Topics may include representations of religious groups, visual and aural piety, identity formation, interreligious conflict, religious education, and use of media technologies for propaganda or proselytizing purposes. Historical, sociological, and anthropological approaches used in concert with various methodologies current within media studies. P/NP or letter grading.

M161A. Chinese Buddhism. (4) (Same as Chinese CM160C.) Lecture, three hours; discussion, one hour. Knowledge of Chinese introduction and development of Buddhism in China, interaction between Buddhism and Chinese culture, rise of Chinese schools of Buddhism. Letter grading.

M161B. Japanese Buddhism. (4) (Same as Japanese CM160D.) Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Development of Buddhism in Japan in its cultural context, with emphasis on key ideas and teachings. Letter grading.

M161C. Korean Buddhism. (4) (Same as Korean CM160E.) Lecture, three hours; discussion, one hour. Knowledge of Korean not required. Introduction and development of Buddhism in Korea, interactions between Buddhism and Confucianism, the syncretic traditions of Buddhism, Korean syntheses of imported Buddhist theological systems and meditative techniques, and independent Son (Zen) schools of Korea. Letter grading.

M161D. Buddhism in India. (4) (Same as South Asian CM160F.) Lecture, three hours; discussion, one hour. Knowledge of Indian languages not required. Overview of social and doctrinal history of Buddhism from its origins to its disappearance in India, based not only on texts but on archaeological, art historical, and inscriptive sources. Examination of both formal doctrinal and actual practices and on what learned Buddhist scholars wrote and what Buddhist did, saw, and made. Letter grading.

M173C. Shinto, Buddhism, and Japanese Folk Religion. (4) (Same as History M173C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Social dimension of various Vajra, Shinto, and littler Shinto traditions. Consideration of cultural nationalism, Buddhism’s medieval Reformation and Zen’s relation to warrior culture, folk religion aspects such as shamanism, ancestor worship, and millenarianism. P/NP or letter grading.

M174D. Indo-Islamic Interactions, 700 to 1750. (4) (Same as History M174D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical introduction to Muslim conquests,ization of the Abbasid Empire, to Islamic civilization, to India, Pakistan, and Bangladesh. Topics include social, political, religious, and cultural history. P/NP or letter grading.

M174E. Indo-Islamic Interactions, 1750 to 1950. (4) (Same as History M174E.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of interplay of factors that, from early Christian missionaries to Islamic madrasah schools and colonial rebellions, have multifacted Muslim reformation in context of colonial modernity. P/NP or letter grading.

M175. Topics in Philosophy of Religion. (4) (Same as Philosophy M175.) Lecture, three hours; discussion, one hour. Requisite: Philosophy 21 or 22. Intensive investigation of one or two topics or works in philosophy of religion, such as attributes of God, arguments for or against existence of God, or relation between religion and ethics. Topics announced each term. May be repeated for credit with consent of instructor.

177. Variable Topics in Religion. (4) Seminar, three hours. Interdisciplinary approach to some major topics in study of religion, such as religion and science, religion and society, politics, mysticism, ideas of revelation, scripture, myth and religion, worship and ritual. May be repeated for credit with topic change. P/NP or letter grading.

M178. Variable Topics. (4) (Same as Middle Eastern Studies M178.) Seminar, three hours. Interdisciplinary approach to some major topics in study of religion and Middle Eastern studies. May be repeated for credit with topic change. P/NP or letter grading.

M179. Topics in Moral Philosophy: Evil. (4) (Same as Philosophy M152B.) Lecture, three to four hours; discussion, one hour (when scheduled). Preparation: one philosophy course. Exploration of philosophical issues raised by topic of evil actions and/or evil people. Issues may include nature of evil, problem of evil and theodicies, responsibility for evil and problem of free will, and motivations and reaction, divergent responses to evil such as forgiveness and punishment. P/NP or letter grading.

180. Religion and Modern Critical Thought. (4) Lecture, four hours. Examination of how various traditions of modern critical thought inform academic study of religion, with primary focus on philosophical analysis of religious belief and practice and its relation to other areas of theoretical discussion, such as philosophy of language, social science, ethics, politics, and cultural history. Topics may include nature of religious experience and its epistemic status, embodiment and religious self, relationship between knowledge, faith, and doubt, nature and function of religious language, relationship between science and religion, religious belief and standards of rational discourse, theoretical approaches to problems of religious and competing truth claims, formation of religious and secular in modernity. P/NP or letter grading.

M182A. Ancient Jewish History. (4) (Same as History M182A and Jewish Studies M182A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of social, political, and religious developments. P/NP or letter grading.

M182B. Medieval Jewish History. (4) (Same as History M182B and Jewish Studies M182B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Social, political, and religious developments. P/NP or letter grading.
### RESEARCH PRACTICE

#### College of Letters and Science

**A334 Murphy Hall**

Los Angeles, CA 90095-1430

**Research Practice**

**Program e-mail**

Muriel C. McClenndon, PhD, Humanities, Arts, and Social Sciences Chair

Craig A. Merlic, PhD, Sciences Chair

#### Faculty Committee

Tama W. Hasson, PhD (Integrative Biology and Physiology)

Beth A. Lazazzera, PhD (Microbiology, Immunology, and Molecular Genetics)

Muriel C. McClenndon, PhD (History)

Craig A. Merlic, PhD (Chemistry and Biochemistry)

#### Overview

The Research Practice subject area includes interdisciplinary courses in the practice of research. Hosted by the Undergraduate Research Center—Sciences and the Undergraduate Research Center for Humanities, Arts and Social Sciences, research practice courses cover the development of research questions and the application of methodological approaches, as well as forms of qualitative and quantitative analysis, and research communications and publications. The courses combine theory and practice, and emphasize experiential learning. Students do not just gain knowledge and skills in their discipline; they also develop an understanding of how knowledge is created and applied across the university. Research practice courses expand on important skills for success in research, and also explore how research skills integrate into a variety of careers. Research practice courses are not associated with one department; students in any major can enroll. Some courses are associated with a research, journal, or scholarship program, and acceptance into that program is required to enroll. Other courses have an open enrollment. For more information see Research Practice—UCLA Undergraduate Research.

### Research Practice Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

96. Bruins Studying Bruins: Introduction to Higher Education Research through Course-Based Collaborative Research Project. (2) Seminar, two hours. Course-based research experience that introduces students to higher education institutional research, assessment, and accreditation. Students collaborate on research assessment project that is used toward campus instructional improvements and its accreditation documentation. P/NP grading.

97XA. PEERS Freshman Seminar: Succeeding in Science. (1) Formerly numbered Ecology and Evolutionary Biology 97X.) Seminar, one hour. Limited to students in Program for Excellence in Education and Research in Sciences (PEERS). Series of lectures, workshops, and discussions to enhance student success in sciences by developing critical academic survival skills, acquainting students with practice of science, and highlighting opportunities available to participate in research as undergraduate students. P/NP grading.

97XB. PEERS Sophomore Seminar: Pathways in Majors, Careers, and Entry into Research. (1) Formerly numbered Ecology and Evolutionary Biology 97XB.) Seminar, one hour. Limited to students in Program for Excellence in Education and Research in Sciences (PEERS). Series of lectures and workshops to enhance student success in sciences by acquainting students with practice of science, opportunities available to participate in research as undergraduate students, and careers available to students with science degrees. P/NP grading.

97XC. Transfer Success and Pathways to Undergraduate Research for Life Sciences Majors. (4) Seminar, one hour. Limited to new transfer students. Designed to provide essential academic skills for life science transfer students, and promote engagement in university research including instruction on securing research opportunities and skills necessary for research and professional success, communication of research, and exploring resources and life science careers. P/NP grading.

97XD. Research Unwrapped: Introduction to Research in Sciences. (1) Seminar, two hours. Exposes students to university research and wide array of research practices in sciences. Introduction to benefits of undergraduate research, scientific method, information and publication search strategies, science communication, and degree and careers requiring research experience. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised) or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

102. Research Practice: Research Revealed. (2) (Formerly numbered 191A) Seminar, two hours. Limited to students participating in Research Revealed undergraduate research preparation program. Students are prepared to conduct their own research, apply to research programs, and interact with faculty members. Topics vary by term. P/NP grading.
103. Research Practice: Student Research Forum. (2) Lecture/activities, four hours. Designed to promote deep engagement in university research, including instruction on research opportunities, skills necessary for research and professional success, exploring research internships on and off campus, and communication of research across all disciplines. P/NP grading.

105. Effective Science Communication. (2) Seminar, two hours. Effectively communicate science in essential for careers in science, technology, engineering, and mathematics. Designed to strengthen and practice skills of sharing scientific communication and presentations, drawing on storytelling techniques to craft more compelling talks. Students have many hands-on experiences with presenting their research, with different audiences, and with different objectives. P/NP grading.

110A. Careers in Libraries and Archives. (2) Formerly numbered Honors Collegium 101M.) Seminar, two hours. Students learn about career paths for librarians and archivists. Introduction to career pathways of various professionals. Brief discussion of professional issues in these fields especially in relation to recruitment and retention in these professions. Discussion of careers in various fields and types of libraries and archives, with emphasis on outstanding professionals at UCLA. Stronger focus on careers in academic spaces. P/NP grading.

110B. Preparing for Post-UCLA Success: Fellowships, Graduate School, and More. (2) Formerly numbered Honors Collegium 101K.) Seminar, two hours. Prepares students to achieve goals beyond UCLA. Participants reflect on values and interests, and learn what is required for effective applications to graduate school, fellowships, and more. Review of process of applying for nationally competitive awards such as Truman, Rhodes, Marshall, and others. Students learn to craft effective curricula vitae, strong personal statements, and compelling research proposals. Students learn to solicit strong letters of recommendation. Skills are preparation for scholarship/fellowship application process, as well as graduate school and job application process. P/NP grading.

120. Research Today: Sources, Tools, and Strategies. (2) Seminar, two hours. Research is process of exploration, experimentation, and discovery. Study is designed to help students to engage in this process and prepare for research-intensive honors thesis. Students collaborate with mentors and experts across UCLA campus as they develop their own approach to research. P/NP grading.

130. Integrity in Science Research. (2) Seminar, two hours. Limited to students in funded research programs, or who are oral study senior thesis. Exploration of research integrity and discussion of important ethical issues that impact scientific investigation. Presentation of major issues in field of research ethics and integrity. Students work together in small groups to present and lead discussions on ethical dilemmas. Focus on research integrity issues that impact broad group of undergraduate researchers on UCLA campus. Student presentations are topical in nature, and vary from year to year based on recent ethical events. P/NP grading.

182. Developing Your Research Skills: Reading, Writing, and Sharing Academic Research in Humanities and Social Sciences. (4) Seminar, three hours; workshop, three hours. Designed for visiting juniors and seniors in Mellon Mays Undergraduate Fellowship program who are engaged in multi-year research projects in humanities and social sciences at home institutions. Focus on development of three important research skills: reading scholarly writing, writing for scholarly audiences, and presenting research for academic and general audiences. Students are supported in producing seven to eight pages of polished writing in form of literature review, thesis chapter, or another meaningful unit of writing as agreed upon with instructor. Students learn to write abstract and present work orally and visually. Approaches reading, writing, and sharing academic research as ongoing, iterative processes. Students gain necessary tools to succeed in all parts of research process. Concludes with symposium in which work is presented. P/NP grading.

192A. UCLA Undergraduate Science Journal. (2) Seminar, two hours. Designed to guide students through critical aspects of preparing UCLA Undergraduate Science Journal for publication. These aspects of writing, reviewing, editing, and formatting articles for publication are essential to research process for sharing findings and engaging with broader scientific and engineering community. Students develop teamwork and project management skills that can help in future career paths. May be repeated for maximum of 10 units. P/NP grading.

192B. Undergraduate Research Journal for Humanities and Social Sciences. (2) (Formerly numbered Honors Collegium 101G.) Seminar, two hours. Limited to students on editorial board of Aleph journal. Students participate in workshops to assess, edit, and publish journal articles. May be repeated for maximum of 10 units. P/NP grading.

193. Variable Topics: Research Practice Journal Club. (2) (Formerly numbered Neurobiology M171 and Psychological Science M171.) Seminar, two hours. Limited by application. Centered on presentation and critical analysis of scientific journal articles, and presentation of students’ own research. Intensive literature-based training program which increases student confidence and scientific literacy, and facilitates transition to postgraduate study. May be repeated for maximum of 10 units. P/NP grading.

194A. Mellon Mays Undergraduate Fellows Research Seminar. (2) (Formerly numbered Honors Collegium 101J.) Seminar, two hours. Limited to current Mellon Mays undergraduate fellows. Designed to support students in their research, and in preparation for graduate school and professional careers. May be repeated five times for credit. P/NP grading.

194B. Research Seminar: Writing Research Proposals and Graduate Applications. (2) Seminar, two hours. Research seminar for undergraduates applying in fall for science, technology, engineering, and mathematics (STEM) PhD or MS programs. Designed to support students in their research, and in preparation for graduate school and professional careers. Letter grading.

194C. Mastering Oral Presentation of Your Research. (2) Seminar, two hours. Examination of best practices in oral presentation of scientific research. Familiarization with rubric used to evaluate oral research presentations given by graduate students and peers. Students present their research, tailored to diverse audience of science faculty and postdocs, and give feedback to their peers. Oral and written feedback is used to help students revise their talks. Culminates with students’ research presentation by each student. Letter grading.

195. Research Activities. (4) Tutorial, 12 hours. Designed to provide academic context for off-campus, remote work at research institutions outside of UCLA. Students work independently with graduate student mentor to learn about research teams, discuss management of research protocols and data, and work weekly on science writing, culminating in production of research abstract and assembly of research paper. May be repeated for credit up to two consecutive quarters. Individual contract required. Letter grading.

Graduate Course

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: Apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

SCIENCE EDUCATION

Interdisciplinary Minor
College of Letters and Science
1037 Young Hall

Overview

The Science Education minor provides preparation for careers where teaching is an important component, including middle and high school, community college, university, or other science-related outreach careers. Students who wish to become middle or high school science teachers and who plan to teach as graduate students in their disciplines are the primary focus. The minor supplies the broad general science background included in California state subject matter credential examinations, education coursework, field experiences in the development, management, and teaching of science laboratory instruction in grades 7 through 12, and UCLA-based teaching practicums in lower-division science laboratory.

Undergraduate Minor

Science Education Minor

Admission

Students eligible for admission to the Science Education minor should be making normal progress on the preparation for a major in the sciences or engineering whether they have declared such a major or not. They must have completed nine courses selected from the following, with at least one course from each of the four categories: (1) Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL (or 20A,
20B, 20L, 30A, 30AL), (2) Life Sciences 7A, 7B, 7C, 23L, (3) Mathematics 3A, 31A or Life Sciences 30A, and (4) Physics 1A, 1B, 4AL, 4BL (or 5A, 5B, 5C). Prior participation in a supervised experience in schools is recommended.

To enter the minor, students must be in good academic standing with an overall grade-point average of 2.0 or better. Students must consult with the academic coordinator responsible for the minor to plan a coherent program to complete both the minor and their major, prior to filing a petition to enter the minor.

The Minor

Required Lower-Division Courses (6 to 8 units): Science Education 1XP or 10XP or 15XP, and Earth, Planetary, and Space Sciences 101 or C113 or Atmospheric and Oceanic Sciences 101 or 102 or 103 may be substituted for course 1).

Required Upper-Division Courses (22 units minimum): (1) Education 127, (2) Science Education 100XP, (3) at least three units selected from Chemistry and Biochemistry 192A, 192B, Life Sciences M192A, 192B, 192C, 192D, 192E, Physics 192M, 192S, Physiological Science 192A, 192B, and (4) at least one and no more than two courses selected from Education M102, M103, 104A, 105B, 106A, 107A, 107B, M108, C111, 123, 126, M131A, 132, M136, 139, 141.

Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 16 units must be taken in residence at UCLA.

Each minor course, except Science Education 1XP, 10XP, or 15XP, must be taken for a letter grade, with a grade of C or better in each, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Science Education

Lower-Division Courses

1XP. Classroom Practices in Elementary School Science. (2) (Formerly numbered 15SL) Seminar, 90 minutes; fieldwork, three hours per week for eight weeks. Introduction for prospective science teachers to field of elementary education and teaching and learning of science in elementary school classrooms. P/NP grading.

10XP. Classroom Practices in Elementary School Science. (2) (Formerly numbered 100SL) Seminar, three hours; service learning fieldwork, three hours. Recommended requisite: course 1XP or 10XP. Introduction for prospective science teachers to field of secondary education and teaching and learning of science in middle school classrooms. P/NP grading.

Upper-Division Courses

100XP. Classroom Practices in High School Science. (2) Formerly numbered 100SL Seminar, three hours; service learning fieldwork, three hours. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to lower-division lecture course. In individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

199. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

SLAVIC, EAST EUROPEAN, AND EURASIAN LANGUAGES AND CULTURES

College of Letters and Science

Overview

The Department of Slavic, East European, and Eurasian Languages and Cultures offers a wide array of courses in the languages and cultures of Russia and of central and eastern Europe. Instruction is offered in Czech, Hungarian, Polish, Romanian, Russian, Serbian/Croatian, and Ukrainian to provide students with the necessary linguistic skills to pursue advanced work in the literature, culture, history, politics, and social structures of these areas. Students have the choice of several majors and minors and the opportunity to enhance their knowledge and skills through programs of study abroad.
Undergraduate Study
The department offers three majors: (1) Central and East European Languages and Cultures, (2) Russian Language and Literature, and (3) Russian Studies. The equivalent of a major in Central and East European Languages and Cultures or Russian Language and Literature is normally required for admission to the department graduate program and is used to determine the number of courses in Russian literature and/or linguistics that students majoring in Russian Studies are expected to make up in order to receive graduate degrees in the department. Students not majoring in Central and East European Languages and Cultures or Russian Language and Literature who intend to pursue graduate study in the department are strongly encouraged to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of makeup courses required. Qualified seniors may also take graduate courses numbered below 220 with consent of the instructor and the graduate and undergraduate advisers.

Undergraduate Majors
Central and East European Languages and Cultures BA
The major in Central and East European Languages and Cultures is designed to provide students with a mastery of one language of central or eastern Europe and familiarity with the literature, as well as general background in the cultural, political, and social history of the Slavic peoples.

Capstone Major
The Central and East European Languages and Cultures major is a designated capstone major. Students must complete a capstone seminar and present their final paper in the department annual Undergraduate Research Conference. Students draw on their previously acquired subject matter knowledge and skills to plan a research project and write a substantial academic paper. They also gain experience engaging in scholarly discourse, preparing appropriate media for public presentation, and submitting their work to an academic journal.

Learning Outcomes
The Central and East European Languages and Cultures major has the following learning outcomes:

- Incorporation of knowledge acquired to formulate an independent study topic and research project
- Selection and use of original sources in a Central and East European language or Russian to prepare a thesis
- Acquisition of skills relating to development of discourse and argument that is clear, reasoned, reflective, informed by evidence, and aimed at deciding what to believe
- Determination of what information should be developed and analyzed

- Completion of conference presentation that includes fielding audience questions
- Mastery of oral communication including interpersonal communication, presentation, and discussion
- Editing of the research paper into a journal article, and submission of it to an academic journal

Entry to the Major
Transfer Students
Transfer applicants to the Central and East European Languages and Cultures major with 90 or more units must complete the following introductory course prior to admission to UCLA: one culture, history, or civilization course on one or more European nations.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements
Preparation for the Major
Required: Central and East European Studies 91 or Slavic 90.

The Major
Required: (1) One three-quarter (12 to 15 units) introductory central and east European language sequence, or one 12-unit intensive introductory central and east European language course, to be selected from Czech 101A, 101B, 101C, Hungarian 101A, 101B, 101C, Polish 101A, 101B, 101C, Romanian 101A, 101B, 101C, 103, Serbian/Croatian 101A, 101B, 101C, 103, or Ukrainian 101A, 101B, 101C; (2) one three-quarter (12 to 15 units) language sequence to be selected from Czech 102A, 102B, 102C, Hungarian 102A, 102B, 102C, Polish 102A, 102B, 102C, Romanian 102A, 102B, 102C, Serbian/Croatian 102A, 102B, 102C, or Ukrainian 102A, 102B, 102C, or any three courses from Russian 100A, 100B, 100C, 101A, 101B, 101C, 102A, 102B, 102C, 103A, 103B, 103C, 140A; (3) three courses (12 units) from the following list (187 courses are 2 units each; no more than 8 units may be from the 187 series); Central and East European Studies M120, 125, 126, Czech 155, 157A through 157M, History 120A through 120D, Hungarian 175A through 175M, Polish 132A, 152B, 152C, 152D, 175A through 175M, Romanian 152, 175A through 175M, Russian CM124D, Serbian/Croatian 175A through 175M, Ukrainian 152, 175A through 175M; one of three courses may be selected from Russian M118, 119, 120, 124A, 124D, 124N, 124T.

During their senior year, students must also take Slavic 191TA, 191TB, and 191TC in which they complete a capstone senior thesis.

Honors Program
The honors program is designed for exceptional departmental majors who wish to complete a research project that culminates in an honors thesis.

The honors program is a three-term sequence (Slavic 198A, 198B, 198C), taken in addition to requirements for the major.

Policies
The Major
Students may petition to substitute courses after consulting with the undergraduate adviser.

Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

Honor Program
Admission
The honors program is open to majors with a 3.5 grade-point average in upper-division courses in the major and a 3.0 overall GPA. Students should apply for admission by spring quarter of their junior year. At the time of admission, students must have completed at least two upper-division courses in their major. Prior to admission to the honors program, students must identify a faculty adviser, who must be a regular member of the UCLA faculty; the faculty adviser must commit to mentoring the student for the duration of the program. Students must also write a two-page proposal of the project, to be approved by the faculty adviser and submitted with the application form.

Requirements
The courses must be taken during senior year (fall, winter, and spring terms respectively). Students pursuing departmental honors must submit the contract for each course by the end of the tenth week of the previous quarter. The sequence culminates in the submission of a thesis. Students who enroll in the honors program are exempt from taking the standard thesis course sequence (Slavic 191TA, 191TB, 191TC).

The honors thesis is intended to be a substantial piece of original scholarship at least 40 pages in length exclusive of front matter, appendices, and bibliography (25 pages to satisfy the regular capstone senior thesis major requirement). Students are required to use a Slavic, east European, or Eurasian language in their research, with the scope of the language work to be determined in consultation with their faculty adviser. Evaluation of the honors thesis is made by the faculty adviser.

To qualify for graduation with departmental honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper-division courses required for the major and an overall GPA of 3.0 or better, and (3) complete Slavic 198A, 198B, 198C with grades of B or better.

To qualify for graduation with departmental highest honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.8 or better in upper-division courses required for the major and an overall GPA of 3.5 or better, and (3) complete Slavic 198A, 198B, 198C with grades of A– or better.

Honors and highest honors are recorded on the final transcript and diploma after students successfully complete the program.

In the event that a student does not complete the departmental honors program or qualify for
departmental honors/highest honors, their paper may count toward the regular capstone senior thesis requirement for their major (25 pages minimum to satisfy requirement).

**Russian Language and Literature BA**

The Russian Language and Literature major is designed to provide students with basic mastery of the Russian language and familiarity with the classics of Russian literature. Students typically begin to study Russian in their first year, but those contemplating a Russian major later in their academic program can fulfill the Russian language requirement by combining regular coursework with summer programs or with the University of California Education Abroad Program (EAP) in Moscow, which is open to students who have completed the equivalent of one or more years of study (level 1 on the American Council on Teaching of Foreign Languages [ACTFL] scale). Students interested in this program should consult with the undergraduate adviser as early as possible.

**Capstone Major**

The Russian Language and Literature major is a designated capstone major. Students must complete a capstone seminar and present their paper in the department annual Undergraduate Research Conference. Students draw on their previously acquired subject matter knowledge and skills to plan a research project and write a substantial academic paper. They also gain experience engaging in scholarly discourse, preparing appropriate media for public presentation, and submitting their work to an academic journal.

**Learning Outcomes**

The Russian Language and Literature major has the following learning outcomes:

- Incorporation of knowledge acquired to formulate an independent study topic and research project
- Selection and use of original sources in Russian or a related language to prepare a thesis
- Acquisition of skills relating to development of discourse and argument that is clear, reasoned, reflective, informed by evidence, and aimed at deciding what to believe
- Determination of what information should be developed and analyzed
- Completion of conference presentation that includes fielding audience questions
- Mastery of oral communication including interpersonal communication, presentation, and discussion
- Editing of the research paper into a journal article, and submission of it to an academic journal

**Entry to the Major**

**Transfer Students**

Transfer applicants to the Russian Language and Literature major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Russian and one Russian civilization course. Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

**Requirements**

**Preparation for the Major**

**Required:** Russian 6 or 20 or equivalent proficiency, one course from 25, 25W, 90A, 90B, or 90BW.

**The Major**

During their senior year, students must also take Slavic 191TA, 191TB, and 191TC in which they complete a capstone senior thesis.

**Honors Program**

The honors program is designed for exceptional departmental majors who wish to complete a research project that culminates in an honors thesis.

The honors program is a three-term sequence (Slavic 198A, 198B, 198C), taken in addition to requirements for the major.

**Policies**

**The Major**

Students may petition to substitute courses after consulting with the undergraduate adviser.

Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

**Honors Program**

**Admission**

The honors program is open to majors with a 3.5 grade-point average in upper-division courses in the major and a 3.0 overall GPA. Students should apply for admission by spring quarter of their junior year. At the time of admission, students must have completed at least two upper-division courses in their major. Prior to admission to the honors program, students must identify a faculty adviser, who must be a regular member of the UCLA faculty; the faculty adviser must commit to mentoring the student for the duration of the program. Students must also write a two-page proposal of the project, to be approved by the faculty adviser and submitted with the application form.

**Requirements**

The courses must be taken during senior year (fall, winter, and spring terms respectively). Students pursuing departmental honors must submit the contract for each course by the end of the tenth week of the previous quarter. The sequence culminates in the submission of a thesis. Students who enroll in the honors program are exempt from taking the standard thesis course sequence (Slavic 191TA, 191TB, 191TC). The honors thesis is intended to be a substantial piece of original scholarship at least 40 pages in length exclusive of front matter, appendices, and bibliography (25 pages to satisfy the regular capstone senior thesis major requirement). Students are required to use a Slavic, east European, or Eurasian language in their research, with the scope of the language work to be determined in consultation with their faculty adviser. Evaluation of the honors thesis is made by the faculty adviser.

To qualify for graduation with departmental honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper-division courses required for the major and an overall GPA of 3.0 or better, and (3) complete Slavic 198A, 198B, 198C with grades of B+ or better.

To qualify for graduation with departmental highest honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.8 or better in upper-division courses required for the major and an overall GPA of 3.5 or better, and (3) complete Slavic 198A, 198B, 198C with grades of A− or better.

Honors and highest honors are recorded on the final transcript and diploma after students successfully complete the program.

In the event that a student does not complete the departmental honors program or qualify for departmental honors/highest honors, their paper may count toward the regular capstone senior thesis requirement for their major (25 pages minimum to satisfy requirement).

**Russian Studies BA**

The major in Russian Studies is designed for students who wish to complement mastery of the language with an array of courses on Russian history, politics, literature, and culture.

**Capstone Major**

The Russian Studies major is a designated capstone major. Students must complete a capstone seminar and present their final paper in the department annual Undergraduate Research Conference. Students draw on their previously acquired subject matter knowledge and skills to plan a research project and write a substantial academic paper. They also gain experience engaging in scholarly discourse, preparing appropriate media for public presentation and submitting their work to an academic journal.
Learning Outcomes
The Russian Studies major has the following learning outcomes:

- Incorporation of knowledge acquired to formulate an independent study topic and research project
- Selection and use of original sources in Russian or a related language to prepare a thesis
- Acquisition of skills relating to development of discourse and argument that is clear, reasoned, reflective, informed by evidence, and aimed at deciding what to believe

In the event that a student does not complete the departmental honors program or qualify for departmental honors/highest honors, their paper may count toward the regular capstone senior thesis requirement for their major (25 pages minimum to satisfy requirement).

Undergraduate Minors

Central and East European Studies Minor

The Central and East European Studies minor is designed for students who wish to augment their major program of study in the College of Letters and Sciences with exposure to a variety of disciplines pertinent to the study of central and eastern Europe, including language, literature, history, political science, folklore, ethnomusicology, and women’s studies.

Admission

To enter the minor students must be in good academic standing (2.0 minimum grade-point average) and file a petition with the department counselor in 322B Kaplan Hall, 310-825-5856.

The Minor

Required Lower-Division Course (5 units): Central and East European Studies 91 or Slavic 90.

Required Upper-Division Courses (28 to 31 units): (1) One three-quarter introductory central and east European language sequence, or one 12-unit intensive introductory central and east European language course, to be selected from Russian 101A, 101B, 101C, Hungarian 101A, 101B, 101C, Polish 101A, 101B, 101C, Romanian 101A, 101B, 101C, 103, Serbian/Croatian 101A, 101B, 101C, 103, or Ukrainian 101A, 101B, 101C students who demonstrate sufficient fluency in one of these languages through departmental testing are exempt from this three-course sequence and must replace it with a minimum of 12 units of language courses from item 3; (2) one course dealing directly with the target culture to be selected from Central and East European Studies 125, 126, 155, History 120A through 120D, Polish 152A, 152B, 152C, Romanian 152, Russian CM124G, Serbian/Croatian 154, or Ukrainian 152; (3) 12 units of second-year or higher-level language courses to be selected from Czech 102A, 102B, 102C, 187A through 187M, Hungarian 102A, 102B, 102C, 187A through 187M, Polish 102A, 102B, 102C, 187A through 187M, Romanian 102A, 102B, 102C, 187A through 187M, Serbian/Croatian 102B, 102C, 187A through 187M, Ukrainian 102A, 102B, 102C, 187A through 187M (187 courses are 2 units each) OR three courses dealing directly with any central and east European culture to be selected from Central and East European Studies M120, 125, 126, Czech 155, History 120A through 120D, Polish 152A, 152B, 152C, Romanian 152, Russian CM124G, Ukrainian 152.

Policies

With approval of the undergraduate adviser, other related upper-division courses may be applied toward the minor.
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Russian Language Minor**

**Admission**
To enter the Russian Language minor, students must have an overall grade-point average of 2.0 or better.

**The Minor**

**Required Lower-Division Courses** (9 to 17 units): Russian 6 or 20 or equivalent proficiency, one course from 25, 25W, 90A, 90B, or 90BW.

**Required Upper-Division Courses** (20 to 23 units): Students select one of the following options: (1) Russian 101A, 101B, 101C and two additional Russian language or literature courses; (2) Russian 100A, 100B, 100C and two additional Russian language or literature courses; or (3) five Russian language and literature courses selected from 102A, 102B, 102C, 103A, 103B, 103C, 107A, 107B, 107C, 130A, 130B, 130C, 140A through 140D, with a minimum of three Russian courses in language.

**Policies**

Students may petition to substitute courses after consulting with the undergraduate adviser. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Russian Literature Minor**

**Admission**
To enter the Russian Literature minor, students must have an overall grade-point average of 2.0 or better.

**The Minor**

**Required Lower-Division Courses** (9 to 17 units): Russian 3 or 10 or equivalent proficiency, one course from 25, 25W, 30, 31, 32, 90A, 90B, or 90BW.

**Required Upper-Division Courses** (20 units): Five courses in Russian-related fields, with a minimum of three courses selected from History M127A through 127D, Political Science 128A, 128B, 156A.

**Policies**

Students may petition to substitute courses after consulting with the undergraduate adviser. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Russian Studies Minor**

**Admission**
To enter the Russian Studies minor, students must have an overall grade-point average of 2.0 or better.

**The Minor**

**Required Lower-Division Courses** (9 to 17 units): Russian 3 or 10 or equivalent proficiency, one course from 25, 25W, 30, 31, 32, 90A, 90B, or 90BW.

**Required Upper-Division Courses** (20 units): Five courses in Russian-related fields, with a minimum of three courses selected from History M127A through 127D, Political Science 128A, 128B, 156A.

**Policies**

Students may petition to substitute courses after consulting with the undergraduate adviser. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Major**

**Slavic, East European, and Eurasian Languages and Cultures MA, CPhil, PhD**

The graduate program provides advanced training in Slavic literatures and linguistics leading to the MA and PhD degrees in Slavic, East European, and Eurasian Languages and Cultures. The primary task of the department faculty is to develop and refine the critical and analytic skills of its students in preparation for productive careers in college teaching and research in the Slavic field. Alternative careers include language teaching, business, translation, interpreting, librarianship, and government service.

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announce-

**Bulgarian**

**Lower-Division Courses**

19. **Fiat Lux Freshman Seminars.** (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. **Honors Seminars.** (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. **Honors Contracts.** (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. **Student Research Program.** (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

**Upper-Division Courses**

101A-101B-101C. **Elementary Bulgarian.** (5–5–5) Lecture, five hours. Course 101A is recommended preparation for 101B, which is recommended preparation for 101C. Each course may be waived with consent of instructor. Basic courses in Bulgarian language. P/NP or letter grading.

189. **Advanced Honors Seminars.** (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. **Honors Contracts.** (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**Central and East European Studies**

**Lower-Division Courses**

19. **Fiat Lux Freshman Seminars.** (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

31. **Introduction to Slavic, East European, and Central Asian Cultures through Film.** (5) Lecture, three hours; discussion, one hour. Interdisciplinary introduction to diversity of languages and cultures represented in Department of Slavic, East European, and Eurasian Languages and Cultures through medium of film. P/NP or letter grading.
89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

100. Balkan Cultures in Film and Literature. (4) Lecture, three hours. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

91. Culture and Society in Central and Eastern Europe. (5) Lecture, three hours; discussion, one hour. Interdisciplinary introduction to main themes and concepts of Central and East European studies, including histories of Eastern Europe, and languages spoken in area. Focus on politics, society, and culture in communism and post-communist periods: party control and disintegration; national and international economic systems; private enterprise and state ownership; atheistic education and state religion; politically engaged literature, mass media, and freedom of expression; sports, visual and performing arts, and nationalism. P/NP or letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

M120. Women and Literature in Southeastern Europe. (4) Same as Comparative Literature M120) Seminar, three hours. Examination of changing roles of women in Balkan countries (Albania, Bosnia-Herzegovina, Bulgaria, Croatia, Greece, Macedonia, Montenegro, Romania, Serbia, Turkey) in last forty years. Emphasis on cultural, social, political, and economic factors affecting women’s roles during countries’ transition from agricultural to industrial economy and from communism to post-communism (in former communist countries). Sensitizes students to complexity of issues in region and helps them better understand multiplicity of causes of present situation. Interdisciplinary study, drawing on sociological/women’s studies, articles, and short fiction by women writers for analysis. Discussion of topics covered in articles, positions taken by authors, and ways in which aspects of Southeast European realities are rendered in fiction by women writers from region. P/NP or letter grading.

125. Interwar Central European Prose. (4) Lecture, three hours. Analysis of the cultural significance of novels, stories, plays, and essays of representative authors of 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. P/NP or letter grading.

C126. Cold-War Central European Culture. (4) Formerly numbered C126) Lecture, three hours. Examination of cold-war Central European culture through prism of pro-se culture, essays, and film from 1947 to 1989. Analysis of strategies of Polish, Czech, Hungarian, and East German writers as articulation of tensions, contradictions, and compromises informing communist rule in central and eastern Europe, with focus on culture as node of resistance as well as accommodation to communist system. Concurrently scheduled with course C212. S/U or letter grading.

Czech

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course and guided independent study of advanced Czech: advanced conversation, composition, vocabulary development, and review of selected grammar topics. May be repeated for credit with topic change. P/NP or letter grading.

Upper-Division Courses

101. Variable Topics Research Seminars: Central and Eastern European Studies. (4) Seminar, three hours. Study and discussion of specialized issues and approaches in history, structure, and themes of one or more literary traditions of central and eastern Europe. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. P/NP or letter grading.

Graduate Courses

C226. Cold-War Central European Culture. (4) Lecture, three hours. Examination of cold-war Central European culture through prism of pro-se culture, essays, and film from 1947 to 1989. Analysis of strategies of Polish, Czech, Hungarian, and East German writers as articulation of tensions, contradictions, and compromises informing communist rule in central and eastern Europe, with focus on culture as node of resistance as well as accommodation to communist system. Concurrently scheduled with course C126. S/U or letter grading.

Hungarian

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to upper-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.
Upper-Division Courses

101A-101B-101C. Elementary Lithuanian. (4–4–4) Lecture, three hours. Course 101A is recommended preparation for 101B, which is recommended preparation for 101C. Each course may be waived with consent of instructor. Basic courses in Lithuanian language. P/NP or letter grading.

102A-102B-102C. Advanced Lithuanian. (4–4–4) Lecture, three hours. Recommended preparation: course 101A is recommended preparation for 102B, which is recommended preparation for 102C. Each course may be waived with consent of instructor. P/NP or letter grading.

121. Survey of Hungarian Literature in Translation. (4) Lecture, three hours. Designed for students in general and comparative literature, as well as students interested in Finno-Ugric studies. Survey of main trends and contacts with other literatures. P/NP or letter grading.

187A. Advanced Tutorial Instruction in Hungarian. (2) Tutorial, one hour; laboratory, one hour. Preparation: two years of Hungarian and/or Hungarian placement test. Tutorial and guided independent study of advanced Hungarian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. May be repeated for credit with topic change. P/NP or letter grading.

187B-187M. Advanced Tutorial Instruction in Hungarian. (2, each) Tutorial, one hour; laboratory, one hour. Preparation: prior course in sequence or Hungarian placement test. Tutorial and guided independent study of advanced Hungarian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. May be repeated for credit with topic change. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Involves in-depth and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

197. Individual Studies in Hungarian. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assignment of credit made on recommendation of instructor. May be repeated for credit. Individual contract required. P/NP or letter grading.

Lithuanian Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Involves in-depth and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Polish Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.
Romanian

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

90. Introduction to Romanian Civilization. (4) Lecture, three hours. Introductory survey of social and cultural institutions of Romanian people and their historical background. P/NP or letter grading.

99. Student Research Program. (1 to 2) Research, one to two hours. Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

101A-101B-101C. Elementary Romanian. (5–5–5) Lecture, five hours. Course 101A is recommended preparation for 101B, which is recommended preparation for 102C. Each course may be waived with consent of instructor. Basic courses in Romanian language, P/NP or letter grading.

102A-102B-102C. Advanced Romanian. (5–5–5) Lecture, five hours. Recommended preparation: course 101C (may be waived with consent of instructor). Course 102A is recommended preparation for 102B, which is recommended preparation for 102C. Each course may be waived with consent of instructor. Differences between oral and written discourse, expansion of students’ general and academic vocabulary, and increase of range of grammatical structures for use in speaking and writing. Cultural information to be included in readings. P/NP or letter grading.

152. Survey of Romanian Literature. (4) Lecture, three hours. Lectures and readings in English. Survey of Romanian literature from Middle Ages to present. P/NP or letter grading.

187A. Advanced Tutorial Instruction in Romanian. (2) Tutorial, one hour; laboratory, one hour. Enforced requisite: course 102C or Romanian placement test. Tutorial and guided independent study of advanced Romanian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. May be repeated for credit with topic change. Concurrently scheduled with course 1180. S/U or letter grading.

280. Variable Topics in Polish Literature. (4) Seminar, three hours. Reading knowledge of Polish recommended. Topics include major writers and genres, or periods. May be repeated for credit with topic change. Concurrently scheduled with course 1180. S/U or letter grading.

32. Russia and Asia: Cultural Dialogues. (5) Lecture, three hours; discussion, one hour. Since end of Soviet Union, cultural and political flux within non-Christian lands neighboring Russia has increased dramatically. Given radical rejection of Russian heritage in most former Soviet territories, key distinctions in humanities have become unclear, including confusion between limits of Slavic and Near Eastern studies. Examination of relation of Russia’s culture to its borders; Caucasus, Central Asia, China, and Japan. P/NP or letter grading.

32A. Intensive Reading in Russian. (5) Lecture, three hours; discussion, one hour. Examination of Russian literature and world cinema. Topics include great Russian novelists and their cinematic adaptations, with focus on problems of perception and misperception. P/NP grading.

39. Inclusion in Russian Film. (5) Lecture, three hours; discussion, one hour; film screening, two hours. Key works, names, events, and concepts of Russian cinematic tradition. Development of skills in analyzing and interpreting films and acquisition of critical terminology of film studies. How film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. How cinema in Russia has created and contested national identity, how cinema has served interests of state, and how it has defied them. P/NP or letter grading.

38. Russian Literature and World Cinema. (4) Lecture, three hours; discussion, one hour. Examination of Russian literary masterpieces and their screen adaptations in various national cinematic traditions, with focus on problems of perception and misperception arising when literature is translated into cinema, and one national culture is viewed through the eyes of another. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

Russian

Lower-Division Courses

1. Elementary Russian. (5) Recitation, five hours; laboratory, one hour. P/NP or letter grading.

2. Elementary Russian. (5) Lecture, five hours; laboratory, one hour. Requisite: course 1 or Russian placement test. P/NP or letter grading.

3. Elementary Russian. (5) Lecture, five hours; laboratory, one hour. Requisite: course 2 or Russian placement test. P/NP or letter grading.

4. Intermediate Russian. (5) Lecture, five hours; laboratory, one hour. Requisite: course 3 or Russian placement test. P/NP or letter grading.

5. Intermediate Russian. (5) Lecture, five hours; laboratory, one hour. Requisite: course 4 or Russian placement test. P/NP or letter grading.

6. Intermediate Russian. (5) Lecture, five hours; laboratory, one hour. Requisite: course 5 or Russian placement test. P/NP or letter grading.

10. Intensive Elementary Russian. (12) Lecture, 19 hours. Intensive basic course in Russian language equivalent to courses 1, 2, 3, 5. P/NP or letter grading.

15A-15B. Accelerated Elementary Russian. (8–7) Recitation, five hours; laboratory, two hours. Material equivalent to courses 1, 2, 3. P/NP or letter grading.

19A. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

90. Introduction to Russian Civilization. (5) Lecture, three hours; discussion, one hour. Introduction to Russian culture and society from earliest times to 1917. P/NP or letter grading.

90B. Russian Civilization in 20th Century. (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 90B. Survey of literature, theater, cinema, television, press, music, and arts. Emphasis on contemporary period, with constant reference to Russian and early Soviet antecedents. P/NP or letter grading.

90BW. Russian Civilization in 20th Century. (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 90B. Survey of literature, theater, cinema, television, press, music, and arts. Emphasis on contemporary period, with constant reference to Russian and early Soviet antecedents. Weekly discussions focus on varied approaches to writing address class topics. Five short papers required. Satisfies Writing II requirement. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.
writing skills, increasing vocabulary, and developing speaking skills required for academic discourse. P/NP or letter grading.

101A-101B-101C. Third-Year Russian. (5–5–5) Lecture, three hours; discussion, two hours. Enforced requisite: course 6 or Russian placement test. Course 101A or Russian placement test is enforced requisite to 101B; course 101B or Russian placement test is enforced requisite to 101C. Advanced grammar, reading, and conversation, with strong multimedia component. P/NP or letter grading.

102A-102B-102C. Topics in Advanced/Superior Russian. (4–4–4) Lecture, three hours. Enforced requisite: course 101A, 101B, 101C or equivalent coursework as determined by department. Course 102A or Russian placement test is enforced requisite to 102B; course 102B or Russian placement test is enforced requisite to 102C. Discussion and composition, with emphasis on vocabulary development and review of selected grammar topics. Readings in fiction and nonfiction, films, and videos, and use of Internet. Each course may be taken independently and may be repeated for credit. P/NP or letter grading.

103A-103B-103C. Russian for Native and Near-Native Speakers. (4–4–4) Lecture, three hours. Course 103A is not required to 103B, which is not requisite to 103C. Improvement of oral and written language skills, emphasis on correct and diversified use of language and addressing individual grammatical difficulties. May be repeated for credit with topic and/or instructor change. 103A, Russian national identity. Readings in literature, philosophy, criticism, film. 103B, Literature and Film. Film adaptations of Russian literature. Readings and screenings. 103C, Special Topics.

107A-107B-107C. Russian for Social and Cultural Studies. (4–4–4) Lecture, three hours. Recommended preparation: third-year Russian. Lectures and readings in Russian. Exploration of texts and media in social sciences and culture, with emphasis on stress, perception, and Internet. Each course may be taken independently and may be repeated for credit. P/NP or letter grading.

108. Russian for Business: Language and Culture. (4–4–4) Lecture, three hours. Preparation: third-year Russian required. Emphasis on formal interpersonal communication of Russian state by Muscovy, Autocracy and its satellite principalities and towns; Mongol invasion; unification of Russian state by Muscovy, Autocracy and its Servitors; serfdom. P/NP or letter grading.

M118. History of Russia, Origins to Rise of Muscovy. (4) Same as History M127A. Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Kievan Russia and its culture, Appanage principalities and towns; Mongol invasion; unification of Russian state by Muscovy, Autocracy and its Servitors; serfdom. P/NP or letter grading.

110. Russian Flagship Program Abroad: Intensive Advanced Russian. (12) Lecture, 19 hours. Enforced requisite: courses 101A, 101B, 101C or equivalent coursework as determined by department. Taught in Russian. Designed for students with high proficiency in Russian who have completed seven-week course in Russian language covering reading, writing, speaking, listening, and grammar. Lectures on Russian history also included. Opportunity to interact with Russian speakers outside class and serve as volunteers. Part of Russian Flagship Program Abroad. May not be repeated for credit. Offered in summer only. Letter grading.

111A-111B-111C. Russian Flagship Program Abroad: Superior Russian. (5–5–5) Lecture, three hours. Enforced requisite: course 111 or equivalent coursework as determined by department. Course 111A is enforced requisite to 111B, which is enforced requisite to 111C. Designed for students with advanced proficiency. Development of skills in Russian phonetics, conversation, and grammar. Acquisition of advanced syntactical structures and expansion of vocabulary based on formal and interpersonal and presentational modes. Letter grading.

112A-112B-112C. Russian Flagship Program Abroad: Russian Literature and Culture. (4–4–4) Lecture, three hours. Enforced requisite: course 110 or equivalent coursework as determined by department. Course 112A is enforced requisite to 112B, which is enforced requisite to 112C. Taught in Russian. Critical reading, analysis, and discussion of Russian literature, with emphasis on Russian cultural and intellectual norms. Readings and essays, with emphasis on formal and academic writing. Letter grading.

113A-113B-113C. Russian Flagship Program Abroad: Professional and Academic Russian and Experiential Learning. (5–5–5) Lecture, three hours. Enforced requisite: equivalent coursework as determined by department. Course 113A is enforced requisite to 113B, which is enforced requisite to 113C. Taught in Russian. Use of discourse practices (speaking, listening, reading, and writing) to participate effectively in discussions of professional topics and situations outside of course. Opportunity to communicate in Russian in authentic contexts by participating in courses with local students, providing service to community, or interning in one business. Letter grading.

C124P. Studies in Russian Literature: Pushkin. (4) Lecture, three hours. Lectures and readings in English. Major works in all genres, including lyric poetry, narrative poems, plays, prose fiction, and selected letters. Concurrently scheduled with course C224P. P/NP or letter grading.

C124T. Studies in Russian Literature: Tolstoy. (4) Lecture, three hours. Lectures and readings in English. Early life and works; stories about the countryside and one major novel such as War and Peace or Anna Karenina. Concurrently scheduled with course C224T. P/NP or letter grading.

M127. Women in Russian Literature. (4) Same as Gender Studies M127. Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Introduction to alternative tradition of women’s writings in Russia and Soviet Union. Emphasis on images of women expressed over time and in function as compared with those found in works of contemporary male writers. P/NP or letter grading.

129. Animation and Music Video. (6) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Lectures and readings in English. Humanities have recently passed through so-called visual turn: traditional emphasis on language(s) in field have been reconsidered in light of society’s increasingly visual workings. New attitude toward our own changing culture (i.e., toward its future) has equal value if applied retrospectively to multiple cultures of one erstwhile empire. In territory where many tongues or traditions needed to be ironed out, visual often plays special role in social cohesion. Because of past politics and today’s profit-driven events, small fickle forms of visual narrative replace. Designed for juniors/seniors. P/NP or letter grading.

130A-130B-130C. Russian Poetry. (4–4–4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Lectures and readings in English. Humanities have recently passed through so-called visual turn: traditional emphasis on language(s) in field have been reconsidered in light of society’s increasingly visual workings. New attitude toward our own changing culture (i.e., toward its future) has equal value if applied retrospectively to multiple cultures of one erstwhile empire. In territory where many tongues or traditions needed to be ironed out, visual often plays special role in social cohesion. Because of past politics and today’s profit-driven events, small fickle forms of visual narrative replace. Designed for juniors/seniors. P/NP or letter grading.

130A-130B-130C. Russian Poetry. (4–4–4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Lectures and readings in English. Humanities have recently passed through so-called visual turn: traditional emphasis on language(s) in field have been reconsidered in light of society’s increasingly visual workings. New attitude toward our own changing culture (i.e., toward its future) has equal value if applied retrospectively to multiple cultures of one erstwhile empire. In territory where many tongues or traditions needed to be ironed out, visual often plays special role in social cohesion. Because of past politics and today’s profit-driven events, small fickle forms of visual narrative replace. Designed for juniors/seniors. P/NP or letter grading.

132C. Studies in Russian Literature: Dostoevsky. (4) Lecture, three hours. Lectures and readings in English. Use of discourse practices (speaking, listening, reading, and writing) to participate effectively in discussions of professional topics and situations outside of course. Opportunity to communicate in Russian in authentic contexts by participating in courses with local students, providing service to community, or interning in one business. Letter grading.

M132. Comparative Media Studies. (4) Same as Comparative Literature M132. Lecture, three hours. History, form, and function of various media. Grounded in political and commercial experience of eastern Europe, comparative investigation of media technologies, today’s burgeoning markets, and yes-
terday’s tragic abuses. Development of media form(s) and content across various times, places, and cultures, with special attention to Slavic phenomena. Letter grade.

C170. Russian Folklore. (3 to 5) Lecture, three hours. Lectures with course 212B. General introduction to Russian folklore, including survey of genres and related folkloric phenomena. Concurrently scheduled with course C240. P/NP or letter grading.

187A. Advanced Tutorial Instruction in Russian. (2) Tutorial, one hour; laboratory one hour. Enforced requisites: course 102C or Russian placement test. Tutorial and guided independent study of advanced Russian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. May be repeated for credit with topic change. P/NP or letter grading.

187B–187M. Advanced Tutorial Instruction in Russian. (2) Each tutorial, one hour; laboratory, one hour. Preparation: previous course in sequence or Russian placement test. Tutorial and guided independent study of advanced Russian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. May be repeated for credit with topic change. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grade.

201A–201B–201C. Russian: Vocabulary, Pronunciation, Style. (4–4–4) Lecture, three hours. Requisite: course 102C or Russian placement test. Practice in pronunciation and analysis of texts with focus on vocabulary, pronunciation, and style, respectively, in three consecutive terms. S/U or letter grading.

211A. Literature of Medieval Russia. (4) Lecture, three hours. Required for MA (literature). Survey of the literature from its beginning through the Kievan and Muscovite periods up to the 18th century. Letter grade.

Survey devoted to emergence of critical and psychological realism, beginning with early works of Turgenev, Goncharov, and Dostoeysievsky, moving to major novels of Tolstoy, Dostoeysievsky, and Saltykov-Shchedrin, and concluding with works of the presym- bols, period, especially short stories of Chekhov. S/U or letter grading.

213A. 20th-Century Russian Literature. 1890 to 1920. (4) Lecture, three hours. Required for MA (literature). Lectures and readings in major literary trends of modernist period, such as decadence, symbolism, futurism, acmeism, and ornamental school. Analysis of representative works of, for example, Bulgakov, Klychevsky, Pasternak, Platonov, and others. S/U or letter grading.

223AD. Studies in Russian Literature: Dostoysievsky. (4) Lecture, three hours. Lectures and readings in English. In-deep reading of major fictional works such as Crime and Punishment, Notes from the Underground, and The Brothers Karamazov. Concurrently scheduled with course C124D. S/U or letter grading.

223MG. Studies in Russian Literature: Gogol. (4) (Formerly numbered C223G.) Same as Ukrainian C223G. Lecture, three hours. Lectures and readings in English. Short stories, novel Dead Souls, and selected plays. Concurrently scheduled with course CM124G. S/U or letter grading.

224P. Studies in Russian Literature: Pushkin. (4) Lecture, three hours. Lectures and readings in English. Major works in all genres, including lyric poetry, narrative poems, plays, prose fiction, and selected letters. Concurrently scheduled with course C124P. S/U or letter grading.

224T. Studies in Russian Literature: Tolstoy. (4) Lecture, three hours. Lectures and readings in English. Early and late stories and novellas, excerpts from the diaries and one major novel such as War and Peace or Anna Karenina. Concurrently scheduled with course C124T. S/U or letter grading.

2240. Russian Folklore. (3 to 5) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey ofgenres and related folkloric phenomena. Concurrently scheduled with course C1240. S/U or letter grading.

264. History of the Russian Literary Language. (4) Lecture, three hours. Requisites: course 204, Slavic 201. Evolution of literary Russian from the 11th to 20th centuries, with repeated for credit with topic and/or instructor change. P/NP or letter grading.

270. Russian Poetics. (4) Lecture, three hours. Introduction to technical study of Russian poetics and verification, with attention to metrics, stanza forms, rhyme, and development of various verse types from the 18th into the 20th century.

C277. Studies in Russian Literature: Nabokov. (4) Lecture, three hours. Lectures and readings in English. Russian novelist (The Gift), American novelist (Lolita), autobiographer (Speak Memory), and critic. Concurrently scheduled with course C124N. S/U or letter grading.

292. Seminar: 19th-Century Russian Literature. (4) Seminar, three hours. Requisites: courses 212A, 212B. Selected authors and works from 19th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

293. Seminar: 20th-Century Russian Literature. (4) Seminar, three hours. Requisite: course 213A. Selected authors and works from 20th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser. S/U or letter grading.

294. Seminar: Russian Literary Criticism. (4) Seminar, three hours. Requisites: courses 211B, 212A, 212B, 213A. Detailed study of specific school of literary criticism, single literary critic, or period in Russian literary history as reflected in literary criticism. Simultaneous or similar phenomena in literary criticism. In West. May be repeated for credit with consent of instructor and graduate adviser. S/U or letter grading.

296. Seminar: History of Russian Culture. (4) Discussion, three hours. Reading and discussion on selected topics in history of Russian culture.

**Serbian/Croatian**

**Lower-Division Courses**

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript, P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for a maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consent Undergraduate Research Center. May be repeated. P/NP grading.
Upper-Division Courses

101A-101B-101C. Elementary Serbian/Croatian. (5-5-5) Lecture, five hours. Course 101A is recommended preparation for 101B, which is recommended preparation for 101C. Each may be waived with consent of instructor. Basic courses in Serbian/Croatian. P/NP or letter grading.

102A-102B-102C. Advanced Serbian/Croatian. (4-4-4) Lecture, three hours. Recommended preparation: course 101B may be waived with consent of instructor. Course 102A is recommended preparation for 102B, which is recommended preparation for 102C. Each may be waived with consent of instructor. P/NP or letter grading.

154. South Slavic Literature. (4) Lecture, three hours. Lectures and readings in English. Survey of South Slavic literature from Middle Ages to the present. P/NP or letter grading.

167A. Advanced Tutorial Instruction in Serbian/Croatian. (2) Tutorial, one hour; laboratory, one hour. Enforced requisite: course 102C or Serbian/Croatian placement test. Tutorial and guided independent study of advanced Serbian/Croatian: advanced conversational vocabulary development, review of selected grammar topics. May be repeated for credit with topic change. P/NP or letter grading.

167B-167M. Advanced Tutorial Instruction in Serbian/Croatian, (2) Each Tutorial, one hour; laboratory, one hour. Preparation: prior course in sequence or Serbian/Croatian placement test. Tutorial and guided independent study of advanced Serbian/Croatian: advanced conversational vocabulary development, review of selected grammar topics. May be repeated for credit with topic change. P/NP or letter grading.

186. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. A reading seminar on topics of general interest to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

186HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

CM114. Teaching and Learning of Heritage Languages. (4) Same as Asian CM124 and Near Eastern Languages CM114.) Lecture, three hours. Consideration of issues relevant to heritage language learners (HLL) and to heritage language (HL) instruction. Readings and discussion on such topics as definitions of HLL and HL, acquisition of grammatical, pronunciation, sociolinguistic, and sociocultural profile of HLs, particularly HLL groups most represented among UCLA students; institutional and instructor attitudes toward HLLs; impact of modern language expectations on IL curriculum and teaching approaches; similarities and differences between HLLs and foreign language learners (FLs) regarding teaching methods and materials, diagnostic testing and needs analysis; use of oral/aural proficiency as springboard for literacy instruction; optimization of instruction of mixed HL and FL classes. Action research component included. Co-requisite: Concurrently scheduled with course CM214. P/NP or letter grading.

188A. Introduction to Eurasia. (2) Lecture, 90 minutes. Experimental or temporary courses in East European and Eurasian studies, such as those taught by resident or visiting faculty members, introductory to upper-division courses. May be repeated for credit with topic change. P/NP or letter grading.

188B. Languages of Eastern Europe and Eurasia. (2) Lecture or tutorial, 90 minutes. Program-sponsored experimental or temporary courses, such as those taught by resident or visiting faculty members, introductory to upper-division courses. May be repeated for credit with topic change in language or language level. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

191TA. Senior Capstone Thesis in Slavic Languages and Literatures. (2-2) Seminar, three hours. Course 191TA is enforced requisite to 191TB, which is enforced requisite to 191TC. Limited to senior departmental majors. Planning and completion of senior capstone thesis. Introduction to research methods and presentation skills. Use of student target language for research required. Oral and written presentations required. Letter grading.

191TB-191TC. Senior Capstone Thesis in Slavic Languages and Literatures. (2-4) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

198A. Honors Research in Slavic, East European, and Eurasian Languages and Literatures. (4) Tutorial, three hours. Limited to senior departmental honors program students. Development of research bibliography and survey of literature in field of Slavic, East European, and Eurasian languages and cultures. Topics chosen through consultation with faculty mentor. Students meet regularly with faculty adviser to report on progress and other activities. May be repeated for credit. Individual contract required. P/NP or letter grading.

198B. Honors Research in Slavic, East European, and Eurasian Languages and Literatures. (4) Tutorial, three hours. Enforced requisite: course 198A. Limited to senior departmental honors program students. Research and writing field of Slavic, East European, and Eurasian languages and cultures under direct supervision of faculty mentor. Topics chosen through consultation with faculty mentor. Students meet regularly with faculty adviser to report on their research, discuss drafts of thesis chapters, and write. Individual contract required. Letter grading.

198C. Honors Research in Slavic, East European, and Eurasian Languages and Literatures. (4) Tutorial, three hours. Enforced requisite: courses 198A, 198B. Limited to senior departmental honors program students. Completion of honors thesis in field of Slavic, East European, and Eurasian languages and cultures. Topics
Graduate Courses

200A. Literary Proseminar. (4) Seminar, three hours. Required for MA (literature). Designed to prepare incoming graduate students for scholarly work by introducing them to resources (departmental, intramural, and extramural), methodologies, and techniques for analysis of literary materials and cultural studies. Letter grading.

201. Introduction to Church Slavic. (4) Lecture, three hours. Required for MA (literature). Introduction to the alphabet, phonology, and grammar of Slavic languages and to research tools and methodologies associated with Church Slavic. Letter or S/U grading.

193. Directed Research in Slavic Languages and Literatures. (2 to 8) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Ukrainian

Lower-Division Courses

19. Flat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

189. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to upper-division lecture course. In-depth study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

Upper-Division Courses

101A-101B-101C. Elementary Ukrainian. (5–5–5) Lecture, five hours. Course 101A is recommended preparation for 101B, which is recommended preparation for 101C. Each course may be waived with consent of instructor and graduate advisor. Concurrently scheduled with course CM214G. P/NP or letter grading.

102A-102B-102C. Advanced Ukrainian. (4–4–4) Lecture, three hours. Recommended preparation: course 101C (may be waived with consent of instructor). Concurrently scheduled (same as Russian CM214G.) Lecture, three hours. Lectures and readings in English. Short stories, novel Dead Souls, and selected plays. Concurrently scheduled with course CM214G. P/NP or letter grading.

152. Ukrainian Literature. (4) Lecture, three hours. Lectures and readings in English. Survey of writers, literary trends, and issues in Ukrainian literature from the late 18th century to the present. Special attention to works of such major figures as Kol’tsavyk, Shevchenko, Franko, Ukrainka, and Tychyna.

C180. Variable Topics in Ukrainian Literature. (4) Seminar, three hours. Reading knowledge of Ukrainian recommended but not required. Topics include major writers, genres, or periods. May be repeated for credit with topic change. Concurrently scheduled with course C280. P/NP or letter grading.

187A. Advanced Tutorial Instruction in Ukrainian. (2) Tutorial, one hour; laboratory, one hour. Preparation: two years of Ukrainian and/or Ukrainian placement test. Tutorial and guided independent study of advanced Ukrainian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. S/U grading.

187B-187M. Advanced Tutorial Instruction in Ukrainian. (2 each) Tutorial, one hour; laboratory, one hour. Preparation: prior course in sequence or Ukrainian placement test. Tutorial and guided independent study of advanced Ukrainian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. S/U grading.

189A. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. In-depth study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designated as adjunct to upper-division lecture course. In-depth study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

Graduate Course

C280. Variable Topics in Ukrainian Literature. (4) Seminar, three hours. Reading knowledge of Ukrainian recommended but not required. Topics include major writers, genres, or periods. May be repeated for credit with topic change. Concurrently scheduled with course C180. S/U or letter grading.

Overview
The Division of Social Sciences is home to leading researchers working to advance understanding of human societies around the globe. With over 250 faculty members housed in more than 15 departments and programs, the division encourages students to explore diverse perspectives and approaches to the study of social life.

The Social Science Interdepartmental Program offers the Master of Social Science (MSS) self-supporting degree. Drawing from current theories, methods, and professional practices from across the social sciences, students develop proficiency with quantitative and qualitative research methods used to address complex social problems. The intensive one-year curriculum emphasizes creative problem-solving and collaborative research practices. Graduates will be prepared for academic and professional careers.

Graduate Major
Master of Social Science Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Social Science Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

110A. Social Science in Context: Perspectives and Methods in Study of Culture and Society. (3) Lecture, three hours. Introduction to social science perspectives and methods for study of culture and society through combination of theoretical discussions and practical exercises. Students gain understanding of interaction of persons, societies, cultures, environments, and time. Examination of relationships between language, culture, and society to gain insights into processes of social reproduction of identities, power relations, and inequality. Students are exposed to working parts of social research: ethics of studying people and communities, gathering and analyzing of data (e.g., observations, interviews, and surveys), and interpretation and presentation of findings. Students gain informed views and attitudes towards just society, intercultural understanding, informed and active citizenship, ethical research practices, and lifelong learning. Letter grading.

110B. Social Science in Context: Understanding New Zealand from Colonialism to Neoliberalism. (4) Lecture, eight hours (four weeks). Offered as part of summer UCLA Travel Study Program to New Zealand. Examination of the history of New Zealand, focusing on its current political and economic context. The historical and social processes that have shaped the modern nation, the structure of New Zealand's economy, and its place in the world economy. Students gain greater insight into social and political relations and events elsewhere in the world, including U.S. Letter grading.

188. Academic Innovation in Industry. (1) Lecture, one hour (prerequisite; concurrent; as needed) to study disciplinary knowledge to industry problems and technological trends. Students build skills to enable them to create novel ways of meeting challenges, build network intelligence, and communicate their ideas and expertise. Students also learn problem-solving techniques like lean startup approach. Uses case study approach to show how social scientists have connected with recent technology trends to produce impactful innovation. P/NP grading.

Graduate Courses

M240. Data and Society. (4) (Same as Digital Humanities M221.) Seminar, three hours. Introduction to way data and computing technologies increasingly play pivotal role in social sciences. Students pose critical questions about social impact of data, while also gaining literacy in engaging digital and data tools. Students learn to recognize historically and institutionally produced biases in science and scientific evidence. Emphasis is on how to work with data for social justice aims. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel. Apprentice Shadow, cooperate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated. Credit/No Credit grading.

401. Quantitative Social Science Research Methods. (4) Seminar, three hours. Introduction to major components of research projects, focusing on research questions, theoretical frameworks, and research design. Students design feasible research plan for individual project. Students identify research question; identify existing data for original analysis; compare theoretical frameworks for social scientific analysis of data; assess relevant evidence and literature; and explore approaches to data analysis. Students submit assignments, and complete research proposal. Letter grading.

410. Engaged Social Science. (4) Seminar, three hours. Exploration of theory and practice of engaged social scientists engaging its historical and contemporary role from policy studies and related fields to more activist modalities of critique and intervention. Drawing on classic and contemporary studies in sociology, anthropology, political science, environmental studies, and social justice, to engage students in larger debates about politics of knowledge in relation to issues, such as poverty, racism, public health, refugees, gang culture, gender hierarchies, public education, and citizenship. Letter grading.

419. Data Analysis. (4) Lecture, three hours. Workshop in which students develop research and analysis skills related to establishing and executing data analysis plan. Students engage in intensive peer-review process, working collaboratively in small groups. Students receive detailed feedback from instructor, teaching assistants, and faculty reader, and are expected to routinely revise their work. Students refine their presentation skills and prepare three- to five-minute presentation. Letter grading.

420. Research Design and Analysis. (4) Seminar, three hours. Guided completion of major research paper (MRP). Students receive detailed feedback from instructor, revise literature review, finalize analysis, tighten rhetoric, and improve organization of manuscript to transform it into final research paper. Letter grading.

430. Community-Based Research. (4) Lecture, three hours; fieldwork, two hours. Study of principles, ethics, and methods of community-based research (CBR), and place and purpose of scholarly inquiry. Working in teams, students conduct small-scale research projects in collaboration with local community organizations. Teams work closely with instructors and organization agents on all aspects of research design,
execution, and data analysis. Students apply quantitative and qualitative research methods skills acquired in courses 401 and 402 to research projects. Attendance at research site meetings, team meetings, and weekly on-campus class meetings required. Each team produces and submits final research report to community partner by end of quarter. Letter grading.

430A. Community-Based Research, Part 1. (4) Lecture, three hours; fieldwork, two hours. Part 1 of 2-part series. Students learn principles, ethics, and methods of community-based research (CBR), and place and purpose of scholarly inquiry. Working in teams, students conduct small-scale research projects in collaboration with local community organizations. Research projects are selected in consultation with instructor and community organization to be completed within quarter. Teams work closely with instructors and organization agents on all aspects of research. Teams develop research design, data collection methods and protocols, recruit participants, and engage in data collection. Students apply quantitative and qualitative research methods skills acquired in courses 401 and 402 to their research projects. Students are expected to attend meetings at research sites, team meetings, and weekly class meetings on campus. Letter grading.

430B. Community-Based Research, Part 2. (4) Lecture, three hours; fieldwork, two hours. Part 2 of 2-part series. Focus on data analysis and writing of final report. Working in teams, students develop data analysis plans, identify units of analysis, develop coding scheme, determine statistical inquiries, and conduct data analysis (including statistical analyses of quantitative data and coding of qualitative data) and interpretation of results. Work is divided fairly among team members with each team member contributing based on their skills and talents. Teams work closely with instructors and organization agents on all aspects of research and write-up. Students are expected to attend all meetings at research sites, team meetings, and weekly class meetings on campus. Each team produces and submits final research report to instructor and community partner. Letter grading.

Stephanie B. Santana, PhD (Comparative Literature)

Overview
The Social Thought minor helps students to think better: to think more deeply and more critically, drawing on the intellectual resources of major thinkers from around the world. Emphasizing social and political thought from the 17th century to today, students read widely to develop an original argument about social life, culminating in a thesis project that is an original contribution to scholarship.

The minor builds on lower-division introductory exposure to the history of modern ideas as embodied in a number of key texts by significant thinkers such as Darwin, Descartes, de Beauvoir, Du Bois, Freud, Hobbes, Locke, Marx, Mill, Nietzsche, Rousseau, Said, Smith, Weber, and Wollstonecraft. Building upon these foundations, students are encouraged to read widely and make connections to intellectuals who are not traditionally considered part of the canon of North Atlantic thought, especially thinkers from the Global South, indigenous communities, and historically marginalized groups.

Insisting that the best way to develop your thoughts is to write about them, the minor culminates in a two-term capstone project, a thesis of at least 5,000 words, under the direction of a UCLA faculty mentor. Students from all majors are encouraged to join the Social Thought minor. The Social Thought minor is about asking big questions about big ideas, and writing answers to those questions.

Undergraduate Minor
Social Thought Minor
Admission
The Social Thought minor is limited to students who formally apply and are admitted. To apply, students must meet with the academic adviser, submit an application, a letter of recommendation from a faculty mentor, and an application essay to the College Academic Counseling Office, A316 Murphy Hall. For more information, see the minor website.

To enter the minor, students must have an overall grade-point average of 2.0 or better and apply for admission only after successfully completing the following lower-division requirements: Clusters 21A and 21B, or two courses from German 56, Honors Collegium 20, 21W, 55, 57, 83W, Philosophy 6, Political Science 10, Sociology 10.

The Minor

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. No more than two courses (8 to 10 units) may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Social Thought
Lower-Division Courses
19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

88. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses
189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

190A-190B. Research Colloquia in Social Thought I, II. (2–2) Seminar, two hours. Corequisite for course 190A course 190A; for 190B: course 199B. Limited to juniors/seniors. Required of students in Social Thought minor. Designed to bring together students undertaking supervised senior thesis work in seminar setting with one or more faculty members to discuss their work or related work in Social Thought minor. Led by one supervising faculty member. Course 190A may be repeated for credit. P/NP grading.

195A-199B. Directed Research or Senior Thesis in Social Thought I, II. (4–4) Tutorial, to be arranged. Corequisite for course 195A course 195A; for 199B: course 190B. Limited to juniors/seniors. Required of students in Social Thought minor. Supervised indi-
Overview

The primary objectives of the Department of Social Welfare graduate program are to prepare leaders for the profession of social work and to develop the empirical base for all facets of practice. In response to changing demographic trends and the emergence of new social problems, the department provides leadership in the areas of policy, practice, and research and in the development of an innovative curriculum for training students and professionals to meet the service needs of a multicultural clientele.

The educational program is based on the premise that all students need to acquire a common body of knowledge and basic skills, and a common understanding of the philosophy and values of the profession. These then form a sound foundation for the development of more specialized knowledge and skills along the lines of each student’s interests and the needs of the field.

Students are encouraged to take advantage of the resources within UCLA by selecting elective courses in related disciplines. In addition, as a department within the Luskin School of Public Affairs, the program affords students instructional opportunities in the other affiliated departments—Public Policy and Urban Planning.

Beyond national opportunities in the profession of social work, there is increasing demand for qualified and experienced social workers to serve in the international field, where many social service programs are conducted under the auspices of the United Nations, the U.S. government, and national sectarian organizations. Graduates of the doctoral program generally secure appointments at major universities or research centers.

The challenge to the department, the profession, and those who join us as students is to prepare to forge the paths, build the bridges, and shape the future to ensure that all individuals, families, and communities enjoy better education, better health care, better job training, and better economic futures.

Graduate Majors

Master of Social Welfare

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Concurrent Degree Program

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

- Master of Social Welfare/Asian American Studies MA
- Master of Social Welfare/Juris Doctor
- Master of Social Welfare/Master of Public Health
- Master of Social Welfare/Master of Public Policy

Social Welfare PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Social Welfare

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

100A. Introduction to Social Welfare: Policies and Programs. (4) Lecture, four hours. Origin and development of major U.S. social welfare programs and policies guiding them, with emphasis on analysis of policy developments/issues related to provision of social welfare services. Study of historical and current responses of profession to major social problems. P/NP or letter grading.

100B. Social Welfare Policy: Overview. (4) Lecture, four hours. Requisite: course 100A. Review of existing policy regarding major social issues in field of social welfare. Examination of discrepancy between need and capacity of social agencies to address need. Exploration of differential impact of policy on various populations. P/NP or letter grading.

101. Social Welfare in Multicultural Society. (4) Lecture, four hours. Social policy viewed from perspective of various cultural groups. Students to become aware of their own cultural perspective and learn to recog-
understand how events, successes, and losses at one stage of life can have important effects later in life. Focus on individuals as they age within one particular sociocultural context.

M110. Inequality and Democracy: Analysis and Praxis of Public Problems. (4) (Same as Urban Planning M110.) Lecture, three hours; discussion, one hour. Analysis and praxis of public problems. Taking up social theory, political economy and critical thinking—biopsychosocial approach that is based on recognition that aging is inherently interdisciplinary phenomenon, and life course perspective that is distinguished by analytical framework it provides for understanding the interplay between human lives and changing social structures, and allows students to understand social work practice in new ways. Letter grading.

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) (Same as Chicano/a and Central American Studies M108B, Gender Studies M104C, Geography M104C, and Public Affairs M131.) Lecture, four hours. Exploration of complexity of variables related to diversity of aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging. In multidisciplinary perspective utilizing faculty from variety of fields to address issues of diversity. Letter grading.

M104D. Public Policy and Aging. (4) (Same as Gerontology M104D.) Lecture, four hours. Examination of theoretical models and concepts of policy process, along with policy and policy-making processes. Description of history of contemporary aging policy. Exploration of current policy issues affecting elderly. P/NP or letter grading.

M104E. Social Aspects of Aging. (4) (Same as Gerontology M104E.) Lecture, four hours. Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around key aspect of social gerontology. P/NP or letter grading.

105. Social Welfare Policy in Modern America: Historical Perspectives. (4) Lecture, three hours; outside study, nine hours. Historical overview of American social policy dealing with three core societal problems: poverty, sickness, and joblessness. Programs developed by governments to ameliorate these problems have typically been public insurance programs or cash transfers such as unemployment insurance, welfare, and Social Security. Students trace the evolution of these programs and their constituent elements. Examination of changes in specific agencies and roles under instruction of a faculty member and a UCLA faculty member. P/NP or letter grading.

M140. Introduction to Study of Aging. (4) (Same as Psychology M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging—biological, social, psychological, and humanistic. Introduction to range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

M142X. Intergenerational Communication across Lifespan. (4) (Same as Sociology M142X and Social Welfare M129X.) Lecture, three hours; fieldwork, one hour. Limited to juniors/seniors. What do you say to your parents in conversation? How do you talk to your grandparents? Does your family talk well to one another as group? How do you communicate well with boss who is 30 years older than you? Individuals of all ages interact with one another, often with significant consequences throughout their lives. Introduction to psychoanalytic, interpersonal, and societal issues related to intergenerational communication across lifespan. Letter grading.

M151. Child Welfare Policy in America. (4) (Formerly numbered 151.) (Same as Public Affairs M124.) Lecture, three hours. Limited to juniors/seniors. Examination of public child welfare system in the U.S. Review of social policies and programs for children, including discussion of orphanages, foster care, and adoptions. Transformation of public child welfare system over the last 200 years. Child welfare reform on child policies and programs in the U.S. Major programs designed to provide safety net for disadvantaged children, including foster care, child care, support and children’s allowance programs. Review of research and analysis in this area. Overview of social policies and programs that impact children in the U.S. with respect to other countries. P/NP or letter grading.

162. Health Policy and Services. (4) Seminar, three hours. Limited to juniors/seniors. Contemporary issues in healthcare financing and delivery and historical perspective on these issues. Role of government in healthcare and ways controversy about this role continues to shape and constrain public policy in health. Major public programs, notably Medicare and Medicaid, and their relationship to issues of access and cost for diverse vulnerable populations. Various public and private approaches to healthcare reform and ways of thinking about their predicted impact, cost, and political feasibility. Issues in healthcare reform, including chronic illness and debate about public and private approaches to long-term care reform. Social work roles in healthcare policy and practice. P/NP or letter grading.

163. Prevention of Risky Substance Use and Related Problems. (4) Lecture, four hours. Limited to juniors/seniors. Prevention of substance use and related harms from legal and illegal substances is major concern on college campuses, community centers, and schools. Examination of research related to patterns of drug use and related harm (such as crime and mental health disorders) and effectiveness of interventions to reduce these harms. Through examples, students explore evidence-based programs and policies, evaluation of effectiveness of evidence-based interventions to increase student knowledge, skills, and expertise in determining effective strategies for reducing drug use and related harm, using most up-to-date information. P/NP or letter grading.

164. HIV Prevention in U.S. and Developing World. (4) Lecture, four hours. Limited to juniors/seniors. Examination of various approaches to HIV prevention, drawing on infectious disease paradigms from public health and theories of behavior change from fields of psychology, sociology, and communications. Sexual health education interventions, community-based prevention programmes and policies, evaluation of effectiveness of evidence-based interventions to increase student knowledge, skills, and expertise in determining effective strategies for reducing drug use and related harm, using most up-to-date information. P/NP or letter grading.

M165. Disability Policy and Services in Contemporary America. (4) (Same as Disability Studies M130 and Gerontology M165.) Lecture, three hours. Limited to juniors/seniors. Growing numbers of people of all ages with disabilities are leading active and productive lives in American communities. Many others are struggling to lead such lives. Who are people with disabilities in contemporary America? How does our U.S. respond to these needs? How do people respond to the disability demands made over time by disability advocates? How has government addressed demands of advocates for various disability populations? What do these demands mean for the future? How do these demands impact policy in the future? How do these demands continue to shape and constrain public policy in health? How do demographic, economic, and political factors influence public and private policies and programs? Letter grading.
188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 885 course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Letter grading. Corequisite content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors and departmental honors programs. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

191. Variable Topics Research Seminars: Social Welfare. (4) Seminar, three hours; outside study, nine hours. Examination in depth of particular subfields of social welfare (e.g., child welfare, children and youth, nonprofit, health, mental health). Limits of investigation set by individual instructor. May be repeated for credit with topic change. Letter grading.

194. Internship Seminars: Social Welfare. (1) Seminar, one hour; outside study, three hours. Corequisite: course 194S. Open to freshmen. Introduction to topics relevant to psychosocial determinants of children’s well-being. Emphasis on resource children and families, with opportunity to gain breadth and depth of knowledge in seminar setting. May be repeated for credit. P/NP grading.

195. Community Internships in Social Welfare. (2 or 4) Tutorial, four hours. Corequisite: course 194. Open to freshmen. Introductory course in community-based child health and advocacy. Students learn about community resources for children and families through service learning experience and work with pediatric patients and families in UCLA pediatric unit. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Letter grading. Corequisite content noted on transcript. P/NP grading.

199. Directed Research in Social Welfare. (2 or 4) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Capping paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

203A-203B-203C. Integrative Seminars. (4–4–4) Seminar, two and one half hours. Integrative courses that bring together theory and practice of social work in various selected areas of profession. Includes identification of problem areas and populations at-risk requiring further examination. S/U or letter grading.

M203X. Special Topics in Public Affairs. (4) Same as Public Policy M201C and Urban Planning M210A. Seminar, three hours; outside study, nine hours. Advanced seminar on emerging issues across public policy, social welfare, and urban planning. May be repeated for credit. S/U or letter grading.

M206A. Homelessness: Housing and Social Service Issues. (4) Same as Urban Planning M270L. Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of current status of homelessness; who homeless are, what social services and housing are available, and existing and proposed programs—appropriate architecture, management, and sources of funding. Outside speakers include providers of services to homeless. Letter grading.

201E. Foundations of Social Work Practice II. (4) Lecture, two and one half hours. Corequisite: course 401B. Weighing and carrying out evidence-supported practices based on differential assessment of people and their contexts. Topics include intervention approaches: case management, motivational interviewing, crisis intervention, cognitive, task-centered, and solution-focused therapies, as well as interventions appropriate for family functioning, small group processes, and environmental modification (advocacy and community organization). Continued evaluation of outcomes. Letter grading.

210C. Foundations of Social Work Practice III. (4) Lecture, two and one half hours. Introductions to sociological, theoretical, and empirical social work practice. Core concepts of social work practice in organizational, community, and policy settings. Exploration of leadership style and development of personalized group work skills. Role of macro practice in agency-based social work in advancing strategies of organizational and social change. Interface and interaction among policy decisions, community needs, and program planning. Policies and issues influence formation, implementation, and evaluation of social welfare programs, policies, and services. Analysis of social, economic, and political context of community practice in order to work effectively with communities. Letter grading.

211B. Human Behavior in Social Environment: Theoretical Perspectives in Social Work and Social Welfare II. (4) Lecture, two and one half hours. Concerted study of theories of social function focusing on covering various perspectives on roots and significance of racism and other forms of oppression in U.S. (and other societies) today. Forces contributing to initiation and maintenance of oppression and inequality across social categories such as race, ethnicity, gender, sexuality, religion, ability, and age. Letter grading.

213A. Social Welfare Research Methods. (4) Lecture, two and one half hours. Review of various research methodologies, including experimental and quasi-experimental designs, survey research methods, qualitative methods, and single subject and group-based research designs. Emphasis on applying research pertaining to social welfare and social science research. Students learn and practice formulating research questions, research questions, and hypotheses and learn how to critically review theory and research. Measurement, sampling procedures, and basic descriptive statistics. Letter grading.

213B. Applied Statistics in Social Welfare. (4) Lecture, two and one half hours; discussion, one hour. Core statistics course builds on research methods taught in course 213A, and designed to help students develop basic understanding of descriptive and inferential statistical approaches. Introduction to statistical reasoning, with emphasis on how data analysis and interpretation can help us understand world. Topics include numerical and graphical summaries of data, data acquisition and experimental design, probability, hypothesis testing, confidence intervals, correlation, and regression. Letter grading.

214A. Foundations of Social Welfare Policy. (4) Lecture, two and one half hours. Overview of key areas of social welfare policy. Roots of American social welfare policy, with examination of how the policy has evolved and how to present day. Specific events and important individuals that have influenced public policy affecting vulnerable populations, such as racial and ethnic minorities, women, the poor, and other diverse populations. Examination of role of social research in informing social welfare policy. Letter grading.

214B. Leadership for Social Change. (4) Lecture, two and one half hours. Examination of leadership and social policy elements for effective social change in dynamic and diverse society. Builds on foundations of social welfare history and policy development. Examination of elements of policy advocacy and competencies for effective social work leadership in organizational and community settings and integration of research and theory in addressing and resolving complex social issues. (Same as Urban Planning M231.) Lecture, three hours; outside study, nine hours. Conceptually, focus on interplay between three of the institutional complexes of modern globalizing societies and organizations that operate within them: state, market, and civil society. Study moves between abstract theory and concrete examples, offers sense of where these institutions and organizations have come from, and helps chart their present trajectories. From perspective of governance, assessment of roles and configurations of institutions and organizations to address today’s challenges. S/U or letter grading.

223. Seminar: Social Work Profession. (2) Seminar, two hours. Nature and role of social work in contemporary society; relationships with other professions; probable future trends in profession; social work ethics, professional organizations, certification licensing; professional responsibility continued self-critique and improvement of professionalism. S/U grading.

229A. Craft of Social Welfare Scholarship I. (4) Lecture, three hours; outside study, nine hours. Limited to PhD students. Exploration of one problem for study—its history, current state of knowledge about why problem exists, and ways of thinking about it. Survey of several problems and alternative ways in which problems have been conceptualized and studied to understand how scholars use theory and empirical evidence to advance what is known, what is yet unknown, where there are important gaps in understanding particular problems, and what might be done to solve them. Letter grading.
810 / Social Welfare

229B. Craft of Social Welfare Scholarship II. (4) Lecture, three hours; outside study, nine hours. Enforced requisite: course 229A. Limited to PhD students. Continued narrative in student focus on one social welfare research project, moving from understanding of evolution and context of general problem to more detailed and intensive review of research literature on specific researchable question to identify one or more critical gaps in knowledge to explore. Discussion of different methods of summarizing research literature, identifying seminar study and interpreting contradictory findings. Regular meetings to discuss ongoing work and to encourage students to review their work with their faculty advisers and/or other mentors with expertise in their problem areas. Letter grading.

229C. Craft of Social Welfare Scholarship III. (2) Lecture, 90 minutes; outside study, four and one half hours. Enforced requisite: course 229B. Limited to PhD students. Focus on craft of scholarly writing for publication to help students develop effective narrative frame for presentation, make choices about extent of detail and shape of literature review, and achieve cogent presentation and conclusion. Consideration of elements of effective professional writing. Letter grading.

231A. Family Systems Interventions. (4) Lecture, two and one half hours. Application of theories and techniques to work with couples and families in a social work practice. Examples of social work practice with couples and families may include developing relationship skills for those struggling with mental illness; support for family caregivers of impaired or frail elderly; parent education and skill development for welfare recipients; individual, couple, and family interventions for victims of abuse; bereavement support groups. Seminar helps students to recover from experiences with substance abuse, domestic violence, sexual difficulties, and more. S/U or letter grading.

231B. Advanced Social Welfare Practice. (4) Lecture, two and one half hours; outside study, nine hours. Corequisite: required social work practicum. Advanced-level, critical analysis of theories, concepts, and principles underlying social casework practice. Specific attention to deviation and stress as conditions affecting functioning of individuals and groups and to diagnostic knowledge and competence required in rehabilitation and prevention. S/U or letter grading.

231C. Advanced Social Welfare Practice: School Social Work. (4) Lecture, two and one half hours; outside study, nine hours. Integration of theory and practice as they pertain to work in school settings. Biopsychosocial/ecological assessment of students (including, but not limited to, differences due to ethnic and/or cultural diversity and to students who are learning disabled, emotionally disturbed, impaired or frail elderly; parent education and skill development for welfare recipients; individual, couple, and family interventions for victims of abuse; bereavement support groups. Seminar helps students to recover from experiences with substance abuse, domestic violence, sexual difficulties, and more. S/U or letter grading.

231D. Advanced Social Welfare Practice: Health. (4) Lecture, two and one half hours; outside study, nine hours. Corequisite: required social work practicum. Advanced-level, critical analysis of various roles that social workers occupy in health settings and strategies for working with various client populations, including stigma, criminalization, cultural bias, and gaps in knowledge. S/U or letter grading.

231E. Advanced Social Welfare Practice: Mental Health. (4) Lecture, two and one half hours; outside study, nine hours. Corequisite: required social work practicum. Advanced-level, critical analysis of various roles that social workers occupy in health settings and strategies for working with various client populations, including stigma, criminalization, cultural bias, and gaps in knowledge. S/U or letter grading.

231F. Advanced Social Welfare Practice: Gerontology. (4) Lecture, two and one half hours; outside study, nine hours. Evidence-based practice training with children and their caregivers in agency-based settings. Integration of theoretical bases of practice with associated methodological, ethical, and on-going practice concerns. Corequisite: required social work practicum. Advanced-level, critical analysis of various roles that social workers occupy in health settings and strategies for working with various client populations, including stigma, criminalization, cultural bias, and gaps in knowledge. S/U or letter grading.

231G. Advanced Social Welfare Practice: Community Mapping. (4) Lecture, two and one half hours; outside study, nine hours. Corequisite: required social work practicum. Advanced-level, critical analysis of various roles that social workers occupy in health settings and strategies for working with various client populations, including stigma, criminalization, cultural bias, and gaps in knowledge. S/U or letter grading.

231H. Advanced Social Welfare Practice: Institutional and Human Service Management. (4) Lecture, two and one half hours; outside study, nine hours. Corequisite: required social work practicum. Conceptual framework and analytic tools for understanding organizational features of human services. Human service organizations work on people to improve, sustain, or prevent decline of well-being. Because of their function these organizations have both a special relationship with clients and with other organizations. Examination of these attributes, theoretical perspective to study them, and analysis of factors that shape nature of work they do. Examination of determinants of relationships between workers and clients by looking at such variables as policy environ-
241J. Advanced Social Welfare Practice: Community Practice. (4) Lecture, two and one half hours; outside study, nine hours. Corequisite: required social work practicum. Designed to deepen student knowledge of community practice methods and empirical base that supports these methods in field of social welfare. Theory, practice, and research methods related to major community practice approaches in context of evidence-based philosophies and processes. Development of skills to address community problems using best available data by applying course concepts to student learning experience. Letter grading.

241K. Advanced Social Welfare Practice: Policy Practice. (4) Lecture, two and one half hours; outside study, nine hours. Corequisite: required social work practicum. Focus on various forms of policy advocacy and communication, learning necessary skills to construct functional grant proposals. Application of problem-solving knowledge to development of human service grants. Various steps in writing grant proposals and opportunity to design/prepare grant proposals. S/U or letter grading.

242. Resilience, Risk, and Thriving among Children and Families. (4) Lecture, two and one half hours. Corequisites: required for semester one and Fall/Winter Well-Being area of concentration. Introduction to advanced study of children and family well-being from social work perspective. Conveys seminal knowledge of key settings and experiences that impact children and family functioning. Drawing from resilience theory and empirical research, review of aspects of contexts such as parenting and family systems, schools, and neighborhoods—that serve as risk and protective factors for healthy childhood development. Emphasis on prevention efforts to ensure healthy development for all youth, stop family violence, and increase social connections for professional roles of social workers who serve, advocate for, and empower children and families around relevant social and economic justice issues. Letter grading.

249A. Introduction to Luskin PhD Research. (4) (Formerly numbered 249FR.) Lecture, three hours; discussion, three hours. Corequisites: required of first-year PhD students. Introduction to design and execution of public affairs research; exploration of subfields of public affairs scholarship and approaches to research on contemporary topics in social welfare and urban planning. Preparation and filing of PhD program of study. Letter grading.

249B. Introduction to Qualitative Research. (4) (Formerly numbered 249QR.) Lecture, two and one half hours; discussion, two hours. Corequisites: required of second-year PhD students. Introduction to qualitative research methods. Focus on design, data collection, coding, and analysis of qualitative data. Letter grading.

254. Logic of Inference and Causation. (4) Lecture, three hours. Discussion, one hour. Corequisite: required of all PhD students who have passed their field work plan for team members. S/U or letter grading. A self-contained course that introduces students to the basic logic of statistical models. Topics include the logic of inference and causation, the statistical models associated with these concepts, and the methodology and techniques for testing hypotheses.

258. Applied Research Design: Dissertation and Qualitative Analysis. (Same as Urban Planning 258C.) Seminar, three hours. Corequisite: required of all PhD students who have passed their field work plan. S/U or letter grading. This course is designed to provide in-depth understanding of the research process and skills necessary for conducting research in social sciences. Students will develop range of research skills and understanding of ethical procedures in research. Students participate in various activities depending on specific research project with which they work. Activities include research tasks such as conducting literature reviews, developing research questions and selecting data sources, cleaning and preparing data, analyzing data, and writing up research findings for conference and journal submissions. Students work closely with their faculty mentor and other graduate students. Introduction to research process and skills necessary for conducting research in social sciences. In Progress (284A, 284B) and S/U or letter (284C) grading.

260A. Research Capstone I: Project Development. (4) Lecture, two and one half hours. Formulation of research questions, problems, and hypotheses that guide critical review of literature and illuminate understanding of interest area. Working in groups to three or four, development of proposal for research capstone project that includes literature review and outline plans for data collection and analysis. Students will prepare for research capstone project. S/U or letter grading. This course is designed to provide in-depth understanding of particular topics in area of applied statistics/measurement to graduate students engaged in conducting research in broad array of fields that comprise social sciences. Letter grading.

260B. Research Capstone II: Data Gathering, Analyses, and Interpretation. (2) Research group meeting, two hours. Supports students in implementing their research capstone, including data gathering and preliminary analysis, oral presentation, and final report. S/U grading. This course is designed to provide a foundation for social work students to engage in advanced research and methodology.

260C. Research Capstone III: Data Gathering, Analyses, and Interpretation. (2) Research group meeting, two hours. Analysis and interpretation of data and finalization of presentation formats of results. Grounding of interpretation of results in existing literature and discussion of findings for real-world applications. In Progress (280C) grading. This course is designed to provide in-depth understanding of the research process and skills necessary for conducting research in social sciences. Students will develop range of research skills and understanding of ethical procedures in research. Students participate in various activities depending on specific research project with which they work. Activities include research tasks such as conducting literature reviews, developing research questions and selecting data sources, cleaning and preparing data, analyzing data, and writing up research findings for conference and journal submissions. Students work closely with their faculty mentor and other graduate students. Introduction to research process and skills necessary for conducting research in social sciences. In Progress (284A, 284B) and S/U or letter (284C) grading.

265. Research in Child Welfare. (4) Lecture, three hours. Overview of research in aging. Development of research questions, selecting appropriate theoretical frameworks, conducting literature reviews, selecting appropriate research design, identifying sampling methods. Special considerations in aging research, including ethical considerations, designing and implementing research project with which they work. Activities include survey, panel, experimental observation, and theory development research. S/U or letter grading.

266. Research in Gerontology. (4) Lecture, three hours. Overview of research in aging. Development of research questions, selecting appropriate theoretical frameworks, conducting literature reviews, selecting appropriate research design, identifying sampling methods. Special considerations in aging research, including ethical considerations, designing and implementing research project with which they work. Activities include survey, panel, experimental observation, and theory development research. S/U or letter grading.

267. Research in Health. (4) Lecture, three hours. Research in area of health policy and services. Discussions of readings about range of research from field of health services, identification of research design issues, design of research instruments, analysis of strengths and limitations of current approaches to health services research, consideration of alternative roles for social work in health care delivery. Letter grading.

268. Research in Mental Health. (4) Lecture, three hours. Research in area of mental health policy and services. Discussions of experimental designs, survey research methods, ethnographic research, case study methods, object design, and observational methods. Operational definition of variables and selection and design of appro-
285H. Program Evaluation Research. (4) Lecture, three hours; discussion, one hour. Analysis of the comparison between evaluation and other research, alternative program evaluation methods, roles and limitations of evaluation research in real world, development of proposals for feasible program evaluation research. Letter grading.

285I. Research in Youth Populations. (4) Lecture, three hours. Research methods as applied to problems, issues, and interventions pertaining to youth populations. Under faculty supervision, enabling students to apply research skills developed in prior courses. May be repeated for credit. S/U grading.

286A. Survey of Research Methods. (4) Seminar, three hours. Basic concepts underlying research methods. Content includes theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. Letter grading.

286B. Advanced Research Methods. (4) Seminar, three hours. Advanced concepts underlying research methods. Instruction and experience in applying theoretical and practical approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. Letter grading.

286C. Research Internship. (4) Fieldwork, four hours. Supervised study and training through participation in on-going research project or one initiated by students and carried out under faculty supervision. Enabling students to apply research skills developed in prior courses. May be repeated for credit. S/U grading.

289B-290B-290C. Seminars: Social Work. (4–4–4) Seminar, three hours; outside study, nine hours. Series courses. May be repeated for credit. S/U or letter grading.

290D. Criminal Justice and Mass Incarceration. (4) Lecture two and one half hours. Exploration of the relationship between social welfare and criminal justice system focusing on mass incarceration organization, reform, and reentry. Examination of life trajectories, development of and response to gangs in U.S. and globally. Examination of origin and development of major criminal justice systems and gang-related systems. Relationship to punishment, incarceration, death penalty, and development and endurance of prison gangs. Analysis of criminal justice system history, future directions, and capacity of social welfare programs to address needs of marginalized populations. Letter grading.

290E. Lesbian, Gay, Bisexual, and Transgender Health Law, and Public Policy. (4) Lecture two and one half hours. Examination of LGBTQ-identified communities and their mobilization of health disparities that exist within broad conception of LGBTQ-identified communities, including disparities among most marginalized individuals and those living at intersections of multiple identities. Use of law and policy by situating goal of achieving health equity for LGBTQ communities in current political climate. Opportunities to evaluate how better health outcomes for LGBTQ people can be brought by bringing intersectional scientific research to bear in shaping health and policy matters moving forward. Letter grading.

290F. Firearm Violence Prevention. (4) Lecture, two and one half hours. Integration of research to up-to-date way of thinking about firearm-related violence. Examination of range of topics connected to contemporary debates about firearm violence in U.S. using collection of philosophical, social, and epidemiological literature. Ways of thinking theoretically and scientifically about causes and consequences of firearm violence in different contexts, from mass shootings to firearm suicides. Major theories advanced to explain firearm violence, methods used in scientific study of firearm violence, and implications and findings about correlates, patterns, processes, and trends related to firearm violence. S/U or letter grading.

290G. Psychotropic Drugs and Medications: Harm Reduction Policies. (4) Lecture, two and one half hours. Understanding and implications of harm reduction approaches to legal (including prescription) and illegal psychoactive drug use in U.S. and elsewhere. Visions and obstacles for future management of psychoactive drugs such as opioids, stimulants, psychedelics, and benzodiazepines according to harm reduction principles. Implications for social work practice across lifespan. Letter grading.

290I. Children with Special Healthcare Needs: Systems Perspective. (4) Seminar, as Community Health Sciences M420 and Health Policy M420.) Lecture, three hours; fieldwork, one hour. Examination and evaluation of principles, policies, programs, and practices that have evolved to identify, assess, and meet special needs of children, infants, and adolescents with developmental disabilities or chronic illness and their families. Letter grading.

290J. Child Welfare Policy. (4) (Same as Public Policy M213.) Lecture, three hours. Examination of evolution of social policy and services for mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of mentally ill and services they are provided. S/U or letter grading.

290L. Poverty, Poor, and Welfare Reform. (4) (Same as Public Policy M214 and Urban Planning M246.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward poor in U.S. or letter grading.

290M. Health Policy. (4) (Same as Public Policy M215.) Lecture, three hours. Introduction to contemporary issues in healthcare financing and delivery; providing historical perspective on emergence of these issues. Examination of major public health programs and their relationship to issues of access and cost. S/U or letter grading.

290N. Public Policy for Children and Youth. (4) (Same as Public Policy M216.) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

290P. Aging Policy, Elderly and Families. (4) (Same as Public Policy M261.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of theoretical models and concepts of policy process and policy application to aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy. Examination of current proposals and issues. Letter grading.

290S. Politics, Power, and Philanthropy. (4) (Same as Public Policy M227 and Urban Planning M287.) Lecture, three hours; outside study, nine hours. Use of political and policy frameworks to understand resultant social dynamics and roles that have shaped rise and characteristics of nonprofit sector and its constituent elements. Examination of social history of nonprofit sector in U.S. Exploration of legal and policy environments and distinct organizational forms. Comparative perspective between U.S. and other countries. S/U or letter grading.

290T. Juvenile Justice Policy. (4) Lecture, two and one half hours; outside study, nine hours. Designed for graduate students. Exploration of evolution of juvenile justice system in U.S. and issues that have shaped current-day practice. Role of social workers in system today. Involvement throughout the development of role of U.S. housing policy and role of government agencies and community organizations. Is problem housing or economic development? Should interventions be directed toward inner city housing markets or through neighborhood strategies? What lessons can be learned from experiences of other countries? Letter grading.

290W. International Social Welfare. (4) Lecture, three hours; outside study, nine hours. Intended for graduate students interested in pursuing analysis of key international social welfare issues. Topics approached from perspective of globalization of social, economic, and political activities. Property, social injustice and inequality, and issues of racial, ethnic, and cultural diversity, with emphasis on multi-faceted contributions of social work, social services, and social welfare policy and development within rich and poor countries. Acquisition of knowledge of international social welfare activities, as well as analytical skills to address and debate complex international issues. S/U or letter grading.

M290X. Comparative Perspective on States, Markets, and Civil Society. (4) (Same as Public Policy M247 and Urban Planning M241B.) Lecture, two and one half hours. Governance is about solving and managing societal problems, such as climate change, poverty, migration, security, mobility, pollution, or trade relations. Contemporary governance is complex set of laws, rules, and regulations that establish and reframe the responsibilities of three institutional complexes of modern societies (state, market, and civil society), interests that guide them, and legitimacy and resources they command. Actors often reach across systemic, jurisdictional, and national boundaries; their relationships can be cooperative, neutral, or fraught with conflict, and governance outcomes can vary significantly. These dynamics involve institutional challenges and, consequently, require significant governance readiness. Lectures, debates, in-class exercises, and student presentations. Exploration of several issues in more detail, e.g., types of state capacities, democracy, crime management, governance innovation, and specific policy fields such as infrastructure or global finance. S/U or letter grading.

M297B. Current Issues in Public Affairs. (2) (Same as Public Policy M297C and Urban Planning M297B.) Lecture, one to two hours. Introduction to wide range of current issues in public affairs. Luskin school faculty present material from their research and teaching. Assigned readings are distributed in advance of each meeting. S/U grading.

M297F. Career Planning and Management. (2) (Same as Public Policy M297F and Urban Planning M297F.) Tutorial, six hours. Directed individual professional development needs of first-year Public Policy, Social Welfare, and Urban Planning students. Development of career management skills while balancing both academic and social life. More than just deciding on chosen career path, career planning management involves taking concrete steps to become career ready. Students gain fundamental career management skills, competitive résumé, and interviewing skills, creating competitive résumé and practicing interviewing articulately. Offers opportunity to learn professional development skills to assist with career planning strategy.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice person personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guid-
Society and Genetics, Institute for

Overview

The Human Biology and Society major provides a rigorous interdisciplinary education in current issues at the intersection of human biology, genetics, and society where bridging the institutional divide between the life sciences and human sciences (humanities and social sciences) is necessary.

The teaching strategy emphasizes the value of synthetic, integrative thinking. Learning can best be organized synthetically around the sorts of knowledge and skills required to investigate and address such problems rather than by building up from the stepwise sequences of traditional disciplines. Preparation for the majors is centered on three areas of study that together prepare students to solve problems at the intersection of biology and society: genes and gene expression; human evolutionary biology; and society, diversity, and identity. The majors provide an important integrative space where different ways of knowing in the human and life sciences are explored, interrelated, and applied. Core and capstone courses emphasize problem-based learning about pressing issues that inextricably link society, culture, and biology, such as medical privacy rights, gene patents, regulation of stem cell research, and questions of race, gender, and identity.

Programmatically, the majors consist of required elements that develop critical thinking skills, knowledge, and excellence in written and spoken communication; and extracurricular involvement in academic research and corporate/community internship. The mission is to educate students who become leaders in diverse areas such as law, medicine, humanities, social sciences, and biological sciences, and to have them interact and work together to form a deep understanding of the issues at the intersection of human social systems, evolutionary biology, and genetics.

The minor in Society and Genetics provides undergraduate students with the opportunity to understand and probe the complex problems and possibilities presented by modern genetics, with special attention to their social context and content. Given the dynamic interaction between genetics and the social world in which it is embedded, the minor is of necessity multidisciplinary and emphasizes a collaborative cross-disciplinary approach to instruction in the core courses of the minor and exposure to a wide range of disparate scholarship through elective courses available in such areas as anthropology, biology, history, philosophy, public policy, and sociology.

Undergraduate Majors

Human Biology and Society BA

Learning Outcomes

The Human Biology and Society major has the following learning outcomes:

- Demonstrated strong foundation of knowledge in social science and evolutionary biology and genetics.
- Skills to critically analyze and evaluate qualitative and quantitative data and social biological theories.
- Formulation of effective and convincing written and oral arguments that integrate biological and social evidence.
- Work well in multidisciplinary teams.
- Skills at communicating across disciplines and leveraging knowledge from multiple perspectives.
- Demonstrated proficiency in at least one area of concentration at the interface between biology and society.
- Integration of ethical, legal, and societal concerns in planning, conducting, and assessing research.
- Use of societal and biological information to critically assess complex real-world problems and to employ interdisciplinary skills to help solve them.

Entry to the Major

Admission

Admission to the Human Biology and Society BA major is by application and competitive, using courses, grades, grade-point averages, and personal statements as minimum standards for consideration. Only a limited number of students are admitted each year. Applicants are not automatically accepted into the major. Students must apply for major standing at the beginning of spring quarter of their sophomore year. Applications submitted after the spring quarter deadline are not considered. Only a limited number of students are admitted each year. Applicants are not automatically accepted into the major. Students must apply for major standing at the beginning of spring quarter of their sophomore year. Applications submitted after the spring quarter deadline are not considered. Only a limited number of students are admitted each year. Applicants are not automatically accepted into the major. Students must apply for major standing at the beginning of spring quarter of their sophomore year. Applications submitted after the spring quarter deadline are not considered. Only a limited number of students are admitted each year. Applicants are not automatically accepted into the major. Students must apply for major standing at the beginning of spring quarter of their sophomore year. Applications submitted after the spring quarter deadline are not considered. Only a limited number of students are admitted each year. Applicants are not automatically accepted into the major. Students must apply for major standing at the beginning of spring quarter of their sophomore year. Applications submitted after the spring quarter deadline are not considered. Only a limited number of students are admitted each year.

Pre-major standing is not required to apply for the major. A copy of the major application is available on the department major web page.
Pre-major

Incoming first years may be admitted as pre-majors on acceptance to UCLA. All other students must first complete Society and Genetics 5, M71A, or M72A, and then contact the undergraduate counselor in 3360 Life Sciences to request pre-major standing.

Transfer Students

Transfer applicants to the Human Biology and Society BA major with 90 or more units must complete the following preparatory courses prior to admission to UCLA: one year of general biology (the equivalent of Life Sciences 7A, 7B, and 7C), introductory chemistry, one statistics course, one anthropology human evolution course, and four introductory social sciences or history courses. Society and Genetics 5 must be taken at UCLA once a transfer student is admitted to the University.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: One core course from Society and Genetics 5, M71A, or M72A; and Anthropology 1, Chemistry and Biochemistry 14A or 14AE, Life Sciences 7A, 7B, 7C, Statistics 10 or 13, and four social theory courses (minimum of 16 units) from African American Studies 1, M5, 6, American Indian Studies M10, Anthropology 3, Asian American Studies 10 or 10W, 20 or 20W, 40 or 40W, 50 or 50W, Chicana/o and Central American Studies 104, 10B, Clusters M1A through 80CW, English M30, Environment M30, Gender Studies 10, Geography 3, History 3A, 3B, 3C, 3D, 12A, 12B, 12C, Honors Collegium 70A, Labor Studies M1A, M1B, M1CW, 10, Molecular, Cell, and Developmental Biology 50, 60, Philosophy 3, 4, 6, 7, 8, 22 or 22W, Political Science 10, 40, Public Affairs 10, 20, 30, 80, Society and Genetics 125, Sociology 1, or M5.

The Major

Students may additionally choose course options in the subfocus areas of cell development, microbiology and immunology, molecular biology and genomics, psychology, and psychiatry and mental health.

Optional Subfocus Areas

The subfocus options are designed and recommended for students who intend a career in medicine or allied health services or are planning to go on to graduate school in the life or health sciences. Students may optionally select any subfocus area as part of the required elective courses for the major.

Cell Development: Molecular, Cell, and Developmental Biology 138, 165A, 168

Ecology and Evolutionary Biology: Three courses from Anthropology 124P, 124S, 126Q, 128P, Ecology and Evolutionary Biology 100, 116, 120, 121, C126, 129, 130, C135, 175, 176

Microbiology and Immunology: Microbiology, Immunology, and Molecular Genetics 101, C185A, and one course from 103AL, 106, 107, 158, or 168

Molecular Biology and Genomics: Molecular, Cell, and Developmental Biology 144, 172, and one course from CM156, Human Genetics CM124, C144, Microbiology, Immunology, and Molecular Genetics C122, or 158

Physiology: Physiological Science 111A, 111B, and one course from 147, 149, or 177

Population Genetics: Two courses from Ecology and Evolutionary Biology C135, Human Genetics CM124, Society and Genetics 120, and one course from Ecology and Evolutionary Biology 120, C11, or Human Genetics C144

Psychology and Mental Health: Three courses from Psychology M107, 112A, 112B, 115, 127A, 129C

Honors Program

To receive departmental honors, students must take each course in the major for a letter grade and complete all upper-division courses in the major with an overall grade-point average of 3.5 or better. For highest departmental honors, students must complete a research project and receive a grade of A or better in Society and Genetics 108, 197, or 199.

Policies

Preparation for the Major

Each course must be taken for a letter grade, and students must complete all-pre major courses with a cumulative minimum grade-point average of 2.9.

The Major

Each course must be taken for a letter grade and passed with a grade of C– or better, and all courses must be completed with a cumulative minimum grade-point average of 2.9.

Human Biology and Society

BS Learning Outcomes

The Human Biology and Society major has the following learning outcomes:

• Demonstrated strong foundation of knowledge in social science and evolutionary biology and genetics
• Skills to critically analyze and evaluate qualitative and quantitative data and social biological theories
• Formulation of effective and convincing written and oral arguments that integrate biological and social evidence
• Demonstrated broad comprehension of mathematical, physical, and life sciences as preparation for medical school
• Work well in multidisciplinary teams
• Skills at communicating across disciplines and leveraging knowledge from multiple perspectives
• Demonstrated proficiency in at least one area of concentration at the interface between biology and society
• Integration of ethical, legal, and societal concerns in planning, conducting, and assessing research
• Use of societal and biological information to critically assess complex real-world problems and to employ interdisciplinary skills to help solve them
• Use of societal and biological information to critically assess complex real-world problems and to employ interdisciplinary skills to help solve them

Entry to the Major

Admission

Admission to the Human Biology and Society BS major is by application and competitive, using courses, grades, grade-point averages, and personal statements as minimum standards for consideration. Only a limited number of students are admitted each year. Applicants are not automatically accepted into the major.
Students must apply for major standing at the beginning of spring quarter of their sophomore year. Applications submitted after the spring quarter deadline are considered during fall quarter of the junior year only as space in the program permits. No applications are considered after fall quarter of the junior year.

Pre-major standing is not required to apply for the major. A copy of the major application is available on the department major web page.

Transfer Students
Transfer applicants to the Human Biology and Society BS major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, and one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory.

Transfer applicants must also complete at least two of the following introductory courses prior to admission to UCLA: one year of general chemistry equivalent to Life Sciences 7A, 7B, and 7C, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory.

Students may additionally choose course options in the subfocus areas of cell development, microbiology and immunology, molecular biology and genomics, physiology, and psychology and mental health.

Optional Subfocus Areas
The subfocus options are designed and recommended for students who intend a career in medicine or allied health services or are planning to go on to graduate school in the life or health sciences.

Students may optionally select any subfocus area as part of the required elective courses for the major.

Cell Development: Molecular, Cell, and Developmental Biology 138, 165A, 168
Ecology and Evolutionary Biology: Three courses from Anthropology 124P, 124S, 126Q, 128P, Ecology and Evolutionary Biology 100, 116, 120, 121, C126, 129, 130, C135, 175, 176
Microbiology and Immunology: Microbiology, Immunology, and Molecular Genetics 101, C185A, and one course from 103AL, 106, 107, 158, or 168

Molecular Biology and Genomics: Molecular, Cell, and Developmental Biology 144, 172, and one course from CM156, Human Genetics CM124, C144, Microbiology, Immunology, and Molecular Genetics C122, or 158

Physiology: Physiological Science 111A, 111B, and one course from 147, 149, or 177

Population Genetics: Two courses from Ecology and Evolutionary Biology C135, Human Genetics CM124, Society and Genetics 120, and one course from Ecology and Evolutionary Biology 120, 121, or Human Genetics C144

Psychology and Mental Health: Three courses from Psychology M107, 112A, 112B, 115, 127A, 129C

Honors Program
To receive departmental honors, students must take each course in the major for a letter grade and complete all upper-division courses in the major with an overall grade-point average of 3.5 or better. For highest departmental honors, students must complete a research project and receive a grade of A or better in Society and Genetics 108, 197, or 199.

Policies
Preparation for the Major
Each course must be taken for a letter grade, and students must complete all pre-major courses with a cumulative minimum grade-point average of 2.5.

The Major
Each course must be taken for a letter grade and passed with a grade of C– or better, and all courses must be completed with a cumulative minimum grade-point average of 2.0.

Undergraduate Minor
Society and Genetics Minor
Admission
Admission to the Society and Genetics minor is by application and competitive, using courses, grades, grade-point averages, and personal statements as minimum standards for consideration. Applicants must be in their junior year and have an overall grade-point average of 2.5 or better. Only a limited number of students are admitted each year. Applicants are not automatically admitted into the minor.

Students must apply for admission to the minor at the beginning of fall quarter of their junior year. No applications are considered after that.

Information about the application process is available on the minor website and by consultation with the undergraduate counselor in 3360 Life Sciences.

The Minor
Required Upper-Division Courses (30 to 34 units): Society and Genetics 101 (or, if Life Sciences 107 has been completed, one course...
from the approved list of electives), 102, 191S, and at least four additional upper-division elective courses (minimum 16 units) from the approved list.

Policies

Students may petition to have a course not on the approved list applied toward the four-course elective requirement. Contact the undergraduate counselor in 3360 Life Sciences.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade of C- or better. Successful completion of the minor is indicated on the transcript and diploma.

Society and Genetics

Lower-Division Courses

5. Integrative Approaches to Human Biology and Society. (4) Lecture, three hours; discussion, one hour. Introduction to concept of problem-based approaches to study of biology and society and areas of concentration, such as bioethics and public science policy, evolutionary biology, culture, and behavior, historical and social studies of life sciences, medical genetics and public health, and population genetics and history, and central thematic issues shared across concentrations, such as commercialization of life and public understanding of science. Letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

M71A-M71B-M71CW. Biotechnology and Society. (6-6-6) (Same as Clusters M71A-M71B-M71CW) Course M71A is enforced requisite to M71B, which is enforced requisite to M71CW. Limited to first-year freshmen. M71A-M71B, Lecture, three hours; discussion, two hours. Exploration of methods, applications, and implications of biotechnology and of ethical, socio- political, and political implications as well as biological under- dopings. P/NP or letter grading. M71CW, Special Topics. Seminar, three hours. Enforced requisite: course M71B. Topics include in-depth examination of ethics and human genetics, bioweapons and biodefense, sex and biotechnology. Satisfies Writing II requirement. Letter grading.

M72A-M72B-M72CW. Sex from Biology to Gend- ered Society. (6-6-6) Communication M72A-M72B-M72CW, Clusters M72A-M72B-M72CW, and Sociology M72A-M72B-M72CW Course M72A is enforced requisite to M72B, which is enforced requisite to M72CW. Limited to first-year freshmen. Letter grading. M72A-M72B-M72CW. Lecture, three hours; discussion, two hours. Examination of many ways in which sex and sexual identity shape and are shaped by biological, data social, and cultural phenomena. From an evolutionary perspec- tive, topics covered may include language, social behaviors, and fundamental questions about the nature of human sex and gender. Satisfies Writing II requirement.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division course in gender studies to present in-depth research topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. Letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. De- signed as adjunct to lower-division lecture course. In- dividual study with professor to explore in depth topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2 Tutorial (su- pervised research or other scholarly work), three hours per week per unit. Entry-level research for lower- division students under faculty mentorship. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

101. Genetic Concepts for Human Sciences. (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for Life Sciences 4. Focused treatment of selected complex genetic con- cepts from molecular biology, population and quanti- tative genetics, and evolutionary biology, with em- phasis on gene-environment interaction at various levels and culminating in exploration of notion of co- evolution of genetic and cultural science concepts presented through real-world issues and re- search problems. Current research on cancer, immune system and development, and how this research is pertinent and carried out in the classroom. Letter grading.

102. Societal and Medical Issues in Human Genet- ics. (5) Lecture, three hours; discussion, two hours. Sequence of entire human genome is now known. Consideration of how this knowledge impacts con- cepts of ourselves as individuals and of our place in biological universe, concepts of race/ethnicity and gender, ability of DNA-based forensics to identify spe- cific individuals, ownership and commodification of genes, issues of privacy and confidentiality, issues of genetic discrimination, issues of predictive genetic testing. Discussion of human cloning for reproductive and therapeutic purposes. Survey of the ethical, legal, and sociological implications of biotechnology and of ethical, legal, and political implications as well as biological under- dopings. P/NP or letter grading. M71A-M71B-M71CW. Biotechnology and Society.

105A. Ways of Knowing in Life and Human Scienc- es. (4) Lecture, three hours; discussion, one hour. En- forced requisite: course 5 or M71A or M72A. Course 105A is not requisite to 105B. Introduction to study of various ways of knowing what we know. In life and human sci- ences, evidence and methods and procedures are used to study, measure, and experiment. Exploration of how they are manifested in technology that cut across disciplines to help students evaluate explanatory models, standards of proof, and qualitative versus quantitative studies. Explorations may include DNA sequencing, tissue cul- tures, bioinformatics, statistics, photography and cinema, charts, trees, and databases. DNA se- quencing is used to study gene functions, evolutionary patterns, and disease and plays role in legal context to reconstruct aspects of human history or to trace iden- tities of unknown individuals, e.g., in administrative, commercial, and legal contexts. Pho- tography is used in sciences and medicine (e.g., X-ray photography), as well as in art and forensics. Letter grading.

120. Problems of Identity at Biology/Society Inter- face. (4) Lecture, three hours; discussion, one hour. Requisites: course 101 or Anthropology 1, or Life Sci-ences 4 and 23L, or 7C (each may be taken concur- rently). Course 105A is not requisite to 105B. Explora- tion of problems of human identity that are inherently biological and social. Topics vary and may include race, obesity and nutrition, autism, deafness or dis- ability, gender, intelligence, and how these concepts are a set of intertwined problems so complex, so difficult to define, and so wrapped up in conceptions of what it is to be human, that it has spawned research from var- iety of perspectives in biological and human sci- ences. Students critically engage various intellectual perspectives—some competing, some complemen- tary—that intersect on one particular topic. Examina- tion of how researchers from social/historical and bio- logical sciences construct topic as intellectual problem, methods they bring to bear on it, and find- ings they have produced. Letter grading.

108. Human Biology, Genetics, and Society. (3) Lecture, two hours; laboratory, one hour. Limited to se- nior Human Biology and Society majors. Lectures, readings, discussions, and development of collabora- tive culminating project. Group-based research proj- ects may include team of students working on a contempo- rary at intersections of biology, human biology, genetics, and society. Reading of large amounts of material to make sense of both scientific concepts and social and polit- ical issues, with original research project and presen- tation required. Letter grading.

M110D. Posthumans. (4) (Same as African American Studies CM110D) Seminar, three hours. Denatural- ization of concept of human and with it unique Western philosophical commitments that sustain imagined boundaries between human and non-human, modern and pre-modern, male and female, able and dis- abled, chosen and condemned, indigenous and Euro- pean, African and whiteness, religious and secular. Ex- ploration of formation of human through long course of Euro-American intellectual history and its im- plications for posthuman and contemporary biological science. Study is in- formed by range of theoretical work that covers meaning of modernity, liberalization, inter-species rela- tionships, critical race theory, conceptual problems in evolutionary biology, and public health. P/NP or letter grading.

M113. Ethical, Legal, and Societal Topics in Genetic Counseling. (2) (Same as Human Genetics CM113.) Lecture, two hours. Discussion of social, cultural, eth- ical, and legal issues in genetics and genetic coun- seling. Letter grading.

120. Genetics and Human History. (4) Lecture, three hours. Requisite: course 101 or Life Sciences 107. Ad- vancements in genomic research have rapidly trans- formed traditional archaeological and historical investiga- tions of human past. Drawing from recent re- search, focus on how genomic analysis has shed new light on old debates such as migration of Homo so- lienius out of Africa, human ancestry with Nean- dertals, first migration to North America, ethnic ex- pansion throughout Europe, and genetic legacy of historical figures such as Thomas Jefferson and Genghis Khan. Discussion of practical and theoretical issues surrounding genetic research on history of hu- mans, including challenges of using ancient and modern DNA, population genetic theory, and ethical implications of genetic research for understanding ethnicity. Letter grading.

121. Race, Science, and Citizenship. (4) Seminar, three hours. Early development of scientific method and systematic exclusion of those in subordinate so- cial groups from scientific practice. Interrogation of bi- naries that prop up scientific knowledge construction, and consideration of how norms and values em- bedded in Western science compare with indigenous or local knowledge systems. How medical research is
motivated by competing assumptions of racial hierarchy and equality. Examination of governments’ use of science to classify racially inferior and contaminated foreigners as threats to sociocultural order. Exploration of how people use knowledge about their embodied experiences to demand rights and accept responsibility for their own health and vitality, either in opposition to or alliance with scientific experts. How controversies are solved in science and technology bring to light some central concerns of social and political theory. Letter grading.

125. Critical Study of Health, Sickness, and Healing in Global Perspective. (5) Lecture, three hours; discussion, one hour. Introduc- tion to sociocultural, historical, and global study of health and sickness. Use of case studies of globally important health conditions, chronic diseases (e.g., Ebola, HIV/AIDS) to analyze factors, including key di- mensions of diversity (class, gender, urban/rural de- velopment) that influence how populations vary in their experience, understanding, and coping with sickness. Special focus on relationships between Western medicine and traditional and alternative ap- proaches to healing. Letter grading.

M126. Genes, Disease, and Culture, (4) (Same as Anthropology 126.) Lecture, three hours; discussion, one hour. Examination of genealogy, one hour. Examination of genetics, disease, and culture. Introduction to basic con- cepts in human genetics, expanding upon evolu- tionary genomics learned in Anthropology 7A, 7B, and survey of both inherited and infectious disease on global level. Wide range of topics include gene-culture co-evolution, niche construction theory, cultural per- ceptions and attitudes toward selection, biological and environmental determinism, and evolutionary origins of disease. Course is broken down into genes and genomes, Mendelian disease, complex disease, and in- fectious disease. Discussion of selected readings that integrate cultural perceptions with biological/genetic phenomena. P/NP or letter grading.

M132. Food Cultures and Food Politics. (5) (Same as English 118F and Food Studies M132.) Lecture, four hours; discussion, one hour (when scheduled). Requi- site: English Composition 3. Introduction to interdisci- plinary field of food studies, with focus on how litera- ture, art, science, politics, and visual culture address political dimensions of food and agriculture in specific contexts. P/NP or letter grading.

M133. Environmental Sociology. (4) (Same as Environ- mental Science and Policy 130.) Lecture, three hours; discussion, one hour. Relationship between soci- ety and environment. Analysis in detail of interrela- tions between social factors (such as class, race, gender, wealth, and development) and environmental changes such as pollution, waste disposal, sustainability, and global warming. P/NP or letter grading.

134. Food and Health in Global Perspective. (4) Lec- ture, three hours. Study problematizes and adds depth to common-sense understandings of healthy and unhealthy consumption by examination of rela- tionship between food and health, from critical and holistic perspective, that accounts for interplay of bi- ology and culture within broader historical, sociocul- tural, and global contexts. Topics include what is meant by health, especially in terms of diet; relationship be- tween food practices and evolutionary biology, as well as particular environments of societies, cultural sys- tems, and their distinct health practices. How major global major food have come to their dominance and consequences for health; and influences of food pro- duction, distribution, and preparation on health. Letter grading.

M136. Eating Science: Science and Politics of Food from Individual to Planetary Health. (4) (Same as Food Studies M136 and Sociology M136.) Lecture, three hours; discussion, one hour. Questions of food and health are both individual and social. Students gain tools for understanding relationships between in- dividual eaters, medicine, and social organization of work, includingappraising foods, tracking, and collections of data on food consumption and socio-ecological systems. P/NP or letter grading.

141. Nature versus Nurture: Genes and Environment. (4) Seminar, three hours. Comprehensive and practical examination of emerging science of gene-en- vironment interaction. Discussion of primary compo- nents of field, including role of metabolic pathways in modern science. Importance and influence of environmental influences in human disease. Exploration of selected hot topics in field such as importance of epigenetics and of microbiome. Course is highly useful for further study in medical field or public health. Letter grading.

M142. Primate Genomics, Ecology, and Conserva- tion. (4) (Same as Anthropology 128S.) Seminar, three hours. Focus on genetic research on wild pri- mates at different geographic scales, using readings from primary literature on primate genetics, ecology, and behavior. Study of paternity and kinship, intrapop- ulation genetic variability, genetic linkage, genomics, phylogenetics/phylogenomics and compar- ative genomics. Utility and appropriateness of var- ious markers considered for different research ques- tions, e.g., mitochondrial DNA, nuclear genes, Y-chromosome, as well as GWAS and ge- nomic/historical documentation methods, and epi- genetic markers. Discussion of methods in fieldwork and lab work, including sampling techniques, collec- tion techniques, wet lab techniques, software analysis packages, and statistical analyses. Introductory-level understanding of genetics expected; study further illu- minates areas around genetics relevant to case studies analyzed. Letter grading.

M143. Amazon in Anthropocene. (4) (Same as Anthro- pology 136.) Seminar, three hours. Exploration of major issues facing Amazon region today. Analysis of environmental degradation caused by human activities, and exploration of major environmental problems and potential solutions. Topics include oil exploration, hydroelectric dams and clean energy, deforestation arc, and international land grabs for soy plantations. Highlights value of different kinds of knowledge and expertise for interdisciplinary solutions for current crises in Amazon. Letter grading.

M144. Stress and Social Inequality. (4) (Same as Sociology 144.) Lecture, three hours; discussion, one hour. Integrative view of health dispar- ities, one of most pressing problems of society, through investigation of social origins of stress, socioeconomic status (SES) on health and disease, using specific lens of stress biology. Topics include introduction to funda- mentals of physiology of stress, integration of litera- ture on poverty and SES, biological and psychological consequences of poverty, and introduction of con- cepts of life course by following stress biology through childhood development and into adulthood. Letter grading.

146. Evolution in Anthropocene. (4) Lecture, three hours; discussion, one hour. Recommended requi- sites: Life Sciences 1A, 7B, 7C. Study of evolution across world and tree of life that is being altered at in- political authority, and how political authority has been employed to both promote and restrict genetics. Con- sideration of several historical episodes such as rise to power in Soviet Union of T. D. Lysenko, peasant agron- omist who rejected Mendelism in favor of quasi-La- marckian approach to genetics; participation of genet- icists in creation of racial state in Nazi Germany; and debates over compulsory sterilization of mental defec- tives in Canada, U.S., and Germany from 1920s to 1940s. Contemporary cases such as controversies over genetically modified foods and regulation and governance of regenerative technologies, and rise of disease advocacy groups. Letter grading.

160. Politics of Heredity. (4) Seminar, three hours. Ex- ploration of intersection of politics and genetics in lib- eral democracies and totalitarian regimes. How ge- netics has been used to consolidate and undermine political authority, and how political authority has been employed to both promote and restrict genetics. Con- sideration of several historical episodes such as rise to power in Soviet Union of T. D. Lysenko, peasant agron- omist who rejected Mendelism in favor of quasi-La- marckian approach to genetics; participation of genet- icists in creation of racial state in Nazi Germany; and debates over compulsory sterilization of mental defec- tives in Canada, U.S., and Germany from 1920s to 1940s. Contemporary cases such as controversies over genetically modified foods and regulation and governance of regenerative technologies, and rise of disease advocacy groups. Letter grading.

161. Controversy and Behavior Genetics. (4) Semi- nar, three hours. Behavior genetics is controversial and seeks genetic links to intelligence, personality, mental illness, and criminality, among many other traits. It explores differences between individuals, men and women, or racial groups, and what social policies might do about those differences. Causes and effects of controversy in behavior genetics using critical sociology and history. Consideration of scien- tific disputes between behavior geneticists and their critics, and critical sociology of behavior genetics. Consideration of behavior genetics as group of scientists, and public reception of behavior genetics and disputes about its social and policy implications. Letter grading.

162. Biotechnologies, Law, and Body. (4) Seminar, three hours. Notions of bodily integrity, privacy, right to life, and to choose to die have created perception that our bodies are protected by law, that somehow we possess sovereignty over our own bodies, and that en- compassing not only our physical being but intangible information contained within our materialized forms. Questioning whether these rights to our own bodies exist and are secured by common and Constitutional law in light of recent developments in biotechnology.
189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through suplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.
196. Research Apprenticeship in Society and Genetics. (2) Tutorial, six hours. Limited to juniors/seniors. Entry-level research opportunities in society and genetics under guidance of faculty mentor. May be repeated for maximum of 4 units. Individual contract required. P/NP or letter grading.

197. Individual Studies in Society and Genetics. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned readings and tangible evidence of mastery of subject matter (paper or other product) required. May be repeated for credit. Individual contract required. Letter grading.

198. Directed Research in Society and Genetics. (2 to 4) Tutorial, six to 12 hours. Preparation: submission of written proposal outlining study or research to be undertaken due to undergraduate advisor for department approval. Studies to involve laboratory research, not primarily literature surveys or library research. Proposal to be developed in consultation with instructor. Limited to juniors/seniors. Department majors may enroll with sponsorship from department faculty members or preapproved outside faculty members. Other juniors/seniors may enroll only with department faculty sponsors. Supervised individual research under guidance of faculty mentor. At end of term culminating paper describing progress of project and signed by student and instructor must be presented to department. May be repeated for credit. Individual contract required. Letter grading.

Graduate Course

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

Overview
Sociology is the study of the organization, dynamics, and consequences of social life. The scope of the discipline is as broad and diverse as social life itself. Sociologists study social interaction and relationships, organizations and institutions, communities and whole societies. The methods of sociological investigation are also varied: sociologists immerse themselves in the daily life of groups, interview group participants, examine recorded interaction, interpret historical documents, engage in quantitative analysis of data, and conduct large surveys. The methods and concepts of sociology yield powerful insights into the social processes shaping lives, problems, and possibilities in contemporary society. The ability to identify and understand these processes—a capacity that C.W. Mills called the “sociological imagination”—is valuable preparation for personal and professional participation in a changing and complex world.

The Department of Sociology faculty includes internationally renowned scholars who address topics ranging in scope from the organization of face-to-face interaction to the consequences of globalization. The department boasts outstanding teachers—six of whom have won Distinguished Teaching Awards—and excellently trained teaching assistants, many of whom have also won awards. The select honors program has a record for training students in the fundamentals of research and generating honors theses of substantial accomplishment.

Career Prospects
In addition to contributing to a liberal arts education, the Sociology major prepares individuals for a broad range of career options and graduate and professional studies. The analytic perspectives and skills gained in the major are a foundation for careers in business, data science, education, law, public health, and social welfare. The major also supplies a foundation for students intending to pursue graduate work in sociology and related fields. Employment opportunities available to the graduate with a Bachelor of Arts (BA) degree in Sociology also include work in community service organizations and health agencies, government service, and human resources.

The Doctor of Philosophy (PhD) in Sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing ca-
The Major

Preparation for the Major

- Critical evaluation of social and political arguments using empirical data
- Effective and convincing formulation of written and oral arguments that integrate sociological evidence
- Demonstrated understanding of the difference between an individual-level and collective-level explanation of behavior
- Demonstrated understanding of the major sociological methods, including interviewing, ethnography, conversation analysis, content analysis, survey design, and statistical analysis, the types of questions they can be used to answer, and their limitations
- Demonstrated familiarity with several major classical contemporary sociological theoretical perspectives and how they can be used to analyze contemporary or historical events or phenomena
- Understanding of some ways in which biographies are shaped by institutions, patterns of social inequality, or cultural practice

Entry to the Major

Pre-major

Only students with fewer than 90 units completed (excluding Advanced Placement units/credit) may declare the Sociology pre-major once they complete either Sociology 1 or 20 with a grade of C or better.

First-Year Students

Students must petition to declare the Sociology major. If Sociology 101 or 102 has already been completed, a grade of C or better is required. Grades in any other completed sociology courses for the major must be C- or better.

Transfer Students

Transfer applicants to the Sociology pre-major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introduction to sociology course and one statistics course.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major

Required: Sociology 1, 20, and one course from Political Science 6, Statistics 10, or 13.

The Major

Required: Eleven upper-division courses, including (1) two theory courses—Sociology 101, 102; (2) one methods course from Sociology 106A, 106B, 110, 111, 112, 113, CM124A, 191H, or Statistics 112; (3) one course from each of the following core areas: (a) interactions—Sociology 111, CM124A, CM125, 126, 130, 132, 133, 134, 140, or 152, (b) institutions and social processes—Sociology 116, 121, M139, 140, 143, 151, 158, 172, 173, M174, M175, M176, or 181B, (c) power and inequality—Sociology M115, 122, 123, M139, 147A, M153, 156, 157, M161, M162, M164, M165, M181A, 182, 183, 185, or 186; and (4) any five upper-division sociology elective courses.

Honors Program

The honors program in sociology provides opportunity for outstanding students to undertake an independent year-long research project under the guidance of a faculty member. Students who successfully complete the honors program graduate with departmental honors.

After acceptance into the honors program, students are required to take courses 191H, 198A, 198B, and 198C (honors thesis seminars) which may be applied as electives toward the major requirements.

Computing Specialization

Majors in Sociology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the major, (2) completing Program in Computing 10A, 10B, 10C, and (3) completing Sociology 111, 113. Each course must be taken for a letter grade. Students graduate with a bachelor’s degree in sociology and a specialization in Computing.

Policies

Preparation for the Major

A minimum grade of C is required in each preparation for the major course. Students with a grade-point average less than 2.0 in the preparation coursework are not eligible for admission to the major. Students who repeat any preparation course more than once are automatically denied admission to the major.

The Major

Students should complete course 101 and the core courses before taking other upper-division courses.

Each course for the major must be taken for a letter grade. To graduate, students must have at least a 2.0 grade-point average in their upper-division major courses, with grades of C or better in Sociology 101 and 102.

Only 8 units of Sociology 199 are allowed. The two theory courses, three core area courses, one methods course, and one sociology elective (seven courses total) must be taken while in residence in the College of Letters and Science at UCLA.

Honors Program

As preparation for the honors program, students must complete all preparation for the major courses.

Students must have a 3.5 overall grade-point average, have completed the sociology preparation requirements and, in most cases, have completed the required theory course. Applications are available from the undergraduate advisor’s office, 254E Haines Hall.

Graduate Major

Sociology MA, CPhil, PhD

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Sociology

Lower-Division Courses

1. Introductory Sociology. (5) Lecture, four hours; discussion, one hour. Survey of characteristics of social life, processes of social interaction, and tools of sociological investigation. P/NP or letter grading.

2. Social Organization of Black Communities. (5) Same as African American Studies 195. (Same as Africana Studies 158.) Lecture, four hours; discussion, one hour; field trips. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues. Letter grading.

3. Social Thought and Origins of Sociology. (5) Lecture, three hours; discussion, two hours. Introduction to history of social thought, with special emphasis on theoretical precursors to development of discipline of sociology. Exposition and analysis of selected social theorists and concepts, especially from the 17th to 19th centuries. Letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

20. Introduction to Sociological Research Methods. (5) Lecture, three hours; discussion, one hour. Introduction to methods used in contemporary sociological research, with focus on issues of research design, data collection, and analysis of data. Fieldwork may be required. Letter grading.

40. American Racism: Psychosocial Analysis. (5) Lecture, four hours; discussion, one hour. Examination of long-standing history of American racism, beginning with institution of slavery, Jim Crow legislation, separate but equal doctrine, Brown versus Board of Education, Civil Rights legislation of 1960s, and Obama presidency. Focus on persistence over time of racist beliefs and mechanisms through which racism becomes passed on from one generation to the next. Racism toward African Americans and harms it has inflicted on African American community, as well as on nation as whole. Examination of psychology and sociology of racism through video clips, social scientific texts, essays by prominent American humanists, and American literature that deals centrally with racism. P/NP or letter grading.

51. Sociology of Migration. (5) Lecture, three hours; discussion, one hour. Introduction to fundamental theories, themes, and research methods used in sociological research through comparative study of international migration. Examination of theoretical debates and empirical analysis of causes and consequences of transnational migration in countries of origin and destination, with focus on issues of race, ethnicity, social networks, development, citizenship, and state in comparative context. Letter grading.
M72A-M72B-M72CW. Sex from Biology to Gendered Society. (6–6–6)

Freshmen. Letter grading. M72A-M72B-Course 72 CW. Course M72A is required for M72B, which is required for M72CW. Limited to first-year freshmen. Letter grading.

102. Contemporary Sociological Theory. (5)

Survey of basic concepts and theories in sociology. Lecture, three hours; discussion, one hour. Requisite: course 101. Critical examination of significant theoretical formulations from 1920 to present. P/NP or letter grading.

110. Comparative and Historical Methods. (4)

Lecture, three hours; discussion, one hour. Recommended requisite: course 101. Introduction to range of comparative and historical methods alongside broader questions and issues in this area of sociology. Students learn about using theories to analyze real-world cases; making comparisons between societies and other social units; developing sociological explanations of historical events; and generalizing about social patterns and changes over time. P/NP or letter grading.

111. Social Networks. (4)

Lecture, three hours; laboratory, one hour. Analysis of how social networks create the infrastructure for social and their unexpected effects. Topics include job search, firm efficiency, and social movements. Visualization programs, computer simulations, and research project. P/NP or letter grading.

112. Introduction to Mathematical Sociology. (4)

Lecture, three hours; laboratory, one hour. Requisites: Mathematics 2, 3A (course whose content includes interdictions to probability theory, matrix algebra, and differential and integral calculus). Statistics 10. Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematics). Letter grading.

Lecture, three hours; laboratory, one hour. Requisite: Statistics 10. Continuation of Statistics 10, covering more advanced statistical techniques such as maximum likelihood estimation of factor analysis. Content varies. Students learn how to use computer and write papers analyzing prepared data sets. P/NP or letter grading.

114. Social Data Science. (4)

Lecture, three hours; discussion, one hour. Data analysis, and way social theory and data are linked. Covers data and computing environment, regression analysis, causal analysis, and machine learning. Offers tools for conducting quantitative analyses of social phenomenon, including emerging computational methods. Integrates substance and method. Draws on literature in social inequality to equally demonstrate applications of studied methods. P/NP or letter grading.

115. Environmental Sociology. (4)

Same as Environment M133 and Society and Genetics M133.) Lecture, three hours; discussion, one hour. Relationship between society and environment. Analysis in detail of interrelations between social factors (such as class, race, gender, and religion) and environmental factors (such as pollution, waste disposal, sustainability, and global warming). P/NP or letter grading.

116. Social Descent. (4)

Lecture, three hours; discussion, one hour. Studies of past, present, and future trends in population growth. Sociological theories of causes and consequences of population growth and redistribution. Emphasis will be on fertility, mortality, and migration. P/NP or letter grading.

117. Family Demography. (4)

Lecture, three hours; discussion, one hour. Examination of demographic behaviors, such as marriage, divorce, and childbearing, associated with family and household organization. Sociological approach to understanding causes and consequences of trends and differentials in family formation and dissolution. P/NP or letter grading.

118. Simulating Society: Exploring Artificial Communities. (4)

Same as Communications M125.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Practices of communication and social interaction in number of multimedia sites and storytelling. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. Concurrently scheduled with course CM125A. P/NP or letter grading.

119. Primate Societies. (4)

Seminar, three hours; discussion, one hour. Requisite: course 1. Designed for juniors/seniors. Topics on diverse behaviors and cultural forms of primates, especially baboons, chimpanzees, and gorillas. Examination of primate socioculture, sexual competition, demography and kinship, politics, communication, and interactions within and between primate species for our lives as human primates. P/NP or letter grading.

120. Disability Rights Law. (4)

Same as Disability Studies M149.) Lecture, four hours. Examination of disability-related issues impacting people of all ages across wide spectrums of settings in both public and private sectors—from preschool to higher education, from military to workplace, and from intensely urban environments to online and virtual worlds. Topics range from persistent and recurring disputes to novel controversies fueled by new technologies and changing times. P/NP or letter grading.

121. Sociology of Religion. (4)

Lecture, three hours; discussion, one hour. Examination of classic and contemporary work in sociology of religion. Analysis of definition of religion, role of religion in modern life, and role of categories like Islam in contemporary U.S. politics. Focus on complicated questions of what it means to be religious: does that mean they are moral, believe in God, or are part of community of believers? Students gain better sense of how to think and talk about religion. P/NP or letter grading.

122. Sociology of Violence. (4)

Lecture, three hours; discussion, one hour. Exploration of macro-, meso-, and micro-level theories of violence, why states organize violence, why civilizations participate in violence, and physical, structural, and cultural definitions and forms of violence, also how violence is transformed in everyday, organizational, and extraordinary contexts. P/NP or letter grading.
129. Sociology of Time. (4) Lecture, three hours; discussion, one hour. Conceptualizations of time seen from scientific, philosophical, historical, and sociological perspectives; linear time in primordial, ancient, and medieval societies; ritual, the sacred, and experience of the eternal; structuring of urban, modern, and postmodern societies by clock, calendar, and schedule; future value orientation and notion of progress; see, labor, and social domination. P/NP or letter grading.

130. Self and Society. (4) Lecture, three hours; discussion, one hour. Examination of social processes shaping self-definition, and enactment of self and personal identity. P/NP or letter grading.

131. Careers in Sociology. (4) Lecture, three hours. Limited to juniors/seniors. Examination of possible career paths for Sociology majors, including such fields as business, nonprofit sector, government, healthcare, entertainment, and other areas. Development of career-relevant materials and skills. Letter grading.

132. Social Psychology: Sociological Approaches. (4) Lecture, three hours; discussion, one hour. Survey of contributions of sociologists to theory and research in social psychology, including theories of social control; conformity and deviation; reference groups; and interaction processes. P/NP or letter grading.

134. Culture and Personality. (4) Lecture, three hours; discussion, one hour. Requsite: course 1. Designed for juniors/seniors. Theories of relation of variations in personality, culture, and individualistic life, in primitive, modern, and postmodern societies, and influence of social role on behavior. P/NP or letter grading.

135. Sociology of Body. (4) Lecture, three hours; discussion, one hour. Examination of body as social construct in particular social and historical contexts. Students gain understanding of how bodies become gendered, raced, classed, and sexualized in ways that create and reinforce social institutions and relations of power. Analysis of reciprocal processes of structuration: how body is shaped by social expectations and symbolic exchange, how meanings are attached to bodies and different body parts, and how body is used in shape social interactions. Critical evaluation of embodiment experience, and contribution of sociological theories and data to understanding P/NP or letter grading.

136. Death, Dying, and Afterlife. (4) Formerly numbered M138.) Lecture, three hours; discussion, one hour. Social analysis of social inequities in death, understanding of what constitutes death, how to make sense of bad deaths, how to dispose of death, and what constitutes appropriate grieving. Death remains at foundation of discipline of sociology. Suicide does not occur randomly but is stratified according to social and structural factors. Emotional orientation, and class. Review of strength of sociological argument and evaluation of explanatory potential of different theories to death. Examination of historic and contemporary studies to examine how research and conceptualizations of death and dying have changed, and social responses to these phenomena. P/NP or letter grading.

137. Asian Comparative Border-Crossing, Diasporic Formation, and Social Transformation. (4) (Same as Asian American Studies M179.) Lecture, three hours; discussion, one hour. Exploration of critical orientations that are driven by globalization and international migration, through social science lens of migration studies and diaspora studies. Examination of how movements of people, ideas, capital, and cultural trends and patterns of diasporic formation, integration, and social transformation at individual, group, and societal levels in non-Western contexts. Students engage in intellectually stimulating debates on immigration and immigrant integration in Asian world; and on anxieties, tensions, conflicts, and accommodation in age of globalization. Students also discuss challenges, possibilities, and implications of building cohesive Asian community. P/NP or letter grading.

140. Negotiating Medical Care: Physician-Patient Conversations. (4) Lecture, three hours; discussion, one hour. Overview of how physician-patient interaction influences kinds of treatment patients receive. Focus on routine primary care medical visits and study of how some of our most significant health-care epiphenomena are affected by communication that takes place during primary care medical visits. Topics include communication between clinicians and patients who has changed over years, normative structure of medical visit, and how communication adds to series of public health problems currently faced. Students learn how to analyze actual interactions between physicians and patients with hands-on exercises to give them tools to examine these conversations. P/NP or letter grading.

141A. Migration and Labor in Mexico-U.S. Context. (5) Seminar, 20 hours. Mexico-U.S. migration is largest and oldest continuous international population flow of contemporary world, temporarily prompted by swift economic transformations, rural and urban Mexican migrants from every corner of Mexico have joined this migratory flow, settling well beyond southwestern region and organizing new communities in the U.S. Migration is binding U.S. and Mexico stronger than ever, putting this complex and multilayered phenomena at top of bilateral agenda. Examination of sociological dynamics of international migration and labor as they apply to Mexico-U.S. context, including demographic, political, and economic dynamics of migration, economic and social infrastructures that support cross-border mobility, and connections of migration with bi-national, national, regional, and local labor markets. Comparative insights to contrast this flow with other contemporary population streams. Offered in summer only. Letter grading.

141B. Migration and Labor in Mexico-U.S. Context: Research Seminar. (5) Seminar, 10 hours; fieldwork, 10 hours. Development of qualitative micro-study and research paper on migration and labor in Mexico-U.S. context. Research paper. Secondary and primary research conducted to study how students become familiar with commonly employed qualitative methods of research. Designed to help students understand basic methods of methodological reasoning, how to formulate research questions, and how to frame and investigate one particular issue related to migration and labor. How to make ethical decisions about conducting research. Development of student abilities in working with a secondary and primary research culminating in final research paper to be presented to faculty members and peers. Offered in summer only. Letter grading.

M144. Stress and Society: Biology and Inequality. (4) Lecture, three hours; discussion, one hour. Integrative view of health disparities, one of most pressing problems of society, through investigation of effects of socioecological stressors (SES) on being specific lens of stress biology. Topics include introduction to fundamentals of physiology of stress, integration of literature on poverty and SES with studies on physiologically consequences of poverty. Study of concepts of life course by following stress biology through childhood development and into adulthood. Letter grading.

145. Sociology of Deviant Behavior. (4) Lecture, three hours; discussion, one hour. Examination of leading sociological approaches to study of deviation and general survey of major types of deviation in American society. P/NP or letter grading.

147A. Sociology of Crime. (4) Lecture, three hours; discussion, one hour. Survey of theoretical theories of social origins, organization, and meanings of crime and criminal behaviors. P/NP or letter grading.

147B. Sociology of Criminal Justice. (4) Lecture, three hours. Discussion, one hour. Examination of structures and routine decision-making processes of key criminal justice institutions, including police, courts, probation and parole, jails and prisons. P/NP or letter grading.

148. Sociology of Mental Illness. (4) (Same as Disability Studies M148.) Lecture, three hours; discussion, one hour. Analysis of major sociological and social psychological models of madness. Study of social processes involved in production, recognition, labeling and treatment of mental illness. P/NP or letter grading.

149. Youth, Trouble, and Juvenile Justice. (4) Lecture, three hours; discussion, one hour. Examination of processes through which youth become involved in juvenile justice system. Analysis of this system as people-processing and people-changing institution as context for considering critical issues in juvenile justice. P/NP or letter grading.

150. Sociology of Aging. (4) (Same as Gerontology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, meaning, and role of the elderly in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of aged; caregiving relations and institutions; social inequalities concerned with aging. P/NP or letter grading.

151. Comparative Immigration. (4) Lecture, three hours; discussion, one hour. Survey of immigration experience of ethno-racial groups that migrated voluntarily to this country, with emphasis on immediate postmigration settlement. P/NP or letter grading.

152. Comparative Acculturation and Assimilation. (4) Lecture, three hours; discussion, one hour. Requisite: course 151. Comparison of acculturation and assimilation of Europeans, Africans, Mexicans, and Asians in the U.S., with emphasis on long-term cultural consequences of immigration. P/NP or letter grading.

153. Chinese Immigration. (4) (Same as Asian American Studies M130C.) Lecture, three hours; discussion, one hour. Survey of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese America and its interactions with social environment. P/NP or letter grading.

154. Race and Ethnicity in Latin America. (4) Lecture, three hours; discussion, one hour. Role of race and ethnicity in political, economic, and social lives of Latin American nations. P/NP or letter grading.
M155. Latinos in U.S. (4) (Same as Chicana/o and Central American Studies M155A.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors, faculty, and social condition of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading.

156. Race and Ethnicity in American Life. (4) Lecture, three hours; discussion, one hour. Role of race and ethnicity in the U.S., including interplay between racial and ethnic structures and meanings. Special attention to comparison of African American and European American experiences and to transformation of Asian American and Latino communities and the nation generally, wrought by renewal of mass migration in second half of the 20th century. P/NP or letter grading.

157. Social Stratification. (4) Lecture, three hours; discussion, one hour. Analysis of American social structure in terms of evaluative differentiation. Topics include criteria for differentiation, bases for evaluation, types of stratification, composition of strata and status systems, mobility, consequences of stratification, and problems of methodology. P/NP or letter grading.

158. Urban Sociology. (4) Lecture, three hours; discussion, one hour. Description and analysis of urbanization and urbanism in the U.S. and world. P/NP or letter grading.

M162. Sociology of Gender. (5) (Same as Gender Studies M162.) Lecture, three hours; discussion, one hour. Enforced requisite: course 1 or Gender Studies 10. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

M163. Gender and Work. (4) (Same as Gender Studies M163.) Lecture, three hours; discussion, three hours; discussion, one hour. Limited to juniors/seniors. Social and human reproduction is global policy issue. Government efforts to influence reproduction are important feature of modern state; political intervention into private life, intimacy, and sexuality. Exploration of politics of reproduction—intersection between politics and life cycle or between public sphere and private lives—and coverage of broad range of issues addressing prevention and promotion of reproduction from historical-comparative approach. Reading, discussion, and development of culminating project. P/NP or letter grading.

M165. Sociology of Race and Labor. (4) (Same as African American Studies M165 and Labor Studies M165.) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Exploration of relationship between race, work, and the economy. Analysis of underlying racial divisions in workforce and how they evolved historically. Consideration of circumstances under which workers and unions have employed people of color from jobs and unions, as well as circumstances under which workers and unions have organized people of color into unions in efforts to improve their wages and working conditions. Emphasis on globalization of these dynamics. P/NP or letter grading.

168. Organizations and Society. (4) Lecture, three hours; discussion, one hour. Sociological analysis of organizations and their social environment. Introduction to basic theories, concepts, methods, and trends in search of behavior of organizations in society. P/NP or letter grading.

169. Law and Society. (4) Lecture, three hours; discussion, one hour. Specific topics may include law in preindustrial and industrialized societies, legalizations of contemporary social relations, participants’ experiences of legal processes, perceptions of justice, social movements toward equal justice, roles of lawyers and legal institutions, and influence of court decisions. P/NP or letter grading.

170. Medical Sociology. (4) Lecture, three hours; discussion, one hour. Requisite: course 1. Provides majors in Sociology and other social sciences, as well as students preparing for health sciences careers, with understanding of health-seeking behavior and interpersonal and organizational relations that are involved in receipt and delivery of health services. P/NP or letter grading.

171. Occupations and Professions. (4) Lecture, three hours; discussion, one hour. Description and analysis of representative occupations and professions, with emphasis on contemporary U.S. P/NP or letter grading.

172. Entrepreneurship. (4) Lecture, three hours; discussion, one hour. Description and analysis of entrepreneurship, with special reference to historical origins, identification of entrepreneurs, and ethnic minority participation, legal and illegal forms, public and private auspices. P/NP or letter grading.

173. Economy and Society. (4) Lecture, three hours; discussion, one hour. Sociology of economic life, with emphasis on principal economic institutions of the U.S. P/NP or letter grading.

174. Sociology of Family. (4) (Same as Gender Studies M174.) Lecture, three hours; discussion, one hour. Theory and research dealing with modern family. Its structure, functions, including historical changes, variant family patterns, family as institution, and influence of contemporary society on family. P/NP or letter grading.

175. Sociology of Education. (5) (Same as Education M108.) Lecture, four hours; discussion, one hour. Study of how U.S. educational system both promotes socioeconomic opportunities and maintains socioeconomic inequalities: historical and theoretical perspectives on role of education in U.S. society; trends in educational attainment; ways in which family background, class, race, and gender affect educational achievement and opportunities for development within and outside schools; effects of education on socioeconomic attainment, family, health, attitudes, and social participation; educational policies to improve school quality and address socioeconomic inequalities. Letter grading.

176. Sociology of Mass Communication. (4) (Same as Communication M147.) Lecture, four hours; discussion, one hour (when scheduled). Studies in relationships between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected audience studies, and effects of media on society. P/NP or letter grading.

177. Sociology of Caribbean. (4) (Same as African American Studies M178.) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Historical sociology of Caribbean, with emphasis on colonialism and decolonization, development and underdevelopment, race-making institutions and evolution of race relations, nationalism and migration. P/NP or letter grading.

180A-180Z. Special Topics in Sociology. (4) each Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Study of selected topics of sociological interest. Open to non-sociology majors, and instructors. May be repeated for credit and may be applied as elective units toward Sociology major. P/NP or letter grading.

181A. Sociology of Global China. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Analyses of how domestic developments create impetus for China’s global expansion, and assessments of global China’s interest in and relations with its neighbors. Concrete case studies include Belt and Road Initiative, soft power and cultural diplomacy, internal colonization of Hong Kong and Xinjiang, China in Africa, U.S.-China trade war, and New Cold War. P/NP or letter grading.

181B. Sociology of Contemporary China. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Survey of changes in Chinese society from beginning of 20th century to present. Topics include social mobility and inequality, family and household, and population. Emphasis on changes post-Reform and opening in present. Focus on interaction of economic and political change plus family organization. Contrasts and similarities between China and West, China’s place in social sciences, and challenges due to social organization that originated from studying Western societies. May be taken independently for credit. P/NP or letter grading.

182. Political Sociology. (4) Lecture, three hours; discussion, one hour. Contributions of sociology to study of politics, including analysis of political aspects of social institutions, social context of action, and social bases of power. P/NP or letter grading.

183. Comparative and Historical Sociology. (4) Lecture, three hours; discussion, one hour. Requisite: consent of instructor. Survey of comparative and historical studies in sociology. Various aspects of development of modern society, including development of nation-state, emergence of capitalism, industrialization, and population growth. Variation in contemporary society, viewed from variety of theoretical perspectives. P/NP or letter grading.

185. American Society. (4) Lecture, three hours; discussion, one hour. Analysis of institutions in the U.S. in historical and international perspective, with emphasis on topics such as industrialization, work, state, politics, community, family, religion, and American culture. Theories of social change, conflict, and order applied to case of the U.S. P/NP or letter grading.

186. Latin American Societies. (4) Lecture, three hours; discussion, one hour. Social structure and social conflict in Latin America, with special attention to racial and class structures and dilemmas of economic and political development. Country and specific focus varies each term. P/NP or letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced requisite: course 188SC. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic. Credit preparation and prearrangement of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced requisite: course 188SC. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic. Credit preparation and prearrangement of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.
189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study. Enrollment is by special arrangement only; students are required to write contract for their seminar. Letter grading.

191M. Undergraduate Seminar: Social Ecology. (5) Seminar, three hours. Limited to juniors/seniors. Fundamentals of sociological approach to social ecology, also known as human ecology. Study of adaptation of population to its environment. Topics include density, maintenance of personal space, space and territorial effects of environment on humans. Reading, discussion, and development of culminating project. Letter grading.

191N. Undergraduate Seminar: Urban and Suburban Sociology. (5) Seminar, three hours. Limited to juniors/seniors. History and present condition of cities and suburbs in America, with stress on global cities such as New York and Los Angeles, and comparisons to London and Shanghai. Process of suburbanization as it began in early 19th century and still continues. Analysis of city politics, house and architectural styles, crime, urban terror, public housing and ghettos, segregation and integration of neighborhoods, questions of gentrification, immigration, urban culture (especially art, museums, and movie and music industries), and environmentalism. A frequently scheduled course with course C297. Letter grading.

191NY. Undergraduate Seminar: Urban and Suburban Sociology in New York City. (5) Seminar, eight hours. Limited to students in summer UCLA Travel Study Program. Cutting-edge urban issues in city of 9.2 million, rebuiding of Wold Trade Center, Robert Moses (New York's master builder), urban economic development, green New York, transporation systems, urban politics, house and architectural styles, including New York's famous skyscrapers, historic preservation, crime and police departments, ghettos, education, housing, and search for affordable housing. Offered in summer only. Letter grading.

191O. Undergraduate Seminar: Ideas of Love in Historical Perspective. (5) Seminar, three hours. Limited to honors seminar participants. Seminar dedicated to creating and handling cultural institutions. Study of selected topics of sociological interest. Seminar, three hours. Limited to juniors/seniors. Social and human reproduction is global policy issue. Government efforts to influence reproduction are important feature of modern state: political intervention into private life, intimacy, and sexuality. Exploration of politics of reproduction—interaction between politics and life cycle or between public and private lives—and of broad range of issues involved in understanding and changing pattern of reproduction from historical-comparative approach. Reading, discussion, and development of culminating project. Letter grading.

191Q. Undergraduate Seminar: Communication in Medical Care. (5) Seminar, three hours. Limited to juniors/seniors. Sociology dimensions of patient care in primary care context. Use of microsociological methods to examine main facets of American primary care medical visits, including detailed analysis of interactional conduct of those visits and development of interpersonal and analytic skills. Reading, discussion, and development of culminating project. Letter grading.

191R. Undergraduate Seminar: Culture and Society. (5) Seminar, three hours. Limited to juniors/seniors. Introduction to classic theoretical approaches and contemporary developments in study of social worlds and processes shaping definition, enactment, and experience of self. Reading, discussion, and development of culminating project. Letter grading.

191S. Undergraduate Seminar: Sexuality. (5) Seminar, three hours. Limited to juniors/seniors. Sexuality is important site for enactment of gender and gender identity. Sexual preference and sexual behavior can also form basis for social identity, repression, discrimination, and privilege, independent of gender. Social factors such as social class, ethnicity, gender, and networks shape our sexual practices and choice of partners. Reading and writing about original sociological work, textual and anthropological texts and development of culminating project. Letter grading.

191T. Undergraduate Seminar: War and Society. (5) Seminar, three hours. Limited to juniors/seniors. Study of relationship between social relations and American identity of social organization in general, with particular attention to shock-based civic militarism characteristic of the West. Topics include honor, discipline, bureaucracy, conscription, logistics, total war, guerilla war, terrorism, and counterinsurgency. Reading, discussion, and development of culminating project. Letter grading.

191U. Undergraduate Seminar: Community. (5) Seminar, three hours. Limited to juniors/seniors. Study of selected topics of sociological interest. Reading, discussion, and development of culminating project. Consent Schedule of Classes. Seminar, three hours. Limited to juniors and instructors. May be repeated for credit and may be applied as elective units toward Sociology major. Letter grading.

194. Research Group Seminars: Sociology. (2) Seminar, two hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field. May be repeated for credit. P/NC grading.

M194DC. Quarter in Washington, DC, Research Seminars. (Same as History M194DC, and Political Science M194DC.) Seminar, three hours. Limited to Quarter in Washington students and other students enrolled in UC Washington programs. Seminar, three hours. Undergraduate study for graduate students. May be repeated for credit and may be approved by instructor. Letter grading.

195CE. Community and Corporate Internships in Sociology. (4) Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in community agency or business to gain electronic internship. Enrollment is by special arrangement only; students are required to write contract for their seminar. Letter grading.

M194DC. Quarter in Washington, DC, Research Seminars. (Same as History M194DC, and Political Science M194DC.) Seminar, three hours. Limited to Quarter in Washington students and other students enrolled in UC Washington programs. Seminar, three hours. Undergraduate study for graduate students. May be repeated for credit and may be approved by instructor. Letter grading.
units may be applied toward major; units applied must be taken for letter grade. Individual contract with supervising faculty member required. P/NP or letter grading.

198A. Design of research project to serve as student’s honors thesis. Research proposal, detailed bibliography, and regular meetings with sponsoring faculty member required. 198B. Requisite: course 198A. Completion of work initiated in course 198A. Development of honors thesis in consultation with instructor. Requisite: course 198B. Completion of honors thesis under direct supervision of honors faculty director.

199. Directed Research in Sociology. (2 to 4) Tutorial, one hour. Requisite: junior/senior Sociology majors. Independent intensive study designed for students with research interest under guidance of faculty mentor. Scheduled meetings to be arranged between faculty mentor and student. Culuminating paper or project required. May be repeated for maximum of 16 units, but only 8 units may be applied toward major. Individual contract required; see undergraduate counselor. P/NP or letter grading.

199A-199B. Directed Research in Language and Social Behavior. (4–4) Tutorial, one hour. Limited to junior/senior Language and Social Behavior minor faculty advisory committee. Scheduled meetings to be arranged between faculty mentor and student. Culuminating paper or project required. Individual contract required; see undergraduate counselor. Letter grading.

Graduate Courses

201A-201B-201C. Proseminars: Sociology. (2–2–2) Seminar; two hours every other week. Required of first-year graduate students. Introduction to range of theoretical and research interests represented by department faculty members. S/U grading.

202A-202B. Theory and Research in Sociology. (4–4) Lecture, two hours; discussion, two hours. Required of first-year graduate sociology students. Examination of interrelations of theory, method, and substance in exemplary sociological works, with analytical and skills-centered orientation. In Progress (202A) and S/U or letter grading.

203. How to Write a Lot. (4) Seminar, three hours. Designed to help graduate students develop regular and productive writing practices. Appropriate for students in their second year or beyond who have one full draft of their MA paper written and want to revise and publish it in a timely manner. Development of regular writing schedules and protecting them from competing demands. Learning of specific genres of writing for academic journals, books, and op-eds. Editing of students’ own work and that of classmates. S/U or letter grading.

204. Topics in Sociological Theorizing. (4) Seminar, four hours. Examination of selected issues and problems in classical or contemporary sociological theory. S/U or letter grading.

205. Family and Social Change. (4) Lecture, three hours. Examination of change in family and household organization, with major focus on relations among economic institutions, family structure, and content of family life. Consideration of concepts, theories, and data about kinship. S/U or letter grading.

210C. Intermediate Statistical Methods III. (4) Lecture, three hours; discussion, one hour. Requisite: course 210B. Statistical methods used in social research, with focus on problems for which classical linear regression model is inappropriate, including categorical data, structural equations, longitudinal data, incomplete and erroneous data, and complex samples. S/U or letter grading.

211A-211B. Comparative and Historical Methods. (4–4) Lecture, three hours. In Progress (211A) and S/U or letter (211B). Strategies of Research and Conceptualization. Topics include relationship of theory and fact to social sciences, logic of comparative and historical analysis, and substantive paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in representative problem areas. 211B. Research Techniques. Requisite: course 211A. Topics include problem of evidence, quantitative and qualitative data. Techniques of data analysis, including use of manuscript context, content analysis, collective biography, and secondary analysis.

212A. Quantitative Data Analysis. (4) Lecture, three hours; discussion, one hour. Enforced requisite: courses 210A, 210B. Course 212A is enforced requisite to 212B. Analysis and interpretation of primarily nonexperimental quantitative data, with focus on sample survey. Using an extensive sample of statistical methods employed in previous courses, culminating in term paper in style of American Sociological Review or similar journal article. Topics include: inferential hypothesis testing, correlation, log-linear analysis, ordinary least squares regression, regression with interactions, robust regression, diagnostic procedures, and methods for handling complex sample survey data. Credit is not to be given only on completion of course 212B.

212B. Quantitative Data Analysis. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 212A. Analysis and interpretation of primarily nonexperimental quantitative data, with focus on sample survey and census data. Extensive practice at utilizing statistical methods encountered in previous courses, culminating in term paper in style of Ameri-
223. Psychological and Interactionist Perspectives on Selected Topics. (4) Lecture, three hours. Comparison of phenomenological and symbolic interaction perspectives by examining particular body of life or current social issue; substantive topics vary; attention on development of phenomenological and interactionist thought on topic of concern, with special concern for ambiguities and divergences both within and between approaches. When relevant, attention on logical and historical relations of phenomenology and interactionism of pragmatist, existentialist, and general philosophy, S/U or letter grading.

M225A. Applications of Economic Theory: California Population Research Topical Seminar Series. (4) (Same as Economics M204A.) Seminar, three hours. Limited to California Center for Population Research (CCPR) affiliates. Examines issues such as demography, health, aging, labor, and broad array of topics concerned with effects of economic, social, and political transformations on human behavior both in U.S. and in other countries. When relevant, attention on logical and historical relations of philosophy and sociology in Western societies, S/U or letter grading.

227. Sociology of Knowledge. (4) Lecture, three hours. Designed for graduate students. Survey of theories and research concerning social determinants of systems of knowledge and role of intellectual and artistic elites in Western societies, S/U or letter grading.

228. Critical Issues in Macrosociology. (4) Lecture, three hours. Conceptual introduction to macro-sociology in which exemplary works are read, studied for substance and methods, and critiqued in seminar and in written papers, S/U or letter grading.

230A-230B. Comparative Ethnicity, Race, and Nationalism. (4–4) Seminar, three hours. Preparation for independent research on comparative ethnic, race, and nationalism through close reading of key theoretical and empirical works, S/U or letter grading.

230C. Comparative Ethnicity, Race, and Nationalism. (4) Seminar, three hours. Introduction to comparative theory of race and ethnicity and effort to demonstrate merits of double comparative approach to race, one that strives to be as comparative at substantive level as gender, age, and class, and in analyses of particular cases, S/U or letter grading.

232. Class, Politics, and Society. (4) Lecture, four hours. Nature of class structure and how it affects distribution of resources; degree of class structure to politics and political power. Issue of salience of class versus other identities such as gender, age, race, and nationalization. Examination of contemporary globalization tendencies of capitalism, S/U or letter grading.

233. Foundations of Political Sociology. (4) Lecture, three hours. Designed for graduate students. Survey of field of political sociology, oriented around critical theoretical, major theoretical traditions, and contemporary exemplars. Special attention to competing perspectives on power, theory of state, and relationship of class structure to politics, S/U or letter grading.

234. Sociology of Development. (4) Seminar, three hours. Discussion of theoretical, historical, and specific issues in sociology of development (e.g., world system theory, developmental state, import substitution industrialization, export promotion industrialization, neoliberalism in Latin America, new approaches), S/U or letter grading.

235A-235B. Race/Ethnicity in U.S. (4–4) Lecture, three hours. Survey of theoretical and empirical literature on race, ethnicity, and immigrant groups in U.S. to provide comparative analysis of racial/ethnic groups as well as provide detailed knowledge of particular racial/ethnic groups and their experiences within historical contexts, to understand structural integration into U.S. society (i.e., structural assimilation or socioeconomic mobility), and to examine theoretical approaches to understanding race and ethnicity in contemporary society. Preparation for field examination in race and ethnicity, S/U or letter grading.

236A. International Migration. (4) Lecture, three hours. Comprehensive overview of key current theoretical debates in study of international migration, with focus on exploration of possibilities of comparative (historical and cross-national) research program in field, linking North America to other global experiences of immigration, S/U or letter grading.

236B. International Migration. (4) Seminar, three hours. Further exploration of key current theoretical debates in study of international migration, with emphasis on comparing both theoretical debates of field and empirical data and case studies on which those debates hinge, to encourage students to undertake research in field, S/U or letter grading.

236C. International Migration. (4) Lecture, three hours. Designed for students beginning or undertaking original research in field of international migration. Outside lecture, preparation of presentations of student projects, circulation of completed or draft student papers, S/U or letter grading.

237. Seminar: Theory and Research in Comparative Social Analysis. (2) Seminar, two hours. Designed for graduate students. Emphasis on one issue of particular importance for comparative analysis of capitalism and socialism, placed in historical and cross-national context, with particular focus on sociology (along with economics, political economy, and production of culture). S/U or letter grading.

238. Sociology of Gender and Sexuality. (4) Seminar, three hours. Discussion of various dimensions of gender and sexuality, including gendered experiences of socialization, including cultural institutions, economy, and family, within context of experiences of black women and black men in contemporary U.S. Letter grading.

239. Social Stratification, Mobility, and Inequality. (4-4) Lecture, three hours. Enforced requisites: courses 239A and 239B are enforced requisites to 239B. Introduction to social stratification, mobility, and inequality in U.S. and abroad, with focus on concepts, data, methods, and facts about occupational and class structure, intergenerational transmission of socioeconomic status, effects of family, school, and labor market on socioeconomic achievement, careers, and inequality; earnings, income, and wealth distribution; poverty; social mobility; socioeconomic factors and marriage, gender and family, social stratification; and health disparities, S/U or letter grading.

240. Sociology of Education. (4) Lecture, three hours. Overview of social scientific study of education, with special focus on sociological analysis of education (S/U or letter grading).

242A-242C. Conversation Analysis II, III. (4-6) Lecture, three hours; discussion, two hours. Exploration of classical approaches to cultural sociology. Continuation of introduction to some structures basic to organization of conversational interaction: organization of repair, and practices of word selection and reference to persons, places, time, and action. S/U or letter grading.

244A. Conversational Structures I. (4) Formerly numbered 244A.) Lecture, three hours; discussion, one hour. Introduction to various structures employed in organization of conversational interaction, such as turn-taking, action sequencing, and repair. Concurrently scheduled with course CM124A, S/U or letter grading.

244B-244C. Conversation Analysis II, III. (4-6) Lecture, three hours; discussion, two hours. S/U or letter grading.

248. Selected Topics in Culture and Society. (4) Seminar, three hours. Discussion, one hour. Designed for graduate students. Seminar is designed for students to situate contemporary experiences of immigration. S/U or letter grading.

248B. International Migration. (4) Seminar, three hours. Further exploration of key current theoretical debates in study of international migration, with emphasis on comparing both theoretical debates of field and empirical data and case studies on which those debates hinge, to encourage students to undertake research in field, S/U or letter grading.

254. Cultural Sociology: Classical and Contemporary Approaches. (4) Lecture, one hour; discussion, two hours. Exploration of classical approaches to cultural sociology. Focus on exploration of possibilities of comparative (historical and cross-national) research program in field, linking North America to other global experiences of immigration, S/U or letter grading.

258. Sociology of Emotions. (4) Lecture, two hours; discussion, two hours. Examination of emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and emotions; creativity and expressive self, emotions and artifacts, experiences of change, emotions and artifacts, experiences of change, emotions and artifacts, experiences of change, emotions and artifacts, experiences of change.

264. Sociology of Emotions. (4) Lecture, two hours; discussion, two hours. Emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and emotions; creativity and expressive self, emotions and artifacts, experiences of change. S/U or letter grading.

274. Sociology of Emotions. (4) Lecture, two hours; discussion, two hours. Emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and emotions; creativity and expressive self, emotions and artifacts, experiences of change. S/U or letter grading.

284. Sociology of Emotions. (4) Lecture, two hours; discussion, two hours. Emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and emotions; creativity and expressive self, emotions and artifacts, experiences of change. S/U or letter grading.

286. Sociology of Emotions. (4) Lecture, two hours; discussion, two hours. Emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and emotions; creativity and expressive self, emotions and artifacts, experiences of change. S/U or letter grading.

294. Sociology of Emotions. (4) Lecture, two hours; discussion, two hours. Emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and emotions; creativity and expressive self, emotions and artifacts, experiences of change. S/U or letter grading.

298. Sociology of Emotions. (4) Lecture, two hours; discussion, two hours. Emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and emotions; creativity and expressive self, emotions and artifacts, experiences of change. S/U or letter grading.

304. Sociology of Emotions. (4) Lecture, two hours; discussion, two hours. Emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and emotions; creativity and expressive self, emotions and artifacts, experiences of change. S/U or letter grading.
operators. Special attention to effects of social change on culture and human development. S/U or letter grading.

250. Sociology of Health. (4) Seminar, three hours. Exploration of literature of human health as product of society. Macro focus and micro focus used to examine relevance of macro organizational features of national society (culture, economy, politics) while maintaining awareness that link these to micro-level influences to personal experience (mind, body, emotion). Main focus on modern industrial societies and organized around many leading issues in sociology of health. Letter grading.

251. Social Movements. (4) Seminar, three hours. In-depth exploration of current theoretical debates and empirical research on social movements, collective action, and contentious politics, examining case studies, comparative analyses, and large-N investigations, with focus on developing student expertise in understanding social movement research and conceptualizing research projects. S/U or letter grading.

M252. Selected Topics in Sociology of Gender. (4) (Same as Gender Studies M252.) Lecture, two hours; discussion, two hours. Designed for graduate students. Seminar on selected topics in sociology of gender. May be repeated for credit. Letter grading.

253. Politics of Reproduction, Gender, and Family. (4) Lecture, one hour. Practices of communication, gender, and family life for both middle-class and low-income populations. Exploration of notions of black masculinity and femininity within black body and critical interrogation of notions of blackness and authenticity in racial identification. Contribution to understanding of black intimate relationships in different contexts, including lesbian and gay identities, Caribbean and other ethnic identities, and interracial intimacies. S/U or letter grading.

M253. Demographic Sociology of Los Angeles. (4) (Same as Community Health Sciences M263.) Lecture, three hours. Designed for graduate students. Use of city of Los Angeles as major social and demographic factors that characterize cities in the U.S. Examination of role of these factors in affecting health outcomes. Letter grading.

256B. Selected Problems in Analysis of Conversation. (4) Lecture, three hours. Requisites: courses 244A, 244B. Variable topics/format course. Consult instructor for topics and formats to be offered in specific term. May be repeated for credit with topic change. S/U or letter grading.

256C. Selected Problems in Psychosocial Analysis. (4) (Same as Anthropology M244P) Lecture, two hours. Recommended preparation: acceptable to seminar. Selections of problems in interpretation of sociology and psychoanalysis, which may be substantive (group development, socialization, culture, deviance, collective behavior) or methodological; latter focuses on clinical fieldwork and experimental use of psychoanalytic and sociotechnical techniques. S/U or letter grading.

260A. Topics in Social and Cultural Movements. (4) (Same as American Indian Studies M263.) Requisite: course 260. Seminar, one hour. Opportunity to advance research projects in progress and to develop skills of constructive criticism in discussing work of others.

261. Working Group in Sociology. (1 to 4) Discussion, two to three hours. Variable topics in sociology of gender; ethnicity; social networks; race, ethnicity, immigration; and social demography and stratification. Advanced study and analysis of current topics in specialized areas of sociology. May be repeated for credit. S/U grading.

262. Cross-Cultural Perspectives on Gender. (4) (Same as Gender Studies M252.) Seminar, three hours. How does gender manifest itself in the lives of different women and men, including women and men, and impact on changing family forms and the development of intergenerational, ethnic and cultural identities, and cross-cultural change? Is gender too different cross-culturally? S/U or letter grading.

C258. Talk and Social Institutions. (4) Lecture, four hours; discussion, one hour. Practices of communication and social interaction in number of major institutional settings in contemporary society. Setting may include emergency services, police and courts, medicine, news interviews, and political oratory. Currently scheduled with course CM125. S/U or letter grading.

268. Economy and Society. Discussion, two hours. (4) Discussion, two hours. Designed for graduate students. Review and critique of major analytical traditions in the study of economic systems and their historical development. S/U or letter grading.

269. Sociology of Medicine. (4) Seminar, three hours. Review and analysis of various theoretical frameworks in sociology of medicine. Topics include medicine, culture, and capitalism; professions and power; challenge of managed care, sick role and social control, interactionism and negotiation, social class, sickness and self, debates over medicalization and demedicalization. Prepared as preparation for field examination in sociology of health and medicine and specifically for themes traditionally included under medical sociology/sociology of medicine. S/U or letter grading.

270. Demographic Sociology of Los Angeles. (4) Seminar, three hours. Use of city of Los Angeles as major social and demographic factors that characterize cities in the U.S. Examination of role of these factors in affecting health outcomes. Letter grading.

278. Sociology of Latin America. (4) Lecture, one hour; discussion, two hours. Designed for graduate students. Selected topics in sociological study of Latin America (social movements, social institutions, ethnicity, race and ethnicity, stratification, and social development. Letter grading.

280. Trafficking, Gender, Health, and Human Rights. (4) (Same as Law M577.) Seminar, four hours. Review and critical assessment of diverse literature on international traffic of persons, with emphasis on significance of sociological, legal, and gender aspects of trafficking. Primary focus on trafficking for sex work and subsequent lines between discourse on commercial sex trade and trafficking. Additional issues include role of political and economic transition, militarization, health implications of trafficking, trafficking for non-sexual labor, and role of advocacy. S/U or letter grading.

281. Selected Problems in Mathematical Sociology. (4) Lecture, three hours. Exploration of some mathematical models of sociological processes. Possible topics: social choice and decision making, kinship relations, organizations, social interaction. S/U or letter grading.

282. Sociology of Medicine. (4) Seminar, three hours. Review, analysis, and discussion of major theoretical frameworks in sociology of medicine. Topics include medicine, culture, and capitalism; professions and power; challenge of managed care, sick role and social control, interactionism and negotiation, social class, sickness and self, debates over medicalization and demedicalization. Prepared as preparation for field examination in sociology of health and medicine and specifically for themes traditionally included under medical sociology/sociology of medicine. S/U or letter grading.

283. Communication in Medical Care. (4) Seminar, three hours. Review and development of empirical knowledge about doctor-patient relationship. Analysis of nature and dynamics of routine office visits, with focus on role of norms in regulating doctor-patient conduct, role of expertise and power in doctor-patient relationship, and methodological questions concerning how doctor-patient relationship can be analytically included under medical sociology/sociology of medicine. S/U or letter grading.

285A-285Z. Special Topics in Sociology. (4) (Same as American Indian Studies M244P) Seminar, three hours. Designed for graduate students. Seminars on selected current topics of sociological interest. Consult Schedule of Classes for topics and instructors. May be repeated for credit. S/U or letter grading.

287. Topics in Chinese Sociology. (4) Seminar, three hours. Preparation: at least two upper-division courses on China in any social sciences discipline. Introduction to current research questions in Chinese sociology, as well as major themes in study of Chinese society, both historical and contemporary, including demographic, economic, political, and social change after and before 1949. S/U or letter grading.

289A-289Z. Data Analysis. (2-4) Requisite: courses 244A, 244B. S/U or letter grading.

291. Data Analysis. Laboratory, two hours. Practice in analysis of conversational data. May be repeated for credit. S/U or letter grading.

292. Problems in Social Research Analysis. (2-4) Requisite: courses 244A, 244B. S/U or letter grading.

C297. Urban and Suburban Sociology. (5) Seminar, three hours. History and present condition of cities and suburbs in America, with stress on global cities such as New York and Los Angeles, and comparisons to London and Shanghai. Process of suburbanization and urbanization in early and late 20th century. Analysis of city politics, house and architectural styles, crime, urban terror, public housing and ghettos, segregation and integration of neighborhoods, questions of gentrification. Immigrant experiences (especially in art, museums, and movie and music industries), and environmentalism. Concurrently scheduled with course C191N. Letter grading.

295. Workshop in Culture and Society. (4) Seminar, two hours every other week. Interdisciplinary workshop for graduate students and faculty pursuing theory and research in topics related to interplay of culture and society, whether social, literary, or philosophical in nature. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprentice must have intensive guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U or letter grading.

495. Supervised Teaching of Sociology. (2) Seminar, two hours. Preparation: appointment as teaching assistant or fellow in Sociology. Directed course for teaching assistants designed to deal with problems and techniques of teaching introductory sociology. S/U grading.

Overview

The Department of Spanish and Portuguese is dedicated to the study and teaching of the languages, literatures, and cultures of the Hispanic heritage in all areas of the world, particularly on the continents of Europe and America. It maintains a strong commitment to the value of original research and professional instruction at all levels of its activities.

Whether studying for the Bachelor of Arts (BA), Master of Arts (MA), or Doctor of Philosophy (PhD) degree, students are given careful guidance in the choice of courses and in the preparation of a study program. The richness of Hispanic culture is amply represented in the extensive range of courses in language, linguistics, and literature. Although the literatures of Spain, Portugal, Brazil, and Spanish America predominate, courses are also offered in Chicanos literature. The breadth of courses offered by the department allows undergraduate students to pursue many possible interests and enables graduate students to concentrate in depth in several areas of specialization.

Department courses are primarily designed to serve the five BA programs: BA in Spanish, BA in Spanish and Community and Culture, BA in Spanish and Linguistics, BA in Spanish and Portuguese, and BA in Portuguese and Brazilian Studies; as well as to prepare students for its three graduate programs: MA in Spanish, MA in Portuguese, and PhD in Hispanic Languages and Literatures. The courses are also functionally supportive of such interdepartmental programs as the BA, MA, and PhD programs in Chicana and Chicano Studies, BA and MA programs in Latin American Studies, and MA and PhD programs in Comparative Literature.

Undergraduate Policies

Language Acquisition Courses

Beginning- and intermediate-level Spanish language courses are offered for Spanish second language learners and Spanish heritage learners. Beginning- and intermediate-level Portuguese language courses are offered for second language learners and learners proficient in another Romance language.

The approach is proficiency-oriented, communicative, and task-based. Students develop communicative competence in all four skill areas (listening, speaking, reading, and writing). Classes are conducted completely in Spanish or Portuguese.

Language courses are delivered in a blended form; students are required to attend face-to-face class meetings and also complete two hours per week of work assigned, online. The two hours of online work are included in the required contact hours for the course.

Students with one or more years of high school Spanish or Portuguese who plan to enroll in Spanish 1 through 27 should take the departmental placement examination. Consult the Schedule of Classes or the department office for more information.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Spanish and Portuguese grammar and/or composition.

Undergraduate Majors

Spanish BA

Capstone Major

The Spanish major is a designated capstone major. Seniors complete a capstone seminar that provides unique opportunity to work closely with a faculty member on a focused topic of research. Through their capstone work students are expected to demonstrate mastery of the Spanish language, along with specific skills and expertise acquired in earlier coursework. Additionally, students acquire a working knowledge of scholarly discourse relative to a specialized topic, conceive and execute an associated project, and engage with a community of scholars, presenting their work to peers and helping to further peers’ work through discussion and critique.

Learning Outcomes

The Spanish major has the following learning outcomes:

- Demonstrated written and oral mastery of the Spanish language
- Demonstrated specific skills and expertise, including research, analysis, and writing
- Identification and analysis of appropriate primary sources
- Conception and execution of a project that identifies and engages with a specialized topic
- Working knowledge of scholarly discourse relative to a specialized topic
- Engagement with peers through presentation, discussion, and critique of student work

Entry to the Major

Transfer Students

Transfer applicants to the Spanish major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one Spanish civilization course, and one Spanish American civilization course.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.
Requirements

Preparation for the Major
Required: Spanish 25 or 27, 42, 44.

The Major
Required: (1) Two core courses (Spanish 119 and 120), (2) eight upper-division Spanish elective courses in literature, culture, linguistics, media, service learning, or interdisciplinary studies, up to three of which may be from an outside department that deals with Spain or Spanish America and have been approved by the undergraduate adviser, and (3) one senior capstone seminar (Spanish 191C).

Honors Program
Portuguese 198A and Spanish 198A are 4-unit courses in which students research and prepare a draft of a thesis on a selected topic; Portuguese 198B and Spanish 198B are 2-unit courses in which students complete the final thesis draft of approximately 25 to 30 pages. Approval of the honors thesis by the faculty mentor is the final requirement for departmental honors. Portuguese 198A-198B and Spanish 198A-198B may not be applied toward the majors.

Policies

Preparation for the Major
Each course must be taken for a letter grade and passed with a grade of C or better prior to beginning upper-division work in the major.

The Major
Each course must be taken for a letter grade and passed with a grade of C or better.

By petition, and after consultation with the undergraduate adviser, up to three 4-unit Spanish 197 or 199 courses may be applied toward the majors.

Honors Program
The departmental honors program is open to majors who have completed a minimum of six upper-division major courses with a 3.7 grade-point average or better in those six courses. Eligibility is verified by the departmental counselor. On the basis of their coursework and special interests, students then consult with a faculty member in that field and formulate a research project that they pursue under the faculty member’s guidance through Portuguese 198A-198B or Spanish 198A-198B.

Spanish and Community and Culture BA

Capstone Major
The Spanish and Community and Culture major is a designated capstone major. Students participate in community-based experiential learning courses coupled with elective and adjunct courses. Reflective journals, final projects, and in-class presentations are required. Through their capstone work, students should have mastery of the Spanish language, ability to conduct and interpret research to determine the needs of specific communities, critical understanding and ability to apply theories within a service context, sensitivity to diversity and cultural differences, and ability to perform scholarly presentations that tie current issues to research and theory.

Learning Outcomes

The Spanish and Community and Culture major has the following learning outcomes:

1. Demonstrated written and conversational mastery of the Spanish language
2. Conduct and interpret research to determine the needs of specific communities
3. Demonstrated critical understanding of, and ability to apply, theories within a service context
4. Demonstrated sensitivity to diversity and cultural differences
5. Performance of scholarly presentations that tie current issues to research and theory
6. Articulation of the value of civic engagement

Entry to the Major

Transfer Students
Transfer applicants to the Spanish and Community and Culture major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one Spanish civilization course, and one Spanish American civilization course.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Spanish and Linguistics BA

Learning Outcomes

The Spanish and Linguistics major has the following learning outcomes:

1. Demonstrated technical mastery of the Spanish language, including pronunciation (phonetics and phonology), history (historical linguistics), and structure (syntax)
2. Demonstration of how to do basic spoken language research in Spanish linguistics, emphasizing Latin American Spanish and Chicano Spanish or Los Angeles vernacular
3. Identification and analysis of appropriate primary linguistic sources within the generative framework
4. Working knowledge of scholarly discourse in a specialized Spanish linguistics topic (phonology, syntax, and historical linguistics)
5. Conception and execution of a project that identifies and engages with a specialized Spanish linguistics topic as a result of the practical part of the courses on phonetics and phonology and on syntax

Entry to the Major

Transfer Students
Transfer applicants to the Spanish and Linguistics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one introduction to linguistics course, and one Spanish or Spanish American civilization course.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.
Requirements

Preparation for the Major
Required: Linguistics 20 (with grade of B– or better), Spanish 25 or 27, M35 (or Portuguese M35), 42 or 44.

The Major
Required: (1) Spanish 100A, 100B, 119, Linguistics 103, 120A, 120B, (2) one course from Linguistics 160 or 165A or 165B, and (3) four upper-division Spanish electives, two of which must be from Spanish 160.

Honors Program
Portuguese 198A and Spanish 198A are 4-unit courses in which students research and prepare a draft of a thesis on a selected topic; Portuguese 198B and Spanish 198B are 2-unit courses in which students complete the final thesis draft of approximately 25 to 30 pages. Approval of the honors thesis by the faculty mentor is the final requirement for departmental honors. Portuguese 198A-198B and Spanish 198A-198B may not be applied toward the majors.

Policies

Preparation for the Major
Each course must be taken for a letter grade and passed with a grade of C or better prior to beginning upper-division work in the major, except Linguistics 20, which must be passed with a grade of B– or better.

The Major
Each course must be taken for a letter grade and passed with a grade of C or better.

Honors Program
The departmental honors program is open to majors who have completed a minimum of six upper-division major courses with a 3.7 grade-point average or better in those six courses. Eligibility is verified by the departmental counselor. On the basis of their coursework and special interests, students then consult with a faculty member in that field and formulate a research project that they pursue under the faculty member’s guidance through Portuguese 198A-198B or Spanish 198A-198B.

Spanish and Portuguese BA

Learning Outcomes
The Spanish and Portuguese major has the following learning outcomes:

- Demonstrated oral, aural, and written mastery of the Spanish and Portuguese languages
- Demonstrated specific skills and expertise, including research, analysis, and writing
- Conception and execution of research projects that identify and engage with a specialized topic
- Identification and analysis of appropriate primary sources
- Working knowledge of scholarly discourse on a specialized topic
- Engagement with peers through presentation, discussion, and critique of student work

Entry to the Major

Transfer Students
Transfer applicants to the Spanish and Portuguese major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one year of Portuguese, one Spanish civilization course or one Spanish American civilization course, and one Brazilian culture course.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major
Required: Portuguese 25 or 26 or 27 (27 recommended), M35 (or Spanish M35), 46, Spanish 25 or 27, 42 or 44.

The Major
Required: (1) One course from Spanish 100A or 100B and one course from Portuguese 100A or 100B, (2) Spanish 119, 120, Portuguese 130A or 130B, (3) six 4- or 5-unit upper-division elective courses, two of which must be in Spanish and three of which must be from the Portuguese offerings, including those taught in English. Only upper-division courses taught in the target language may be applied toward the major, except the Portuguese courses taught in English.

Honors Program
Portuguese 198A and Spanish 198A are 4-unit courses in which students research and prepare a draft of a thesis on a selected topic; Portuguese 198B and Spanish 198B are 2-unit courses in which students complete the final thesis draft of approximately 25 to 30 pages. Approval of the honors thesis by the faculty mentor is the final requirement for departmental honors. Portuguese 198A-198B and Spanish 198A-198B may not be applied toward the majors.

Policies

Preparation for the Major
Each course must be taken for a letter grade and passed with a grade of C or better.

The Major
Each course must be taken for a letter grade and passed with a grade of C or better prior to beginning upper-division work in the major.

By petition, and after consultation with the undergraduate faculty adviser, up to three 4-unit Portuguese civilization courses or one Brazilian culture course may be applied toward the majors.

Honors Program
The departmental honors program is open to majors who have completed a minimum of six upper-division major courses with a 3.7 grade-point average or better in those six courses. Eligibility is verified by the departmental counselor. On the basis of their coursework and special interests, students then consult with a faculty member in that field and formulate a research project that they pursue under the faculty member’s guidance through Portuguese 198A-198B or Spanish 198A-198B.

Portuguese and Brazilian Studies BA

Study Abroad
Students are encouraged to spend up to one year in a Portuguese-speaking country to study in a university or conduct research. Appropriate credit may be granted in accordance with the individual program, arranged in consultation with the undergraduate faculty adviser in Portuguese. Proposals must be submitted in advance in writing and must be approved by the department.

Learning Outcomes
The Portuguese and Brazilian Studies major has the following learning outcomes:

- Demonstrated oral, aural, and written mastery of the Portuguese language
- Demonstrated specific skills and expertise, including research, analysis, and writing
- Conception and execution of research projects that identify and engage with a specialized topic
- Identification and analysis of appropriate primary sources
- Working knowledge of scholarly discourse relative to a specialized topic
- Engagement with peers through presentation, discussion, and critique of student work

Entry to the Major

Transfer Students
Transfer applicants to the Portuguese and Brazilian Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Portuguese, one nature of language course, one Portuguese civilization course or one Brazilian civilization course, and one Brazilian culture course.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements

Preparation for the Major
Required: Portuguese 25 or 26 or 27 (27 recommended), 46.

The Major
Required: Ten upper-division courses (45 units minimum), including Portuguese 100A or 100B, 130A or 130B, and seven elective courses selected from 100A through 199.

Honors Program
Portuguese 198A and Spanish 198A are 4-unit courses in which students research and prepare a draft of a thesis on a selected topic; Portuguese 198B and Spanish 198B are 2-unit courses in which students complete the final thesis draft of approximately 25 to 30 pages.
Approval of the honors thesis by the faculty mentor is the final requirement for departmental honors. Portuguese 198A-198B and Spanish 198A-198B may not be applied toward the majors.

**Policies**

**Preparation for the Major**

Each course must be taken for a letter grade and passed with a grade of C or better prior to beginning upper-division work in the major.

**The Major**

Out of the seven elective courses, three courses from outside the department that focus on Brazil, Portugal, or Lusophone Africa may be applied toward the major with approval of the undergraduate adviser. A minimum of five out of the seven elective courses must be taken in Portuguese.

Each course must be taken for a letter grade and passed with a grade of C or better.

By petition, and after consultation with the undergraduate adviser, up to three 4-unit Portuguese 197 or 199 courses may be applied toward the major.

**Honors Program**

The departmental honors program is open to majors who have completed a minimum of six upper-division major courses with a 3.7 grade-point average or better in those six courses. Eligibility is verified by the departmental counselor. On the basis of their coursework and special interests, students then consult with a faculty member in that field and formulate a research project that they pursue under the faculty member’s guidance through Portuguese 198A-198B or Spanish 198A-198B.

**Double Majors**

Through judicious use of electives, students may find it possible to secure the BA degree with two complete majors (e.g., Portuguese/Spanish, Portuguese/History, Portuguese/Sociology, etc.). Interested students should consult with the undergraduate adviser in Portuguese as early as possible in their BA program.

**Undergraduate Minors**

**Mexican Studies Minor**

The Mexican Studies minor allows students with an interest in Mexico to augment their major programs with courses that expose them to the history, literature, and culture of Mexico. Given Southern California’s proximity to Mexico, the demographics of Los Angeles, and the shared history of Mexico and the Southwest, the minor is a natural complement to many majors.

**Admission**

To enter the minor, students must have an overall grade-point average of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish. A petition to declare the minor should be filed with the undergraduate counselor in 5314 Rolfe Hall.

**The Minor**

- **Required Lower-Division Courses (8 to 9 units):** Spanish 25 or 27, and one course from History 8A, 8B, 8C, or Spanish 44.
- **Required Upper-Division Courses (20 to 22 units):** Three Mexican culture and literature courses selected from Spanish 135 through 180 in consultation with the undergraduate adviser and two courses from Anthropology 114P, Chicana/o and Central American Studies M102, M108A, 120, M125, M132, 142, 172, 184, Ethnomusicology M106A, History 157B, 160B.

**Policies**

By petition and after consultation with the undergraduate adviser, one 4-unit 197 or 199 course may be applied toward the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade and passed with a grade of C or better. Students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Portuguese and Brazilian Studies Minor**

**Admission**

To enter the Portuguese and Brazilian Studies minor, students must have an overall grade-point average of 2.0 or better and must complete Portuguese 27 or equivalent. A petition to declare the minor should be filed with the undergraduate counselor in 5314 Rolfe Hall.

**The Minor**

- **Required Lower-Division Courses (9 units):** Portuguese 25 or 26 or 27 (27 recommended), and 46.
- **Required Upper-Division Courses (20 units):** Three courses selected from Portuguese 100A through 199, and two upper-division courses on a Brazilian topic.

**Policies**

Courses may be taken in Portuguese or English, but must be clearly related to an aspect of Brazilian studies.

Only one 4-unit Portuguese 197 or 199 course may be applied toward the minor.

By petition, up to two upper-division courses on Portugal or Brazil may be taken in other departments and applied toward the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade and passed with a grade of C or better. Students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Spanish Minor**

**Admission**

To enter the Spanish minor, students must have an overall grade-point average of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish. A petition to declare the minor should be filed with the undergraduate counselor in 5314 Rolfe Hall.

**The Minor**

- **Required Lower-Division Courses (9 units):** Spanish 25 or 27, and 42 or 44.
- **Required Upper-Division Courses (20 to 22 units):** Spanish 119 and four Spanish literature, culture, linguistics, service learning, or media studies courses.

**Policies**

By petition and after consultation with the undergraduate adviser, three 4-unit 197 or 199 courses may be applied toward the minor.

Each minor course must be taken for a letter grade and passed with a grade of C or better. Students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Spanish Linguistics Minor**

**Admission**

To enter the Spanish Linguistics minor, students must have an overall grade-point average of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish. A petition to declare the minor should be filed with the undergraduate counselor in 5314 Rolfe Hall.

**The Minor**

- **Required Lower-Division Courses (9 units):** Spanish 25 or 27, M35 (or Portuguese M35).
- **Required Upper-Division Courses (20 to 21 units):** Spanish 100A, 100B, and three upper-division Spanish electives, two of which must be from Spanish 160.

**Policies**

By petition and after consultation with the undergraduate adviser, one 4-unit 197 or 199 course may be applied toward the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
Graduate Majors

Hispanic Languages and Literatures CPhil, PhD

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Portuguese MA

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Spanish MA

Requirements
Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Indigenous Languages of the Americas

Lower-Division Courses

5A-5B-5C. Elementary Nahuatl. (4–4–4) (Formerly numbered M5A-MSB-MS5C) Lecture, five hours. Course 5A is enforced requisite to 5B, which is an enforced requisite to 15B, which is enforced requisite to 15C. Taught primarily in Nahuatl. Examination of Nahuatl (Aztec) language of central Mexico at intermediate level. Coverage of Nahuatl grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

15A-15B-15C. Intermediate Nahuatl. (4–4–4) (Formerly numbered M15A-M15B-M15C) Lecture, four hours. Enforced requisites: courses 5A, 5B, 5C. Course 15A is enforced requisite to 15B, which is enforced requisite to 15C. Taught primarily in Nahuatl. Examination of Nahuatl (Aztec) language of central Mexico at intermediate level. Coverage of Nahuatl grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

17. Intensive Elementary Quechua. (12) Lecture, 15 hours; laboratory, five hours. Intensive course equivalent to courses 18A, 18B, 18C. Language of Incas and its present-day dialects, as spoken in Andean South America. Offered in summer only. Letter grading.

596. Directed Studies in Quechua. (1 to 8) Tutorial, to be arranged. Requisites: courses 119A, 119B, 119C. Directed individual study or research in Quechua. Four units may be applied toward MA degree requirements. May be repeated for credit. S/U grading.

Portuguese

Lower-Division Courses

1. Elementary Portuguese. (4) Lecture, three hours; laboratory, two hours. Taught in Portuguese. Laboratory is online. Introductory Portuguese language and culture course that is proficiency-oriented, communicative, and task-based to help develop communicative competence in four skill areas (listening, speaking, reading, and writing), as well as cultural competence. P/NP or letter grading.
2. Elementary Portuguese. (4) Lecture, three hours; laboratory, two hours. Taught in Portuguese. Laboratory is online. Introductory Portuguese language and culture course that is proficiency-oriented, communicative, and task-based to help develop communicative competence in four skill areas (listening, speaking, reading, and writing), as well as cultural competence. P/NP or letter grading.
3. Intermediate Portuguese. (4) Lecture, three hours; laboratory, two hours. Taught in Portuguese. Laboratory is online. Intermediate Portuguese language and culture course that is proficiency-oriented, communicative, and task-based to help develop communicative competence in four skill areas (listening, speaking, reading, and writing), as well as cultural competence. P/NP or letter grading.

8A. Portuguese Conversation. (2) Lecture, three hours. Enforced requisite: course 1, 11A, Portuguese Language Assessment Interview, or enrollment in any Portuguese course. Designed to help beginner and intermediate students of Portuguese language improve their conversation skills through discussions, presentations, participation in events, and other communicative situations. Among other elements, practice of formal and informal speaking styles. Use of appropriate vocabulary to discuss issues relevant to students’ lives and to Afro-Luso-Brazilian culture. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

191. Variable Topics Research Seminars: Indigenous Languages. (2 or 4) Seminar, three hours. Research seminars on selected topics on various indigenous languages. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

Graduate Course

89HC. Honors Contracts. (1) Tutorial, three hours. Enforced requisite to 15C. Taught primarily in Nahuatl. Examination of Nahuatl (Aztec) language of central Mexico at intermediate level. Coverage of Nahuatl grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Enforced requisite: course 1. Limited to 20 students. Designed as adjunct to upper-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for students. Honors content noted on transcript. P/NP or letter grading.

3. Intermediate Portuguese. (4) Lecture, three hours; laboratory, two hours. Taught in Portuguese. Laboratory is online. Intermediate Portuguese language and culture course that is proficiency-oriented, communicative, and task-based to help develop communicative competence in four skill areas (listening, speaking, reading, and writing), as well as cultural competence. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

11A-11B. Intensive Portuguese. (5-5) Lecture, four hours; laboratory, two hours. Taught in Portuguese. Laboratory is online. Accelerated course designed only for students with proficiency in another Romance language. P/NP or letter grading.

13. Intensive Introductory Portuguese Language and Culture. (12) Lecture, 20 hours; laboratory, three hours. Intensive introduction to Portuguese language and culture equivalent to courses 1, 2, and 3, and 11A and 11B. Proficiency-oriented, communicative and task-based approach intended to facilitate communicative competence in four language skills areas: listening, speaking, reading, and writing. Development of cultural awareness of heterogeneous Portuguese-speaking community in America, Europe, and Africa. Intensive accelerated course designed to help students increase their ability to communicate in Portuguese. Offered in summer only. P/NP or letter grading.

8A. Portuguese Conversation. (2) Lecture, three hours. Enforced requisite: course 3 with grade of B or better. P/NP or letter grading.

11A-11B. Intensive Portuguese. (5-5) Lecture, four hours; laboratory, two hours. Taught in Portuguese. Laboratory is online. Accelerated course designed only for students with proficiency in another Romance language. P/NP or letter grading.

191. Variable Topics Research Seminars: Indigenous Languages. (2 or 4) Seminar, three hours. Research seminars on selected topics on various indigenous languages. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

25A. Advanced Portuguese: Summer Course. (4) Lecture. Three hours; field trips, and luncheons. Offered in summer only. P/NP or letter grading.

26. Language and Popular Culture. (4) Lecture, three hours; field trips, and luncheons. Development of speaking, reading, and writing skills. Structured in thematic units, with songs, videos, and specific vocabulary emphasizing questions of Brazilian cultural identity. Offered in summer only. P/NP or letter grading.

26A. Language and Popular Culture: Summer Course. (4) Lecture, 20 hours. Enforced requisite: course 3 or 11B. Development of speaking, reading, and writing skills. Structured in thematic units, with songs, videos, and specific vocabulary emphasizing questions of Brazilian cultural identity. Includes cultural activities, field trips, and luncheons. Offered in summer only. P/NP or letter grading.

27. Writing Studies: Afro-Luso-Brazilian World. (4) Lecture, three hours. Requisite: course 3 or 11B. Further development of communicative skills, especially writing. Discussions and activities increase knowledge and awareness of the complex forms of cultural production in Portuguese language. Students continue to acquire cultural competence. Introduction to study of literature, with specific focus on themes and topics pertinent to Lusophone world. P/NP or letter grading.

27A. Advanced Composition and Style: Summer Course. (4) Lecture, 20 hours. Enforced requisite: course 3 or 11B. Practice in writing Portuguese with appropriate vocabulary, syntactical structures, and stylistic patterns. Includes cultural activities, field trips, and luncheons. Offered in summer only. P/NP or letter grading.

M35. Spanish, Portuguese, and Nature of Language. (5) (Same as Spanish M35.) Lecture, three hours; discussion, one hour. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses, study of language and its relation to other areas of human knowledge. P/NP or letter grading.

46. Brazil and Portuguese-Speaking World. (5) Lecture, four hours; discussion, one hour (when scheduled). Taught in English. Topical analysis of cultural history of Brazil in context of Portuguese-speaking world, with emphasis on comparative, trans-Atlantic relations, social development, and artistic manifestations. P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other academic activities led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other academic activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

100A. Phonology and Morphology. (4) Lecture, four hours. Enforced requisite: course 27. Analysis of phonetic, phonemic, and morphological systems of Portuguese or P/NP or letter grading.

102. Foundations of Portuguese Culture in Iberian, Latin American, and Luso-Brazilian Worlds. (4) (Same as Spanish M122.) Lecture, four hours. Requisite: course 25 or 26 or Spanish 25 or 27. Taught in English. Addresses specificities of visual culture in Spanish and Portuguese-speaking worlds. Through critical engagement with wide range of visual materials—from 16th-century maps of Americas to YouTube videos of street protests in Chile; from Modernist architectural designs for new national capitals to telenovelas and colonial photographs; and everything in between—in introduction to practices, processes, objects of study, and interdisciplinary networks of virtual cultural studies. By examining manifestations of visual culture from Iberian, Latin American, and Luso-Brazilian contexts, students gain culturally specific foundations of visual culture and skills of visual literacy. P/NP or letter grading.

130A-130B. Introduction to Literature in Portuguese. (4–5) Lecture, four hours. Enforced requisite: course 25 or 26 or 27. Introduction to principal themes, currents, and authors from Brazil in context of Portuguese-speaking world. P/NP or letter grading.

141A. Literature and Film in Portuguese. (4) Lecture, four hours. Taught in English. Study of intertextuality and dialogism, interactions between literary and cinematic fields, question of fidelity, and equivalents between literary and cinematic expression in Portuguese-speaking world. May be repeated for credit with topic change. P/NP or letter grading.

141B. Film, Television, and Society in Brazil. (4) Lecture, four hours. Taught in English. Study of development, evolution, and impact of film and television in Brazil against backdrop of broader social, historical, and cultural contexts. May be repeated for credit: P/NP or letter grading.

141C. Documentary Film. (4) Lecture, four hours. Taught in English. Overview of documentary film production in Portuguese-speaking world, with special focus on period since 1985. May be repeated for credit with topic change. P/NP or letter grading.

142A. Brazil and Its Culture. (4) Lecture, four hours. Taught in English. Exploration of roots of contemporary Brazil through study of broad chronological periods from Portuguese colonization to present and how they shaped idea of Brazilian exceptionalism, racial mixture as source of national identity, and Lusotropicism and its influence on Brazilian historiography. May be repeated for credit with topic change. P/NP or letter grading.

142B. Brazil and Portuguese in Comparative Perspective. (4) Lecture, four hours. Taught in English. Study of social and cultural trends in Portugal and Brazil, with emphasis on issues of migration, dialogue, and contention in historical context. May be repeated for credit with topic change. P/NP or letter grading.

143A. Colony, Intellectuals, and History. (4) Lecture, four hours. Taught in English. Course 27. Investigation of way that Brazilian maritime expansion from 15th to early 19th century was represented and interpreted in writings from across empire. May be repeated for credit with topic change. P/NP or letter grading.

143B. Transatlantic Literature in Portuguese. (4) Lecture, four hours. Enforced requisite: course 27. Study of modern relations between Portugal and Portuguese-speaking world in literature and arts. May be repeated for credit with topic change. P/NP or letter grading.

143C. Modernism, Modernity, and Identity. (4) Lecture, four hours. Enforced requisite: course 25 or 26 or 27. Examination of concepts and practice of modernism in Portuguese-speaking world, with primary focus on 1920s. Reading and discussion of poems on sociohistorical context, relations with European avantgarde, modernist poetics and polemics, and for national identity as expressed in period’s poetry and prose. May be repeated for credit with topic change. P/NP or letter grading.

143D. Contemporary Literature in Portuguese. (4) Lecture, four hours. Requisite: course 25 or 26 or 27. Exploration of connections between literatures of Angola, Brazil, and Portugal against background of globalization and Internet. May be repeated for credit with topic change. P/NP or letter grading.

175. Topics in Creative Writing and Literary Translation. (4) Seminar, three hours. Requisite: course 25 or 26 or 27. Exploration of art of translation or creative writing. Guest speakers or instructors include professional literary translators, poets, novelists, playwrights, and filmmakers, and will focus on methodology, and practice of their art. May be repeated for credit with topic change. P/NP or letter grading.

180. Topics in Visual Culture. (4) Lecture, four hours; discussion, one hour (when scheduled). Requisite: Portuguese 25 or 26 or 27. Study of visual knowledge production in Latin America and Iberia as complex relation between visual subjects, practices, and representation in Latin American, Afro-Luso-Brazilian, and Iberian contexts. Objects of analysis may include architecture and urban design, digital media and other technologies, documentaries, fashion, fictional and experimental films, graphic novels and other media, maps and cartography, photography, plastic arts, and art history, theater and performance, video, among others. May be repeated four times for credit with topic change. P/NP or letter grading.

187FL. Special Studies: Readings in Portuguese. (2) Seminar, two hours. Enforced requisite: course 27. Students must be concurrently enrolled in affiliated main course. Additional work in Portuguese to augment work assigned in main course, including reading and writing assignments. May be repeated. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. P/NP or letter grading.

191. Undergraduate Variable Topics Seminars: Portuguese. (4) Seminar, three hours. Requisite: course 25 or 26 or 27. Research seminar on selected topics in Portuguese, Brazilian, and Lusophone Studies. Development of culminating project. Consult Schedule of Classes or department counselor for topic to be offered in specific term. May be repeated for credit. P/NP or letter grading.

195. Community Internships in Portuguese. (4) Tutorial, two hours; fieldwork, eight hours. Requisite: course 25 or 26 or 27. Limited to juniors/seniors. Community-engaged learning is teaching and learning strategy that integrates meaningful community service
with instruction and critical reflection to enrich the learning experience, teach civic responsibility, and strengthen communities. Students use cultural and linguistic immersion in real-world settings at least 8-10 hours per week in volunteer work in on- or off-campus organizations or service-learning projects. Students may be required to complete at least 80 hours of volunteer work in one or more organizations.

198A–198B. Senior Honors Research in Portuguese. (4–4) Tutorial, to be arranged. Individual intensive study, with scheduled meetings, to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. Eight units of courses 197 and/or 199 may be applied toward major requirements. Individual contract required. P/NP or letter grading.

199. Directed Research in Portuguese. (2 to 4) Tutorial, to be arranged. Preparation: apprentice period of one academic quarter. May be repeated for credit with topic change. S/U or letter grading.

201A–201B. Development of Portuguese and Old Spanish. (4–4) Same as Spanish M205A–M205B. Study in Galician-Portuguese and Old Spanish. (4–4) Same as Spanish M251A–M251B. Lecture, two hours. Study of problems related to historical development of Galician-Portuguese and Old Spanish. Each course may be repeated once with topic change and consent of appropriate guidance committee.

202. Synchronic Morphology and Phonology. (4) Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. S/U or letter grading.

203. 19th-Century Brazilian Literature and Culture. (4) Lecture, three hours. Enforced requisite: course 27. Study of representative trends and authors. May be repeated for credit with topic change. S/U or letter grading.

205. 19th-Century Portuguese Literature. (4) Lecture, three hours. Enforced requisite: course 27. Study of representative trends and authors. May be repeated for credit with topic change. S/U or letter grading.

258. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprenticing for one year. May be repeated for credit. S/U or letter grading.

296. Graduate Research Group. (2) Lecture, three hours. Enforced requisite: course 27. Organized by topics, may be repeated for credit. S/U or letter grading.

301. Intermediate Spanish. (4) Lecture, three hours. Enforced requisite: course 1G. May be repeated for credit. S/U or letter grading.

302. Synchronic Morphology and Phonology. (4) Lecture, three hours. Enforced requisite: course 27. Study of representative trends and authors. May be repeated for credit with topic change. S/U or letter grading.

Spanish Lower-Division Courses

1. Elementary Spanish. (4) Lecture, three hours; labaratory, two hours. Taught in Spanish. Laboratory is on-line. Introductory Spanish language and culture course that is proficiency-oriented, communicative, and task-based to help develop communicative competence in four skill areas (listening, speaking, reading, and writing), as well as cultural competence. P/NP or letter grading.

2. Elementary Spanish. (4) Lecture, three hours; laboratory, two hours. Taught in Spanish. Laboratory is on-line. Introductory Spanish language and culture course that is proficiency-oriented, communicative, and task-based to help develop communicative competence in four skill areas (listening, speaking, reading, and writing), as well as cultural competence. P/NP or letter grading.

3. Intermediate Spanish. (4) Lecture, three hours; laboratory, two hours. Taught in Spanish. Laboratory is on-line. Introductory Spanish language and culture course that is proficiency-oriented, communicative, and task-based to help develop communicative competence in four skill areas (listening, speaking, reading, and writing), as well as cultural competence. P/NP or letter grading.

4. Intermediate Spanish. (4) Lecture, three hours; laboratory, two hours. Taught in Spanish. Laboratory is on-line. Intermediate Spanish language and culture course designed to increase communicative ability. Acquisition of cultural competence and introduction to study of literature. Comprehension of conversations and stretches of connected discourse, reading of texts with minimum use of dictionary, writing with increased grammatical accuracy and control of sentence structure, coherence, and text organization, talking about past, present, and future events, and expression of preferences, feelings, beliefs, and opinions. P/NP or letter grading.

5. Intermediate Spanish. (4) Lecture, three hours; laboratory, two hours. Taught in Spanish. Laboratory is online. Intermediate Spanish language and culture course designed to increase communicative ability. Acquisition of cultural competence and introduction to study of literature. Comprehension of conversations and stretches of connected discourse, reading of texts with minimum use of dictionary, writing with increased grammatical accuracy and control of sentence structure, coherence, and text organization, talking about past, present, and future events, and expression of preferences, feelings, beliefs, and opinions. P/NP or letter grading.

6. Introductory Spanish for Heritage Speakers. (4) Lecture, three hours; laboratory, two hours. Labora-

written, and to increase knowledge of grammatical structures and achieve communicative competence. P/NP or letter grading.

7B. Intermediate Spanish for Heritage Speakers. (4) Lecture, three hours; laboratory, two hours; P/NP or letter grading. Second-year course for speakers who are native or near-native in Spanish. Prerequisite: 3 or 7A or Spanish placement test. Laboratory is online. Designed for students who are from Spanish-speaking family background and have some knowledge of Spanish. Intermediate course to further develop communicative abilities, both verbal and written, and to increase knowledge of grammatical structures and achieve communicative competence. P/NP or letter grading.

9A-9B. Spanish Conversation. (2-3) Discussion, three hours. Course 8A is open to students with credit for course 4. Students who have completed course 3 with grade of B or better may be admitted. P/NP or letter grading.

10. Intensive Elementary Spanish. (12) Lecture, 20 hours. Intensive elementary instruction in speaking, listening, reading, and writing equivalent to courses 1, 2, and 3, with emphasis on Spanish grammar and Hispanic culture. Offered in summer only. P/NP or letter grading.

11A. Catalan Language and Culture I. (4) Lecture, six hours. Part one of two-term accelerated language sequence equivalent to three terms of traditional instruction. Introduction to Catalan language and culture from a variety of perspectives: historical, social, and communicative approaches. Study involves variety of activities, which are designed to develop learners' listening, reading, speaking, and writing skills. P/NP or letter grading.

11B. Catalan Language and Culture II. (4) Lecture, six hours. Prerequisite: course 11A or equivalent. Part two of two-term accelerated language sequence equivalent to three terms of traditional instruction. Study of specific works of literature and historical knowledge of Catalan language and culture from wide range of activities focused on task-based and communicative approaches. Study involves variety of activities, which are designed to develop learners' listening, reading, speaking, and writing skills. P/NP or letter grading.

12A-12B-12C. Basque Language and Culture I, II, III. (4-4-4) Lecture, five hours. Introduction to Basque language and culture from a variety of perspectives: historical, social, and communicative approaches. Study involves variety of activities, which are designed to develop learners' listening, reading, speaking, and writing skills. P/NP or letter grading.

19. fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of philosophical and ethical topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

25. Advanced Spanish Composition. (4) Lecture, three hours. Prerequisite: course 5. Emphasis on development of communicative abilities, both verbal and written, as well as on increased comprehension of variety of forms of cultural production in Spanish language and on preparation for more advanced Spanish courses. P/NP or letter grading.

27. Advanced Spanish Composition for Heritage Speakers. (4) Lecture, three hours. Prerequisite: course 5. Practice in reading and writing of Spanish for students with oral proficiency in Spanish (in lieu of course 25). P/NP or letter grading.

28A. Spanish for Special Purposes: Medical. (4) Lecture, three hours. Prerequisite: course 3. Practice in speaking with native speakers of Spanish to improve vocabulary and cultural situations for students with special interest in fields such as medicine, business, law, etc. P/NP or letter grading.

28B. Spanish for Special Purposes: Business. (4) Lecture, three hours. Recommended prerequisite: course 3. Introduction to Spanish language and its diverse cultures in variety of business settings. Offers opportunities to practice simple language that may be useful in airports, hotels, restaurants, and informal and professional settings where Spanish is target language. P/NP or letter grading.

M35. Spanish, Portuguese, and Nature of Language. (5) (Same as Portuguese M35). Lecture, three hours; discussion, one hour. Introduction to language study and advanced context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge. P/NP or letter grading.

42. Iberian Cultures. (5) Lecture, four hours; discussion, one hour. Required of majors. Lectures taught in English; discussion sections taught in either Spanish or English. High-level study of Spain with emphasis on artistic, economic, social, and historical development as background for upper-division courses. P/NP or letter grading.

44. Latin American Cultures. (5) Lecture, four hours; discussion, one hour. Required of majors. Lectures taught in English; discussion sections taught in either Spanish or English. Highlights of civilization of Spanish America, with emphasis on artistic, economic, social, and historical development as background for upper-division courses. P/NP or letter grading.

60A-60B-60C. Hispanic Literatures in Translation. (4-4-4) Lecture, three hours. Class readings and analysis of selected works in translation. Classroom discussion, papers, and examinations in English. 60A. Spanish Literature; 60B. Spanish-American Literature; 60C. Luso-Brazilian Literature (same as Portuguese M122). Lecture, four hours. Prerequisite: course 25 or 27 or Portuguese 25 or 26 or 27. Taught in English. Addresses specificities of visual culture in Spanish- and Portuguese-speaking worlds. Through critical engagement with wide range of visual materials—from 16th-century maps of Americas to YouTube videos of street protests in Chile; from Modernist architectural designs for new national capitals to tele-novelas and colonial photographs; and everything in between—introduction to practices, processes, objects of study, and interdisciplinary critical frameworks of visual cultural studies. By examining manifestations of visual culture from Iberian, Latin American, and Luso-Brazilian contexts, students gain culturally specific foundations of visual knowledge and skills of visual literacy. P/NP or letter grading.

120. Literature in Historical Context. (4) Lecture, four hours; discussion, one hour. Requisite: course 25 or 27. Introduction to different ways of looking at literary work as historico-cultural. Exploration of major models for writing history—great narratives, cyclic, teleological, sacred, and profane conceptions. Traditional concepts of literary history and problems of mixed categories (historicizing aspects of style, national history, and world literature). P/NP or letter grading.

M122. Foundations in Visual Culture in Iberian, Latin American, and Luso-Brazilian contexts, students gain culturally specific foundations of visual knowledge and skills of visual literacy. P/NP or letter grading.

130. Topics in Medieval Studies. (4) Lecture, four hours. Requisites: courses 25 or 27, and 119. Exploration of medieval Iberian literatures: lyric poetry, prose, and history of the peninsula, with emphasis on its literary and linguistic diversity. Portuguese literature. Convi-vencia (peaceful coexistence), Europe and Orient, beginnings of Inquisition, oral versus written traditions, origins of Hispanic-Christian expansion beyond peninsula, and flowering of AfL. May be repeated for credit with topic change. P/NP or letter grading.

135. Topics in Early Modern Studies. (4) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 25 or 27, and 119. Exploration of 16th and 17th centuries, with focus on early modern period of Spain and Spanish America. Possible topics include Spanish colonization and indigenous responses, transatlantic literary and visual ba-roque, race and religion in construction of early modern nation, transcultural fictions, early modern identities and theatrical representations, literature and historiography, transcannic poetics and poetry. May be repeated for credit with topic change. P/NP or letter grading.

140. Topics in Modern Studies. (4) Lecture, four hours. Requisites: courses 25 or 27, and 119. Exploration of major modern movements in Spain and 19th and 20th centuries in Spain and Spanish America. Possible topics include Enlightenment, Romanticism, nation-building literature, realism and naturalism, and works by Calvo-Sotelo, Concorde, Garmiento, Bécquer, Isacca, Mera, Villaverde, and Galdós. May be repeated for credit with topic change. P/NP or letter grading.

150. Topics in Contemporary Studies. (4) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 25 or 27, and 119. Exploration of main trends that characterize contemporary Latin American and Spanish literatures and cultures and main concepts used to address them. Possible topics
include transculturation and heterogeneity, race and ethnicity, vanguard movements, lettered and popular cultures, literary modernization in Latin American boom, literature, and mass production; autobiography, women’s writing, border literature, and postmodern fiction. May be repeated for credit with topic change. P/NP or letter grading.

160. Topics in Spanish Linguistics. (4) Lecture, four hours. Required course 25 or 27. Exploration of origin of language, how Spanish is acquired, evolution of Spanish from Latin to early modern period, how Spanish varies in world, how to teach Spanish, Spanish in contact with other languages. Possible topics include Spanish in Los Angeles, history of language, first- and second-language acquisition, language and cognition. May be repeated for credit with topic change. P/NP or letter grading. M165XP. Taking It to Street: Spanish in Community. (5) (Formerly numbered M165SL.) (Same as Chicana/o and Central American Studies M167XP) Seminar, three hours. Enforced requisite: course 25 or 27. Service learning course to give students opportunity to use cultural and linguistic knowledge acquired in Spanish classes in real-world settings. Students required to spend minimum of eight to 10 hours per week at agreed on site in Latino community. P/NP or letter grading.

170. Topics in Interdisciplinary and Transhistorical Studies. (4) Lecture, four hours; discussion, one hour (when scheduled). Required course 25 or 27, 119. Comparative study of cultural production in Latin American, Afro-Luso-Brazilian, and Iberian contexts across diverse historical periods, regional, and ethnic traditions, and aesthetic modes. Possible topics include Afrolatinidad; diaspora; feminism; folklore; gender; globalization; indigeneity and indigenous studies (Andean, Mesoamerican, Amazonian, Tupi, and Tapu); migration; music (including Latin American protest songs, nueva canción, música regional, punk, rap, folk); popular culture; regionalisms. May be repeated for credit with topic change. P/NP or letter grading. M172XP. Topics in Community Engagement. (5) (Formerly numbered M172SL.) (Same as Chicana/o and Central American Studies M170XP) Seminar, four hours; field project, four to six hours. Required course 25 or 27. Introduction to community engagement in various forms. Exploration of methods of community involvement and change making processes within variety of professional contexts in community. Students engage in experiential research, service, and/or learning to broaden their understanding of Spanish-speaking and Latinx communities. Students have opportunity to use cultural and linguistic knowledge acquired in Spanish classes in a community setting. Topics may include oral tradition, immigrant narratives, visual culture and community, language and identity in community, urban spaces, etc. May be repeated for credit with topic change. P/NP or letter grading.

175. Topics in Creative Writing and Translation. (4) Seminar, three hours. Required courses: courses 25 or 27, and 119. Exploration of art of translation or creative writing. Guest instructors include professional literary translators, poets, novelists, playwrights, and filmmakers who discuss theory, methodology, and practice of their art. May be repeated for credit with topic change. P/NP or letter grading.

180. Variable Topics in Visual Cultures. (4) Formerly numbered M180.) Lecture, four hours; discussion, one hour (when scheduled). Required: courses 25 or 27, 119. Study of visual knowledge production in Latin America and Iberia as complex relation between visual subjects, practices, and representation. Objects of analysis may include architecture and urban design, digital media and other technologies, documentaries, fashion, video games, feature films, graphic novels and other media, maps and cartography, photography, plastic arts and art history, theater and performance, video, among others. May be repeated four times for credit with topic change. P/NP or letter grading.

187A-187B. Advanced Tutorial in Community and Culture I, II. (1–2) Tutorial, one hour. Required: course 25 or 27. Designed as adjunct to upper-division courses in culture and community. Exploration of topics in greater depth through supplemental readings, papers, community service, or other activities. Course 187A may be repeated once for credit. P/NP or letter grading.

189. Advanced Honors Seminars, (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grade required.

191A. Variable Topics in Spanish: Studies in Hispanic Literature and Linguistics, (4) Seminar, three hours. Limited to 15 junior/senior Spanish majors. Variable topics course with readings, discussions, and development of culminating paper. Consult Schedule of Classes or department counselor for topic to be offered in specific term. May be repeated for credit with topic change. P/NP or letter grading.

191B. Variable Topics in Spanish: Studies in Hispanic Culture and Civilization. (4) Seminar, three hours. Advanced variable topics course that studies diverse aspects of Hispanic culture, civilization, and history. Classroom discussions, development of culminating paper, and examinations in Spanish. May be repeated for credit with topic change. P/NP or letter grading.

191C. Senior Capstone Seminar. (4) Seminar, three hours. Enforced requisite courses: courses 119, 120, and at least three upper-division elective courses required for majors. Limited to 15 junior/senior majors. Knowledge from previous coursework used to address current trends in discipline; students work with one faculty member on one focused research topic. Culminating paper required. Letter grade required.

195. Community Internships in Spanish. (4) Tutorial, one hour; fieldwork, 10 hours. Required: course 25 or 27. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide journal of their experience. Final research paper required. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

197. Individual Studies in Spanish. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. Eight units of courses 197 and/or 199 may be applied toward major requirements. May be repeated for maximum of 48 units. Individual contract required. P/NP or letter grading.

198A-198B. Senior Honors Research in Spanish in II, (4–2) Tutorial, to be arranged. Preparation: completion of minimum of six upper-division major core courses with gpa of 3.5. Course 198A is enforced requisite to 198B. Limited to juniors/seniors. Development and completion of honors thesis under direct supervision of faculty member. May not be applied toward major requirements. Individual contract required. Letter grading.

199. Directed Research in Spanish. (2 to 4) Tutorial, to be arranged. Required: course 25. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating paper required. Eight units of courses 197 and/or 199 may be applied toward major requirements. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M200. Research Resources, (4) (Same as Portuguese M200.) Lecture, three hours. Identification and use of research resources for graduate students. M201A-M201B. Literary Theory and Criticism. (4–4) (Same as Portuguese M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. Letter grading.

209. Dialectology, (4) Lecture, three hours. Major dialect areas of peninsular and American Spanish, with distinguishing features of each. Influence and contribution of cultural and historical features, including diglossic languages, to their formation.

211. Medieval Lyric Poetry, (4) Lecture, three hours. Readings of and lectures on Spanish lyric poetry from the beginning to 1500. 212. Medieval Epic and Narrative Poetry, (4) Lecture, three hours. Readings of and lectures on Spanish epic and narrative poetry from the beginning to 1500. 213. Medieval Prose, (4) Lecture, three hours. Readings and lectures on Spanish prose from the beginning to 1500.

218. Realism and Naturalism, (4) Lecture, three hours. Readings of and lectures on realistic and naturalistic literature.

219. Major Currents in Modern Spanish Literature, (4) Lecture, three hours. Introduction to major literary currents, including symbolism, Parnassianism, and the Generation of 1898.

220. Spanish Prose Literature from 1888 to the Civil War, (4) Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period.
233. Spanish Prose Literature after the Civil War. (4) Lecture, three hours. Readings of and lectures on representative plays and poems.

234. Spanish Drama and Poetry after the Civil War. (4) Lecture, three hours. Readings of and lectures on representative plays and poems.

237. Literature of the Spanish Conquest. (4) Lecture, three hours. Readings of and lectures on chronicles, poems, and indigenous accounts of the Spanish Conquest.

241A-241B. Contemporary Spanish-American Short Story. (4–4) Lecture, three hours. Study of important short story writers from modernism to the present.

243A-243B. Contemporary Spanish-American Poetry. (4–4) Lecture, three hours. Intensive study of important poets of Spanish America from modernism to the present.

244A-244B. Contemporary Spanish-American Novels. (4–4) Lecture, three hours. Study of important novelists from modernism to the present.

M251A-M251B. Studies in Galician-Portuguese and Old Spanish. (4–4) Same as Portuguese M251A-M251B.) Lecture, two hours. Study of problems related to development of Galician-Portuguese and Old Spanish. Each course may be repeated once with topic change and consent of appropriate guidance committee.

256A-256B. Studies in Spanish Linguistics. (4) Lecture, two hours. Study of problems in analysis and description of the contemporary Spanish language. Each course may be repeated once with topic change and consent of appropriate guidance committee.

257. Studies in Dialectology. (4) Discussion, two hours. May be repeated once with topic change and consent of appropriate guidance committee.

262A-262B. Studies in Medieval Spanish Literature. (4–4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

264A-264B. Studies in Golden Age Spanish Literature. (4–4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

265. Cervantes. (4) Discussion, two hours. May be repeated once with topic change and consent of appropriate guidance committee.

270A-270B. Studies in 18th-Century Spanish Literature. (4–4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

271A-271B. Studies in 19th-Century Spanish Literature. (4–4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.
The Department of Statistics and Data Science is devoted to furthering the science of data, and faculty research focuses on statistical and machine learning, computational statistics, computational biology, social statistics, and environmetrics. Both the undergraduate and graduate programs immerse students in theory, application, and computation—the foundations of data science.

Centers
Reflecting diverse research interests, the department is organized around several centers that collectively offer undergraduate and graduate students rich opportunities for specialized study. These include the Center for Environmental Statistics; Center for Social Statistics; Center for Statistical Research in Computational Biology; and Data Science Education Center.

Undergraduate Majors

Statistics and Data Science
BS
The Statistics and Data Science major is designed to provide a general introduction to the practice of statistics for students who intend to pursue study at the graduate level or seek employment in industry or government. Courses are selected to provide sufficient theoretical background for future graduate-level research work, exposure to modern techniques and practices, and experience in fields of application.

It is strongly recommended that students, in conjunction with the BS degree, pursue a minor in a substantive discipline that applies statistics. Students must consult with the undergraduate faculty adviser to ensure that the minor selected is one in which statistics is applied.

Students interested in the major in Statistics and Data Science should meet with the student affairs officer early in their careers. Students who have completed Mathematics 33A, Statistics 20, and at least one course from Statistics 10 through 13 may declare a pre-major.

Capstone Major
The Statistics and Data Science major is a designated capstone major. Students are prepared for future academic studies, as well as for careers in which understanding, analyzing, communicating, and organizing data are of central importance. The capstone gives students an opportunity to put into practice concepts and ideas that otherwise might remain theoretical and/or abstract, and to synthesize the many topics they have studied. Students should demonstrate ability to restate investigative questions in terms of statistical models or algorithms, find appropriate research literature to support their work, relate theoretical concepts to real-world problems, and clearly communicate their results to nontechnical audiences.

Learning Outcomes
The Statistics and Data Science major has the following learning outcomes:

• Ability to restate an investigative question in terms of a statistical model or algorithm
• Verbally communicate statistical results clearly to a non-technical audience
• Successfully relate theoretical concepts to a real-world problem in a written report
• Demonstrated ability to find research literature appropriate to the investigative task
• Deliver reproducible statistical analyses using accepted practices of the research community
• Demonstrated ability to verbally and orally communicate statistical results to both technical and nontechnical audiences

Entry to the Major
Pre-major
Incoming first-year and transfer students may be admitted as Statistics and Data Science pre-majors on acceptance to UCLA. Pre-major students must apply for the major after completing Statistics 20, and one course from Statistics 10 through 15, with grades of C or better, and an overall grade-point average of 2.5. Any student who meets the pre-major requirements may declare the major with the undergraduate student services adviser through Message Center.

First-Year Students
Students who entered as first years must declare the major with the undergraduate adviser no later than the end of the fall quarter of their junior year.

Transfer Students
Transfer applicants to the Statistics and Data Science major with 90 or more units must complete as many of the following introductory courses as possible prior to admission: two years of calculus, one linear algebra course, and one statistics course. These courses must be completed with a minimum grade-point average of 2.5. Students must declare the major with the department undergraduate adviser no later than the end of the fall quarter of their junior year.

Refer to the UCLA transfer admission guide for up-to-date information regarding transfer selection for admission.

Requirements
Preparation for the Major

The Major
Required: Statistics 100A, 100B, 100C, 101A, 101B, 101C, 102A, 102B, 102C; two capstone statistical consulting courses (140XP, 141XP); and two upper-division elective courses selected from Mathematics 131A, 131B, 151A, 151B, 170B, 171, or Statistics 112 through 199 (except courses 147, M148, 184, 186).

Policies
Preparation for the Major
Each course must be completed with a grade of C or better, and a grade-point average of 2.5 or higher. Students who repeat more than two of the preparation courses or who repeat any preparation course more than once are automatically denied admission to the major.

The Major
Students are strongly encouraged to take electives in departments other than statistics, particularly in mathematics, computer science, and substantive disciplines that apply statistical methods. Elective courses from outside the department may be selected in consultation with the department director of undergraduate education.

The capstone consists of two courses (Statistics 140XP and 141XP) that must be completed sequentially in the final year. Students must first complete courses 100B and 101B before they can begin the capstone.

Students planning to continue their study of statistics at the graduate level are strongly advised to include in their schedule as many of the following courses as possible: Mathematics 115A, 115B, 131A, 131B, 151A, 151B, 170B, 171.

Only 4 units of Statistics 195 and 199 may be applied toward the major. Courses 189 and 189HC may not be applied toward any of the major requirements.
Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

**Data Theory BS**

**Capstone Major**
The Data Theory major is a designated capstone major. Students work in small teams to solve a large, open-ended data science problem for community- or campus-based clients. Emphasis is placed on the development and theoretical support of a statistical model or algorithmic approach. Alternatively, students may undertake research on the foundations of data science, studying advanced topics and writing a senior thesis.

**Learning Outcomes**
The Data Theory major has the following learning outcomes:

- Understanding of mathematical and statistical bases of most common methods of data science
- Ability to explain in writing, with examples, how concepts of statistics and mathematics together solve real-world problems involving data
- Skillfully manage data
- Development, comparison, and testing of data-driven models to solve problems
- Understanding and explanation of variability when fitting and interpreting models of real-world systems
- Carrying out of reproducible data analysis using accepted practices of research community
- Written and verbal communication of findings of analyses
- Identification of areas of active research in data science
- Insightfully address problems concerning ethics of data use and storage, including data privacy and security
- Demonstrated mastery of concepts and skills of machine learning, modeling and supervised learning, dimension reduction and unsupervised learning, and deep learning
- Demonstrated familiarity with numerous software tools used in statistical and data science work and research
- Demonstrated knowledge of mathematical foundations, including pure and applied linear algebra, basic analysis, probability, and optimization theory
- Study and evaluation of proofs of mathematical and statistical results employed in data theory
- Work effectively in a team on a data science problem
- Demonstrated eligibility for graduate study in applied mathematical science or statistical science

**Entry to the Major**

**Pre-major**

Students entering UCLA directly from high school or first-term transfer students who want to declare the Data Theory pre-major at the time they apply for admission are automatically admitted to the pre-major. Students must visit the student services office of either the Mathematics Department or Statistics and Data Science Department in order to petition to enter the major. All students are identified as Data Theory pre-majors until they satisfy the following minimum requirements for the major.

**First-Year Students**

To enter the major, students must petition after they have completed the preparation for the major courses. Students who have an overall grade-point average (GPA) of at least 3.3 in the preparation for the major courses, and have completed all preparation for the major courses before the fall quarter of their third year at UCLA, will be admitted to the major.

Students whose overall GPA is between 2.7 and 3.3, or who fail to complete the preparation courses before the fall quarter of their third year, are admitted only if space is available. All students must petition before they have earned 160 units, or by the winter quarter of their junior year, whichever comes first. Only grades for courses that are taken at the University of California, including UC summer schools, are counted for this GPA computation.

**Transfer Students**

Transfer applicants to the Data Theory major are admitted to the pre-major. Applicants with 90 or more units must have completed the following by the end of the spring term prior to entry to UCLA: two years of calculus for physical science and/or engineering majors, one linear algebra course, one C++ programming course, one statistics course.

Transfer students must have completed all preparation for the major coursework, and must have passed Mathematics 42, 115A, and at least 4 units of upper-division coursework required for this major with at least a 3.3 GPA, in order to be eligible to petition to enter the major. Transfer students will be admitted to the major if they satisfy these requirements. Transfer students who fail to meet these criteria for automatic admission will be admitted only if resources allow. Transfer students must petition to enter the major no later than the spring quarter of their third year.

Refer to the **UCLA transfer admission guide** for up-to-date information regarding transfer selection for admission.

After satisfying the preparation for the major requirements, students must visit the student services office of either the Mathematics Department or Statistics and Data Science Department in order to petition to enter the major.

**Requirements**

**Preparation for the Major**

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 42, 115A; Program in Computing 10A; one course selected from Statistics 10, 12, 13, 15; Statistics 20, 21.

**The Major**

Required: Mathematics 118, 131A, 156, Statistics 101A, 101C, 102A, 102B, 147, 184; one two-quarter sequence: Mathematics 170E and 170S, or Statistics 100A and 100B; one elective selected from Mathematics 151A, 151B, 164, 168, 171, 174E, 178A, 178B, 178C, 179 or 182; one elective selected from Statistics 100C, 101B, 102C, or C151 through 199 (except Statistics 182, 186, or 189); two additional electives from either of the above lists; a capstone course (Mathematics M148 or Statistics M148), to be taken during the final year.

**Policies**

**Preparation for the Major**

Each course must be completed with a grade of C or better and an overall grade-point average of at least 2.7. All students must take Mathematics 42 at UCLA. The major is limited in size according to available resources.

**Repetition of more than two mathematics or statistics sequenced courses or of any mathematics or statistics sequenced course more than once results in automatic dismissal from the major.**

**The Major**

Only 4 units of course 199 may be applied toward the major. Courses 189 and 189HC may not be applied toward any of the major requirements.

Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

**Undergraduate Minors**

**Social Data Science Minor**

The Social Data Science minor is designed to offer a solid background in data science for students majoring in social science disciplines. It is restricted to students who are declared majors within the Social Sciences Division.

**Admission**

To enter the minor, students (1) must have completed the required lower-division courses for letter grades with a minimum C or better grade in each course, and a grade-point average of 2.5 or better in lower-division courses; and (2) file a petition with the Statistics and Data Science Department undergraduate adviser.

**The Minor**

**Required Lower-Division Courses (12 or 13 units):** Mathematics 33A, Statistics 20, and one course from Economics 41, Geography 7, Political Science 6, Sociology 20, or Statistics 10 through 15.

Graduate Majors
Master of Applied Statistics and Data Science

Requirements
Official, specific degree requirements are detailed in *program requirements for UCLA graduate degrees*, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Statistics MS, CPhil, PhD

Requirements
Official, specific degree requirements are detailed in *program requirements for UCLA graduate degrees*, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Statistics Lower-Division Courses

10. Introduction to Statistical Reasoning. (5) Lecture, three hours; discussion, one hour. P/NP or letter grading.
11. Introduction to Statistical Methods for Geographical Data. (5) Lecture, three hours; discussion, one hour. P/NP or letter grading.
12. Introduction to Statistical Methods for Geographical and Environmental Studies. (5) Lecture, four hours; discussion, one hour. P/NP or letter grading.
13. Introduction to Statistical Methods for Life and Health Sciences. (5) Lecture, three hours; discussion, one hour; laboratory, one hour. P/NP or letter grading.
14. Introduction to Data Science. (5) Lecture, three hours; discussion, one hour; computer laboratory, one hour. P/NP or letter grading.

Upper-Division Courses

100A. Introduction to Probability. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 32B, 33A. Not open to students with credit for Electrical Engineering 131A or Mathematics 170A; open to graduate students. Students may receive credit for only two of the following: course 100A, former course 110A, Biostatistics 100A. Probability distributions, random variables, vectors, and expectation. P/NP or letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of research, stimulating many paths of discovery at UCLA. P/NP grading.
20. Introduction to Statistical Programming with R. (4) Lecture, three hours; discussion, one hour. Enforced requisite: one course from course 10, 12, 13, 15, Economics 41, or Psychology 100A, or score of 4 or higher on Advanced Placement Statistics Examination. Designed to prepare students for upper-division work in statistics. Introduction to use of R, including data management, simple programming, and statistical graphics in R. P/NP or letter grading.
21. Python and Other Technologies for Data Science. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 20. Covers use of Python and other technologies for data analysis and data science. Focus on programming with Python and selection of its libraries: NumPy, pandas, matplotlib, and scikit-learn, for purpose of data processing, data cleaning, data analysis, and machine learning. Other technologies covered include Jupyter notebook and Git. Intended for Data Theory majors as introduction to Python language and libraries most frequently used in data science. Letter grade.
35. Introduction to Probability with Applications to Poker. (4) Lecture, three hours; discussion, one hour. Exploration of some main topics in introductory probability theory, especially discrete probability problems, that are useful in wide variety of scientific applications. Topics include conditional probability and conditional expectation, combinatorics, laws of large numbers, central limit theorem, Bayes theorem, univariate distributions, Markov processes, and Brownian motion. Examination of computer simulation in depth and discussion of computational approximations of solutions to complex problems using R, with examples of situations and concepts that arise naturally when playing Texas Hold’em and other games. P/NP or letter grading.
88. Sophomore Seminars: Statistics. (2) Seminar, two hours. Requisites: one course from 10, 11, 12, 13, or 14. Limited to 20 lower-division students. Readings and discussions designed to introduce students to current statistical consulting research and fieldwork disciplines. Culminating project may be required. P/NP or letter grading.
89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.
89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grade.
99. Student Research Program. (0 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Policies

Statistics 105, 188SA, 188SB, 188SC, 189, 189H-C, 195, and 199 may not be applied toward the minor. Elective courses from outside the department are selected in consultation with the Statistics and Data Science undergraduate faculty adviser. The variable topics courses Political Science 179 and 191E and Sociology 191V may only be applied toward the minor by special petition on the basis of their statistical content.
Economics 104 may be used as a substitute for Statistics 101A as a requisite for Statistics 101B.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Statistics and Data Science Minor

The Statistics and Data Science minor is designed to provide a solid background in statistics for students majoring in other disciplines.

Students interested in the minor in Statistics and Data Science should meet with the student affairs officer early in their careers. Students who have completed Mathematics 33A, Statistics 20, and at least one course from Statistics 10 through 15 may declare the minor.

Admission

To enter the minor, students (1) must have taken Mathematics 33A, Statistics 20, and one course from Statistics 10 through 15 for letter grades with a minimum C or better grade in each and a grade-point average of 2.5, and (2) file a petition with the department undergraduate adviser.

The Minor

Required Upper-Division Courses (24 units): Six upper-division courses selected from one of the following options: (1) Statistics 100A, 100B, and 100C, and Statistics 101A, 101B, and 101C, or Statistics 102A, 102B, and 102C, or (2) Statistics 100A, 100B, 101A, 101B, 102A, and 102B or 102C.

Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.
100B. Introduction to Mathematical Statistics. (4) Lecture, three hours; discussion, one hour. Requisite: course 100A or Mathematics 170A or 170E. Survey sampling methods and models; one- and two-sample problems. P/NP or letter grading.

100C. Linear Models. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 100B or Mathematics 170S. Theory of linear models, with emphasis on general linear model (e.g., multiple regression) and generalized linear model (e.g., logistic regression). Special attention to modern extensions of regression, including re- gression diagnostics, graphical procedures, and bootstrap techniques for statistical inference. P/NP or letter grading.

101A. Introduction to Data Analysis and Regression. (4) Lecture, three hours; discussion, one hour. Requisite: one course from 10, 12, 13, 15, Economics 41, or Psychology 100A, or score of 4 or higher on Advanced Placement Statistics Examination, and course 20. Recommended: course 102A. Applied regression analysis, with emphasis on general linear model (e.g., multiple regression) and generalized linear model (e.g., logistic regression). Special attention to modern extensions of regression, including regression diagnostics, graphical procedures, and bootstrapping techniques for statistical inference. P/NP or letter grading.

101B. Introduction to Design and Analysis of Experiments. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 101A. Fundamentals of designing and analyzing experiments. Topics include model fitting, extra sums of squares principle, testing general linear hypothesis, testing general linear regression, stepwise procedures. P/NP or letter grading.

112. Statistics: Window to Understanding Diversity. 18 a.m. Reading. Topic: Presenting a scientific laboratory. one hour. Requisite: one course from course 10, 12, 13, Economics 11, 41, or Psychology 100A, or score of 4 or higher on Advanced Placement Statistics Examination as well as one course from 100A. Fundamental concepts of statistical methods in social sciences, including regression, multivariate techniques, logistic regression, and data-handling and analysis. Applications to social sciences, using professional analysis software package for data analysis. Letter grading.

C116. Social Statistics. (4) Lecture, three hours. Preparation: some knowledge of basic calculus and linear algebra. Recommended: courses 100B, 101B, and 101C, or one course from 10, 11, 12, 13 and one upper-division statistics course using regression. Designed for social sciences graduate students and advanced undergraduate students seeking training in data analysis and interpretation in social sciences. Concurrently scheduled with course C216. P/NP or letter grading.

120. Getting Up to Speed with SPSS, Stata, SAS, and R. (4) Lecture, three hours. Requisite: course 101B. Designers for junior and seniors, Applied regression analysis, with emphasis on general linear model (e.g., multiple regression) and generalized linear model (e.g., logistic regression). Special attention to modern extensions of regression, including regression diagnostics, graphical procedures, and bootstrapping techniques for statistical inference. P/NP or letter grading.

120C. Introduction to Statistical Models and Data Mining. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 101A. Recommended: course 101B. Designers for junior and seniors. Applied regression analysis, emphasis on general linear model (e.g., multiple regression) and generalized linear model (e.g., logistic regression). Special attention to modern extensions of regression, including regression diagnostics, graphical procedures, and bootstrapping techniques for statistical inference. P/NP or letter grading.

120A. Introduction to Computational Statistics with R. (4) Lecture, three hours; discussion, one hour. Requisites: course 101B, Mathematics 33A, and one course from 10, 12, 13, Economics 11, 41, or Psychology 100A, or score of 4 or higher on Advanced Placement Statistics Examination. Introduction to computational statistics through numerical methods, and computationally intensive methods for statistical problems. Topics include statistical graphics, root finding, simulation, randomization testing, and bootstrap techniques for statistical inference and data analysis. Use of computer for analysis of large-scale data. P/NP or letter grading.

131. Python and Other Technologies for Data Analysis. (4) Lecture, three hours; discussion, one hour. Requisite: course 102A. Limited to junior/senior statistics majors. Introduction to Python, R, and other languages for data analysis and scientific computing. Study of some commonly employed solutions—SPSS (Statistical Package for Social Sciences), Stata, SAS (Statistical Analysis System), and R—for data analysis and statistical issues in health sciences, engineering, economics, and government. Emphasis on applied problem solving, measurement issues in data analysis, use of computer for analysis of large-scale data. P/NP or letter grading.

130. Python and Other Technologies for Data Analysis. (4) Lecture, three hours; discussion, one hour. Preparation: basic statistics, basic computer literacy. Study of four commonly employed solutions—SPSS (Statistical Package for Social Sciences), Stata, SAS (Statistical Analysis System), and R—for data analysis and statistical issues in health sciences, engineering, economics, and government. Emphasis on applied problem solving, measurement issues in data analysis, use of computer for analysis of large-scale data. P/NP or letter grading.

147. Data Technologies for Data Scientists. (2) Lecture, two hours. Requisites: courses 100B or Mathematics 170S, 101A, 101C or Mathematics 156. Limited to seniors. Introduction to variety of tools and tools that are widely used in data science. Prepares students for applied work. Topics include use of collabor- ative repository hosting services allowing access to data and results. Recommended preparation: that cover computing power and database storage; open source artificial intelligence libraries. Recommended to be taken prior to or concurrently with course M148. Letter grading.

M8. Experience of Data Science. (4) (Same as Mathematics M141B.) Lecture, four hours. Requisites: courses 100B or Mathematics 170S, 101A, 101C or Mathematics 156, Mathematics 118, 131A. Students solve real data science problems for community- or campus-based clients. Students work in small groups with faculty member and client to frame client’s question in data science terms, create mathematical models to analyze data, and present results. Students may elect to undertake research on foundations of data science, studying advanced topics and writing senior thesis with discussion of findings or survey of literature on chosen foundational topic. Development of collaborative skills, communication principles, and discussion of ethical issues. Letter grading.

151. Experimental Design. (4) Lecture, three hours. Requisites: courses 100C, 101A. Basic principles, advantages and disadvantages of experimental designs, Latin squares, balanced incomplete block designs, factorial designs, fractional factorial designs, minimum aberration designs, robust parameter designs. Concurrently scheduled with course M141C. P/NP or letter grading.

M154. Measurement and Its Applications. (4) (Same as Psychology M144.) Lecture, three hours. Requisite: one course from 10, 12, 13, or Psychology 100A. Selected theories for quantification of psychological, edu- cational, social, and behavioral science data. Classical test, factor analysis, generalizability, item response, optimal scaling, ordinal measurement, computer-adaptive, and related theories. Construction of tests and measurement models of population characteristics. Practical applications of sampling methods via lectures and hands-on laboratory exer- cises. Concurrently scheduled with course CM248. P/NP or letter grading.

157. Probability and Statistics Data Modeling and Analysis Using Statistics Online Computational Re- source. (4) Lecture, three hours; discussion, one hour. Preparation: one mathematics, engineering, physics, or computer science course. Requisite: Program in Computing 20A. Probability and statistics topics in data-driven and interactive manner using open Internet resources. Varieties of data, study-
designs, and applications arising from biomedical, re-
search, and simulated data to prepare students for in-
novative multidisciplinary research. Use of Statistics
Online Computational Resource (SOCR). P/NP or
letter grading.

C161. Introduction to Pattern Recognition and Ma-
chine Learning. (4) Lecture, three hours. Requisites:
course 100B, Mathematics 33A. Introduction to pat-
tern analysis and machine intelligence designed for
advanced undergraduate and graduate students.
Concurrently scheduled with course C261. P/NP or
letter grading.

170. Introduction to Time-Series Analysis. (4) Le-
ture, three hours; discussion, one hour. Requisite:
course 100C or 101A, and 100B. Exploration of stan-
dard methods in temporal and frequency analysis
used in analysis of numerical time-series data. Ex-
amples provide development and interpretation of
implementation techniques discussed. P/NP or letter grading.

M171 Introduction to Spatial Statistics. (4) (Same as Geography M186.) Lecture, three hours; laboratory,
one hour. Requisite: one course from 10, 12, 13. In-
truction to methods of measurement and interpreta-
tion of geographic distributions and associations.
P/NP or letter grading.

C173. Applied Geostatistics. (4) Lecture, three hours;
discussion, two hours. Requisite: course 101A (may
be taken concurrently) or 101B. Geostatistics can be
applied to many problems in other disciplines such as
hydrology, traffic, air and water pollution, epidemi-
ology, ecology, waste management, forestry, oceanography, meteorology, and agriculture and,
in general, to every problem where data are ob-
served at geographic locations. Acquisition of know-
ledge from different areas that can be used to analyze
real spatial data problems and to connect geostatis-
tics with geographic information systems (GIS).
Con-
currently scheduled with course C273. P/NP or letter
grading.

175. Statistics for Spatial Data. (4) Lecture, three
hours; discussion, one hour. Statistical theories used
in analyzing spatial data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point
data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-
tial data: geostatistical data, lattice data, and point

data. Study of three types of spa-

207. Statistical Learning with Sparsity. (4) Lecture, three hours. Introduction to statistical learning with sparsity, including convex optimization techniques to help recover underlying signal in data. S/U or letter grading.

211. Topics in Economics and Machine Learning. (4) Lecture, three hours. Requisites: courses 200B, 201B, and Mathematics 115A. Examination of development in information technology lead to deeper engagement between technology and human that involve data, inferences, and decisions between multiple self-interested participants. Coverage of several use cases of synthetic data, including education, financial, and medical data, and on case studies that demonstrate how to apply these concepts and techniques to real-world problems. Topics include two-sided markets (college admissions, dating markets, etc.), social choice, crowd sourcing, reputation systems, equilibrium computation, mean-field game, and mean-field control. Letter grading.

212. Graphical Models. (4) Lecture, three hours. Recommended requisite: course 200A. Introduction to graphical models with applications in statistical modeling, machine learning, and causal inference. Coverage of several use cases of synthetic data, including education, financial, and medical data, and on case studies that demonstrate how to apply these concepts and techniques to real-world problems. Topics include two-sided markets (college admissions, dating markets, etc.), social choice, crowd sourcing, reputation systems, equilibrium computation, mean-field game, and mean-field control. Letter grading.

213. Synthetic Data Generation. (4) Lecture, three hours; discussion, one hour. Recommended requisite: course from 200B, 201B, 202A, M231A, 231B. Introduction to synthetic data generation, to build trustworthy artificial intelligence systems. In general, well-designed generation process of synthetic data can provide individual information (e.g., preserved data privacy), inject knowledge (e.g., guaranteed robustness), or increase diversity (e.g., enhanced fairness) based on raw data sets. Study includes tutorial on machine generation. General approaches for synthetic data: generative- adversarial-network-based methods, diffusion process-based methods, and generative-flow-network-based methods. Examination of several use cases of synthetic data in various industries including financial service, e-commerce, and health care. S/U or letter grading.

217. Statistical Analysis of Networks. (4) Lecture, three hours. Introduction to analysis of social structure, conceived in terms of social relationships. Major concepts of social network theory and mathematical representation of social relationships. Examination of how representations of network information, S/U or letter grading.

222. Pattern Recognition and Machine Learning. (Same as Computer Science M276A.) Lecture, three hours; discussion, one hour. Recommended requisites: courses 200B, 202B, or Computer Science 262A. Recommended preparation: programming skills in R, C/C++, or equivalent. Examination of pattern recognition and machine learning that are used in computer vision, image processing, speech recognition, data mining, statistics, and computational biology. Topics include Bayesian decision theory, parametric and nonparametric learning, clustering, complexity (VC-dimension, MDL, AIC, PCA/ICA/CA/CTA, MDS, SVM, boosting). S/U or letter grading.

225. Experimental Design. (4) Lecture, three hours; discussion, one hour. Recommended requisite: course 200B or 200A. Recommended preparation: programming skills in R, C/C++, or equivalent. Examination of design of experiments. Concurrently scheduled with course C151. S/U or letter grading.

226. Introduction to Bayesian Statistics. (4) Lecture, three hours; discussion, one hour. Recommended requisite: course 200A or 200B. Recommended preparation: programming skills in R, C/C++, or equivalent. Examination of design of experiments. Concurrently scheduled with course C151. S/U or letter grading.

229. Decision Theory. (4) Same as Political Science M208D and Psychology M257.) Lecture, three hours. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment measurement models, such as confirmatory, higher-order, and structural means factory analytic models. Structural equation models, including path and simultaneous equation models. Log-linear models and related testing, and other statistical issues. Computer implementation. Applications. S/U or letter grading.

M244. Statistical Theory: Random Variables. (4) (Same as Education M231E.) Lecture, three hours. Requisites: Education 231A, M231B. Introduction to general statistical modeling framework. Important special cases of this framework include confirmatory factor analysis, structural equation models, item response models, latent class models, and multilevel models, among others. Topics include discussions of general references in computational and theoretical models, model formulation, identification, estimation, and testing. Letter grading.

246. Statistical Model Selection. (4) Lecture, three hours. Preparation: course 100B or equivalent. Regression analysis and design of experiments, to develop understanding of oral and written presentations of statistical data problems and to connect geostatistics with geometric information systems (GIS). Concurrently scheduled with course C173. S/U or letter grading.

CM248. Applied Sampling. (4) (Same as Epidemiology M212A.) Lecture, three hours. Preparation: course 100A or 200A or Biostatistics 213A. Theory and practice with different forms of professional statistical functions. S/U grading.

M250. Statistical Methods for Epidemiology. (4) (Same as Epidemiology M211.) Lecture, four hours. Preparation: two terms of statistics (such as Biostatistics 102A and 102B, or equivalents: Epidemiology 200A, 200B, 200C). Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in previous term. Study of the role of data analysis in epidemiologic research and application of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

M254. Statistical Methods in Computational Biology. (4) (Same as Bioinformatics M223 and Biostatistics M271.) Lecture, three hours; discussion, one hour. Preparation: elementary probability concepts. Required: course 100A or 200A or Biostatistics M221. Introduction to statistical methods developed and widely applied in several branches of computational biology, such as gene expression, sequence alignment, comparative genomics, and biological networks, with emphasis on understanding of basic statistical concepts and use of statistical inference to solve biological problems. Letter grading.

256. Causality. (4) Lecture, three hours; discussion, one hour. Preparation: proficiency in basic R coding, probability theory, linear algebra, multivariate calculus, and statistics through inference and regression. Tools to pursue both theoretical and applied research in causality. S/U or letter grading.

271. Probabilistic Models of Visual Cortex. (4) Seminar, three hours. Preparation: course 100B or Mathematics 33A. Recommended: Computer Science 180, Introduction to Statistical Models of mammalian visual cortex, with topics in low-, mid-, and high-level vision. Discussion of relevant evidence from anatomy, electrophysiology, imaging (e.g., fMRI), and psychophysics. Concentration on mathematical modeling of these into account recent progress in probabilistic models of computer vision and developments in machine learning. S/U or letter grading.

C273. Applied Geostatistics. (4) Lecture, three hours; discussion, one hour. Geostatistics can be applied to many problems in other disciplines such as hydrology, traffic, air and water pollution, epidemiology, economic growth, traffic management, forest inventory, geographic data, oceanography, meteorology, and agriculture and, in general, to every problem where data are observed at geographic locations. Acquisition of knowledge from different areas that can be used to analyze real spatial data problems and to connect geostatistics with geographic information systems (GIS). Concurrently scheduled with course C173. S/U or letter grading.

285. Seminar: Research Topics in Statistics. (2 to 4) Seminar, one to three hours. Topics in various statistical areas by means of lectures and informal conferences with staff members. May be repeated for credit. S/U grading.

M286. Seminar: Statistical Problem Solving for Population Biology. (2) (Same as Ecology and Evolutionary Biology M286.) Seminar, two hours. Preparation: course 100B or equivalent. Design and analysis of experiments to test hypotheses in biology and other related fields. S/U grading.

411. Multivariate Statistical Analysis. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 20, and 101A, or equivalent level of discipline. Limited to Master of Applied Statistics students. Emphasizes students working knowledge of basic concepts underlying most important multivariate techniques, with overview of actual applications in various fields, and with experience in choosing such techniques on problem of their own choosing. Addresses underlying mathematics and problems of applications. Reasonable level of competence in both statistics and mathematics is required. Letter grading.

412. Advanced Regression and Predictive Modeling. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Statistics students. Often we are interested in making inferences and predictions from data, either by (1) estimating particular meaningful parameters of models or (2) finding best fitting model we can that then manipulate to produce useful outputs such as predictions or counterfactual estimates. Focus is on linear models and gets to explore regression and classification techniques that have been ubiquitous in machine learning literature in recent years, with special attention to regularization and kernel techniques. Letter grading.

413. Machine Learning. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Statistics students. Recommended preparation: linear algebra, probability, computer programming knowledge. Introduction to machine learning and data mining methods. To gain in-depth understanding of these methods, implementation of them in R, Python, and C++. Letter grading.

415. Introduction to Forecasting. (4) Lecture, three hours; discussion, one hour. Limited to Master of Applied Statistics students. Designed for physical and social sciences students who are interested in using statistics and its applications for forecasting and data-driven decisions and for life sciences and medical school students who are interested in modeling of historical data to predict outcomes. Introduction to state-of-art statistical methods that rely on historical data collected in past to forecast future outcomes. Coverage of models used for forecasting only one measurement type and models used to forecast several types of measurements simultaneously. S/U or letter grading.

416. Applied Geostatistics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 401, 402, and 403. Limited to Master of Applied Statistics students. Introduces various analysis of types of spatial and spatial-temporal datasets frequently arising in geostatistical problems. Geostatistical data arise commonly in nearly every science, wherever spatial data and meaningful data are obtained. Examples include geology, hydrology, traffic, air and water pollution, epidemiology, economics, geography, waste management, forestry, oceanography, meteorology, and agriculture. Modern methods for analyzing both lattice and point process data using R, and student performances of their own analysis of geostatistical datasets involving variogram modeling, kriging, model fitting, and estimation using maximum likelihood and nonparametric methods. Letter grading.

419. Experimental Design. (4) Lecture, three hours; discussion, one hour. Requisites: courses 402, 403. Limited to Master of Applied Statistics students. Fundamentals of designing experiments to gain maximal information while minimizing costs. Topics include role of randomization and blocking, comparing two or more treatments, randomized blocks, factorial design, Latin square designs, fractional factorial designs, response surface designs. Letter grading.

420. Causal Inference in Social Science Practice. (4) Lecture, three hours; discussion, one hour. Requisite: course 400. Recommended requisites: courses 401, 402, 403. Limited to Master of Applied Statistics students. Variety of designs and methods, including experiments, matching, regression, panel methods, difference-in-differences, synthetic control methods, instrumental variable estimation, regression discontinuity design, and sensitivity analysis. Basic skills from probability and statistics. Applications drawn from various fields including political science, public policy, economics, and sociology. Skills development is in using such techniques on any discipline in which investigators seeks to make causal statements but cannot fully randomize treatment. Letter grading.

421. Advanced Statistical Communication. (4) Formerly numbered 421B. Lecture, three hours; discussion, one hour. Designed to improve verbal and written communication skills related to various ways in which statistics is used in workplace. Directed toward students who are fluent in English and are already proficient in verbal and written communication of scientific results. Letter grading.

423. Longitudinal Data Analysis. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 20, 101A, or equivalent level of discipline. Limited to Master of Applied Statistics students. Fundamental methods in longitudinal data analysis, with examples of actual applications in various disciplines. Students gain experience in using such techniques on problems of choice. Reasonable level of competence in both statistics and mathematics required. Letter grading.

424. Teamwork and Leadership in Data Science. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 20, 101A, or equivalent level of discipline. Limited to Master of Applied Statistics students. Study team collaboration, negotiation, and problem solving in teams of data scientists. Students present statistical results for audiences ranging from business leaders to media outlets to academic statisticians. Letter grading.

495A. Teaching College Statistics. (2) Seminar, two hours; intensive training at beginning of Fall Quarter. Required of all potential departmental teaching assistants and new PhD students. Practical and theoretical issues in teaching of statistics. S/U grading.

495B. Teaching College Statistics. (2) Seminar, two hours. Weekly discussion and intensive training for all first-year teaching assistants that addresses practical and theoretical issues in using technology to teach statistics, including use of statistical software as education tool. S/U grading.

496. Statistics Internship. (2 to 4) Tutorial, four hours; field work, two hours. Under faculty supervision, production of substantial paper resulting in or arising from internship. S/U or letter grading.

497. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Supervised individual reading and study on project approved by a faculty member. May be repeated for credit. Letter grading.

498. MAS Thesis Research. (2 to 8) Tutorial, four hours. Research on thesis project for MAS students. Project should be original analysis of data that solves pressing problem and is done typically in conjunction with an industry partner. May be repeated for credit. Letter grading.

506. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Designed for second-year statistics MS students. Study and research for MS thesis. May be repeated for credit. Letter grading.

598. MS Thesis Research. (2 to 12) Tutorial, to be arranged. Preparation: advancement to PhD candidacy. Study and research for PhD dissertation. May be repeated for credit. S/U grading.

Overview
The Department of Surgery instructs medical students during all four years of medical school. Students are expected to obtain broad knowledge of diseases treated by surgical means and to understand the pathophysiology of these conditions, the therapy that may be applied, and the anticipated results of treatment. They are also encouraged to learn about the effects of surgical illness on the patient and the patient’s family and environment.

Second-year students participate in one eight-week core clerkship in clinical surgery and are assigned to rotations at a combination of Rea-gan UCLA, Cedars-Sinai Medical Center, Harbor-UCLA, West Los Angeles VA, Olive View-UCLA, Kaiser Permanente, and UCLA Santa Monica medical centers. Each facility has a special orientation depending on the patient population and the individual staff. During the fourth year, students may elect to take additional clinical rotations with increasing responsibilities. Additional in-depth elective courses are offered in collaboration with other departments.

For more details on the Department of Surgery and courses offered, see the department website.

Surgery

Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

199. Directed Research in Surgery. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Overview
The Department of Theater offers comprehensive training for the profession, including study of the theater's long history and in the artistic and intellectual challenges inherent in theater making.

Manifesting talent and promise as well as representing a wide range of backgrounds and interests, prospective students are selected by the faculty through auditions and interviews in cities throughout the U.S.

For current or specific information about the programs and faculty members, see the department website.

Undergraduate Study
At the undergraduate level, students receive education in acting, design and production, directing, formal and textual analysis, musical theater, performance studies, and playwriting, all within the rigorous liberal arts framework of the Bachelor of Arts (BA) degree. The department also offers a Theater minor.

Graduate Study
At the graduate level, students in the Master of Fine Arts (MFA) program develop as artists and are given preprofessional training in the skills of theater, while PhD students engage in critical investigations of performance broadly understood. In conjunction with their theater studies, students also have the opportunity to pursue elective courses in the area of film, digital media, and television, and, schedules allowing, take graduate courses from across UCLA.

Undergraduate Major
Theater BA
The Theater BA provides students with a liberal arts education by combining critical study of theater and performance with experiential
practice in one or more of its component parts. Students explore acting, design, directing, formal and textual analysis, playwriting, and production to build a foundation for future creative work. Specialized and advanced training is available to prepare students for a variety of careers, further training, or graduate study. At the upper-division level, students may choose from an array of advanced elective courses including those in acting, design and production, directing, musical theater, playwriting, theater history, and dramatic literature. Internships in areas such as producing and casting are also available.

**Capstone Major**

The Theater major is a designated capstone major. Theater capstone courses represent independent student scholarship and/or a high degree of artistic achievement in each of the undergraduate areas. Capstone courses are intended to be the culmination of all the broad educational courses and core foundational courses that a student has taken. Group participation in the creation and production of student projects is core to the curriculum. Capstone courses vary by area and require individual projects or performances, a major artistic contribution to a theater production, or an individual course of study resulting in a research paper. Through their capstone work, students demonstrate general knowledge and specialized skills, successfully relate their experience in a studio, production, or fieldwork setting, communicate effectively orally and in writing, and engage with a community of artists and scholars presenting theatrical work.

**Learning Outcomes**

The Theater major has the following learning outcomes:

- Demonstrated broad knowledge of fundamentals acquired through coursework, including general knowledge of the art form and skills in a specialized area of study
- Successful relation of experience in a studio, production, or fieldwork setting
- Engagement with a community of artists and scholars presenting theatrical work
- Effective oral and written communication

**Entry to the Major**

**Admission**

All applicants must meet the admission standards of UCLA and the departmental screening process. Applications are accepted only in November for admission to the following fall quarter. There are no mid-year admissions. Students must submit required supplemental materials directly to the Theater Department. If requested by the department, applicants must also sign up for an audition and/or interview online. There is a $90 fee for all interviews/auditions.

Applicants interested in one of the emphases in acting, design and production, integrated studies (including critical studies, directing, and playwriting) or musical theater may submit materials for consideration in that area.

**Requirements**

**Preparation for the Major**

Required: Theater 11, 12, 13, 14A, 14B, 14C, 50 (must be taken for 4 units total).

**The Major**

The major consists of Theater 101A, 101B, one course from 102A through 113, 131C or 163C or 180 (capstone seminar), one course (4 units) from 150, 173A, 173B, 174B, or 174C, and 34 upper-division theater elective units.

**Policies**

**The Major**

Up to 8 units of upper-division credit in the Department of Film, Television, and Digital Media may be included in the 34-unit theater elective requirement.

**Admission**

To enter the minor students must be in good academic standing (minimum 2.0 grade-point average), have completed at least one approved UCLA theater minor course with a grade of C or better, and files a petition at the Student Services Office, 103 East Melnitz Building, 310-206-8841. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by each student’s school or College.

**Undergraduate Minor**

**Theater Minor**

The Theater minor is designed for students who wish to augment their major program of study with a series of courses that promote the study of theater as a global phenomenon for reflecting the human experience. The minor consists of a selection of lower-division courses that expose students to the fundamentals of theatrical production, as well as acting, writing, and directing. Upper-division courses offer more focused study of those areas, as well as theater design, history, education, and theater of non-Western cultures.

**Admission**

To enter the minor students must be in good academic standing (minimum 2.0 grade-point average), have completed at least one approved UCLA theater minor course with a grade of C or better, and file a petition at the Student Services Office, 103 East Melnitz Building, 310-206-8441. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by each student’s school or College.

**The Minor**

Required Lower-Division Courses (6 to 10 units): Theater 10 and one course from 15, 20, 28A, 28B, 28C, 30.

Required Upper-Division Courses (22 to 27 units): Theater 150, one course from 102A through 113, and four courses selected from 117, 118A, 118B, 118D, 120A, 120B, 120C, 121, 123, 128A, 130, 136, 138, 139, C146A, C146B, 149, 195.

**Policies**

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer credit for any of the above is subject to department approval.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Majors**

**Theater MFA**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Theater and Performance Studies CPhil, PhD**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Theater**

**Lower-Division Courses**

1A-1B-1C. Introduction to Dance for Music Theater. (1–1–1) Studio, four hours. Taught for Theater majors. Introduction to basic music theater dance technique. Each course may be repeated once for credit. Letter grading.

2A. Tai Chi I. (1–1–1) Studio, two to four hours. Emphasizes proper form, etiquette as coextensive with training, and other values that sustain physical practice over lifetime. Actors increase focus, enhance discipline, cultivate internal energy, and relax mind and body. Demonstration of how each tai chi movement works in self-defense situation. Letter grading.

2B. Tai Chi II. (1–1–1) Studio, two to four hours. Requisite: course 2A. Taught for Theater majors. Reviews, refines, and advances work of course 2A, introducing new forms, and delving more deeply into practice of Yang-style tai chi. Courses in performance practice continuum emphasize proper form, etiquette, and other values that sustain practice over lifetime. May be repeated once for credit. Letter grading.

3. Aikido. (1) Studio, two to four hours. Taught for Theater majors. Introduction to basic stance, falls, throws, and pins of 20th-century martial art, Aikido.
Courses in performance practice continuum emphasize proper form and etiquette. May be repeated twice for credit. Letter grading.

10. Introduction to Theater. (5) Lecture, three hours; discussion, three hours (when offered). Emphasis on collaborative role of theater artists and active role of audience. Understanding of and access to live theatrical event and enhanced appreciation of value of theater to society; development of critical skills through consideration of representative examples of theatrical production from Europe, America, Asia, and Africa. P/NP or Letter grading.

11. Approaches to Interpretation of Theater and Performance: Global Perspective. (5) Seminar, four hours. Introduction to basic methods of interpretation in theater and performance throughout world. Topics illustrated by faculty members and guest speakers, visits to off-campus theaters, and reading from contemporary plays. Letter grading.

12. Introduction to Performance. (4) Lecture, two hours; studio, four hours. Investigation of phenomenon of performance and role of performer in theatrical events, including interpretation of drama through performance. Examination of various forms of theatrical performance and styles of expression, and development of acting, voice, and movement skills. Letter grading.

13. Play Reading and Analysis. (5) Lecture, three hours. Provides base for subsequent study in theater. Development of techniques of play reading and habits of scholarship useful to further study in each of theater's subdisciplines, including acting, directing, design, playwriting, and critical study. Letter grading.

15. Introduction to Directing. (4) Lecture, two hours; studio, four hours. Investigation of role of director in theatrical production and theories of play direction, with emphasis on analysis and interpretation of dramatic work and its realization in production. Letter grading.

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP or Letter grading.

20. Acting Fundamentals. (4) Studio, four hours. Introduction to interpretation of drama through art of actor. Development of individual insights, skills, and disciplines in presentation of dramatic material to audiences. P/NP or Letter grading.

23A. Introduction to Musical Literacy for Singing Actors. (2) (Formerly numbered 23.) Studio, three hours. Reading and translating musical notation in treble clef; defining common musical terminologies; basic rhythm-reading and diatonic sight-singing in all major keys. Letter grading.

23B. Advanced Musical Literacy for Singing Actors. (1) Studio, three hours. Requisite: course 23A. More advanced sight-singing, incorporating minor keys, chromatic scales, internal key changes, and bass clef; exploration of the roles played by form, meter, modes, and harmonic/contrapuntal singing. Letter grading.

24A. Actor's Voice. (2) Studio, three to four hours. Study of basic vocal technique for actor, with emphasis on voice production and phonation. Exploration of physiology for subsequent training. Letter grading.

24B. Voice in Performance. (2) Studio, three to four hours. Requisite: course 24A. Continuation of course 24A, with greater emphasis on group and/or solo performance projects that present targeted vocal and textual challenges. Letter grading.

24C. Voice and Speech I. (1) Studio, three to four hours. Development of voice and speech techniques for stage. Letter grading.

25. Articulation and Body. (2) Studio, three to four hours. Study of balance and gestural principles of body in performance. Includes strategies of movement initiation and organization, as well as performance of movement scores to support actor's craft. Letter grading.

26. Alexander Techniques. (2) Studio, three hours. Study and practice in Alexander techniques as method of developing balance, poise, and coordination of body and mind. Exploration of use of rhythm to expand movement potential of actors and relevant use of visual arts and animal studies to characterize development and to expansion of movement potential. P/NP or Letter grading.

27. From Vauvelle to Standup Comedy. (4) Studio, three to four hours. Exploration of many aspects of comedy using American vaudeville traditions, acts, and performers as historical base to experience importance of rhythm, timing, delivery, speech, and body language in all styles of comedy, to find value of improvisation/imagination as well as innovative writing skills in all comic forms, to discover how comedy drama is related to its antecedents, and to experience and develop own powers of mimicry, dance, storytelling, clowning, magic, designing, and tumbling/stunts, and to build overall confidence/ease in comic performance skills. P/NP or Letter grading.

28A-28B-28C. Acting, Voice, and Movement Workshops I. (2 each) Studio, three to six hours (28A-28C) and six hours (28-B-F). Study of beginning acting technique, scene study, and development of voice and movement skills. Each course may be repeated for maximum of 12 units. Letter grading.

30. Dramatic Writing. (4) Studio, three hours. Intended for theater minors and other nonmajors. Exploration and development of creative writing skills for one or more of various forms of entertainment media. May be repeated once. Letter grading.

34A-34B-34C. Ballet II. (1–1–1) Studio, five hours. Development of dance and movement techniques for musical theater. Letter grading.

35A. Group Singing Techniques. (1) Studio, three hours. Requisite: course 35. Introduction to singing techniques, with emphasis on bel canto training. Exploration of how singing voice works and how to achieve optimal vocal sound and musicality while preserving vocal health. Letter grading.

35B. Advanced Group Singing Techniques. (1) Studio, three hours. Requisite: course 35A. Advanced singing techniques, focusing on strategies for producing consistently dynamic, efficient, and musical vocal sound, and how to build stamina and range while preserving vocal health. Letter grading.

50. Theater Production. (1 to 2) Laboratory, three to six hours. Laboratory experience in various aspects of theater production, including stage management or member of production crew. May be repeated for maximum of 8 units. Letter grading.

72. Production Practice in Theater, Film, Video, and Digital Media. (1 to 8) Studio, three hours. Exploration and laboratory experience in more of various aspects of production and postproduction practice for entertainment media, including theater, film, video, and digital media. May be taken for maximum of 8 units. Letter grading.

73. Production Practice in Theater with Emerging Technologies. (4) Studio and laboratory, four to six hours. Introductory studio with focus on collaborative creative and technical development of emerging and/or advanced technologies. Letter grading.

76. Introduction to Production Practice in Theater with Emerging Technologies. (4) Studio and laboratory, four to six hours. Introductory studio with focus on collaborative creative and technical development of emerging and/or advanced technologies, often culminating in rehearsal and/or public presentation. Letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or Letter grading.

95. Introduction to Community or Corporate Internships in Theater, Film, and Television. (2 to 4) Tutorial, six to 12 hours. Limited to freshmen/sophomores. Internship at various theater and entertainment organizations accentuating creative contributions, organization, and work of professionals in various specialties. Students meet on regular basis with faculty member and provide periodic letter grades. May be taken for maximum of 4 units. Individual contract with supervising faculty member required. P/NP or Letter grading.

99. Student Research Program. (1 to 2) Tutorial (su) or Laboratory, three to six hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP or Letter grading.

Upper-Division Courses

101A. Global Histories of Theater and Performance I. (5) Lecture, three hours; discussion, one hour. Introduction to histories of theatrical practice from across world, with emphasis on ancient world through 18th century. Introduction to global aesthetic theories and historiographical research methods. Letter grading.

101B. Global Histories of Theater and Performance II. (5) Lecture, three hours; discussion, one hour. Introduction to histories and historiographies of theater and performance from across world, with emphasis from 18th century through 21st century. Introduction to representational modalities from melodrama to performance art and theoretical approaches from Marxism to poststructuralism. Letter grading.

102A. Theater of Japan. (8) Lecture, three hours. Overview of Japanese theater and performance from early theatrical activity to present, with emphasis on enduring forms and genres, patterns of reception, and transnational influences. Letter grading.

102B. K-Pop: Race, Gender, and Sexuality in Globalizing Asian Media. (5) Lecture, two hours; discussion, two hours. Exploration of K-pop through critical lens of gender queerness, racial plagiarism and cultural appropriation, body performance, technology, transmedia, and globalization. Study acknowledges that history of globalization and evolution of media ecosystem cannot be studied without considering uneven power dynamics marked by racial and gender hierarchies and digital accessibility. Letter grading.

102C. Cross-Cultural Currents in Theater. (5) Lecture, three hours. Exploration of interculturalism in theater, with focus on 20th-century alternatives to nativism. Analysis of historical materials and dramatic texts to investigate cultural, aesthetic, ethical, and social implications of borrowing from other cultures. Letter grading.

M103A. African American Theater History: Slavery to Mid-1800s. (4) (Same as African American Studies M103A.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of African American theater; focus on African American artists in America from slavery to mid-1800s. Letter grading.

M103B. African American Theater History: Minstrel and Emergence of American Musical Theater. (4) (Same as African American Studies M103B.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from minstrel stage to rise of American musical. Letter grading.

M103C. Origins and Evolution of Chicano Theater. (4) (Same as Chicano/a and Central American Studies M103C.) Lecture, three hours. Designed for juniors/seniors. Exploration of development of Chicano theater...
from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s). P/NP or letter grading.

M103D. Contemporary Chicano Theater: Beginning of Chicano Theater. (5) Same as Chicano/a and Central American Studies M103D. Lecture, three hours. Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical movements that led to emergence of Chicano theater. Letter grading.

M103E. Modern African American Drama: Harlem Renaissance to Black Arts Movement. (4) Same as Chicano/a and Central American Studies M103E. Lecture, three hours. Analysis and discussion of Chicano theater since 1980, including discussion of Chicana/o playwrights, their significant involvement in creation of diversified American theatrical tradition. Letter grading.

103I. Israel and Palestine: Communities, Conflicts, Cultures, and Art. (4) Lecture, three hours. No background or prior interest in history or region or arts required. Land variously known by names of Zion, Holy Land, Palestine, and Israel is not just one image of imagination, envisioned and re-envisioned throughout history. It is at once real and surreal, stardy and fragile, all-enduring and ephemeral. Examination of selected works of literature, performance, visual arts, film, and media by Israeli and Palestinian artists, as well as Western artists with interest in region. Looking beyond headlines and facile cultural cliché for deeper insights art can offer into cultural conflict and community at large, to emerge with surprising conclusions. Letter grading.

M103J. Contemporary Black Theater: Modern Civil Rights Era to Black Lives Matter and Beyond. (4) Same as African American Studies M103J. Lecture, three hours. How themes of race, conflict, and geographic and political influences to provide historical framework for design of scenery, costumes, and lighting for theater, film, and television. May be repeated once for credit. Concurrently scheduled with course C404G. Letter grading.

C104E. History of Design Décor Part II: Architecture and Décor—Antiquity to Early Neoclassical. (4) Lecture, four hours. Requisites: courses 14A, 14B, 14C. Study of pre-Renaissance architectural and interior decor as manifestation of cultural, social, economic, and political influences to provide historical framework for design of costumes for theater, film, and television. Survey of history of Western costume and civilian attire. May be repeated once for credit. Concurrently scheduled with course C404G. Letter grading.

C104F. History of Design for Performance Production Part II: Historic Costume from Prehistoric to Neoclassical. (4) Lecture, four hours. Requisites: courses 14A, 14B, 14C. Study of historic costume as manifestation of cultural, social, economic, and political influences to provide historical framework for design of costumes for theater, film, and television. Survey of history of Western costume and civilian attire. May be repeated once for credit. Concurrently scheduled with course C404G. Letter grading.

C104I. History of Design for Performance Production Part II: Costume Design. (4) Lecture, four hours. Requisites: courses 14A, 14B, 14C. Study of costume as manifestation of cultural, social, economic, and political influences to provide historical framework for design of costumes for theater, film, and television. Survey of history of Western costume and civilian attire with global emphasis. May be repeated once for credit. Concurrently scheduled with course C404I. Letter grading.

C104J. History of Design for Performance Production: Selected Topics of Décor and Costume Design History. (4) Lecture, four hours. Requisites: courses 14A, 14B, 14C. Study of historic costume as manifestation of cultural, social, economic, and political influences to provide historical framework for design of costumes for theater, film, and television. May be repeated three times for credit. Concurrently scheduled with course C404J. Letter grading.

107. Drama of Diversity. (5) Lecture, three hours; discussion, one hour (when scheduled). Investigation of diversity in American society as manifested in dramatic works and theatrical presentations. P/NP or Letter grading.

108. Undergraduate Seminar: History and Criticism. (5) Seminar, four hours. Limited to 15 students. Selected topics in history and criticism of theater and performance. Study of how experimental theaters originate, how they imagine their form of performance, their audience, and their goals. Concentration on theater that regarded themselves, in some way, as experimental. Examples primarily from theaters within U.S. from 1967 to present as well as from other countries, specifically Poland, also considered. Letter grading.

M113. Contemporary Physical Theater. (5) Lecture, four hours; other, to be arranged. Practical application of creative drama process. Exploration of interrelationships of arts to traditional disciplines of learning. May be repeated once for credit. P/NP or letter grading.

114. Special Topics in Theater and Performance Studies. (5) Lecture, three or four hours. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit. P/NP or letter grading.

M114. Variable Topics in Performance and Disability Studies. (4) Same as Disability Studies M114. Seminar, four hours. Analysis and critique of depiction of disability in theater. Topics may include introduction to disability studies; race, gender, and disability; representation of disability in theater; and more. May be repeated for credit with topic or instructor change. P/NP or letter grading.

117. Topics in Physical Performance. (2) Studio, three to four hours. Exploration of specific physical performance techniques, and/or modern physical theater practices. Topics may include specific types of partnering, combat, martial arts, vintage dance, etc. May be repeated twice for credit. Letter grading.

118A. Creative Dramatics. (4) Lecture/laboratory, four hours. Studies of principles and procedures of improvisational approach to drama as done with children from nursery school to junior high. P/NP or letter grading.

118B. Advanced Creative Dramatics. (2 to 4) Lecture, four hours; other, to be arranged. Practical application of creative drama process. Exploration of interrelationships of arts to traditional disciplines of learning. May be repeated once for credit. P/NP or letter grading.

119A. Interactive Theater. (4) Lecture, four hours. Active, problem-solving process of theater exercises and games designed to examine racial stereotypes, sexual harassment, gender discrimination, and other issues that divide members of campus community, as well as issues that divide campuses from Los Angeles community. Selected to increase social and political awareness of problems and ideas fundamental to intercultural communication, with an emphasis on developing skills and attitudes useful in facilitating discussions between actors and audience participants. Use of techniques of sensory awareness, movement, pantomime, improvisation, and characterization. Letter grading.

118D. ArtsBridge Teaching Practicum. (4) Lecture, four hours. Requisites: courses 118A, 118B. Development of K-12 teaching materials to integrate theater with specific core curriculum. Collaboration with class-
room teacher to identify core subject to be taught. Language arts, science, history, mathematics, and social sciences are possible curricular areas. Development of evaluation techniques to measure effectiveness of incorporating theater materials into curriculum. Weekly meetings to discuss teaching strategies and prepare written lesson plans that incorporate California Teaching Content Standards, objectives, motivation, detailed implementation of lesson plan, and ideas for assessment. Classroom work culminates in thoroughly documented final project evaluated by Arts-Bridge student, classroom teacher, and UCLA faculty members. P/NP or letter grading.

120A–120B. Acting and Performance in Film. (5–5) Lecture, six hours. Exploration of acting and performance in film. Through screenings of performance-driven films, class and acting exercises, examination of methods, styles, and performances of some of world’s most highly regarded actors and their work. P/NP or letter grading.

120C. Acting and Performance in Film. (5) Lecture, six hours. Exploration of acting and performance in film. Through screenings of performance-driven films, class discussion, and acting exercises, examination of methods, styles, and performances of some of world’s most highly regarded actors and their work. P/NP or letter grading.

121. Acting Workshop. (2) Studio, to be arranged. Requisite: course 20, Courses 160, 163A, 163B, and 163C may not be taken concurrently. Workshop that provides students with opportunity to rehearse, perform, and criticize scenes. May be repeated once for credit. P/NP or letter grading.

C122. Character Development through Makeup and Hair Design. (2) Studio, four hours. Examination of importance of makeup and hair design in film. History and overview of hair and makeup in fashion and motion pictures. Collaboration of makeup artists and hair-stylists with costume design, actors, production designer, and director to conceptualize people in script. Exploration of makeup artist and hairstylist roles in current film, television, and theater productions and skills needed to design makeup and hair for film and television productions. Concurrently scheduled with course C222. Letter grading.

124A. Intermediate Voice and Speech I: Vocal Ener- gy in Classical Texts. (4) Studio, three to four hours. Requisites: courses 24A and 24B, or 28A and 28B. Creation of warm-up and building of vocal energy through understanding, ideas, and thoughts, and expression. Examination of diaphragmatic connection and breath control to work towards vocal and speech, and including Shakespearean sonnet. Letter grading.

124B. Intermediate Voice and Speech II: Creating Complete Warm-Up for Theatrical Productions. (2) Studio, three to four hours. Requisites: courses 24A, 24B, and 124A, or 28A, 28B, and 124A. Working with contemporary texts to learn all simple vowels (lip, tongue, open, neutral) and to communicate sound consistently with voice, body, and movement. Creation of complete warm-up for theatrical production using these methods. Letter grading.

125B. Physical Awareness and Combat for Theater, Film, and Television. (2) Studio, to four hours. Requisite: courses 25 or 28C. Battle training for actors in theater, film, and television. Concentration on warm-up, relaxation, control, stunts, gymnastics, martial arts, and use of weapons. Letter grading.

125D–125F. Movement and Combat III. (2–1–2) Studio, three to four hours. Physical awareness for actors, concentrating on warming up body, relaxation, control, stunts, gymnastics, martial arts, and use of weapons. Letter grading.

127. Performance for Virtual Environments. (4) Lecture, two hours; discussion, one hour; laboratory, two hours. Exploration of performance in virtual environments through hands-on experimentation and scene work using two or more vocal/visual techniques supported by history of each technology and its use in arts, key technological concepts, and basic production processes. Consideration of uses in large scale professional production as well as low-budget and do-it-yourself approaches. Platforms studied are selected for their importance to field, timeliness, and relationship to department program. Students engage with platforms as character actor, director, and self-selected scenes. Students explore character development, different relationships to audience and camera, and engagement/synchronization with virtual setting. Students design and collaboratively in concert with study of experiences of other actors, directors, and other creators with platforms. Letter grading.

128A. Acting, Voice, and Movement Workshops II. (2) Studio, four to six hours. Study of advanced acting technique, scene study, and development of voice and movement skills. May be repeated for maximum of 12 units. Letter grading.

CM129. Contemporary Topics in Theater, Film, and Television. (2) Same as Film and Television CM129. Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, television, and television of writing, direction, production, and performance. Overview of individual contributions in collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated twice for credit. Concurrently scheduled with course CM229. P/NP or letter grading.

C133A. Script Development Workshops. (4–8) Lecture, three hours; studio, four to 24 hours. Guided process of script development, with emphasis on communication, artistic growth, and professional process. May be taken for maximum of 8 units. Concurrently scheduled with course C433A. Letter grading.

134G. Dance for Musical Theater: Ballet. (1) Studio, three to four hours. Designed for Theater majors. Intermediate level course. Development of skills and fur- therment of concepts of ballet technique. Emphasis on development of proper placement, building strength and flexibility, higher level of techniques, and awareness of musicality and artistic expression. May be re- peated five times for credit. Letter grading.

135. Musical Theater Vocal Styles: Gospel. (2) Studio, three hours. Designed for Theater majors. Part of five-course series of musical theater performance techniques in which students explore and master va- rious vocal styles and/or acting approaches necessary to be competitive in field of professional musical theater. Exploration of strategies and techniques for singing gospel and rhythm and blues music, with solo and group improvisation as foundation. Letter grading.

135C. Musical Theater Vocal Styles: Legitimate/OPer- etta. (2) Studio, three hours. Designed for Theater majors. Part of five-course series of musical theater performance techniques in which students explore and master va- rious vocal styles and/or acting approaches necessary to be competitive in field of professional musical theater. Exploration of strategies and techniques for singing legitimate/opera music, with focus on vocal and body strengthening exercises and solo song coaching. Letter grading.

135D. Musical Theater Vocal Styles: Rock. (2) Studio, three hours. Designed for Theater majors. Part of five-course series of musical theater performance tech- niques in which students explore and master variety of vocal styles and/or acting approaches necessary to be competitive in field of professional musical theater. Exploration of strategies and techniques for singing rock music, with emphasis on vocal and body strengthening exercises and solo song coaching. Letter grading.

135E. Musical Theater: Creating and Playing Char- acters from Musical Text. (2) Studio, two to three hours. Designed for Theater majors. Exploration of text and lyrics of musical theater piece, song cycle, or specific composer’s work from actors’ points of view. Students develop skill in creating and observing, and improvisation. Emphasis on creating and sustaining character through singing. Letter grading.

135F. Singing: Individual Instruction. (1) Studio, one hour. Requisite: course 35B. Designed to advance particular vocal technique, focusing on vowel shape, range expression, and overall mastery of vocal instrument. May be repeated four times for credit. Letter grading.
136. Advanced Acting for Stage. (4) Studio, four hours. Requisite: course 123. Study and practice of art of acting through progression to more advanced acting problems. Concurrently scheduled with course 115B. Design to aid the actor in the transition from stage to film work. Examination of film production and its physical characteristics and the acting style needed for work in film and television. Students may perform in simulated studio setting on camera. May be repeated once for credit with instructor change. Letter grading.

137. Acting for the Camera. (4) Lecture/studio, four to six hours. Requisite: course 115B. Design to aid the actor in the transition from stage to film work. Examination of film production and its physical characteristics and the acting style needed for work in film and television. Students may perform in simulated studio setting on camera. May be repeated once for credit with instructor change. Letter grading.

138. Special Problems in Performance Techniques. (4) Studio, four hours. Study of complex problems in voice, movement, and acting. May be repeated twice for credit. P/NP or letter grading.

139. Play Reading and Analysis. (5) Lecture, three hours. Investigation of dramatic texts, with focus on play structure, plot, character, dialogue, ideas, and various other elements essential to effective theatrical interpretation and realization. Letter grading.

C146A-C146B. Art and Process of Entertainment Design. (4-4) Lecture. Conceptualization, design, and prototyping of entertainment environments. Concurrently scheduled with courses C446A-C446B. Letter grading. C146A. Exploration of original forms of media-rich entertainment experience through lectures, presentations, and participatory workshops. Students form collaborative teams to conceive and propose interactive entertainment events. C146B. Prototype development; two to five proposals to be more completely defined and developed. Students form collaborative teams for further conceptual development of their project proposals. May be repeated once for credit.

147A. Drafting. (4) Studio, four hours. Development of visual and written skills through drafting. Exploration of drafting for scenic and lighting designs. May be repeated once for credit. P/NP or letter grading.

148. Special Courses in Design and Technical Theater. (4) Lecture, three hours. Group study of selected subjects in design and technical theater. May be repeated twice for credit. P/NP or letter grading.

149. Introduction to Design. (5) Lecture, three hours. Exploration of interpretation of drama through design, including study of scenic and lighting techniques of design. Collaborative role of designer, principles of design for scenery, lighting, costumes, and sound. Both technical and aesthetic groundworks for further study. Investigation of professional practice and design research process, composition, and conceptualization. Investigation of design research process, composition, and conceptualization. May be repeated twice for credit. Concurrently scheduled with course C452E. Letter grading.

C151A, C151B. Graphic Representation of Design: Multimodal Rendering. (2) Studio, four hours. Study of model for representation of design ideas and rendering techniques. Concurrently scheduled with course C455A. Letter grading.

C155B. Graphic Representation of Design: Digital Rendering. (2) Studio, four hours. Study of digital media rendering techniques as they relate to interpretation of scenic, lighting, and costume renderings, with focus on human form in space. Weekly demonstrations of wide variety of art media, including watercolor, markers, pastel, and collage rendering. May be repeated twice for credit. Concurrently scheduled with course C455B. Letter grading.

C156. History of Costume Design in Movies. (4) Lecture, three hours; screenings, two to six hours. History of costume design within context of 20th-century film. Emphasis on evolution of role of costume designer since early days of film industry. Role of costume designer and contribution of costume design to cinematic storytelling. Concurrently scheduled with course C453E. Letter grading.

C160. Advanced Design for Musicals. (4) Lecture/studio, four hours. Requisites: courses 14A, 14B, 14C. Exploration of sound design for theater and technologies for mixing, reinforcement, and signal processing. Topics include use of delay, equalization, and microphone placement for theater sound reinforcement with focus on mixing musicians. Covers paper work needed to complete show. Tuning space, equalization, working with some advanced programming and mixing on various consoles. May be repeated once for credit. Concurrently scheduled with course C454B. Letter grading.

C161A-C161D. Lighting Design for Performances and Special Events. (4) Lecture, four hours. Requisites: courses C152A, C152B, C152C. Advanced topics in lighting design, including live performances for concerts, exhibitions, and live events. Concurrently scheduled with course C452D. Letter grading.

C162E. Lighting Design for Dance. (4) Lecture, four hours. Requisite: course C152A, C152B, or C152C. Advanced topics in lighting design, concentrating on live dance performance in all styles. Concurrently scheduled with course C452E. Letter grading.

C163A. Costume Design. (4) Lecture/studio, four hours. Requisites: courses 14A, 14B, 14C; for transfer students: course 149. Study of costume design for proscenium, thrust, and arena configurations, music theater, and concert lighting. May be repeated twice for credit. Concurrently scheduled with course C452B. Letter grading.

C163B. Costume Design for Theater. (4) Lecture/studio, four hours. Requisites: courses 14A, 14B, 14C; for transfer students: course 149. Study of costume design for proscenium, thrust, and arena configurations, multiset productions, and music theater. May be repeated twice for credit. Concurrently scheduled with course C452B. Letter grading.

C163C. Costume Design for Film and Television. (4) Lecture/studio, four hours. Requisites: courses 14A, 14B, 14C; for transfer students: course 149. Study of current professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. May be repeated twice for credit. Concurrently scheduled with course C453C. Letter grading.

C163D. Projects in Costume Design Management. (4) Lecture, three hours; screenings, two to six hours. Preparation of presentations of design concepts for scenic design offerings, set designs, costume presentations, and special effects. Concurrently scheduled with course C453D. Letter grading.

C155F. Graphic Representation of Design: Costume Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of techniques for rendering theatrical costumes, and fabrics. May be repeated twice for credit. Concurrently scheduled with course C455F. Letter grading.

C155G. Graphic Representation of Design: Scene Painting Techniques. (2) Studio, four hours. Requisite: course 147A or 147B. Study of scenic painting techniques and materials and their realization of color design and elevations. May be repeated once for credit. Concurrently scheduled with course C455G. Letter grading.

C155H. Selected Topics in Graphic Representation of Design. (2) Studio, six hours. Group study of selected subjects in techniques for interpretation of design for theater. May be repeated once for credit. Concurrently scheduled with course C455H. Letter grading.

C156A. Introduction to Computer-Assisted Drafting. (4) Studio, four hours. Requisite: course 147A. Investigation of drawing and editing techniques, drafting floor plan sections, and elevation drawings using AutoCAD. Concurrently scheduled with course C456A. Letter grading.

C156B. Advanced Computer-Assisted Drafting. (4) Studio, four hours. Requisite: course 147A or 147B. Study of techniques for graphical representation of design using AutoCAD. Concurrently scheduled with course C456B. Letter grading.

C156D. Introduction to Computer-Assisted Drafting. (4) Studio, four hours. Requisite: course 147A. Investigation of drawing and editing techniques, drafting floor plan sections, and elevation drawings using Vectorworks. Concurrently scheduled with course C456D. Letter grading.

C156G. Virtual Reality Rendering for Film. (2) Studio, four hours. Requisites: courses C155C, C155H, C156A, C156B, C156C. Preparation: basic 3D modeling and rendering skills. Students learn how to translate 3D models developed in Maya into Unreal Engine game engine environment, and utilize this platform as a powerful tool for development, presentation, and staging of films and theater set design. Students primarily use Autodesk Maya and Unreal Engine, but are also introduced to Zbrush, Blender, Quixel, and other ancillary resources. Concurrently scheduled with course C456G. Letter grading.

C157A-C157B-C157C. Costume Construction Techniques. (2–2–2) Studio, four hours. Study of theory and application of drafting, pattern making, fitting, and construction techniques for period costumes and period design, to achieve authentic-appearing costume using contemporary methods. Each course may be repeated once for credit. Concurrently scheduled with courses C457A-C457B-C457C. P/NP or letter grading.

160. Fundamentals of Play Direction. (5) Lecture, two hours; laboratory, four hours. Requisite: course 15 with concurrent 147A. Course may be taken concurrently. Basic theories of play direction and their application through preparation of scenes under reheasal conditions. Letter grading.

163A. Directing for Stage. (4) Lecture/studio, four hours. Requisite: course 15. Intensive development of primary directing skills and process, including text analysis and exploration of craft fundamentals as basis for director/actor communication and effective staging. Students direct scenes from plays under laboratory conditions. Letter grading.

163D. Directing Project for Stage. (5) Discussion, three hours; laboratory, four to eight hours. Requisites: courses 163A, 163B. Employment of stage directing techniques in production of short play or project. Students direct one-act play or project. May be repeated once for credit. Concurrently scheduled with course C458D. Letter grading.

167A. Career Preparation for Actor. (2) Lecture/ studio, three to four hours. Requisite: course 116B. Preparation for professional career as actor in film, television, theater, and commercials. Topics include audition preparation, head shots, resumes, agents, managers, casting directors, producers, unions, survival skills, professional development. Letter grading.

167B. Audition Preparation for Singing Actor. (2) Lecture/studio, three hours. Requisite: one course from 134A through 135F. Audition preparation for singing actor, providing various techniques to prepare for and successfully execute professional musical theater auditions. Letter grading.

170. Design and Production Project. (4) Laboratory, eight hours. Requisites: courses 14A, 14B, 14C. Experience as stage manager or designer, including participation in preparation and realization of scenic, lighting, costume, or sound designs, or stage management production. May be repeated once for credit. Letter grading.

171A. Advanced Theater Laboratory. (1 to 4) Laboratory, to be arranged. Creative participation as actor or stage manager in production and postproduction preparation of departmental productions. May be taken for maximum of 4 units. P/NP or letter grading.

171B. Advanced Theater Laboratory. (1 to 4) Laboratory, to be arranged. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for maximum of 4 units. P/NP or letter grading.

172. Production Practice in Theater, Film, Video, and Digital Media. (1 to 8) Studio, three to eight hours. Exploration and laboratory experience in one or more workshops exploring production and postproduction practice for entertainment media, including theater, film, video, and digital media. May be repeated for maximum of 24 units. Letter grading.

173A. Design Assignment: Assistant Designer. (2) Studio, six hours. Requisites: courses 14A, 14B, 14C. Laboratory experience as assistant designer, including participation in preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice. Letter grading.

173B. Production Design Assignment: Designer. (2) Studio, six hours. Requisites: courses 14A, 14B, 14C. Laboratory experience as designer, including preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice. Letter grading.

174B. Project in Stage Management. (3) Studio, nine units. Requisites: course 147A. Laboratory experience in professional duties of assistant stage manager, including participation as assistant stage manager in preproduction, rehearsal, and performance phases of productions. May be repeated once for credit. Letter grading.

174C. Project in Stage Management. (4) Studio, 12 hours. Requisite: course 174A. Laboratory experience in professional duties of stage manager, including participation as stage manager in preproduction, rehearsal, and performance phases of productions. Problems of unions, auditions, organization, scheduling, and responsibilities of lengthy run. May be repeated three times for credit. Letter grading.

174D. Advanced Stage Management Techniques. (2) Lecture, two hours; studio, two hours. Requisites: courses 147A, 147A. Professional duties of stage manager. Practical trajectory through roles, skills, techniques, dry techniques, cue 2 cue, preshow setup, performance reports, and quick change rehearsals. Letter grading.

175A-175B-175C. Summer Theater Workshops. (4 credits; each) Laboratory, 12 hours. Participation in various aspects of theater production and performance. Offered in summer only. Letter grading.

175B. Summer Theater Workshop. (1 to 4) Laboratory, three hours. Participation in various aspects of theater production and performance. Offered in summer only. Letter grading.

C176A-C176B-C176C. Production Practice in Theater with Emerging Technologies I, II, III. (4–4–4) Studio/laboratory, four to six hours. Collaborative creative and technical development of all aspects of theatrical production incorporating emerging technologies and/or advanced technologies, culminating in rehearsal and performance. Offered in summer only. Requisites: courses in cases where multiple quarters are needed to prepare production. Concurrently scheduled with course C476A-C476B-C476C. Letter grading.

M178. Film and Television Acting Workshop. (2) Lecture and lab. Preparation for the film and television industry, four hours. Workshop providing opportunities for students to rehearse, perform, and evaluate scenes. Three different production styles to which performers may be exposed. Two projects (1) is performed in collaboration with director, (2) single-camera experience, and (3) multiple-camera experience. May be repeated twice for credit. Letter grading.
180. Senior Project. (4) Lecture or studio, three hours. Requisites: courses 101A, 101B. Preparation of conceptual or creative project to provide culminating experience in production of creative or research work. May be repeated twice for credit. Letter grading.

181. Career Development for Actors. (2) Lecture, three hours; fieldwork, three hours. Limited to seniors. Study of business practices, career entry, and development of professional acting career. Letter grading.

C185A. Role of Producer in Professional Theater. (2) Lecture, three hours. Study of structure governing economic and artistic decision-making processes in professional theater of America. Concurrency scheduled with course C195P or letter grading.

C185B. Role of Management in Educational and Community Theater. (2) Lecture, three hours. Study of artistic, social, and economic criteria in administration of educational and community theater. Concurrently scheduled with course C205B. P/NP or letter grading.

188A. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Initially scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188C. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course P/NP. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

190. Community or Corporate Internships in Theater, Film, and Television. (2, 4, or 8) Tutorial, eight, 16, or 24 hours. Limited to juniors/seniors. Internship at various theaters, studios, or entertainment organizations accentuating creative contributions, organizations, and work of professionals in their various specialties. Students meet on regular basis with instructor and present and discuss results of their experiences. May be taken for maximum of 8 units. Individual contract with supervising faculty member required. Letter grading.

191. Directed Research or Senior Project in Theater. (2 to 8) Tutorial, to be arranged. Limited to juniors/seniors. Research under guidance of faculty mentor. Supervised individual research or investigation. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

206. Themes in World Theater and Drama. (5) Seminar, four hours. Designed for graduate students. Selected topics in world theater history, drama, production, and/or architecture organized on thematic basis. May be repeated four times for credit. S/U or letter grading.

208A. Practicum in Dramaturgy. (2 to 12) Laboratory, to be arranged. Requisites: courses 208A, 208B. Demonstration of competence in practice of dramaturgy through completion of approved dramaturgical assignment. May be taken for maximum of 12 units. Letter grading.

210. Topics in World Theater and Drama. (5) Seminar, three hours. Designed for graduate students. Investigation of selected topics in world theater, drama, literature, and theatrical or performance architecture. May be repeated four times for credit. S/U or letter grading.

C212. Emerging Technologies and Their Uses in Live Performance. (4) Formerly numbered C437. Seminar, four hours. Survey of major emerging and contemporary technologies and their potential uses in and impact on live performance, from augmented and virtual reality to electronic textiles, Internet of Things, and Modern artificial intelligence. Offers solid basis for engaging in future collaborations with technologists, for self-study of new technologies, and, for those already more familiar with digital technologies, theorize for engaging with social context of these technologies. Concurrently scheduled with course C112. S/U or letter grading.

216A. Approaches to Representation. (5) Lecture, three hours; laboratory, one hour. Overview of strategies of representation from classical aesthetic theories to postmodern deconstructions of them. May be repeated once for credit. Letter grading.

216B. Approaches to History. (5) Lecture, three hours; laboratory, one hour. Overview of key methodologies, theories, and methods of history of the theatre and performance linked to plays and performances appropriate to approach. Letter grading.

216C. Approaches to Identification. (5) Lecture, three hours; laboratory, one hour. Overview of key theories, methods, debates, and performance texts of identifying the structure between audience member or scholar and theatrical or performance object. Letter grading.

220. Graduate Forum. (1 to 4) Seminar, one to four hours. Limited to 20 students. Preparation and discussion of issues informing and affecting contemporary theater. May be repeated four times for credit. S/U grading.

221. Introduction to Performance Studies. (5) Seminar, three hours. Lecture or performance as sustained practice in traditional disciplines such as theater, music, and dance and as lens to focus thinking about human experience in fields such as philosophy, anthropology, linguistics, education, and law. Emphasis on establishing interdisciplinary dialogue across many fields. Letter grading.

C222. Character Development through Makeup and Hair Design. (2) Studio, four hours. Examination of makeup and hair design in film. History and overview of hair and makeup in fashion and motion pictures. Collaboration of makeup artists and hairdressers with directors, producers, costume designers, and directors to conceptualize people in script. Exploration of makeup artist and hairstylist roles in current film, television, and theater productions and skills needed to design makeup and hair for film and television productions. Concurrently scheduled with course C122. Letter grading.

CM229. Contemporary Topics in Theater, Film, and Television. (2) Same as Film and Television CM229. Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated twice for credit. Concurrently scheduled with course CM129. S/U or letter grading.

230A-230B-230C. Writing for Contemporary Theater, Film, and Television. (4) Lecture, two hours; studio, four hours. Designed for graduate students. Letter grading.

230A. One-Act Play. Analysis of strategy and dramatic structure of selected contemporary short plays leading to guided completion and critique of student written one-act plays. 230B. Full-Length Play. Analysis of strategy and dramatic structure of selected contemporary full-length plays leading to guided completion and critique of selected student written full-length plays. 230C. Performance and Text. Exploration of structural strategies, political implications, and technical demands of selected contemporary American plays leading to guided completion and critique of student work.

231. Special Topics in Playwriting. (4) Lecture, three hours. Analysis and practice of various aspects of playwriting. Variable content selected from topics such as comedy writing, docudrama, experimental theater, writing for alternative audiences, or children's theater. May be repeated twice for credit. Letter grading.

232. Manuscript Analysis. (4) Lecture, three hours. Design for graduate students. Critical and constructive study of dramatic techniques as employed by playwrights and screenwriters in selected examples of contemporary work. May be repeated once for credit. S/U or letter grading.

242. Introduction to Design in Production. (4) Lecture or studio, four hours. Introduction to process of design for entertainment, collaborative role of designer, and realization of designs in production. May be repeated once for credit. Letter grading.

243A-243B-243C. Scenic Design. (4–4–4) Studio, four hours. Advanced study and practice in scenic design for theater. Imaginative as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of design. May be repeated once for credit. S/U or letter grading.

244A. Advanced Theater Production. (2 to 8) Studio, 12 to 24 hours. Designed for graduate students. Creative participation in preparation and presentation of theatrical production. May be taken for maximum of 8 units. Letter grading.

244B-244B-244C. History of Costume. (4–4–4) Lecture/studio, four hours. Designed for graduate students. Study of history of costume as manifestation of cultural, social, economic, and political influences to provide historical framework and costumes for theater, film, and television. Historical survey and in-depth exploration of selected periods, with study of influences of diverse cultures. Letter grading.

246D. History of Costume Design. (4) Lecture, four hours. Study of history of costume as manifestation of cultural, social, economic, and political influences to provide historical framework for design of costumes for theater, film, and television. Historical survey and in-depth exploration of selected periods, with study of influences of diverse cultures. Letter grading.

250. Directing I. (4) Lecture, four hours; studio, 24 hours. Designed for graduate students. Development of directorial skills of analysis, planning, staging, and controlling through medium of written preparations and directing of scenes. Letter grading.

253. Production Project in Direction for Stage. (2 to 8) Discussion, one hour; studio, 12 to 30 hours. Designed for graduate students. Direction of dramatic works from creative discussion to initial work in progress. May be repeated for maximum of 20 units. Letter grading.
C283D. Directing Project for Stage. (5) Discussion, three hours; laboratory, four to eight hours. Requisites: courses 163A, 163B, 163C. Application of stage di- recting techniques in preparation of problems in project. Students direct one-act play or project. May be repeated once for credit. Concurrently scheduled with course C163D. Letter grading.

264. Directing Classical and Historical Drama. (4) Lecture, three to five hours; laboratory, one hour. Requisites: four to eight hours. Examination of selected plays from different historical periods and cultures, with an emphasis on the theatrical environment in which each play was created. May be repeated once for credit. Letter grading.

265. Modern Theories of Production. (4) Lecture, four hours. Examination of modern theories of production from emergence of director in 19th century to present. Investigation of different responses to prob- lems of creating vital theatrical event in context of on- going evolution of theater as art form. Examination of contribution of significant directors and movements; relation between theater and other forms of representa- tion. Letter grading.

266. Theatrical Conceptualization. (4) Lecture, four hours. Examination of process of conceptualization in dramatic production; centrality of theatrical conceptual- ization in interpretation of dramatic text; exploration of range of possibilities for design of theater spaces and options in design components. Consider- ation of visual arts and music as sources of stimulus for theatrical works; focus on collaborative aspect of theatrical production. Letter grading.

272. Production Practice in Theater, Film, Video, and Digital Media. (1 to 8) Studio, three to eight hours. Production practice for entertainment media, including theater, film, video, and digital media. May be repeated for credit. Letter grading.

C285A. Role of Producer in Professional Theater. (2) Lecture, three hours. Designed for graduate students. Study of structure governing economic and art-istic decision-making processes in professional the-ater of America. Concurrently scheduled with course C185A. S/U or letter grading.

C285B. Role of Management in Educational and Community Theater. (2) Lecture, three hours. De- signed for graduate students. Study of artistic, social, and economic criteria in administration of educational and community theater. Concurrently scheduled with course C185B. S/U or letter grading.

C290A-C290B. Special Studies in Theater Arts. (2 or 4 each) Lecture/discussion, two or four hours. Designed for graduate students in seminar study of a particular theater arts, organized on topical basis. Each course may be repeated once for credit. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice per- sonnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guid- ance and supervision of regular faculty member re- sponsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

C404E. History of Design Décor Part I: Architecture and Décor—Antiquity to Early Neoclassical. (4) Lecture, four hours. Requisites: courses 14A, 14B, 14C. Study of pre-Renaissance architectural and interior décor as foundation for Neoclassical, social, economic, and political influences to provide historical framework for design of scenery, costumes, and light- ing for thea- ter, film, and television. May be repeated once for credit. Concurrently scheduled with course C104E. Letter grading.

C404F. History of Design Décor Part II: Architecture and Décor—Industrial Revolution to 21st Century. (4) Lecture, four hours. Requisites: courses 14A, 14B, 14C. Study of post-Renaissance architectural and in-terior décor as manifestation of cultural, social, eco- nomic, and political influences to provide historical framework for design of scenery, costumes, and light- ing for theater, film, and television. May be re- peated once for credit. Concurrently scheduled with course C104F. Letter grading.

420A. Advanced Acting I. (4) Studio, six to 12 hours. Advanced training for actors; challenging body’s core, and energy and concentration needed for per- formance. Deepening awareness of personal, physical idioms, expressions, acting tendencies, and body and breath control. Letter grading.

420B. Advanced Acting I (4) Studio, six to 12 hours. Scene work, usually from 20 to 30 minutes in length. Continuation of work on off-stage preparation, with further development of how actor goes about doing research and fieldwork on character being played. Letter grading.

420C. Advanced Acting for Camera. (4) Studio, six to eight hours. Practice in performance techniques for film and television production. Exploration of language used by actors and directors in film and television production, and subtle differences between acting for stage and camera. Letter grading.

421A. Advanced Acting: Shakespeare. (4 to 8) Studio/laboratory, six to 12 hours. Continuing work on Shakespeare. Class, challenging body’s core, and energy. Text and warm-up exercises also covered. Letter grading.

421B. Advanced Acting: Classical and Historical Drama. (4) Studio/laboratory, six to eight hours. Con- cepts related to Greek choruses and historical plays. Addresses group concentration and communication, choral breathing, awareness of kinetic relationship of performer’s body in space, and relationship of emo- tion to movement, and voice. Letter grading.

421C. Advanced Acting and Craft for Actor. (4) Studio/laboratory, six hours. Advanced acting with focus on craft, inclusive of physicality of thought, de- tails of realism, tempo, shared rhythm and relating movement to text, and audition technique. Letter grading.

422. Advanced Acting for Theater, Film, and Televi- sion. (8 to 12) Studio/laboratory, eight to 12 hours. In- tensive performance experience. May be repeated for maximum of 24 units. Letter grading.

423. Acting for Microphone. (2) Studio/laboratory, three hours. Acting for microphone. May be repeated for credit. S/U grading.

424B. Vowels and Voice Placement. (1) Studio, three hours. Requisite: course 424A. Builds on course 424A. Introduction of vowel diphthongs and triphthongs; de- velopment of forward sound, including consistent thought energy. Exercises to develop, and text to im- plement forward sound, including consistent thought energy. Text and warm-up exercises also covered. Letter grading.

424G. Advanced Vocal Dynamics. (1) Studio, three hours. Extended range, resonance, and vocal power in support of clear, forward speech. Further fluency with vocal resonance in relation to acoustical properties of performance spaces. Using vivid vocal engagement to support dynamic expression of demanding texts, with attention to varieties of tempo, volume, pitch, reso- nance, range, etc. Letter grading.

424L. Phonicets, Dialects, and Accents. (1) Studio, three hours. Use of phonetics to enhance actor’s ability to create character using dialect and accents. Culininating dialect presentation project required. Letter grading.

424J. Acting for Microphone. (2) Studio, four to six hours. Techniques including textual analysis and char- acter work in art and craft of acting for microphone. Letter grading.

425A. Advanced Movement I. (2 or 4 each) Studio/labora- tory, three to six hours. Discovery of body’s unique language through exercises designed to explore and free total instrument. Development of flexible actor with range, expression, and confidence physically. May be repeated for maximum of 12 units. Letter grading.

425B-425C. Advanced Movement I. (2 or 4 each) Studio/laboratory, three to six hours. Discovery of body’s unique language through exercises designed to explore and free total instrument. Development of flexible actor with range, expression, and confidence physically. May be repeated for maximum of 12 units. Letter grading.

425D. Advanced Training Intensive. (2) Studio, 12 to 15 hours per week for four weeks. Advanced training class, challenging body’s core, energy, and concentra- tion needed for performance. Deepening awareness of movement, and physical idioms and acting tenden- cies, body and breath control. May be repeated once for credit. Letter grading.
425E. Advanced Conditioning and Combat for The-ater, Film, and Television. (2) Studio, six hours. Body conditioning, basic striking skills, tumbling, breakfalls, re-directing energy, stunts, gymnastics, martial arts, use of weapons, and integration of skills in perform-ance contexts. Letter grading.

425F. Advanced Movement II. (2 or 4) Studio/labora-tory, three to six hours. Presentation of more complete picture of body mechanics, movement, dance, and its relationship to the actor, music, and dance. Advancement of physical training of individual actors to their maximum poten-tial. Experience in techniques and discovery of origins of variety of acrobatic and dance disciplines, including ballet, balleto, period dance, and circus techniques. Letter grading.

425G-425H-425I. Advanced Movement III. (2 or 4 each) Studio, three to six hours. Advanced physical training and research for movement, dance, or combat discipline: capoeira, martial arts, ballet, balli-room, period dance, circus techniques. Letter grading.

426A-426B-426C. Alexander Techniques. (2 or 4 each) Studio, three to six hours. Study and practice in Alexander techniques as method of developing bal-ance, poise, and coordination of body and mind. Explo-ra-tion of use of rhythm to expand movement poten-tial of actors and relevant use of visual arts and an-imal studies to develop an understanding of movement and to expansion of movement potential. Letter grading.

430A-430B-430C. Advanced Studies in Playwriting. (4 to 8 each) Lecture, three hours. Limited to MFA playwriting students. Guidance and instruction in the refinement and adaptation of full-length scripts for stage. S/U or letter grading.

431. Special Topics in Playwriting. (4) Discussion, three hours. Advanced study and practice of playwriting program students. Analysis and practice of varied aspects of playwriting’s art. Variable content selected from topics such as comedy writing, docudrama, writing for alter-native audiences, adaptation from stage to screen, children’s theater, or improvisational techniques. May be repeated for credit. S/U or letter grading.

433A. Script Development Workshops. (4 to 8) Lecture, three hours; studio, four to 24 hours. Desig-nated projects. Guided process of script development, with emphasis on communica-tion, artistic growth, and professional process. May be taken for maximum of 8 units. Concurrently scheduled with course C435A.

433B. Script Development Workshop. (4 to 8) Lecture, three hours; studio, four to 24 hours. Desig-nated projects. Guided process of script develop-ment, with emphasis on communication, artistic growth, and professional process. May be taken for maximum of 8 units. Letter grading.

441A. Lighting Design. (4) Lecture/studio, four hours. Study of use of light and color to create space, effect of light on scenery and costumes, lighting for arena/ thrust theaters, multiscreen productions, lighting pat-terns, and moving scenery. May be repeated once for credit. Letter grading.

441B. Lighting Design. (4) Lecture/studio, four hours. Study of use of light and color to create space, effect of light on scenery and costumes, lighting for arena/thrust theaters, multiscreen productions, lighting pat-terns, and moving scenery. May be repeated once for credit. Letter grading.

441D. Scenic Projection and Media Techniques. (4) Lecture/laboratory, four hours. Designed for graduate students. Advanced study and practice in scena-projection design, including emphasis on research and design, and execution of theatrical projection and photographic technique for stage. May be repeated once for credit. S/U or letter grading.

442A-442B-442C. Costume Design. (4–4–4) Lecture/ studio, four hours. Study and practice in costume design for theater. Investigation as impetus for design, text analysis, metaphor, and conceptualiza-tion. Investigation of design research process, period style, and chart creation leading to visualization of design. Study of costume design for thea-trical productions, ballet, opera, and musical theater. Each course may be repeated once for credit. Letter grading.

443A-443D. Advanced Scenic Design. (4 each) Study, four hours. Advanced study and practice of scenic design for theater, with emphasis on cultivating imagination as impetus for design, text analysis, metafor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of design, as well as exploration of students’ individual cognitive and artistic process and refinement of the course material. May be repeated twice for credit. S/U or letter grading.

445A-445B-445C. Production Design for Film, Tele-vision, and Entertainment Media. (4–4–4) Lecture/ studio, four hours. Study and practice in design of scena-projection and entertainment media, including effects of differing media on design choices, role of production designers and art direc-tors, and design for single- and multiple-camera pro-ductions. Each course may be repeated once for credit. Letter grading.

446A-446B. Art and Process of Entertainment Design. (4–4) Lecture, three hours. Conceptualiza-tion, design, and prototyping of interactive theatrical events. Concurrently scheduled with courses C416A- C416B. Letter grading. C446A. Exploration of original forms of media-rich entertainment experience through lectures and the development of a live performance. Students form collaborative teams to conceive and propose interactive entertainment events. C446B. Prototype development; two to five proposals to be more completely defined and developed. Students form collaborative teams for further conceptual develop-ment of their project proposals. May be repeated once for credit.

446A-446B-446C. Costume Design for Film, Televi-sion, and Entertainment Media. (4–4–4) Lecture/studio, four hours. Study and practice in design of costumes for live and virtual characters in film, television, and entertainment media, including effect of differing media on design process. Design projects 446A and 446B may be repeated once for credit; course 446C may be repeated twice for credit. Letter grading.

448B. Deconstructing Glamour. (4) Lecture, three hours; screenings, two hours. Exploration of integra-tion of costume design into filmmaking process and illu-mination of work required to bring characters from written page to life. Letter grading.

449A. Design Thesis Preparation. (2) Lecture/studio, four hours. Design selected projects that will pre pare design students for thesis examination. In Prog-rесс grading (credit to be given only on completion of courses 449B and 449C).

449B. Design Thesis Preparation. (2) Lecture/studio, four hours. Design selected projects that will pre pare design students for thesis examination. In Prog-rесс grading (credit to be given only on completion of course 449C).

450. Design Thesis Project. (4) Lecture/studio, four hours. Series of group design projects that will pre pare design students for thesis examination. In Prog-rесс grading (credit to be given only on completion of course 449C).

451A. Design Thesis Project. (4) Lecture/studio, four hours. Series of group design projects that will serve as comprehensive examination for MFA degree in enter-tainment design. Review and evaluation of projects by design faculty members from all areas of curriculum. Letter grading.

451B. Design Thesis Project for Theater, Film, and Tele vision. (4) Lecture/studio, four hours. Four costume design students. One major scenography design project that serves as comprehensive exami-nation for MFA degree in entertainment design. Re-view and evaluation of projects by design faculty members from all areas of curriculum. May be repeated once for credit. Letter grading.

451D. Design Thesis Project for Theater. (4) Lecture/studio, four hours. Study of visual presentation of design for MFA degree in entertainment design. May be repeated once for credit. Concurrently scheduled with course C151B. Letter grading.

452A. Lighting Design. (4) Lecture/studio, four hours. Study of lighting, with emphasis on design, text analysis, metaphor, and conceptualization. Investigation of composition and control of light and color in relation to actor. May be repeated once for credit. Concurrently scheduled with course C152A. Letter grading.

452B. Lighting Design for Stage. (4) Lecture/ studio, four hours. Study of lighting design for proscenium, thrust, and arena configurations, multiscreen productions, and concert theater. May be repeated once for credit. Concurrently scheduled with course C152B. Letter grading.

452D. Lighting Design for Performance and Special Events. (4) Lecture, four hours. Requisites: courses C452A, C452B, C452C. Advanced topics in lighting design, including live performances for concerts, exhibits, and live events. Concurrently scheduled with course C152D. Letter grading.

452E. Lighting Design for Dance. (4) Lecture, four hours. Requisite: course C441A, C441B, or C441C. Advanced topics in lighting design, concentrating on live performance. May be repeated twice for credit. Concurrently scheduled with course C152E. Letter grading.

453A. Costume Design. (4) Lecture/studio, four hours. Investigation as impetus for design, text analysis, metafor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of design. May be repeated twice for credit. Concurrently scheduled with course C153A. Letter grading.

453B. Costume Design for Theater. (4) Lecture/ studio, four hours. Study of costume design for proscenium, thrust, and arena configurations, multiset productions, and music theater. May be repeated twice for credit. Concurrently scheduled with course C153B. Letter grading.

453C. Costume Design for Film and Television. (4) Lecture/studio, four hours. Study of current profes-sional costume design and wardrobe practices in film and television, including effect of differing media on design choices. May be repeated twice for credit. Concurrently scheduled with course C153C. Letter grading.

453D. Projects in Costume Design Management. (4) Lecture, three hours. Examination of professional duties of costume designers, set costumers, and su-pervisors, especially management of production logistics, including but not limited to costume breakdowns, construction budgets, and setting up and running them, as well as set costumer training for film and television, practicing on-set protocol, breakdown of daily respon-sibilities, and assembling set costumer kits ready for production. Practice with professional responsibilities to move from abstract to substantive problem solving, maintaining creative and collaborative environment
while adhering to logistical obstacles and tasks. Concurrently scheduled with course C153D. Letter grading.

C453E. History of Costume Design in Movies. (4) Lecture, three hours; screenings, two to six hours. History of costume design within context of 20th-century fashion and film history, including evolution of role of costume designer since early days of film industry. Role of costume designer and contribution of costume design to cinematic storytelling. Concurrently scheduled with course C153E. Letter grading.

C453F. Practice of Costume Design for Film Productions. (4) Lecture, three hours. Introduction to costume design as integral aspect of filmmaking, emphasizing role of costume designer in the development and implementation of costume design. May be repeated twice for credit. Concurrently scheduled with course C153F. Letter grading.

C455C. Graphic Representation of Design: Digital Rendering. (4) Studio, four hours. Study of contemporary computer-generated process in rendering costumes, lighting, and scenic elements with combination of hand and digital rendering techniques. Coverage of rendering from life, enhancing final look, and computer-generated renderings to create polished sophisticated presentations for theater, film, and television productions. May be repeated twice for credit. Concurrently scheduled with course C155CG. Letter grading.

C455D. Graphic Representation of Design: Model Making. (2) Studio, four hours. Course: 147A or 147B. Study of model for representation of scenic designs from initial working prototypes to finished color models. Use of a wide variety of materials and techniques for execution of model. Graduate students expected to produce models demonstrating higher level of proficiency and skill. Concurrently scheduled with course C155DG. Letter grading.

C455E. Graphic Representation of Design: Life Drawing. (2) Studio, four hours. Course: 147A or 147B. Study and practice in drawing of human form. May be repeated twice for credit. Concurrently scheduled with course C155EG. Letter grading.

C454A. Sound Design. (4) Lecture/studio, four hours. Study of current professional sound recording, re-recording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C154C. Graduate students expected to produce designs demonstrating higher level of proficiency and skill. Letter grading.

C454B. Sound Design for Musicals. (4) Lecture/studio, four hours. Exploration of sound design for theater and techniques for mixing, reinforcement, and signal processing. Use of delay, equalization, and microphone placement for theater sound reinforcement with focus on mixing musicals. Covers paperwork needed to complete show. Tuning space, equalization, and advanced projects involving programming and mixing on various consoles. May be repeated once for credit. Concurrently scheduled with course C154BG. Letter grading.

C454C. Sound for Film and Television. (4) Course C154B. Letter grading. Requisite: concurrently scheduled with course C154C. Graduate students expected to produce designs demonstrating higher level of proficiency and skill. Letter grading.

C454G. Music Technology for Sound Design. (4) Lecture/studio, four hours. Study of current professional sound recording, re-recording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C154G. Graduate students expected to produce designs demonstrating higher level of proficiency and skill. Letter grading.

C455A. Graphic Representation of Design: Perspective Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Introduction to use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form light, shade, and textures. Graduate students expected to produce drawings demonstrating higher level of proficiency and skill. Concurrently scheduled with course C155AG. Letter grading.

C455B. Graphic Representation of Design: Multimedia Rendering. (2) Studio, four hours. Study and practice of multimedia rendering as they apply to interpretation of scenic, lighting, and costume renderings, with focus on human form in space. Weekly demonstrations of wide variety of art media, including watercolor, markers, pastel, and collage rendering. May be repeated twice for credit. Concurrently scheduled with course C155BG. Letter grading.

C456G. Virtual Reality Rendering for Film. (2) Studio, four hours. Requisites: courses C455C, C455H, C456A, C456B, C456C. Preparation: basic 3D modeling and rendering skills. Students learn how to translate game engine models into Unreal engine environment and utilize this platform as powerful tool for development, presentation, and staging of film and theater set design. Students practice designing and building scenes in Unreal engine, but are also introduced to Zbrush, Blender, Quixel, and other ancillary resources. Concurrently scheduled with course C156G. Letter grading.

457D. Advanced Historical Costume Interpretation and Construction. (4) Lecture/studio, four hours. In-depth costume construction and presentation of one renowned artwork and as intrinsic element of art history to gain expertise in costume and pattern making, while creating half-scale costume inspired by masterwork and to gain familiarity with artist’s life and social milieu. Letter grading.

C459A-459B. Directing for Theater, Film, and Television. (4-4) Lecture, three hours. Limited to graduate theater students. Analyzes and presents specific scenes, of differences and many similarities in directorial approach to same literary material in three media. S/U or letter grading.

460AF-460AW-460AS. Contemporary Issues in Direction. (1–1–1) Discussion, three hours. Designed for graduate students. Discussion of role of director in contemporary professional practice. Review discussion and critique of directing projects. Each course may be repeated for a maximum of 4 units. Letter grading.

462. Advanced Directing. (8 or 12) Studio, 12 or 30 hours. Designed for graduate students. Advanced problems in directing for theater, film, and television. May be repeated for maximum of 24 units. Letter grading.

463. Production Project in Direction for Stage (8 or 12 units). Studio, 24 hours. Designed for graduate students. Creative participation and design of conception and preparation of dramatic work. Letter grading.

472. Production Practice in Theater, Film, Video, and Digital Media. (1 to 8) Studio, three to eight hours. Exploration and laboratory work in various aspects of production and postproduction practice for entertainment media, including theater, film, video, and digital media. May be repeated for a maximum of 24 units. Letter grading.
474. Advanced Projects in Design and Production. (4) Lecture/studio, four hours. Study and practice in preparation and execution of designs for theater, film, video, and entertainment forms. As contributing artistic member of design team, creative responsibilities include designer, technical supervisor, or production manager. May be repeated for maximum of 16 units. Letter grading.

475A. Graduate Design Portfolio Project: Scenic Design. (2) Lecture, four hours; studio, four to eight hours. Preparation: at least six master scenic design courses. Preparation of complete designs and drawings for theatrical, film, operatic, and theoretical productions and assembling of design portfolio and résumé. Information about industry demands and protocol for portfolio presentation and review, with projects prepared under guidance of respective design faculty adviser. Letter grading.

475B. Graduate Design Portfolio Project: Lighting Design. (2) Lecture, four hours; studio, four to eight hours. Preparation: at least six master lighting design courses. Preparation of complete designs and drawings for theatrical, film, operatic, and theoretical productions and assembling of design portfolio and résumé. Information about industry demands and protocol for portfolio presentation and review, with projects prepared under guidance of respective design faculty adviser. Letter grading.

475C. Graduate Design Portfolio Project: Costume Design. (2) Lecture, four hours; studio, four to eight hours. Preparation: at least six master costume design courses. Preparation of complete designs and drawings for theatrical, film, operatic, and theoretical productions and assembling of design portfolio and résumé. Information about industry demands and protocol for portfolio presentation and review, with projects prepared under guidance of respective design faculty adviser. Letter grading.

476A-C. Production Practice in Theater with Emerging Technologies I, II, III. (4-4-4) Studio/laboratory, four to six hours. Collaborative creative and technical development of all aspects of theoretical production incorporating emerging and/or advanced technologies, culminating in rehearsal and public presentation. Offered as series of up to three courses in cases where multiple quarters are needed to prepare production. Concurrently scheduled with course C176A-C176B-C176C. Letter grading.

495A-495B-495C. Practicum and Practice in Teaching Theater. (2-2-2) Seminar, to be arranged; discussion, two hours. Study and practice of teaching theater at university level. Orientation and preparation of graduate (PhD) students who have responsibility to assist in teaching undergraduate courses in department. Discussion of problems common to teaching experience. S/U or letter grading.

498. Professional Internship in Theater, Film, and Television. (4, 8, or 12) Tutorial, to be arranged. Full- or part-time at studio or on professional project. Internship is available in film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled. S/U or letter grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor; department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596A. Directed Individual Studies: Research. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

596B. Directed Individual Studies: Writing. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

596C. Directed Individual Studies: Directing. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

596D. Directed Individual Studies: Design. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

596E. Directed Individual Studies: Acting. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

596F. Directed Individual Studies: Production. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

597. Preparation for PhD Qualifying Examinations in Theater Arts. (2 to 12) Tutorial, to be arranged. Writing of prospectus and three reading lists. May be repeated for credit. S/U grading.

Learning Outcomes
The Individual Field major has the following learning outcomes:
- Development of individualized course of study
- Demonstrated competency in discourse of disparate disciplines on which the major draws
- Completion of capstone project or thesis that synthesizes coursework into a culminating project
- Demonstrated competency in the literature and/or artistic traditions pertinent to chosen course of study

Overview
Highly motivated students in a School of Theater, Film, and Television major who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit.

Undergraduate Major
Individual Field BA in Theater, Film, and Television

Highly motivated students in a School of Theater, Film, and Television major who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit.

The student, in consultation with the faculty adviser, develops an individualized plan for a course of study that either combines two or more fields or creates a wholly new field. This plan cannot replicate any existing UCLA undergraduate majors.

University Studies
Lower-Division Courses

10A. ACE UCLA | Critical Strategies to Achieve Undergraduate Excellence (First- and Second-Year Students). (2) Seminar, two hours. Not open for credit to students with credit for course 10B, 10C, 10D, 10E, 10F; or former course 10. Imparts students with critical strategies to achieve undergraduate excellence at top-tier research institution. Study of research university’s mission, rigor, and expectations of students, as well as its pedagogical implications. Cultivation of formal space on campus where UCLA students learn to engage collaboratively with their diverse community of scholars; to comprehend and apply effective learning strategies and theoretical foundations of college stu-
10F. ACE UCLA | Critical Strategies to Achieve Undergraduate Excellence for Humanities Students. (2) Seminar, two hours. Not open to students who have completed University Studies 10A, 10B, 10C, 10D, 10E, or former course 10. Designed for first-year students. Study of research university’s history, mission, rigors, expectations of students, and pedagogical implications. Cultivation of formal space on campus where UCLA students learn to explore major in humanities and identify transferable skills; to engage collaboratively with their diverse community of scholars; to comprehend and apply effective learning strategies and theoretical foundations of college student development; to navigate complex structure of UCLA; to practice resilience and growth mindset; to think critically about diversity and their identity; and to be fully aware of their value to intellectual fabric of institution as contributors to innovative research and scholarship. P/NP grading.

15A. Collaborative Learning Workshops for Humanities and Social Sciences Majors. (2) Seminar, two hours. Designed for students in First Year Scholars Program (FYSP). Part I of three-part series of collaborative learning and community-building work sessions. Collaborative work spaces and participatory learning environments are integral component of student development. Creates specific and unique space for FYSP scholars to cultivate community and support, as well as develop critical strategies to achieve undergraduate excellence at top-tier institution. Engages students collaboratively with diverse community of scholars; supports their understanding and application of effective learning strategies; guides students in practice growth mindset, navigation of complex structure of UCLA; thinking critically about diversity and their identity, and being fully aware of their value to intellectual fabric of institution as contributors to innovative research and scholarship. P/NP grading.

15B. Collaborative Learning Workshops for Humanities and Social Sciences Majors. (2) Seminar, two hours. Requisite: course 15A. Designed for students in First Year Scholars Program. Workshops are integral component of student learning and development. Continues to cultivate learning communities. Workshops prepare students for second year, as they become more intentionally engaged in academic community, at UCLA and beyond. Workshops foster academic, professional, and personal development of students majoring in humanities and social sciences. Instructors, peer mentors, and campus partners facilitate interactive workshops that help students transition to, engage with, and navigate UCLA as they cultivate their first year at university. P/NP grading.

15C. Collaborative Learning Workshops for Humanities and Social Sciences Majors. (2) Seminar, two hours. Requisite: course 15B. Designed for students in First Year Scholars Program (FYSP). Part III of three-part series of collaborative learning and community-building work sessions. Students work together on ongoing research proposal and project presented at culmination of program. Collaborative work spaces and participatory learning environments are integral component of student development. Creates specific and unique space for FYSP scholars to cultivate community and support, as well as develop critical strategies to achieve undergraduate excellence at top-tier institution. Engages students collaboratively with diverse community of scholars; supports their understanding and application of effective learning strategies; guides students in practice growth mindset, navigation of complex structure of UCLA, thinking critically about diversity and their identity, and being fully aware of their value to intellectual fabric of institution as contributors to innovative research and scholarship. P/NP grading.

30. How to Succeed at UCLA: Retention. (2) Seminar, two hours. Limited to students in Bruin Readmission Program. Designed to provide students who are working toward readmission critical understanding of how they and others arrive at their dismissal status and steps they can take that lead to academic success in future. Examination of research on retention and departure in higher education and both individual and collective strategies for academic success. P/NP grading.

Graduate Course

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

Overview

The professional urban planner works on the creation and management of the urban environment, including its physical, economic, and social elements. Housing, transportation, air and water quality, the preservation of historic communities, and the development of community-level economic and employment programs are some of the tasks undertaken by recent graduates of the Department of Urban Planning.

The department takes pride in its collegial atmosphere. It features a lively mix of students from diverse academic backgrounds, drawn from many foreign countries and from every avenue of American life. It includes many members of racial and ethnic minority groups, and more than half the students are women. Student organizations provide an interesting program of extracurricular activities.

Career Prospects

Graduates have taken positions in local, state, and national governments, and increasingly with nonprofit and private companies whose products and services affect the urban environment. While most UCLA graduates find positions in the U.S., the program offers the opportunity to specialize in development planning abroad, including rural development, and many graduates have found positions in Latin America, Africa, and Asia.

Undergraduate Minor

Urban and Regional Studies Minor

The scale, diversity, balkanized governance, and natural environment of Southern California all contribute to making it an extraordinary natural laboratory for learning about urban and regional issues, whether the focus is on immigration, employment, the built environment, transportation, poverty, natural resources, or a host of other challenges. The Urban and Regional Studies minor offers undergraduate students a means to address some of these issues from an interdisciplinary perspective, giving a balanced mixture of theory, practice, and service learning courses.

Admission

To enter the minor, students must be in good academic standing with an overall grade-point average of 2.0 or better, have completed 90 or more units, and complete either Urban Planning M120 (or Public Affairs M109) or 121 with a grade of C or better. An introductory course in a grade of C or better. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Majors

Master of Urban and Regional Planning

Requirements

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Concurrent Degree Programs

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

- Master of Urban and Regional Planning/Community Health Sciences Master of Public Health
- Master of Urban and Regional Planning/Environmental Health Sciences Master of Public Health
- Master of Urban and Regional Planning/Juris Doctor
- Master of Urban and Regional Planning/Latin American Studies MA
- Master of Urban and Regional Planning/Master of Architecture
- Master of Urban and Regional Planning/Master of Business Administration

Upper-Division Courses

M110. Inequality and Democracy: Analysis and Praxis of Public Problems. (4) (Same as Social Welfare M110.) Lecture, three hours; discussion, one hour. Analysis and praxis of public problems. Taking up case of persistent inequality in liberal democracies, coverage of key frameworks and methodologies for understanding and analyzing poverty and inequality and examination of forms of action. Tense role of government to social movements, that seek to intervene in such problems. Study of problems, programs, policies, and politics in globally interconnected, transnational world, while avoiding analytical divide between global north and global south. Letter grading.

M120. Introduction to Cities and Planning. (4) (Same as Public Affairs M109.) Lecture, three hours; discussion, one hour. Survey of urban history and evolution in U.S., urban social theory, current growth trends,
121. Urban Policy and Planning. (4) Lecture, three hours. Examination of current urban planning and policy issues and debates, such as normative theories of good urban form, metropolitan organization and governance, economic development and growth management, edge cities, spatial mismatch hypothesis, urban poverty, racial/ethnic inequality, gender and urban structure, sustainability, and future of cities. P/NP or letter grading.

M122. Policy, Planning, and Community. (4) (Same as Asian American Studies M108.) Lecture, three hours; field laboratory. Project-oriented methods course on conducting needs assessment in Asian American communities. Geographical information systems to be used to define problems and needs. Letter grading.

129. Special Topics in Urban Policy and Research. (4) Lecture, three hours. Examination of particular composition, and review of (e.g. conflicting portrayals of) environmental planning, housing and community development, international planning and development, land use, or urban design in some depth. Specific topic area to be determined by instructor. May be repeated for credit, with topic change. P/NP or letter grading.

130. Fundamentals of Urban and Regional Economies. (4) (Formerly numbered 185SL.) Lecture, three hours. Introduction to regional economy, with emphasis on Los Angeles. Key economic sectors, labor market opportunities, and implications for decision making. Understanding of economic forces acting on urban areas. Basic concepts related to location choice, agglomeration effects, economies of scale, and specialization of cities and city regions. P/NP or letter grading.

CM137. Southern California Regional Economy. (4) (Same as Labor Studies M180.) Lecture, three hours. Introduction to regional economy, with emphasis on Los Angeles. Key economic sectors, labor market opportunities, and implications for decision making. Understanding of economic forces acting on urban areas. Basic concepts related to location choice, agglomeration effects, economies of scale, and specialization of cities and city regions. P/NP or letter grading.

M140. Issues in Latina/Latino Poverty: Mexican and Central American Voices from Los Angeles. (4) (Same as Chicana/o and Central American Studies M121 and Labor Studies M121.) Lecture, four hours. Examination of key issues of race, ethnicity, gender, disability, and class in Los Angeles, with emphasis on understanding social, economic, and political processes that shape the lives and works in practice and how it might be improved. Letter grading.

M165. Environmentalism: Past, Present, and Future. (4) (Same as Geography M125.) Lecture, three hours; discussion, one hour. Exploration of history and origin of major environmental ideas, movements or countermovements they spawned, and nature of modern environmentalism. Introduction to early ideas of environmentalism, how rise of modern sciences reshaped environmental thought, and how this was later transformed into 19th-century nature of American conservation movements. Review of politics of American environmental thought and contemporary environmental questions as they relate to broader set of questions about natural resources, sustainability, and equity in environmental debate. Exploration of issues in broad context, including global climate change, rise of pandemics, deforestation, and environmental justice impacts of war. Letter grading.

CM166. Global Environment and Development: Problems and Issues. (4) (Same as Geography M127.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Questions of population, resources, and environment. Analysis of global environmental restructuring and its connections to changing organization of production and resulting environmental impacts. Case studies from Asia, Latin America, and U.S. concurrently scheduled with course C266. P/NP or letter grading.

M167. Environmental Justice through Multiple Lenses. (4) (Same as Environment M167 and Public Affairs M166.) Lecture, three hours. Examination of intersection between race, economic class, and environment in U.S., with focus on issues related to social justice. Because environmental inequality is highly complex phenomenon, multidisciplinary and multi-population approach taken, using alternative ways of understanding, interpreting, and taking action. P/NP or letter grading.

M169. Politics of Water. (4) (Same as Public Affairs M159.) Lecture, three hours; discussion, one hour. Access to safe and sustainable water provision is major challenge for governments. Examination of political, economic, and social dimensions of water provision in Asia, Africa, Latin America, and U.S. Includes water and state building, market reforms and globalization, social mobilization, and citizen demand making strategies, role of crisis in citizen claims making. Letter grading.

M171. Planning Issues in Latino/Latino Communities: Preserving and Strengthening Community Assets in Mexican and Salvadoran Los Angeles. (4) (Same as Chicana/o and Central American Studies M122 and Labor Studies M122.) Lecture, four hours. Examination of key issues of race, ethnicity, gender, disability, and class in Los Angeles, with emphasis on understanding social, economic, and political processes that shape the lives and works in practice and how it might be improved. Letter grading.

M164A. Documentary Production for Social Change: Mobility in Los Angeles. (4) (Same as Disability Studies M164A.) Seminar, three hours; fieldwork, three hours. Exploration of documentary filmmaking as catalyst for social change, using daily commute in Los Angeles as case study. Introduction to issues of race, ethnicity, gender, disability, and class in experiences of commuting, access to public transportation, and car-based versus alternative (bike and pedestrian) forms of commuting. Exposure to observational, interview-based, and participatory documentary shooting and editing techniques, as well as social marketing strategies that are vital to documentary production and distribution. Letter grading.

M165A. Documentary Production for Social Change: Mobility in Los Angeles. (4) (Same as Disability Studies M166A.) Seminar, three hours; fieldwork, three hours. Exploration of documentary filmmaking as catalyst for social change, using daily commute in Los Angeles as case study. Introduction to issues of race, ethnicity, gender, disability, and class in experiences of commuting, access to public transportation, and car-based versus alternative (bike and pedestrian) forms of commuting. Exposure to observational, interview-based, and participatory documentary shooting and editing techniques, as well as social marketing strategies that are vital to documentary production and distribution. Letter grading.

M165. Environmentalism: Past, Present, and Future. (4) (Same as Geography M125.) Lecture, three hours; discussion, one hour. Exploration of history and origin of major environmental ideas, movements or countermovements they spawned, and nature of modern environmentalism. Introduction to early ideas of environmentalism, how rise of modern sciences reshaped environmental thought, and how this was later transformed into 19th-century nature of American conservation movements. Review of politics of American environmental thought and contemporary environmental questions as they relate to broader set of questions about natural resources, sustainability, and equity in environmental debate. Exploration of issues in broad context, including global climate change, rise of pandemics, deforestation, and environmental justice impacts of war. Letter grading.

CM166. Global Environment and Development: Problems and Issues. (4) (Same as Geography M127.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Questions of population, resources, and environment. Analysis of global environmental restructuring and its connections to changing organization of production and resulting environmental impacts. Case studies from Asia, Latin America, and U.S. concurrently scheduled with course C266. P/NP or letter grading.

M167. Environmental Justice through Multiple Lenses. (4) (Same as Environment M167 and Public Affairs M166.) Lecture, three hours. Examination of intersection between race, economic class, and environment in U.S., with focus on issues related to social justice. Because environmental inequality is highly complex phenomenon, multidisciplinary and multi-population approach taken, using alternative ways of understanding, interpreting, and taking action. P/NP or letter grading.

M169. Politics of Water. (4) (Same as Public Affairs M159.) Lecture, three hours; discussion, one hour. Access to safe and sustainable water provision is major challenge for governments. Examination of political, economic, and social dimensions of water provision in Asia, Africa, Latin America, and U.S. Includes water and state building, market reforms and globalization, social mobilization, and citizen demand making strategies, role of crisis in citizen claims making. Letter grading.

M171. Planning Issues in Latino/Latino Communities: Preserving and Strengthening Community Assets in Mexican and Salvadoran Los Angeles. (4) (Same as Chicana/o and Central American Studies M122 and Labor Studies M122.) Lecture, four hours. Examination of key issues of race, ethnicity, gender, disability, and class in Los Angeles, with emphasis on understanding social, economic, and political processes that shape the lives and works in practice and how it might be improved. Letter grading.

M164A. Documentary Production for Social Change: Mobility in Los Angeles. (4) (Same as Disability Studies M164A.) Seminar, three hours; fieldwork, three hours. Exploration of documentary filmmaking as catalyst for social change, using daily commute in Los Angeles as case study. Introduction to issues of race, ethnicity, gender, disability, and class in experiences of commuting, access to public transportation, and car-based versus alternative (bike and pedestrian) forms of commuting. Exposure to observational, interview-based, and participatory documentary shooting and editing techniques, as well as social marketing strategies that are vital to documentary production and distribution. Letter grading.

M165A. Documentary Production for Social Change: Mobility in Los Angeles. (4) (Same as Disability Studies M166A.) Seminar, three hours; fieldwork, three hours. Exploration of documentary filmmaking as catalyst for social change, using daily commute in Los Angeles as case study. Introduction to issues of race, ethnicity, gender, disability, and class in experiences of commuting, access to public transportation, and car-based versus alternative (bike and pedestrian) forms of commuting. Exposure to observational, interview-based, and participatory documentary shooting and editing techniques, as well as social marketing strategies that are vital to documentary production and distribution. Letter grading.

M165. Environmentalism: Past, Present, and Future. (4) (Same as Geography M125.) Lecture, three hours; discussion, one hour. Exploration of history and origin of major environmental ideas, movements or countermovements they spawned, and nature of modern environmentalism. Introduction to early ideas of environmentalism, how rise of modern sciences reshaped environmental thought, and how this was later transformed into 19th-century nature of American conservation movements. Review of politics of American environmental thought and contemporary environmental questions as they relate to broader set of questions about natural resources, sustainability, and equity in environmental debate. Exploration of issues in broad context, including global climate change, rise of pandemics, deforestation, and environmental justice impacts of war. Letter grading.

CM166. Global Environment and Development: Problems and Issues. (4) (Same as Geography M127.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Questions of population, resources, and environment. Analysis of global environmental restructuring and its connections to changing organization of production and resulting environmental impacts. Case studies from Asia, Latin America, and U.S. concurrently scheduled with course C266. P/NP or letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SB. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors and department honors programs. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

195. Course in Urban Planning. (4) Tutorial, 12 hours. Limited to junior/senior Urban and Regional Studies minors. Internship in supervised setting in community agency or urban planning setting. Students will develop regular practice with instructors to provide periodic reflection of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

196. Directed Research in Urban Planning. (2 to 8) Tutorial, three hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. CULminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M201. Theories of Architecture. (4) Same as Architecture and Urban Design M201.) Lecture, three hours. Exploration of conceptual and historical structures that shape current issues in architectural theory. Readings in primary texts serve as framework for understanding such theories, and as an intensive inquiry in archetypal tural context. Letter grading.

M202A-B. Land Use. (202A: 3 or 4/202B: 1 or 2) Lecture, three hours. Course 202A is enforced requisite to 202B. Exploration of 21st-century land-use public controls, private practice, and litigation in California from basic planning, zoning, subdivision controls, and official mapping to regional growth management, environmental analysis, and land protection. Concurrently scheduled with Law 286. In Progress (202A) and S/U or letter (202B) grading.

M203. Housing Segregation, Housing Discrimination, and Evolution of Public Policy. (1 to 8) (Same as Law M256E) Seminar, three hours; two field trips. Consideration of selected aspects of housing law and policy, including current federal and state housing subsidies; remedies of housing consumers; impacts of market discrimination against children, racial minorities, and women; and local governmental laws influencing cost and supply, such as anti-discrimination laws and rent control legislation. Catalytic role of economic and community development in expansion of housing supply also considered. In Progress (M203A-203B) and letter (203B) grading.

M204. Research Design and Methods for Social Policy. (4) (Same as Public Policy M218.) Lecture, three hours; outside study, nine hours. Limited to graduate students. Review of research design and consumer and producers of qualitative and quantitative policy research. In first half of course, formal principles of research design; in second half, various data collection methods, analysis, and interpretation, and survey design. Letter grading.

M205A-B. MURP Comprehensive Examination: Applied Planning Research Project I, II. (4–4) Required of all students completing applied planning research project MURP comprehensive exam capstone option. Letter grading. 205A. Seminar, three hours. Guides students through identifying topics, selecting scope of work and memorandum of understanding with clients, completing research design and literature review portions of applied planning research project, and collecting data. 205B. Seminar, three hours; discussion, one hour. Guides students through completion of data collection, analysis, findings, conclusions, and recommendations portions of applied planning research project. Preparation of executive summary and poster synthesizing their work.

M206. Introduction to Geographic Information Systems. (4) Lecture, one hour; laboratory, two hours. Practice-oriented study using Esri/ArcGIS. Survey and overview of spatial database technologies and data analysis, management, and visualization. Students are guided through series of exercises and assignments to build higher levels of spatial understanding and experience. Use of laboratory exercises, book exercises, and project to help illuminate principles and teach useful skills. Discussion of three major themes: spatial analysis, data management, design and visualization. Letter grading.

M207. Applied Microeconomics for Urban Planning. (4) Lecture, three hours; laboratory, 90 minutes. Preparation: passing score on microeconomics examination given first day of class. Practical use of economic concepts in urban planning. Topics include: theory and measurement of externalities, income distribution, and economic growth. Topics include: behavior, efficiency, public goods and free rider problem, environmental pricing, public service pricing, and conflicts between individual and collective rationality. Letter grading.

M208A. Introduction to Luskin PhD Research. (4) (Formerly numbered 207A.) (Same as Social Welfare M247A) Lecture, two hours; outside study, five to 10 hours. Required of first-year PhD students. Introduction to design and execution of public affairs research; exploration of subfields of public affairs scholarship and approaches to research on contemporary topics in social welfare and urban planning. Preparation and filing of PhD program of study. Letter grading.

M208B. Logic of Inference and Causation. (4) (Formerly numbered 207B.) (Same as Social Welfare M248C.) Seminar, three hours. Required: courses M208A, M208D. Required in first or second year of PhD program. Development of researchable hypotheses and accompanying research design strategies, understanding of causal inquiry, review of critiques of traditional methods and of alternative approaches to scholarship. Letter grading.

M209C. Applied Research Design: Dissertation and Thesis Proposal. (4) (Formerly numbered 208C.) (Same as Social Welfare M252.) Seminar, three hours. Required of all PhD students who have passed their field examinations but have not yet advanced to candidacy and all MURP students completing their thesis capstone option. Advanced research design course that guides students in selecting problem/question to study, reviewing previous research on problem/question, framing specific research questions/hypotheses, and selecting methodology and plan for testing hypotheses. May be repeated for credit. S/U or letter grading.

M210D. Introduction to Qualitative Research. (4) (Same as Social Welfare M249B.) Lecture, three hours; outside study, nine hours. Required: course M208A. Required in first or second year of PhD program. Introduction to philosophy, theories, logic, design, and practice of qualitative research by studying its varied methodologies. Letter grading.

M209A. Special Topics in Planning Theory. (4) Lecture, three hours. Topics in planning theory selected by faculty members. May be repeated for credit. S/U or letter grading.

M210A. Special Topics in Public Affairs. (4) (Same as Public Policy M291C and Social Welfare M290.) Seminar, three hours; outside study, nine hours. Advanced seminar on emerging issues across public policy, social welfare, and planning. May be repeated for credit. S/U or letter grading.

M210B. Comparative Perspective on States, Markets, and Civil Society. (4) (Same as Public Policy M247B and Social Welfare M290X.) Lecture, two and outside study. Governance and managing societal problems, such as climate change, poverty, migration, security, mobility, pollution, or trade relations. Contemporary governance is complex set of laws, rules, and regulations that and responsibilities of three institutional complexes of modern societies (state, market, and civil society), interests that guide them, and legitimacy and resources they command. Actors often across systemic, jurisdictional, and national boundaries; their relationships can be cooperative, neutral, or fraught with conflict, and governance outcomes can vary significantly. Their dynamics involve positive and negative changes and, consequently, require significant governance readiness. Lectures, debates, in-class exercises, and student presentations. Exploration of several issues in more detail, e.g., trade, security, democracy, crisis management, governance innovation, and specific policy fields such as infrastructure or global finance. S/U or letter grading.

M211. Law and Quality of Urban Life. (4) Lecture, three hours. Introduction to law as urban system, directed primarily toward those interested in intersection of law and policy: broad array of urban issues examined, as is law as part of urban cause and cure of urban problems. Examination of law as changing process rather than collection of principles, so that students develop facility to interact with law and lawyers in positive and forceful manner. S/U or letter grading.

M212. International/Comparative Planning Workshop. (2 or 4) Seminar, three hours: field trips, five to 10 days. Topics of planning and policy in various international or domestic sites. Topics may include urban design, housing development, and/or physical planning. May be repeated for credit. S/U or letter grading.

M213. Urban Data Science. (4) Lecture, three hours. Preparation: basic Python programming experience or introductory Python course. New data sources are potential goldmine for urban planners and policy makers. But sometimes they are large, messy, or awkward to access, and often they are all of these things. Development of skills in scraping, processing, and managing urban data, and using tools such as natural lan-
guage processing, geospatial analysis, and machine learning. Use of examples from transit, housing, and equity planning, and building of competence in open-source tools such as Python and SQL. Consideration also of limits to data science, and biases and pitfalls that big data can entail. Letter grading.

214. Neighborhood Analysis. (4) Lecture, two hours; laboratory, one hour. Introduction to GIS and statistical and cartographic software useful but not necessary. Methods-oriented studio course, with focus on developing data and analytical skills required to profile and analyze neighborhood regions. Students develop quantitative neighborhood profiles that can be used in community planning and at other geographical levels (e.g., cities, counties, and regions). Students gain professional experience and produce reports that fit larger community. Data management and analysis, including accessing, cleaning, and presenting data. Letter grading.

M216. Current Issues in Food Studies. (4) Same as Community Studies M217.) Seminar, three hours; outside hours. Limited to Food Studies Graduate Certificate Program students. Food is complex subject given that production, procurement, preparation, consumption, and exchange of edible matter is biologically vital to human growth, development, and function and critical to many aspects of society and culture. Food studies is growing cross-disciplinary field of research, teaching, and policy that encompasses and draws from cultural anthropology and geography, food law and policy, urban planning, sociology, literature, history, public health, nutrition, environmental science, molecular biology, and statistics. Students learn how to use geographic information systems (GIS) to inform practice, advocacy, and policy work at local, state, national, and international levels. Letter grading.

222A. Introduction to Planning History and Theory. (4) Lecture, three hours; discussion, 90 minutes. Required of first-year MURP students, typically in Fall Quarter. Includes historical examples of how students who have not completed comparable graduate course in planning history and theory. Exploration of planning thought and practice over time, leading authors and key issues in field of planning, traditional and insurgent histories of planning, and alternative approaches to planning for multiple and pluralistic publics. Letter grading.

222B. Advanced Planning Theory: Production of Space. (4) Lecture, three hours; outside (4) hours. Designed for first-year PhD students. Major ideas and theories of planning that have influenced its development from early-19th century to present. Letter grading.

223. Critical Race Studies. (4) Lecture, three hours. Focus on foundational and contemporary critical race theory (CRT), and other theoretical works focusing on racism and racialization, as applied to public policy, social welfare, and urban planning. Review of causes and symptoms of structural racism and the racist ideologies that inform, and are influenced by, these three fields. Students are expected to be prepared and ready to engage in class by completing readings, developing key theoretical reflection, and keeping up with current events related to course topics. Letter grading.

224. Racial Justice and Planning. (4) Lecture, three hours. Addresses problem of advancing racial justice in and through planning research and practice. What key theories that explain racism and justice in planning are; how histories of unjust planning thought and practice have contributed to entrenched racial inequalities in and around cities; what some promising practices for confronting and addressing historical and present-day racial injustice are; and how intersect- ional understanding and approach can be embraced by planners taking on the highly unequal, politically fractured, and charged urban and regional landscapes. Addresses these questions of planning through modules examining topics such as abolition and policing, climate and environmental justice, housing and infrastructure; spatial planning and urban design; education reform; immigrant incorporation; and public health. Letter grading.

226. Visual Communication Skills. (2) Five-week course. Lecture, two hours; laboratory, one hour. Greater emphasis on graphic presentation and visual communication to educate stakeholders, advocate for change, and encourage participation in planning pro- cess in recent years, in both public and private sector. Visual communication requires analytic skills and stra- tegic thinking, strong foundation in design theory, and technical skills in computer programs. Introduction to Adobe InDesign and Illustrator and foundation in design theory and communication. How to use graphic design presentation programs to create attractive and powerful planning materials and reports, design principles to communicate ideas in clear, succinct, and engaging manner, and when and how to use graphic materials to support verbal presentations or written reports. Letter grading.

229. Special Topics in Planning Methods. (4) Lecture, three hours. Topics in planning methodology selected by faculty members. May be repeated for credit. S/U or letter grading.

M230. Introduction to Regional Planning. (4) Same as Public Policy M241.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on rela- tionships between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space. Letter grading.

M231. Global Public Affairs: Governing in Interconnected World. (4) Same as Public Policy M228B and Social Welfare M215.) Lecture, three hours; outside work, nine hours. Conceptually, focus on interplay be- tween three major institutional complexes of modern, globalization, and large scale social and political organizations that operate within them: state, market, and civil society. Study moves between abstract theory and concrete exam- ples, offers sense of where these institutions and or- ganizations have come from, and helps chart their present trajectories. From perspective of governance, social movements and configurations of institutions and organizations to address today’s challenges. S/U or letter grading.

232. Disaster Management and Response. (4) Lecture, three hours. Through readings and presentations, examination of disaster management and response in both U.S. and developing countries. Exploration of how disaster impacts and risk reduction both relate to economic, vulnerability, and political factors, in addi- tion to the complex roles and responsibilities of governments and organizations to focus on distinct disaster contexts and themes as set out in reading and weekly sessions. Letter grading.

233. Political Economy of Development. (4) Formerly numbered M233.) Lecture, three hours. Intro- duction to new approaches in urban studies, basic concepts and analytical approaches of urban political economy, with major emphasis on American urban problems and restructuring of modern metropolises. Topics include historical geography of urbanization, development and transformation of urban spatial structure, suburbanization and metropolitan political fragmentation, urban fiscal crisis, and role of urban so- cial movements. Letter grading.

M234A. Development Theory. (4) Same as Geography M229A.) Lecture, three hours. Review of basic literature and schools of thought on development theory through analysis of cases of colonization, co- lonialism, capitalism, and socialism on various urban and rural social and economic structures in Third World. Presentation, through evaluation of theoretical writings and case studies, of complexity and diversity of developing countries. Emphasis on linkages be- tween policy and rural and urban impacts. Gives stu- dents important background for courses M234B, M234C, and many other planning courses addressing Third World issues. Letter grading.

M234B. Ecological Issues in Planning. (4) Same as Geography M229B.) Lecture, three hours. Recommended preparation: course M266. Science and poli- tics of modern environment, in light of transformations inherent in global change, including how to address these questions in ways that go be- yond green consumerism and bifurcation of wild, eco- logical, and human environments. American environ-
mentalism has become dominant model for many conservation practices. Informed by Muirist model of
informed by Muirist model of mentalism has become dominant model for many
inflationary growth, development, and many others can be skeptical of both in 21st century. Letter grading.

235A. Urbanization in Developing World. (4) Lecture, three hours. Course 235A is not prerequisite to
questions of urbanization and planning in low- and middle-income countries. Case studies from Latin America, Africa, and Asia. Lectures, student presentations, and policy debates. Letter grading.

235B. Civil Society, Nongovernmental Organizations, and Environmental Movements. (4) Lecture, three hours. Questions of civil society, nongovernmental organizations (NGOs), and social movements in low- and middle-income countries. Case studies from Latin America, Africa, and Asia. Lectures, student presentations, and policy debates. Letter grading.

236A. Theories of Regional Economic Development. (4) Same as Geography M230A and Public Policy M240L. Lecture, three hours; discussion, one hour. Examination of theories of location of economic activity, trade, and other forms of contact between regions, and industrial change. Focus on how experiences with bureaucracies, bureaucrats shape their jobs, and experiences of people who interact with bureaucracies tend voluntarily or involuntarily.

242. Poverty and Inequality. (4) Lecture, three hours. Examination of relationship between urbanization and spatial inequality in U.S.—spatial dynamics of urban growth, levels and causes of spatial inequality, and implications of spatial inequality for low-income communities. Topics include poverty, residential segregation, immigrant neighborhoods, spatial disparities in access to opportunities, housing mobility, neighborhood health and safety, transportation, and social cohesion. Analysis of role of policies in promoting and/or reducing spatial inequalities. Letter grading.

243. Urban Futures: Space, Ecology, Society. (4) Lecture, three hours. Urban social and ecological changes are intertwined and coproduced. Inquiry into how we can better understand and intervene in this critical relationship, in global context of technological change, ecological crises, and inequality, rethinking planned and unplanned societies. Examination of big problems, and big ideas and big plans that may be necessary to address them as well as what enables large-scale urban environmental projects to be conceived and implemented. Letter grading.

244. Urban Poverty and Planning. (4) Lecture, three hours. Examination of determinants of urban poverty, with emphasis on urban poverty in U.S. and on geographical dimensions of poverty and planning interventions that contribute to poverty reduction. Topics include relationship between poverty and human and social capital, demographic change, low-wage labor market, spatial concentration of poor, residential segregation, and social policy. Letter grading.

245. Urban Public Finance. (4) Lecture, three hours. Requisites: courses 207, 220A. Theory and practice of urban public finance, with emphasis on methods used to fund public infrastructure. Topics include fiscal impact analysis of real estate development, effects of taxes on land-use decisions, benefits assessment to

247. Planning for Multiple Publics. (4) Lecture, three hours. Exploration of planning needs of various social groups in urban settings, using existing literature and research studies to develop the mechanisms of planning for multiple publics. Analysis of communities in Los Angeles metropolitan area to gain insights into practical, theoretical, and methodological problems of planning for multiple publics. Generally taken in first year. S/U or letter grading.

249. Special Topics in Transportation Policy and Planning. (4) Lecture, three hours. Topics in transpor-
tation policy and planning selected by faculty members. May be repeated for credit. S/U or letter grading.

250. Transportation, Land Use, and Urban Form. (4) Same as Public Policy M220. Lecture, three hours. Historical evolution of urban form and transportation systems, intracity, intercity, and regional, and state government in historical and institutional context: organization, finance, intergovernmental relations, role of judiciary, public services, lawmaking, citizen participation through initiatives and referenda, and government tort liability. Letter grading.

251. Parking and City. (4) Lecture, three hours. Requisites: course 207. Parking is misunderstood link between transportation and land use. Transportation engi-
evines typically arise when planning for parking is at end of most trips, while urban planners plan for parking as transportation issue that engineers must study. No profession is intellectually responsible for parking and everyone interacts with parking. Letter grading.

252. Transportation and Land Use: Transportation and Urban Design Studio. (4) Studio, three hours. Students of different backgrounds and interests collaborate, and individually propose solutions for actual transportation planning and urban design problem. Course simulates real-world professional planning project of type that students might be assigned if working for public agencies. Students acquire ability to collect and synthesize evidence typically marshaled by transportation planning and urban design professionals, urban and site analysis capabilities, design and physical planning skills, and data analysis and design presentation and re-presentation abilities. Letter grading.

253. Travel Behavior Analysis. (4) Same as Civil Engineering M236B and Public Policy M240L. Lecture, three hours. Requisites: courses 207 and 220B, or Public Policy 201 or M201A, and 203. Descriptions of travel patterns in metropolitan areas, recent trends and innovations into travel forecasting methods, trip generation, trip distribution, mode split traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis. Letter grading.

254. Bicycle and Pedestrian Planning. (4) Lecture, three hours. Walking and bicycling are essential components of sustainable transportation systems. In response to growing concerns about access, safety, and livability, emphasis is placed on transportation planning and pedestrian and bicycle transportation. Exploration of field’s relationship to land use, transportation planning, public health, and environment. Detailed knowledge provided of various bicycle and pedestrian facilities and their appropriate contexts. Examination of bicycle
864 / Urban Planning

and pedestrian planning in context of overall street design. Essential components of bicycle and pedestrian planning, including policies, programs, funding, and advocacy. Focus on development of and out-of-class planning projects. Letter grading.

M255. Shared Mobility Policy and Planning. (4) (Same as Public Policy M244.) Lecture, three hours. Introduction to planning, analysis, and management of shared mobility services in particular focus public transit. Overview of shared mobility policy and planning context; introduction to transportation planning and project evaluation processes; high-speed rail and airports and aviation; public transit policy and planning, including performance evaluation and route planning; taxis and ADA paratransit, ride-hailing, car-, bike-, and scooter-share; implications of vehicle automation for shared mobility in the years ahead. Letter grading.

M256. Transportation Economics, Finance, and Policy. (4) (Same as Public Policy M222.) Lecture, three hours. Overview of transportation finance and economic consequences of equity and in transport finance; historical evolution of highway and transit finance; current issues in highway finance; private participation in road finance, toll roads, road costs and tolls, congestion pricing; current issues in transit finance; transit fare and subsidy policies, contracting and privatization of transit services. Letter grading.

M257. Transportation and Urban Economics. (4) Lecture, three hours. Examination of equity issues related to urban transportation, with focus on complex relationships among urban spatial structure, transportation (travel patterns) and transportation investments in urban economics. Role of transportation in improving economic outcomes for low-income and minority households and communities. Letter grading.

M258. Transportation and Climate Change. (Same as Applied Policy M223.) Lecture, three hours. How to reduce greenhouse gas emissions from transportation. Critical analysis of policies to improve fuel economy, promote electric vehicles, and reduce vehicle travel. Effects of transport and the development of alternative transportation systems. Analytical methods to quantify carbon emissions and estimate emission reductions. Focus on climate change, but consideration of other environmental consequences of transportation and across low and middle income countries. Examination of similarities and distinctions between relevant water access issues in both contexts. To date, water resources planning has been devoted almost exclusively to surface water supply and delivery systems. Focus here on social, political, and economic drivers of access, inequality of access, and related conflicts. Water resource governance issues primarily considered at subnational, city, and household scales. S/U or letter grading.

264. Environmental Law. (4 or 6) Lecture, three or four hours. Examination of federal and environmental law related to transportation. From environmental regulations that limit pollution, to strategies and allocation of primary responsibility for various environmental decisions. Focus on air pollution and Clean Air Act as means of illustrating policy issues underlying federal law. Concurrently scheduled with Law 290. S/U or letter grading.

264A-264B. Environmental Law. (264A: 3 or 4/264B: 1 or 2) Lecture, three hours. Course 264A is enforced requisites to 264B. Examination of principles of environmental law through analysis of various legal issues and public policy. Legal consequences of public decision-making, and knowledge about ways to frame development, and transportation policy and planning issues under federal law. Concurrently scheduled with Law 290. In Progress (264A) and S/U or letter (264B) grading.

M265. Environmental Economics: Urban and Regional. (4) Lecture, three hours. Reading-intensive exploration of urban and regional economic issues. Emphasis on problems related to urban and regional economic development and the management of land use. Topics include: economic growth and development, and transportation policy and planning issues under federal law. Concurrently scheduled with course CM172. Letter grading.

M272. Introduction to Market-Rate Real Estate Development and Finance. (4) (Same as Architecture and Urban Design M272.) Lecture/seminar, three hours. Studio, two hours; outside study, eight hours. Course 220A. Recommended for first-year students in community development and urban design, and urban development areas of concentration. Introduction to real estate development law process specifically geared toward students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects involve integrated development process with exposure to design solutions that are interactively modified to meet efficient feasibility tests. S/U or letter grading.

272B. Advanced Real Estate Studio. (4) Studio, three hours. Lecture, three hours. Course 220B. Study combines disciplines of planning, urban design, construction, real estate finance and investment, and property operations and management. Students learn about the departmental and regulatory structure of the real estate market, and the development of the Capital Markets. Letter grading.

M273. Site Planning. (4) Lecture, three hours. Reading-intensive exploration of planning, public policy, and real estate development. Knowledge about ways to frame development, and the management of land use. Topics include: economic growth and development, and transportation policy and planning issues under federal law. Concurrently scheduled with course CM172. Letter grading.

273. Site Planning. (4) Lecture, three hours; laboratory, 90 minutes. Lecture: two hours; discussion, 90 minutes; one field trip. Requisites: course 220A. Recommended for first-year students in community development and urban design, and urban development areas of concentration. Introduction to real estate development law process specifically geared toward students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects involve integrated development process with exposure to design solutions that are interactively modified to meet efficient feasibility tests. S/U or letter grading.

M275. Community Development and Housing Policies: Roles of State, City, and Nonprofits. (4) (Same as Public Policy M243 and Social Welfare M290U.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of role of community development, and the management of land use. Topics include: economic growth and development, and transportation policy and planning issues under federal law. Concurrently scheduled with course CM172. Letter grading.

276A-276B. Urban Housing. (1 to 8 each) (Same as Law M287.) Lecture, three hours. Course 276A is enforced requisite to 276B. Examination of past 40 years of federal and state programs to stem urban decline and improve housing in U.S.; comparison and

278. More Jobs, Better Jobs: Work and Policy. (4) Lecture, three hours. Examination of how labor markets work and what can be done to help them work better, with focus on U.S. Particular emphasis on low-wage, low-skill workers and marginalized groups, such as inner-city people of color and immigrants. Analyses of how urban labor markets work with discussions of policy options for making them work better and range of solutions for improving job creation, workforce training and job ladder creation, union and community organizing, and immigration reform. Examination of power and economic inequality and how to make changes. Letter grading.

279. Seminar: Public Space. (4) Seminar, three hours. Investigation of changes in production, consumption, design, and meaning of public space and analysis of social, political, economic, and cultural factors that lie behind them. Letter grading.

281. Introduction to History of Built Environment in U.S. (4) Lecture, two hours; discussion, one hour. Introduction to history of urban design and its development in different cultural contexts and regions. Letter grading.

282. Urban Form, Paradigms, Applications. (4) Lecture, three hours. Discussion and evaluation of the philosophical bases, ideologies, and paradigms of urban design in last century; examination of how these have refocused on built environment of cities. Letter grading.

283. Community Development, Organizing, and Engagement. (4) Lecture, three hours. Examination of theory and practice of community development, organizing, and engagement. Understanding of multiple dimensions of community development (physical, economic, political, social) and how they interact, as well as major debates about community development strategies. Focus on empowerment strategy in disadvantaged and marginalized communities, and relationship of community and worker organizing to broader movements for social change. Consideration of various approaches to community participation and engagement, and struggles over power and inclusion within these processes. Examination of relations between community development and enrollment. Letter grading.

284. Looking at Los Angeles. (4) Lecture, three hours. Introduction to history and physical form of Los Angeles, with emphasis on understanding social, economic, and political issues in development of Los Angeles. Concurrently scheduled with course C184. Letter grading.

285. Built Environment and Health. (4) Formerly numbered 285. Lecture, three hours. Exploration of important linkages between urban-biobuilt environment and health. Focus on physical, urban planning, and community-based approaches through theory and series of case studies. Understanding of these linkages is used to propose ecological solutions to issues at nexus of built environment and public health. May be concurrently scheduled with course CM11.$ Letter grading.

286. Politics, Power, and Philanthropy. (4) Seminar, three hours; outside study, nine hours. Use of political economics perspective to analyze forces that have shaped rise and characteristics of nonprofit sector and its constituent elements. Examination of social history of nonprofit sector in U.S. Exploration of legal and policy environments and distinct organizational forms. Comparative perspective between U.S. and other countries. S/U or letter grading.

288. Sprawl and Smart Growth. (4) Lecture, three hours. Suburbs are not new, but metropolitan areas in U.S. and overseas have grown rapidly at their edges in ways that many consider problem-plagued. Discussion of causes and impacts of sprawl as it relates to smart growth. Letter grading.

292. Elements of Urban Design. (4) Seminar, three hours. Introduction of basic knowledge of elements and methods of urban design. Multidisciplinary approach leading to understanding of political, socioeconomic, and network of urban systems and its dynamic interrelations. S/U or letter grading.

293. Politics, Ideology, and Design. (4) Seminar, three hours. Exploration of cultural and political context of architecture and planning work. Examination of theory and practice from variety of perspectives applied to set of varied physical environments and to set of current spatialized concepts. Consideration of theoretical propositions that are shaping present urban and architectural debate and concrete cases studies where politics and ideology shape design process. Letter grading.

294. Housing in Developing Countries: Policy Objectives and Options. (4) Lecture, three hours. Examination of relevance of public policies and their intended and unintended effects on housing demand and supply in developing countries. How definition of housing problems, and scope of solutions, has changed over time. Critical assessment of some key solutions that have been tried in past, their advantages, shortcomings, and resultant trade-offs, and likely directions for future housing policy. Letter grading.

295. Introduction to Urban Humanities. (4) Lecture, three hours; studio, six hours. Core introduction to urban humanities. Analytical and descriptive methods of humanities paired with speculative and projective methods of architectural and urban design to better understand contemporary state of human environment. Focus on Los Angeles, with concepts seminar, methods laboratory, projects studio, and site visit components. Offered in summer only. S/U or letter grading.

296. Housing Policy and Planning. (4) Seminar, three hours. Study of housing policy and planning in the U.S. and California given rapid changes in state, with consideration of experiences from other states and countries and to what extent they are relevant here. Social policies likely impact housing, such as social housing, rent control, and housing finance, issues of household formation, housing supply, housing sub-markets, and gentrification, as well as planning processes related to housing and Affirmatively Furthering Fair Housing. Letter grading.

297. Current Issues in Urban Planning. (1 to 4) Seminar, three hours. Current issues in urban planning selected by students in conjunction with faculty member. May be repeated for credit. S/U grading.

297B. Current Issues in Public Affairs. (2) Seminar, three hours. Current issues in urban planning selected by students in conjunction with faculty member. May be repeated for credit. S/U grading.

297F. Career Planning and Management. (2) Seminar, three hours. Topics in newly emerging planning issues such as role of cutting-edge technology, innovative policies, and experimental programs. May be repeated for credit. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, one hour. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

390. Joint Planning/Architecture Studio. (4) Seminar, three hours. Topics in newly emerging planning issues such as role of cutting-edge technology, innovative policies, and experimental programs. May be repeated for credit. Letter grading.

496. Field Projects. (4) Tutorial, four hours. May not be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, one hour; discussion, one hour; studio, four hours. Opportunity to work on joint planning/architecture project for client. Outside speakers; field trips. Examples of past projects include third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; with residing in Los Angeles public housing developments. S/U or letter grading.

548. Field Projects. (4) Tutorial, four hours. May not be repeated for credit. S/U grading.

549. Field Projects. (4) Tutorial, four hours. May not be repeated for credit. S/U grading.

Mark S. Litwin, MD, MPH, FACS, Chair

Overview
The fundamental goal of the Department of Urology is to teach medical students the general principles of diagnosis and management in diseases of the genitourinary tract. Urology encompasses a wide scope of human illness, including conditions that are congenital and acquired, pediatric and adult, male and female, malignant and benign. The department functions to acquaint students with the skills necessary to manage these conditions in the initial stages and over the long term.

Instruction spans all four years of the undergraduate medical school curriculum but is concentrated during the clinical rotations. Students spend two weeks on the urology service during the third year and may return for an additional three-week elective rotation during the fourth year. The clinical experience includes time spent in the faculty and resident clinics, on ward rounds, and in didactic conferences that cover general urology, urological subspecialties, uropathology, and uroradiology. Urology teaching settings include the Reagan UCLA, Harbor-UCLA, Olive View-UCLA, UCLA Santa Monica, and West Los Angeles VA medical centers.

For more details on the Department of Urology and courses offered, see the department website.

Urology

Lower-Division Courses
19. Fiat Lux Freshman Seminars. (1) Seminar; one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work); three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Course
199. Directed Research in Urology. (2 to 8) Tutorial, four hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Overview
The Visual and Performing Arts Education minor is an interdisciplinary and interdepartmental series of courses designed to introduce students to the field of arts education for multiple publics in general and specifically in relationship to the K-12 public school system; introduce students to the profession of the teaching artist and to a broad range of careers in the arts, including K-12 teaching, community arts education, museum education, creative arts therapies, and arts advocacy and to a variety of arts-related programs and cultural agencies, including community arts centers, museums, after-school programs, and nonprofit arts institutions; expand the ongoing dialogue and interaction between UCLA, extended Los Angeles community, K-12 public school system, and students in the arts; extend the School of the Arts and Architecture commitment to UCLA and community partnerships by linking teaching and research with undergraduate education, civic engagement, and support experiential learning opportunities that address issues of educational equity and social justice; and conduct research on the transformative potential for the arts to positively impact society and evaluate best practices in arts education.

Undergraduate Minor

Visual and Performing Arts Education Minor

The Visual and Performing Arts Education minor is intended to supplement the education of undergraduate students enrolled in the Architectural Studies, Art, Art History, Dance, Design/Media Arts, Ethnomusicology, Music, Theater, and World Arts and Cultures majors.

Admission
To apply to the minor, students must have completed at least 50 percent of the lower-division requirements of their specific majors and Arts Education M102 with a grade of B or better, be in good academic standing with an overall grade-point average of at least 2.7, and submit a minor application, which includes a concentration proposal to be developed in consultation with the Visual and Performing Arts Education director.

The Minor

Required Courses (28 to 32 units with a minimum of 24 upper-division units): (1) Core and capstone sequence requirement: Arts Education M102, M192, M192XP (Arts Education M192 and M192XP include a guided teaching experience), (2) arts education requirement: two courses selected from Arts Education 20, 101, 103, 105, 195 (minimum units), 197 (minimum units), (3) one upper-division education course (list of recommended courses available from the Arts Education program office or the school Office of Student Services), and (4) one upper-division elective course (minimum units) selected from arts education or, by petition, an arts education related course (list of recommended courses available from the Arts Education program office or the school Office of Student Services).

Policies
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.
Arts Education

Lower-Division Courses

19. Flat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

20. Introduction to Community Engagement through Arts. (5) Lecture, three hours; discussion, one hour; outside study, 11 hours. Introduction to fields of community engagement and arts education informed by philosophies of progressive education and social justice movements. By looking at community engagement as issue of equity and social justice, examination of basic theories of creativity, artistic development, and community partnership, and history, philosophies, politics, and sociocultural trends of community engagement in American society. Attendance at UCLA arts presentations and introduction to creative process. Readings and discussions to understand community engagement and arts education as crucial elements of comprehensive education, with emphasis on writing process, including regular writing assignments that require students to read, analyze, critique, and evaluate community arts practices and arts education scholarship. P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for maximum of 8 units. Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP or letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week. Four-year-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

Upper-Division Courses

101. Selected Topics in Arts Education. (4) Lecture, three hours; outside study, nine hours. Selected topics in arts education explored through variety of approaches. May include community projects, guided teaching experiences, studio and/or fieldwork, readings, discussion, research papers, and oral presentations. Topics announced in advance. May be repeated for credit. P/NP grading.

102. Introduction to Arts Education for Multiple Publics: Theory and Practice. (4) (Same as Education M142.) Seminar, three hours; outside study, nine hours. Introductory course with focus on arts education for multiple publics in inner-city settings. Study of core issues in arts education, creativity, and social justice as students develop, implement, and assess original syllabi, lesson plans, and community learning projects for multiple publics in inner-city schools and arts organizations. Collaboration with partner schools in planning, teaching, and evaluation of arts education programs in dance, music, theater, and visual arts. P/NP or letter grading.

103. Socially Engaged Pedagogy in Arts. (4) Lecture, three hours; outside study, nine hours. Students are in contact and conversation with active community-based artists and youth workers regularly utilizing socially engaged pedagogy and arts education in core classes, principles, and practices. Based on readings and investigations, students research and write one case study on one particular arts site that is utilizing socially engaged pedagogies and art-making strategies. Theoretical and experiential components provided for students from all arts disciplines to explore tactics and strategy of socially engaged pedagogy and arts practice through variety of approaches that may include readings, visual and audio documentation, discussion, research papers, oral presentations, and relevant guest speakers. P/NP or letter grading.

105. Arts Programs in Correctional Institutions: History, Theory, and Practice. (4) Lecture, three hours; outside study, nine hours. Examination of attitudes of prison and probation toward utilizing artists working in prison, political figures, and community while critically engaging with consequences of correctional environment outside influence of arts as role model for inspiration and discipline. Seminars will be in correctional institutions explored through variety of approaches that may include readings, visual and audio documentation, discussion, research papers, oral presentations, and relevant guest speakers. P/NP or letter grading.

107. Visual Arts Methods for Teaching Artist. (4) Lecture, three hours; discussion, one hour. Recommended prerequisite: experience in specific art form. Enrollment by consent of instructor. Methodological approach to teaching visual arts specifically in K-12 setting. Emphasis on strategies for teaching in hybrid settings, inclusive of management strategies, evaluation, and repertoire development. Exploration through variety of approaches may include community projects, performance, guided teaching experiences, studio and/or fieldwork, readings, discussion, and oral presentations. P/NP or letter grading.

108. Performing Arts Methods for Teaching Artist. (4) Lecture, three hours; discussion, one hour. Recommended prerequisite: experience in specific art form. Enrollment by consent of instructor. Methodological approach to teaching performing arts specifically in K-12 setting. Emphasis on strategies for teaching in hybrid settings, inclusive of management strategies, evaluation, and repertoire development. Exploration through variety of approaches may include community projects, performance, guided teaching experiences, studio and/or fieldwork, readings, discussion, and oral presentations. P/NP or letter grading.

109. Design/Media Arts Methods for Teaching Artist. (4) Lecture, three hours; discussion, one hour. Recommended prerequisite: experience in specific art form. Enrollment by consent of instructor. Methodological approach to teaching design/media arts specifically in K-12 setting. Emphasis on strategies for teaching in hybrid settings, inclusive of management strategies, evaluation, and repertoire development. Exploration through variety of approaches may include community projects, performance, guided teaching experiences, studio and/or fieldwork, readings, discussion, and oral presentations. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for credit. P/NP or letter grading.

M102. Introduction to Arts Education for Multiple Publics: Theory and Practice. (4) (Same as Education M142.) Seminar, three hours; outside study, nine hours. Introductory course with focus on arts education for multiple publics in inner-city settings. Study of core issues in arts education, creativity, and social justice as students develop, implement, and assess original syllabi, lesson plans, and community learning projects for multiple publics in inner-city schools and arts organizations. Collaboration with partner schools in planning, teaching, and evaluation of arts education programs in dance, music, theater, and visual arts. P/NP or letter grading.

195. Community Internships in Arts Education. (2 to 4) Tutorial, one hour; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in supervised setting in K-12 schools or community arts organizations. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

197. Individual Studies in Arts Education. (2 to 4) Tutorial, to be arranged. Preparation: 3.0 grade-point average in major. Limited to juniors/seniors in Visual and Performing Arts Education minor and/or arts education teaching sequence. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. Letter grading.

World Arts and Cultures/Dance / 867
Overview

Defined by a dynamic blend of theory and practice, the Department of World Arts and Culture/Dance (WAC/D) is led by a renowned faculty of scholars, activists, curators, filmmakers, and choreographers dedicated to critical cross-cultural analysis and making. The department is the place to make dances, explore digital media, curate exhibitions, become an arts activist, and develop scholarly expertise in culture and the arts. Multiple disciplines and artistic approaches are used to encourage students to position their work within broad social contexts.

In the World Arts and Cultures BA arts activism, visual cultures, and critical ethnographies are emphasized. The Dance BA integrates composition, training, and improvisation, while challenging students to locate dance politically, culturally, and historically. The MFA in Choreographic Inquiry promotes adventurous choreographic inquiry and engages with global discourses around the body and performance. The MA/PhD programs in culture and performance address theories of corporeality, performance, visuality, and culture, and offer interdisciplinary training that fosters independent research. The Art and Global Health Center enables undergraduate and graduate students to explore art as a life-saving activity. The path-breaking programs of the department are committed to academic excellence, diversity, freedom of expression, activism, and social transformation through the arts.

Undergraduate Study

The undergraduate program offers majors in Dance and in World Arts and Cultures.

The BA in Dance thoroughly integrates learning to dance, learning to make dances, and critical interrogation of dance as a cultural practice. Students study a variety of dance throughout their studies. They enroll in a four-term sequence in dance composition, with additional opportunities to participate in the creation of their own dances, as well as working as dancers in the creation of new works by faculty members and visiting artists. Further, they engage in a core of four courses in the study of scholarly discourse around the body and dance, launching a critical inquiry into their own study of bodily practices, internalization of the embodied experience, and how bodily ideas and embodied experiences are interpreted and communicated outwardly and interpersonally, both locally and globally.

The BA in World Arts and Cultures highlights culture and representation as key perspectives for understanding creativity in local and global arenas. Three streams of cross-cultural and interdisciplinary study are available: arts activism, critical ethnographies, and visual cultures. These streams define the department commitment to a range of practices, including ethnography,activism, visual and related expressive arts, documentary and short films, museum and curatorial studies, performance, and other creative perspectives and methods. Courses combine theory and practice and are grounded in culturally diverse artistic expressions.

All students are encouraged to complement the required set of core and elective departmental courses with others offered across campus, such as courses from ethnic and area studies programs, and may organize their course of study in relation to particular interests or professional goals (e.g., international comparative studies, intercultural studies, education, area specializations such as Africa, Asia, or Latin America, minority discourse, gender studies).

Graduate Study

The graduate program offers Master of Arts (MA) and Doctor of Philosophy (PhD) degrees in Culture and Performance and a Master of Fine Arts (MFA) in Choreographic Inquiry. Culture and performance studies research communities, cultures, and transnational movements through heritage and globalization studies, multivocal ethnographies, dance and theories of corporeality and embodiment, visual and material culture, critical museum and curatorial studies, documentary practice and Internet interventions, as well as arts activism and interdisciplinary art making. The MFA in Choreographic Inquiry offers opportunities to engage multiple movement practices as students work on pioneering research in the form of new choreography. Students may focus on media, dance studies theory, and theories of the body as supplements to their work as choreographers. The Art and Global Health Center within the department presents further opportunity for learning and practice.

While operating with considerable independence, the two graduate degree areas are unified by the department’s common concern for aesthetic production, corporeality and performance, the dynamics of tradition, and culture-building in contemporary societies. Connections are forged between critical theory and artistic practices, and attention is given to the changing social roles and responsibilities of artists, practitioners, and scholars of the arts in the U.S. and worldwide.

Undergraduates and graduates have excelled in fields including technology and the arts, videography, documentary work, public service, education, theatrical/events production, performing arts, urban planning, law, environmen
tal activism, public health, and medicine. They have made careers in community nonprofits and activist groups, government arts agencies, museums, and arts foundations. Potential careers for MA, PhD, and MFA graduates also include positions in research universities and colleges, and MFA graduates are active as choreographers/performers in their own companies or with other professional organizations.

Undergraduate Majors

Dance BA

All students take a set of courses as preparation for the Dance major that focuses on the integration of dance and critical analysis. For students who transfer into the major, depending on the year of entry and prior coursework, lower-division preparatory coursework may be waived or substituted. When students enter the major, they continue their studies of dance technique, composition, and analysis, and they also enroll in a primary and secondary research area. The three research areas are (1) creative inquiry as research, (2) critical dance studies, and (3) dance and civic engagement. The creative inquiry as research area is grounded in contemporary choreography with a focus on dance-making and performing in a wide range of genres from throughout the world. Opportunities are provided for students to present their own choreography, to participate in performances by others, and to study performance production and videography. The critical dance studies area focuses on study of scholarship examining the body and dance, in their cultural and historical contexts. Courses in dance history, dance and culture, and dance as an identification practice are offered that enable students to analyze the rhetorical and ideological significance of dance. The dance and civic engagement area is grounded in the investigation and activist-oriented work of artists and the role of dance in the public sphere, and offers a wide range of courses in the nature of activism as well as opportunities for fieldwork, education internships, and other forms of community involvement.

Students select one area as their primary area and another as their secondary area. Elective options provide further deepening of student knowledge and skills in any or all of the areas. Students may also consider courses from programs outside the department and may organize their course of study in relation to their particular interests.

Students who wish to confer with the departmental student affairs officer regarding program planning and major requirements should contact the undergraduate counselor.

Learning Outcomes

The Dance major has the following learning outcomes:

- Choreography of dances in various settings, cultural contexts, and media, with emphasis on progressive approaches
- Creative problem-solving of issues tied to arts and activism, dance-making, and producing
in multiple formats, in an intercultural and interdisciplinary context
• Think critically about the relationship between aesthetics and politics through choreography, written analysis, and multiple research methods
• Demonstrated advanced proficiency in at least two movement disciplines
• Analysis of vocabulary, location, and syntax of dance works
• Analysis of political, cultural, and historical implications of dance works
• Demonstrated ability to understand and implement collaboration in an art-making practice
• Written and oral recognition and synthesis of key concepts in critical dance studies

Entry to the Major

Admission
New students are admitted to the Dance major for fall quarter only. All applicants are reviewed individually, based on submission of a written research paper, transcripts, two letters of recommendation, and one personal essay. These supplementary materials are requested from students in mid-December, after the general UC application is received and processed, and are due back in the department in January. For first-year applicants, college placement test scores are also considered. Students must participate in a late January/early February audition. Specifics about the audition are included in the e-mail requesting the above-mentioned supplementary materials.

Change of major applications are considered once a year. Current UCLA students who petition to change their major are required to meet with the student affairs officer prior to application, but no later than the eighth week of fall quarter in order to participate in the departmental supplemental application process during fall/winter quarters for admission into the program the following spring or fall quarter. They are required to take selected departmental courses before and during the term in which they apply to the program (contact the student affairs officer for a list of selected courses). They must have a minimum 2.0 overall grade-point average, a minimum 2.0 GPA in all departmental courses taken, and no more than 90 quarter units at the time of application. All students are required to audition in early winter quarter and may be interviewed as part of the application process.

Requirements

Preparation for the Major

Required: Dance 1, 16, 44, 45, 67A, 67B, 70.

The Major

The Dance major consists of 76 units of coursework.

Required: (1) Dance 101, 117A, 117B and (2) 10 units in the primary area and 5 units in the secondary area selected from the following:

(a) creative inquiry as research—Dance 114, 116, 117C, C122, 170, C171, 174A, C174B, C180, or other upper-division courses with faculty approval.

(b) critical dance studies—Dance C145X, C152, M157, 158, 160, CM168, C171, 182, World Arts and Cultures 199, or other upper-division courses with faculty approval.

(c) dance and civic engagement—Dance 114, C184, World Arts and Cultures 100A, 100B, 103, 144, 160, 177XP, 195, or other upper-division courses with faculty approval (no more than 8 units of courses 114 and/or 160 may be applied toward this area). Students also have the option to propose a senior honors project through Dance 186A and 186B.

Movement Arts/Dance Practices—Required: A total of 48 units of practice courses. A minimum of two technique courses per term until completion is strongly recommended. Thirty of the total 48 units must be selected from Dance 6, 9, 13, 15, 56, 59, 63, 65, C106A, C113A, C115, 116. Of these 30 units, a minimum of 6 units of a first style and 4 units of a second style must be at the advanced level. Eighteen of the total 48 units may be selected from Dance 5, 10, 11, 12, 16, 52, 60, C112A, 116, 160, World Arts and Cultures 55, 78, 80, 178. No more than 8 units of World Arts and Cultures 78 or 178 may be applied toward this requirement.

Senior Honors Project

Students may participate in a senior honors project consisting of 10 additional units. The project provides students with opportunity to demonstrate mastery and integration of knowledge and learned abilities from the major. The project may take various forms—from choreographic performance projects or an academic research paper to field/internship work in an identified area of research focus. With faculty advising, students must declare their intent to participate by spring quarter of their junior year. They identify a faculty mentor and work closely with that person on the development of the project, submitting a senior project proposal for faculty approval by the beginning of the senior year. In their senior year they enroll in a two-term course sequence (Dance 186A, 186B) to coordinate and present their research findings.

World Arts and Cultures BA

The World Arts and Culture major emphasizes a cross-cultural and interdisciplinary approach to the study of art making, community engagement, and multimedia analysis. The five required preparation for the major courses introduce students to the intersectionality evidenced in the collective work of the faculty. A lower-division, practice-based course enables students to connect the practice and study of art-making across a variety of genres and forms. In three lower-division seminars, students are prepared for the major by studying theoretical concepts of culture, the tensions between local and global art perception, and the diverse ways that colonialism has been understood and resisted around the globe.

Building upon the foundational preparation courses, the required core courses of the major expand interpretive lenses to include ethics of representation, methods of research, an opportunity to build upon one's practice-based experience, and a one-credit course that connects students with faculty advisers to increase awareness of field-specific scholarship, disciplinary methods, and various genres and forms for intellectual output, particularly as these might be articulated with post-graduate aspiration.

Students in the major have the option to pursue a senior praxis project. Working with faculty advisers, students will be able to develop a performance, film, event, multimedia production, and other possible forms of evidence of their education in the department.

Students who wish to confer with the departmental students offier regarding program planning and major requirements should contact the undergraduate counselor.

Learning Outcomes

The World Arts and Cultures major has the following learning outcomes:
• Demonstrated critical analyses of a variety of approaches to visual and performance-based art making and activism in cross-cultural contexts
• Interpretation of and, in some cases, conduct of field-based research within specific communities
• Demonstrated ability to conceptualize, plan, and exercise art, curatorial, and/or ethnographic projects that reflect a dynamic dialog between theory and practice
• Demonstrated sensitivity to diversity and cultural differences, particularly as articulated within various forms of governance, national and international policy, transnational art and curatorial practices, and museum and heritage sites
• Development of informed interpretations, not only of the way that art functions within communities but also how the links between art and community are created and represented
• Articulation of the value of civic engagement within a variety of arts-oriented social contexts

Entry to the Major

Admission
New students are admitted to the major for fall quarter only. All applicants are reviewed individually, based on submission of a written research paper, transcripts, two letters of recommendation, and one personal essay. These supplementary materials are requested from students in mid-December, after the general UC application is received and processed, and are due back in the department in January. For first-year applicants, college placement test scores are also considered. Students must participate in a late January/early February audition. Specifics about the audition are included in the e-mail requesting the above-mentioned supplementary materials.

Change of major applications are considered once a year. Current UCLA students who petition to change their major are required to meet with the student affairs officer prior to application, but no later than the eighth week of fall quarter in order to participate in the departmental supplemental application process during fall/winter quarters for admission into the program the following spring or fall quarter. They are required to take selected departmental courses before and during the term in which they apply to the program (contact the student affairs officer for a list of selected courses). They must have a minimum 2.0 overall grade-point average, a minimum 2.0 GPA in all departmental courses taken, and no more than 90 quarter units at the time of application. All students are required to audition in early winter quarter and may be interviewed as part of the application process.

Requirements

Preparation for the Major

Required: Dance 1, 16, 44, 45, 67A, 67B, 70.

The Major

The Dance major consists of 76 units of coursework.

Required: (1) Dance 101, 117A, 117B and (2) 10 units in the primary area and 5 units in the secondary area selected from the following:

(a) creative inquiry as research—Dance 114, 116, 117C, C122, 170, C171, 174A, C174B, C180, or other upper-division courses with faculty approval.

(b) critical dance studies—Dance C145X, C152, M157, 158, 160, CM168, C171, 182, World Arts and Cultures 199, or other upper-division courses with faculty approval.

(c) dance and civic engagement—Dance 114, C184, World Arts and Cultures 100A, 100B, 103, 144, 160, 177XP, 195, or other upper-division courses with faculty approval (no more than 8 units of courses 114 and/or 160 may be applied toward this area). Students also have the option to propose a senior honors project through Dance 186A and 186B.

Movement Arts/Dance Practices—Required: A total of 48 units of practice courses. A minimum of two technique courses per term until completion is strongly recommended. Thirty of the total 48 units must be selected from Dance 6, 9, 13, 15, 56, 59, 63, 65, C106A, C113A, C115, 116. Of these 30 units, a minimum of 6 units of a first style and 4 units of a second style must be at the advanced level. Eighteen of the total 48 units may be selected from Dance 5, 10, 11, 12, 16, 52, 60, C112A, 116, 160, World Arts and Cultures 55, 78, 80, 178. No more than 8 units of World Arts and Cultures 78 or 178 may be applied toward this requirement.

Senior Honors Project

Students may participate in a senior honors project consisting of 10 additional units. The project provides students with opportunity to demonstrate mastery and integration of knowledge and learned abilities from the major. The project may take various forms—from choreographic performance projects or an academic research paper to field/internship work in an identified area of research focus. With faculty advising, students must declare their intent to participate by spring quarter of their junior year. They identify a faculty mentor and work closely with that person on the development of the project, submitting a senior project proposal for faculty approval by the beginning of the senior year. In their senior year they enroll in a two-term course sequence (Dance 186A, 186B) to coordinate and present their research findings.

World Arts and Cultures BA

The World Arts and Culture major emphasizes a cross-cultural and interdisciplinary approach to the study of art making, community engagement, and multimedia analysis. The five required preparation for the major courses introduce students to the intersectionality evidenced in the collective work of the faculty. A lower-division, practice-based course enables students to connect the practice and study of art-making across a variety of genres and forms. In three lower-division seminars, students are prepared for the major by studying theoretical concepts of culture, the tensions between local and global art perception, and the diverse ways that colonialism has been understood and resisted around the globe.

Building upon the foundational preparation courses, the required core courses of the major expand interpretive lenses to include ethics of representation, methods of research, an opportunity to build upon one’s practice-based experience, and a one-credit course that connects students with faculty advisers to increase
partamental courses taken, and no more than 90 quarter units at the time of application. Students may be interviewed as part of the application process.

**Requirements**

**Preparation for the Major**

Required: World Arts and Cultures 1, 2, 20, 24, 33.

**The Major**

The World Arts and Cultures major consists of 46 units of coursework.

**Required:**

(1) World Arts and Cultures 100A or 100B, 102, 104, 124, 185; (2) 25 units from any World Arts and Cultures elective courses, or other upper-division courses with faculty approval.

**Senior Praxis Project**

Students may choose to complete a senior praxis project by completing 15 units of elective coursework and the following two courses (or 10 units of equivalent coursework with faculty approval). World Arts and Cultures 2 and 102 provide the foundational training in making practice-based techniques. Students begin to identify a project in the required World Arts and Cultures 185 Junior-Year Proposal course during their junior year. With the support of their instructor, students can be approved to choose the senior praxis project during their final three quarters of enrollment. Projects may include written theses, visual ethnographies, documentaries, curatorial projects, installations, short films, internships, community service, field-based research, as well as other formats. Projects are crafted in close consultation with faculty advisers to provide capstone experiences that draw together ideas and abilities from their WAC/D curriculum while positioning students for postgraduate opportunities.

**Graduate Majors**

**Choreographic Inquiry MFA 2022-2023**

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Culture and Performance MA, PhD**

The master’s degree may be earned only in the process of completing PhD requirements.

**Requirements**

Official, specific degree requirements are detailed in program requirements for UCLA graduate degrees, available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announce-
ments, other publications, and websites of the schools, departments, and programs.

**Dance**

**Lower-Division Courses**

1. Global Perspectives on Dance. (8) Lecture, three hours; discussion, one hour. Examination of practices of choreography, improvisation, and technique in different cultural settings and historical eras. Introduction to field of dance studies through analysis of broad spectrum of philosophies and practices within global contexts with focus on creative activity, dance-making, thinking and understanding act of improvising, and diverse ways of training one’s body. By framing process of analysis within array of historical periods and cultural settings, development of capacity to engage with dance as lived social and artistic practice while refining critical seeing, thinking, and writing skills. P/NP or letter grading.

2. Moving Voice. (2) Studio, three hours. Experiential Investigation of voice as it relates to resonant, physical body. Working with primal qualities of voice and how it interfaces with breath, physical anatomy, and space around us. Physical approach to singing, with singing being defined in its broadest sense as all possible sounds emitted by human voice. May be repeated for credit without limitation. P/NP or letter grading.

3. Beginning West African Dance. (2) Studio, three hours. Beginning-level study of dances originating from Mandingo culture in sub-Saharan Africa. May be repeated for credit without limitation. P/NP or letter grading.

4. Beginning Hip-Hop Dance. (2) Studio, three hours. Beginning-level study of dances originating from Mandingo culture in sub-Saharan Africa. May be repeated for credit without limitation. P/NP or letter grading.

5. Beginning Martial Arts. (2) Studio, three hours. Beginning-level study of Tai Chi Chuan and other martial arts forms. May be repeated for credit without limitation. P/NP or letter grading.

6. Beginning Modern/Postmodern Dance. (2) Studio, three hours. Beginning-level work in modern and/or postmodern movement practices. Technical training with emphasis on increasing skill. May be repeated for credit without limitation. P/NP or letter grading.

7. Beginning Improvisation in Dance. (2) Studio, three hours. Examination of diverse movement sources from different cultural settings and historical eras. Introduction to creative exploration in which creation of dance can take place. How do different choreographers conceptualize creative process of dance-making? What kinds of strategies do they use for creating or moving out of which they create dance? Answers to these questions in relation to broad range of artistic approaches, acknowledging that dance-making occurs distinctively in different cultural contexts and social moments. Use of these analyses to assist in creative process for making new dances. P/NP or letter grading.

8. Introduction to Dance Studies. (4) Lecture, three hours. Forced-choice cultural contexts and discipline of dance studies, focus on study of corporeality as key contemporary perspective on body. Multidisciplinary approach to dancing bodies conceptualized as social constructs, including attention to race, class, and national identity. P/NP or letter grading.

10. Intermediate West African Dance. (2) Studio, three hours. Intermediate-level study of dances originating from Mandingo culture in sub-Saharan Africa. May be repeated for credit without limitation. P/NP or letter grading.

12. Intermediate Martial Arts. (2) Studio, three hours. Intermediate-level study of Tai Chi Chuan and other martial arts forms. May be repeated for credit without limitation. P/NP or letter grading.

14. Intermediate Modern/Postmodern Dance. (2) Studio, four hours. Intermediate-level work in modern and/or postmodern movement practices. Technical training with emphasis on increasing skill. May be repeated for credit without limitation. P/NP or letter grading.

15. Intermediate Theories and Methods in Dance Composition I: Languages. (4) Seminar, two hours; studio, two hours; outside study, eight hours. Enforced requisite: course 16. Examination of diverse movement sources from which dances are made. How do different choreographers envision vocabularies of movement they use? How do they select or create movement out of which they create dance? Answers to these questions in relation to broad range of artistic approaches, acknowledging that dance-making occurs distinctively in different cultural contexts and social moments. Readings about and viewing of videos of selected artists’ work and their different strategies for creating languages of their dances for comparison. Use of these analyses to assist in creative process for making new dances. P/NP or letter grading.

16. Theories and Methods in Dance Composition II: Processes. (4) Seminar, two hours; studio, two hours; outside study, eight hours. Enforced requisite: course 67A. Examination of diverse movement sources through which creation of dance can take place. How do different choreographers conceptualize creative process of dance-making? What kinds of strategies do they use for sequencing their materials? Answers to these questions in relation to broad range of artistic approaches, acknowledging that dance-making occurs distinctively in different cultural contexts and different historical moments. Readings about and viewing of videos of selected artists’ work and their different strategies for their processes of creating dances for comparison. Use of these analyses to assist in creative process for making new dances. P/NP or letter grading.

17. Production Practicum. (2) Lecture, 90 minutes; activity, three and one half hours. Introduction to practical perspectives on producing events in world arts and cultures, including but not limited to theatrical support and planning and executing lecture series. Introduction to professional stage production principles and hands-on experience in technical theater. May be repeated once for credit. P/NP grading.

18. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

19. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and en-
Upper-Division Courses

101. Theories of Dance. (5) Lecture, four hours; discussion, two hours. Enforced requisite: course 45. Ideas and methods of dance history and movement have achieved broad resonance in contemporary performance, art, politics, culture, and studies of social behavior. Examination of concepts and approaches to dance making and deployments of its vocabulary within field and beyond, concentrated in four principal approaches: history, ethnography, choreographic analysis, and critical theory. Use of key ideas in dance to investigate allied areas of performance, embodiment, social constructions of identity and difference, and relationship between aesthetics and politics. Design of dance performances to illustrate link between theory and practice. How dance creates alternative modes of history and knowledge in range of cultural contexts. P/NP or letter grading.

C106A. Advanced West African Dance. (2) Studio, three hours. Advanced-level study of dances originating from Mandingo culture in sub-Saharan Africa. May be repeated for credit without limitation. Concurrently scheduled with course C406A. P/NP or letter grading.

C108A. Advanced Hip-Hop Dance. (2) Studio, three hours. Advanced-level study of hip-hop movement practices. May be repeated for credit without limitation. Concurrently scheduled with course C408A. P/NP or letter grading.

C113A. Advanced Ballet. (2) Studio, three hours. Advanced-level study of ballet as movement practice. May be repeated for credit without limitation. Concurrently scheduled with course C413A. P/NP or letter grading.

114. Performance Practicum, (1 to 4) Studio, three to 12 hours. Rehearsal and performance in selected choreographic/theatrical work. May be repeated for credit without limitation. P/NP grading.

C115. Advanced Modern/Postmodern Dance. (2) Studio, six hours. Advanced-level work in modern and/or postmodern movement practices. Technical training, with emphasis on increased understanding of movement vocabulary to apply these to performance. May be repeated for credit without limitation. Concurrently scheduled with course C415. P/NP or letter grading.

116. Advanced Improvisation in Dance. (2) Studio, four hours. Enforced requisite: course 116. Development of aesthetic perspective through use of imagery, sound, and other art. Concentration and projection may be repeated for credit without limitation. P/NP or letter grading.

117B. Theories and Methods in Dance Composition IV: Impacts. (4) Seminar, two hours; studio, two hours; outside study, eight hours. Enforced requisites: courses 16, 67A, 67B. Examination of how dance makes an impact on its audience. Synthesis of analyses undertaken in previous courses to determine how dances move their viewers. How do dances appeal to or address their audiences? How do dance vocabulary, sequence, and timing affect audience? Answers to these questions in relation to broad range of artistic approaches, acknowledging that dance-making occurs distinctively in different cultural contexts and different historical moments. Different approaches to dance result in highly distinctive kinds of responses from audiences. Focus on creation of three in-depth studies, each of which endeavors to construct distinct and kind of response from viewers. P/NP or letter grading.

117C. Advanced Topics in Choreography. (4) Lecture, four hours; studio, two hours; outside study, six hours. Enforced requisites: courses 16, 67A, 67B. Directed exploration in composition, with focus on developing theme-based choreographic works that are informed by theoretical engagement with selected topics through lecture, reading, and discussion. Thematic topics include contemporary issues and concerns such as image, essence, and abstraction; home, history, and memory; interculturalism; constructing identities and difference. May be repeated for credit without limitation. P/NP or letter grading.

C122. Music and Dance Collaborations. (4) Studio, four hours. Requisites: courses 67A, 67B. Designed for dance students who have had prior coursework/experience in music and for music students who have had prior coursework/experience in music composition. Opportunity for directors, choreographers, and composers to work together creating and developing material in their respective disciplines. Exploration of different forms and ways of approaching creative process of making dance and music, presenting material on weekly basis, and developing skills for discussion. Concurrently scheduled with course C222. P/NP or letter grading.

C145XP. Selected Topics in Dance Studies. (4) Formerly numbered C145. Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Selected topics in study of dance and corporeality. Consequent Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. Concurrently scheduled with course C245XP. P/NP or letter grading.

C152. History and Theory of Modern/Postmodern Dance. (4) Lecture, four hours; studio, two hours; outside study, six hours. Introduction to key figures in creation of modern/postmodern movement skills for understanding and tracing of radical shift to postmodern dance that occurred in mid-20th century. Contemporary developments, both historical and theoretical. Student projects involve choreography and writing. Concurrently scheduled with course C252. P/NP or letter grading.

M157. Rechoreographing Disability. (Same as Disability Studies M157) Seminar, four hours. Through study of range of performance by, about, or featuring people who identify as disabled, reading and discussion of range of writing about experiences of disability and process of making work about disability by key artists and thinkers. Concept of choreography as political/cultural idea broadly defined as scored movement and organization and behavior of bodies, as well as choreography as poetic form for expression of ideas, creative tool, or product. Viewing, viewing and discussion of work, and embodying ideas through movement and dance-making. P/NP or letter grading.

158. Choreographing Gender. (4) Lecture, three hours; laboratory, four hours for junior/seniors. Analysis of aesthetic codes and theatrical choreographic approaches as they intersect with construction of gender in U.S., with close attention to race, class, and sexuality as they are combined. Examination of record and documentation of performances and production of critical writing. P/NP or letter grading.

160. Topics in Body Mechanics. (4) Lecture, three hours; studio, one hour. Designed for juniors/seniors. Variable topics course with discussion of injury prevention, anatomy for dancers, and study of biophysical and physical principles of human movement as related to dance. May be repeated for credit without limitation. P/NP or letter grading.

CM168. Beyond Academia: Making Art in Real World. (Same as World Arts and Cultures CM168) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Focus on understanding bureaucratic structures and regional histories condition and shape the presentation of art as well as practical issues as publicity and grant-writing. Concurrently scheduled with course CM268. P/NP or letter grading.

170. Advanced Production. (1 to 2) Laboratory, three hours. Advanced-level study of production practices. Enforced requisites: course 70. Further development and application of practical perspectives on producing events in department, including but not limited to theatrical support and production of an executing lecture series. Provides students with advanced practical knowledge necessary, as well as opportunity to study nature of this component in world arts and cultures/dance studies. May be repeated for credit without limitation. P/NP or letter grading.

C171. Dance Production: Variable Topics. (4) Lecture, four hours; laboratory, two hours. Foundational experience in range of dance production practices, including but not limited to lighting design, set design, costume design, and stage management. Practical training in area covered, combined with theoretical inquiry and practical experience of students to reflect on their own work and that of others. Completion of production project may be repeated for credit without maximum of 12 units. Concurrently scheduled with course C277. P/NP or letter grading.

174A. Projects in Dance. (2) Laboratory, four hours. Individualized major projects in choreography, performance, cultural studies, production, and media. May be repeated for credit without limitation. P/NP or letter grading.

C174B. Projects in Dance. (Formerly numbered 174B) Laboratory, six hours. Individualized final showing, video viewing and comparison paper in choreography, performance, cultural studies, production, and media. May be repeated for credit without limitation. Concurrently scheduled with course C274B. P/NP or letter grading.

182. Dance and Visual Media. (4) Lecture, four hours; laboratory, two hours. Examination of aesthetic differences between dance, film, and video and exploration of new aesthetic when they are combined. Analysis of record and documentary dance film, choreo-cinema, and impact of MTV, as well as integration of media with performance. Letter grading.

C180. Dance for Camera. (4) Lecture, two hours; laboratory, two hours. Introduction to making dance for camera. Students acquire and apply basic video production tools for creating and producing movement-based projects. With rudimentary tools—to film, frame, set up shots, storyboard, design shot lists, and set-up lists, log and capture, edit, and export footage—students create their own dance for camera video projects. Students gain deeper understanding of conceptualization, practice, theory, history, and current state of dance for camera. Concurrently scheduled with course C280. Letter grading.

C184. Production Arts Seminar. (4) Seminar, four hours. Theory and practice of production administration, including hands-on case studies for producing public events in arts and academia. Topics include, but are not limited to, history and theories of producing, mission statements, budgeting, marketing, public relations, fund-raising, legalities, and archiving. Concurrently scheduled with course C243. P/NP or letter grading.

186A-186B. Senior Projects in Dance. (5–5) Lecture, four hours; outside study, 11 hours. Course 186A is requisite to 186B. Limited to senior Dance majors. Application of concepts, skills, and content from interdisciplinary major to individual projects. Methodologies may include critical, comparative, ethnographic, and performance approaches. Lecture/seminar format with Dance faculty during first term; faculty-directed presentations of individual projects during second term. Letter grading.
188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth than in other courses, including research papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

Graduate Courses

211A-211E. Advanced Choreography. (4 each) Lecture, two hours; studio, two hours. Theoretical aspects of advanced choreography for students who have reached level of self-initiation of substantial creative works. Refinement and realistic self-evaluation; critical counsel by acknowledged choreographers. S/U or letter grading.

C222. Music and Dance Collaborations. (4) Studio, four hours. Requisites: courses 67A, 67B. Designed for dancers who have had prior coursework in music and for music students who have had prior coursework/experience in music composition. Opportunity for directors, choreographers, and composers to work together creating and developing material in their respective disciplines. Exploration of different forms and ways of approaching creative process of making dance and music, presenting mental and physical processes, and developing skills for discussion, critique, and review. Concurrently scheduled with course C122. S/U or letter grading.

C243. Production Arts Seminar. (4) Seminar, four hours. Theory and practice of production administration, including hands-on case studies for producing public events in arts and academia. Topics include, but are not limited to, history and theories of producing, mission statements, budgeting, marketing, public relations, fund-raising, legalities, and archiving. Concurrently scheduled with course C184. S/U or letter grading.

C245XP. Selected Topics in Dance Studies. (4) Formerly numbered C245.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Selected topics in study of dance and corporeality. Consult Schedule of Classes for topics to be offered in specific terms. May be repeated for credit with topic change. Concurrently scheduled with course C145XP. S/U or letter grading.

C252. History and Theory of Modern/Postmodern Dance. (4) Lecture, four hours; studio, two hours; outside study, eight hours. Designed for graduate students. Examination of historical and theoretical developments, both historical and theoretical. Projective involvement in creation of modern dance, with special attention to their theories and philosophies and tracing of radical shift to postmodern dance that occurred in mid-20th century. Contemporary developments, both historical and theoretical. Project students involve choreography and writing. Concurrently scheduled with course CM252. S/U or letter grading.

C268A. Beyond Academia: Making Art in Real World. (4) Same as World Arts and Cultures CM268.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Focus on understanding bureaucratic structures and regional histories conditioning creation of art in real world, including such practical issues as publicity and grant-writing. Concurrently scheduled with course CM168. S/U or letter grading.

C271. Dance Production: Variable Topics. (4) Lecture, four hours; laboratory, two hours. Foundational experience in range of dance production practices, including: management, design, and production of dance presentations. Completion of production project required. May be repeated for maximum of 12 units. Concurrently scheduled with course C171. S/U or letter grading.

C274B. Projects in Dance. (4) Laboratory, six hours. Individual research, writing, and presentation of study of dance. Letter grading.

C280. Dance for Camera. (4) Lecture, two hours; laboratory, two hours. Introduction to making dance for camera. Students acquire and apply basic video production skills for creation of movement-based projects. May be repeated for credit without limitation. Concurrently scheduled with course C174B. S/U or letter grading.

C306A. Advanced West African Dance. (2) Studio, three hours. Advanced-level study of dances originating from Mandingo culture in sub-Saharan Africa. May be repeated for credit without limitation. May be repeated for credit without limitation. Concurrently scheduled with course C106A. S/U or letter grading.

C409A. Advanced Hip-Hop Dance. (2) Studio, three hours. Advanced-level study of hip-hop movement practices. May be repeated for credit without limitation. Concurrently scheduled with course C109A. S/U or letter grading.

C412A. Advanced Special Topics. (2) Studio, three hours. Advanced-level study of variable movement practices. May be repeated for credit without limitation. Concurrently scheduled with course C112A. S/U or letter grading.

C413A. Advanced Ballet. (2) Studio, three hours. Advanced-level study of ballet as movement practice. May be repeated for credit without limitation. Concurrently scheduled with course C113A. S/U or letter grading.

C415. Advanced Modern/Postmodern Dance. (2) Studio, six hours. Advanced-level work in modern and/or postmodern movement practices. Teaching/training, with emphasis on increased understanding of movement principles and ability to apply these to performance. May be repeated for credit without limitation. Concurrently scheduled with course C115. S/U or letter grading.

C441. Dance Production Practicum. (2 to 4) Laboratory, four to eight hours (one or two hours may be individualized consultation). Skills and understanding of production components, including stage manager, production assistants, and producer. May be repeated for maximum of 8 units. S/U grading.

C452. Directed Field Study in Dance Education. (2 to 8) Seminar, one hour; field study, two hours minimum. Directed field study to provide teaching experience in community school or other approved site. No more than 4 units may be applied toward MA degree requirements. S/U grading.

C490. Projects in Choreography and Performance. (2 to 8) Tutorial, one three-hour rehearsal per unit per week minimum. Creation, casting, and rehearsing of culminating concert, reflecting professional achievement in choreography and performance, in first term. In second term, direction of on-stage rehearsals for culminating concert by each student leading to fully staged performance. May be repeated for maximum of 16 units. S/U or letter grading.

488. Professional Internship in Dance. (4, 8, or 12) Seminar, to be arranged. Full- or part-time supervised fieldwork. Limited to MFA students. Internship in dance, theater, film, or television organization. Participation in creative, administrative, technical work of professionals in their specialties. S/U or letter grading.

World Arts and Cultures

Lower-Division Courses

1. Introduction to World Arts and Cultures. (5) Lecture, three hours; discussion, one hour. Survey of concepts and theories involved in interdisciplinary study of art, aesthetics, and performance. Examination of interactions among various modes of creation, production, role of style in daily life, performative representation of cultural identity and difference, and interaction of diverse artistic traditions. Letter grading.

2. Lower-Division Seminar. (5) Seminar, four hours; outside study, 11 hours. Variable topics seminar with focus on scholarly and practice-based research in arts. In-depth investigations of topics ranging from body in cultural context, interdisciplinary art-making, and cultural studies. Study of the extent to which notions of aesthetics and efficacy are interwoven in people’s lives in active, instrumental ways. Use of Fowler Museum’s long-term exhibition entitled “Intersections: World Arts/Local Lives” as object of study to examine many insights that arts can offer into social, political, and religious experience. Drawing on cultures of Africa, Asia, Pacific, and Indigenous Americas, both ancient and contemporary, consideration of degree to which notions of aesthetics and efficacy are intertwined and interdependent in art forms made to intervene in people’s lives in active, instrumental ways. Use of specific case studies to illustrate and interrogate theoretical paradigms. P/NP or letter grading.

3. Colonialisms and Resistance. (5) (Same as American Indian Studies M10.) Lecture, three hours; discussion, one hour. Survey of selected Native North American cultures from pre-Western contact to contemporary period, with particular emphasis on early cultural diversity and diverse patterns of political, linguistic, social, legal, and cultural change in postcontact period. P/NP or letter grading.

24. World Arts, Local Lives. (8) Lecture, three hours; discussion, three hours. Use of Fowler Museum’s long-term exhibition entitled “Intersections: World Arts/Local Lives” as object of study to examine many insights that arts can offer into social, political, and religious experience. Drawing on cultures of Africa, Asia, Pacific, and Indigenous Americas, both ancient and contemporary, consideration of degree to which notions of aesthetics and efficacy are intertwined and interdependent in art forms made to intervene in people’s lives in active, instrumental ways. Use of specific case studies to illustrate and interrogate theoretical paradigms. P/NP or letter grading.
art, mythology, ritual, health practice, languages, and ecology. With examples spanning globe, consideration of issues of colonialism, tradition, religious change, and implications of the logical differences between people. Examination of critical perspectives on social development, historical progress, and intellectual assimilation. P/NP or letter grading.

55. Intermediate World Arts Practices in Global and Transcultural Forms. (2) Studio, three hours; outside study, three hours. Intermediate-level study of world arts practices crossing national and cultural boundaries. Variable topics, such as body music, cross-cultural textile creation, or mural painting, in cultural and historical context. May be repeated for credit without limit. P/NP or letter grading.

78. Private Instruction in World Arts and Cultures. (2 to 4) Studio, one to four hours. Designed for freshmen/sophomores. Private or semiprivate instruction in one world arts practice with distinguished community practitioners. Requirement arranged by students and approved by instructor. May be repeated for maximum of 24 units. P/NP grading.

M79. Food Politics: Cultural Solutions to Political Problems. (5) (Same as Food Studies M79.) Lecture, four hours; discussion, one hour. Examination of issues of environmental and public health effects of intensive and extensive agriculture, influence of corporations on government, animal ethics, food deserts and urban agriculture, and food insecurity. Focus on representation of such issues in documentaries, public lectures, memoirs, novels, and visual art, as well as on initiatives to address such problems through policy and activism. P/NP or letter grading.

80. Video Tools and Techniques. (2) Laboratory, four hours. Introduction to video tools and practices to train students in key techniques of video production. Basic skills spanned to develop short videos for circulation via DVD and/or Internet. Practical exercises based on material and instruction provided in class, spanning production and postproduction processes of video making. Evaluation of students on these exercises and ability to create and edit sequences of any or all materials developed during course. Training in technical aspects of video production and usage of video tools. P/NP or letter grading.

85. Sophomore Seminar. (5) Lecture, 90 minutes. Planning and execution of proposal for junior year of study, with attention to exploring resources of department and University as whole. P/NP grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be repeated for credit with topic change. P/NP or letter grading.

99. Student Research Program. (1 to 2) Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual program consult Undergraduate Research Center. May be repeated. P/NP grading.

100A. Art as Social Action. (5) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Discussion of what constitutes artist’s social responsibility as well as the best way to qualify to engage in direct political action. Study of tension between powers of this world and powers of art. P/NP or letter grading.

100B. Art as Moral Action. (5) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. One’s ability to distinguish between right and wrong depends on the nature of one’s actions and their consequences. Study of cultural strategies of moral engagement, persuasion, and inquiry in personal and public life, including acts of conscience and civil disobedience. P/NP or letter grading.

101. Theories of Performance. (5) Lecture, four hours; studio, two hours. Performance commonly refers to activities on proscenium stage. Explosion of that narrow notion of performance by delving into scholarship from young fields such as performance studies, which draws on disciplines of anthropology, cultural studies, gender studies, linguistics, postcolonial theory, and sociology. Exploration in studio of concept of performance and its disciplinary and performative practices in multi-disciplinary performance works that engage with and amplify theories studied. P/NP or letter grading.

102. Upper-Division Seminar. (5) Seminar, three hours. Variable topics seminar with focus on advanced practice-based research arts. In-depth investigations of topics addressing variable array of art genres including drawing, musical composition, painting, performance poetry, sculpture, stand-up comedy, and therapy music. Exploration of generation and expansion of art works supported by readings, assigned written analysis, supervised fieldwork, individual and collaborative assignments, and/or practice-oriented projects. Determining project in integrating theoretical and practical components of selected seminar topic required. May be repeated once for credit. Letter grading.

103. Arts in Communities. (5) Lecture, four hours. Introduction to theoretical and practical understanding of field of community arts by and for multiple publics. Review of relevant issues in field and exploration of roles of arts and other organizations in struggles for social change, representation, and community building. Through national and international examples, exploration of art works that emphasize participation of citizens and use of cultural relevant performance, art, and exhibition. Examination of processes of creative thinking, community involvement, collaborative enterprise, research, and education in community arts. Letter grading.

CM113B. Legislative Theater for Race and Gender Justice. (5) (Same as African American Studies CM113B.) Lecture, three hours; discussion, one hour (when scheduled). Exploration and application of range of interactive methods and arts-based strategies with participants from UCLA and broader Los Angeles community in order to research and influence public policy and legislative change. Students and campus partners create and perform legislative theather addressing issues of race, gender, and criminal-justice system. Critical texts, collaborative work, and creative methods are used to engage perspectives on justice. Analysis of diverse and growing body of work on systems of research, work, workshops, performances, and critiques of original writings and developments performed in response to writing scholars and community partners. Concurrently scheduled with course CM125B. P/NP or letter grading.

M113D. Spoken Word Workshop: Creative Writing and Performance Practicum. (4) (Same as African American Studies M113D.) Enroll by consent of instructor. Shaped by, and consistently inspiring, broader movements for social and political change, practice of spoken word today provides creative outlet for performers worldwide by resisting and remixing elements of traditional verse, participatory theater, and popular culture. To develop writing and performance skills, and to deeply understand selection of poets and performing artists who have shaped spoken word as known today, investigation of aesthetics and political movements of their time through critical essays and poetry from range of influential movements. P/NP or letter grading.

114. Performance Practicum. (1 to 4) Studio, three to 12 hours. Rehearsal and performance in selected community-based or theatrical work. May be repeated for credit without limitation. P/NP grading.

120. Selected Topics in Cultural Studies. (4) Lecture, three hours. Designed to cover selected topics in interdisciplinary study of arts and performance in cultural and historical context. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. P/NP or letter grading.

121. Ethnography and Performance. (4) Lecture, four hours; outside study, eight hours. Survey of some ways that ethnography and performance intersect, and as development or some preliminary approaches to effectively document performance events. Reading of ethnographies of performances, as well as consideration of how performances can work effectively, P/NP, S, N, audit.

122. Healing across Cultures. (5) Lecture, two and one half hours; discussion, one hour. Examination of multiple traditions of healing as recorded across cultures, including acts of conscience and civil disobedience. P/NP grading.

123. Introduction to Field-Based Research Methods. (5) Lecture, three hours. Introduction to methods, techniques, and issues in conducting field-based research, including data gathering procedures, ethical concerns, sampling, checks and controls, teamwork, interventions, and results as not only tangible and impersonal output of inquiry but also of intangibles that can be used to inform practice. Through readings, discussion, and hands-on exercises, students learn how to plan fieldwork projects and write proposals, prepare consent forms and deal with cultural issues, construct questionnaires, interview, use audiovisual documentation, and manage and present data. P/NP or letter grading.

M125A. Beyond Mexican Mural: Beginning Muralism and Community Development. (5) (Same as Art M186A and Chicana/o and Central American Studies M186A.) Studio/lecture, four hours. Corequisite: course M125AL. Investigation of muralism as method of community education, development, and empowerment. Exploration in conceptual development of large-scale collaborative digitally created image and/or painting for placement in community. Students research, design, and work with community participants. P/NP or letter grading.

M125AL-M125BL-M125CL. Beyond Mexican Mural: Muralism and Community Laboratory. (4–2–2) (Same as Art M186AL-M186BL-M186CL and Chicana/o and Central American Studies M186AL-M186BL-M186CL.) Course M125AL is requisite to M125BL, which is requisite to M125CL. Mural and Digital Laboratory is art studio housed at Social and Public Art Resource Center in Venice, CA, where students work in community-based setting. Open to students during scheduled hours with laboratory tech support, it offers instruction as students independently in collaborative design, drafting, and produce large-scale painted and digitally generated murals to be placed in community setting. P/NP or letter grading. M125AL. Beginning, Laboratory, four hours. Corequisite: course M125A, M125BL. Interme...
M125 CL. M125A, M125AL. Corequisite: course M125B; 874 / World Arts and Cultures/Dance (Same as Art M125C. Beyond Mexican Mural: Advanced Mural production to full scale and community approval. P/NP participants. Continuation of project through states of production, full scale and community approval. P/NP or letter grading.

M125C. Beyond Mexican Mural: Advanced Muralism and Community Development. (4) Same as Art M186B and Chicana/o and Central American Studies M186B.) Studio/lecture, four hours. Prequisites: courses M125A, M125AL. Corequisite: course M125BL. Continuation of investigation of muralism as method of community education, development, and empowerment. Exploration of issues through development of large-scale collaborative digitally created image and/or painting for placement in community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

M125M. Whose Monument Where?: Course on Public Art. (4) Same as Art M185 and Chicana/o and Central American Studies M185.) Lecture, four hours. Recommended corequisite: course M125A, M125B, or M125C. Examination of public monuments in U.S. as basis for cultural insight and critique of American values from perspective of artist. Use of urban Los Angeles as textbook in urban space issues such as who is public, who speaks in public, what defines neighborhoods, and do different ethnic populations use public space differently. P/NP or letter grading.

C129. Food Customs and Symbolism. (4) Lecture, three hours. Designed for juniors/seniors. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing, eating, food and identity, and food and its emotional significance, aversions and taboos, advertising, changing food habits, and American diet. Concurrently scheduled with course C229. P/NP or letter grading.

144. Make Art/Stop AIDS. (8) Lecture, four hours studio, two hours, eight hours. What is AIDS? Is it central question posed here in relation to global AIDS epidemic. Working in close connection with public health and social service organizations, development of effective tool in AIDS prevention and treatment efforts. Review of literature of AIDS cultural analysis that emerged in late 1980s in U.S. and application of that literature to international hot spots such as India, China, South Africa, and Brazil. Collaborative theory-in-action projects. P/NP or letter grading.

C146. Politics of Performance. (4) Seminar, four hours; outside study, eight hours. Designed for juniors/seniors. Opportunity to reflect on artists and intellectuals as cultural workers operating in domains of ideology, aesthetics, and theory. Analysis of such keywords as ideology, aesthetic, performance, influence, and public readings of artists and intellectuals, and artists. Concurrently scheduled with course CC246. P/NP or letter grading.

150. Critical Ethnographies. (5) Lecture, three hours. Ethnography as ideology. Survey of methods and tropes and rhetorical strategies to explicitly locate ethnographic method as key component of cross-cultural understanding. Examination of categorical notions of insider and outsider while also developing various perspectives on performed acts of identity formation. Concurrently scheduled with course CC250. P/NP or letter grading.

C152. Visual Cultures. (4) Lecture, three hours. How are ways of seeing constructed through culture, gender, religion, class, and nation? Theories and case studies from around world permit understanding of social processes through which gaze is determined and image economies negotiated. Topics include scopic regimes, aesthetics of streamlined design, and visibility and liberation. Concurrently scheduled with course CC252. P/NP or letter grading.

C158. Theorizing Art Activism. (4) Seminar, three hours. Historicizing and theorizing of art activism to provide context for concerted analysis, creation, and production. Readings include theoretical texts and current performances. Consideration of one particular activist project, with focus on ongoing activism sponsored by UCLA Art and Global Health Center. Art as tool of social change, organized by artists members supported and encouraged. Concurrently scheduled with course CC258. P/NP or letter grading.

C159. Art and Global Health. (4) Seminar, three hours. Focus of interdisciplinary research on arts-based methodologies in pursuit of improved health outcomes, using examples from international projects created and supported by UCLA Art and Global Health Center. Readings include, one by artists and arts scholars and articles from public health and medical literature. Seminar members propose their own arts-based health promotion interventions. Concurrently scheduled with course CC259. P/NP or letter grading.

160. Performing Sexual Health: UCLA Sex Squad. (4) Seminar, three hours. Exploration of activist sexual health education theater as it has been used both locally and globally. Examination specifically of how humor, personal narrative, and nonjudgmental pro-sex approaches have been utilized to open empowering and educational dialogues about sexual health by and for diverse range of communities. Intensive training on sexual health, HIV/AIDS, with a focus on organizing and planning of artists’ interventions to open urgent dialogues on these taboo topics. May be repeated for maximum of 12 units. P/NP or letter grading.

C172. Academic Making Art in Real World. (4) Same as Dance CM168.) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Focus on understanding bureaucratic structures and regional histories conditioning creation of art in real world, including such practical issues as publicity and grant-writing. Concurrently scheduled with course CM268. P/NP or letter grading.

C173. Sound Resources for Performance. (4) Lecture, four hours; studio, eight hours. Designed for music majors. Exploration of music, in search of interesting, new, and unusual. Investigation of musical possibilites via record store, internet, and music library of avant-garde and recent sounds; body (clapping, stepping, and singing); and hardware store (found sound). Participants collaborate with fellow students in creative efforts and in presentation of research findings. Concurrently scheduled with course CC273. P/NP or letter grading.

174A. Projects in World Arts and Cultures. (2) Laboratory, four hours. Individualized major projects in choreography, performance, cultural studies, production, and media. May be repeated for credit. P/NP or letter grading.

174B. Projects in World Arts and Cultures. (4) Laboratory, six hours. Individualized major projects in choreography, performance, cultural studies, production, and media. May be repeated for credit. P/NP or letter grading.
177XP. Taking Action: Arts Practice and Community Service. (4) Formerly numbered 177SL.) Seminar, four hours; outside study, eight hours. Enforced requisite: course C184. Designed for juniors/seniors. Application of training in world arts and cultures through service projects designed by students in collaboration with selected community organizations and institutions. Reflection on impact of service on communities and theories. May be repeated once for credit. P/NP or letter grading.

178. Advanced Private Instruction in World Arts and Cultures. (2 to 8) Studio, three to 12 hours. Designed for juniors/seniors. Private or semiprivate instruction in one world arts practice with distinguished community-based artist to be arranged by students and approved by instructor. May be repeated for maximum of 24 units. P/NP grading.

M179. Food Activism in Los Angeles: Narrating Pasts, Imagining Futures. (4) Same as Food Studies M179.) Lecture, two hours; discussion, two hours. Introduction to history and praxis of local interventions into food insecurity and the food system, including community gardens, pop-up markets, and care farms. Through ethnographic and oral history methodologies, students learn how food activists organize themselves, their history of power, and their tools to counteract injustices. Focus on relationships between food access, food politics, and food ethics; and social histories of race, class, urban planning, and housing discrimination. P/NP or letter grading.

C180. Variable Topics in Video Production/Practice. (4) Lecture, two hours; laboratory, two hours. Enforced requisite: course 80. Training in low-budget and independent video and documentary practice as research tool. Visual ethnography combined with experimental film. Introduction to history, ethics, and aesthetics of documenting subjects such as culture, performance, and dance. Focus on both expression and experience. Film and documentary theory, ethnography, and phenomenology used to create innovative and critical forms of visual documentation. Skills include shooting, sound recording, interview, and editing. May be repeated for credit. Concurrently scheduled with course C280, Letter grading.

181. Ethnographic Film. (4) Lecture, four hours. Survey of ethnographic film and video, with focus on studies of expressive culture. Emphasis on critical and comparative approaches to visual study of culture, community, and arts. P/NP or letter grading.

185. Junior-Year Proposal. (1) Lecture, 90 minutes; outside study, 90 minutes. Limited to World Arts and Cultures majors. Planning and execution of proposal (either senior focus or honors project) for senior-year study, with attention to exploring resources of department and University at large. May be repeated for credit. P/NP grading.

186A-186B. Senior Honors Projects in World Arts and Cultures. (5–8) Lecture, four hours; outside study, 11 hours. Course 186A is required to 186B. Limited to senior World Arts and Cultures majors. Application of conceptual and content from interdisciplinary major and independent projects. Methodologies may include critical, comparative, ethnographic, and performance approaches. Lecture/semester format with World Arts and Cultures faculty during first term; faculty-directed presentations of individual projects during second term. Letter grading.

M187. Indigenous Film. (8) Same as American Indian Studies M187.) Lecture, three hours; discussion, one hour. Introduction to study of indigenous films and representations, with focus on selected ethnographic, documentary, animated, and feature films ranging from 1920 to present. P/NP or letter grading.

188SA. Individual Studies for USIE Facilitators. (1) Tutorial, to be arranged. Enforced requisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

188SC. Individual Studies for USIE Facilitators. (2) Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

195. Community or Corporate Internships in World Arts and Cultures. (2 to 4) Tutorial, six hours. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide periodic reports of their experiences. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

199. Directed Research in World Arts and Cultures. (2 to 5) Tutorial, two hours. Preparation: 3.0 grade-point average in major. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty member. Paper or project required. May be repeated for maximum of 10 units. Individual contract required. P/NP or letter grading.

Graduate Courses

200. Theories of Culture. (4) Seminar, three hours; outside study, nine hours. Introduction to history of culture concept in arts, humanities, and social sciences. Analysis of contemporary debates concerning ownership and uses of world culture, and critical elucidation of study of culture. S/U or letter grading.

201. Theories of Performance. (4) Seminar, three hours; outside study, nine hours. Close reading and analysis of classic and contemporary studies of performance and related aesthetic practices. Familiarization with ways in which performance is defined and deployed by scholars working in disciplines of anthropology, dance, folklore, linguistics, literature, musicology, performance studies, philosophy, sociology, and theater. S/U or letter grading.

202. Research Methodologies. (4) Seminar, three hours; outside study, nine hours. Hands-on course designed to help students develop understanding of many developed qualitative research methods and designs they encounter in their work. Identification and creation of research problems, development of designs, actual data collection, and analysis procedures to address those problems. S/U or letter grading.

203. Proseminar: Dance Studies. (4) Seminar, three hours; outside study, nine hours. Survey of theoretical issues and problems in study of dance and body movement in cultural, social, and historical context. S/U or letter grading.

204. Theories of Corporeality. (4) Seminar, three hours; outside study, nine hours. Cross-cultural and interdisciplinary perspectives on human body. Topics include representations of bodies and identities, and analysis of dance and other somatic modes of performance. S/U or letter grading.

207. Ethnography of Performance. (4) Seminar, three hours; outside study, nine hours. Survey of methodologies in ethnographic study of performance in cultural context. Field documentation, participant observation, oral history and interview techniques, performative dimensions of ethnographic research, ethnics, and politics of ethnographic representation. S/U or letter grading.

210. Ethnography of and as Colonialism. (4) Seminar, three hours. Beginning with 1560 debates over Indian humanity and ranging to contemporary scholarship about and by indigenous peoples, focus on intersections of writing, colonialism, violence, and historiography in America. Exploration of relationship between eighteenth- and nineteenth-century, Western, and academic practices of writing history. Development of critical stance on utility of colonial theories as perspectives bear on anthropological and historical studies of indigenous religiosity. Regions include southwest Columbia, Orinoco Delta in Venezuela, Valley of Mexico, and several examples: throughout the Southwest, plains, and northeast. S/U or letter grading.

CM213B. Legislative Theater for Race and Gender Justice. (5) Same as African American Studies CM213B.) Lecture, three hours; discussion, one hour (when scheduled). Examination of range of interactive methods and arts-based strategies with participants from UCLA and broader Los Angeles community in order to research and influence public policy and legislation. Students design and campus partners create and perform legislative theater addressing issues of race, gender, and criminal justice system. Critical texts, collaborative work, and creative methods are used to engage perspectives on justice. Analysis of diverse and growing body of work on systems of justice through research, writing, workshops, performances, and critiques of original workshops and performances in response to visiting scholars and community partners. Concurrently scheduled with course CM113B. S/U or letter grading.

216. Analyzing Narrative and Oral Performance. (5) Lecture, four hours. Designed for graduate students. Exploration of ways of documenting individual narrators and interpreting their styles and repertoires; how narrators conceptualize and perform narrative discourse, impact of audience and situated event on both narrating and story, how experiences and values are communicated through narrating, modes of representing oral narrating, and politics of narrative and oral performance. S/U or letter grading.

220. Seminar: Culture and Performance. (4) Seminar, three hours; outside study, nine hours. Designed for graduate students. Variable topics in interdisciplinary study of performance and social and historical context. May be repeated for credit with topic change. S/U or letter grading.

C229. Food Customs and Symbolism. (4) Lecture, three hours; outside study, five hours. Exploration of range of interactive methods and arts-based strategies with participants from UCLA and broader Los Angeles community in order to research and influence public policy and legislation. Students design and campus partners create and perform legislative theater addressing issues of race, gender, and criminal Justice system. Critical texts, collaborative work, and creative methods are used to engage perspectives on justice. Analysis of diverse and growing body of work on systems of justice through research, writing, workshops, performances, and critiques of original workshops and performances in response to visiting scholars and community partners. Concurrently scheduled with course CM113B. S/U or letter grading.

CM230. Space and Place. (4) (Same as Architecture and Urban Studies CM230.) Lecture, three hours. Survey of array of spaces and places from cross-cultural or comparative perspective and with performance emphasis, with focus on mutual interaction of World Arts and Cultures/Dance / 875
human beings and their created environments. Emphasis on common, ordinary, anonymous, or vernacular nonbuilt and built environments, which are built and used by ordinary people. Focus on transitional communities around world. Concurrently scheduled with course CM130. S/U or letter grading.

C238. American Indian Arts in Performance. (4) Seminar, four hours. Acquisition of awareness and sensitivity to American Indian arts traditions within Native American worlds of performance and material culture and development of ability to focus on them and learn to conduct research on them. Examination of wide range of American Indian dance traditions within their possible range of such contexts, with performance given its most generous definition. Study of spectrum of genres, including architecture, social and dance re-galia, masks, and utilitarian material culture, to investigate how such items play their part and come alive through movement, sound, spoken word, silence, and even dreams and visions. Concurrently scheduled with course C139. S/U or letter grading.

C239. Afro-Caribbean Ritual Arts. (4) Lecture, three hours. Designed for graduate students. Introduction to diaspora African religions, with particular attention to Caribbean culture. Lectures, readings, and video material focus on ritual and its expression in religious art. Concurrently scheduled with course C139. S/U or letter grading.

CM240XP. Healing, Ritual, and Transformation. (4) (Formerly numbered CM243XP) Lecture, four hours; outside study, eight hours. Designed for graduate students. Examination of how various cultures think of health and wellness, not only individually but collectively. Exploration of structural inequalities within health care and medical sciences. Students are required to contribute weekly to service learning component, working with individuals and organizations in fields of health and wellness including healers, non-profits, and organizations working for social justice. May be concurrently scheduled with CM140XP. Letter grading.

C242. Myth and Ritual. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Examination of how various cultures think of health and wellness, not only individually but collectively. Exploration of structural inequalities within health care and medical sciences. Students are required to contribute weekly to service learning component, working with individuals and organizations in fields of health and wellness including healers, non-profits, and organizations working for social justice. May be concurrently scheduled with CM140XP. Letter grading.

C250. Critical Ethnographies. (5) Lecture, three hours. Enforced prerequisite: course 20 or 33. Survey of major tropes and rhetorical strategies to explicitly locate ethno-graphic method as key component of cross-cultural understanding. Examination of categorical notions of insider and outsider while also developing various perspectives on performance arts of identity formation. Concurrently scheduled with course C150. S/U or letter grading.

C252. Visual Cultures. (4) Lecture, three hours. How are ways of seeing constructed through culture, gender, religion, class, and nation? Theories and case studies from around the world. Emphasis on how social processes within which gaze is determined and image economics negotiate. Topics include scopic regimes, aesthetics of streamlined design, and visibility and liberation. Concurrently scheduled with course C20. S/U or letter grading.

C258. Theorizing Arts Activism. (4) Seminar, three hours. Historicizing and theorizing of arts activism to provide context for concerted analysis, creation, and promotion of a world of art. Emphasis on theoretical texts and current performance histories. Consideration of one particular activist project, with focus on ongoing activism sponsored by UCLA Art and Global Health Center. Arts activist projects and members supported and encouraged. Concurrently scheduled with course C158. S/U or letter grading.

C259. Art and Global Health. (4) Seminar, three hours. Exploration of interface of arts- and health-based methodologies in pursuit of improved health outcomes, using examples from international projects created and supported by UCLA Art and Global Health Center. Readings include texts by artists and arts scholars, and articles from health and medical literature. Seminar members propose their own arts-based health promotion interventions. Concurrently scheduled with course C159. S/U or letter grading.

CM166. Art in Real World. (4) (Same as Dance CM266.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Focus on understanding bureaucratic structures and regional histories conditioning creation of art in real world, including such practical issues as publicity and grant-writing. Concurrently scheduled with course CM168. S/U or letter grading.

C273. Sound Resources for Performance. (4) Lecture, three hours; studio, one hour; outside study, eight hours. Designed for graduate students. Exploration of music, in search of interesting, new, and unusual. Investigation of musical possibilities via record store, Internet, and music library; environmental sounds and patterns; body (clapping, stepping, and singing); and hardware store (found sound). Participants collaborate with fellow students in creative efforts and in presentations of research results. Concurrently scheduled with course C173. S/U or letter grading.

C280. Variable Topics in Video Production/Practice. (4) Lecture, two hours; laboratory, two hours. Enforced prerequisite: course 104. Focus on video and independent video and documentary practice as research tool. Visual ethnography combined with experimental film. Introduction to history, ethics, and aesthetics of documentary subjects, storytelling, performance, and dance among range of forms for bodily expression and experience. Film and documentary theory, ethnography, and phenomenology used to create innovative and critical forms of visual documentation. Skills include cinematography, sound recording, interviews, and digital editing. May be repeated once for credit. Concurrently scheduled with course C180. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprenticeship personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

400. Directed Professional Activities. (2 to 8) Lecture, to be arranged. Directed projects in professional education, bibliography, filmmography, videography, conference and festival direction, and other professional activities. May not be applied toward MA degree requirements. May be repeated. S/U grading.

451. Teaching Assistant Seminar. (2) Seminar, one hour; laboratory, three hours. Required of all World Arts and Culture Department teaching assistants. Lectures, discussion, readings, and practice teaching. May be repeated once for credit. S/U grading.

478. Advanced Private Instruction in World Arts and Cultures. (2 to 8) Studio, three to 12 hours; outside study, three to 12 hours. Private or semiprivate instruction with distinguished community-based artist to be arranged by students and approved by instructor. May be repeated for maximum of 24 units. S/U grading.

480. Seminar: Research Topics. (2 to 4) Seminar, two to four hours outside study, to be arranged. Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned, conducted, or recently completed. Students required to make minimum of one presentation each term they are enrolled for credit. May be repeated for maximum of 4 units. S/U grading.

495. Teaching Assistant Seminar. (2) Seminar, one hour; laboratory, three hours. Required of all World Arts and Culture Department teaching assistants. Lectures, discussion, readings, and practice teaching. May be repeated once for credit. S/U grading.

496. Teacher Preparation in World Arts and Cultures. (2) Seminar, two hours. Directed work in preparation for syllabi and gather resources for courses. Topics include development of teaching philosophy, evaluation/selection of course content, teaching methodologies, assessment/evaluation/grading practices, and consideration of practical, administrative, and ethical issues. Students meet with instructor to review their specific needs as they progress in development and elaboration of course plans. Microteaching sessions provide context for applying concepts and principles discussed. S/U grading.

596A. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

596F. Directed Study or Research in Hospital or Clinic. (2 to 8) Tutorial, to be arranged. S/U grading.

597. Preparation for Master's Comprehensive Examination or PhD Qualifying Examination. (2 to 8) Tutorial, to be arranged. Preparation for MA or MFA comprehensive examination or PhD qualifying examination. S/U grading.

Overview
Writing Programs is committed to inclusive pedagogy and student success, serving undergraduates through a curriculum in composition and English as a second language (ESL), as well as through the Undergraduate Writing Center (UWC). Writing Programs serves as the chief resource for writing and English language instruction through entry-level writing, first-year composition, writing-in-the-disciplines, and professional writing courses. Its courses play a vital role in preparing undergraduates from diverse linguistic and academic-skill backgrounds to succeed as writers/communicators in their UCLA studies as well as in future professional contexts. Writing Programs’ courses facilitate discovery, understanding, analysis, inspiration, community building, and global citizenship.

In addition, Writing Programs serves international graduate students as writers and communicators through graduate-level academic writing courses that satisfy the UCLA ESL requirement, elective writing workshops, and oral communication courses for international students who plan to serve as TAs and need to satisfy the Test of Oral Proficiency (TOP) requirement.

During the summer, matriculated UCLA students can complete some of their undergraduate writing requirements. Writing Programs also offers international summer visitors a suite of second language writing and communication courses.

Writing Programs works closely with the Office of Equity, Diversity, and Inclusion to help all students experience academic belonging, and bring together members of the UCLA and Los Angeles communities through service learning courses, summer bridge programs for high school students, the UCLA prison education program, and public events. Writing Programs educational initiatives promote the impact of writing, write large, around issues of self expression, public discourse, diversity, and experiential learning.

Undergraduate Study
The undergraduate curriculum develops writing skills in linguistic, visual, and digital forms, and encourages students to see the classroom as a place to be challenged by new ideas, to investigate, problem-solve, reflect, imagine, think and rethink, and ultimately, to learn. Writing Program’s undergraduate teaching mission is extended by the UWC, which aids thousands of students annually from all disciplines and all divisions at UCLA to communicate effectively in their coursework.

Entry-Level Writing
Every student who does not satisfy the Entry-Level Writing requirement by presenting transfer credit or acceptable test scores is required to take, as early as possible during the first year in residence, English Composition 1, 1A, 1B, 2, or 2I as determined by performance on the Analytical Writing Placement Examination (AWPE). Students who have not otherwise satisfied the Entry-Level Writing requirement and who have not taken the AWPE before entering UCLA must take it in their first term. For more information, see Entry-Level Writing in Undergraduate Study.

English as a Second Language Requirement
All entering undergraduate students whose native language is not English and who have not otherwise satisfied the English as a Second Language (ESL) requirement may be required to take one or more English composition courses designed for multilingual students (1A, 1B, 2I). First-year undergraduate students are placed in the courses based on the AWPE. Transfer students are placed in the courses based on the UCLA English as a Second Language Placement Examination (ESLPE). Transfer students who are required to take the ESLPE include those who have not yet satisfied the Intersegmental General Education Curriculum (IGETC), and those held at the discretion of Undergraduate Admission. The ESLPE may be taken once only.

Graduate Study
A curriculum in writing pedagogy for graduate students is also offered. Graduate writing instructors from across campus benefit from intensive writing pedagogy training as preparation for teaching freshman composition (satisfies Writing I requirement) and writing in the disciplines (satisfies Writing II requirement).

Writing Programs also provides writing pedagogy training for teaching assistants (TAs) in the Samueli School of Engineering, and the general education freshman cluster program, and the Freshman Summer Program and Transfer Summer Program in partnership with the Academic Advancement Program. Teaching assistants interested in expanding their professional teaching profile as writing specialists can pursue a graduate certificate in Writing Pedagogy, and participate in the certificate annual teaching symposium.

English as a Second Language Requirement
All entering graduate students whose native language is not English and who have not otherwise satisfied the English as a Second Language (ESL) requirement may be required to take one or more ESL courses. Students are placed in the courses based on the UCLA English as a Second Language Placement Examination (ESLPE) and may be held for up to two ESL courses (300, 301).

The following students are exempt from the ESL requirement: students who hold a bachelor’s or higher degree from a university located in the U.S. or in another country (e.g., Australia, Barbados, Canada, Ireland, Jamaica, New Zealand, United Kingdom) in which English is both the primary spoken language of daily life and the medium of instruction, or who have completed at least two years of full-time study at such an institution; and students with a score of 100 or better on the Test of English as a Foreign Language Internet-Based Test (TOEFL iBT), or at least a 7.5 overall band score on the International English Language Testing System (IELTS) examination. See International Applicants in Graduate Study.
Graduate Certificate
Writing Programs offers a graduate certificate in Writing Pedagogy.

English as a Second Language
Lower-Division Courses

19. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

20. Conversation and Fluency. (4) Lecture, four hours. Emphasis on speaking fluently in English by examining rules of conversation, participating actively in class discussions, making group presentations, and completing out-of-class assignments designed to promote interaction with native speakers and familiarize international students with UCLA campus and local community. Offered in summer only. P/NP or letter grading.

21. Pronunciation. (4) Lecture, four hours. Designed to improve clarity, accuracy, and understanding of spoken English through study and practice of pronunciation features as they occur in real speech, using models from television, movies, and online talks. Emphasis on individualized feedback through audorecording and videorecording technology. Offered in summer only. P/NP or letter grading.

22. Public Speaking. (4) Lecture, four hours. Emphasis on making presentations, interacting with audience members, and leading group discussions. Videorecording of student performances to allow students to improve through self and peer evaluation, as well as through individualized instructor feedback. Offered in summer only. P/NP or letter grading.

24. Preparation for American Universities. (4) Lecture, four hours. Designed for international students planning to study at American universities. Students research suitable undergraduate or graduate programs, interview advisers at local universities, and learn to write effective personal statements. Additional focus on understanding American society, listening, and speaking skills. Offered in summer only. P/NP or letter grading.

25. Academic Reading and Writing. (4) Lecture, four hours. Designed to improve reading speed, comprehension, and knowledge of academic writing conventions. Emphasis on synthesizing information from sources, providing proper citations, and avoiding plagiarism. Focus on development of ability to revise and edit one's own written work. Offered in summer only. P/NP or letter grading.

26. Business Communication: Speaking. (4) Lecture, four hours. Emphasis on giving business and marketing-focused presentations (both individual and group), handling audience questions, and running effective meetings. Videorecording of student performances to allow students to improve through self and peer evaluation, as well as through individualized instructor feedback. Offered in summer only. P/NP or letter grading.

27. Business Communication: Writing. (4) Lecture, four hours. Emphasis on writing persuasive texts for diverse business audiences. Topics include writing effective summaries, creating outlines, and developing professional online profiles. Offered in summer only. P/NP or letter grading.

28. English through Language, Culture, and Society. (4) Lecture, four hours. Survey of selective language structures through their occurrence within contemporary cultural and societal topics within thematic, content-based English language learning environment. Focus on understanding and applying these structures to improve fluency while enhancing critical thinking skills. Emphasis on understanding and applying written/spoke assignments that situate language within authentic contexts. Topics may include gender, sexuality, politics, humor, intercultural communication, media, international issues, and local/regional issues. P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

97A. Variable Topics in English as a Second Language. (4) Lecture, four hours. Specialized topics in English as second language or English for academic purposes. Emphasis on focusing to topics covered/or and audience to whom course is directed. May be repeated for credit with topic change. Offered in summer only. P/NP (undergraduates), S/U (graduates), or letter grading.

97B. Variable Topics in English as a Second Language Placement Examination. (2) Lecture, one hour. May be repeated for credit with topic change. Offered in summer only. P/NP or letter grading.

97C. Variable Topics in English as a Second Language Placement Examination. (1) Seminar, one hour. May be repeated for credit with topic change. Offered in summer only. P/NP or letter grading.

103. Pronunciation for Multilingual Students. (4) Lecture, four hours. Emphasis on accurate articulation of sounds, word stress, rhythm, linking between syllables, intonation, and other features of fluent spoken English, using variety of videorecorded models and online pronunciation resources. Individualized feedback provided through frequent recorded assignments. P/NP or letter grading.

105. Advanced Grammar and Style for Multilingual Students. (4) Lecture, five hours. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

300. Intermediate Writing and Communication for International Graduate Students. (4) Lecture, five hours. Enforced requisite: proficiency demonstrated on English as a Second Language Placement Examination. Development of academic writing skills with focus on reading comprehension, vocabulary development, and analysis of discipline-specific research articles, with additional work on fundamental composition techniques, grammar, and editing. S/U or letter grading.

301. High-Intermediate Writing and Communication for International Graduate Students. (4) Lecture, five hours. Enforced requisite: course 300 or proficiency demonstrated on English as a Second Language Placement Examination. Development of academic writing skills with focus on reading comprehension, vocabulary development, and composition techniques with additional work on grammar and editing. S/U or letter grading.

302. Advanced Writing Workshop for International Graduate Students. (4) Lecture, five hours. Requisite: course 301 or proficiency demonstrated on English as a Second Language Placement Examination. Writing and revision of papers for academic work or publication in student fields of study. Emphasis on rhetorical strategies as well as stylistic and organizational conventions for presenting research-based arguments in disciplines including humanities, social sciences, and pure and applied sciences. Focus on grammar structures and vocabulary that contribute to clear and coherent writing style. S/U or letter grading.

Graduate Courses

107. Academic Reading and Vocabulary for Multilingual Students. (4) Lecture, four hours. Emphasis on improving reading rate and comprehension, expanding academic vocabulary, and developing critical reading skills. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.
310. Pronunciation for International Teaching Assistants. (4) Lecture, five hours. Satisfies Test of Oral Proficiency (TOP) requirement for international graduate students who received marginal pass on TOP. Focus on accurate articulation of sounds, word stress, linking, and other features of fluent spoken English, using authentic models of classroom language. Additional emphasis on comprehending typical under-graduate speech. Frequent audio-recordings and video-recordings provide opportunity for self-review and individualized instructor feedback. SU grading.

311. Classroom Communication for International Teaching Assistants II. (4) Lecture, five hours. Focus on stress, rhythm, and intonation of fluent spoken English using audio and video recordings of actual classroom teaching situations. Communication patterns include building rapport, giving instructions, handling questions, and interacting in office hours. Micro-teaching performances video-recorded for self, peer, and instructor evaluation. SU/grading.

312. Classroom Communication for International Teaching Assistants III. (4) Lecture, five hours. Satisfies Test of Oral Proficiency (TOP) requirement for international graduate students who received marginal pass on TOP. Course 311 is not required to 312. Focus on stress, rhythm, and intonation of fluent spoken English using audio and video recordings of actual classroom teaching situations. Communication patterns include building rapport, giving instructions, handling questions, encouraging participation, and organizing lessons. Microteaching performances video-recorded for self, peer, and instructor evaluation. SU/grading.

313. Presentation and Discussion-Leading Skills for International Teaching Assistants. (4) Lecture, five hours. Satisfies Test of Oral Proficiency (TOP) requirement for international graduate students who received marginal pass on TOP. Focus on communicating effectively as teaching assistants through interactive teaching demonstrations and student-led discussions of topical issues in the field. Emphasis on presenting subject matter in well-organized, interactive, and accessible way. Student performances videorecorded for external self, peer, and instructor evaluation. SU/grading.

English Composition

Lower-Division Courses

1. Introduction to University Discourse. (4) Lecture, four hours. Required: prerequisite demonstrated on Analytical Writing Placement Examination. Introduction to demands of university-level critical reading and academic writing. Engagement in substantial and regular writing and revision assignments through practicing and building on reading, writing, and rhetorical skills. Emphasis on revision, developing syntactic variety and academic vocabulary, and editing for grammar and style. Composition of course with grade of C or better is requisite to course 2. Letter grading.

1A. Intermediate Composition for Multilingual Students. (4) Lecture, five hours. Enforced requisite: proficiency demonstrated on Analytical Writing Placement Examination. Introduction to demands of university critical reading and academic writing. Emphasis on reading comprehension, vocabulary development, and fundamental composition techniques, with additional work on grammar and editing. Letter grading.

1B. High-Intermediate Composition for Multilingual Students. (4) Lecture, five hours. Required: proficiency demonstrated on Analytical Writing Placement Examination (Enforced) or English pass on Second Language Placement Examination (transfer students). Development of academic writing skills with focus on reading comprehension, vocabulary development, and fundamental composition techniques, with additional work on grammar and editing. Letter grading.

1C. Advanced Composition for Multilingual Transfer Students. (5) Lecture, four hours. Prerequisite: proficiency demonstrated on Entry-Level Writing requirement or course 1B (C or better). Development of academic writing skills with focus on writing process, grammatical structures key to clear and effective style, and practice with major forms of academic writing, with additional work on Oral Proficiency Test. Course with grade of C or better satisfies English as a Second Language requirement. Letter grading.

2. Approaches to University Writing. (5) Lecture, four hours. Prerequisite: proficiency demonstrated on Analytical Writing Placement Examination (enforced) or course A (C or better). Second course in university-level discourse, with analysis and critique of university-level texts, focusing on argumentative coherence and effective style. Completion of course with grade of C or better satisfies Entry-Level Writing requirement. Letter grading.

3. Approaches to University Writing for Multilingual Students. (6) Lecture, six hours. Prerequisite: proficiency demonstrated on Analytical Writing Placement Examination (enforced) or course B (C or better). Second course in university-level discourse, with analysis and critique of university-level texts, focusing on argumentative coherence and effective style. Completion of course with grade of C or better satisfies Entry-Level Writing requirement. Letter grading.

3A. English Composition, Rhetoric, and Language. (5) Lecture, four hours. Prerequisite: satisfactory performance on Entry-Level Writing requirement or course 2 (C or better). Open for credit to students with credit for course 3, 3DS, 3E, or 3SL Rhetorical techniques and skillful argument. Focus on diversity and inclusiveness. Analysis of varieties of academic texts and writing of minimum of 20 pages of revised text. Completion of course with grade of C or better satisfies Writing I requirement. Letter grading.

3B. English Composition, Rhetoric, and Language. (5) Lecture, four hours. Prerequisite: satisfactory performance on Entry-Level Writing requirement or course 2 (C or better). Open for credit to students with grade of C or better satisfies Writing I requirement. Letter grading.

3D. English Composition, Rhetoric, and Language (Service Learning). (5) Formerly numbered 3DS. Lecture, three hours; fieldwork, two hours. Enforced requisite: satisfactory performance on Entry-Level Writing requirement or course 2 (C or better). Investigation of difference and diversity through writing and rhetoric. Critical examination of structures and institutions that promote asymmetrical power relations as well as responses of diverse groups to these inequalities. Original argumentation that engages with difference and responds to complexities of diverse societies. Service learning adds to understanding of diversity by offering firsthand interactions with diverse communities students are learning about. Completion of 20 hours of on-site service learning and development of critical thinking skills about diversity through classroom discussions, focused readings and service-learning experiences, as well as through reflective and analytical writing and research. Collection of course with grade of C or better satisfies Writing I requirement. Letter grading.

3E. English Composition, Rhetoric, and Language for Engineers. (5) Lecture, three hours. Enforced requisite: satisfactory performance on Entry-Level Writing requirement or course 2 (C or better). Open for credit to students with credit for course 3, 3D, 3DS, or 3SL Rhetorical techniques and skillful expository writing. Analysis of varieties of academic prose, including technical writing and brief expository technical elements. Minimum of 20 pages of revised text. Completion of course with grade of C or better satisfies Writing I requirement. Letter grading.

3SL. English Composition, Rhetoric, and Language (Service Learning). (5) Lecture, three hours; fieldwork, two hours. Enforced requisite: satisfactory performance on Entry-Level Writing requirement or course 2 or 2I (C or better). Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of minimum of 20 pages of revised text. Service learning component includes meaningful work with off-campus agencies selected by instructor. Course with grade of C or better satisfies Writing I requirement. Letter grading.

4. Writing Workshop for Multilingual Students. (5) Tutorial, four hours. Prerequisite: demonstrated on Analytical Writing Placement Examination or informed self-placement administered through Writing Programs. Corequisite: course 1 or 2. Multilingual students gain language awareness and skills that complement courses satisfying Entry-Level Writing requirement. May be repeated once for credit. P/NP grading.

5W. Literature, Culture, and Critical Inquiry. (5) Lecture, four hours. Enforced requisite: course 3. Use of literature in works within cultural context to engage students in critical thinking and writing about issues important to academic inquiry and responsible citizenship. Minimum of 15 to 20 pages of revised text required in addition to regular informal writing exercises. Satisfies Writing II requirement. Letter grading.

6W. Language, Culture, and Discourse. (5) Lecture, four hours. Enforced requisite: courses 2, 3, Study of structures and use of English and its relationship to social structure and cultural values. Readings in linguistic analysis, language acquisition, sociolinguistics, and pragmatics provide foundation as students analyze authentic language as it is used in private and public contexts. Minimum of 15 to 20 pages of revised writing required. Satisfies Writing II requirement. Letter grading.

18. Fiat Lux Freshman Seminars. (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. Offered in summer only. P/NP or letter grading.

51. Writing Workshop. (2) Lecture, five hours. Described for any students who have not yet enrolled in their first full term at UCLA. Introduction to demands of university writing and often untaught conventions that govern it. Writing techniques developed to address specific writing tasks such as timed examination, application essay, effective e-mail, and college paper. Offered in summer only. P/NP or letter grading.

51W. Writing Workshop. (2) Lecture, two hours. Limited to students admitted to the Freshman Writing Program who have not completed their first year of college coursework. Introduction to demands of university writing and often untaught conventions that govern it. Writing techniques developed to address specific writing tasks such as timed examinations, effective e-mails, and college papers, but also broad communication concerns such as classroom participation and oral presentations. P/NP grading.

52. Writing and Critical Thinking for Pre-College Scholars. (4) Lecture, 10 hours. Limited to students in VIP Scholars Program at UCLA. Introduction to demands of university writing, including research writing, with special focus on challenging students to think critically about world around them and their place in it within social justice framework. Offered in summer only, P/NP or letter grading.

89. Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division course lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward the 12 units of eligible students. Honors content noted on transcript. P/NP or letter grading.

89HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for
Upper-Division Courses

100W. Interdisciplinary Academic Writing. (5) Lecture, four hours. Requisite: course 3 or 3H or English as a Second Language 36. Designed for sophomore/juniors/seniors. Course in academic writing suitable for both lower- and upper-division students that helps them develop academic papers with range of complexity and length. Focus on conventions of academic prose and genres across disciplines. Written assignments include common forms of academic writing such as argument, research paper, and/or critical essay. Satisfies Writing II requirement. Letter grading.

100WD. Interdisciplinary Writing. (5) Lecture, four hours. Requisite: course 3, 3D, 3DS, or 3E. Course in academic writing suitable for both lower- and upper-division students that helps them develop academic papers with range of complexity and length. Focus on conventions of academic prose and genres across disciplines. Written assignments include common forms of academic writing such as argument, research paper, and/or critical essay. Satisfies Writing II requirement. Letter grading.

105D. Professional Writing: Business and Entrepreneurship. (5) Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3. Emphasis on developing written, oral, and visual communication skills for entrepreneurial settings. Common tasks including pitching idea, seeking funding for startup, or promoting product or service. P/NP or letter grading.

110. Writing Adjunct. (4) Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3 or 3H. Students must be concurrently enrolled in course offered in conjunction with course 110 (consult Schedule of Classes for courses so designated). Writing assignments use materials from adjunct course and reflect and develop analytic writing skills needed in that course. May be repeated for credit with consent of instructor. P/NP or letter grading.

120A. Language Study for Teachers: Elementary School. (4) Lecture, four hours. Requisite: satisfaction of Entry-Level Writing and English Composition requirements. Survey of topics in English linguistics of special interest to elementary school teachers. Topics include approaches to English grammar; language acquisition and development; language attitudes; regional and social dialects of American English; bilingual schooling; contribution of English language study to teaching of reading, writing, spelling, and literature. P/NP or letter grading.

123. Information Literacy and Research Skills. (1) Lecture, one hour. Preparation: satisfaction of Writing I requirement. Designed to help students become information literate so they know how to identify, locate, critically evaluate, and use print and electronic information effectively and ethically. Closely interwoven with Writing Programs courses that have information/research-related assignments. P/NP or letter grading.

129A-129D. Academic Writing in Disciplines. (4 each) Lecture. Designed for junior/seniors. Advanced study of writing conventions in specific disciplinary areas, with focus on analysis and development of writing expertise in common discursive forms, stylistic patterns, and research practices in give discipline. Each course may be taken independently for credit. P/NP or letter grading. 129A. Literature. 129B. Social Sciences. Lecture, three hours; discussion, one hour; 129C. Physical and Life Sciences. 129D. Fine Arts.

130A. Professional Writing: Digital Writing and Web Literacy. (5) Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3. Emphasis on writing for digital environments such as websites, blogs, newsletters, and social media. Common professional settings for these skills include journalism, political campaigns, Internet marketing, and corporate communication. P/NP or letter grading.

130B. Professional Writing: Business and Entrepreneurship. (5) Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3. Emphasis on developing written, oral, and visual communication skills for entrepreneurial settings. Common tasks including pitching idea, seeking funding for startup, or promoting product or service. P/NP or letter grading.

130D. Professional Writing: Nonprofits and Public Engagement. (5) Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3. Development of ability to write persuasively and effectively in both nonprofit and public sectors. Writing genres include mission and vision statements, grant proposals, public service announcements, and outreach campaigns. P/NP or letter grading.

130E. Professional Writing: Arts and Entertainment. (5) Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3. Emphasis on the economy of writing, including literary material and performances in areas such as film, television, theater, music, art/design, podcasts, and video games. Writing genres include critical reviews, recaps, promotional materials, treatments, and profiles. P/NP or letter grading.

131A-131C-131D. Specialized Writing. (4-4-4) Lecture, four hours. Requisite: satisfaction of Entry-Level Writing and English Composition requirements. Designed for juniors/seniors. Advanced writing course designed to help students develop stylistic, formal, and argumentative sophistication in various rhetorical contexts, including different sections that emphasize rhetorical values of major professions and research areas. Each course may be taken independently for credit. P/NP or letter grading. 131A. Law and Politics. 131C. Medicine and Public Health. 131D. Media and Communications.

131B. Specialized Writing: Business and Social Policy. (5) Lecture, four hours. Requisite: satisfaction of Entry-Level Writing and English Composition requirements. Designed for juniors/seniors. Advanced writing course designed to help students develop stylistic, formal, and argumentative sophistication in various rhetorical contexts, including different sections that emphasize rhetorical values of major professions and research areas. Each course may be taken independently for credit. P/NP or letter grading.

132. Variable Topics in Rhetoric and Writing. (5) Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3. Intensive study of rhetoric and writing within one academic or professional context. Consult Schedule of Classes for topic focus in specific term. May be repeated for credit with topic change. P/NP or letter grading.

132A-132B-132C. Topics in Rhetoric and Writing. (4-4-4) Lecture, four hours; discussion, one hour. Requisite: satisfaction of Entry-Level Writing and English Composition requirements. Designed for juniors/seniors. Study of specific topics in relationship between rhetoric/writing and social or political history. Each course may be taken independently for credit. P/NP or letter grading. English majors who wish to use course to satisfy departmental requisites must take it for letter grade. 132A. Gender and Writing; 132B. Autobiographical Writing; 132C. Cultural Studies.

133. Topics in Writing for Multimedia Environments. (5) Lecture, four hours. Requisite: satisfaction of Entry-Level Writing requirement, course 3. Special topics in professional writing exploring current developments, issues, or debates within art, entertainment, and/or digital media industries. May be repeated for maximum of 10 units. P/NP or letter grading.

134. Topics in Science Writing. (5) Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3. Special topics in professional writing exploring current developments, issues, or debates within specific field of science or technology. May be repeated for maximum of 10 units. P/NP or letter grading.

135. Professional Writing: Writing for Audio. (5) Formerly numbered 130F. Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3. Emphasis on writing for listening audiences such as podcasts and radio, building brand awareness to reach them, and engineering clean audio. Common professional settings for these skills include audio journalism, political campaigns, Internet marketing, and corporate communication. P/NP or letter grading.

136. Practical Writing and Editing. (5) Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3. Special topics in professional writing exploring current developments, issues, or debates within art, entertainment, and/or digital media industries. May be repeated for maximum of 10 units. P/NP or letter grading.

137. Writing for Public Speaking. (5) Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3. Emphasis on careful preparation, rehearsal, and delivery of professional presentations including design of effective visual aids and delivery. P/NP or letter grading.

M138. Topics in Creative Writing. (5) Same as English M138. Seminar, three hours. Requisite: course 3 or 3D or 3DS or 3SL. Introductory workshop in genre(s) of instructor choice, that may include mixed genres, playwriting, screenwriting, literary nonfiction, or poetry. May be repeated for maximum of 15 units. P/NP or letter grading.

M141. Current Methods of Language Teaching. (5) (Same as Linguistics M141.) Lecture, four hours; discussion, one hour. Enforced requisite: Linguistics 20. Survey of the theory and practice of current and/or various periods, and for a variety of contexts. Aims to make a major 100-level course in one or more periods, as approved by instructor. P/NP or letter grading.

142. Teaching Grammar and Style. (4) Lecture, four hours. Requisite: Linguistics 20. Survey of English language structures and conventions to better understand relationships among forms/structure, meaning, and stylistic effects. Emphasizes understanding of teachers’ ability to explain structures and to articulate nuances of meaning. Exploration of grammar and style in terms of design and lesson building. P/NP or letter grading.

175. Apprenticeship in Composition Tutoring. (2) Seminar, two hours. Enforced requisite: satisfaction of Writing II requirement. Composition Peer Learning Facilitators (PLFs) who work in Undergraduate Writing Center provided with ongoing mentoring in composition and peer learning methodologies. Overview of language, writing, and literacy needs of diverse college-age writers, including developing writers, multilingual writers, and nonnative English-speaking (NNES) writers. Provides opportunity to reflect critically on
Graduate Courses

375. Teaching Apprentice Practicum. (1-4) Seminar, to be arranged. Preparation: apprentice personnel in teaching assistant, second-year associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit with consent of instructor. P/NP grading.

180. Research Practice. (Formerly numbered M180.) Lecture, four hours. Advanced workshop designed for juniors and seniors engaged in large-scale research projects. Students present their research projects in class, develop collegiality and critical analysis. Open to all students. May be repeated for credit with consent of instructor. P/NP grading.

M185. Professional Writing Capstone. (4) Same as English M185.) Seminar, four hours. Limited to junior/senior professional writing majors. Topical writing workshop on rhetorical strategies useful in written and multimodal genres. Intended to provide students with opportunity for serious engagement with writing project in their minor specialization under close faculty supervision. Explores the relationship between critical analysis and the classroom. Reading, discussion, oral presentations, rhetorical analysis, and development of professional portfolio. Students develop their capstone projects, including identifying appropriate models, generic expectations, and rhetorical choices. P/NP or letter grading.

189. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture courses. Exploration of topics of greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

189HC. Honors Contracts. (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lead course instructor to explore topics of greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

M192. Undergraduate Practicum in English: Journals. (2) Same as English M192.) Seminar, two hours. Training and supervised practicum for undergraduate students engaged in Keeping Journals supervised by faculty members in English and/or Writing Programs. May be repeated for credit. P/NP or letter grading.

195. Community or Corporate Internships in English Composition. (2 to 4) Tutorial, to be arranged. Required: course 3 or 3H. Limited to juniors/senior. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

199. Directed Research or Senior Project in English Composition. (2 to 4) Tutorial, to be arranged. Required: course 3 or 3H. Limited to seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

375. Teaching Apprentice Practicum. (1-4) Seminar, to be arranged. Preparation: apprentice personnel in teaching assistant, second-year associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit with consent of instructor. P/NP grading.

401. Current Issues in University Writing Pedagogy. (4) Seminar, three hours. Limited to graduate students. Exploration of literature and theories of postsecondary writing pedagogy that may include focus on changing institutional role of writing instruction, multimodal composition, linguistic/educational diversity. S/U or letter grading.

402. Writing Pedagogy across Disciplines: Genre and Discourse. (4) Seminar, three hours. Limited to graduate students. Survey of literature on academic writing across curricula. Examination of writing conventions, genres, and styles in graduate student academic disciplines, with focus on evolving academic discourse in emerging and hybrid areas of inquiry. Development of knowledge of advanced composition pedagogy to changes in disciplinary academic discourse, with discussion of challenges for multilingual learners. S/U or letter grading.

404. Diversity and Student-Centered Pedagogy. (4) Seminar, three hours. Limited to graduate students. Survey of theories of writing in the context of social and cultural diversity, with focus on diversity of race, socioeconomic status, geographic background, linguistic skills, and academic preparedness. Development of best practices for accommodating diverse student populations and building active inclusive curriculum and classroom environments at university level. S/U or letter grading.

405A. Teaching Preparation Seminar: Second Language Learners. (4) Seminar, three hours. Limited to graduate students. Required of all English as a second language (ESL) teaching assistants and open to students seeking Graduate Certificate in Writing Pedagogy. Focus on pedagogical issues specifically related to academic reading and composition skills for second language learners, including course design, assessment of student writing, conferencing, and specialized problems that may occur in teaching ESL courses. S/U grading.

405B. Supervised Teaching of Language Learners. (2) Seminar, two hours. Enforced requisite: course 405A. Required of all English as second language (ESL) teaching assistants each year. They are assigned to help English language (ESL) teaching assistants in composition pedagogy, writing course design, assessment of student writing, and specialized problems that may occur in teaching ESL courses. S/U grading.

405C. Teaching Preparation Seminar: First-Year Composition. (4) Seminar, three hours. Limited to graduate students. Required of all teaching assistants prior to teaching English Composition 3 courses and open to teaching assistants for Writing I. Focus on composition pedagogy, writing course design, assessment of student writing, and specialized problems that may occur in teaching English Composition 3 courses. May be repeated for credit. S/U grading.

405D. Supervised Teaching of First-Year Composition. (2) Seminar, two hours. Enforced requisite: course 405C. Required of all teaching assistants who are assigned to English Composition 3 courses. Focus on composition pedagogy, course design, assessment of student writing, and specialized problems that may occur in teaching English Composition 3. May be repeated for credit. S/U grading.

405E. Teaching Preparation Seminar: Writing in Disciplines. (2) Seminar, three hours every other week. Limited to graduate students. Required of all teaching assistants for Writing II courses not exempt by appropriate departmental or program training. Mentoring conferences and teaching observations, with focus on student-centered pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in disciplinary contexts. Practical concerns of creating assignments, marking and grading essays, and conducting peer reviews and conferences. May be repeated for credit. S/U grading.

405F. Supervised Teaching of Writing in Disciplines. (2) Seminar, two hours. Enforced requisite: course 405E. Required of all teaching assistants for Writing II courses not exempt by appropriate departmental or program training. Mentoring conferences and teaching observations, with focus on student-centered pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in disciplinary contexts. Practical concerns of creating assignments, marking and grading essays, and conducting peer reviews and conferences. May be repeated for credit. S/U grading.

M495I. Teaching Preparation Seminar: Writing for Engineers. (4) Same as Engineering M495I.) Seminar, two and one half hours. Limited to graduate students. Required of all teaching assistants for writing courses not exempt by appropriate departmental or program training. Exploration of topics in engineering writing, with a focus on student-centered pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in engineering writing contexts. Practical concerns of preparing students to write course assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.

M495J. Supervised Teaching of Writing for Engineers. (4) Same as Engineering M495J.) Seminar, one hour. Enforced requisite: course 405I. Required of all teaching assistants in teaching English Composition 2 or 3 courses. Training for engineering writing courses. Mentoring in group and individual meetings. Continued focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in engineering writing contexts. Practical concerns of preparing students to write course assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.

M495K. Teaching Preparation Seminar: Teaching and Writing Pedagogies for Electrical Engineers. (2) Same as Electrical and Computer Engineering M495K.) Seminar, two hours. Enforced requisite: course 405I. Required of all teaching assistants in teaching English Composition 2 or 3 courses. Training for electrical engineering writing courses. Mentoring in group and individual meetings. Continued focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in engineering writing contexts. Practical concerns of preparing students to write course assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.

M495L. Teaching Preparation Seminar: Teaching and Writing Pedagogies for Electrical Engineers. (2) Same as Electrical and Computer Engineering M495L.) Seminar, two hours. Enforced requisite: course 405J. Required of all teaching assistants in teaching English Composition 2 or 3 courses. Training for electrical engineering writing courses. Mentoring in group and individual meetings. Continued focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in engineering writing contexts. Practical concerns of preparing students to write course assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.

M495M. Teaching Preparation Seminar: Teaching and Writing Pedagogies for Electrical Engineers. (2) Same as Electrical and Computer Engineering M495M.) Seminar, two hours. Enforced requisite: course 405J. Required of all teaching assistants in teaching English Composition 2 or 3 courses. Training for electrical engineering writing courses. Mentoring in group and individual meetings. Continued focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in engineering writing contexts. Practical concerns of preparing students to write course assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.
texts. Practical concerns of creating assignments, responding to and grading essays, and conducting peer reviews and conferences. May be repeated for credit. S/U grading.

495P. Teaching Preparation Seminar: Empowering Culturally Diverse Student Writers. (2) Seminar, two hours. Limited to graduate students. Recommended for all teaching assistants planning to teach English composition as part of AAP’s summer bridge programs. Focus on pedagogy that serves heterogeneous classrooms, with emphasis on diversity of race, socioeconomic status, citizenship status, and academic preparedness. Practical concerns include lesson planning and professionalization for composition instructors. S/U grading.

495S. Supervised Summer Teaching of Language and Composition. (2) Seminar, 90 minutes. Requisite: course 495A or 495C. Recommended for all teaching assistants teaching English as a second language, English composition, and Writing II courses during summer. Focus determined on individual basis according to class appointed and may include oral skills pedagogy, composition pedagogy, course design, assessment of student performance, and specialized problems that may occur in intensive summer language and/or composition courses. Supervision during appointment and mentor meetings and reflection on teaching experience following summer appointment. S/U grading.

496. Special Projects in Language and Writing Pedagogy. (1 to 4) Tutorial, three hours. Limited to Writing Pedagogy graduate certificate students. Reflective teaching experience, practicum experience, specialized curriculum development project, or independent research project under guidance of faculty mentor. Individual contract required. S/U grading.

499. Academic Professionalization Colloquium. (2) Colloquium/workshop, three hours every other week. Limited to graduate students. Rotating speakers on topics such as designing digital teaching portfolio, drafting academic/teaching curriculum vitae (CV), writing application letters for academic jobs, and pursuing alternative academic careers. Speaker sessions and panels to be followed by workshops. Revision of application letter, CV, teaching portfolio, or other relevant document to be determined in consultation with colloquium organizer. S/U grading.
Appendixes

Appendix A: University Administrative Officers

University of California (UC) administrative officers include the systemwide Board of Regents, Office of the university president, and chancellors of the ten state campuses. UCLA officers include administrative and academic executives, and deans of the College and schools.

UC Board of Regents

Terms of Regents appointed by the Governor expire March 1 of the year in parentheses. The student Regent and alumni Regents serve a one-year term beginning July 1 and ending June 30 of the year shown.

Regents Ex Officio

- Michael V. Drake, President of the University
- Keith Ellis (2024), Vice President, Alumni Associations of UC
- Eleni T. Kounalakis, Lieutenant Governor of California
- Gavin C. Newsom, Governor of California
- Joel Raznick (2024), President, Alumni Associations of UC
- Tony K. Thurmond, State Superintendent of Public Instruction

Appointed Regents

- Maria Anguiano (2028)
- Elaine E. Batchlor (2033)
- Carmen Chu (2030)
- Michael Cohen (2030)
- Gareth Elliott (2025)
- Howard Peter Guber (2029)
- Jose M. Hernandez (2033)
- Richard Leib (2026)
- Hadi Makarechian (2032)
- Ana Matosantos (2034)
- Lark Park (2029)
- John A. Pérez (2024)
- Janet Reilly (2028)
- Mark Robinson (2034)
- Richard Sherman (2026)
- Jonathan Jay Sures (2032)
- Merhawi Tesfai (2024), Student Regent

Faculty Representatives

- Steven Cheung (2024), Senate Vice Chair
- James Steintrager (2024), Senate Chair

Staff Adviser

- Jo Mackness (2024), Berkeley

Officers of the Regents

- Alexander Bustamante, Executive Vice President; Chief Compliance and Audit Officer
- Gareth Elliott, Vice Chair
- Richard Leib, Chair
- Tricia Lyall, Secretary and Chief of Staff
- Gavin C. Newsom, President
- Charles F. Robinson, Senior Vice President; General Counsel
- Jagdeep Singh Bachher, Vice President, Investments; Chief Investment Officer

UC Office of the President

- Michael V. Drake, University President
- Nathan Brostrom, Executive Vice President; Chief Financial Officer
- Alexander Bustamante, Executive Vice President; Chief Compliance and Audit Officer
- Carrie Byington, Executive Vice President; UC Health
- Rachael Nava, Executive Vice President; Chief Operating Officer
- Katherine S. Newman, Executive Vice President, Academic Affairs; Provost
- Michael Reese, Senior Vice President, External Relations and Communication (Interim)
- Charles F. Robinson, Senior Vice President; General Counsel
- Jagdeep Singh Bachher, Vice President, Investments; Chief Investment Officer
- Pamela Brown, Vice President, Institutional Research and Academic Planning
- Yvette Gullatt, Vice President, Graduate, Undergraduate, and Equity Affairs; Vice Provost; Chief Diversity Officer
- Glenda Humiston, Vice President, Agriculture and Natural Resources
- Craig Leasure, Vice President, National Laboratories
- Cheryl Lloyd, Vice President, Human Resources
- Theresa A. Maldonado, Vice President, Research and Innovation
- Van Williams, Vice President, Information Technology Services; Chief Information Officer
- Kathleen Fullerton, Associate Vice President, State Government Relations
- Christopher Harrington, Associate Vice President, Federal Government Relations

UC Campus Chancellors

- Gene D. Block, Los Angeles
- Carol T. Christ, Berkeley
- Howard Gilliman, Irvine
- Sam Hawgood, San Francisco
- Pradeep K. Khosla, San Diego
- Cynthia K. Larive, Santa Cruz
- Gary S. May, Davis
- Juan Sánchez Muñoz, Merced
- Kim A. Wilcox, Riverside
- Henry T. Yang, Santa Barbara

UCLA Administrative Officers

- Gene D. Block, Chancellor
- Darnell M. Hunt, Executive Vice Chancellor and Provost
- Michael J. Beck, Administrative Vice Chancellor
- Allison Baird-James, Vice Chancellor; Chief Financial Officer (Interim)
- Ina Bryant, Vice Chancellor, Legal Affairs (Interim)
- Mitchell J. Chang, Vice Chancellor, Equity, Diversity, and Inclusion (Interim)
- Monroe Gorden, Jr., Vice Chancellor, Student Affairs
As of publication, UCLA has 531 endowed chairs that have been activities of distinguished faculty members. Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the three missions of education, research, and community service. Among the principal forms of private support are endowed professorships, or chairs, which support the educational and research activities of distinguished faculty members. As of publication, UCLA has 531 endowed chairs that have been approved by the UC Office of the President.

School of Dentistry

Alumni and Friends Oral and Maxillofacial Surgery Endowed Chair
Alumni and Friends Presidential Endowed Chair
Thomas R. Bales Chair in Orthodontics
Thomas K. Barber Endowed Chair in Pediatric Dentistry
Naomi and Jim Ellison Endowed Chair
Lee Family Endowed Chair
Momentum Endowed Chair in Special Patient Care
Nobel Biocare Endowed Chair in Surgical Implant Dentistry
Dr. No-Hee Park Chair in Dentistry
Tarrson Family Endowed Chair in Periodontics
Jack A. Weichman Chair in Endodontics
Bob and Marion Wilson Endowed Chair
Felix and Mildred Yip Endowed Professorship in Dentistry

School of Education and Information Studies

Martin and Bernard Breslauer Professorship in Bibliography
Allan Murray Carter Chair in Higher Education
Dr. Rosalyn Shostak Heyman and Dr. Max L. Heyman, Jr., Endowed Chair
George F. Kneller Chair in Education and Anthropology
George F. Kneller Chair in Education and Philosophy
Presidential Chair in Education and Diversity
Pritzker Family Endowed Chair in Education to Strengthen Families
Wasserman Endowed Deanship of Education and Information Studies

Henry Samueli School of Engineering and Applied Science

L.M.K. Boelter Chair in Engineering
Collins Aerospace Term Chair for Excellence
Collins Aerospace Term Chair for Innovation
Vijay K. Dhir Chair in Engineering
Trafton and Dorothea Frederking Endowed Chair
Norman E. Friedmann Chair in Knowledge Sciences
Armond and Elena Hairapetian Chair in Engineering and Medicine
Tatsuo Itoh Endowed Chair in Electrical and Computer Engineering
Leonard Kleinrock Term Chair in Computer Science
Evelyn Knight Chair in Engineering
Levi James Knight, Jr., Chair for Innovation
Levi James Knight, Jr., Term Chair for Excellence
Fang Lu Endowed Chair in Engineering
J.M. Maguire Term Chair in Engineering
Richard G. Newman AECOM Endowed Chair in Civil Engineering
Nippon Sheet Glass Company Chair in Materials Science
Northrop Grumman Chair in Electrical Engineering
Northrop Grumman Chair in Electrical Engineering/Electromagnetics
Northrop Grumman Opto-Electronic Chair in Electrical Engineering
Mukund Padmanabhan Term Chair
Mukund Padmanabhan Term Chair Electrical Engineering
Vijay K. Dhir Chair in Engineering
Ralph M. Parsons Foundation Chair in Chemical Engineering
Jonathan B. Postel Chair in Computer Systems
Jonathan B. Postel Chair in Networking
Presidential Endowed Chair in Structural Engineering
Pritzker Chair in Sustainability
Raytheon Company Chair in Electrical Engineering
Raytheon Company Chair in Mechanical Engineering
Charles P. Reames Endowed Chair in Electrical Engineering
Ben Rich Lockheed Martin Chair in Aeronautics
Sabol-Scott Term Chair in Civil and Environmental Engineering

Appendix B: Endowed Chairs

Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the three missions of education, research, and community service. Among the principal forms of private support are endowed professorships, or chairs, which support the educational and research activities of distinguished faculty members. As of publication, UCLA has 531 endowed chairs that have been approved by the UC Office of the President.

Dr. Allen and Charlotte Ginsburg Endowed Chair in Translational Genomics
Nancy and Jonathan Glaser Endowed Chair for Pediatric Sarcomas
Joan S. and Ralph N. Goldwyn Endowed Chair in Immunobiology and Transplantation Research
Victor Goodhill, MD, Chair in Head and Neck Surgery
Laurie and Steven C. Gordon Chair in Neurosciences
Laurie and Steven C. Gordon Chair in Neurosurgery
Steven C. Gordon Family Chair in Parkinson’s Disease Research
Dolly Green Chair in Clinical Research
Dolly Green Chair in Ophthalmology
Dolly Green Chair in Vision Science
Thomas N. Grove Chair in Anesthesiology
Maud Cady Guthman Chair in Cardiology
Muriel Harris Chair in Geriatric Psychiatry
Shirley M. Hatos Chair
Stefan Hatos Endowed Chair in Psychiatry and Biobehavioral Sciences
Gavin S. Herbert Endowed Chair for Macular Degeneration
Ernest G. Herman Chair in Ophthalmology
Christian Herrmann, Jr., MD Endowed Chair in Neuromuscular Disease
Holt and Jo Hickman Endowed Chair in Advanced Lung Disease and Lung Transplantation
Ronald S. Hirshberg Chair in Translational Pancreatic Cancer Research
Stanley Iezman and Nancy Stark Endowed Chair in Thoracic Radiation Oncology Research
A. Ray Irving, Jr., MD, Chair in Clinical Ophthalmology
John Jergens Chair in Kidney Transplantation
Kaiser Permanente Chair in Community Medicine
Margaret Holden Jones Kanaar, MD, Chair in Cerebral Palsy
Solomon A. and Marie M. Kaplan Chair in Pediatric Endocrinology
Maddie Katz Endowed Chair in Palliative Care Research and Education
Ronald L. Katz, MD, Endowed Chair in Anesthesiology
Chizuko and Nobuyuki Kawata Chair in Cardiology
Dorothy and Robert Keyser Endowed Chair
Karl Kirchgenssner Foundation Chair in Vision Science
Arnold W. Klein, MD, Chair in Dermatology
George F. Kneller Chair in Family Medicine
Kolokotrones Chair in Ophthalmology
John J. Kuiper Chair in Nephrology and Renal Transplantation
Grace and Walter Lantz Endowed Chair in Ophthalmology
Lya and Harrison Latta Chair in Pathology
Lauren B. Leichtman and Arthur E. Levine Endowed Chair in Women’s Health Research
Eleanor Leslie Chair in Innovative Brain Research
Eleanor Leslie Chair in Pioneering Brain Research
Eleanor I. Leslie Chair of Neuroscience
Barbara Gerald Levey Endowed Chair
Gerald S. Levey, MD, Endowed Chair
Shirley LeVine Chair in Pediatric Education
Bert O. Levy Endowed Chair in Orbital and Ophthalmic Plastic Surgery
Hilal Lewis Family Chair in Ophthalmology
Walton Li Chair in Cornea and Uveitis
Lincy Foundation Chair in Clinical Gastroenterology
Mark S. Litwin, MD, Endowed Chair in Mentorship
William P. Longmire, Jr., Chair in Surgery
Olve and Angela Lundgren Endowed Chair
Meyer and Renee Luskin Chair in Migraine and Headache Studies
Gordon and Virginia MacDonald Distinguished Chair in Human Genetics
Charles H. Markham Chair in Neurology
Nancy Marks Endowed Chair in Women’s Health Research
Della Martin Chair in Psychiatry
Mattel Executive Endowed Chair in Pediatrics
Appendixes / 888

Herb Alpert School of Music

Kenny Burrell Chair in Jazz Studies
Susan G. Covel and Mitchel D. Covel, MD, Chair in Music
Mickey Katz Endowed Chair in Jewish Music
Leo M. and Elaine Krown Klein Chair in Performance Studies
Mohindar Brar Sambhi Endowed Chair in Indian Music
Shapiro Family Chair in Piano Performance

Simms/Mann Family Foundation Chair in Integrative Oncology
Jennifer Jones Simon Chair in Radiation Oncology
Norton Simon Chair in Biophysics
Jonathan Sinay Chair in Epilepsy
Henry E. Singleton Chair in Urology
Jack H. Skirball Chair in Multiple Sclerosis Research
Jack H. Skirball Chair in Ocular Inflammatory Diseases
Jack H. Skirball Chair in Pediatrics
P. Gene and Elaine Smith Endowed Chair in Alzheimer’s Disease Research
Rebecca Smith Chair in Molecular and Cellular Pathology
Rory Smith, MD, Endowed Chair
Smotrich Family Optometric Clinician-Scientist Chair
Jerome and Joan Snyder Chair in Ophthalmology
Joan and Jerome Snyder Chair in Cornea Diseases
Joan and Jerome Snyder Chair in Vision Science
George F. Solomon Professorship in Psychobiology
Spiegelberg Family Chair in Urologic Oncology
Norman F. Sprague Chair in Molecular Oncology
Frances Stark Chair in Neurology
Fran and Ray Stark Foundation Chair in Digestive Diseases
Fran and Ray Stark Foundation Chair in Ophthalmology
Fran and Ray Stark Foundation Chair in Urology
Peter Starrett Term Chair in Medical Education
Rupert and Gertrude Steiger Vision Research Chair
Jules Stein Chair in Ophthalmology
Michael and Sue Steinberg Endowed Chair in Global AIDS Prevention and Policy Research
W. Eugene Stern Chair in Neurosurgery
E. Richard Stiehm Endowed Chair in Pediatric Allergy, Immunology, and Rheumatology
Ruth and Raymond H. Stotter Chair in Neurosurgery
Bradley R. Straatsma, MD, Endowed Chair in Ophthalmology
Dorothy and Leonard Straus Endowed Chair in Gastroenterology in Memory of Gussie Borun
Streisand Chair in Cardiology
Dr. Allen J. Swartz and Roslyn Holt Swartz Women’s Lung Health Endowed Chair
Kelly Lee Tarantino Endowed Term Chair in Integrative Liver Transplantation
Dr. George Tarjan Chair in Intellectual and Developmental Disabilities Research
Michael E. Tennenbaum Family Endowed Chair in Creativity Research
Paul I. Terasaki Chair in Surgery
Flora L. Thornton Chair in Vision Research
Leon J. Tiber, MD, and David S. Alpert, MD, Chair in Medicine
Vernon O. Underwood Family Chair in Ophthalmology
Phill Woodrow Van Wagoner Professorship
Variety Club—D. Barry Reardon Endowed Chair in Pediatric Hematology/Oncology
Richard D. and Ruth P. Walter Chair in Neurology
Richard D. and Ruth P. Walter Chair in Psychiatry
Charles Stewart Warren and Hildegard Warren Endowed Research Chair
Wasserman Professor of Ophthalmology
Wasserman Term Chair for Innovation
David Well Chair in Psychiatry and Biobehavioral Sciences
Dr. Louis Jolyon West Chair for Innovation in Psychiatry
Dr. Louis Jolyon West Chair for Excellence in Psychiatry
Wilder Chair in Psychiatry and Neuroscience
Susan and David Wilstein Endowed Chair in Medicine
Susan and David Wilstein Endowed Chair in Rehabilitation Medicine
Judith and Robert Winston Chair in Pediatric Urology

Appendixes / 888
School of Nursing
Lulu Wolf Hassenplug Chair in Nursing
Audrienne H. Moseley Chair in Biological Nursing Science
Audrienne H. Moseley Chair in Community Health Research
Audrienne H. Moseley Chair in Nursing
Audrienne H. Moseley Endowed Chair in Equity, Diversity, and Inclusion
Shapiro Family Endowed Chair in Developmental Disability Studies

Meyer and Renee Luskin School of Public Affairs
Marjorie Crump Chair in Social Welfare
Franklin D. Gilliam, Jr. Chair in Social Justice
Meyer and Renee Luskin Chair in Innovation and Sustainability
Luskin Endowed Chair for Dean of the School of Public Affairs

Jonathan and Karin Fielding School of Public Health
Fred H. Bixby Chair in Population Policy
Jonathan and Karin Fielding Presidential Chair in Health and Equity
Jonathan E. Fielding Chair in Climate Change and Public Health
Gordon–Levin Endowed Chair in Infectious Diseases and Public Health
Paul Torrens Chair in Healthcare Management
Fred W. and Pamela K. Wasserman Chair in Health Policy and Management

School of Theater, Film, and Television
David C. Copley Chair for Study of Costume Design
Lew and Pamela Hunter/Jonathan and Janice Zakin Chair in Screenwriting
Rouben Mamoulian Visiting Chair in Film Directing
Rouben Mamoulian Visiting Chair in Theater Directing

Chancellor’s Office
James S. Coleman Chair in International Development Studies
Betsy Wood Knapp Chair for Innovation and Creativity

Institute of American Cultures
George and Sakaye Aratani Chair in Japanese American Incarceration, Redress, and Community
Ralph Bunche Chair in International Studies
Morgan and Helen Chu Endowed Chair in Asian American Studies
Helen and Morgan Chu Endowed Director’s Chair of the Asian American Studies Center
Korea Times–Hankook Ilbo Endowed Chair in Korean American Studies
UCLA Alumni and Friends of Japanese Ancestry Chair in Japanese American Studies
Walter and Shirley Wang Chair in U.S./China Relations and Communications

International Institute
Rosalinde and Arthur Gilbert Foundation Endowed Chair in Israel Studies
Dong Soon Im and Mi Ja Im Endowed Chair in Korean Christianity
Paul I. and Hisako Terasaki Chair in Contemporary Japanese Studies
Terasaki Chair in U.S.–Japanese Relations

Appendix C: Faculty Honors

Distinguished Teaching Awards

Academic Senate Recipients

Each year the UCLA Alumni Association presents Distinguished Teaching Awards to Academic Senate faculty members. The highly prized awards are presented at the annual Andrea L. Rich Night to Honor Teaching, and selection of recipients is based on recommendations of the Academic Senate Committee on Teaching. Nominations are solicited from academic departments during fall quarter.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 were named the Luckman Distinguished Teaching Awards.

1961
John F. Barron (Economics)
Hector E. Hall (Physiology)
Kenneth N. Trueblood (Chemistry and Biochemistry)

1962
Charles W. Hoffman (Germanic Languages)
Thomas P. Jenkin (Political Science)
Ken Nobe (Chemical Engineering)

1963
Carl W. Hagge (Germanic Languages)
Wendell P. Jones (Education)
Robert H. Sorgenfrey (Mathematics)
Saul Winstein (Chemistry and Biochemistry)

1964
Mostafa A. El-Sayed (Chemistry and Biochemistry)
Leon Howard (English)
Moise F. Rubinstein (Civil and Environmental Engineering)

1965
E.A. Carlson (Biology)
W.R. Hitchcock (History)
Allen Parducci (Psychology)
William R. Romig (Microbiology and Molecular Genetics)

1966
George A. Bartholomew (Biology)
William P. Gerberding (Political Science)
Hans Meyerhoff (Philosophy)
Joseph E. Spencer (Geography)

1967
Basil Gordon (Mathematics)
J.A.C. Grant (Political Science)
William Matthews (English)
David S. Saxon (Physics and Astronomy)
E.K.L. Upton (Physics and Astronomy)

1968
Edward W. Graham (Chemistry and Biochemistry)
W. James Popham (Education)
Sydney C. Rittenberg (Microbiology and Molecular Genetics)
Robert P. Stockwell (Linguistics)
Fred N. White (Physiology)

1969
Robert J. Finkelstein (Physics and Astronomy)
Douglas S. Hobbs (Political Science)
J.E. Phillips (English)
Raymond M. Redheffer (Mathematics)
Margret I. Sellers (Microbiology and Immunology)

1970
Ehrhard Bahr (Germanic Languages)
Joseph Cascarano (Biology)
B. Lamar Johnson (Education)
Daniel Kivelson (Chemistry and Biochemistry)
Richard D. Lehan (English)

1971
Vernon E. Denny (Chemical Engineering)
Peter N. Ladefoged (Linguistics)
Arthur S. Schwabe (Medicine)
Duane E. Smith (Political Science)
Andreas Tietze (Near Eastern Languages and Cultures)

1972
Barbara K. Keogh (Education)
James N. Miller (Microbiology and Immunology)
David S. Rodes (English)
Ned A. Shearer (Speech)
Charles A. West (Chemistry and Biochemistry)

1973
Kirby A. Baker (Mathematics)
David Evans (Chemistry and Biochemistry)
Albert Hoxie (History)
Nhan Levan (Electrical Engineering)
Judith L. Smith (Physiological Science)

1974
Robert B. Edgerton (Anthropology, Psychiatry and Biobehavioral Sciences)
David S. Eisenberg (Chemistry and Biochemistry)
Victoria A. Fromkin (Linguistics)
Robert C. Neerhout (Pediatrics)
Andrea L. Rich (Speech)

1975
Alma M. Hawkins (World Arts and Cultures)
Morris Holland (Psychology)
Paul M. Schachter (Linguistics)
Stanley A. Wolpert (History)
Richard W. Young (Neurobiology)

1976
Marianne Celce-Murcia (Teaching English as a Second Language, Applied Linguistics)
Jesse J. Dukeminier (Law)
George R. Guffey (English)
Marilyn L. Kourilsky (Education)
Chand R. Viswanathan (Electrical Engineering)

1977
Michael J.B. Allen (English)
Henry M. Cherrick (Dentistry)
Richard C. Maxwell (Law)
J. William Schopf (Earth and Space Sciences)
Verne N. Schumaker (Chemistry and Biochemistry)

1978
William R. Allen (Economics)
Michael E. Jung (Chemistry and Biochemistry)
J. Fred Weston (Management)
Thomas D. Wickens (Psychology)
Johannes Wilbert (Anthropology)

1979
Steven Krantz (Mathematics)
Paul I. Rosenthal (Communication Studies)
Christopher Salter (Geography)
James H. White (Mathematics)
Stephen C. Yeazell (Law)

1980
A.R. Braunmuller (English)
Fredi Chiappelli (Italian)
Kenneth L. Karst (Law)
Richard F. Logan (Geography)
Ronald F. Zernicke (Physiological Science)

1981
Arnold J. Band (Near Eastern Languages and Cultures)
Charles L. Batten, Jr. (English)
Lucien B. Guze (Medicine)
Gerald Lopez (Law)
Andy Wong (Dentistry)

1982
Dean Bok (Neurobiology)
Robin S. Liggett (Architecture and Urban Design, Urban Planning)
William Melnitz (Theater)
Joseph K. Perloff (Medicine)
Karen E. Rowe (English)

1983
Claude Bernard (Physics and Astronomy)
Bryan C. Ellickson (Economics)
Robert S. Elliott (Electrical Engineering)
Albert D. Hutter (English)
Charles M. Knobler (Chemistry and Biochemistry)

1984
Robert Dallek (History)
Hooshang Kangerloo (Radiological Sciences)
Jeffrey Prager (Sociology)
Stanley Siegel (Law)
Sandra A. Thompson (Linguistics)

1985
Patricia M. Greenfield (Psychology)
David F. Martin (Computer Science)
Mark W. Plant (Economics)
Ross P. Shideler (Comparative Literature, Scandinavian Section)
William D. Warren (Law)

1986
Roger A. Gorski (Neurobiology)
Patricia A. Keating (Linguistics)
Leonard Kleinrock (Computer Science)
Martin Wachs (Urban Planning)
Scott L. Waugh (History)

1987
Lawrence W. Bassett (Radiological Sciences)
E. Bradford Burns (History)
Kenneth W. Graham, Jr. (Law)

Non-Academic Senate Recipients

In spring of 1985, the Office of Instructional Development (now Center for the Advancement of Teaching) began sponsorship of awards to three instructors who are not members of the Academic Senate. This category includes lecturers, and adjunct and clinical faculty members. All non-Academic Senate faculty members who are nominated by their departments are eligible. Recipients are selected by the Academic Senate Committee on Teaching, using the same criteria as those used for Academic Senate members.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 were named the Luckman Distinguished Teaching Awards.

Gold Shield Faculty Prize
The $30,000 Gold Shield Faculty Prize, an award for academic excellence, was created by the Gold Shield Alumnae of UCLA in celebration of their fiftieth anniversary in 1986. The prize is funded by an endowment of $250,000 raised by Gold Shield for this purpose, which has grown to over $450,000. Guidelines provide that the prize “recognize and reward UCLA faculty members who have demonstrated extraordinary accomplishment in teaching and in research or creative activity...and who have made a significant contribution to undergraduate education.” Preference for recipients is given to faculty members in mid-career, who do not often receive the extra professional incentives available to distinguished senior faculty.

The Gold Shield Faculty Prize is awarded to each recipient for scholarly use. The awardee is selected every year by a committee of peers appointed by the Academic Senate. Student and Gold Shield representatives are included. Recipients must come from fields that have undergraduate programs at UCLA.

1986-88
Michael E. Jung (Chemistry and Biochemistry)

1988-90
Patricia M. Greenfield (Psychology)

1990-92
Jeffrey C. Alexander (Sociology)

1992-94
J. William Schopf (Earth and Space Sciences)

1994-96
Albert R. Braunmuller (English)

1996-98

1998-00
Robert B. Goldberg (Molecular, Cell, and Developmental Biology)

2000-02
Utpal Banerjee (Molecular, Cell, and Developmental Biology)

2002-04
Richard B. Kaner (Chemistry and Biochemistry)
In accordance with Alfred Nobel’s will, Nobel Prizes are awarded to “those who, during the preceding year, have conferred the greatest benefit to humankind.” Considered among the most prestigious awards in their field, Nobel Prizes are awarded in the fields of chemistry, economics, literature, peace, physics, and physiology or medicine. Since their 1901 inception, Nobel Prizes have been awarded to University of California faculty 71 times. Of those, seven UCLA professors have been so honored.

Willard F. Libby, 1908–1980 (Chemistry), 1960
Julian S. Schwinger, 1918–1994 (Physics), 1965
Donald J. Cram, 1919–2001 (Chemistry), 1987
Paul D. Boyer, 1918–2018 (Chemistry), 1987
Louis J. Ignarro, 1941– (Physiology or Medicine), 1998
Lloyd S. Shapley, 1923–2016 (Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel), 2012
Andrea M. Ghez, 1965– (Physics), 2020

UCLA University Professors

The title University Professor is reserved for scholars of international distinction, who are recognized and respected as teachers of exceptional ability. Appointments may be made from distinguished tenured faculty. University Professors are appointed by the Regents, at the recommendation of the president after consultation with the chancellor and Academic Senate of the appointee’s home campus.

In over 50 years, only 40 professors throughout the UC system have ever been appointed University Professor. Since 1972, six UCLA faculty have been given this honor, including one active UCLA faculty member.

Donald J. Cram, 1919–2001 (Chemistry and Biochemistry), 1988
Robert B. Edgerton, 1931–2016 (Psychiatry and Biobehavioral Sciences), 1996
M. Frederick Hawthorne, 1928–2021 (Chemistry and Biochemistry), 1998
