Vice-Chancellor Foster H.

Sherwood, Ph.D., LL.D.

Vice-Chancellor—Planning,

William G. Young, Ph.D., D.Sc.

Chancellor at Riverside:

Herman T. Spleth, Ph.D.

Vice-Chancellor Robert A. Nishet,

Ph.D.

Chancellor at San Diego:

Herbert F. York, Ph.D., D.Sc.

Chancellor at Santa Barbara:

Vernon I. Cheadle, Ph.D.

Vice-Chancellor A. Russell

Buchanan, Ph.D.

Vice-Chancellor Stephen S.

Goodspeed, Ph.D.

Chancellor at Santa Cruz:

Dean E. McHenry, Ph.D.

Provost at San Francisco Medical

Center:

John B. deC. M. Saunders, M.B.,

Ch.B., F.R.C.S. (Edin.)

Vice-Provost Willard C. Fleming,

D.D.S., D.Sc.

FOUNDED 1868

The Beginning. The Organic Act passed by the State Legislature and signed by the Governor in 1868, established the University of California. It opened its doors in 1869 on the Oakland campus of the College of California, which had grown out of a movement started by Congregational and Presbyterian ministers sent to the West by the Home Missionary Society of New York, as early as 1848. The University of California moved to Berkeley in 1873 as soon as the first buildings were completed. One of these buildings, South Hall, is still standing and still in use.

Today. The University, currently serving the state of California with seven campuses—Berkeley, San Francisco, Davis, Riverside, Los Angeles, Santa Barbara, and San Diego—is composed of academic and professional schools and colleges, divisions, departments of instruction, museums, libraries, research institutes, bureaus, and foundations.

In addition to the educational facilities centered on its campuses, the University operates the University Extension and Agricultural Extension Service everywhere in the state where a public demand is apparent. Special instruction and research are carried on throughout the State, in other states and in foreign countries.

Growth. The University is continuing, as in the past, to keep pace with the growth of the State. Present campuses are being expanded; two new campuses, Irvine and Santa Cruz, are in the planning stage. Recent statewide enrollment was about 59,000. By 1970 it is estimated the enrollment will reach 103,000. That the University has steadily increased in quality as well as in size is attested to by the fact that it is generally recognized as one of the great universities in the country. The University of California provides a college education for all qualified students, without distinction as to sex, creed, or race. Its instruction covers all the broad and essential fields of human knowledge, including the arts, sciences, and literature. It also provides fundamental training for many of the professions.

Governing Board. The University is governed by a Board of Regents, sixteen of whom are appointed for a term of sixteen years. The Governor of the State serves as President of the Board. The Regents appoint the President of the University, who is the executive head of the University, and with his advice appoint the chancellors, provosts, directors, and deans who administer the affairs of the individual campuses and divisions making up the University.

Academic Senate. By authority vested in them by the State constitution, the Regents created an *academic* administrative body called the

Academic Senate. Subject to approval of the Regents, the Senate determines conditions for admission, certificates, and degrees. It authorizes and supervises all courses of instruction in the academic and professional colleges and schools, except in professional schools offering courses at graduate level only. Deans or directors of schools, colleges, or other divisions of the University assist the President in the administration of the University, with special emphasis on the welfare of the division which they individually represent, and of the students therein.

The Los Angeles Campus

CAMPUS OFFICERS

Chancellor:

Franklin D. Murphy, M.D.,
Sc.D., L.H.D.

Chancellor, Emeritus:

Vern O. Knudsen, Ph.D., LL.D.

HISTORY AND DEVELOPMENT

Early Years. The Los Angeles State Normal School, destined to become the University of California, Los Angeles, was established by action of the State Legislature in March, 1881. Initially located on the present site of the Los Angeles City Library, the School was moved in 1914 to a new site on North Vermont Avenue. Through legislative action made effective by the Governor's signature on May 23, 1919, the property and records of the State Normal School were transferred to The Regents of the University of California.

The newly created institution opened its doors in September, 1919, as the "Southern Branch" of the University of California. The curriculum included courses in the freshman and sophomore years in letters and science and in teacher-training. In 1922 the teacher-training courses were organized as a Teachers College, and in 1923 and 1924, respectively, the third and fourth years of Letters and Science were added.

On February 1, 1927, the Southern Branch of the University was officially designated the University of California at Los Angeles. In the summer of 1929 the University occupied its new Westwood Village campus, encompassing three hundred and eighty-three acres in the foothills of the Santa Monica Mountains. Within a decade the University of California, Los Angeles, expanded its educational facilities to include a College of Agriculture, a College of Business Administration (later School of Business Administration), a College of Applied Arts (later replaced by a College of Fine Arts), a School of Education, and a Graduate Division. Successively added were a College of Engineering, schools of Dentistry, Law, Library Service, Medicine, Nursing, Public Health, Social Welfare, and a Graduate School of Business Administration.

Today. Dominated by the majestic towers of Royce Hall on the north and the impressive bulk of the Center for Health Sciences on the south, the Los Angeles campus of the University of California reflects the tremendous growth of the University. There are now 69 departments, 14 schools and colleges, the Graduate Division, and 17 Research Institutes, Bureaus and Centers.

Under way is a long-range development program designed to prepare the campus for an expected enrollment by 1970 of approximately 27,500 full-time students. Recent additions to the physical plant include the Neuropsychiatric Unit, the Laboratory of Nuclear Medicine and Radiation Biology, the Marion Davies Children's Clinic, the Student Union Building, Sproul Hall, two multi-level parking structures, and the Theater Arts Unit I. Other buildings under construction or sched-

uled include a Social Science Unit, a Physics Building Unit II, a North Campus Library Unit I, additions to the Chemistry—Geology Building, a Rehabilitation Center on the West Medical Campus, and two residence halls, Rieber and Hedrick Halls.

COMMUNITY AND TRANSPORTATION

Located in the corporate limits of the City of Los Angeles, the Los Angeles campus of the University of California, fringed on the north by the Santa Monica Mountains and within visible distance of the Pacific Ocean, enjoys a temperature climate. During the summer months the mean temperature is about 68 degrees; during the winter period, the mean temperature is about 49 degrees.

It is ideally located for varied recreation and entertainment. The beaches and mountain resorts are within easy driving distance. Hollywood is close by. And the community is served by a number of fine restaurants.

The cultural atmosphere of the community is active and challenging, supplementing the year-around program offered on the campus.

The campus may be reached by bus as follows: from *Los Angeles* business district, Metropolitan Transit Authority bus 83W, southbound on Hill Street. From *Santa Monica*, Metropolitan Transit Authority bus via Wilshire Boulevard, and Santa Monica Municipal Bus Lines, via Wilshire Boulevard and Santa Monica Boulevard. From *Los Angeles International Airport*, Airport-transit, via Beverly Hills.

SURVEY OF CURRICULA

The scope of the undergraduate and graduate programs of instruction offered in the four colleges and ten schools of the University on the Los Angeles campus is briefly indicated below. For more details see pages 71 through 169 of this bulletin.

The *College of Letters and Science* offers curricula leading to the degrees of Bachelor of Arts and Bachelor of Science, and the following preprofessional curricula: prebusiness, precriminology, predental, predental hygiene, premedical, prenursing, prenutritional science, prepharmacy, prepublic health, and presocial welfare.

The *College of Agriculture*, *College of Engineering*, *School of Business Administration*, *School of Nursing*, and *School of Public Health* offer curricula leading to the degree of Bachelor of Science.

The *College of Fine Arts* offers curricula leading to the degree of Bachelor of Arts.

The *School of Dentistry* offers a curriculum leading to the degree of Doctor of Dental Surgery.

The *School of Law* offers a curriculum leading to the degree of Bachelor of Laws.

The *School of Medicine* offers a curriculum leading to the degree of Doctor of Medicine.

The *School of Education* supervises curricula leading to the Certificate of Completion of the various elementary and secondary credentials, and for the administrative credential.

The *Graduate Division*, in cooperation with the colleges and schools of the University, supervises advanced study leading to the academic degrees of Master of Arts, Master of Science, and Doctor of Philosophy; and the professional degrees of Master of Business Administration, Master of Education, Master of Engineering, Master of Fine Arts, Master of Library Science, Master of Public Administration, Master of Public Health, Master of Social Welfare, Doctor of Education, and Doctor of Public Health.

THE UNIVERSITY LIBRARY

The University Library on the Los Angeles campus consists of the Main Library and a number of branch and departmental libraries. Its collections contain about 1,875,000 volumes, and extensive holdings of pamphlets, manuscripts, maps, microtext editions, music scores, recordings, and slides. The Library regularly receives about 25,000 periodicals and newspapers.

The principal collection of the University Library is in the Main Library Building. The card catalogue here lists all catalogued books in the Main Library and other campus libraries and in the William Andrews Clark Memorial Library.

The Graduate Reading Room in the Main Library provides special study and research facilities for graduate students, including facilities for reading microtext materials and for the use of typewriters. Students enrolled in graduate courses have access to the main book stacks in the Library.

An open-shelf collection of books of interest primarily to undergraduate students is maintained in the College Library in the Main Library Building.

The Main Library's Department of Special Collections contains rare books and pamphlets, manuscripts, the University Archives, certain subject collections of books, early maps, and files of early California newspapers.

The Government Publications Room in the Main Library is a depository for the official publications of the United States Government, the State of California, the United Nations and some of its specialized agencies, and a number of other international organizations. It receives

selected publications of the other states and possessions of the United States and publications of foreign governments.

The Library has been designated by the Office of Technical Services, of the U. S. Department of Commerce, as a Regional Technical Report Center, to receive unclassified scientific and technical reports issued by certain government agencies and their contractors.

The Reading Room of the Institute of Government and Public Affairs, in the Main Library, has books, documents, pamphlets, and periodicals on local government, and is a depository for the official publications of California counties and cities. The John Randolph Haynes and Dora Haynes Foundation Library is housed there.

The Oriental Library, housed in the Main Library Building, contains books, journals, newspapers, and other materials in Chinese, Japanese, and Korean languages.

Libraries in Art, Biomedical Sciences, Business Administration, Chemistry, Education, Engineering and Mathematical Sciences, English, Geology, Industrial Relations, Law, Maps, Music, Physics, Theater Arts, and the University Elementary School are housed in the departments which they primarily serve.

The Biomedical Library, situated in the east wing of the Medical Center, serves the schools of Medicine, Nursing, and Public Health, and the departments of Bacteriology, Botany, and Zoology.

The resources of these libraries are available to all students and members of the faculty of the University.

A service for the rapid photocopying of periodical articles and portions of books is available in the Main Library, the Biomedical Library, the Engineering and Mathematical Sciences Library, and the Business Administration Library.

The Library handbook, **KNOW YOUR LIBRARY**, describing the organization and services of the University libraries and listing their schedules of hours, may be obtained in any of the campus libraries.

Supplementing the University Library is the William Andrews Clark Memorial Library of about 70,000 books, pamphlets, and manuscripts, featuring English culture of the seventeenth, eighteenth, and nineteenth centuries, and the history of Montana. Materials in the library do not circulate, and admission is by card only, application for which should be made to the University Librarian. This library is not on the University campus, but is situated at 2205 West Adams Boulevard.

Bus service is provided daily, upon request, from the UCLA campus to the Clark Library. Reservations for bus service must be made with the Librarian's Office before 4:00 p.m. preceding a weekday, and before noon on Friday for Saturday transportation to Clark Library. From the campus the Clark Library also may be reached by Metropolitan Transit Authority bus to Western Avenue, transferring to the "84" bus of the

Metropolitan Transit Authority Lines; from downtown, by the "11" bus of the Metropolitan Transit Authority. The Library is open Monday through Saturday from 8 a.m. to 5 p.m. Leaflets describing the Clark Library are available upon application to the University Librarian.

SPECIAL RESEARCH FACILITIES

Organized research units, established outside the usual departmental structure, are maintained within the University to aid the research and enhance the teaching of participating members of the faculty. Although such research organizations do not offer curricula leading to degrees, they may on occasion provide research training to highly qualified graduate students employed in their research programs. These organizations are classified as institutes, centers, projects, bureaus, nondepartmental laboratories, and scientific museums.

An *Institute* is established primarily for the coordination and promotion, on a continuing basis, of faculty research needs and interests organized around a broad subject area. Normally, research projects and programs conducted by an institute cut across the boundaries of departments, schools or colleges. Institutes, however, are also established to coordinate broad and varied research within a single department, and they may also undertake activities which contribute to public service.

A *Center* is established either as an agency within an institute to further research interests of the faculty in a designated major area or as a separate agency which provides specialized facilities for faculty research projects.

A *Bureau* is an academic agency engaged primarily in public service activities and in facilitating research in one or more academic departments related to these activities.

A *Scientific Museum* is an organization for the collection, preservation and use of materials used in research and teaching.

Institutes

The Brain Research Institute established October 14, 1961, provides facilities for research in the neurological and behavioral sciences for investigators from fourteen departments and divisions at UCLA—Anatomy, Biophysics, History of Medicine, Medical Microbiology and Immunology, Neurology, Neurosurgery, Pathology, Pediatrics, Pharmacology, Biological Chemistry, Physiology, Psychiatry, Psychology and Zoology. The three principal goals of the Institute are: 1) to undertake research in the many fields which contribute to an understanding of brain mechanisms and behavior; (2) to contribute to the training of investigators for independent careers in brain research; (3) to develop and disseminate information about brain function in the interests of the social and scientific communities.

The Institute of Business and Economic Research was established as a separate department on the Los Angeles campus on February 7, 1949, for the purpose of facilitating research in business and economic problems, particularly those of the California and the Pacific areas. The activities of this Institute are coordinate with the Institute of Business and Economic Research which was established on the Berkeley campus of the University in 1941. It acts as a service organization for faculty members by providing research assistants, travel expenses, and statistical and other technical assistance to those engaged in research projects for sponsorship by the Institute. The results of Institute research studies are published by the University of California Press in the Institutes Monograph Series, by the Institute itself as soft-cover monographs, or as reprints of articles first printed in various learned journals.

The Division of Research of the Graduate School of Business Administration was established on July 1, 1956. Its function is to encourage, promote, and facilitate basic and developmental research in business administration. While the Division serves principally the faculty of Business Administration, it seeks to encourage interdisciplinary approaches to business problems by working with other faculties of the University, with faculties of other universities and colleges in the State, and with business firms. The Division also provides research assistance for faculty members and an opportunity for training and financial support for qualified graduate students. The Division and the programs in the Division publish the results of research and maintain reprint series. An annual report of the Division is available upon request.

The Cancer Research Institute at UCLA was established in 1955 and is located in the UCLA Center for the Medical Sciences. All departments in the Medical School have access to the research facilities of the Institute.

The Institute for Cell Research and Molecular Biology was established in the Spring of 1963 to further fundamental research and teaching in biology by the analysis of vital phenomena in terms of the molecular properties of the subcellular units. It is an interdepartmental organization, providing a broad coverage of the borderline fields between biochemistry and several biological specialties. Besides work on heredity it pursues studies in the development and mechanism of physiological functions. It is intended primarily as an agency to support and enhance faculty research interests, but it also offers limited opportunities for both graduate and post-doctoral investigations.

Established early in 1961, the Institute of Ethnomusicology has already developed a five-year program focusing on various musical cultures of the world to be followed by an even deeper emphasis on comparative studies during the next five-year period. In order to comprehend the music of a given culture, not only the music itself must be

studied, but also its social context. Therefore, interdisciplinary collaboration is encouraged among musicologists, anthropologists, sociologists, linguists, psychologists and other specialists trained in comparative religion, philosophy, history and art. Specific projects now in progress include such areas as the Balkans and the Near East, Southeast Asia and the Far East, Latin America and Africa. The program also includes studies directed toward fundamental concepts germane to the entire world of music as well as to new laboratory methods and techniques. A rapidly expanding archive of unique materials, as well as complete laboratory facilities, are available to graduate students and faculty. Special symposia, lectures, and presentations of non-Western music and dance are offered as a public service.

The **Institute of Geophysics and Planetary Physics** was established in 1947 to encourage research in geophysics and space physics on all campuses of the University of California and to provide advanced training for qualified personnel. Members of the Institute staff on several campuses, and members of associated departments are prepared to supervise graduate work in a variety of fields. The Institute distributes from its University budget grants-in-aid to support research wherever it appropriately may do so throughout the University.

The **Institute of Government and Public Affairs** conducts several programs of organized research and service, such as the Program of Urban Studies and the Program of Public Policy Studies. A large collection of documents, pamphlets, and periodicals relating to governmental administration and selected fields of public affairs are available and, in addition, the Institute administers the John Randolph Haynes and Dora Haynes Collection relating to California government politics. These and other advanced study and research in several fields relating to public administration, central and local governments, politics and elections, and public policy formulation are also available.

The **Institute of Industrial Relations**, authorized by the Legislature of the State of California in 1945, began operations in 1946. It is concerned with two principal types of activity. The first is an interdisciplinary research and publishing program directed at the present time primarily toward the study of labor-management relations; wages and related problems; economic security programs; the labor market; the impact of technological change; labor law; human relations; labor history; and comparative developmental studies. Research staff members of the Institute are usually drawn from the regular faculties of the Departments of Business Administration, Economics, History, Political Science, and Sociology and the School of Law. A number of half-time research assistantships are available to qualified graduate students each year in connection with this program. The second main activity consists of a community relations program serving management, unions and other groups interested in industrial relations. The program consists of

public lectures, conferences, institutes of varying duration and evening courses.

The Institute of International and Foreign Studies was established in 1958 by action of the Board of Regents, to help plan and carry out many of UCLA's rapidly expanding interests and obligations in the fields of international affairs. Its primary functions are to promote and facilitate interdisciplinary studies of an international character; to provide liaison with government and international agencies, including diplomatic and consular offices; to hold major responsibility for the foreign relations of UCLA; and to receive distinguished foreign guests. The Institute is affiliated with the five autonomous study centers: the *Center of African Studies*; the *Center for Latin American Studies*, the *Center for Near Eastern Studies*, the *Center for Russian and East European Studies* and the *Center for Comparative Folklore and Mythology*. In addition, the Institute directs the National Security Studies and the Fulbright Scholar Coordination program and coordinates the Foreign Student Leader Seminars.

The Western Management Science Institute was founded in December, 1959 to encourage and facilitate research and advanced training in management science, primarily at UCLA, but also at other institutions of higher learning in the Western United States. The Institute's research projects at UCLA center upon the economics of decision making and the theory of production systems. The Institute also supports the UCLA Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences; provides financial support for certain user-oriented activities of the Western Data Processing Center; conducts occasional regional or national scholarly conferences on topics in management science; finances a research grant game service for business schools throughout the West.

The Neuropsychiatric Institute is a research and teaching unit in the Center for the Health Sciences established on November 1, 1960, and supported by the Department of Mental Hygiene. It houses the Department of Psychiatry, the Divisions of Neurology, Neurosurgery and Neuropathology, clinical neurophysiology research laboratories, electroencephalographic laboratories and clinics. The research program involves a multidisciplinary approach to the problems of functional and organic disorders of the nervous system.

The Institute of Transportation and Traffic Engineering, established at the University of California by act of the California State Legislature in 1947, provides a means through which the many resources of the University can be focused on research in transportation. Toward this end, it operates within the Colleges of Engineering at Berkeley and Los Angeles, with staff, offices and research laboratories of both locations. The Institute's research program at Los Angeles covers a

broad range of research relating to transportation, including analysis and design of transportation systems (land, air, water), mathematical theory of traffic flow, application of high-speed computers to traffic analysis and control, collision injury research, driver behavior and characteristics, highway safety and accident data analysis, urban transportation and related land use planning. Because much of the Institute's continuing research program is funded by outside agencies, part-time employment is available and enables many students to participate in Institute research while completing their studies.

Centers

The African Studies Center, established in 1959, provides a framework for furthering research on Africa involving social sciences, education, linguistics and the humanities. Through its Research Committee, the Center makes grants for research on Africa on all campuses of the University of California. Its Fellowship Committee each year awards full stipends or supplementary grants-in-aid to students concentrating upon Africa in graduate degree programs. The Center also undertakes to provide on a continuous basis full information to members of the faculty and to students on extramural sources of research support. Other Center activities include public education programs on Africa, training programs for specialist personnel such as Peace Corps Volunteers, the bringing of Africanist scholars and leading African personalities to the University as short-term lecturers or as research associates, the sponsorship of an interdisciplinary colloquium each semester focused on some integrating theme and a publications program.

The Western Data Processing Center (WDPC) was established in 1956 as an integral part of the Graduate School of Business Administration to advance research and training with particular reference to problems faced by business organizations in the thirteen western states. A secondary objective of the WDPC is to make available its services and facilities for machine computation and data processing for research in any academic discipline at UCLA and participating institutions. Current equipment includes IBM 7090, 1401, and 1620 data processing systems, and IBM 1301 Disk File, and various kinds of teleprocessing equipment to facilitate data transmission between WDPC and other university campuses. Financial assistance to graduate students is available in the form of IBM Research Assistantships awarded annually.

The Center for the Study of Comparative Folklore and Mythology is the research arm of the Folklore and Mythology Group, which was organized in 1961 to stimulate interest in Folklore along interdisciplinary lines. In addition to Mythology, Primitive Myth and Ritual has also become a part of the work of the Center. There is an attempt on the one hand to relate modern folklore to ancient mythology and

on the other to show in terms of folklore and mythology the impact of higher cultures upon lower. In mythology particular emphasis is laid on the ancient Indo-European, Finno-Ugric and Semetic traditions of Europe, Western Asia, and the Near East. Collecting projects are underway in Latin America and the Philippines. Within the United States research projects involve the compilation of a Dictionary of American Popular Beliefs and Superstitions, with supporting work in American Legendry, Custom and Usage. The collecting of ethnic folklore, as well as genres of Anglo-American material, is also an important part of the program.

The Center for Research in Languages and Linguistics was established in 1962. It plans, initiates and coordinates research projects and interdisciplinary programs in the different fields of language study, linguistics, philology and the communication sciences.

The Administrative Committee on Latin American Studies was officially established in 1954 which in 1959 became the Center of Latin American Studies. The Center serves individual and group research projects as well as facilitates the exchange of research personnel between UCLA and Latin America. Its publications include *Statistical Abstract of Latin America*, *Latin America in Periodical Literature*, and *Communism in Latin America—A Bibliography*, *The Post-War Years (1945–1960)*. Under the auspices of the Center an interdisciplinary seminar in Latin American Studies is conducted. In 1958 an annual student leader exchange program sponsored by the Department of State was inaugurated. In its first three years this program concentrated on Colombia and since 1961 on Brazil.

The Law-Science Research Center, established February, 1963, is an outgrowth of the activity of the Chancellor's Committee for Interdisciplinary Studies of Law and the Administration of Justice, which was established in 1959. That Committee sponsored the First (1960) and Second (1962) National Law and Electronics Conference at Lake Arrowhead, an interdisciplinary gathering of scholars and practitioners from various disciplines concerned with the impact of information retrieval technology upon law and its administration. The Center continues the work of the Conference, causing its proceedings to be published. The Center also is engaged in a comprehensive study of the functions of the Superior Court of Los Angeles County, jointly with a Committee of Judges of the Court and System Development Corporation, a nonprofit corporation chartered in the public interest. Other studies are contemplated involving the applications of new scientific and technological developments to law and the administration of justice. Graduate research and distinguished scholar in residence programs are being planned.

The Center for Medieval and Renaissance Studies was established in 1963 to assist individual and group researches by members of the

faculty and to amplify opportunities for graduate training. The Center is concerned with analysis and interpretation of the developing patterns of Western civilization during its formative periods. To this end it emphasized the interplay of influence not only among the peoples of the West but also among those of Byzantium, the Slavic lands, Islam, the minor Christian communities of the Near East, and the scattered centers of Jewish activity. Likewise it strives to clarify the continuities and mutations of the Greco-Roman tradition in these variant cultures, and their significance for the West. The Center, aided by a special bibliographer, enlarges research material in the library, slide and microfilm collections, employs graduate students in special projects, arranges research colloquia and invites distinguished lecturers to UCLA.

The Near Eastern Center was established in 1957 for the purpose of encouraging individual and collaborative research and training in this area. The Center furthers the research of individual faculty members and collaborates in the solution of basic research problems which require institutional backing. The Center offers a number of research assistantships to graduate students and in addition a small number of grants-in-aid to postdoctoral students and junior scholars. The Center also sponsors lectures, seminars and conferences on various topics falling within the scope of Near Eastern studies.

The Real Estate Research Program was established in 1950 and obtains its basic financial support through appropriations by the State Legislature from the State Real Estate Fund. The purpose of the Program is to advance knowledge of the structure and growth of urban communities, of the patterns and dynamics of urban land use, of the behavior of real-estate markets and business firms operating in these markets, and of public policies impinging upon the use and development of real-estate resources. Many studies conducted under the Program use the Los Angeles metropolitan area as a laboratory for the analysis of urban change, while others concern themselves with subjects of state-wide or national scope. The Program maintains a specialized library and employs graduate students as research assistants.

The purpose of the Russian and East European Studies Center established in 1958 is to promote, assist and coordinate research and training in this area. It furthers the research of individual faculty members, offers a small number of research assistantships to graduate students, sponsors colloquia, seminars and lectures and participates, with other universities, in academic exchange programs with the countries of Eastern Europe.

The Space Science Center is a part of the *Institute of Geophysics and Planetary Physics*. It was established to develop facilities for space-related research by faculty and graduate students, to promote interdepartmental programs of education and research in the physical and biological sciences and engineering. Graduate students, enrolled in

the Astronomy, Chemistry, Geology, Meteorology, of Physics M.A. and Ph.D. programs, or in the Geophysics Interdepartmental curriculum, may do research or pursue advanced studies on the characteristics of the interplanetary medium, the structure of the moon and the planets, radiation belt physics, atmospheric structure and dynamics, geomagnetism and solar physics, and many other areas at the Center. Fellowships and research assistantships are available to promising graduate students; grants-in-aid to faculty members.

Scientific Museums

The Botany Building is situated in the Botanical Garden permitting ready access to the garden for all classes. The experimental field, lath-house, and pollinating house are also in the garden. Adjoining is the Plant Physiology Building, with glasshouses and controlled-growth rooms for instructional and research materials.

The University maintains a teaching Herbarium of specimens representative of the floras of the world. The collection includes the Bonati Herbarium, noteworthy for the specimens of old world Scrophylariaceae, an extensive and comprehensive collection of American Labiatae, and research collections of certain California genera. Special emphasis is placed on an herbarium of subtropical ornamental plants.

PUBLIC LECTURES, CONCERTS, FILMS, THEATER AND ART EXHIBITS

As opportunity offers, the University presents public lectures of general and of scholarly interest by qualified persons. These lectures are intended to supplement and stimulate the work of all departments of the University. In addition, the Speakers' Bureau provides clubs and organizations with speakers from the University faculty.

The musical program of the University includes many special events. The Concert Series Section of the Committee on Fine Arts Productions offers a broad variety of concerts by soloists, chamber musicians, orchestral, choral, and other groups of nationally known artists. The Department of Music offers each semester evening concerts by its performance organizations—the A Cappella Choir, the Symphony Orchestra, the Opera Workshop, the Chamber Music Ensemble, the Collegium Musicum, the Chorus, the Band, the Madrigal Singers, and the various ethnic study groups. Individual student artists and members of the music faculty also present weekly Tuesday Noon Recitals and monthly Friday Noon Organ Recitals. All of these events are open to the public.

Dance concerts are presented regularly under the auspices of the newly created Department of Dance. In addition, well-known dance

groups are brought to the campus by the Concert Series Section of the Committee on Fine Arts Productions.

The Art Galleries, in the Dickson Art Center, contain a permanent collection of older masters, and present a series of significant temporary exhibitions many of which are circulated nationally. All aspects of art are covered in this program—painting, drawing, print making, sculpture, architecture, ceramics, and industrial, interior, costume and graphic design. The Galleries are open from 12:30 to 5 p.m. Mondays through Fridays and 1:30 to 5:00 p.m. Sundays.

In addition to its intramural, experimental production program, the Department of Theater Arts produces a varied selection of significant new and old plays from Aristophanes to Bernard Shaw, Shakespeare to Eugene O'Neill, as well as plays never produced before. These are presented in an annual season of six plays for the campus and community.

Also, the Theatre Group, a joint venture by University Extension and the theatrical professions, presents outstanding classical and contemporary plays. All these productions are professionally produced, directed and performed.

A number of art, documentary, educational, and foreign films, including film series, are presented each semester. Such showings include on occasion outstanding short features written, directed and produced by Theater Arts students. These, too, are open to the public.

SUMMER SESSIONS

During the summer the University conducts at Los Angeles two six-week summer sessions. In 1963 the first Summer Session will begin on Monday, June 17, and the second on Monday, July 29. The Summer Sessions bulletin is obtainable after February 17 of each year from the Office of the Summer Sessions, Administration Building, University of California, Los Angeles 24, California.

Admission to a Summer Session does not constitute admission to a regular session. Students planning to attend the University in regular session are referred to pages 24-37 of this bulletin.

UNIVERSITY EXTENSION

University Extension, with Northern and Southern Area headquarters in Berkeley and Los Angeles, makes available the resources of the University on a statewide basis to individuals and organizations. Extension programs are organized around the following educational aims: (1) the intellectual and cultural development of adults; (2) the dissemination of new knowledge resulting from teaching and research activities within the University; (3) the continuing education of scientific, technical, and

professional personnel; (4) the development of special educational programs for public and private organizations and agencies; and (5) public affairs education through programs designed to aid adults in meeting their responsibilities as citizens.

A variety of methods are used to implement these aims: classes, discussion groups, correspondence courses, conferences, institutes, short courses, lectures, motion picture production, broadcast educational television, and vocational counseling and testing (Los Angeles only).

Veterans may use the educational benefits available to them under Federal and State laws to enroll in University Extension classes, provided the classes are part of their prescribed and recognized objectives approved by the Veterans Administration.

For detailed information, write or telephone the University Extension office on any campus of the University or at the following additional locations: 813 South Hill Street, Los Angeles 14 (MAdison 3-6123); 1221 Fourth Avenue, San Diego 1 (BElmont 2-7321); Room 15, Buena Park High School, 10th and Magnolia, Buena Park (LAmber 6-3397); San Francisco Extension Center, 55 Laguna Street, San Francisco (UNderhill 1-6833).

Admission to the University

IN UNDERGRADUATE STATUS

The admission requirements of the University are based on two principles: first, that the best assurance of success in the University is shown by high quality of scholarship in previous work, and second, that the study of certain specified subjects will give the student both a good preparation for the work of the University and a reasonable freedom in choosing his field of specialization. These principles apply to admission to either freshman or advanced standing.

Application for Admission

Applications should be filed with the Admissions Officer, 1147 Administration Building, University of California, Los Angeles 24. Application forms will be supplied by the Office of Admissions upon request. The application must be filed between October 1 and July 15 for the fall semester and between March 1 and December 15 for the spring semester.

Admission requirements are uniform on all campuses of the University. Admission to the University entitles the student to attend the campus of his choice if the required facilities are available there. Since applications will be processed and acted upon in only one Office of Admissions, applications directed to more than one campus serve no purpose and should not be filed.

If, after a student has filed his application, he decides to register on a different campus, he should write to the Director of Admissions, 521 University Hall, University of California, Berkeley 4, indicating the campus where he filed his application, the campus where he now wishes to register, and the reason for his change. His records will be transferred to the campus he wishes to attend provided facilities are available there. Such requests must be received at least three weeks before registration.

Application Fee

Every applicant for admission is required to pay a non-refundable fee of \$5 each time an application is filed. Remittance by bank draft or money order payable to The Regents of the University of California should be attached to the application.

Transcripts

Official transcripts of record should be sent directly to the Office of Admissions from the graduating high school and from each college attended. Work in progress should be shown on a preliminary tran-

script. It is the applicant's responsibility to request that these transcripts be sent to the Admissions Office.

Notification of Eligibility

So that students may be informed as early as possible about eligibility, they are urged to apply early in the application period and request promptly to have transcripts of record sent to the Admissions Office.

Students applying as first-semester freshmen should ask the high school to submit preliminary transcripts showing the complete record through the next-to-last semester before graduation and listing courses in progress during the final semester. Those applying after April 1 for the fall semester or after December 1 for the spring semester should not expect answers until at least four weeks after final transcripts reach the Admissions Office. Those applying before these dates may receive notification somewhat more promptly.

Students applying for admission in advanced standing may expect notification about four weeks after final transcripts have been received. The receipt of preliminary transcripts may shorten this interval, and applicants for the spring semester should arrange for submitting of preliminary transcripts showing work in progress, since provisional admission may be possible.

Subject A: English Composition

The University requires that every accepted student pass an examination in English composition (the Subject A examination) or complete in college an acceptable course in English composition with a satisfactory grade. Students who enter the University with credentials showing the completion elsewhere of acceptable college-level training in composition or a score of at least 600 in the College Entrance Examination Board Achievement Test in English Composition taken after completion of the first half of the eleventh grade are considered to have met the Subject A requirement. All other students are required to take the examination given by the University. Although it is not a condition of admission, it must be taken at the opening of the semester of first attendance if not taken previously. Students who neither pass the examination nor meet the requirement in one of the above ways will be required to take the noncredit course in English composition, for which a fee of \$35 is charged.

Vaccination Certificate

Every new student and every student returning to the University after an absence must present at the time of medical examination by the University Medical Examiners a certificate establishing the fact that

he has been successfully vaccinated against smallpox within the last three years. A form for this purpose will be furnished by the Admissions Office. Vaccination should be completed before registration.

Intercampus Transfer

An undergraduate student who is registered on any campus of the University, or who has attended a regular session of the University and has not since been registered in another institution, may apply for transfer to another campus of the University by obtaining the proper forms from the campus where he was last registered. The intercampus transfer application forms and application for transcript of record forms may be obtained from the Office of the Registrar and must be filed with that office by July 15 for the fall semester and by December 15 for the spring semester.

Preparation for University Curricula

In addition to the high school subjects required for admission to the University, certain preparatory subjects are recommended for many University curricula to give the student an adequate background for his chosen field of study. Lack of a recommended high school course may delay graduation from the University. Details of these recommendations will be found in the bulletin, **PREREQUISITES AND RECOMMENDED SUBJECTS**, which is ordinarily in the hands of high school and junior college counselors and which may be obtained from the Office of Admissions or the University Dean of Educational Relations, 521 University Hall, University of California, Berkeley 4.

All students should pursue a full program of academic subjects during their senior year in high school.

Graduates of California high schools who are not eligible for admission to the University are usually advised to attend one of the California junior colleges and take courses applicable toward requirements of the college in which they wish to enroll in the University.

ADMISSION TO FRESHMAN STANDING

An applicant for admission to freshman standing is one who has not registered in any college-level institution since graduation from high school.

If the applicant does not meet at the time of high school graduation the requirements given below for admission to freshman standing, he must qualify for admission to advanced standing (see page 30). An exception to this regulation will be made only if the student's deficiency was the result of his having omitted one or more required high school

subjects. It is sometimes possible for such a student to remove the deficiency during the summer if approval to do so is obtained in advance from the Office of Admissions.

If the applicant has registered in a junior college, a four-year college, a university, extension classes of college level, or any comparable institution since graduation from high school, he is subject to regulations governing admission in advanced standing.

Requirements for Admission to Freshman Standing

Applicants for admission to freshman standing must meet the requirements listed below. These requirements apply to California residents; for special requirements for out-of-state applications, see page 31.

Graduation From an Accredited High School

An accredited high school in California is one that has been officially designated by the Board of Regents of the University as a school from which students will be admitted to the University primarily on the basis of their record of subjects completed and scholarship attained. The University publishes a list of accredited schools annually in September. Accreditation by the University refers to the college preparatory program of the high school and implies no judgement of other functions of the school. If the applicant comes from a high school that is not accredited, the Office of Admissions will, upon request, instruct him regarding the procedure he should follow. When residents of California have attended high schools outside California, the University determines acceptability of the high school records by consulting other accrediting agencies.

Subject Requirements

(a) History—1 unit

This must consist of 1 unit of United States history, or one-half unit of United States history and one-half unit of civics or American government.

(b) English—3 units

These must consist of six semesters of English composition, literature, and oral expression, certified by the high school principal as University preparatory.

(c) Mathematics—2 units

These must consist of two semesters of algebra and two semesters of plane geometry, or an integrated two-year course covering the same material. Advanced algebra and trigonometry may be substituted for algebra, and trigonometry and solid geometry for plane geometry.

(d) Laboratory Science—1 unit

This must consist of an eleventh- or twelfth-grade year course in one laboratory science, certified by the high school principal as University preparatory.

(e) Foreign Language—2 units

These must be in one language. Any foreign language with a written literature is acceptable.

(f) Advanced Course—1 or 2 units

This must be chosen from one of the following:

Mathematics. A total of 1 unit composed of second-year algebra, solid geometry, trigonometry, or an advanced course for which trigonometry is a prerequisite.

Foreign language. Either 1 additional unit in the same foreign language offered under (e) or 2 units of another foreign language.

Science. 1 unit of either chemistry or physics in addition to the science offered under (d).

Additional elective units to complete the minimum of 15 standard entrance units are also required.

A course taken in the tenth, eleventh, or twelfth year may be counted in satisfaction of a subject requirement only if the grade in the course is an A, B, or C; courses in which the grade is D or lower will not be counted. However, courses taken for subject credit in the ninth year need show passing grades only.*

Scholarship Requirements

At least a B average is required in courses taken after the ninth year which are used to meet the (a) to (f) subject requirements. In determining the required average, a grade of A in one course will be used to balance a C in another; but an A grade may not be used to compensate for D, E, or F grades.

Grades are considered on a semester basis except from schools that give only year grades.

Courses taken in the tenth, eleventh, and twelfth years in which a grade of C or lower is received may be repeated to raise grades in an amount not to exceed 2 units of the (a) to (f) pattern, if approved by the principal of an accredited high school. Only the first repetition may be used to satisfy scholarship requirements, but additional repetitions are allowed to satisfy a subject requirement.

Minor Deficiencies

The Admissions Officer has authority and responsibility for waiving minor deficiencies when justification is evident in the form of unusual academic records or recommendations.

* Effective with respect to applicants for admission in the fall semester of 1964 and thereafter, subject requirements in the (a) to (f) pattern may be satisfied only by courses in which a grade of C or higher has been assigned.

Admission by Examination

High school graduates who are ineligible on their high school records and who have had no college work subsequent to graduation from high school may qualify for admission by examination.

The University does not offer entrance examinations but accepts the results of examinations given by the Educational Testing Service for the College Entrance Examination Board.

To qualify by examination, the applicant must present scores in the Scholastic Aptitude Test and three Achievement Tests. The three Achievement Tests are to include English composition and one from each of the following two groups:

1. Social Studies and Foreign Language.
2. Mathematics and Sciences.

The tests must be taken after completion of the first half of the eleventh grade. The first repetition of a test will be accepted, but the verbal and mathematics scores on the Scholastic Aptitude Test must be from the same sitting. The total score on the Scholastic Aptitude Test must be at least 1000; the scores on the three Achievement Tests must total at least 1650, and the score on any one Achievement Test must not be less than 500.

An applicant who has graduated from an unaccredited high school may qualify by examination under the foregoing rules.

For admission of out-of-state applicants by examination, see page 32.

Arrangements to take the tests should be made with the Educational Testing Service, P. O. Box 27896, Los Angeles 27, California, or P. O. Box 592, Princeton, New Jersey. The fees are to be paid to the Educational Testing Service. Scores will be regarded as official only if they are received by the Admissions Office directly from the Educational Testing Service.

Test Dates

Application Deadlines

Saturday, November 2, 1963.....	October 5, 1963
Saturday, December 7, 1963.....	November 9, 1963
Saturday, January 11, 1964.....	December 14, 1963
Saturday, March 7, 1964.....	February 8, 1964
Saturday, May 2, 1964.....	April 4, 1964
Wednesday, July 8, 1964.....	June 10, 1964

Applicants should arrange to take the tests as early as possible. The scores of an applicant who takes the tests in August will be reported too late for consideration for admission in the fall; similarly, the scores of an applicant who takes the tests in January will be reported too late for consideration for admission in the spring.

ADMISSION TO ADVANCED STANDING

An applicant who has registered in a junior college, a four-year college, a university, extension classes of college level, or any comparable institution since graduation from high school is subject to regulations governing admission to advanced standing. The applicant may not disregard his college record and apply for admission to freshman standing.

Requirements for Admission to Advanced Standing

Applicants for admission to advanced standing must meet the requirements listed below. These requirements apply to California residents; for special requirements for out-of-state students, see page 32.

Satisfaction of High School Subject Requirements

Students are expected to have satisfied, either through high school or college courses, the subjects required for admission of high school graduates to freshman standing (see page 27). Courses taken in an approved college, of appropriate content and completed with satisfactory grades, may be used to clear high school subject deficiencies.

Deficiencies in subject requirements will be waived in an amount not exceeding two high school units if the applicant presents at least 56 units acceptable for advanced standing credit with a grade-point average of 2.4 or higher in all advanced-standing units attempted.

Minimum Scholarship Requirements

In college courses acceptable for transfer to the University, certain grade-point averages are required. Grade points are assigned as follows: for each unit of A, 4 points; B, 3 points; C, 2 points; D, 1 point; E and F, no points. The grade-point average is determined by dividing the total number of acceptable units attempted into the number of grade points earned on those units. Courses completed with a grade lower than C may be repeated, but the units and grade points count each time the course is taken.

The applicant's record in institutions of college level must show that he has met the minimum scholarship standard required of transferring students, in no case lower than a 2.0 average in transfer courses in the last college attended and an over-all 2.0 average in all transfer courses attempted. If the applicant was ineligible at the time of high school graduation because of low scholarship or a combination of low scholarship and incomplete subject preparation, he must present a minimum of 56 units of transfer courses with a grade-point average of at least 2.4. The applicant must also be entitled to return as a student in good standing to the last college attended.

Credit for Work Taken in Other Colleges

The University grants credit for courses appropriate to the curriculum in the University which have been completed in other accredited colleges and universities. This credit is subject to the restrictions of the senior residence requirement of the University. Also, no student may receive transfer credit in excess of an average of 18 units per semester.

As an integral part of the system of public education of California, the University accepts, usually at full unit value, approved transfer courses completed with satisfactory grades in the public junior colleges of the State. After a student has earned 70 units acceptable toward a degree (except credit allowed for military service and training) no further unit credit will be granted for courses completed at a junior college.

Extension courses taken at an institution other than the University may not be acceptable. The decision regarding their acceptability rests with the Office of Admissions.

Minor Deficiencies

The Admissions Officer has authority and responsibility for waiving minor deficiencies when justification is evident in the form of unusual academic records or recommendations.

SPECIAL REQUIREMENTS FOR OUT-OF-STATE APPLICANTS

It has been necessary to place some limitation on enrollment of applicants who are not residents of California, and therefore only those of exceptional promise will be eligible for admission. The regulations below are designed to admit out-of-state applicants whose standing, as measured approximately by scholastic records, is in the upper half of those who would be eligible under the rules for California residents.

Requirements for Freshman Standing

Graduation From an Accredited High School

For schools outside California, regional or other accrediting agencies are consulted. The University makes the final decision regarding acceptability.

Subject Requirements

The same subject pattern as for California residents is required (see page 27).

Scholarship Requirements

The applicant must have maintained a grade-point average of 3.4 or higher on the required high school subjects (grade points are assigned as follows: for each unit of A, 4 points; B, 3 points; C, 2 points; D, 1 point; E and F, no points).

Admission by Examination

Out-of-state applicants who have graduated from high school but are ineligible on their high school records and who have had no college work subsequent to graduation from high school may qualify for admission by examination. The requirements for in-state applicants given on page 29 apply to out-of-state applicants except that the total score on the Scholastic Aptitude Test must be at least 1100 and the scores on the three Achievement Tests must total at least 1725. The score on any one Achievement Test must not be less than 500.

Requirements for Advanced Standing

In addition to the regular admission requirements (see page 30), out-of-state applicants for admission to advanced standing must meet the following regulations.

Required Subjects and Scholarship

The applicant must have maintained a grade-point average of 2.8 or higher in college subjects acceptable for transfer credit.

The applicant is expected to have fulfilled the pattern of required high school subjects, if not before high school graduation, then by having included in his college program the courses needed to remove any subject shortages. However, deficiencies in subject requirements will be waived in an amount not exceeding two high school units if the applicant presents 56 or more units acceptable for advanced standing credit with a grade-point average of 2.8 or higher.

If the applicant did not have at the time of high school graduation an average of 3.4 or higher in courses satisfying the required subject pattern, he must present a minimum of 56 acceptable college units with a grade-point average of at least 2.8.

ADMISSION OF SPECIAL STUDENTS

Special students are students of mature years who have not had the opportunity to complete a satisfactory high school program or who have not completed a substantial amount of college work and who by reason of special attainments may be prepared to undertake certain

courses in the University toward a definite and limited objective. No person under twenty-one years of age will be admitted as a special student, nor will an applicant be admitted directly from high school. An applicant for special status must ordinarily submit transcripts of record from all schools attended beyond the eighth grade. Only cases of unusual merit will be considered. A personal interview is usually required before final action in any individual case can be taken.

Conditions for admission are assigned by the Admissions Officer and are subject to the approval of the dean of the college in which the applicant plans to study. Admission is for a specified time only and a prescribed scholarship average must be maintained.

A special student may be admitted to those courses for which, in the judgment of the instructor, he has satisfactory preparation. A special student will seldom be able to undertake the work of the engineering and other professional colleges or schools.

An applicant will not be admitted to special status for the purpose of making up requirements for admission to the University as a regular student.

ADMISSION TO LIMITED STATUS

Students in limited status are those with a bachelor's degree who are not candidates for an advanced degree, or those without a bachelor's degree who have completed a substantial amount of college work, and who by reason of special attainments may be prepared to undertake certain courses in the University toward a definite and limited objective. An applicant for limited status must ordinarily submit transcripts of record from all schools attended beyond the eighth grade. A personal interview is usually required before final action can be taken.

Conditions for admission are assigned by the Admissions Officer and are subject to the approval of the dean of the college or school in which the applicant plans to study. Admission is for a definite period, and a prescribed scholarship average must be maintained.

An applicant will not be admitted to limited status for the purpose of raising a low scholarship average.

ADMISSION OF APPLICANTS WITH BACHELORS' DEGREES

Ordinarily, an applicant with a bachelor's degree substantially equivalent to the bachelor's degree granted by the University of California should apply for admission to graduate status. An applicant with a superior record may occasionally qualify as a student in limited status or, after a complete change of objective, as an undergraduate seeking a second baccalaureate. In either case, the previous scholarship record must be such as to indicate very strong probability of academic success.

Admission is subject to the approval of the Admissions Officer and of the dean of the school or college in which the applicant plans to enroll.

ADMISSION OF APPLICANTS FROM OTHER COUNTRIES

The credentials of an applicant for admission from another country in either undergraduate or graduate standing are evaluated in accordance with the general regulations governing admission. An application, official certificates, and detailed transcripts of record should be submitted to the Office of Admissions several months in advance of the opening of the semester in which the applicant hopes to gain admittance. Doing so will allow time for exchange of necessary correspondence and, if the applicant is admitted, will help him in obtaining the necessary passport visa.

Compulsory Health Insurance. The acquisition of health insurance is a condition of registration at the University of California for all foreign students except those in the United States on Permanent Immigrant visas.

Proficiency in English. An applicant from another country whose native language is not English may be admitted only after demonstrating that his command of English is sufficient to permit him to profit by instruction in the University. An applicant's knowledge of English is tested by an oral and written examination given by the University. Admission of an applicant who fails to pass this examination will be deferred until he has acquired the necessary proficiency in the use of English.

Language Credit. A student from a country where the language is not English, will be given college credit in his own language and its literature only for courses satisfactorily completed. Such credit will be allowed only for courses taken in his country at institutions of college level, or for upper division or graduate courses taken in this University or in another English-speaking institution of approved standing.

College of Engineering. A student who is outside the United States and applies for admission to the lower division of the College of Engineering must pass with satisfactory scores the College Entrance Examination Board Scholastic Aptitude Test (verbal and mathematics sections) and achievement examinations in English composition, physics, and advanced mathematics before a letter of admission to the College of Engineering can be issued. Arrangements to take the tests in another country should be made directly with the Educational Testing Service, P.O. Box 592, Princeton, New Jersey. A fee of \$13 is charged for these examinations and should be sent to the Educational Testing Service,

not to the University. The applicant should request that his scores in the tests be forwarded to the Office of Admissions.

Foreign Student Adviser. There is on campus an adviser to assist foreign students in all matters pertaining to their attendance at the University. It is urged that every student from another country, upon his arrival at the University, consult the Foreign Student Adviser, 2248 Administration Building.

ENGINEERING EXAMINATIONS

All students who plan to register in the College of Engineering in either the lower division or the upper division should take an engineering qualifying examination.

The Lower Division Engineering Examination is an aptitude test that contains sections on technical vocabulary, mathematical reasoning, and scientific relationships. A satisfactory score on this test, though not a condition of admission, is prerequisite to the standard pattern of courses in the lower division of the College of Engineering; consequently, students who do not achieve a satisfactory score will not be able to begin the usual pattern of courses and therefore will require more than four years to graduate.

The Upper Division Engineering Examination is an achievement test that includes sections on English, mathematics, chemistry, physics, and lower division engineering subjects. It is required of all students who seek upper division status in the College of Engineering, including those from the lower division of the University.

Both examinations are given on announced dates at various test sites throughout the State. By special arrangement, these examinations may be taken outside California.

The appropriate examination should be taken the semester before the one in which the applicant plans to register. Formal application for admission to the University as well as the application to take the test must be filed before the date scheduled for the examination.

ADMISSION IN GRADUATE STANDING

Applications for admission to graduate status will be considered from graduates of recognized colleges and universities who propose to work for the degree of Master of Arts, Master of Science, Master of Education, Master of Fine Arts, Master of Engineering, Master of Business Administration, Master of Library Science, Master of Public Administration, Master of Public Health, or Master of Social Welfare, for the degree of Doctor of Education, Doctor of Public Health, or for the degree of Doctor of Philosophy, or the certificates of completion lead-

ing to the general secondary or junior college teaching credentials, and the supervision and administration credentials. Completed applications with supporting documents *in duplicate* must be received by the Admissions Section of the Graduate Division not later than July 15 for the fall semester, and not later than December 1 for the spring semester. Because of the time required to process an original application or a renewal of application, and to prepare the registration forms, applications and/or transcripts received after the deadline date will ordinarily be deferred for consideration to the following semester.

Holders of the bachelor's degree from institutions of acceptable standing are accorded admission to the Graduate Division, subject to the following qualifications: (1) that the standards of the degree in question are equivalent in both the distribution of academic subject matter and in scholarship achievement requirements to those maintained at the University of California; (2) that the required B grade average in all post-baccalaureate work is maintained; and (3) that the student can be accommodated in the field in which he wishes to study. The Dean of the Graduate Division may deny admission, however, if the record of scholarship is not sufficiently distinguished, or if he judges the undergraduate program not to have been such as to furnish an adequate foundation for advanced academic or professional study. These provisions affect all applicants whether from colleges or schools in the University of California or elsewhere. Notification of acceptance or rejection is sent to each applicant as soon as possible after the receipt of his application. *Applicants are warned not to make definite arrangements for attending the University, on the assumption that they will be accepted for admission, until they have received a formal notice of acceptance from the Graduate Division.*

Application is to be made upon the form provided by the Graduate Division, and must be accompanied by the application fee (see below); transcripts of previous work must be submitted in accordance with the instructions on the application form.

An application fee of \$5 is required of every student applying for admission to graduate status, even though he may have been in previous attendance at the University in other than graduate status.

Admission with Subject Deficiencies

In special instances an applicant whose undergraduate program is not the equivalent to that required for the bachelor's degree of the University of California—in the pattern of subjects and/or requirements of the major in which the applicant wishes to obtain an advanced degree—may be admitted to the Graduate Division* but only upon recommendation of the department in which he wishes to take an advanced degree

* This does not apply to applicants with scholarship deficiencies.

and with the understanding that the applicant will have to take courses to make up his deficiencies prior to or in addition to the work required for the advanced degree. Such applicants must expect to have to spend more than the usual time in residence required for the advanced degree.

Admission without an Advanced Degree Objective

Students who do not desire to become candidates for higher degrees must meet the same admission requirements as those who are prospective candidates for degrees. They must be admitted to a specified field of study, and they must satisfy the Dean that their program of study has a definite scholarly or professional purpose. Such students are not eligible to apply for exemption from the nonresident tuition fee.

Graduate Students in Summer Sessions

Students are advised that admission to graduate courses in the Summer Sessions does not of itself constitute admission to the Graduate Division. Students who wish to take upper division and graduate courses in the Summer Sessions with the intention of applying them toward an advanced degree, or who wish to work for an advanced degree or University recommended credential in Summer Sessions only, must establish their eligibility for graduate work at the University by applying for and being admitted to graduate standing for a regular session (fall or spring), even though they do not plan to register that semester. This should be done before the student begins an advanced degree program.

Students who do not register in the semester for which they were admitted and who later wish to attend a regular session must file a *renewal of application* for admission to graduate status, even if they have attended one or more Summer Sessions in the interval. If they have attended other institutions or University Extension in the interval, they must file supplementary transcripts.

General Regulations

APPLICATION FOR ADMISSION

Prospective students are warned of the necessity of making early application for admission in order that their credentials may be processed in time to permit registration within the scheduled period. New undergraduate students must file applications for admission, with complete credentials, not later than July 15 for the fall semester and not later than December 15 for the spring semester. For new graduate students (including old undergraduate students entering graduate status for the first time), these dates are July 15 and December 1, respectively. Attention is called to the fact that new students expecting to enter the *School of Law*, *School of Medicine*, and *School of Social Welfare* must file applications at earlier dates. For these dates see the sections explanatory of the curricula of the college or school in later pages of this bulletin.

Undergraduate students planning to return after an absence must file applications for readmission not later than August 15 for the fall semester and not later than January 15 for the spring semester. For graduate students, these dates are August 15 and January 2, respectively. Students planning to re-enter the college or one of the schools listed in the preceding paragraph should follow the instructions given at the end of the paragraph.

REGISTRATION

Each student registers in the University of California, Los Angeles, at times appointed for this purpose, at the beginning of each semester. Registration covers the following steps: (1) filling out address card, paying fees, and receiving in exchange a card showing that the applicant has been registered in the University; (2) enrolling in courses according to instructions which will be posted on the University bulletin boards; and (3) filing registration packet at the office of the dean of his college or school. Continuing students will have an opportunity to perform both steps (1) and (2) by mail; all students will have the opportunity to perform step (1) by mail.

The student should consult the REGISTRATION CIRCULAR for the semester he plans to attend, to acquaint himself with the dates upon which students are required to register, enroll in classes, and file study lists.

REGISTRATION REQUIRED FOR CANDIDATES FOR HIGHER DEGREES

Every candidate for a higher degree is required to register at the University at the beginning of each semester so long as *any part* of the *degree* requirement (including the thesis or dissertation and final examination) is not yet fulfilled; and until either the degree shall have been awarded, or the candidate shall have been granted a formal leave of absence or an honorable dismissal by the graduate dean. Failure to register or to take a leave of absence will constitute presumptive evidence that the student has withdrawn from the Graduate Division. If the student plans to be in residence on the campus he must register as a regular student.† If he plans to be away from campus during the semester, but in correspondence with his department and in an instructional relationship with his advisers, he must register *in absentia*. Such registration does not entitle a student to health or other services covered by the incidental fee. Petitions to register in absentia must be filed with the Office of the Graduate Division *before registration*.

PHYSICAL EXAMINATION

All new students (graduate and undergraduate, including transfer students from other campuses of the University) must appear at the Student Health Service and take a physical examination to the end that the health of the University community, as well as that of the individual student, may be safeguarded.

All re-entrant students and all former undergraduates entering graduate status for the first time are required to report to the Student Health Service for clearance of health record and recheck of certain items in the physical examination.

Before coming to the University every student is urged to have his own physician examine him for fitness to carry on University work, and to have all defects capable of being remedied, such as dental cavities, defective hearing, or defective eyesight, corrected. This will prevent possible loss of time from studies. Prior to registration in the University, prospective students who have had a diagnosis of active tuberculosis will be required to submit evidence that their disease has become inactive.

† Graduate students in residence who have been *advanced to candidacy for a doctor's degree*, upon petition to the Office of the Graduate Division have the option of foregoing the services of student health facilities and paying only one-half the established incidental fee, plus the nonresident tuition fee if applicable.

RESERVE OFFICERS' TRAINING CORPS

Army Reserve Officers' Training Corps

In accordance with National Defense Act of 1920, and with the concurrence of the Regents of the University, a unit of the Senior Division Reserve Officers' Training Corps was established on the Los Angeles campus of the University in July, 1920.

The purpose of the Army R.O.T.C. is to qualify male students as leaders in their chosen fields, as far as the requirements of the service permit: engineering, communications, administration, logistics, personnel management, intelligence, and many others. The R.O.T.C. program qualifies graduates for commissions as officers in the United States Army Reserve, and selected graduates for commissions in the Regular Army.

The courses in general military science are prescribed by the Department of the Army and are designed to offer the opportunity for commissions in most of the branches of the United States Army.

Naval Reserve Officers' Training Corps

By action of the Secretary of the Navy and of the Regents of the University of California in June, 1938, provision was made for the establishment of a unit of the Naval Reserve Officers' Training Corps on the Los Angeles campus of the University.

The primary object of the Naval Reserve Officers' Training Corps is to provide at civil institutions systematic instruction and training which will qualify selected students of such institutions for appointment as officers in the Regular Navy, Naval Reserve, Marine Corps, and Marine Corps Reserve. Upon successful completion of the four-year program, which includes the receipt of a baccalaureate degree from the University, the student may expect to be commissioned and to be ordered to active duty in ships or aircraft of the Navy with field units of the Marine Corps, or with Marine Aviation.

Initial enrollment is restricted to able-bodied male students who are citizens of the United States, between the ages of seventeen and twenty-one years, never have been married and agree to remain unmarried until commissioned or disenrolled. Students must pass the same physical examination as is required of all candidates for admission to the Naval Academy.

The N.R.O.T.C. program normally covers eight consecutive semesters.

Courses in naval orientation and organization, naval history, seamanship, communications, advanced naval weapons, psychology,

navigation, advanced seamanship, naval engineering, damage control, military justice, and leadership are given to those students seeking naval commissions. Courses in military history and principles, small-unit tactics and amphibious operations are given during the last four semesters to those students seeking Marine Corps commissions.

Students are enrolled in the Naval Reserve Officers' Training Corps under one of two categories. These categories are listed below together with the method of selection:

Regular N.R.O.T.C.—Students selected by nation-wide competitive examination and personal interviews. Applications to take the examination must be submitted in early November of the year prior to entering Regular N.R.O.T.C. Successful candidates receive tuition, fees, books, uniforms, and \$50 per month retainer pay from the Navy.

Contract N.R.O.T.C.—Students selected by the Professor of Naval Science after a personal interview and under the quota and policies set by the Navy Department.

Air Force Reserve Officers' Training Corps

The Air Force R.O.T.C. program is a four-year course of study designed to prepare selected college students to serve as officers in the Regular and Reserve component of the United States Air Force. The purpose of the program is to develop character, personality, leadership potential, and to provide the student with a professional education requisite for appointment as a commissioned officer in the Air Force Reserve. With continued increase in importance of air power in overall United States strategic planning, the selection of Air Force R.O.T.C. trained college graduates is receiving increased emphasis.

The course of study is divided into two parts. The Basic Course, or first two years of the program, is concerned with Aerospace Power indoctrination. The Advanced Course, or last two years of the program, is concerned with preparing selected students for active duty in fields compatible with their major field of effort on the college campus.

Acceptance into the Advanced Course is based on academic standing at the University, aptitudes and interests of the individual, and the result of a thorough physical examination. Those students desiring to train for Air Force officer positions and who pass the stringent entrance requirements will be earmarked for assignment in a specific Air Force Career Area on acceptance for the advanced program.

More detailed information is available elsewhere in this bulletin.

R.O.T.C. DRAFT DEFERMENT

Students who qualify and are accepted for the Advanced Course R.O.T.C. (junior and senior years) may be deferred from induction into

the service under the authority contained in the Universal Military Training and Service Act (65 Stat. 75; 50 U.S.C. app. 451-467) as amended, and as further amended by the Reserve Forces Act of 1955 (P.L. 305, 84th Congress; D.A. Bull. 12, 1955).

For military deferment, see the department concerned. Students securing R.O.T.C. draft deferments need not request deferment through the Office of Special Services described on page 66 of this bulletin.

SUBJECT A: ENGLISH COMPOSITION

With the exception noted below, every undergraduate entrant must, at the time of his first registration in the University, take an examination, known as the *Examination in Subject A*, designed to test his ability to write English without gross errors in spelling, grammar, sentence structure, or punctuation.

The examination in Subject A is given at the opening of each semester. (See the REGISTRATION CIRCULAR, to be obtained from the Registrar.) A second examination for persons who do not appear at the announced time is given a few days after the first examination in each semester; for this examination a fee of \$1 is charged.

The results of the first examination will be made known not later than the day preceding the date set for the filing of the study lists for the current semester. Papers submitted in the examination are rated as either "passed" or "not passed." A student who is not present at the examination in Subject A which he is required to take will be treated as one who has failed.

Every student who does not pass in the examination in Subject A must, immediately after his failure, enroll in a course of instruction, three hours weekly for one semester, known as the *Course in Subject A*, without unit credit toward graduation. Should any student fail in the course in Subject A he will be required to repeat the course in the next succeeding semester of his residence in the University.

A student who maintains in the course in Subject A a grade of A is permitted, on recommendation of the Committee on Subject A, to withdraw from the course at a date determined by that committee, and is given credit for Subject A.

Every student who is required to take the course in Subject A is charged a fee and the charge will be repeated each time he takes the course. This fee must be paid before the study list is filed.

No student will be granted a bachelor's degree until he has satisfied the requirement of Subject A.

In respect to grading, conditions, and failure, the course in Subject A is governed by the same rules as other University courses.

A student who has received a satisfactory rating in the College

Entrance Examination Board examination in English composition will receive credit for Subject A. A student who has passed an examination in Subject A given by the University or given under the jurisdiction of the University at various centers in the State annually in April will receive credit for Subject A.

A student who, at any time, has failed in the University examination in Subject A does not have the privilege of taking a second examination until he has completed the course in Subject A.

A student who enters the University of California, Los Angeles, with credentials showing the completion elsewhere with a grade not lower than C, of one or more college courses in English composition is exempt from the requirements in Subject A.

Students from other countries whose native language is not English should take the special examination in English for foreign students rather than the Subject A examination. Those who pass this special examination will be credited as having met the Subject A requirement, as will students who subsequently complete English 33B with a grade of C or better, the advanced course in English for foreign students.

AMERICAN HISTORY AND INSTITUTIONS

Candidates for a bachelor's degree must satisfy the "Requirement in American History and Institutions" by demonstrating a knowledge of American history and of the principles of American institutions under the federal and state constitutions. This requirement may be satisfied in any one of four ways.

1. By passing two optional examinations (one in American History and one in American Institutions) which the Committee on American History and Institutions offers for the purpose of satisfying the requirement. (Normally the examinations are offered one each semester. No unit credit is given for the examinations.)

2. By satisfactorily completing in the University a minimum total credit of four units, from the following list:

Economics 13; History 6A, 6B, 7A, 7B, 8A, 8B, 101, 171A, 171B, 172, 173A, 173H, 174A, 174B, 175, 176, 177, 178A, 178B, 179, 180, 181, 182; Political Science 1, 101, 113, 125, 141, 142, 145, 146, 166, 167A, 167B, 171, 182, 186; History XL 17AB; Political Science X 7, XB 100A (Department of Correspondence Instruction, Berkeley 4, California).

Equivalent courses completed in the University Extension or in Summer Sessions may be used to fulfill the requirement. Equivalent courses taken at other collegiate institutions and accepted by the Board of Admissions may be used to fulfill the requirement.

3. By a combination of 1 and 2, above.

4. By presentation of a certificate of satisfaction of the present California requirement as administered in another collegiate institution within the State.

Candidates for a teaching credential, but not for a degree, need take only the optional examination (in American Institutions) or a two-unit course on the principles and provisions of the Constitution of the United States.

Further information regarding the requirement and the optional examinations may be obtained from the Committee on American History and Institutions. Office hours are from 2:30 to 4:30 p.m., Wednesday or Thursday, in Room 174 Haines Hall.

DEGREES AND TEACHING CREDENTIALS

Detailed statements of requirements for degrees issued by the University will be found in this bulletin, under headings of the several colleges and departments, and in the bulletins of the various professional schools. The requirements for certificates of completion leading to teaching credentials are to be found in the **UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION**.

Degree Residence†

Every candidate for the bachelor's degree must during his final two semesters of residence, be enrolled in the college or school in which he is taking the degree; and the last 24 units must be completed while enrolled in this college or school. The student may offer two six-week Summer Sessions or one eight-week Summer Session as equivalent to one semester; but he must complete in resident instruction at least one regular semester of his senior year. The regulation applies both to students entering this University from another institution and to students transferring from one college to another within the University.

CHANGE OF COLLEGE OR MAJOR

A student may transfer from one college or major department of the University to another upon the approval of the dean or other responsible officers or committee of the college (or department) to which admission is sought. A form of petition for transfer is supplied by the Registrar.

No student is permitted to transfer from one major department to another after the opening of the last semester of his senior year.

† Special provisions governing residence of degree candidates in the College of Engineering are described in the requirements of that college. See under College of Engineering in this bulletin.

HONORS

Honor students are those who attain the standard of scholarship required by their respective college or school. Honors are granted also with the bachelor's degrees. For regulations concerning honors see the sections explanatory of the curricula of the various colleges in this bulletin.

CREDIT AND SCHOLARSHIP

In both the University and the high school the student is credited, in respect to the amount of work accomplished, in terms of units; and in respect to quality of scholarship, in terms of grades. In a further, more exact determination of the student's scholarship, the University assigns a numerical value in points to each scholarship grade. These points are called grade points and are more fully described below.

High school credit, when it is offered in application for admission to the University, is reckoned in matriculation units; one matriculation unit represents one year's work in a given subject in the high school.

High school credit, when it is offered in satisfaction of high school graduation requirements, is measured in standard secondary units; that is, the credit granted for the study of a subject throughout the school year of from thirty-six to forty weeks is stated in terms of the standard secondary unit. Each unit represents approximately one-quarter of a full year's work in high school; in other words, four standard secondary units represent one full year's work in high school.

Relation between High School Matriculation Units and University Units.—One year's work in the high school is considered to be equivalent to one University semester's work of college level; that is, a student who desires to make up any high school subject deficiency by offering work of college level can in one University semester earn credit equivalent to the credit of one year's work in high school.

In the University, a unit of credit represents one hour weekly of the student's time for the duration of one semester in lecture or recitation, with the time necessary for preparation, or a longer time in laboratory or other exercises for which outside preparations is not required. It is expected that most students will spend two hours preparation for one hour a week of lecture or recitation. Each University unit credit is thus understood to represent at least three hours of the student's time, and the credit value of a course is reckoned in units on that basis.

STUDY-LIST LIMITS*

Concurrent enrollment in resident courses and in courses in University Extension or another institution is permitted only when the entire pro-

* The course in Subject A, which does not give units of credit toward the degree, nevertheless displaces 2 units from a student's allowable program.

gram of the student has received the approval of the proper dean or study-list officer and has been filed with the Registrar before the work is undertaken.

A student on scholastic probation, except in the College of Engineering, is limited to a program of 12 units each semester, to which may be added a $\frac{1}{2}$ -unit course in physical education.

For students in good academic standing, undergraduate study lists may be presented as follows:

College of Agriculture: 12 to 18 units per semester, plus $\frac{1}{2}$ unit of physical education.

School of Business Administration: 12 to 18 units per semester, plus $\frac{1}{2}$ unit of physical education if required.

College of Engineering: within the limits prescribed in each individual case by the Dean or his representative.

College of Fine Arts: 12 to 18 units per semester except for students in their first semester of residence and students who failed to make a C average the previous semester, in which cases the maximum is 16. Upon attaining at least a B average in a total program of 12 or more units, a student may petition to enroll in as many as 20 units. In all cases $\frac{1}{2}$ unit of physical education may be added to the stated maximum.

College of Letters and Science: 12 to 16 units for students in the first semester of the freshman year. All other students who have a C average or better and are not on probation may carry from 12 to a maximum of 18 units without petition. After one's first semester, he may petition to enroll in as many as 20 units if in the preceding semester he attained at least a B average in a total program of 12 or more units. All first-semester transfer students from any other campus of the University may carry excess study lists on the same basis as students who have completed one or more semesters on the Los Angeles campus. All entering freshmen who are enrolled in Naval R.O.T.C. may carry not more than 17 $\frac{1}{2}$ units without petition.

School of Nursing: 12-18 units. A student must petition to enroll in more units.

School of Public Health: 12 to 16 units. A student must petition to enroll in more units.

With the exception of the $\frac{1}{2}$ unit of physical education allowed in certain cases, as indicated above, all courses in Military Science and Physical Education and all repeated courses are to be counted in study-list limits.

A special student ordinarily will have his study list specified at the time of his admission; it is limited to 16 units.

Regulations concerning study-list limits for graduate students will be found on page 162 of this bulletin.

GRADES OF SCHOLARSHIP; GRADE POINTS

In the University, the result of the student's work in each course (graduate and undergraduate) is reported to the Registrar in one of six scholarship grades, four of which are passing, as follows: A, excellent; B, good; C, fair; D, barely passed; E and F, not passed. The designations "passed" and "not passed" may be used in reporting upon the results of certain courses taken by honor students in the College of Letters and Science and in reporting upon the results of lower division courses outside the major taken by students in graduate status.

Grade E indicates a record below passing, but one which may be raised to a passing grade without repetition of the course by completing examinations or by performing other tasks required by the instructor. Grade F denotes a record so poor that it may be raised to a passing grade only by repeating the course. A student who raises a grade of E to a passing grade receives unit credit but no grade points unless granted by petition in special circumstances.

The term "incomplete" is not used in reporting the work of students. The instructor is required, for every student, to assign a definite grade based upon the work actually accomplished, irrespective of the circumstances which may have contributed to the results achieved.

Course reports filed by instructors at the end of each semester are final, not provisional.

Grade points are assigned to the respective scholarship grades as follows: for each unit of credit, the scholarship grade A is assigned 4 points; B, 3 points; C, 2 points; D, 1 point; E, and F, no points.

In order to qualify for any bachelor's degree at Los Angeles,* the student must have obtained at least twice as many grade points as there are units in the total credit value of all courses undertaken by him in the University of California.† A similar regulation is in effect on all campuses of the University.

Minimum Scholarship Requirements

The following provisions apply to all undergraduate students at Los Angeles except students in the College of Engineering:

A. Probation: a student shall be placed on probation

(1) If at the close of his first semester his record shows a total deficiency of six or more grade points below a C average; or

(2) If at the close of any subsequent semester, his grade-point average is less than 2.0 (a C average), computed on the total of all

* Candidates for teaching credentials must also maintain at least a C average in supervised teaching.

† Courses taken by honor students of the College of Letters and Science or by graduate students without letter grades are not counted in determining the grade-point status.

courses undertaken in this University for which he has received a final report.

B. Dismissal: a student shall be subject to dismissal from the University

(1) If in any semester he fails to pass with a grade of C or higher courses totaling at least 4 units; or

(2) If while on probation his grade-point average for the work undertaken during any semester falls below 2.0 (a C average); or

(3) If after two semesters of probationary status he has not obtained a grade-point average of 2.0 (a C average), computed on the total of all courses undertaken in this University for which he has received a final report.

Students at Los Angeles coming under the above regulations are subject to the supervision of the deans of their respective colleges, who have adopted a policy of limiting study lists of students on probation to 12 units. In cases where students are subject to dismissal the deans have the power to dismiss from the University; to permit retention in the University; and to permit dismissed students to re-enter the University.

The following provisions apply to all students in the College of Engineering:

A student will be subject to dismissal from the University

(1) If during any semester or summer session he fails to attain a C average in all courses for which he is enrolled; or

(2) If at the end of any semester or summer session he has failed to attain at least a C average in all courses undertaken in the University.

A student who becomes subject to these provisions shall be under the supervision of the faculty of the College. The faculty, or persons designated by it, shall have the power to dismiss from the University students under its supervision, or to suspend the provisions of this regulation and permit the retention in the University of the students thus subject to dismissal, and the return to the University of students who have been dismissed under this regulation.

The action to be taken in respect to students in graduate status who acquire scholarship deficiencies is left to the discretion of the Dean of the Graduate Division.

CREDIT BY EXAMINATION

Provision is made whereby an undergraduate student in residence and in good standing may under certain conditions take examinations for degree credit either (a) in courses offered in the University, without formal enrollment in them, or (b) in subjects appropriate to the student's curriculum, but not offered as courses by the University. The results of

all such examinations, with grades and grade points, are entered upon the student's record in the same manner as for regular courses of instruction (see Grades of Scholarship, above). No fees are required. Applications may be obtained from the Dean of the College.

Application for examination for advanced standing on the basis of work done before entrance to the University should be made to the Office of Admissions at the time of entrance to the University. If a student who has already matriculated proposes to enter upon study outside the University of California with a view to asking the University to examine him upon that work and to allow him credit toward the degree, he must take all arrangements *in advance* with the department concerned and with the Director of Admissions. Fees are required for such validation examinations. The application form for examinations may be obtained from the Office of Admissions.

FINAL EXAMINATIONS

Final examinations are obligatory in all undergraduate courses except laboratory courses and other courses which, in the opinion of the Committee on Courses, because of resemblance to laboratory courses, require special treatment. In laboratory courses final examinations are held at the option of the department in charge. All examinations will, so far as practicable, be conducted in writing, and a maximum time will be assigned beforehand for each examination, which no student will be allowed to exceed. The time for examination sessions may not be more than three hours. Leave to be absent from a final examination must be sought by written petition to the proper faculty.

If a final examination is one of the regular requirements in a course, there can be no individual exemption from examination, except as provided in the preceding paragraph.

WITHDRAWAL FROM THE UNIVERSITY

During the course of any semester a student may file with the Registrar a Notice of Withdrawal and Request for Statement of Conditions for Readmission. Provided the student is in good standing at time of withdrawal and secures the necessary clearances, he may be issued an "honorable dismissal."

A student is in good standing if he is entitled to enjoy the normal privileges of a student in the status in which he is officially registered. Students dismissed by reason of scholarship deficiencies, and students under supervision or on probation, may receive letters of honorable dismissal which bear a notation concerning their scholarship; students under censure or suspension may not receive an honorable dismissal

but may receive transcripts of record which bear a notation concerning such censure or suspension.

Students who withdraw from the University during the course of any semester and wish subsequently to re-enter must file an Application for Readmission on or before August 15 for a fall semester; January 15, for a spring semester.

Discontinuance without Notice.—Students who discontinue their work without petition for honorable dismissal may render themselves ineligible not only for readmission to the University of California but also for admission by transfer to another institution. All grades in courses undertaken in the semester from which a student withdraws without notice become “not passing” (E or F) and remain so upon the student’s permanent record.

TRANSCRIPTS OF RECORD

Upon formal application to the Registrar a student may have issued on his behalf transcripts of his record on all work taken on this campus of the University. A fee of \$1.00 is charged for each transcript, except for those required for intercampus transfer within the University which shall be provided without charge.

DISCIPLINE

When a student enters the University it is taken for granted by the University authorities that he has an earnest purpose and that his conduct will bear out this presumption. If however, he should be guilty of unbecoming behavior or should neglect his academic duties, the University authorities will take such action as, in their opinion, the particular offense requires. Students who fail to make proper use of the opportunities freely given to them by the University must expect to have their privileges curtailed or withdrawn.

STUDENT RESPONSIBILITY

Each student is responsible for compliance with the regulations printed in this bulletin and in the handbook of RULES AND REGULATIONS FOR STUDENTS issued by the Registrar’s Office; also with official notices published in the *Daily Bruin* or posted on official bulletin boards.

Expenses, Housing, Financial Aids

GENERAL EXPENSES AND FEES*

The question of expense while attending the University is of importance to every student. It is difficult, however, to give specific information about yearly expenditures. In a student body of some twenty thousand members there are so many different tastes, as well as such a wide range of financial resources, that each student must determine his budget in keeping with his own needs and financial condition. It is possible to live simply, and to participate moderately in the life of the student community, on a modest budget. The best help the University authorities can offer the student in planning his budget is to inform him of certain definite expense items, and acquaint him with others for which he will in all probability have to provide.

An estimated budget for the academic year is given on page 56.

Fees and deposits are payable preferably in cash. If a check is presented the face amount should not exceed all the fees to be paid and must be made payable to The Regents of the University of California.

INCIDENTAL FEE

The incidental fee for all undergraduate and graduate students is \$75. This fee, which must be paid each semester at the time of registration, covers certain expenses of students for counseling service, for library books, for athletic and gymnasium facilities and equipment, for lockers and washrooms,§ for registration and graduation, for such consultation, medical advice, and hospital care or dispensary treatment as can be furnished on the campus by the Student Health Service, and for all laboratory and course fees. A Student Union fee of \$6 each semester is required of all undergraduate and graduate students. Membership in the Associated Students (fee \$8 for all rights and privileges) is required of all undergraduate students; see page 68. Membership in the Graduate Students Association (fee, \$2 for all rights and privileges) is required of all graduate students; see page 68. No part of these fees is remitted to those students who may not desire to make use of any or all of these privileges. If a student withdraws from the University within the first five weeks from the date of his registration, a part of these fees will be refunded.

* All fees subject to revision. Payment of registration fees is a part of registration. Other fees are payable at Cashier's Office, which is open from 8:30 a.m. to 4 p.m. daily, and from 9 a.m. to 12 m. on Saturdays.

§ Lockers are issued, as long as they are available, to registered students who have purchased standard locks. Locks are sold at \$1.25 each, and may be used as long as desired, or may be transferred by the purchaser to another student.

TUITION

Tuition is free to every student (*not in the School of Medicine*) who has been a legal resident of the State of California for a period of more than one year immediately preceding the opening day of the semester during which he proposes to enroll. Every student who has not been a legal resident of the state for said period is classified as a nonresident and is subject to payment of a nonresident tuition fee. A student entering the University for the first time should read carefully the rules governing the determination of residence as quoted below so that he may be prepared in the event of nonresident classification to pay the required tuition fee. Every entering student and every student returning to the University after an absence is required to make a Statement as to Residence on the day of registration upon a form which will be provided for that purpose and his status with respect to residence will be determined soon after registration by the Attorney in Residence Matters.

The eligibility of a student to register as a resident may be determined only by the Attorney in Residence Matters. If the student is in doubt about his residence status, he may communicate with that officer at 590 University Hall, University of California, Berkeley 4. During registration, the Attorney may be consulted upon the campus at a place that may be ascertained by inquiry at the Registrar's Information Window, Administration Building.

Students classified as nonresidents are required to pay a tuition fee of \$300 each semester. This fee is in addition to the incidental, Student Union, and A.S.U.C.L.A. fees. Exception from payment of the nonresident tuition fee may be granted to an unmarried minor whose parent is in active military service of the United States and is stationed in California on the opening day of the semester during which the minor proposes to attend the University. The nonresident tuition fee for an *undergraduate* student registered for less than 12 units is \$25 a unit or fraction of a unit, with a minimum of \$50. Graduate students may have part or all of the nonresident tuition fee waived under certain conditions set forth below.

Graduate students who are unable to devote more than half time to academic study for reasons of health as certified by the Student Health Service, or for reasons of full-time employment in salaried positions when certified by a statement from the employer, may petition the Dean of the Graduate Division for an exception from payment of the nonresident fee. When exceptions are made, the student's program will be limited to 6 units of course work, and the fee will be \$150. The petition must be submitted before registration. Otherwise, all students are presumed to be full-time students, irrespective of the number of units for which they enroll.

Graduate students who are admitted without deficiencies, who have proved that their scholarship is distinguished and who are making normal progress toward the fulfillment of requirements for higher academic or professional degrees or toward the requirements for teaching certificates to be granted by the University, may apply to the Dean of the Graduate Division for waiver of the nonresident tuition fee. Students who wish to obtain this privilege should apply for the waiver at the time of application for admission to the Graduate Division. If the application for fee waiver is approved, the student will be notified by mail, time permitting; otherwise, he should inquire at the Office of the Graduate Division of the campus on which he has been admitted prior to his registration. Students will be charged the full fees at the time of registration unless they have followed this procedure and have received a fee statement for presentation to the Cashier prior to their registration date. Returning and continuing students should also observe these time limits and procedures if they are applying for waivers. No assurance can be given students who apply for waivers during the registration period that action will be taken prior to their registration date. They must be prepared to register on time and to pay the full fees. If their waiver requests are approved after they have registered, a refund of the nonresident tuition fee will be arranged. The waiver is granted for only one semester at a time and a new application has to be made for it each semester.

The term *distinguished scholarship* will be interpreted as follows: The scholarship standing must have been excellent throughout a period of no less than two years just preceding the time of application for this privilege. Moreover, only students from institutions of recognized standing in scholarly work will be considered. Applicants for this privilege may be required to have confidential letters about themselves sent to the Dean of the Graduate Division from persons who are thoroughly acquainted with their abilities and their intellectual achievements. Thus it should be clear that only the decidedly exceptional student will be eligible for the privilege of exemption from the payment of tuition if he is a nonresident. Irrespective of how distinguished his scholarship may have been, a graduate student will not be exempt from payment of the tuition fee if he is carrying some lower division courses merely for his cultural advancement or is making up subject deficiencies in his undergraduate preparation. Foreign students whose tuitions are paid by their governments are in no case eligible for remission of the nonresident fee.

Rules Governing Residence

The residence classification of each student is determined in accordance with Section 244 of the California Government Code, Sec-

tions 23054, 23055 and 23057 of the California Education Code and the Standing Orders of the Regents. It is therein provided that a resident student is any person who has been a legal resident of the State of California for more than one year immediately preceding the opening day of the semester during which he proposes to enroll.

The attention of the prospective alien student is directed to the fact that he is a nonresident unless, in addition to the general residence requirements for tuition purposes, he has been admitted to the United States for permanent residence in accordance with all applicable laws of the United States. The attention of the prospective student who has not attained the age of 22 and whose parents are not California residents, and the attention of the veteran who was not a resident of California at the time of his entrance into the Armed Forces, is directed to the fact that presence in California for more than one year does not, of itself, entitle the student to classification as a resident.

Every student who is classified as a resident but who becomes a nonresident of California is obliged to notify the Attorney in Residence Matters at once. Application for a change of classification with respect to a previous semester will not be received under any circumstances.

A person incorrectly classified as a resident student is subject to reclassification as a nonresident. If the incorrect classification resulted from concealed facts or untruthful statements made by him, the student then shall be required to pay all tuition fees which would have been charged to him as a nonresident student. He shall be subject also to such discipline as the President of the University may approve.

REFUNDS

Refunds of a part of the incidental fee (and of the nonresident tuition fee, if paid) is made to a student who withdraws from the University within five weeks from the first day of classes.

No claim for refund of fees will be considered unless such claim is presented during the fiscal year to which the claim is applicable. No student will be entitled to a refund except upon surrender to the Registrar of his registration card and receipt. Students should preserve their receipts.

OTHER FEES

Application fee, \$5. This fee is charged every applicant for admission to the University, and is payable at the time the application is filed. Applicants for graduate status must pay this fee, even though it may have been paid in undergraduate status; see page 35.

Medical examination: original appointment, or deferment arranged in advance, no fee; *fee for a second appointment*, \$4.

Late registration, \$10.

Late filing of registration packet, \$10.

Late examination in Subject A, \$1.

For courses added or dropped after date set for filing registration packet, \$2 for each petition.

For removal of grade E, \$4 for each petition.

For reinstatement of lapsed status, \$10.

For late application for teaching assignment, \$1.

For late notice of candidacy for the bachelor's degree, \$3.

For late return of athletic supplies, \$1 for each 24 hours until full purchase price of article is reached.*

For failure to empty locker within a specified time, \$5.

Returned check collection, \$5.

For duplicate registration card, \$2.

For duplicate cards in the registration packet, \$1 for one and \$.25 for each additional card.

Tuition fee for Government students, \$300.

TRANSPORTATION TO CAMPUS AND PARKING

Student parking facilities on campus are limited and are subject to a parking fee.

A limited number of parking permits will be sold on a priority basis as follows: (1) Students with physical disabilities which preclude walking long distances may apply for permits through the Student Health Service; (2) Students living in residence halls may apply for adjacent parking through the authorized representative in their residence hall; (3) Students whose curriculum or research requires several trips to and from the campus each day may inquire at Campus Parking Service regarding their eligibility for parking permits; (4) In those cases where an extreme hardship will be imposed on the student if he cannot park on campus, appeals may be made to the Dean of Students Office, Room 2224, Administration Building. These applications will be carefully screened.

All students who do not receive permits on a priority basis may obtain permits on a "first come, first served" basis. In addition, parking facilities are available on a daily basis at 25 cents per entry as space allows.

For additional information relating to parking facilities, inquire at Campus Parking Service, Room A-207, Administration Building.

The use of public transportation, bicycles, and motor scooters is encouraged whenever possible. Bicycle racks and scooter parking are

* Supplies or equipment not returned before the close of the fiscal year must be paid for in full; return after that date is not permitted.

provided at convenient locations throughout the campus. Registration of all motor scooters and motorcycles is required and permits to park on campus are issued at no charge. Applications for these permits may be completed at the University Police Department or at Campus Parking Service. Please contact the Metropolitan Transit Authority or the Santa Monica Municipal Bus Line for information regarding bus schedules in this area.

PRINCIPAL ITEMS OF EXPENSE ESTIMATED FOR A COLLEGE YEAR (two semesters)

Expense Item	Cost	Remarks
Incidental Fee	\$150	Actual cost.
Student Union Fee	12	Actual cost.
A.S.U.C.L.A. Membership Fee.....	16	Membership required of undergraduates; optional for graduate students; however, \$2 Graduate Students Association Membership is required.
Books and Supplies.....	180	Approximate cost.
Board and Room.....	980	Room and Board (20 meals/week) for two semesters in a University residence hall costs, on the average, \$880. An additional sum should be budgeted to cover the one meal a week not provided in the University residence halls or in other residence facilities. The cost of remaining on campus during school recesses is not included in the basic residence hall contract. These supplementary board costs, plus residence hall membership fees, average about \$100 a year.
Miscellaneous	302	A minimum allowance for variable items such as clothing (\$75), transportation and parking (\$90), medicine and drugs (\$62), laundry and dry cleaning (\$50), and the cost of a round trip from home to campus (\$25) is suggested.
Total	\$1,640	A minimum budget for a student who is a California resident and who lives in a University Residence Hall will be approximately \$820 a semester, or \$1,640 a year. Students classified as nonresidents of the State must also add to their estimated budgets the tuition fee of \$600 a year (\$300 a semester).

LIVING ACCOMMODATIONS

Living accommodations for students who do not live with friends or relatives are provided in a number of ways—in Mira Hershey Hall, the University residence for women; in Dykstra, Sproul, Rieber and Hedrick residence halls for men and women; in private homes which accept paying guests; in one of the privately owned residence halls or cooperatives; in neighboring rented apartments; in sororities or fraternities; or in the Married Students' Housing Project. Information concerning any of these accommodations may be obtained from the Office of Housing Services, Room 161, Kerckhoff Hall, University of California, Los Angeles 24. Office hours are: Monday through Friday, 9 a.m. to 5 p.m.

ACCOMMODATIONS WITH PRIVATE LANDLORDS

Up-to-date room and apartment rental listings are freely available to any student who desires to call *in person* at the Office of Housing Services. Since the listings change from day to day, arrangements for such accommodations cannot be made by mail. It should be understood that these accommodations are not inspected by the University. Students planning to obtain rental listings from the Office of Housing Services are advised to arrive on campus at least a week or ten days prior to the opening of the semester.

Since the University is not prepared to go into the community and inspect accommodations and make rental or other arrangements on behalf of students, such transactions must be made individually and directly with landlords. Students and landlords are both advised to have a clear understanding, preferably in writing, as to prices, intended length of tenancy and charges to be made during vacation periods.

Prices range from \$100 to \$125 per month for room and board, from \$40 to \$55 per month per person for room only, and \$80 to \$125 per month for furnished single and bachelor apartments. Those students who are not boarding by the month can obtain moderately priced meals at the cafeteria in the Student Union, or at one of the many restaurants in Westwood Village adjoining the campus.

UNIVERSITY RESIDENCE HALLS

Mira Hershey Hall (for Women)

Mira Hershey Hall, located on the east side of the campus, provides accommodations for 331 women students. Contemporary student rooms have been added as have a new recreation room and dining room while the charm of the Mediterranean architecture of the original structure with its graceful courtyards and gardens has been maintained.

Clarence Dykstra Hall (for Men and Women)

Clarence Dykstra Hall provides accommodations for 800 men and women. This ten-story co-ed residence hall served by high-speed elevators is set in the west campus hills. Men and women students share the dining room, first floor lounges, and recreation rooms. The sun deck on the roof of the tenth story is used by student residents for parties and sun bathing. The hall represents the best in contemporary design, and many of the rooms have views of the beach cities.

Sproul Hall (for Men and Women)

Sproul Hall, a companion co-ed residence hall located just north of Dykstra Hall, was completed and opened in September, 1960. This seven-story hall accommodates 824 men and women students. Contemporary in design, this hall provides dining and lounge area to be shared by men and women occupants who live in separate wings. It is located on the west campus hills and provides sweeping views of the campus and surrounding areas.

Rieber Hall (for Men and Women)

Charles Rieber Hall, set among the west campus hills, offers accommodations for 400 men and 400 women in separate wings. The first floor area is divided into smaller, more intimate lounge, dining, and recreation areas in order to give a feeling of individuality. Several other innovations have been made in this hall which opens in the fall of 1963. They include extra soundproofing between student rooms and newly designed study lamps for excellent study conditions. In this hall, each wing is served by two high speed elevators.

Hedrick Hall (for Men and Women)

Earle Hedrick Hall is the newest of the University's coeducational residence halls. With the same basic design as Rieber Hall, Hedrick incorporates all of the design improvements that have been made in the residence halls thus far. Hedrick, which opens in the spring of 1964, is situated on the highest of the hills on the west campus and offers a sweeping view of the campus, Westwood and the Santa Monica Bay area.

If a student is reasonably sure of being accepted by the Office of Admissions for enrollment, an application for residence may be obtained by writing to the Office of Housing Services.

Applications for all halls are mailed about October 1 for the Spring Semester and about March 1 for the Fall Semester. Requests for applications may be made earlier.

Completed applications should be submitted as soon as possible since

all assignments are based on the chronological order in which the completed applications are received, plus class in school, the geographical location of the applicant's home, and admittance to UCLA.

Contracts for residence are on a semester basis with assignments being made in May for the fall semester and about December 1 for the spring semester.

The present rate for room and board is \$440 per person per semester, and there are social and telephone fees of \$5 each per semester included in the contract which every student is required to sign upon accepting placement in a University residence hall. Two students are assigned to each room. Three meals are served daily, with the exception of Sundays and University holidays when two meals only are served.

PRIVATELY OWNED AND OPERATED UNIVERSITY APPROVED RESIDENCES

Cooperatives

Three residence halls for women are on the cooperative plan with rates for board and room varying from \$265-\$320 per semester per person. Under this plan the students share in the work of operating the hall and work an average of four to five hours per week for part payment of their room and board.

The Cooperative Housing Association is a privately owned, nonprofit organization operating three houses accommodating about 206 men, each member being required to work four hours per week. The cost for board and lodging with two, three, or four in one room is \$263-\$279 per semester. Information concerning membership application may be secured from the manager at Landfair House, 500 Landfair Avenue, Los Angeles 24.

All business dealings should be clearly understood by both the student and the owner since the University cannot assume any responsibility for arrangements to which it is not a party.

Fraternities and Sororities

Most of the 35 fraternities and 22 sororities own or lease homes near the campus and provide lodging and meals for their members and pledges. Monthly bills for residents range from \$90 to \$105 per month, depending upon the number of meals served and the social and recreational privileges included. Students interested in affiliating with a sorority or fraternity should contact either the Panhellenic Office (for sororities), care of the Dean of Women Office, 2241 Administration Building, 405 Hilgard Avenue, Los Angeles 24, or the UCLA Inter-

fraternity Council (for fraternities) at P. O. Box 24031, Los Angeles 24, California.

Students who wish to pledge fraternities or sororities but who do not wish to live in the fraternity or sorority house are welcome to contract for space in University residence halls or with private householders. However, students *will not* be allowed to break their contract to move into fraternities or sororities during the course of the semester.

Accommodations for Married Students

Apartment and house rentals are plentiful. It should be understood that these rentals are not inspected by the University. Married students planning to obtain rental listings from the Office of Housing Services are advised to arrive on campus at least a week or ten days prior to the opening day of the semester. Prevailing prices on furnished and unfurnished rentals are as follows: bachelor and single apartments, \$80 to \$125 per month; 1-bedroom apartments, \$85 to \$150 per month; 2-bedroom apartments \$90 to \$160 per month. Monthly rental prices for houses are appreciably higher. Although the facilities of the Office of Housing Services are available to all students, apartment and house rental listings cannot be sent by mail to interested students. Up-to-date rental listings are available to any student who desires to call in person at the Office of Housing Services.

MARRIED STUDENTS' HOUSING PROJECT

The University of California, Los Angeles, operates a Married Students' Housing Project located on campus. The Project has 195 two-room apartments (combination living room-dinette, kitchen, one bedroom and bathroom with shower) renting at \$38 per month furnished and \$34 per month unfurnished.

Eligibility. Any full time, regularly enrolled veteran or nonveteran student who is married or is considered to be "head of family" may apply for Married Students' Housing Project. Extension students are not eligible to apply.

Assignments. Assignments of applicants to apartments in the Married Students' Housing Project are made on a "need" basis which considers number of children in family, lack of suitable income, and need for housing. If "need" factors are equal between applicants, assignment priority is given to the veteran applicant. Assignment of married students having children is given priority over married students without children.

Only a student and his immediate family may live in the Project.

MOTELS AND TRAILER COURTS

Good motels are located one to five miles from the campus with varying rates and accommodations. It is sometimes advisable for family groups to accept these accommodations temporarily until more permanent quarters can be located. Listings may be secured from the Office of Housing Services.

No trailer parking areas are provided on or near the campus. Information relative to such facilities is available at the Office of Housing Services.

FINANCIAL AIDS FOR STUDENTS

UNDERGRADUATE SCHOLARSHIPS

A number of scholarships are available for both entering and continuing students on the Los Angeles campus from funds provided by the Regents and friends of the University. A limited number of scholarships are available for out-of-State students.

Application blanks and descriptive circulars may be obtained from the Scholarship Office, 2238 Administration Building, University of California, Los Angeles 24, California. Applications must be filed with the committee during the period December 1 to January 10 for continuing students, and during the period December 1 to February 15 for entering students. These dates pertain to the year prior to the academic year for which the awards are to be made. Applications received later than the stated deadlines cannot usually be considered.

To be eligible for a scholarship the applicant must meet certain requirements as to scholarship, financial need, character and promise. A few scholarships are restricted to students with special additional qualifications. Information concerning these special qualifications may be obtained by contacting the Scholarship Office.

Regents Scholarships

A number of four year and two year scholarships are made available to outstanding entering freshmen, to continuing and transfer students beginning their junior year in the University, and to students in the schools of medicine. Recipients will be chosen for both demonstrated achievements and promise. Each will receive \$100 honorarium at the beginning of each academic year. Additional stipends to cover the full cost of required fees, board and room, books and supplies, and incidental expenses will be awarded, the amount to be based on individual financial need. Application requirements are the same as for other scholarships.

Alumni Scholarships

The UCLA Alumni Association, in conjunction with the University, makes available each year a number of scholarships for entering freshmen from accredited California high schools. These are one year awards. The same application blanks are used for all scholarships open to entering students and the completed forms must be in the University Scholarship Office by February 15. The Alumni Committee, with the approval of the University Committee on Undergraduate Scholarships and Prizes, will choose applicants with substantial scholastic ability, high character and outstanding qualities of leadership, who give promise of reflecting credit on themselves and the University.

GRADUATE SCHOLARSHIPS AND FELLOWSHIPS

For information concerning graduate scholarships, consult the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION.

LOANS

Various organizations and individuals have contributed toward the building up of several student loan funds. The gifts for this purpose are administered by the University in accordance with the conditions laid down by the donors.

All University loans are repayable as soon as possible without defeating the purpose of the loan or seriously inconveniencing students.

Applications for regular University loans should be filed at least twelve days in advance of need. For information regarding the application period for National Defense Student loans and for any additional information, please contact the Student Loan Office, 2240 Administration Building.

National Defense Education Act loans are also administered by the Student Loan Office.

PRIZES

The generosity of alumni and friends of the University provides each year for competitive prizes and awards in several fields. These prizes and awards are described in a bulletin issued monthly. The recipients are ordinarily announced at Commencement in June of each year. Further information may be obtained from the Scholarship Office, 2238 Administration Building.

SELF-SUPPORT AND STUDENT EMPLOYMENT

Many students earn part, and a few earn all, of their expenses while attending the University. The University authorities are eager to offer as much encouragement as possible to students who must maintain them-

selves, but long experience has brought out the fact that the self-supporting student, early in his college life, may have to face unforeseen problems which affect his welfare.

University work demands the best that a student can give it. The following statements are made, therefore, not to discourage the able student who must do outside work, but to forewarn him with facts and information so that he may plan carefully and intelligently, and by so doing overcome many of the difficulties that might otherwise lead to disappointment and failure.

1. Whenever possible, it is wise for a student to use his savings to make the first semester of residence in the University one of freedom to give full time to academic work. He may then have an opportunity to adjust himself to new surroundings, to establish sound habits of study, and to maintain a good scholastic standing, and thereby build a foundation for the rest of his University course. By the end of the first semester the student should know the demands of university life and his own capabilities well enough to make it possible to plan, for subsequent semesters, a combined program of studies and work for self-support.

2. The regular undergraduate four-year course based on an average of 15 units of academic work a semester is organized on the supposition that students will give the major part of their time and attention to their studies while attending the University. Therefore, a student who must give considerable time and energy to outside work should consider at the outset the possibility that more than the usual eight semesters (four years) may be required to complete the program for the degree, if he is to maintain his scholastic standing and his health, and to enjoy the advantages of university life.

With reasonable diligence, a student in good health carrying an average program of study in the undergraduate departments can give as much as twelve hours a week to outside employment without seriously interfering with his college work; employment in excess of this amount should be accompanied by a reduction of the academic program carried.

3. Students who are not physically strong or in good general health should not, under ordinary circumstances, attempt to be wholly self-supporting because of the danger of jeopardizing health and academic progress.

Student Services and Activities

STUDENT HEALTH SERVICE

The purpose of the Student Health Service is to conserve the time of the students for their classwork and studies, by preventing and treating acute illnesses and injuries. The services are limited by the staff and faculties available.

Each student registering in the fall and continuing through the spring semester, and each student registering in the spring semester may, at need, have such medical care as the campus health service is staffed and equipped to provide, from the first day of the semester in which the student first registers during the academic year to the last day of the spring semester of the same academic year, or to the date of official withdrawal from the University. Additional service may be provided for seven days after the last day of the semester, at the discretion of the Director of the Student Health Service. Any prospective registrant who receives health service and who does not register for the next following semester shall be required to pay toward the cost of the service rendered him up to the amount of the incidental fee.

Hospital care for a period up to thirty days may be given in the event of serious illness, on the recommendation of the Director of the Student Health Service. A student patient who is still in the hospital at the end of the semester will be released to the care of his family or community as soon as this can be done with safety. Also, in the case of illnesses or injuries requiring long-continued care (tuberculosis, mental illness, spinal injury, etc.) where the condition will obviously prevent the student from returning to classes during the current semester, he will likewise be released to the care of his family or community as soon as this can be done safely.

The Student Health Service does not take responsibility for the care of chronic physical defects or illnesses present at the time of entrance to the University as, for example, hernias, chronic bone and joint diseases or deformities, chronic gastrointestinal disorders, uterine fibroids, chronically infected tonsils, tuberculosis, syphilis, malignant diseases, allergic and endocrine disorders, etc. Furthermore, it does not take responsibility for any injury or illness wherein treatment (other than first aid or emergency care) has been initiated elsewhere; nor for providing elective medical or surgical care, where the best interests of the student would be served by treatment during vacation. There is no provision for the fitting of glasses. Industrial injuries covered by workmen's compensation insurance are given no care other than first aid.

Dental service is provided for diagnosis, and for emergencies such as fractures. A limited amount of general dentistry is also available in certain cases where there is some special need as, for example, when a student's family dentist is unavailable because of distance. Charges are made for such general dentistry in accordance with a schedule of fees approved by the President of the University. The Dental Department is not prepared to provide bridges or other extensive prostheses.

The Student Health Service does not provide complete protection against large medical expenses. Students may utilize its services only if they are able to come to the campus. They ordinarily are not eligible for any services during the summer vacation. There is no provision for replacing teeth lost in accidents. A supplemental medical expense insurance policy, especially designed to protect the students in times, places, and situations where they cannot utilize the Student Health Service, may be purchased at low cost through the Associated Students, at the beginning of each semester.

The acquisition of health insurance is a condition of registration at the University of California for all foreign students except those who are in the United States on Permanent Immigrant visas.

STUDENT COUNSELING CENTER

Individual counseling of regularly enrolled University students is provided by a staff of counseling psychologists who assist students in dealing with choice of and preparation for educational and vocational objectives and with personal-social problems related to their academic performance.

Study Habit Seminars which focus on psychological factors and methods underlying effective study, note-taking, and examination techniques are conducted by the professional staff for interested students. A Reading Laboratory where students may be helped to increase their reading efficiency also is a service offered by the Student Counseling Center, and an Occupational Library is maintained in the Center, providing materials with current information about careers.

Students may arrange an appointment for counseling or sign up for one of the study groups in 2255 Administration Building. Signups for the Reading Laboratory are taken in 271 Economics Building.

Testing is done when it seems advisable as a basis for counseling, and special testing projects for departments and colleges within the University are also administered through this center.

Information regarding the Graduate Record Examination, the Medical College Admission Test and other tests is available in the center.

VOCATIONAL REHABILITATION SERVICE

Students who have a physical or emotional disability which handicaps them vocationally may be eligible for the services of the Vocational Rehabilitation Service of the State Department of Education. These services include vocational counseling and guidance, training (with payment of costs such as books, fees, tuition, etc.), and placement.

A Rehabilitation Counselor is available on the Los Angeles campus for interviewing applicants. Appointments may be made in the Office of Dean of Students—Special Services, A-253 Administration Building, or by contacting the Vocational Rehabilitation Service Office at 107 S. Broadway, Los Angeles 12; telephone MADison 0-4626. One year's residence in California is required for eligibility.

SELECTIVE SERVICE (DRAFT)

Selective service information and counseling on draft status are available Mondays through Fridays at the Office of Dean of Students—Special Services, A-253 Administration Building. Certification of enrollment must be filled out by every student registered with the Selective Service System and submitted to Special Services for mailing within 30 days from the beginning of the academic year. Students desiring deferments on the basis of enrollment in University R.O.T.C. programs should consult page 41 of this bulletin.

VETERANS INFORMATION

Dean of Students—Special Services maintains liaison between certain veterans and veterans' dependents, the Veterans Administration, the State Department of Veterans Affairs, and other agencies offering veteran's educational benefits to assist veterans in coordinating University procedures with Veterans' Educational regulations. This office is located in the Administration Building. Offices of the United States Veterans Administration are located as follows: Los Angeles Regional Office, 1380 S. Sepulveda Boulevard, Los Angeles 25, California; San Francisco Regional Office, 49 Fourth Street, San Francisco 3, California.

Information regarding educational benefits available from the State of California (CVEI) may be obtained from the State Department of Veterans Affairs, P. O. Box 1559, Sacramento 7, California; or by writing either to 1736 Westwood Blvd., Los Angeles 24, California, or 350 McAllister Street, San Francisco 2, California.

Veterans wishing to enroll under the provisions of Public Law 550 (Korean G.I. Bill) and students wishing to enroll under the provisions of Public Law 634 (War Orphans Education Act) must obtain from the United States Veterans Administration a Certificate for Education and

Training which should be filed with the Office of Special Services, Room A-253 Administration Building as soon as possible. These veterans must be prepared to pay all fees and educational costs at the time of registration as education and training allowances are paid to the veteran by the Veterans Administration and the first monthly payments will normally be received 60 to 75 days after compliance with the above instructions.

STUDENT AND ALUMNI PLACEMENT CENTER

Part-Time Student Employment

Currently enrolled students desiring employment during the regular semesters and summer vacation periods may register with the Student and Alumni Placement Center in Temporary Building 1G. Professional staff interviewers assist the student in finding suitable employment emphasizing, whenever possible, the career job which affords work experience related to the student's major field.

The new student who plans to be self-supporting is advised not to begin his University course without sufficient funds to cover the major expenses of at least the first semester, since it is not always possible to secure employment immediately.

Jobs are usually available on an hourly basis in the fields of typing, stenography, bookkeeping, sales and clerical work, care of children, housework, manual labor, tutoring, and other specialized types of work for the properly qualified. Listings of room and board in exchange for work in private homes are also maintained. These are available to men and women and married couples.

Full-Time Career Placement

Through the full-time placement service of the Student and Alumni Placement Center, a staff of professional interviewers is available for consultation and guidance on career planning and placement.

Candidates for a degree, graduate or undergraduate, are urged to register as soon as possible in their last year in order that they may be referred well in advance of graduation to employers from business, industry and government. Such referrals may involve off-campus interviews at plant headquarters or on-campus interviews by employer representatives who visit the Placement Center annually from October through May. All majors are afforded a wide range of career opportunities.

This service is available to all regularly enrolled students of the University, their spouses, and alumni of the University who are unemployed or who desire career relocation.

OFFICE OF EDUCATIONAL PLACEMENT

The Office of Educational Placement recommends graduates, students, and former students for positions in universities, colleges, junior colleges, high schools, and elementary schools, and for educational research, thereby assisting qualified candidates to obtain permanent employment or promotion in the work for which they have prepared themselves. No fee is charged matriculated students or former students of regular sessions or graduates of the University of California; there is no expense to school officials seeking teachers through this office. Communications should be addressed to the Office of Educational Placement, 220 Moore Hall.

The University reserves the right to refuse its services to candidates who seek positions for which they are not fully qualified. In every recommendation the aim is to keep in mind the best available persons, remembering candidates already employed as well as those who may be out of employment.

Candidates for positions are urged to inform the office of the result of their candidacy, and of their desires for future promotion or change of occupation.

THE ASSOCIATED STUDENTS

The undergraduate student self-government is organized and administered by the Associated Students. All undergraduates hold membership by virtue of paying the required A.S.U.C.L.A. membership fee at registration. The organization has a legislative council composed of a President, Vice-President, fifteen elected student representatives, and four adult members. The council administers the general business of the association and coordinates the various cocurricular activities such as publications, athletics, and recreation.

Members are entitled to participate in the affairs of the Associated Students, to subscriptions to the U.C.L.A. *Daily Bruin*, and certain other publications, to free admissions to many athletic contests and reduced rates to others, as well as to dramatic, social, and similar events which are part of the program of the Associated Students. In addition to the *Daily Bruin* the Associated Students publish the *Southern Campus*, the yearbook of the University.

All graduate students belong to a parallel organization, the Graduate Students Association. The Graduate Students Association is part of the A.S.U.C.L.A. but maintains its own separate program geared to the interests and needs of graduate students.

Both the undergraduate and graduate associations have offices in Kerckhoff Hall, given to the University by Mrs. William G. Kerckhoff

of Los Angeles. Kerckhoff Hall facilities have recently been supplemented by one of the finest student union buildings in the United States, in which the cafeteria and student store, owned and operated by the A.S.U.C.L.A., are now located. Recreational and educational programs are provided, as well as a variety of student services.

UNIVERSITY OFFICE OF STUDENT ACTIVITIES

The broad spectrum of activities ranging from the invitation of prominent speakers to this campus, to the formation of student clubs, or the planning of UCLA's traditional Mardi Gras are arranged through this office. Under the direction of the Dean of Men, the University Student Activities Office enforces regulations and policies regarding student activities, student government, recreation groups, honor societies, political, religious, and social clubs. Fraternal and living groups also clear their functions with this department. The Dean of Men is also charged with the responsibility for counseling and the maintenance of good order and discipline for male undergraduates and the members of fraternities and living groups.

The staff is always available to help individual students form clubs and assist them in planning and coordinating their activities.

The University Student Activities Office is located on the third floor of Kerckhoff Hall. The Dean of Men, University Recreation Coordinator, Dean of Student Activities, and the Men's Living Advisers all have offices here.

Necessary clearances and approvals for student activities and events are obtained through the Student Activities Office in the early stages of planning.

PHYSICAL EDUCATION

The facilities of the Department of Physical Education are available to all students as follows:

Recreational Use. Swimming pools, fields, conditioning rooms, gymnastic areas, handball courts, etc., are available Monday through Friday except during times when classes are regularly scheduled. Some facilities are also available on Saturday from 9 a.m.—12 noon. (Any inquiries can be directed to the main stockrooms or main offices in either building during the period Monday through Friday.)

Instruction. Regularly scheduled classes are available on the beginning, intermediate and advanced levels in a great variety of individual and dual sports, team, game and conditioning activities. In addition, instruction is offered in all areas of dance. (See Schedule of Classes.)

Intramurals. Competition and participation in some thirty team and

individual sports activities are available. These activities are usually conducted during late afternoon or early evening hours. Please make inquiries in Men's Gymnasium 122-A or Women's Gymnasium 124 for additional information.

RELIGIOUS FACILITIES

In the immediate vicinity of the campus, at the southeast corner of Hilgard and LeConte Avenues, is the University Religious Conference, where official representatives of the Baptist, Catholic, Congregational, Disciple, Episcopal, Jewish, Latter-day Saints, Lutheran, Methodist and Presbyterian denominations have student headquarters. Additional facilities are available for Catholic students at the Newman Club, 840 Hilgard Avenue. The Y.W.C.A. occupies its own building, at 574 Hilgard Avenue, near the entrance to the campus; the Y.M.C.A. has its office in the same building, at 572 Hilgard Avenue. The Christian Science Organization reading room and headquarters are located at 560 Hilgard Avenue, near the entrance to the campus.

At these centers are held religious discussion groups, lectures, Bible classes, social gatherings, luncheons, dinners, and other student meetings.

Schools and Colleges

COLLEGE OF LETTERS AND SCIENCE

The curricula of the College of Letters and Science are designed to provide the student with opportunities to broaden his culture and to prepare him for specialized professional studies. These curricula lead to the degree of either Bachelor of Arts or Bachelor of Science, normally at the end of the eighth semester.

A liberal education presupposes a reasonably wide distribution of courses that contribute to a desirable balance of intellectual interests. To this end the student is required to select courses in the lower division that deal with general fundamentals of human knowledge. In the more diverse offerings of the upper division the student is relatively free to concentrate his attention upon courses in a field of interest best suited to his aptitudes and purposes.

Each student therefore chooses a field of concentration in the upper division which may be a program of related courses within a single department (departmental major), or a group of coordinated courses involving a number of departments (interdepartmental curriculum), or, under certain circumstances, an organized group of courses chosen to meet a student's special need (individual field of concentration). The pursuit of such definite courses of study necessarily requires a knowledge of antecedent courses known as "prerequisites." With the assistance of his departmental adviser, the student is expected to select those lower division courses which are related to his proposed advanced study. The College of Letters and Science also maintains a staff of counselors to advise and guide students in all academic matters.

Requirements for the Bachelor's Degree

The degree of Bachelor of Arts or Bachelor of Science will be granted upon the following conditions:

1. The minimum number of units for the bachelor's degree shall be 120, of which at least 108 shall be in courses taken from the Letters and Science List of Courses (see page 72), and at least 42 shall be in upper division courses from the Letters and Science List. At least 12 of these upper division units shall be outside a single department, and not more than 42 units of upper division courses taken in one department may be counted toward the bachelor's degree. Not more than 4 units in Physical Education 1 may be counted toward the bachelor's degree. Not more than 8 units of music courses in the series 40A-41W

and 190A-192W will be counted toward the bachelor's degree. No credit will be allowed for work completed at a junior college after the student has completed 70 units toward the degree.

The candidate shall have attained at least a 2.00 grade-point average in all courses undertaken in this University.

2. The candidate shall have completed the general University and College requirements (A) to (G), inclusive (pages 74-77), except for exemptions authorized for his field of concentration (see page 77).

3. The candidate shall have met the University requirement in American History and Institutions.

4. The candidate shall have satisfied the requirements of a field of concentration in the College of Letters and Science. Before the degree is granted, the department or committee in charge of the student's field of concentration must certify that the student has completed the requirements for the field of concentration.

5. The candidate shall have been registered in the College of Letters and Science while completing the final 24 units of work, and shall have completed while registered in the College at least 18 units of upper division courses, including at least 12 units in his field of concentration. This regulation applies to all students including those entering this University from other institutions or from University of California Extension, and to students transferring from other colleges of this University.

The degree of Bachelor of Arts shall be granted to all candidates who qualify for the bachelor's degree, except that the degree of Bachelor of Science shall instead be granted to candidates who have completed such fields of concentration as the Executive Committee of the College may designate as leading to that degree.

Letters and Science List of Courses

At least 108 units offered for the degree of Bachelor of Arts or Bachelor of Science must be in courses chosen from the Letters and Science List of Courses, and the 42 units required in upper division courses (numbered 100-199) must be selected from the same list.

Any course not included in the Letters and Science List of Courses but required or accepted as part of a field of concentration or as a prerequisite therefor, will, for students in that field of concentration, but for no others, be treated as if it were on the Letters and Science List of Courses. Students in the General Elementary and Early Childhood Education Curricula are specifically referred to the special regulation under those curricula concerning the Letters and Science List of Courses.

The following list refers to the courses offered in departments at Los Angeles for the fall and spring semesters, 1963-1964 and is subject to change annually. Courses will be accepted for Letters and Science credit only if taken during a year in which they appear on the list.

Agriculture:

Entomology. 199.

Floriculture and Ornamental Horticulture. 146A-146B.

Irrigation and Soil Science. 101, 108, 110.

Plant Biochemistry. 111.

Plant Pathology. 120.

Air Science. All undergraduate courses up to a total of 12 units.

Anthropology and Sociology:

Anthropology. All undergraduate courses except 400.

Sociology. All undergraduate courses.

Art. 1A, 1B, 5, 7, 100A, 100B, 101, 103, 104, 105, 106, 107, 108, 109, 110A, 110B, 110C, 110E, 111A, 111B, 111C, 112A, 112B, 113A, 113B, 113C, 113D, 114, 115A, 115B, 115C, 115D, 116A, 116B, 117A, 117B, 118, 119A, 119B, 148, 149A-B-C-D, 199.

Astronomy. All undergraduate courses.

Bacteriology. All undergraduate courses.

Botany. All undergraduate courses.

Business Administration. 118, 160.

Chemistry. All undergraduate courses.

Classics:

Classics. All undergraduate courses.

Latin. All undergraduate courses.

Greek. All undergraduate courses.

Sanskrit. All undergraduate courses.

Economics. All undergraduate courses.

Education. 100A-100B, 108, 110A-110B, 129.

Engineering. 111A, 115A, 117A, 120A, 122A, 130A, 145, 150B, 151A, 160A, 163A, 181A, 182D, 182E, 183A, 185B, 186A, 187A, 191A, 192A, 192B.

English:

English. All undergraduate courses except 370.

Speech. All undergraduate courses except 142A, 142B, and 370.

Folklore. All undergraduate courses.

French. All undergraduate courses except 310, 370, 372.

Geography. All undergraduate courses except 370.

Geology:

Geology. All undergraduate courses.

Mineralogy. All undergraduate courses.

Paleontology. All undergraduate courses.

Germanic Languages:

German. All undergraduate courses except 370.

Dutch-Flemish and Afrikaans. All undergraduate courses.

Finnish-Ugric. All undergraduate courses.

Scandinavian Languages. All undergraduate courses.

History. All undergraduate courses.

Home Economics. 170

Humanities. 1A-1B.

Integrated Arts. 1A-1B.

Italian. All undergraduate courses, except 370.

Journalism. 2, 101, 112, 180, 181, 182, 183, 190, 191, 195.

Linguistics. All undergraduate courses.

Mathematics:

Mathematics. All undergraduate courses except 38, 41, and 370.

Statistics. All undergraduate courses.

Meteorology. All undergraduate courses.

Military Science. All undergraduate courses up to a total of 12 units.

Music. All courses included in the following series: 1A to 30B, 100A to 115D, 118, 121A to 177, 197, 199.

Naval Science. All undergraduate courses up to a total of 12 units.

Near Eastern and African Languages:

African Languages. All undergraduate courses.

Arabic. All undergraduate courses.

Armenian. All undergraduate courses.

Berber Languages. All undergraduate courses.

Egyptian. All undergraduate courses.

Hebrew. All undergraduate courses.

Persian. All undergraduate courses.

Semitics. All undergraduate courses.

Turkish. All undergraduate courses.

Urdu. All undergraduate courses.

Nutritional Sciences. 113, 114.

Oriental Languages. All undergraduate courses.

Philosophy. All undergraduate courses.

Physical Education. 1, 130, 139, 146, 147, 150A-150B, 151, 155.

Physics. All undergraduate courses except 370.

Political Science. All undergraduate courses except 104.

Psychology. All undergraduate courses.

Public Health. 5, 44, 100, 110, 147, 160A.

Slavic Languages. All undergraduate courses.

Spanish and Portuguese:

Spanish. All undergraduate courses except 370.

Portuguese. All undergraduate courses.

Theater Arts. 5A, 5B, 101, 102, 104, 105A, 105B, 105C.

Zoology:

Zoology. All undergraduate courses except 111H, and 370.

Life Sciences. 1A-1B.

Biology. 12.

General University and College Requirements

It is advisable that each of the requirements (A) to (G) be completed as early as possible in the student's progress toward the degree, normally all of them within the first 60 units of college work. In fields of concentration requiring unusually heavy preparations some postponements are

possible; and in certain fields, exemptions have been authorized (see page 77).

(A) General University Requirements.

- (1) *Subject A.* An examination in Subject A (English Composition) is required of all entrants at the time of their first registration in the University. For further regulations concerning Subject A, see page 42 of this bulletin.
- (2) *American History and Institutions.* See page 43 of this bulletin.

(B) Foreign Language. At least 16 units in not more than two languages.

- (1) The first two years of high school work in a foreign language will be counted in satisfaction of 4 units of this requirement; the third and fourth years in the same language will be counted in satisfaction of 4 units each. Only work of grade C or higher may be counted.†
- (2) If a new language is begun on the college level it may not apply on this requirement unless course 2, or the equivalent, with its prerequisites is completed.
- (3) This requirement may also be satisfied in one of the following ways: (a) by passing a proficiency examination on this campus in one foreign language; or (b) on petition, by presentation of credentials from a secondary school in which the language of instruction is a foreign language.
- (4) Courses given in English by a foreign language department will not be accepted in fulfillment of this requirement.
- (5) College credit for the mother tongue of a foreign student and for its literature is allowed only for courses taken in native institutions of college grade, or for upper division and graduate courses actually taken at the University of California or at another English-speaking institution of approved standing.

(C) Mathematics. Elementary algebra and plane geometry. If a year of each of these subjects was not completed in high school, they may be taken in University of California Extension, but will not be counted as part of the 120 units.

(D) English Composition. At least 3 units in English composition (English 1A) with a grade of C or better. This requirement may also be satisfied by passing a proficiency examination in English composition set and administered by the Department of English with the approval of the Executive Committee of the College. A bona fide student from abroad, who has learned English as a foreign language and in whose secondary education English was not the medium of instruction, may

† Any student who because of lapse of time or other circumstances feels unable to continue successfully a language begun in high school may consult the department of the language concerned regarding the possibility of repeating all or a part of the work for credit. Such credit would count on the 120 units required for the bachelor's degree; but credit is not allowed toward the required 16 units in foreign language for both the high school and college work thus duplicated.

satisfy this requirement by completing English 33B with a grade of C or better.

(E) Natural Sciences.

- (1) At least 5 units in physical science chosen from the following:

Astronomy 1, 100, 101

Chemistry 1A, 2A, 2, 3A

Geography 1

Geology 2, 2L, 3, 101

One course (not more than 3 units) from: Any lower division

Mathematics course except 38 and 41; Mathematics 114;

Statistics 1; Philosophy 31

Meteorology 3

Physics 1A, 1B, 1C, 1D, 2A, 2B, 10

- (2) At least 5 units in biological science, chosen from the following:

Anthropology 1

Bacteriology 1, 4, 5, 6

Biology 12

Botany 1, 2, 3, 101

Life Sciences 1A-1B (both 1A and 1B must be completed to count on science requirement)

Paleontology 101, 110, 111, 136, 137

Psychology 1B

Zoology 1A, 1B, 15, 102, 125, 138

(F) Social Sciences.

- (1) A lower division year course in history, chosen from the following:

History 1A-1B or 5A-5B or 6A-6B or 7A-7B or 8A-8B

- (2) At least 6 units in social sciences exclusive of history and including courses in at least two subjects, chosen from the following list:

Anthropology 2

Economics 1A, 13, 101

Geography 2

Political Science 1, 2, 101, 103

Psychology 1A, 101

Public Health 5

Sociology 1, 101

(G) Humanities. Two of the following three groups:

- (1) *Literature.* At least 4 units in English, American, or any foreign literature, in the original language* or in translation, selected from the following list:

African Languages 150A, 150B

Arabic 150A, 150B

Classics 113

English 30A, 30B, 46A, 46B, 115, 116A, 116B, 117J, 125C, 125D, 130, 133, 135, 136, 151M, 153, 190A, 190B

French 109A, 109B, 109M, 109N

German 104A, 104B, 118A, 118B, 121A, 121B

* The same courses in foreign language may not be counted both on requirement (G-1) and on the foreign language requirement (B).

Greek 102, 103, 180A, 180B

Hebrew 150A, 150B

Humanities 1A, 1B

Italian 103A, 103B, 109A, 109B, 152

Latin 4, 101, 180

Oriental Languages 112, 132

Persian 150A, 150B

Scandinavian 141A, 141B

Slavic Languages 130, 132, 137, 143A, 143B, 144, 145, 147, 150, 160

Spanish 120A, 120B, 121A, 121B, 160A, 160B.

- (2) *Philosophy*. A 6-unit lower division year course in philosophy, selected from the following:

Philosophy 6A-6B, 20A-20B

- (3) *The Arts*. At least 4 units selected from the following:

Art 1A, 1B, 5 or 7, 100A, 100B, 108, 109

Integrated Arts 1A-1B

Music 20A, 20B, 30A, 30B, 130, 131, 136A, 136B, 170

Theater Arts 5A, 102

Authorized Exemptions

The following exemptions have been authorized in the fields of concentration listed below, and will apply until June, 1966. After that date only exemptions for the curriculum in Earth Physics and Exploration Geophysics will be in effect.

Major in Bacteriology. Exemption:

Requirement (F-2).

Curriculum in Biological Illustration. Exemptions:

1. Either (F-1), or (F-2); and
2. One of the two groups under (G).

Major in Botany. Exemptions:

1. Requirement (F-2); and
2. One of the two groups required under (G).

Major in Chemistry. Exemptions:

1. Either (F-1), or (F-2); and
2. Either (E-2), or one of the two groups required under (G).

Curriculum in Earth Physics and Exploration Geophysics. Exemptions:

1. Requirement (F-2); and
2. One of the two groups required under (G).

Major in Geology. Exemptions:

1. Requirement (F-2); and
2. One of the two groups required under (G).

Major in Mathematics. Exemption:

Requirement (F-1).*

* Mathematics majors who are candidates for the general secondary teaching credential may be exempted from one of the two groups required under (G) upon petition recommended by the department and approved by the Dean of the College.

Curriculum in Physical Sciences—Mathematics. Exemption:

One of the two groups required under (G).

Major in Zoology. Exemptions:

1. Either (F-1), or (F-2); and
2. One of the two groups required under (G).

Regulations Governing the Field of Concentration

(A) A field of concentration shall consist of not less than 24, nor more than 42 units of upper division courses. Not more than 42 units of upper division courses taken in one department will be counted toward the bachelor's degree. In economics this limitation is inclusive of courses in business administration. Only the following courses may be counted in satisfaction of the field of concentration: (1) courses in resident instruction* at the University of California, Los Angeles campus, or at another college or university; (2) courses in University Extension with numbers having the prefix X, XB, XD, XL, XR, XSB, or XSD. Courses in the 300 series (teachers' courses) or in the 400 series (professional courses) are not accepted as part of the field of concentration, with the exception of the General Elementary and Early Childhood Education curricula. Except for the General Elementary and Early Childhood Education curricula, not more than 6 units in courses numbered 300–399 or 400–499 may be accepted for the Bachelor of Arts or Bachelor of Science degrees.

(B) The fields of concentration shall be designated as *departmental*, *interdepartmental*, or *individual*.

- (1) A departmental field of concentration (or major) shall consist of a group of coordinated upper division courses, of which at least two-thirds of the units are in one department, set up and supervised by a department.
- (2) An interdepartmental field of concentration (or curriculum) shall consist of at least 36 units of coordinated upper division courses, of which less than two-thirds are in one department, set up and supervised by a committee appointed by the Executive Committee of the College.
- (3) A student who has some unusual but definite academic interest, for which no suitable major or curriculum is offered in the University of California, and who has completed at least two semesters of work (a minimum of 24 units) in the University with a grade-point average of 3.00, or higher, may, with the consent of the Dean of the College and with the assistance of a faculty adviser appointed by the Dean, plan his own field of concentration. This field will

* Resident instruction is defined as that which is offered to students in regular attendance during the fall and spring semesters and the Summer Session.

consist of at least 36 units of coordinated upper division courses, of which less than two-thirds are in one department.

(C) All entering students, without advanced standing, must designate a field of concentration in order to register at the beginning of the sophomore year.

Each student admitted to the College with 30 or more units of advanced standing must designate his field of concentration, and his study list must be approved by a representative of the department or committee before it will be accepted by the Registrar. A department or committee may designate the Dean of the College as its representative.

(D) An upper division student may change his field of concentration only by permission of the Dean of the College and of the department or committee in charge of the field of concentration to which the student petitions to transfer. No change of field of concentration will be permitted after the opening of the student's last semester.

(E) Students who fail to attain a grade-point average of at least 2.00 in work taken in the prerequisites for the field of concentration, or in courses in the field of concentration, may, at the option of the department or committee in charge, be denied the privilege of continuing in that field of concentration. The student must attain an average grade of C (2 grade points for each unit undertaken) in all courses offered as part of the field of concentration.

(F) All students must take at least one course in their field of concentration each semester during their last, or senior year.

Organized Fields of Concentration in the College of Letters and Science

Majors Leading to the Bachelor's Degree

The College offers majors (departmental fields of concentration) in the following fields. These majors lead to the degree of Bachelor of Arts unless otherwise noted.

Anthropology	Geography	Oriental Languages
Applied Physics†	Geology	Philosophy
Arabic	German	Physical Education†
Astronomy	Greek	Physics
Bacteriology	Hebrew	Political Science
Botany	History	Psychology
Chemistry†	Italian	Slavic Languages
Classics	Latin	Sociology
Economics	Mathematics	Spanish
English	Meteorology	Speech
French	Music	Zoology

† Leading to degree of Bachelor of Science.

Curricula Leading to the Bachelor's Degree

The College offers curricula (interdepartmental fields of concentration) leading to the degree of Bachelor of Arts in the following fields:

Astronomy-Mathematics
 Astronomy-Physics
 Biological Illustration
 Early Childhood Education
 Earth Physics and Exploration Geophysics
 General Elementary Teaching
 Home Economics†
 International Relations
 Latin-American Studies
 Near Eastern Studies
 Physical Sciences-Mathematics
 Presocial Welfare
 Public Service

Requirements of these curricula are listed in detail in the following pages.

Special Program in African Studies

Committee in Charge: J. S. Coleman (*chairman*), R. E. Baldwin, Leo Kuper, M. G. Smith, B. E. Thomas, Leonard Thompson, W. E. Welmers.

The underlying philosophy of the program in African Studies is that persons with a firm grounding in one of the established disciplines can make the best contribution to an understanding of Africa and its problems. Thus, the special program in African Studies can be taken only jointly with work toward a bachelor's degree in one of the following fields: anthropology, economics, geography, history, Near Eastern and African languages, political science, or sociology. The student completing this special program will receive a degree with a major in his chosen discipline and specialization in African Studies.

The program is designed primarily for (1) students who plan to live and work in Africa or who are interested in government and public service careers involving African affairs, and (2) students who plan to pursue graduate work in one of the social sciences or Near Eastern and African languages with primary concentration on the African field.

Preparation.—Introductory courses in any four of the following: Anthropology 2 (3), Economics 1A-1B (3-3) or 101 (3), Geography 1 (3), 2 (3), or 100 (3), History 1A-1B (3-3) or 5A-5B (3-3), Political Science 2 (3) or 103 (2), Sociology 1 (3) or 101 (3). Training in Arabic, French, Portuguese, or an African language is highly recommended.

Upper Division.—The student is required to take a major in a social science or in Near Eastern and African languages. The required courses for the curriculum in African Studies may also be used to fulfill the requirement for the major when relevant.

† Leading to degree of Bachelor of Science.

Required Courses:

- (1) African Languages 190 (Survey of African Language Structures (3))
OR the fulfillment of a language requirement recommended by the Committee in Charge of the Program as appropriate for the student's career plans.
- (2) Any FOUR of the following courses:

Anthropology 139	Peoples of Africa (3) I
Geography 126	The Geography of Africa (3) II
History 130	The History of South Africa (3) II
History 133A-133B	History of Africa (3-3) Yr.
Political Science 132	New States in World Politics (2) I, II
Political Science 156	The Governments of Tropical Africa (3) I
Sociology 191	Social Processes in Africa (3) I

Special Program in Biophysics

Committee in Charge: G. A. Bartholomew (chairman), D. E. Atkinson, I. Rudnick.

The program in biophysics is designed primarily for students of biology, chemistry, and physics who plan to apply the methods and techniques of the physical sciences to the solution of biological problems. This program can be undertaken only jointly with work toward the bachelor's degree in one of the biological sciences, or in physics, or in chemistry. The bachelor's degree will be granted in the student's major with specialization in biophysics. Biophysics is largely a graduate discipline, and the undergraduate student in the biophysics program should look forward to graduate studies in one of the departments of the College of Letters and Science, the School of Medicine, or the College of Engineering.

Because of the broad background required for work in biophysics, students interested in this program should anticipate that a substantial amount of course work in fields outside their chosen department will be required both during their graduate and undergraduate careers. Students preparing for a career in biophysics should take the following courses in addition to, or incidental to, completing a major in their chosen department: (1) Mathematics 1, 3A, 3B, 4A, 4B, or Mathematics 5A, 5B, 6A, 6B; (2) Physics 1A, 1B, 1C, 1D, 107, 116A; (3) Zoology 1A, 1B, 101A, 130A (or Botany 140). It is recognized that all these essential courses cannot be completed within the 120 units normally required for the bachelor's degree.

Curricula Leading to Degrees**Curriculum in Astronomy-Mathematics**

Committee in Charge of the Curriculum: D. M. Popper (chairman), L. H. Aller, B. Gordon, R. M. Redheffer.

This curriculum is being discontinued. No new students will be accepted into the program.

Curriculum in Astronomy-Physics

Committee in Charge of the Curriculum: G. O. Abell (chairman), L. H. Aller, N. Byers.

Each student must have his study list approved each semester by an adviser in the Department of Astronomy.

LOWER DIVISION

Required: Physics 1A, 1B, 1C, 1D (12); Mathematics 1 (or the equivalent special examination—see prerequisites for Mathematics 3A on page 403), 3A, 3B, 4A, 4B, or Mathematics 5A, 5B, 6A, 6B (14).

UPPER DIVISION

The curriculum comprises 36 upper division units, distributed as follows: I. Required: Astronomy 101 (3), 103A, 103B (6), 117A, 117B (6); Mathematics 110AB (4); Physics 105, 110A, 110B, 115 (12). II. Electives in astronomy, mathematics, and physics. Especially recommended are: Engineering 191A, 192B (formerly Astronomy 112, 115); Mathematics 125, 135; Physics 112, 124A (124C may be taken concurrently with 124A).

Curriculum in Biological Illustration

Committee in Charge of the Curriculum: R. A. Boolootian (chairman), L. F. Andreson, W. H. Furgason, G. Gloege, C. G. Humelbaugh, M. E. Mathias, W. R. Romig, P. Vaughn, M. Voge.

The curriculum in biological illustration offers a minimum four-year program balanced between illustrative drawing and the biological sciences. Although as here outlined it prepares a student to illustrate primarily in the biological sciences, special consideration may be made for those students whose interest is illustrating in the physical sciences. Some degree of flexibility and program modification is provided through conferences with the Committee.

The curriculum is designed to prepare a student for illustrating in a specific field, e.g., botany, zoology, or general biology, or for further study in the highly specialized field of medical illustration.

LOWER DIVISION

Required: Art 10A, 10B, 20B, 30A, 30C, Zoology 1A–1B, Chemistry 2A.

UPPER DIVISION

Required: 36 units of upper division courses, including Art 145, 148, 149A–B–C–D, 150, 167A–167B, and at least 20 units from zoology, botany, and allied fields. Recommended: Art 190; Botany 126, 199; English 106S; Theater Arts 180, 445; Zoology 140. The student must have his selection of courses approved by his curricular adviser each semester.

Curriculum in Earth Physics and Exploration Geophysics

Committee in Charge of the Curriculum: J. Kaplan (chairman), J. C. Crowell, G. C. Kennedy.

This curriculum is designed to provide training in physics, chemistry, mathematics, and geology, which are basic to geophysics. The requirements of the petroleum and mining industries for exploration experts, and the demands of educational and research institutions, indicate the desirability of a broad training in the physical sciences for those intending to enter either the field of applied geophysics or the general field of the physics of the earth. Summer employment with geophysical prospecting parties is strongly recom-

mended. The curriculum below will be modified to allow students to prepare for graduate study in geophysics either in the Department of Geology or in the Department of Physics.

LOWER DIVISION

Required: Chemistry 1A-1B (10), Geology 2 and 2L (4), 3 (4), Mineralogy 6A-6B (5), Mathematics 5A-5B (8), 6A-6B (6), or Mathematics 1, 3A, 3B, 4A, 4B (14), Physics 1A-1B-1C-1D (12).

UPPER DIVISION

The curriculum comprises 36 upper division units, distributed as follows:

Required: Geology 102A (3), 103 (4), Geophysics 122 (3), Mathematics 110AB (4), Physics 107 (2), 107C (2). Recommended: Chemistry 110A-110B (6), 111 (4), Geology 110 (3), 111 (3), 116 (3), Mathematics 124 (3), 128 (3), Physics 105 (3), 110 (3), 112 (3), 116A (3), 116C (2), Engineering 115A (3), 181A (3), 198 (3). A summer's field experience with a geophysical crew.

Each student is required to obtain approval of his upper division curriculum, including electives, from the course adviser in the Institute of Geophysics.

General Elementary and Early Childhood Education Curricula

Committee in Charge of the Curricula: A. E. Longueil (chairman), J. A. Crow, M. H. Curtis, W. H. Dutton, H. L. Kostanick, Miss A. B. Nisbet.

These curricula have been designed by the College of Letters and Science and the School of Education to lead to both the degree of Bachelor of Arts from the College of Letters and Science, and the *Certificate of Completion* in general elementary or kindergarten-primary teaching from the School of Education. It is possible to complete the requirements for these two objectives in approximately four years and one summer session by completing the requirements for the bachelor's degree concurrently with one of the curricula set forth below.*

At the beginning of their junior year, if not before, students in these curricula must formally register in the School of Education as credential candidates; this is in addition to registration in the College of Letters and Science as candidates for the bachelor's degree.

Curriculum I. General Elementary

LOWER DIVISION

Required: English 1A and either English 1B or Speech 1; Psychology 1A and either 1B or 33 (transfer students may meet this requirement by taking Psychology 101); Art 5 or 7; Music 31; Public Health 44; Mathematics 38. Recommended: Life Science 1A-1B or Biology 12, Botany 1, or Zoology 1A; History 7A-7B or 8A-8B.

* It is also possible to secure the recommendation of the School of Education for the general elementary or kindergarten-primary teaching credential by pursuing a departmental field of concentration and by completing, in addition to the requirements for the bachelor's degree, the credential requirements set forth in the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION. This program will require approximately one semester longer than the special program outlined above.

UPPER DIVISION

The following courses in education are required for the credential and should be taken approximately in the order listed: Education 100A (open to high sophomores), 100B, 110A-110B, 124A, 139A, 324A-324B (Supervised Teaching). (At least a C average is required for all courses in education, including at least a grade of C in Supervised Teaching.)

The field of concentration in this curriculum comprises at least 36 upper division units of professional and academic courses. At least a C average must be maintained in the field of concentration.

1. The professional courses in the field of concentration: Education 124B, Art 330, Music 330, Physical Education 330.

2. The academic courses in the field of concentration: At least 27 units of work in no more than four departments, according to one of the following patterns. (The units in any department may vary by one unit above or below that specified, provided the total is 27 or more units.)

(a) English	9	(c) English	6
Geography	9	Geography	6
History	9	Anthropology or Sociology	6
—	—	Phys. Ed. or Poli. Sci. or Psych.	6
	27	Additional units in one of above	
		departments (other than Phys.	
		Ed.) already chosen by the stu-	
		dent	3
			27
(b) English	6		
Geography	6		
History	6		
Additional units in one of			
above	3		
6 units from one of the following:			
Anthro., Phys. Ed., Poli. Sci. or		(d) Same as (c) except that History may	
Soc.	6	be substituted for Geography	
	27		

The courses in the field of concentration must be chosen from the approved list which is available in the College office and the Office of Student Services, School of Education, Room 201, Moore Hall. No student may offer for credit toward the minimum required 120 units any courses not on the Letters and Science List of Courses in addition to those required in this curriculum.

Curriculum II. Early Childhood Education

LOWER DIVISION

Required: Same as in Curriculum I with the exception of Mathematics 38, which is not required for kindergarten-primary teaching.

UPPER DIVISION

The following courses in education are required for the credential and should be taken approximately in the order listed: Education 100A (open to high sophomores), 100B, 110A-110B, 122A, 139A, 322A-322B (Supervised Teaching). (At least a C average is required for all courses in education, including at least a grade of C in Supervised Teaching.)

The field of concentration in this curriculum comprises at least 36 upper division units of professional and academic courses. At least a C average must be maintained in the field of concentration.

1. The professional courses in the field of concentration: Education 122B and the sections for Early Childhood Education majors in Art 330, Music 330, Physical Education 330.

2. The academic courses in the field of concentration: Same as for Curriculum I. No student may offer for credit toward the minimum required 120 units any courses not on the Letters and Science List of Courses in addition to those required in this curriculum.

Curriculum in Home Economics

Committee in Charge of the Curriculum: F. M. Obst (chairman), G. A. Emerson, R. H. Turner.

This curriculum is designed primarily for students preparing to teach home economics in the secondary schools. Degrees in this curriculum will not be awarded after June 30, 1965. The requirements for registration in this curriculum are listed under Home Economics on page 373 of this bulletin. Continuing, re-entering, and transfer students majoring in clothing, textiles, and related arts, food technology, foods and nutrition, and general home economics should consult page 373 of this bulletin for further instructions.

LOWER DIVISION

Required: All students with less than 15 units of completed lower division courses as of June 30, 1961, will be required to take the following lower division courses as part of or in addition to the general University and College of Letters and Science requirements: Art 30A, Chemistry 1A-1B, and 8, English 1A, and 1B or Speech 1, Economics 1A-1B, Home Economics 15, 16, Nutritional Sciences 11, Public Health 44, Psychology 1A-1B, Sociology 1, Zoology 15.

Students with more than 15 units of completed lower division courses as of June 30, 1961, should consult their advisers for lower division requirements.

UPPER DIVISION

The curriculum consists of 36 upper division units distributed as follows: Home Economics 135, 145, 146, 155, 172, 181, 370, Nutritional Sciences 102, 113, Public Health 107, Psychology 112, Sociology 126, 162, and additional upper division home economics courses, if necessary, to complete the total of 36 units.

Curriculum in International Relations

Committee in Charge of the Curriculum: W. Gerberding (chairman), J. T. Hitchcock, R. C. Rudolph, G. E. von Grunebaum.

This curriculum is designed primarily for students in the College of Letters and Science whose interests, while not specialized, fall in the field of international relations and modern diplomacy.

LOWER DIVISION

Required: Political Science 1 (3), 2 (3); History 1A-1B, or 5A-5B, or 8A-8B (3-3); and 12 units from the following: Economics 1A-1B (3-3), Geography 1 (3), 2 (3), Anthropology 1 (3), 2 (3), Sociology 1 (3), 2 (3), Philosophy 25 (3).

UPPER DIVISION

The curriculum comprises 36 upper division units distributed as follows:

I. General requirements (24 units): (a) Political Science 125 (3), 127 (3), or Political Science 130 (3) and 131 (3); (b) Political Science 133A-133B (3-3); (c) Geography 181 (3); (d) 9 units from the following: History 133A-133B (3-3), 140B (3), 141H (3), 142A-142B (3-3), 178A-178B (3-3), Economics 107 (3), 109 (3), 110 (3), 111 (3) (or Sociology 186 (3)), 195 (3), Sociology 122 (3), 186 (3) (or Economics 111 (3)), 187 (3), Anthropology 125 (3), 126 (3).

II. Field requirements: At least 12 units in one of the five following fields of specialization (to be distributed in not less than two departments).

(a) *Far Eastern and South Asian Affairs*: Political Science 132 (2), 136 (3), 138 (3), 158 (3), 159 (3), 160A (3), 160B (3), History 191A-191B (3-3), 192A-192B (2-2), 193 (3), 194A-194B (3-3), 195A-195B (2-2), 196B (3), Geography 124A-124B (3-3), Anthropology 124 (3), 146 (3), 148 (3).

(b) *Latin American Affairs*: Political Science 126 (3), 150A-150B (3-3), History 160 (3), 162A-162B (3-3), 166 (3), Geography 122A-122B (3-3), Sociology 150 (3).

(c) *European Affairs*: Political Science 154 (3), 155A (3), 157 (3), History 141D (3), 141F (3), 141G (3), 141H (3), 142A (3), 142B (3) (if not offered under I above), 142D (3), 142E (3), 142F (3), 143D (3), 144B (3), 146A-146B (3-3), 146C (3), 147 (3), Geography 123A-123B (3-3), 173 (3), Anthropology 145 (3), Economics 112 (3).

(d) *British Empire Affairs*: Political Science 152 (3), 153 (2), History 130 (3), 151A-151B (3-3), 152 (3), 156 (3), 157 (3), 158A-158B (3-3), 159 (3), 196B (3), Geography 125 (3).

(e) *African and Near Eastern Affairs*: Political Science 132 (2), 134 (3), 151 (3), 156 (3), History 130 (3), 136 (2), 137 (3), Geography 126 (3), 127 (3), Anthropology 139 (3), Sociology 166 (3), 167 (3).

Recommended: Political Science 102 (3), 112 (3).

Candidates for the degree in this curriculum will be required to give evidence, normally by examination, of their ability to read current literature on international relations in one modern foreign language, particularly French, German, Spanish, Russian, or Italian. Candidates may also offer other major modern languages not native to them.

Curricula in Latin-American Studies

Committee in Charge of the Curricula: H. J. Bruman (chairman), R. H. Fitzgibbon, E. T. Glauert, M. A. Zeitlin.

The curricula in Latin-American studies are designed to serve the needs of the following classes of students: (1) students desiring a general education focused on this particular area; (2) students planning careers which will necessitate residence in or knowledge of Latin America, such as teaching, business, scientific research, engineering, journalism, or government service; (3) students preparing for advanced study in the social sciences, primarily in the Latin-American field; (4) students preparing to teach social sciences or Spanish in the secondary schools. Selection of courses should be governed in part by the objective of the student.

It is recommended that students who wish to receive credit in one of these curricula for work taken in Latin-American schools obtain the prior written approval of the Committee.

LOWER DIVISION

Required: Spanish 4 and 44; Portuguese 1 and 2; Geography 1; Anthropology 1; History 8A-8B. It is recommended that at least two courses be elected from the following list: Anthropology 2; Economics 1A, 1B; Geography 2; Political Science 1, 2; Sociology 1.

UPPER DIVISION

Curriculum for Students Desiring a General Education or Careers in Business, Research, or Government Service

Spanish 121A-121B; 6 units chosen from Portuguese 199, Spanish 101, 103, 114; 24 units of additional courses chosen from the list below. Courses must be chosen from at least three departments, with at least 9 units from each of two departments other than Spanish, and at least 20 units of courses of Latin-American content (indicated below by asterisks).

Curricula for Students Preparing to Be Teachers

A. Candidates for the general secondary credential with a teaching major in social sciences and a teaching minor in Spanish must take: Spanish 121A-121B and 6 units chosen from Spanish 101, 103, 114, 115, 117, 118 (either 103 or 115 must be included); and 24 units of additional courses chosen from the list below. Courses must be chosen from at least three departments with at least 9 units from each of two departments other than Spanish, and at least 20 units of courses of Latin-American content (indicated below by asterisks). In addition to the lower division courses required in the curriculum, the following must also be taken: History 1A-1B or 5A-5B, Geography 2, Political Science 1 and 2 (or 1 and 103), and Economics 1A-1B (or 1A and 108) or Sociology 1 and 2. Completion of a teaching major requires 6 units in graduate courses in anthropology, economics, geography, history, or political science, after attainment of the A.B. degree.

B. Candidates for the general secondary credential with a teaching major in Spanish and a teaching minor in social sciences must take: Spanish 103, 120A-120B (prerequisite: Spanish 42), 114, 115, 117, 121A-121B; and at least 18 units of additional courses chosen from the list below. Courses must be chosen from at least three departments, with at least 6 units from each of two departments other than Spanish, and at least 15 units of courses of Latin-American content (indicated below by asterisks). A teaching minor in social science may be completed by meeting the requirements of this curriculum. Completion of the teaching major in Spanish also requires Spanish 118, 151 (or 203), 370, and 6 units of graduate courses in Spanish after attainment of the A.B. degree.

Note: Candidates for the general secondary credential must take Psychology 1A, 1B (or 33) and 22 units of prescribed courses in education. For further information consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION and the appropriate adviser.

Additional Courses

Anthropology 102, 105, 107*, 110, 124, 125, 127, 140*, 141*, 142*, 165; Art 110B*; Economics 195, 196, 197; Folklore 101; Geography 113, 122A-

122B*, 131, 165, 175, 199*; History 160*, 162A-162B*, 166*, 169*, 178A-178B, 188, 199* (Section 9); Linguistics and Philology 170; Music 136A-136B; Political Science 125, 126*, 127, 150A-150B*, 199*; Portuguese 121*; Sociology 143, 144, 150*, 186, 189; Spanish 137*, 139*, 143*, 147*, 151*.

Curriculum in Near Eastern Studies

Committee in Charge of the Curriculum: G. E. von Grunebaum (chairman), H. A. Davidson, J. C. Greenfield, W. Leslau, B. E. Thomas, A. Tietze, W. E. Welmers.

This curriculum in Near Eastern studies is designed primarily for the following classes of students: (1) students seeking a general education and desiring a special emphasis in this particular area; (2) students who plan to live and work in this area, whose careers will be aided by a knowledge of the peoples, languages, and institutions (such careers might be centered on teaching, research, business, engineering, journalism, or government service); (3) students preparing for advanced study in the language, peoples, or institutions of the area. Selection of courses should be decided partly by the student's own special objectives except that the same Near Eastern language must be maintained in both lower and upper division.

LOWER DIVISION

Required: Arabic 1A-1B or Hebrew 1A-1B; candidates must also obtain a reading proficiency in either French, German or Italian, and give evidence, normally by examination, of their ability to read current literature on Near Eastern studies (this requirement may be satisfied at any time before graduation); History 1A-1B; 12 units from the following social sciences: Anthropology 2, 3; Economics 1A-1B; Geography 2; Political Science 2; Sociology 1.

UPPER DIVISION

Required: Language—Arabic 102A-102B, 103A-103B, 119A-119B and 6 units chosen from Arabic 130A-130B or 140A-140B; or: Hebrew 102A-102B, 103A-103B, 119A-119B and 6 units chosen from Hebrew 120A-120B-120C-120D, 130A-130B, or 140A-140B-140C-140D. HISTORY—History 134A-134B and 4 units chosen from History 116A-116B, 132A-132B, 135, 136, 137, 138A-138B or 139A-139B.

Additional Social Sciences: 12 units chosen from the following courses in at least two disciplines:

Anthropology-Sociology

Anthropology 103, 123, 124, 125

Sociology 166, 167

Geography 126, 127

History 117A-117B, 123A-123B, 131A-131B, 132C-132D, or any other history courses listed above exclusive of 134A-134B.

Political Science 134, 151.

Recommended Courses: Anthropology 111A, 111D; Arabic 150A-150B; Hebrew 150A-150B; Persian 150A-150B; Folklore 101; History 111A-111B, 133A-133B; Linguistics 170, 173; Philosophy 112, 152, 153.

Competency in a second Near Eastern language is suggested for students

planning graduate work in Islamic Studies. This work should be undertaken in the senior year.

Unit Requirement Summary:

Language	24
History	10
Restricted Electives	12
Total	46

Curriculum in Physical Sciences—Mathematics

Committee in Charge of the Curriculum: P. B. Johnson (chairman), P. C. Curtis, W. C. Dutton, D. Kivelson, N. A. Watson.

This curriculum is designed to provide training in sciences and mathematics for those students who are planning to work for the general secondary credential with physical sciences and general science as a major and mathematics as a minor. The curriculum has been set up to provide adequate training for secondary teachers of physics, chemistry, general science, and mathematics.

LOWER DIVISION

Required: Chemistry 1A–1B, 5A (13); Mathematics 1, 3A, 3B, 4A (12); Physics 1A–1B, 1C (9). Physics 1C may be deferred to upper division.

Note: To satisfy the College requirement in biological science, students seeking the credential should choose 5 units from Biology 12; Life Science 1A–1B; Zoology 1A, 1B, 15.

UPPER DIVISION

Required: Chemistry 8 and 9 (6) or 112A–112B (10); Mathematics 4B (3) and 101A or 101B (3) and any other 100-level mathematics course (3); Physics 1D (3), and 105 (3) or 107 (2); Astronomy 101 (3); Geology 101 (3); English 106S (3); Education 100A, 100B, 130 (7); Mathematics 370 or Physical Sciences 370 (3).

For those students who are not certain that they will continue their work toward the general secondary, the last 10 units may be replaced by upper division work selected from Astronomy 117A, 117B; Chemistry 108A, 108B, 109; Engineering 191A, 192B; Physics 121.

Curriculum in Presocial Welfare

Committee in Charge of the Curriculum: R. J. Murphy (chairman), W. E. Jeffrey, H. H. L. Kitano, R. T. Morris, M. A. Wenger.

The field of concentration in social welfare is designed to give the student what is currently regarded as the most suitable background for professional training at the graduate level in the School of Social Welfare. A course of studies like this also serves all purposes in which a broad foundation in the various social sciences is desirable. Completion of this curriculum does not guarantee admission to a school of social welfare, and the student is expected to consult his adviser regarding the specific requirements of the school of social welfare he expects to enter.

Following an outline of the preparation required, the curriculum is set forth in two parts: I. Specialization, and II. Social Science Electives.

Preparation (preferably to be taken during the first two years of college or at the beginning of the third year):

Anthropology 1-2 (6); Life Sciences 1A-1B (6); Sociology 1 or 101 (3); Psychology 1A-1B (6) or 101 (3); Economics 1A-1B (6) or 101 (3); Political Science 1-2 (6) or 103 (2); Statistics 1 (3) or Sociology 18 (3).

I. Specialization: Thirty (or 32) units in upper division Letters and Science courses to be distributed in the fields as indicated below:

Sociology: At least 12 units including Sociology 185 and 9 units of upper division sociology.

Psychology: At least 8 units of upper division psychology.

Economics: At least 5 to 6 units (2 courses) in upper division economics.

Political Science: At least 6 units including Political Science 181.

II. Social Science Electives: Ten (or 11) units, preferably to be chosen from the following list of courses, or similar courses, with approval of and in consultation with, an adviser. Courses in this list are also those recommended for the requirements under I above.

Anthropology 103, 125, 151, 165; Economics 100A, 103, 107, 131, 133, 156; History 174A-174B, 175, 176, 188; Philosophy 104, 105, 114, 147; Political Science 113, 166, 186; Psychology 148, 168; Sociology 120, 126, 142, 143, 144, 145, 161, 181, 182, 186, 189; Public Health 110, 170.

Curriculum in Public Service

Committee in Charge of the Curriculum: P. Woll (chairman), J. M. Gillies, H. J. Nelson.

The curriculum in public service is designed to be of assistance to students who wish to qualify themselves for positions in government work. It should be noted that a large percentage of government positions are open only through competitive examinations. The curriculum, therefore, is designed to allow the student to coordinate a program drawn from several departments in preparation for a general class of positions. Although the curriculum is primarily related to political science, it is designed to allow a broader training in administrative work than is permitted in a departmental major.

LOWER DIVISION

Required: Business Administration 1A-1B (3-3); Economics 1A-1B (3-3); Political Science 1-2 (3-3); Statistics 1 (3); Speech 1 (3). In certain fields, other courses are prerequisite to upper division courses included in the curriculum:

Public Personnel—Psychology 1A-1B.

Planning—Geography 1-2; Geography 4.

UPPER DIVISION

The curriculum itself consists of 36 units of upper division courses selected from one of five possible fields of concentration: Public Personnel Administration, Public Management, Public Relations, Financial Administration, and Planning. Less than two-thirds of the total units in the field are to be taken in one department. Political Science 141, 166 or 187, 172 or 184, 181, and 185 are required courses for each field of concentration. The remaining units must be chosen from the approved list of courses offered under the student's chosen field:

I. Public Personnel Administration

Political Science 166 (3), 171 (3), 172 (3), 183 (3), 184 (3), 186 (3), 187 (3); Psychology 105A (3), 111 (2), 185 (2), 186 (2); Business Administration 150 (3), 152 (3); Economics 150 (3), 152 (3), 155 (3), 158 (3); Sociology 118 (3), 131 (3), 161 (3).

II. Public Management

Political Science 113 (3), 143 (3), 146 (2), 166 (3), 168 (3), 171 (3), 172 (3), 183 (3), 184 (3), 186 (3), 187 (3); Business Administration 150 (3), 152 (3), 190 (3); Economics 131 (3), 150 (3), 170 (3); Psychology 185 (2); Sociology 118 (3), 128 (3), 131 (3), 143 (3).

III. Public Relations

Political Science 125 (3), 127 (3), 142 (2), 143 (3), 146 (2), 148 (3), 166 (3), 167A-167B (3-3), 171 (3), 172 (3), 183 (3), 184 (3), 186 (3), 187 (3); Business Administration 150 (3), 163 (3); Economics 150 (3); Journalism 101 (3); Psychology 142 (2), 143 (2), 180 (2); Sociology 118 (3), 128 (3), 131 (3), 143 (3); not more than 6 units from History 171A (3), 171B (3), 172 (3), 173A (3), 173H (3), 174A-174B (3-3), 175 (3).

IV. Financial Administration

Political Science 143 (3), 166 (3), 167A-167B (3-3), 171 (3), 172 (3), 183 (3), 184 (3), 186 (3), 187 (3); Business Administration 120 (4); Economics 131 (3), 133 (3), 135 (3); Sociology 118 (3).

V. Planning

Art 100A (2); Business Administration 180 (3), 181 (3), 182 (3); Economics 107 (3), 131 (3), 170 (3), 171 (3), 173 (3); Engineering 137A (3); Geography 101 (3), 105 (3), 141 (3), 142 (3), 155 (3), 161 (3), 165 (3); Political Science 143 (3), 146 (2), 147 (3), 166 (3), 167A-167B (3-3), 168 (3), 171 (3), 172 (3), 183 (3), 184 (3), 186 (3), 187 (3); Sociology 122 (3), 128 (3), 131 (3), 143 (3), 144 (3), 145 (3).

Variations in the programs may be made with the approval of the adviser.

The curriculum in public service, which combines work of the departments of Political Science, Economics, Psychology, and Business Administration, prepares students for positions in governmental work other than foreign service. The curriculum is of value also for students interested in careers as public relations counselors, personnel managers, etc.

During the past few years, governmental employment, both in the federal and local governments, has offered an attractive field to young men and women who have the proper training and interest. Governmental positions increasingly require specialized training in fields such as budgeting, personnel, engineering, and in government management. In addition to regular positions with the government, there are openings for part-time or full-time internship training in various governmental agencies in the Los Angeles area.

Preparation for Various Professional Curricula

In addition to the curricula described in the preceding pages, all of which lead to the bachelor's degree, certain courses given at the University of California, Los Angeles, may be used as preparation for admission to the professional colleges and schools of the University in Los Angeles, in Berkeley, and in San Francisco.

include general University requirements and additional specific requirements, as follows (the numbers in parentheses refer to courses at the University of California, Los Angeles, which fulfill the requirements):

(1) General University requirements

Subject A

American History and Institutions is prerequisite to a bachelor's degree.

(2) English 1A-1B 6 units

(3) Science 35 units

(a) Chemistry 1A, 1B, 5A, 8, 9 19

(b) Physics 2A, 2B 8

(c) Zoology 1A, 1B 8

(4) Trigonometry

(if not completed in high school)

(5) Foreign language (in not more than one language) 12 units

This may be counted from high school at the rate of 4 units for the first two years and 4 units for each year thereafter.

Satisfaction of the (B) requirement (page 75) on this campus is also acceptable.

(6) Social science and humanities 12 units

The following subjects are recommended for the student's consideration: anthropology, economics, history, political science, psychology, history and appreciation of art or music, English or speech (in addition to the basic requirement), and philosophy. If a student wishes to substitute mathematics in partial satisfaction of this requirement, he may include in his program a maximum of 3 units of mathematics (in addition to the required trigonometry).

Predental Hygiene Curriculum: Two Years†

(Open to Women)

Adviser: Dr. E. A. Carlson. Appointments may be made at the office of the College of Letters and Science.

The University offers a four-year program in dental hygiene leading to the degree of Bachelor of Science. The first two years may be taken at Los Angeles; the last two years must be taken in the School of Dentistry in San Francisco.

The student will find herself more adequately prepared if she has taken in high school the following subjects: English, 3 units; history, 1 unit; mathematics, 3 units (algebra and plane geometry); chemistry, 1 unit; physics, 1 unit; foreign language, 3 (or, preferably, 4) units.

The 60 units of work required for admission to the School of Dentistry include general University requirements and additional specific requirements, as follows (the numbers in parentheses refer to courses at the University of California, Los Angeles, which fulfill the requirements):

† The School of Dentistry reserves the right to limit enrollment if applications exceed the available facilities, and to require interviews and aptitude tests if they are necessary in the selection of the class. For further information see the ANNOUNCEMENT OF THE SCHOOL OF DENTISTRY, SAN FRANCISCO.

(1) General University requirements**Subject A**

American History and Institutions (required for the bachelor's degree).
(The examination in American History and Institutions may be taken in the School of Dentistry, but it is preferable to satisfy the requirement in the pre dental program.)

- | | |
|-------------------------------|----------|
| (2) English 1A-1B | 6 units |
| †(3) Chemistry 1A-1B, 8 | 13 units |
| (4) Zoology 1A-1B | 8 units |
| (5) Psychology | 6 units |
| (6) Social science | 12 units |
- Courses in the fields of anthropology, economics, history, political science, and sociology may be used to satisfy this requirement.
- (7) Humanities 12 units
- Courses in the field of history and appreciation of art or music, English or speech (in addition to the basic requirement), foreign language (in addition to requirement (8) below), and philosophy may be used to satisfy this requirement.
- (8) Foreign language (in not more than one language) 12 units
- This may be counted from high school at the rate of 4 units for the first two years and 4 units for each year thereafter. Satisfaction of the (B) requirement (page 75) on this campus is also acceptable.

Premedical Studies: Four Years*

Adviser: Dr. E. A. Carlson.

Appointments may be made at the office of the College of Letters and Science.

Students who intend to apply for admission to a medical school and who wish to complete the requirements for a bachelor's degree before such admission, should select a field of concentration within the College. In addition to fulfilling the requirements of the chosen field of concentration, the student is advised to ascertain and satisfy the specific requirements for medical schools to which he expects to apply.

Premedical Curriculum: Three Years*

Adviser: Dr. E. A. Carlson.

Appointments may be made at the office of the College of Letters and Science.

It is assumed that as preparation for this curriculum the student will have completed in the high school the following subjects: English, 3 units; United States history, 1 unit; mathematics, 2 units (elementary algebra and

* This section applies both to the School of Medicine at San Francisco and to the School of Medicine at Los Angeles. Usually the following courses are required for admission to medical school: English 1A, 1B; Chemistry 1A, 1B, 5A, 8, 9; Physics 2A, 2B; Zoology 1A, 1B, 100A; French 1, 2 (or German 1, 2).

† At Los Angeles, Chemistry 1B is prerequisite to Chemistry 8.

plane geometry); chemistry, 1 unit; physics, 1 unit; foreign language (preferably French or German), 2 units. It is desirable that a course in freehand drawing be taken in high school. If possible, the student should also complete in high school intermediate algebra, $\frac{1}{2}$ unit, trigonometry, $\frac{1}{2}$ unit, although these courses may be taken in the University.

It is important for students to bear in mind that the class entering the School of Medicine is limited; in the past there have been a great many more applicants than could be admitted. Premedical students who, upon the conclusion of their sixth semester, find themselves thus excluded from the School of Medicine, will be unable to obtain the bachelor's degree in the College of Letters and Science at the end of the eighth semester, unless they plan their programs with this contingency in mind. They should, therefore, either enter a departmental major at the beginning of the fifth semester, at the same time meeting all premedical requirements, or include in their premedical program a sufficient number of appropriate courses in some major department. Provision for the completion of such a major does not prejudice the student's eligibility for admission to the School of Medicine.

Prenursing Curriculum: Two Years

Committee in Charge of the Curriculum: Laurie M. Gunter (chairman), Meridian R. Ball, Dorothy M. Crowley.

The University offers a four-year course leading to the Bachelor of Science degree in Nursing. The Prenursing Curriculum in the lower division of the College of Letters and Science is designed to prepare students for the upper division program in the School of Nursing. The curriculum as set forth below includes the specific requirements for acceptance by the School of Nursing.

Students should apply for admission to the School of Nursing when they have completed or have in progress 60 units of the Prenursing Curriculum with at least a grade C average.

(A) General University requirement	Units
Subject A	0
(B) Foreign language (completion of course 2) [†]	0-8
(C) Elementary algebra and plane geometry	0
(D) English composition (English 1A).....	3
(E) Natural Sciences	
(1) Chemistry 1A, 1B, 8	13
Physics 10 (or a high school course in physics with grade of B)	0-3
(2) Bacteriology 1	4
Psychology 1B	3
Zoology 1A, 1B	8
(F) Social Sciences	
(1) History 6A-6B, 7A-7B, or 8A-8B (or appropriate upper division courses)	6
(2) Anthropology 2	3
Psychology 1A	3
Sociology 1 or 101	3

[†] Completion of course 2 in a foreign language or 3 years of one language in high school is required.

(G) Humanities. Two of the following three groups:	Units
(1) Literature	8-12
(2) Philosophy	
(3) The Arts	
	<hr/> Total units 54-69

Prenutritional Sciences Curriculum: Two Years

Committee in Charge of the Curriculum: G. A. Emerson (chairman), L. S. Goerke, M. E. Swendseid.

The University offers a four-year program leading to the degree of Bachelor of Science in nutritional sciences. The prenutritional sciences curriculum in the lower division of the College of Letters and Science is designed to prepare students for the upper division program in the School of Public Health.

The specific requirements for acceptance by the School of Public Health are included in the curriculum as set forth below. Students should apply for admission to the School of Public Health upon completion of 60 units of this program with a grade C average or better.

(A) General University requirement	Units
Subject A	0
(B) Foreign language (completion of course 3)*	8-12
(C) Elementary algebra and plane geometry	0
(D) English 1A-1B	6
(E) Natural science	
(1) Physical science	
Chemistry 1A-1B	10
Mathematics 1	2

Prepharmacy Curriculum: Two Years

Adviser: J. H. Beckerman.

Appointments may be made at A4-205 Center for the Health Sciences.

The School of Pharmacy on the San Francisco campus of the University offers a four-year curriculum leading to the degree of Doctor of Pharmacy. To be admitted to this curriculum a student must have met all requirements for admission to the University and have completed, with an average grade of C or better in the University of California or in another institution of ap-

* Preferably German.

proved standing, at least 60 units of the program set forth below under the heading of "Prepharmacy Curriculum." Students taking the prepharmacy work at the University of California normally will be enrolled in the College of Letters and Science. If taken elsewhere, the courses selected must be equivalent to those offered at the University of California. In order to complete prepharmacy studies in the minimum of time, students should complete elementary chemistry, trigonometry, and a full year of intermediate algebra in the high school.†

First Year

	Units
(1) General University requirement	
Subject A	0
(2) English 1A-1B or Speech 1, 2	6
(3) Science	
Chemistry 1A-1B	10
Botany 1	5
(4) Trigonometry and Intermediate Algebra (if not completed in high school)	
(5) Electives	8
Electives should be selected from courses in foreign language, social science, and humanities offered in satisfaction of the lower division requirements of the College of Letters and Science.	

Second Year

	Units
(1) Science	
Zoology 1A-1B	8
Physics 2A-2B	8
(2) Mathematics 3A-3B	6
(3) History 7A-7B or History 7A, Political Science 1	6
If the University requirement in American History and Institutions has been met, electives may be taken.	
(4) Electives	3

Prepublic Health Curriculum: Two Years

Committee in Charge of the Curriculum: L. S. Goerke (chairman), M. R. Ball, G. A. Bartholomew.

The University offers a four-year program leading to the degree of Bachelor of Science in public health. The prepublic health curriculum in the lower division of the College of Letters and Science is designed to prepare students for the upper division program in the School of Public Health.

† Students who have completed the two-year prepharmacy curriculum at Los Angeles cannot be assured of admission to the School of Pharmacy of the San Francisco campus. When the number of qualified applicants for the Doctor of Pharmacy curriculum exceeds the available facilities, selection will be made on the basis of scholarship as determined from the College record and by examination. A personal interview may be required. Applications for admission to the School of Pharmacy, San Francisco campus, must be filed between October 1 and March 1 preceding the September of proposed admission. Blanks may be obtained from the Office of the Director of Admissions, University of California Medical Center, San Francisco 22. For further information see the ANNOUNCEMENT OF THE SCHOOL OF PHARMACY, SAN FRANCISCO, which may be obtained from the Dean, School of Pharmacy, University of California Medical Center, San Francisco 22.

The specific requirements for acceptance by the School of Public Health are included in the curriculum as set forth below. Students should apply for admission to the School of Public Health upon completion of 60 units of this program with a grade C average or better.

		Units
(A) General University requirement		
Subject A		0
(B) Foreign language (completion of course 2)*		4-8
(C) Elementary algebra and plane geometry		0
(D) English 1A		3
(E) Natural science		
(1) Physical science		
Chemistry 1A		5
Mathematics 1 or 3A		2-3
(2) Life science		
Bacteriology 1, 4		5
Zoology 1A-1B		8
(F) Social sciences		
(1) History 7A-7B		6
(2) At least 6 units in social sciences exclusive of history and including courses in at least two subjects, chosen from the following list:		
Anthropology 2	}	6
Economics 1A, 13, 101		
Geography 2		
Political Science 1, 2, 101, 103		
Psychology 1A, 101		
Sociology 1, 101		
(G) Humanities		
(1) Literature		
Humanities 1A-1B		6
(2) Philosophy		
Philosophy 6A-6B		6

Other Professional Curricula in the University

Architecture. Students in good standing having a minimum of 60 units of University credit will be admitted to the College of Architecture upon formal application filed with the Secretary of the College. In order to complete the prescribed curriculum in the indicated time, such students should also have completed the prerequisites to the work of the junior year. Only the academic courses in this program may be taken in the College of Letters and Science at Los Angeles; consequently, the student desiring a major in architecture is advised to enroll at Berkeley for the professional courses leading to the M.A. degree which carries a recommendation to State License Boards.

Journalism. The University offers no undergraduate major in journalism at Los Angeles. There is, however, an undergraduate program in journalism which is designed primarily to prepare the student for graduate training

* Completion of course 2 in a foreign language or 3 years of one language in high school is required.

leading to a career in journalism—on the newspaper or magazine, in broadcasting, or in the communicative aspects of public information.

Undergraduate preparation for journalism embraces three areas: (1) general requirements of the College of Letters and Science, (2) a major in one of the social science or humanities disciplines, and (3) a series of undergraduate courses in journalism totaling eleven semester hours, to be taken as a group of related electives in the junior and senior years.

Undergraduate students interested in journalism should select a major from the list of Majors and Curricula. The department recommends the following majors: economics, English, history, political science and sociology. Other majors and curricula also are suitable, and the student may wish to consult the department before selecting a major. On the Application for Admission, the student should indicate the college, the major, and the word "journalism" in parentheses, e.g., *Letters and Science, political science (journalism)*. This will permit the college to assign the student to the proper adviser who will help the student plan a program in his major with electives recommended by the Department of Journalism. If the student is undecided on his major at the time of his application, he should indicate on his application: *Letters and Science, undecided (journalism)*.

Preoptometry. Refer to the ANNOUNCEMENT OF THE SCHOOL OF OPTOMETRY, BERKELEY.

Library Service

Except to students enrolled in the undergraduate curriculum in pre-librarianship prior to September, 1961, the University will not award the bachelor's degree with a prelibrarianship major. The School of Library Service on the Los Angeles campus and the School of Librarianship on the Berkeley campus have the following basic admission requirements: a bachelor's degree with a subject major, a broad background in the liberal arts, and a reading knowledge of at least two modern foreign languages. Further information on admission requirements and on recommended undergraduate courses may be obtained from the Office of the School of Library Service, Library, Room 322.

Undergraduate students entering the University in September, 1961, or thereafter and who are primarily interested in entering a graduate library school should select a major from the lists of Majors and Curricula. This major and the appropriate college should be indicated on the Application for Admission, undergraduate, with Library Service in parentheses: e.g., *Letters and Science, English (Library Service)*. This will make it possible for the college to assign the student to the proper adviser who will help the student plan a program in his selected major with electives recommended by the School of Library Service. This procedure will also assure that the admission requirements of the School of Library Service are known to the student. Neither library service nor librarianship should be listed as a major. If the student is undecided regarding his undergraduate major but does know that he wishes to enter a library school as a graduate student, he should indicate on the application, *Letters and Science, undecided (Library Service)*.

Religion

Advisory Committee: A. B. Nisbet (chairman), W. Leslau, R. H. Turner.

The University does not offer courses in religion nor does it have a graduate school of theology; it therefore does not offer a curriculum in religion or in pretheological studies. However, a student preparing for admission to a theological seminary, or for religious work in general, will be assigned an adviser prepared to help him plan a program in his selected major with electives recommended by the American Association of Theological Schools and specific Protestant, Catholic, and Jewish seminaries.

Such undergraduate students should select a major from the list of fields of concentration on page 79 (recommended majors are English, history, philosophy) and indicate this major on the Application for Admission, Undergraduate, Letters and Science, with Religion in parentheses: for example, *Letters and Science, History (Religion)*. If the student is undecided regarding a choice of major and desires ultimately to prepare himself for religious work, he should indicate on the application: *Letters and Science, undecided (religion)*.

It is advisable to choose a major that will follow one's field of interest and meet as nearly as possible the following undergraduate requirements as set forth by the interdenominational American Association of Theological Schools: English literature, composition, and speech (18 units); history (9-12 units); philosophy (9 units); natural sciences (6 units); psychology (3 units); other social sciences (15 units); foreign languages (16 units in one or two of the following: Greek, Latin, Hebrew, German, French).

The attention of students interested in religion is directed to the following specific courses: Anthropology 124 (Comparative Religion); Arabic 150A, 150B (Survey of Arabic Literature); Art 104 (Medieval Art); Art 100A (History of Art); Classics 178 (Greek and Roman Mythology); English 116A, 116B (The English Bible as Literature); English 151M (Milton); Hebrew 150A, 150B (Survey of Hebrew Literature); Hebrew 120A, 120B, 120C, 120D (Selected Texts of the Bible); Semitics 130 (Biblical Aramaic); History 121A, 121B (The Early and Later Middle Ages); History 135 (Introduction to Islamic Culture); History 138A, 138B (Jewish History); History 141B (The Reformation); History 177 (Intellectual History of the United States); History 196A (Early History of India); Italian 109A, 109B (Dante's *Divina Commedia*); Music 123 (Music in the Middle Ages); Music 171 (History and Literature of Church Music); Oriental Languages 172A, 172B (The Influence of Buddhism on Far Eastern Cultures); Persian 150A, 150B (Survey of Persian Literature); Philosophy 104 (Ethics); Philosophy 105 (Ethics and Society); Philosophy 112 (Philosophy of Religion); Philosophy 157 (Medieval Philosophy); Philosophy 188 (Ethical Theory).

Honors Program

The College of Letters and Science has instituted an Honors Program which accords special privileges to superior students whose grade-point average for all work undertaken in the University is not less than 3.5:

Honors Program in the Lower Division

1. Admission to Program. A lower division student in the College who has completed 15 or more units in one semester, and whose grade-point average for all work undertaken in the University is not less than 3.5, may apply for admission to this program on forms to be supplied by the office of the Dean. The application form must be approved by the department or committee in charge of the student's proposed field of concentration and by the Dean of the College.

2. Purpose of Program. The Honors Program in the lower division is designed to give the outstanding student more freedom in meeting the lower division requirements by demonstrating proficiency and achievement by examination. The total credit which may be earned under the special provisions of the Honors Program in the lower division is 18 units, which may be earned in either or both of the following ways:

(a) Credit by examination for courses studied independently which may be undertaken in addition to the maximum study-list limits of the College.

(b) Credit for more advanced courses taken on a "passed" or "not passed" basis in the fields specified as fulfilling College requirements (E), (F), and (G). Work taken under this section must be included in the study-list limits of the College. The quality of the work required of a student in the Honors Program to be marked "passed" is higher than that required for a barely passing letter grade. In calculating grade-point standing, units gained in this way shall not be counted. Petitions for such credit will not be accepted later than the first week in the semester.

Honors Program in the Upper Division

1. Admission to the Program. A student who has attained upper division standing with a grade-point average for all work undertaken in the University of not less than 3.5, or any other upper division student recommended by his department or committee in charge of his field of concentration, may apply for admission to this program on forms to be supplied by the office of the Dean of the College. The application form must be approved by the department or committee in charge of the student's field of concentration and by the Dean. A student being recommended for this program without the necessary grade-point average must be specially approved as an honor student by the Committee on Honors of the College.

2. Purpose of the Program. A student approved for admission to this program may be admitted to such advanced honors programs as may be provided by the department or committee or faculty adviser in charge of the student's field of concentration. Such honors programs may include:

(a) Enrollment in small seminar-type classes;

(b) Independent research or reading during the two semesters of the student's senior year. The maximum amount of credit allowed under provision (b) is 6 units.

Also, an upper division student in the Honors Program may take each semester one course not offered by him to satisfy the requirements for the field of concentration, in which his work shall be marked "passed" or "not passed." The quality of work required to be marked "passed" will be higher than that required for a barely passing letter grade. In calculating grade-point standing, units gained in this way shall not be counted. The maximum number of units which may be earned under this provision is 12. Petitions for such credit will not be accepted later than the first week in the semester.

Honors with the Bachelor's Degree

Honors may be awarded at graduation as provided under 1, 2, and 3, below, to a student who is recommended for such an award by the department or committee or faculty adviser in charge of his field of concentration and the Committee on Honors.

1. Honors may be awarded to a student who has both (a) completed his field of concentration with participation in such honors program as may have been provided for that field, and (b) qualified for honors by some other method (such as a comprehensive examination) to be prescribed by the department or committee or faculty adviser in charge of his field of concentration and approved by the Executive Committee of the College.
2. Honors also may be awarded to a student who has completed the field of concentration with distinction, and who has a general record satisfactory to the Committee on Honors, but who has not participated in an honors program.
3. Students who, in the judgment of the department, committee, or faculty advisers concerned, display marked superiority in their fields of concentration may be recommended for the special distinction of Highest Honors.
4. The Committee on Honors shall consider all recommendations, shall confer with the several departments, committees, faculty advisers, and Dean of the College about doubtful cases, and shall transmit to the Dean of the College its recommendation concerning the award of Honors or Highest Honors.
5. The lists of students to whom Honors and Highest Honors in the various fields of concentration shall have been awarded at time of graduation shall be published in the COMMENCEMENT PROGRAM

each year, and students whose names appear upon these lists shall be issued certificates of honors in addition to University diplomas reflecting the highest order of honors awarded.

COLLEGE OF AGRICULTURE

The College of Agriculture of the University of California offers at Los Angeles the following curriculum:

Plant Science—majors in floriculture and ornamental horticulture and general horticulture. These majors are not available in the other sections (Berkeley, Davis, and Riverside) of the statewide College of Agriculture.

This curriculum leads to the degree of Bachelor of Science. Graduate work is also offered at Los Angeles leading to the degrees of Master of Science and Doctor of Philosophy in plant science.

Students electing other majors in the plant science curriculum—agronomy, genetics, landscape horticulture, plant pathology, pomology, vegetable crops, and viticulture—may spend the freshman and sophomore years at Los Angeles and then transfer to the campus, Berkeley or Davis, where their major work is offered. The same is true of students electing certain other curricula in the College of Agriculture—agricultural economics, agricultural education, entomology and parasitology, food science, irrigation science, landscape architecture, preforestry, soil science, range management, and preveterinary medicine. Students electing the animal science curriculum are advised to transfer after one year at Los Angeles. The first three years of the agricultural engineering curriculum are available in the College of Engineering at Los Angeles. Students who register with the intention of later transferring to Berkeley or Davis to pursue other curricula or to obtain majors in the plant science curriculum other than those offered at Los Angeles are requested to consult the PROSPECTUS OF THE COLLEGE OF AGRICULTURE (obtainable from the Office of the Dean) and the appropriate advisers in agriculture at Los Angeles.

Every student *must* consult his adviser each semester for guidance in meeting the requirements of the curriculum of his choice, and his study list *must* be approved by the Dean's office.

Requirements for the Degree of Bachelor of Science in Agriculture

The candidate for the degree of Bachelor of Science in the College of Agriculture must complete the following requirements:

(1) The equivalent of four years of university residence. The senior year must be spent in the College of Agriculture, University of California.

The student should note that in order to complete the work in agri-

culture within the normal four-year period, prerequisites must be systematically met and the proper sequences of courses followed. Unnecessary delay will thereby be avoided.

(2) One hundred and twenty-four units of university work, with at least twice as many grade points, in addition to matriculation units and Subject A. (The Subject A examination in English Composition is required of every undergraduate student on or before his first registration in the University.) Not more than 4 units may be in lower division physical education courses.

(3) Thirty-six of the 124 units must be in upper division courses (courses numbered 100–199).

(4) Nine units of mathematics. Matriculation work may be offered toward this requirement, with each year of high school work valued at 3 units. The student normally satisfies this requirements before the end of his sophomore year in the University.

(5) American History and Institutions. The student may meet this requirement by passing an examination for which no credit is given, or by completing certain prescribed courses or course sequences.

(6) In addition, every student must complete the requirements as listed under one of the following curricula:

Plant Science Curriculum

Students must complete the following:

(a) General	Units
Chemistry	13
Botany and plant physiology	9
Physics	3
Economics	3
English and/or speech	6
Genetics	4
Plant pathology	4
Soils, irrigation, or plant nutrition	3
Entomology (see zoology)	4

Additional units from:

Natural Sciences	9–15
Bacteriology, biochemistry, botany or plant physiology, chemistry, entomology, geology, irrigation, mathematics,* physics, plant pathology, plant nutrition, soils, zoology, or animal physiology.	
Social Sciences and Foreign Languages	3–9
Economics, English or speech, foreign language, history or political science,† philosophy, psychology, sociology.	

65

(b) Students must also complete a major, the minimum requirements of which consist of 12 units of approved upper division courses in the field of the major.

* Not including Trigonometry or Intermediate Algebra.

† In addition to the general University requirement.

Certain courses, or other equivalent, are required by the following majors:

Floriculture and Ornamental Horticulture.—Botany 1, 107; Chemistry 1A, 1B, 8; Floriculture and Ornamental Horticulture 110, 131, and 136A or 136B; Irrigation and Soil Science 101. Recommended: Botany 151; Irrigation and Soil Science 110; Zoology 150.

General Horticulture.—Chemistry 1A, 1B, 8; Botany 1, 107. Recommended: Botany 103; Floriculture and Ornamental Horticulture 110, 136A or 136B; Irrigation and Soil Science 101.

Example of Minimum Program—Plant Science Curriculum

<i>Freshman Year</i>	Units First Semester	Units Second Semester	<i>Sophomore Year</i>	Units First Semester	Units Second Semester
*Military or air science..	1½	1½	*Military or air science..	1½	1½
Physical education	½	½	Physical education	½	½
English 1A-1B or			Physics 2A-2B	4	4
Speech 1, 2.....	3	3	Chemistry 8 or 5A	3	..
Botany 1, 104	5	..	Bacteriology 1	4
Chemistry 1A-1B	5	5	Floriculture and		
History 7A or Political			Ornamental Horti-		
Science 1	3	culture 110	3
Economics 1A	3	Botany 104	4	..
			Elective	3	2-3
	<hr/>	<hr/>		<hr/>	<hr/>
	15	16		16	15-16

Students who are unable to meet the above-outlined program of study during the first two years may take some of the requirements in their junior or senior years. It should be noted, however, that any great departure from the above program will delay graduation beyond the normal four-year period.

Junior and Senior Years

The additional required courses—Zoology 150; Botany 107 (Plant Physiology) and 140 (Plant Genetics); 3 units from Irrigation and Soil Science 101, 110; Plant Pathology 120—together with such electives in any department as may be approved by the major adviser, will be taken during the junior and senior years. For elective courses in other departments, see elsewhere in this bulletin.

Where the option exists, the student should consult the major adviser concerning the 12 units required for his major.

Other Curricula

The requirements in the other curricula offered by the College of Agriculture will be found in the PROSPECTUS OF THE COLLEGE OF AGRICULTURE (obtainable from the Office of the Dean). Programs suitable for the conditions at Los Angeles are given in this bulletin or may be had from the appropriate advisers in agriculture, who should be consulted.

* Or Naval science (3 units per semester).

Honors

Students who become candidates for the bachelor's degree in the College of Agriculture may be recommended for honors on the basis of the quality of the work done in the regular curriculum.

Honors with the Bachelor's Degree

- (1) Honors are granted at graduation only to students in honor status who have completed the major with distinction, and who have a general record satisfactory to the Study-Lists and Courses Committee.
- (2) Students who, in the judgment of the Study-Lists and Courses Committee, show marked superiority in their major subject may be recommended for the special distinction of Highest Honors.
- (3) A list of students to whom Honors or Highest Honors in the College have been awarded is published in the COMMENCEMENT PROGRAM, and honors are designated on the University diplomas of students whose names appear on these lists.

COLLEGE OF ENGINEERING

The Department of Engineering, in complement with other University departments, offers courses leading to the degrees of Bachelor of Science, Master of Science, Master of Engineering, and Doctor of Philosophy. While many graduates of the College of Engineering enter the profession directly upon achievement of the bachelor's degree, others find it advantageous to continue academic work toward the advanced degrees. Some graduates find it possible to pursue advanced study while at the same time maintaining themselves in full-time employment in local industry. The facilities of University Extension are available to those who desire supplementary study without the aim of an advanced degree.

The abundance and variety of extracurricular activities on the Los Angeles campus provide many opportunities for valuable experiences in leadership, service, recreation, and personal satisfaction. The Faculty of the College strongly encourages engineering students to participate in such activities, especially those of most relevance to engineering. Among the latter are the student Engineering Society, the student publication, *California Engineer*, and the student-oriented programs of the many technical and professional engineering societies in the Los Angeles area.

A branch of the campus library is housed within the complex of engineering buildings. Known as the Engineering-Mathematical Sciences Library, it serves the Departments of Engineering, Mathematics, Astronomy, and Meteorology. Open stacks encourage students to explore and use specialized literature.

The Department of Engineering maintains in the Engineering Building an Evening Information Center which is open from 5 to 10 p.m. Monday through Friday, and from 9 a.m. to 12 noon on Saturday, during the fall and spring semesters.

Students who plan to seek advanced degrees are referred to page 114 of this bulletin and to the ANNOUNCEMENT OF THE GRADUATE DIVISION, LOS ANGELES.

THE ANNOUNCEMENT OF THE COLLEGES AND SCHOOL OF ENGINEERING, BERKELEY, DAVIS, LOS ANGELES, AND SANTA BARBARA, gives information concerning the history of the Colleges, facilities for instruction and research, Engineering Extension, and other related matters.

Admission to Engineering

Attention is directed to the fact that the last days for filing applications for admission to the University by students desiring enrollment in the College of Engineering are July 15, 1963, for fall, 1963, admission; December 15, 1963, for spring, 1964, admissions. Admission to the College of Engineering is largely confined to beginning freshmen and to upper division students.

An engineering qualifying examination must be taken by all applicants for admission to the College of Engineering at both the lower division and upper division levels. The examination is to be taken the semester previous to that in which the applicant desires to register. No other test results may be substituted for those of the appropriate engineering qualifying examination. The formal application for admission to the University as well as the application to take the test must be filed before the date scheduled for the examination. Students not taking the test on the date scheduled will not be considered for admission to regular status in the College of Engineering in the semester immediately following.

There are two engineering qualifying examinations: the *Engineering Examination, Lower Division*, is required of all applicants for admission prior to the junior year; it is an aptitude test designed to demonstrate the applicant's general scholastic ability and his ability to comprehend scientific materials and principles, and to use mathematical concepts. The *Engineering Examination, Upper Division*, is required of applicants for admission at and above the junior level, and must be passed satisfactorily by all students, whether new or continuing, prior to beginning the work of the junior year; it is an achievement test covering lower division courses in mathematics, physics, chemistry and engineering. The same examinations are required for admission to the Colleges and School of Engineering at Berkeley, Davis, Los Angeles, and Santa Barbara. A list of the places and times for the examinations

may be obtained from the Admissions Officer at any of the campus. Application blanks for these examinations should be obtained by the prospective student several months before he plans to enroll in the University. A \$5 fee will be charged for each examination if taken with a group of three or more persons at the regularly scheduled times; otherwise the fee is \$10.

Admission at the Freshman Level

While most applicants will take their first two years in engineering at a junior college, an applicant may qualify for admission to the University in freshman standing under any one of the several plans of admission described on pages 26-30 of this bulletin, including the *Engineering Examination, Lower Division*. It is important for applicants expecting to enter the College of Engineering to include the following subjects in the list of high school courses taken to satisfy the University admission requirements:

Algebra	2 units	Chemistry or physics	
Plane geometry	1 unit	(both are desirable)	1 unit
Trigonometry	$\frac{1}{2}$ unit	Mechanical drawing	1 unit

Students lacking the above preparation will find it necessary to make up equivalent courses while in college, thereby delaying graduation.

Admission at the Junior Level

In general, students will be admitted to the College of Engineering only at the freshman and junior levels. The *Engineering Examination, Upper Division* is required of students entering at the junior level. Prerequisite to all upper division engineering courses is upper division standing in the College of Engineering. Upper division standing for both new and continuing students is determined by a combination of lower division grades and the score in the *Engineering Examination, Upper Division*.

In place of the first two years of the engineering curriculum given below, transfer students should complete a program which is *recommended for transfer students by the junior college, or other institution attended*, and which also includes the following minimum requirements for junior standing in Engineering at the University:

	Minimum Number of Units
Analytic geometry and calculus.....	12
Chemistry (for engineering and science students).....	8
Physics (for engineering and science students).....	10
Engineering (which must include some units in each of the following subject areas: graphics, properties of materials, surveying or engineering measurements, and statics)....	10

Humanities and social studies.....	6
Unspecified subjects (3 units may be humanities and social studies; the remainder to be in engineering and scientific subjects, which may include units, in addition to required units, in mathematics, chemistry, physics and engineering subjects; none may be in military science and/or physical education)	10
	<hr/> 56

Students who enter with *only* these 56 units will require more than 4 semesters to complete the upper division of the engineering curriculum.

Students transferring from other colleges and universities to the University of California for the study of engineering should have adequate training in subjects basic to the level at which transfer is planned. The full senior year, comprising a minimum of 30 units, in all cases must be completed at the University of California.

Students who wish to transfer to the College of Engineering from a technical institute or junior college technical education program will be expected to meet existing University requirements for admission to the freshman year. In consultation with a faculty counselor, placement in engineering courses will be determined by the student's previous scholarship record and his performance on an appropriate aptitude or achievement test. After he has demonstrated ability to do the work required in the College of Engineering with a satisfactory grade-point average, the College of Engineering will evaluate his non-certificate terminal courses and recommend transfer credit for them to the extent that they are found to have served the student as preparation for his advanced work in engineering.

The Colleges of Engineering on the Berkeley and Los Angeles campuses have adopted a policy of reciprocity whereby students who have completed *all* the requirements for upper division standing in either of the Colleges of Engineering will be admitted with upper division standing in the other College of Engineering.

UNDERGRADUATE STUDY IN ENGINEERING

Purpose. To provide undergraduate preparation for the functions of design, research and development, in all branches or fields of professional engineering, for an age when all technology must be put to use in a framework of human interests and values.

Plan. A single unified curriculum (134 semester units), consisting of a required core of fundamental subjects and disciplines (91 semester units) and a program of elective courses (43 semester units). The elective program provides each student with two opportunities: first, for specialization in the major field of engineering of his choice, and second, for development of an under-

standing of the inescapable interaction between technology and human societies.

Required Core. An integrated group of courses which feature fundamentals common to all branches of engineering. These fundamentals cover the following subjects and disciplines: mathematics, physics, chemistry, life science, engineering measurements, graphics, properties and strength of materials, engineering mechanics, circuit analysis, thermodynamics and heat transfer, fluid mechanics, engineering design, and engineering economics.

Electives—Major Field. A group of advanced courses in engineering, mathematics, the sciences (physical, life, and space) and business administration, taken predominantly in the last one and one-half years.

Electives—Humanities. A group of courses in humanities, social studies, and fine arts (collectively termed humanities for reasons of convenience and brevity), selected from the rich offerings of many departments on campus for their relevance to human interests and values.

English Proficiency. A general requirement of the University and the College. The University requires that every accepted student either pass its Subject A examination (in English composition or complete an acceptable course in English composition with a satisfactory grade (see page 42)). The College of Engineering requires proficiency in written English throughout the undergraduate years. Students who do not maintain proficiency and those who enter the upper division having unsatisfactory scores on the English portion of the Upper Division Engineering Examination must undertake remedial studies in English composition. None of the units of credit for such studies may be counted as part of the 134 units of the engineering curriculum. Consequently, deficiencies in English require extra work and may delay graduation.

Length of Curriculum. 134 semester units, scheduled for completion in four academic years of *full-time* study. These 134 units may be spread over more than four years for employed students or for those who wish to take broader programs. Alternatively, they may be completed in less than four years by students who wish to attend summer sessions.

Degree. The Bachelor of Science, awarded upon completion of the engineering curriculum and all associated requirements, including those for all students of the University.

Requirements for the Degree. Completion of (1) the required core and the elective program of the engineering curriculum with at least a "C" average in all those courses which are of upper division level, and (2) the general University requirements, including those for American history and institutions, minimum scholastic standing, and senior residence.

Honors and Awards at Graduation.

(a) *Honors*—for high scholarship or distinction in advanced study, defined normally as attainment of a grade-point average of 3.25 or more in at least 50 units of upper division studies, or, in exceptional cases, as eminence in special studies or research attested by faculty recommendations.

(b) *Highest Honors*—for markedly superior intellectual achievement, defined normally as attainment of a grade-point average of 3.75 or more in at least 50 units of upper division studies, or, in exceptional cases, as

outstanding achievement in special studies or research attested by faculty recommendations.

(c) *Engineering Achievement Awards*—for general eminence in special studies, research or other work or service, not necessarily in formal courses, granted upon recommendation of the Faculty of the College and approval by the Committee on Student Relations.

Cooperative Work-Study Program. A plan under which students may rearrange the regular schedule of courses in order to obtain preengineering experience by working for pay in approved industrial positions during portions of their college years.

Adaption for Transfer Students. Curricular flexibility in the junior year to provide smooth transition for students who transfer from the many public junior colleges in California which offer instructional programs equivalent to the first two years of the engineering curriculum. This flexibility derives from long-standing statewide policies of the University of California which provide:

(a) that equivalence of the lower division engineering programs of other colleges be judged by a set of minimum subject requirements rather than a fixed pattern of courses,

(b) that admission to junior status in engineering, for applicants from lower division in the University as well as other colleges, be based upon a minimum standard of lower division grades and scores on the Upper Division Engineering Examination,

(c) that college level courses completed with satisfactory grades in the junior colleges may be accepted for full credit, up to a maximum of 70 semester units. (See pages 30-31 for more complete explanation.)

Student Advising Program. Regular and special conferences between students and the faculty advisers to whom they are individually assigned upon admission to the College. These advisers assist students in arranging study programs, selecting electives, and otherwise completing requirements for graduation, all under the guidance and with the approval of the Dean of the College.

E.C.P.D. Accreditation. The Engineering Curriculum is accredited by the Engineers' Council for Professional Development, the nationally recognized accrediting body for engineering curricula.

THE ENGINEERING CURRICULUM (134 Units)

Lower Division

(See page 112 for transfer students.)

	Units First Semester	Units Second Semester		Units First Semester	Units Second Semester
<i>Freshman Year</i>			<i>Sophomore Year</i>		
Mathematics 5A-5B	5	3	Mathematics 6A-6B	3	3
Chemistry 1A-1B	5	5	Physics 1C-1D	3	3
Physics 1A	—	3	Engineering 4C-4D	3	3
Engineering 4A-4B	3	3	Engineering 15A-15B ..	3	3

The Elective Program of the Engineering Curriculum

The engineering curriculum includes an individualized elective program of 43 units. Each student, with the approval of his faculty adviser and the Dean of the College, selects a program which suits his individual needs, interests and objectives. This program is divided into two parts as follows:

1. The major field electives: A minimum of 18 units in a field of engineering endeavor selected by the student. At least 15 of these units must be in upper division courses and must include 3 units in engineering design, 3 units in engineering economy, and 3 units in engineering materials. There should be a reasonable balance between courses in the practice and the science of engineering. Appropriate advanced courses in other departments on campus may be included.

Three units of study must be in the life sciences and may be accomplished within either the major field or the humanities electives, whichever is appropriate for the particular course selected. Certain courses in such fields as psychology, physiology, and bacteriology are acceptable, as are the applied life science courses offered by the Department of Engineering.

2. The humanities electives: A minimum of 21 units in humanities, social studies and fine arts (collectively termed humanities for the sake of convenience and brevity). At least 9 of these units must be in upper division courses. To provide some depth, at least one group of 8 to 10 units must be in courses of the same academic department or must otherwise reflect coherence in respect to subject matter. In such a group, upper division courses should predominate.

Engineering students are strongly urged to satisfy by examination the University's requirement in American History and Institutions (see page 41). By careful selection of appropriate courses, however, a student may satisfy this requirement while accomplishing the objectives of the humanities electives.

3. Four of the 43 units are to be divided between the major field and the humanities electives in any proportion that the individual student may choose.

Optional Senior Year at Berkeley or Davis

Students desiring to take advantage of the wide variety of senior courses on the Berkeley campus or of the senior agricultural engineering offerings on the Davis campus may elect to complete part or all of the senior year of the engineering curriculum, not exceeding 36 units of work, on one of those campuses. In consultation with faculty advisers and with approval of the Dean of the College of Engineering, Los Angeles, such students will substitute appropriate Berkeley or Davis offerings for courses Engineering 109A, 104C, and 104D. The major field electives of such students will be made up largely of Berkeley or Davis campus courses chosen from the offerings of two or more departments.

The College of Engineering on the Berkeley campus offers curricula in civil engineering, electrical engineering, engineering science, industrial engineering, mechanical engineering, materials science and mineral engineering. These curricula are printed in the GENERAL CATALOGUE, DEPARTMENTS AT BERKELEY, and in the ANNOUNCEMENT OF THE COLLEGES AND SCHOOL OF ENGINEERING, BERKELEY, DAVIS, LOS ANGELES, AND SANTA BARBARA. Students in the College of Engineering on the Los Angeles campus may elect to work toward a Bachelor of Science degree from the College of Engineering on the Berkeley campus. Such students will, with the aid of a Los Angeles faculty adviser, choose Los Angeles campus courses which satisfy the requirements of the Berkeley curriculum selected. Transfer to the Berkeley campus will be effected at the appropriate level, but at least the final 30 units must be completed in residence at Berkeley. The first three years of most, but not of all, of the Berkeley curricula may be completed at Los Angeles.

Graduate Study in Engineering

The Department of Engineering is prepared to offer graduate study and research in many areas of engineering. Although graduate students are not required to limit their studies to a particular area division, the divisions are expected to serve as centers of activity for graduate studies. The divisions are:

Structures. Soil mechanics, static and dynamic analysis and design of engineering structures, shells and arches, advanced strength of materials, optimum design of structures, elastic and inelastic stability.

Applied Mechanics. Mechanics of fluids, aerodynamics, flight mechanics, aircraft stability, control and performance, aeroelasticity, elasticity and plasticity, vibration theory, rigid body dynamics, aeroacoustics, wave propagation in solids, nonlinear theory of continuous media, hypersonics, hydrodynamics, engineering magnetohydrodynamics.

Chemical, Nuclear and Thermal. Heat and mass transfer, radiation transfer, molecular flow, areothermochemistry, thermodynamics, applications of chemical physics, chemical processes, energy conversion and utilization, nuclear processes, nuclear reactor analysis and design.

Materials. Metallography, electron microscopy, x-ray diffraction, ceramics, mechanical and physical metallurgy, structure of solids and related properties of materials, thermodynamics of metals and ceramics.

Electronics and Circuits. Circuit and network theory, basic magnetics, electron devices, transistors.

Information Systems. Analogue and digital computer systems, control system theory and optimization techniques, sampled data systems, nonlinear systems, simulation, communication systems theory and optimization techniques, detection theory, information theory and prediction and filter theory.

Electromagnetics. Electromagnetic theory, solid state electronics, dielectric and magnetic properties of matter, antenna theory, microwaves, ion dynamics, plasma, paramagnetic and ferromagnetic resonance, masers.

Astronautics. Celestial mechanics as applied to orbit theory, perturbations, observation and prediction. Vehicle dynamics in relation to the problem of attitude, optimum trajectories, navigation and instrumentation. This division will be concerned also with space technology in its broad interpretation.

Design, Management and Planning. The complexity of developing advanced devices and systems has focused attention on the central problems of engineering design, management and planning. This division is concerned with the theory, methodology, and the broader problems of design, with the management of the engineering function and the planning of engineering projects.

Environmental Systems. This division is concerned with the graduate engineering programs dealing with the conservation and utilization of our natural and human resources. Included are such fields as biotechnology, water resources, air resource engineering, ecological and environmental systems engineering, soil mechanics, sanitary engineering, traffic and transportation engineering, and the resource aspects of urban and regional planning.

Graduate students in Engineering are encouraged to supplement their programs with appropriate offerings from the Departments of Business Administration, Chemistry, Mathematics, Meteorology, Physics, or other fields closely allied to Engineering.

Engineering graduate students must carry a minimum of six units each semester until the completion of their unit requirements.

Requirements for Admission to Graduate Status

Applications for admission will be received from graduates of recognized colleges and universities. The basis of selection is promise of suc-

cess in the work proposed, which is judged largely on previous college record. Each application will be referred by the Dean of the Graduate Division to the department of the applicant's proposed major for recommendation before admission is approved.

In addition to meeting the requirements of the Graduate Division, the student must have completed an undergraduate curriculum in engineering substantially equivalent to that given at the University of California with an undergraduate scholarship record equivalent to at least a 3.0 grade-point average (based on 4.0 maximum) in all engineering and upper division courses undertaken. An applicant who fails to meet the requirement above must complete additional course work before being admitted to graduate status. These courses will not be accepted toward the unit requirement for the M.S. degree.

Students who have completed other curricula may be required to enroll in certain undergraduate engineering courses which generally will not be accepted in fulfillment of the requirements for advanced degrees.

Applicants are required to file a special application with the Department of Engineering. These departmental supplements may be secured by writing to the Assistant Dean of Graduate Studies, Department of Engineering.

Graduate Record Examination

All applicants are required to take the Advanced Engineering Test of the Graduate Record Examination. The test is given four times a year in various locations in the United States and several foreign countries.

Applications for the Graduate Record Examination may be secured by applying to the Educational Testing Service, 4640 Hollywood Boulevard, Los Angeles 27, California (for those living in the western hemisphere) and to Educational Testing Service, 20 Nassau Street, Princeton, New Jersey (for those living in the eastern hemisphere).

The Testing Service must be requested to forward the test results to the Assistant Dean of Graduate Studies, Department of Engineering.

There is a fee of \$8 for the Advanced Engineering Test.

Requirements for the Master's Degree

In general, students will follow Plan I for the degree of Master of Science in Engineering. (Only under special circumstances is Plan II allowed.) Students will satisfy the requirements by enrolling in appropriate courses chosen in accordance with a plan prepared in conference with graduate engineering adviser and approved by the department. A minimum of 60 per cent of the total unit requirement, both graduate and upper division undergraduate work, must consist of courses in

engineering, mathematics, physics, or chemistry. The student may wish also to complete certain analytical and professional courses on other campuses of the University of California.

Requirements for the Doctor's Degree

The following information supplements the general requirements appearing on pages 165-169.

A student who has just completed his requirements for the M.S. degree and desires to proceed toward the Ph.D. must file Form 1, Notice of Intention to Proceed to Candidacy for the Degree Doctor of Philosophy, with the Assistant Dean, Graduate Studies in Engineering for approval to do so.

The basic program of study toward the Ph.D. degree in engineering is built around three fields. Certain fields of study have been established as follows:

Applied Mathematics
Biotechnology
Circuit Theory
Computers
Control Systems
Engineering
Dynamics
Elastic and Inelastic
Deformation of Solids
Electromagnetic Theory

Fluid Mechanics
Heat and Mass Transfer
Management and Administration
Neutron Transport
Properties of Materials
 (a) *Ceramics*
 (b) *Physical Metallurgy*
Structural Analysis
Statistics and Probability
Thermodynamics

However, the department feels that many significant contributions have arisen and will continue to emerge from a reorientation of existing knowledge and, therefore, that no classification scheme can be considered as unique. Thus prospective Ph.D. candidates will be allowed, and in certain cases encouraged, to undertake (as fields of study) areas which have been previously undefined. Approval of a Ph.D. program is based upon the set of fields considered as a whole, and is granted by the Assistant Dean of Graduate Studies. At least two of the three fields must be clearly defined as Engineering.

The requirements for a particular field generally may vary with the student's particular objective, although minimum requirements exist for each field. Ordinarily, the student will engage both in formal course study and in individual study in meeting the field requirement, which is satisfied upon passing the preliminary examination.

While the emphasis in a Ph.D. program is on the ability to correlate knowledge, rather than on the mere satisfaction of course requirements, the extent of a properly chosen field of study is such that the competent student will be able to complete the three field requirements in two years of full-time graduate study or the equivalent.

In general, students in engineering must earn the M.S. degree before the Assistant Dean of Graduate Studies will consider a proposal for a Ph.D. program. However, the course work leading to the M.S. degree will, if selected properly, aid in meeting the field requirements.

Preliminary Examinations. Assistant Dean of Graduate Studies will consider proposed programs from properly qualified graduate students. If the fields are felt to be appropriate, the committee will notify the student and will recommend a guidance committee which is also in charge of the examinations in the three fields. In order that the proposal be adequately considered and the guidance committee properly appointed, the suggested program must be outlined in detail.

After the completion of the study for the field as outlined by the members of the guidance committee in charge, the student may take the preliminary examination, which will include not less than a four-hour written examination.

Foreign Language. The student should propose the foreign languages to the Assistant Dean of Graduate Studies at the time of his proposal of the three fields of study. In some cases, the undergraduate elective selection may profitably include a foreign language if a Ph.D. degree is visualized at that time.

Qualifying Examination. After the student has demonstrated his competence in the three fields and has passed the language examinations, the Assistant Dean of Graduate Studies will notify the Graduate Division of his readiness for the qualifying examination and will recommend the committee for this examination, generally as follows: staff member directing research, chairman; members of the guidance committee; two staff members from other departments.

The details of the qualifying examination are at the discretion of the committee, but ordinarily will include a review of the preliminary examinations and a broad inquiry into the student's preparation for research. In most cases, the qualifying examination is oral, the preliminary examinations usually constituting the written portion as required by the Graduate Division (page 167).

Dissertation. The candidate shall prepare his dissertation in accordance with the instructions furnished by the Graduate Division, except that the dissertation shall be typed on vellum (carbon backed), so that it may be reproduced by the ozalid process. The thesis must be unbound, unperforated, and unpunched. The candidate shall furnish the vellum original (with pages separated by tissues) plus three ozalid copies to the Graduate Division, and one ozalid copy to the instructor in charge of his thesis.

Off-Campus Graduate Program

In addition to the course offerings on the Los Angeles campus, the Department of Engineering has established several other centers of graduate instruction. This provides an opportunity for graduates in engineering to take courses off campus which may satisfy the unit and academic residence requirements for the Master of Science degree in engineering. Special permission may also be granted these students, allowing them to perform the research and analysis required for the thesis off campus. The off-campus programs consist of courses, usually offered in the evening, devoted to engineering science. They are unified programs providing a basis for advanced technical applications. The courses are designed primarily to assist in the over-all development of professional competence and to broaden the technical background, rather than to provide specialty courses directly related to the student's immediate assignment in industry. The present off-campus graduate program is available in the following areas: San Diego, China Lake (U. S. Naval Ordnance Test Station), Orange Belt (Pomona, Azusa, Corona, Riverside, Ontario), Point Mugu (U. S. Naval Air Missile Test Center), Paramount.

Engineering Executive Program

The Department of Engineering offers an engineering executive program leading to a Master of Engineering degree. This program is designed to meet the needs of engineers who, within the next decade, will fill top executive positions in industry. Applications will be received both from persons recommended and sponsored by their firms and from individuals. Applications are open only to individuals who are qualified for regular graduate status in engineering, and whose full-time industrial experience extends over at least five years. A student must be accepted in regular graduate status to be eligible for this program. The fee is \$350 each semester. The last day to file applications for acceptance for the 1963 fall semester was March 1, 1963.

COLLEGE OF FINE ARTS

The College of Fine Arts was established on July 1, 1960, replacing the former College of Applied Arts as the administrative structure housing the departments of Art, Dance, Music, and Theater Arts. The College of Fine Arts believes that through the combining of scholarly study with creation and performance high competence in the arts can effectively be developed at the University level. The objective is a professional education of the highest quality for the creative and performing artist on the one hand, and the historian and critic of the arts on the other.

The departments of Art, Dance, Music, and Theater Arts offer four-year curricula, each leading to the degree of Bachelor of Arts. By completing additional requirements set by the School of Education, students may also secure *teaching credentials* in connection with these majors.

The College temporarily administers the interdepartmental curriculum in Apparel Design, but this program is being discontinued in the summer of 1964.

Requirements for Graduation

The degree of Bachelor of Arts will be granted upon the following conditions:

I. Unit Requirements

The minimum number of units for the degree shall be 120, of which at least 66 units shall be outside the major department. At least 42 units shall be in upper division courses, including 6 or more units outside the major department.

II. Scholarship Requirements

A "C" average (2.0) is required on all work completed in the University of California, exclusive of University Extension. A "C" average is also required in all upper division courses in the major.

III. Residence Requirements

All candidates for the degree must be registered in the College of Fine Arts while completing the last two semesters (24 units).

Students transferring from other institutions or from University of California Extension with senior standing must complete in the College of Fine Arts at least 18 units in upper division courses, including 12 or more units in the major department. This regulation does not apply to students transferring from other colleges within the University.

Summer Session.—Two six-week summer sessions or one eight-week summer session on any campus of the University of California may be presented in lieu of one of the final semesters.

Junior College.—Courses taken at a junior college after the completion of 70 units toward the degree may satisfy lower division subject requirements, but they are not given unit credit toward the 120 units required for graduation. Junior college credits may not apply on any upper division requirement.

University Extension.—Courses in University of California Extension (either class or correspondence) may not be offered as a part of the residence requirement. Otherwise, courses bearing the prefixes X, XB, XD, XL, XR, XSB, and XSD, may be applied toward the bachelor's degree unless numbered in the "400" series. The latter are professional

courses and may be recommended as supplementary electives, but they do not yield credit toward the A.B. degree in the College of Fine Arts. Only courses bearing the "XL" prefix are considered the equivalent of courses offered in the regular session at UCLA.

Concurrent enrollment in resident courses and in Extension courses is permitted only when the entire combined program has been approved in advance by the Dean's Office. Extension courses *earn no grade points* and do not affect the student's grade-point standing in the University.

IV. Subject Requirements

The student shall complete the specific subject requirements established by the University, the College of Fine Arts, and the student's major department:

General University Requirements

Subject A (English Composition). (See page 42)

American History and Institutions. (See page 43)

General College Requirements

The general requirements of the College of Fine Arts are planned to insure a degree of basic skill in communication, both in English and in at least one foreign language, and to give the student an introduction to each of the broad fields of human learning: natural science, social science, and the humanities. It is intended that these requirements will be spread over the entire undergraduate program, and students are encouraged to take both upper and lower division courses for the completion of these requirements.

Any course applied on one of the (A) to (E) requirements may not also be applied on another of these requirements.

A. *English Reading and Composition.* At least 6 units of English reading and composition (English 1A-1B) with grades of "C" or better. This requirement may be met in part by passing a proficiency examination in English 1A, set and administered by the Department of English with the approval of the Executive Committee of the College of Fine Arts.

B. *Foreign Language.* At least 12 units in one foreign language. Without reducing the total number of units required for the bachelor's degree, high school work with grades of "C" or better and not duplicated by college work[§] will count as follows: 4 units for the first two years together, and 4 units each for the third and fourth years.

[§] Any student who because of lapse of time or other circumstances feels unable to continue successfully a language begun in high school may consult the department of the language concerned regarding the possibility of repeating all or part of the work for credit. Such credit counts on the 120 units required for the bachelor's degree, but credit is not allowed toward the required 12 units in foreign language for both the high school courses and the college work duplicating them.

The requirement may also be met by passing a proficiency examination in one language. A foreign student whose entire secondary school work was completed in his native tongue, excluding English, may *upon petition* be considered as having fulfilled the foreign language requirement. Courses in foreign literature in English translation may not be applied on this requirement.

With the approval of the chairman of the student's major department and the dean of the College, 16 units in two languages may be presented in lieu of 12 units in one language. *This approval is by petition only.*

C. *Natural Science.* At least 9 units of natural science, including 3 units each from groups 1 and 2, and one course having a minimum of 30 hours of laboratory work. Courses marked with an asterisk (*) meet the laboratory requirement. A high school course acceptable for the admission requirement in laboratory science satisfies the College laboratory requirement, but does not reduce the requirement of 9 units of college courses in natural science, or the specific requirement of 3 units in physical science and/or mathematics, and 3 units in biological science.

1. *Physical science and/or mathematics.* Astronomy 1, 100; Chemistry 1A*, 2, 2A*; Geography 1, 3, 115; Geology 2, 2L*, 3*, 101; Mathematics 1, 3A, 37; Meteorology 3; Physics 2A*, 2B*, 10, 21*.
2. *Biological science.* Anthropology 1; Bacteriology 1, 4*, 6; Biology 12; Botany 1*, 2*, 3*; Floriculture and Ornamental Horticulture 131*; Life Sciences 1A-1B (both 1A and 1B must be completed to count on the science requirement); Paleontology 101; Psychology 1B, 108; Zoology 1A*, 1B*, 15*, 25*, 150*.
3. *History of science and/or philosophy of science.* Astronomy 100; History 125A, 125B; Philosophy 20B; Zoology 138, 140.

D. *Social Science.* At least 9 units of social science, including 6 units of history of western civilization (History 1A-1B). Courses used by the student to satisfy the American History and Institutions requirement may not be applied on this requirement.

Anthropology 1, 2, 3, 102, 103, 110, 124, 125, 127; Economics 1A, 1B, 13, 100A, 100B, 101; Geography 2, 5A, 5B, 100, 121 to 181; History, all courses; Political Science 1, 2, 101, 102, 103, 110, 112, 113, 125, 141, 146, Psychology 1A, 1B, 33, 101, 110, 112, 113, 120, 135, 145, 181; Sociology 1, 2, 101, 122, 124, 126, 129, 142, 143, 144, 161.

E. *Humanities.* At least 9 units of humanities, including 3 or more units in each of two of the following three areas. Courses offered by the student's major department are not applicable.

1. *The Arts.* Art, all courses; Dance, all courses; Integrated Arts 1A, 1B; Music, all courses; Theater Arts, all courses.
2. *Literature.* Humanities 1A-1B; English, American, or foreign literature, including works in translation.
3. *Philosophy.* Philosophy 6A, 6B, 20A, 20B, 31, 32, 102, 104, 112, 114, 136, 146A, 146B, 147, 149, 170A, 170B.

Optional General College Requirements

Students graduating prior to September, 1965, have the option of satisfying the general requirements of the discontinued College of Applied Arts *in lieu of the foregoing general requirements of the College of Fine Arts.* (In all cases, the general University requirements and the major requirements will be those currently in effect at the time of graduation.) The optional requirements, *which must be met in full*, are as follows:

A. *Either:*

A₁. **Foreign Language.* At least 16 units in one foreign language. Without reducing the total number of units required for upper division standing or the bachelor's degree, high school work with grades of C or better and not duplicated by college work[§] will count as follows: 4 units for the first two years together, and 4 units each for the third and fourth years. The requirement may also be met by passing a proficiency examination in one language. Courses in foreign literature in English translation may not be applied on this requirement. (A foreign student whose entire secondary school work was completed in his native tongue, excluding English, may *upon petition* be considered as having fulfilled the foreign language requirement.)

A₂. **Natural Science.* At least 12 units chosen from the following list, including at least one course having 30 or more hours of laboratory work. Courses marked with an asterisk (*) meet the laboratory requirement. Only college courses may apply on the natural science requirement.

Anthropology 1; Astronomy 1, 2*; Bacteriology 1, 4*, 6; Biology 12; Botany 1*, 2*, 3*, 6*; Chemistry 1A*, 1B*, 2, 2A*, 5A*, 5B*, 8, 9*; Geography 1, 3, 5A; Geology 2, 2L*, 3*; Life Sciences 1A-1B (both 1A and 1B must be completed to count on the science requirement); Mathematics 1, 3A, 3B, 37, and Statistics 1; Meteorology 3; Mineralogy 6A*, 6B*; Physics 1A*, 1B*, 1C*, 1D*, 2A*, 2B*, 10, 21*; Psychology 1B; Zoology 1A*, 1B*, 15*, 25*.

* Courses offered in satisfaction of the language or natural science requirement may not be used on the year-course requirement.

§ Any student who because of lapse of time or other circumstances feels unable to continue successfully a language begun in high school may consult the department of the language concerned regarding the possibility of repeating all or a part of the work for credit. Such credit counts toward the 120 units required for the bachelor's degree, but credit is not allowed toward the required 16 units in foreign language for both the high school courses and the college work duplicating them.

OR

A. A combination of *Foreign Language and Natural Science* to be distributed as follows:

**Foreign Language*. At least 16 units in not more than two languages. Without reducing the total number of units required for upper division standing or the bachelor's degree, high school work with grades of C or better and not duplicated by college work[§] will count as follows: 4 units for the first two years together, and 4 units each for the third and fourth years. If a new language is begun in college, it may not apply on this requirement unless course 2 with its prerequisites is completed. The requirement may also be met by passing a proficiency examination in one language. Courses in foreign literature in English translation may not be applied on this requirement.

**Natural Science*. At least 9 units chosen from the natural science list set forth above, including at least one course having 30 or more hours of laboratory work.

B. *Matriculation Mathematics*. Elementary algebra and plane geometry. If these subjects were not completed in the high school, they may be taken in University of California Extension, but without credit.

C. **Three Year Courses*. A year course chosen from three of the following seven groups, one sequence to be selected from group 1, 2, or 3. Only the courses specified below are acceptable.

1. English, Speech: English 1A-1B, 46A-46B; Speech 1, 2, 3, 4; English 1A and Speech 1.
2. Foreign language: Any two consecutive courses, of at least two units each. High school work and literature courses in English translation do not apply on this requirement.
3. Mathematics: Any two of the following courses: Mathematics 1, 3A, 3B, 37; Statistics 1.
4. Social Sciences: Anthropology 1, 2; Economics 1A-1B; Geography 1, 2, 5A-5B; History 1A-1B, 5A-5B, 6A-6B, 7A-7B, 8A-8B; Political Science 1, 2; Sociology 1, and either 2 or 12.
5. Psychology: Psychology 1A, and either 1B or 33.
6. Philosophy: Philosophy 6A-6B, 20A-20B, 31 and 32.
7. Music, Art, Theater Arts (A student majoring in art, music or theater arts may not present a year course in his major department): Art 1A-1B, 10A-10B, 20A-20B, 30A and either 30B or 30C; Integrated Arts 1A-1B; Music 1A-1B, 3A-3B, 20A-20B, 30A-30B; Theater Arts 5A-5B.

D. *Minor*. A graduation† minor in the College of Fine Arts consists of 20 units of coordinated courses, of which at least 6 units must be in closely related upper division courses. All courses in a given department are considered

† A graduation minor is not necessarily a "teaching" minor acceptable for the general secondary teaching credential. See the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION for definitions of approved teaching minors.

§ See section (§) footnote on page 123.

* See degree (*) footnote on page 123.

closely related. A minor may consist of courses chosen entirely from one department, or it may be a group minor including related courses from several fields.

With a group minor, the lower division work may include courses from several departments, although it is recommended that two year courses be included. The 6 units of upper division work must be from one department, normally a year sequence.

Possible group minors are listed below. Students planning other combinations must secure advance approval from the Dean's Office *before* taking the courses.

Business administration, economics.

English, speech, theater arts.

Humanities: art, dance, folklore, humanities, integrated arts, literature, music, philosophy.

Life science: bacteriology, biology, botany, floriculture and ornamental horticulture, life sciences, physiological psychology, zoology.

Physical science: astronomy, chemistry, engineering, physical geography, geology, mathematics, meteorology, mineralogy, physics.

Social science: anthropology, economics, geography, history, political science, psychology, sociology.

Note: The minor may not include:

- a. Any course in the student's major department.
- b. Any course from another department applied on a student's major or specifically listed by number as applicable on the student's upper division major.
- c. Any Education courses applied on a teaching credential.
- d. Foreign language or other courses completed in high school.
- e. Courses in the mother tongue of a foreign student, unless approved by petition.

Departmental Requirements—The Major

Each candidate for the bachelor's degree shall have completed a major or curriculum in the College of Fine Arts with a scholarship average of at least two grade points per unit in all upper division courses, and shall have been recommended by the chairman of his major department or curriculum committee.

A major is composed of not less than 36 units, and shall include at least 24 units in upper division courses. The major includes both lower and upper division courses, arranged and supervised by the department and approved by the Executive Committee of the College.

A curriculum is composed of not less than 36 units nor more than 54 units from several departments, including at least 24 units in upper division courses. The curriculum includes both lower and upper division courses, selected and supervised by a curriculum committee and approved by the Executive Committee of the College.

Special attention is directed to the courses listed as preparation for

the major. In general, it is essential that these courses be completed before upper division major work is undertaken. In any event, they are essential requirements for the completion of the major.

As changes in major requirements occur, students are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the departmental adviser, and adjustments approved by petition when necessary.

The major must, in its entirety, consist (1) of courses taken in *resident instruction* at this or another university, or (2) of courses with numbers having the prefix X, XB, XD, XL, XR, XSB, or XSD taken in University of California Extension.

Any student failing to attain a scholarship average of at least two grade points per unit in his major department may, at the option of the department, be denied the privilege of a major in that department.

A department may submit to the Dean of the College the name of any student who, in the opinion of the department, cannot profitably continue in the major, together with a statement of the basis for this opinion, and the probable cause of the lack of success. The Dean may permit a change of major, or may, with the approval of the President, require the student to withdraw from the College.

No student is permitted to change his major after the opening of the last semester of the year in which he intends to graduate.

Any department offering a major in the College of Fine Arts may require from candidates for the degree a general final examination in the department.

Organized Majors and Curricula

Departmental majors leading to the degree of Bachelor of Arts, with opportunities for specialization as indicated, are offered in the following areas:

MAJOR IN ART

History of Art
History and Studio*
Pictorial Arts*
Design*

MAJOR IN DANCE*

MAJOR IN MUSIC*

MAJOR IN THEATER ARTS

Theater Arts
Language Arts*

Curriculum in Apparel Design.—The interdepartmental curriculum in Apparel Design, leading to the Bachelor of Science degree, will be offered for the last time in 1963-1964. New students will be admitted to the program only if they can satisfy all requirements for graduation by the summer of 1964.

With the proper selection of courses, including those set by the School of Education, teaching credentials are available in the majors and specializations marked with an asterisk (*).

Curriculum in Apparel Design

Preparation for the Major. Art 10A-10B, 30A-30B, Economics 1A-1B, Home Economics 16.

The Major.—Thirty-six units of coordinated upper division courses, including Art 119B, 180 (8 units); Home Economics 161, 170, 172, 175, 176, 177A-177B; and additional courses chosen from Art 187A, 187B, and other upper division art courses approved by the student's adviser.

Honors

Honor Students

The list of honor students each semester shall include the names of students completing the previous semester's program with distinction, or who otherwise qualify for honor status according to criteria established by the Executive Committee of the College of Fine Arts.

Honors With the Bachelor's Degree

1. Honors shall be granted at graduation to students who have completed the major with distinction, and who have a general record satisfactory to the College Committee on Honors. Departmental recommendations shall be reported to the Dean of the College.
2. The special distinction of Highest Honors may be awarded to students who, in the judgment of their departments, display marked superiority in their major subject. Departmental recommendations shall be reported to the Dean of the College.
3. The Committee on Honors shall nominate students for Honors or Highest Honors on the basis of criteria established by the Executive Committee of the College of Fine Arts.
4. A list of students to whom Honors or Highest Honors have been awarded shall be published in the Commencement Program.

SCHOOL OF BUSINESS ADMINISTRATION

The School of Business Administration at Los Angeles, replacing the College of Business Administration, was established in the spring of 1950. The School admits students of junior or higher standing and offers curricula leading to the undergraduate degree of Bachelor of Science. The School of Business Administration is a professional school of the University whose purpose is to provide for qualified students a well-balanced education for careers in business at the management and administrative levels. The general and specific requirements of the School are designed to furnish a broad preparation for careers of management rather than a highly specialized proficiency in particular occupations. The two-year curriculum leading to the degree of Bachelor of Science consists of a basic program of professional education for business management plus specialization in one field. The basic program attempts to

create an understanding of the operation of the business enterprise within the whole economy; to develop proficiency in the use of such tools of management as accounting, business law, statistical and economic analysis; and to provide knowledge of the principles of management in several functional fields. Upon completing the basic program, students undertake a minimum of three courses in their chosen field of emphasis. Opportunity for concentration is offered in the fields of accounting, finance, insurance, production and operations management, industrial relations, marketing, transportation and traffic management, real estate and urban land economics, business statistics and information processing.

Admission

In accordance with the general objectives of the School of Business Administration, students are accepted on the basis of intellectual capacity and academic preparation as demonstrated by their work in the first two years of college. A student is eligible to apply for admission to the School of Business Administration if he (1) has been admitted to the University, and (2) has completed or has in progress a minimum of 60 units of college credit with at least a grade C average.

Lower Division Requirements

An organized program of study in preparation for a professional curriculum in the School must satisfy the following requirements:

- (1) the general University requirements, listed in this bulletin.
- (2) the lower division requirements of one of the colleges of the University of California.

For example, these may be fulfilled by meeting the requirements for upper division standing in the College of Letters and Science (Berkeley or Los Angeles), the prebusiness curriculum in the College of Letters and Science (Los Angeles), or upper division standing in the College of Fine Arts (Los Angeles). Organized programs of study offered by departments within such colleges as Engineering, Agriculture, or Letters and Science, at any campus of the University of California, are acceptable if junior standing is achieved.

- (3) the following specific requirements or their equivalents:
 - (a) Business Administration 1A-1B, Elementary Accounting.
 - (b) Economics 1A-1B, Principles of Economics.
 - (c) Mathematics 32B, Introductory Mathematical Analysis for Business, Mathematics 3A, Analytic Geometry and Calculus, First Course, or Mathematics 37B, Mathematics for Social and Life Sciences.
 - (d) English 1A, English Composition with grade C or better.

- (e) Completion of course 2 (or the equivalent) in a foreign language.

Application for acceptance by the School of Business Administration (Los Angeles) should be filed with the Office of Admissions not later than July 15 for the fall semester and not later than December 15 for the spring semester.

Students who wish to transfer from other colleges or schools of the University of California, Los Angeles, to the School of Business Administration must file an application in the Office of the Assistant Dean, GBA 3250A, not later than July 15 for the fall semester and not later than December 1 for the spring semester.

Students who are in the prebusiness curriculum in the College of Letters and Science and who have achieved junior standing but who do not transfer into the School cannot take upper division business courses.

Requirements for the Degree of Bachelor of Science

The degree of Bachelor of Science will be granted upon fulfillment of the following conditions:

1. A minimum of 128 units. A candidate must have attained at least a grade C average or twice as many grade points as units attempted.
2. A candidate for the degree must be registered in the School of Business Administration while completing the final 24 units of work and must have followed organized semester programs approved by the Dean. This regulation applies both to students entering the School of Business Administration from another university and to students transferring from other divisions of this University.

Students admitted to senior standing in the School of Business Administration (Los Angeles) on the basis of credit from other institutions or on the basis of credit from University Extension, must complete in residence, subsequent to such admission, a minimum of 24 units composed of at least 18 units of upper division Business Administration courses, including at least 6 units in their chosen field of concentration.

The faculty of the School of Business Administration expects its graduates to be well-rounded individuals who possess not only an understanding of the fundamentals of business, but also, a sound foundation in the sciences and humanities. Students who come to the School with highly specialized backgrounds will be required, therefore, to take appropriate courses in other areas of knowledge.

The Department of Business Administration also regards proficiency in the use of written and spoken English as one of the requirements for the satisfactory completion of every course.

3. Completion of requirements (a) to (e) below is required of all candidates.

- a. *University requirement of American History and Institutions.*
- b. *Basic Courses:* All students in the School of Business Administration must complete the following courses in their proper sequence:

Business Administration 100. Business Economics.

Business Administration 101. Business Fluctuations and Forecasting.

Business Administration 108. Legal Analysis for Business Managers.

Students who transfer to the School of Business Administration with 3 units credit for law must take Business Administration 105B to meet their business law requirement. Note: After July 1, 1964, all entering students *must* take course 108.

Business Administration 115. Business Statistics.

Business Administration 120. Intermediate Accounting or Business Administration 120M. Managerial Accounting.

Business Administration 190. Organization and Management Theory.

Economics 135. Money and Banking.

*Functional Courses:** Business Administration 130. Business Finance.

Business Administration 140. Elements of Production Management.

Business Administration 150. Elements of Industrial Relations.

Business Administration 160. Elements of Marketing.

It is the policy of the School of Business Administration to require courses 100 and 115 to be taken concurrently, and to require courses 100, 115, and 120 or 120M to be taken in the student's first semester in the School, followed immediately by a second semester program that includes course 101 and Economics 135. In addition, students must meet their business law requirement in the junior year. Thus, the basic tools of economic analysis, business law, statistics, and accounting are acquired before the senior work begins in the functional areas of concentration. Any adjustments in the programs of entrants, necessitated by subject deficiencies from lower division, or any other reason, may be made only by the Assistant Dean for Student Affairs.

* Students majoring in Business Administration must take courses 100, 115, and 120 or 120M before the functional courses.

- c. *The field of concentration:* At least three courses aggregating not less than 9 units in one of eight following fields (may not include basic required courses listed under (b) above):

Accounting	Transportation and
Finance	Traffic Management
Insurance	Real Estate and
Industrial Relations	Urban Land Economics
Production and	Business Statistics and
Operations Management	Information Processing
Marketing	

With the approval of the Dean, a student may change his field of concentration.

Students who wish to elect an individually designed field of concentration may propose an area comprised of three or more courses selected either inside or outside the department, or partially inside and partially outside the department. It is expected that the proposed group of courses be appropriately integrated with the general program which the student wishes to follow. This privilege is extended to students who demonstrate academic ability and a particular interest in a special area. Selection of a special field and the specific courses therein must have the written approval of the Assistant Dean for Undergraduate Student Affairs before the work is undertaken.

- d. *Electives:* At least 17 units in departments other than Business Administration of which 9 units must be in upper division courses.

e. *Scholarship requirements*

1. At least a C average in all work undertaken in the University.
2. At least a C average in all upper division courses taken under requirements (b) and (c) above and any other upper division courses in business administration, business education, and economics.
3. At least a C average in all subjects undertaken in the field of concentration (c) above.

Typical Program

The typical program for a student entering the School of Business Administration might be as follows:

JUNIOR YEAR

<i>First Semester</i>	<i>Units</i>	<i>Second Semester</i>	<i>Units</i>
Business Administration 100.....	3	Business Administration 101.....	3
Business Administration 115.....	3	Economics 135.....	3
Business Administration 108.....	4	Business Administration 150.....	3
Business Administration 120		Business Administration 160.....	3
or 120M	3-4	Elective	5
Elective	3		
	<hr/> 16		<hr/> 17

SENIOR YEAR			
<i>First Semester</i>	<i>Units</i>	<i>Second Semester</i>	<i>Units</i>
Business Administration 130.....	3	Business Administration 190.....	3
Business Administration 140.....	3	Field of concentration courses	6
Field of concentration course	3	Electives	8
Electives	9		
	<hr/> 18		<hr/> 17

There may be minor adjustments in this program to permit the early completion of the first course in the student's field of concentration.

Honors

The Executive Committee of the School will recommend for Senior Honors Privileges and for Honors or Highest Honors with the bachelor's degree such students as it may judge worthy of that distinction.

GRADUATE SCHOOL OF BUSINESS ADMINISTRATION

The Graduate School of Business Administration was established in August, 1955, and assumes responsibility for the graduate curricula formerly under the jurisdiction of the School of Business Administration. The Graduate School of Business Administration offers curricula leading to the degrees of Master of Business Administration and Doctor of Philosophy in business administration.

The broader directives of the Graduate School include the following: (1) to provide professional education which will develop in qualified students the intellectual and personal attributes that are prerequisite for successful careers in management or as staff specialists in public or private enterprises; (2) to prepare the exceptionally qualified, mature students for careers as teachers and research scholars in business and business management; (3) to offer management development programs for experienced businessmen who may profit from an intensive study of management theory and practices; and (4) to enlarge the body of systematic knowledge about business administration, the management process, and the environment in which the enterprise functions, and to disseminate this knowledge through publications and improved teaching materials.

The School recognizes the importance of improving management of the economy through the preparation of persons who will have responsibility for making decisions. In a free, competitive enterprise society, the combined judgments of business managers probably constitute the greatest single influence upon the economic welfare of society. Success in business is increasingly the result of risk-taking enterprise and in-

novation, backed by systematic intelligence about available technology, markets, finance, and people. The graduate business school faculty in a university properly strives to understand and to influence these changes, and to transmit to mature students a systematic approach to business problem-solving.

All students interested in applying to the Graduate School of Business Administration should consult the **UCLA ANNOUNCEMENT OF THE GRADUATE SCHOOL OF BUSINESS ADMINISTRATION**.

Admission

Applicants for both the M.B.A. and the Ph.D. programs follow the same procedures. The degree programs of the School are under the jurisdiction of the Dean of the Graduate Division. The regulations of the Graduate Division as well as those of the Graduate School of Business Administration should be observed.

Application forms must be filed by each student for both the Graduate Division and the Graduate School of Business Administration not later than July 15 for the fall semester, and not later than December 1 for the spring semester. The Graduate Division application must be accompanied by a money order or bank draft of \$5 in payment of application fees. Payment must be for the exact amount of the fee and should be made payable to The Regents of the University of California.

Admission to Graduate Status.—Graduate students are admitted to graduate status on the basis of promise of success in the work proposed, as judged primarily by (1) the candidate's previous college record and (2) his performance on the Admission Test for Graduate Study in Business.

1. To be admitted in graduate status in the department a student is required to have an undergraduate scholarship record of approximately a grade B average in all courses taken in the junior and senior years and in junior-senior courses in business administration and economics; and a B average or better in all postbaccalaureate course work.

In an exceptional case an applicant who fails to meet this requirement may, at the discretion of the Assistant Dean of the Graduate School of Business Administration, be recommended for admission on a trial basis. Such a recommendation will be made only when the applicant's qualifications give promise that he may pursue the degree program with success. It will not be made for an applicant who has already completed the equivalent of the first year of the Master of Business Administration program or by an applicant for admission to the Ph.D. program. For departmental restrictions applying to students so admitted see the **UCLA ANNOUNCEMENT OF THE GRADUATE SCHOOL OF BUSINESS ADMINISTRATION**.

2. All applicants are required to take the Admission Test for Graduate Study in Business. The test is given four times a year in various locations in the United States and several foreign countries. Students must write to the Educational Testing Service, 20 Nassau Street, Princeton, New Jersey, for information regarding application and the time and place of the examination, and they should request the service to forward the test results to the Graduate School of Business Administration. If an applicant does not take the examination before filing applications for admission he must explain this failure when filing; and if otherwise eligible, he will be admitted and will be required to take the examination at the next scheduled date.

3. All applicants for admission to the Ph.D. program are requested to arrange a personal interview with the Assistant Dean. Interviews are conducted at various universities throughout the United States.

Admission to Part-Time Study.—The Ph.D. program is limited to full-time students. However, a limited number of fully employed students are admitted to the M.B.A. program. Part-time students must meet all above-stated requirements for admission, be in continuous residence during the course of their program, and carry a minimum of 6 units per semester. Courses are scheduled in the late afternoon and evening to assist part-time students in completing their degree objective. Any one considering part-time study should consult with the Assistant Dean with respect to the feasibility of his program.

Leave of Absence.—Graduate students planning to be away from the University for any semester must file a Leave of Absence Petition. Failure to take an official leave of absence will constitute presumptive evidence that the student has withdrawn from the graduate program.

A student on a leave of absence has the right to resume his graduate studies upon termination of that leave. A commitment for readmission is made by the Graduate Division and the Graduate School of Business Administration when the leave of absence is granted. This privilege of readmission may be denied, however, if in the opinion of the graduate division denial is required because of special circumstances. Leaves of absence are granted for no longer than one academic year. While on a leave of absence, graduate students may use neither University facilities nor the time of faculty members.

A special application for readmission is required of persons formerly registered in a regular session as a graduate student and had not been granted an official leave of absence.

Renewal of Application for Admission.—A renewal of application is required of persons who were admitted to a fall or spring semester but did not register. This application is obtained at the Graduate Division,

and is to be filed not later than July 15 for the fall semester and December 1 for the spring semester. Attendance in a summer session does not constitute admission or regular registration in graduate status.

Requirements for the Degree of Doctor of Philosophy

The following information supplements the statement of general requirements for the Doctor of Philosophy degree in the UCLA ANNOUNCEMENT OF THE GRADUATE SCHOOL OF BUSINESS ADMINISTRATION.

Basic University Requirements. See pages 165–169. Special departmental requirements are:

Program of Study. Candidates for the Doctor of Philosophy degree must complete the following program:

Preparatory Course Work:—Candidates must supply evidence through course credits or by oral or written test of a basic knowledge of Business Administration.

Screening Examinations:—Candidates must pass written examinations covering the proposed major area of study plus three “supporting fields,” normally business economics, management, and an elective field either inside or outside the department.

Foreign Language:—For the general University requirements, see page 166. The foreign language requirement must be completed before the major field examination.

Required Courses:—Each candidate must satisfy specific course requirements or present evidence of equivalent preparation.

Required Doctoral Seminars:—A passing grade must be obtained in two discussion seminars. (Note: A detailed description of the above requirements is found in the UCLA ANNOUNCEMENT OF THE GRADUATE SCHOOL OF BUSINESS ADMINISTRATION.)

Major Field Examination:—A major field examination, covering the major field and supporting material offered both inside and outside the department.

Oral Qualifying Examination:—An oral examination is required after completion of the major field examination.

Dissertation:—Consult page 168 for university requirements. Each candidate must file with the Department of Business Administration a final draft of the doctoral dissertation two weeks prior to scheduling the final oral examination. In addition a fourth copy is filed with the Department of Business Administration.

Final Oral Examination:—A final oral examination is required and deals primarily with the subject of the dissertation.

Requirements for the Degree of Master of Business Administration

First-Year Program

The first year of the M.B.A. program requires the mastery of five required fields and five elective fields. These fields are defined below in terms of the courses offered in the Department of Business Administration on the Los Angeles campus (course numbers refer to courses in the Department of Business Administration unless otherwise indicated):

***Required Courses.** (102G and 120G are prerequisites to all other core courses. The following may be taken concurrently: 106G, 108G, 115G, 135G, 140G, 150G, and 160G.)

- | | |
|--|--|
| 1. Business Economics 102G
(100 and 101). | 3. Business Law 108G (108). |
| 2. Accounting 120G
(120 or 120M). | 4. Business Statistics 115G (115). |
| | 5. Organization and Management
Theory 190G (190). |

Elective Course (any five).*

- | | |
|--|--|
| 1. Behavioral Science 106G (106) | 6. Personnel Management 150G
(150). |
| 2. Money and Banking
(Economics 135). | 7. Marketing 160G (160). |
| 3. Finance 130C (130 or 133). | 8. Transportation and Traffic
Management (170). |
| 4. Insurance 135G (135). | 9. Real Estate and Urban Land
Economics 180G (180). |
| 5. Production Management 140G
(140). | |

(Explanation of course numbers: Courses numbered without the G suffix are offered regularly in the Department of Business Administration for undergraduate students, and are generally available for students in the Graduate School of Business Administration. Courses numbered with the suffix G are offered exclusively for students in the Graduate School, regardless of their degree objective or status.)

First-year graduate students may satisfy parts of this requirement by independent study and examination with special permission of the Assistant Dean of Student Affairs.

Graduate students who are already prepared in one or more of the above fields, as evidenced by satisfactory completion of the above courses or their equivalent, may elect to begin concurrently a part of the program of the second year of the M.B.A., with the approval of the Dean.

Second-Year Program

The second-year program consists of a minimum of 24 units of

* For titles and descriptions of courses see pages 220-235.

which at least 12 units must be in 200-series courses. The program has three parts:

(a) Major field of concentration	9-15 units
(b) Business Economics and Business Management requirement	6 units
(c) Electives	3-9 units
Total	<hr/> 24 units

Major Field of Concentration. Each student must select a major field and complete in it between 9 and 15 units of work. At least 9 units of this work must be 200-series courses, excepting where specifically directed otherwise by the Assistant Dean. Courses offered in fulfillment of requirement (b) may not be applied to the major field requirement.

Business Economics and Business Management Requirement. The student will select one 3-unit course in each of the following categories:

Business Economics: BA 200, 201 or 202 (3 units)

Business Management: BA 290, 291 or 292 (3 units)

Electives.—The student must elect between 3 and 9 units *outside* of categories (a) and (b) above. For this requirement courses may be elected from any graduate offerings in the University or from the undergraduate offerings in the Department of Business Administration labeled specifically in the UCLA ANNOUNCEMENT OF THE GRADUATE SCHOOL OF BUSINESS ADMINISTRATION.

Business Administration.

A written comprehensive examination is given in the major field of concentration.

Residence of at least one academic year on the Los Angeles campus is required for the M.B.A. degree candidate. The 24 units of the second-year program must be completed on the Los Angeles campus, and a minimum of 4 units must be taken for two semesters.

Fields of concentration available in the M.B.A. program are as follows:

- | | |
|--|--|
| a. Statistics and Information Processing | f. Marketing |
| b. Accounting | g. Real Estate and Urban Land Economics |
| c. Finance | h. Management Theory and Policy |
| d. Production and Operations Management | i. Insurance |
| e. Personnel Management and Industrial Relations | j. Transportation and Traffic Management |

The candidate for degree of Master of Business Administration must pass an integrated comprehensive examination based upon his major

field of graduate study. The examination is given in the fourteenth week of each semester. There is no language requirement. The candidate must maintain a grade-point average of 3.0 or better in all work taken in graduate standing, including undergraduate courses taken in restricted status; on the second-year program, in addition, a 3.0 or better grade-point average must be maintained in total work taken in the University subsequent to the required master's degree program.

SCHOOL OF DENTISTRY

The School of Dentistry on the Los Angeles campus will admit its first class of dental students in September, 1964, for a four-year curriculum leading to the degree of Doctor of Dental Surgery. Applications for admission to this first entering class together with appropriate transcripts and other pre-dental requirements should be filed not later than December 31, 1963. Application forms may be obtained from the Office of Student Affairs, UCLA School of Dentistry, Los Angeles 24, California. No applicants will be notified of admission, even on a provisional basis, prior to November 1, 1963.

Predental Requirements

The basic educational requirements for admission to the School of Dentistry is a minimum of 2 years of college work, and completion of 60 units of courses which preferably include those listed under the College of Letters and Science on page 93 of this bulletin. In addition, the school requires satisfactory performance in the national aptitude tests given by the Council on Dental Education of the American Dental Association.

When taking these tests the candidate should specify the schools where applications are being filed so that the aptitude test results may be mailed directly to the appropriate schools.

Modern dentistry provides exciting opportunities for blending art and science, technology and biology. The predental student will therefore wish to test his abilities in handling both biological and physical sciences. In addition, there are many other aspects in the broadening scope of dentistry which contribute to preparation for a career in private practice, in academic dentistry, and in the Armed Forces and Public Health Service.

It is desirable therefore, for the predental student to prepare himself for broad professional activities. He should take advantage of the opportunity at the college level to extend his cultural background, his knowledge of languages and the behavioral sciences. Many predental students now avail themselves of advanced educational opportunities

so as to qualify for admission to graduate divisions, in which case the student may find it important to have completed more than two years of pre dental education. In fact more and more students today complete three and four years of college prior to admission to the schools of dentistry.

SCHOOL OF EDUCATION

Three advanced degrees are offered by the School of Education: Master of Education, Master of Arts (with a major in education), and Doctor of Education. The function of the master's degree programs is the development of leadership in such educational fields as administration, supervision, curriculum development, guidance and counseling, audio-visual communications, and teaching. Students are encouraged to arrange a course of study which will provide breadth in the major areas affecting education, and depth in the field of special interest. Two degree programs are provided, the Master of Arts (Thesis Plan), and the Master of Education (Comprehensive Examination Plan). The course of study is largely determined by the degree objective and the area of special interest selected by the candidate. The doctoral program is provided to develop high-level specialists in these fields as well as to prepare students for college teaching and for educational research. Comprehensiveness and flexibility are characteristic of the advanced degree programs.

The School of Education offers curricula leading to certificates of completion and state credentials authorizing service in the following fields: kindergarten-primary; general elementary; general secondary; junior college; teaching exceptional children (speech correction and lip-reading, mentally retarded); school librarianship; general pupil personnel services (counseling, child welfare and attendance, school social work, school psychometry, school psychology); supervision; elementary school administration; secondary school administration and general school administration. In addition to maintaining the foregoing curricula, the School of Education provides opportunity for individual programs of study meeting the requirements of the State Board of Education for credentials in certain other fields.

Admission to Undergraduate and Professional Programs

To be eligible for enrollment in undergraduate and professional courses in the School of Education (education courses in the 100 or 300 series) a student must meet the following requirements:

An student in good standing in the University of California, who has

completed the lower division requirements in one of the colleges of the University, or the equivalent, may enroll in one or more introductory courses, but for one semester or for one Summer Session only.

To be eligible for enrollment during a second semester a student must satisfy additional requirements in four areas:

Academic Achievement. Before mid-term of the first semester or Summer Session the student must have forwarded directly to the Office of Student Services, official up-to-date transcripts of all college credits. His transcripts must show (a) an over-all grade-point average of 2.0 or higher if an undergraduate, 2.5 if a graduate, (b) a grade-point average in education courses of 2.0 or higher if an undergraduate, 2.5 if a graduate, and (c) a grade-point average in standard subject matter courses, not including courses in "performance" fields, of 2.0 or higher. In order to remain in a teaching program after admission undergraduate students must maintain a grade-point average of 2.0 (elementary) or 2.5 (secondary). Graduate students must maintain a grade-point ratio of 2.75 for continuing in the program.

Communication Skills. Under the auspices of the Office of Student Services, during his first semester or Summer Session the student must pass standardized tests in English (e.g., reading comprehension and mechanics of expression), and in arithmetic concepts. The student must also demonstrate that he is free of gross speech defects.

Physical and Mental Health. During his first semester or Summer Session in education courses the student must report to the Student Health Service in order to obtain preliminary approval for the study of education, indicating that his physical and mental health is such that he can perform the duties normally expected of teachers at the academic level he plans to teach.

Personal Fitness. An individual with a criminal record, or one incapable of normal personal-social relationships, is barred by law from teaching in the schools of California.

Ordinarily a student will be informed of the above requirements and corresponding deadlines during the first week of his first semester in education courses. However, it is the student's responsibility to be aware of and comply with these requirements.

Admission to Graduate Status in Education

In order to qualify for graduate status in education, the student must (1) hold a degree of Bachelor of Arts or Bachelor of Science from the University of California, or its equivalent; (2) demonstrate adequate preparation in social and theoretical foundations of education, educa-

tional psychology, and educational measurement or statistics; (3) have earned a grade-point average of at least 3.0 in the 100 series courses, and (4) have earned a grade-point average of at least 3.0 in education courses in the 100 series. For special requirements for admission to the doctoral program, see the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

Counseling

The Office of Student Services helps prospective students in education to explore and to choose appropriate fields and levels of school service, advises them concerning courses and procedures to follow in qualifying for graduate degrees, credentials, and certification for public school service, and counsels them on professional matters during their stay at the University. Students may request interpretation of test results, referral to community agencies for preteaching experience with children, referral to a remedial program, assistance in programming to meet specific credential and degree requirements, and counseling on personal and professional matters.

In addition, the office serves as a selection agency to determine eligibility for professional programs under the supervision of the Committee on Professional Fitness; handles details of enrollment in classes; conducts programs for lower division students at the University and in junior colleges to interest them in and facilitate their preparation for work in education; refers candidates for graduate programs to appropriate faculty advisers; makes recommendations for scholarships and fellowships; conducts research on student and professional problems; and formulates periodic reports on student personnel.

The staff consists of an assistant dean who coordinates the work of the office, graduate advisers who handle advising of candidates for graduate degrees, counselors who advise candidates for credentials, and several research workers.

It is important that each student establish contact with the Office of Student Services during his first semester on campus so that he may determine his eligibility for the program he wishes to enter, receive assistance in selection of courses, and fulfill all requirements for admission. Enrollment for a second semester is contingent upon his having completed all necessary steps satisfactorily during the first semester.

A complete statement of curricula, requirements, and procedures in the School of Education will be found in the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION, which may be obtained at the office of the Dean of the School of Education, Los Angeles campus, or by mail upon application to the Registrar of the University of California, Los Angeles 24, California.

Supervised Teaching†

Supervised teaching is provided in: (1) the University Elementary School, comprising a nursery school, kindergarten, and the elementary grades; and (2) elementary and secondary schools in Los Angeles and Santa Monica. Special provisions for demonstration have been made at the University Elementary School and at the following schools in Los Angeles City: Warner Avenue Elementary School, Emerson Junior High School, and University High School. The work in supervised teaching is organized and administered by the director of supervised teaching and a corps of supervisors and training teachers, chosen by the University authorities.

Master of Arts in Education

The Master of Arts degree is designed to permit maximum flexibility in program planning. The major portion of the course work is structured around the candidate's thesis problem.

Amount and Distribution of Work. At least twenty semester hours and a thesis must be completed in graduate status. The units must be taken in graduate (200) or upper division (100) courses, and at least 8 of the 20 units must be in strictly graduate work in education. With permission of the candidate's chairman and the Assistant Dean in charge of the Office of Student Services, advanced courses in departments other than Education may be accepted in partial fulfillment of the degree requirement.

The course of study for all candidates for the Master of Arts degree must include:

1. Course work from any of the basic areas not present in the candidates' background preparation (see Admission Requirements, page 139).
2. Education 200A—Fundamentals of Educational Research.
3. Courses selected from one or more of the following fields of specialization:
 - a) *Area I. Cultural Foundations of Education*
(See courses 100–109, 201–209, 250–254)
 - b) *Area II. Educational Psychology and Counseling*
(See courses 110–119, 210–219, 255–259)
 - c) *Area III. Curriculum and Instruction*
(See courses 120–139, 220–239, 260–269)
 - d) *Area IV. Administration and Supervision*
(See courses 240–249, 270–279)

† Consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

- e) **Area V. Technological and Continuing Education**
(See courses 137, 237, 267)

4. For other requirements see **UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION** and pages 162-165 of this bulletin.

Master of Education Degree

The Master of Education degree is designed to provide a comprehensive background in the basic fields affecting the study of education and to test the retention of such knowledge by a series of examinations in three fields: (1) either principles of education and sociology of education, or history of education and comparative education; (2) educational psychology; and (3) an optional field suited to the candidate's special area of concentration and jointly determined by the candidate and his adviser.

The Master of Education is a professional degree and carries the additional requirement that the candidate must have obtained, or be working toward, a teaching credential or certificate.

Amount and Distribution of Work. Twenty-four units of upper division (100) and graduate (200) courses are required, of which at least 12 units must be in strictly graduate courses in the School of Education. The follow course patterns are suggested for the various examinations:

1. Either Principles of Education and Sociology of Education: 108, 206A, 206B, or History of Education and Comparative Education: 201A, 201B, 204A, 204B.
2. Educational Psychology: 114, 119 (prerequisite), 210, 215A.
3. Optional examination chosen from among the following:
 - A. History of Education (by individual consent)
 - B. Comparative Education (by individual consent)
 - C. Philosophy of Education (by individual consent)
 - D. Sociology of Education: 108, 208A, 208B
 - E. Development and Learning: 210, 211, 212
 - F. Differential Education: 116, 118 or 216A, 216B
 - G. Measurement and Statistics: 200B, 214A, 214B
 - H. Pupil Personnel Services: 116, 213A, 215A, 215B
 - I. Early Childhood Education: 220, 222A, 222B, 223
 - J. Elementary Education: 220; and 4 units selected from 224A, 224B, 225A, 225B, 226A, 226B, 227A, and 227B
 - K. Secondary Education: 220, 230A or 230B, 263 or 280A or 280B
 - L. Vocational Education: 217, 238A, 238B
 - M. Business Education: 137, 237A, 237B
 - N. Audio-Visual Education (by individual consent)

- O. Higher Education (by individual consent)
- P. Adult Education (by individual consent)
- Q. Administration: 240A, 240B, 240C
- R. Supervision: 241A, 241B or 241C, 241D

The basic course of study outlined above will vary with each individual candidate depending upon his previous preparation in the field of education. Fifth-year students working on a general secondary credential, or candidates who hold a teaching credential may have completed some of the above courses in undergraduate status. In such cases, the candidate will have the opportunity for a broader selection of courses. See UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION and pages 162-165 of this bulletin.

Doctor of Education Degree

The program for the Doctor of Education degree has been designed to meet the increasing complexity in the field of education and the growing demand for a wide variety of abilities for leadership. A significant aspect of the program is its flexibility in meeting individual differences in interest, background and career objectives.

From the areas listed below each candidate must select a major field of concentration which will comprise the major portion of his study, the area of his dissertation, and the major area of his qualifying examinations. In addition, each candidate must select two related fields of study, one in the Department of Education, and the second either in Education or in another department. Qualifying examinations are given in both the related fields.

A candidate may elect to encompass a total area for breadth of knowledge, or he may select a subarea for depth and intensity of understanding. However, except as authorized by the Committee on Graduate Degrees only one selection from each of the five major areas is permitted in the combination of his major and related fields. Candidates are urged to take part of their doctoral study in the other disciplines available on a large University campus.

Areas of specialization open to candidates for the Doctor of Education degree.

I. Cultural Foundations of Education (Comprehensive); or

- | | |
|--------------------------|----------------------------|
| A. Comparative Education | C. Philosophy of Education |
| B. History of Education | D. Sociology of Education |

II. Educational Psychology (Comprehensive); or

- | | |
|-----------------------------|-------------------------------|
| A. Development and Learning | C. Measurement and Statistics |
| B. Differential Education | D. Pupil Personnel Services |

III. Curriculum and Instruction (Comprehensive); or

- | | |
|------------------------------|-------------------------------|
| A. Early Childhood Education | D. Higher Education |
| B. Elementary Education | E. Audio-Visual Education and |
| C. Secondary Education | Self-Instructional Methods |

IV. Administration and Supervision (Comprehensive)**V. Technological and Continuing Education**

- | | |
|---|---------------------------------|
| A. Business-Economic Education | C. Vocational Education |
| B. Education and Training
in Business and Industry | D. Continuing (Adult) Education |

VI. Other departments (must be a related field). Course work may be taken in any other department if the work is directly related to the student's doctoral objectives, if the student's sponsor approves the plan, and if the sponsor can work out details with the other department in a manner approved by the Committee on Graduate Degrees in the Department of Education.

Because of the number of possible variations in combinations of major fields of concentration and various related fields, programs of study for the doctorate must be planned with each individual candidate. The graduate adviser in the Office of Student Services guides each candidate in the early formulation of his program, and suggests appropriate faculty members who might serve as the candidate's sponsor. However, it is the responsibility of the candidate to seek and find sponsorship from one of the resident graduate faculty members in the Department of Education. (For further details of this program see the **UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.**)

SCHOOL OF LAW

Applicants for admission to the School of Law must have a bachelor's degree from an accredited institution and must have taken the Law School Admission Test. The application for admission to the School of Law must be made on forms supplied by the School of Law, University of California, Los Angeles 24, California, and transcripts of all college, university, and professional school records, including the records of work completed on the Los Angeles campus of the University of California, must be sent from the institutions of origin to the School of Law, University of California, Los Angeles 24. If the applicant is currently enrolled in a college or university, the transcripts should cover all work completed to date, including a statement showing work in progress. The transcripts should be accompanied by a statement indicating the date on which it is expected the work in progress will be completed, and the necessary supplementary transcripts should be sent to the School of Law.

The Educational Testing Service will supply each applicant with a bulletin of information concerning the Law School Admission Test. For permission to take the Law School Admission Test, applicants should write directly to the Educational Testing Service, 20 Nassau Street, Princeton, New Jersey, requesting an application blank and bulletin of information listing places where the test may be taken.

Admissions will be on a competitive basis. Official notice of admission, or denial of admission, will be sent at the earliest possible date.

SCHOOL OF LIBRARY SERVICE

In December of 1958 the Regents of the University of California authorized the establishment of the School of Library Service on the Los Angeles campus, to begin a course of instruction in September, 1960, leading to the Master of Library Science degree. The curriculum, of 24 to 30 units (depending upon previous academic preparation of the student), is a graduate program which normally requires two regular semesters and a Summer Session to complete. The M.L.S. degree is accepted in the United States and in many other countries as the basic preparation for professional positions in municipal, county, college, university, school, children's, and special library service. In addition to required courses offered by the School of Library Service, elective courses in library service and in other University departments are recommended to provide a basis for specialized preparation.

Requirements for admission include admission to graduate status by the Graduate Division, an undergraduate course of study appropriate to graduate study in librarianship, a grade-point average accepted by both the Graduate Division and the School of Library Service, and a reading knowledge of at least two modern foreign languages, preferably German and French. Applicants are also required to have a score submitted on the Aptitude Test of the Graduate Record Examination. Further information concerning entrance requirements, degree requirements, the California State Credential for School Librarians, age limitations, and exclusions due to physical handicaps may be obtained from the Office of the School of Library Service.

SCHOOL OF MEDICINE

The School of Medicine on the Los Angeles campus, which opened in 1951, admits a first-year class of candidates for the M.D. degree each fall. Applications for the class entering in September, 1964, together with all transcripts of record and other necessary documents, must be filed between May 1, 1963, and November 30, 1963, with the Office of Student Affairs, UCLA School of Medicine, Los Angeles 24,

California. Application forms and information may be secured from that office.

The requirements for admission to the first-year class of the School of Medicine meet or exceed those set by the Association of American Medical Colleges.

Basis of Selection. Enrollment is limited and highly selective. Candidates will be chosen on the basis of the following considerations: (1) undergraduate and, where applicable, graduate scholarship; (2) score on the Medical College Admissions Test which should have been taken preferably in May and in any case not later than October of the year during which application is made (this test is administered for the Association of American Medical Colleges by The Psychological Corporation); (3) interview of the applicant by a member or members of the Admissions Committee of the School of Medicine; and (4) letters of recommendation.

Preference is given to students who, in the opinion of the Committee on Admissions, present evidence of broad training and high achievement in their college training, of capacity for establishment of effective working relations with people in extracurricular activities and employment, and of possessing in greatest degree those traits of personality and character essential to success in medicine.

To be considered a California applicant, a student must meet one of the following requirements: (1) he must have completed 60 units or more in an accredited college or university in the State of California, or (2) he must be a legal resident of the State of California, who lived in the State immediately prior to beginning his premedical work and who left the State temporarily for completion of all or part of his premedical work.

Premedical Training. Ordinarily the requirement for admission to the first-year class of the School of Medicine is a baccalaureate degree but consideration is given to outstanding students who have completed at least three full academic years (90 semester units toward a baccalaureate degree) at an approved college or university.

The academic years should be devoted to obtaining as broad an education as possible. The major objectives should be: (1) facility in the use of English, written and spoken; (2) facility in quantitative thinking, represented by mastery of at least elementary mathematics; (3) such training in physical and biological science as will make possible ready comprehension of medical science and result in a thorough comprehension of the scientific method; (4) a foundation for an ever-increasing insight into human behavior, thought, and aspiration through study of individual man and his society, as revealed both by the social sciences and the humanities; and (5) some knowledge of a language and culture other than the student's own.

These objectives will ordinarily require completion of the following studies:

1. English composition or literature, 6 units.
2. Mathematics, 3 units.
3. Physics, 8 units.
4. Chemistry, two semesters of inorganic chemistry and one semester each of organic chemistry and quantitative analysis.
5. An additional semester of chemistry (e.g., organic or physical), or mathematics at the level of calculus, or physics. Elementary biochemistry will not satisfy this requirement.
6. Zoology, including vertebrate embryology, 12 units.
7. A classical or modern foreign language, 12 units of college work, or its high school equivalent,* or attainment of facility in reading a foreign language achieved by other means. If work has been done in two languages, 8 units of each will be acceptable.

Although these requirements should be fully satisfied, they may in part be waived for outstanding students. To attain the baccalaureate degree the student must fulfill the specific requirements of the college of his undergraduate work.

In the time not occupied by the required courses, students should undertake studies directed to the fourth objective stated above, guided by their own interests. Preference will not be given students who major in natural science since intensive study in the social sciences and in the humanities is considered at least equally valuable.

Completion of Requirements. The student must complete the pre-medical requirements before beginning the first year of medical studies, although these requirements need not be completed at the time application for admission is filed.

Physical Examination. Successful candidates must pass a physical examination before registering. The faculty has the right to sever at any time the connection with the School of Medicine of any student who is considered physically, morally, or mentally unfit for a career in medicine.

Fees. For residents of California the total fee for each semester is \$208 for graduate students, \$214 for undergraduate students; for non-residents the total fee is \$445.50 for graduate students, \$451.50 for undergraduate students.

Admission to Advanced Standing. Students who have completed one or two years in an approved medical school and who desire to transfer to this School should apply to the Office of Student Affairs of the School

* In a single language, the first two years of high school work are credited with 4 units, and the third and fourth years are credited with 4 units each.

of Medicine for instructions. Applications will be received after May 1, but not later than July 15. In no case will applications for transfer to the fourth-year class be considered.

Graduate Work

Graduate work leading to the degrees of Master of Science and Doctor of Philosophy is authorized in anatomy, biophysics, infectious diseases, pharmacology, physiological chemistry, physiology, and radiology. See the departmental announcements elsewhere in this bulletin for further information. For details concerning the professional curriculum, consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF MEDICINE.

SCHOOL OF NURSING

The Regents of the University of California authorized the establishment of a School of Nursing at Los Angeles in the summer of 1949. The School admits students of junior or higher standing, and offers curricula leading to the degrees of Bachelor of Science and Master of Science in nursing.

Curricula available:

1. The Basic Nursing Program leading to the Bachelor of Science degree provides for a close interweaving of general and professional education. The social, emotional, and health aspects of nursing are emphasized throughout the curriculum. Nursing laboratory practice under the guidance of faculty members is provided in hospitals, outpatient clinics, schools, homes, and community health centers.

Requirements for admission:

Admission to the University.

Completion of 60 units of college work, including courses required by the School of Nursing.

Personal recommendations as required by the School of Nursing.

Eligibility for the study of nursing as determined by demonstrated aptitudes, recommendations, interviews, physical examinations and scholastic attainment.

2. The Program for Registered Nurses leading to the Bachelor of Science degree provides for a close interweaving of general and professional education. Nursing laboratory practice under the guidance of faculty members is provided in hospitals, outpatient clinics, schools, homes, and community health centers.

Requirements for admission:

Graduation from an accredited school of nursing and evidence of the fulfillment of the legal requirements for the practice of nursing.

Personal and professional recommendations as required by the School of Nursing.

Eligibility for the study of nursing as measured by the National League for Nursing Graduate Nurse Examination and other tests administered by the University.

Completion of the lower division requirements or transfer credit evaluated as the equivalent. (See the UCLA ANNOUNCEMENT OF THE SCHOOL OF NURSING.)

3. Under the jurisdiction of the Graduate Division, Los Angeles, the School of Nursing administers programs leading to the Master of Science degree. These programs are designed to prepare professional nurses for clinical specialization and for administrative, supervisory, and teaching positions in schools of nursing, hospitals, and public health agencies. For further information about the graduate programs in nursing, consult the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION, and the UCLA ANNOUNCEMENT OF THE SCHOOL OF NURSING.

Requirements for admission:

Graduation from a recognized college or university having an accredited basic nursing program satisfactory to the School of Nursing, Los Angeles, and the Graduate Division, Los Angeles
or

Graduation from an accredited school of nursing offering satisfactory basic preparation in nursing and from a recognized college or university with a major satisfactory to the School of Nursing, Los Angeles, and Graduate Division, Los Angeles.

Evidence of the fulfillment of the legal requirements for the practice of nursing.

Satisfactory completion of the National League for Nursing Graduate Nurse Examination, Plan C.

An undergraduate scholarship record satisfactory to the School of Nursing, Los Angeles, and to the Graduate Division, Los Angeles.

Personal and professional recommendations as requested by the School of Nursing, Los Angeles.

Admission. Applications for admission to the Basic Program and to the Registered Nurse Program in the School of Nursing should be filed not later than July 15 for the fall semester and not later than December 15, for the spring semester.* Applications for admission to the Graduate Program should be filed not later than July 15 for the fall semester and not later than December 1 for the spring semester. The School of Nursing reserves the right to admit students on the basis of

* Applications from foreign students should be filed not later than May 1 for the fall semester and October 1 for the spring semester.

scholarship, recommendations, interviews, and demonstrated aptitudes.

Applications for admission to the undergraduate programs (accompanied by a \$5 application fee) should be filed with the Office of Admissions, University of California, 405 Hilgard Avenue, Los Angeles 24, California.

Applications for admission to the graduate programs (accompanied by a \$5 application fee) should be filed with the Admissions Section of the Graduate Division, Los Angeles, University of California, Los Angeles 24, California.

Educational programs are planned in the School of Nursing after evaluations of credentials have been made by the Office of Admissions or the Graduate Division following receipt of applications for admissions.

Requirements for the Degree of Bachelor of Science

The degree of Bachelor of Science will be granted upon fulfillment of the following requirements.

For the Student in the Basic Program

1. The candidate shall have completed at least 126 units of college work, and shall have satisfied the general University requirements.
2. The candidate shall have completed satisfactorily a minimum of 60 units of upper division courses.
3. The candidate shall include, in the required 126 units, at least 60 units in general education. Only those courses appearing in the Letters and Science List of Courses shall be accepted for this requirement.
4. After admission to the School of Nursing, the candidate shall have completed the specified units of college work acceptable to the faculty of the School.
5. The candidate shall have maintained at least a C average in all courses taken.
6. The candidate shall have completed all required nursing courses in the School of Nursing and must have maintained an average grade of C in all clinical nursing courses.

For the Student in the Registered Nurse Program

1. The candidate shall have completed at least 126 units of college work, of which 60 shall be in upper division courses, and shall have satisfied the general University requirements. Not more than 10 units of lower division credit will be granted to the registered nurse for nursing courses completed in a hospital school of nursing or in a two-year nursing program.

2. The candidate shall include, in the required 126 units, at least 60 units in general education. Only those courses appearing in the Letters and Science List of Courses shall be accepted for this purpose.
3. The candidate shall have maintained at least a C average in all courses taken, and must have maintained an average grade of C in all clinical nursing courses.
4. The candidate must have completed the major in nursing and additional upper division college work acceptable to the faculty of the School of Nursing, and shall have been registered in the School while completing the final 24 units of work.

Honors

The faculty of the School of Nursing or a duly authorized committee thereof shall recommend for Honors or Highest Honors senior students who meet the criteria determined by the faculty of the School of Nursing.

Requirements for the Degree of Master of Science

The degree of Master of Science will be granted upon fulfillment of the following requirements:

1. The candidate shall have met the general requirements of the Graduate Division. (See page 162.)
2. The candidate shall have completed in graduate or upper division courses: at least 20 units for Plan I of which 14 shall be graduate courses in nursing; at least 24 units for Plan II of which 14 shall be graduate courses in nursing. The additional units required for the degree may be distributed among courses in the 100 or 200 series subject to approval by the student's faculty adviser. Students who are preparing for teaching, supervision, or junior college teaching are required to take 370, or 475, or 332.

For further information concerning graduate work consult the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION.

SCHOOL OF PUBLIC HEALTH

General Purpose. The purpose of the programs of education offered in public health is to provide the student with a thorough understanding of the principles and theory of public health, and working knowledge of research methods. Courses of study are designed to present administration and research within the concepts described by Winslow's definition of public health—"the art and science of prolonging life,

preventing disease and promoting physical and mental efficiency, through organized community effort."

The graduate programs of study are open to physicians, dentists, engineers, veterinarians, clinical psychologists, nurses, statisticians, and to persons with certain other academic or professional preparation.

Degrees Offered. Six degrees are offered, as follows: Bachelor of Science, Master of Science in Public Health, Master of Science in Nutritional Sciences, Master of Science in (School) Health Education, Master of Public Health, Doctor of Public Health, Doctor of Philosophy in biostatistics.

Bachelor of Science Degree

A four-year undergraduate program leading to a Bachelor of Science degree in public health is offered in the University. The lower division curriculum of 60 units may be taken in the College of Letters and Science. Undergraduate students who have satisfactorily completed at least 60 units of work in one of the colleges of the University, or who have transfer credits evaluated as equivalent, may apply for admission to the School of Public Health.

Premedical and predental requirements can be met while satisfying the requirements for the Bachelor of Science in public health. By proper planning and selection of electives, prepharmacy and predental hygiene curriculum students can also satisfy the admission and degree requirements of the School.

In the general framework of academic study in public health, students may wish to choose particular courses as background to specialization, either in graduate study or in their future professions. Some such graduate areas of concentration are: biostatistics, epidemiology, health administration, occupational health, medical records library science, public health education, school health education, public health nutrition, and environmental health. Interested students are urged to discuss this with their adviser.

Candidates for the degree of Bachelor of Science must have completed at least 120 units of college work, of which at least the last 24 units must have been completed while enrolled in the School of Public Health. The student must earn at least twice as many grade points as the number of units of work undertaken in the University.

Preparation for the Major

Courses recommended for the first two years of college work in preparation for upper division study in the School of Public Health will be found under the Prepublic Health Curriculum and Prenutritional Sciences Curriculum in the College of Letters and Science, pages 97 and 98 of this bulletin.

The Major, Public Health Specializations

- (1) Required public health courses: Public Health 100, 110, 147, 160A, 170.
- (2) In addition to the above requirements, those of one of the following *pregraduate curricula* must be met. In each case electives approved by the department adviser should be added to make a total of at least 120 units, including at least 42 units in upper division.

Biostatistics.—Mathematics 3A–3B, 4A–4B, Statistics 131A–131B, Public Health 160B, 160C, 161. Every student will be required to take courses and study in depth at upper division level an additional subject area as a basis for application of statistical methods and theories.

Health Administration.—A year course at lower division level, or 6 units at upper division level, from anthropology, economics, psychology, or sociology; Zoology 25; Business Administration 135, 150 (or Political Science 185), 152 (or Sociology 161); Public Health 134, 160B (or 161).

Occupational Health.—Chemistry 1B, 8; Speech 1, 2; Psychology 1A, 1B; Zoology 25; Engineering 131A, 172A; Psychology 187; Sociology 131; Public Health 134, 160B. Recommended electives include: Business Administration 150, 152 (or Sociology 161); Psychology 145; Public Health 160C.

Environmental Health.—Chemistry 1B, 8 (or 112A); Physics 2A–2B; Engineering 172; Zoology 151; Public Health 112, 134, 153, 160B. Three units from Economics 101, Psychology 101, Sociology 101 (if the equivalent courses were not taken in lower division). Suggested electives: Anthropology 2, Chemistry 5A, 9, Engineering 131A, Mathematics 3A, Zoology 100A, 139.

Public Health Education.—Business Administration 152 (or Sociology 161); Nutritional Sciences 111; Zoology 25; Public Health 134. Electives to include an additional 18 units from at least four of the following areas: anthropology, economics, education, philosophy, political science, psychology, sociology.

School Health Education.—(Additional preparation: Public Health 44; English 1B or Speech 1A; Physical Education 1, two semesters; Psychology 33 or 1B); Public Health 130A–130B, 134; Nutritional Sciences 111; Psychology 111, 112 or Education 110A–110B; 8 to 9 units selected from Public Health 101; Psychology 142, 145, 148, 168, 181; Sociology 145, 161, 189.

Health Record Science.—Zoology 25, Public Health 102A–102B, 198, 402A–402B. 6 units of lower division or upper division in anthropology, economics, psychology or sociology. 6 units of upper division in personnel management or administration, and organization and management theory. 3 to 6 units in biological sciences.

The Major, Nutritional Sciences Specializations

Nutritional Sciences.—Bacteriology 1, 4; Chemistry 5A, 8 and 9 (or 112A–112B), 108A–108B (or Biological Chemistry 101A–101B); Eco-

nomics 1B; Mathematics 3B or 37; Nutritional Sciences 101, 113, 114, 117; Public Health 100, 147, 160A; Zoology 1B; and electives chosen from the following list to equal 120 units: Nutritional Sciences 100, 102, 142, 199; Physics 2A, 2B; Mathematics 4A, 6A; Public Health 110, 170, upper division bacteriology and zoology courses (with adviser's approval).

Dietetics.—Bacteriology 1; Business Administration 1A, 150; Chemistry 8; Economics 1B; Nutritional Sciences 11, 100, 101, 102, 113, 114, 116, 121, 122; Psychology 110; Zoology 1B; and electives chosen from the following list to equal 120 units: Chemistry 108A, 108B, Nutritional Sciences 115, 117, 199, Public Health 100, 147, 160A. (Prepares for the Dietetic Internship.)

Master of Science Degree

The Master of Science degree in public health is intended for persons without previous professional education or experience who have achieved a good academic record, or who attain a high score in an approved graduate study aptitude test, and who present other satisfactory evidence of suitability for advanced study in public health. In view of the waiver of prior professional education, the length of the program is two years, one of which must be a full academic year in residence. The remainder of the program will be planned on an individual basis, according to the student's need, and will include formal courses, research leading to a master's thesis, or supervised work and study in the field. A student who has completed part or all of an undergraduate major in public health may find it possible to satisfy the requirements for this degree in a shorter period of time.

Requirements. For general requirements, see pages 162 to 165 of this bulletin or the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION. The department normally follows Plan I for the Master of Science degree, but Plan II may be approved in exceptional cases.

A student is required to specialize in one of the following areas: biostatistics, environmental health, epidemiology, health administration, occupational health, public health education, public health nutrition, hospital administration, and medical care administration.

Master of Science in Nutritional Sciences

Admission. For admission to the Master of Science program in nutritional sciences, the student must have completed the bachelor's degree in nutrition, chemistry or a life science. The undergraduate program should normally have included general chemistry, organic chemistry, general biochemistry, methods in biochemistry, college algebra, analytical geometry and calculus, bacteriology, German or French, general zoology, biostatistics, and at least 12 units of nutritional sciences.

General Requirements for the Degree. At least 20 semester units are required and a thesis based upon the student's own laboratory research. 12 units, including 8 units of strictly graduate courses, must be chosen from courses in nutritional sciences. The remaining 8 units will be selected, following consultation with the adviser, from related courses in chemistry, physiological chemistry and related areas which are not prerequisite to the graduate major.

Related Courses in Other Departments. Chemistry 238; Biological chemistry 101A-101B, 210, 220A-220B, 232, 242; other related courses selected with the approval of the adviser.

Master of Science in (School) Health Education

The Master's degree in school health education is designed to provide preparation for qualified, high level, competent health educators for colleges and universities and elementary and secondary schools.

Admission. For admission to the Master of Science program in school health education, the student must have completed in the Bachelor's degree program at least 9 to 12 units in approved upper division school health education courses and 6 to 9 units in approved upper division courses from at least one of the following fields: other public health subjects, anthropology, sociology, psychology, physical education, zoology, education.

Requirements. For general requirements, see pages 162-165 of this bulletin or the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION. The student may follow either Plan I (at least 20 units and thesis) or Plan II (at least 24 units and satisfactory completion of a comprehensive examination). A minimum of 8 units of 200 series courses in school health education is required for either plan. The student's program is planned in consultation with his graduate adviser in accordance with his undergraduate preparation and his professional goals.

Master of Public Health Degree

Admission. Candidates to be admitted for the degree of Master of Public Health may be either

1. Holders of the degree of M.D. or D.D.S. from an acceptable medical or dental school (who have substantially the equivalent of a bachelor's degree in strictly nonprofessional courses)*;
2. Holders of a bachelor's degree from an approved college or university with adequate preparation in the sciences basic to public health. Candidates should also be qualified in some professional capacity for

* Holders of other acceptable doctoral degrees may qualify under special action.

postgraduate education in public health, and should in addition have either

- a. Professional academic qualifications in engineering, nursing, education, or other fields of public health; or
- b. Normally, not less than three years of experience in some field of public health practice or teaching of a type acceptable to the School.

General Requirements for the Degree

1. At least one year of graduate residence and a program including not less than 24 units of acceptable course work, of which at least 12 units must be in strictly graduate courses in the major subject. The student must maintain at least a grade B average in all work completed in graduate standing. By special permission, a candidate may be authorized to present an acceptable thesis in lieu of 4 of the 24 units required.
2. A comprehensive final examination either in the student's field of specialization or in the general field of public health, as determined by the faculty.
3. At least twelve weeks of approved field service in a public health agency. This may be waived for those presenting evidence of previous qualifying experience. In several areas of study, additional periods of supervised field work or clinical training are required.

A student is required to concentrate in one of the following areas: epidemiology, public health administration, medical care administration, mental hospital administration, general hospital administration, occupational health, maternal and child health, biostatistics, public health education, public health nutrition, environmental health.

Doctor of Public Health Degree

The Doctor of Public Health degree is offered to students who qualify in either of two ways. The length of the program will vary according to the student's qualifications. In these programs the emphasis will be on research, planning and development. A doctoral dissertation based on original work is one of the essential requirements for completion of either program.

Prior Master's Degree. Students who hold a master's degree in public health may be admitted as doctoral candidates if otherwise qualified. A full year in residence is required. The length of the course will vary according to the student's qualifications but, as a rule, will be two or more years. Preference will be given to full-time students.

Integrated Two-Year Course. A limited number of students who hold

doctor's degrees in medicine and other fields may be admitted directly to a two-year Doctor of Public Health program that integrates enrollment in formal courses, research, and the preparation of a doctoral dissertation.

The doctorate in public health is offered primarily as an advanced study and research degree, in the attainment of which students who are already well advanced in a related fundamental field will carry on intensive work in the advancement of this knowledge as related to public health. The areas of specialization follow the pattern of the master's program in public health.

Doctor of Philosophy Degree in Biostatistics

A program of study leading to the degree of Ph.D. in biostatistics is offered. Reference should be made to the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION, for general University requirements. The student's program of study must be approved by the department and by the Graduate Council, and it must embrace at the graduate course level three areas of knowledge: biostatistics, mathematical statistics, and a biomedical field such as biology, infectious diseases, medicine, microbiology, pharmacology, physiology, psychology, public health, or zoology. Recommendation for the degree is based on the attainments of the candidate rather than on the completion of specific courses.

Doctor of Education Degree (with a Field of Concentration in School Health Education)

School health education is one of the fields of concentration within the School of Education curriculum leading to the Doctor of Education degree.

For details of the Doctor of Education degree, the candidate is referred to the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION or the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION. The candidate for this degree must have his background and competency in education appraised by the doctoral adviser in the School of Education and his undergraduate and graduate preparation in school health education appraised by the school health education advisers in the School of Public Health.

Nondegree Students

Persons employed in responsible positions in public health, and other qualified persons, who wish to attend certain courses without applying for a degree, may be admitted as nondegree students—space, time, and circumstances permitting. Students without an advanced degree objective must meet the same admission requirements as those who are prospective candidates for degrees.

Students preparing for foreign assignments may also enroll in courses

offered by other departments, for example: government, philosophy, sociology, anthropology, and linguistics, as related to selected countries or regions of the world. Joint programs may be arranged with other departments to meet specific needs, for example: engineering, nuclear medicine and biophysics, radiology, nutrition, psychiatry, infectious diseases, public administration. See course offerings of other departments listed in this bulletin.

SCHOOL OF SOCIAL WELFARE

The School of Social Welfare offers a two-year graduate program in social welfare which is fully accredited by the Council on Social Work Education. The degree of Master of Social Welfare is awarded to students who successfully complete the prescribed two-year program (four semesters) of 46 units and who comply with additional specified requirements.

Full-time students are admitted to the School in the fall semester and are expected to continue in attendance throughout the academic year. A maximum of 24 units may be accepted as transfer credit toward the Master of Social Welfare degree. In the case of transfers, the School will prescribe the work required to qualify for the Master of Social Welfare degree. The School may also require students to audit courses which are believed to be essential even though the student may have been granted credit for a similar course taken in another school. A written evaluation of the transfer student's work will be requested from the school in which the student completed his first-year program.

Because of the highly integrated nature of the School's program and the consequent necessity of taking together at least certain groups of courses, part-time study is not encouraged.

The School of Social Welfare offers courses on the graduate level only. Completion of the University's program in presocial welfare or its equivalent is most desirable as preparation for graduate study in social welfare. Applicants who have not had this preparation will, however, be considered if they have completed a broad undergraduate program in the biological and social sciences and psychology.

Applications for admission should be filed by April 15 for the following fall semester. Applicants must file an "Application for Admission to Graduate Status" with the Graduate Division of the University, and, in addition, must file an application with the School of Social Welfare and submit other specified information. To qualify for admission to the first-year program an applicant must: (1) have a bachelor's degree from an accredited college or university, and through the Graduate Division establish his eligibility for admission to graduate status at the University of California. Los Angeles; (2) have an upper division grade-point

average of 3.00 or better, the applicants would be considered on an individual basis in terms of their ability to demonstrate capacity for academic achievement and professional development in line with the above requirement; (3) have completed at least 15 semester hours in the social sciences and/or psychology; (4) be not over 35 years of age, unless capacity for professional development in the field of social welfare has been demonstrated in social work or in a closely related field; (5) be physically able to meet the demands of the graduate curriculum, as evidenced by a physical examination conducted by the Student Health Service immediately prior to registration; (6) satisfy the School that he possesses the personal attributes essential for professional education and for successful social work practice.

To qualify for admission to the second-year program, an applicant must:

1. Have successfully completed in an accredited school of social work and within seven years immediately preceding his request for admission to the second-year program, a first-year graduate program meeting the current requirements of this school. First-year students at the School of Social Welfare who successfully complete their work and have a grade-point average of at least 3.0 (B average), automatically qualify for advancement to the second-year program.
2. Be physically able to meet the demands of the graduate curriculum, as evidenced by a physical examination conducted by the Student Health Service immediately prior to registration.
3. Satisfy the School that he possesses the personal attributes essential for further professional education and for successful social work practice.

Admission to courses is by specific approval of the School. Inasmuch as the social work profession is a discipline primarily based upon interpersonal relationships, the School reserves the right to exclude from courses students who have not demonstrated in class, practice, and professional relationships the personal attributes regarded as essential to the successful practice of social work even though the academic work done by such students may be satisfactorily performed. The School reserves the right to exclude from courses any student whose performance as reflected in grades falls below the requirement for the master's degree.

Total enrollment in the School of Social Welfare is limited by the educational resources of the School. As a result, it may not be possible to accept some applicants, even though they may meet all the formal qualifications for admission. Preference in the selection of students therefore will be given to those applicants who appear to be best qualified as indicated by their scholastic achievements, previous experience, personal fitness, and aptitude for the social work profession.

Agencies having stable and progressive programs capable of providing students with educational as well as practical experience are utilized for field instruction. While the overwhelming majority of placements are in the Los Angeles area, a few may be as far away as Camarillo State Hospital to the north and San Diego to the south. Students are assigned to placements on the basis of their particular educational needs and are expected to work within agency policy including the observation of employment practices and, where stipulated by the agency, the signing of oaths sometimes required of agency employees. In a few agencies stipends are paid to students for field work.

A number of federal, state, local, and national agencies make available scholarships and fellowships to graduate students in Social Welfare. Applications are for the most part made directly to the School. Additional information regarding these scholarships may be obtained from the Admissions Office of the School. In addition to these grants, a number of scholarships are offered through national organizations. General information concerning these scholarships may be obtained by writing to the School or to the Council on Social Work Education, 345 East 46th Street, New York 17, New York. Information regarding general University scholarships for which Social Welfare students may be eligible may be secured from the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION.

For information concerning courses and curricula, see the UCLA ANNOUNCEMENT OF THE SCHOOL OF SOCIAL WELFARE and page 549 of this bulletin.

THE GRADUATE DIVISION

UCLA offers advanced study leading to the degrees of Master of Arts, Master of Business Administration, Master of Education, Master of Engineering, Master of Fine Arts, Master of Library Science, Master of Public Administration, Master of Public Health, Master of Science, Master of Social Welfare, Doctor of Philosophy, Doctor of Education, Doctor of Public Health, and to certificates of completion for the general secondary and junior college teaching credentials and the advanced credentials for public school service. For more complete information concerning the work of the Division, and concerning the requirements for higher degrees, consult the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION and the offerings of the major department under the appropriate section of this bulletin.

Definition of Academic Residence

Every graduate student must register for, attend, and complete upper division courses (courses in the 100 series) or graduate courses (200

series) amounting to at least 4 units for each semester or 2 units for each summer session, in order to satisfy the minimum residence requirement in candidacy for any higher degree or certificate issued by the University. Each six- or eight-week Summer Session counts as one-half of one semester of residence.

Study-List Limits

In order to counteract the tendency to accumulate credits by sacrificing thoroughness and the high scholarly attainment which comes only through intense application, the University restricts the number of units in which a student may enroll.

A graduate student in a regular semester is limited to 16 units when he takes only upper division courses, to 12 units when he takes only graduate courses, and to a total made up in the proper proportion of 12 to 16—as for example, 6 graduate and 8 upper division—when he takes both upper division and graduate courses.

Only students enrolled in the Graduate Division may be appointed as Teaching Assistants, Teaching Fellows and Research Assistants. They are limited to normal study-list totals and may not be employed more than 50 per cent time without the consent of the Dean of the Graduate Division. Qualified individuals who are employed fulltime outside the University or in a University nonacademic position are limited to 6 units of graduate and/or undergraduate courses. Study lists exceeding these limits may be accepted only with the approval of the Dean of the Graduate Division.

Requirements for the Master's Degree

Preparation. The candidate's preliminary training for the master's degree should be substantially the equivalent of that represented by the corresponding bachelor's degree. In the University of California, the bachelor's degree indicates eight years of systematic high school and college work distributed according to the University's requirements for the particular college or course in which the degree is offered.

If the candidate's undergraduate course has been deficient in breadth of fundamental training and fails to provide a proper foundation for advanced work in the department or departments of his choice, it may be necessary for him to devote some time to specified undergraduate courses before proceeding to the degree program, and this may involve a longer period of residence than would otherwise be required.

The requirements for the master's degree described in the section which follows are those set by the Graduate Council and are common to all master's degree programs. Individual departments may impose additional requirements. More detailed information about the require-

ments for the master's degree in a given major will be found under the appropriate major in this bulletin.

The Master of Arts is offered on the Los Angeles campus in the following major fields:

African Area Studies	Geology	Music
Anthropology	Geophysics	Near Eastern
Anthropology-	German	Languages and
Sociology	Greek	Literatures
Art	History	Oriental Languages
Astronomy	Islamic Studies	Philosophy
Botany	Italian	Political Science
Classics	Journalism	Psychology
Dance	Latin	Russian Area Studies
Economics	Latin-American	Slavic Languages
Education	Studies	Sociology
English	Linguistics	Spanish
French	Mathematics	Speech
Geochemistry	Meteorology	Theater Arts
Geography	Microbiology	Zoology

The Master of Science is offered in the following fields:

Anatomy	Infectious Diseases	Physiology
Biological Chemistry	Journalism	Plant Science
Biophysics	Nursing	Preventive Medicine
Business	Nutritional Sciences	and Public Health
Administration	Pharmacology	Psychiatry
Chemistry	Physical Education	Public Health
Engineering	Physics	Radiology
Health Education	Physiological	
Home Economics*	Chemistry	

A professional master's degree is offered in the following major fields:

Business Administration (M.B.A.)	Library Science (M.L.S.)	Public Health (M.P.H.)
Education (M.Ed.)	Public Administration (M.P.A.)	Social Welfare (M.S.W.)
Engineering (M.Engr.)		
Fine Arts (M.F.A.)		

Application for Advancement to Candidacy. Applications for advancement to candidacy must be filed not later than the second week of the semester in which the requirements are to be completed. Students are warned that such advancement is not automatic, but requires a formal application distinct from registration. The form for advancement to candidacy is available at the Graduate Division office.

Amount and Distribution of Work. A student must pursue one of the following plans at the option of the department of his major field for

* Applies only to students who entered program before June 30, 1961.

fulfillment of the requirements for the master's degree. Under either plan all requirements for the degree must be satisfied within a calendar year from the time of completion of the course requirement.

Plan I: Thesis Plan. At least 20 units and a thesis are required. The units must be taken in graduate or upper division undergraduate courses, and at least 8 of the 20 must be in 200 series courses in the major subject. No unit credit is allowed for the thesis. After these general and the special departmental requirements are met, the student may take any course in the 100 or 200 series, although he is subject to his major department's guidance in the distribution of his work among the departments. In addition, the major department may require any examination which seems necessary to test the candidate's knowledge of his field.

Plan II: Comprehensive Examination Plan. A minimum of 24 units of upper division and graduate courses are required, of which at least 12 units must be in 200 series courses in the major subject. After these general and the special departmental requirements are met, the student may take any course in the 100 or 200 series, although he is subject to his major department's guidance in the distribution of his work among the departments. A comprehensive final examination in the major subject, its kind and conduct to be determined by the department concerned, is taken by each candidate. A department may require a special paper or other work in addition to the comprehensive examination.

Scholarship. Only courses in which the student is assigned grades of "A", "B", or "C" are counted in satisfaction of the requirements for the master's degree. A student must maintain a "B" average (3.00) for all required and elective courses taken subsequent to the bachelor's degree. For each unit of credit, grade points are assigned as follows:

A—4 grade points	C—2 grade points	E—None
B—3 grade points	D—1 grade point	F—None

Foreign Language. Each department shall determine at its option whether a reading knowledge of a foreign language shall be required of a candidate for the master's degree. The examination in all cases is to be administered by an examiner under the supervision of a committee of the Graduate Council.

Residence. The minimum period of academic residence required is two semesters, of which at least one semester must be spent at Los Angeles in graduate status. The requirement may be satisfied in part by residence on other campuses of the University of California.

For degree purposes, a student is not regarded as in residence unless he is registered in graduate status and is actually attending regularly

authorized University exercises amounting to at least 4 units of upper division or graduate work in a regular session, or 2 units in a summer session.

Ordinarily all the work for the master's degree is expected to be done in residence, but a graduate of this University or any other approved candidate may complete part of his work in absence, subject to the approval of the Graduate Council, the regulations on study in absence, and the minimum residence requirement of one year.

The Thesis. The thesis is the student's report, in as brief a form as possible, of the results of his original investigation. Although the problems for master's degree candidates are of limited scope, they must be attacked in the same systematic and scholarly way as problems of greater magnitude, as for example, one under investigation by a candidate for the doctor's degree. Before beginning his work on a thesis, the student must receive the approval of his major department and the instructor concerned, on the subject and general plan of investigation. Detailed instructions concerning the physical form in which theses must be submitted may be had upon application to the Graduate Division.

Requirements for the Degree of Doctor of Philosophy

The fields of study in which the degree of Doctor of Philosophy is offered on the Los Angeles campus of the University are listed as follows:

Anatomy	Geography	Literatures
Anthropology	Geology	Pharmacology
Anthropology-	Geophysics	Philosophy
Sociology	Germanic Languages	Physics
Art History	Hispanic Languages	Physiological
Astronomy	and Literature	Chemistry
Biological Chemistry	History	Physiology
Biophysics	Infectious Diseases	Plant Science*
Biostatistics	Islamic Studies	Political Science
Business	Linguistics	Psychology
Administration	Mathematics	Romance Languages
Chemistry	Medical Physics	and Literatures
Classics	(Radiology)	Slavic Languages
Economics	Meteorology	and Literatures
Engineering	Microbiology	Sociology
English	Music	Speech
French	Near Eastern	Zoology
Geochemistry	Languages and	

A professional doctor's degree is offered in the following major fields:

Education (Ed.D.)

Public Health (Dr.P.H.)

* See Departments of Botany, Floriculture and Ornamental Horticulture and Plant Biochemistry.

Students who desire to become candidates for the doctor's degree should bear in mind that the degree of Doctor of Philosophy is granted by the University of California not for the fulfillment of technical requirements alone, such as residence and the completion of fundamental courses within a chosen field, but more for the student's general grasp of the subject matter of a large field of study and his distinguished attainments within it, for his critical ability, his power to analyze problems and to coordinate and correlate the data from allied fields to serve the progress of ideas. In addition, he must demonstrate, through his dissertation, the ability to make an original contribution to the knowledge of his chosen field, and throughout his career as a graduate student must prove himself capable of working independently.

Preparation. A prospective candidate for this degree must hold a bachelor's degree from one of the colleges of this University, based on a curriculum that includes the requirements for full graduate status in the department of his major subject, or must have pursued successfully an equivalent course of study elsewhere.

Residence. The minimum residence requirement for the doctor's degree is two academic years (or four semesters), in graduate status, one of which, ordinarily the second, must be spent in continuous residence at the University of California, Los Angeles. (See also *Program of Study*, below.)

Foreign Language. Before taking the qualifying examinations for advancement to candidacy for the Ph.D. degree the student must pass examinations in two foreign languages acceptable to the department of the candidate's major and the Dean of the Graduate Division. The examinations must show that he is able to read and understand the written form in these languages. These examinations will be administered by an examiner under supervision of a committee of the Graduate Council. A student's native language will not count as satisfying one of the language requirements above.

A department may, with the approval of the Graduate Council, permit a Ph.D. candidate to substitute for one of the languages a program of studies in an auxiliary field external to the major field. This substitute program shall be in addition to the major program of study and will be allowed only upon representation by the department that such substitution will be more conducive to sound research results than would a reading knowledge of any second language.

Program of Study. The student's program of study must be approved by the Graduate Council, must embrace a field of investigation previously approved by his department or interdepartment group, and must extend over the full period of study. However, recommendation for the

degree is based on the attainments of the candidate rather than duration of his study, and ordinarily not less than three full years will be needed to finish the work.

Notice of Ph.D. Degree Candidacy. As early as possible, preferably at the end of the first semester of graduate study, the student should declare his intention of proceeding to candidacy for the Ph.D. degree. Statement of such intention should be made in duplicate on Form 1, which is available in the Graduate Division. The candidate must secure the signed approval of his departmental or interdepartmental group chairman. One copy of the form should be filed with the department or interdepartment group of the student's field of study and the other with the Graduate Division.

Guidance Committees. On receiving such notification an informal guidance committee will be appointed by the department or interdepartment group of the student's field of study to assist the student in making out his program and preparing him for the qualifying examinations. This committee must give its written approval to the department before the student is permitted to take these examinations and it ceases to exist as soon as he has passed the qualifying examinations.

Doctoral Committees. Upon nomination of the department or interdepartment group of the student's field of study a doctoral committee will be appointed by the Graduate Council. Nomination of the doctoral committee should be made on Form 2, which is available in the Graduate Division. This committee shall consist of not fewer than five members, three of whom shall be from the department of the candidate's major and two from a department or departments other than the major. The doctoral committee conducts the qualifying oral examination (in some cases also the written examinations), and conducts the final oral examination. For this final oral examination additional members may be appointed to the committee by the Dean of the Graduate Division in consultation with the department. With the unanimous consent of all members of the committee, three members of the committee may be designated to supervise and pass upon the student's dissertation,* but all members of the committee shall have the opportunity to read the dissertation and shall participate in the final oral examination.

Qualifying Examinations. Before he is admitted to candidacy, the student must pass a series of qualifying examinations, both written and oral. The written examinations may be administered by the department of the student's field of study, but the oral examination must be conducted by his doctoral committee. The qualifying oral examination is

* At the time of filing the dissertation with the Graduate Division, a certificate of unanimous consent, signed by the committee chairman, must accompany all approval pages carrying only three signatures.

never open to the public. The report on the qualifying examinations should be made on Form 3, which is available in the Graduate Division. The report form must be signed by the members of the doctoral committee.

Advancement to Candidacy. Upon receipt of the report on the qualifying examinations an application form for advancement to candidacy (Form 4) will be sent to the candidate. The candidate must file his application with the Dean of the Graduate Division after it has been properly approved by the chairman of his doctoral committee and the advancement to candidacy fee has been paid. The Dean of the Graduate Division will then determine whether all formal requirements have been met.

The semester in which the student is advanced to candidacy will be counted as a full semester for the purpose of the residence requirement, provided advancement to candidacy (including filing of the completed form and payment of the fee) occurs at or before midterm and the student is registered for 4 or more units.

The Dissertation. A dissertation on a subject chosen by the candidate and approved by his doctoral committee, bearing on his principal study and showing his ability to make independent investigation, is required of every candidate for the degree. In its preparation the candidate is guided by his doctoral committee, which also passes on the merits of the completed dissertation, and the approval of this committee, as well as that of the Graduate Council, is required before he is recommended for the degree. Special emphasis is laid on this requirement. The degree is never given merely for the faithful completion of a course of study, however extensive.

Specific instructions concerning the form of the dissertation may be obtained from the Dean of the Graduate Division.

Final Examination. The candidate's final examination is conducted by his doctoral committee. The examination is oral and deals primarily with the relations of the dissertation to the general field in which its subject lies. Admission to the final examination may be restricted to committee members, members of the Academic Senate, and guests of equivalent academic rank from other institutions. The report on the final examination should be made on Form 5, which is available in the Graduate Division. The report form must be signed by the members of the doctoral committee.

Requirements for the Degree of Doctor of Education

The requirements for the degree of Doctor of Education are similar in general outline to those of the degree of Doctor of Philosophy; for a

detailed statement consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION or page 139 of this bulletin.

Degree of Doctor of Public Health

For the requirements for the degree of Doctor of Public Health, see the UCLA ANNOUNCEMENT OF THE SCHOOL OF PUBLIC HEALTH or page 152 of this bulletin.

The Bachelor's Degree for Graduate Students

In general, the University of California discourages candidacy for a second bachelor's degree, even if the proposed major is in a new field; at the same time, it recognizes that there are cases in which such a degree may legitimately be sought. *Students wishing to become candidates for a second bachelor's degree will apply to the Admissions Office for admission as undergraduate students.* Admission is subject to the approval of the Director of Admissions and of the dean of the appropriate college who shall also set requirements and make recommendations for the degree. No persons will be recommended for the bachelor's degree who have not satisfied substantially, at the time of procedure to the degree, the conditions imposed upon other undergraduate students at the University of California, including the completion of at least 24 units of course work in continuous residence.

Multiplication of Higher Degrees

The duplication of higher degrees is discouraged on the same basis as the duplication of the bachelor's degree. The holder of a master's degree in a given field received at another institution may not become a candidate for a degree in the same field in the University. Petitions for a master's degree in a different field will be considered on their individual merits.

Courses of Instruction

Fall and Spring Semesters, 1963-1964

Classification and Numbering

Courses are classified and numbered as follows:

Undergraduate Courses. These are of two kinds, lower division and upper division.

A lower division course (numbered 1-99, or sometimes indicated by a letter if the subject is one usually given in high school) is open to freshmen and sophomores.

An upper division course (numbered 100-199) is advanced study in a field which has been pursued in the lower division, or elementary work in a subject of sufficient difficulty to require the maturity of upper division students. Courses in the 100 series may be offered in partial satisfaction of the requirements for the master's degree, if taken with the approval of the major department and when registered in graduate status.

Graduate courses (number 200-299) are open only to students accepted in graduate status. As a condition for enrollment in a graduate course the student must submit to the instructor in charge of the course evidence of satisfactory preparation for the work proposed; adequate preparation will consist normally of the completion of at least 12 units of upper division work basic to the subject of the graduate course.

Professional teacher-training courses (numbered 300-399) are highly specialized courses dealing with methods of teaching, and are acceptable toward academic degrees only within the limitations prescribed by the various colleges or schools. Courses in this series do not yield credit toward a higher degree.

Professional courses (numbered 400-499), other than teacher-training courses, are acceptable toward academic degrees only within the limitations prescribed by the various colleges, schools, or Graduate Division, Los Angeles.

University Extension courses bearing numbers prefixed by X, XB, XD, XL, XR, XSB, XSD yield credit toward an academic degree. They are rated, with respect to the general and specific requirements for the bachelor's degree, on the same basis as courses taken in residence at collegiate institutions of approved standing. Concurrent enrollment in resident courses and in University Extension courses (or courses at another institution) taken with a view to credit toward a degree is permitted only when the entire program has been approved in advance by the dean of the student's college.

Abbreviations

In the following list of courses, the credit value of each course in semester units is indicated by a number in parentheses after the title. A unit of registration is one hour of the student's time at the University, weekly, during one semester, in lecture or recitation, together with the time necessary in prep-

aration therefor; or a longer time in laboratory or other exercises not requiring preparation. The session in which the course is given is shown by Roman numerals: I for the fall semester, and II for the spring semester. A course given throughout the period September to June is designated Yr. The assignment of hours is made in the SCHEDULE OF CLASSES to be obtained at the time of registration.

Year Courses. A course designated by a double number (for example, Economics 1A-1B) is continued through two successive semesters, ordinarily beginning in the fall semester. Each half of the course constitutes a semester's work. The first half is prerequisite to the second unless there is an explicit statement to the contrary. The instructor makes a final report on the student's work at the end of each semester. Unless otherwise noted, the student may take the first half only and receive final credit for it.

■ AGRICULTURAL ENGINEERING

(Department Office, 3066 Engineering Building I)

Russell L. Perry, M.E., *Professor of Agricultural Engineering.*

The Major.—The major is offered by the Colleges of Engineering, Los Angeles and Berkeley, with the senior year given only on the Davis campus. See the ANNOUNCEMENT OF THE COLLEGES AND SCHOOL OF ENGINEERING and the PROSPECTUS OF THE COLLEGE OF AGRICULTURE.

Lower Division Course

*1. Introduction to Agricultural Machinery, Structures and Processing.

(2) II.

Mr. Perry

Lecture, two hours. Field trips may be scheduled.

Development of mechanization of farming. Principles of operation of farm machinery and power equipment. Functional and structural requirements of farm buildings. Unit operations of processing farm products.

■ AGRICULTURE

Maurice L. Peterson, Ph.D., *Professor of Agronomy, Berkeley (University Dean of Agriculture).*

Sidney H. Cameron, Ph.D., *Professor of Plant Physiology (Dean of the College of Agriculture, Los Angeles).*

Claude B. Hutchison, M.S., LL.D., D.Agr. (hon.c.), *Emeritus Professor of Agriculture, Berkeley, and Dean, Emeritus.*

Robert W. Hodgson, M.S., *Emeritus Professor of Subtropical Horticulture (Dean of the College of Agriculture, Emeritus).*

Letters and Science List.—Entomology 199; Floriculture and Ornamental Horticulture 146A-146B; Irrigation and Soil Science 101, 108, 110; Plant Biochemistry 111; and Plant Pathology 120. For regulations governing this list, see page 72.

Upper Division Courses.—All upper division courses announced by the College presuppose at least junior standing, though sophomore students may

* Not to be given, 1963-1964.

take certain upper division courses. Juniors and seniors in colleges other than Agriculture may elect such courses in the College of Agriculture as they are qualified to pursue.

Curriculum.—Two majors in the plant science curriculum are offered on the Los Angeles campus; namely floriculture and ornamental horticulture, and general horticulture. For requirements see sections under the College of Agriculture and the departments of Floriculture and Ornamental Horticulture, and Plant Biochemistry.

Preparation for Other Majors in the Plant Science Curriculum and for Other Curricula in the College of Agriculture.—See the PROSPECTUS OF THE COLLEGE OF AGRICULTURE and consult the appropriate advisers for students in agriculture.

Course Offerings.—On the Los Angeles campus courses are offered by the following departments of the College of Agriculture: Agricultural Engineering (see page 170). Entomology (see page 320). Floriculture and Ornamental Horticulture (see page 321). Irrigation and Soil Science (see page 378). Plant Biochemistry (see page 499). Plant Pathology (see page 499).

AIR SCIENCE

(Department Office, 251 Business Administration—Economics Building)

John W. Oberdorf, B.S., Colonel, U. S. Air Force, *Professor of Air Science (Chairman of the Department)*.

Jack L. Hixon, B.S., Major, U. S. Air Force, *Associate Professor of Air Science*.

James B. Lamb, B.S., Major, U. S. Air Force, *Associate Professor of Air Science*.

Mervin M. Taylor, B.S., Major, U. S. Air Force, *Associate Professor of Air Science*.

Thomas J. Phillips, B.S., Captain, U. S. Air Force, *Assistant Professor of Air Science*.

Clement P. Tamraz, B.S., Captain, U. S. Air Force, *Assistant Professor of Air Science*.

Letters and Science List.—All undergraduate courses in this department up to a total of 12 units are included in the Letters and Science Lists of Courses.

NOTE: This in no way prejudices counting additional Department of Air Science courses up to the 12 units of non-Letters and Science credit accepted toward the degree. For regulations governing this list, see page 72.

College of Engineering.—6 units of lower division credit and 9 units of upper division credit for Department of Air Science courses are accepted toward a degree in the College of Engineering.

Air Force Reserve Officers' Training Corps

The mission of the Air Force R.O.T.C. is to develop in selected college students, through a permanent program of instruction, those qualities of leadership and other attributes essential to their progressive advancement to positions of increasing responsibility as commissioned officers in the United States Air Force. The purpose and objectives of the program are:

1. To develop in cadets an understanding of the Air Force mission, organization, operations, problems and techniques.

2. To develop in cadets the ability to work with others on group activities and assume a leadership role when required.

3. To educate and prepare cadets to discharge the responsibilities required of them as Air Force officers.

Basic Course—Foundations of Aerospace Power.

Lower Division Courses

The lower division or basic courses in either Military or Air Science are prescribed for all first- and second-year undergraduate male students who are citizens of the United States, have not reached their twenty-fourth birthday, and are physically fit for military service. Students other than those required to take R.O.T.C. training may be informally enrolled in Air Force R.O.T.C. on application. The professor of Air Science may, at his discretion, allow credit for portions or all of the Air Science I and II courses for equivalent training obtained from active service in one of the Armed Forces. The Air Science basic course consists of one hour of Leadership and Command laboratory per week for the first two academic years and two hours of formal academic instruction per week during the second semester of the freshman year and the first semester of the sophomore year. The Air Force loans a formally enrolled basic student, without charge, all the required Air Science textbooks, instructional equipment, and regulation Air Force uniforms. Air Force equipment is to be returned in good condition on completion of the course and students are held liable for loss or damage. Informally enrolled Air Force R.O.T.C. students may be supplied Air Force texts and training equipment if available, but not a uniform.

1A. Introduction to A.F.R.O.T.C. (½) I.

The Staff

Leadership laboratory consisting of introduction to drill and six classroom hours designed to acquaint the student with the U.S.A.F. and the A.F.R.O.T.C. program.

1B. Foundations of Aerospace Power. (2½) II.

The Staff

Elements and potentials of aerospace power; air vehicles and principles of flight; military instrument of national security; professional opportunities in the U.S.A.F.; leadership laboratory.

21A. Fundamentals of Aerospace Weapon Systems. (2½) I.

The Staff

Prerequisites: courses 1A and 1B.

Introduction to aerospace missiles and aircraft; their propulsion systems; aerospace defense; modern targeting and electronic warfare; high explosive, nuclear, chemical, and biological warheads; and aerospace strategic and tactical organizations and operations with contemporary Air Force weapons systems. Includes problems, mechanics and military implications of present and future space operations, and contemporary aerospace military thought.

21B. Air Force Orientation and Motivation. (½) II.

The Staff

Prerequisites: courses 1A and 1B.

Leadership laboratory consisting of drill and command and six classroom hours designed to provide information and motivation toward an Air Force career.

In order to obtain credit for courses 1A and 21B, students must complete, in addition to Leadership and Command laboratory, a two- or three-semester hour college course approved by the Department of Air Science as contributing to the professional educational background of an Air Force officer. Related courses required of students enrolled in the Advanced Course will not be approved for credit in the basic course. University courses approved for credit in Air Science 1A and 21B are listed at the end of this section.

Upper Division Courses

Students who will successfully complete, or are credited with, the basic course may apply for enrollment in the advanced course of Air Science during their sophomore year. Selection of students for the advanced course is determined by academic standing on the campus, aptitude for officer training as determined by written examination, interest as demonstrated while enrolled in the basic course, physical examination, and Air Force quota allocations received by the University. Quotas are allotted to the University according to Air Force requirements at the time cadets will be placed on active duty. Those selected will then be required to contract with the Air Force for the officer training as pilots or navigators, for technical positions, or for general service. Each cadet will serve in the position for which he is trained on entering active duty.

The advanced Air Science program comprises four hours of formal academic instruction and one hour of leadership laboratory per week for two academic years. One hour of the four academic hours is taught by the department. Three hours are selected standard University courses. The advanced course students organize and operate an Air Force training activity. Advanced students are expected to devote a part of their study time, in addition to scheduled instruction, to planning, administering, and managing the cadet activities. The advanced course of Air Force R.O.T.C. includes a summer camp of four weeks' duration, normally following the Air Science III academic year.

A student, to qualify for formal enrollment in advanced course, must:

1. Not have reached his twenty-fifth birthday at the time of admission and be able to graduate with four semesters of academic work, and must graduate in two academic years.
2. Make application to appear before a board of officers appointed for selecting students for the advanced course. This board normally meets during March and November of each year.
3. Have completed satisfactorily a written aptitude-test battery.
4. Successfully pass a physical examination prescribed for Air Force officers.
5. Execute a written agreement with the Air Force to complete the Air Force R.O.T.C. advanced courses, to attend the prescribed summer training, and to accept a commission as an Air Force officer, if offered.

Advanced Air Force R.O.T.C. formally enrolled cadets may be enlisted members of the Air Force Reserve, and as such must retain their reserve status during the advanced course. They may not hold a commission in any of the Armed Forces in any capacity.

Appointments must be physically sound, well-informed, and of robust constitution. Applicants desiring to enter flying training as pilots must have 20-20 vision, uncorrected, in each eye. Normal color perception is required. Applicants for training as navigators must have uncorrected distance vision of better than 20-50 bilaterally, correctible to 20-20 bilaterally, and near vision of 20-20 bilaterally, uncorrected.

Advanced course appointments are available to outstanding students who are unable to qualify physically or do not desire flying training. These applicants must have at least distant-vision of 20-400 or better bilaterally, correctible to 20-40 in one eye and 20-30 in the other.

Formally enrolled advanced course Air Force R.O.T.C. students receive a government commutation of ration allowance amounting to \$81 per quarter during the two advanced academic years, in addition to a major portion of the required Air Science texts and training equipment. Students attending summer training are paid at the rate of \$78 a month, in addition to rations, quarters, and travel expenses.

Junior Year

131A. Air Force Officer Development. (1) I.

The Staff

Prerequisite: completion of basic course.

Staff organization and functions, and the skills required for effective staff work, including oral and written communications, observing, and individual and group problem solving. Concurrent enrollment in Speech 1 or successful completion of the course.

131B. Air Force Officer Development. (1) I.

The Staff

Prerequisite: completion of the basic course.

Basic psychological and sociological principles of leadership and their application to leadership practice and problems. Introduction to military justice. Concurrent enrollment in Psychology 181 or successful completion of the course.

Summer Training

Summer training is required of all Air Force Advanced Course Cadets before commissioning. Attendance at a summer training unit is normally accomplished during the summer months between the junior and senior years of college.

Summer Training. (3) 232 hours of four weeks' duration.

Prerequisite: courses 131A and 131B.

Summer Training Unit Staff

Processing in and out; physical training; individual weapons; familiarization flying; field exercises; United States Air Force Base experience.

This course is held at selected Air Force Bases.

Senior Year

141A. Weather and Navigation. (1) I.

The Staff

Prerequisite: courses 131A and 131B. Concurrent enrollment in Political Science 127 or credit for satisfactory completion of the course.

An introduction to flying-type Air Force duty. Leadership training.

141B. Briefing for Commissioned Service. (1) I.

The Staff

Prerequisite: courses 131A and 131B.

Briefing for commissioned service. Leadership laboratory. Concurrent enrollment in Geography 181 or credit for satisfactory completion of the course.

Related Courses in Other Departments

Speech 1. Introduction to Speech. (3)

Psychology 181. Applied Human Relations. (3)

Political Science 127. International Relations. (3)

Geography 181. Political Geography. (3)

These courses are required of all cadets before commissioning. It is recommended that they be taken during the junior and senior years in the order shown.

Courses Approved for Credit in Air Science 1A and 1B

Anthropology and Sociology—All lower division courses.

Astronomy—1 and 2.

Bacteriology—1.

Botany—All lower division courses.

Business Administration—1A and 1B.

Chemistry—All lower division courses.

Economics—All lower division courses.

Engineering—4A, 4B, 4C, 4D, 15A and 15B.

English—46A, 46B.

French—1, 2, 3, 4.

Geography—All lower division courses.

Geology—2, 3.

German—1, 2, 3, 3S, 4.

Scandinavian Languages—All lower division courses.

History—All lower division courses.

Italian—1, 2, 3, 4.

Journalism—2.

Mathematics—3A, 3B, 4A, 4B, 5A, 5B, 6A, 6B, 32A, 32B, 37A, 37B.

Meteorology—3, 4.

Near Eastern Languages—All lower division courses.

Oriental Languages—1A, 1B, 9A, 9B.

Philosophy—6A, 6B, 20A, 20B, 31.

Physics—All lower division courses except 41B.

Political Science—All lower division courses.

Psychology—All lower division courses.

Slavic Languages—1, 2, 3, 4.

Spanish and Portuguese—1, 2, 3, 4.

Zoology—1A, 1B, 15, 25.

ANATOMY

(Department Office, 13-276 Medical Center)

W. Ross Adey, M.D., *Professor of Anatomy and Physiology.*

Mary A. B. Brazier, Ph.D., *Professor of Anatomy, Biophysics and Physiology in Residence.*

John D. French, M.D., *Professor of Anatomy and Director of the Brain Research Institute.*

John D. Green, M.D., *Professor of Anatomy.*

H. W. Magoun, Ph.D., *Professor of Anatomy.*

Franklin D. Murphy, M.D., Sc.D., *Professor of Medical History.*

C. D. O'Malley, Ph.D., *Professor of Medical History.*

Richard E. Ottoman, M.D., *Professor of Radiology and Anatomy.*

Daniel C. Pease, Ph.D., *Professor of Anatomy.*

- Charles H. Sawyer, Ph.D., *Professor of Anatomy.*
 Jose P. Segundo, M.D., *Professor of Anatomy in Residence.*
 Reidar F. Sognnaes, Ph.D., D.M.D., *Professor of Anatomy and Oral Biology.*
 Robert D. Tschirgi, M.D., Ph.D., *Professor of Anatomy and Physiology.*
 Nathaniel A. Buchwald, Ph.D., *Associate Professor of Anatomy in Residence.*
 Carmine D. Clemente, Ph.D., *Associate Professor of Anatomy (Acting Chairman of the Department).*
 Earl Eldred, M.D., *Associate Professor of Anatomy.*
 Richard C. Greulich, Ph.D., *Associate Professor of Anatomy and Oral Biology.*
 Lawrence Kruger, Ph.D., *Associate Professor of Anatomy.*
 Arnold B. Scheibel, M.D., *Associate Professor of Anatomy and Psychiatry.*
 Roger A. Gorski, Ph.D., *Assistant Professor of Anatomy.*
 David S. Maxwell, Ph.D., *Assistant Professor of Anatomy.*
 Richard W. Young, Ph.D., *Assistant Professor of Anatomy.*
 ———, *Assistant Professor of Anatomy.*

- Elmer Belt, M.D., *Lecturer in Medical History and Clinical Professor of Surgery.*
 Charles F. Bridgman, Ph.D., *Associate in Anatomy and Art.*
 Edward H. Daseler, M.D., *Assistant Clinical Professor of Anatomy.*
 Louise M. Darling, M.A., *Lecturer in Medical History and Biomedical Librarian.*
 Donald J. Davenport, M.D., *Assistant Clinical Professor of Anatomy.*
 John Field, II, Ph.D., *Lecturer in Medical History and Professor of Physiology.*
 William S. Glassman, M.D., *Assistant Clinical Professor of Anatomy.*
 Raymond T. Kado, B.S., *Associate in Anatomy.*
 Robert J. Moes, M.D., *Lecturer in Medical History.*
 Anselmo R. Pineda, M.D., *Assistant Clinical Professor of Anatomy.*
 Robert W. Porter, M.D., *Associate Clinical Professor of Anatomy and Surgery.*

Admission to Graduate Status

Students intending to take advanced degrees in the Department of Anatomy must have a bachelor's degree in physical or biological science, or in the premedical curriculum. Other degrees may be acceptable for those students specializing in medical illustration. Introductory courses in zoology and vertebrate embryology are required, as well as one year of general and organic chemistry and one year of college physics. Deficiencies in these courses must be made up before the student is admitted to full graduate status.

Strongly recommended are courses in comparative anatomy, microscopic technique, elementary statistics, philosophy of science, and scientific German and French.

Requirements for the Master of Science Degree

The graduate student undertaking to enter the profession of anatomy should apply himself directly to attaining the Ph.D. degree. The Department of Anatomy offers the Master of Science degree only for the restricted purposes of individuals whose major interests lie in allied fields such as medical illustration, paramedical subjects, and the postgraduate programs of doctors of medicine.

- A. Candidates for the master's degree may elect to follow either the thesis or examination plan. Under either plan a candidate may count no more than 6 units of Anatomy 290 (research) toward the required credit-unit total.
- B. Courses required.
1. Two of these courses:
 Anatomy 101, Microscopic Anatomy (5 units)
 Anatomy-Physiology 103, Basic Neurology (6)
 Anatomy 207, Gross Anatomy (8)
 2. One departmental seminar course.
- C. A candidate taking the master's degree on the examination plan must pass a written examination upon: (1) general aspects of anatomy; (2) a restricted field of anatomy or kindred subject matter. These examinations cannot be substituted for the departmental examination required of the Ph.D. candidate.
- D. No foreign language is required.

Requirements for the Doctor of Philosophy Degree

- A. These courses are required of all doctoral candidates in anatomy:
- Anatomy 101, Microscopic Anatomy (5 units)
 - Anatomy-Physiology 103, Basic Neurology (6)
 - Anatomy 207, Gross Anatomy (8)
 - Anatomy 290, Research
 - Physiology 101, Mammalian Physiology (8)
 - Participation in at least two different graduate seminar courses of the Department of Anatomy.
 - Courses selected by the student and his adviser as necessary to his program.
- B. Further requirements:
1. A reading knowledge of (a) German and (b) French or Russian, unless it can be demonstrated that another language would be more valuable for the program.
 2. Successful completion of oral qualifying examinations.
 3. Presentation and defense of a thesis.
 4. All doctoral candidates are expected to gain teaching experience by assisting in one of the major anatomy courses for a minimum of one semester.
 5. The graduate student may upon option of the department be required to take English 106S (3 units), Advanced Composition for Majors in the Physical and Life Sciences.

Upper Division Courses

101. Microscopic Anatomy. (5) L.

Mr. Pease, Mr. Green, Mr. Greulich, Mr. Kruger, Mr. Young

Prerequisite: admission to School of Medicine or consent of the instructor.
 Microscopic study of the tissues and organs of the human body.

103. Basic Neurology. (3) II.

Mr. Magoun, Mr. Adey, Mr. Buchwald, Mr. Tschirgi,
Mr. Scheibel, Mr. Segundo

Prerequisite: admission to School of Medicine or consent of the instructor. Must be taken concurrently with Physiology 103.

Lectures, conferences, demonstrations, and laboratory procedures necessary to an understanding of the function of the human nervous system.

Graduate Courses**207. Gross Anatomy. (8) I.**

Mr. Sawyer, Mr. Clemente, Mr. Eldred, Mr. Gorski, Mr. Maxwell

Prerequisite: consent of the instructor.

Lectures and dissection of the human body.

208. Electronics for Research in Experimental Anatomy and Basic

Neurology. (2) II.

Mr. Kado

Prerequisite: Biophysics 401 or consent of instructor.

Lectures and discussions on the applications of electronic instrumentation to the problems of data acquisition, recording and analysis. Emphasis will be placed on practical solutions to problems.

240. History of Medicine. (1) II.

Mr. O'Malley in charge

Survey of the development of scientific and medical thought from ancient times to the present.

241. History of the Clinical Sciences. (1) II.

Mr. O'Malley in charge

Survey of the development of the clinical specialties and comparison of medical practice in western civilization with that developed in other parts of the world.

250. History of the Biological Sciences. (1) I, II.

Mr. O'Malley in charge

Discussions of current outlook, methods, and ideas in the biological sciences in the light of the general history of these sciences.

251. Seminar in Microscopic Anatomy. (1-2) I, II.

Mr. Pease, Mr. Green

Prerequisite: consent of the instructor.

252. Seminar in Medical History. (2) I, II.

Mr. O'Malley

Prerequisite: ability to read at least one foreign language.

Bibliography and readings, class discussion and papers on selected topics in the history of medicine. Semester I, beginnings to 1600; Semester II, 1600 to present.

253. Seminar in Experimental Neurology. (1-2) I, II.

Mr. Magoun in charge

Prerequisite: consent of the instructor.

254. Research Seminar in Mental Health. (1) I, II.

The Staff

Prerequisite: Anatomy-Physiology 103 or the equivalent.

Interdisciplinary seminars by senior research workers and staff dealing with problems related to mental health.

255. Seminar in Endocrinology. (1-2) I, II.

Mr. Sawyer

Prerequisite: consent of the instructor.

256. Survey of the Basic Neurological Sciences. (2) I, II.

The Staff

Prerequisite: Anatomy-Physiology 103 or the equivalent.

Lectures and laboratory exercises dealing with the most recent advances in the study of the central and peripheral nervous system.

257. Journal Reviews in Experimental Anatomy. (1) I, II.

Mr. Clemente, Mr. Kruger

Research frontiers in various fields of experimental anatomy are reviewed and mutually discussed by graduate students and professors.

290. Research. (1-6) I, II.

The Staff

ANTHROPOLOGY AND SOCIOLOGY

(Department Office, 360 Haines Hall)

- Ralph L. Beals, Ph.D., *Professor of Anthropology and Sociology.*
 Joseph B. Birdsell, Ph.D., *Professor of Anthropology.*
 Walter R. Goldschmidt, Ph.D., *Professor of Anthropology and Sociology.*
 †Harry Hoiyer, Ph.D., *Professor of Anthropology.*
 Leo J. Kuper, Ph.D., *Professor of Sociology.*
 William A. Lessa, Ph.D., *Professor of Anthropology.*
 Svend Riemer, Ph.D., *Professor of Sociology.*
 Melvin Seeman, Ph.D., *Professor of Sociology.*
 Michael G. Smith, Ph.D., *Professor of Anthropology.*
 Ralph H. Turner, Ph.D., *Professor of Sociology and Anthropology.*
 Constantine Panunzio, Ph.D., *Emeritus Professor of Sociology.*
 Eshref Shevky, Ph.D., *Emeritus Professor of Sociology and Anthropology.*
 Alexander M. Badawy, Ph.D., *Associate Professor of Anthropology.*
 William O. Bright, Ph.D., *Associate Professor of Anthropology.*
 †Pedro Carrasco, Ph.D., *Associate Professor of Anthropology.*
 Melville Dalton, Ph.D., *Associate Professor of Sociology.*
 Harold Garfinkel, Ph.D., *Associate Professor of Sociology.*
 C. Wayne Gordon, Ph.D., *Associate Professor of Sociology and Education.*
 Clement W. Meighan, Ph.D., *Associate Professor of Anthropology (Chairman of the Department).*
 †Richard T. Morris, Ph.D., *Associate Professor of Sociology.*
 Johannes Wilbert, Ph.D., *Associate Professor of Anthropology.*
 Charles R. Wright, Ph.D., *Associate Professor of Sociology.*
 Lindsey C. Churchill, Ph.D., *Assistant Professor of Sociology.*
 Oscar Grusky, Ph.D., *Assistant Professor of Sociology.*
 Joel M. Halpern, Ph.D., *Assistant Professor of Anthropology.*
 John T. Hitchcock, Ph.D., *Assistant Professor of Anthropology.*
 John E. Horton, Ph.D., *Assistant Professor of Sociology.*
 †Raymond J. Murphy, Ph.D., *Assistant Professor of Sociology.*
 Phillip L. Newman, Ph.D., *Assistant Professor of Anthropology.*
 Henry B. Nicholson, Ph.D., *Assistant Professor of Anthropology.*
 Anthony Oberschall, Ph.D., *Assistant Professor of Sociology.*
 Wendell H. Oswalt, Ph.D., *Assistant Professor of Anthropology.*
 Jack H. Prost, Ph.D., *Assistant Professor of Anthropology.*
 Samuel J. Surace, Ph.D., *Assistant Professor of Sociology.*
 †John Takeshita, Ph.D., *Assistant Professor of Sociology.*
 ———, *Assistant Professor of Anthropology.*
 ———, *Assistant Professor of Anthropology.*
 ———, *Assistant Professor of Sociology.*
 ———, *Instructor in Anthropology.*
 ———, *Instructor in Anthropology.*

Ruth Reimer Ellersieck, Ph.D., *Research Associate in Sociology.*

† Absent on leave, 1963–1964.

‡ In residence fall semester only, 1963–1964.

Jack D. Douglas, M.A., *Lecturer in Sociology.*

Keith L. Johnson, M.A., *Graduate Research Archaeologist.*

Howard W. Law, Ph.D., *Visiting Assistant Professor of Anthropology and Linguistics.*

Stanley V. Long, M.A., *Graduate Research Archaeologist.*

T. Scott Miyakawa, Ph.D., *Visiting Associate Professor of Sociology.*

———, *Lecturer in Sociology.*

Leo Reeder, Ph.D., *Lecturer in Sociology and Associate Professor of Public Health.*

Roy T. Simmons, M.A., *Research Associate in Anthropology.*

James R. Sackett, M.A., *Acting Instructor in Anthropology.*

———, *Lecturer in Sociology.*

Lewis Yablonsky, Ph.D., *Acting Associate Professor of Sociology and Social Welfare.*

Letters and Science List.—All undergraduate courses in anthropology and sociology are included in the Letters and Science List of Courses. For regulations concerning this list, see page 72.

Field of Concentration in Anthropology

Preparation.—Required: Anthropology 1, 2, Sociology 1 or 101, 12, 18 or an equivalent approved by the Department; any 6 units chosen from Psychology 1A–1B, Geography 1–2 or 101, History 1A–1B, 8A–8B, Life Science 1A–1B, Zoology 1A–1B, 15, Geology 2, 3, Oriental Languages 32, 42, Spanish 42, 44; and fulfillment of the general requirements of the University and the College of Letters and Science.

The Field of Concentration.—Thirty upper division units distributed as follows:

1. Anthropology 102, 103, 125, and 9 additional units in anthropology. Linguistics 170 may be used to satisfy 3 units of this requirement.

2. Six units of upper division sociology. Any course except 101, 142, 185.

3. Six additional units chosen from one of the following fields: Sociology; Linguistics 170, 173; Psychology 120, 137, 139, 143, 145, 147; Folklore 101, 105, 190; any course in regional or cultural geography; Geology 107, 117; any upper division history course in regional history; any upper division course in Near Eastern languages or Oriental languages; any political science course in Group IV (comparative government); Paleontology 101, 111, 137; Zoology 100A–100B, 106.

Upper division courses in sociology will apply toward the requirement that at least 12 upper division units shall be outside a single department.

The student must also meet the requirements of the University and the College of Letters and Science for graduation.

Field of Concentration in Sociology

Preparation.—Required: Sociology 1 or 101, 12 and 18, Anthropology 1 and 2, Psychology 1A or 101, and fulfillment of the general requirements of the University and the College of Letters and Science. The student should consult a detailed statement of requirements and recommendations available

at the departmental office. Each student must apply to the department for assignment to an adviser.

The Field of Concentration.—Thirty upper division units distributed as follows:

1. Eighteen upper division units in sociology, not including courses 101 and 142. Students planning graduate study or a professional career in sociology should include course 117.

2. Six units chosen from anthropology.

3. Six additional upper division units selected with advance written approval of the adviser from one of the following groups: anthropology; economics; folklore (may be combined with 3 units of history or 3 additional units of anthropology); geography; history; philosophy; political science; psychology.

Upper division courses in anthropology will apply toward the requirement that at least 12 upper division units shall be outside a single department.

Candidates for the General Secondary Credential.—The undergraduate requirements for a teaching major in social science may be fulfilled by completing the preparation as outlined in the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION, and items 1 and 2 for the field of concentration in anthropology or items 1 and 2 for the field of concentration in sociology. Six upper division units in history selected with the approval of the adviser may be substituted for one of the lower division year courses in history and may also apply on the field of concentration.

Social Welfare.—Students whose primary interest is in social welfare may either fulfill the requirements of the field of concentration in sociology or of the curriculum in presocial welfare (see page 89). Students planning on graduate training in social welfare at this University should consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF SOCIAL WELFARE.

Admission to Graduate Status

In addition to meeting the requirements of the Graduate Division, the student must have a bachelor's degree in anthropology or sociology or its equivalent. Students lacking this requirement will be required to make up subject deficiencies before proceeding with the advanced degree program. Upon admission to graduate status, students should consult the department regarding the orientation examinations in anthropology or sociology, which are given to provide a basis for preparing a plan of study. The examination in sociology is given in enrollment week or the first week of classes, while the anthropology orientation examination is given slightly later in the semester. These examinations are required of all graduate students, and they are used for advisory purposes only. Students will not be refused registration on the basis of the examinations.

Requirements for the Master's Degree

The Department will ordinarily follow Plan II but may accept Plan I in special cases. A syllabus giving the details of the general requirements and of the required examinations may be obtained from the departmental office.

Students are permitted to specialize in anthropology, or sociology, or a combination of both fields.

For the M.A. degree in anthropology, the student is required (1) to complete a reading examination in one foreign language, normally French or German, (2) to complete 24 units of course requirements in anthropology and sociology as a graduate student, at least 12 of which must be graduate courses, and (3) to pass a comprehensive examination.

For the M.A. degree in sociology, the student is required (1) to complete a reading examination in one foreign language, normally French or German, (2) to complete 24 units of course requirements in sociology and anthropology as a graduate student, at least 12 of which must be graduate courses (course 118 must be completed either in graduate or undergraduate status), (3) to pass a comprehensive examination, and (4) to complete a master's report.

For the joint degree in anthropology and sociology, the student is required (1) to complete a reading examination in one foreign language, normally French or German, (2) to complete 30 units in graduate status divided as follows: at least 6 graduate units in anthropology and 6 in sociology, 6 upper division or additional graduate units in the discipline in which the candidate received the A.B. degree, and 12 upper division units or additional graduate units in the other discipline, (3) to pass a comprehensive examination covering the basic aspects of the two disciplines. The foreign language requirement may be waived for students taking sociology 117 and 118 or 118 and 119. However, students planning to proceed to the Ph.D. degree should not elect this alternative, and those who subsequently decide to seek the Ph.D. will be required to pass one foreign language examination before pursuing further graduate study. This degree is especially intended to qualify students who plan to become junior college teachers. Students are encouraged to plan their programs so as to fulfill the requirements for the junior college or secondary teaching credentials. Details on credential matters may be obtained from the Credentials Counselor in the School of Education.

Requirements for the Ph.D. Degree

Candidates for the doctor's degree ordinarily must possess the master's degree and must conform to the general requirements set by the Graduate Division for the Ph.D. degree. (The M.A. degree is sometimes waived in exceptional cases, especially in anthropology. Consult the syllabus available in the departmental office.)

Students may take the doctor's degree in anthropology, sociology, or in a combination of both fields. It should be emphasized that the granting of the doctor's degree does not depend alone upon the satisfactory completion of a specified number of courses. The candidate must demonstrate his competence as a research scholar and his ability to give instruction in his field.

Every candidate for the doctor's degree must take a written and oral qualifying examination. A syllabus defining the fields covered by these examinations may be secured from the office of the department.

Candidates for the doctor's degree are expected to spend a period in field work in the course of which they may collect data for the doctoral dissertation. Only in exceptional cases will students be exempted from this requirement.

The dissertation and the final oral examination will be in accordance with

the requirements of the Graduate Division. Before the dissertation is begun, the subject must be approved in writing by the student's graduate advisers.

ANTHROPOLOGY

Lower Division Courses

1. General Anthropology. (3) I, II.

Mr. Prost, Mr. Birdsell

Human biology and physical anthropology; the relation of man and the animals; the origin and antiquity of man; fossil man; anthropometry; the criteria of race and racial classification; current racial theories; race problems.

2. General Anthropology. (3) I, II.

Mr. Hitchcock, Mr. Halpern

Lecture, three hours; quiz, one hour. May be taken without Anthropology 1.
The nature of culture; culture growth and history; a survey of the range of cultural phenomena, including material culture, social organization, religion, language, and other topics.

3. Introduction to Archaeology: Prehistory and Culture Growth. (3) I.

Mr. Meighan

Development of archaeology as an anthropological study; objectives and methods of modern archaeology; important archaeological discoveries throughout the world; contributions of archaeology toward understanding development of human culture.

Upper Division Courses

Courses 1, 2, or upper division standing are prerequisite to all upper division courses, except as otherwise stated.

102. Ethnology. (3) I, II.

Mr. Wilbert, Mr. Newman

Major theories of culture; survey of principal culture types and their distribution; discussion of ethnological problems.

103. Culture History. (3) I.

Mr. Nicholson, Mr. Sackett

The birth of civilization as revealed by archaeology, with concentration on developments in the Near East and Asia since the Neolithic period; theories of cultural development based on these discoveries.

104. Old World Archaeology. (3) I.

Mr. Sackett

Early archaeological cultures of the Old World: Asia, Africa, and Europe. Primarily concentrated on the period from the Upper Paleolithic to the Neolithic.

105. American Indians North of Mexico. (3) I, II.

Mr. Oswalt

An introductory survey of the Indians of North America, north of Mexico; origins, languages, civilizations, and history.

106. Archaeology of North America. (3) I, II.

Mr. Nicholson

Prehistory of North American Indians; prehistoric culture areas; relations with historic Indians.

107. Indians of South America. (3) I, II.

Mr. Wilbert

An introductory survey of the Indians of South America; origins, languages, civilizations and history.

109. Introduction to Nahuatl Language and Literature. (3) I.

Mr. Law

Prerequisite: reading knowledge of Spanish.

The Nahuatl (Aztec) language and historical sources published in Nahuatl.

110. Language and Culture. (3) II.

Mr. Bright

The study of language as an aspect of culture; the relation of habitual thought and behavior to language; the problem of meaning.

- 111A. Introduction to Egyptian Archaeology.** (3) I, II. Mr. Badawy
A comprehensive study of archaeology in Ancient Egypt from the earliest times to the Roman period, covering architecture, sculpture, graphic and minor arts. Relations with contemporaneous arts of the Aegean and Greece.
- 111B. Egyptian Archaeology.** (3) I, II. Mr. Badawy
Continuation of 111A.
- 111C. Islamic Art and Archaeology.** (3) I, II. Mr. Badawy
Architecture, painting, and minor arts of those regions dominated historically by the Moslem religion, with emphasis on the Arabic cultures of Iran and the Near East, North Africa and Spain.
- 111D. Coptic and Byzantine Archaeology.** (3) I, II. Mr. Badawy
Architecture, painting, sculpture, and minor arts of the Early Christian period in the Near East to the eighth century, A.D.
- 122. Traditional Political Systems.** (3) I. Mr. Smith
Prerequisite: upper division standing and course 125 or Sociology 101, or consent of the instructor.
Political Organization in pre-industrial societies: its bases, aspects, functions and forms. Law and the maintenance of order—Ideology and Corporations. Relation of political to other Institutions. Conditions of change.
- *123. Nomadic Societies.** (3) II. _____
Prerequisite: upper division standing and consent of the instructor.
Pastoralism and tribal organization, with special reference to Central Asia and the Middle East. Relations of pastoral nomadic and peasant agricultural peoples. Conquest, sedentarization, and the transformation of organization.
- 124. Comparative Religion.** (3) I, II. Mr. Lessa, Mr. Newman
The origins, elements, forms, and symbolism of religion; the role of religion in society.
- 125. Comparative Society.** (3) I, II. Mr. Goldschmidt, Mr. Halpern
Prerequisite: upper division standing and Anthropology 2, or Sociology 1 or 101, or consent of the instructor.
The analytical study of organized social life in societies of varying degrees of complexity; group formation and function; the relation of value systems to organized interpersonal behavior; systems of status; economic institutions and the role of property; the problem of control and authority in society.
- 126. Invention and Technology.** (3) I. Mr. Sackett
Prerequisite: upper division standing.
A survey of the technologies of primitive peoples. Technological progress; the characteristics of invention; factors in the adoption of inventions.
- *127. Primitive Art.** (3) II. _____
Development and change of conventions in the visual art forms of various nonliterate peoples; effects of craftsmanship, materials, and local culture on primitive art.
- 128. Kinship and Social Organization.** (3) I, II. _____
Kinship systems in primitive society and their significance in the organization of social life. Theories of kinship, marriage regulations, and kinship role patterns.
- 129. Primitive Economies.** (3) II. Mr. Carrasco
Economic life of primitive peoples and precapitalistic civilizations, with emphasis on the integration of the economy with technology and with social and political institutions.
- 137. Indians of California.** (3) I, II. Mr. Meighan
Native peoples of California; their origins, languages, and culture.
- 139. Peoples of Africa.** (3) I. _____
The native cultures of Africa south of the Sahara; cultural history and diversity. Problems in cultural adjustment in modern Africa.

- 140. Ancient Civilizations of Middle America. (3) I.** Mr. Nicholson
Pre-Spanish culture history of Middle America as revealed by archaeology and early Spanish writings: Aztecs, Toltecs, Maya and their predecessors, with emphasis on social and political systems, economic patterns, art, architecture, and intellectual achievements.
- 141. Indians of Modern Mexico. (3) I.** Mr. Beals
The contemporary Indian groups in Mexico; the present cultures and their derivations; the problem of the mixed culture; Indian influences on modern Mexican culture.
- 142. Ancient Civilizations of Andean South America. (3) II.** Mr. Nicholson
Pre-Spanish culture history of Andean South America as revealed by archaeology and early Spanish writings, with special emphasis on the Inca and their predecessors in Peru: social and political systems, economic patterns, religion, art, architecture, and intellectual achievements.
- 144. Arctic Cultures. (3) I.** Mr. Oswalt
A survey of arctic peoples, their prehistory, aboriginal life, and current cultural status.
- 145. Peoples of Eastern Europe and the Soviet Union. (3) II.** Mr. Halpern
Social organization, religion, class structure and other topics dealing with the various ethnic groups in Eastern Europe and the U.S.S.R. both past and present. Agricultural, nomadic and urban societies in this area, including central Asia, will be studied.
- *146. Peasant and Tribal Cultures of India. (3) I.** Mr. Hitchcock
Indian civilization as revealed in the archaeological record and in peasant and tribal communities. Main issues in contemporary research.
- 147. Peoples of the Pacific. (3) I, II.** Mr. Newman
The aboriginal civilizations of Australia, Malaysia, Melanesia, Micronesia, and Polynesia in prehistoric and modern times; changes arising from European contact and colonization.
- *148. Cultures of Southeast Asia. (3) I.** Mr. Halpern
A survey of civilizations and tribal peoples of the area between India and China. Emphasis on cultural interrelationships in the framework of both historical and contemporary problems.
- 150. Physical Anthropology. (3) II.** Mr. Prost
Lecture, three hours; laboratory, two hours. Prerequisite: consent of the instructor.
A general survey of human osteology in terms of racial variations. The methodology of measurements and observations will require laboratory work.
- 151. The Genetics of Race. (4) I.** Mr. Birdsell
Prerequisite: Anthropology 1.
A general survey of the techniques and problems of racial classification. Emphasis is on the genetic approach; and the methods of modern classical genetics and population genetics are applied to human evolution.
- 155. Fossil Man and His Culture. (3) I.** Mr. Prost
The comparative anatomy of fossil man as examined against a framework of the available cultural remains and the ethnological aspects of the environment. The Paleolithic cultures of the Old World are reviewed as a part of the content.
- 156. Social Anthropology. (3) I.** Mr. Smith
Prerequisite: course 2 or Sociology 1 or 101; upper division standing in anthropology or sociology.
- 162. History of Anthropology. (3) I, II.** Mr. Hitchcock
Prerequisite: Anthropology 1 and 2, and senior standing. Prerequisite to graduate work in the theory and method of anthropology.
A systematic survey of the development of anthropology as a scientific field, especially designed for majors in anthropology and sociology.

* Not to be given, 1968-1964.

- 165. Acculturation and Applied Anthropology. (3) II.** Mr. Halpern
Prerequisite: upper division standing and Anthropology 2 or Sociology 1 or 101. Recommended: Anthropology 125.

The impact of Western civilization upon native societies; characteristic social and cultural adjustments to the impact; community disintegration and reintegration; anthropological problems in colonial and native administration.

- 195. Methods and Techniques of Field Archaeology. (2) II.** Mr. Meighan
Lecture, one hour; laboratory, three hours. During part of the semester Saturday field work is substituted. Prerequisite: consent of the instructor.

The organization of archaeological surveys and excavations, aims and working methods. Archaeological mapping, photography, and recording. May be repeated for credit (not to exceed 4 units total credit for course).

- 196. Methods and Techniques of Archaeology. (2) I.** Mr. Meighan
Lecture, one hour; laboratory, three hours. Prerequisite: consent of the instructor.

The interpretation and presentation of archaeological finds. Chronological sequencing; stylistic and statistical analysis; documentation, publication. Techniques of preservation, restoration and illustration of artifacts.

- 199. Special Studies in Anthropology. (1-4) I, II.** Mr. Nicholson in charge
Prerequisite: senior standing and consent of the instructor.

Graduate Courses

- 247A-247B. Pacific Island Cultures. (2-2) Yr.** Mr. Lessa
250. Theory and Method of Anthropology. (2) I. Mr. Oswald, Mr. Wilbert
***251A-251B. Myth and Ritual. (2-2) Yr.** Mr. Lessa
256A-256B. Social Anthropology. (2-2) Yr. Mr. Smith
257A-257B. Problems in Cultural Anthropology. (2-2) Yr. Mr. Surace
265A-265B. Cultures of Latin America. (2-2) Yr. Mr. Beals
266A-266B. African Cultures. (2-2) Yr. Mr. Goldschmidt
267A-267B. Seminar in Directed Culture Change. (2-2) Yr. Mr. Halpern
Case study analysis of programs of directed culture change and the role of the applied anthropologist.
270. Analytical Methods in Archaeological Studies. (2) II.

Mr. Meighan, Mr. Nicholson
Analytical techniques in field and laboratory, including such topics as seriation, typology, ecological and demographic analyses as these pertain to archaeological research.

- 271. Historical Reconstruction and Archaeology. (2) II.** Mr. Nicholson
Interpretation of historical developments through archaeological research. Application of ethnohistory to archaeological problems.

- 272. Prehistoric Non-Agricultural Societies. (2) I.** _____
Regional studies in the development of early human cultures.

- 273A-273B. Human Microevolution. (2-2) Yr.** Mr. Birdsell

- 274. Prehistoric Civilizations of the New World. (2)** Mr. Meighan, Mr. Nicholson

Development of aboriginal New World civilizations.

- 275. The Principles of Human Ecology. (2) II.** Mr. Birdsell
Prerequisite: graduate status, courses 1 and 2. Given every third year.

A survey of the principles relating the economically simpler human populations to their natural environments. Cultural evolution and the adaptive processes inherent in it are explored. Laboratory exercises include the principal techniques useful in an ecological approach to human populations.

* Not to be given, 1963-1964.

276. Man and His Ecological Relations. (2) II.

Mr. Birdsell

297. Individual Studies for Graduate Students. (1-4) I, II.

The Staff

299. Research in Anthropology. (1-6) I, II.

Mr. Meighan

Related Courses in Another Department (see page 395)

Linguistics 170. Introduction to Linguistics. (3) I, II.

Mr. Bright, Mr. Hoijer, Mr. Law

Linguistics 173. Structural Linguistics. (3) II.

Mr. Bright

Graduate courses in Linguistics (see page 397) are open to students who have had courses 170 and 173, and are required of Ph.D. candidates who intend to specialize in anthropological linguistics

SOCIOLOGY

Lower Division Courses

1. Introductory Sociology. (3) I, II.

The Staff

Survey of the characteristics of social life, the processes of social interaction, and the tools of sociological investigation.

2. American Social Problems. (3) I, II.

The Staff

Identification and analysis of contemporary social problems in the United States; an attempt to establish criteria by which the educated layman can judge the probable effectiveness of various schemes for social betterment.

12. Sociological Analysis. (3) I, II.

The Staff

Prerequisite: course 1 or 101. Required of majors.

Development and application of the basic tools and concepts of course 1 by means of an examination of selected monographic works.

18. Interpretation of Quantitative Data. (3) I, II.

Mr. Churchill

Prerequisite: course 1 or 101, or may be taken concurrently. Satisfies the statistics requirement for the major in sociology and anthropology.

The interpretation of statistical measures, tables, and graphs of the types most frequently encountered in sociological literature.

Upper Division Courses

Course 1 or 101, or the equivalent, and upper division standing are prerequisite to all upper division courses in sociology unless otherwise stated.

101. Principles of Sociology. (3) I, II.

The Staff

No credit will be given for this course if course 1 has been completed.

For upper division students who have not taken Sociology 1. A more intensive introduction to sociology than is given in course 1. May not be counted as fulfilling the requirements of the field of concentration.

117. Introduction of Sociological Research Methods. (3) I. Mr. Oberschall

A systematic treatment of the logic of qualitative and semiquantitative skills of use in sociological research, e.g., classification, questionnaire and schedule design, content analysis, critical analysis of studies, conceptual analysis of case material.

118. Intermediate Quantitative Methods. (3) I.

Mr. Churchill

Prerequisite: courses 12 and 117, and Sociology 18, Statistics 1, or some other course in statistics approved by the department. Required for the M.A. in sociology.

A brief systematic course in the logic and practice of statistical methods of use to sociologists.

119. Advanced Quantitative Methods. (3) II.

Prerequisite: course 118. Required for the Ph.D. in sociology

A continuation and elaboration of course 118. Designed for students with professional objectives.

120. Social Disorganization. (3) I, II.

Mr. Douglas

An examination of various symptoms of social disorganization, such as individual maladjustment, and a general survey of the processes through which societies become disorganized.

122. Social Change. (3) II.

Mr. Murphy

A study of patterns of social change, resistance to change, and change-producing agencies and processes.

124. Collective Behavior. (3) I, II.

The Staff

Characteristics of crowds, mobs, publics, social movements, and revolutions. Their relation to social unrest and their role in developing and changing social organization.

126. Culture and Personality. (3) I.

Mr. Turner

Theories of the relation of variations in personality to culture and group life, in primitive and modern societies, and the influence of social role on behavior.

128. Formal Organizations. (3) I.

Mr. Surace

Institutional analysis of administrative structures and voluntary associations; informal organization, ideology, bureaucracy, decision-making, and morale.

129. Mass Communications. (3) I.

Mr. Wright

Formal organization, functions, and development of the mass media; communications as a social process; cultural patterns; audience characteristics; communications and bureaucracy. Aspects of the American media are compared with other systems, e.g., Soviet, British, Arabic.

131. Industry and Society. (3) I, II.

Mr. Dalton

Prerequisite: upper division standing.

A sociological analysis of industry. Attention given to factors in the status group awareness and occupational role-learning of workers and managers; interaction between technological social systems; the interplay between official and unofficial action, and between industry and community.

135. Social Stratification. (3) I.

Mr. Murphy

An analysis of American social structure in terms of evaluational differentiation. Topics to be considered include criteria for differentiation, bases for evaluation, types of stratification, the composition of strata and status systems, mobility, consequences of stratification and problems of methodology.

142. Marriage and the Family. (3) I, II.

Mr. Riemer

Prerequisite: upper division standing. May not be counted toward the field of concentration in sociology. No credit will be given for this course if credit has been received for Sociology 162.

The marriage-family system; development, modern functions, characteristics, and maladjustments.

143. Urban Sociology. (3) I, II.

Mr. Riemer

Urban and rural cultures; the characteristics of cities in Western civilization, with emphasis on the American metropolis.

144. Rural Society. (3) II.

The characteristics of rural social systems in contrast to urban; the nature of folk societies; development of major agricultural traditions in America, with emphasis upon the effects of industrialization of rural life; problems in policy and administration of agriculture in modern America.

145. Community and Ecology. (3) I.

Comparative studies of community structure and organization. Application of the ecologic, sociometric and similar techniques to community research.

147. Social Aspects of Housing and City Planning. (3) II.

Mr. Riemer

Prerequisite: course 143.

Implications for family and urban social relationships of housing floor plans and plans for neighborhoods and cities.

150. Latin-American Societies. (3) II.**Mr. Beals**

Prerequisite: upper division standing.

A descriptive survey of the major Latin-American societies, emphasizing their historical backgrounds and their emergent characteristics, with special attention to the relations between rural and urban life.

161. Group Processes. (3) I.**Mr. Douglas**

Systematic study of the formation, structure, and functioning of groups; analysis of group processes and group products from a variety of theoretical viewpoints; implications of various research techniques.

162. Process and Socialization in the Family. (3) I.

No credit will be given for this course if credit has been received for Sociology 142.

Examination of the processes of interaction, decision-making, role differentiation, conflict, integration, and socialization within the family and their interrelations with society.

***166. Population and Society in the Middle East. (3) I.**

Prerequisite: upper division standing and consent of instructor.

A survey of the Middle Eastern societies; their historic and environmental bases; the contemporary demographic and cultural situation.

***167. Comparative Sociology of the Middle East. (3) II.**

Prerequisite: upper division standing and consent of instructor.

A review of the unity of Middle Eastern societies in Islam and their diversity exemplified by such nomadic peoples as the Bedouin, countries in process of rapid modernization such as Turkey and Israel, colonial situations as in Algeria and Morocco, and underdeveloped areas as Iran and the Arabian countries.

170. Backgrounds of Sociological Thought. (3) I.**Mr. Dalton**

Survey of attempts, from early literate societies to the twentieth century to understand the nature of man and society; the social origins of this intellectual background; the course of these ideas in the development of sociological theory.

171. Development of Sociological Theory. (3) I.**Mr. Horton**

A comparative survey of basic concepts and theories in sociology, 1850-1920; the codification of analytic schemes; a critical analysis of trends in theory construction.

172. Contemporary Sociological Theory. (3) II.

A critical examination of significant theoretical formulations, 1920 to the present; an analysis of the relation between theoretical development and current research emphases.

180. Sociology of Education. (3) I, II.**Mr. Gordon**

(Same as Education 108.)

Studies of social processes and interaction patterns in educational organizations, the relationships of such organizations to aspects of society, social class and power, social relations within the school, formal and informal groups, school culture, roles of teachers, students, and administrators.

181. Sociopathic Behavior. (3) I.*Mr. Garfinkel**

Prerequisite: course 120.

Various types of sociopathic behavior analyzed from the standpoint of social isolation and social control.

182. Criminology. (3) I.**Mr. Douglas**

Theories of the genesis of crime; factors in the organization of criminal behavior from the points of view of the person and group; criminal behavior systems.

183. Social Control. (3) I.*Mr. Grusky**

Theories of social control; consideration of the agencies and means involved in the control of social deviation.

184. Control of Crime. (3) II.

Theories of punishment; methods of dealing with convicts; social organization of police, courts, prisons, probation, and parole.

* Not to be given, 1963-1964.

185. The Field of Social Welfare. (3) II.

Mr. Riemer

Prerequisite: course 120

A sociological analysis of social work as an institution. Attention given to agency organization and functions.

186. Population Problems. (3) I.

Mr. Sutton

Implications for social organization and social policy of population size and composition, birth and death rates. Consideration of social problems related to population increase, population redistribution, and other trends.

187. Political Sociology. (3) I.

Mr. Oberschall

The contributions of sociology to the study of politics including the analysis of political aspects of social systems, the social context of action, and the social bases of power.

189. Intergroup Conflict and Prejudice. (3) II.

A study of the causes and consequences of group conflict, with emphasis upon majority-minority relations, prejudice and discrimination. Special attention is given to alternative sociological and psychological theories of prejudice; the effects of minority status upon the individual; and the possibilities for attitude and behavior change.

190. Ethnic and Status Groups. (3) II.

Mr. Kuper

The characteristics of the "visible" ethnic groups, e.g., Japanese, Mexican and Negro; their organization, acculturation, and differentiation. The development, operation and effects of selective immigration and population mobility. The status of the chief minorities in the continental U.S., with comparative materials drawn from Jamaica, Hawaii, and other areas.

191A. Social Processes in Africa. (3) I.

Mr. Kuper

A course in comparative sociology. A study of selected processes in African societies, primarily in the fields of urban sociology, social structure and social change, involving an inter-disciplinary approach.

199. Special Studies in Sociology. (1-4) I, II.

The Staff

Prerequisite: senior standing and consent of the instructor.

A course of independent study designed for graduate or senior undergraduate students who (a) desire a more advanced or specialized treatment of an area covered in the regular course list and who present this course as a prerequisite; or (b) desire work in an area of sociological analysis currently not covered by an upper division course.

Graduate Courses

200A-200B. Methods and Techniques of Sociological Research. (3-3) I, II.

The Staff

A year course providing firsthand field and laboratory experience in original research. Problems of methodology and technique: selection and formulation of problem, selection of sample, questionnaire and schedule construction, collection of data, processing and tabulation, presentation of findings.

201. Proseminar in Sociology. (3) I.

Mr. Murphy

Prerequisite: graduate status.

A comprehensive survey of basic concepts and theories in the major fields of sociology. Designed primarily for graduate students in the first year of residence.

214. The Measurement of Sociological Variables. (2) II.

Mr. Churchill

Prerequisite: courses 117 and 118.

Theory and technique of measurement in sociology. Construction, application, and interpretation of measurement techniques, especially the forms of scaling.

216. Questionnaire and Schedule Construction. (2) I.

Mr. Wright

Prerequisite: graduate standing and consent of the instructor.

Procedures, methods, and problems in the collection of data by means of interview and questionnaire.

215. Selected Problems in Small Group Analysis. (2) II.

Mr. Churchill

The use of laboratory techniques in the study of sociological aspects of small groups.

- *227. Interviewing and Interviewer Training. (2) I.** Mr. Morris
Prerequisite: graduate standing and consent of the instructor.
Problems and methods of sociological interviewing; development of interview skills; the selection and training of interviewers; the administration of interview studies.
- *219. Factor Analysis as a Sociological Research Tool. (2) I.** ———
Prerequisite: courses 117 and 118.
The principles of factor analysis and its application to sociological problems; use of traditional R-technique in analysis of complexes of statistical variables and in testing conceptual hypotheses in sociology; Q-technique and the determination of types; recent developments.
- 224. Problems in Social Psychology. (2) II.** Mr. Grusky
- *226. Leadership and Social Structure. (2) I.** ———
A comparative analysis of types of leadership in different social structures with particular attention to the recruitment and career patterns of leaders.
- 227. The Sociology of Knowledge. (2) I.** Mr. Horton
Prerequisites: Graduate status or permission of instructor.
A survey of theories and research concerning social determinants of systems of knowledge and the role of intellectual and artistic elites in Western societies.
- 229. Selected Problems in Communications. (2) II.** Mr. Wright
- *236. Social Change in the Middle East. (2) I.** ———
- *237. Social Stratification in the Middle East. (2) II.** ———
- *250. Methodological Problems. (2) I.** Mr. Seeman
- 251. Social Maladjustment. (2) II.** Mr. Garfinkel
- 252. Criminology. (2) I.** Mr. Yablonsky
- 253. Quantitative Methods in Sociology. (2) II.** ———
- 254. Penology. (2) II.** Mr. Yablonsky
- 255A-255B. Systematic Sociological Theory. (2-2) Yr.** Mr. Kuper
- *256A-256B. Demography. (2-2) Yr.** ———
- 257. Sociology of the Arts. (2) II.** Mr. Horton, Mr. Murphy
- 260. Industry and Society. (2) II.** Mr. Dalton
- *261A-261B. Ethnic Minorities. (2-2) Yr.** Mr. Seeman
- 262. Selected Problems in Urban Sociology. (2) II.** ———
- 263. Social Stratification. (2) II.** ———
- 264. Professions in the American Society. (2) II.** ———
- *265. Critical Problems in Organization Theory. (2) I.** Mr. Grusky
- 269. Collective Behavior. (2) II.** Mr. Turner
- 270. Selected Problems in Socialization. (2) I.** Mr. Turner
- 299A. Research in Sociology for M.A. Degree Candidates. (1-3) I, II.**
Mr. Churchill in charge
- 299B. Research in Sociology for Ph.D. Candidates. (1-6) I, II.**
Mr. Kuper in charge

* Not to be given, 1963-1964.

ART

(Department Office, 1118 Dickson Art Center)

- Laura F. Andreson, M.A., *Professor of Art.*
 †Karl M. Birkmeyer, Ph.D., *Professor of Art.*

Departmental Right. The Department of Art reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

Letters and Science List. The following courses are included in the Letters and Science List of Courses (for regulations governing this list, see page 72): 1A, 1B, 5, 7, 100A, 100B, 101, 103, 104, 105, 106, 107, 108, 109, 110A, 110B, 110C, 110E, 111A, 111B, 111C, 112A, 112B, 113A, 113B, 113C, 113D, 114, 115A, 115B, 115C, 115D, 116A, 116B, 117A, 117B, 118, 119A, 119B, 148, 149A-B-C-D, and 199. Students in the College of Letters and Science may take as many units of art history courses as their program allows, and they may take twelve units of studio courses toward the A.B. degree.

College of Fine Arts

The departmental major offered in the College of Fine Arts leads to the degree of Bachelor of Arts with the opportunity to specialize in one of the four areas: (1) Art History, (2) History and Studio, (3) Pictorial Arts, and (4) Design.

Preparation for Major No. 1. Course 1A and 1B.

Preparation for Majors No. 2, 3, and 4. Eighteen units of lower division art courses, including 1A, 1B, 10A, 10B, 20A, 30A, and four additional units selected from courses 20B, 25, 30B, and 30C. Prospective Pictorial Arts majors are advised to elect courses 20B and 25, and prospective design majors courses 30B and 30C.

1. Art History.

The Major: A minimum of 36 units including at least 30 units selected in consultation with an art history adviser from courses 101 to 118, Classics 151A, 151B, Anthropology 127, Oriental Language 170A, 170B, Philosophy 136, and 6 units of art electives. Other related courses in anthropology, classics, English literature, foreign languages and literature, history, philosophy, music and theater arts are recommended as non-major electives for the degree.

2. History and Studio.

The Major: A minimum of 36 units including at least 20 units of history of art selected in consultation with the departmental adviser from courses

101 to 118; and 16 units of studio courses selected from courses 120 to 197, including at least 2 units from courses 150 to 197.

3. Pictorial Arts.

The Major: A minimum of 36 units including at least 18 units of pictorial arts, selected in consultation with a pictorial arts adviser from courses 120 to 147, including 2 units each of 130, 140, and 145; 6 units of history of art selected from courses 101 to 118; and 12 units of art electives.

4. Design.

The Major: A minimum of 36 units including at least 18 units of design courses selected in consultation with a design adviser, from courses 119A, 119B, and 150 to 197; 8 units of art history from courses 101 to 118; 10 units of art electives.

Art Education. Within the 36 units of upper division art courses required for the major in art, candidates for a teaching credential must include 8 units of art history; 8 units of pictorial arts; 8 units of design, including one course in three dimensional design; 9 units of additional electives in one of the foregoing areas; and Art 370 (secondary credential students) or Art 330 (elementary credential students). In addition, 6 units of graduate work in art, including Art 295, are required for the secondary credential. Prospective elementary teachers who do not major in art should register for courses 7 and 330. For further information concerning teaching credentials consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

Graduate Division

Admission to Graduate Status. In addition to meeting the requirements of the Graduate Division, the student must have a bachelor's degree or its equivalent, and should have a major in art and a field of specialization: history of art, studio, or art education. Students whose preparation is deficient, as determined by the appropriate admissions committee, will be required to take work additional to the degree program to make up such deficiencies. For more detailed information, write to the Chairman of the Department of Art and enclose a transcript or summary of academic record.

Requirements for the Master's Degree. For the general University requirements, see page 162. The Department of Art offers graduate study in four areas of specialization: (1) History of Art, (2) Art Education, (3) Pictorial Arts, (4) Design. When applying for admission, it is advisable to designate the major field of specialization and whenever possible present examples of previous work in the field.

Art History. The program for the Master of Arts degree in art history follows Plan I, a minimum of 20 semester units in art history and a thesis. The program for the degree is worked out under the guidance of the adviser in the area of specialization. Knowledge of at least one approved foreign language is required; this requirement must be fulfilled by the end of the second semester. A final written examination covers four of the following fields, two of them major and two minor: (1) Primitive and Pre-Classical Art, (2) Classical Art, (3) Medieval Art, (4) Renaissance Art, (5) Baroque Art, (6) Art of the Eighteenth and Nineteenth Centuries, (7) Modern Art, (8)

American Art, (9 and 10) Oriental Art, (11) Theory of Art. Following submission of the thesis the candidate must pass an oral examination.

Art Education. The master's program with this specialization follows Plan II, a minimum of 24 units of graduate work, including 4 units of an advanced project in art education. The final comprehensive examination is oral. Students must meet a quality standard in a final exhibition of studio work. The degree program consists of a combination of research, lecture, and studio courses planned under the guidance of a staff member in art education.

Pictorial Arts or Design. The master's program with these specializations follows Plan II, a minimum of 24 units of graduate work, including 4 units of an advanced project in the field of specialization. The final comprehensive examination is oral. Those majoring in Pictorial Arts may stress painting, sculpture, or printmaking in their advanced project, and are expected to have a good general knowledge of the history and theory of art. Majors in design may stress graphic, industrial, environmental, costume, ceramic, or metal, but the ideal degree candidate is the comprehensive designer rather than the specialist. The specific program for the Master of Arts degree is worked out under the guidance of a staff member in the area of the advanced project.

Master of Fine Arts Degree in Pictorial Arts or Design. The program requires a minimum of 48 units, including 4 units of an advanced project in the field of specialization. Candidates must have completed, whether as undergraduates or graduate students, a minimum of 30 acceptable units in the history and theory of art. Students who have an M.A. degree may be accepted as candidates for the M.F.A., but the M.A. degree is not a prerequisite. The M.F.A. is the highest degree in course for prospective professional artists. Two to three years of graduate work will normally be required to complete the requirements in terms of quality of creative work.

Doctor of Philosophy Degree in Art History. In addition to the general University regulations for the Doctor of Philosophy degree, including the dissertation and final examination (see page 165) a candidate must satisfy the following departmental requirements:

1. **Foreign Language.** A reading knowledge of French and German is requisite for all candidates except those specializing in Oriental art who may substitute an Oriental language for one of the above. The requirements for the first language should be fulfilled by the end of the first year of graduate work, the requirement for the second language at the end of the second year. Both language requirements must be satisfied before advancement to candidacy for the degree.

2. **Qualifying Examination.** Preparation for the qualifying examination, which advances the student to candidacy, will include a minimum of four graduate seminars and a term paper or master's thesis demonstrating scholarly competence. The examination is both written and oral and may be combined with the master's examinations if this intention is declared in advance.

Lower Division Courses

1A. History of Art. (3) I.

Painting, sculpture, and architecture from prehistoric times to the end of the Middle Ages.

Mr. Sheppard

1B. History of Art. (3) II.**Mr. Sheppard**

Painting, sculpture, and architecture from the Renaissance to the present.

5. Fundamentals of Art. (2) I, II.**Miss Holmes**

A lecture course for the general student in the principles of art and art criticism. Study of terminology and criteria of value. Illustrated with examples of modern and historic painting, sculpture, architecture, and design.

7. Introduction to Art. (3) I, II.**Mr. Trissel**

A lecture course for the general student as an introduction to art through studies of drawing, painting, sculpture, and design, and the application of aesthetic principles to daily life. Credit not applicable for the art major.

10A. Drawing. (2) I, II.**Mr. Brice, Mr. Elgart, Mr. Stussy**

Beginning course in drawing.

10B. Drawing. (2) I, II.**Mr. Nunes**

Prerequisite: course 10A, 20A, or consent of the instructor.

Beginning course in figure drawing.

20A. Painting. (2) I, II.**Mrs. Brown**

Prerequisite: course 10A or consent of the instructor.

Beginning course in painting.

20B. Painting. (2) I, II.**Mr. Brown**

Prerequisite: courses 10A, 10B, and 20A or consent of the instructor.

Composition and color.

25. Sculpture. (2) I, II.

Modeling and basic sculptural form.

30A. Design. (2) I, II.**Mr. Caruthers**

Elements of design in the visual arts; theory and studio projects.

30B. Design. (2) I, II.**Mr. Caruthers**

Prerequisite: course 30A.

Two-dimensional studies of line, value, and color.

30C. Design. (2) I, II.**Mr. J. Carter**

Prerequisite: course 30A.

Three-dimensional studies in materials, form, and structure.

Related Course in Another Department**Integrated Arts 1A-1B. Man's Creative Experience in the Arts. (3-3) Yr.****Mr. Trissel****Upper Division Courses****I. HISTORY AND THEORY OF ART****100A. History of Art. (2) I.****Mr. Longman**

Not open to students having credit for 1A. Does not count toward the major in art.

Painting, sculpture, and architecture from prehistoric times to the end of the Middle Ages.

100B. History of Art. (2) II.**Mr. Longman**

Not open to students having credit for 1B. Does not count toward the major in art.

Painting, sculpture, and architecture from the Renaissance to the present.

101. Theory and Criticism of Art. (3) I, II.**Mr. Longman**

Lecture, two hours; discussion, one hour.

Criteria of criticism: analysis of works of historic art; elements of psychology and sociology of art; semantics of critical terminology; relation of aesthetic meaning to reality and truth; studies in criticism of modern art.

- 103. Oriental Art. (3) I.** Mr. Davidson
Indian, Indonesian, Chinese, and Japanese art and architecture.
- 104. Medieval Art. (3) II.** Mr. Sheppard
Art and architecture from the Early Christian through the Gothic period.
- 105. Italian Renaissance Art. (3) I.** Mr. Pedretti
Art and architecture from 1300 to 1600 A.D.
- 106. Northern Renaissance Art. (2) II.** Mr. Birkmeyer
Art and architecture in the Netherlands, France, and Germany from 1400 to 1600 A.D.
- 107. Baroque Art. (3) I.** _____
Seventeenth-century art and architecture in Italy, Spain, Flanders, Holland, France, Germany, Austria, and England.
- 108. European Art from 1700 to 1900. (2) II.** Mr. Ziff
Art and architecture in France, England, Spain, Italy, and Central Europe.
- 109. Modern European Art. (2) I.** _____
Art and architecture of the twentieth century.
- 110A. Prehistoric and Primitive Art (3) I.** Mr. Altman
The arts of Africa, Australia, the Pacific Islands, and the American Indians after the Conquest.
- 110B. Pre-Columbian Art. (3) I.** Mr. Altman
The prehistoric arts of the Americas.
- 110C. Problems in Primitive Art. (3) II.** Mr. Altman
Advanced studies in the primitive arts of Africa and the Pacific Islands and the American Indians.
- 110E. Art of the Ancient Near East. (3) II.** _____
Art and architecture of Egypt and Mesopotamia.
- 111A. Indian Art. (3) I.** Mr. Davidson
Prerequisite: course 103 or consent of the instructor.
Art and architecture of India and Indonesia from prehistoric times to the present.
- 111B. Chinese Art. (3) II.** Mr. Davidson
Prerequisite: course 103 or consent of the instructor.
Art and architecture of China from prehistoric times to the present.
- 111C. Japanese Art. (2) I.** Mr. Davidson
Prerequisite: course 111A or consent of the instructor.
Art and architecture of Japan from prehistoric times to the present.
- 112A. Art of the Early Middle Ages. (2) I.** Mr. Sheppard
Prerequisite: course 104 or consent of the instructor.
Art and architecture before 1000 A.D.
- 112B. Romanesque Art. (2) I.** Mr. Sheppard
Prerequisite: course 104 or consent of the instructor.
Art and architecture of Western Europe in the eleventh and twelfth centuries.
- 113A. Italian Art of the Trecento. (3) I.** Mr. Birkmeyer
Prerequisite: consent of the instructor.
Art and architecture of the fourteenth century.
- 113B. Italian Art of the Quattrocento. (3) II.** Mr. Birkmeyer
Prerequisite: consent of the instructor.
Art and architecture of the fifteenth century.

- 113C. Leonardo da Vinci. (3) I.** Mr. Pedretti
 Prerequisite: course 105 or consent of the instructor.
 Art, theory of art, science, and technology of Leonardo da Vinci; predecessors, pupils, and followers; the School of Milan.
- 113D. Michelangelo and High Renaissance Architecture. (3) II.** Mr. Pedretti
 Prerequisite: course 105 or consent of the instructor.
 Architecture, sculpture, and painting of Michelangelo; architecture of the early sixteenth century.
- 114. Art of the Netherlands in the Fifteenth Century. (3) I.** Mr. Birkmeyer
 Prerequisite: course 106 or consent of the instructor.
- 115A. Rococo Art. (2) I.** Mr. Ziff
 Prerequisite: course 108 or consent of the instructor.
 Art and architecture from 1700 to 1770 in France, Germany, and Italy.
- 115B. Romantic Art. (3) II.** Mr. Ziff
 Prerequisite: course 108 or consent of the instructor.
 Art and architecture from 1770 to 1850 in England, France, and Germany.
- 115C. Impressionism and Post-Impressionism. (2) I.** Mr. Ziff
 Prerequisite: course 108 or consent of the instructor.
 French painting from 1860 to 1900.
- 115D. Major Artists of the Twentieth Century. (2) II.** _____
 Prerequisite: course 109 or consent of the instructor.
- 116A. American Art. (3) I.** Mr. Bloch
 Painting and sculpture from the Colonial period to 1900 in the United States.
- 116B. American Art. (3) II.** Mr. Bloch
 Painting and sculpture of the twentieth century in the United States.
- 117A. History of Prints and Drawings. (3) II.** Mr. Bloch
 Development of techniques and history of style and expression from the late Middle Ages to the present.
- 117B. Research Methods in Art History. (3) I.** Mr. Sheppard
- 117C. Art and Architecture of Georgian England. (2) II.** Mr. Ziff
 Prerequisite: consent of the instructor.
 A study of the principal artists and movements in England from about 1700 to 1830. Particular attention will be given to works in the Huntington Art Gallery.
- 118. Advanced Art Theory. (3) I.** Mr. Longman
 Prerequisite: course 101 or consent of the instructor.
 Studies in the semantics of art criticism; the relation of art forms to visual reality; and aesthetic and ethical value in relation to truth.
- 119A. History of Design. (2) I, II.** Mrs. Sunkees
 History of interior design, furniture, and objects of utility.
- 119B. History of Design. (2) I, II.** Miss Everett
 History of Western and Oriental costume.

Related Courses in Other Departments

- Classics 151A. The Art of the Aegean Bronze Age. (3) I. Mr. Clement
 Classics 151B. Greek and Roman Architecture. (3) II. Mr. Clement
 Oriental Languages 170A. Archaeology of China. (2) II. Mr. Rudolph
 Oriental Languages 170B. Archaeology of Modern China. (2) II. Mr. Rudolph
 Philosophy 136. Philosophy of Art. (3) II. Mr. Wilson

II. DRAWING, PAINTING, PRINTS, SCULPTURE AND PHOTOGRAPHY

Courses 120 to 147 are open to repeated registration, upon recommendation of the student's adviser, to the maximum credit indicated in each course. The number of units specified in parentheses, e.g. (2 or 4), indicates that the student may register for one or at most two sections in any one semester for two or at most four units.

- 120. Life Drawing.** (2 or 4) I, II. Mr. Amato, Mr. Elgart, Mr. Stussy
Prerequisite: courses 10A, 10B, or consent of the instructor. Maximum credit, 6 units.
Studies from the model.
- 125. Drawing.** (2 or 4) I, II. Mr. Brice, Mr. Brown
Prerequisite: courses 10A, 10B, and 2 units of 120 or consent of the instructor. Maximum credit, 6 units.
Drawing as a terminal medium of artistic expression.
- 127. Drawing Laboratory.** (2) I, II. Miss Holmes
May be repeated once for credit. Not open to students having credit for course 128.
Studies in style, expression, and aesthetic quality based on historic precedent.
- 128. Advanced Drawing Laboratory.** (2 or 4) I, II. Mr. Mullican
Prerequisite: courses 10A, 10B, and 2 units of 120 or consent of the instructor. Maximum credit, 4 units. Primarily for majors in pictorial arts.
Stylistic analysis and drawing based on historic precedent.
- 130. Painting.** (2 or 4) I, II.
Mrs. Brown, Mr. Elgart, Mr. Levine, Mr. Mullican
Prerequisite: courses 10A, 20A, or consent of the instructor. Maximum credit, 8 units.
Any medium or subject. Composition, interpretation, expression.
- 135. Life Painting.** (2 or 4) I, II. Mr. Amato, Mr. Brown
Prerequisite: courses 10A, 10B, 20A; 2 units of 120; and 4 units of 130 or consent of the instructor. Maximum credit, 6 units.
Any medium. Composition, interpretation, expression.
- 140. Prints.** (2 or 4) I, II. Mr. Brown, Mr. Elgart
Prerequisite: courses 10A, 10B, 20A, or consent of the instructor. Maximum credit, 8 units.
Engraving, etching, drypoint, aquatint, softground, lithography, woodcut, and mixed media. Traditional and experimental studies. Fine printing.
- 145. Sculpture.** (2 or 4) I, II.
Prerequisite: courses 10A, 10B, or consent of the instructor. Maximum credit, 8 units.
Modeling or carving. Clay, plaster, wood, stone, metals, and welding. Plaster casting.
- 147. Photography.** (2 or 4) I, II. Mr. Heineicken
Prerequisite: courses 10A, 20A, or consent of the instructor. Maximum credit, 4 units.
Photography as a medium of artistic expression.
- 148. Scientific Illustration.** (2) I. Mr. Bridgman
Descriptive drawing adapted to the needs of scientists and recommended to students whose major is science; study of media for reproduction.
- 149A-B-C-D. Biological Illustration.** (1-1-1-1), I, II. Mr. Bridgman
Prerequisite: course 148 or consent of the instructor.
Descriptive drawing for biologists, with emphasis on scientific observation, interpretation, and rendering.

III. DESIGN

Courses 150, 160, 170, 175, 180, 190, and 195 are open to repeated registration, upon recommendation of the student's adviser, to the maximum credit

indicated in each case. The number of units specified in parentheses, e.g. (2-4), indicates that the student may register for one or at most two sections in any one semester for two or at most four units.

150. Graphic Design. (2 or 4) I, II.

Mr. Heinecken, Mr. Jennings

Prerequisite: courses 10A, 10B, 30A, 30B, 30C, or consent of the instructor. Maximum credit, 10 units.

Experimental design in two dimensions, including processes of pictorial reproduction.

157. Illustration. (2) I, II.

Mr. Jennings

Prerequisite: courses 10A, 10B, 20A, 30A, or consent of the instructor.

Development of pictorial imagination and technical resources in the depiction of specified subject matter.

160. Industrial Design. (2 or 4) I, II.

Mr. Demaree

Prerequisite: course 30A and consent of the instructor. Maximum credit, 8 units. After a first registration in this course, the student should have college physics and engineering drawing or take courses in these subjects concurrently with 160.

Design of objects for mass production which meet the requirements of aesthetic appeal, social need, and practical function.

163. Principles of Industrial Design. (2) I.

Prerequisite: courses 1A, 1B, or consent of the instructor.

A study of the technical, economic, environmental, and cultural factors which have influenced the design of objects of utility in the past and which condition contemporary industrial design.

165A. Studies in Industrial Design. (2) I.

Prerequisite: course 30A. Prerequisite or corequisite: 30B, 30C, or consent of the instructor.

Studies in three dimensions using common materials such as clay, paper, wood, etc., as sketch media for representation of design concepts.

165B. Studies in Industrial Design. (2) II.

Prerequisite: course 30A. Prerequisite or corequisite: 30B, 30C, or consent of the instructor. May be taken before 165A.

Graphic communication; analysis of production methods and characteristics of materials.

167A-167B. Perspective and Rendering. (2-2) Yr.

Mr. Demaree

Prerequisite: course 10A or consent of the instructor.

170. Environmental Design. (2 or 4) I, II.

Mrs. Fetty

Prerequisite: courses 10A, 10B, 30A, or consent of the instructor. Maximum credit, 8 units.

The design of the environment man inhabits, satisfying the requirements of use and beauty in original solutions of group and individual problems.

171A-171B. Visual Presentation. (2-2) Yr.

Mr. Choate

Prerequisite: courses 10A, 30A, 30B, 30C, or consent of the instructor.

Analysis of artifacts and natural form and phenomena via drawing. Structuring and expression of conceptual forms via graphics using vocabulary given through analysis.

173A. Introduction to Theory and Design of Architecture. (2) I.

Mr. Choate

Prerequisite: course 30A or consent of the instructor.

Study of the fundamental concepts of architectural design.

173B. Introduction to Theory and Design of Architecture. (2) II.

Mr. Choate

Prerequisite: course 30A or consent of the instructor.

A study of building materials and methods of construction, emphasizing the physical properties of materials and methods of construction in relation to their effects on aesthetic expression.

- 175. Furniture Design. (2 or 4) I, II.** Mrs. Grossman
Prerequisite: course 30A or consent of the instructor. Maximum credit, 4 units.
The design of individual forms involved in the organic design of architectural interiors.
- 177. Landscape Design. (2) I, II.** Mrs. Fetty
Prerequisite: course 30A. Prerequisites or corequisites: Botany 3, or Floriculture and Ornamental Horticulture 131, or consent of the instructor.
Studio projects in the use of plant materials in landscape design, with particular emphasis on visual and ecological considerations.
- 179. Terminal Problem in Design. (2) I, II.** The Staff
Prerequisite: senior standing. 170, 175, 177
A research and design study that applies knowledge and skills acquired in previous courses toward a solution of a major environmental design project.
- 180. Costume Design. (2 or 4) I, II.** Mrs. Reps, Miss Everett
Prerequisite: courses 10A, 10B, 30A, or consent of the instructor. Maximum credit, 8 units.
Projects related to the study of aesthetic design in vestment, accoutrement, and equipment.
- 187A-187B. Textile Design. (2-2) Yr.** Mrs. Sunkees, Mr. Kester
Prerequisite: course 30A or consent of the instructor.
Design of printed and woven textiles.
- 190. Ceramics. (2 or 4) I, II.** Miss Andreson, Mr. Kester
Prerequisite: course 30A or consent of the instructor. Maximum credit, 8 units.
- 195. Metal Design. (2 or 4) I, II.** Mr. W. Carter
Prerequisite: courses 30A and 30C, or consent of the instructor. Maximum credit, 8 units.
- 197. Three-Dimensional Design. (2) I, II.** Mr. J. Carter
Prerequisite: course 30C or consent of the instructor.
Advanced studies in three-dimensional design.

Special Studies for All Majors

- 199. Special Studies in Art. (1-4) I, II.** The Staff
Prerequisite: senior standing and consent of the instructor and adviser. Open to repeated registration upon recommendation of adviser. Maximum credit, 6 units.
Projects may be in history or studio courses.

Graduate Courses

Prerequisite for all courses: consent of the instructor. All courses may be repeated for credit upon recommendation of adviser.

Professional Courses in Method

330. Art in Elementary Education. (3) I, II.

Mr. Stoops, Miss McPhail

Studio, six hours.

A study of objectives and methods with correlated studio activities.

370. Principles of Art Education. (3) I, II.

Mr. Stoops

Lecture, two hours; studio, four hours.

A study of philosophy, objectives, and methods in secondary education.

UNIVERSITY ART GALLERIES

Located in the east wing of the Dickson Art Center are four well-equipped art galleries. The Willitts J. Hole Art Gallery and the James Kennedy Gallery are devoted to exhibitions of the permanent art collections of the University, the East Gallery to special loan collections which are presented on a regular schedule, and the Print Room to exhibitions of prints from the Grunwald Graphic Arts Foundation and other sources. The showing of student and faculty work is also an important part of the exhibition program of the art galleries.

ASTRONOMY

(Department Office, 8105 Mathematical Sciences Building)

Lawrence H. Aller, Ph.D., *Professor of Astronomy (Chairman of the Department)*.

Samuel Herrick, Ph.D., *Professor of Astronomy and Engineering*.

Daniel M. Popper, Ph.D., *Professor of Astronomy*.

George O. Abell, Ph.D., *Associate Professor of Astronomy*.

Edward K. L. Upton, Ph.D., *Assistant Professor of Astronomy*.

Ray J. Weymann, Ph.D., *Assistant Professor of Astronomy*.

Albert E. Whitford, Ph.D., *Director of the Lick Observatory and Astronomer*.

Letters and Science List.—All undergraduate courses in astronomy are included in the Letters and Science List of Courses. Also included on this list are courses Engineering 191A and 192B (formerly Astronomy 112 and 115). For regulations governing this list, see page 72.

Advising.—Every student enrolled in the curricula in Astronomy and Astronomy-Physics is required to have each semester's program approved by a departmental adviser.

Preparation for the Major.—Required: Physics 1A-1B-1C-1D; Mathematics 1 (unless exempted by special examination), 3A, 3B, 4A, 4B or 5A, 5B, 6A, 6B. Recommended: A reading knowledge of French, German, or Russian.

The Major.—Twenty-four upper division units of astronomy, physics, and mathematics, as follows: Astronomy 101, 103A-103B, 117A-117B. Electives in astronomy, mathematics, and physics. For the purposes of this curriculum, courses in Engineering, 191A (Astrodynamics and Rocket Navigation) and 192B (Determination of Orbits) (formerly Astronomy 112 and 115) are to be considered courses in astronomy.

Major in Astronomy-Physics.—This major is intended for students who are considering a career in the science of astronomy. The requirements of this major are given on page 81 of this bulletin. The General Secondary Teaching Credential may be obtained with this major. The credential is offered with the field major of physical sciences. For requirements consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

Astrodynamics.—Students with a major interest in the applications of celestial mechanics to problems of space flight are referred to the Department of Engineering, which offers courses in this field. Certain of these courses are acceptable as electives in the undergraduate and graduate curricula in astronomy.

Requirements for the Master's Degree.—Candidates for the degree of Master of Arts in astronomy may qualify under either Plan I, Thesis Plan, or Plan II, Comprehensive Examination Plan. For the general requirements, see pages 162-165. A candidate must demonstrate a reading knowledge of French, German, or Russian; his program of courses must be approved by the department.

The candidate's record must include, in addition to the 20 or 24 units required for the master's degree, 24 units of upper division courses in astron-

omy, mathematics, and physics approved by the Department of Astronomy. The following undergraduate courses, or their equivalents, are required of all candidates for the master's degree in astronomy: Astronomy 101 (General Astronomy), 103A-103B (Intermediate Astronomy), 117A-117B (Astrophysics); Mathematics 110AB (Advanced Engineering Mathematics); Physics 105 (Analytic Mechanics), 110A-B (Electricity and Magnetism), 112 (Thermodynamics and Kinetic Theory), 115 (Elementary Quantum Mechanics). The graduate program must include 6 units chosen from courses Astronomy 201A-201B, 208, 217, 227A-227B.

For the purposes of these requirements courses in Engineering 191A (Astrodynamics and Rocket Navigation, formerly Astronomy 112), 192B (Determination of Orbits, formerly Astronomy 115), 292C (Advanced Orbit Theory, formerly Astronomy 215), 292A-292B (Celestial Mechanics, formerly Astronomy 225A-225B) are to be considered courses in Astronomy.

Requirements for the Degree Doctor of Philosophy.—For the general requirements, see pages 165-169. Acceptable foreign languages are any two of French, German, and Russian. The candidate must pass written qualifying examinations testing his background in physics and mathematics as well as in astronomy. In addition to the undergraduate preparation listed under "Requirements for the Master's Degree," the candidate's advanced preparation should include most of the material of the graduate curriculum of the department. The candidate will also be required to pass an oral qualifying examination, conducted by his doctoral committee, that will test the student's preparation to conduct a specialized research problem.

Lower Division Courses

1. Elementary Astronomy. (3) I, II.

The Staff

Not open to students who have taken or are taking Astronomy 101 or 103A.

An introductory survey course in the general principles and the fundamental facts of astronomy, designed primarily for students not majoring in a physical science or mathematics.

2. Practice in Observing. (2) I.

The Staff

Prerequisite: Plane trigonometry and some previous or concurrent course in astronomy, or consent of the instructor.

Practical work for beginners, including telescopic observations and laboratory exercises cognate to an elementary course in astronomy.

Upper Division Courses

Lower division courses in astronomy are not prerequisite to upper division courses.

*100. Historical Development of Astronomy. (3) II.

Prerequisite: upper division standing. Not open to students who have taken or are taking course 1 or 101, and may not be counted on the major in astronomy.

A survey of astronomy, the historical development of its methods and ideas, and its relation to other fields of thought.

101. Introduction to Astronomy. (3) I, II.

The Staff

Prerequisite: Mathematics 3A, 3B, and high school physics. Open to qualified sophomores as well as upper division students. Course 2 may be elected for observatory and laboratory work in connection with this course.

A survey of the whole field of astronomy, designed primarily for students majoring in a physical science or mathematics.

* Not to be given, 1963-1964.

- 103A-103B. Intermediate Astronomy.** (3-3) Yr. The Staff
 Prerequisite: Mathematics 3A-3B, 4A-4B and Physics 1A-1B-1C-1D.
 Spherical astronomy, the mechanics of the solar and stellar systems, stellar motions and distances, photometry, and stellar statistics.
- 117A-117B. Introduction to Astrophysics.** (3-3) Yr. The Staff
 Prerequisite: senior standing in astronomy or physics, or consent of instructor.
 The physics of stars, interstellar matter, and stellar systems.
- 199. Special Studies.** (1-5) I, II. The Staff
 Prerequisite: senior standing and consent of the instructor. May be repeated for a total of not more than 10 units.

Note: Astronomy credit may also be given for the following Engineering courses:

- 191A. Astrodynamics and Rocket Navigation.** (3). Formerly Astronomy 112.
- 192B. Determination of Orbits.** (3). Formerly Astronomy 115.

Graduate Courses

Prerequisite to graduate courses is by consent of the instructor. Graduate courses 201 through 229 are offered in alternate years.

- 201A-201B. Astrophysics of the Solar System.** (3-3) Yr. Mr. Aller
 The sun, solar phenomena, and solar-terrestrial relationships. The interplanetary medium and astronomical plasma physics; magnetohydrodynamics. Planetary atmospheres. Origin and evolution of the solar system.
- 204A-204B. Observational Astronomy.** (3-3) Yr. Mr. Popper
 Spherical and positional astronomy, parallaxes, proper motions of stars. Star catalogues. Astronomical optics. Photometric and spectrographic observations and techniques. Radio telescopes. Includes laboratory work.
- *208. The Interstellar Medium.** (3) II. Mr. Aller
 Interstellar gas and dust. Diffuse and planetary nebulae. Magnetic fields in space and the acceleration of cosmic rays. Star formation.
- *217. Stellar Photospheres.** (3) I. Mr. Aller
 Physics of stellar photospheres and radiative transfer. The continuous and line spectra of stars. Chemical abundances in stars.
- *219. Galactic Astronomy.** (3) I. Mr. Popper, Mr. Abell
 Statistical astronomy. Stellar motions. Distance determination. Star clusters. Stellar populations. Galactic kinematics and dynamics. Structure of the galaxy.
- 227A-227B. Stellar Structure and Evolution.** (3-3) Yr. Mr. Weymann, Mr. Upton
 Structure and evolution of the stars. Stellar energy sources and origin of the elements. Pulsation theory of variable stars. The second semester is devoted primarily to the application of machine computation to the solution of astrophysical problems, including the computation of stellar models.
- *229. Extragalactic Astronomy.** (3) II. Mr. Abell
 Galaxies and clusters of galaxies. Distribution of matter in space. The observational approach to cosmology.
- 250. Seminar.** (1) I, II. The Staff
 Seminars in various topics in modern astronomy.

* Not to be given, 1983-1984.

297. Individual Studies for Graduate Students. (1-6) I, II. The Staff

298. Advanced Study and Research at Lick Observatory. (2-6) I, II.
The Staff (Mr. Whitford in charge)

Intended for graduate students who require observational experience as well as for those working upon observational problems for their theses.

299. Research on Thesis or Dissertations. (2-6) I, II. The Staff

Note: Astronomy credit may also be given for the following Engineering courses:

292C. Advanced Orbit Theory. (3). Formerly Astronomy 215.

292A-292B. Celestial Mechanics. (3-3) Yr. Formerly Astronomy 225A-225B.

❖ BACTERIOLOGY

(Department Office, 5205 Life Sciences Building)

M. J. Pickett, Ph.D., *Professor of Bacteriology.*

Sydney C. Rittenberg, Ph.D., *Professor of Bacteriology (Chairman of the Department).*

Anthony J. Salle, Ph.D., *Emeritus Professor of Bacteriology.*

Meridian Ruth Ball, Sc.D., *Associate Professor of Bacteriology.*

Gregory J. Jann, Ph.D., *Associate Professor of Bacteriology.*

Rafael J. Martinez, Ph.D., *Assistant Professor of Bacteriology.*

William R. Romig, Ph.D., *Assistant Professor of Bacteriology.*

Eugene Rosenberg, Ph.D., *Assistant Professor of Bacteriology.*

Eli E. Sercarz, Ph.D., *Assistant Professor of Bacteriology.*

Gordon H. Ball, Ph.D., *Professor of Zoology.*

Benjamin G. Fishkin, M.D., *Lecturer in Bacteriology.*

Orda A. Plunkett, Ph.D., *Professor of Botany.*

Letters and Science List.—All undergraduate courses in bacteriology are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Bacteriology 1, 4 or 5; Chemistry 1A, 1B, 5A, 8, 9; Physics 2A, 2B; *Zoology 1A, 1B; a modern foreign language.

The Major.—Bacteriology 103, 105, or 130, 106, 120; Chemistry 108A and 108B, or 135; together with enough upper division units in related subjects to total 24 units, these to be selected from the upper division Bacteriology; Botany 119, 126; Chemistry 106, 107, 109, 136; Public Health 160A; Zoology 101A, 101B, 111, 111C, 111H, 119, 132A, 151. Courses are to be chosen with the approval of the department.

Bacteriology majors who plan a career in public health microbiology or clinical laboratory technology are required to take Bacteriology 105 and the following additional courses: Bacteriology 107, 108, 109; Botany 126; Chemistry 106 instead of 9; Zoology 111, 111C, 111H. Bacteriology 106 not required.

* Starting in the fall semester of 1964 a new year course in general biology (5-5), will be substituted for Zoology 1A-1B. The Zoology 1A-1B sequence will start for the last time in the fall semester of 1963.

Subsequent to graduation, an apprenticeship in an approved laboratory is required for eligibility to take the State examination for a license in either of the above fields.

Graduate Study.—The Department of Bacteriology offers a program of study and research leading to the M.A. and Ph.D. degrees in microbiology. More detailed information may be found on page 161 and under Microbiology, page 421.

Lower Division Courses

1. **Introductory Bacteriology. (3) I, II.** Mr. Rittenberg
Lecture, 3 hours. Concurrent enrollment in 4 or 5 required. Prerequisite: Chemistry 1A or 2A. Primarily for students majoring in a biological science.
A general introduction to bacteriology.
4. **Laboratory Course in Introductory Bacteriology. (2) I, II.** Mr. Sercarz, Mr. Rosenberg
Course 1 must be taken concurrently. Prerequisite: Chemistry 1A or 2A.
5. **Laboratory Course in Introductory Bacteriology. (2) I, II.** Mr. Romig, Mr. Rittenberg
Course 1 must be taken concurrently. Prerequisite: Chemistry 1A.
An introduction to laboratory techniques and experimentation for the unusually well-qualified student. Enrollment to be limited. Admission, by permission of instructor, based on performance in previous science courses.
6. **General Bacteriology. (2) I, II.** Mr. Jann, ———
Lecture, two hours. Not open to students who have had course 1. No prerequisites.
A cultural course for nontechnical students, with emphasis on the significance of bacteria in our daily environment and as agents of disease.

Upper Division Courses

103. **Advanced Bacteriology. (5) I.** Mr. Pickett
Lecture and discussion, three hours; laboratory, six hours. Prerequisite: course 1; recommended: course 106.
The more advanced principles of the life activities, growth, and morphology of bacteria. The etiology of disease.
105. **Serology. (4) II.** Mrs. Ball
Lecture, one hour, laboratory, nine hours. Prerequisite: course 103 and consent of the instructor.
The theory and practice of serological methods.
106. **Physiology of Bacteria. (3) I.** Mr. Martinez
Prerequisite: course 1 and Chemistry 108A–108B.
Life processes of microorganisms with special emphasis on growth and reproduction.
- *106C. **Physiology of Bacteria Laboratory. (2) I.** Mr. Martinez
Concurrent or prerequisite: course 106.
107. **Public Health Bacteriology. (4) I.** Mrs. Ball
Lecture, one hour; laboratory, nine hours. Prerequisite: course 103. Designed for students who plan careers in the fields of public health and clinical bacteriology.
A study of diagnostic procedures.
108. **Hematology. (2) II.** Mr. Fishkin
Lecture, one hour; laboratory, two hours. Prerequisite: senior standing and consent of the instructor.
Diagnostic procedures used for the study of normal and pathological blood cells.

* Not to be given, 1963–1964.

109. General Virology. (2) II.

Prerequisite: course 103.

An introduction to the plant and animal viruses including the bacteriophages and the rickettsiae. Considerations of techniques, inclusion bodies, pathogenesis, immunity, and virus-host relationships.

114. Industrial Microbiology. (4) II.

Mr. Jann

Lecture and laboratory. Prerequisite: course 106.

The study of microorganisms of industrial importance, including methods of growth, isolation, identification, and conditions affecting their efficiencies.

120. Bacterial Genetics. (2) II.

Mr. Romig

Prerequisite: course 106, Chemistry 108A and 108B, or consent of the instructor.

A study of the occurrence, induction, and modification of mutations; the cytological basis of bacterial genetics; nature and action of the genetic material; and the modes for transfer of hereditary traits in microorganisms.

120C. Bacterial Genetics Laboratory. (2) II.

Mr. Romig

Concurrent or prerequisite: course 120.

***125. Determinative Bacteriology. (3) I.**

Mr. Romig

Lecture, one hour; laboratory, six hours. Prerequisite: course 103.

The basic biological characteristics and taxonomic relationships of the Schizomycetes.

130. Immunochemistry. (4) II.

Mr. Sercarz

Lecture, two hours; laboratory, six hours. Prerequisite: course 103; recommended: Chemistry 108A and 108B.

Advanced studies in microbial parasitism, including factors affecting host resistance.

195. Proseminar. (2) I, II.

The Staff

Prerequisite: course 103. Course 195, or equivalent, is a prerequisite for graduate research in microbiology (Microbiology 299).

Oral and written reports on current research in microbiology.

199. Special Studies in Bacteriology. (2-5) I, II.

The Staff

Prerequisite: senior standing and consent of the department prior to registration.

MICROBIOLOGY**Graduate Courses****206. Subcellular Structure and Function in Bacteria. (3) II.**

Mr. Martinez

Prerequisite: Chemistry 108A-108B.

A discussion of the structure, chemical nature, and function of subcellular elements of bacteria.

208. Macromolecules from Microorganisms. (3) II.

Mr. Rosenberg

Prerequisites: Chemistry 108A-108B.

Selected topics in the isolation, chemical structure and biosynthesis of nucleic acids, proteins and carbohydrates of microorganisms.

210. Advanced Bacterial Physiology. (3-3) Yr.

Prerequisite: Bacteriology 106.

Physiological activities of microorganisms in the light of more advanced principles.

212. Bacterial Viruses. (2) II.

Lecture one hour; laboratory five hours. Prerequisite: course 120; college mathematics, one year; or consent of the instructor.

Laboratory and lectures on the nature of bacterial viruses. The course will include a study of methods of assay and purification, growth, kinetics, radio-biology, and will stress genetics.

***225. Topics in Bacterial Genetics. (2) I.**

Mr. Romig

Prerequisites: Bacteriology 120, 120C.

* Not to be given, 1963-1964.

- 251A-251B. Seminar in Microbiology. (1-1) Yr. Mr. Ball, Mr. Plunkett
 252. Seminar in Medical Microbiology. (1) II. Mr. Pickett
 *253. Seminar in Immunology. (1) I. Mrs. Ball
 254. Seminar in Microbial Physiology. (1) I. Mr. Jann
 255. Seminar in General Virology. (1) I. ———
 256. Seminar in Microbial Genetics. (1) II. Mr. Romig
 299. Research on Thesis or Dissertation. (2-6) I, II. The Staff

BIOCHEMISTRY

Graduate Study.—Programs of study and research leading to the M.S. and Ph.D. degrees in the general area of biochemistry are offered in the Department of Biological Chemistry, School of Medicine (see page 210) in the Department of Chemistry (see page 237) and in the Department of Botany and Plant Biochemistry (see page 216). More detailed information regarding admission requirements and opportunities for graduate studies in these programs may be obtained by writing to the Graduate Adviser in the Department in which you are interested.

BIOLOGICAL CHEMISTRY

(Department Office, 33-257 Center for the Health Sciences)

- Ralph W. McKee, Ph.D., *Professor of Biological Chemistry.*
 James F. Mead, Ph.D., *Professor of Biophysics and Nuclear Medicine and Professor of Biological Chemistry.*
 Joseph F. Nyc, Ph.D., *Professor of Biological Chemistry.*
 John G. Pierce, Ph.D., *Professor of Biological Chemistry (Vice-Chairman of the Department).*
 †Sidney Roberts, Ph.D., *Professor of Biological Chemistry.*
 Emil L. Smith, Ph.D., *Professor of Biological Chemistry (Chairman of the Department).*
 Marian E. Swendseid, Ph.D., *Professor of Nutrition and Biological Chemistry.*
 Max Dunn, Ph.D., *Emeritus Professor of Chemistry and Biological Chemistry.*
 Wendell H. Griffith, Ph.D., *Emeritus Professor of Biological Chemistry.*
 Robert M. Fink, Ph.D., *Associate Professor of Biological Chemistry.*
 Isaac Harary, Ph.D., *Associate Professor of Biophysics and Nuclear Medicine in Residence and Associate Professor of Biological Chemistry in Residence.*
 David R. Howton, Ph.D., *Associate Professor of Biophysics and Nuclear Medicine in Residence and Associate Professor of Biological Chemistry in Residence.*
 Albert Light, Ph.D., *Associate Professor of Biological Chemistry.*
 Richard F. Riley, Ph.D., *Associate Professor of Radiology and Associate Professor of Biological Chemistry.*
 John E. Snoke, Ph.D., *Associate Professor of Biological Chemistry.*
 Irving Zabin, Ph.D., *Associate Professor of Biological Chemistry.*

* Not to be given, 1963-1964.

† Absent on leave, 1963-1964.

Requirements for Admission to Graduate Status

1. For general requirements, see pages 30-32 of the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION.
2. Minimum departmental requirements:
 - A. Bachelor's degree in agriculture, biochemistry, botany, chemistry, microbiology, physical-biological science, or zoology.
 - B. Courses, or their equivalent, as follows: General Chemistry (Chemistry 1A-1B); Quantitative Analysis (Chemistry 5A); Physical Chemistry (Chemistry 109 or 110A-110B), with at least 2 additional units of laboratory; Organic Chemistry (Chemistry 112A-112B); Analytic Geometry and Calculus (at least equivalent to Mathematics 37); General Physics (Physics 2A-2B); General Biology (Zoology 1A-1B, or Bacteriology 1 and Botany 1).
 - C. In the admission of students, preference will be given those whose curricula include the following courses, or their equivalent: Advanced Quantitative Analysis (Chemistry 5B); Qualitative Organic Analysis (Chemistry 103); General Biochemistry (Chemistry 108A-108B); Physical Chemistry (Chemistry 110A-110B, Chemistry 111); Analytical Geometry and Calculus (Mathematics 3A-3B, Mathematics 4A); Statistics (Statistics 1); General Zoology (Zoology 1A-1B).

Requirements for the Master of Science Degree

1. For general requirements, see pages 162-165 of this bulletin.
2. Departmental requirements:
 - A. A reading knowledge of German is required. *The requirement must be satisfied during the first semester of graduate registration.*
 - B. *Thesis Plan I* must be completed. Under this plan 20 units are required in upper division and graduate courses, including 6 to 10 units of Biological Chemistry 290 (research) and a minimum of 6 units in graduate courses other than Biological Chemistry 290. Biological Chemistry 101A-B-C, or the equivalent, may not be counted as part of the required 20 units.
 - C. Candidates for the master's degree may be required to pass written and oral examinations.

Requirements for the Doctor of Philosophy Degree

1. For general requirements, see pages 165-169 of this bulletin.
2. Departmental requirements:
 - A. A reading knowledge of French and German is required. *The requirement must be satisfied before the end of the third semester in residence.*
 - B. Course of study: The course of study for an advanced degree will be arranged according to the needs of the individual student. Normally, all candidates will be expected to register for departmental courses 220, 242, 251, and 290. Additional courses in the major and other fields will be taken in accordance with the recommendations of the guidance committee.

Upper Division Courses

101A. Biological Chemistry. (4) I.

The Staff

Required in the medical curriculum; consent of the instructor is required for nonmedical students.

101B. Biological Chemistry. (3) II.

The Staff

Required in the medical curriculum; consent of the instructor is required for nonmedical students.

101C. Biological Chemistry Laboratory. (3) II. Mr. McKee and the Staff

Required in the medical curriculum; consent of the instructor is required for nonmedical students.

Graduate Courses

***210. Regulation of Cell Metabolism. (3) I.**

Mr. Roberts

(Formerly Biochemistry of the Hormones.)

Lecture or recitation 3 hours. Prerequisite: course 101A-101B, or Chemistry 108A-108B, or equivalent. Zoology 118A-118B recommended. Normally offered only in alternate years.

Regulatory processes in animal metabolism; availability of substrate, membrane transport, intracellular compartmentalization and channeling, enzyme activation and inhibition; interaction with hormones and other regulatory factors; relationship to cell function.

212. Protein Structure. (2) I.

Mr. Pierce, Mr. Light, Mr. Smith

Lecture, two hours. Prerequisite: course 101A-101B-101C, or Chemistry 108A-108B, or equivalent. Normally offered only in alternate years.

The chemical and genetic basis of the primary, secondary, and tertiary structure of proteins with emphasis on the protein hormones and stable enzymes. Relationships between structure and biological activity.

220A-220B. Biochemical Preparations and Techniques. (3-3) I, II.

Mr. Nyc and the Staff

Lecture or conference, one hour; laboratory, six hours. Prerequisite: consent of instructor.

Laboratory techniques important in biochemical research; isolation, identification and determination of biologically active compounds. Either or both semesters may be taken.

***221. Neurobiochemistry. (3) II.**

Mr. Roberts and the Staff

Lecture or conference, three hours. Prerequisite: course 101A-101B-101C, or Chemistry 108A-108B, or equivalent. Normally offered only in alternate years.

Chemistry and metabolism of the nervous system with particular emphasis on development, differentiation and function.

230. Cytochemistry. (4) I.

Mr. McKee

Lecture, two hours; laboratory, six hours. Prerequisite: course 101A-101B-101C or Chemistry 108A-108B, or equivalent. Normally offered only in alternate years.

Chemical composition of the animal cell with special reference to identification and significance of sites of chemical activity.

***232. Biochemistry of Nutrition. (2) I.**

Lecture, two hours. Prerequisite: course 101A-101B-101C, or Chemistry 108A-108B, or equivalent.

Nutritional aspects of metabolism of vitamins and minerals; biochemical recognition of dietary deficiencies.

***235. Physical Biochemistry. (3) II.**

Mr. Snoke

Lecture, three hours. Prerequisite: course 101A-101B-101C, or Chemistry 108A-108B or equivalent; Chemistry 110A-110B and 111; consent of instructor.

Physico-chemical principles in biochemical systems including the physical properties of macromolecules and thermodynamic and kinetic characteristics of metabolic reactions.

* Not to be given, 1963-1964.

242. Advanced Metabolism. (3) I.

Mr. Zabin, Mr. Harary

Lecture, three hours. Prerequisite: course 101A-101B-101C, or Chemistry 108A-108B, or equivalent.

An advanced treatment of methods for the study of the biogenesis and degradation of carbon compounds *in vivo* and *in vitro*; kinetics and energetics of metabolic systems in animals.**245. Biochemistry of Lipides. (2) II.**

Mr. Mead, Mr. Howton

Lecture and conference, two hours. Prerequisites: course 101A-101B-101C, or Chemistry 108A-108B, or equivalent.

Biochemistry of lipides including methods of isolation, characterization and determination; role of lipides in animal metabolism.

248. Biochemistry of Nucleoproteins. (2) II.

Mr. Fink

Lecture and conference, two hours. Prerequisite: course 101A-101B-101C, or Chemistry 108A-108B, or equivalent.

Biogenesis, function and catabolism of nucleotides and nucleoproteins and their structure, self-reproducibility and mutagenesis.

251A-251B. Seminar in Biological Chemistry. (1-1) I, II.

Mr. Snoko

Oral reports by graduate students on topics selected from current biochemical literature.

***261A-261B. Seminar in Biochemistry of Nutrition. (1-1) I, II**

Prerequisites: course 101A-101B-101C, or the equivalent, and consent of instructor. Recommended: course 232.

Discussion of research reported in the current literature and dealing with the relation of food to metabolism, with emphasis on the biochemical basis of nutritional requirements during growth and aging.

290A-290B. Research in Biological Chemistry. (2-6; 2-6) I, II. The Staff**BIOPHYSICS AND NUCLEAR MEDICINE**

(Department Office, B1-153 Center for the Health Sciences)

Alexander Kolin, Ph.D., *Professor of Biophysics.*James F. Mead, Ph.D., *Professor of Biophysics and Nuclear Medicine and Professor of Biological Chemistry.*Joseph F. Ross, M.D., *Professor of Biophysics and Nuclear Medicine (Chairman of the Department) and Professor of Medicine.*Wilbur A. Selle, M.D., Ph.D., *Professor of Biophysics.*Stafford L. Warren, M.D., *Professor of Biophysics.*Albert W. Bellamy, Ph.D., *Emeritus Professor of Biophysics.*Mary A. B. Brazier, Ph.D., *Professor of Biophysics and Nuclear Medicine, Anatomy and Physiology in Residence.*Norman S. Simmons, D.M.D., Ph.D., *Professor of Biophysics and Nuclear Medicine and Oral Medicine in Residence.*George V. Taplin, M.D., *Professor of Biophysics and Nuclear Medicine, and Radiology in Residence.*Marcel Verzeano, M.D., *Associate Professor of Biophysics.*Isaac M. Harary, Ph.D., *Associate Professor of Biophysics and Nuclear Medicine, and Biological Chemistry in Residence.*Thomas G. Hennessey, M.D., Ph.D., *Associate Professor of Biophysics and Nuclear Medicine, and Radiology in Residence.*David R. Howton, Ph.D., *Associate Professor of Biophysics and Nuclear Medicine, and Biological Chemistry in Residence.*

* Not to be given, 1963-1964.

Norman S. MacDonald, Ph.D., *Associate Professor of Biophysics and Nuclear Medicine, and Radiology in Residence.*

Ralph E. Nusbaum, Ph.D., *Associate Professor of Biophysics and Nuclear Medicine in Residence.*

Lawrence S. Myers, Ph.D., *Assistant Professor of Biophysics and Nuclear Medicine in Residence and Assistant Professor of Radiology in Residence.*

Ole A. Schjeide, Ph.D., *Assistant Professor of Biophysics and Nuclear Medicine in Residence and Assistant Professor of Radiology in Residence.*

Benedict Cassen, Ph.D., *Clinical Professor of Biophysics and Nuclear Medicine.*

Kathryn F. Fink, Ph.D., *Associate Clinical Professor of Biophysics and Nuclear Medicine.*

———, *Associate Biophysicist in Residence.*

Admission to Graduate Status

In addition to fulfillment of the requirements of the Graduate Division, applicants for admission to graduate status in biophysics and nuclear medicine should have adequate training and experience in biology, physics, chemistry, and mathematics. Completion of the following course of study will provide satisfactory preparation for the advanced degree:

a. Mathematics:

Analytic Geometry, 3 units

Differential and Integral Calculus, 9 units

Differential Equations or equivalent, 3 units

Working understanding of statistics, such as obtained in a 3-unit course

b. Chemistry:

General Chemistry, 10 units

Quantitative, 3 units

Organic, 3 units

Physical Chemistry, 6 units

Biochemistry (Chemistry 108A–108B and 136, 9 units; or 135 and 136, 6 units); or Biological Chemistry in the School of Medicine.

c. Physics: 23 units of upper division work, including the following courses or their equivalents:

Analytic Mechanics (105), 3 units

Physical Optics (108B), 3 units

Electronics (116A, 116C), 5 units

Atomic Physics (121), 3 units

Nuclear Physics (124A), 3 units

Atomic and Nuclear Physics Laboratory (124C), 1 unit; or Physical Optics Laboratory (108C), 1 unit.

d. Biology: 20 units of upper division and graduate work, including courses in morphology and physiology.

Requirements for the Degree of Master of Science

1. For the general requirements, see pages 162–165.

2. A foreign language is not required for the master's degree.

Requirements for the Doctor's Degree

1. For the general requirements, see pages 165-169.

2. Departmental requirements: A program of study will be recommended by the departmental committee on graduate study on the basis of the students' completion of and record of achievement in the basic course of study noted above. When indicated additional upper division or graduate courses necessary to fulfill his specific needs will be required.

Upper Division Courses**101. Elements of Medical Biophysics. (2) II.**

Mr. Ross and the Staff

Lectures on the biophysics of the whole organism, on molecular and cellular function, and on the relation of biophysics to the diagnosis and treatment of disease.

199. Special Studies. (1-3) I, II.

The Staff

Prerequisite: consent of the instructor.

Graduate Courses**240. Electrodiagnostic Techniques. (1) I.**

Mr. Selle

The principles of electrocardiography, electromyography, electroencephalography, electrophysiology, and other electronic methods involving a consideration of electrophysics, action potentials, and techniques and procedures of taking records, together with a systematic description of mechanisms. Certain periods will be devoted to experimental work and to taking of records on hospital patients.

241A-241B. Molecular Biophysics. (2-2) Yr.

The Staff

An adaptation of our knowledge of molecular structure to biological concepts of protoplasm and extraneous cell parts. Molecular level considerations are related to the atomic level below and the micellar level above. Electrical aspects as well as structural are included.

242A-242B. Advanced General Biophysics. (2-2) Yr.

Mr. Kolin and the Staff

Biophysical principles and methods applied to the study of biological phenomena and medical research.

251A,B,C,D. Seminar in Biophysics. (1-1-1-1) I, II.

Mr. Mead

Prerequisite: consent of the instructor.

It is anticipated that all graduate students in the department will elect this seminar after the first year of residence. Oral reports by the graduate student on important topics suggested from the current literature in *Biophysics* and related fields.

260. Seminar on the Physics of Viruses. (1-2) I.

The Staff

A review of the results of the application of physical concepts and physical methods to the study of viruses.

262. Seminar in Neurobiophysics. (1-2) II.

The Staff

A study of the application of new concepts and methods in molecular and colloidal biophysics to the understanding of the ultrastructure and electrical properties of neurons.

265A-265B. Cellular Biophysics. (1-2) I, II.

The Staff

A survey of living material on subcellular levels of organization, with emphasis on physical concepts. General topics covering the area of cellular and molecular biophysics, differing each semester for three consecutive years.

270A-270B. Seminar in Biomedical Aspects of Nuclear Radiation.

(1-1) I, II.

Mr. Ross and the Staff

A seminar covering current topics of interest in the biomedical aspects of nuclear radiation, with emphasis on student participation in the consideration of these topics.

297. Special Problems for Graduate Students. (1-4) I, II.

The Staff

Any properly qualified graduate student who wishes to pursue a problem through reading or advanced study may do so if his proposed project is acceptable to a member of the staff.

299. Research in Biophysics. (2-8) I, II.

The Staff

401. Instrumentation for Research in Biology and Medicine. (1) II.

Prerequisite: consent of the instructor.

The Staff

Instruction in the theory and practice of modern instrumentation for research.

■ BOTANY AND PLANT BIOCHEMISTRY

(Department Office, 320 Botany Building)

David Appleman, Ph.D., *Professor of Plant Physiology.*Jacob B. Biale, Ph.D., *Professor of Plant Physiology.*Karl C. Hamner, Ph.D., *Professor of Botany.*F. Harlan Lewis, Ph.D., *Professor of Botany.*

Mildred E. Mathias (Mildred Mathias Hassler), Ph.D., *Professor of Botany and Director of the Botanical Gardens.*

Bernard O. Phinney, Ph.D., *Professor of Botany.*Orda A. Plunkett, Ph.D., *Professor of Botany.*† Charles A. Schroeder, Ph.D., *Professor of Botany.*Samuel G. Wildman, Ph.D., *Professor of Botany.*Carl C. Epling, Ph.D., *Emeritus Professor of Botany.*Arthur W. Haupt, Ph.D., *Emeritus Professor of Botany.*Flora Murray Scott, Ph.D., *Emeritus Professor of Botany.*George G. Laties, Ph.D., *Associate Professor of Plant Physiology.*Henry J. Thompson, Ph.D., *Associate Professor of Botany (Life Sciences).*Wilbur T. Ebersold, Ph.D., *Assistant Professor of Botany.*Harold A. Mooney, Ph.D., *Assistant Professor of Botany.*Bruce C. Parker, Ph.D., *Assistant Professor of Botany.*———, *Assistant Professor of Botany.*

Letters and Science List.—All undergraduate courses in Botany are included in the Letters and Science List of Courses.

Preparation for the Major.—Botany 1 or Biology 1A-1B, Chemistry 1A-1B, 8 or 112A; Physics 2A-2B.

The Major.—Eighteen units of upper division courses in Botany including 104, 107, 140, 150, plus 6 units of upper division courses in botany or from the following list: Bacteriology 106, Chemistry 108A, Paleontology 120, Zoology 100A, 103, 107, 109A, 110, 112, 118A, 132A, 132C, 134, 142, and 150.

Advanced Degrees.—Admission to the graduate program requires an undergraduate major in a natural science. The department offers work leading to the Master of Arts in Botany and the Doctor of Philosophy in Plant Science degrees with opportunities for specialization in: anatomy, ecology, evolution, genetics, morphology, mycology, physiology, systematics, and virology. For details see under Plant Science, page 500.

† Absent on leave, 1963-1964.

Students with a botany major may work toward a general secondary credential with the field major of plant science or life science and general science.

Lower Division Courses

11. General Botany. (5) I, II.

Mr. Ebersold, Mr. Hamner

Lecture, three hours; laboratory, six hours.

An introduction to the various fields of plant science, including anatomy, morphology, physiology, and genetics.

3. Field Botany. (4) II.

Mr. Mooney

Lecture, two hours; laboratory or field, six hours.

An introduction to the life habits, interrelationships, and classification of native and ornamental plants.

Upper Division Courses

101. Introductory Botany. (3) I, II.

Mr. Hamner

Lecture and demonstration, three hours.

An introduction to botany for non-biology majors.

102. The Soil as a Natural Resource. (2) II.

Mr. Appleman

Lecture, two hours. Prerequisites: Chemistry 1A or 2A or high school chemistry.

Designed for students who desire a general knowledge of soils, soil resources, soil conservation and productivity. Cannot be used for credit in the soil science major.

*103. Plants in Relation to Man. (2) II.

Mr. Schroeder

Lecture and demonstration; two hours.

Origin, geographic distribution, and history of economic plants with emphasis on morphology, classification, ecology, and utilization by man.

104. Plant Structure. (4) I.

Mr. Parker

Lecture, two hours; laboratory, six hours. Prerequisite: Biology 1A-1B or Botany 1. Required of majors.

Cytology and differentiation in vascular and non-vascular plants with emphasis on the dynamic aspects of cell and tissue differentiation.

105. Algae and Bryophytes. (4) II.

Mr. Parker

Lecture, two hours; laboratory, six hours. Prerequisite: Biology 1A-1B or equivalent.

The structure, development, and phylogenetic relationships of the principal orders of algae, liverworts, and mosses, including methods of isolation and culture.

107. Introduction to Plant Physiology. (4) II.

Mr. Wildman

Lecture, two hours; laboratory, six hours. Prerequisite: Biology 1A-1B or equivalent, Chemistry 1A-1B, Chemistry 8 or equivalent. Required of majors.

The fundamental principles of plant growth, development, and metabolism, with emphasis on biochemical mechanisms.

108. Plant Morphogenesis. (2) II.

Lecture, two hours. Prerequisite: course 104; course 107 recommended.

Growth in relation to development, morphogenetic factors, and the phenomena of morphogenesis (correlation, polarity, symmetry, differentiation and regeneration).

109. Plant Morphogenesis Laboratory. (2) II.

Laboratory, six hours. Prerequisite or concurrent: course 108.

Laboratory experiments to illustrate the principles of plant morphogenesis.

* Not to be given, 1963-1964.

† Starting in the fall semester of 1964 a new year course in general biology (5-5) will be substituted for Botany 1. It will serve as the introductory course for students majoring in bacteriology, botany, and zoology. Botany 1 will be given for the last time in the spring semester of 1964.

***113. Physiological Plant Anatomy. (3) II.**

Mr. Hamner

Lecture, one hour; laboratory, six hours. Prerequisite: courses 104, 107. Offered in alternate years.

A survey of the tissues of the higher plants in relation to function.

119. Mycology. (3) I.

Mr. Plunkett

Lecture, one hour; laboratory, six hours. Prerequisite: Biology 1A-1B, or equivalent. Structure, development, and classification of the important genera and species of fungi.

126. Medical Mycology. (4) II.

Mr. Plunkett

Lecture, two hours; laboratory, six hours. Prerequisite: Biology 1A-1B or equivalent. An introduction to the morphology, physiology, and taxonomy of the pathogenic fungi which cause disease in man and the domestic animals.

131. Physiology of Fungi. (3) I.

Mr. Plunkett

Lecture, one hour; laboratory, six hours. Prerequisite: courses 119 or 126 and Chemistry 8.

A survey of the interrelation of fungi to their environment, including factors influencing growth, nutrition, metabolism, and reproduction.

140. Plant Genetics. (4) I.

Mr. Phinney

Lecture, three hours; laboratory, three hours. Prerequisite: Biology 1A-1B or equivalent. Required of majors.

Principles of heredity. Laboratory experiments with plant and animal materials.

***141. Plant Cytogenetics. (2) I.**

Mr. Lewis

Lecture, two hours. Prerequisite: course 140 or Zoology 130A. Offered in alternate years. The fundamentals of cytogenetics. Heredity as related to cytogenetical phenomena, with special reference to plants.

***141C. Plant Cytogenetics Laboratory. (1) I.**

Mr. Lewis

Laboratory, three hours. Prerequisite or concurrent: course 141. Offered in alternate years.

Laboratory in plant cytogenetics.

142. Biochemical Genetics. (2) I.

Mr. Phinney

Lecture, two hours. Prerequisite: introductory course in genetics, and Chemistry 8.

Aspects of gene action determined through the study of metabolic pathways in fungi and chemical systems in higher plants. The evaluation of the gene as reduplicating unit at the chemical level.

150. Plant Systematics and Ecology. (4) II.

Mr. Lewis, Mr. Mooney, Mr. Thompson, Miss Mathias

Lecture, two hours; laboratory, six hours. Prerequisites: Biology 1A-1B or equivalent. Required of majors.

A study of the variation and distribution of plants with an emphasis on operative mechanisms at the population level.

151. Taxonomy of Seed Plants. (3) I.

Miss Mathias

Lecture, one hour; laboratory, six hours. Prerequisite: consent of the instructor.

A survey of the orders and families commonly met with in the native and cultivated floras.

***152. Advanced Systematic Botany. (3) II.**

Mr. Lewis, Mr. Thompson

Lecture, one hour; laboratory or field, six hours. Prerequisite: course 150, elementary genetics, and consent of the instructor. Offered in alternate years.

Field and laboratory study of natural variation in relation to systematics.

***153. Determinants of Evolution. (2) I.**

Mr. Lewis

Lecture and discussion, two consecutive hours. Prerequisite: consent of the instructor

The processes of evolutionary change in natural populations. A student may concurrently initiate an experimental project as Botany 199.

* Not to be given, 1963-1964.

- *155. Distribution and History of Angiosperms. (2) II.** Miss Mathias
Lecture, two hours. Prerequisite: consent of the instructor.
A comparative study of the distributional patterns of angiosperm families and their historical development.
- 160. Plant Physiology. (3) I.** Mr. Biale, Mr. Laties, Mr. Wildman
Lecture and discussion, three hours. Prerequisite: consent of the instructor. Recommended: course 107, Chemistry 108A.
A critical analysis of selected topics pertaining to metabolism and growth of plants, with emphasis on the experimental approach.
- 161. Experiments in Plant Physiology. (2) I.** Mr. Biale, Mr. Laties, Mr. Wildman
Laboratory, six hours. Prerequisite: course 160 to be taken concurrently, and consent of instructor. Designed primarily for students expecting to do research in the botanical or horticultural sciences, or other research involving plant physiology and plant biochemistry.
An advanced course illustrating the experimental study of topics considered in Botany 160.
- *171. Advanced Plant Ecology. (3) I.** Mr. Mooney
Lecture, two hours; laboratory, three hours. Prerequisite: introductory course in plant ecology or consent of instructor.
A detailed consideration of the principles involved in the quantitative description and analysis of environments, plant responses, and community structure.
- *190. Research Methods in Morphology. (4) I.** Mr. Schroeder
Lecture, one hour; laboratory, nine hours. Prerequisite: consent of the instructor. Offered in alternate years.
The theory and methods of preparing plant tissues and materials for microscopic study.
- 195A-195B. Proseminar in Botany. (2-2) Yr.** Mr. Phinney
Lecture, two hours. Prerequisite: senior standing and consent of the instructor.
Oral reports and discussions on research topics of interest to biologists.
- 199. Special Studies. (2-4) I, II.** The Staff
Prerequisite: senior standing and consent of the instructor. May be repeated for a total of 6 units.

Graduate Courses

- 201A-201B. Principles and Theories of Botany. (2-2) Yr.** Mr. Parker
Lecture, two hours. Prerequisite: major in botanical science.
A point of orientation for advanced graduate research.
- 211A*-B*-C*-D*-E-F. Advanced Plant Physiology. (2) I, II.** Mr. Appleman, Mr. Biale, Mr. Hamner, Mr. Laties, Mr. Wildman
Lectures, two hours. Open to all students interested in plant physiology; may be entered any semester.
A survey of the entire field of plant physiology, covering a period of three years. Each semester of the sequence is devoted to the intensive study of primarily one of the following topics: photosynthesis, growth and growth regulators, respiratory metabolism, nitrogen and intermediary metabolism, mineral nutrition and transport, development and reproduction.
- 221. Orientation in Taxonomic Research. (1) II.** Miss Mathias
Laboratory, three hours. Prerequisite: consent of the instructor.
A course for graduate students in taxonomic botany designed to acquaint them with the bibliography of taxonomy, herbarium methods, problems in nomenclature, and preparation of monographs, revisions, and floras, including interpretation and construction of descriptions and keys and their illustration.
- 252A-252B. Seminar in Plant Ecology. (1-1) Yr.** Mr. Mooney
- 253A-253B. Seminar in Plant Anatomy. (1-1) Yr.** _____

* Not to be given, 1963-1964.

220 / BOTANY; BUSINESS ADMINISTRATION

254A-254B. Seminar in Plant Physiology. (1-1) Yr.

Mr. Appleman, Mr. Biale, Mr. Hamner, Mr. Laties, Mr. Wildman
Required of graduate students enrolled in Plan B.

255A-255B. Seminar in Systematics. (1-1) Yr.

Miss Mathias, Mr. Lewis, Mr. Thompson

256A-256B. Seminar in Plant Morphology. (1-1) Yr.

Mr. Schroeder

257A-257B. Seminar in Mycology. (1-1) Yr.

Mr. Plunkett

258A-258B. Seminar in Genetics. (1-1) Yr.

Mr. Ebersold, Mr. Phinney

Students may enter in any semester.

Special topics covering all aspects of genetics, differing each semester for three years.

*259A-259B. Seminar in Evolutionary Genetics. (1-1) Yr.

Mr. Lewis

277A-277B. Directed Studies. (2-4) I, II.

The Staff

278A-278B. Research in Botany. (2-6; 2-6) Yr.

The Staff

LIFE SCIENCES

1A-1B. Fundamentals of the Life Sciences. (3-3) Yr.

Mr. Furgason, Mr. Thompson

This course satisfies the same prerequisite as Botany 1.

Related Courses in Other Departments or Divisions

Art 149A-B-C-D. Biological Illustration.

Bacteriology 120. Bacterial Genetics.

Floriculture and Ornamental Horticulture 148. Design and Analysis of Horticultural Experiments.

Geography 118. Plant Geography.

Paleontology 120. Paleobotany.

Zoology 140. Development of Biological Ideas.

Zoology 234. Electromicroscopy and Ultrastructure.

These and other courses in the departments listed, as well as in chemistry, meteorology, oceanography, physics, and plant pathology, may be of particular interest to botany majors.

BUSINESS ADMINISTRATION

(Department Office, 3250 Graduate School of Business Administration)

Ralph M. Barnes, Ph.D., *Professor of Production Management and Engineering.*

Alexander Boldyreff, Ph.D., *Professor of Business Administration and Engineering.*

George W. Brown, Ph.D., *Professor of Business Administration and Engineering.*

William F. Brown, Ph.D., *Professor of Marketing.*

Elwood S. Buffa, Ph.D., *Professor of Operations Management.*

Joseph D. Carrabino, Ph.D., *Professor of Production and Operations Management.*

Albert B. Carson, Ph.D., C.P.A., *Professor of Accounting.*

* Not to be given, 1963-1964.

- Fred E. Case, D.B.A., *Professor of Real Estate and Urban Land Economics.*
 Ralph Cassady, Jr., Ph.D., *Professor of Marketing.*
 James Gillies, Ph.D., *Professor of Real Estate and Urban Land Economics.*
 Leo Grebler, Ph.D., *Professor of Real Estate and Urban Land Economics.*
 Neil H. Jacoby, Ph.D., LL.D., *Professor of Business Economics and Policy.*
 Raymond J. Jessen, Ph.D., *Professor of Business Administration.*
 Harold Koontz, Ph.D., *Mead Johnson Professor of Business Policy and Transportation.*
 Jacob Marschak, Ph.D., *Professor of Business Administration.*
 Wayne L. McNaughton, Ph.D., *Professor of Business Administration.*
 Frederic Meyers, Ph.D., *Professor of Personnel Management and Industrial Relations and Associate Director, Institute of Industrial Relations.*
 Cyril J. O'Donnell, Ph.D., *Professor of Business Organization and Policy.*
 George W. Robbins, M.B.A., *Professor of Marketing (Chairman of the Department).*
 Harry Simons, M.A., C.P.A., *Professor of Accounting.*
 R. Clay Spowls, Ph.D., *Professor of Business Statistics.*
 George A. Steiner, Ph.D., *Professor of Business Administration.*
 Robert Tannenbaum, Ph.D., *Professor of Personnel Management and Industrial Management.*
 J. Frederick Weston, Ph.D., *Professor of Business Economics and Finance.*
 John C. Clendenin, Ph.D., *Emeritus Professor of Finance.*
 Ira N. Frisbee, M.B.A., C.P.A., *Emeritus Professor of Accounting.*
 Howard S. Noble, M.B.A., C.P.A., LL.D., *Emeritus Professor of Accounting.*
 Theodore A. Andersen, Ph.D., *Associate Professor of Business Economics and Finance.*
 Ralph C. Hoerber, J.D., Ph.D., *Associate Professor of Business Law.*
 James R. Jackson, Ph.D., *Associate Professor of Business Administration.*
 Erwin M. Keithley, Ed.D., *Associate Professor of Business Administration.*
 Paul Kircher, Ph.D., C.P.A., *Associate Professor of Accounting.*
 Fred Massarik, Ph.D., *Associate Professor of Personnel Management.*
 Alfred Nicols, Ph.D., *Associate Professor of Business Economics.*
 Frank E. Norton, Ph.D., *Associate Professor of Business Economics.*
 Irving Pfeffer, Ph.D., *Associate Professor of Insurance.*
 John R. Van de Water, J.D., *Associate Professor of Industrial Relations and Business Law.*
 Robert M. Williams, Ph.D., *Associate Professor of Business Economics and Statistics.*
 ———, *Associate Professor of Business Administration.*
 Wilbert E. Karrenbrock, Ph.D., *Associate Professor of Accounting, Emeritus.*
 H. Robert Bartell, Ph.D., *Assistant Professor of Business Administration.*
 Eugene Brigham, Ph.D., *Assistant Professor of Business Administration.*
 Leland S. Burns, Ph.D., *Assistant Professor of Real Estate and Urban Land Economics.*
 James V. Clark, D.B.A., *Assistant Professor of Business Administration.*
 Allan R. Drebin, Ph.D., C.P.A., *Assistant Professor of Accounting.*
 David K. Eiteman, Ph.D., *Assistant Professor of Finance.*
 Richard V. Evans, Ph.D., *Assistant Professor of Business Administration.*
 Richard N. Farmer, Ph.D., *Assistant Professor of Business Administration.*

Lower Division Courses

1A-1B. Elementary Accounting. (3-3) Beginning either semester.

Prerequisite: sophomore standing. 1A is prerequisite to 1B. Mr. Drebin in charge
An introduction to accounting theory and practice. The first semester presents the recording, analyzing and summarizing procedures used in preparing balance sheets and income statements. The second semester includes payroll and tax accounting partnership, and corporation accounts, manufacturing and cost accounting and supplementary statements.

Upper Division Courses

Unless otherwise indicated in the course description, an upper division Business Administration course is open only to students registered in the School of Business Administration or the Graduate School of Business Administration, to students in other colleges or schools the curricula of which officially prescribe the course, and to students who secure the written approval of the Dean of the School of Business Administration. Business Administration 1A-1B and economics 1A-1B or their equivalent are prerequisite to all upper division courses unless specifically waived.

BUSINESS ECONOMICS

100. Business Economics. (3) I, II.

Mr. Brigham, Mr. Huizenga, Mr. Lishan,
Mr. McCall, Mr. Nicols, Mr. Stern

Prerequisite: course 115 (may be taken concurrently). Required of all business administration students in their first semester of residence.

Effort of the enterprise to secure profits, nature of demand for its products. Costs and production. Allocation of resources through competition. Forms of market competition. Relation of size to efficiency. Markets for productive factors. Incentives and growth, capital budgeting.

101. Business Fluctuations and Forecasting. (3) I, II.

Mr. Andersen, Mr. Norton, Mr. Williams

Prerequisite: courses 100, 115; and Economics 135 (may be taken concurrently). Required of all business administration students in their second semester of residence immediately following course 100.

How the enterprise reacts to general economic fluctuations and how its decisions, in turn, affect them. Important forces in past fluctuations. Behavior of indices of business activity. Appraisal of forecasting techniques. Entrepreneurial and public policies to mitigate business fluctuations.

BUSINESS LAW

105B. Business Law. (3) I, II. Mr. Hoeber, Mr. Raza, Mr. Van de Water

Prerequisite: course 18 (Berkeley) or equivalent. Not open to students who have credit for course 108.

Significance and growth of the law; law in its relationship to business, with special emphasis on current problems and on the law of sales, property, negotiable instruments, business organizations, and trade regulations.

108A-108B. Legal Analysis for Business Managers. (2-2) I, II.

See course 108AB for description. Mr. Hoeber, Mr. Raza, Mr. Van de Water

108AB. Legal Analysis for Business Managers. (4) I, II.

Mr. Hoeber, Mr. Raza, Mr. Van de Water

Not open to students who have credit for course 18 (Berkeley) or 105B or equivalents. Must be completed in the first or second semester in residence.

- 101. Plato: Apology and Crito. (3) I.** Mrs. Mohr, Mr. Levine
Prerequisite: courses 1-2.
- 102. Homer: Selections. (3) II.** Mr. Levine, Mrs. Mohr
Prerequisite: course 101.
- 103. Herodotus and Thucydides. (3) I.** Mr. Hoffleit
Prerequisite: courses 101, 102. This course is normally given every other year in alternation with course 107.
- *104. Aeschylus and Sophocles. (3) II.** Mr. Hoffleit
Prerequisite: courses 101, 102. This course is normally given every other year in alternation with course 106.
- *105. Euripides and Aristophanes. (3) I.** Mr. Travis
Prerequisite: courses 101, 102. This course is normally given every other year in alternation with course 107.
- 106. Plato: Republic. (3) II.** Mr. Hoffleit
Prerequisite: courses 101, 102. This course is normally given every other year in alternation with courses 104 and 108.
- *107. Lyric Poets: Selections from Archilochus to Bacchylides. (3) I.** Mrs. Mohr
Prerequisite: courses 101, 102. This course is normally given every other year in alternation with courses 103 and 105.
- *108. Attic Orators: Selections. (3) II.** Mr. Hoffleit
Prerequisite: courses 101, 102. This course is normally given every other year in alternation with course 106.
- 165A-165B. Greek Composition. (1-1) Yr.** Mr. Travis
Prerequisite: course 100B. Course 165A is prerequisite to 165B.
Attic Prose.
- 180A-180B. A Survey of Greek Literature in English. (2-2) Yr.** Mr. Travis
This course is normally given every other year in alternation with Latin 180. A knowledge of Greek is not required. Course 180A and 180B may be taken independently for credit.
A study of the literature of Greece from Homer to Lucian with reading in English.
- 199. Special Studies in Greek. (1-5) I, II.** The Staff
Prerequisite: senior standing and consent of the instructor.

Graduate Courses

- 201A-201B. Homer.** _____
- *201A. The Iliad. (3) I.**
- *201B. The Odyssey. (3) II.**
- 202. Sophocles. (3) I.** Mr. Hoffleit
- 203. Thucydides. (3) II.** Mr. Hoffleit
- *204. Aristophanes. (3) I.** Mr. Travis
- *205. Euripides. (3) II.** Mr. Travis
- 212. Greek Epigraphy. (2) I.** Mr. Clement
Prerequisite: a reading knowledge of Greek and Latin.
A survey of Greek historical inscriptions, chiefly Attic.

* Not to be given, 1963-1964.

Significance and growth of the law; law in its relationship to business, with special emphasis on current problems; coverage of the law of contracts, agencies, sales, property, negotiable instruments, business organizations including the functions of inside and outside counsel and trade regulations.

BUSINESS COMMUNICATIONS

110. Business Communications. (3) I, II. Mr. Keithley, Mrs. Thompson

The development of information, skills, and attitudes as they relate to the types of communication required in the management of enterprises.

STATISTICS AND INFORMATION PROCESSING

115. Business Statistics. (3) I, II. Mr. Jessen, Mr. Sprowls

Lecture, three hours; laboratory, one hour. May be taken to satisfy core course requirement 115C.

Elements of probability, probability distributions, estimation and confidence intervals, tests of significance and of hypotheses, linear regression and correlation, time series analysis and principles of index numbers. Applications to the analysis of and the decision making aspects of everyday and business problems.

116A. Statistical Methods. (3) I. Mr. Jessen

Prerequisite: course 115 or equivalent.

Introduction to analysis of variance, design and analysis of statistical experiments and surveys and statistical quality control; principles of statistical decision considering opportunity loss and costs of uncertainty; data processing and its effect on statistical methods; introduction to evolutionary operations.

116B. Statistical Methods. (3) II. Mr. Jessen

Prerequisite: course 116A.

Elements of analysis of variance, design and analysis of statistical experiments and surveys; multiple regression and correlation, curvilinear regression; analysis of enumeration data; non-parametric methods; analysis problems of time series data.

117. Business Indexes and Time Series. (3) II. Mr. Williams

Prerequisite: course 115 or the equivalent.

Analysis of the business indexes in current use. Index number construction. Methods of measuring business trends and fluctuations, with applications to business forecasting. Serial and multiple correlation. The use of electronic computers in the analysis of business series.

118. Introduction to Operations Analysis. (3) I, II. Mr. Jackson

Prerequisite: courses Mathematics 32B and Business Administration 115.

An introduction to the philosophy, techniques, and business applications of operations analysis, with emphasis on the managerial viewpoint.

119. Electronic Computers in Business. (3) I, II. Mr. Sprowls

Electronic computers in business; the logic of computers; elements of programming and operation; costs; case studies and inspection of computer installations.

ACCOUNTING

120. Intermediate Accounting. (4) I, II. Mr. Drebin, Mr. Simons

Prerequisite: courses 1A-1B. Not open for credit to students who have credit for 120M. Required of all students whose field of concentration is accounting in their first semester in residence. Students with a field of concentration other than accounting must take either course 120 or 120M.

The preparation of the principal accounting statements. Recording valuation, and presentation of cash, temporary investments, receivables, inventories, investments, plant and equipment, intangibles, current obligations, long-term debt, paid-in capital, and retained earnings. Statement analysis. Statement of application of funds.

120M. Managerial Accounting. (3) I, II. Mr. Kircher, Mr. Philips

Prerequisite: course 1A-1B. May be elected by students in fields of concentration other than accounting to meet core course requirements in accounting. Not open to students who have credit for 120.

Basic concepts of accounting; procedures for financial reporting; systems and internal control; cost estimates; budgets; interpretation of administrative reports.

122. Cost Accounting. (3) I, II.**Mr. Carson, Mr. Kircher**

Prerequisite: course 120.

The nature, objectives, and procedures of cost accounting and control; job costing and process costing; accounting for manufacturing overhead; cost budgeting; cost reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis.

124. Advanced Accounting. (5) I, II.**Mr. Drebin, Mr. Simons**

Prerequisite: courses 120, 122.

Partnerships and joint ventures; installment sales and consignment sales; home office and branch relationships; corporate combinations; the preparation of consolidated statements; foreign branches and subsidiaries; receiverships, estates and trusts; governmental units; actuarial science.

127. Federal Tax Accounting. (3) I, II.**Mr. Buttrey**

Prerequisite: course 124, or consent of the instructor.

A study of the fundamentals of federal income taxation, with emphasis on the taxation of individuals.

FINANCE

Economics 135 is required of all students in the School of Business Administration.

130. Business Finance. (3) I, II.**Mr. Andersen, Mr. Bartell, Mr. Brigham, Mr. Holtz, Mr. Weston**

Study of the forms and sources of financing business firms large and small, corporate and non-corporate. The emphasis is on financial planning and decision formulating.

132. Credit Management. (3) I, II.**Mr. Bartell, Mr. Weston**

Prerequisite: course 130.

Development of credit policies in relation to enterprise policy. The place of credit management within the organization. Consideration of factors influencing internal financial management and the formulation of credit extension policy.

133. Investment Principles and Policies. (3) I, II.**Mr. Brigham, Mr. Eiteman, Mr. Holtz**

Problems underlying investment analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to money markets and business fluctuations; security price-making forces; construction of personal investment programs.

134. Investment Analysis. (3) I, II.**Mr. Holtz, Mr. Eiteman**

Prerequisite: courses 120 or 120M or 120G, and 133 or 130G.

Examination of specific industries, companies, and securities from an investment point of view; sources of information; techniques of analysis; measurement of risks, returns, and investment values; evaluation of corporate credit; preparation of reports. Annual reports of business corporations and current cases are studied.

RISK-BEARING AND INSURANCE**135. Principles of Insurance. (3) I, II.****Mr. Goshay, Mr. Pfeffer**

Basic principles of risk and insurance and their applications to business management and personal affairs. Analyses of concepts and methods of handling risks; insurance carriers, contracts, and underwriting; loss prevention and settlement; government insurance programs; economic functions of insurance.

136. Life Insurance. (3) I.**Mr. Goshay, Mr. Houston**

Prerequisite: course 135.

Studies of the nature, and of the business and personal uses of life insurance and annuities; contracts; policy conditions; selection of risks; types of carriers; mathematical bases; group, wholesale, and industrial insurance; organization, management, regulation, taxation, and investment policy of legal reserve companies.

137. Multiple Lines Insurance. (3) II.

Mr. Goshay, Mr. Houston

Prerequisite: course 135.

Studies of the principles and practices of property and casualty insurance. Analysis of insurance functions, including marketing, rate-making, underwriting, claims, and loss prevention. Fire and allied lines, workmen's compensation, liability, automobile, fidelity, and surety bonding are explored.

PRODUCTION AND OPERATIONS MANAGEMENT**140. Elements of Production Management. (3) I, II.**

Lecture, two hours; laboratory, two hours.

Mr. Buffa, Mr. Carrabino

Principles and decision analyses related to the utilization of the factors of production in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. The study of production organizations, analytical models and methods, facilities design, and the design of control systems for production operations.

141. Design of Production Systems. (3) I, II.

Mr. Buffa

Lecture, two hours; laboratory, three hours. Prerequisite: course 140 or consent of the instructor.

Analytical methods effective in the design of plant layout and materials-handling systems; process analysis, operation sequence analysis, economic analysis; location and layout of production departments, maintenance facilities, employee service facilities, offices. Laboratory work involves the design of a complete production system.

142. Production Planning and Control. (3) II.

Mr. Carrabino

Prerequisite: course 140 or consent of the instructor.

A study of inventory theories, production models and programming; scheduling and allocation of the factors of production; quality and cost control; and the design of production information and control systems.

143. Design and Measurement of Work. (4) I, II.

Mr. Barnes

Lecture, two hours; laboratory, four hours. Prerequisite: course 140 or consent of the instructor.

Motion and time study as a management tool. Job simplification and motion economy; motion picture film analysis; analyzing operations; time standards and their determination; performance rating and allowances; measuring work by statistical methods; labor cost control.

144. Analysis of Line Production Systems. (3) I, II.

Mr. Buffa

Prerequisite: course 140 and consent of the instructor.

A study of continuous production systems. The design and operation of manual, mechanized, and automatic production lines; material movement, balancing operations, in-process storage, physiological and psychological factors in task design, support activities, and line flexibility.

147. Job Evaluation and Wage Incentives. (3) I, II.

Mr. Carrabino

Lecture, two hours; laboratory, two hours. Prerequisite: course 140 or consent of the instructor.

Theory, design, evaluation, and administration of wage incentive plans and their interrelationships with job evaluation, methods standardization, and work measurement programs; study of the specialization, enlargement, and optimum design of jobs.

INDUSTRIAL RELATIONS**106. Behavioral Science Foundations. (3) I, II.**

Mr. Clark, Mr. Massarik, Mr. Schmidt, Mr. Shedlin, Mr. Tannenbaum

An introduction to selected concepts in behavioral science, their integration and application to management. Organization, group, cultural, individual behavior in relation to managerial environment and functional fields of business administration. Simulations and demonstrations of behavioral science principles.

150. Elements of Industrial Relations. (3) I, II.

Mr. Fogel, Mr. Massarik, Mr. McLoughlin, Mr. Raza

It is suggested that industrial relations majors take course 106 as a foundation for this course.

Principles and methods of effectively utilizing human resources in organizations. The relationship between social, economic, and other environmental factors and current problems in industrial relations.

152. Leadership Principles and Practice. (3) I, II.

Mr. Clark, Mr. Lasko, Mr. Massarik, Mr. Reisel, Mr. Schmidt,

Prerequisite: senior standing.

Mr. Shedlin, Mr. Tannenbaum

Knowledge and skills leading to effectiveness in interpersonal relations. Understanding oneself as a leader, and others as individuals and as members of working groups. Understanding of group process, including group leadership. Lectures and "sensitivity training" laboratory.

MARKETING

160. Elements of Marketing. (3) I, II. Mr. Huff, Mr. Lupul, Mr. Whiteside

A survey of the major marketing methods, institutions, and practices. The subjects of retailing, wholesaling, distribution channels, marketing legislation, advertising, cooperative marketing, pricing, marketing research, and marketing costs are treated from the standpoint of consumers, middlemen, and manufacturers.

162. Retail Store Management. (3) I, II.

Mr. Frye

Prerequisite: course 160.

A study of retailing from the standpoint of management. Includes the case-method treatment of such problems as buying, sales promotion, inventory planning and control, pricing, style merchandising, and general management problems.

163. Advertising Principles and Policies. (3) I, II.

Mr. Kassarian

Lecture, two hours; laboratory, two hours. Prerequisite: course 160.

The preparation, use, and administration of advertising, emphasizing the use of research to direct and measure the effectiveness of each stage in the operation; the economic and social implications of advertising.

165. Sales Management. (3) I, II.

Mr. Lupul

Prerequisite: course 160 or consent of the instructor.

A case-method study of sales strategy from the managerial viewpoint. Includes merchandising policies, distribution policies, forecasting and planning, sales method and campaigns, pricing, sales department organization, management of the sales force, and budgetary control of sales.

169. Marketing Policies. (4) I, II.

Mr. W. Brown, Mr. Cassidy

Lecture, two hours; laboratory, two hours. Prerequisite: course 160 and senior standing.

Marketing management and research methods, including product and promotional policies, distribution channel decisions, the theory of pricing and price policies, and restrictive legislation. Business cases constitute the basis for class discussion. Laboratory periods provide practice in the application of principles.

TRANSPORTATION AND TRAFFIC MANAGEMENT

170. Physical Distribution Management. (3) I.

Mr. Farmer

Prerequisite: Economics 173 or consent of the instructor.

Principles of purchasing transportation services of all types by business managers. Selection of transportation alternatives. Analysis as a distribution logistics problem of over-all product and spatial activities.

171A-171B. Transportation Management. (3-3) I, II.

Mr. Farmer

Prerequisite: Economics 173 or consent of the instructor.

Management of transportation enterprises. Application of principles and techniques to transport problems. Impact of public policy, industry structure, capital facilities, operations, pricing and intercompany relationships.

REAL ESTATE AND URBAN LAND ECONOMICS

180. Elements of Real Estate and Urban Land Economics. (3) I, II.

Mr. Burns, Mr. Case, Mr. Gillies, Mr. Grebler

An examination of business decision-making as related to logical forces shaping cities and influencing real estate market functions and land uses. Emphasis is placed on decision-making as it relates to appraising, building, financing, managing, marketing, and using urban property.

181. Real Property, Evaluation. (3) I. Mr. Case, Mr. Gillies, Mr. Grebler

Prerequisite: course 180 or consent of the instructor.

Methods of developing criteria for establishing land values and selecting alternative uses and locations. Ability to reason and choose effectively is cultivated through attention to the theoretical framework underlying property valuation.

182. Urban Economics and Business Policy. (3) II.

Mr. Case, Mr. Gillies, Mr. Grebler

Prerequisite: course 180 or consent of the instructor.

Business policies involved in converting raw land to urban uses. Emphasis on private, local governmental, and federal programs for housing and construction as related to economic stability and progress as well as the efficient use of urban space.

MANAGEMENT THEORY AND POLICY**190. Organization and Management Theory. (3) I, II.**

Mr. Cave, Mr. Richman, Mr. Strasburg

Prerequisite: senior standing. Required of all business administration students.

A study of the principles of business management. Emphasis is placed upon the application of these principles to the general, as distinguished from the functional, management of enterprise by means of readings and case studies.

ADVANCED STUDY IN BUSINESS ADMINISTRATION**199. Special Studies in Business Administration. (1-4) I, II.** The Staff

Prerequisite: senior standing and consent of the instructor and the Dean by special petition available in the Office of the Dean.

Graduate Core Courses†**102G. Business Economics. (3) I, II.**

Mr. Nicols, Mr. Norton, Mr. Stern, Mr. Williams

Open only to graduate students. May be substituted for Economics 1A-1B and courses 100 and 101. Not open to students who have credit for course 100 or 101.

Analysis of decision-making in the firm, competitive policies and market structure, revenue and cost behavior, and expansion through investment. Sales, cost, and profit forecasting. General business forecasting and cyclical mechanisms. The role of enterprise under political democracy and public policy.

106G. Behavioral Science Foundations. (3) I, II.

Mr. Clark, Mr. Massarik, Mr. Schmidt, Mr. Shedlin, Mr. Tannenbaum

Fundamental concepts in behavioral science; their integration and application to management. Theoretical and practical aspects of organization, group, cultural and individual behavior. The managerial environment as a field for systematic behavioral science investigation.

108G. Law for Business Managers. (3) I, II.

Mr. Hoeber, Mr. Raza, Mr. Van de Water

Open only to graduate students who do not have credit for course 18 (Berkeley), 105B or 108, or the equivalent.

Significance and growth of the law; modern trends in settling business controversies; summary of law of contracts, property, negotiable instruments, agency, partnerships, corporations; regulation of business by the administrative process, with special reference to trade practices and labor relations.

115G. Business Statistics. (3) I, II.

Open only to graduate students.

An introduction to statistics for graduate students who have had no previous course in which the emphasis is upon applications to business problems.

† 102G and 120G are prerequisites to all other core courses. Courses 108G, 115G, 135G, 140G, 150G, and 160G may be taken concurrently.

120G. Survey of Accounting Principles. (3) I, II.

Mr. Drebin

Open only to graduate students. May be substituted for courses 1A-1B and 120M. May be elected by students in fields of concentration other than accounting to meet core course requirements in accounting. Not open to students who have credit for courses 1B or 120 or 120M.

The nature, fundamental mechanisms, and central problems of business accounting, with particular emphasis on the problems of periodic income measurement. Basic principles of cost and profit-volume analysis. Preparation and interpretation of the major accounting reports.

130G. Business Finance. (3) I, II.

Mr. Brigham, Mr. Holtz

Prerequisites: course 120 or 120M or 120G. Open only to graduate students who do not have credit for 130 and 133.

Content includes business, financial planning, financial management, securities, and other financial instruments, securities markets, and securities valuation.

135G. Principles of Insurance. (3) I, II.

Mr. Houston, Mr. Pfeffer

Open only to graduate students who do not have credit for a basic course in insurance. Basic principles of risk and insurance and their applications to business management and personal affairs. Analysis of concepts and methods of handling risks; insurance carriers, contracts, and underwriting; loss prevention and settlement; government issue programs; economic functions of insurance.

140G. Elements of Production Management. (3) I, II.

Mr. Buffa, Mr. Carrabino

Open only to graduate students who do not have credit for a basic course in production management.

Principles and decision analysis related to the effective utilization of the factors of production in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. The study of production organizations, analytical models and methods, facilities design, and the design of control systems for production operations.

150G. Elements of Industrial Relations. (3) I, II.

Mr. McNaughton in charge

Open only to graduate students who do not have credit for a basic course in personnel management.

Principles and methods of utilizing human resources in organizations.

160G. Marketing. (3) I, II.

Mr. Huff, Mr. Robbins

Open only to graduate students who do not have credit for a basic course in marketing.

A study of institutions and functions as they relate to the distribution of goods and services emphasizing the viewpoint of management in the planning, execution, and measurement of marketing activities and strategies, and the viewpoint of society in the analysis of cost, impact, and results.

180G. Elements of Real Estate and Urban Land Economics. (3) I, II.

Mr. Burns, Mr. Case, Mr. Gillies, Mr. Grebler

Open only to graduate students who do not have credit for a basic course in real estate.

An analysis of factors influencing the growth and structuring of cities. An analysis of the institutional factors which influence the business enterprise as it operates in the urban environment in appraising, real estate financing, construction, marketing, and government housing activities.

190G. Basic Management Theory and Policy. (3) I, II.

Mr. Cave, Mr. Richman

Prerequisites: course 120, 120M, or 120G. Open only to graduate students who do not have credit for an advanced course in management theory and policy at the undergraduate level.

An analysis of the functions of managers, emphasizing underlying principles applicable to general, rather than functional, management.

Graduate Courses†

200. Managerial Economics. (3) I, II. Mr. Nicols, Mr. Norton, Mr. Stern

Prerequisite: courses 100, 101, or 102G and 115 or 115G.

Analysis of decision-making in the enterprise. The market environment, measurement of the influence of policy and nonpolicy variables on sales and costs. Sales, cost, and profit forecasting. Capital budgeting and criteria for investment decisions. Inventory, depreciation, dividend and financial policies.

201. Business Forecasting. (3) I, II.

Mr. Andersen, Mr. Norton, Mr. Williams

Prerequisite: courses 100, 101 or 102G, and 115 or 115G.

The role of business forecasting in managerial planning. Principles and methods of forecasting. Evaluation of the reliability of existing forecasting techniques. Covers both short-term and long-term forecasting of industry, regional and national business trends.

202. Economic Policy and the Business Environment. (3) I, II.

Prerequisite: consent of the instructor.

Mr. Jacoby, Mr. Norton

Analysis of economic policies shaping the business policy; stabilizing policy instruments; structural policies for efficiency and progress; policy needs for the future. Treats policy formation and administration as well as design.

203A. Economic Theory of Decision. (3) I.

Mr. Marschak

Prerequisite: rudiments of economic theory, calculus, and probabilities or statistics.

Norms and facts of decision-making in household, business, government. Consistent behavior in terms of personal utilities and probabilities. Departures from consistency: stochastic theories of behavior and resulting econometric models.

203B. Economic Theory of Information and Organization. (3) II.

Mr. Marschak

Prerequisite: rudiments of economic theory of the firm, and of calculus and probabilities or statistics; 203A or consent of the instructor.

Optimal decision and information rules. Amount, cost, and value of information. Rational models of teams. Relation to the theory of games.

205. Behavioral Science Applied to Management. (3) I, II.

Mr. Massarik, Mr. Tannenbaum

Management as viewed from the standpoint of behavioral science. An examination of the forces shaping individual, group, organizational, subcultural, and cultural dynamics, as they affect the management of the business enterprise.

210A-210B. Seminar in Operations Analysis. (3-3) Yr.

Mr. Jackson

Prerequisite: Math. 4B and B.A. 116A, or the equivalents. Course 210A is prerequisite to course 210B. (Note: courses 118 and 210A cannot both be taken for credit toward the M.B.A. degree.)

First semester: the major concepts and tools of operations analysis, including programming models, static and dynamic probability models, and computer simulation of complex systems.

Second semester: intensive study of selected topics in operations analysis.

213. Problems in Integrated Business Systems. (3) I, II.

Mr. Kircher

Prerequisite: course 118 or consent of the instructor.

Need for integrated systems for the collection, transmission, processing, and recording of information; development of models for integrated systems; evaluation of procedures; general purpose and special purpose equipment; case studies of operating systems.

214. Selected Topics in Data Processing. (3) I, II.

The Staff

Special topics in data processing. Current developments in data processing principles and practice. Analysis of recent literature.

† Graduate students who have had little or no previous preparation in business administration should consult the Graduate School of Business Administration for a condensed program of prerequisite courses restricted to graduate students.

216. Statistical Survey Techniques. (3) II.**Mr. Jessen**

Prerequisite: course 116A.

Principles and techniques useful in the design of statistical survey and in the analysis of the data. Elements of sampling theory; principles of survey design, choice of sampling unit, estimator, probabilities of selection. Properties of stratified multi-stage and multi-phase sampling designs. Optimal designs considering costs. Techniques for dealing with hard-to-get data and missing data. Practical cases to illustrate principles and techniques.

217. Quantitative Methods of Business Forecasting. (3) II.**Mr. Williams**

Prerequisite: course 117 or consent of the instructor.

Econometric models and advanced time series analysis in measuring trends and fluctuations in business series; electronic computers in the analysis of business series; input-output analysis; the learning curve; applications to business forecasting.

218. Selected Topics in Business Statistics. (3) II.**Mr. G. Brown**

Special topic in statistical methods. Current developments in statistical theory and practice. Analysis of recent literature.

222. Seminar in Industrial Accounting. (3) II.**Mr. Carson**

Prerequisite: course 122.

A study of industrial and cost accounting problems, theories of cost allocation and absorption; problems of cost budgeting and control. Current cost accounting literature is examined in connection with case studies.

223. Verification of Financial Statements. (3) I, II.**Mr. Philips**

Prerequisite: course 124.

Problems of examination, verification, and presentation of financial statements from the standpoint of the independent public accountant. Legal and professional responsibilities of public accountants; professional ethics. Relations of examinations to internal controls.

224. Accounting Data for Management Purposes. (3) I, II.**Mr. Kircher**

A study of accounting procedures to provide management with data to make decisions; types of data required for planning and control; availability and reliability of such data in accounting systems; provision of special-purpose data; conditions of good internal reporting.

225. Accounting Systems and Control. (3) I, II.**Mr. Kircher**

Prerequisite: course 122.

Purposes of accounting systems; relation of systems design to organization structures; provision of data for planning control and external reporting; methods of systems study; characteristics of important routines; use of mechanical and electronic equipment; special control needs in major industries.

227. Seminar in Advanced Tax Accounting. (3) I, II.**Mr. Buttrey**

Prerequisite: course 127.

Problems in federal and state income, franchise, gift and estate taxes; study of source materials and research methods for ascertaining current rulings and trends in laws and regulations.

228. Seminar in Advanced Accounting Problems. (3) I, II.**Mr. Simons**

Prerequisites: courses 223, 225, 227, 229 (may be taken concurrently).

Contemporary financial accounting theory and practice with emphasis upon pronouncements of the American Institute of Certified Public Accountants, and American Accounting Association, and the Securities and Exchange Commission. Application of principles to advanced problems.

229. Seminar in Accounting Theory. (3) I, II.**Mr. Carson**

A survey of accounting literature, with emphasis on the development of basic accounting concepts. An attempt is made to explain contemporary practice as it has evolved in accordance with basic theory and expanding demands for accounting information.

† To be given for first time, Spring 1964.

230. Seminar in Money Rates and Money Markets. (3) I. Mr. Andersen

Prerequisite: Economics 135 and course 133 or 130 or 130G, and course 120 or 120M or 120G, or consent of the instructor.

A study of American money markets. Source of funds for bond investment, mortgage loans, stock financing, and small business financing; the demand for such funds; the interest rates and yields from investments which result from supply-demand relationships.

231. Business Financial Policy. (3) I.

Mr. Weston

Prerequisite: course 120 or 120M or 120G or 130 or 130G and 133, or consent of the instructor.

The social and economic consequences of business financial policies. Projections of aggregate sources and uses of business funds, dividend policy and business saving, possible financing gaps, business and social aspect of mergers and reorganization.

232. Problems of Business Finance. (3) II. Mr. Andersen, Mr. Weston

Prerequisite: course 130 or 130G or 133, or consent of the instructor.

Application of principles of finance to the financial management of business enterprises. The program includes reading assignments on principles and methods of finance, and individual student reports of financial problems of particular importance.

233. Seminar in Investments. (3) II.

Mr. Eiteman

Prerequisite: course 120 or 120M or 120G, and 130 or 130G or 133, or consent of the instructor.

Discussion of current problems faced by individual and institutional investors; critical review of special studies made by members of the class on topics relating to investment.

235. Problems in Insurance Management. (3) I.

Mr. Pfeffer

Prerequisite: course 135 or 135G, or consent of the instructor.

Advanced consideration of the problems of insurance management. Treats the actuarial, underwriting, investment, marketing, and regulatory problems relating to insurance activities.

236. Life Insurance in Business and Estate Management. (3) I. Mr. Pfeffer

Prerequisite: courses 135 or 135G, 136, 108, or 108G; or consent of the instructor.

An advanced study of business life insurance and estate programming with emphasis on the analysis, conservation, management and disposition of the individual or business estate.

237. Property and Casualty Insurance in Business Management. (3) II.

Mr. Pfeffer

Prerequisite: courses 135 or 135G, 136, 108, or 108G or consent of instructor.

An advanced treatment of the property and liability risks found in business enterprise, with emphasis on the role of the risk manager in the firm.

239. Risk and Risk Bearing. (3) I.

Mr. Pfeffer

Prerequisite: course 135 or 135G, or consent of the instructor.

Advanced consideration of the theory of risk and risk bearing. The analysis of alternative ways of meeting risk and uncertainty, the scope and limits of insurance, and the economics of insurance.

240A-240B. Seminar in Industrial Plant Management. (3-3) Yr. Mr. Buffa

Course 240B may be taken before course 240A.

Policy decisions encountered at the coordinative, or plant management level. Production policies and organization; determination of production methods; coordinating production activities; industrial risk and forecasting; social aspects of production; case studies.

241A-241B. Seminar in the Management of Industrial Research. (3-3) Yr.

Course 241B may be taken before course 241A.

Mr. Carrabino

Managerial problems and policy decisions concerning technological research; budgeting for research; contributions of engineering and market research; management of research and development; research and industrial progress; social aspects of technological change; product diversification and standardization; case studies.

242. Seminar in Advanced Methods in Production Control. (3) I, II.

Prerequisite: course 142.

Mr. Boldyreff

The application of techniques to production planning and scheduling; probability models in inventory control; linear programming in planning and scheduling; priority function scheduling; the use of high-speed computers in production management; design and simulation of production models; case studies.

249A-249B. Seminar in the Scientific Approach to Management. (3-3) Yr.

Mr. Barnes

The historical development of the scientific approach to management; analysis of the contributions of the pioneers, Taylor, Gilbreth, Gantt, Fayol, and others; evaluation of current trends; case studies.

250A. Seminar in Personnel Management (Individual Emphasis). (3) I, II.

Mr. Fogel, Mr. McLoughlin, Mr. McNaughton, Mr. Raza

(Formerly numbered 250.)

Consideration, at an advanced level, of factors underlying the formation and execution of managerial policies relating to the selection, development, adjustment, and motivation of individual employees. Emphasis on independent investigations and presentations by students.

250B. Seminar in Personnel Management (Organizational Emphasis). (3) I, II.

Mr. Fogel, Mr. McLoughlin, Mr. McNaughton, Mr. Raza

(Formerly numbered 251.)

Consideration, at an advanced level, of factors underlying the formation and execution of managerial policies relating to employee participative programs, administration of benefits and services, effects of work environment, and evaluation of the personnel program. Emphasis on independent investigations and presentations by students.

251. Seminar in the Management of Labor Relations. (3) I, II.

Mr. Fogel, Mr. McLoughlin, Mr. Meyers, Mr. Van de Water

(Formerly numbered 252.)

Consideration, at an advanced level, of the collective bargaining process, the labor-management agreement, the administration of the contract, and the impact on public policy on the management of industrial relations. Case studies, field trips, and visiting lecturers will be part of the seminar curriculum.

252. Law and Governmental Policy in Industrial Relations. (3) I, II.

(Formerly numbered 255.)

Mr. Van de Water

Prerequisite: course 150G.

Governmental policies on employer-employee relations; historical background; constitutional and common law principles; application of Taft-Hartley, labor reform, anti-trust, anti-injunction, fair labor standards, workmen's compensation and other acts; trends and proposed legislation on labor-management affairs.

253. Settlement of Industrial Disputes. (3) I or II.

Mr. McNaughton, Mr. Meyers, Mr. Raza, Mr. Van de Water

Prerequisite: course 150 or 150G or Economics 158.

Principles that underlie adjustments of labor controversies. The character and procedures of arbitration, mediation, fact-finding, and conciliation. Policies of existing agencies dealing with industrial disputes.

254. Analysis of Labor Markets. (3) I or II.

Mr. Fogel, Mr. Meyers

Prerequisite: consent of the instructor.

Problems of verifying hypothesis concerning labor market behavior and the application of data to managerial problems. Problems operationally defining labor market concepts. Critical evaluation of available labor market data. Case studies applying these data to managerial problems.

256. Theory and Methods in Leadership Training. (3) I or II.

Mr. Clark, Mr. Massarik, Mr. Schmidt, Mr. Shedlin, Mr. Tannenbaum

Problems in the application of scientific knowledge for the development of effective leaders. Comparative analysis of the research findings, theories, and practices of different approaches to leadership training. Critical analysis of the role of the training specialist.

257. Seminar in Labor Relations Law and Industrial Organization. (3) II.

Mr Meyers

Prerequisite: course 251, 252, or 253, or consent of instructor. (Same as Law 354, Labor Relations and Industrial Organization.)

An examination at an advanced level of the legal, managerial and economic factors relevant to union-management relations. Investigation in depth of specific labor relations problems from the point of view, simultaneously, of law management and economics.

260. Seminar in Product Planning and Distribution Channeling. (3) I, II.

Mr Huff

A study of the influence of technique and marketing variables on the adaptation of product design to market requirements and on the selection of channels of distribution.

261. Seminar in Marketing Institutions. (3) I, II.

Mr. W. Brown

Investigative procedures in solving marketing problems. Legal environment in which marketing institutions operate. Types of competitive factors (dealer relations, self-service operations, store location, etc.) in relation to rivalry.

262. Seminar in Price Policies. (3) I, II.

Mr. Cassady

Consideration of such concepts as demand, theory of competition, market classification, price leadership, geographical pricing schemes, and price discrimination; analysis of the price policies of individual firms in which these concepts are utilized.

263. Theory and Management of Market Stimulation. (3) I, II.

Mr. W. Brown

Analysis of factors influencing consumer demand. Techniques for stimulating demand are evaluated in relation to specific marketing objectives. Material is drawn from economics, psychology, sociology, anthropology, and marketing research.

270. Seminar in Physical Distribution Management. (3) I, II. Mr. Farmer

Prerequisite: Economics 173 or consent of the instructor.

Advanced analysis of spatial problems of firms, including transportation problems of physical distribution.

271. Seminar in Transportation Management. (3)

Mr. Farmer

Prerequisite: Economics 173 or consent of the instructor.

Application, through individual research, analysis, and group discussion of management principles and techniques applicable to transportation enterprises.

280. Management of Real Estate Enterprises. (3) I.

Mr. Case, Mr. Gillies, Mr. Grebler

Prerequisite: course 180, 180G, 181 and 182; or consent of the instructor.

A case-study approach to the use of urban land by business enterprises, including the theory, principles, and policies necessary for locations and site selection, property improvement, marketing and financing urban space. Particular attention is given to federal housing programs and agencies.

282. Seminar in Urban Land Utilization. (3) II.

Mr. Case, Mr. Gillies, Mr. Grebler

Prerequisite: course 180, 180G, 181, and 182; or consent of the instructor.

Study of forces affecting land uses, with emphasis on city growth and structure, locational theory, and the conversion of urban facilities to economic uses. Field research in urban development and redevelopment, central business districts, housing problems, and specialized real estate business activities. Extensive reading in current literature.

290. Seminar in Organization Theory. (3) I, II. Mr. Koontz, Mr. Powell

Analysis of the theory and practice of the managerial function of organizing through study of the literature, case analyses, and seminar discussion. Individual projects and reports.

291. Seminar in Planning and Control. (3) I, II.

Mr. Koontz, Mr. Steiner, Mr. Strasburg

Analysis of the theory and practice of the managerial function of planning and control. The implementation of objectives through policy formulation, decision-making, and control. Individual projects and reports.

292. Seminar in Direction and Leadership. (3) I, II.

Mr. Massarik, Mr. Tannenbaum

The management function of direction and its implementation through leadership. Emphasis on research and theories dealing with the key variables underlying the manager's interpersonal effectiveness in an organizational context.

293. Seminar in the Philosophy of Enterprise Control. (3) II.

Mr. O'Donnell

A study of the business enterprise as a social institution, with emphasis on the changing purposes of social action. Adjustments of the firm to changes in the social environment. Ethical problems in management. Social responsibilities of the business manager.

294. Seminar in Business Policies. (3) I, II.

Mr. O'Donnell

Analysis of business cases; the identification of salient problems encountered by managers at all levels, and the application of management principles to their identification and solution.

299R. Research Methods in Business Administration. (3) I, II. The Staff

The scientific method in management research, variations in research methodology and design, methods of data collection and analysis, the application of research findings. Individual and/or group projects will be required.

299. Research in Business Administration. (1 to 4) I, II.

The Staff

Prerequisite: consent of the Instructor and the Dean by special petition available in the office of the Assistant Dean of Student Affairs.

BUSINESS EDUCATION

(Department Office, 310 Moore Hall)

Samuel J. Wanous, Ph.D., *Professor of Education.*

Lawrence W. Erickson, Ed.D., *Associate Professor of Education.*

Erwin M. Keithley, Ed.D., *Associate Professor of Business Administration.*

Margaret H. Thompson, M.Ed., *Associate in Business Administration.*

_____, *Associate in Business Administration.*

Students wishing to prepare for teaching in the field of business education should plan to obtain the bachelor's degree with a major in business administration or economics.‡

Graduate Division.—Students in business education may earn the following graduate degrees: Master of Business Administration or Doctor of Philosophy in the School of Business Administration; Master of Education, Master of Arts, or Doctor of Education in the School of Education. For further information see the UCLA ANNOUNCEMENTS OF THE SCHOOL OF BUSINESS

‡ For further information see Professors Wanous, Erickson, or Keithley.

ADMINISTRATION, OF THE SCHOOL OF EDUCATION, and OF THE GRADUATE DIVISION.

Requirements for Teaching Credentials.—Candidates for the general secondary credential with a major or minor in business education should consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

Upper Division Courses

110. Business Communications. (3) I, II. Mr. Keithley, Mrs. Thompson
(Now Business Administration 110.)

The development of information, skills, and attitudes as they relate to the types of communication required in the management of enterprises.

- *111. Applied Secretarial Practice. (3) I, II. Mr. Erickson
Study of stenographic office problems, including the development of expert skill and ability in transcription. A consideration of the principles underlying the editing of dictated letters and reports and of the requirements and standards of stenographic positions in civil service as well as in various types of private offices.

- *112. Management of Office Services. (3) I, II. Mr. Erickson
A study of procedures, standards, and methods of measurement related to office services. An introductory consideration of human relations problems in the office, and their solutions. The development of an understanding of the uses of various types of office machines.

- *113. Office Organization and Management. (3) I, II. Mr. Erickson, Mr. Keithley
Analysis of functions of various office departments, their organization and management. Methods used in selecting and training office personnel; office planning and layout; selection and care of office supplies and equipment; methods and devices used to improve operating efficiency; types and uses of office appliances; techniques for performing office duties.

- *115. Management of Office Personnel. (3) I, II. Mr. Erickson
Prerequisite: course 113.
An analysis of the principles, methods, and procedures of effective utilization of office personnel. Recruiting, selecting, inducting, training, compensating, promoting, and managing employee relations. A study of standardization of procedures, job analyses and job descriptions, production standards, and control methods.

116. Office Systems and Procedure. (3) I, II. Mr. Keithley
Study of principles of good office systems, techniques used in making systems and machine-utilization surveys, motion economy applied to office jobs, and tools used by methods analysts.

199. Special Studies. (1-4) I, II. The Staff
Prerequisite: senior standing and consent of the instructor.

Graduate Courses

210. Case Studies in Office Management. (2) II. Mr. Keithley
299. Independent Study in Business Education. (2-4) I, II. The Staff

Professional Courses in Method

- 370A. Methods of Teaching Secretarial Subjects. (2) I. Mr. Erickson
A survey and evaluation of the methods and materials used in teaching typewriting, shorthand, transcription, and office training to secondary school pupils. Also considered are achievement standards, grading plans, measurement devices, and procedures for adapting instruction to various levels of pupil ability.

* Not to be given, 1963-1964.

370B. Methods of Teaching Bookkeeping and Accounting. (2) II.

Mr. Erickson

A study of the devices, methods, and materials used in teaching bookkeeping, business arithmetic, and related business subjects. A consideration of course objectives, curricular placement, units of instruction, and testing and teaching methods.

370C. Methods of Teaching General Business and Merchandising. (2) I.

Mr. Erickson

A study of the devices, methods, and materials used in teaching general business and merchandising subjects. Emphasis placed upon study of current practices, objectives, teaching aids, testing, and evaluation of instructional materials.

CHEMISTRY

(Department Office, 3010 Chemistry Building)

†Daniel E. Atkinson, Ph.D., *Professor of Chemistry.*Francis E. Blacet, Ph.D., *Professor of Chemistry.*Paul D. Boyer, Ph.D., *Professor of Chemistry.*Donald J. Cram, Ph.D., *Professor of Chemistry.*Paul S. Farrington, Ph.D., *Professor of Chemistry.*Clifford S. Garner, Ph.D., *Professor of Chemistry.*Theodore A. George C. Kennedy, Ph.D., *Professor of Geochemistry.*

Admission to Courses in Chemistry.—Regular and transfer students who have the prerequisites for the various courses are not thereby assured of admission to those courses. The department may deny admission to any course if a grade D was received in a course prerequisite to that course, or if in the opinion of the department the student shows other evidence of inadequate preparation.

Letters and Science List.—All undergraduate courses in chemistry are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Required: Chemistry 1A–1B, 5A (or Chemistry 3A–3B), Physics 1A, 1C, Mathematics 1, 3A, 3B, 4A (or the alternative sequence 5A–5B, 6A), English 1A, and a reading knowledge of German. Recommended: Mathematics 4B or 6B, Physics 1D, and an additional course in chemistry.

Students should note that the lower division curriculum prescribed for the College of Chemistry at Berkeley differs from the lower division curriculum in the College of Letters and Science at Los Angeles.

The Major.—The minimum requirement for the major in chemistry is Chemistry 5B (3), 110A–110B (6), 112A–112B (10), 111 (4) and two additional courses in chemistry, of which one must include laboratory work, selected from the following group: 103, 121, 125, 126A, 126B, 130A, 130B, 131, 132, 133, 135, 136, 198. It is recommended that courses through Chemistry 110B and 112B be completed by the end of the junior year provided this can be accomplished without neglecting broader educational needs. The courses which should be considered for the senior year depend somewhat on the student's special interest. If this be physical-inorganic chemistry, courses 121, 125, 130A, 130B, 131, 132 and 133 are recommended for consideration along with certain advanced courses in physics and mathematics; if organic chemistry, courses 103, 126A and 126B; and if biochemistry, courses 135, and 136, along with certain courses in the life sciences.

The following courses outside of chemistry are also required and should be finished as early as possible (some may be taken in the lower division): English 106S, Mathematics 4B or 6B, Physics 1D.

Completion of the major in chemistry automatically meets the minimum requirements for eligibility to full membership in the American Chemical Society in the minimum time of two years after graduation.

Chemistry majors are urged to seek help and advice in the Chemistry Undergraduate Adviser's Office, Room 3326A, Chemistry Building.

Transfer Students.—A student who transfers to the University of Cali-

formia, Los Angeles, with a grade of B or better in both Chemistry 8 and 9 (or their equivalents) may be admitted to Chemistry 112B. It is recommended, however, that he take Chemistry 112A for which he will receive 3 units of credit instead of the usual 5 units. A transfer student who has credit for only Chemistry 8 (or its equivalent), or for Chemistry 8 and Chemistry 9 (or their equivalents) with a grade less than B in either of these courses, must take Chemistry 112A for which he will receive 3 units of credit. To receive credit toward the major for Chemistry 112A and 112B (or their equivalents), which have been taken elsewhere, the consent of the departmental adviser is required.

Upper Division Credit.—Chemistry majors will receive upper division credit for Chemistry 5B if taken while in upper division. Non-chemistry majors will receive upper division credit for any two of the courses 5B, 8, 9, if taken while in the upper division, or if granted such credit by petition.

Graduate Study.—The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in chemistry and to the M.S. and Ph.D. degrees in biological chemistry. Prospective candidates for advanced degrees in chemistry may specialize in any of the following fields: analytical, biological, inorganic, organic, or physical chemistry.

The general University requirements for the M.S. degree are given on page 162; the Department of Chemistry makes use of Plan I, the Thesis Plan. The general University requirements for the Ph.D. degree are given on page 165. The student is not required to earn the M.S. degree before undertaking work for the Ph.D. degree. More detailed information regarding admission to and requirements for graduate study may be obtained by writing to the Graduate Adviser, Department of Chemistry, University of California, Los Angeles 24, California.

Lower Division Courses

Certain combinations of courses involve limitations of total credit as follows: 2A and 1A, 9 units; 2 and 1A, 7 units; 8 and 112A, 6 units; 8, 9 and 112A, 9 units.

1A. General Chemistry. (5) I, II.

Mr. Baur, Mr. El-Sayed, Mr. Kaesz, Mr. McCullough, Mr. Trueblood

Lecture, three hours; laboratory and quiz, six hours. Prerequisite: high school chemistry; for outstanding students high school physics and three years of high school mathematics is an acceptable alternative. All students who intend to take this course must take a preliminary examination, which will normally be given about ten days before instruction begins. Enrollment priority will be given to those students who have taken the examination satisfactorily at that time. Those appearing for the examination must be prepared to identify themselves. This course, or course 3A, is required of majors in chemistry and in various other fields of science and/or technology.

The first half of a basic course in principles of chemistry, with special emphasis on chemical calculations.

1B. General Chemistry. (5) I, II.

Mr. Blacet, Mr. Eisenberg, Mr. El-Sayed,
Mr. Farrington, Mr. Garner, Mr. Trueblood

Lecture, three hours; laboratory and quiz, six hours. Prerequisite: course 1A or 3A. Required in the same curricula as course 1A or 3A.

A continuation of course 1A, with special applications to the theory and technique of qualitative analysis; periodic system; structure of matter. A brief introduction to organic chemistry is included.

2. Introductory Chemistry. (3) I, II.

Mr. Hardwick

Lecture, three hours. The course may be taken for credit in physical science by students following curricula not requiring laboratory work in such field of study. Not open for credit to students who have credit for course 2A.

An introductory course emphasizing the principles of chemistry and including a brief introduction to elementary organic chemistry.

2A. Introductory Chemistry. (5) I, II.

Mr. Hardwick

Lecture, three hours; laboratory and quiz, four hours. This course satisfies the chemistry requirements for nurses as prescribed by the California State Board of Nursing Examiners; it is required of certain home economics majors. Not open for full credit to students who have credit for course 2.

An introductory course emphasizing the principles of chemistry and including a brief introduction to elementary organic chemistry.

3A-3B. Introductory Chemical Principles. (5-5) Yr.

Mr. El-Sayed, Mr. Libby, Mr. Trueblood

Lecture, three hours; laboratory and quiz, six hours. Prerequisite: an outstanding record in high school chemistry or physics and in at least three years of high school mathematics. Admission will be on basis of special examination to be given approximately ten days before instruction begins. Enrollment to be limited. Course 3A not open to students who have credit for Chemistry 1A.

An introduction to the principles and techniques of chemistry for the unusually well-qualified student. The sequence Chemistry 3A-3B covers essentially the same material as does the sequence Chemistry 1A-1B-5A.

5A. Quantitative Analysis. (3) I, II.

Mr. Farrington, Mr. McCullough, Mr. Pecsok

Lecture, discussion, and quiz, two hours; laboratory, six hours. Prerequisite: courses 1A-1B, or 3A and 1B. Required of majors in chemistry and in various other fields of science and/or technology.

Principles and techniques involved in gravimetric, volumetric and colorimetric analyses.

5B. Quantitative Analysis. (3) I, II.

Mr. Bayes, Mr. Eisenberg, Mr. Farrington, Mr. Pecsok, Mr. Scott

Lecture, discussion, and quiz, two hours; laboratory, six hours. Prerequisite: course 5A or 3B. Required of chemistry majors.

A continuation of course 5A, but with emphasis on theory and modern techniques, including non-aqueous titrations, electroanalytical methods, chromatography, and problems involving counting of radioactivity.

8. Elementary Organic Chemistry. (3) I, II.

Mr. Cram, Mr. Foote, Mr. Geissman, Mr. Haake, Mr. Jacobs

Prerequisite: courses 1A and 1B. Course 2A will be accepted for nonscience majors only. Concurrent enrollment in course 9 is advisable.

An introductory study of the compounds of carbon, including both aliphatic and aromatic derivatives.

9. Methods of Organic Chemistry. (3) I, II.

Mr. Foote

Lecture and quiz on principles of laboratory manipulation, two hours; laboratory, six hours. Prerequisite or concurrent: course 8.

Laboratory work devoted principally to synthesis, partly to analysis.

99. Special Studies in Chemistry. (1-3) I, II.

The Staff

Prerequisite: consent of the Chemistry Undergraduate Adviser.

Special studies in chemistry with an emphasis on an introduction to chemical research. Intended only for well-qualified lower division students.

Upper Division Courses

Certain combinations of courses carry limitations of total credit, as follows: 108A, 108B and 135, 6 units; 109 and 110A, 5 units; 8 and 112A, 6 units; 8, 9 and 112A, 9 units.

103. Qualitative Organic Analysis. (3) I, II.

Mr. Haake

Lecture, discussion, and quiz, two hours; laboratory, six hours. Prerequisite: courses 5A or 3B and 112B.

Identification of unknown organic compounds using microtechniques; discussions of classical identification procedures, methods of separating compounds, and the interpretation of spectra; problems illustrating applications to modern research.

106. Clinical Chemistry. (3) I.

Mr. Smith, Mr. West

Lecture, one hour; laboratory and quiz, six hours. Prerequisite: Chemistry 5A or 3B and 108B. Required in the medical technology curriculum. May not be offered as part of the major in chemistry.

Qualitative and quantitative methods in clinical chemistry.

108A-108B. General Biochemistry. (3-3) Yr.

Mr. Atkinson, Mr. Smith, Mr. West

Lecture, three hours. Prerequisite: course 8 or 112B.

This course may not be offered as part of the major requirements in chemistry. Chemistry majors may take Chemistry 135.

Discussion of the basic principles of the biochemistry of plants, animals, and microorganisms with emphasis on metabolism.

109. General Physical Chemistry. (3) II.

Mr. Atkinson, Mr. Bayes, Mr. McCullough

Lecture, three hours. Prerequisite: course 5A or 3B or the equivalent, Physics 2A-2B, Mathematics 37, or the consent of the instructor. Recommended: course 8, Mathematics 3A-3B. May not be offered as part of the major in chemistry.

The fundamental principles of physical chemistry, with examples of particular interest in the life sciences.

110A. Physical Chemistry. (3) I, II.

Mr. Kivelson, Mr. Libby, Mr. McCullough, Mr. McMillan, Mr. Scott

Prerequisite: course 3B or 5A, Physics 1A, and Mathematics 4A or 6A (with a minimum grade of C in each), and course 5B (may be taken concurrently). Non-chemistry majors may be admitted without course 3B or 5A or 5B.

Certain fundamental principles relating to matter and energy, including first, second and third laws of thermodynamics with applications to thermochemistry and the mass-action law of chemical equilibrium; gas laws and molecular-kinetic theory.

110B. Physical Chemistry. (3) I, II.

Mr. El-Sayed, Mr. Garner, Mr. Kivelson, Mr. Libby, Mr. McMillan

Prerequisite: course 110A and Physics 1C; Mathematics 4B or 6B (may be taken concurrently).

Colligative properties of solutions of nonelectrolytes; fugacity, activity and standard states, phase equilibria, chemical kinetics; electrical properties of solutions and ionic theory; electromotive force of voltaic cells.

110G. Physical Chemistry. (3) I, II.

Mr. Kivelson, Mr. Libby, Mr. McCullough, Mr. McMillan, Mr. Scott

Prerequisite: same as for course 110A. Open only by permission of the Chemistry Graduate Adviser to graduate students who have not taken course 110A in this institution.

110H. Physical Chemistry. (3) I, II.

Mr. El-Sayed, Mr. Garner, Mr. Kivelson, Mr. Libby, Mr. McMillan

Prerequisite: course 110A or 110G. Open only by permission of the chemistry graduate adviser to graduate students who have not taken course 110B in this institution.

111. Methods of Physical Chemistry. (4) I, II.

Mr. Bayes, Mr. Scott

Lecture, two hours; laboratory, six hours. Prerequisite: courses 110A, 110B (may be taken concurrently), and Physics 1D (may be taken concurrently).

Physicochemical measurements and laboratory experiments illustrating some of the important principles of physical chemistry.

112A-112B. Organic Chemistry. (5-5) Yr. Beginning either semester.

Mr. Cram, Mr. Foote, Mr. Geissman, Mr. Jacobs

Lecture, three hours; laboratory and quiz, six hours. Prerequisite: courses 1B and 5A, or 3B. A student who has received a grade of B or better in both courses 8 and 9 may be admitted to course 112B without having had course 112A. It is recommended, however, that he take course 112A, for which he will receive 3 units of credit instead of the usual 5 units.

A beginning course designed primarily for chemistry majors, but open to other students who desire a more comprehensive course than Chemistry 8 and 9. Organic chemistry is presented with emphasis upon the application of modern principles to structure, reactivity, methods of synthesis, and physical properties of organic compounds.

***121. Methods of Inorganic Chemistry. (3) I.**

Lecture, discussion, and quiz, two hours; laboratory, six hours. Prerequisite: course 5B.

Equilibrium and reaction rate: periodic classification. Laboratory work principally synthetic and analytic, involving special techniques.

125. Instrumental Methods. (3) II.

Mr. Farrington, Mr. Pecsok, Mr. Trueblood

Lecture, discussion, and quiz, two hours; laboratory, six hours. Prerequisite: courses 5B, 110B, 111, and Physics 1D. In the event that it is necessary to limit enrollment, admission will be based upon performance in the prerequisite courses, particularly 5B and 111.

Theory and applications of instrumental methods in chemical problems. The laboratory work includes experiments in spectrophotometry, polarography, activation analysis, X-ray diffraction, mass spectrometry, and various other modern techniques.

126A-126B. Advanced Organic Chemistry. (3-3) Yr.

Mr. Cram, Mr. Geissman, Mr. Jacobs, Mr. Winstein

Lecture, three hours. Prerequisite: Chemistry 112A-112B or its equivalent. Primarily for seniors and first-year graduate students. With the consent of the instructor, course 126B may be taken without 126A by capable students who have done well in the prerequisite course, but this is not encouraged.

A comprehensive course based upon modern concepts. Substitution, elimination, and addition reactions, condensations, rearrangements, stereochemistry and free-radical chemistry.

130A. Advanced Physical Chemistry. (3) I.

Mr. Garner, Mr. Kivelson, Mr. McMillan

Lecture, three hours. Prerequisite: Chemistry 110B; Mathematics 4B or 6B; Physics 1C, 1D. Primarily for seniors and first-year graduate students.

Selected topics in modern physical chemistry, including quantum effects, nucleonics, interaction of matter with fields, intermolecular forces, chemical bond, molecular structure and the solid state.

130B. Advanced Physical Chemistry. (3) II.

Mr. McMillan, Mr. Scott

Lecture, three hours. Prerequisite: Chemistry 110B; Mathematics 4B or 6B; Physics 1C, D. Chemistry 130A is prerequisite except with the permission of the instructor.

A continuation of Chemistry 130A. Selected topics in modern physical chemistry, including probability and statistical methods, partition functions and statistical thermodynamics, heat capacities, electric and magnetic effects, statistical theory of reaction rates, imperfect gases and condensation, liquids and solutions, phase transitions.

131. Absorption Spectra and Photochemical Reactions. (2) II.

Mr. Blacet

Prerequisite or concurrent: course 110A. Normally offered only in alternate years.

The chemical interpretation of spectra and the study of chemical processes which are initiated by the absorption of visible and ultraviolet radiation.

***132. X Rays and Crystal Structure. (2) II.**

Mr. McCullough, Mr. Trueblood

Prerequisite: course 110A. Normally offered only in alternate years.

Symmetry of crystals; use of X rays in investigation of crystal structure.

* Not to be given, 1963-1964.

133. Inorganic Chemistry. (3) II.

Mr. Kaesz

Lecture, three hours. Prerequisite: courses 110B and the equivalent of 112A.

Theory of bonding in inorganic chemistry; stereochemistry; uncommon oxidation states; the periodic generalization with emphasis on relationship to electronic structure; acid-base theory and related topics.

135. Biochemistry. (3) I.

Mr. Atkinson, Mr. West

Lecture, three hours. Prerequisite: courses 112B and either 109 or 110A (110A may be taken concurrently).

A course in the principles of biochemistry designed for chemistry majors and others with equivalent preparation. Students lacking such preparation may take courses 108A and 108B which are not counted toward the fulfillment of the chemistry major requirements.

136. Methods of Biochemistry. (3) II. Mr. Atkinson, Mr. Smith, Mr. West

Lecture, discussion, and quiz, two hours; laboratory, six hours. Prerequisite: courses 5A or 3B and 108B or 135 (108B may be taken concurrently).

The preparation, analysis, and reactions of metabolites in animals, plants, and microorganisms.

198A, B, C, D, E, F. Special Courses in Chemistry. (1-3) I, II. The Staff**199. Special Studies in Chemistry. (1-3) I, II.**

The Staff

Prerequisite: junior standing and consent of the Chemistry Undergraduate Adviser.

Graduate Courses***202. Chemical Kinetics. (3) II.**

Mr. Bayes, Mr. Kivelson

Normally offered only in alternate years.

A critical consideration of all important classes of chemical reactions in gaseous and condensed phases and at interfaces between phases. Experimental methods, and application of theory. Recent advances in the theory of reaction rates.

203. Chemical Thermodynamics. (3) I.

Mr. McMillan, Mr. Scott

Normally offered only in alternate years.

Derivation and application of thermodynamic relations of particular importance in chemistry; partial molar quantities and thermodynamic properties of solutions; the concepts of standard states, fugacity, activity, and activity coefficient and their uses; phase equilibria; electrochemical changes; special topics in thermodynamics.

221. Physical Organic Chemistry. (3) II.

Mr. Winstein

A course stressing the quantitative approach to kinetics and mechanism of organic reactions. Criteria of mechanism. Correlations of reactivity and equilibrium.

222A, B, C, D, E, F. Advanced Topics in Organic Chemistry. (2) I, II.

A Staff Member in Organic Chemistry

The subject matter of this course will be in a recognized field of organic chemistry in which the staff member giving the course has developed special proficiency owing to his research interests.

231. Nuclear Chemistry. (3) II.

Mr. Garner, Mr. Libby

Radioactivity; nuclear reactions; interaction of nuclear radiations with matter; detection and measurement of nuclear radiations; methods of preparation, isolation and identification of radionuclides; chemical effects of nuclear transformations; isotope effects; applications of stable and radioactive tracers to chemical problems.

232A, B, C, D, E, F. Advanced Topics in Physical and Inorganic Chemistry.

(2) I, II.

A Staff Member in Physical or Inorganic Chemistry

The subject matter of this course will be in a recognized field of physical or inorganic chemistry in which the staff member giving the course has developed special proficiency owing to his research interests.

* Not to be given, 1963-1964.

***233. Statistical Mechanics. (3) II.**

Mr. Baur, Mr. McMillan

Prerequisite: course 130B; Mathematics 4B. Recommended: course 203; Physics 105; Mathematics 119A, 122A-122B. Normally offered only in alternate years.

Derivation of the laws of molecular assemblies from the properties of the individual molecules, including: elementary kinetic theory of gases; thermodynamic functions for monatomic, diatomic, and polyatomic gases; chemical equilibrium; the crystalline state; theory of the general imperfect gas; condensation; and related topics.

234. Quantum Chemistry. (3) II.

Mr. Kivelson, Mr. McMillan

Prerequisite: course 130A; Physics 121; Mathematics 119B or 110B; or consent of the instructor. Recommended: course 131, Physics 105. Normally offered only in alternate years.

Elementary quantum mechanics, with particular emphasis on chemical applications. Includes: classical mechanics; early quantum theory; wave-particle dualism; statistical interpretation; Schrödinger formulation; particle in a potential well, harmonic oscillator, and rigid rotator; hydrogen atom; periodic system; approximation methods, molecules; chemical bond types; and more advanced topics as time permits.

238. Chemistry of Intermediary Metabolism. (3) II.

Mr. West

Prerequisite: course 108A-108B or 135. Normally offered only in alternate years.

Detailed consideration of metabolic transformations and the experimental methods employed in this field.

***240. Chemistry of Enzyme Action. (3) I.**

Mr. Atkinson

Prerequisite: courses 108A-108B or 135 and 109 or 110A, or consent of the instructor. Normally offered only in alternate years.

Physical and chemical characteristics of enzymes; kinetics and mechanisms of enzyme-catalyzed reactions.

242A, B, C, D, E, F. Advanced Topics in Biochemistry. (2) I, II.

The Staff in Biochemistry

The subject matter of this course will be in a field of biochemistry in which the staff member giving the course has developed special proficiency owing to his research interests.

260A, B, C, D, E. Seminar in Chemistry. (1) I, II.

The Staff

Oral reports by graduate students on important topics from the current literature in their field of chemistry. Each student taking this course must consult the instructor in charge before enrolling, and is expected to present a report.

260A. Seminar in Analytical Chemistry.

260B. Seminar in Biochemistry.

260C. Seminar in Inorganic Chemistry.

260D. Seminar in Organic Chemistry.

160E. Seminar in Physical Chemistry.

290. Seminar in Current Research. (1) I, II.

The Staff

Weekly seminars in current chemical research. Graduate students taking the cumulative examinations in their field of chemistry are required to participate in one of the specialized seminars approved for this purpose by the Chemistry Graduate Adviser.

299. Research in Chemistry. (3-6) I, II.

The Staff

Research in analytical chemistry, biological chemistry, inorganic chemistry, organic chemistry, and physical chemistry.

CLASSICS

(Department Office, 340 Royce Hall)

Paul Augustus Clement, Ph.D., *Professor of Classics and Classical Archaeology (Chairman of the Department).*

* Not to be given, 1963-1964.

Albert Hartman Travis, Ph.D., *Professor of Classics*.
 Frederick Mason Carey, Ph.D., *Emeritus Professor of Classics*.
 Paul Friedlander, Ph.D., *Emeritus Professor of Latin and Greek*.
 Herbert Benno Hoffleit, Ph.D., *Associate Professor of Classics*.
 Philip Levine, Ph.D., *Associate Professor of Classics*.
 Jaan Puhvel, Ph.D., *Associate Professor of Classics and Indo-European Linguistics*.

Helen Florence Caldwell, M.A., *Lecturer in Classics*.
 Emil Kunze, Ph.D., *Visiting Professor in Classical Archaeology*.
 Evelyn Venable Mohr, M.A., *Lecturer in Classics*.
 Anastasia Demetriadis Norre, M.A., *Associate in Classics*.
 Barbara Smith, M.A., *Lecturer in Classics*.

Letters and Science List.—All undergraduate courses in the department are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Major Fields

The student may take the major in Latin, in Greek, or in Latin and Greek (i.e., in the Classics). Students considering a major in the department should consult the adviser as soon as possible in their university career, but in no case later than the point at which they are about to take upper division courses.

Preparation for the Major.

A. Latin. Required: courses 1, 2, 3, 4 (or four years of high school Latin and course 4, or three years of high school Latin and courses 3 and 4, or two years of high school Latin and courses 2, 3, and 4), course 9A–9B (which may be taken concurrently with upper division courses).

B. Greek. Required: courses 1 and 2, or two years of high school Greek.

C. Latin and Greek (the Classics). Required: the courses required in preparation for the major in Latin (A.).

The Major

A. Latin. Required: (1) courses 101, 102, 103, 180, and 9 additional units chosen from courses 104, 105, 106, 107, 108; (2) Greek 1 and 2, or 6 units of upper division Greek.

B. Greek. Required: (1) courses 100A–100B, 101, 102, 103, 180A–180B, and 9 additional units chosen from courses 104, 105, 106, 107, 108; (2) Latin 4.

C. Latin and Greek (the Classics). Required: (1) Latin 101, 102, 103, 180, and 3 additional units chosen from courses 104, 105, 106, 107, 108; and (2) Greek 101, 102, 103, 180A–180B, and 3 additional units chosen from courses 104, 105, 106, 107, 108.

Requirements for Admission to Graduate Status

A candidate for admission to graduate status in the department must meet,

¹ In residence fall semester only, 1963–1964.

² In residence spring semester only, 1963–1964.

in addition to the general University requirements, the minimum requirements for an undergraduate major in Latin, in Greek, or in the Classics (Latin and Greek). If the student is deficient in this prerequisite, he must fulfill it by undergraduate work which is not counted toward his advanced degree program.

Special Requirement for the Teaching Credential in Latin

Latin 165A-165B is required of students preparing for this credential.

The Master's Degree

The degree is offered in Latin, in Greek, and in the Classics (Latin and Greek). In order to qualify, the candidate must satisfy (1) the general University requirements, (2) the general departmental requirements, and (3) the special departmental requirements for the degree in one of the three fields. For the outline of departmental requirements, see below; for *complete* data, students must consult the departmental graduate advisers.

General University Requirements for the Master's Degree

See pages 162-165. The department follows the comprehensive examination plan. For inclusion in electives outside the 12 units "in strictly graduate courses in the major subject," the department especially recommends Classics 151A-151B, 210, 211, 212, 251A, 251B, 251C, 251D, History 111A-111B, 112A-112B, 113A-113B, 251A-251B, Linguistics 210, and Sanskrit 190, 191.

General Departmental Requirement for the Master's Degree

In addition to fulfilling the general University requirements, the candidate must demonstrate a satisfactory reading knowledge of French or German by the end of his first semester of residence.

Special Departmental Requirements for the Master's Degree in Latin

In addition to the general University requirements and the general departmental requirements the following must be met for the degree in Latin:

1. Completion of Greek 102.

2. A comprehensive examination, to consist of the following:

a) The translation of Latin authors into English prose.

b) Latin literature. The student will be expected to show a sound general knowledge of the history of Latin literature, to be derived from reading recommended by the department. Students who have received a grade of B or better in Latin 180 will normally be excused from this phase of the examination.

c) Roman history. The student must display a satisfactory knowledge of the history of the Roman world from the beginnings to the fall of the Western Empire, to be derived from reading recommended by the department. This requirement may be satisfied by passing History 111B or 113A-113B with a grade of B or better, and students are strongly advised to fulfill it in this way.

d) Latin composition. The student will be expected to translate passages of English prose into Latin of the Ciceronian period. This requirement may be satisfied by passing Latin 165A-165B with a grade of B or better.

Special Departmental Requirements for the Master's Degree in Greek

In addition to the general University requirements and the general depart-

mental requirement, the following must be met for the degree in Greek.

1. Completion of 3 units of upper division Latin.

2. A comprehensive examination, to consist of the following:

a) The translation of Greek authors into English prose.

b) Greek literature. The student will be expected to show a sound general knowledge of the history of Greek literature, to be derived from reading recommended by the department. Students who have received a grade of B or better in Greek 180A-180B will normally be excused from this phase of the examination.

c) Greek history. The student must display a satisfactory knowledge of the history of the Greek world from the beginnings to the Roman Conquest, to be derived from reading recommended by the department. This requirement may be satisfied by passing History 111A or 112A-112B with a grade of B or better, and students are strongly advised to fulfill it in this way.

d) Greek composition. The student will be expected to translate passages of English prose into Attic Greek. This requirement may be satisfied by passing Greek 165A-165B with a grade of B or better.

Special Departmental Requirements for the Master's Degree in the Classics (Latin and Greek)

In addition to the general University requirements and the general departmental requirement, the following must be met for the degree in the Classics (Latin and Greek).

1. Completion of one course from Latin 104, 105, 106, 107, 108, and of one course from Greek 104, 105, 106, 107, 108, other than courses taken to meet the requirements for the major.

2. A comprehensive examination to consist of the following:

a) The translation of Greek and Latin authors into English prose.

b) Greek and Latin literature. The student will be expected to show a sound general knowledge of the chief authors and movements of Greek and Latin literature, to be derived from reading recommended by the department. Students who have received a grade of B or better in Latin 180 will normally be excused from the Latin section of this phase of the examination, and those who have had a similar standing in Greek 180A-180B will normally be excused from the Greek section.

c) Greek and Roman history. The student must display a satisfactory knowledge of the main development of Greek and Roman history, to be derived from reading recommended by the department. This requirement may be satisfied by passing History 111A-111B (or 112A-112B and 113A-113B) with a grade of B or better, and students are strongly advised to fulfill it in this way.

d) Greek and Latin composition. The student will be expected to translate passages of English prose into Attic Greek and Ciceronian Latin. This requirement may be satisfied by passing Greek 165A-165B and Latin 165A-165B with a grade of B or better.

In satisfying the general University requirement of twelve units in strictly graduate courses in the major subject, a candidate for the degree in the Classics (Latin and Greek) will be required by the department to effect a reasonable even distribution between the two languages.

The Doctor's Degree

The degree is offered in Classics with special emphasis in Classical Literature or in Classical Archaeology or in Classical Linguistics. In order to qualify, the candidate must satisfy the general University requirements and the special departmental requirements for the degree. For the general University requirements see pages 165-169.

Special Departmental Requirements for the Doctor's Degree

Prerequisites for admission to the program are (a) an A.B. degree from this university or its equivalent, with a major in Greek and Latin, (b), a reading-knowledge of French or Italian or German (a reading-knowledge of two modern languages is required by the end of the first year of graduate work; of these one must be German), (c) sufficient preparation in Ancient History and in Classical Archaeology or in Indo-European Linguistics to indicate readiness to begin the program with competence. Students judged deficient in prerequisites will be given the opportunity to remove their deficiencies. It is to be expected that normally it will be necessary to devote at least two years of full-time study, or the equivalent, to a systematic program of courses and seminars designed to effect a suitable balance between Classical authors, the other disciplines, and the area of special emphasis. Further, all students are expected to read in the original language the designated parts of a reading list of Greek and Roman authors.

Qualifying examinations, written and oral, will demonstrate ability to translate from Greek and Latin, knowledge of the field of special emphasis (Classical Literature, Classical Archaeology, Classical Linguistics), and competence in any one of the following areas which is *not* part of the field of special emphasis: (I) Greek and Roman Literature, (II) Classical Archaeology and Epigraphy, (III) Classical Linguistics and Sanskrit, (IV) Greek and Roman History. A dissertation on some aspect of the field of special emphasis and an oral defense of the dissertation complete the formal requirements for the degree. The dissertation may be expected to occupy at least a third year of full-time work.

For *complete* information students must consult the department.

Courses Which Do Not Require a Knowledge of Greek or Latin

Classics 113, 151A-151B, 178, 210, 211, 251A, 251B, 251C, 251D, 260.

Latin 40, 180.

Greek 40, 180A-180B.

CLASSICS**Upper Division Courses**

113. Ancient Drama. (2) I, II.

Mr. Travis, Miss Caldwell

A knowledge of Latin and Greek is not required.

The major Greek and Latin dramas in translation, with a history of the theater and dramatic productions.

151A-151B. Classical Art. (3-3) Yr.

Mr. Clement

A knowledge of Latin and Greek is not required. Courses 151A and 151B may be taken independently for credit.

A general introduction to the study of Aegean, Greek, and Roman architecture, sculpture, and painting. Course 151A deals with excavation sites and architecture, course 151B with sculpture and painting.

178. Greek and Roman Mythology. (3) I.

Mr. Puhvel

A knowledge of Greek and Latin is not required.

Origin and development of the myths and legends; their place in the religion, literature and art of Greece and Rome; modern approaches to the understanding of mythology.

Graduate Courses***210. Topography and Monuments of Athens. (2) II.**

Mr. Clement

Prerequisite: consent of the instructor. A knowledge of Greek and Latin is desirable, but is not a prerequisite.

Detailed studies in the topography and monuments of Athens combining the evidence of literature, inscriptions, and actual remains.

211. Topography and Monuments of Rome. (2) II.

Mr. Clement

Prerequisite: consent of the instructor. A knowledge of Greek and Latin is desirable, but is not a prerequisite.

Detailed studies in the topography and monuments of ancient Rome combining the evidence of literature, inscriptions, and actual remains.

251A, B, C, D. Seminar in Classical Art.

Mr. Clement, Mr. Kunze

Prerequisite: Classics 151A-151B, or consent of the instructor. A knowledge of Latin and Greek is not required.

Each year, the seminar is concerned with specific problems in one of the following fields:

*251A. The Aegean Bronze Age. (3) II.

251B. Greek and Roman Architecture. (3) I.

*251C. Greek and Roman Sculpture. (3) II.

*251D. Greek and Roman Painting. (3) I.

260. Seminar in Indo-European Mythology. (3) II.

Mr. Puhvel

Prerequisite: Classics 178 or consent of the instructor. A knowledge of Latin and Greek is not required. A reading knowledge of French or German is desirable.

Studies in ancient Indo-European mythological and religious traditions and their relationship to the myths of the Eastern Mediterranean, the Near East, and the Finno-Ugrian area.

297. Individual Studies for Graduate Students. (1-6) I, II.

The Staff

LATIN**Lower Division Courses****1. Elementary Latin. (4) I, II.**

The Staff

Sections meet four hours weekly.

2. Elementary Latin: Selections from Ovid's Metamorphoses. (4) I, II.

Sections meet four hours weekly.

The Staff

Prerequisite: for undergraduates, course 1, or two years of high school Latin. Graduate students may take this course without prerequisite to satisfy the requirement of the preliminary screening examination in Latin.

3. Vergil: Aeneid. (4) I, II.

Miss Caldwell, Mrs. Mohr

Sections meet four hours weekly.

Prerequisite: course 2, or three years of high school Latin.

4. Readings in Latin Prose. (4) I, II.

Miss Caldwell, Mrs. Mohr

Prerequisite: course 3, or four years of high school Latin.

9A-9B. Latin Prose Composition. (2-2) Yr.

The Staff

Prerequisite: course 2, or three years of high school Latin; 9A is prerequisite to 9B.

A systematic survey of Latin syntax and idiom through translation of English into Latin.

* Not to be given, 1963-1964.

40. The Latin Element in English. (2) I, II.

Mrs. Mohr

A knowledge of Latin is not required.

A study of the derivation and usage of English words of Latin origin. The student learns to analyze the English words into their component elements—prefixes, bases, and suffixes—and so acquires an understanding of their form and meaning.

Upper Division Courses

Important: Certain upper division courses are not given every year (see below). All courses required for the major may readily be taken within the usual four years of undergraduate study, but adequate planning is essential.

***101. Catullus: Selections: Horace: Odes and Epodes. (3) I.**

Prerequisite: course 4.

Miss Caldwell, Mrs. Mohr

102. Plautus and Terence. (3) II.

Prerequisite: course 4.

Miss Caldwell, Mrs. Mohr

103. Lucretius. (3) I.

Mr. Levine

Prerequisite: course 101 or course 102. This course is normally given every other year in alternation with courses 105 and 107.

104. Roman Historians. (3) II.

Mr. Hoffleit

Prerequisite: courses 101, 102. This course is normally given every other year in alternation with courses 106 and 108.

***105. Roman Elegy. (3) I.**

Mr. Levine

Prerequisite: courses 101, 102. This course is normally given every other year in alternation with course 103.

***106. Roman Satire: Horace, Juvenal, and Martial. (3) II.**

Mr. Hoffleit

Prerequisite: courses 101, 102. This course is normally given every other year in alternation with course 104.

***107. Vergil: Eclogues and Georgics. (3) I.**

Miss Caldwell

Prerequisite: courses 101, 102. This course is normally given every other year in alternation with course 103.

***108. Cicero and Seneca: The Philosophical Works. (3) II.**

Mr. Levine

Prerequisite: courses 101, 102. This course is normally given every other year in alternation with course 104.

120. Introduction to Medieval Latin. (2) II.

Prerequisite: one year of college Latin or the equivalent.

A study of the forms, syntax, and vocabulary of medieval Latin and the reading of illustrative texts.

165A-165B. Latin Composition. (1-1) Yr.

Mr. Levine, Mr. Travis

Prerequisite: course 9A-9B. Course 165A is prerequisite to 165B.

Ciceronian prose.

***180. A Survey of Latin Literature in English. (3) I.**

Mr. Levine

A knowledge of Latin is not required. This course is normally given every other year in alternation with Greek 180A-180B.

199. Special Studies in Latin. (1-5) I, II.

The Staff

Prerequisite: senior standing and consent of the instructor.

Graduate Courses***202. Cicero's Philosophical Works. (3) I.**

Mr. Levine

203. Roman Historians. (3) II.

Mr. Hoffleit

* Not to be given, 1963-1964.

*204. Roman Prose Writers, Cicero, Letters. (3) II.	Mr. Travis
*206. The Roman Epic: Ennius to Silius Italicus. (3) II.	Mr. Hoffleit
*207. Catullus. (3) II.	Mr. Levine
*210. Vergil's Aeneid. (3) I.	_____
*211. Cicero's Rhetorical Works. (3) I.	Mr. Travis
220. Vulgar Latin. (3) II.	_____
225. Italic Dialects and Latin Historical Grammar. (3) I.	Mr. Puhvel
253. Seminar in Latin Studies: Palaeography. (3) II.	Mr. Levine
*254. Seminar in Latin Studies: Comedy. (3) II.	Mr. Travis
255. Seminar in Latin Studies: Elegy. (3) I.	Mr. Levine
256. Seminar in Latin Studies: Ovid. (3) II.	Mr. Hoffleit
290. Research in Latin. (1-4) I, II.	The Staff
370. The Teaching of Latin. (3) II.	Miss Smith

Prerequisite: graduate standing or consent of the instructor.

Review of grammar; concentrated reading and translation of selections from Vergil, Ovid, Cicero and other prose-writers. Methods of teaching especially adapted to the junior and senior high school.

GREEK

Lower Division Courses

- 1-2. Elementary Greek. (4-4) Yr. Miss Caldwell
 Sections meet four hours weekly. Upon completing Greek 2, students may enroll directly in course 101.
 The elements of Greek grammar and readings from Attic prose.
10. Introduction to Medieval and Modern Greek. (4) I. Mrs. Norre
 Sections meet four hours weekly.
 A study of the forms, syntax, and vocabulary of the medieval and modern language. A knowledge of ancient Greek is desirable, but is not a prerequisite.
11. Readings in Medieval and Modern Greek. (4) II. Mrs. Norre
 Sections meet four hours weekly.
 Prerequisite: course 10.
40. The Greek Element in English. (2) I, II. Mrs. Mohr
 A knowledge of Greek is not required.
 A study of the derivation and usage of English words of Greek origin. The student learns to analyze the English words into their component elements—prefixes, bases, and suffixes—and so acquires an understanding of their form and meaning.

Upper Division Courses

Important: certain upper division courses are not given every year (see below). All courses required for the major may readily be taken within the usual four years of undergraduate study, but adequate planning is essential.

- 100A-100B. Prose Composition. (1-1) Yr. Mr. Hoffleit, Mrs. Mohr
 Prerequisite: course 101 or 102. Course 100A is prerequisite to 100B.

* Not to be given, 1963-1964.

225. Greek Dialects and Historical Grammar. (3) II. Mr. Puhvel
 *250. Seminar in Greek Studies: Comedy. (3) I. Mr. Travis
 290. Research in Greek. (1-4) I, II. The Staff

SANSKRIT

Upper Division Courses

190. The Elements of Sanskrit. (3) I. Mr. Puhvel
 Prerequisite: consent of the instructor.
 Introduction to script and grammar, with reading exercises and attention to the significance of Sanskrit for the understanding of other Indo-European languages.
 *191. Advanced Sanskrit. (3) II. Mr. Puhvel
 Prerequisite: Sanskrit 190 or equivalent preparation.
 Advanced aspects of grammar and the reading of literary texts.
 199. Special Studies in Sanskrit. (1-5) I, II. Mr. Puhvel
 Prerequisite: senior standing and consent of the instructor.

Related Courses in Other Departments

DANCE

(Department Office, 122 Women's Gymnasium)

Alma M. Hawkins, Ed.D., *Associate Professor of Dance (Chairman of the Department)*.

_____, *Assistant Professor of Dance.*

_____, *Assistant Professor of Dance.*

_____, *Assistant Professor of Dance.*

Pia Gilbert, *Associate Supervisor of Dance.*

Carol J. Scothorn, M.A., *Associate Supervisor of Dance.*

Audrey A. Robinson, M.S., *Assistant Supervisor of Dance.*

Annemarie Steinbiss, M.S., *Associate in Dance.*

Letters and Science List.—Courses 1, 150A, 150B, 151 and 155 (formerly Physical Education 150A, 150B, 151 and 155) are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

College of Fine Arts

The dance major offered in the College of Fine Arts leads to the Bachelor of Arts degree. For requirements of the College of Fine Arts, see page 119.

Preparation for the Major.—Dance 35, 36A-36B, 36C-36D, and 38; Inte-

* Not to be given, 1963-1964.

grated Arts 1A-1B, English 1A, Speech 1, Psychology 1A, 33, Zoology 15, 25, and four units (including at least one course with an asterisk) chosen from Art 10A*, 10B*, 30A*, English 31*, Humanities 1A, 1B, Music 30A, 30B, and Theater Arts 5A.

The Major.—Dance 150A-150B, 151, 152, 153A-153B, 154, 158A-158B, Physical Education 110A-110B, six units chosen from Art 100A, 100B, 108, 109, 116B, English 115, 117J, 133, Folklore 101, 105, Music 121A, 121B, 136A, 136B, 137, 190H, Philosophy 136, Theater Arts 102, 118A, 119, 140E, 140F, 144, 147, and electives from Anthropology 102, 124, 125, 127, Sociology 101, 126, Philosophy 146A, 146B, 147, to bring total to 36 units.

Admission to Graduate Status

In addition to meeting the requirements of the Graduate Division as stated in the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION the student must have an undergraduate major in dance or equivalent preparation with a minimum of 24 upper division units in the dance concentration. Students whose preparation is deficient, as determined by Graduate Admissions, will be required to make up such deficiencies in addition to the degree program. For more detailed information, write to the Chairman of the Department of Dance and enclose a transcript or summary of academic record.

Requirements for the Master's Degree

Graduate students may follow Plan I or Plan II (see page 164). The candidate's course of study will be planned under the guidance of the graduate adviser. Emphasis may be placed on dance history and philosophy, choreography, ethnic forms, or dance education.

Plan I.—A minimum of 20 semester units and a thesis. Choreography of major proportion is acceptable as a thesis.

Plan II.—A minimum of 24 semester units, including an independent study project and a final comprehensive examination.

Lower Division Courses

1. Dance Activities. (½) I, II.

The Staff

Classes in modern dance and ethnic dance for the general college student. Consult *Schedule of Classes* for complete list of offerings. May be repeated for a maximum of 4 units credit.

34. Stage Movement. (2) I, II.

Three hours, lecture and laboratory.

Study of the principles of physical timing, rhythm and control in the acting situation.

35. Music Analysis for Dance. (2) I, II.

Mrs. Gilbert

Analysis of the elements of music and their relationship to dance. Use of percussion instruments and the piano as tools for dance accompaniment.

36A-B-C-D. Fundamentals of Creative Dance. (2-2-2-2)

The Staff

Open only to students with a major or minor in dance. Must be taken in sequence. Study of dance through varied experience in movement including historical and contemporary forms with emphasis on increasing ability to use movement creatively and to relate to dance the principles and elements of other arts.

38. Dance Notation. (1) I.

Mrs. Scothorn

Prerequisite: consent of the instructor.

Study of systems of dance notation with experiences in recording and interpreting dance scores.

Upper Division Courses

150A-150B. Advanced Dance. (3-3) Yr.

Mrs. Scothorn

Prerequisite: course 36A-B-C-D.

A continuing study of dance with emphasis on integration and synthesis of previous dance experience and the creative use of movement in composition.

151. History of Dance. (3) I.

Prerequisite: consent of the instructor.

Study of the functions and form of dance in society. Consideration of various cultures—primitive through the present day with emphasis on dance as an art in Western civilization.

152. Organization of Public Dance Performances. (2) II.

Mrs. Scothorn

Prerequisite: course 150A-150B.

Study of the purpose, administration, procedures and production problems of dance events.

153A-153B. Dance Composition Workshop. (2-2) Yr.

Mrs. Scothorn

Prerequisite: consent of the instructor.

The elements and process of dance composition, and practice in individual and group composition and evaluation.

154. Music as Dance Accompaniment. (2) I.

Mrs. Gilbert

Prerequisite: course 35 or consent of instructor.

Piano and percussion improvisation for dance; history of music for dance; choreographer-composer relationships.

155. Folk Festivals. (2) II.

Prerequisite: one semester of folk dance or consent of the instructor.

Study of folklore in relation to festivals and pageants. The preparation of an original festival.

158A-158B. Philosophical Bases and Trends in Dance. (2-2) Yr.

Prerequisite: courses 150A-150B, 151.

Miss Hawkins

Critical analysis of dance as a creative experience and the role of professional and educational dance in our society. Study of selected points of view and the relationship of various creative approaches to current developments in dance.

170. Ethnic Dance of Eastern Cultures. (2) I, II.

Prerequisite: consent of instructor.

Study of dances of Eastern cultures with emphasis on the unique movement characteristics, rhythmic structure, historical background and related folklore. Includes performance of selected dances.

175. Ethnic Dance of Western Cultures. (2) I, II.

Prerequisites: consent of instructor.

Study of folk dances of Western cultures with emphasis on the unique movement characteristics, rhythmic structure, historical background and related folklore. Includes performance of selected dances.

190. Advanced Dance Performance. (1-3) I, II.

Mrs. Scothorn

Prerequisite: consent of instructor.

The study and performance of major choreography.

199. Special Studies in Dance. (1-4) I, II.

Miss Hawkins

Prerequisite: senior standing and consent of instructor.

Graduate Courses

200. Advanced Dance Notation. (2) II.

Mrs. Scothorn

Prerequisite: consent of the instructor.

Advanced study of dance notation.

202. Research Methods and Bibliography in Dance. (2) I. The Staff

204A-204B. Advanced Choreography. (2-2) Yr. Mrs. Scothorn
Prerequisite: course 153A-153B or the equivalent.
Theoretical and creative aspects of advanced choreography.

206. Music for Dance. (2) II. Mrs. Gilbert
Prerequisite: course 154 or the equivalent.
Theory of the aesthetic and functional relationship of music to dance.

208. Principles of Dance Theater. (2) I. Mrs. Scothorn
Prerequisite: course 152 or the equivalent.
Principles which serve the presentation of dance.

210. Aesthetics of Dance. (2) I. Miss Hawkins
A critical analysis of aesthetic concepts related to dance.

220. Dance in the Twentieth Century. (2) II. Miss Hawkins
Prerequisite: course 151 or the equivalent.
Concepts, styles, and forms of dance in the 20th century.

226. Dance Expressions in Selected Cultures. (2) II. ———
Prerequisite: course 151 or the equivalent.
Dance as a social and cultural experience in the life of man.

227. Advanced Studies in Dance Education. (2) I. Miss Hawkins
Prerequisite: consent of the instructor.
Concepts relating to the development of creativity and artistic integrity in dance.

251. Dance in Rehabilitation. (2) II. Miss Hawkins and Staff
Dance in the therapeutic setting.

291. Directed Studies in Dance. (1-6) I, II. Miss Hawkins

Professional Courses in Method

327A-327B. Principles of Teaching Dance. (2-2) Yr. ———
Prerequisite: course 35 or 154.
A study of methods, curricular materials; and evaluation procedures as related to the teaching of dance in the secondary schools.

Related Courses in Other Departments

Integrated Arts 1A-1B. Man's Creative Experience in the Arts. (3-3) Yr.
Mr. Trissel

 Alice John Vandermeulen, Ph.D., *Lecturer in Economics.*

Letters and Science List.—All undergraduate courses in economics are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Objective of the Major in Economics.—The program for the student majoring in the field of economics is designed to provide a well-balanced and carefully integrated curriculum in liberal arts leading to the A.B. degree. The requirements for and offerings in the major are intended not only to provide a well-rounded education based on a broad foundation of economics and related subjects, but also to supply basic training for students who plan to enter the professional fields of high school and junior college teaching in the social sciences or business education, law, social work, or government service. The major provides the basic training for professional graduate studies in economics. Majors who envisage a business career can arrange a plan of study which provides the basic training for such a career and the foundation for graduate work in schools of business administration.

Upper division programs are worked out for each student in consultation with a departmental adviser.

Preparation for the Major.—Required: Economics 1A–1B. Under special circumstances and by petition, a student may be permitted to substitute Economics 101 for Economics 1A–1B. This may be done only when the student is in upper division standing.

Requirements for the Major.

- 1) Economics 100A and either 100B or 140;
- 2) One course in each of three fields in economics listed below other than the field of economic theory or Economics 140;
- 3) Twenty-four upper division units in courses offered by the Department of Economics, including (1) and (2). Upon petition to the department, not more than 6 units of upper division courses in business administration may be accepted toward the satisfaction of this requirement.

§ *Recommended Courses.*—Lower division students preparing for the major in economics are strongly recommended to include in their programs Economics 13 and Business Administration 1A. Majors in economics should endeavor to include courses selected from the following departments in completing their upper division programs: Anthropology and Sociology, Business Administration, Geography, History, Philosophy, Political Science, Psychology. The selection should be made on the basis of the student's proposed career and on the recommendation of his major adviser. Students who intend to pursue economics to the graduate level are encouraged to take work in mathematics at least through the first course in calculus. This applies especially to those who are interested in economic theory and statistics.

Fields:

Economic Theory (courses 100A, 100B, 103, 104, 105).

Economic Institutions (courses 107, 108, 112).

Economic Development (courses 109, 110, 111).

Regional Economics (courses 120, 121).

Public Finance (courses 131, 132, 133).

Money and Banking (courses 135, 136).

Statistics, Mathematical Economics, and Econometrics (courses 140, 141, 142, 143, 144, 145).

Labor Economics (courses 150, 152, 155, 156, 158).

Government and Industry (courses 170, 171, 173, 174).

International Economics (courses 195, 196, 197).

Requirements for the M.A. Degree

Candidates for the degree of Master of Arts in economics are required to have completed the equivalent of an undergraduate major in economics, including Economics 140 or its equivalent. In addition to the general University requirements (see pages 162–165), the departmental requirements are as follows: Economics 100A–100B, Economics 103, and Economics 140, or their equivalents, passed with a grade of at least C; and at least 12 units of strictly graduate courses in economics. These graduate courses must be spread over at least two “subject” fields in economics (see above). In addition, each student will have to specialize in one of these fields offered by the department. If he elects to follow the examination plan rather than the thesis plan, he will be given a single four-hour written examination in his field of concentration. This examination will be given, normally, on a Saturday morning of the thirteenth or fourteenth week of the semester.

|| Effective for all new majors.

§ Not more than 42 units of upper division courses in economics and business administration may be counted toward the bachelor's degree.

With the consent of the graduate adviser, candidates may offer 6 units of acceptable upper division and/or graduate courses in other social sciences, in business administration, in mathematics, in psychology, in education, or in philosophy in partial satisfaction of the requirements for the degree. This will not, however, relieve the student from taking 12 graduate units in the Department of Economics.

Requirements for the Ph.D. Degree

- (1) *Basic Requirements.* See general University regulations, pages 165-169.
- (2) *Accounting, Statistics, Economic History, and History of Economic Thought.* A semester course in (a) accounting, (b) statistics, (c) American economic history, (d) European economic history and (e) History of Economic Thought at the lower division, upper division, or graduate level—or the equivalent thereof as interpreted by the graduate committee of the department—must be completed at the earliest possible date and prior to admission to candidacy, if not in candidate's prior record.
- (3) *Minor.* Every candidate for the Ph.D. degree in economics must offer a minor field of concentration outside the department, to be selected from history, political science, geography, philosophy, psychology, anthropology, sociology, or mathematics. Any other field will be acceptable only by special approval of the department. A minimum of nine units in upper division courses (excluding the basic introductory course), or lower division courses in mathematics—or the equivalent thereof as interpreted by the graduate committee of the department—will be required.

(4) *General Qualifying Examinations.* In order to gain admission to candidacy, graduate students shall pass written and oral examinations. The written examinations will cover the fields of general economic theory, and three additional fields to be selected from those listed in the field offerings of the department. A student, upon petition, may be allowed to substitute a field in the School of Business Administration for one of his three elective fields in economics.

A student may take his written qualifying examinations in general economic theory and in one other field in one semester and his other two written examinations in a subsequent semester. Each of the four written examinations will be three hours in length. The oral examination will cover the student's preparation in economics in general and can be taken only after all the written examinations have been passed.

The qualifying examinations for the Ph.D. degree will be given during the ninth, tenth, and eleventh weeks of each semester.

Lower Division Courses

1A-1B. Principles of Economics. (3-3) Yr. Beginning either semester.

Mr. Allen, Mr. Barron, Mr. Campbell, Mr. Gorter, Mr. Hansen,

Lecture, two hours; discussion, one hour.

Mr. H. L. Miller, Mr. Scoville

An introduction to principles of economic analysis, economic institutions, and issues of economic policy. The first semester emphasizes allocation of resources and distribution of income through the price system. The second semester concentrates on aggregative economics, including money and banking, national income, and international trade.

13. Evolution of Economic Institutions in America. (3) I, II. Mr. Murphy

The historical development of the present American economic system and its performance over time, especially as revealed by the quantitative data of modern research.

Upper Division Courses

Courses 1A-1B or 101 are prerequisite to all upper division courses in economics.

100A. General Economic Theory. (3) I, II. Mr. Hirshleifer, Mr. H. L. Miller

The laws of demand, supply, returns, and costs; price and output determination in different market situations. The implications of the pricing process for the optimum allocation of resources.

100B. General Economic Theory. (3) I, II. Mr. Campbell, Mr. Hansen

Theory of employment and income; theory of factor pricing and income distribution; present state and prospects of capitalism in relation to welfare and economic progress.

101. Economic Principles and Problems. (3) I, II.

Mr. Alchian, Mr. Allen, Mr. Barron, Mr. Kelly, Mr. Murphy

Designed for non-economics majors. A one-semester course presenting the principles of economics with applications to current economic problems. Satisfies the prerequisite to all upper division courses in economics. Not open to students with credit for 1A-1B.

103. History of Economic Theory. (3) I.

Mr. Allen

A survey of economic analysis from Grecian antiquity to the early twentieth century, concentrating on the 18th and 19th centuries; special attention to selected writers, including Aristotle, the Mercantilists, the Physiocrats, Hume, Smith, Malthus, Ricardo, Marx, the Marginalists, and Marshall.

104. Industrial Organization. (3) II.

Mr. Demsetz

A study of the structure and operation of American industry. Particular attention will be given to the nature and economic effects of the corporation, concentration of output and control, characteristics of products and production processes, and price policies.

105. Economic Fluctuations. (3) I.

Mr. Campbell, Mr. Hansen

Prerequisite: course 135.

Identification, measurement, and analysis of economic fluctuations; methods of forecasting. Appraisal of alternative countercyclical policies, public and private, and their use in recent cyclical experience.

107. Comparative Economic Systems. (3) I, II. Mr. Murphy, Mr. Scoville

An analysis of capitalist and planned economies as exemplified by the United States, Soviet Union, Great Britain, etc. Alternative systems are compared with respect to the economic goals, theories of economic organization, institutions, and developmental processes. Problems of economic planning are emphasized.

108. Development of Economic Institutions. (3) I.

Mr. Scoville

Rise of capitalism, especially in Western Europe, with emphasis on its basic institutions, such as private property, profit motive, price system; comparative rates of growth of different countries; protestantism and capitalism; critical evaluation of the concept of the Industrial Revolution.

109. Economic Development. (3) I.

Mr. Baldwin

A brief survey of development theories from Adam Smith to the post-Keynesians is followed by an examination of the problems both of accelerated development in poor countries and of maintaining development in rich countries.

110. Problems of Underdeveloped Areas. (3) II.

Mr. Baldwin

Prerequisite: course 109.

An analysis of the obstacles to economic development confronting poor countries and of the policies designed to overcome these barriers to growth. Special problems of different areas as well as development plans of selected countries are examined.

111. Population Analysis. (3) II.

Mr. Hansen

An economic analysis of the causes and consequences of population growth and change, particularly as related to income levels and patterns of resource allocation. Analysis of investment in human capital.

112. Economic Problems of the U.S.S.R. (3) II.

Mr. Murphy

An introduction to the organization and policies of the economy of the U.S.S.R.

120. Regional Economic Analysis. (3) I.

The analysis of intranational regions including discussion of: income determination, regional growth, and interregional flows. Special attention to the problems of the Los Angeles region.

121. The Economics of Location. (3) II.

The principles of location of firms in terms of general and partial equilibrium analysis. Includes empirical evidence on actual location practices.

131. Public Finance. (3) I, II.

Mr. Somers

A survey of the development and economic effects of public expenditures, revenues, and indebtedness, with reference to selected tax and budgetary problems.

132. State and Local Finance. (3) II.

The division of functions and revenues between state and local governments; the revenues, expenditures, and indebtedness of these governments. Analyses of state and local tax systems.

133. Federal Finance. (3) II.

Mr. Somers

Prerequisite: course 135.

An analysis of the federal tax structure, federal expenditures, and the federal debt structure, and their relationship to the level of employment and income, resource allocation, and the distribution of income.

135. Money and Banking. (3) I, II.

Mr. Barron, Mr. Brunner, Mr. Campbell, Mr. H. L. Miller

The principles and history of money and banking, with principal reference to the experience and problems of the United States.

136. Techniques of Monetary Control. (3) II.

Mr. Brunner

Prerequisite: course 135.

The nature of monetary controls; monetary developments as related to prices, production, and national income; monetary policies in the interwar and postwar periods; monetary policy and domestic economic stabilization.

140. Introduction to Statistical Methods. (3) I, II.

Mr. Hirshleifer, Mr. H. L. Miller

The elements of statistical analysis. Presentation and interpretation of data; descriptive statistics; theory of probability and basic sampling distributions; statistical inference, including principles of estimation and tests of hypotheses; introduction to regression and correlation. Not open for credit to students who have completed Business Administration 115.

141. Principles of Statistical Decision. (3) I.

Mr. Hirshleifer

Prerequisite: course 140.

Errors of the first and second kind; economic loss functions; prior probabilities and Bayes' Theorem. Analysis of classical and Bayesian approaches. Application to inventory and production problems. The value of information, and implications for sampling design.

142. Quantitative Economic Analysis. (3) II.

Mr. Hansen

Prerequisite: course 140 or the equivalent.

Advanced regression and correlation analysis, and analysis of variance; study of time series and index numbers. Emphasis on applications of statistical tools in quantitative economic analysis and on implications of quantitative knowledge on the validity of economic theory.

- 143. Introduction to Mathematical Economics. (3) I.** Mr. Brunner
Basic concepts and operations of mathematical logic and their application to economic analysis. Differentiation of functions, maximum and minimum problems in economics. Linear systems in economics, matrices, vectors and determinants and their elementary properties.
- 144. Economic Models and Econometric Methods. (3) II.** Mr. Demsetz
Prerequisite: course 140.
An introductory course designed to acquaint the student with basic concepts in model building, different types of economic models, problems and techniques of quantifying models, and the use of such models for public policy.
- 145. Logic and Scientific Method in Economics. (3) II.** Mr. Brunner
Prerequisite: Philosophy 31 and Economics 140.
Application of the sentential and predicate calculus to the analysis of the logical structure of hypotheses and theories in economics. The assignment of meaning to the formal constructions will be investigated and the nature of confirmation, prediction and explanation considered.
- 150. Labor Economics. (3) I, II** Mr. Kelly
Economic analysis of trade union philosophies and practices; theoretical exploration of basic influences affecting real wages and employment, with examination of the relevant statistical record; internal wage policies of the firm; union-management relations and the public economy.
- 152. Social Insurance. (3) II.**
Basis of the social security program; unemployment insurance, workmen's compensation, old age pensions, insurance against sickness.
- 155. History and Problems of the Labor Movement. (3) I.** Mr. Kelly
The origin and development of trade-unionism in the United States; theory of collective bargaining, methods and practices of contemporary unionism; the legal status of unionism.
- 156. Labor Law and Legislation. (3) II.** Mr. Kelly
Prerequisite: course 150.
The social and economic basis of the law regulating employer-employee relationships. Analysis of the implications of federal and state legislation for collective bargaining; economic effects of laws regulating wages, hours of work, and other labor standards.
- 158. Collective Bargaining. (3) I, II.** Mr. Kelly
Prerequisite: course 150.
Theory and practice of collective bargaining; mediation and arbitration of industrial disputes; grievance procedures and administration of labor-management agreements; government intervention in collective bargaining.
- 170. Economics of Industrial Control. (3) I, II.** Mr. Barron, Mr. Pegrum
Economic and institutional foundations of public regulation; the pricing process and public policy; public control of competition, monopoly, transportation, and public utilities; the rationale of a private enterprise economy.
- 171. Public Utilities. (3) I.** Mr. Barron
The economics of public service corporations; the economic problems of regulation; state and national problems arising from the development of public utilities; public ownership.
- 173. Economics of Transportation. (3) I, II.** Mr. Pegrum
The economic characteristics of transport; the functions of the different agencies; pricing and resource allocation in transport; public regulation of transport; urban transport; the modern transport problem.
- 174. National Transport Policy. (3) II.** Mr. Pegrum
Prerequisite: course 170 or 171 or 173.
Major economic problems of national transport policy; interagency pricing; interagency integration; investment allocation within and among agencies; traffic allocation among agencies; economic analysis of public aid and regulation; terminal and metropolitan transport problems; coordination of regulatory agencies.

176. Economics of Natural Resources. (3) II.**Mr. Barron**

Pricing system and efficiency in the use and conservation of natural resources; private and social cost, and the concept of waste; cost allocation among users. Analysis of policies for petroleum, coal, timber, fisheries, and minerals.

177. Water and Land Economics. (3) II.

Economic principles in utilization of water and resources. Legal and institutional factors governing use. Problems in development, reclamation, conservation, and allocation. Project and area studies. One field trip required. Not open for credit to students who have taken Agricultural Economics 177.

195. Principles of International Trade. (3) I, II.**Mr. Allen, Mr. Gorter**

A general introduction to international economics, based upon an examination of the theory of trade and the means and significance of balance of payments adjustments, with analysis of major issues of international commercial and monetary policy confronting national and international agencies.

196. International Trade Policies. (3) II.**Mr. Gorter**

Prerequisite: course 195 or consent of the instructor.

Analysis of theory, practice and consequences of regulation of international trade as expressed through the policies of nations and of international agencies concerned with obtaining international accord on such matters as import quotas, commodity agreements, and the reduction of trade barriers.

197. International Finance. (3) II.**Mr. Allen**

Prerequisite: course 135 or 195.

Emphasis on interpretation of the balance of payments and the adjustment to national and international equilibria through changes in price levels, exchange rates, and national income. Other topics include: making international payments, determination of exchange rates under various monetary standards, capital movements, exchange controls, and international monetary organizations.

199. Special Studies in Economics. (1-3) I, II.**The Staff**

Prerequisite: senior standing and consent of the instructor.

Graduate Courses**201A,B,C. Economic Theory. (3-3-3)****201A,B. Price and Distribution Theory.****Mr. Alchian, Mr. Baldwin, Mr. Hirshleifer****201C. Macroeconomics.****Mr. Brunner****202. Monetary Theory. (3)****Mr. Brunner****203A. Economic Theory of Decision. (3)****Mr. Marschak**

Same as Business Administration 203A.

203B. Economic Theory of Information and Organization. (3)

Same as Business Administration 203B.

Mr. Marschak**204. Analytical Methods and Concepts. Seminar. (3)****Mr. Brunner**

(Formerly numbered 203.)

242A-242B. Econometrics. (3-3)**Mr. Brunner, Mr. Demsetz****250. History of Economic Thought. Seminar. (3)****Mr. Allen**

Prerequisite: course 103 or consent of the instructor.

252. Recent Trends in Economic Thought. Seminar. (3)**253. Applications of Economic Theory. Seminar. (3)****Mr. Alchian****254. Economic Fluctuations and Growth. Seminar. (3)****Mr. Campbell**

256. Statistical Economics. Seminar. (3) _____
258. Monetary Policy. Seminar. (3) Mr. H. L. Miller
- 260A-260B. Industrial Organization, Price Policies and Regulation.
Seminar. (3-3) Mr. Barron, Mr. Pegrum
Economics 260A is not a prerequisite for 260B.
261. Public Finance. Seminar. (3) Mr. Somers
262. Evolution of Economic Institutions in the United States. Seminar. (3)
Mr. Scoville
263. Evolution of Economic Institutions in Western Europe. Seminar. (3)
Mr. Murphy, Mr. Scoville
265. National Transport Policy. Seminar. (3) Mr. Pegrum
- 266A-266B. International Economics. Seminar. (3-3) Mr. Allen, Mr. Gorter
267. Economic Foreign Policy. Seminar. (3) Mr. Gorter
- 268A-268B. Economic Growth of Underdeveloped Areas. Seminar.
(3-3) Mr. Baldwin

Letters and Science List.—Courses 100A–100B, 108, 110A–110B, and 129 are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

The Major.—An undergraduate major is not offered in the Department of Education at Los Angeles. Students desiring to qualify for certificates of completion leading to teaching and administration credentials should consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

Upper Division Courses

Junior standing is prerequisite to all courses in education except course 100A, which is open to high sophomores. Additional prerequisites for enrollment in 100 and 300 series courses will be found on page 139 of this bulletin.

100A–100B. Fundamentals of Education. (2–2) I, II.

Mr. Kneller, Mr. MacMillam and Staff

Prerequisite: course 100A is prerequisite to 100B.

An analytical and critical study of American educational thought and practice, with special emphasis on the ability of the teacher to deal with educational ideas as they relate to philosophic, social, political, and economic factors.

* The training staff consists of about two hundred public school teachers, chosen for their ability as teachers and as supervisors by the University supervisory staff, and approved for such service by the public school authorities.

108. Sociology of Education. (3) I, II.

Mr. Gordon

(Same as Sociology 180.)

Prerequisite: Sociology 1 or 101.

Studies of social processes and interaction patterns in educational organizations; the relationship of such organizations to aspects of society, social class, and power; social relations within the school; formal and informal groups; school culture; roles of teachers, students, and administrators.

Psychology 1A and either 1B or 33 are prerequisites to all courses in educational psychology.

110A-110B. Psychological Foundations of Education. (3-2) I, II.**Course 110A.**

Mr. Keislar, Mr. Wittrock

Prerequisite: Psychology 1A and either 1B or 33.

The learning process in school situations and the evaluation of learning; physical, mental, and social development of children in relation to the school.

Course 110B.

Mr. Whittrock

Prerequisite: course 110A.

Personality formation and assessment among pupils; principles of guidance as applied to problems of pupil personnel and counseling in schools.

114. Educational Statistics. (2) I.

Mr. Husek

Prerequisite: Psychology 1A and either 1B or 33.

Lecture and laboratory.

Elementary descriptive statistical procedures and sampling error theory through simple analysis of variance and Chi square as applied to educational problems.

116. The Education of Exceptional Children. (3) I.

Mrs. Seagoe

Prerequisite: course 110A-110B.

The characteristics of and educational provisions for exceptional children, including the mentally and physically handicapped, the gifted, and the delinquent.

***118. Counseling and Guidance for the Handicapped. (2) II.**

Mr. Leton

Prerequisite: course 116.

Principles and practices employed in guidance and counseling services for persons who are handicapped, mentally, physically, or socially. Emphasis given to occupational opportunities for the handicapped and to the role of appraisal of individual differences in planning for social, emotional, and vocational adjustments.

119. Educational Measurement. (3) II.

Mr. Husek

Lecture and laboratory. Prerequisite: course 114.

Introduction to achievement test construction, elementary theory of measurement, survey of measurement techniques, critical study of typical tests and inventories used for estimating aptitude, achievement, attitudes, temperaments, and interests.

122A. Early Childhood Education. (4) I, II.

Mrs. Sherer

Prerequisite: courses 100A and 110A.

Theory and practice in nursery schools, kindergartens, and primary grades, with particular emphasis on social studies, science, and mathematics for younger children.

122B. Early Childhood Education. (4) I, II.

Mrs. Sherer, Mrs. Tyler

Prerequisite: course 122A.

Language development of children from nursery school age through the primary grades; includes oral and written language, prereading, reading, and literature.

***122C. The Arts in Early Childhood Education. (3) II.**

Mrs. Sherer

Prerequisite: course 110A-110B.

The role of the arts (music, art, rhythm, dramatic play and creative language) in the school and out of school experience of younger children.

* Not to be given, 1963-1964.

124A. The Elementary School Curriculum. (4) I, II.

Mr. Cunningham, Miss Crabtree, Mr. McNeil

Prerequisite: courses 100A, 110A. Aside from regular class hours, students must reserve three hours each week for participation in assigned schools.

Current conceptions of the elementary school curriculum, with emphasis on the role of social studies and science, and on effective teaching techniques.

124B. The Elementary School Curriculum. (4) I, II.

Mr. Bormuth, Mr. Dutton

Prerequisite: courses 100A, 110A. Aside from regular class hours, students must reserve three hours each week for participation in a public elementary school.

Current conceptions of the elementary school curriculum, with emphasis on reading, language, and arithmetic, and on effective teaching techniques.

128. Curriculum for Mentally Retarded Children. (3) II.

Mr. Leton

Prerequisite: courses 116, 110A-110B.

Organization, curricula, and procedures in classes for the mentally retarded.

129. Secondary Education. (3) I, II.

Mr. Vredevoe

A study of secondary education in the United States, with reference to the needs and problems of secondary school teachers.

130. Curriculum and Instruction in Secondary Schools. (3) I, II.

Mr. Popham, Mr. Hendrix and the Staff

Prerequisite: course 100A for secondary candidates; course 209A or 234 for junior college candidates. This course is prerequisite to all supervised teaching for the general secondary or junior college credentials.

Current conceptions of the secondary school curriculum, including instructional techniques.

137. Business Education. (3) I, II.

Mr. Erickson

The organization, administration, and teaching of business education in secondary schools.

139A. Audio-Visual Media of Instruction. (2) I, II.

Mr. Vetter

(Former number, 147 and 147EC.)

Prerequisite: this course must be taken concurrently with 122A, 124A, or 130.

Theory and practice in the use of audio-visual instruction media with reference to particular educational levels. Content includes selection, evaluation, and utilization of a wide range of instructional materials.

139B. Self-instructional Materials and Devices. (2) II.

Prerequisite: course 139A or equivalent.

Mrs. Markle, Mr. Popham

Analysis of developments in the design and use of self-instructional materials and teaching machines in the elementary and secondary school curricula, and techniques in the development of self-instructional programs.

149. Field Work. (2-4) I, II.

Mr. Dickerman

Supervised field work in adult education.

199. Special Studies. (1-5) I, II.

The Staff

Prerequisite: senior standing and consent of the instructor.

Graduate Courses†**200A-200B. Fundamentals of Educational Research. (2-2) Yr.**

Mr. Husek, Mr. Keislar

Lecture and laboratory. Prerequisite: course 114. Education 200A is prerequisite for Education 200B.

Considers research reporting, including bibliographical techniques, presentation of data, the application of the scientific method to educational research, theory of research, experimental design, techniques for gathering data, and interpretation of results.

† Open only to students in graduate status. Consent of the instructor is required for all graduate courses.

201A-201B. History of Education. (2-2) Yr.**Mr. Nunis**

Development of educational thought and practice in Western civilization. Emphasis in 201A upon the Greek and Roman cultures, the Middle Ages, the Renaissance, the Reformation, and National Systems of Europe. Emphasis in 201B upon Colonial America and significant educational movements in the United States.

204A-204B. Comparative Education. (2-2) Yr.**Mr. Jones**

Prerequisite: course 100A-100B.

An analytical and critical study of educational thought and practice in major countries and regions of the world. Particular attention is given to political, economic, social, religious, and other factors which influence education and public enlightenment.

206A-206B. Philosophy of Education. (2-2) Yr.**Mr. Kneller**

Prerequisite: course 206A is prerequisite to course 206B.

A systematic study of the philosophic and related forces determining American educational policy and practice.

208A-208B. Advanced Sociology of Education. (2-2) Yr.**Mr. Gordon**

Prerequisite: course 108; Sociology 180; or consent of the instructor.

The application of the concepts of social and cultural systems to the analysis of educational systems and the derivation of general principles of group behavior therefrom; interpretation of organizational behavior according to current principles as observed in various educational groups.

209A. The Junior College. (2) I, II.**Mr. Johnson**

A study of the history and role of the junior college, and of problems and issues confronting the two-year college.

209B. Higher Education in the United States. (2) I, II.**Mr. Pace**

An examination and appraisal of the scope and diversity of higher education: varieties of students, institutions, purposes, and programs. Historical background, trends, current issues.

210. Learning and Education. (2) I.**Mr. Wittrock**

Prerequisite: courses 110A-110B, 114, and 119.

A critical review of the theoretical and experimental literature dealing with learning in school.

211. Developmental Processes in Education. (2) I.*Mr. Whittrock**

Prerequisite: courses 110A-110B, 114, and 119.

A study of growth and function in physical, mental, social, and emotional development from infancy through adolescence.

212. Individual Differences and Education. (2) II.**Mr. Whittrock**

Prerequisite: courses 110A-110B, 114, and 119.

Individual and group differences among students, including a study of the interrelationships of special significance for the school.

213A-213B. Personality Theory in Student Personnel Work. (2-2) Yr.**Mr. Sorenson, Mr. Shaw**

Prerequisite: course 110A-110B, 114; 119 prerequisite or concurrent. Courses 213A and 215A prerequisite for course 213B.

213A. Introduction to selected theories of personality, and consideration of their implications for teachers and counselors.

213B. A review of psychological well-being and mental hygiene, and their implications for teachers and counselors.

214A-214B. Measurement in Education. Advanced. (2-2) Yr.**Mr. Husek**

Prerequisite: courses 110A-110B, 114, 119.

Theory of educational measurement; the construction and evaluation of aptitude and achievement tests, questionnaires, and rating devices for prediction and assessment in education.

* Not to be given, 1963-1964.

215A-215B. Fundamentals of Student Personnel Work. (2-2) Yr.

Mr. Sorenson, Mr. Shaw

Prerequisite: courses 110A-110B, 114; 119 prerequisite or concurrent. Course 215A prerequisite for course 215B.

For student personnel workers at all levels.

215A. Considers the functions of the personnel worker and relations to student, teacher, other school officials, parents, and community agencies.

215B. Considers the ethical principles and legal provisions that apply to specific problems.

216A-216B. The Measurement and Guidance of Exceptional Children.

(2-2) Yr.

Mr. Leton

Prerequisite: courses 110A-110B, 116, 218A.

Deals with the techniques for measuring educational characteristics of exceptional children, and the application of data in the educational guidance of exceptional children.

217. Principles of Career Planning. (2) I.

Mr. Barlow

Prerequisite: courses 110A-110B, 114, 119, 215A.

The use of psychological tests and occupational information in helping students in educational and vocational planning.

218A-218B. Appraisal of the Individual Student. (2-2) Yr.

Mr. Leton

Prerequisite: courses 110A-110B, 114; 119A prerequisite or concurrent. Course 215A prerequisite for course 218B.

218A. Introduction to individual testing; includes supervised practice.

218B. Other appraisal techniques, such as systematic observations, the interview, and case studies; and cumulative records and their use in the school.

218C. Evaluation and Field Research in Pupil Personnel Work. (2-4) I, II.

Mr. Leton

Prerequisite: completion of coursework in general area of preparation; concurrent with or following advanced courses in Pupil Personnel specializations; and prior approval in UCLA credential program.

For students in professional sequences in Pupil Personnel Work. Functions and competencies in each specialization. Problems in the organization, implementation, and evaluation of Pupil Personnel Services.

219A-219B. Experimental Study of Audio-Visual Communication Media.

(2-2) Yr.

Mr. Lumsdaine

Prerequisite: courses 114 and 139 or the equivalent required; 119 and 200A-200B recommended.

For advanced students with an active interest in research. Analysis of methods used and results obtained in experiments on the development of knowledge, skills, and attitudes through audio-visual communication media.

220. Principles of Curriculum and Instruction. (2) I, II.

Mrs. Tyler

For graduate students who wish to develop the ability to examine critically the basic concepts underlying the determination of objectives, the selection and organization of learning experience, and the evaluation process.

221. Evaluation of Curriculum and Instruction. (2) I.

Mrs. Tyler

Prerequisite: course 220.

Ways of evaluating the effectiveness of curriculum and instruction, including assessment and improvement of teacher behavior and accomplishment.

222A-222B. Early Childhood Education. Advanced. (2-2) Yr.

Mrs. Sherer

Prerequisite: course 122A-122B.

Critical survey of current literature and research in early childhood education.

223. Environmental Factors in Early Childhood Education. (2) II.

Prerequisite: courses 110A-110B.

Mrs. Sherer

A study of environmental factors in influencing the mental, emotional, and social development of children from infancy through early childhood.

224A-224B. Curriculum Construction in Elementary Education. (2-2) Yr.**Mr. Lucio**

Intensive study of research relating to design, evaluative criteria, and staff organization in curriculum improvement.

225A-225B. The Social Studies in Elementary Education. (2-2) Yr.**Miss Crabtree**

Advanced study and research in social studies teaching and learning, with implications for curriculum development.

226A-226B. Mathematics and Science in Elementary Education. (2-2) Yr.**Mr. Dutton**

Critical analysis of significant research in elementary mathematics and science teaching and learning. Application of findings to improvement of school programs. Evaluative techniques and individual student research.

227A-227B. Reading and Language in Elementary Education. (2-2) Yr.**Mrs. Sherer**

Advanced study and research in reading, spelling, and oral and written language. Application of findings to improvement of school curricula.

230A-230B. The Secondary School Curriculum. (2) Yr.**Mr. McNeil**

Prerequisite: course 220.

For teachers, administrators, guidance personnel, and workers in foundations of education who wish to analyze current curriculum offerings in the light of purposes of secondary education. Consideration will be given to philosophical, psychological, and sociological bases for selection of learning experiences.

234. The Junior College Curriculum. (2) I, II.**Mr. Johnson, Mr. Hendrix**

Prerequisite: course 209A.

A study of trends, practices, and issues in the junior college curriculum, viewed in the light of the role and purposes of the two-year college.

236A-236B. Adult Education. (2-2) Yr.**Mr. Dickerman**

For school administrators and teachers, extension and group workers, librarians, and others who are responsible for developing programs of adult education.

A survey of the field of adult education: functions, development, clientele, institutions, and practices.

237A-237B. Business Education in Secondary and Higher Education. Advanced. (2-2) I, II.**Mr. Erickson**

Prerequisite: course 137 and teaching experience.

Advanced study in business education teaching and learning, with a critical analysis and evaluation of significant research applicable to curriculum and teaching practices.

237C. The Organization, Administration, and Supervision of Business Education. (2) I.**Mr. Erickson**

Prerequisite: teaching experience or consent of the instructor.

A study of principles, practices, and problems related to the organization, administration, and supervision of business education at secondary and higher education levels.

238A-238B. Vocational Education. Advanced. (2-2) Yr.**Mr. Barlow**

Prerequisite: course 100A-100B.

An advanced course in the principles of vocational education, designed especially for supervisory and administrative personnel and candidates for the doctorate in education.

239A-239B. Audio-Visual Education. Advanced. (2-2) Yr.**Mr. Lumsdaine, Mr. Vetter**

For supervisors and administrators dealing with problems involved in developing programs of audio-visual education on the various levels in public education.

240A-240B-240C-240D. Backgrounds for Education Administration.**240A. Introduction to Education Administration. (2) I, II.****Mr. Fawcett**

Presents principles and theories relating to administration and supervision.

240B. Organization of Education in the United States. (2) I, II. ———

Considers the respective roles of the federal, state, county, and local governments, and voluntary agencies in American education. Reveals legal bases and administrative relationships.

240C. School Law. (2) I, II.

Mr. Briscoe

For students preparing for administrative positions in education. Considers laws, court decisions, and legal procedures relating to management of schools.

***240D. Laws Relating to Minors. (2) I, II. ———**

Prerequisite: consent of the instructor.

Considers federal and state statutes, local regulations and ordinances, attorney general and county counsel interpretations, court decisions, and ethical practices applicable to minors.

241A-241B-241C-241D. Supervision of Instruction.**241A. Supervision of Instruction. (2) I, II.**

Mr. Fielstra

Prerequisite: teaching experience and consent of the instructor.

Considers basic principles and procedures applicable to supervision of instruction and in-service education of teachers.

241B. Supervision of Instruction in Elementary Schools. (2) I.

Prerequisite: course 241A.

Mr. Fielstra

Relates principles and procedures of supervision specifically to the elementary school.

241C. Supervision of Instruction in Secondary Schools. (2) II.

Prerequisite: course 241A.

Mr. Fielstra

Relates principles and procedures of supervision specifically to the secondary school.

241D. Evaluation and Field Research in Supervision of Instruction.

(2) I, II.

Mr. Fielstra

Prerequisite: courses 241A and 241B or 241C.

Emphasizes the field study and evaluation of major problems in supervision.

242A. Principles of Educational Finance. (2) I, II.

Mr. Lindman

Reviews historical and theoretical background; considers principles relating to federal and state participation in educational finance; analyzes present expenditures and future requirements.

242B. School Business Administration. (2) I, II. ———

For students preparing to be school superintendents or business managers. Principles of financial planning and operational procedures relating to school budgeting, accounting, purchasing, and plant operation.

242C. School Business Administration. Problems. (2) I, II. ———

Prerequisite: consent of the instructor.

For students preparing for school business management positions. Intensive study of selected problems in school business administration.

244A. Personnel Administration in Education. (2) I.

Mr. Fawcett

Theories and principles of school personnel administration; personnel policies and procedures; selection, appointment, and orientation; salary policies, professional welfare; and in-service growth.

244B. Communication in Education Administration. (2) II. ———

Considers communication theory and its application to administrative problems; includes internal communication among board members, superintendent and staff, and external communication with the community.

* Not to be given, 1963-1964.

- 245A. Research in Education Administration. (2) I, II.** Mr. Yett
Research methodology intrinsic to school administration; includes projection of school population, study of cost-quality relationships, and analysis of services performed by educational research agencies.
- 245B. School Surveys. (2) I, II.** Mr. Yett
Principles and techniques for appraisal of schools and colleges, with emphasis upon school and college surveys.
- 246A-246B. Administration of Elementary Education. (2-2) Yr.** Mr. Lucio
Prerequisite: teaching experience and consent of the instructor.
Emphasizes study of major problems and research findings in elementary administration.
- 246C. Evaluation and Field Research in Elementary School Administration. (2) I, II.** Mr. Lucio
For students who have completed basic requirements for the elementary administration and supervision credential. Emphasizes the field study and evaluation of major problems in administration.
- 247A-247B. Administration of Secondary Education. (2-2) Yr.** Mr. Vredevoe
For students preparing for administration and supervision of secondary schools. Principles and practices in organization and administration of secondary schools.
- 247C. Evaluation and Field Research in Secondary School Administration. (2) I.** Mr. Vredevoe
An examination and evaluation of secondary schools, including an intensive study and development of evaluative instruments and criteria.
- 248A. Organization and Administration of City School Systems. (2) I.** Mr. Briscoe
Principles of efficient school administration as exemplified in the practices of city school systems; compares organization and management procedures used in public administration, business administration, and school administration.
- 248B. City School Administration. Problems. (2) II.** Mr. Briscoe
Provides for intensive study of selected problems in city school administration.
- 249. Administration of Junior Colleges. (2) I, II.** Mr. Campion
For students preparing for or now in administrative positions in junior colleges. Reviews administrative problems peculiar to junior colleges.
- 250A-250B. Seminar: History of Education. (2-2) Yr.** Mr. Nunis
Prerequisite: course 201A-201B. Limited to candidates for advanced degrees.
Specialized studies in the history of education.
- 251A-251B. Seminar: Philosophy of Education. (2-2) Yr.** Mr. Kneller
Prerequisite: courses 110A-110B, 206A-206B.
Limited to candidates for advanced degrees whose major interest is philosophy of education.
- 252A-252B. Seminar: Sociology of Education. (2-2) Yr. Beginning either semester.** Mr. Gordon
Prerequisite: Education 108; Sociology 180; Education 208A-208B or graduate status in the departments of Sociology or Anthropology.
Admission on consultation with the instructor. Limited to graduate students of advanced standing in the departments of Education, Sociology, and Anthropology.
- 253A. Comparative Education Seminar: International Agencies in Education. (2) I.** Mr. Wilson
Reviews the role of education in foreign policy and international affairs; analyzes the development, limitations, and programs of such international agencies as the International Bureau of Education and Unesco; and appraises United States national programs of international cultural relations.

253B. Comparative Education Seminar: International Educational Exchange.

(2) II.

Mr. Wilson

Deals with the international exchange of students and scholars with particular reference to foreign visitors to the United States; explores the research on processes and effects of interchange; conducts research on the situation of foreign students particularly in Los Angeles.

253C-253D. Comparative Education Seminar: African Education.

(2-2) I, II.

Mr. Jones

Prerequisite: course 204A or consent of instructor.

253C focuses on historical development and comparative analysis of educational policies and practices in sub-Saharan Africa with special attention to the impact of social, political, economic, and other factors.

253D is devoted to special problems confronting African education.

253E. Comparative Education Seminar: Latin American Education. (2) II.

Prerequisite: course 204A or consent of instructor.

Mr. Wilson, Mr. Jones

Presents a comparative analysis of educational policies and practices in Latin America with special attention to social, political, and economic factors influencing educational development.

253F. Comparative Education Seminar: Education in Asia. (2) I.

Prerequisite: course 204A or consent of instructor.

Mr. Wilson, Mr. Jones

Presents a comparative analysis of educational policies and practices in Asia with special attention to social, political, and economic factors influencing educational development.

254A. Seminar: Higher Education. (2) I, II.

Mr. Pace

A study of selected topics in higher education drawn from fields such as; administration, finance, personnel, college teaching, graduate education, professional education, institutional surveys.

254B-254C. Seminar: Teacher Education. (2-3) Yr.

Mr. Goodlad

Prerequisite: course 209B recommended.

Historical, philosophical and comparative analyses of issues and problems in education of teachers; curriculum planning, authority and responsibility in higher education, experimentation, research. Designed for advanced students planning to engage in teaching and administrative courses in institutions preparing teachers.

255A-255B Seminar: Educational Psychology. (2-2) Yr.

Mr. Ryans

Prerequisite: courses 210, 211, 212. Limited to candidates for the master's or doctor's degree whose major interest is educational psychology and to students desiring to carry research in this area.

256A-256B. Seminar: Measurement in Education. (2-2) Yr.

Mr. Husek

Prerequisite: course 214A-214B.

Special problems in construction and use of achievement examinations, aptitude tests, and other methods of assessment.

257A*-257B. Seminar: The Development of Newer Educational Media. (2-2)

Yr.

Mr. Lumsdaine, Mrs. Markle

Prerequisite: courses 110A and 139 required; 119 and 210 recommended. Limited to candidates for advanced degrees.

Experimentation with educational applications of teaching films, television courses, and self-instructional media, including implications of theories of learning and communication for the design and use of these media.

257C-257D. Seminar: Programming of Self-Instructional Media. (2-2) Yr.

Prerequisite: course 257B or consent of instructor.

Mr. Lumsdaine, Mrs. Markle

Theory and research techniques in the development and evaluation of self-instructional programmed learning materials for teaching machines and related devices.

* Not to be given, 1963-1964.

258A-258B. Seminar: Counseling Theory and Practice: (2-2) Yr.**Mr. Sorenson**

Prerequisite: courses 213A-213B, 215A. Limited to candidates for advanced degrees whose major interest is counseling, and to selected high school and college counselors.

259A. Seminar: Problems in Educational Psychology. (2) II. Mrs. Seagoe

Prerequisite: courses 210, 211, and 212. Limited to graduate students whose major interest is in educational research.

Studies the procedures employed in collegiate bureaus of educational research, problems investigated, and methodologies employed in public school research.

259B-259C. Seminar: Social Psychological Research in Higher Education.**(2-2) Yr.****Mr. Pace**

Current research on the characteristics of college students and college environments: studies of students' abilities, interests, values; personality development during college; peer groups; organizational variables; the college as a social system.

260. Seminar: Curriculum and Instruction. (2) II. Mr. Goodlad, Mrs. Tyler

Prerequisite: course 220.

For graduate students who wish to pursue research in the curriculum.

261A-261B. Seminar: Early Childhood Education. (2-2) Yr. Mrs. Sherer

For graduate students whose major interest is in the nursery school, kindergarten, or primary education.

262A-262B. Seminar: The Elementary School Curriculum. (2-2) Yr.

Prerequisite: course 124B.

Mr. Lucio

For teachers, curriculum workers, administrators, and graduate students interested in the study of curriculum problems in the elementary school.

263. Seminar: Secondary School Curriculum. (2) I, II.**Mr. McNeil**

Prerequisite: courses 220, 221.

Primarily for doctoral students in supervision and curriculum. Study and research on selected problems.

264A-264B. Seminar: The Junior College. (2-2) Yr.**Mr. Johnson**

Prerequisite: course 209A.

A study of selected junior college problems and developments; administration, student personnel services, curriculum.

264C-264D. Seminar: Technical Education in the Junior College. (2) I, II.**Mr. Barlow**

A study of the content, methods, and organization of technical education programs of a vocational-technical nature, with particular reference to junior college problems of teaching and administration.

266A-266B. Seminar: Adult Education. (2-2) Yr.**Mr. Dickerman**

Prerequisite: course 236A-236B.

For professional adult educators. Trends, problems, and recent research.

267A-267B. Seminar: Research in Business Education. (2-2) I, II.**Mr. Wanous**

Covers the bibliography of and research methods found useful in a study of problems in business education. Analyses, studies, and implications of their findings for the improvement of business education. Design of individual research projects.

268A-268B. Seminar: Vocational Education and Guidance. (2-2) Yr.**Mr. Barlow**

For graduate students whose major interest is in vocational education, vocational guidance, or closely related problems.

269A-269B. Seminar: Audio-visual Education. (2-2) Yr. Mr. Lumsdaine

Prerequisite: course 139. Limited to candidates for advanced degrees whose major interest is audio-visual education and to students desiring to carry on research in this area.

270. Seminar: Education Administration. (2) I, II.**Mr. Briscoe**

For advanced students in educational administration and supervision. Considers major issues and current problems relating to administration of schools and colleges.

271. Seminar: Advanced Education Administration. (2 or 4) I, II.**Mr. Lindman**

Directed research for advanced students in education administration.

273. Seminar: Supervision of Instruction. (2) I, II.**Mr. Fielstra**

Prerequisite: courses 241A and 241B or 241C.

Provides opportunity for advanced students in supervision to design and to conduct directed research which normally will be related to the preparation of a master's thesis or doctoral dissertation.

280A-280B. Seminar: Secondary Education. (2-2) Yr.**Mr. Vredevoe**

280A. Critical study of basic issues and problems related to secondary education.

280B. Emphasizes purposes, methods, instruments, and types of evaluative and accrediting programs for secondary schools.

297. Individual Studies for Graduate Students. (1-6) I, II.**The Staff**

Prerequisite: graduate status and consent of the instructor. May be repeated only once for credit.

299A-299B. Research on Dissertation for Doctoral Candidates. (2-6) Yr.**The Staff**

Limited to candidates for the Doctor of Education degree who have been advanced to candidacy.

Professional Courses†**322A-322B. Supervised Teaching: Early Childhood Education. (4-4) I, II.****Mr. Bond and the Staff**

Prerequisite: senior standing, Education 122A-122B, Art 330, Music 330, and Physical Education 330.

Required of all candidates for the kindergarten-primary credential. One of the teaching assignments must be in the kindergarten and the other in grades 1, 2, or 3.

322C. Supervised Teaching: Supplementary Teaching in Kindergarten-Primary Grades. (1-4) I, II.**Mr. Bond and the Staff**

Supplementary teaching which may be elected by the student, or, in certain cases, required by the department.

323. Supervised Teaching in the Nursery School. (2-4) I, II.**Mr. Bond and the Staff**

Open to candidates seeking a permit to teach in child-care centers, nursery schools, parent-child observation classes, and parent cooperatives. Does not meet the requirement in supervised teaching for kindergarten-primary or general elementary credentials.

324A-324B. Supervised Teaching: General Elementary. (4-4) I, II.**Mr. Bond and the Staff**

Prerequisite: for courses A and B: senior standing, Education 124A-124B, Art 330, Music 330, and Physical Education 330. Required of all candidates for the general elementary credential. One of the assignments will be in the upper elementary grades and the other in a lower elementary grade.

324C. Supervised Teaching: Supplementary Teaching in Elementary Schools (1-4) I, II.**Mr. Bond and the Staff**

Supplementary teaching which may be, in certain cases, required by the department.

† All candidates must (1) secure the approval of the Office of Student Services at least one semester prior to assignment, including formal recommendation of the University Physician and evidence of suitable grade-point averages; and (2) apply to the director of supervised teaching by the middle of the semester preceding the assignment.

328L. Supervised Library Service. (4) II.**Mr. Bond and the Staff**

Prerequisite: Education 100A-100B, Library Service 203 and 206.

Under supervision and guidance, 120 hours of planned library service such as to displace any portion of the required 8 units of student teaching for the general elementary credential or 6 units for the general secondary credential.

328MR. Supervised Teaching: Mentally Retarded. (4) I, II.**Mr. Bond and the Staff**

Prerequisite: course 128 and at least 8 units of supervised teaching for the general elementary credential or 6 units for the general secondary credential. 328MR does not displace any portion of the required 8 units of student teaching for the general elementary credential or 6 units for the general secondary credential.

328SC. Supervised Teaching: Speech Correction and Lipreading. (4) I, II.**Mr. Bond and the Staff**

Prerequisite: Speech 142A-142B and at least 8 units of supervised teaching for the general elementary credential or 6 units for the general secondary credential. 328SC does not displace any portion of the required 8 units of student teaching for the general elementary credential or 6 units for the general secondary credential.

†330A-330B. Supervised Teaching: General Secondary. (3 units each) I, II.**Mr. Bond and the Staff**

General prerequisite: graduate status; Education 100A-100B, 130. Special methods courses in majors and in minors as follows: Art: 370; Business Education: 2 units from Business Education 370A-370B-370C-370D; English and Speech: English 370; French: 370; German: 370; Health Education: 145B; Home Economics: 370; Mathematics: 370; Music: 370; Physical Education (Men): 370, 145B; Physical Education (Women): 326A-326B, 327A-327B; Spanish: 370 (or may be taken concurrently); Speech and Speech-English: Speech 370. Approval of the department of the undergraduate major subject, and consent of the director of supervised teaching. A minimum grade-point average of 2.5 in: (a) all upper division courses comprising the college major, (b) all courses comprising the college minor, (c) all upper division courses, (d) all courses in Education, (e) all courses subsequent to the receipt of the Bachelor's degree.

†330E. Supervised Teaching: Supplementary Teaching in Any Secondary Field. (1-6) I, II.**Mr. Bond and the Staff**

Prerequisite: graduate status and previous student teaching or regular public school teaching experience, Education 100A-100B, 130, and consent of the director of supervised teaching.

334. Supervised Teaching: Junior College. (4) I, II. Mr. Bond and the Staff

Prerequisite: graduate status; Education 209A; Education 234 or 130; approval of the department of the teaching major and the consent of the director of supervised teaching. Restricted to candidates for the junior college credential. A minimum grade-point average of 2.75 in: (a) all courses comprising the college major, (b) all courses in Education, (c) all upper division courses.

ENGINEERING**(Department Office, 7408 Engineering Building)****Morris Asimow, Ph.D., Professor of Engineering (Vice-Chairman, Interdisciplinary Activities).****Roy Bainer, M.S., Professor of Engineering and Professor of Agricultural Engineering, Resident at Davis.****A. V. Balakrishnan, Ph.D., Professor of Engineering.****John Landes Barnes, Ph.D., Professor of Engineering.**

† For students securing the special or general secondary credential, a year sequence of 3 units per semester (total of 6 units) is required, as indicated.

Ralph M. Barnes, Ph.D., *Professor of Engineering and Production Management.*

Joseph S. Beggs, D.Eng., *Professor of Engineering.*

L. M. K. Boelter, M.S., *Professor of Engineering.*

Alexander W. Boldyreff, Ph.D., *Professor of Engineering and Business Administration.*

George W. Brown, Ph.D., *Professor of Engineering, Business Administration and Director of the Western Data Processing Center.*

Albert F. Bush, M.S., *Professor of Engineering.*

Harry W. Case, Ph.D., *Professor of Engineering and Psychology.*

Andrew Charwat, Ph.D., *Professor of Engineering.*

Reno R. Cole, M.S., *Professor of Engineering.*

Edward P. Coleman, Ph.D., *Professor of Engineering.*

C. Martin Duke, M.S. *Professor of Engineering (Chairman of the Department).*

Robert S. Elliott, Ph.D., *Professor of Engineering.*

J. Morley English, Ph.D., *Professor of Engineering.*

*Gerald Estrin, Ph.D., *Professor of Engineering.*

Alan E. Flanagan, Ph.D., *Professor of Engineering.*

H. Kurt Forster, Ph.D., *Professor of Engineering.*

 Thomas T. Woodson, M.S., *Lecturer in Engineering.*

Letters and Science List.—Courses 111A, 115A, 117A, 120A, 122A, 130A, 145, 150B, 151A, 160A, 163A, 181A, 182D, 182E, 183A, 185B, 186A, 187A, 191A, 192A, 192B.

Enrollment in engineering courses is permitted to students from other colleges who are undertaking curricula in which engineering courses are prescribed or recommended. Such students may be admitted to engineering courses by petition approved by the Dean of the College of Engineering, Room 6426 Engineering Building II.

Service Courses

Enrollment in the following courses is open to any University student who is qualified. Service courses may not be accepted toward a degree in Engineering.

18. Materials of Production and Construction. (3) I. Mr. Sines

Prerequisite: Chemistry 1A or 2.

A study of the properties of materials, the relationship of their properties to the methods used in manufacturing and the relationship of their properties to their applications.

146B. Properties of Art Ceramic Materials. (3) I. Mr. Knapp

(Numbered 108D prior to 1959-1960.)

Prerequisite: Art 190. Occasional field trips will be scheduled. For students in Fine Arts.

Composition of ceramic materials and products. Properties of ceramic bodies and glazes, and calculation methods for compounding.

Lower Division Courses

4A. Introduction to Engineering Systems. (3) I, II.

Mr. Grandi, Mr. Chipman

Demonstration and lecture, two hours; laboratory, four hours. Prerequisite: one year of high school mechanical drawing and regular lower division status in the College of Engineering. Concurrent or prerequisite (should be taken concurrently): Mathematics 5A, Chemistry 1A. Field trips may be scheduled.

Introduction to engineering systems. Measurements of geometrical and performance parameters of such systems as an energy conversion system and a transportation system including both traffic and material flow. Geometrical measurements of the output of a production plant and of land are included. Graphical presentation of results of laboratory measurements. Introduction to the statistical representation of data. Introduction to engineering analysis.

4B. Introduction to Design. (3) I, II.**Mr. Grandi, Mr. Asimow**

Demonstration and lecture, two hours; laboratory, four hours. Prerequisite: course 4A. Concurrent or prerequisite: Mathematics 5B, Chemistry 1B, Physics 1A.

Introduction to elementary design, including experimental design, of a structure, machine, circuit, or process, for the satisfaction of a given need. Graphical computations and analyses and preparation of working drawings and specifications. Introduction to the general method of engineering design. Case studies of engineering designs, including possible field trips.

4C. Introduction to Properties of Materials. (3) I, II.**Mr. Grandi, Mr. Rosenthal**

Lecture, two hours; laboratory, three hours. Prerequisite: course 4B; Chemistry 1B, Physics 1A, Mathematics 5B.

Importance of materials in engineering. Internal structure and general properties of materials. Metals, ceramics, and polymers. Experimental demonstration of important properties and illustration of their application in engineering, including field trips.

4D. Introduction to Engineering Processes. (3) I, II.**Mr. Grandi, Mr. Cole**

Lecture, one hour; laboratory, seven hours. Prerequisite: course 4C. Concurrent: course 15B, Physics 1C, Mathematics 6B. Field trips may be scheduled.

Manufacturing, construction, chemical and sanitation processes which combine or separate materials, considered as engineering systems. Measurement and control of mechanical and human variables.

16. Engineering Drawing. (3) I.**Mr. McCutchan**

Lecture, one hour; laboratory, five hours. Prerequisite: course 2 or 4B.

An advanced course, based on A.S.A. standards of drawing and drafting room practice, correlating technical sketching and drafting with engineering design and production.

15A-15B. Elementary Mechanics. (3-3) Yr. Beginning either semester.

Lecture, two hours; laboratory, three hours.

Mr. Shanley

This is a unified course covering elementary topics of analytical mechanics and strength of materials.

15A, prerequisite: Physics 1A; prerequisite or concurrent: course 4C, Mathematics 4A or 6A.

Composition and resolution of coplanar force systems, equilibrium of coplanar force systems, simple stress calculations, frames, continuously distributed loads, moments of areas, beam stresses. Algebraic and graphic methods will be employed.

15B, prerequisite: course 15A; prerequisite or concurrent: Mathematics 4B or 6B.

Composition and resolution of noncoplanar force systems, equilibrium of noncoplanar force systems, friction, torsion, states of stress and strain, deflection of beams, statically indeterminate beams, combined axial and bending loads, eccentric loads, columns, cables.

83A. Engineering Probability and Statistics. (2) I, II.**Mr. Coleman**

Prerequisite: completion of or concurrent enrollment in course 4A, Mathematics 5A; or equivalent.

Compound statements, connectives, logical relations, sets, partitions, counting; statistical experimentation, sample space, quantitative observations, graphical representation, descriptive statistics, probability measures. Hypergeometric, binomial, Poisson, Gaussian, exponential probability distributions; sampling, statistical estimation, significance tests; least squares, linear regression, correlation; experiments, engineering applications.

83B. Laboratory in Engineering Probability and Statistics. (1) I, II.

Prerequisite: concurrent enrollment in Engineering 83A.

Mr. Coleman

Computational techniques for compiling and analyzing engineering data. Experimental derivations of sampling distributions. Experimental verification of probability laws. Fitting curves to data. Industrial control chart and sampling techniques. Experiments and problems to augment lectures given in Engineering 83A.

† To be given when there is sufficient demand.

96. Engineering and Society. (2) II.**Mr. Frankel**

Prerequisite: enrollment in College of Engineering or consent of instructor.

Readings selected from the writings of outstanding engineers, scientists, and architects whose works illustrate the interaction between engineering and human society. Attention also given to the over-all contributions and historical significance of these men and their works.

97. Elementary Analysis of Engineering Practice. (3) I, II.**Mr. Knight**

Prerequisite: satisfactory completion of one semester's work in residence in the College of Engineering, Los Angeles, and participation in cooperative work-study program in engineering.

Analysis of the physical operation and plant of representative industries or engineering agencies. Role of the engineer in safety, economy, and use of human and natural resources. Written and oral reports required.

Upper Division Courses

Admission to junior status in the College of Engineering is determined on the basis of lower division grades and the score on the *Engineering Examination, Upper Division*. Applicants for junior status from all sources, including applicants from the University's lower division, will be required to meet the same minimum standard. For all students enrolled in the College of Engineering, junior status is prerequisite to all upper division courses.

Enrollment in engineering courses is permitted to students from other colleges who are undertaking curricula in which engineering courses are prescribed or recommended. Such students may be admitted to engineering courses by petition approved by the Dean of the College of Engineering, Room 6426 Engineering Building II.

Students entering junior status with a course in statics should take Engineering 108A. A course in statics is not equivalent to either course 15A or course 15B.

100A. Circuit Analysis. (3) I, II.**Mr. Schott**

Prerequisite: Mathematics 110AB or 110C (may be taken concurrently).

Elements of electrical circuit analysis, with emphasis on solutions of circuit problems; analogues and duals; applications of steady state and transient analysis to linear electrical, mechanical, and thermal systems.

100B. Field Theory and Energy Flow. (3) I, II.**Mr. Rosenstein**

Prerequisite: courses 100A; 104A (may be taken concurrently). Occasional field trips may be scheduled.

A study of electrostatic and electromagnetic fields, of the interaction of field and matter, and of fields in areas other than electrical. Energy in fields will be studied.

102B. Engineering Dynamics. (3) I, II.**Mr. Thomson**

Prerequisite: course 15B or a course in analytical mechanics-statics; Mathematics 110AB or 110C (may be taken concurrently).

Fundamental ideas of dynamics; kinematics and kinetics of particles and rigid bodies; motion relative to moving reference frames; work-energy and impulse-momentum relationships. Subjects are treated in terms of modern vector techniques.

103A. Elementary Fluid Mechanics. (3) I, II.**Mr. E. H. Taylor**

Prerequisite: courses 102B, 105A. Recommended to be taken concurrently: course 105B. Occasional field trips may be scheduled.

An introductory course dealing with the application of the principles of mechanics to the flow of compressible and incompressible fluids. Includes hydraulic problems of flow in closed and open conduits.

104A. Experimental Engineering. (3) I, II.

Mr. Grandi, Mr. Willis

Laboratory, six hours per week. Additional three hours required for preparation, calculations, and reports. Prerequisite: course 100A (may be taken concurrently). Occasional field trips may be scheduled.

Introductory experiments illustrating the properties of engineering materials. Applications of circuit theory to electrical, mechanical, thermal, acoustical, and fluid systems. Measurements and instrumentation. Required and elective experiments.

104B. Experimental Engineering. (3) I, II.

Mr. Grandi, Mr. E. F. King

Laboratory, six hours per week. Additional three hours required for preparation, calculations, and reports. Prerequisite: courses 100A, 104A; 108A (may be taken concurrently). Concurrent: courses 100B, 103A. Occasional field trips may be scheduled.

Introductory experiments on the operation and application of machines, and on the behavior of engineering structures. Measurements and instrumentation.

104C-104D. Experimental Engineering. (4-4) Yr. Beginning either semester.

Mr. Grandi, Mr. Tauxe

Laboratory, eight hours, some of which may be devoted to lecture and/or demonstration. Additional four hours required in preparation of reports. Prerequisite: completion of all required freshman, sophomore, and junior courses. Occasional field trips may be scheduled.

A year laboratory course containing a group of integrated experiments common to all engineering fields, a group of elective experiments particularly applicable to the several fields of engineering, and a senior project.

105A. Engineering Thermodynamics. (3) I, II.

Mr. Knuth

(Not the same as course 105A given prior to September, 1959.)

Prerequisite: junior standing.

Introduction to energy, heat, work, entropy, temperature, and states of matter. Zeroeth, first, and second laws of thermodynamics. Processes involving closed systems. Graphical representation of thermodynamic processes. Ideal gases. Equations of state. Carnot theorem. Properties of pure substances. State diagrams.

105B. Engineering Thermodynamics. (3) I, II.

Mr. Knuth

Prerequisite: course 105A.

Energy conduction, convection, and radiation. Statistical thermodynamics. Calculations of thermodynamic functions for simple molecular models. Calculations of changes in thermodynamic functions. Third law of thermodynamics. Law of corresponding states. Clapeyron's equation. Chemical equilibrium. Phase rule. Adiabatic reaction temperatures. Cycle analysis.

106A. Principles of Engineering Investment and Economy. (3) I, II.

(Numbered 120 prior to 1959-1960.)

Mr. Campbell

Prerequisite: course 100B, 103A, 105B.

Derivation of formulas used in investment theory; analysis of financial statements and cost accounting methods; analysis of original and alternative investments; equipment replacement problems; influence of personnel factors; quality control; studies in the economy of governmental projects.

106B. Theory and Methods of Engineering Design. (3) I, II.

Mr. Asimow

Prerequisite: senior standing in engineering.

Fundamental ideas of engineering design; methodology and the design process; decision theory as applied to design; the process and technique of optimization; special analytical tools of engineering design.

108A. Strength of Materials. (3) I, II.

Mr. Shanley

Prerequisite: course 4C; a course in analytical mechanics—statics; Mathematics 4B or 6B (may be taken concurrently). Students entering junior status with a course in statics should take Engineering 108A. A course in statics is not equivalent to either course 15A or course 15B.

Stress, strain, and elasticity; thin shells, welded and riveted joints; shafts and helical springs; beams, shear, moment, flexural stress, shearing stress, deflection, unsymmetrical loading; column-theory; combined stresses.

108B. Strength of Materials. (2) I, II.

Mr. Shanley

Prerequisite: course 15B or 108A, or the equivalent.

Review of stress-strain relationships, including inelastic behavior, strain energy, combined stresses; stress concentration and fatigue; bending theory, including curved beams, inelastic behavior, composite beams, unsymmetrical loading; shear flow theory, including shear center, torsion of thin shells, deflections; inelastic buckling of columns, plates, and shells; energy methods of deflection analysis; introduction to analysis of statically indeterminate structures and relaxation methods.

†109A-109B. The Engineer and His Professional Duties. (2-2) Yr.

(Numbered 113A-113B prior to 1959-1960.)

Mr. Boelter

Prerequisite: senior standing in engineering. Enrollment limited to twenty students per section.

Oral and written reports on various subdivisions of knowledge, with emphasis on the sociohumanistic periphery of engineering. Class meetings will be devoted to the subjects of the history of technology, business organization, personal efficiency, professional codes and ethics, industrial procedures, and engineering-report writing. The course serves as training in the professional duties of the engineer.

110A. Intermediate Circuit Theory I. (3) I, II.

Mr. Karplus

Prerequisite: senior standing in engineering; course 181A recommended.

Engineering circuit theory; essentials of circuit analysis and introduction to circuit theory; driving point impedance synthesis; physical applications of complex frequency-plane representation.

110B. Intermediate Circuit Theory II. (3) I.

Mr. Karplus

Prerequisite: courses 110A and 181A, or equivalent.

Review of driving point impedance synthesis; properties of transfer functions; synthesis of transfer functions of lossless, RC and general passive two terminal-pair networks; insertion loss synthesis techniques; image parameter network theory; introduction to the approximation problem; normalization and frequency transformation.

111A. Basic Magnetics. (3) I.

Mr. Rosenstein

Prerequisite: course 100A, or equivalent.

Fundamentals of modern magnetic theory and materials; magnetic circuit; development of energy, force, and circuit relations; characteristics of magnetic and permanent magnet materials; analysis of static electromagnetic systems such as transformers and magnetic amplifiers, emphasizing the static magnetic amplifier.

113A. Computer Applications: Ordinary Differential Equations. (3) I, II.

(Numbered 181D prior to 1959-1960.)

Mr. Karplus

Prerequisite: senior standing in engineering; course 181A recommended.

A comprehensive survey of the application of analog and digital computers to the solution of engineering problems governed by ordinary differential equations. Formulation of engineering problems, elements of analog and digital computer systems, numerical analysis, and sources of error.

114A. Introduction to Electronic Digital Computing Systems. (3) I, II.

Mr. Estrin

Prerequisite: senior standing in electrical engineering, or equivalent including a knowledge of differential equations and their solution by Laplace transform methods, general circuit design, electronic circuits, nonlinear and pulse electronic circuits. (Mathematics 110AB; courses 100A, 115A, 115B, 181A.)

Orientation including comparison of analog and digital systems; historical background of digital computers; special mathematical topics; introductory programming; specialized digital computing circuits; systems and logical aspects of the over-all machine and its components; emphasis on reliable and conservative design techniques.

† 109A given each semester and summer; 109B given spring semester.

114B. Logical Design of Digital Computing Machinery and Systems.

(3) I, II.

Mr. Estrin

Prerequisite: course 114A, or approved equivalent.

Logical design of synchronous digital computers; introduction to Boolean algebra and application to the following topics, among others: decimal and binary arithmetic units; delay-time and fast-access memories; input and output systems; error-detecting and correcting circuits.

114C. Circuit Design of Digital Computers. (3) I, II.

Mr. Estrin

Prerequisite: course 114A or equivalent.

Properties of nonlinear elements in two-state circuits, common component characteristics: semiconductors, magnetic materials, vacuum tubes, design of gates, bistable units, amplifiers, design of matrix and drum memories, storage and input-output devices and circuits.

114D. Digital Computer Systems Design. (3) I.

Mr. Estrin

Prerequisite: course 114A.

Complete design of digital systems; fundamentals common to most digital systems and consideration of major aspects of several specific systems.

115A. Physical Basis of Electronics. (3) I, II.

Mr. Elliott

Prerequisite: courses 100A and 105A (both may be taken concurrently).

A fundamental treatment of major areas of electron and solid state physics and their application to vacuum and semiconductor electronics leading to the development of simple equivalent circuits for vacuum diodes and triodes and semiconductor diodes and triodes.

115B. Active Electronic Circuits I. (3) I, II.

Mr. E. F. King

Prerequisite: course 100A.

Amplifiers: untuned voltage, untuned power, direct-coupled, broad-band; feedback. Sinusoidal oscillators. Design considerations.

115C. Active Electronic Circuits II. (3) I, II.

Mr. E. F. King

Prerequisite: course 115B.

Large-signal and nonlinear situations. Graphical and analytical methods for analysis and design. Introduction to switching-mode operation. Design considerations.

115D. Pulse and Digital Methods. (3) I, II.

Mr. E. F. King

Prerequisite: course 115B.

Linear and nonlinear wave shaping; linear pulse amplification; bistable, monostable and astable multivibrators, time-base generators; counting, synchronization and frequency division; digital computer circuits, gates, comparators; pulse and digital systems; design considerations.

117A. Applied Electromagnetic Theory I. (3) I, II.

Mr. Elliott

Prerequisite: course 100B or equivalent.

Static electric and magnetic fields, Maxwell's equations and their application to a variety of engineering problems.

117B. Applied Electromagnetic Theory II. (3) I, II.

Mr. Schott

Prerequisite: course 117A.

Propagation and reflection of plane waves, wave guides, resonant cavities, microwave networks, Hertzian dipole.

118A. Electrical Power Operation and Distribution. (3) I.

Mr. Grandi

(Numbered 100C prior to 1959-1960.)

Prerequisite: courses 100B, 104B. Occasional field trips will be scheduled.

Electrical power generation and distribution systems are considered from the viewpoint of equipment, operations, transmission and distribution, and system economics.

120A. Intermediate Fluid Mechanics. (3) I, II.

Mr. E. H. Taylor

(Numbered 103B prior to 1959-1960.)

Prerequisite: courses 103A, 105B.

The dynamics of nonviscous and viscous fluids; potential motion, vortex motion, Navier-Stokes equation, boundary layers, turbulence, compressibility. Emphasis is placed on the applications of theory to various practical systems which involve fluid motion.

121A. Engineering Aerodynamics. (3) I, II.

Mr. Rott

(Numbered 121 prior to 1959-1960.)

Prerequisite: course 103A and Mathematics 110AB or 110C.

A course in the fundamentals of aerodynamics dealing with the basic aspects of compressible and incompressible fluid dynamics; theory of potential flow, airfoils, and finite wings; lifting surfaces in supersonic flow.

122A. Viscous Fluid Dynamics. (3) II.

Mr. Charwat

Prerequisite: course 103A; course 120A recommended.

Fundamental equations. Flow in pipes and channels; introduction to the study of viscous flows; laminar and turbulent boundary layers; methods of solution; elements of compressible boundary layer theory and heat transfer.

124A. Engineering Acoustics. (3) I.

Mr. Powell

Prerequisite: senior standing in engineering, or consent of the instructor.

Acoustics as a fluid motion: elementary interactions, reflection, transmission. Source types; characteristics and association with pulse jet, aeolian tones, jet noise. Noise spectra, measurement. Selected topics such as noise of boundary layers; propellers and fans; structural vibration, fatigue; underwater sound.

130A. Environmental Biotechnology. (3) I, II.

Mr. Lyman

Prerequisite: junior standing in engineering or equivalent.

Physical, physiological, and psychological aspects of the interaction between man and thermal, atmospheric, radiant, and mechanical agents and energies in the environment. Biological and physical requirements for engineering control of the environment; applications to complex systems. Occasional field trips may be scheduled.

130B. Machine and Systems Biotechnology. (3) I, II.

Mr. Lyman

Prerequisite: junior standing in engineering or equivalent.

Quantitative and qualitative methods for assessing man as a component in engineering design applications. Limits and optima of human psycho-physiological capabilities applied to display-control design, decision-making problems, and task definition; problems of man-machine interactions in large-scale systems. Occasional field trips may be scheduled.

131A. Industrial Sanitary Engineering. (3) II.

Mr. Bush

Prerequisite: senior standing in engineering.

Quantitative consideration of industrial environment. Evaluation of atmospheric contaminants, sampling methods and analysis, design of ventilation systems (hoods, local exhaust principles, exhausters and collectors), airflow measurements, industrial atmospheric pollution regulations. Consideration of fundamentals of problems of evaluation, disposal of liquid and solid waste involving the design of disposal systems.

†132A. Air Conditioning. (3) I.

Mr. Nottage

Prerequisite: senior or graduate standing, or equivalent.

Design and performance principles for air-conditioning equipment. Thermodynamic properties of moist air. Psychrometric chart analyses. Component equipment principles. Physiological-environment interactions. Systems load analysis for air-conditioning buildings. Guest lecture and field trip.

135A. Design of Optical Systems I. (3) I, II.

Mr. Beggs

Prerequisite: senior standing in engineering.

An understanding of principles of image formation, and their application to design of lenses and optical systems in the first order with correction of aberrations. Synthesis of systems by the algebraic third order methods.

135B. Design of Optical Systems II. (3) II.

Mr. Beggs

Prerequisite: course 135A.

Preliminary design of optical systems with attention to application; preliminary design of a lens; trigonometric analysis of aberrations; graphical aids; optical image evaluation; tolerances; use of high-speed automatic digital computers; design of aspheric surfaces and condensing systems.

† Given even-numbered years only.

136A. Introduction to Control Systems Theory. (3) I, II. Mr. Leondes

(Numbered 181C prior to 1959-1960.)

Prerequisite: course 181A.

Study of basis for control system specification; synthesis techniques; a.c. and d.c. control system components and detailed study of the design of some control systems drawn from practice.

136B. Control Systems Theory. (3) I, II. Mr. Leondes

Prerequisite: course 136A.

Extended synthesis techniques; multipole control systems; additional problems in linear systems; analysis and synthesis of nonlinear control systems.

136C. Sampled Data Control Systems Theory. (3) I, II. Mr. Leondes

Prerequisite: course 136A.

Analysis and synthesis of control systems with sampled functions of time as system variables; techniques for synthesis of sampled data control systems to meet required specifications; behavior of sampled data system between sampling instants, multirate sampled data systems.

137A. Highway Transportation Systems. (3) I. _____

(Numbered 174 prior to 1959-1960.)

Prerequisite: senior standing in engineering.

Fundamental aspects of streets and highways as transportation facilities; planning, financing, location, economics, geometric design, and physical characteristics. Traffic surveys and instrumentation; traffic control and related devices; applications of statistical techniques to traffic problems.

137B. Design of Streets and Highways. (2) II. _____

Lecture, one hour; laboratory, three hours. Prerequisite: course 137A.

Design of street and highway systems and components including tangent sections, curves, interchanges, access facilities, traffic controls, parking facilities; suboptimizations on utility, safety, cost, properties of materials, maintainability, present needs, future needs; individual and group design assignments.

142A. Elements of Construction. (3) I. Mr. Duke

(Numbered 148A prior to 1959-1960.)

Lecture, two hours; laboratory and field trips, three hours. Prerequisite: senior standing in engineering.

Anatomy of the industry, contracts, costs and economics, equipment and materials, construction methods, field engineering techniques, observation and engineering analysis of current construction projects in the vicinity, field trips.

143A. Engineering of Underground Reservoirs. (3) II. Mr. Perrine

(Numbered 143B prior to 1959-1960. Not the same as 143A offered prior to 1960-1961.)

Prerequisite: Geology 111 or consent of instructor. Occasional field trips will be scheduled.

Oil and gas production mechanisms, aquifer behavior; thermodynamic relations, reservoir forces, fundamental equations; secondary recovery of oil.

144A. Tool Engineering. (3) II. Mr. Asimow

(Numbered 145 prior to 1959-1960.)

Lecture, two hours; laboratory, two hours. Prerequisite: course 162A (may be taken concurrently). Field trips will be scheduled.

The selection of tooling for production; design of tools, jigs, fixtures, dies, and production-type gages; design of tooling for automatic machines, design of assembly tooling.

145A. Introduction to X-Ray Diffraction. (3) II. Mr. Rosenthal

Lecture, two and one-half hours; demonstration, one-half hour. Prerequisite: junior standing; Physics 121 (may be taken concurrently).

Fundamentals of crystallography; stereographic projection; X-rays, diffraction of X-rays by crystals; determination of a cubic lattice by powder method; determination of crystal orientation by back reflection Laue method; structural and phase changes; electron and neutron diffraction.

146A. Properties of Ceramic Materials. (3) I.**Mr. Knapp**

(Numbered 108C prior to 1959-1960.)

Prerequisite: senior standing in engineering.

Structure of some ceramic materials in the crystalline and glassy states, and relation to physical and chemical properties. Equilibria of ceramic mixtures and certain thermodynamic applications.

147A. Introduction to Physical Metallurgy. (3) I, II.**Mr. Flanigan**

(Numbered 108G prior to 1959-1960.)

Lecture, two hours; laboratory, three hours.

A fundamental study of metals and alloys, the dependency of properties on structure, and the influence of mechanical and thermal treatments on structure and properties. Metal crystals. Plastic deformation, work hardening and recrystallization. The role of alloying elements. Alloy diagrams. Precipitation hardening. Transformations in alloys of iron and carbon. Commercial treatments and processes.

147B. Processing of Metals. (3) II.**Mr. Cole**

(Numbered 108H prior to 1959-1960.)

Prerequisite: course 147A.

Metal-shaping processes and associated problems involving plastic and fluid flow, heat transfer, metallurgical and chemical reactions, forces and energy. Design of equipment and interrelation of process and product design.

150A. Industrial Heat Transfer. (3) I, II.**Mr. Edwards**

(Numbered 151A prior to 1959-1960.)

Prerequisite: course 105B.

The study of the basic principles of heat transfer and their application to the design of industrial equipment. Steady state and transient problems of conduction by analytical and numerical methods. Free and forced convection. Transfer of radiant energy.

150B. Thermal and Luminous Radiation. (3) I.**Mr. O'Brien**

(Numbered 153 prior to 1959-1960.)

Prerequisite: course 105B or the consent of the instructor.

Introduction to the production, transmission, and reception of radiation; geometry and properties of radiant transfer systems; determination of radiant transfer matrices; integral and finite-difference representations of radiant transfer; analogue and digital computers applied to thermal radiation and lighting systems.

150C. Design of Solar Energy Utilization Systems. (3) I.*Mr. Edwards**

Prerequisite: course 105B. Recommended: courses 150A or 150B.

Nature and availability of solar energy; spectral radiation properties of materials; calculation techniques for irradiation of surfaces and net energy exchange; methods of solar energy collection, conversion, and storage; design of solar energy conversion systems for terrestrial and space needs.

151A. Intermediate Thermodynamics. (3) I.**Mr. Nobe**

(Numbered 105C prior to 1959-1960.)

Prerequisite: course 105B.

Review of fundamental principles and concepts of phenomenological thermodynamics with applications to chemical, physical and engineering systems. Statistical thermodynamics.

152A. Mass Transfer. (3) I, II.**Mr. Knuth**

Prerequisite: course 105B.

Viscosity, thermal conductivity and diffusivity of fluids; review of momentum transport and energy transport; concentration distribution in laminar flow and in turbulent flow; unsteady diffusion; simultaneous heat and mass transfer; mass transfer with chemical reactions; interphase transport in multicomponent systems.

* Given odd-numbered years only.

153A. Propulsion. (3) II.

Mr. Rott

(Numbered 156 prior to 1959-1960.)

Prerequisite: course 103A, 105B.

Thermodynamic properties of gases. Flows in channels, nozzles and rocket motors. Power plant cycle analysis. The turbojet engine and its variants. Ramjets and pulse jets. Combustion. Aerodynamic design elements of compressors and turbines. Elements of aircraft and rocket performance.

155A. Nuclear Reactor Engineering. (3) I, II.

Mr. Hicks

Prerequisite: Mathematics 110C.

Introduction to the basic engineering principles involved in the design of nuclear reactors. Includes basic physics required for engineering applications, diffusion of neutrons, neutron slowing down theory, and multigroup calculations.

155B. Nuclear Reactor Engineering. (3) I, II.

Mr. Hicks

Prerequisite: course 155A.

Time dependent diffusion theory, problems of heterogeneity, temperature effects, and control problems. Studies of the major element of reactor design.

†156B. Nuclear Reactor Kinetics. (3) I.

Mr. Hicks

(Numbered 155C prior to 1959-1960.)

Prerequisites: courses 155A, 136A or equivalent.

Reactor kinetics, automatic control and control mechanisms, feedback loops, transient response, long term reactivity changes, effects of power plant control, and reactor start-up and shutdown.

157A. Engineering Aspects of Chemical Processes. (3) I.

Mr. Nobe

(Numbered 150 prior to 1959-1960.)

Prerequisite: course 105B; Chemistry 110B recommended.

Principles of material and energy balances and their application to industrial chemical processes. Basic principles of reaction kinetics and introduction to chemical reactor design.

***157B. Principles of Separation Operations. (3) II.**

Mr. Nobe

(Numbered 158A prior to 1962-1963.)

Prerequisite: course 157A; course 152A recommended.

Requirements and limitations in the separation of a mixture into its component parts. Emphasis on repetitive counter-flow operations and on applications common to all fields. Specific examples from fields of chemistry, metallurgy, fossil fuels, atomic energy, etc.

160A. Introduction to Mechanical Vibrations. (3) I, II.

Mr. Thomson

(Numbered 102D prior to 1959-1960.)

Prerequisite: course 102B.

Introduction to fundamentals of mechanical vibrations, types of oscillatory motions, Fourier components. Study of free, forced, and transient vibrations, damping, vibration isolation, vibration measuring instruments. Coupled oscillations of lumped systems, use of Lagrange's equations, Rayleigh and matrix-iteration methods.

160B. Flight Mechanics and Performance. (3) I.

Mr. Rott

Prerequisite: courses 102B and 103A, or equivalent.

Study of the atmosphere, experimental aerodynamics, trajectory mechanics, basic and special performance problems of aircraft and missiles, static stability and control, and the mechanics of maneuvers.

160C. Aircraft Stability and Control. (3) II.

Mr. Rott

Prerequisite: courses 160B, 181A.

Euler's equations of motion and their application to aircraft flight; the nature of external forces and stability of motion; aerodynamic stability derivatives and their bearing on aircraft design; aircraft response to arbitrary control input using Laplace's method.

* To be given odd-numbered years only.

† Not to be given after fall, 1963.

160D. Aeroelasticity. (3) II.

Mr. Powell

Prerequisite: courses 160A, 160B, 181A, or consent of the instructor.

Analysis of the aeroelastic problems of divergence, control reversal, flutter, and transient response including related topics in vibrations, structures, and unsteady aerodynamics. Solutions by both assumed mode and matrix methods will be stressed.

161A. Advanced Kinematics of Mechanisms. (3) I, II.

Mr. Beggs

(Numbered 180 prior to 1959-1960.)

Prerequisite: course 102B. A field trip will be scheduled during the spring or fall recess.

Analysis and synthesis of fundamental types of mechanisms, including electric, magnetic, pneumatic, and hydraulic links. Both graphical and analytical methods are used. Applications will be considered to such devices as instruments, servomechanisms, calculating machines, conveyors, and printing presses.

†162A. Machine Design. (4) II.

Mr. Fuchs

(Numbered 106A prior to 1959-1960.)

Lecture, two hours; laboratory, six hours. Prerequisite: course 4B, or equivalent introductory design course; 102B.

The design of machine elements on the basis of static and dynamic working stresses; selection of materials and shop processes; economic problems in design; design and use of various machine elements; linkages, fastenings, power transmission equipment; friction and lubrication.

163A. Elasticity and Plasticity. (3) I, II.

Mr. Sines

(Numbered 107H prior to 1959-1960.)

Prerequisite: course 108B; Mathematics 110AB or 110C (may be taken concurrently).

Three dimensional stress and strain. Criteria for prediction of mechanical failure. Differential equations in three dimensions; analytical, numerical, and experimental solutions of plane state and torsion problems. (Stress function, iteration, strain gages, photoelasticity.) Homogeneous plastic flow, fast fracture, elastic tensile instability.

164A. Principles of Soil Mechanics. (3) I, II.

Mr. Tauxe

(Numbered 108J prior to 1959-1960.)

Prerequisite: courses 103A, 108B; Geology 2 and 2L recommended.

Soil as a foundation for structures and as a material of construction. Soil formation, properties, classification, tests. Shear failure and earth pressures. Compaction. Consolidation. Bearing capacity. Stresses in earth masses. Field techniques for exploration and design.

165A. Analysis of Framed Structures. (3) I, II.

Mr. Rubinstein

(Numbered 107A prior to 1959-1960.)

Prerequisite: course 108B.

Analysis of beams and plane and space framed structures; applications of superposition and influence lines; deflections of beams and framed structures. Introduction to analysis of indeterminate beams and framed structures.

165B. Advanced Analysis of Framed Structures. (3) I, II.

Mr. Rubinstein

(Numbered 107B prior to 1959-1960.)

Prerequisite: course 165A.

Extension of principles covered in Engineering 165A to the general solution of more complicated determinate and indeterminate framed structures. Slope deflection and moment distribution methods. Principles of limit analysis of frames and trusses. Analysis of rings and arches including those with variable moment of inertia.

166A. Analysis of Shell Structures. (3) I, II.

Mr. Shanley

(Numbered 107G prior to 1959-1960.)

Prerequisite: course 108B.

Analysis for shear, bending, and torsion; buckling of columns, plates, and shells; properties of aircraft structural materials; brief description of load factors and load distribution for aircraft structures.

† To be given even-numbered years only.

166B. Advanced Analysis of Shell Structures. (3) I, II. Mr. Shanley
(Numbered 107J prior to 1959-1960.)

Prerequisite: course 166A.

Analysis of stiffened and unstiffened shell structures. Includes membrane forces, shell and plate bending, torsion and shear, load diffusion, deflection, generalized analysis, column and plate buckling, inelastic corrections, interaction, general instability post-buckling, fatigue and damage, optimum shell configurations.

167A. Structural Components. (3) I, II. Mr. Rubinstein
(Numbered 106C prior to 1959-1960.)

Lecture, two hours; laboratory, three hours. Prerequisite: course 165A (may be taken concurrently).

Design and analysis of structural members and modes of connections; composite and prestressed members; fabrication and erection techniques; optimization principles.

167B. Design of Stationary Structures. (3) I, II. Mr. Rubinstein

Lecture, two hours; laboratory, three hours. Prerequisite: course 167A.

Design of structural systems such as bridges, buildings, waterfront installations and towers. Application of optimization principles to complete structures. An individual or group project to design a comprehensive structural system will constitute approximately one-half the course. Field trips.

168A. Optimum Structural Design I. (3) I. Mr. Shanley

Prerequisite: course 108B or equivalent (Strength of Materials).

Principles of structural design for minimum weight or cost; relationships between material properties and structural configuration; prediction of weight of structures; relative merits of different materials; analysis of non-optimum factors; applicable to aero-space and civil structures.

170A. Sales Engineering. (3) I. Mr. Case

Lecture, three hours. Prerequisite: senior standing in engineering. Field trips may be arranged.

The principles of engineering sales will be illustrated by the case method. Individual class projects will be carried through the sales development cycle from market research to written proposal and oral presentation.

171A. Engineering Organization and Administration. (3) I, II. Mr. Case

Prerequisite: senior standing in engineering.

The principles of organization and administration as applied to engineering in industry will be considered. Special problems pertaining to the use of organization charts, the assignment of administrative responsibility, the engineering use of job descriptions, job evaluation, job analysis, and efficiency surveys as well as problems pertaining to the selection, training, and supervision of technical employees will be discussed.

172A. Principles of Industrial Safety. (3) II. Mr. Brenner

Prerequisite: junior standing in engineering.

Delineation of the over-all accident prevention problem, with emphasis on industrial concepts. Analysis and synthesis of all major elements, e.g., statistical methods, plant layout, machine and process control devices and safeguards, applicable laws and codes, nuclear radiation and other occupational health hazards, engineering and medical controls, explosion and fire prevention and protection, industrial traffic and safety organization.

181A. Linear System Solutions by Transform Methods. (3) I, II. Mr. Schott

Prerequisite: courses 100A, 102B, 104A; Mathematics 110C or 110AB.

Formulation and solution of equations of behavior of linear electrical, mechanical, and thermal systems by the Laplace-transformation method. Applications of the transform method to lumped-parameter systems.

182A. Mathematics of Engineering. (3) I, II. Mr. Pipes

Prerequisite: course 181A; Mathematics 110AB or 110C.

Applications of mathematical methods to engineering problems are considered, involving systems whose parameters are "lumped" and whose mathematical formulation leads to the solution of ordinary differential or difference equations. Typical problems in the fields of electrical, mechanical, and civil engineering are discussed and used to introduce and illustrate the mathematical techniques involved.

182B. Mathematics of Engineering. (3) I, II.**Mr. Pipes**

Prerequisite: course 182A.

Applications of mathematical methods to engineering problems are considered, involving systems whose parameters are "distributed" and whose mathematical formulation leads to the solution of partial differential equations. The engineering problems are used to introduce and illustrate the mathematical procedures and are chosen from the fields of electrical, mechanical, and civil engineering.

182C. Matrix Methods in Engineering. (3) I, II.**Mr. Pipes**

Prerequisite: course 181A; Mathematics 110AB or 110C.

Fundamentals of matrix algebra, differential and integral calculus of matrices; solution of linear, polynomial, and systems of differential equations; applications to mechanical vibrations, electric circuit theory, heat conduction, acoustical vibrations, theory of elasticity, electrical, mechanical, and acoustical wave motion.

182D. Variational Methods in Engineering. (3) I, II.**Mr. Pipes**

Prerequisite: courses 100A, 102B, 181A; Mathematics 110AB or 110C.

Maxima and minima of integrals involving several dependent variables; isoperimetric problems and Lagrange's multipliers; Hamilton's principle and Lagrange's equations; Fermat's principle; energy method; Rayleigh's principle and Rayleigh-Ritz method; Galerkin method; variational methods; applications.

182E. Nonlinear Differential Equations in Engineering. (3) I, II.**Mr. Pipes**

Prerequisite: courses 100A, 102B, 181A.

Practical introduction to nonlinear differential equations; representative applications; presentation of various analytical methods employed in solution of technical problems taken from fields of electrical, mechanical, and civil engineering. Topological, operational, Poincare, van der Pol, and Kryloff-Bogoliuboff methods; technical problems.

183A. Probability and Stochastic Processes for Engineers. (3) I, II.**Mr. Coleman**

Prerequisite: Mathematics 6B. (Not the same as course 183A offered prior to fall semester, 1958.)

Combinatorial analysis, sample space, events, probability theory, discrete and continuous random variables, probability distributions, population parameters, stochastic independence, sums of random variables, law of large numbers. Central limit theorem and applications. Statistical inference, stochastic processes and calculus of random function.

183B. Engineering Statistics I. (3) I, II.**Mr. Coleman**

Prerequisite: course 83A or equivalent.

Fundamental statistical concepts, population (system), sample, parameter, statistics. Significance tests and confidence limits. Efficient computational procedures. Risks of wrong decisions, power functions, operating characteristic curves. Simple and multiple regression and correlation, bivariate normal distribution. Applications in engineering and industry.

183D. Reliability. (3) II.**Mr. Coleman**

Prerequisite: course 183B or equivalent.

Probability, statistics, engineering, management principles in measuring, estimating, predicting reliability. Practical reliability applications of binomial, Poisson, exponential, gamma, chi-square, Gaussian and Weibull distributions. Sequential life testing, redundancy, design reviews, worse-case analysis. Wear-out, failure rates, maintainability, availability, dependability, derating, stress-strength relations.

185A. Systems Engineering. (3) I, II.**Mr. Boldyreff**

Prerequisite: Mathematics 110AB or 110C.

Mathematical bases for decision and programming in industry; models, methods, and objectives of systems engineering; specific methods and problems; emphasis placed upon practical validity and use of common-sense and empirical methods.

185B. Dynamic Programming. (3) II.**Mr. Hall**

Prerequisite: Mathematics 110AB or 110C.

Introduction to mathematical analysis of multistage decision processes occurring in mathematical theory of control, in operations research and system analysis, and in mathematical economics; analytic formulation and numerical computation stressed; examples.

- 186A. Introduction to Theory of Detection. (3) I, II.** Mr. Balakrishnan
Prerequisite: courses 181A, 183A.
An introduction to the modern theory of detection of random signals as applied to radar, communications and data processing.
- 186B. Introduction to the Theory of Information. (3) II.** Mr. Balakrishnan
Prerequisite: courses 181A, 183A.
Introduction to the theory of information as developed by Shannon.
- 186C. Introduction to the Theory of Prediction and Filtering. (3) I.**
Prerequisite: courses 181A, 183A. Mr. Balakrishnan
Spectrum and correlation analysis of random signals and the associated linear filtering and prediction theory.
- 191A. Astrodynamics. (3) I.** Mr. Baker
(Formerly Astronomy 112.)
Prerequisite: Mathematics 3B, 4A or 6A.
The practical application of celestial mechanics and other allied fields to the contemporary problems of space vehicles.
- 192A. Astrodynamics Observation Theory. (3) I.** Mr. Baker
(Formerly Astronomy 107.)
Prerequisite: Mathematics 3B, 4A; recommended: Engineering 191A.
Astronomical photogrammetry, reduction of radar observations, and other techniques employed in the handling of astrodynamics observational data. The theory of the space range system, Baker-Nunn cameras, range equipment, and anomalous luminous phenomena.
- 192B. Determination of Orbits. (3) II.** Mr. Baker
(Formerly Astronomy 115.)
Prerequisite: Engineering 191A or consent of the instructor.
The theory and calculation of the preliminary orbits of space vehicles and a study of their subsequent differential correction. Laplacian first approximation.
- 195A. Seminar on Problems in Engineering Education. (1) I, II.** Mr. Duke
Prerequisite: senior or graduate standing in engineering.
Historical review of engineering education; objectives and place of engineering education in the academic world; optimization of learning in lecture, recitation, and laboratory classes; evaluation of engineering teaching; research in engineering education; developing professional attitudes.
- 197. Advanced Analysis of Engineering Practice. (3) I, II.** Mr. Knight
Prerequisite: junior standing and participation in the cooperative work-study program in engineering.
Analysis and synthesis of engineering systems in industry and government, including prediction of performance and costs. Role of the engineer in design, production, and management. Written and oral reports.
- 198. Special Courses. (1-6) I, II.** Mr. Duke
Prerequisite: senior standing in engineering; enrollment subject to approval of instructor in charge.
Group study of selected topics. Study groups may be organized in advanced engineering subjects upon approval of instructor in charge. Occasional field trips may be arranged.
- 199. Special Studies. (1-5) I, II.** The Staff
Prerequisite: senior standing, superior achievement, and consent of the instructor. Application forms for requesting enrollment may be obtained from the Chairman of the Department.
Occasional field trips may be arranged.

Graduate Courses

Courses in the 200 series are open only to graduate students and in each case the consent of the instructor must be secured. Courses will be offered only if there is sufficient demand.

210A. Advanced Circuit Theory. (3) II.

Mr. Karplus

Prerequisite: courses 110A, 110B.

General theory of two terminal pair networks; advanced techniques of transfer function synthesis; approximation in frequency domain; potential analog techniques; Fourier series techniques; time domain approximations; introduction to active network synthesis.

213A. Computer Applications Seminar. (3) II.

Mr. Karplus

Prerequisite: course 113A.

A discussion of the application of analog and digital computer techniques to complex engineering problems. Hybrid computations; random parameters and noise; and analog-digital conversion.

213B. Computer Applications: Partial Differential Equations. (3) I.

Prerequisite: course 113A.

Mr. Karplus

A comprehensive survey of the solution of field problems governed by partial differential equations by means of automatic computers. Formulation of engineering problems as partial differential equations, analog simulation methods, digital simulation methods.

214A. Digital Computer Seminar. (3) I, II.

Mr. Estrin

Prerequisite: courses 114A, 114B.

A survey of the literature in the field of digital computers with emphasis on switching theory and application, digital computer design, and the application of digital computers.

215A. Solid State Electronics. (3) I.

Mr. Hershberger

(Numbered 230B prior to 1959-1960.)

Prerequisite: course 115A.

Energy levels in gases and solids, dielectric materials, paramagnetism and ferromagnetism, ferrites, spin resonance effects, absorption and reradiation effects, masers.

215B. Solid State Electronics. (3) II.

Mr. Elliott

Prerequisite: course 215A.

Review of free electron theory and band theory of solids; application of Brillouin zones; semiconductor crystals; semiconductor devices; superconductivity; cryogenic devices; lattice vacancies, diffusion and color centers; quantum electronics.

215C. Electronic Systems. (3) I, II.

Mr. Mackey

Prerequisite: courses 115C and 115D.

Engineering of electronic systems contrasted to single function circuits. Systems influenced by interface problems, signal spectra and modulation forms. Performance limited by environment, miniaturization, power, bandwidth, component reliability. Material drawn from fields of telemetry, radar, television, computers and automatic controls.

217A. Electromagnetic Theory: Radiation I. (3) I.

Mr. Elliott

(Numbered 230A prior to 1959-1960.)

Prerequisite: courses 117A and 117B or consent of instructor. Offered in alternate years.

Hallen-Aharoni theory of linear antennas; Scheikunoff array theory. Dolph-Tchebyscheff aperture distribution; two-dimensional scanning arrays; effect of mutual coupling; dipole, slot and helix as single radiators and as array elements; frequency-independent antennas.

*217B. Electromagnetic Theory: Radiation II. (3) II.

Mr. Elliott

Prerequisite: course 217A. Offered in alternate years.

Microwave optics. Stratton-Chu formulation. Horn radiators. Reflectors and lenses. Pattern synthesis. Stevenson slot theory. Fast and slow wave antennas. Taylor distribution. Wave-gate-fed arrays. Babinet's principle.

* Given odd-numbered years only.

† Given even-numbered years only.

***217C. Electromagnetic Theory: Microwave Circuits I. (3) I. Mr. Elliott**

Prerequisite: course 117B or equivalent. Offered in alternate years.

Impedance concept for waveguide modes; Schwinger variational technique for obstacles; irises; matching of discontinuities; principal types of junctions; ridges and corrugations; dispersive effects.

†217D. Electromagnetic Theory: Ion Dynamics. (3) II. Mr. Elliott

Prerequisite: courses 117A, 117B. Offered in alternate years.

The fundamental force equation; simple ion trajectories; magnetic and electric focusing; conformal transformation solutions; klystron theory and magnetron theory; the electron microscope; frequency limitations; traveling wave interactions; plasma oscillations.

***217E. Electromagnetic Theory: Wave Propagation. (3) II.**

Prerequisite: course 117B.

Mr. Hershberger

Ground wave radiation from dipoles above flat and spherical earths; equivalent earth radius, height gain and effect of ground; the ionospherically reflected wave, magnetic field effects, absorption and multipath fading; scatter propagation from tropospheric and ionospheric fluctuations.

220A-220B. Theoretical Hydrodynamics I and II. (3-3) Yr. Mr. Rott

Prerequisite: course 103A or the equivalent; vector algebra; partial differential equations.

Vector calculus: equations of conservation of mass, momentum, and energy for an inviscid fluid; potential and stream functions; application of complex variable theory to two-dimensional, incompressible flow; airfoil theory; free streamline problems; vortex motion; surface waves; equations of viscous, incompressible flow; very viscous flow; boundary layer theory; gas dynamics of the convergent-divergent nozzle; hodograph method; characteristics method.

221A. Gas Dynamics. (3) II.

Mr. Charwat

Prerequisite: consent of the instructor.

Review of thermodynamics, wave and shock motion in unsteady one-dimensional and steady two- and three-dimensional flows, small perturbation theory for wings and bodies, similarity rules, characteristics theory, effects of viscosity and conductivity.

***221B. Hypersonic Aerodynamics. (3) I.**

Mr. Rott

Prerequisite: course 221A.

A comprehensive survey of hypersonic aerodynamics to provide an introduction to the field; application to aircraft, missiles, and space vehicles.

222A. Real Fluids. (3) II.

Mr. Charwat

Prerequisite: course 103A, partial differential equations, vector algebra; or consent of instructor; course 122A recommended.

Theoretical treatment of laminar and turbulent, incompressible and compressible viscous flow; approximate solutions and important empirical work; fundamental aspects of several related problems such as heat transfer, statistical theories of turbulence, the analytical framework for treatment of "real" fluid dynamics.

***223A. Kinetic Theory and Molecular Flow. (3) I.**

Mr. Charwat

Offered in alternate years.

The molecular structure of gases; kinetic foundations of thermodynamics and gas dynamics; physics of the upper atmosphere; aerodynamics in rarefied gases; gas-surface interactions; experimental techniques.

†224A. Fundamentals of Aeroacoustics. (3) II.

Mr. Powell

Prerequisite: course 124A.

Detailed discussion of plane waves, point sources. Nonlinearity, layered and moving media, multiple reflections. Inhomogeneous wave equation. Monopole, dipole, quadrupole source fields from scattering inhomogeneities and turbulence: Lighthill's theory. Solid surface source distributions. Moving sources. Similarity methods. Selected detailed applications.

* Given odd-numbered years only.

† Given even-numbered years only.

224B. Advanced Topics in Aeroacoustics. (3) I.*Mr. Powell**

Prerequisite: course 224A.

Further developments to treat selected items such as noise generation by turbulent or supersonic jets, rockets, subsonic and supersonic boundary layers, shockwave interactions, whistles, atmospheric and underwater aspects, sonic "boom," structural response to random fluid pressures, introduction to aerothermoacoustics.

225A. Aerothermochemistry. (3) I.**Mr. Knuth**

Prerequisite: courses 151A and one of 122A, 150A, 152A; or consent of instructor.

Change equations for multicomponent mixtures; rate equations for momentum, mass and energy transfers, chemical reactions, phase changes; rate coefficients and molecular collisions; rate coefficients and irreversible thermodynamics; equilibrium criteria; reaction heats; characteristic times and dimensionless parameters of aerothermochemistry.

†225B. Aerothermochemistry. (3) II.**Mr. Knuth**

Prerequisite: course 225A.

Application of fundamentals presented in Engineering 225A to burning of premixed gases, cooling with mass transfer, quenching of chemical reactions, sound speed in reacting mixtures, channel flows of reacting mixtures, Prandtl-Meyer flows of reacting mixtures, etc.

†226A. Engineering Magnetohydrodynamics. (3) I.**Mr. Rott**

Prerequisite: courses 117A and 220A or consent of the instructor.

Continuum theory of the motion of a conducting fluid in a magnetic field; typical solutions for incompressible and compressible flow; elements of the theory of conductivity in a plasma; propulsion and power generation applications.

230A. Advanced Biotechnology. (3) I.**Mr. Lyman**

Prerequisite: consent of instructor.

Review and analysis of contemporary bioscience research which bears on problems of engineering component and system design. Emphasis is on methodological and scientific factors underlying man-machine-environment interactions.

230B. Advanced Biotechnology. (3) II.**Mr. Lyman**

Prerequisite: consent of instructor.

Specialized coverage of "human factors" and "human engineering" with orientation toward obtaining design optimization of the functions of humans in relation to engineering parameters of environment, communication and control.

236A. Random Processes in Automatic Control Systems. (3) I, II.**Mr. Leondes**

Prerequisite: courses 136B and 183A, or equivalent. Course 186C recommended.

Techniques for analysis and synthesis of linear control systems subjected to random processes as inputs, of nonlinear control systems with random processes as inputs, and of multipole control systems with random processes as input.

236B. Advanced Control Systems Theory. (3) I, II.**Mr. Aoki**

Prerequisite: courses 136B, 136C, 236A.

Optimization techniques including Pontryagin maximum principle, time optimal systems, Neyman-Person lemma, linear operators. Concepts, formulation, applications of control problems via dynamic programming. Advanced stability techniques, Lyapunov methods, application to such nonlinear systems as adaptive systems. Other advanced topics.

236C. Control Systems Theory Seminar. (3) I, II.**Mr. Aoki**

Prerequisite: course 236B.

Critical review of various topics in advanced control systems theory. Topics will include random processes in control systems, nonlinear control, linear time variable systems, optimal systems, adaptive systems with deterministic and random inputs, applications of functional analysis. Other advanced topics.

* Given odd-numbered years only.

† Given even-numbered years only.

- 243A. Theory of Flow Through Porous Media. (3) I.** Mr. Perrine
Prerequisite: course 143A or consent of instructor.
Theory of miscible and immiscible fluid displacement processes within porous media; derivation and solution methods for equations describing flow; appropriate linearization of flow equations, representation as a hyperbolic system, numerical solutions, problems in stability or fingering, statistical hydrodynamics, capillarity.
- 245A. Properties of Engineering Materials. (3) I.** Mr. Rosenthal
(Numbered 210A prior to 1959-1960, and 210B prior to 1958-1959.)
Prerequisite: graduate standing in engineering.
Application of solid-state physics to determination of structure and properties (mechanical) of engineering materials. Elements of X-ray structure analysis. Cohesive strength of ionic crystals and simple metals. Lattice imperfections, nonelastic behavior of solids.
- 245B. Properties of Engineering Materials. (3) II.** Mr. Sines
(Numbered 210B prior to 1959-1960, and 210A prior to 1958-1959.)
Prerequisite: graduate standing in engineering, Physics 121 (or equivalent).
Application of solid-state physics to determination of properties (other than mechanical) of engineering materials. Introduction to modern concepts. Specific heat, conductivity (conductors and semiconductors), dielectrics, magnetic properties. Electron theory of alloys.
- 246A. Equilibria for Materials at Elevated Temperatures. (3) II.**
Prerequisite: course 146A. Mr. Knapp
Thermodynamic applications for systems of inorganic materials at elevated temperatures; lattice energies of ionic crystalline compounds; thermodynamic properties of solid solutions and melts; chemical reactions involving metals and ceramics at elevated temperatures.
- †247A. Reactions of Physical Metallurgy. (3) II.** Mr. Flanigan
Prerequisite: bachelor's degree in engineering, physics or chemistry and at least one prior course in physical metallurgy, e.g., course 147A; or consent of the instructor.
A study of the mechanisms and rate-controlling factors associated with important reactions of physical metallurgy. Diffusion, solidification, recrystallization after cold work, grain growth, precipitation from supersaturated solid solution, decomposition of austenite.
- 249A. Problems of Materials for Nuclear Reactors. (3) II.** Mr. Frankel
Prerequisite: courses 147A, 155A, or equivalent; courses 163A, 245A recommended.
Review of reactor characteristics; general materials considerations; problems unique to nuclear reactors; neutron economy; radiation damage; internal heating; properties of special materials; special problems with power reactors; fuels for high burn-up, influence of materials considerations on economics of nuclear power.
- 250A. Heat and Mass Transfer. (3) I.** Mr. Edwards
(Numbered 251 prior to 1959-1960.)
Prerequisite: course 150A or 152A or consent of the instructor.
Development of equations describing heat, mass, and momentum transfer; general principles of diffusional and mass transfer processes; analogies among transport processes; applications to systems and processes with combined heat and mass transfer such as evaporative cooling.
- 250B. Seminar in Advanced Heat Transfer. (3) II.** Mr. Edwards
Prerequisite: course 150A.
A review of the current literature in the fields of convective heat transfer and boiling heat transfer with special emphasis on analytical methods. Student reports on advanced topics in heat transfer.
- 251A. Advanced Topics in Thermodynamics. (3) I.** Mr. Robinson
(Numbered 298 prior to 1959-1960.)
Prerequisite: course 151A and consent of instructor.
A review of the fundamental notions of classical and irreversible thermodynamics; applications to chemical equilibria and flow processes. Student reports on current topics in thermodynamics.

† Given even-numbered years only.

***254A. Advanced Thermal and Luminous Radiation. (3) II. Mr. O'Brien**

Prerequisite: course 150B or equivalent preparation.

Radiative transfer in geometrically complex spaces; non-uniform radiant excitation and properties; spatial distribution of net transfer and radiance; non-gray spectral distributions; emphasis on matrix formulation; problems from current literature of space technology, heat transfer, illumination, colorimetry and photometry.

255A. Nuclear Reactor Engineering. (3) I. Mr. Hicks

Prerequisite: course 155B; course 281A recommended.

The mathematical study of nuclear reactor behavior by analytical and numerical methods. Topics to be discussed include: nuclear cross sections, slowing down, transport theory, multi-group diffusion.

255B. Nuclear Reactor Engineering. (3) II. Mr. Hicks

Prerequisite: course 255A.

The mathematical study of nuclear reactor behavior by analytical and numerical methods. Topics to be discussed include: perturbation theory, reactor kinetics, and heterogeneous systems.

257A. Chemical Reactor Analysis and Design. (3) I. Mr. Nobe

(Numbered 158B prior to 1963-1964.)

Prerequisite: course 157A; courses 150A and 152A recommended.

Principles of chemical reactor kinetics and interphase transfer kinetics and applications to batch and flow systems. The effect of thermodynamic variables on kinetics. Homogeneous and heterogeneous flow reactions.

259A. Engineering Chemical Physics. (4) I. Mr. Robinson

Prerequisite: Mathematics 110C or equivalent, and Chemistry 130A or Physics 121.

Application of quantum mechanics, statistical mechanics, and kinetic theory to problems in modern engineering. Emphasis will vary from year to year. In 1963-1964, topics will include transport phenomena in gases and plasmas, quantum mechanical collision phenomena, and quantum statistics.

259B. Engineering Chemical Physics. (2) II. Mr. Robinson

Prerequisite: course 259A or consent of instructor.

Continuation of course 259A. Concurrent registration for 2 units of course 299 on a related subject is strongly recommended but not required. Some consideration will also be given to absorption and surface phenomena and chemical kinetics.

260A. Advanced Dynamics of Rigid Bodies. (3) I. Mr. Thomson

Prerequisite: course 102B or equivalent.

Kinematics and dynamics of space motion; ellipsoid of inertia; Poincaré's geometric interpretation; precession and nutation; stability, perturbation solutions; high speed gyro; influence of gimbals, damping; constrained motion and gyrodynamic forces; gyrocompass, vehicle motion; Lagrangian formulation; impulsive excitation.

260B. Advanced Topics in Dynamics. (3) II. Mr. Thomson

Prerequisite: course 260A.

Advanced topics relating to current dynamical problems.

260C. Wave Propagation in Solids. (2) I. Mr. Morgan

Prerequisite: course 263A or 263C, and 281A or Mathematics 224A.

Elastic waves in an extended medium, reflection and refraction at boundaries; propagation in bounded media, experimental measurements; stress waves in imperfectly elastic media, visco-elastic solids, internal friction, plastic and shock waves.

261A. Advanced Kinematics. (3) II. Mr. Beggs

Prerequisite: course 161A.

Analysis and synthesis of space mechanisms with special reference to point and line contact members such as gears and cams; complex variable, matrix, tensor dual number methods; deflections, vibrations and stress propagation.

* Given odd-numbered years only.

263A. Mechanics of Deformable Solids I. (3) I.*Mr. Zizicas**

Prerequisite: course 108B; prerequisite or concurrent: course 281A; or consent of the instructor. Offered in alternate years.

States of stress and strain and their directional dependence, reversible and irreversible isotropic stress-strain relations, local and integral formulation of isotropic problems.

‡263B. Mechanics of Deformable Solids II. (3) II.**Mr. Zizicas**

Prerequisite: course 263A. Offered in alternate years.

Systematic solution of isotropic problems; analysis of anisotropic solids and effects of large strains.

‡263C. Applied Elasticity. (3) I.**Mr. Lin**

Prerequisite: course 108B, Mathematics 110C or equivalent; course 163A recommended.

Elastic stress-strain relations, plane stress and strain problems in rectangular and cylindrical coordinates, bending of prismatic bars, stress concentration due to circular holes in strained plates, rotating disks and cylinders, torsion of circular and rectangular bars, thermal elastic stresses.

263D. Applied Plasticity. (3) II.*Mr. Lin**

Prerequisite: course 263C or consent of instructor.

Deformation theory, flow theory, slip theories of plasticity and their limitations, simple inelastic structures as inelastic beams, shafts, columns, spherical shells, thick cylinders, rotating disks and cylinders, plastic hinges in rigid frames and visco-elastic structures.

‡263E. Theory of Disks, Membranes, and Plates. (3) I.**Mr. Zizicas**

Prerequisite: course 263A or consent of instructor.

Reversible and irreversible deformation of disks; small and large deflections of elastic membranes and plates; thick plates; anisotropic plates; sandwich plates; irreversible deflections of plates; stable and unstable deformations to be considered; typical applications.

263F. Theory of Shells. (3) II.*Mr. Zizicas**

Prerequisite: course 263A or consent of the instructor.

Elements of differential geometry of surfaces; membrane and bending theory of shells; application to cylindrical, spherical, conical shells, and other shells with rotational symmetry; large deflections of shells; irreversible deflection of shells; stable and unstable deformations to be considered; typical applications.

263G. Mechanics of Continuous Media I. (3) I.**Mr. Morgan**

Prerequisite: courses 263A or 263C, and 281A; or consent of the instructor.

Development of exact non-linear theories of solid and fluid mechanics. Geometry and thermodynamics of large deformations. Natural state, Cauchy's and Jaumann-Murnaghan rate-of-deformation theories in elasticity. Rivlin's exact (large-deformation) solutions in the natural state theory.

263H. Mechanics of Continuous Media II. (3) II.**Mr. Morgan**

Prerequisite: course 263G.

Various approximations to the exact elasticity theories, e.g., the Mooney-Rivlin theory for rubber. Exact theories for fluids: the Stokesian fluid, the Reiner-Rivlin fluid with a natural time, the Maxwellian fluid. Superposition theories: visco-elastic continua.

264A. Analytical Soil Mechanics. (3) II.**Mr. Duke**

Prerequisite: course 164A.

Stress and plasticity, passive resistance, bearing capacity, piles, stability of slopes, seepage, consolidation, elasticity problems, soil dynamics, earthquake problems, field studies, foundations, earth structures. Emphasis will vary from year to year.

265A. Advanced Structural Analysis. (3) I.**Mr. Rubinstein**

Prerequisite: courses 165A, 165B; or 166A, 166B.

Plastic or ultimate strength analysis of frames; light metal structural systems; indeterminate space frameworks; safety of structures. Application of modern computer techniques. Emphasis will be on stationary structures and will vary from time to time as indicated by current developments.

* Given odd-numbered years only.

‡ Given even-numbered years only.

266A. Stability of Structures (3) I.

Mr. Hurty

Prerequisite: courses 165B, 166B; Mathematics 110C; or equivalent.

Elastic buckling of bars, frames. Different approaches to stability problems, inelastic buckling of columns and beam columns. Columns and beam columns with linear, non-linear creep. Combined torsional and flexural buckling of columns, lateral buckling of beams, buckling of curved bars.

267A. Advanced Structural Design. (3) II.

Mr. Rubinstein

Prerequisite: courses 165A, 165B, 166A, 167A, 167B.

Design and economics of complex structural systems; various framing systems for concrete, masonry, and metal mill buildings, tall buildings, bridges, and special structures; monolithic structures; development of optimization principles in structural design; comprehensive design project.

269A. Dynamics of Structures. (3) II.

Mr. Hurty

Prerequisite: course 160A.

Consideration of properties of structures and advanced principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Approximation methods and interaction techniques. Transient response to impulsive loads. Structural damping. Emphasis on matrix formulation and solution.

‡270A-270B-270C. The Engineer in the Technical Environment. (3-3-3)

3 semesters, beginning in the fall.

Mr. O'Neill

Prerequisite: acceptance to the Engineering Executive Program.

Development and application of quantitative methods in the analysis and synthesis of engineering executive systems; recently developed mathematical, statistical and machine methods; optimization of outputs with respect to costs-time-material-energy-information-power.

‡271A-271B. The Engineer in the General Environment. (3-3)

2 semesters, beginning in the fall.

Mr. Frankel

Prerequisite: acceptance to the Engineering Executive Program.

Influences of history, literature, and human relations on development and utilization of natural and human resources; the engineer's role in applying both quantitative and historical methods to problems in industry, transportation, water supply, etc., in local, national, and international communities.

‡272A-272B. The Engineer in the Business Environment. (3-3)

2 semesters, beginning in the spring.

Mr. Asimow

Prerequisite: acceptance to the Engineering Executive Program.

Accounting theory. Analysis of financial statements with special reference to their use in and effect on engineering activity; economy of business enterprise; organization and management of engineering activity; relationship of the engineering function with sales, marketing, production and financing functions.

281A. Analytical Methods of Engineering. (3) I, II.

Mr. Morgan

(Numbered 200A prior to 1959-1960.)

Prerequisite: course 182A or consent of instructor.

Application of mathematical methods to engineering problems; basic problems in the fields of fluid dynamics, heat conduction, and electromagnetic theory will be discussed.

281B. Analytical Methods of Engineering. (3) I, II.

Mr. Balakrishnan

Prerequisite: course 281A or consent of instructor.

Application of mathematical methods to engineering problems; basic problems in the fields of fluid dynamics, heat conduction, and electromagnetic theory will be discussed.

‡ Open only to Engineering Executive Program students. See page 119 of this bulletin.

***283A. Selected Topics in Engineering Statistics. (3) I.**

Prerequisite: courses 183A, 183B.

Mr. Coleman, Mr. Brown

Foundation topics for statistical decision procedures and stochastic processes selected from probability measures, distribution functions, characteristic functions and transformations. Relationships of statistical decision theory and Bayes' methods to engineering problems. Concepts of strategy, risk, utility, performance characteristics and sequential procedures.

†283B. Statistical Design of Engineering Experiments. (3) II.

Prerequisites: courses 183A, 183B.

Mr. Coleman, Mr. Brown

Matrix treatment of linear hypotheses in engineering experimentation. Statistical estimation, tests of hypotheses, analysis of variance, regression models. Randomized blocks, factorial, Latin square, multiple factor and level experiments. Principles of orthogonality, confounding, fractional replication, incomplete block designs with engineering applications.

286A. Advanced Theory of Detection. (3) II.

Mr. Balakrishnan

Prerequisite: course 186A or equivalent; Mathematics 209A or 232 or Engineering 283B recommended.

Statistical theory of detection as applied to communications, radar and data processing.

286B. Advanced Theory of Information. (3) I.

Mr. Balakrishnan

Prerequisite: course 186B; Mathematics 209A, 220A or the equivalent recommended. Information rates and channel capacity for discrete and continuous systems; ergodic theorems; coding methods and associated error bounds.

286C. Mean Square Optimization Methods. (3) II.

Mr. Balakrishnan

Prerequisite: course 186C; course 281A, Mathematics 209A and 220A recommended. Linear and non-linear optimization methods for single and multiple random processes in communication systems.

287B. Stochastic Processes in Linear Systems. (3) II.

Mr. J. L. Barnes

Prerequisite: courses 181A, 183A and bachelor's degree in engineering, physics or mathematics.

Formulation and solution of equations of behavior of lumped and distributed linear electrical, rigid- and fluid-mechanical, and thermal systems with stochastic (i.e., chance) excitation, or system change, and response.

291A. Advanced Astrodynamics. (3) II.

Mr. Baker

(Formerly Astronomy 299A.)

Prerequisite: courses 191A, 192B.

Advanced problems in astrodynamics with special applications to space vehicles. Non-gravitational and relativistic effects, astrodynamical constants, the N-body problem, advanced observation theory.

292A. Practical Celestial Mechanics. (3) I.

Mr. Herrick

(Formerly Astronomy 225A.)

Prerequisite: courses 191A and 192B.

The advanced application of celestial mechanics to the rocket problem including special and general perturbations, gravitational potential, numerical integration, and other topics of practical importance to orbit prediction.

292B. Celestial Mechanics. (3) II.

Mr. Herrick

(Formerly Astronomy 225B.)

Prerequisite: course 191A; courses 192B and 292A recommended.

The advanced theory of celestial mechanics, motion about an aspherical Earth, small divisor problems, Hamiltonian mechanics, canonical variables.

* Not to be given, 1964-1965.

† Not to be given 1963-1964; to be given fall 1964; not to be given in the spring semester until spring 1966.

292C. Advanced Orbit Theory. (3) I.**Mr. Herrick**

(Formerly Astronomy 215.)

Prerequisite: courses 191A, 192A, 192B.

Lagrange-Gauss-Gibbs first approximation, the Gaussian and Gibbsian preliminary orbit methods, differential correction including analytical partial derivatives. New orbit determination methods with special applications to space vehicles.

†297. Analysis and Synthesis of a Large Scale System. (3) II. **Mr. Asimow**

Prerequisite: acceptance to the Engineering Executive Program.

A problem area of modern industry or government is selected as a class project and its solution is synthesized using quantitative tools and methods. The project also serves as a laboratory in organization for a goal oriented technical group.

298. Seminar in Engineering. (1-5) I, II.**Mr. Duke**

Seminars may be organized in advanced technical fields. Course may be repeated provided no duplication exists. If appropriate, field trips may be arranged.

299. Research in Engineering. (1-6) I, II.**The Staff**

Occasional field trips may be arranged. Prerequisite: consent of instructor. Application forms for requesting enrollment may be obtained from the Chairman of the Department.

Investigation of advanced technical problems.

Professional Course**‡400. Principles and Techniques of Electron Microscopy. (1) I.** **Mr. Froula**

Prerequisite: a physics course including light, electricity, and magnetism; or consent of the instructor. Occasional visits to electron microscopy laboratory.

Fundamental principles of electron microscopy. Design and use of electron microscopes and supplementary equipment. Techniques and problems of specimen preparation. Interpretation of micrographs. Application of electron microscopy in various fields.

ENGLISH

(Department Office, 2303 Humanities Building)

Martin Perry Andersen, Ph.D., Professor of Speech.**Bradford Allen Booth, Ph.D., Litt.D., Professor of English.****Hugh Gilchrist Dick, Ph.D., Professor of English (Chairman of English).****John Jenkins Espey, B.Litt., M.A., (Oxon.), Professor of English.****Majl Ewing, Ph.D., Professor of English.*****Leon Howard, Ph.D., L.H.D., Professor of English (Vice-Chairman of the Department).****Paul Alfred Jorgensen, Ph.D., Professor of English.****Wesley Lewis, Ph.D., Professor of Speech.****William Matthews, Ph.D., Professor of English.****Blake Reynolds Nevius, Ph.D., Professor of English.****†Ada Blanche Nisbet, Ph.D., Professor of English.****James Emerson Phillips, Jr., Ph.D., Professor of English.****Clifford Holmes Prator, Ph.D., Professor of English (Vice-Chairman of the Department).****Franklin Prescott Rolfe, Ph.D., Professor of English.****†Robert Paul Stockwell, Ph.D., Professor of English.****Hugh Thomas Swedenberg, Jr., Ph.D., Professor of English.****Lily Bess Campbell, Ph.D., Litt.D., L.H.D., LL.D., Emeritus Professor of English.**

† Absent on leave, 1963-1964.

‡ Open only to Engineering Executive Program students. See page 119 of this bulletin.

§ To be given when there is sufficient demand.

* In residence spring semester only, 1963-1964.

- Alfred Edwin Longueil, Ph.D., *Emeritus Professor of English*.
 Ralph Cohen, Ph.D., *Associate Professor of English*.
 Vinton Adams Dearing, Ph.D., *Associate Professor of English*.

† Absent on leave, 1963–1964.

———, *Acting Assistant Professor of English.*

George M. Savage, Ph.D., *Professor of Theater Arts.*

Joseph Sheehan, Ph.D., *Associate Professor of Psychology.*

Students must have passed Subject A (either examination or course) before taking any course in English. Regulations concerning Subject A will be found on page 42 of this bulletin.

Letters and Science List.—All undergraduate courses in English except 370 and all undergraduate courses in speech except 142A, 142B, and 370 are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Courses 1A–1B and 46A–46B or the equivalent, with an average grade of C or higher; History 5A–5B, or History 151A–151B (or any combination of the two courses) for junior transfers, or the equivalent (except under Plan III).

Recommended: Ancient and modern foreign languages. A reading knowledge of French, German, or Latin is required for the M.A. degree. For the Ph.D. degree a reading knowledge of both French and German is required; a reading knowledge of Latin is essential for work in some fields.

The Major.—Plan I. For the general undergraduate: 24 units of upper division courses in English, including (1) English 117J; (2) one of the Type courses (6 units); (3) three of the Age courses (not more than two courses in adjacent ages); (4) at least 3 units of upper division American literature.

Plan II. For the undergraduate expecting to proceed to the M.A. or Ph.D. degree in English: the student must present, in the first half of the junior year, a program to be examined and approved by the departmental adviser to upper division students. (1) The program must comprise, at a minimum, 24 units of upper division courses in English, including (a) English 117J, to be taken in the junior year; (b) one of the Type courses (6 units); (c) three of the Age courses (not more than two courses in adjacent ages); (d) at least 3 units of upper division American literature; (e) English 151L, to be taken in the senior year.

Plan III. The major in English (with speech) for the student taking the general secondary credential.

- (a) The completion of the following: (1) English 1A–1B, 46A–46B; (2) Speech 1 and 2 or 4; (3) English 31 or 106L; 115 or 153; 117J; 3 units from 131, 132, 133, 190A, 190B; (4) 6 units from English 114A–114B, 122A–122B, 125C–125D, 125G–125H; (5) 6 units from English 152, 156, 158, 167, 177, 187; (6) 3 units from Speech 106, 107, 109, 110, 111, 112A, 112B, 122, 140; (7) Theater Arts 103.
- (b) The following courses, ordinarily to be taken in the graduate year, complete the English requirements for the general secondary credential: English 370, taken before or concurrently with Education 130; 6 units from English 201, 221, 222, 223A, 223B, 224, 225, 226, 227A, 227B, or their equivalent.

The minor in English (with speech) for the general secondary credential

will consist of the following courses: (1) English 1A-1B, 46A-46B; (2) Speech 1; (3) English 106L or 31; (4) 6 units from English 114A, 114B, 115, 117J, 125C, 125D, 131, 132, 133, 153, 190A, 190B; (5) English 370.

The Honors Program in English.—Majors with a 3.0 average in English, and nonmajors with honors status in the College of Letters and Science, may, upon completing at least nine upper division units in the department, apply for admission to the honors program in English. In addition to the minimum grade-point average, admission to the program requires a letter of recommendation from a member of the faculty in the department and satisfactory evidence of the ability to write acceptable prose. Students admitted to the program will enroll in English 196A-196B, and will elect either English 117L or 197. English majors in the honors program may substitute 196A-196B for the Type course requirement under Plans I, II, and III. Majors under Plan III may, with the approval of the department chairman, further substitute either 117L or 197 for one of the two required Age courses.

Requirements for Admission to Graduate Courses

The requirement is ordinarily the undergraduate major in English or its equivalent. No graduate student may take a graduate course in English who has fewer than 12 units in upper division major courses in English. This requirement is prerequisite to the 24 units demanded for the master's degree. If the candidate is deficient in this prerequisite, he must fulfill it by work undertaken as a graduate student.

Requirement for the Master's Degree

1. For the general requirements, see page 162. The Department follows Plan II, as described on page 164. The comprehensive examinations are given toward the end of each semester for both the M.A. and for the Ph.D. qualifying examinations, and during the Summer Session for the M.A. degree alone.

2. Under the comprehensive examination plan, the department offers two programs leading to the M.A. degree. Of these, Plan A is designed primarily for students intending to teach in high schools and junior colleges. Plan B constitutes the first phase of the program leading to the Ph.D. degree for students intending to teach in colleges and universities. Students who take the M.A. degree under Plan A may, if recommended by the department, transfer to the Ph.D. program, but they will not be eligible for the qualifying examinations until they have completed the course requirements listed under Plan B. For both Plan A and Plan B, a reading knowledge of French or German or Latin is required. Students should take the reading test in one of these languages at the beginning of the first semester of residence, but in any event no later than the mid-term of the semester in which all degree requirements are to be completed.

Plan A. Students must complete at least 24 units in English, including the following courses: course 201, one course chosen from 110, 111; two courses chosen from 221, 222, 223A, 223B, 224, 225, 226, 227A, 227B. To meet the general University requirements, at least 12 units must be in strictly graduate (200 series) courses. Upon completion of all requirements, the student will be given a comprehensive oral examination of no less than one hour designed

to test his intellectual grasp of the major literary documents presented to him during his graduate study.

Plan B. (See Requirements for the Doctor's Degree, below.)

Requirements for the Doctor's Degree

1. For the general requirements, see page 165.

2. Departmental requirements: (a) On entering the department the candidate will present to the chairman a written statement of his preparation in French, German, and Latin. He should take the reading test in one of the two required modern foreign languages (French and German) at the beginning of the first semester of residence, the test in the other not later than the beginning of the third semester of residence. For work in some fields a reading knowledge of Latin is necessary. (b) In the first year (normally two semesters) of graduate study, the candidate will follow the Plan B program leading to the master's degree. This includes: course 200, 210; four courses chosen from 221, 222, 223A, 223B, 224, 225, 226, 227A, 227B; one graduate seminar; and three units of elective. Upon completion of these requirements and not later than the semester following the completion of 30 units of graduate work the candidate will take Part I of the qualifying examination. This examination will consist of four written examinations, each one hour and a half long, and a two-hour oral examination. In the written examinations, the candidate will be expected to demonstrate a sound and comprehensive knowledge of four major fields in English literature (with Linguistics and American Literature each considered as a single field). The student will be allowed to offer either English or American literature of the 20th century as a field, but not both. In the oral examination he will be expected to demonstrate a sufficient knowledge of other fields to guarantee his basic preparation for college teaching. If he does well in both the written and oral examinations, he will be encouraged to proceed further with graduate study. Students holding a master's degree from another institution may enter the program for the doctor's degree, but they will be required to pass Part I of the qualifying examination. (c) Normally the candidate will devote a second year to the completion of the language requirement (6 units chosen from 211, 212, 213) and the taking of graduate seminars in English (at least two outside his major field) or suitable courses in other departments, after which he will take Part II of the Qualifying Examinations and be advanced to candidacy. Of course this period may be curtailed or extended according to circumstances. Part II of the Qualifying Examinations will consist of three three-hour written examinations and a two-hour oral examination in the candidate's special field and in two other fields to be chosen in consultation with his adviser. No special examination in linguistics is required, but questions on the language will appear at appropriate points in the examinations on literature. (d) A final year (which under the University rules may not be curtailed) will normally be devoted by the candidate chiefly to the preparation of his dissertation, after which he will take his final oral examination. During this year the candidate may satisfy the residence requirement either by taking additional seminars or by registering in English 299.

If a student has allowed seven years or more to elapse since taking a course or examination to meet the requirements for a graduate degree, it will be

necessary to have such a course or examination validated by the department before he can proceed toward completion of the requirements.

Lower Division Courses

Freshman Courses

1A. First-Year Reading and Composition. (3) I, II. Mr. Graver in charge

Open to all students who have received a passing grade in Subject A.

Principles and methods of expository writing.

1B. First-Year Reading and Composition. (3) I, II. Miss Ridley in charge

Prerequisite: English 1A.

Introduction to the types of modern literature: the novel, the short story, drama, and poetry.

*4A. Great Books: Dramatic Comedy. (1) I. _____

*4B. Great Books: Dramatic Tragedy. (1) II. _____

*4C. Great Books: the English Novel. (1) I. _____

*4D. Great Books: the Continental Novel. (1) II. _____

*4E. Great Books: Lyric Poetry. (1) I. _____

*4F. Great Books: Narrative Poetry. (1) II. _____

4G. Great Books: Famous Utopias. (1) I.

Mr. Hirschman

4H. Great Books: Great Satirists. (1) II.

Mr. Hirschman

Sophomore Courses

30A. American Literature of the Pre-Civil War Period. (2) I, II.

Mr. Howard in charge

Prerequisite: course 1A. Not open for credit to students who have taken upper division courses in the same period.

30B. American Literature of the Post-Civil War Period. (2) I, II.

Mr. Howard in charge

Prerequisite: course 1A. Not open for credit to students who have taken upper division courses in the same period.

31. Intermediate Composition. (2) I, II.

Mr. Ewing in charge

Prerequisite: course 1A-1B.

46A-46B. Survey of English Literature. (3-3) Yr. Beginning each semester.

Prerequisite: course 1A-1B.

Mr. Dearing in charge

Upper Division Courses

Upper division standing is required for all upper division courses in English. Courses 1A-1B and 46A-46B are prerequisite to all upper division courses in English, except 106S, 110, 111, 115, 116A-116B, 117J, 118, 125C-125D, 130, 133, 135, 151M, 190A, 190B, for which 1A is prerequisite, and 195 and 153, for which 1A and 1B are prerequisite. Theater Arts students may substitute Humanities 1A-1B for course 46A-46B as a prerequisite for 113A and 113B. Students who have not passed English 31 will be admitted to 106C and 106F only upon a test given by the instructor.

* Not to be given, 1963-1964.

A. The Junior Course: Course 117J. Required of Juniors whose major is English.

B. The Type Courses: Courses 114A-114B, 122A-122B, 125C-125D, and 125G-125H. It is understood that major students in English will take one of these year courses.

C. The Age Courses: Courses 152, 156, 158, 167, 177, and 187. It is understood that major students in English under Plans I and II will take three of these courses, and majors under Plan III will take two.

D. Courses in American Literature: Courses 130, 131, 132, 133, and 135. It is understood that major students in English under Plans I and II will take at least 3 units of these courses.

E. The Senior Course: Course 151L. Required of seniors whose major subject is English under Plan II.

106A. The Short Story. (2) I, II. Mr. Espey, Mr. Kessler
Prerequisite: consent of the instructor.

106C. Critical Writing. (2) I, II. The Staff

106D-106E. Fundamentals of Dramatic Writing. (3-3) Yr. Mr. Savage

106F. Exposition. (2) I, II. Mr. Espey

106L. Advanced Composition for Teachers. (2) I, II. The Staff
Designed primarily for candidates for the general secondary teaching credential.

106S. Advanced Composition for Majors in the Physical and Life Sciences.
(3) I, II. _____

110. Introduction to the English Language. (3) I.

Mr. Matthews, Mr. Stockwell
A survey of the changes in the English systems of sounds, grammar, and lexicon from 750 A.D. to the present, with consideration of the broader linguistic principles exemplified by these changes.

111. The English Language in America. (3) I, II.

Mr. Matthews, Mr. Stockwell

113A. British and Continental Drama, 1500-1850. (3) I, II. Mr. Calderwood

Prerequisite: English 46AB or Humanities 1AB, and English 117J or Classics 113. Not open for credit to students who have completed English 114A-114B.

A study of the major European dramatic traditions, with emphasis on significant plays of Britain, France, Spain, Germany, and Russia.

113B. Modern Drama. (3) I, II. Mr. Chandler
(Formerly number, 114C.)

Prerequisite: English 113A, or English 46A-46B, or Humanities 1A-1B.
A comparative study of the drama from Ibsen to the present, with consideration of significant continental, British, and American playwrights.

114A-114B. English Drama from the Beginning to 1900. (3-3) Yr.

Mr. Dent

115. Primitive Literature. (3) II. Mr. Jones, Mr. Wilgus

The study of primitive types, such as the fable, folk tale, myth, legend, ballad, and hero tales, as to characteristics and theories of origin and diffusion. The comparative study of typical stories, and the work of collectors and adapters.

116A. The English Bible as Literature: the Old Testament. (2) I.

Mr. Dearing

- 116B. *The English Bible as Literature: the New Testament.* (2) II.
Mr. Dearing
- 117J. *Shakespeare.* (3) I, II.
The Staff
A survey of from twelve to fifteen plays, with special emphasis on one chronicle, one comedy, and one tragedy.
- 117L. *Advanced Shakespeare.* (3) I, II.
Prerequisite: course 117J. Mr. Dent, Mr. Jorgensen, Mr. Phillips
Intensive study of three to five plays, with consideration of sources, textual problems, and various critical approaches.
118. *Children's Literature.* (3) I, II.
Mrs. Sayers
- 122A-122B. *English Poetry from the Beginning to the Present.* (3-3) Yr.
Mr. Espey, Mr. Gullans
- 125C-125D. *The English Novel from the Beginning to the Present.*
(3-3) Yr. Mr. Booth, Mr. Jones, Mr. Graver
- 125G-125H. *English Prose from the Beginning to the Present.* (3-3) Yr.
Mr. Ewing
130. *American Literature of the Colonial and Early National Periods.*
(2) II. Mr. Falk, Mr. Howard
131. *American Literature of the Nineteenth Century.* (3) I.
Not open to students who have not had 46A-46B. Mr. Falk, Mr. Nevius
132. *American Literature in the Twentieth Century.* (3) I, II.
Mr. Bone, Mr. Dembo, Mr. Durham, Mr. Nevius
Not open to students who have not had 46A-46B.
133. *American Life in American Letters.* (3) I. Mr. Durham
The main currents of thought in American life as reflected in literature.
135. *American Fiction.* (3) I, II.
Mr. Bone, Mr. Booth, Mr. Durham, Mr. Howard, Mr. Nevius
The history of the American novel and short story from the beginning to the present day.
- 151L. *Chaucer.* (3) I, II. Mr. Longueil, Miss Ridley
- 151M. *Milton.* (3) I. Mr. Swedenberg
A survey of the major and minor poems of Milton and his more significant prose works.
152. *English Literature of the Later Middle Ages.* (3) I, II.
Mr. Habenicht, Miss Ridley
153. *Introduction to the Study of Poetry.* (3) I, II. Mr. Jones, Mr. Thorslev
155. *Literary Criticism.* (3) II. Mr. Cohen, Mr. Nelson
156. *The Age of Elizabeth.* (3) I, II. Mr. Kinsman, Mr. Phillips, Mr. Dick
158. *The Age of the Stuarts.* (3) I, II.
Mr. Gullans, Mr. Miner, Mr. Swedenberg
167. *The Age of Pope and Johnson.* (3) I, II.
Mr. Cohen, Mr. Dearing, Mr. Swedenberg
177. *The Romantic Age: 1784-1832.* (3) I, II. Mr. Cohen
187. *The Victorian Age: 1832-1892.* (3) I, II. Mr. Booth, Mr. Graver

- 190A. English Literature since 1900. (3) I. Mr. Ewing, Mr. Hirschman
The novel.
- 190B. English Literature since 1900. (3) II. Mr. Ewing, Mr. Espey
Poetry.
- 196A. Honors Course in English. (3) I. Mr. Kinsman in charge
Prerequisite: (1) for the English major; senior standing with a minimum 3.0 average in the major and consent of departmental honors committee; (2) for students with honors status in the College of Letters and Science; senior standing with a minimum 3.5 general average and consent of departmental honors committee.
Intensive study of problems in separate areas of fiction, nonfiction prose, drama, and poetry with discussion, oral reports, and preparation of one or more papers on the subject. Sections limited to ten students.
- 196B. Honors Course in English. (3) II. Mr. Kinsman in charge
Prerequisite: course 196A.
Supervised preparation of an honors essay (12,000-word) on an aspect of fiction, non-fictional prose, drama, or poetry.
197. Proseminar. (3) I, II. The Staff
Prerequisite: senior standing as an English major and consent of the instructor. Sections limited to twenty students.
Intensive study of a single author, with discussion, oral reports, and the preparation of one or more papers on the subject. 1963-1964: first semester—D. H. Lawrence; second semester—.
199. Special Studies in English. (1-3) I, II. The Staff
Prerequisite: senior standing and consent of the instructor.

Graduate Courses

200. Bibliography. (3) I, II. Mr. Dearing
201. The Functions of Literary Criticism. (3) I, II. Mr. Longueil, Mr. Nelson
210. History of the English Language. (3) I, II. Mr. Matthews, Mr. Stockwell
Developments in the English language from its Indo-European origins to the rise of Early Modern English.
211. Readings in Old English Literature. (3) I. Mr. Matthews, Mr. Stockwell
Prerequisite: course 210.
212. Readings in Middle English Literature. (3) II. Mr. Matthews, Miss Ridley
Prerequisite: course 210.
213. The Development of Modern English. (3) I. Mr. Bower, Mr. Matthews, Mr. Stockwell
Prerequisite: course 212.
221. Medievalism. (3) II. Mr. Matthews, Miss Ridley
222. The Renaissance. (3) I, II. Mr. Dick, Mr. Jorgensen
- 223A. Jacobean and Caroline Literature. (3) II. Mr. Miner, Mr. Swedenberg

Restricted to those who have passed Part I of the qualifying examinations for the doctor's degree.

299. Research on Dissertation. (1-6) I, II.

The Staff

Restricted to those who have passed Part II of the qualifying examinations for the doctor's degree.

Professional Course in Method**370. The Teaching of English. (3) I, II.**

Mr. Hartung

Required of candidates for the general secondary credential with the field major in English and speech.

COURSES IN ENGLISH AS A SECOND LANGUAGE

Course 33A and 33B are only for students whose first language was other than English and are not open to those who have received a satisfactory grade in English 1A at the University of California. Permission to enroll in 33A and 33B is given on the basis of the entrance examination which students whose native language is not English must take instead of the Subject A

* Not to be given, 1963-1964.

examination (see page 42 of this bulletin). Depending on the result of this examination, entering students are: (1) required to spend a semester studying elementary English; (2) required to take 33A followed by 33B; (3) required to take 33B; or (4) credited as having met the Subject A requirement.

Certificate in the Teaching of English as a Second Language

To qualify for this certificate students must meet the following requirements: (1) Both students educated in the United States and in foreign countries must have an educational background sufficient to qualify them as teachers in their home state or country, and will normally be admitted to the University as graduate students. With the approval of the Dean of the Graduate Division and the Chairman of the Department of English, graduate admission may be granted to bona fide foreign students solely for the purpose of pursuing the courses leading to this certificate, provided they meet graduate admission requirements. Students who do not meet these requirements may, upon recommendation of the Chairman of the Department of English, be admitted to limited status to pursue the course leading to the certificate. (2) All students must complete a 24-unit program of graduate work. Courses to be completed in the first semester are Speech 103K, Linguistics 170, English 370K, 3 units of nondepartmental elective (Education 110A-110B, 119; Folklore 106; History 177; Political Science 113). Depending upon the results of the University's entrance examination for foreign students, nonnative speakers may be required to take English 33B in lieu of this elective. Courses to be completed in the second semester are English 106K, English 111, English 250K, 3 units from English 118, 132, 133, 135, or 201. (3) Certificate candidates in graduate status must maintain a grade average equivalent to that required of candidates for a University-recommended general secondary teaching credential.

Special Language Requirements for Native Speakers of English.—Students whose mother tongue is English will not be held for the 6 units of electives. Instead they will be required to devote those 6 units to acquiring or perfecting their knowledge of the native language of the pupils to whom they expect to teach English. Courses which deal with the linguistic structure of the language in question should be chosen wherever possible, and such courses must be taken after the work leading to the certificate is begun. In case there is doubt as to which foreign language will be most appropriate, a non-Indo-European language should be chosen.

English 33A. Intermediate English for Foreign Students. (4) I, II.

Mrs. Miller

Intensive drill in pronunciation, structural patterns, vocabulary, conversation, and composition. Meets five hours weekly.

English 33B. Intermediate English for Foreign Students. (4) I, II.

Continuation of course 33A. Meets five hours weekly.

Mrs. Miller

Speech 103J. Phonetics for Foreign Students. (3) I.

Prerequisite: course 33B or the equivalent.

A detailed and systematic study of the sounds of American English and the way in which they are put together in connected speech, applied to the improvement of the student's own accent. Language laboratory.

103K. Phonetics for Teachers of English as a Second Language. (3) I.

Prerequisite: consent of the instructor.

Mr. Ladefoged, Miss McIntosh

Analysis of the phonological structure of contemporary English, with attention to the differences between British and American speech. Laboratory drill directed toward individual needs. Apprenticeship for native speakers of English.

English 106J. Advanced Composition for Foreign Students. (3) II. ———

Prerequisite: course 33B or the equivalent.

Exercise in writing based on literature dealing with American life and thought, with the aim of developing control of idiomatic expression.

106K. Advanced Composition for Teachers of English as a Second Language. (3) II.

Prerequisite: consent of the instructor.

Mr. Bowen, Miss McIntosh

Survey of English grammar as related to classroom instruction. Compositions based on the contrastive analysis of American and other cultures. Apprenticeship for native speakers of English.

250K. Contrastive Analysis of English and Other Languages. (3) II.

(Former number 370L.)

Miss McIntosh, Mr. Prator

Prerequisites: Linguistics 170, English 370K.

Seminar in the theory and techniques in contrasting the phonological, grammatical, and lexical structures of English with those of other languages.

English 370K. The Teaching of English as a Second Language. (3) I.

Miss McIntosh, Mr. Prator

Prerequisite: an educational background sufficient to qualify the student as a teacher in his home country or in the United States.

Bibliography, survey, and evaluation of methods and materials; the nature of language learning; analysis of the differences between two languages as the basis of instruction. Observation of classes.

SPEECH

Students must have passed Subject A (either examination or course) before taking any course in speech. See page 42.

Preparation for the Major.—Speech 1, 2, 3, 4, with an average grade of C or higher; English 1A–1B, 46A–46B; Psychology 1A, 1B.

The Major.—Plan I. For the general undergraduate: the program must include (a) Speech 111 or 112A, or 112B; 134, or 135, or 137; 6 units from 106, 107, 109, 110; (b) 12 units of electives in upper division courses in speech; (c) 6 units of electives in upper division courses in each of two of the departments of Anthropology and Sociology, Economics, English, Education (100A–100B, 110A–110B), History, Philosophy, Political Science, Psychology, Theater Arts (118A–118B, 119, 130, 445, 473), the courses to be approved by the departmental adviser.

Plan II.—The major in speech (with English) for the student taking the general secondary credential.

- (a) The completion of the following: (1) Speech 1, 2, 3, 4; (2) English 1A–1B, 46A–46B, English 31 or 106L, English 117J; (3) 3 units from English 131, 132, 133, or 190A–190B; (4) Speech 140; (5) Theater Arts 103; (6) 12 or 13 units selected, in consultation with the departmental adviser, to complete a 24-unit upper division major, including 6 units from 106 (or 107), 109 (or 110), 111 (or 112A or 112B); 6 or 7 additional units of electives in upper division speech courses.

(b) The attainment of a satisfactory level of skill in oral reading and public speaking.

(c) The following courses, ordinarily to be taken in graduate year, complete the speech requirements for the general secondary credential: Speech 370; 6 units from graduate courses in two major areas of speech.

The minor in speech (with English) for the general secondary credential will consist of the following courses: (1) Speech 1, 2, 3, 4; (2) English 1A-1B; (3) 6 units in speech from one of the following sequences: (a) 106, 107, 109, 110, (b) 111, 112A, 112B, (c) 103, 140, 142A, 142B; (4) Speech 370.

For the field major and the field minor in English (with speech), see page 305.

Requirement for the Credential to Teach Exceptional Children: Speech Correction and Lipreading

1. For general requirements, see the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

2. Specific course requirements:

(a) The general area of preparation (12 units): Education 116 or Psychology 161; Education 118 or 216A; Speech 140, Education 328SC.

(b) Area of specialization—Speech correction and lipreading (15 units): Psychology 162; Speech 103, 142A-142B, 145, 146.

Requirements for Admission to Graduate Courses

A bachelor's degree with a major consisting of at least 24 upper division units in speech or speech and English or speech and drama. (No graduate student may take a graduate course in speech who has to his credit fewer than 12 upper division units in speech.) This requirement is prerequisite to the 24 units demanded for the master's degree. If the candidate is deficient in this prerequisite, he must fulfill it by work undertaken as a graduate student.

Requirements for the General Secondary Credential

Consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

Requirement for the Master's Degree

1. For the general requirements see page 162. The department follows Plan II as described on page 164. The Master's Comprehensive Examination is given toward the end of each semester.

2. Departmental requirements: (a) Students are required to take the reading test in French or German in the first year of residence. (b) During the first semester of residence, students must pass a speech proficiency examination in public speaking and oral reading. (c) They must complete the requirements under Plan II as follows: Speech 200; 12 units of graduate courses in speech, including 3 units of Speech 290, selected from two speech fields (interpretation, public address, speech correction); 9 units of upper division or graduate courses to complete a 24-unit program (6 of these may be in related courses in other departments selected with the approval of the graduate adviser). (d) They must pass a comprehensive final examination consisting of three written tests, as follows: (1) one examination in general speech; (2)

examination in a major speech area (public address, interpretation, speech correction); and (3) one examination in a minor speech area. Specific information about these examinations may be secured from departmental advisers.

Requirements for the Doctor's Degree

1. For general requirements, see page 165.

2. Departmental requirements: (a) On entering the department the student will present to the Graduate Committee a written statement of his preparation in French and German. He must take the reading test in one of the languages not later than the first semester of residence, and the test in the other foreign language not later than the third semester of residence. No student will be permitted to take Part II of the Qualifying Examination until the language requirements have been met. (b) During the first semester of residence, the candidate must demonstrate proficiency in public speaking and oral reading (see M.A. requirements above). (c) The Qualifying Examination for the Ph.D. will be given in two parts, each of which consists of oral and written sections. Part I is normally taken after one year of graduate work and Part II at the end of a second year. The written portion of Part I is the same as the comprehensive examination for the master's degree, and students receiving that degree from this University will have completed this requirement. Students transferring here with a master's degree in speech will normally take this written examination at the end of the first semester of residence. Those who show promise of superior scholarship in the written examination will be given a two-hour oral examination by a departmental committee. If they do well in this, they will be encouraged to proceed with further graduate study. (d) In the year following successful completion of Part I of the Qualifying Examination, the candidate will take additional courses in his fields of major and minor interests in speech, and such courses in other departments as are necessary in preparation for writing his dissertation, after which he will take Part II of the Qualifying Examination and be advanced to candidacy. Of course, this period may be curtailed or extended according to circumstances. Part II will consist of two three-hour written examinations in the major speech area and one three-hour written examination in the minor area. It will also include a two-hour oral examination, before an interdepartmental committee, in the candidate's special field and such areas as are chosen in consultation with the adviser. (e) A final year (which under the University rules may not be curtailed) will normally be devoted by the candidate chiefly to the preparation of his dissertation, after which he will take his final oral examination. During this year the candidate may satisfy the residence requirement either by taking additional seminars or by registering in Speech 299.

If a student has allowed seven years or more to elapse since taking a course or examination to meet the requirements for a graduate degree, it will be necessary to have such course or examination validated by the department before he can proceed toward completion of the requirements.

Lower Division Courses

1. Introduction to Speech. (3) I, II.

The Staff

The basic principles and practices of effective oral communication in platform speaking, group discussion, and oral reading.

- 2. Elements of Public Speaking.** (3) I, II. The Staff
 Prerequisite: course 1.
 The principles of effective speech composition in public address.
- 3. Basic Voice Training.** (2) I, II. The Staff
 Lecture and discussion, 3 hours. Prerequisite: course 1.
 Voice physiology, phonetics, and voice drills.
- 4. Elementary Interpretation.** (3) I, II. The Staff
 Prerequisite: course 1.
 Principles and methods of the oral communication of prose and poetry with understanding and appreciation.

Upper Division Courses

- 103. Phonetics.** (3) II. Mr. Hargis
 Prerequisite: consent of the instructor.
 A study of the physical production and acoustic characteristics of the sounds of American English; modifications of the sounds in connected speech; extensive practice in phonetic recording of general American speech and its deviate forms.
- 104. Phonology of English.** (3) II. Mr. Ladefoged
 Prerequisite: course 103 (Phonetics) or consent of instructor.
- 106. Principles and Types of Public Discussion.** (3) I, II. Mr. Andersen
 Prerequisite: course 2 or consent of the instructor.
 Analysis of the purposes, principles, and types of public discussion. Practice in organizing group discussion.
- 107. Principles of Argumentation.** (3) I, II. Mr. Lewis
 Prerequisite: course 2 or consent of the instructor.
 Analysis of propositions, tests of evidence, briefing. Study of hindrances to clear thinking, ambiguity of terms, or prejudices. The critical analysis of selected argumentative speeches.
- 109. Principles of Audience Analysis.** (3) I, II. Mr. Lewis, Mr. Lomas
 (Formerly numbered 110A.)
 Prerequisite: course 2 or the equivalent.
 Theory of audience analysis and adaptation. Preparation and delivery of the occasional speech.
- 110. Analysis of Style in Speech Composition.** (3) II. Mr. Lewis, Mr. Lomas
 (Formerly numbered 110B.)
 Prerequisite: course 2 or the equivalent.
 Development of speaking style through critical study of selected speeches and the preparation of special forms of public address.
- 111. Theories and Techniques of Interpretation.** (3) I, II. Mr. Hargis, Mr. Vandraegen
 (Formerly numbered 111A.)
 Prerequisite: course 4 or the equivalent.
 A study of the schools, principles, and techniques of oral interpretation.
- 112A-112B. Oral Interpretation of Literature.** (3-3) Yr. Mr. Hargis, Mr. Vandraegen
 (Formerly numbered 111B.)
 Prerequisite: course 4 or equivalent.
 A study of the literary, aesthetic, and oral bases for the analysis and communication of prose and poetry.
- 122. Scientific Bases of Speech.** (3) I. _____
 Prerequisite: course 3.
 An introduction to the development of speech, and to its physical, anatomical, and physiological bases.
- *134. Classical Public Address.** (3) I. Mr. Lewis, Mr. Lomas
 A critical study of speeches by leading Greek and Roman orators.

* Not to be given, 1963-1964.

- 135. British Public Address. (3) I.** Mr. Lomas
Critical study of speeches by leading British orators from the eighteenth century to the present time. Relationship of speakers to issues and social movements of their day.
- 137. American Public Address. (3) II.** Mr. Lomas, Mr. Richardson
Critical study of speeches by leading American orators from the colonial period to the present time. Relationships of speakers to issues and social movements of their day.
- 140. Principles of Speech Correction. (3) I, II.** Mrs. Hahn
Types and causations of speech disorders, the developmental and communicative approach to correction with emphasis on defects of articulation and voice; observation of Speech Clinic (Articulation Division) required.
- 142A. Methods of Speech Correction. (2) I, II.** Mrs. Hahn
One hour lecture, 3 hours laboratory. Prerequisite: Speech 140.
Study of literature of speech correction and practice in the Speech Clinic (Articulation).
Observation of methods in the Speech Clinic of the Psychological Clinic.
- 142B. Methods of Speech Correction. (2) I, II.** _____
Prerequisite: Speech 142A and Psychology 162.
Observation and discussion of cases, study of research data, practice in the Speech Clinic (Articulation Division).
- 145. Introduction to Audiology. (3) I.** _____
Prerequisite: Speech 1, 3.
- 146. Principles of Aural Rehabilitation. (3) II.** _____
Prerequisite: Speech 145.
History and methods of improving the speech of the hard of hearing, including the principles and practice of audiometry and lipreading.
- 190A-190B. Forensics. (1-1) Yr.** Mr. Lewis, Mr. Murray
Prerequisite: consent of the instructor. May be repeated once for credit.
- 199. Special Studies. (1-3) I, II.** The Staff
Prerequisite: senior standing and consent of instructor.

Graduate Courses

- 204. The Development of Speech in the Child. (3) I.** Mrs. Hahn
- *206. Backgrounds and Theories of Discussion. (3) I.** Mr. Andersen
- 207. Forms and Methods of Argumentation. (3) I.** Mr. Lewis
- 211A, B. Backgrounds and Theories of Oral Interpretation.**
- *211A. From Quintilian to Rush. (3) I.** Mr. Vandraegen
- 211B. From Rush to the Present. (3) I.** Mr. Hargis
- 234A, B. Rhetorical Theory.**
- 234A. Classical Theory. (3) I.** _____
- *234B. Modern Theory. (3) I.** Mr. Phelps
- 240A, B. Organic Speech Disorders.**
- 240A. Voice Defects and Cleft Palate. (3) II.** Mrs. Hahn
- *240B. Cerebral Palsy and Aphasia. (3) I.** _____
- 250A, B. Seminar in Oral Interpretation.**
- *250A. Theory. (3) II.** Mr. Hargis
- 250B. Analysis of Materials. (3) II.** Mr. Vandraegen

260A. B. Seminar in the Criticism of Public Address.

*260A. Historical and Social Settings. (3) II. Mr. Richardson

260B. Rhetorical Criticism. (3) II. Mr. Lomas

*266. Seminar in Critical Analysis of Discussion. (3) II. Mr. Andersen

267. Seminar in Critical Analysis of Argumentation. (3) II. Mr. Lewis

270A. B. Seminar in Speech Correction.

*270A. Speech Correction. (3) II. _____

270B. Speech Therapy. (3) II. Mrs. Hahn

*275. Seminar in Audiology. (3) II. _____

280. Seminar in Experimental Phonetics. (3) II. Mr. Ladefoged

290. Individual Directed Research. (3) I, II. The Staff

297. Directed Studies. (1-4) I, II. The Staff

Restricted to those who have passed Part I of the qualifying examinations for the doctor's degree.

299. Research on Dissertation. (1-6) I, II. The Staff

Restricted to those who have passed Part II of the qualifying examinations for the doctor's degree.

Professional Course in Methods

370. The Teaching of Speech. (3) I, II. Mr. Phelps

Required of candidates for the general secondary credential with the field major in speech and English.

ENTOMOLOGY

(Department Office, 297 Kinsey Hall)

Walter Ebeling, Ph.D., *Professor of Entomology (Vice-Chairman of the Department).*

I. Barry Tarshis, Ph.D., *Assistant Professor of Entomology.*

For other courses in entomology, see under Zoology.

Completion of the curriculum requires residence during the last two years on the Berkeley or Davis campus. See the PROSPECTUS OF THE COLLEGE OF AGRICULTURE and consult the appropriate adviser for students in agriculture.

Upper Division Course

199. Special Studies. (2-4) I, II. The Staff

Prerequisite: senior standing and consent of the instructor.

Graduate Course

283A-283B. Research in Entomology. (2-6; 2-6) Yr. The Staff

* Not to be given, 1963-1964.

FLORICULTURE AND ORNAMENTAL HORTICULTURE

(Department Office, 393 Kinsey Hall)

B. Lennart Johnson, Ph.D., *Professor of Ornamental Horticulture.*

Vernon T. Stoutemyer, Ph.D., *Professor of Ornamental Horticulture and Assistant Director of the Botanical Garden (Chairman of the Department).*

Anton M. Kofranek, Ph.D., *Associate Professor of Floriculture.*

Harry C. Kohl, Jr., Ph.D., *Associate Professor of Floriculture.*

Victor B. Youngner, Ph.D., *Associate Professor of Ornamental Horticulture.*

Wesley P. Hackett, Ph.D., *Assistant Professor of Ornamental Horticulture.*

Preparation for the Major.—Required courses, or the equivalent: Chemistry 1A, 1B, 8; Botany 1, 107; Irrigation and Soil Science 101. Recommended: Botany 3, 104, 151; Zoology 150.

The Major.—Minimum of 12 units of upper division courses in the major, including courses 131, 136B, and two courses from the following: 110, 121, 131, 136A, 146A or 146B.

Graduate Study.—Graduate work in Floriculture and Ornamental Horticulture is offered as Plant Science. See page 500 for description.

Upper Division Courses

110. Plant Propagation. (3) II.

Mr. Hackett

Lecture, one hour; laboratory, six hours. Prerequisite: Botany 1 or the equivalent. Recommended: Botany 6 and 107 (may be taken concurrently).

Principles and practices in plant propagation.

121. Taxonomy, Ecology and Physiology of Turfgrass. (3) II.

Mr. Youngner

Lecture, two hours; laboratory, three hours. Prerequisite: Botany 1 or the equivalent. Offered in spring 1964 and alternate years.

Taxonomy, identification, adaptation, and breeding of turfgrasses and ground covers. Ecological relationships of grasses and other components of the turfgrass community. Basic principles underlying turfgrass cultural practices, including soil management, nutrition, and water relations.

131. Taxonomic Classification and Ecology of Ornamental Plants. (3) I.

Mr. Stoutemyer

Lecture, two hours; laboratory, three hours; several field trips. Prerequisite: Botany 1 or consent of the instructor.

The botanical classification, relationships, and identification of the more important ornamental plants in southern California, with special emphasis on their environmental requirements and adaptations.

136A-136B. General Floriculture. (4-4) Yr.

Mr. Kofranek, Mr. Kohl

Lecture, three hours; laboratory, three hours; several field trips. Prerequisite: Botany 107 or the equivalent. 136A is not a prerequisite to 136B.

The basic practices and principles of floricultural crop production from a commercial standpoint, including photoperiod, temperature, nutrition, and water relations, with special reference to the more important crops grown in California.

*146A. Plant Breeding. (3) I.

Lecture, two hours; laboratory, three hours. Prerequisite: Botany 140 or the equivalent, and consent of the instructor. Offered in fall 1964 and alternate years.

Application of cytogenetics to the problems and methods of plant breeding, including studies of interspecific hybridization, sterility phenomena, inbreeding acceleration, gene transfer, chromosomal aberrations, and special linkage problems.

* Not to be given, 1963-1964.

***146B. Plant Breeding. (3) II.**

Mr. Johnson

Lecture, two hours; laboratory, three hours. Prerequisite: botany 140 or the equivalent. Offered in spring, 1965, and alternate years.

Application of biometrical genetics to the problems and methods of plant breeding, including studies of linkage, inbreeding and heterosis, quantitative inheritance, selection in populations, backcrossing and hybridization.

148. Design and Analysis of Experiments. (3) II.

Mr. Johnson

Lecture, two hours; laboratory, three hours. Prerequisite: Statistics I or the equivalent. Offered in spring, 1964, and alternate years.

Principles of experimental design, including tests of significance, analysis of variance and covariance; types of designs, including randomized blocks, Latin squares, factorial and other designs.

199. Special Studies. (2-4) I, II.

The Staff

Prerequisite: senior standing and consent of the instructor.

Graduate Courses**260A-260B. Seminar in Floriculture. (2-2) Yr.**

The Staff

286A-286B. Research in Ornamental Horticulture. (2-6; 2-6) Yr.

The Staff

✱ FOLKLORE AND MYTHOLOGY GROUP

Wayland D. Hand, Ph.D., *Professor of German and Folklore and Director, Center for the Study of Comparative Folklore and Mythology.*

Jaen Puhvel, Ph.D., *Associate Professor of Classics and Indo-European Linguistics.*

D. K. Wilgus, Ph.D., *Associate Professor of English and Anglo-American Folk Song.*

Ralph C. Altman, *Lecturer in Art.*

James Richard Andrews, Ph.D., *Associate Professor of Spanish.*

Samuel G. Armistead, Ph.D., *Assistant Professor of Spanish.*

Pedro Carrasco, Ph.D., *Associate Professor of Anthropology.*

John A. Crow, Ph.D., *Professor of Spanish.*

Alma Hawkins, Ed.D., *Associate Professor of Dance.*

Melvyn Helstien, M.F.A., Ph.D., *Assistant Professor of Theater Arts.*

John T. Hitchcock, Ph.D., *Assistant Professor of Anthropology.*

Mantle Hood, Ph.D., *Professor of Music.*

Claude E. Jones, Ph.D., *Associate Professor of English.*

Boris A. Kremenliev, Ph.D., *Professor of Music.*

William A. Lessa, Ph.D., *Professor of Anthropology.*

Vladimir Markov, Ph.D., *Associate Professor of Slavic Languages.*

William Matthews, Ph.D., *Professor of English.*

David Morton, M.A., *Associate in Music.*

Phillip Newman, Ph.D., *Assistant Professor of Anthropology.*

Laurence A. Petran, Ph.D., *Professor of Music.*

Stanley L. Robe, Ph.D., *Associate Professor of Spanish.*

Richard C. Rudolph, Ph.D., *Professor of Oriental Languages.*

Frances Clark Sayers, *Lecturer in English.*

* Not to be given, 1963-1964.

- Carol J. Scothorn, M.A., *Associate Supervisor of Physical Education.*
 Charles Seeger, A.B., *Research Associate in Music (Ethnomusicology and Folk Music).*
 Eli Sobel, Ph.D., *Professor of German.*
 Charles Speroni, Ph.D., *Professor of Italian.*
 Walter Starkie, M.A., Litt.D., *Visiting Professor.*
 Annmarie Steinbiss, M.S., *Associate in Physical Education.*
 Erik Wahlgren, Ph.D., *Professor of Scandinavian Languages.*
 Johannes Wilbert, Ph.D., *Associate Professor of Anthropology.*
 Marion Albert Zeitlin, Ph.D., *Professor of Spanish.*
 ———, *Visiting Assistant Professor of Finno-Ugric Studies.*

Letters and Science List.—All undergraduate courses in folklore and all related courses in anthropology, art, English, German, Italian, music, and Spanish.

Although no major in folklore is offered, a wide variety of course work is available in the three following general areas: (1) languages and literatures (English and foreign languages); (2) Social Sciences (anthropology, history, sociology); (3) folk arts (art, music, physical education, theater arts). Students with undergraduate preparation in folklore may continue their work on the graduate level. For the planning of course work, students should consult departmental advisers and Mr. Hand.

Through its member departments the Folklore Group also offers a variety of course work leading to M.A. and Ph.D. degrees. Financial aid and research opportunities are available to qualified graduate students in the form of fellowships, research assistantships, and collecting stipendia, administered by the Center for the Study of Comparative Folklore and Mythology. For further information, students should consult the Director of the Center, Mr. Hand.

Upper Division Courses

101. Introduction to Folklore. (3) I.

Mr. Hand

Prerequisite: junior standing. A reading knowledge of a foreign language is desirable, but not prerequisite to the course.

The various fields of folklore, their literature, and problems.

105. American Folklore. (3) II.

Mr. Wilgus

Prerequisite: junior standing.

A survey of American folklore with illustrative materials from all genres (folk songs, folk tales, legends, superstitions, proverbs, folk speech).

106. American Folk Song. (3) I.

Mr. Wilgus

Prerequisite: junior standing.

A survey of American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

111. Gypsy Folklore. (2) I.

Mr. Starkie

Prerequisite: junior standing.

A survey of Gypsy folklore, with attention to the special role of the Romany peoples as transmitters of folklore over wide geographical continua.

190. Research Methods and Bibliography. (2) I.

Mr. Hand

Lecture, one hour; laboratory, two hours. Prerequisite: Folklore 101, and any one of the following courses: Folklore 105, 106, Anthropology 102, 124, English 115, 118, German 102, Italian 105, Music 136A or 136B, Spanish 149.

The bibliography and methods of folkloristic research, including classification and archiving.

191. Field Collecting. (2) II.

Mr. Wilgus

Lecture, one hour; laboratory, two hours. Prerequisite: Folklore 105, and any one of the following courses: Folklore 101, 106, 190, Anthropology 102, 124, English 115, 118, German 102, Italian 105, Music 136A or 136B, Spanish 149, 151.

The techniques of folklore collecting, including the use of apparatus and the transcription of materials. Field experience will be gained on collecting trips.

199. Special Studies in Folklore. (1-3) I, II.

The Staff

Prerequisite: senior standing and consent of the instructor.

Graduate Courses***245. The Folk Tale. (2) I.**

Mr. Hand

Prerequisite: course 101, or any one of the following courses: Folklore 105, Anthropology 102, 124, English 115, German 102, Italian 105, Music 136A or 136B.

251. Finno-Ugric Folklore and Mythology. (3) II.**259. Seminar in Folklore. (3) II.**

Mr. Hand, Mr. Wilgus

Prerequisite: graduate standing and consent of the instructor.

298A-298B. Special Studies in Folklore. (1-5; 1-5) Yr.

The Staff

RELATED COURSES IN OTHER DEPARTMENTS**Upper Division Courses****Anthropology 102. Ethnology. (3) I, II.**

Letters and Science List.—All undergraduate courses in French except 310, 370, and 372 are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Required: courses 1, 2, 3, and 4 (or 25), or their equivalents.

The Major.—Two majors are offered by the department.

Plan A: leading to the Bachelor of Arts in French and subsequently to the Master's Degree, Plan A, or to the General Secondary Credential. Required: at least 28 units of upper division French, including 101A-101B, 109A-109B, 107A, 130A-130B, 134A-134B, and at least 4 additional units in French literature.

¹ In residence fall semester only, 1963-1964.

* Recalled to active service.

Plan B: with emphasis on literature, leading to the Bachelor of Arts in French and subsequently to the Master's Degree, Plan B. Required: at least 28 units of upper division French, including 101A-101B, 109A-109B, 130A-130B, and at least 12 additional units in French literature. With the specific permission of the department 4 units of the 28 may be satisfied by appropriate upper division courses in History, Philosophy, or the literature and linguistics of another language.

Students who fail to maintain a C average or better in all work undertaken in upper division courses in the Department of French will, upon approval of the Dean of the College of Letters and Science, be excluded from the Major in French.

Students intending to major in French must consult the appropriate major adviser before registering for French courses in the upper division.

Major Advisers: Mr. Miller (Plan A), Mr. Thielemann or Mr. Oxenhandler (Plan B).

The Honors Program in French.—Majors with a 3.5 grade-point average in French and a 3.0 overall average will be eligible to apply for the Honors Program in French. Students will be informed of their eligibility near the end of their junior year and should make application at that time if they wish to enter the program. Applications should include: 1) a letter in French describing the student's field of interest in French literature and culture; 2) the student's final examination in French 101A or 109A or a term paper from another French course. If these materials meet with the Committee's approval, the student will be called for an interview. Students admitted to the program will enroll in the Honor section of French 130A-130B and in French 140A-140B. During 140A students will select topics for the Senior Essay. The second semester (140B) will be devoted to the writing of the essay under the tutorial guidance of the instructor. No regular class meetings will be scheduled for 140B.

Requirements for the General Secondary Teaching Credential

Consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION. At the discretion of the department an examination will be given preparatory to recommendation for the certificate of completion for the general secondary teaching credential. Should the department direct that this examination be given, it will be held on the first Thursday after January 1 and the third Thursday in May, and it must be passed before the department will recommend that the student take his practice teaching.

Requirements for the Master's Degree

I. The department offers two alternative programs: Plan A designed for teachers of French at the secondary and junior college levels, and Plan B leading to the Ph.D. in French or in Romance Languages.

II. Departmental requirements:

(1) *Language requirements:* a) for all candidates for the M.A. in French, the foreign language requirement will be fulfilled by passing the University reading test in one of the following languages: German, Spanish, Italian, or Latin. In special cases, substitution of another foreign language will be accepted, if approved by the chairman of the department. Students are required to pass the reading test in one of the foreign languages before the end of the

second semester of residence. All candidates for the M.A. must satisfy the department as to their proficiency in spoken French.

(2) Course requirements:

Plan A: At least 24 units in French, including the following courses: 131A-131B, 149, 220, and 230. To meet the general University requirements, at least 12 units must be in graduate courses.

The comprehensive examination will consist of a written examination in three out of five fields (16th-20th century), a sight translation from English to French (from French to English in the case of students whose native language is French), a literary composition in French (in the modern field only) of not less than two hours, an *explication de texte* and an oral examination in French covering a topic previously prepared by the candidate. At the discretion of the department a candidate may be permitted to take this examination a second time; but under no circumstances is a third trial allowed.

Plan B: At least 24 units in French, including the following courses: 131A-131B, 149, 220, and 230. To meet the general requirements, at least 12 units must be in graduate courses.

The comprehensive examination for Plan B will consist of a written examination in three out of six fields (medieval-twentieth century), each two hours long, an *explication de texte*, and an hour oral examination on the three fields. Passing this examination will be equivalent to passing Part I of the qualifying examination. At the discretion of the department a candidate may be permitted to take this examination a second time; but under no circumstances is a third trial allowed.

Requirements for the Ph.D. Degree in French

Departmental requirements:

1. **Language requirements:** a) Students must pass a reading examination in German, Latin, and either Italian or Spanish. In special cases, substitution of another foreign language will be accepted, if approved by the chairman of the department. At least one of these examinations must be passed prior to taking the Qualifying Examination Part I. b) All candidates for the Ph.D. must satisfy the department as to their proficiency in spoken French.

2. **Required courses:** 131A-131B; 149; 201; 202; 220; 230; 235 (unless previously completed). In addition the student will take such required courses as his guidance committee will prescribe in preparation for the Qualifying Examination, Part II. These courses shall include at least 4 seminars, two of which must be in the candidate's chosen area.

In the case of students who already have the *Licence ès Lettres* or the M.A., the work taken will be evaluated by the department, and appropriate credit given toward the course and examination requirements. All students will, however, take Part I of the Qualifying Examination, which in this case will serve as a guidance examination for the use of the department.

3. Part I of the Qualifying Examination will consist of a written examination in 3 out of 6 fields (medieval-twentieth century), each two hours long, an *explication de texte*, and an hour oral examination. If the student does well on these examinations, he will be encouraged to proceed further with graduate study toward either the Ph.D. in French or Romance Languages. The passing grade for Part I is an average grade of B (3.0).

4. After completion of the language requirements and the required courses, the student will take Part II of the written and oral qualifying examinations and, if successful, will be advanced to candidacy. Part II will consist of:

A. Four written examinations: a five-hour examination in the candidate's chosen area to consist of a three-hour essay question and a two-hour question on literary history; three four-hour examinations in the other areas, each consisting of a two-hour essay question and a two-hour question on literary history. For the purpose of this examination, the four areas will be defined as follows:

- I. Medieval.
- II. Renaissance and Baroque.
- III. Classicism and the Enlightenment.
- IV. Modern.

B. An oral examination of two hours' duration bearing on the four areas. The passing grade for Part II is an average grade of B (3.0).

5. After completion of the dissertation, the candidate will take an oral examination in its defense. The thesis subject and outline should be approved by the student's doctoral committee no later than October 1 of the year in which it is to be submitted.

6. If seven years have elapsed since any of the requirements have been taken, these requirements must be revalidated by the department. Inquire at departmental office for further clarification.

Requirements for the Ph.D. Degree in Romance Languages and Literature
See page 543 of this bulletin.

Lower Division Courses

The ordinary prerequisites for each of the lower division courses are listed under the description of these courses. Students who have had special advantages in preparation may, upon examination or by recommendation of the instructor, be permitted a more advanced program.

1. Elementary French. (4) I, II.

Mrs. Lenard in charge

Sections meet five hours weekly.

1G. Elementary French for Graduate Students. (No credit) I, II.

Mr. Miller in charge

2. Elementary French. (4) I, II.

Mrs. Lenard in charge

Sections meet five hours weekly. Prerequisite: course 1 or two years of high school French.

3. Intermediate French. (4) II.

Mrs. Lenard in charge

Sections meet five hours weekly. Prerequisite: course 2 or three years of high school French.

4. Intermediate French. (4) I, II.

Mr. Decock in charge

Sections meet four hours weekly. Prerequisite: course 3 or four years of high school French.

8A-8B-8C-8D. French Conversation. (1-1-1-1) Beginning each semester.

Mrs. Hackstaff in charge

The class meets two hours weekly. Open only to students who have completed course 2 or its equivalent with grade A or B; or by permission of the department.

- 25. Advanced French. (4) I, II. Beginning each semester.** Mr. Miller
Course meets four hours weekly. Prerequisite: course 4 or the equivalent.

Upper Division Courses

The prerequisite to all upper division courses except those in translation is 16 units of lower division courses, including course 4 with a grade of B or higher or course 25 with a grade C or higher.

All upper division courses are conducted in French. Course 109A is prerequisite to all other upper division courses in literature.

- 101A-101B. Intensive Reading. Grammar and Composition. (3-3) Yr.**
Beginning each semester. Miss Hamel in charge

- 107A-107B. French Phonetics. (2-2) Yr. Beginning each semester.**
Prerequisite: consent of the instructor. Miss Korol, Miss Hamel
French pronunciation, diction, intonation in theory and practice; phonetic transcription, phonetic evolution of the modern language; remedial exercises; recordings.

- 109A-109B. Introduction to the Study of French Literature. (3-3) Yr.**
Beginning either semester. Mr. Bensimon, Mr. Thielemann
Open to majors in Romance languages, and others sufficiently prepared, with the consent of the instructor. Not open to students who have taken or are taking courses 109M, 109N.

- 112A-112B. The Nineteenth Century. (2-2) Yr. Mr. Seznec, Mr. Bensimon**
Main literary and intellectual trends from Romanticism to Naturalism through representative works of Chateaubriand, Stendhal, Hugo, Balzac, Baudelaire, Flaubert, Verlaine, Zola and others.

- 114A-114B. Contemporary French Literature. (2-2) Yr. Mr. Oxenhandler**
The French novel, poetry, and essay since 1885. Symbolism, Surrealism, Existentialism, as represented by Rimbaud, Mallarmé, Gide, Proust, Apollinaire, Valéry, Malraux, Sartre and others.

- 118A-118B. The Sixteenth Century. (2-2) Yr. Mr. Humiston**
Literature and thought in the sixteenth century as represented by Rabelais, Marot, Calvin, Marguerite de Navarre, the Pléiade, Montaigne, and others.

- 120A-120B. The Seventeenth Century. (2-2) Yr. Mr. Bensimon, Mr. Hubert**
A study of the development of Classicism through representative works of Corneille, Molière, Racine, Descartes, Pascal, and others.

- 121A-121B. The Eighteenth Century. (2-2) Yr. Mr. Crowley**
121A. Readings and discussions of the outstanding works of the literature and thought of the period (1680-1789), omitting Voltaire and Rousseau.
121B. Limited to study of Voltaire and Rousseau.

- *124. French Lyric Poetry from Villon to the Present. (3) II.** _____
A course in the history of French poetry: versification, imagery, changing themes and approaches to poetry through the ages.

- 130A-130B. Advanced Grammar and Composition. (2-2) Yr. Beginning either semester.**

Mr. Bensimon, Mr. Bonno, Mrs. Brichant, Mr. Decock, Miss Hamel
Prerequisite: course 101A-101B.
This course is required of all candidates for the Certificate of Completion of the teacher training curriculum. A special section of this course will be devoted to students in the Honors Program. It will place special emphasis on literary composition and *explication de textes*.

* Not to be given, 1963-1964.

- 131A-131B. Advanced Literary Composition.** (2-2) Yr. Mr. Hubert
Prerequisite: course 130A-130B or the equivalent.
A course in the writing of literary French. Advanced syntax, problems of style, creative translation.
- 134A. Survey of French Culture and Institutions.** (3) I. Mrs. Brichant
History of French Culture and Institutions up to 1815.
- 134B. Survey of French Culture and Institutions.** (3) II. Mrs. Brichant
History of French Culture and Institutions since 1815 with special emphasis on contemporary France.
- 135A-135B. Modern French Literature and Its Intellectual Background.**
(2-2) Yr. Mr. Pucciani
Intellectual background of French literature since the Renaissance (Humanism, Rationalism, Empiricism, Positivism, etc.). Study of the ideas which have informed French literary expression.
- 140A. Honors Course in French.** (2) I. Mr. Oxenhandler in charge
Prerequisite: senior standing in French with a 3.5 grade-point average in the major, a 3.0 overall average and consent of the departmental Honors Committee.
Intensive study of a special topic in French literature chosen from a list proposed by the instructor in charge. Readings, oral and written reports, discussion.
- 140B. Honors Course in French.** (2) II. Mr. Oxenhandler in charge
Prerequisite: course 140A.
Supervised preparation of an Honors Essay. The student will be expected to work individually, to consult with the instructor frequently, but there will be no regularly scheduled class meetings.
- 149. Introduction to the History of the French Language.** (3) I, II. Mr. Nichols
History of the French language. Basic linguistic concepts and terminology.
- 199. Special Studies in French.** (1-5) I, II. The Staff
Prerequisite: senior standing and consent of the instructor.

Courses in Which No Knowledge of French Is Required

(May not be taken for major or graduate credit)

- 109M-109N. Survey of French Literature.** (3-3) Yr. Mr. Barker
- 110A-110B. The Novel of the Nineteenth and Twentieth Centuries.** (2-2) Yr. Mr. Oxenhandler, Mr. Barker
- *122A-122B. Medieval Literature in English Translation.** (2-2) Yr.
A. Epic, Romance, history. Mr. Barker
B. Drama, lyric and allegorical poetry.

Graduate Courses

Concerning conditions for admission to graduate courses, see page 170 of this bulletin.

- 201. History of the French Language.** (2) II. Mr. Nichols
Prerequisite: course 149 and a reading knowledge of Latin.
Phonology, morphology, syntax and lexicography of the French language from its origin to the present.
- 202. Old French.** (3) II. Mr. Nichols
Grammar of medieval northern dialects; intensive reading and translation of representative texts.

* Not to be given, 1963-1964.

- *203A-203B. Old Provençal: Reading of Texts. (2-2) Yr. Mr. Nichols
Reading and translation of Old Provençal texts. Phonology and morphology of the language.
- *204A-204B. The Welsh Language. (3-3) Yr. _____
- *205. Contemporary French Linguistics. (2) II. _____
The major areas of current French linguistics; experimental phonetics; phonology, morphology; acoustic phonetics; semantics.
- 206A-206B. Survey of Medieval Literature. (3-3) Yr. Mr. Nichols
Prerequisite: French 202 or the equivalent.
Religious and profane literature of the Old French periods: Saints' lives, epics, romances, *fabliaux*, lyric poetry, drama.
- 208A-208B. The Sixteenth Century. (3-3) Yr. Mr. Humiston
The development of poetry; prose writers and dramatists; the early Baroque.
- 209A-209B. The Seventeenth Century. (3-3) Yr. Mr. Bonno, Mr. Hubert
Main currents and figures of the Classical period.
- 212A-212B. The Eighteenth Century. (3-3) Yr. Mr. Thielemann
Main currents and figures of eighteenth-century French literature.
- 213A-213B. The Nineteenth Century. (3-3) Yr. Mr. Nouty
Main currents and figures of the nineteenth century.
- 214A-214B. French Literature of the Twentieth Century. (3-3) Yr.
Main currents and figures of twentieth-century French literature. Mr. Pucciani
220. Explication de Textes. (2) I. Mr. Bonno
230. French Literary Criticism. (2) I. Mr. Oxenhandler
235. Methods of Literary Research. (2) II. Mr. Crowley
Prerequisite: The M.A. degree or its equivalent.

Seminars

- 250A-250B-250C. Studies in Medieval French Literature.
- *A. Narrative Literature. (2) I. Mr. Nichols
- *B. Didactic Literature. (2) II. Mr. Nichols
- *C. Lyric Poetry. (2) I. Mr. Nichols
- 251A-251B-251C-251D. Studies in the Renaissance.
- *A. Rabelais. (2) I. Mr. Humiston
- B. Montaigne. (2) I. Mr. Bensimon
- *C. Poetry. (2) I. Mr. Humiston
- *D. Drama. (2) II. Mr. Humiston
- 252A-252B-252C-252D. Studies in Classicism.
- *A. Classic Tragedy. (2) I. Mr. Hubert
- B. Classic Comedy. (2) I. Mr. Hubert
- *C. Classic Prose. (2) II. Mr. Bonno

* Not to be given, 1963-1964.

- *D. Poetry. (2) II.** Mr. Bonno
- 253A-253B-253C-253D-253E. Studies in the Enlightenment and Neo-classicism.**
- A. The Philosophes: Voltaire. (2) II.** Mr. Crowley
- *B. Eighteenth-Century Prose. (2) II.** Mr. Hubert
- *C. The Philosophes: Diderot. (2) II.** Mr. Thielemann
- *D. The Drama. (2) II.** Mr. Crowley
- *E. The Philosophes: Rousseau. (2) I.** Mr. Thielemann
- 254A-254B-254C-254D-254E. Studies in the Nineteenth Century.**
- A. Romantic Prose. (2) I.** Mr. Seznec
- *B. Romantic Poetry. (2) II.** Mr. Barker
- C. Realism and Naturalism. (2) I.** Mr. Nouty
- *D. Theater. (2) II.** Mr. Nouty
- *E. Symbolism. (2) II.** Mr. Hubert
- 255A-255B-255C-255D. Studies in Contemporary Literature.**
- A. The Novel. (2) I.** Mr. Pucciani
- *B. The Theater. (2) II.** Mr. Pucciani
- *C. Lyric Poetry. (2) II.** Mr. Oxenhandler
- D. Existentialism. (2) II.** Mr. Pucciani
- E. Religious Thought in Contemporary Literature. (2) I.** Mr. Oxenhandler

Special Studies

- 297. Directed Studies. (1-6) I, II.** The Staff
- 299. Research on Theses. (1-6) I, II.** The Staff

Professional Courses in Method

- 310. The Teaching of French in the Elementary School. (3) I, II.**
Prerequisite: consent of the instructor. Mrs. Lenard
A course intended to prepare elementary teachers to teach French in the grades.
- 370. The Teaching of French. (3) I, II.** Mr. Miller, Mrs. Lenard
Prerequisite: courses 101A-101B, 107A, 130A-130B. Required of all candidates for the Certificate of Completion in French; should be completed before practice teaching.
- *372. The Language Laboratory. (2) I, II.**
Prerequisite: consent of the instructor.
New electronic techniques for language instruction. Pedagogical and practical problems of making tapes, installing and organizing a laboratory; control procedures.

Related Courses in Another Department

- Latin 220. Vulgar Latin. (3) II.**
- Latin 225. Italian Dialects and Latin Historical Grammar. (3) I.** Mr. Puhvel
- Classics 178. Greek and Roman Mythology. (3) I.** Mr. Puhvel

* Not to be given, 1963-1964.

■ GENETICS

For courses in genetics, see under Departments of Bacteriology, Botany and Plant Biochemistry, and Zoology.

■ GEOGRAPHY

(Department Office, 55A Haines Hall)

- *Henry J. Bruman, Ph.D., *Professor of Geography*.
 Robert M. Glendinning, Ph.D., *Professor of Geography*.
 H. Louis Kostanick, Ph.D., *Professor of Geography*.
 Richard F. Logan, Ph.D., *Professor of Geography*.
 Clifford H. MacFadden, Ph.D., *Professor of Geography (Chairman of the Department)*.
 Joseph E. Spencer, Ph.D., *Professor of Geography*.
 Benjamin E. Thomas, Ph.D., *Professor of Geography*.
 Clifford M. Zierer, Ph.D., *Professor of Geography*.
 Ruth Emily Baugh, Ph.D., *Emeritus Professor of Geography*.
 George McCutchen McBride, Ph.D., *Emeritus Professor of Geography*.

 ———, *Assistant Professor of Geography*.

Letters and Science List.—All undergraduate courses in geography except 370 are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Geography 1, 2, 3, and 4 are required of all majors. In addition, Geology 2 or 101 is required of professional majors. Appropriate courses in anthropology, botany, economics, geology, history, political science, and the modern foreign languages are recommended for all majors.

Three general objectives may be recognized for those who select geography as a major. These are: (1) preparation for graduate study in the subject leading to advanced degrees and professional occupation as a geographer, (2) preparation for the student who wishes to gain a broad understanding of the world and its peoples, and (3) preparation for the student who desires to secure a teaching credential with a specialty in geography and the social sciences. Plans applicable to the three objectives are listed below.

The Major.—The minimum requirement for all majors is 30 units of upper division work in geography.

§ Sabbatical leave in residence, 1963–1964.

* In residence spring semester only, 1963–1964.

Plan I. For the student expecting to proceed to the M.A. or Ph.D. degree in geography the following courses are required: Group I—Geography 101, 105, 115, 175; Group II—two courses chosen from Geography 121, 122A, 122B, 123A, 123B, 124A, 124B, 125, 126, 127, 131; Group III—two courses chosen from Geography 141, 142, 155, 161, 165, 171, 173, 181, 199; Group IV—two courses chosen from Geography 106, 108, 113, 117, 118, 119.

Plan II. For the student desiring a less specialized program leading to a broad understanding of the world who is working for a teaching credential, the following courses are required: Group I—Geography 115 and 175; Group II—three courses chosen from Geography 121, 122A, 122B, 123A, 123B, 124A, 124B, 125, 126, 127, 131; Group III—three courses chosen from Geography 141, 142, 155, 171, 173, 181, 199; Group IV—two courses chosen from Geography 108, 113, 117, 118, 161.

Admission to Graduate Status

In order to gain admission to the graduate program in geography, the applicant must meet the following:

1. Have an A.B. or B.S. degree and completion of an undergraduate major totaling approximately 30 semester units of junior-senior year work in geography, distributed among topical, systematic, and regional courses.

2. Have a scholastic average of at least 3.0 ("B" average) in the major and at least 2.75 in total junior-senior work outside of geography. At the discretion of the department a student with slight scholastic or course deficiencies may be admitted in graduate status for a trial period, during which deficiencies must be made up.

3. The admission of every student to graduate status in geography must be approved by the chairman of the department, *in addition* to the general approval by the Graduate Division. Write directly to the Chairman, Department of Geography, for such approval, providing at least two letters of evaluation from previous instructors. Completed official applications for admission, supported by transcripts, must be filed *with the Graduate Division* prior to the final dates (July 15 for the fall semester, and December 1 for the spring semester). Students seeking teaching assistantships may secure applications from the Department of Geography, and must file them not later *than February 1*, supported by at least two recommendations and a photograph.

Requirements for the General Secondary Teaching Credential

Consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

Requirements for the Master's Degree

The general requirements of Graduate Division are listed in pages 162–165, and the specific requirements of the department of geography follow.

The M.A. degree may be obtained either by Plan I or Plan II; Plan I being the one normally required by the department.

Screening Examination.—Required under both Plan I and Plan II, this will be given by the candidate's informal guidance committee in the course of the first semester in residence, to assess the candidate's general competence in the field of geography up to the graduate level.

Foreign Language.—Required under both Plan I and Plan II is a reading knowledge of a modern foreign language, normally German, French, or Spanish, demonstrated by passing an examination conducted by the Graduate Division examiner.

Plan I, Thesis Plan.—(A) The course work in residence must consist of at least 20 units, including a minimum of 12 units in graduate courses designated by the department, including courses 250 (Growth of Geographic Thought); 275 (Advanced Field Problems in Local Geography, a six-week summer graduate field course); and 280 (Geographic Writing).

(B) Each student must present a thesis, based in whole or in part on original investigation, and preferably a field study. Selection of a thesis topic, conduct of the investigation, and final organization, proceeds initially under the supervision of an informal guidance committee (2 members of the department staff) and, later, under an official Graduate Division committee (2 members of the department staff, plus one member from another university department).

Plan II, Comprehensive Examination Plan.—(A) The work in residence must include course 250 (Growth of Geographic Thought) and at least 24 units of course work, including a minimum of 12 units in graduate courses.

(B) This examination normally is given in the final two-week period of the semester in which the candidate completes his work for the degree. It usually consists of two half-day written examinations covering the broad divisions of history of geography, systematic geography, regional geography, and functional applications of systematic geography. The examination is designed to test for broad grasp of subject, as well as the more specialized abilities of the candidate.

Requirements for the Doctor's Degree

General requirements of the Graduate Division are stated on pages 165 to 169. Specific requirements pertaining to geography follow.

A. An M.A. or M.S. Degree, with Geography Specialty.—The department believes strongly that students normally will find it to their advantage to have had the background and experience of the Master's degree before undertaking work toward the Ph.D. degree.

B. Preliminary Examinations.—(Preliminary examinations may consist of any number of oral or written examinations, at the discretion of the guidance committee. At the minimum, there shall be a written examination covering both general and specific aspects of the geographical field, as well as the student's particular fields of specialization. This examination also shall include a field problem in local geography. The examination, including the field problem, normally is spread over a three-day period and shall be given at a time designated by the guidance committee.)

C. Qualifying Examination.—The foreign language requirement must be met prior to taking the qualifying examination, which is an oral examination conducted by the candidate's official Ph.D. committee. This examination stresses particularly those segments of geography in which the candidate has specialized.

D. The Dissertation.—Each candidate is required to choose a dissertation topic, and to secure approval of the topic by the department, via his doctoral committee. A topic entailing field, as well as library study normally is required.

Lower Division Courses

1. Introduction to Geography: Physical Elements. (3) I, II.

Mr. Glendinning in charge

Lecture, two hours; laboratory-discussion, one hour. Students who have had course 5A or 100 will receive only half credit for course 1.

A study of the basic physical elements of geography (especially climate, landforms, soils, and natural vegetation), and their integrated patterns of world distribution.

2. Introduction to Geography: Cultural Elements. (3) I, II.

Mr. Spencer in charge

Lecture, three hours. Students who have had course 5B or 100 will receive only half credit for course 2.

A study of the basic cultural elements of geography (population distribution, general land-use patterns, and trade) and their correlation with the physical elements. Delimitation of the major geographic regions of the world.

3. Introduction to Climate and Weather. (3) I, II.

Mr. Bailey

Not open for credit to students who have credit for Meteorology 3.

A survey of the earth's atmospheric phenomena, with special reference to the causes and regional distribution of climate and weather.

4. Map Reading and Interpretation. (3) I, II.

Mr. Thrower in charge

Lecture, one hour; laboratory, three hours.

Interpretation of maps, charts, and aerial photographs; coverage and quality of world mapping; sources; properties of map projections; interpretation of symbols, terrain characteristics and settlement patterns on foreign and domestic maps.

*5A. Economic Geography. (3) I.

Mr. McKnight in charge

Not open to students who have credit for courses 1 and 2. Students who have credit for course 1 or 100 will receive only 1½ units of credit for course 5A.

A study of those physical and cultural elements of the environment essential to the geographic interpretation of economic activities, as developed through studies of agricultural productions of foodstuffs and industrial raw materials.

5B. Economic Geography. (3) II.

Mr. McKnight in charge

Prerequisite: course 1, or 5A, or 100. Students who have credit for course 2 will receive only half credit for course 5B.

The principles of economic geography as developed through studies of minerals and power production, trade, and industry.

Upper Division Courses

Prerequisite for all upper division courses: upper division standing, except as indicated below.

100. Principles of Geography. (3) I, II.

The Staff

Not open to those who have credit for courses 1 and 2 or 5A-5B; may not be counted on the major in geography.

A brief survey of the fundamental physical and cultural elements of geography and their integration on a world-wide regional basis.

* Not to be given, 1963-1964.

101. Fundamentals of Geographic Field Work. (3) I, II.

Mr. Logan in charge

Saturdays. Prerequisite: courses 1 and 2 or 5A-5B, and consent of instructor. To be taken by major students normally in the junior year.

Selected field studies in the Los Angeles area. The course affords training in field mapping of rural and urban types and in techniques of area analysis.

105. Introductory Cartography. (3) I, II.

Mr. Thrower in charge

Prerequisite: course 4 and one of the following: 1 and 2, or 5A-5B, or 100, or consent of instructor.

Survey of the field of cartography. Includes theory and construction of map projections, compilation procedures, principles of generalization and symbolization, cartographic drafting and lettering techniques, and map reproduction methods.

106. Intermediate Cartography. (3) II.

Mr. Thrower

Prerequisite: courses 4 and 105, or consent of the instructor.

Examination of principles of map design and their relationship to representation and reproduction methods. Theory and practice of quantitative mapping, graphics, and lettering.

107. Advanced Cartography. (3) I.

Mr. Thrower

Prerequisite: course 105 or equivalent and consent of the instructor.

Advanced work in cartographic theory and practice, including terrain representation, symbolization, color and reproduction. Laboratory work in advanced construction techniques.

108. Geographical Air Photo Analysis. (3) I.

Mr. Thrower

Prerequisite: course 4 or consent of the instructor.

A study of features of cultural and physical geography by means of aerial photographs. Emphasis is placed on the use of aerial photographs in geographical research and on the theory and practice of interpreting individual features and their interrelationships.

113. General Climatology. (3) II.

Mr. Bailey

Prerequisite: course 3 or consent of instructor. To be taken by major students normally in the junior year.

A study of the causes of climatic phenomena and of the larger features which characterize the climates of the earth.

115. Physical Bases of Geography. (3) I, II.

Mr. Glendinning

Prerequisite: course 1 or equivalent, or consent of instructor. One or two field trips may be required. To be taken by major students in the junior year; by others in either the junior or senior year.

A study of the basic physical factors existing in each of the major geographic realms, with special emphasis on the interrelationships of climates, landforms, soils, drainage, and natural vegetation.

117. Animal Geography. (3) I.

Mr. Bennett

A study of the physical and cultural factors of animal distribution and an examination of the role of animals in human societies.

118. Plant Geography. (3) II.

Mr. Gaines

Prerequisite: course 1 or consent of instructor.

Character, distribution, and environmental relationships of the principal vegetation regions of the world.

119. Geography of the Arid Lands. (3) I.

Mr. Bailey in charge

Prerequisite: courses 1 and 2, 101, 115, 118, 175 and/or consent of instructor.

An investigation of the physical and cultural complexes of the world's arid regions. Salient factors emphasized include climate, landforms, water, soils, natural vegetation and the various aspects of human occupancy, including future possibilities for human utilization.

121. The Geography of Anglo-America. (3) I, II.

Mr. Zierer in charge

Prerequisite: courses 1 and 2, or 5A-5B, or 100.

Delimitation and analysis of the principal economic geographic divisions of the United States, Canada, and Alaska.

122A. The Geography of Middle America. (3) I. Mr. Bruman in charge

A study of the geographic factors, physical and cultural, that are basic to an understanding of the historical development of Middle America and of the contemporary economic and social geography of Mexico and the countries of Central America and the West Indies.

122B. The Geography of South America. (3) II. Mr. Bruman

A study of the geographic factors, physical and cultural, that are basic to an understanding of the historical development of South America and of the contemporary economics and social geography of the individual South American countries.

123A. The Geography of Western Europe. (3) I. Mr. Kostanick in charge

A study of geographic conditions and their relation to economic, social, and political problems in the Atlantic states of Europe. Emphasis on France, Germany, the British Isles, Scandinavia, and the Benelux Countries.

123B. The Geography of Eastern Europe and the Soviet Lands. (3) II.

Mr. Kostanick

A study of geographic conditions and their relation to economic, social, and political problems in eastern and southern Europe, including Soviet Asia.

124A. The Geography of Southern Asia. (3) I. Mr. MacFadden

Prerequisite: course 1A or 5A or 100.

A regional survey of the physical and cultural features which characterize the economic, social, and political geography of southern Asia (India through the East Indies) during historic and modern times.

124B. The Geography of Eastern Asia. (3) II. Mr. Spencer

A regional survey of the physical and cultural features which characterize the economic, social, and political geography of eastern Asia (China, Korea, and Japan).

125. The Geography of Australia and Oceania. (3) I. Mr. McKnight

Prerequisite: courses 1 and 2, or 5A-5B, or 100.

A regional synthesis of the physical and human features which characterize Australia and New Zealand, Hawaii, and the islands of the South Pacific.

126. The Geography of Africa. (3) I, II. Mr. Thomas

The regions of Africa in terms of physical features, human settlement, economic production, and political patterns. Emphasis on Africa South of the Sahara.

127. The Geography of the Middle East. (3) II. Mr. Thomas

A regional survey of the physical and cultural features which characterize the economic, social, and political geography of Northern Africa and Southwestern Asia during historic and modern times.

131. The Geography of California. (3) I, II. Mr. Logan

An analysis of geographic conditions in the seven major provinces of California. Utilization of resources, routes of communication, location of settlements, and distribution of population in their geographical and historical aspects.

141. Commercial Geography. (3) I. Mr. Nelson in charge

Analysis of the geographic distribution of basic raw materials in relation to world trade centers and trade routes.

142. Industrial Geography. (3) II. Mr. MacFadden

Prerequisite: course 2 or 5B or 100 or 141.

Analysis of the distribution of the manufacturing industries.

155. Urban Geography. (3) I, II. Mr. Nelson in charge

A study of the origin, development, distribution, and regional variation of the world's cities, with emphasis on an analysis of the functions and patterns of American cities.

161. The Conservation of Natural Resources. (3) I. Mr. Zierer

The general principles of conservation and their application, especially in the United States.

- 165. Geographical Aspects of Land Planning. (3) I.** Mr. Glendinning
Prerequisite: courses 1 and 2, or 5A-5B, and consent of the instructor. Normally limited to ten students.
A study of the role of geographic discipline in land-planning activities.
- 171. Historical Geography of Anglo-America. (3) II.** Mr. Zierer
The geography of the major divisions of the United States and Canada at selected times in the past.
- 173. The Historical Geography of the Mediterranean Region. (3) I.** _____
Prerequisite: course 1, or 5A, or 100.
A study of the geographic factors operative in the Mediterranean lands from ancient to modern times.
- 175. The Cultural Bases of Geography. (3) I, II.** Mr. Bruman, Mr. Spencer
Prerequisite: course 2 or consent of instructor.
The geographic factor in the evolution of primitive cultures and of advanced civilizations.
- 181. Political Geography. (3) I, II.** Mr. Kostanick
The principles of political geography as developed through regional studies of political phenomena throughout the world. Current problems in domestic and international affairs will be considered.
- 199. Special Studies. (1-5) I, II.** The Staff
Prerequisite: senior standing and consent of the instructor.

Graduate Courses

- 250. Seminar. The Growth of Geographic Thought. (3) I, II.**
Prerequisite: consent of instructor. Mr. Spencer in charge
Normally the first seminar to be taken by graduate students in geography.
- 255. Seminar in the Geography of Asia. (3) II.** Mr. Spencer
Prerequisite: course 124A, or 124B, or the equivalent, and consent of instructor.
- 256. Seminar in the Geography of Anglo-America. (3) II.** Mr. Zierer
Prerequisite: course 121 or the equivalent, and consent of instructor.
- 257. Seminar in the Geography of Latin America. (3) II.** Mr. Bruman
Prerequisite: course 122A, or 122B, or the equivalent, and consent of instructor.
- 258. Seminar in California Geography. (3) I.** Mr. Gaines
Prerequisite: consent of instructor.
- 259. Seminar in the Geography of Australia and Oceania. (3) II.** Mr. McKnight
Prerequisite: course 125 or the equivalent, and consent of the instructor.
- 261. Seminar in Climatology. (3) I.** Mr. Bailey
Prerequisite: course 113 or the equivalent, and consent of instructor.
- 262. Seminar. Landforms and Their Geographic Significance. (3) II.** Mr. Glendinning
Prerequisite: course 115 or the equivalent, and consent of instructor.
- 270. Seminar in Economic Geography. (3) II.** Mr. MacFadden
Prerequisite: course 141 or 142, or the equivalent, and consent of instructor.
- 271. Seminar in Political Geography. (3) I.** Mr. Kostanick
Prerequisite: course 181 or the equivalent, and consent of instructor.
- 272. Seminar in Cultural Geography. (3) I.** Mr. Spencer in charge
Prerequisite: consent of instructor.
- 273. Seminar in Selected Regions. (3) I.** The Staff

275. Advanced Field Problems in Local Geography. (6)

Six weeks, concurrent with the Summer Session.

Mr. Logan in charge

Prerequisite: course 101 or the equivalent, and consent of instructor.

Advanced field study in representative areas of southern California; reconnaissance and detailed field-mapping, systematic and regional analysis of significant physical and cultural features, and the preparation of written research and field reports.

280. Geographic Writing—Research Techniques and Reports. (3) I, II.

Prerequisite: consent of instructor.

Mr. Gaines

290. Research in Geography. (1-6) I, II.

Prerequisite: consent of instructor.

The Staff

Investigation subsequent to, and growing out of, any of the above seminars.

Professional Course in Method

370. The Teaching of Geography. (3) II.

Prerequisite: consent of the instructor.

The basic concepts of Geography as applied to teaching at the secondary level; modern techniques in the presentation of geographic materials; sources of background information.

GEOLOGY

(Department Office, 3806 Geology Building)

Daniel I. Axelrod, Ph.D., *Professor of Geology.*

John C. Crowell, Ph.D., *Professor of Geology (Chairman of the Department).*

Willis P. Popenoe, Ph.D., *Professor of Geology.*

William W. Rubey, D.Sc., *Professor of Geology and Geophysics.*

Kenneth D. Watson, Ph.D., *Professor of Geology.*

George W. Wetherill, Ph.D., *Professor of Geophysics and Geology.*

———, *Professor of Geology.*

U. S. Grant, Ph.D., *Emeritus Professor of Geology.*

William John Miller, Ph.D., Sc.D., *Emeritus Professor of Geology.*

Joseph Murdoch, Ph.D., *Emeritus Professor of Geology.*

¹Donald Carlisle, Ph.D., *Associate Professor of Geology.*

†Clarence A. Hall, Jr., Ph.D., *Associate Professor of Geology.*

Clemens A. Nelson, Ph.D., *Associate Professor of Geology (Vice-Chairman of the Department).*

Gerhard Oertel, Dr. rer. nat., *Associate Professor of Geology.*

†John L. Rosenfeld, Ph.D., *Associate Professor of Geology.*

———, *Associate Professor of Geology.*

John M. Christie, Ph.D., *Assistant Professor of Geology.*

Charles E. Corbató, Ph.D., *Assistant Professor of Geology.*

W. Gary Ernst, Ph.D., *Assistant Professor of Geology and Geophysics.*

N. Gary Lane, Ph.D., *Assistant Professor of Geology.*

Ronald L. Shreve, Ph.D., *Assistant Professor of Geology and Geophysics.*

———, *Assistant Professor of Geology.*

¹Ted L. Bear, A.B., *Lecturer in Petroleum Geology.*

¹ In residence fall semester only, 1963-1964.

† Absent on leave, 1963-1964.

John T. McGill, Ph.D., *Research Associate in Geology.*

Helen Tappan Loeblich, Ph.D., *Lecturer in Geology.*

Alexander Stoyanow, Ph.D., *Research Associate in Geology.*

William S. Ting, Ph.D., *Associate Research Geologist.*

Letters and Science List.—All undergraduate courses in geology, mineralogy, and paleontology are included in the Letters and Science List of Courses. For regulations governing this list see page 72.

Geology

The program described below is designed to provide the student majoring in geology with as broad and generalized a training as possible in a curriculum leading to the A.B. degree. A student who intends to continue to graduate work, or who plans on a specialized career within the field of geology, should aim to complete the field of emphasis shown in the section following the description of the major that is most nearly related to his particular interest. A student continuing to graduate work must complete in graduate standing those courses required in his field of emphasis which he has not taken as an undergraduate.

Students intending to major in geology should confer with a departmental adviser as early as possible, and preferably before registration.

Preparation for the Major.—Geology 2, 2L, 3; Mineralogy 6A–6B; Chemistry 1A–1B; Physics 1A or 2A, 1B or 1C or 1D or 2B; Mathematics 1, 3A or 5A; English 106S; one course selected from among the following: Zoology 1A, Life Science 1A, Botany 2, Meteorology 4, Mathematics 3B or 5B, Chemistry 5A, Statistics 1.

The Major.—Geology 102A, 102B, 103, 116, 118A–118B; Paleontology 110; and nine units from among the following: any upper division courses in Geology, Mineralogy, Paleontology, and Geophysics; Physics 105; Chemistry 110A, 110B, 111; Mathematics 4B or 6B, 110AB or 110C, 122A, 122B, 124, 125; Statistics 131A–131B; Zoology 106, 112, 130A, 134, 159.

At the end of the senior year each student must take a comprehensive final examination in geology.

Fields of Emphasis.—Those students planning graduate work or specialized careers in geology should aim to complete one of the following fields of emphasis or submit an alternative program for approval by a committee of the geology faculty. Each field is a selection of courses from among those listed above and constitutes a basis for advanced work. A student continuing to graduate work must complete in graduate standing those courses required in his field of emphasis which he has not taken as an undergraduate.

Each field of emphasis includes Geology 2, 2L, 3; Mineralogy 6A–6B; Chemistry 1A–1B; Mathematics 1, 3A or 5A; English 106S; Geology 102A, 102B, 103, 116, 118A–118B, 119; Paleontology 110.

The additional courses for each option are as follows:

(1) **Physical Geology, Geophysics.**—Physics 1A or 2A, and 1B, 1C, 1D; Mathematics 3B, 4A, 4B or 5B, 6A, 6B; (Recommended: Chemistry 5A); Mineralogy 108, 109 or 110; eight units from among the following fifteen courses: Geology 107, 117 or 158, 150; Chemistry 110A–110B; Mathematics

¹ In residence fall semester only, 1963–1964.

110AB or 110C, 122A-122B, 124, 125; Physics 105; Statistics 131A-131B.

(2) *Mineralogy, Petrology, Mineral Deposits, Geochemistry*.—Physics 1A or 2A, and 1C; Chemistry 5A; Mathematics 3B, 4A, 4B, or 5B, 6A, 6B; Geology 110; Mineralogy 108, 109; Chemistry 110A, Chemistry 110B or Geophysics 122 or Mineralogy 101; (Recommended: Chemistry 110B, 111; Geology 107, 158).

(3) *Paleontology, Stratigraphy*.—Physics 1A or 2A, and 1B or 1C or 1D or 2B; a course in statistics (recommended: Public Health 160A or Statistics 1); Zoology 1A, 1B; Geology 158; one of the following five courses: Zoology 106, 110, 112, 134; Botany 2; two of the following nine courses: Paleontology 111, 114, 120, 135, 136, 137; Mineralogy 108, 110; Zoology 137. (Recommended: Geology 107, 117, 150; Zoology 130A).

Suggested programs for each of these emphases are available in the departmental office.

Requirements for the Master of Arts Degree

1. For the general University requirements, see page 162.

2. Departmental requirements:

The department follows Plan I (Thesis Plan), as described on page 164. Each candidate for the M.A. degree is required to complete three seminars selected from geology, mineralogy, paleontology, or geophysics and to pass the Graduate Division examination in a modern foreign language.

A candidate for the M.A. degree in geology must either elect one of three fields of emphasis in geology or submit an alternative program for approval by a committee of the geology faculty. He must have to his credit, in addition to the general University requirements, the lower and upper division courses (or their equivalents) recommended for the field of emphasis chosen (or alternative program). Under most circumstances, students deficient in these requirements will be allowed to complete them while in graduate status. He must also complete one of the sequences listed below or an alternative program.

a. *Physical Geology, Geophysics*.—Twenty units from among the following twenty courses: Geology 107, 117 or 158, 150; Paleontology 111 or 114 or 120 or 136 or 137; Chemistry 110A-110B; Mathematics 110AB or 110C, 122A-122B, 124, 125; Physics 105; Statistics 131A-131B.

b. *Mineralogy, Petrology, Mineral Deposits, Geochemistry*.—Mineralogy 101 or 110 or 181; Chemistry 110B, 111; nine units from among the following nine courses: Geology 107, 117, 150, 158; Geophysics 122; Mathematics 110AB or 110C, 122A-122B.

c. *Paleontology, Stratigraphy*.—Geology 107 or 117; Mineralogy 108, 110; three of the following six courses: Paleontology 111, 135, 136, 137; Zoology 160, 161; one course each from three of the following four groups: (1) Zoology 112, 212, 268; (2) Zoology 106, 134, 137, 266; (3) Paleontology 114; Zoology 110, 210; (4) Paleontology 120, Botany 2. (Recommended: Zoology 130A, 152).

Requirements for the Degree of Doctor of Philosophy

1. For the general University requirements, see page 165.

2. Departmental requirements:

Prospective candidates for the degree of Doctor of Philosophy in geology

must have the A.B. degree in geology from this university, or from an institution of equivalent standing and with a preparation deemed equivalent to that required for the A.B. degree from this university. The candidate must either (a) elect one of the three fields of emphasis in geology and be familiar with the subject matter of courses required for the M.A. degree in their respective fields of emphasis, or (b) submit an alternative program for the Ph.D. degree for approval by a committee of the geology faculty.

a. *General Preliminary Examination*.—Each prospective candidate for the Ph.D. degree in geology is *required* to take a written preliminary examination during the *first semester* of graduate status. This examination will be based upon the A.B. curriculum in geology at this institution.

b. *Program of Study*.—On the basis of the student's performance in the above examination, a guidance committee will recommend a program of study.

c. *Special Examination*.—Upon completion of the program of study recommended by the guidance committee, the candidate is required to take a written examination in his field of specialization. This examination must be taken within two years of the General Preliminary Examination.

Geophysics

For the interdepartmental curriculum in geophysics, see page 82.

GEOLOGY

Lower Division Courses

2. **General Geology—Physical.** (3) I, II. The Staff
 An elementary course in the principles of physical geology.
- 2L. **Laboratory, General Geology—Physical.** (1) I, II. The Staff
 Laboratory, three hours. Prerequisite: Geology 2 must be taken concurrently except by consent of instructor.
 Laboratory exercises in topographic and geologic map study, mineral and rock identification.
3. **General Geology—Historical.** (4) II. Mr. Lane
 Lecture, three hours; laboratory, three hours. Prerequisite: Geology 2.
 The geologic history of the earth and its inhabitants.

Upper Division Courses

101. **Principles of Geology.** (3) I, II. Mr. Shreve
 Prerequisite: junior standing. Not open to students who have taken Geology 2 or 3.
 A survey of the principles of physical and historical geology.
- 102A. **Geologic Problems.** (3) I. The Staff
 Laboratory, three hours; field, one day per week. Prerequisite: Geology 2, 2L, 103 (may be taken concurrently).
 Introduction to geologic mapping. Application of descriptive geometry and trigonometry to geologic problems; interpretation of geologic maps.
- 102B. **Field Geology.** (3) II. The Staff
 Laboratory, three hours; field, one day per week. Prerequisite: Geology 102A; English 106S (may be taken concurrently).
 Principles and methods of geologic mapping.
103. **Petrology.** (4) I. Mr. Watson
 Lecture, two hours; laboratory, six hours. Prerequisite: Mineralogy 6A–6B; Chemistry 1B (may be taken concurrently).
 Origins and characteristics of rocks. Laboratory determination with the hand lens.

- 107. Geology of North America. (2) II.** Mr. Nelson
Prerequisite: Geology 3 or consent of the instructor.
A regional study of North American geology.
- *110. Economic Geology. (3) II.** _____
Lecture, two hours; laboratory, three hours. Prerequisite: Geology 103.
Origin and occurrence of the important metallic and nonmetallic mineral deposits.
- 111. Petroleum Geology. (3) I.** Mr. Bear
Prerequisite: Geology 116 or consent of the instructor.
Geology applied to the exploration and production of petroleum, techniques of surface and subsurface geology; petroleum engineering problems of concern to geologists.
- 116. Structural Geology. (3) II.** Mr. Christie
Lecture, two hours; laboratory, three hours. Prerequisite: Geology 102A and 103 or consent of the instructor. A knowledge of descriptive geometry is desirable.
Fracture, folding, and flow of rocks. Solution of structural problems.
- 117. Geomorphology. (3) I.** _____
Prerequisite: Geology 2 or 101.
Principles of geomorphology.
- 118A. Intermediate Field Geology. (4)** The Staff
Eight weeks, commencing with Summer Session. Prerequisite: Geology 102B or the equivalent and 116. Geology 118B must be taken concurrently.
Preparation of a geologic field map and structure sections of a selected region.
- 118B. Geologic Report Writing. (2)** The Staff
Eight weeks commencing with Summer Session. Geology 118A must be taken concurrently.
Preparation of a geologic report concerning the geology of the region mapped in course 118A.
- 119. Advanced Field Geology. (2) I.** The Staff
Field, one day. Prerequisite: Geology 118A-118B or the equivalent.
Problems in field geology with some choice of emphasis available to the student.
- 150. Stress and Deformation in Geological Materials. (3) II.** Mr. Shreve
Lecture, three hours. Prerequisite: one year of Physics and Mathematics 4A or 6A, or consent of the instructor. Offered in alternate years.
Scalars, vectors, tensors; rotation and inversion of axes, transformation matrix; stress; infinitesimal strain, strain rate; finite strain; Mohr's circle construction and other graphical methods of representation.
- *151. Flow of Geological Materials. (3) II.** Mr. Shreve
Lecture, three hours. Prerequisite: one year of Physics and Mathematics 4B or 6B, or Geology 150, or consent of the instructor. Offered in alternate years.
Properties of solids and fluids; dimensional analysis; equations of state, continuity, momentum, and energy; laminar flow; nature of turbulence, turbulent flow in wide channels, roughness, transport of sediment; quasi-viscous flow, flow of glaciers.
- 158. Foundations of Stratigraphy. (2) II.** Mr. Axelrod
Prerequisite: Geology 102B (may be taken concurrently).
A survey of geologic, paleontologic, biologic, and climatic principles applicable to stratigraphy, and their bearing on paleogeography.
- 199. Special Studies in Geology. (1-5) I, II.** The Staff (Mr. Crowell in charge)
Prerequisite: senior standing and consent of the department chairman.

Graduate Courses

- *236. Physical Geology of California. (3) II.** _____

* Not to be given, 1963-1964.

- 250. Seminar in Physical Geology. (3) II.** Mr. Shreve
Prerequisite: consent of the instructor.
- 251. Seminar in Chemical Petrology. (3) II.** Mr. Ernst
Prerequisite: Mineralogy 109.
- 252. Seminar in Geomorphology. (3) II.** _____
Prerequisite: Geology 117 or the equivalent.
- 254A-254B. Seminar and Laboratory in Igneous Petrology. (2-5; 2-5) yr.** Mr. Rosenfeld, Mr. Watson
Prerequisite: Mineralogy 109. Recommended: Geology 251. Offered in alternate years.
- *255A-255B. Seminar and Laboratory in Metamorphic Petrology. (2-5; 2-5) Yr.** Mr. Rosenfeld, Mr. Watson
Prerequisite: Mineralogy 109. Offered in alternate years.
- *256. Seminar and Laboratory in Structural Petrology of Deformed Rocks. (3-5) II.** Mr. Christie
Prerequisite: Geology 116, Mineralogy 108, or consent of the instructor. Offered in alternate years.
Study of microscopic structures and the orientation of minerals in deformed rocks, using the microscope and universal stage. Laboratory compulsory.
- *257. Seminar and Laboratory in Sedimentary Petrology. (2-5) I.** _____
Prerequisite: Mineralogy 110 or equivalent.
Advanced study of problems concerning sedimentary rocks and sedimentation processes.
- 258. Seminar in Stratigraphy. (3) I.** Mr. Nelson
Prerequisite: Geology 158.
- 259. Field Investigations in Geology. (2) II.** Mr. Crowell
Prerequisite: graduate standing and consent of the instructor.
Preparatory seminars on a selected field problem, followed by a field trip to the region during spring recess, with a report required.
- 260. Seminar in Structural Geology. (3) I.** Mr. Oertel
Prerequisite: Geology 116 or equivalent.
Seminar in fundamentals of structural geology with emphasis on sedimentary terranes.
- 261. Structural Analysis of Deformed Rocks. (3) II.** Mr. Christie
Prerequisite: Geology 116 or equivalent. Geology 260 strongly recommended.
Geometrical study and interpretation of structures in terranes with complex or multiple deformations, with special attention to structures on a megascopic scale. Supervised field or laboratory studies optional.
- 262. Seminar in Advanced Problems in Geology. (3) I.** Mr. Rubey
Prerequisite: consent of the instructor.
Study of selected geological problems of broad scope.
- *263A-263B. Seminar in Economic Geology. (3-3) Yr.** Mr. Carlisle
Occasional field trips during the course. Prerequisite: Geology 110. The second semester of this course may be taken without the first.
- 264. Seminar in Geochronology. (3) I.** Mr. Wetherill
Prerequisite: consent of the instructor.
Study of natural decay systems, such as U-Pb, Th-Pb, Rb-Sr, K-A, C¹⁴; experimental techniques, mass spectrometry, evaluation of geochronologic data.
- 299. Research in Geology. (1-6) I, II.** The Staff (Mr. Nelson in charge)

* Not to be given, 1963-1964.

MINERALOGY

Lower Division Courses

6A. Introductory Mineralogy. (3) I.

Mr. Ernst

Lecture, one hour; laboratory, six hours. Prerequisite: elementary chemistry, trigonometry; Geology 2 and 2L (may be taken concurrently).

Properties, relationships, origin of minerals; form and structure of crystals; determination of common minerals by physical and chemical tests.

6B. Intermediate Mineralogy. (2) II.

Laboratory, six hours. Prerequisite: Mineralogy 6A.

Continuation of Mineralogy 6A.

Upper Division Courses

101. Paragenesis of Minerals. (2) I.

Mr. Ernst

Prerequisite: Geology 103, or consent of the instructor.

Principles governing heterogeneous equilibria, with selected application to mineral stability relations in igneous, metamorphic, and sedimentary rocks.

108. Optical Mineralogy and Petrography. (4) I.

Lecture, two hours; laboratory, six hours. Prerequisite: Mineralogy 6B or upper division standing in science or engineering with the consent of the instructor.

Optical properties of minerals; determination of minerals and rocks with the petrographic microscope; immersion methods.

109. Petrology and Petrography of Igneous and Metamorphic Rocks. (2) II.

Laboratory, six hours. Prerequisite: Geology 103, Mineralogy 108.

Mr. Watson

Characteristics and origin of igneous and metamorphic rocks; determination with the petrographic microscope.

110. Petrology and Petrography of Sedimentary Rocks. (2) II.

Laboratory, six hours. Prerequisite: Geology 103, Mineralogy 108.

Characteristics and origin of sedimentary rocks; physical and mineralogical analysis of sediments; determination of minerals by immersion methods.

*181. Mineralography. (2) II.

Mr. Carlisle

Laboratory, six hours. Prerequisite: Mineralogy 108.

Determination of opaque minerals in polished sections; recognition of common ore minerals; paragenetic relationships.

Graduate Courses

*274. Seminar in Structural Crystallography. (2-5) I.

Seminar, two hours; laboratory, optional. Prerequisite: consent of the instructor.

Advanced crystallography and the atomic structure of crystals.

*282. Problems in Goniometry. (2-4) II.

299. Research in Mineralogy. (1-6) I, II.

Mr. Ernst

PALEONTOLOGY

Upper Division Courses

101. Principles of Paleontology. (3) II.

Mr. Lane

Prerequisite: junior standing or consent of the instructor. Students who receive credit for Paleontology 110 may not receive additional credit for Paleontology 101.

A survey of the principles governing the evolution and distribution of fossils.

* Not to be given, 1963-1964.

110. General Paleontology. (3) I.

Mr. Lane

Lecture, two hours; laboratory, three hours. Prerequisite: Geology 8 or upper division standing in the life sciences. Students who receive credit for Paleontology 101 may not receive additional credit for Paleontology 110.

Methods and principles of paleontology, including evolution, classification, and distribution of organisms. The geologic history of plants, vertebrates, and invertebrates.

111. Systematic Invertebrate Paleontology. (3) II.

Mr. Popenoe

Lecture, one hour; laboratory, six hours. Prerequisite: Geology 3, or Geology 101 or Paleontology 101 or upper division standing in the life sciences.

The study of invertebrate fossils.

114. Micropaleontology. (3) I.

Mrs. Loeblich

Lecture, one hour; laboratory, six hours. Prerequisite: Paleontology 110 or 111 or upper division standing in the life sciences.

Study of the microfossils important in stratigraphic work.

***120. Paleobotany. (3) II.**

Mr. Axelrod

Lecture, two hours; laboratory, three hours. Prerequisite: Geology 3, Botany 2 or consent of the instructor.

Vegetation of the earth during geologic time.

***135. Paleontology and Stratigraphy of the Paleozoic. (3) I.**

Mr. Lane

Lecture, one hour; laboratory, six hours. Prerequisite: Paleontology 110 or 111 or consent of the instructor. Offered in alternate years.

Evolution and stratigraphic distribution of invertebrates during the Paleozoic Era. One required field trip.

136. Paleontology and Stratigraphy of the Mesozoic. (3) II.

Mr. Popenoe

Lecture, one hour; laboratory, six hours. Prerequisite: Paleontology 110 or 111 or consent of the instructor. Offered in alternate years.

Evolution and stratigraphic distribution of invertebrates during the Mesozoic Era. Field trips.

***137. Paleontology and Stratigraphy of the Cenozoic. (3) II.**

Mr. Hall

Lecture, one hour; laboratory, six hours. Prerequisite: Paleontology 110 or 111 or upper division standing in the life sciences.

Principles of marine paleoecology and occurrence of marine invertebrates in the Cenozoic Era.

198. Colloquium in Paleontology. (1) I and II.

The Staff

Lecture, one hour. Prerequisite: senior or graduate standing in geology or life sciences. May be taken for a total of two semesters with credit.

Staff lectures and student recitations on selected current topics in paleontology.

Graduate Courses**214. Seminar in Micropaleontology. (3) II.**

Mrs. Loeblich

Prerequisite: Paleontology 114.

Discussion and demonstration of recent advances in micropaleontology with emphasis on the Foraminifera, their morphology and systematics, the living animal and life cycles, ecology and paleoecology, new techniques for study, and stratigraphic value and limitations of microorganisms.

258. Seminar in Paleontology. (3) II.

Mr. Popenoe

Prerequisite: Paleontology 110 or 111 or graduate standing in the life sciences.

Review of current and classic paleontologic works, with emphasis on principles of paleontology.

299. Research in Paleontology. (1 to 6) I, II.

The Staff

* Not to be given, 1963-1964.

GEOPHYSICS AND PLANETARY PHYSICS

(Institute Office, 3687 Geology Building)

David T. Griggs, M.A., *Professor of Geophysics.*

Robert E. Holzer, Ph.D., *Professor of Geophysics.*

George C. Kennedy, Ph.D., *Professor of Geophysics.*

Leon Knopoff, Ph.D., *Professor of Geophysics and Physics.*

Willard F. Libby, Ph.D., *Professor of Chemistry (Director of the Institute).*

Gordon J. F. MacDonald, Ph.D., *Professor of Geophysics.*

Willem V. R. Malkus, Ph.D., *Professor of Geophysics.*

John W. Miles, Ph.D., *Professor of Engineering and Geophysics.*

Clarence E. Palmer, D.Sc., *Professor of Geophysics.*

George W. Wetherill, Ph.D., *Professor of Geophysics and Geology.*

Louis B. Slichter, Ph.D., *Emeritus Professor of Geophysics.*

Gordon J. Fergusson, M.Sc., *Associate Professor of Geophysics.*

W. Gary Ernst, Ph.D., *Assistant Professor of Geology and Geophysics.*

Ronald L. Shreve, Ph.D., *Assistant Professor of Geology and Geophysics.*

Jacob A. B. Bjerknes, Ph.D., *Professor of Meteorology and Geophysics.*

William W. Rubey, D.Sc., *Professor of Geology and Geophysics.*

The Institute of Geophysics and Planetary Physics was established to encourage fundamental research in geophysics and space physics and to provide graduate instruction for qualified students. Members of the staff and associated departments are prepared to supervise graduate work in a variety of fields: atmospheric physics, physics of the radiation belts, interplanetary physics and solar physics, geophysical fluid dynamics, high pressure physics, tectonophysics, geochemistry, nuclear geophysics, age determination, gravitation, physical oceanography and marine geophysics, seismology, physics of the deep interior, and exploration geophysics. The bachelor's degree may be in any field; however, a thorough undergraduate preparation in one or more of the basic sciences, physics, mathematics or chemistry is expected of students pursuing graduate research. The student who elects to pursue research in geophysics or space physics may do so by entering the Geophysics Interdepartmental Curriculum, the Geochemistry Interdepartmental Curriculum or by enrolling in one of the following departments: Geology, Physics, Meteorology, Mathematics, Astronomy, Chemistry. An individual program of instruction will be worked out for each student, since the requirements for the M.A. or Ph.D. degree are not the same for all students. For further information, contact the Institute of Geophysics and Planetary Physics.

Upper Division Course

122. Geophysical Prospecting. (3) II.

Mr. Slichter

Prerequisite: consent of the instructor.

The principles of geophysical prospecting for ores, petroleum, and other economic minerals.

Graduate Courses

240. Theoretical Seismology. (3) I.

Mr. Knopoff

An advanced course treating problems of transient wave motions in elastic solids. The mathematical analysis of wave propagation, boundary value problems, interaction of compression and shear waves, surface waves, plane boundaries, elastic and imperfectly elastic materials.

249. Experimental Petrology. (3) I.

Mr. Kennedy

250. Seminar in Geophysics. (3) I, II.

Mr. Slichter, Mr. MacDonald

Seismology, geophysical prospecting, electromagnetic prospecting. Selected topics in earth physics. The content will vary from year to year.

253. Seminar in Geochemistry. (3) I, II.

Mr. Kennedy, Mr. Wetherill

Phase equilibria, origin of igneous and metamorphic rocks, meteorites, origin of the earth and solar system. Selected topics in geochemistry. The content will vary from year to year.

255. Seminar in Atmospheric Physics. (3) I.

Mr. Holzer

Selected problems in physics of the high atmosphere, electromagnetic waves in ionized media; magnetic noise; atmospheric electrical currents. The content will vary from year to year.

260. Experimental Geology. (3 to 6) II.

Mr. Griggs

Seminar, two hours; laboratory, optional. Prerequisite: consent of the instructor.

The mechanics of rock deformation. Dimensional analysis and model theory applied to geological problems.

290. Research in Geophysics. (1-6) I, II.

The Staff

This course will include studies relative to exploration geophysics and experimental work in the electromagnetic model laboratory; research relative to gravity-surveying and to gravity earthtides (Mr. Slichter); theoretical and experimental studies relative to seismology and geophysics (Mr. Knopoff); tectonophysics and properties of matter at high pressure (Mr. Griggs); atmospheric electrical phenomena (Mr. Holzer); meteorological problems (Mr. Palmer); space science (Mr. MacDonald); radioactive dating and nuclear geophysics (Mr. Fergusson, Mr. Libby, Mr. Wetherill); hydrodynamics (Mr. Malkus); meteorites (Mr. Wetherill).

Related Courses in Other Departments

Geochemistry

Chemistry 110A, 110B, 203, 231. Geology 103, 110, 251, 254A-254B, 255A-255B, 262, 264. Mineralogy 101, 108, 181, 274.

Astronomy 201A-201B, 208, 217, 227A-227B. Engineering 191A, 192A, 192B, 217E, 220A-220B, 263G, 263H, 287A, 287B, 292A, 292B, 292C. Mathematics 224A, 225A-225B, 229A-229B, 233. Meteorology 140, 141, 217, 231B, 232A-232B, 232C. Physics 210A, 212, 217, 218, 220A, 221A, 231, 232.

GERMANIC LANGUAGES

(Department Office, 310 Royce Hall)

Alfred Karl Dolch, Ph.D., *Professor of German.*

Wayland D. Hand, Ph.D., *Professor of German and Folklore.*

Victor A. Oswald, Jr., Ph.D., *Professor of German.*

Eli Sobel, Ph.D., *Professor of German.*

Erik Wahlgren, Ph.D., *Professor of Scandinavian Languages.*

Gustave Otto Arlt, Ph.D., LL.D., *Emeritus Professor of German.*

Frank H. Reinsch, Ph.D., *Emeritus Professor of German.*

Carl William Hagge, Ph.D., *Associate Professor of German.*

Robert R. Heitner, Ph.D., *Associate Professor of German (Chairman of the Department).*

Vern W. Robinson, Ph.D., *Associate Professor of German.*
 William J. Mulloy, Ph.D., *Associate Professor of German, Emeritus.*
 Franz H. Bäuml, Ph.D., *Assistant Professor of German.*
 Kenneth G. Chapman, Ph.D., *Assistant Professor of Scandinavian Languages.*
 Charles W. Hoffmann, Ph.D., *Assistant Professor of German.*
 Terence Harrison Wilbur, Ph.D., *Assistant Professor of German.*

Stephanie Lombardi, Ph.D., *Lecturer in German.*
 William F. Roertgen, Ph.D., *Lecturer in Germanic Languages.*
 Edith A. Schulz, M.A., *Lecturer in German.*
 ———, *Visiting Assistant Professor of Finno-Ugric.*
 John W. Jacobson, M.A., *Acting Assistant Professor of German.*
 ———, *Acting Instructor in German.*
 ———, *Acting Instructor in German.*

William Melnitz, Ph.D., *Professor of Theater Arts.*

Letters and Science List.—All undergraduate courses in Germanic languages except German 370 are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Required: course 1, 2, 3, (3S), 4, 6, 8A and 42A–42B, or their equivalents. Recommended: History 1A–1B; English 1A–1B, 46A–46B; Philosophy 20A–20B.

The Major in German.—At least 24 units in upper division courses, including 106A, 106B, 107, 118A, 118B, and one course from each of the following groups: (1) 105, 108, 119; (2) 109A, 109B; (3) 104A, 104B, 110, 111; (4) 114A, 114B. Students looking forward to the secondary credential should take also 106C–106D. Students desiring a purely literary or philological major, not looking toward secondary teaching, should consult the departmental adviser regarding permissible substitutions of courses.

Admission to Graduate Status

The completion of the undergraduate major, or its equivalent, with a minimum grade-point average of 3.0 is required. If the candidate is deficient in this prerequisite he must fulfill it by undergraduate courses taken as a graduate student.

Entering graduate students may be required to take a placement examination in German language and literature before enrolling in courses.

Requirements for the General Secondary Credential

Consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

Requirements for the Master's Degree

1. For the general requirements, see pages 162–165. The department usually follows the comprehensive examination plan, but under certain conditions the thesis plan may be approved.

2. Application for advancement to candidacy may be made when the student has passed the reading examination in French.

3. Courses offered in satisfaction of the general requirements, under both Plans I and II, must include courses 201, 239, and one seminar course.

4. The final examinations under Plan II consist of three sections.

a. *Linguistics*. The student must present evidence of a knowledge of the history and development of the modern German language, and a thorough acquaintance with Middle High German.

b. *Older Literature*. The student must have an acquaintance with the history of older German literature (to 1750) and with its important monuments and personalities.

c. *Modern Literature*. He must have a thorough acquaintance with the history of modern German literature (1750 to date) and with a considerable number of its authors and their works.

Examination in these three fields will be in writing and will be based upon the suggested readings which are given to the student. In a final oral examination the student will be examined further in these same three fields and on his general background.

Students who are accepted on the thesis plan do not take the written final examination but will take an oral examination on the field of the thesis, as provided on page 164.

Requirements for the Doctor's Degree

1. For the general requirements, see pages 165-169.

2. Advancement to candidacy will take place when the student has (a) passed the graduate reading examination in French; (b) passed a departmentally administered reading examination either in a modern Scandinavian language or in Dutch-Flemish-Afrikaans, or successfully completed two semesters of study, in residence, of a modern Scandinavian language or of Dutch-Flemish-Afrikaans; (c) passed 201 (Bibliography), 232 (Old High German), 239 (Middle High German), and 240 (Folklore of the Germanic Peoples), or the equivalents; (d) successfully completed three seminars.

The degree is offered in the following four fields, from which one major and one minor field shall be selected:

a. *German Literature*

b. *Germanic Philology and Linguistics*

c. *Scandinavian Literature and Philology*

d. *Germanic Folklore*

The field in which the candidate intends to present a dissertation will be designated as his major field. The candidate shall pass one written qualifying examination in his major field and one written qualifying examination in a minor field. He is then subject to an oral qualifying examination administered by his doctoral committee, as provided on page 167.

GERMAN

Lower Division Courses

The ordinary prerequisites for each of the lower division courses are listed under the description of these courses. Students who have had special

advantages in preparation may be permitted a more advanced program; or such students may be transferred to a more advanced course on recommendation of the instructor.

1. Elementary German. (4) I, II. Miss Schulz and Mrs. Lombardi in charge
This course corresponds to the first two years of high school German.

1G. Elementary German for Graduate Students. (No credit) I, II.
Four hours a week. Miss Schulz in charge

2. Elementary German. (4) I, II. Miss Schulz and Mrs. Lombardi in charge
Prerequisite: course 1 or two years of high school German.

†3. Intermediate German. (4) I, II. Mr. Bäuml in charge
Prerequisite: course 2 or three years of high school German.
Readings in literary German.

†3S. Intermediate German. (4) I, II. Mr. Bäuml in charge
Prerequisite: course 2 or three years of high school German.
Readings in the sciences.

4. Intermediate German. (4) I, II. Mr. Bäuml in charge
Prerequisite: any one of courses 3, 3S, or four years of high school German.
Advanced readings in literary German.

6. Review of Grammar. (2) I, II. Mr. Roertgen in charge
Prerequisite: course 2 or three years of high school German.
Required for the major in German.

8A-8B. German Conversation. (1-1) Beginning each semester.
Mr. Roertgen in charge
The class meets two hours weekly. Open to students who have completed course 2 or its equivalent. Course 8A is normally prerequisite to 8B.

42A-42B. German Civilization. (2-2) Yr. Mr. Bäuml, Mr. Sobel
Lectures and reports. Conducted in English. No knowledge of German required.
A general survey of the development of German civilization in its more important cultural manifestations. Required for the major in German.

Upper Division Courses

The prerequisite for all upper division courses except 121A and 121B is course 4 or the equivalent.

102. German Folklore. (3) II. Mr. Hand
A survey of the various genres of German folklore. Lectures and reading of selected texts.
Offered only in alternate years.

104A-104B. Readings in the Drama of the Nineteenth Century. (3-3) Yr.
Selected readings from nineteenth-century authors. Mr. Robinson

105. Lessing's Life and Works. (3) I. Mr. Heitner
Lectures and readings of selected texts.

106A-106B. Grammar, Composition, and Conversation. (2-2) Yr.
106A. Emphasis on composition. Mr. Roertgen
106B. Emphasis on conversation. Recitation, two hours; laboratory, two hours. Prerequisite: course 8A or 8B.

† The two courses numbered 3 and 3S may be taken for credit. It is recommended that German 3 be taken before the specialized course 3S.

- 106C-106D. Grammar, Composition, and Conversation. (2-2) Yr.
Prerequisite: course 106A. Mr. Roertgen
107. Phonetics of the German Language. (2) I. Mr. Wilbur
Lecture, two hours; laboratory, one hour.
Study of the articulatory basis of the sounds of German and practice in standard pronunciation.
108. Schiller's Life and Works. (3) II. Mr. Heitner, Mrs. Lombardi
Lectures and reading of selected texts.
- 109A. Introduction to Goethe: The Young Goethe. (3) I. Mr. Hagge
Intensive study of a selection of Goethe's lyrics to 1786 and of *Götz*, *Werther*, *Urfaust*, and *Egmont*. Lectures on the literary background of the Storm and Stress Movement.
- 109B. Introduction to Goethe: The Classical Goethe. (3) II. Mr. Hagge
Intensive study of a selection of Goethe's lyrics from 1786 to 1832 and of *Iphigenie*, *Tasso*, *Hermann und Dorothea*, and *Novelle*. Lectures on the literary background of the Classical Movement.
110. The German Lyric. (3) II. Mr. Oswald
Prerequisite: 6 units of upper division German or consent of the instructor.
A survey from 1750 to 1950.
111. German Narrative Prose. (3) I. Mr. Oswald
Prerequisite: 6 units of upper division German or consent of the instructor.
A survey from 1750 to 1880, with special reference to the *Novelle*.
- 114A. German Literature from 1875 to the Present. (3) I. Mr. Oswald
Prerequisite: 6 units of upper division German or consent of the instructor.
Prose and poetry.
- 114B. German Literature from 1875 to the Present (3) II. Mr. Hoffmann
Prerequisite: 6 units of upper division German or consent of the instructor.
Dramatic literature.
117. History of the German Language. (3) II. Mr. Wilbur
Prerequisite: course 106A-106B, 107, or consent of the instructor.
- 118A. History of German Literature. (3) I. Mr. Bäumel, Mr. Sobel
Prerequisite: 6 units of upper division German or consent of the instructor.
The Middle Ages to 1624.
- 118B. History of German Literature. (3) II. Mr. Heitner
Prerequisite: 6 units of upper division German or consent of the instructor.
Lectures in German. From 1624 to 1850.
119. Middle High German. (3) I. Mr. Bäumel
Outline of grammar; selections from Middle High German poetry.
- 121A. German Literature in Translation. (2) I. Mr. Hagge
Prerequisite: junior standing. Not accepted as part of the major in German.
Readings and lectures on Lessing, Schiller, and Goethe.
- 121B. German Literature in Translation. (2) II. Mr. Sobel
Prerequisite: junior standing. Not accepted as part of the major in German.
Readings and lectures on selected modern authors.
132. Goethe's Faust. (3) II. Mr. Hagge
Prerequisite: course 109A or 109B and 6 additional units of upper division German, or consent of the instructor.
Intensive study of the text of Goethe's *Faust*, Parts I and II, together with more general consideration of other treatments of the Faust theme in European literature.
199. Special Studies. (1-5) I, II. The Staff
Prerequisite: senior standing and consent of the instructor.

Graduate Courses

201. Bibliography and Methods of Literary History. (2) I. Mr. Sobel
Required for the M.A. and Ph.D. degrees.
208. The Sixteenth and Seventeenth Centuries. (3) I. Mr. Sobel
210. The Age of Goethe. (3) I. Mr. Hagge
- *212. Nineteenth-Century Narrative and Poetry. (3) II. ———
- *213. The Enlightenment and Pre-Romanticism. (3) II. Mr. Heitner
225. Nineteenth-Century Drama. (3) II. Mr. Robinson
226. Contemporary German Literature. (3) I. Mr. Hoffmann
From *Neue Sachlichkeit* to the present.
228. Recent German Literature. (3) II. Mr. Oswald
From Naturalism to Expressionism.
- *229. Expressionism. (2) I. Mr. Melnitz
- *230. Survey of Germanic Philology. (3) I. Mr. Wilbur
231. Gothic. (3) I. Mr. Dolch
232. Old High German. (3) I. Mr. Dolch
233. Old Saxon. (3) II. Mr. Dolch
239. Readings in Middle High German Literature. (3) II. Mr. Bäuml
Prerequisite: course 119 or the equivalent.
Required for the M.A. degree.
240. Folklore of the Germanic Peoples. (3) I. Mr. Hand
Prerequisite: course 102, or Folklore 101.
245. Germanic Mythology. (3) II. Mr. Wahlgren
Prerequisite: knowledge of German, a Scandinavian language, or consent of the instructor.
- *251. Seminar on the Age of Goethe. (3) II. Mr. Hagge
- *253. Seminar in Nineteenth-Century Literature. (3) I. ———
254. Seminar in the Enlightenment and Pre-Romanticism. (3) I. Mr. Heitner
256. Seminar in Literature after 1875. (3) II. Mr. Hoffman, Mr. Oswald
257. Seminar in Sixteenth- and Seventeenth-Century Literature. (3) II. Mr. Sobel
- *259. Seminar in Germanic Linguistics. (1 to 3) II. Mr. Bäuml, Mr. Dolch, Mr. Wilbur
Prerequisite: course 230 and one dialect or the equivalent.
- 297A-297B. Individual Studies for Graduate Students. (1-6; 1-6) I, II. The Staff
299. Research on Doctoral Dissertation. (1-6) I, II. The Staff

* Not to be given, 1963-1964.

Professional Course in Method**370. The Teaching of German. (3) I.**

Mrs. Lombardi

Prerequisite: graduate standing or consent of instructor. Required of all candidates for the general secondary credential in German.

DUTCH-FLEMISH AND AFRIKAANS**Upper Division Courses****101A. Elementary Dutch-Flemish and Afrikaans. (3) I.**
(Dutch-Flemish)

Mr. Roertgen

101B. Elementary Dutch-Flemish and Afrikaans. (3) II.
(Afrikaans)

Mr. Roertgen

199. Special Studies in Dutch-Flemish and Afrikaans. (1-5) I, II.

Mr. Roertgen

FINNO-UGRIC**Upper Division Courses****101A. Elementary Finnish. (3) I.****101B. Elementary Finnish. (3) II.**

Prerequisite: course 101A or the equivalent.

SCANDINAVIAN LANGUAGES**Lower Division Courses****1. Elementary Swedish. (4) I.**

Mr. Wahlgren in charge

2. Elementary Swedish. (4) II.

Mr. Wahlgren in charge

Prerequisite: course 1 or the equivalent.

3. Intermediate Swedish. (4) I.

Mr. Wahlgren

Prerequisite: course 2 or the equivalent.

4. Intermediate Swedish. (4) II.

Mr. Wahlgren

Prerequisite: course 3 or the equivalent.

11. Elementary Norwegian. (4) I.

Mr. Chapman

12. Elementary Norwegian. (4) II.

Mr. Chapman

Prerequisite: course 11 or the equivalent.

13. Intermediate Norwegian. (4) I.

Mr. Chapman

Prerequisite: course 12 or the equivalent.

14. Intermediate Norwegian. (4) II.

Mr. Chapman

Prerequisite: course 13 or the equivalent.

Upper Division Courses**141A. Scandinavian Literature in English Translation. (2) I.**

Mr. Chapman, Mr. Wahlgren

No prerequisite; open to all upper division students.

From earliest times to 1500. Selections from the sagas, Eddic and Scaldic verse, and the ballads.

141B. Scandinavian Literature in English Translation. (2) II.

Mr. Chapman, Mr. Wahlgren

No prerequisite; open to all upper division students.

From 1500 to the present.

142. Readings in the Modern Scandinavian Drama. (2) I.

Mr. Chapman, Mr. Wahlgren

No prerequisite; open to all upper division students.

Readings in the Scandinavian drama since 1850: Ibsen, Björnson, Strindberg, Lagerkvist, and others. Readings in English or, for language credit, in Scandinavian.

143. The Modern Scandinavian Novel. (2) II. Mr. Chapman, Mr. Wahlgren

No prerequisite; open to all upper division students.

The Scandinavian novel since 1875. Readings and discussions of J. P. Jacobsen, L. Dinesen, Lagerlöf, Hamsun, Undset, and others. In English or, for language credit, in Scandinavian.

199. Special Studies in Scandinavian. (1-5) I, II.

Mr. Chapman, Mr. Wahlgren

Graduate Courses

*243. Old Icelandic. (3) I.

Mr. Wahlgren

*244. Old Norse-Icelandic Prose and Poetry. (2) II.

Mr. Wahlgren

297A-297B. Individual Studies for Graduate Students. (1-6; 1-6) I, II.

The Staff

299. Research on Doctoral Dissertation. (1-6) I, II.

Letters and Science List.—All undergraduate courses in history are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Required: (1) course 1A–1B, to be taken in the freshman year, and (2) course 5A–5B or 6A–6B or 7A–7B or 8A–8B, to be taken in the sophomore year, or equivalent preparation for students transferring from other departments or other institutions. History majors who offer 5A–5B in satisfaction of (2) must take 6 units of the United States history in the upper division; those who offer 8A–8B in satisfaction of (2) must take at least 3 units of United States history in the upper division.

Recommended: French, German, Latin, Spanish, Italian, or a Scandinavian language. For upper division work in history, a reading knowledge of one of these is usually essential. For language requirements for graduate work, see pages 164 and 166 of this bulletin.

The Major.—Majors shall fulfill their upper division requirements under Plan A, or, upon admission to Honors candidacy, under Plan B.

Plan A. The Major.

- (1) A minimum of 24 units of upper division work in history, including
 - a. History 111A–111B or History 121A–121B or 6 units chosen from courses numbered 141 to 149 or 6 units chosen from courses numbered 151 to 159.
 - b. History 162A–162B or 6 units chosen from courses numbered 171 to 188 or History 191A–191B.
 - c. Course 197 to be taken in the junior year.
 - d. Course 199 in a field for which preparation has been made to be taken in the senior year.

History majors are required to maintain a "C" average in their 24 units of upper division history as well as a "C" average in all courses counted toward the major.

† Absent on leave, 1963–1964.

§ Sabbatical leave in residence fall semester, 1963–1964.

(2) Six units of approved upper division courses in an allied field. Allied fields include anthropology, art history, economics, geography, philosophy, political science, sociology, and a national literature of the field of the student's emphasis, e.g., English literature in combination with an English history emphasis. Approval of the courses selected must be obtained from a Department of History adviser in writing.

Plan B. The Honors Major. Students are admitted to Honors candidacy by the Departmental Honors Committee.

- (1) Students in the Honors program shall be required to take:
 - a. Six units of Old World history (111 through 159).
 - b. Six units of New World history (160 through 191).
 - c. Course 197 (3 units) in their junior year.
 - d. Course 199 (Honors; 6 units) in their senior year, during which time they shall prepare an Honors thesis.
- (2) Six units of approved upper division courses in an allied field. See paragraph 2 under Plan A.
- (3) At the end of the senior year Honors candidates shall be required to take two comprehensive examinations: one in the student's major field and one in the broader area of historical interpretation.
- (4) Honors candidates may, with consent of the director of the honors program, take up to twelve units of 190 (directed reading) in preparation for the comprehensive examinations.

Admission to Graduate Status

Students who have completed the undergraduate major in history, or the equivalent, will be recommended for admission to graduate work in history provided they meet general admission requirements. Students may be admitted with subject deficiencies, but such deficiencies will have to be made up by taking courses in addition to requirements for an advanced degree program.

Students who hold a bachelor's degree with a science major and who wish to pursue the department's Ph.D. program in the history of science will be exempted from the requirement of an undergraduate major in history, provided that they satisfy the chairman of the Department of History that they are competent to undertake the required program in history. Students in this category will be expected to enroll in any history course or courses, for example, History 197, which the graduate adviser may deem advisable.

Only students who have met all admission and course prerequisites are eligible to enroll in graduate courses in history.

Requirements for the General Secondary Teaching Credential

Consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

Requirements for the Master's Degree

Candidates for the degree of Master of Arts in history may qualify under Plan I or Plan II, except that those electing Plan I may do so only with the prior consent of the instructor who will supervise the thesis.

PLAN I. Thesis Plan. Candidates under Plan I must meet the following requirements in addition to those stated on page 164.

A. Foreign language. A reading knowledge of a foreign language approved by the Department of History (see page 164). The Department recommends that this requirement be met in the first semester of graduate work and requires that it be met before advancement to candidacy for the Master's degree.

B. Units of work. A minimum of 20 units of upper division and graduate courses in history is required. At least 8 units must be chosen from the 200 series courses in history, exclusive of History 298. In addition 8 of the required 20 units must be outside the field of the thesis. No course in the 300 series may be counted toward this requirement.

C. An acceptable thesis written under the direction of a member of the staff whose prior consent has been secured.

PLAN II. Examination Plan. Candidates under Plan II must meet the following requirements in addition to those stated on page 164.

A. Foreign language. Same as under Plan I.

B. Units of work. A minimum of 24 units of upper division and graduate courses approved by the Department is required. Of these, at least 12 units shall be outside the field of the written examination. No courses in the 300 series may be counted toward this requirement. At least 12 units shall be chosen from the 200 series courses in history, exclusive of History 298, and at least six of these units shall be in one graduate seminar.

C. Comprehensive examination. A written comprehensive examination in a field chosen by the candidate from the following list of fields.

Ancient History
Medieval History, 300-1500
Modern European History
Since 1500
British History Since 1485

African History
Far Eastern History Since 1368
United States History Since 1492
Latin American History Since 1492

D. An acquaintance solely with textbook information will not be adequate. The departmental guidance committee will hold a meeting, usually each semester, for students who expect to take the comprehensive examination, to advise them of the department's expectations. The student also is advised to consult lists of recommended readings prepared by the department. Likewise, the candidate is advised to confer at the outset of his graduate work with instructors offering graduate courses in the field in which he proposes to present himself for examination. The examination will ordinarily be given in May and at the close of the Summer Session, on dates announced by the chairman of the department.

Required for the Doctor's Degree

Candidates for the degree of Doctor of Philosophy in history must meet the general requirements set forth on pages 165-169. Attention is directed to the requirements that a program, extending over the full time of study, must be approved by the department. A command of good English, spoken and written, the ability to read French and German, and an acquaintance with general history, are expected of all candidates. The candidates are also required to take at least one one-year seminar in history.

A. Examinations

1. *Foreign Language Examinations.* A reading knowledge of two foreign languages, demonstrated by passing the foreign language reading examinations administered by the Foreign Language Examiner of the Graduate Division, is required of every candidate. Ordinarily these two languages are French and German, though, with the consent of the Department, another foreign language, pertinent to the candidate's major field of study, may be substituted for French or German. However, two Romance or two Germanic languages may not be offered in satisfaction of this requirement. Full-time doctoral candidates should meet this requirement before entering the second year of graduate study and must meet it by the end of their fifth semester of graduate work; otherwise they may be barred thereafter from graduate courses. Graduate students are cautioned that in some fields of history a reading knowledge of a third, even a fourth, foreign language in addition to French and German is essential, though these additional languages are not subject to the formal reading examination.

2. *Qualifying Examinations.* Before he is admitted to candidacy a student must pass a series of qualifying examinations, both written and oral. In these examinations he is expected to show an adequate grasp of the wider fields of historical knowledge and an ability to correlate historical data pertaining to them and to explain their significance. These examinations will be designed to test not merely factual knowledge but also powers of historical analysis and synthesis, critical ability, and capacity for reflective thinking. A knowledge of the history of any area includes a reasonable knowledge of its historiography and bibliography; of its geography; and of its political, cultural, economic, and other historical aspects.

The candidate must offer himself for examination in four fields, one of which may be an approved field in anthropology, economics, geography, language and literature, philosophy, political science, or other allied subject. This allied field must be comparable in size and scope to the history fields listed below. The candidate should select the history fields with consideration to both geographic and chronological distribution and must receive the department's approval of all four fields not less than six months before his qualifying examinations are taken. In each of the fields there shall be a sub-field designated in advance for more intensive examination. To this end he should seek a conference with the departmental guidance committee early in his graduate work. Full-time graduate students must take their qualifying examinations not later than the end of their sixth semester of graduate work. Students who fail to meet this requirement may be barred thereafter from graduate courses.

Fields of Examination

Ancient Greece

Ancient Rome

The Early Middle Ages, 300-1100

The Later Middle Ages, 1050-1500

Byzantine History

The Near East, 500-1500

The Near East, since 1500

African History

History of Science to 1600

History of Science since 1600

*History of Medicine

Europe, 1454-1789

* In cooperation with the School of Medicine.

Europe since 1740
 Russia since 862
 England, 1485-1763
 England since 1763
 The British Empire
 The Far East, 1500-1850
 The Far East since 1800

South and Southeast Asia
 United States, 1492-1800
 United States since 1763
 The American West
 Hispanic America, 1492-1830
 Hispanic America since 1759

The qualifying examinations will include a three-hour written examination in one of the fields offered by the candidate. The field for the written examination will be selected by the Ph.D. committee. The oral examination will cover all four fields and will normally be held shortly after the written examination, but at the discretion of the doctoral committee it may be held as late as six months after the written examination. Both the written and the oral examinations are the responsibility of the committee as a whole. A candidate in the history of science program must select three of the above fields and either the history of medicine or an allied field referred to above. The candidate must also demonstrate a detailed knowledge of the substance and historical development of a particular science, or of a type of engineering or technology, as a sub-field common to the historical fields.

3. Final Examination. The final examination will be oral, and will cover the field within which the dissertation falls. The candidate will be expected to show such a mastery of his special field, and such an acquaintance with the literature, general and special, bearing on it, as would qualify him to give instruction in it to mature students.

B. Dissertation

Each candidate is required to present a dissertation on a subject chosen by him, of such character as to show a thorough mastery of the sources of information and the ability to carry on independent research. It must be in good literary form and suitable for publication. In lieu of the customary type of dissertation, students may in certain cases edit, or translate and edit, some historical source. Such a project involves careful textual criticism, explanatory annotations, and an historical introduction clearly showing the contribution of the source to historical knowledge. The dissertation must be completed within five years of the qualifying examinations. Any extension of this period must be secured annually from the chairman of the department.

Lower Division Courses

1A-1B. Introduction to Western Civilization. (3-3) Yr.

Lecture, two hours; discussion section, two hours.

Mr. Hitchcock, Mr. Weber

A broad, historical study of major elements in the Western heritage from the world of the Greeks to that of the twentieth century, designed to further the beginning student's general education, introduce him to ideas, attitudes, and institutions basic to Western civilization, and to acquaint him, through reading and critical discussion, with representative contemporary documents and writings of enduring interest.

5A-5B. History of England and Greater Britain. (3-3) Yr. Mr. Howard

Lecture, two hours; quiz section, one hour.

The political, economic, and cultural development of the British Isles and the Empire from the earliest times to the present.

†6A-6B. History of American Civilization. (3-3) Yr.

Lecture, three hours; quiz, one hour.

Mr. Berwick, Mr. Meyer, Mr. Smith

A survey of American civilization and culture with emphasis upon the central ideas found embedded in the fine arts, science, philosophy, religion, and law. Guest lecturers from outside the department will be scheduled.

†7A-7B. Political and Social History of the United States. (3-3) Yr.

Beginning either semester.

Mr. Dyer, Mr. Saloutos

Lecture, two hours; quiz section, one hour.

This course is designed for students in the social sciences who want a thorough survey of the political and social development of the United States as a background for their major work and for students in other departments who desire to increase their understanding of the rise of American civilization.

8A-8B. History of the Americas. (3-3) Yr.

Mr. Burr

Lecture, two hours; quiz section, one hour.

A study of the development of the Western Hemisphere from the discovery to the present. Attention in the first semester to exploration and settlement, colonial growth, imperial rivalries, and the achievement of independence. In the second semester, emphasis upon the evolution of the American nations and people in the nineteenth and twentieth centuries.

Upper Division Courses

The prerequisite for course 101 is upper division standing. The prerequisite for all other upper division courses is upper division standing and course 1A-1B, or 5A-5B, or 6A-6B, or 7A-7B, or 8A-8B, or other preparation satisfactory to the instructor.

101. Main Currents in American History. (2) I, II. Mr. Meyer, Mr. Berwick

A one-semester survey of United States history, with emphasis upon the growth and development of a distinctive American culture. Not open to students who have credit for course 7A, 7B, or 6A, 6B, or 8B. Not to be counted toward the major.

111A-111B. History of the Ancient Mediterranean World. (3-3) Yr.

Mr. Brown, Mr. Chambers

A survey of the history of the ancient Mediterranean world from earliest times to the reign of Constantine. The work of the first semester ends with the death of Alexander.

112A-112B. History of Ancient Greece. (3-3) Yr.

Mr. Brown

112A. The Greek city-state. The emphasis will be on the period between the Persian Wars and the rise of Macedon.

112B. The Hellenistic Period. A consideration of the new patterns in government, social life, science, and the arts that appeared between the Macedonian conquest and the decisive intervention of Rome.

113A-113B. History of Rome. (3-3) Yr.

Mr. Chambers

113A. To the death of Caesar. Emphasis will be placed on the development of imperialism and on the constitutional and social struggles of the late Republic.

113B. From the death of Caesar to the time of Constantine. The early empire will be treated in more detail supplemented by a survey of the social and economic changes in the third century.

***116A-116B. History of the Ancient East. (3-3) Yr.**

Mr. Greenfield

A survey of the social, religious, political and literary history of Mesopotamian culture from the rise of the Sumerian city-states to the fall of the Persian Empire. Sumerians, Assyrians, Elamites, Hittites, Hurrians, Amurrites, Phoenicians and Persians will all be discussed.

* Not to be given, 1963-1964.

† Credit will not be given for both 6A and 7A or for both 6B and 7B.

117A-117B. History of Ancient Egypt. (3-3) Yr.

Miss Lichtheim

117A. From early dynastic times to the end of the New Kingdom (ca. 3000 B.C. to 1000 B.C.). The rise of Pharaonic Egypt from tribal beginnings to leading power in the ancient Near East; its peaks of achievement in the Old, Middle, and New Kingdoms.

117B. Prerequisite: course 111A or consent of the instructor. From the end of the New Kingdom to the Arab conquest (1000 B.C. to 640 A.D.). Break-up of the homogeneous Pharaonic civilization; foreign invasions and occupations (Ethiopian, Assyrian, and Persian); Alexander the Great and the Hellenization of Egypt; the Græco-Roman period bilingual culture; the rise of the Coptic church; Egypt under Byzantine rule.

121A. The Early Middle Ages. (3) I.

Mr. White

A survey of religious, intellectual, artistic, social, and economic changes in Europe from the decay of the Roman Empire until about 1050.

121B. The Later Middle Ages. (3) II.

Mr. White

A continuation of 121A, from 1050 to about 1450, with the added consideration of the new scientific movements.

122A-122B. History of the Church to the End of the Middle Ages. (3-3) Yr.

Mr. Ladner

A course on the development of Christian doctrines, on ecclesiastical institutions and on relations between the church and empires, kingdoms, and lay society, from the beginnings of Christianity to the great reform councils of the late Middle Ages.

123A-123B. Byzantine History. (3-3) Yr.

Mr. Vryonis

This course stresses the political, socioeconomic, religious, and cultural continuity in the millennial history of Byzantium. It begins with the reforms of Diocletian and includes such topics as Byzantium's relations with Latin Europe, Slavs, Sassanids, Arabs, and Turks.

124A-124B. History of Technology from Antiquity to the Twentieth Century.

(3-3) Yr.

Mr. Burke

A general survey of the history of technology with some consideration of its changing social, economic, and cultural relationships.

125A-125B. History of Science. (3-3) Yr.

Mr. Burke

Scientists and scientific thought in relationship to societies from Aristotle to the present.

130. History of South Africa. (3) II.

Mr. Galbraith

Changing patterns of South African society from the arrival of the Dutch to the present.

132A-132B. Social, Political, and Intellectual History of Iran. (2-2) Yr.

Mrs. Keddie

132A. To 1500. The interaction of Iran and Islam; the movements; Turkish and Mongol conquerors; classical Persian literature.

132B. 1500-1962. The Safavid Renaissance; The 19th and 20th centuries: Western impact, imperialism, abortive revolution, and intellectual modernization.

133A-133B. History of Africa. (3-3) Yr.

Mr. Thompson

Africa from earliest times to the present with special emphasis on the period since the post-European contact.

134A-134B. Near and Middle East from 600 A.D. (3-3) Yr.

Mr. von Grunebaum

134A. The rise of Islam, the Caliphate, the Crusades, the Turkish and Mongol invasions; the rise of the Ottoman Turks.

134B. The Ottoman and Persian empires, decay and westernization, internal change and reform.

135. Introduction to Islamic Culture. (2) I.

Mr. von Grunebaum

Origins of the Islamic way of life and thought, survey of Islamic history, Islamic literature in English translation, interaction of the Islamic world and Europe in medieval and modern times.

- 136. Islamic Institutions and Political Ideas. (2) II.** Mr. von Grunebaum
Institutions and ideas of government, administration, justice, education, economic and social life in the Islamic Near East as they were before the impact of the West, and as they were affected by that impact.
- 137. Near East in the Nineteenth and Twentieth Centuries. (3) I.** Mr. von Grunebaum
The decay of the Islamic empires and the expansion of Europe, the Eastern Question, westernization and the rise of national states in the Near East.
- 138A-138B. Jewish History. (3-3) Yr.** Mr. Greenfield
Jewish history from Biblical times to our period.
- 139A-139B. History of the Turks. (3-3) Yr.** Mr. Vryonis
A survey of the society, government, and political history of the Turks from earliest times down through the foundation of the Turkish Republic. Arab Muslim and Balkan Christian elements are discussed only when they form a part of the Ottoman Empire. (Students are strongly advised not to begin with the second half of the course.)
- 140A-140B. History of Modern Europe. 1500-1914. (3-3) Yr.** Mr. Anderson
A general survey of European history, 1500-1914.
- *141A-141B. Europe in Transition, 1450-1610. (3-3) Yr.** Mr. Hitchcock
141A. The Renaissance.
141B. The Reformation.
- 141C. Europe in the Seventeenth Century, 1610-1715. (3) I.** Mr. Lossky
European culture, institutions, and politics in the seventeenth century.
- 141D. Europe in the Eighteenth Century. (3) II.** Mr. Lossky
European culture, institutions, and politics from the death of Louis XIV to 1789.
- *141E. Europe, 1789-1815: The French Revolution and the Napoleonic Empire. (3) I.** Mr. Weber
The First Republic and the First Empire: their origins, rise, decline, and fall; their effects in France and Europe.
- 141F. Europe, 1815-1870. (3) I.** Mr. King
The history of Europe from the decline of Napoleon to the end of the Franco-Prussian War; a survey covering international relations and internal conditions of the major European countries, with special stress on the rise of nationalism and liberalism.
- 141G. Europe, 1870-1914. (3) II.** Mr. King
The history of Europe from end of the Franco-Prussian War to eve of First World War. A survey covering internal conditions of major European countries, nationalism, neo-imperialism, the rise of socialism, spread of industrial revolution, and diplomatic background of First World War.
- 141H. Europe Since 1914. (3) II.** Mr. King
Political, economic, and military developments since the outbreak of the First World War.
- *142A-142B. European Diplomacy and Imperialism. (3-3) Yr.** Mr. Hitchcock
A study of European international rivalries primarily in the nineteenth and twentieth centuries.
- 142C. Social History of Europe in the Nineteenth Century. (3) I.** Mr. Anderson
Impact of the rise of industrialism upon the social structure and ideals of Europe; the conflict between the new social forces and those of the Old Regime; emphasis upon the nineteenth century.

* Not to be given, 1963-1964.

142D. Social History of Europe in the Twentieth Century. (3) II.

Mr. Anderson

Impact of war, revolution and the continued expansion of industrialism and of knowledge upon the structure, relations and ideals of the social groups.

142E-142F. Cultural and Intellectual History of Europe from the Renaissance to the French Revolution. (3-3) Yr.

Mr. Weber

Climates of taste and climates of opinion. Educational, moral and religious attitudes; the art, thought and manners of the time in a historical context.

142G-142H. Cultural and Intellectual History of Europe in Nineteenth and Twentieth Centuries. (3-3) Yr.

Mr. Weber

Climates of taste and climates of opinion. The art, thought, and manners of the time in an historical context.

143A. France from 1500 to 1789. (3) II.

Mr. Lossky

The *ancien régime* in France from the end of the fifteenth century to its dissolution in the eighteenth century: its institutions, society, and culture.

143D. France Since the Founding of the Third Republic. (3) I.

Mr. King

(Former number, 149C.)

An intensive study of modern France, emphasizing the nation's search for political and economic stability and for military security in the twentieth century. Recommended preparation: course 1A-1B.

144A. Germany, 1496 to 1806. (3) I.

Mr. Hitchcock, Mr. Anderson

The Holy Roman Empire from the Renaissance to the French revolutionary era. Rise of the German territorial states, especially Prussia. Institutional and cultural developments. Background and origins of modern German nationalism.

144B. Germany Since 1806. (3) II.

Mr. Anderson

A political, economic, social and cultural analysis of the period of national unification, the Bismarckian Reich, the reign of William II, and the wars and revolutions of the twentieth century.

145. The Netherlands in European Affairs, 1450-1795. (3) I.

Mr. Lossky

Emphasis will be on the republican institutions of the Dutch and on the leading role of the Dutch in international affairs, maritime ventures, and the cultural and economic life of Europe, especially in the seventeenth century.

146A-146B. History of Russia. (3-3) Yr.

Mr. Fisher

146A. History of Russia to 1801. Political, economic, and social developments and the foreign relations of Russia in the Kievan, Muscovite, and imperial periods.

146B. History of Russia, 1801-1917. The agrarian problem, the great reforms, the radical movement, the revolution of 1905; Russia in international politics, especially the Near Eastern question.

146C. The Soviet Union. (3) II.

Mr. Rogger

Internal developments and foreign affairs of the Soviet Union from the revolutions of 1917 to the present.

147. Intellectual History of Russia. (3) II.

Mr. Rogger

Topics include the Russian intelligentsia from the eighteenth to the twentieth centuries; Slavophiles and Westerners; Western philosophical influences; and Russian Marxism. Major literary and intellectual figures of all shades of opinion will be included: e.g., Herzen, Bakunin, Mikhailovskii, Plekhanov, and Lenin.

150. Modern British Biography. (3) II.

Mr. Howard

A study of the lives of leaders of Britain, the development of biographical technique and the place of biography in the writing of history.

151A-151B. History of the British People in Modern Times. (3-3) Yr.

Mr. Howard

A study of the main currents in the thought, culture, and social progress of the British people from Henry VIII to the death of Victoria.

- 152. Constitutional History of England. (3) II.** Mr. Howard
Prerequisite: course 5A-5B or consent of the instructor.
A study of the institutions, social and political forces, and ideas which contributed to the development of the British constitution, especially during the formative period before the Glorious Revolution.
- 153. Renaissance England. (3) I.** Mr. Curtis
A study of the intellectual forces and the social, economic, and political conditions in England in the age of the Renaissance. The Reformation, the Elizabethan era, and the Puritan revolution will receive attention.
- 154. Great Britain in the Seventeenth Century. (3) II.** Mr. Howard, Mr. Curtis
A study of the intellectual forces and the social, economic, and political conditions in England during the seventeenth century.
- 155. Great Britain in the Eighteenth Century (1688-1783). (3) I.** Mr. Howard
The structure of the British government, society, and economic life under the Hanoverians.
- 156. Great Britain in the Nineteenth Century. (3) I.** Mr. Moore
British culture, institutions, and politics in the Great Century from the French Revolution to the death of Victoria.
- 157. Great Britain in the Twentieth Century. (3) II.** Mr. Moore
The changing British scene in war and peace from the accession of Edward VII to the present.
- 158A-158B. The British Empire Since 1783. (3-3) Yr.** Mr. Galbraith
The political and economic development of the British Empire, including the evolution of colonial nationalism, the development of the commonwealth idea, and changes in British colonial policy. The work of the first semester covers to 1900.
- 159. History of Canada. (3) I.** Mr. Galbraith
A survey of the growth of Canada into a modern state from its beginnings under the French and British colonial empires.
- 160. History of the Caribbean. (3) I.** _____
- 161A-161B. Modern History of Spain and Portugal. (3-3) Yr.** Mr. Payne
Political, ideological and economic history of Spain and Portugal from the late Middle Ages to the present.
- 162A-162B. Latin America from the Discovery to the Present. (3-3) Yr.** Mr. Burr
- 166. History of Mexico. (3) I.** Mr. Burr
The development of the viceroyalty of New Spain and the Mexican nation, with emphasis upon the problems of the period since Diaz.
- 169. History of Inter-American Relations. (3) I.** Mr. Burr
Emphasizes the historical development of a distinctive system of international relations among the nations of the Western Hemisphere, from 1808 to the present.
- 171A. The United States: Colonial Period. (3) I.** Mr. Smith
Political and social history of the Thirteen Colonies and their neighbors; European background, settlement and westward expansion, intercolonial conflicts, beginnings of culture, colonial opposition to imperial authority.
- 171B. The United States: The New Nation. (3) I, II.** Mr. Smith, Mr. Berwick
Political and social history of the American nation from 1750 to 1801, with emphasis upon the rise of the New West; revolution, confederation, and union; the fathers of the Constitution.

172. The United States: The Formative Era, 1801-1850. (3) II.**Mr. Berwick**

Political, social, and economic history of the United States in the Age of Jefferson and Jackson. Emphasizes the rise of political parties; westward expansion and the roots of intersectional conflicts; Utopian experiments; folklore, language, science, and religion; and the emergence of an American national character.

173A. The United States: Civil War and Reconstruction. (3) I. **Mr. Dyer**

The topics studied will include: the rise of sectionalism, the anti-slavery crusade; the formation of the Confederate States; the war years; political and social reconstruction.

173H. The United States, 1875-1900. (3) II.

American political, social, and institutional history in a period of great change. Emphasis on the altering concepts of the role of government and the responses to that alteration.

174A-174B. The United States: The Twentieth Century. (3-3) Yr.**Mr. Mowry**

The political, economic, intellectual, and cultural aspects of American democracy in the twentieth century.

175. History of American Capitalism Since the Civil War. (3) I.

Recommended preparation: courses 7A-7B and economics 13.

Mr. Saloutos

A study of the changes in agriculture, industry, labor, banking, transportation, and commerce in a capitalist society, and of some of the prominent personalities who made these changes possible.

176. American Reform Movements and Reformers. (3) II. **Mr. Saloutos**

A study of educational, monetary, labor, and agrarian reforms advocated in the nineteenth and twentieth centuries.

177. Intellectual History of the United States. (3) I.**Mr. Meyer**

The principal systems of ideas about man and God, nature and society, which have been at work in American history. Emphasis on the sources of these ideas, their connections with one another, and their expression in great documents of American thought.

178A-178B. American Diplomatic History. (3-3) Yr.

178A. The establishment of an independent foreign policy, the territorial expansion of the United States, and the emergence of a world power.

178B. The role of the United States in the twentieth-century world.

179. Constitutional History of the United States. (3) I and II. **Mr. Dyer**

Prerequisite: 6 units of United States history or government, or consent of the instructor.

A study of the Federal Constitution from the historical point of view, with emphasis upon the constitutional convention and the constitutional controversies of the nineteenth century.

180. Social History of the United States Since 1800. (3) II. **Mr. Meyer**

An historical study of the character and values of the American people as affected by regions, classes, and economic change; with particular attention to the cultural roles of women, businessmen, Negroes, and ethnic groups.

181. The American West. (3) I.**Mr. Caughey**

Recommended preparation: course 8A-8B.

A study of the West as frontier and as region, in transit from the Atlantic seaboard to the Pacific, and from the seventeenth century to the present.

182. The Social History of American Art. (3) II.

A study of the relationship of painting, sculpture, architecture, music, and, to a limited degree, of literature to the American culture.

183. History of California. (3) II.**Mr. Caughey**

Recommended preparation: course 8A-8B.

The economic, social, intellectual, and political development of California from the earliest times to the present.

190. Directed Reading for Honors. (1-12) I, II. The Staff
Reading intended to fill gaps in the historical training of individual honors students. Reports on reading will be made at regular intervals.

191A. History of the Far East. (3) I. Mr. Han, Mr. Wilson, Mr. Wolpert
China and Japan from the earliest times to the beginning of Westernization.

191B. History of Far East. (3) II. Mr. Han, Mr. Wilson
Transformation of the Far East in modern times under the impact of Western civilization.

192A-192B. The Twentieth-Century Far East. (2-2) Yr. Mr. Han
A study of the social, economic, and political development of the Far Eastern countries since 1898, with special attention to the changes in ideas and institutions after a century of Western impact.

193. Diplomatic History of the Far East. (3) II. Mr. Wilson
The role of Far Eastern states in the international community beginning with the establishment of the Treaty System in China and the opening of Japan to intercourse with the rest of the world in 1854.

194A-194B. History of Modern China. (3-3) Yr. Mr. Han
Final consolidation of the Tungus peoples in Manchuria and their rule over China; social, economic, political, and literary achievements; movements for modernization toward the end of the nineteenth century; the founding of the Republic.

195A-195B. History of Modern Japan. (2-2) Yr. Mr. Wilson
The political, economic, and cultural development of Japan since the establishment of the Tokugawa Shogunate in 1603.

196A. Early History of India. (3) I. Mr. Wolpert
Introduction to the civilization and institutions of India. A survey of the history and culture of the South Asian subcontinent from the earliest times to the founding of the Mughal Empire.

196B. Recent History of India and Pakistan. (3) II. Mr. Wolpert
History of the South Asian subcontinent from the founding of the Mughal Empire, through the eras of European expansion, British rule, and the nationalist movement, to the present.

196C. History of Southeast Asia. (3) II. Mr. Wolpert
The history and culture of modern Burma, Thailand, Laos, Cambodia, Vietnam, Malaya, Indonesia, and the Philippines from earliest times. Emphasis on the expansion of European influence, and the growth of Nationalism in Burma, Indonesia, Indo-China, and the Philippines.

197. History and Historians. (3) I, II. The Staff
Required of all history majors in their junior year.
A study of historiography, including the intellectual processes by which history is written, the results of these processes, and the sources and development of history. Attention also to representative historians.

199. Special Studies in History. (3) I, II. The Staff
An introduction to historical method, followed by individual investigation of selected topics.
To be taken by all history majors in their senior year in a field for which specific preparation has been made in the junior year. Assignment to sections is made only by the departmental coordinator for registration in this course. Sections 1, 2, 9, 10, and 12 are rarely given more than once each year.

Section 1. Ancient History

Mr. Brown, Mr. Chambers

Section 2. Medieval History.

Mr. White

Section 3. European History.

Mr. Hitchcock

Section 4. European History.

Mr. King

Section 5. English History.

Mr. Howard, Mr. Curtis

Section 6. American Colonial History.

Mr. Berwick, Mr. Smith

Section 7. United States History.

Section 8. Recent United States History.

Mr. Meyer

Section 9. Hispanic-American History.

Mr. Burr

Section 10. Pacific Coast History.

Mr. Caughey

Section 11. The British Empire.

Mr. Galbraith, Mr. Wolpert

Section 12. The Far East.

Mr. Han, Mr. Wilson

Section 13. The Near East.

Mr. von Grunebaum

Graduate Courses

202. Advanced Historiography. (3) I, II.

The Staff

A. Ancient and Medieval.

B. Modern European.

C. British.

D. American.

E. Latin American.

F. The Near East.

G. The Far East.

205A-205B. Ancient Political Institutions. (3-3) Yr.

Mr. Chambers

Detailed study of selected topics in ancient history. Greek and Latin will not necessarily be required.

208. Topics in European History. (3)

The Staff

A graduate course involving reading, lecturing, and discussion of selected topics in Modern European History. This course does not fulfill the seminar requirement for the Ph.D. degree.

215A-215B. Westernization in the Arabic-Speaking World. (2-2) Yr.

Prerequisite: History 134A-134B or equivalent.

Mr. von Grunebaum

Impact of the West on the Arabic-speaking world including North Africa since 1800 A.D. and the reactions of the various sections of the Arab world, especially in their religious, social, and cultural aspects.

251A-251B. Seminar in Ancient History. (3-3) Yr.

Mr. Brown

252A-252B. Seminar in the History of the Medieval Church in the West.

(3-3) Yr.

Mr. Ladner

Emphasis of the Medieval Church in the West and the Holy Roman Empire.

253A-253B. Seminar in the Renaissance and Reformation. (3-3) Yr.

Mr. Hitchcock

Ordinarily the first semester will be concerned with Renaissance problems and the second with the Reformation.

254A-254B. Seminar in Medieval History. (3-3) Yr.

Mr. White

255A-255B. Seminar in the History of Science. (3-3) Yr.

Studies in the history of science.

256A-256B. Seminar in Early Modern European History. (3-3) Yr.

Mr. Lossky

Studies in European political and cultural history of the seventeenth and eighteenth centuries.

257A-257B. Seminar in Late Modern European History. (3-3) Yr.

Mr. King

Studies in continental European history since the earlier nineteenth century.

258A-258B. Seminar in Modern European History. (3-3) Yr.

Mr. Anderson

Studies in European political and cultural history of the nineteenth and twentieth centuries.

259A-259B. Seminar in Russian History. (3-3) Yr. Mr. Fisher, Mr. Rogger

Prerequisite: the student should have a reading knowledge of at least one European language.

Studies in the history of Russia and other Slavic countries.

260A-260B. Seminar in English History. (3-3) Yr.

Mr. Howard

Studies in the later Stuart and early eighteenth-century periods.

261A-261B. Seminar in British Empire History. (3-3) Yr.

Mr. Galbraith

Studies in nineteenth- and twentieth-century imperial history.

262A-262B. Seminar in English History. (3-3) Yr.

Mr. Curtis

Studies in Tudor and early Stuart England.

263A-263B. Seminar in African History. (3-3) Yr.

Mr. Thompson

Studies in African history.

264A-264B. Seminar in Modern European History. (3-3) Yr.

Mr. Weber

The relationship of intellectual movements and political and socio-economic developments in recent European history.

265A-265B. Seminar in Hispanic-American History. (3-3) Yr.

Mr. Burr

Studies in the colonial and early national periods.

268A-268B. Seminar in Near Eastern History. (3-3) Yr.

Studies in the history of the Near East.

Mr. von Grunebaum

269A-269B. Seminar in United States History. (3-3) Yr.

Mr. Smith

Studies in the colonial period.

270A-270B. Seminar in United States History. (3-3) Yr.

Mr. Mowry

Studies in the recent United States and the recent American West.

271A-271B. Seminar in United States History. (3-3) Yr.

Mr. Saloutos

Studies in recent United States history.

272A-272B. Seminar in United States History. (3-3) Yr.

Mr. Dyer

Studies in political and social problems of the middle nineteenth century.

273A-273B. Seminar in United States History. (3-3) Yr.

Mr. Meyer

Studies in American intellectual history.

274A-274B. Seminar in American History. (3-3) Yr.

Mr. Caughey

Studies of the American West.

279A-279B. Seminar in Far Eastern History. (3-3) Yr.

Mr. Han

280A-280B. Seminar in South and Southeast Asia. (3-3) Yr.

Mr. Wolpert

Ideas and institutions of South Asia and their influence in Southeast Asia.

290. Research in History. (1 to 6) I, II.

The Staff

Open only to students who have passed the qualifying examination for the doctor's degree.

298. Directed Studies. (1-3) I, II.

The Staff

Related Courses in Other Departments

The following courses are offered in the School of Medicine and are accepted toward the history of medicine and history of science programs.

Anatomy 240. History of Medicine. (1)

Anatomy 252. Seminar in Medical History. (2)

HOME ECONOMICS

(Department Office, 1209 Public Health Building)

Dorothy Leahy, Ed.D., Professor of Education.

Helen B. Thompson, Ph.D., Professor of Home Economics, Emeritus.

Frances Obst, Ed.D., Associate Professor of Home Economics.

Marguerite G. Mallon, Ph.D., Emeritus Associate Professor of Home Economics.

Olive Hall, Ph.D., Assistant Professor of Education.

Clarice H. Lindsey, M.S., Assistant Professor of Home Economics.

Theodora Corey, M.A., Lecturer in Home Economics.

Mary Rogers, M.S., Associate in Home Economics.

The degree of Bachelor of Science with a major in home economics will not be awarded after June 30, 1965.

The specializations in clothing, textiles, and related arts; food technology; and general home economics are to be discontinued and new students will not be admitted to these majors after June 30, 1961. Continuing, reëntering and transfer students in these majors may proceed toward the bachelor's degree as indicated below, and should consult their advisers or the Home Economics office as to their programs.

The specialization in home economics teacher education will be continued. Students interested in this major should consult the School of Public Health section of this bulletin, page 152.

The specialization in home economics teacher education will be continued until June 30, 1965, as an interdepartmental curriculum in the College of Letters and Science. See page 85 of this bulletin for the curriculum course requirements. New students will not be admitted to this curriculum.

Continuing, reëntering and transfer students meeting the College of Letters and Science requirements may proceed toward the bachelor's degree as follows: students registering in the fall semester of the academic year 1963-1964, with 55 units or more; and 1964-1965, with 85 units or more.

Students meeting the requirements of the former College of Applied Arts (now the College of Fine Arts) may register in all specializations according to the following schedule:

Transfer students may register during the academic year 1963-1964 with 90 or more acceptable units of advanced standing.

Continuing students may register in the fall semester, 1963, with 90 or more units in the former College of Applied Arts.

Reëntering students, formerly in the College of Applied Arts, may register during the academic year 1963-1964 with 90 or more units.

Letters and Science List.—Course 170 is included in the Letters and Science List of Courses. For regulations governing this list see page 72.

Requirements for the Teaching Credentials

Consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION for the General Elementary Secondary and Junior College Credential requirements.

Requirements for the Master's Degree

Requirements for the degree of Master of Science in home economics may be met by Plan I or by Plan II. This degree will not be awarded after June 30, 1965. New graduate students in home economics will not be permitted to enter this program. Continuing and reëntering students should contact the Home Economics office for further information about their programs. For graduate division requirements, see pages 162-165. A reading knowledge of a foreign language is not required. In addition to the general scholarship requirements for graduate status, the candidate for the degree must present an undergraduate major substantially equivalent to that offered at University of California, Los Angeles. If the student is deficient in this prerequisite, he must fulfill it by work taken prior to and in preparation for the 20- or 24-units requirement for the master's degree.

Lower Division Courses

15. Selection of House Furnishings. (3) I, II. Miss Obst
Lecture, two hours; laboratory, four hours. Prerequisite: Art 30A recommended.
A study of floor plans, furniture selection and arrangement, suitable materials for floor coverings, wall decorations, curtains, draperies, and upholstery, table linens, china, glass, and silver.
16. Introduction to Clothing and Textiles. (3) I, II. Mrs. Lindsey
Lecture, one hour; laboratory, six hours.
A study of the fundamental principles of clothing construction including a study of textiles in relation to their selection and use.

Upper Division Courses

135. Laboratory in Child Study. (3) I, II. Mrs. Rogers
Prerequisite: Psychology 112 and Sociology 126 or consent of the instructor.
Further study of the growth and development of children, with emphasis on the pre-school period. Observation and participation in the nursery school with discussion of nursery school theory and practice.
145. Home Management Problems. (3) I, II. Miss Obst
Lecture, two hours; laboratory and demonstration, two hours. Prerequisite: consent of the instructor.
A study of the management of the various resources available to the family with a view to promoting family well-being and satisfaction.

- 146. Home Management Laboratory. (2) I, II.** Miss Corey
Laboratory: six hours. Prerequisite or concurrent: course 145, Nutritional Science 11.
Experience in group living for five weeks with the guidance of an instructor.
- 155. House Planning and Furnishings. (2) II.** Miss Obst
Lecture, one hour; laboratory, three hours. Prerequisite: course 15, Art 30A.
Planning the home with reference to livability, selection of furnishings and equipment, arrangements for minimizing work, and adaptation to the needs of families of varying interests and incomes.
- 160. Fundamentals of Textiles. (2) I, II.** Mrs. Lindsey
The study of textile fabrics, fibers, and the processes used in their manufacture as a basis for selection and use. Not open to those who have taken course 16.
- 161. Decorative Textiles. (2) I, II.** Miss Obst
Prerequisite: course 16 or 160.
Studies in the appreciation of the construction and historical background of woven, printed, and embroidered textiles, handmade laces; the damasks, brocades, and prints of China, Persia, and India; French tapestries; oriental rugs; French and English prints, and early American textiles.
- 170. History and Development of the Clothing Industry. (3) II.** Mrs. Lindsey
A study of the growth, location, influences of technological advances, designers, legislation, organizations, publications, fashions, and problems of production, promotion, and distribution of ready-to-wear upon the clothing and textile industry.
- 172. Advanced Clothing. (3) I, II.** Miss Corey, Mrs. Lindsey
Lecture, one hour; laboratory, six hours. Prerequisite: course 16.
Problems of clothing construction, including the adaptation of commercial patterns and the selection, care, and use of equipment.
- 175. Tailoring Problems. (3) I, II.** Mrs. Lindsey
Lecture, two hours; laboratory, four hours. Prerequisite: course 172.
The design, fashion, construction, and economic factors involved in selecting and in making tailored garments.
- 176. Advanced Dress Design. (3) I, II.** Miss Corey
Lecture, two hours; laboratory, four hours. Prerequisite: course 172.
Creation of original designs through French draping and flat pattern. Selection and manipulation of fabrics.
- 177A-177B. Pattern Analysis. (3-3) Yr.** Miss Corey
Lecture, two hours; laboratory, four hours. Prerequisite: course 176A.
A study of pattern drafting and grading in relation to the problem of design, with consideration of personal and industrial needs. Standardization of size and relationship to problems of production and consumption.
- 181. Problems in Home Economics. (2) I, II.** Miss Leahy
Prerequisite: course 370.
A study of special problems in the teaching of homemaking selected in accordance with the needs of the student. Emphasis is placed on the contribution of homemaking to school and community life.
- 199. Special Studies in Home Economics. (1-3) I, II.** The Staff
Prerequisite: senior standing and consent of the instructor.

Graduate Courses

- 229. Methods of Research in Home Economics. (2) I, II.** Miss Hall
A study of the methods of research applicable to the various areas of home economics. Individual guidance in research in a selected problem. Assistance in the statistical treatment of data.
- 271. Seminar in Home Economics Education. (2) I, II.** Miss Hall
Review of recent and current developments in the teaching of home economics.

376 / HOME ECONOMICS; INTERDISCIPLINARY COLLOQUIA

272. Seminar in the Supervision of Home Economics. (2) II. Miss Leahy

Prerequisite: teaching experience.

Individual investigation of the nature and function of supervision of home economics at all school levels.

273. Seminar in the Organization and Administration of Home Economics.

(2) I.

Miss Leahy

A review of the literature, and intensive individual study of problems concerned with the organization and administration of home economics at all school levels.

282A-282B. Selected Problems. (2-4; 2-4) Yr.

The Staff

Laboratory or field investigation in a specialized area of home economics.

Professional Course in Method

370. Principles of Home Economics Teaching. (3) I, II. Miss Leahy

Prerequisite: 12 units of upper division course work in home economics.

A survey and evaluation of methods and materials used in teaching home making in the secondary school.

🌿 HORTICULTURE

For courses in horticulture, see under Floriculture and Oriental Horticulture, page 321, and Plant Biochemistry, page 499.

🌿 HUMANITIES

Pier-Maria Pasinetti, Ph.D., *Professor of Italian.*

Bonnie Thoman Culotta, M.A., *Associate in the Humanities.*

Letters and Science List.—Course 1A-1B is included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

1A-1B. World Literature. (3-3) Yr.

Mr. Pasinetti

A course in world literature for the general student. Recommended as a course to satisfy requirement (G) (1) in the College of Letters and Science.

Related Course in Another Department

Integrated Arts 1A-1B. Man's Creative Experience in the Arts. (3-3)

🌿 INTEGRATED ARTS

Letters and Science List.—Course 1A-1B is included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

1A-1B. Man's Creative Experience in the Arts. (3-3) Yr.

Mr. Trissel

The most significant aspects of the arts through the ages, from primitive art to modern mass communication, literature excluded. A nontechnical presentation for the general student.

🌿 INTERDISCIPLINARY COLLOQUIA

Organized colloquia involving several disciplines are offered from time to time in conformity with faculty and student interests. They are open to all

faculty members and to graduate students assigned to the colloquia by their advisers. Graduate credit is not awarded directly, but may be given through appropriate departmental courses.

African Studies

Committee in charge: Hilda Kuper, Research Fellow of the African Studies Center (Chairman); Robert E. Baldwin, Economics; James S. Coleman, Political Science; Leo Kuper, Sociology; M. G. Smith, Anthropology; Benjamin E. Thomas, Geography; and Leonard Thompson, History.

A colloquium on Africa in the social sciences will meet biweekly throughout the year. Papers presented and discussed in this colloquium will focus each semester upon a different integrating theme, such as Urbanization and Migration, Development and Adaptation of Legal Systems in Africa, and similar topics amenable to interdisciplinary discourse.

Behavioral Sciences

Committee in charge: Jacob Marschak, Business Administration and Economics (Chairman); John L. Barnes, Engineering (pro tem); George W. Brown, Business Administration and Engineering (on leave); Mary A. B. Brazier, Biophysics; Karl Brunner, Economics; Leo Breiman, Mathematics; Edward C. Carterette, Psychology; Anthony R. Oberschall, Sociology; Charles B. Tompkins, Mathematics.

A colloquium on mathematics in the behavioral sciences will meet biweekly throughout the year. Papers presented and discussed in this colloquium use mathematical language to improve communication between behavioral sciences, and also between these sciences and other branches of knowledge.

Meetings are announced in the University Calendar.

Computer Sciences

Committee in charge: C. B. Tompkins, Mathematics (Chairman); G. Brown, Business Administration; G. Estrin, Engineering; F. H. Hollander, Computing Facilities; F. J. Massey, Public Health; J. L. Selfridge, Computing Facilities.

A colloquium on computer sciences will meet biweekly to study technical aspects of application of computers to the solution of scientific research problems. Much attention will be devoted to mechanical languages and to other aspects of the problem of communication between researcher and machine. All facets of the progress of a problem through a computation will be considered; these will include numerical analysis and related mathematical features, translation to codes and related logical features, structure of machines and related engineering features. Excerpts from the proceedings of the colloquium may be submitted for publication in The University of California Publication in Automatic Computation.

Information concerning times of meetings, and general program may be obtained from the Offices of the UCLA Computing Facility.

Political Change

Committee in charge: David A. Wilson, Political Science (Chairman); Robert Baldwin, Economics; James S. Coleman, Political Science; Russell H. Fitzgibbon, Political Science; Leo Kuper, Sociology.

A colloquium on the theoretical analysis of political change will meet biweekly throughout the year. Papers presented will emphasize the interaction of the phenomena which are the subject matter of the traditional social science disciplines in the processes of change.

IRRIGATION AND SOIL SCIENCE

(Department Office, 97 Physics Building)

Arthur F. Pillsbury, Engr., *Professor of Irrigation (Chairman of the Department)*.

Owen R. Lunt, Ph.D., *Associate Professor of Soil Science*.

Johann J. Oertli, Ph.D., *Assistant Professor of Soil Science*.

Completion of the curriculum in irrigation science is possible only on the Davis campus and for the soil science curriculum only on the Berkeley and Davis campuses. See PROSPECTUS OF THE COLLEGE OF AGRICULTURE and consult the appropriate advisers.

Graduate Study.—Graduate work may be undertaken in aspects of irrigation and soil science that relate to plant science. See page 500 of this bulletin for description.

Upper Division Courses

*101. Introduction to Water and Soil. (3) I. Mr. Lunt, Mr. Pillsbury
Lecture, three hours. Prerequisite: introductory college chemistry and physics.
The nature, characteristics, and distribution of soils, including soil morphology, physics, and chemistry. The principles involved in management of soil and water resources; soil-plant-water-nutrition relationship and irrigation and reclamation design and operation.

*101L. Laboratory, Introduction to Water and Soil. (1) I. Mr. Lunt
Laboratory, three hours. Prerequisite: course 101 (will usually be concurrent).
Optional laboratory for course 101.

110. The Soil as a Medium for Plant Growth. (3) I. Mr. Lunt
Lecture, three hours. Prerequisite: Chemistry 1A-1B and 8, or the equivalent; Physics 2A-2B. Recommended: introductory course in geology.

Soil chemistry, microbiology, and physics, including water relations, as they influence the mineral nutrition of plants and soil productivity.

199. Special Studies. (2-4) I, II. The Staff
Prerequisite: senior standing and consent of the instructor.

Graduate Course

280A-280B. Research in Irrigation and Soils. (2-6; 2-6) Yr.
The Staff (Mr. Pillsbury in charge)

* Not to be given, 1963-1964.

ISLAMIC STUDIES

The program for the Master of Arts in Islamic Studies provides specialized training primarily for the following classes of students: (1) students seeking a general education and desiring a special emphasis in this particular area; (2) students who plan to live and work in this area, whose careers will be aided by a knowledge of the peoples, languages, and institutions (such careers might be centered on teaching, research, business, engineering, journalism, librarianship, or government service); (3) students preparing for advanced study in the language, peoples, or institutions of the area. Subject to the limitations indicated below, the special course of studies is formulated for each candidate according to his experience and requirements.

Requirements for the Bachelor's Degree.—For details concerning the curriculum in Near Eastern Studies leading to the degree of Bachelor of Arts see page 88.

Requirements for the Master's Degree

1. General Requirements (as throughout the Graduate Division). See page 162.

2. Admission to the Program. The degree of Bachelor of Arts in Near Eastern Studies of the University of California, Los Angeles, or its equivalent is required. The Committee to Administer the Curriculum in Near Eastern Studies will pass on the application for admission to the program.

3. Plan. The program is offered under both Plan I (Thesis Plan) and Plan II (Comprehensive Examination Plan). The selection of a plan will be decided upon by the candidate and his adviser and approved by the committee.

4. Language Requirements. Candidates for the Degree of Master of Arts in Islamic Studies will be required to show proficiency in either French or German, in addition to the language or languages of their field of specialization. In view of the scholarly literature in the field, candidates are earnestly advised to acquaint themselves with a second European language in which relevant material for their studies is available.

5. Program. The program of each candidate will be especially prescribed by the Advisory Committee. The program should, wherever possible, be established before the candidate enters his first semester of work. The program will be planned to allow emphasis on Arabic, Persian or Turkish (Islamic) Studies and is intended for the student desiring a broad knowledge of the Arab (Islamic) world or to prepare for an academic career in this field. Courses of study which combine concentration on certain of the social sciences with a Near Eastern area specialization are also possible.

Program in Arabic, Persian or Turkish (Islamic) Studies.

The program of each candidate in Arabic, Persian or Turkish (Islamic) Studies will, in addition to Arabic, Persian or Turkish, include a full year's course in one of the remaining two languages. The additional required units will be chosen by the candidate from History 202F, 215A–215B, 268A–268B; Sociology 236, 237; political science, and at his option, courses in closely related fields, such as Indian history, anthropology, or geography of the area.

Other study arrangements in the Near Eastern field are available through the Department of Near Eastern and African Languages.

Requirements for the Ph.D. Degree in Islamic Studies

1. For the general University requirements, see pages 165-169.
2. Requirements for admission to the program.

Competence in one of the relevant Near Eastern languages or an undergraduate major in one of the social sciences affiliated with the Program, that is, at present, in alphabetical order, history, political science and sociology, with some specialization in the Near East. The guidance committee may require the student to take additional work to make good any deficiencies in his undergraduate program.

3. Requirements of the Program.

(a) Upon beginning his studies under this Program, the candidate will present to the Chairman of the Committee to Administer the Curriculum in Near Eastern Studies a written statement of his preparation in one of the two modern languages required by the University regulations (generally French and German) at the beginning of his first semester in residence. For work in some fields, a reading knowledge of Italian and/or Spanish is essential.

(b) In the first year (normally two semesters) of graduate study, the candidate will follow essentially the existing master's program in Islamic (Arabic, Persian or Turkish) Studies which calls for two Near Eastern languages. (See 5 above.)

(c) Normally the candidate will devote the second year to suitable courses and seminars in the departments affiliated with the Program, these courses to be determined by the candidate's special advisory committee (to be appointed by the Chairman of the Committee to Administer the Curriculum in Near Eastern Studies); after which he will complete his qualifying examinations and be advanced to candidacy. Of course, this period may be curtailed or expanded according to circumstances.

(d) A final year (which under university rules cannot be curtailed) will normally be devoted by the candidate chiefly to the preparation of his dissertation, after which he will take his final oral examination. During this year the candidate may satisfy the residence requirements either by taking additional seminars or by registering in Islamics 299.

Qualifying Examination

The qualifying examination will, depending on the social science concentration elected by the student, consist (if, for example, his chosen field be history) in examinations on the whole range of Near Eastern history, one field of sociology (or political science) and the testing of the student's knowledge of his chosen Near Eastern languages and their literatures. Qualifying examinations for students with different concentrations will be constructed accordingly.

Lower Division Courses†**Near Eastern Languages**

Arabic 1A-1B. Elementary Arabic. (4-4) Yr.

Hebrew 1A-1B. Elementary Hebrew. (4-4) Yr.

† For additional courses, see relevant departments.

Upper Division Courses†

Anthropology and Sociology. Anthropology 111A. Introduction to Egyptian Archaeology. (3)

111B. Egyptian Archaeology. (3)

111C. Islamic Art and Archaeology. (3)

111D. Coptic and Byzantine Archaeology. (3)

*123. Nomadic Societies. (3)

*Sociology 166. Population and Society in the Middle East. (3)

*167. Comparative Sociology of the Middle East. (3)

Art 111A. Indian Art. (3)

199. Special Studies in Art. (1-4)

Geography 126. The Geography of Africa. (3)

127. The Geography of the Middle East. (3)

History *116A-116B. History of the Ancient East. (3-3) Yr.

117A-117B. History of Ancient Egypt. (3-3) Yr.

123A-123B. Byzantine History. (3-3) Yr.

132A-132B. Social, Political, and Intellectual History of Iran. (2-2) Yr.

134A-134B. Near and Middle East from 600 A.D. (3-3) Yr.

135. Introduction to Islamic Culture. (2)

136. Islamic Institutions and Political Ideas. (2)

137. The Near East in the Nineteenth and Twentieth Centuries. (3)

138A-138B. Jewish History. (3-3)

139A-139B. History of the Turks to 1687. (3-3) Yr.

Near Eastern and African Languages

African Languages 101A-101B. Introductory Swahili. (4-4) Yr.

102A-102B. Advanced Swahili. (3-3) Yr.

105A-105B. Introductory Bambara. (3-3) Yr.

*106A-106B. Luganda. (3-3) Yr.

107A-107B. Introductory Kpelle. (3-3) Yr.

108A-108B. Introductory Xhosa. (3-3) Yr.

*109A-109B. Introductory Twi. (3-3) Yr.

112A-112B. Introductory Hausa. (3-3) Yr.

ITALIAN

(Department Office, 342 Royce Hall)

Carlo L. Golino, Ph.D., *Professor of Italian (Acting Chairman of the Department)*.

Pier-Maria Pasinetti, Ph.D., *Professor of Italian*.

Charles Speroni, Ph.D., *Professor of Italian*.

Franco Fido, Dottore in Lettere, *Assistant Professor of Italian*.

Giuseppe Velli, Dottore in Lettere, *Assistant Professor of Italian*.

Franca Schettino, Ph.D., *Instructor in Italian*.

Alfredo Brigola, M.A., *Lecturer in Italian*.

Margherita Jones-Cottino, Dottore in Lettere, *Acting Instructor in Italian*.

Renata Landres, M.A., *Associate in Italian*.

Maria Russell, M.A., *Associate in Italian*.

Althea Soli, M.A., *Lecturer in Italian*.

Letters and Science List.—All undergraduate courses in Italian are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Required: Italian 1, 2, 3, 4, 102A-102B, or the equivalent to be tested by examination; Latin 1 or two years of high school Latin. Recommended: History 1A-1B; Philosophy 6A-6B, and an additional foreign language.

The Major.—Twenty-four units of upper division courses (exclusive of 102A-102B), of which at least 20 must be in Italian. Four units may be taken in French, German, Greek, Latin, Portuguese, or Spanish literature.

As electives the department recommends courses in (1) European history, anthropology, geography, political institutions, and international relations, particularly as they relate to Italy; (2) English literature; (3) French, German, Greek, Latin, Portuguese, and Spanish language and literature.

Requirements for Admission to Graduate Status.—Students who have completed the undergraduate major in Italian, or the equivalent, will be recommended for graduate work in Italian provided they meet the general requirements for admission to regular graduate status.

Requirements for the General Secondary Credential

Consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

* Not to be given, 1963-1964.

Requirements for the Master's Degree

For the general requirements, see pages 162-165. Two years of high school Latin, or the equivalent, are a departmental prerequisite for the master's degree in Italian. A reading knowledge of one other foreign language is also required of each candidate.

The department usually follows the comprehensive examination plan, but under certain conditions the thesis plan may be approved. The master's comprehensive examination consists of two three-hour written examinations. The student will be expected to show: (1) a fair knowledge of the history of Italian civilization, and (2) a more thorough acquaintance with the history of Italian literature from the thirteenth century to the present time. In a final oral examination the student will be examined on his general preparation and background.

Students who are accepted on the thesis plan do not take the written final examinations but will take an oral examination on the field of the thesis, as provided on page 164.

Requirements for the Doctor's Degree

The major for the Ph.D. degree in Romance Languages and Literature is described on page 543 of this bulletin.

Lower Division Courses

1. **Elementary Italian—Beginning.** (4) I, II. Mr. Velli in charge
This course corresponds to the first two years of high school Italian.
2. **Elementary Italian—Continued.** (4) I, II. Mr. Velli in charge
Prerequisite: course 1 or two years of high school Italian.
3. **Intermediate Italian.** (4) I, II. Mr. Velli in charge
Prerequisite: course 2 or three years of high school Italian.
4. **Intermediate Italian—Continued.** (4) I, II. Mr. Velli
Prerequisite: course 3 or four years of high school Italian.
- 8A-8B-8C. **Italian Conversation.** (1-1-1) Yr. Mrs. Soli in charge
The class meets two hours weekly. Open to students who have completed course 3. Those with grade A or B in course 2 may be admitted.
25. **Advanced Italian.** (4) I, II. Mrs. Soli
Course meets four hours weekly. Prerequisite: course 4 or the equivalent.
A preparatory course for advanced Italian and composition.

Upper Division Courses

Sixteen units of lower division courses in Italian, or the equivalent, are required for admission to any upper division course. All upper division courses, with the exception of 102A-102B, 109A-109B and 152, are conducted mainly in Italian.

- *100. **Readings in the Italian Theater.** (3) II. Mr. Pasinetti
The Italian theater from the *Commedia dell'Arte* to the present.

- 101A-101B. **Composition, Oral and Written.** (3-3) Yr. Mrs. Jones-Cottino

* Not to be given, 1963-1964.

- 102A-102B. Italian Culture and Institutions.** (2-2) Yr. Mr. Golino
A study in the growth and development of Italian culture in the various fields. There are no prerequisites for this course. Lectures in English, reading in Italian or English.
- 103A-103B. Survey of Italian Literature.** (3-3) Yr. Mr. Speroni
- 104A-104B. Introduction to the Study of Italian Literature.** (2-2) Yr. Mr. Fido
- *105. Italian Folklore.** (3) II. Mr. Speroni
A survey of Italian folklore, with emphasis on its cultural background and literary connections.
- *106. Contemporary Italian Literature.** (2) I, II. Mr. Golino
- 107. Petrarch and Italian Lyric Poetry.** (2) I, II. Mr. Velli
- *109A-109B. Dante's Divina Commedia.** (3-3) Yr. Mr. Speroni
With the consent of the instructor this course may also be taken by students who have a thorough preparation in French, Spanish, or Portuguese.
- 130A-130B. Advanced Grammar and Composition.** (2-2) Yr. Mr. Fido
Prerequisite: course 101A-101B.
- 152A-152B. Italian Literature in English Translation.** (3-3) Yr. Mr. Golino
Master works of Italian literature from Dante to the present.
- 199. Special Studies in Italian.** (1-3) I, II. The Staff
Prerequisite: senior standing and consent of the instructor.

Graduate Courses

- *200. Bibliography and Methods of Literary Research.** (3) I. Mr. Golino
- *201A-201B. Medieval Italian Literature.** (2-2) Yr. —
- *202. The Italian Novella.** (2) II. Mr. Velli
- 204A-204B. Studies in The Divine Comedy.** (3-3) Yr. Mr. Pasinetti
- 222A, B, C, D, E. The Renaissance.**
222A-222B. The Principle Trends of Italian Renaissance. (3-3) Yr. Mr. Speroni
- *222C-222D. Machiavelli, Guicciardini, Castiglione.** (3-3) Yr. Mr. Fido
- *222E. Study of the Major Poets of the Renaissance.** (3) II. Mr. Velli
- *225. The Italian Epic: Ariosto and Tasso.** (3) I. Mr. Speroni
- *226. Studies in Seventeenth-Century Italian Literature.** (2) I, II. Mr. Golino
- *228. Studies in Eighteenth-Century Italian Literature.** (2) I, II. Mr. Pasinetti
- 229A-229B. Italian Romanticism.** (2-2) Yr. Mr. Pasinetti
- *230A-230B. Modern Italian Literature.** (2-2) Yr. Mr. Golino

* Not to be given, 1963-1964.

- 234A-234B. Italian Literary Criticism from De Sanctis to the Contemporaries. (2-2) Yr. Mr. Fido
- 240A-240B. Italian Philology. (2-2) Yr. Mr. Velli
290. Research in Italian. (1-6) I, II. The Staff
Prerequisite: consent of the department.

Professional Course in Method

370. The Teaching of Italian in the Elementary School and the High School. (3) I, II. Mrs. Russell
Prerequisite: 101A-101B, 102A-102B, 103A-103B, 130A-130B.

JOURNALISM

(Department Office, 55 Economics Building)

- Joseph A. Brandt, M.A. (Oxon.), B.Litt. (Oxon.), LL.D., *Professor of Journalism*.
- Robert E. G. Harris, M.A., *Professor of Journalism*.
- William W. Johnson, M.A., *Professor of Journalism*.
- Robert A. Rutland, Ph.D., *Associate Professor of Journalism*.
- Walter Wilcox, Ph.D., *Associate Professor of Journalism (Chairman of the Department)*.
- Jack Lyle, Ph.D., *Assistant Professor of Journalism*.

The graduate program in journalism prepares students for careers on the newspaper or magazine, in broadcasting, or in the communicative aspects of public information. Students are enrolled in one of two plans, depending upon previous preparation. Normally, students complete the program in one calendar year (academic year plus one summer session and an internship), although some students remain for three semesters, either to pursue additional studies or to lighten the study load so that they may work. A detailed description of the program and departmental application forms may be obtained from the Chairman, Department of Journalism, UCLA, 405 Hilgard Avenue, Los Angeles 24, California.

Students may qualify for one of two plans: *Plan 1*: For students who have completed an undergraduate major in journalism or in one of the social sciences or in one of the humanities—28 semester hours, divided as follows: 191 (2 semester hours), 204 (2), 252 (1), 260 (3), 268 (3), 274 (2), 400 (2), 401 (2), electives (11). *Plan 2*: For students who present significant journalism experience—24 semester hours, including courses listed under Plan 1 with the exception of 400 and 401. Qualification for admission to a plan is determined by the faculty. *Thesis*: Students may elect a thesis in lieu of four semester hours of elective course work. *Comprehensive examination*: Students who do not elect a thesis must qualify by passing a written and oral comprehensive examination. *Degrees*: Students who pass a foreign language examination may elect to receive the Master of Arts degree; others will receive the Master of Science degree.

The undergraduate program in journalism includes a core series of courses for undergraduate students who wish to prepare for graduate training leading to a career in journalism. This series consists of 101 (3), and 10 semester hours selected from among undergraduate journalism course offerings with the counsel of a journalism adviser. See page 99 for additional information concerning the core series. Undergraduate courses are included in the Letters and Science List of Courses, as set forth on page 72. Further information may be obtained from the Department.

Lower Division Course

2. Fundamentals of Journalism. (3) I, II.

Mr. Lyle, Mr. Rutland

Lectures, field trips and workshops.

Survey of journalism principles and techniques.

Upper Division Courses

101. Reporting. (3) I, II.

Mr. Rutland

Lecture, two hours; laboratory, two hours.

Fundamentals of the news communication process, including communications theory, media analysis and audience analysis. Style, structure and organization of the news story. Readability formulas. Laboratory: Exercises and experiments in news communication.

112. The History of American Journalism. (3) I.

Mr. Rutland

History and principles of the news and information media and their ancillary agencies with special attention to the news and information function. Course emphasizes historical context, including the main forces in development of the free press and social responsibility concepts.

180. Radio and Television News. (2) II.

The Staff

Prerequisite: course 2 or equivalent.

Fundamentals of broadcast news, FCC regulations. Network, station, and news agency problems and policies.

181. Reporting of Public Affairs. (3) II.

Mr. Harris

Prerequisite: course 2 or equivalent.

Reporting governmental functions with emphasis upon judicial, legislative, and administrative procedures at the city and county level.

182. Magazine Writing. (3) I, II.

Mr. Harris

Writing nonfiction articles for general magazines, specialized publications, and newspaper feature sections. Style, structure and organization. Research methods. Marketing procedures.

183. Fundamentals of Public Relations. (2) I, II.

The Staff

Industrial and institutional public relations. Procedures, including analysis of institutional policy, definition of publics, attitude measurement, communications, and evaluation of results. Emphasis upon use of mass media in public relations communications.

190. The Foreign Press. (3) II.

Mr. Harris

Analysis and discussion of the four theories of the press. Study of the flow of international news. Analysis of the foreign media. Problems of propaganda, governmental control, language, and economic support.

191. Law of Mass Communications. (2) I, II.

Mr. Wilcox

Basic laws affecting the press: First and Fourteenth amendments; laws concerning libel, copyright, postal regulations and sedition. Special laws affecting broadcasting. Legal aspects of freedom of information.

192. The Media of Mass Communication. (3) I, II.

Mr. Lyle, Mr. Wilcox

Institutional analysis of the mass media with emphasis upon the press and broadcasting; the mass communications process; interaction with other institutions; critical evaluation.

195. The Critical Function of the Press. (3) II.**Mr. Brandt**

Analysis and evaluation of the press in its role as critic of the popular arts, including television, books and motion pictures. Special lectures by professional critics.

Graduate Courses**204. Ethics and Responsibility in Mass Communications. (2) I, II.****Mr. Brandt**

Critical evaluation of the mass media with respect to ethical practices and responsibility. Required for the master's degree.

207. Graphic Arts in Mass Communications. (3) I, II.**Mr. Rutland**

Principles and theory of the graphic arts in journalism, including photography, typography, and charts and graphs; basic printing processes.

241. Editorial Function of the Mass Media. (2) II.**Mr. Brandt**

Critical analysis of the editorial function of the mass media; study of the editorial, the editorial column, and the editorial campaign.

252. Seminar in Editing the Newspaper. (1) I, II.**The Staff**

Study of editing problems with some emphasis upon role of special editorial divisions (urban, finance, science, etc.); guest lecturers.

253. Seminar in the History of Mass Communications. (2) II.**Mr. Rutland**

Study of historical trends in the development of the mass media.

260. Seminar in Issues in the News. (3) I, II.**Mr. Brandt**

Study of media responsibility and performance with reference to selected basic issues affecting the human condition. Required for the master's degree.

268. Seminar in the Reporter and Society. (3) I, II.**Mr. Harris**

Study of media performance in relation to main forces in the contemporary cultural pattern; emphasis upon the role of interpretive reporting. Required for the master's degree.

274. Seminar in Theories of Mass Communications. (2) I, II.**Mr. Lyle**

Study of the mass communications process in terms of source, message, medium, context, audience, and response. Required for the master's degree.

275. Seminar in Mass Communications Research. (2) II.**Mr. Lyle**

Theory and techniques of mass communications research methods.

297. Individual Studies in Mass Communications. (1-4) I, II.**Mr. Lyle and the Staff**

Supervised research projects in mass communications. May be repeated for a total of four semester hours.

Professional Courses**400. News Communication I. (2) I, II.****Mr. Johnson**

Laboratory and field work in journalism.

401. News Communication II. (2) I, II.**Mr. Johnson, Mr. Wilcox**

Prerequisite: course 400.

Continuation of News Communication I.

402. News Communication III. (2) I, II.**Mr. Johnson**

Prerequisite: courses 400 and 401.

Media internship.

 LATIN-AMERICAN STUDIES***Curriculum in Latin-American Studies***

For details of the curriculum leading to the degree of Bachelor of Arts, see page 86 of this bulletin.

Master of Arts in Latin American Studies

The degree of Master of Arts in Latin-American studies is designed to provide systematic advanced training for (a) those planning to enter business or government service in the Latin-American field, and (b) those in a specific academic discipline who have a regional interest in Latin America. It is not intended as a complete vocational preparation. Nor is a doctor's degree in Latin-American studies granted, on the assumption that at such a level the optimum training program involves a degree granted by an academic department with such emphasis on Latin-American studies as departmental requirements permit.

The degree of Master of Arts in Latin-American studies is administered by the Committee on Latin-American Studies.

Requirements for the Master's Degree

1. *General Requirements.*—See page 162.

2. *Preparation.*—The degree of Bachelor of Arts in Latin-American studies, or its equivalent, constitutes the preparation for admission. In exceptional cases graduate students with other backgrounds may be admitted at the discretion of the committee, but may be required to complete additional course work to correct deficiencies in preparation.

3. *Language Requirement.*—A reading knowledge of Spanish and Portuguese is required for admission to the program leading to the degree.

4. *Plan.*—The comprehensive examination plan (Plan II) is followed.

5. *Course Requirements.*—Twenty-four units of upper division and graduate work are required; these must be in courses of Latin-American content taken in at least three departments, with a minimum of at least 6 units in each of the three departments. At least 12 of the required 24 units must be in the 200 series, including a minimum of 3 units of graduate work in each of at least three departments. The proposed program must be approved by the committee in charge, which may authorize minor modifications in the course requirements, provided they are consistent with the objectives of the degree.

*Graduate Course***250. Interdisciplinary Seminar in Latin American Studies. (3) I, II. —**

Should be taken by all candidates for the master's degree in Latin American Studies. This seminar is given by the staff in charge of the Graduate Program. The professor in charge is rotated from time to time among the various departments offering work in the Latin American area, and faculty members from several departments including visiting faculty from Latin America usually participate.

John A. Bauman, B.S.L., LL.B., LL.M., Jur.Sc.D., *Professor of Law.*

L. Dale Coffman, A.B., J.D., LL.M., S.J.D., *Professor of Law.*

William Cohen, A.B., LL.B., *Professor of Law.*

Jesse J. Dukeminier, Jr., A.B., LL.B., *Professor of Law.*

†Edgar A. Jones, Jr., A.B., LL.B., *Professor of Law.*

Robert L. Jordan, A.B., LL.B., *Professor of Law.*

Harold Marsh, Jr., A.B., LL.B., LL.M., Jur.Sc.D., *Professor of Law.*

Richard C. Maxwell, B.S.L., LL.B., *Professor of Law (Chairman of the Department).*

Addison Mueller, A.B., LL.B., *Professor of Law.*

Paul O. Proehl, A.B., J.D., M.A., *Professor of Law and Lecturer in Political Science.*

Ralph S. Rice, B.S., LL.B., LL.M., *Connell Professor of Law.*

Murray L. Schwartz, B.S., LL.B., *Professor of Law.*

James D. Sumner, Jr., A.B., LL.B., LL.M., J.S.D., *Professor of Law.*

Arvo Van Alstyne, A.B., LL.B., *Professor of Law.*

Harold E. Verrall, A.B., M.A., LL.B., J.S.D., *Professor of Law.*

William D. Warren, A.B., J.D., J.S.D., *Professor of Law.*

Kenneth H. York, A.B., LL.B., *Professor of Law.*

Rollin M. Perkins, A.B., J.D., S.J.D., *Connell Professor of Law, Emeritus.*

Norman Abrams, A.B., J.D., *Associate Professor of Law.*

†Herbert Morris, A.B., LL.B., D.Phil. (Oxon.), *Associate Professor of Law and Philosophy.*

Herbert E. Schwartz, B.S., LL.B., *Assistant Professor of Law.*

Eliezer Erel, B.A., M.A., Ph.D., LL.B., *Acting Associate Professor of Law and Lecturer in Political Science.*

Edwin F. Franke, A.B., LL.B., *Lecturer in Charge of Legal Aid Instruction.*

James L. Malone, A.B., LL.B., *Lecturer in Law.*

William C. Mathes, A.B., LL.B., *Lecturer on Trial Practice and Judge of the Practice Court.*

Melville B. Nimmer, A.B., LL.B., *Acting Professor of Law.*

Louis Piacenza, *Law Librarian.*

Foster H. Sherwood, Ph.D., LL.D., *Lecturer in Law and Professor of Political Science.*

LIBRARY SERVICE

(Department Office, 322 Library)

†Lawrence Clark Powell, Ph.D., Litt.D., L.H.D., *Professor of Library Service (Chairman of the Department).*

† Absent on leave, 1963-1964.

Andrew H. Horn, Ph.D., *Professor of Library Service (Vice-Chairman of the Department)*.

Seymour Lubetzky, M.A., *Professor of Library Service*.

Robert Vosper, M.A., *Professor of Library Service*.

*Donald V. Black, A.B., B.L.S., *Lecturer in Library Service*.

Barbara Gray Boyd, M.P.A., *Lecturer in Library Service*.

Chase Dane, A.B., M.S.L.S., *Lecturer in Library Service and Supervisor of Teaching in the School of Education*.

Louise Darling, M.A., *Lecturer in Library Service and Medical History*.

Robert M. Hayes, Ph.D., *Lecturer in Library Service and Mathematics*.

Everett T. Moore, M.A., *Lecturer in Library Service*.

Betty Rosenberg, M.A., *Lecturer in Library Service*.

Frances Clarke Sayers, C.L., *Senior Lecturer in Library Service and English*.

Johanna E. Tallman, A.B., C.L., *Lecturer in Library Service and Engineering Bibliography*.

Graduate Courses

200. Method and Theory of Bibliography. (2) I, II.

Mr. Horn

Introduction to the history, theory and methods of bibliographical research. Analytical or critical bibliography and enumerative or systematic bibliography. Lectures, discussions, and a written report on a bibliographical problem.

201A-201B. Introduction to Cataloging and Classification. (3-3) Yr.

(Former numbers, 201 and 214.)

Mr. Lubetzky

Lectures and discussions, three hours; laboratory, three hours.

Objectives and methods of cataloging and classification; principles and rules of entry and description of library materials; subject analysis, subject headings, and classification; treatment of special types of library materials; organization of library catalogs.

202A-202B. Reference Service and Materials. (3-3) Yr.

(Former numbers, 202 and 212.)

Miss Boyd, Mr. Horn, Miss Rosenberg

Methods and materials of reference service; national and trade bibliography; general reference works, encyclopedias, etc.; government publications; introduction to subject bibliography and information sources. Lectures, discussions, and reports on assigned problems.

203. Introduction to Librarianship. (3) I.

Mr. Powell

Introductory survey of the evolution of libraries and basic information about the principal fields of library service, with emphasis on major trends and problems. Introduction to administrative theory and practice as applied to libraries. Readings and written reports.

204. Selection and Acquisition of Library Materials. (3) I.

Miss Boyd

Theories, principles, and practice of selecting books and other library materials. Techniques of acquisition by public, school, academic and special libraries. Lectures, discussions, reports.

205. Special Problems in the Selection of Materials and Evaluation of Collections. (2) II.

Mr. Powell

Problems in selecting recordings, films, maps, and other library materials in special format; special problems in selecting material in particular subject fields; methods of evaluating library collections and the effectiveness of the selection process.

206. School Libraries. (2) II.

Mr. Dane

A general survey of elementary and secondary school libraries. Emphasis on the function, administration, organization, services, materials, and the planning and equipment of school libraries in relation to the modern school.

* In residence Spring Semester only, 1963-1964.

207. Public Libraries. (2) II.

Miss Boyd

Lectures, reading, field trips. Prerequisite: consent of the instructor.

The government, organization, and administration of municipal, county, and regional public libraries; developments in the changing patterns of public library service.

208. College, University and Research Libraries. (2) II.

Mr. Powell

Organization, administration, collections, facilities, finances, and problems of college and university libraries and their relationships within the institutions of which they are a part. Functions of research libraries and work of their staffs in serving scholars.

209. Library Work with Children. (2) I, II.

Mrs. Sayers

General survey of children's books and reading preferences. Historical backgrounds and development: types of children's literature; levels of interest; criticism and evaluation; illustration; trends; book selection; story telling; organization and administration of a children's room in a public library.

211. Historical Bibliography. (2) II.

Mr. Horn

Prerequisite: course 200 or consent of the instructor.

Early records and the manuscript period; history of the printed book, including materials and methods; parallel history of the book trade and of book collecting in ancient, medieval and modern western civilization; oriental influences upon western books and libraries.

213. Seminar in the History of Library Technology. (2) I.

Mr. Horn

Prerequisite: course 211 or consent of the instructor.

Special studies in the history of library techniques, methods, equipment, and organization of information for storage and retrieval. Results of investigations to be prepared with objective of journal publication.

215. Reading and Reading Interests. (2) II.

Miss Boyd

Prerequisite: consent of the instructor.

Reading interests, habits, and needs of different types and groups of readers. The nature of reading, problems of reading, selection of reading by children, young people, college students, and public library patrons. The role of the library in adult education.

217. Bibliography of Science, Engineering and Technology. (2) II.

Prerequisite: consent of the instructor.

Mrs. Tallman

Scientific and technical literature with emphasis on reference and bibliographical aids. Periodical and serial literature in the physical sciences, and its use and control through abstracts and indexes.

218. Bibliography of the Medical and Life Sciences. (2) II.

Miss Darling

Prerequisite: consent of the instructor.

Literature of the life sciences, pure and applied, with emphasis on reference and bibliographical aids. Periodical and serial literature; abstracts and indexes; notable books in the history of biological sciences.

219. Bibliography of the Social Sciences. (2) II.

Miss Rosenberg

Prerequisite: consent of the instructor.

Literature of the social sciences, including monumental source collections, periodicals, bibliographies, catalogs, indexes, abstracts, etc. Libraries notable for holdings in the social sciences.

220. Bibliography of the Humanities and Fine Arts. (2) I.

Miss Rosenberg

Prerequisite: consent of the instructor.

Literature of the humanities and fine arts, with special emphasis on reference materials, bibliographies, indexes, and so forth. Notable special collections on the humanities and fine arts.

240. Comparative Librarianship. (2) II.

Mr. Vosper

(Former number, 250.)

Prerequisite: consent of the instructor.

Library development and service patterns in European and other countries; comparisons of these with librarianship in the United States. Interlibrary cooperation between types of libraries and also between libraries of different political jurisdictions, including international cooperation.

- 241. Libraries and Literature of the Southwest. (2) I, II.** Mr. Powell
(Former number, 251.)
Prerequisite: consent of the instructor.
Special readings, reports, and discussions on the history, resources, and problems of libraries in the southwestern United States and northwestern Mexico. Literature of the Southwest.
- 242. Special Collections and Documentation. (2) II.** Mr. Horn
(Former number, 252.)
Prerequisite: consent of the instructor.
Special collections and special libraries. Methods of handling nonbook materials. Notable collections of maps, manuscripts, pamphlets, music, photocopies, etc. Materials of scientific and professional libraries. Current trends in information storage and retrieval; implications to general library work.
- 298. Special Studies. (1-4) I, II.** The Staff
Prerequisite: consent of the Dean of the School of Library Service.
Directed special study and written report on the bibliography, library history, or library problems of a political or cultural area; or, an original investigation and report on an aspect of library functions and services. Reports must be submitted for publication.

Professional Courses

- 349M. Medical Library Internship. (4) I, II.** Miss Darling
Prerequisites: M.L.S. degree or equivalent, graduate status, and consent of the Dean of the School of Library Service.
Supervised library service, at a professional level, in the UCLA Biomedical Library for a minimum of 180 hours per semester, including weekly critiques of bibliographical, administrative and service problems. Field trips, written reports, final oral examination. May be repeated once.
- 349S. Internship in Scientific Information Systems. (4) I, II.** The Staff
Prerequisites: admission to graduate status and M.L.S. degree or equivalent; or admission to graduate status with a bachelor's degree in an acceptable subject major and qualifications (including reading knowledge of two modern foreign languages) for admission to School of Library Service. Approval of the Dean of the School of Library Service.
Supervised program of observation and apprentice training in science information storage and retrieval systems, including mechanized and computer applications. Weekly critiques of readings and reports on documentation problems. Final examination. Minimum of 180 hours per semester. May be repeated once.

LINGUISTICS

- Henrik Birnbaum, Ph.D., *Associate Professor of Slavic Languages.*
William O. Bright, Ph.D., *Associate Professor of Anthropology (Chairman, Committee on the Linguistics Program).*
William E. Bull, Ph.D., *Professor of Spanish.*
Edward C. Carterette, Ph.D., *Assistant Professor of Psychology.*
Mieko S. Han, Ph.D., *Assistant Professor of Oriental Languages.*
*Harry Hoijer, Ph.D., *Professor of Anthropology.*
Peter Ladefoged, Ph.D., *Assistant Professor of English.*
Wolf Leslau, Docteur ès Lettres, *Professor of Hebrew and Semitic Linguistics.*
William Matthews, Ph.D., *Professor of English.*
Lois McIntosh, Ph.D., *Associate Professor of English.*
Clifford H. Prator, Ph.D., *Professor of English.*
Jaen Puhvel, Ph.D., *Associate Professor of Classics and Indo-European Linguistics (Director, Center for Research in Language and Linguistics).*
*Robert P. Stockwell, Ph.D., *Professor of English.*

* Absent on leave, 1963-1964.

William E. Welmers, Ph.D., *Professor of African Languages.*

Terence H. Wilbur, Ph.D., *Assistant Professor of German.*

*Dean S. Worth, Ph.D., *Associate Professor of Slavic Languages.*

Joseph R. Applegate, Ph.D., *Acting Assistant Professor of Berber Languages.*

Björn Collinder, Ph.D., *Visiting Professor of Finno-Ugric Studies.*

Paul Garvin, Ph.D., *Lecturer in Business Administration.*

Howard W. Law, Ph.D., *Visiting Assistant Professor of Linguistics and Anthropology.*

Letters and Science List.—All undergraduate courses in Linguistics are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

The Linguistics Program

The program leading to the M.A. and Ph.D. degrees in Linguistics is administered by the Committee on the Linguistics Program. It is open to graduate students in the language fields and in anthropology who are interested in the theory and methods of structural and historical linguistics. Undergraduates who intend to enter the Linguistics Program should consult its Chairman for information on recommended preparation.

Admission to the Program

In addition to meeting the requirements of the Graduate Division, the student should have (1) an A.B. degree in a language field or in anthropology, and (2) Linguistics 170 and 173 or their equivalents. Upon admission to graduate status students should consult the Chairman, Committee on the Linguistics Program, on the planning of his studies.

Requirements for the Master's Degree

General Requirements (as throughout the Graduate Division).

Plan and Language Requirements.—All candidates for the M.A. degree in Linguistics are required to pass a comprehensive examination in accordance with Plan II, to be taken no later than the semester following the completion of 30 units of work in linguistics. A reading examination in French or German is required unless, by petition to the Committee on the Linguistics Program, the candidate receives permission to substitute another language.

Program.—There are two programs for the M.A. degree: Program A is designed to lead on to the Ph.D., for students who intend to teach in colleges and universities. Program B is primarily for students who desire advanced training in linguistics for its utility to other careers such as language teaching. Those who take the M.A. degree in Program B may, on the recommendation of the Committee on the Linguistics Program, proceed to the Ph.D., but they will not be eligible for a qualifying examination until they have completed the course requirements listed for Program A.

Program A: 24 units as follows: Linguistics 200, 202, 203, 204, 205, 250; two courses selected from 210-219.

Program B: 24 units, taken as graduate work, as follows: 15 units selected from Linguistics 173, 200, 202, 203, 204, 205, 250; 9 units selected from the

* Absent on leave, 1963-1964.

preceding or from Linguistics 172, 210-219, English 111, 213, 250K, Speech 280.

Requirements for the Doctor's Degree

Candidates for the Ph.D. degree in Linguistics must have earned with distinction the M.A. degree in Linguistics under Program A (or its equivalent, as demonstrated by passing a qualifying examination) and must conform to the general requirements set by the Graduate Division for the Ph.D. degree.

The granting of the Ph.D. degree does not depend alone upon the satisfactory completion of a specified number of courses. The candidate must also demonstrate his competence as a research scholar and his ability to give instruction in his field. Courses specifically intended for Ph.D. candidates are those numbered 255-299.

Every candidate must take written and oral comprehensive examinations in (1) structural linguistics, (2) a specific language area, and (3) in one of the following areas: experimental phonetics, linguistics and language teaching, mathematical linguistics, or psycho- and ethnolinguistics.

Candidates are expected to spend a period in linguistic field research, in the course of which they may collect data for a dissertation.

The dissertation and the final oral examination are required in accordance with the rules of the Graduate Division. Before the dissertation is begun, the subject must be approved by the Committee on the Linguistics Program.

All students are required to pass reading proficiency examinations in two languages approved by the Committee on the Linguistics Program. Neither of these may be the student's native language.

The Center for Research in Languages and Linguistics offers financial aid and research opportunities to graduate students in linguistics in the form of research assistantships. For further information, students should consult the Director of the Center, Mr. Puhvel.

Upper Division Courses

170. Introduction to Linguistics. (3) I, II. Mr. Bright, Mr. Hoijer, Mr. Law

A beginning course in the descriptive and historical study of language: linguistic analysis; linguistic structures; language classification; language families of the world; language in its social and cultural setting.

172. Linguistics in Relation to Other Disciplines. (3) II. Mr. Applegate

Prerequisite: course 170 or equivalent.

The role of linguistics in language learning, communications engineering, translation, literary criticism, psychology, and psychotherapy; recent developments in applied linguistics.

173. Structural Linguistics. (3) II.

Mr. Bright

Prerequisite: course 170 or equivalent.

Descriptive analysis of phonological and grammatical structures.

Graduate Courses

200. Phonetics. (3) I.

Mr. Ladefoged

Prerequisite: course 173 or equivalent.

The phonetics of a variety of languages, and the phonetic phenomena that occur in languages of the world.

- 202. Historical Linguistics. (3) II.** Mr. Bright, Mr. Welmers, Mr. Wilbur
Prerequisite: course 173 or equivalent.
The comparative method, historical and internal reconstruction, internal and external borrowing, dialectology as mechanism of change.
- 203. Phonemics. (3) I.** Mr. Stockwell, Mr. Welmers
Prerequisite: course 173 or equivalent.
Distributional, prosodic, and distinctive feature analysis of the phonemic structure of languages.
- 204. Morphology. (3) I.** Mr. Bright, Mr. Hoijer, Mr. Law
Prerequisite: course 173 or equivalent.
The study of word formation in a variety of languages.
- 205. Syntax. (3) I.** Mr. Bright, Mr. Stockwell, Mr. Worth
Prerequisite: course 173 or equivalent.
The study of sentence construction in a variety of languages.
- 210. Indo-European Linguistics. (3) II.** Mr. Puhvel
Prerequisite: course 173; or Sanskrit 190; or consent of instructor.
Comparative study of phonology, morphology, and syntax, with an analysis of selected texts.
- 211. Typology of Slavic Languages. (3) II.** Mr. Birnbaum, Mr. Worth
Prerequisite: course 173 or consent of instructor.
A descriptive and comparative survey of the Slavic languages, with emphasis on the structural features distinguishing them from other Indo-European and from non-Indo-European languages.
- 214. Typology of American Indian Languages. (3) II.** Mr. Bright, Mr. Hoijer, Mr. Law
Prerequisite: course 173 or consent of instructor.
Studies of selected languages, with emphasis on the diversity of linguistic structure in the Americas.
- 215. Typology of Berber Languages. (3) II.** Mr. Applegate
Prerequisite: course 173; or Semitics 280; or consent of instructor.
A survey of the Berber languages, with special attention to the structural features which distinguish Berber within the Hamito-Semitic group; application of structural linguistic methodology to historical and comparative studies.
- 216. Typology of African Languages. (3) II.** Mr. Welmers
Prerequisite: course 173 or consent of instructor.
Descriptive and comparative survey of the languages of Africa, with particular emphasis on tonal structures and systems of noun classification and concord; illustration of a variety of individual languages.
- 217. Typology of Finno-Ugric Languages. (3) II.** Mr. Collinder
Prerequisite: course 173 or consent of instructor.
Survey of the history and structure of the chief representatives of the Finno-Ugric language group, with appropriate reference to characteristic texts.
- 218. Typology of South Asian Languages. (3) II.** Mr. Bright
Prerequisite: course 173 or consent of instructor.
Descriptive and historical survey of the languages of India, Pakistan, and Ceylon; detailed study of a selected language.
- 219. Typology of Oriental Languages. (3) II.** Mrs. Han
Prerequisite: course 173 or consent of instructor.
Descriptive and comparative study of the languages of the Far East; detailed study of a selected language.
- 250. Field Methods. (3) II.** Mr. Bright, Mr. Hoijer, Mr. Law
Prerequisite: courses 173, 200, 203, 204.
A language unknown to members of the class to be analyzed from data elicited from an informant. The seminar papers will be relatively full descriptive sketches of the language of the informant.

255A. Structural Linguistics: Phonology. Seminar. (3) I.

Prerequisite: course 203.

Mr. Bright, Mr. Stockwell

Problems in phonological theory and in the phonological analysis of a variety of languages.

255B. Structural Linguistics: Grammar, Lexicon. Seminar. (3) II.

Prerequisite: course 204, 205.

Mr. Bright, Mr. Stockwell

Problems in grammatical and lexical theory and in the analysis of a variety of languages.

260. Anthropological Linguistics. Seminar. (3) I. Mr. Bright, Mr. Hoijer

Prerequisite: course 250.

Studies in descriptive linguistics based on materials derived from field work. May be repeated for credit.

262. Psycholinguistics. Seminar. (3) II.

Mr. Carterette

Current psycholinguistic theory and research problems; coding and decoding; stimulus-response description of language behavior; language learning; speech recognition and perception; linguistic disturbances; thinking and concept formation; language statistics, structure, and uncertainty; psycholinguistic aspects of personality and culture.

265. Directed Informant Work. Seminar. (3-6). I, II.

Prerequisite or corequisite: course 260.

Mr. Bright, Mr. Hoijer

Intensive informant work by students individually or in small groups. May be repeated for credit.

297. Directed Studies. (1-4) I, II.

The Staff

299. Research on Dissertation. (1-6) I, II.

The Staff

**Business Administration 214. Selected Topics in Data Processing (Seminar in Language Data Processing). (3) I.** Mr. Garvin**English 250K. Contrastive Analysis of English and Other Languages. (3) II.** Mr. Prator, Miss McIntosh**Speech 280. Seminar in Experimental Phonetics. (3) II.** Mr. Ladefoged**Related Courses in Other Departments****Anthropology 110.****Classics: Latin 225; Greek 225; Sanskrit 190, 191.****English: English 110, 111, 210, 213, 250A,B. Speech 103, 122, 240B.****French: 107A-B, 149, 201, 205.****German: 107, 117, 230, 259.****Italian: 240A-B.****Near Eastern and African Languages: Hebrew 190A-B; Semitics 280A-B, 290A-B; African Languages 190; Turkish 190A-B.****Oriental Languages: Japanese 175.****Psychology: 283.****Slavic Languages: 122A-B, 222, 225A,B,C, 226, 227, 229, 270, 271.****Spanish and Portuguese: 115, 117, 118, 203, 206, 209, 256.**

MATHEMATICS

(Department Office, 6115 Mathematical Sciences Building)

- Richard Arens, Ph.D., *Professor of Mathematics.*
 Edwin F. Beckenbach, Ph.D., *Professor of Mathematics.*
 Clifford Bell, Ph.D., *Professor of Mathematics.*
 †Earl A. Coddington, Ph.D., *Professor of Mathematics.*
 Henry A. Dye, Ph.D., *Professor of Mathematics.*
 John W. Green, Ph.D., *Professor of Mathematics.*

 Michel A. Melkanoff, Ph.D., *Lecturer in Mathematics and Associate Professor of Engineering.*

Letters and Science List.—All undergraduate courses in mathematics and statistics except Mathematics 38, 41, and 370 are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Required: Courses 3A, 3B, 4A, 4B or 3H, 4G, 4H with an average grade of C or higher. Prospective majors who qualify are strongly urged to take the honors sequence 3H, 4G, 4H. Recommended: physics and a reading knowledge of French, German, or Russian.

A student who has not had trigonometry may, on petition approved by the College of Letters and Science, take concurrently University Extension course Mathematics X CABC; no university credit is allowed for this course. A student who feels himself deficient in algebra should take course 1 either prior to, or concurrently with, course 3A.

The Major.—Courses 108, 119A, and one of 100, 112A, 112B, together with enough additional upper division units, approved by an upper division adviser, to total 24 units; not all three of 101A, 101B, 114 may be taken for credit. A student who has credit for a course containing more than one but less than 3 units of differential equations, may, to satisfy the 119A requirement, present credit for a reading course (199) containing material supplementing his previous work. At most, 3 of the 24 units required for graduation may be taken in related courses in other departments, provided approval has been obtained in advance from a departmental adviser. Candidates for a teaching credential must include Mathematics 370 in the required 24 units. The student must maintain an average grade of at least C in upper division courses in Mathematics, as well as a C average in all courses counted toward the major.

Teaching Minor.—Mathematics 370 and not less than 20 units in the Department of Mathematics, including two three-unit courses in the 100 sequence.† The recommended minor is Statistics 1, Mathematics 1, 3A, 3B, 4A, 41, 101A, 101B and the required 370. Non-science majors may, with the approval of a Mathematics Department adviser, substitute courses 37A, 37B, and 38 for 3A, 3B, and 4A.

Business Administration.—Students preparing for this School are required to take courses 37A, 37B (recommended) or 1, 3A.

Engineering.—Lower division students in this College are required to take courses 5A, 5B, 6A, 6B or 3H, 4G, 4H.

Undergraduate Placement Examinations.—An examination covering high school algebra and trigonometry is given each semester at 9:00 a.m. on the Wednesday of registration week. This year the examination will be held in Room 2250 of the Chemistry Building. This examination determines which non-engineering students may be exempt from the stated prerequisites for courses 3A, 5A, and 32B. It also determines which student will be considered for course 3H, the first honors course in calculus. There is no penalty for doing poorly on the examination, nor are permanent records kept of the grades received.

A student entering from high school who believes that he has had the equivalent of a course offered by the Department of Mathematics (e.g., courses 3A, 3B, or 4A) may demonstrate his proficiency in this course by examination. If, in the opinion of the department, his level of achievement is sufficiently high, he will be permitted to enter the next course in the sequence. No University credit is earned by passing such an examination. Arrangements for such an examination must be made with the department secretary in Room 6115, Mathematical Sciences Building, on or before the Monday of registration week.

Requirements for the Master's Degree

Candidates for the degree of Master of Arts in mathematics must qualify under Plan II, comprehensive examination plan. For the general requirements, see pages 162–165. Under this plan either one of two requirements must be satisfied. One of these is the preparation of a report under the direction of some member of the department. This is a project designed to train the student in independent study of mathematical literature and the reduction to orderly form of the knowledge thus gained. The other is the presentation of a program containing at least 18 units of graduate courses in mathematics instead of the usual required 12. The candidate must pass a set of qualifying written examinations, one in basic analysis and one in basic algebra.

Requirements for the Doctor's Degree

The requirements are, in general, in accordance with those listed under general requirements for the doctor's degree, pages 165–169. At present, the qualifying examinations which must be taken within the department before the student is advanced to candidacy are three in number: one in analysis, one in algebra, and one in a speciality. These are written examinations, which

† Mathematics 4B may apply toward the teaching minor in lieu of an upper division course in the 100 series.

are given once each semester, and the student must pass all three within a span of five semesters.

Lower Division Courses†

1. College Algebra (2) I, II.

Mr. Johnson in charge

Prerequisite: trigonometry and one and one-half years of high school algebra. Not open for credit to students who have credit for D, 3A, 3H, 5A, or 32A.

Fundamental operations, inequalities, functions, theory of equations, determinants, permutations, combinations, binomial theorem, progressions, and complex numbers.

3A. Analytic Geometry and Calculus, First Course. (3) I, II.

Mr. Beckenbach in charge

Prerequisite: three years of high school mathematics, including trigonometry, or the passing of a placement examination.

Elements of analytic geometry, differentiation of algebraic and trigonometric functions, inverse of differentiation.

3B. Analytic Geometry and Calculus, Second Course. (3) I, II.

Mr. Redheffer in charge

Prerequisite: course 3A or the passing of a qualifying examination. (See page 402.) Continuation of 3A. Further topics in analytic geometry, exponential and logarithmic functions, the definite integral, techniques of integration.

3H. First Honors Course in Calculus (4) I, II.

Mr. Blattner

Prerequisite: students will be admitted on the basis of their performance on a placement examination given each semester.

Fundamental concepts, techniques, and applications of differential and integral calculus. This course places more emphasis on logical development of the ideas of calculus than course 3A and is designed to permit exceptionally able students to progress at a pace commensurate with their abilities.

4A. Analytic Geometry and Calculus, Third Course. (3) I, II.

Prerequisite: course 3B.

Mr. Rogers in charge

Continuation of 3B. Applications, study of limits, infinite series.

4B. Analytic Geometry and Calculus, Fourth Course. (3) I, II.

Prerequisite: course 4A. Upper division credit will be allowed to students who are not majors in Mathematics, Engineering, or Meteorology, who take the course while in upper division.

Continuation of 4A. Solid analytic geometry, partial differentiation, multiple integration, first order differential equations.

4G. Second Honors Course in Calculus. (*4) I, II.

Mr. Dye

Prerequisite: course 3H, or course 3B with high attainment and consent of the instructor.

Continuation of course 3H.

4H. Third Honors Course in Calculus. (4) I, II.

Mr. Green in charge

Prerequisite: course 4G.

Continuation of 4G.

5A. Analytic Geometry and Calculus. (5) I, II.

Mr. Smith in charge

Prerequisite: satisfactory passing of the lower division engineering placement examination in mathematics or of the placement examination described on page 402.

A unified course in analytic geometry and differential calculus, and an introduction to integration of algebraic functions.

* Mathematics 4G will carry only 3 units of credit in the fall semester, 1963.

† Students who have credit for courses in the 3A, 3B, 4A, 4B sequence will not be allowed additional credit for courses in the 5A, 5B, 6A, 6B sequence; and vice versa.

5B. Analytic Geometry and Calculus. (3) I, II.

Prerequisite: course 5A.

A unified course in analytic geometry and differential calculus, and an introduction to integration of transcendental functions.

6A. Differential and Integral Calculus. (3) I, II.

Prerequisite: course 5B.

Techniques and applications of integration; infinite series and expansion of functions.

6B. Differential and Integral Calculus. (3) I, II.

Prerequisite: course 6A. Upper division credit will be allowed to students who are not majors in mathematics, engineering, or meteorology, who take the course while in upper division.

Solid analytic geometry, partial differentiation and multiple integration, with applications; ordinary differential equations through simple applications involving damped oscillations.

32A. Introductory Mathematical Analysis for Business. (3) I, II.

Mr. Ferguson in charge

Prerequisite: sophomore standing. Not open for credit to students who have received credit for course D, or 1. A student may enroll in course 32B without taking course 32A by passing a placement examination (see page 402).

Algebra, including quadratics, logarithms, progressions, and the binomial theorem; graphical representation; simple and compound interest; ordinary annuities. Students who need extra review and drill will be required to attend the class four times a week.

32B. Introductory Mathematical Analysis for Business. (3) I, II.

Lecture, two hours; problem laboratory, one hour.

Mr. Ferguson in charge

Prerequisite: course 32A or the equivalent or the passing of a placement examination (see page 402).

Elementary differential and integral calculus and curve fitting, with applications to business and economics.

37A. Mathematics for Social and Life Sciences. (3) I, II.

Prerequisite: none.

Mr. Jackson in charge

Elementary logic and set theory, the real number system and its algebra, graphs, systems of linear and quadratic equalities and inequalities, and matrices, with applications.

***37B. Mathematics for Social and Life Sciences. (3) I, II.**

Prerequisite: course 37A, or consent of instructor.

Mr. Jackson in charge

Elementary differential and integral calculus, differential equations, and probability, with applications.

38. Fundamentals of Arithmetic. (3) I, II.

Mr. Bell in charge

Prerequisite: sophomore standing.

Designed primarily for prospective teachers of arithmetic. The study of the fundamental operations on integers and fractions is stressed, together with suitable visual aids. Although efficiency in arithmetical skills is required, the emphasis is on the understanding of arithmetical procedures.

41. Introduction to Coding for Automatic Digital Computers. (1) I, II.

Not open for credit to those having credit for either course 139 or 140. Prerequisite: one year of college mathematics.

Binary arithmetic; standard machine operations; coding commands, iterations of most frequent use; applications to computers on campus.

* To be offered first time spring semester, 1964.

Upper Division Courses

100. College Geometry. (3) I.

Mr. Johnson

Prerequisite: course 4A.

Selected topics in geometry, with particular emphasis on recent developments.

101A. Fundamental Concepts of Mathematics. Algebra. (3) I, II. Mr. Curtis

Prerequisite: course 37 or the equivalent.

A course designed especially for teachers and prospective teachers of secondary mathematics. Selected topics in algebra; number system; logical concepts; elementary functions; determinants and matrices.

101B. Fundamental Concepts of Mathematics. Geometry. (3) I, II.

Mrs. Klotz

Prerequisite: course 37 or the equivalent (course 101A not a prerequisite).

A course designed especially for teachers and prospective teachers of secondary mathematics. Selected topics in elementary geometry; deductive geometry; axiomatic approach; various axiomatic systems for Euclidean geometry; non-Euclidean geometry; projective, metric, and affine geometry.

108. Linear Algebra. (3) I, II.

Mr. Motzkin in charge

Prerequisite: course 4A.

Vector spaces; linear transformations and matrices; matrix algebra; determinants and solutions of systems of equations.

110A-110B. Advanced Engineering Mathematics. (2-2) I, II.

A year course. See course 110AB for description.

110AB. Advanced Engineering Mathematics. (4) I, II.

Mr. Redheffer in charge

Prerequisite: course 4B. Not open to students who have taken course 6B or any course containing 1 unit of work in differential equations; such students should take course 110C. Students in the engineering curriculum are required to take course 110AB or 110C, depending upon the prerequisite. Students who have credit for 119A will be limited to 2 units of credit.

Ordinary differential equations and orthogonal functions, partial differential equations, line integrals, Green's theorems, vector analysis, solution of equations.

110C. Advanced Engineering Mathematics. (3) I, II.

Mr. Redheffer in charge

Prerequisite: course 6B, or an equivalent course containing at least 1 unit of differential equations. Students who have credit for course 119A will be limited to 2 units of credit.

This course covers all the material in Mathematics 110AB with the exception of one unit of differential equations.

110D. Advanced Engineering Mathematics. (3) II.

Mr. Sokolnikoff

Prerequisite: course 110AB or 110C.

Complex variable, probability, curve fitting.

111A. Introduction to Higher Algebra. (3) I, II.

Mr. Berkson

Prerequisite: course 108.

Integral domains, fields, polynomial domains, factorization theory, groups, vector spaces and linear transformations, rational and Jordan canonical forms, quadratic and hermitian forms.

111B. Introduction to Higher Algebra. (3) I, II.

Mr. Arens

Prerequisite: course 111A.

Rings and ideals, linear algebras, field extensions, algebraic numbers, Galois theory.

112A. Introduction to Higher Geometry. (3) II.

Mr. Straus

Prerequisite: course 108.

Homogenous point and line coordinates, cross ratio, one- and two-dimensional projective geometry, point and line conics.

112B. Introduction to Metric Differential Geometry. (3) I, II.

Prerequisite: courses 108 and 119A or consent of the instructor.

Classical differential geometry of curves and surfaces; special problems.

114. Mathematical Ideas. (3) II.

Prerequisite: upper division standing.

The mathematical method; sets, equivalence, cardinals; numbers, integers, rationals, complex numbers; geometry, Euclid's axioms, axiomatic method; analytic geometry, dimension, functions, curves; idea of a limit; topology, convex sets, convex functions.

115A. Theory of Numbers. (3) I.

Mr. Pukanszky

Prerequisite: course 4A or consent of the instructor.

Divisibility, congruences, diophantine analysis.

115B. Theory of Numbers. (3) II.

Mr. Pukanszky

Prerequisite: course 115A.

Selected topics in the theory of primes, algebraic number theory, and diophantine equations.

119A. Differential Equations. (3) I, II.

Mr. Sorgenfrey

Prerequisite: course 4B. Students who have credit for course 110B or 110AB or the equivalent will be limited to one unit of credit for course 119A. Such students may take a one-unit reading course (199) covering the remaining topics in course 119A.

Linear equations with constant coefficients and analytic coefficients. Regular singular points. Method of successive approximations. Systems.

119B. Differential Equations. (3) II.

Mr. Coddington

Prerequisite: course 119A, or the equivalent.

Advanced topics in ordinary differential equations, including geometric theory of autonomous systems and boundary value problems. Second order linear partial differential equations with constant coefficients. Separation of variable technique.

120. Probability.

See Statistics 120A-120B.

122A-122B. Advanced Calculus. (3-3) Yr. Beginning either semester.

Prerequisite: course 108, or 110C, or 119A.

Mr. Koosis

Fundamentals of calculus from a more advanced point of view. The real number system; continuous functions. General theory and application of partial differentiation. Implicit function theorems. Vector fields. Line and surface integrals. Point set theory. Theory of integration. Infinite series. Uniform convergence. Improper integrals.

124. Vector Analysis and Potential Theory. (3) I, II.

Mr. Clifton

Prerequisite: course 4B. Recommended: one year of college physics.

Vector algebra, fields, calculus. Stokes' and Green's theorems. Application to potential theory. Harmonic functions.

125. Analytic Mechanics. (3) II.

Prerequisite: courses 119A or 110C, and one of 122A, 124, Physics 105, or consent of the instructor.

Foundations of Newtonian mechanics; kinematics and dynamics of a rigid body; variational principles and Lagrange's equations.

127A-127B. Foundations of Mathematics. (3-3) Yr.

Mr. Chang

Prerequisite: senior standing in mathematics. Juniors with exceptional ability may be admitted with special consent of the instructor.

Course 127A covers the basic logical ideas by means of symbolic logic. Course 127B covers set theory, theory of relations, the logical background of function theory, the number system, and induction.

135. Numerical Mathematical Analysis. (3) I, II.

Mr. Cheney

Prerequisite: course 119A or consent of the instructor.

Computation with numbers of fixed precision—accuracy, round off, checking. Choice and use of tables. Applications involving approximations with polynomials—finite differences, interpolation, extrapolation, numerical differentiation and integration. Computation with continued fractions. Numerical approximation to solutions of equations.

- 136. Numerical Methods in Algebraic Problems. (3) I.** Mr. Swift
Prerequisite: course 108 and some knowledge† of coding for automatic digital computers, or consent of the instructor.

Spectral theory of finite matrices. Direct and iterative methods for inverting matrices and solving linear equations and inequalities. Various methods for obtaining characteristic values and vectors of matrices. Numerical solution of systems of nonlinear equations.

- 137. Numerical Methods in Differential Equations. (3) II.** _____

Prerequisite: courses 119A and 122A.

Forward integration; error analysis; Milne, Runge-Kutta, and difference methods; systems of equations; higher order and nonlinear equations; two-point boundary conditions.

- *138. Numerical Methods of Approximation. (3) I.** _____

Prerequisite: course 135, or consent of the instructor.

Polynomial approximation of functions of one or more variables in the senses of least-squares. Orthogonal polynomials. Continued fractions and rational approximation. Approximation by other function families. Gaussian quadrature. Emphasis throughout on numerical methods for use with automatic digital computing machinery.

- 139. Automatic Digital Computers. (3) I, II.** Mr. Tompkins

Prerequisite: course 119A (may be taken concurrently) and some knowledge† of coding, or consent of the instructor.

Idealized description of electronic components suitable for digital computing; Boolean algebra; organization and logic of large digital computers; coding and other means of applying these components effectively to the solution of extensive problems.

- 140. Logic of Applications of Automatic Digital Computers. (3) II.**

Prerequisite: courses 119A and 139, or consent of the instructor. Mr. Tompkins

The logic of coding automatic digital computers; parts of a code; automatic coding; coding symbolisms and logic; microcoding; iterative routines, approximations, and other techniques for effective exploitation of automatic computers. Examples of codes will be prepared by each student.

- 142. Introduction to Game Theory and Linear Programming. (3) I, II.**

Prerequisite: courses 4B and 108, or the equivalent.

Mr. Gordon

The basic theorems of two person zero-sum matrix games including the minimax theorem. Applications to games of chance and strategy. The principles of linear programming, the duality theorem, and simplex methods. Applications to industrial and business problems.

- 185. Introduction to Complex Analysis. (3) I, II.**

Mr. Horn

Prerequisite: courses 110A-110B, 110C, or 119A.

Complex numbers, functions, differentiability, series, extensions of elementary functions, integrals, calculus of residues, conformal maps and mapping functions with applications.

- 197. Directed Group Studies for Advanced Students. (2-4) I, II.** _____

Prerequisite: consent of the instructor.

- 199. Special Studies in Mathematics. (1-3) I, II.**

The Staff

Prerequisite: senior standing and consent of the department.

Graduate Courses

(Open only to students who have graduate status.)

- 205. Analytic Number Theory. (3) I.**

Mr. Rogers

Prerequisite: courses 111A, 115A, and 122A, completed or taken concurrently.

Domain of real integers, additive and multiplicative theory, integral domains, partitions, special series, prime number theory.

* Not to be given, 1963-1964.

† Such knowledge may be obtained by taking course 41 or by suitable experience.

***206. Algebraic Number Theory. (3) I.**

Mr. Straus

Prerequisite: courses 122B and 221A or consent of instructor.

Ideals, valued rings, ideal classes, quadratic and cyclotomic fields, applications to Diophantine equations, elements of class field theory, prime ideal theorem, Thue-Siegel-Roth and related theorems.

209A-209B. Real Analysis. (3-3) Yr.

Mr. Taylor

(Replaces the former 209, 242AB.)

Prerequisite: course 122A-122B or the equivalent.

Point-set topology in Euclidean space. More general spaces. Continuous functions. Convergence and approximation theorems. Functions of bounded variation. Integrals and measures. Multiple integrals and the Fubini theorem. Absolutely continuous functions. Set functions. Differentiation and integration. The L^p spaces.**210A-210B. Differential Geometry. (3-3) Yr.**

Mr. Smith

Prerequisite: course 112B or consent of the instructor.

Global theory of connections: curvature, torsion, geodesics, holonomy, covariant derivative. Geometry of Riemannian manifolds: sectional curvature, manifolds of constant curvature, submanifolds, Gauss-Bonnet theorem and other topics.

***212. Algebraic Geometry. (3) II.**

Mr. Straus

Prerequisite: courses 111A, 112A.

Algebraic preliminaries, projective space, Grassmann coordinates, collineations and correlations.

214. Topics in the Theory of Convex Sets. (3) I.

Mr. Straus

Prerequisite: either one of the courses 209A, 224A, 226A, or the consent of the instructor.

Basic theorems for convex sets in topological linear spaces; separation theorems and support properties; local convexity; families of convex sets and isoperimetric problems; characterizations of convex sets; convex functions; Helly type theorems.

***215. Non-Euclidean Geometry. (3) II.**

Mr. Steinberg

Prerequisite: consent of the instructor. Recommended: course 108.

216. Differentiable Manifolds. (3) II.

Mr. Clifton

Prerequisite: course 108, 119A, 122A-122B.

Theory of differentiable manifolds. Calculus of differential forms, Frobenius theorem. Differentiable singular cohomology. Stokes theorem. Elements of sheaf theory, de Rham's theorem. Differentiable fiber bundles, characteristic classes.

220A-220B. Advanced Probability. (3-3) Yr.

Mr. Breiman

Prerequisite: course 209A.

Review of essential material in measure and integration. Probability distributions, independence and convergence, characteristic functions, the continuity theorem, central limit theorem, laws of large numbers. The Borel zero-one law, Glivenko-Cantelli theorem and other topics.

221A-221B. Higher Algebra. (3-3) Yr.

Mr. Horn, Mr. Rogers

Prerequisite: course 111A.

222. Theory of Groups. (3) I.

Mr. Gordon

Prerequisite: course 221A-221B or 111A and consent of the instructor.

Classical theorems of general group theory, permutation groups, group representations, basic facts on topological and Lie groups.

224A. Complex Analysis. (3) I, II.

Mr. Arens, Mr. Horn

Prerequisite: courses 122A-122B.

Students with facility for mathematics may take courses 224A-B in their senior year with proper approvals. These courses include the theory in course 185. Students who have credit for course 224B will not be given credit for course 224A. Introduction to and rigorous treatment of the theory of complex numbers and functions, linear transformations, conformal mappings, Cauchy's theorem and its consequences, residue calculus.

* Not to be given, 1963-1964.

224B. Complex Analysis. (3) I, II.

Mr. Schubert, Mr. Curtis

Prerequisite: course 224A.

Taylor and Laurent series, Mittag-Leffler and Weierstrass theorems, normal families, Poisson's formula, Harnack's principle, Jensen's formula, subharmonic functions, canonical mappings, analytic continuation, the monodromy theorem, and algebraic functions.

224C. Topics in Higher Complex Analysis. (3) I.

Mr. Sario

Prerequisite: courses 224A, 224B, the latter previously or concurrently.

Introduction to a special field of higher complex analysis, e.g., univalent functions, boundary correspondence, meromorphic functions, automorphic functions, subharmonic functions, several complex variables, kernel functions, variational methods, special functions. The content of the course varies from semester to semester.

†225A-225B. Mechanics of Continua. (3-3) Yr.

Mr. Sokolnikoff

Prerequisite: course 122A-122B or consent of the instructor.

Course 225A deals with the theory of mechanics of deformable media, analysis of stress, analysis of strain, stress-strain relations, energy theorems, fundamental boundary value problems of mechanics of continua.

Course 225B deals with the variational methods of solution of problems of elasticity, uses of the analytic function theory in two-dimensional problems, theory of plates and shells.

226A-226B. Topology. (3) Yr.

Mr. O'Neill

Prerequisite: course 209A, taken previously or concurrently, or consent of the instructor.

Properties of topological spaces: separation axioms, compactness, connectedness; metrizable; further topics selected from general and algebraic topology.

227. Infinite Series. (3) I.

Mr. Koosis

Prerequisite: course 224A or 209A, taken previously or concurrently, or consent of the instructor.

Selected topics in Fourier Series, power series, orthogonal polynomials, almost periodic functions, and completeness of sets of functions.

228A-228B. Introduction to Functional Analysis. (3-3) Yr.

Mr. Blattner

Prerequisite: courses 209A, 224A, or consent of instructor.

Linear spaces, especially with topology or norm. Dual space. The standard theorems on linear operators. Introduction to spectral theory in Hilbert space. Analysis of vector valued functions. Operational calculus. Commutative normed rings. Spectral representation and multiplicity.

229A-229B. Applied Complex Analysis (3-3) Yr.

Mr. Green

Prerequisite: course 122A, or 110C, or 110AB.

Complex numbers, infinite series, Cauchy's theorem, residue calculus, various methods of conformal representation, the Gamma function, hypergeometric functions. Legendre functions, Bessel functions, elliptic functions, and orthogonal polynomials, applications to engineering and physics.

230A-230B. Homotopy Theory. (3-3) Yr.

Mr. Hu

Prerequisite: course 226A-226B, or consent of the instructor.

Main problems in homotopy theory and their relations; exponential map, fundamental groups, Hopf theorems; fiber spaces, covering spaces; homotopy groups, axiomatic approach, n -connective fiberings, Freudenthal's suspension; obstruction theory; cohomotopy groups; exact couples and spectral sequences. Will normally be offered every other year.

231A-231B. Set Theory. (3-3) Yr.

Mr. Robinson

Prerequisite: Mathematics 127A or Philosophy 32 or the equivalent; Philosophy 184A is recommended. Students may not receive credit for both Mathematics 231A and Philosophy 231A or for both Mathematics 231B and Philosophy 231B.

Axiomatic set theory: sets, relations, functions, cardinal and ordinal numbers, finiteness and infinity, infinite arithmetic, partial orderings, simple orderings, well-orderings, the axiom of choice and the continuum hypothesis and their consequences, inaccessible numbers, results on independence and relative consistency.

† Year course to begin spring semester, 1964.

233A-233B. Mathematical Logic. (3-3) Yr.**Mr. Chang**

Prerequisite: course 127A-127B and 221A-221B, or consent of instructor.

Gödel's incompleteness theorem and related results, recursive functions and sets; axiomatic set-theories, problems of axiomatization, independence, and consistency; theory of models, arithmetical classes and their algebraic properties; higher order functional calculi; generalizations of Gödel's completeness theorem; many valued logics.

234A-234B. Riemann Surfaces. (3-3) Yr.**Mrs. Klotz**

Prerequisite: courses 111A, 224A, or consent of the instructor.

Topological spaces, covering surfaces, simplicial homology, singular homology, harmonic and sub-harmonic functions, Dirichlet's problem, normal operators, conformal mappings, capacities, classification theory, extremal length, method of orthogonal projection, kernel functions, Abel's and Riemann-Roch's theorems.

235. Lie Groups. (3) II.*Mr. Arens**

Prerequisite: course 209A or 226A, or consent of the instructor.

Real and complex analytic manifolds of several dimensions, the analysis of covering manifolds, and the monodromy principle. Infinitesimal transformations, Lie groups and Lie algebras, and the correspondence between the analytic subgroups of a Lie group, and the subalgebras of its algebra.

236. Topological Groups. (3) I.*Mr. Arens**

Prerequisite: courses 224A, 226A, or consent of the instructor.

Invariant integration, group algebras, representation of Abelian and compact groups.

237A-237B. Calculus of Variations. (3-3) Yr.*Mr. Clifton**

Prerequisite: courses 224A, 209A, or consent of the instructor.

The differential equation of a curve minimizing a definite integral. Other properties of a minimizing curve analogous to those deduced by Legendre, Weierstrass, and Jacobi. Conditions which insure the existence of a minimum, extensions to multiple integrals.

238. Algebras of Operators in Hilbert Space. (3) I.**Mr. Dye**

Prerequisite: courses 228A-228B, 209A, or consent of instructor.

Convergence of operators; weakly closed (Von Neumann) algebras. Density theorems; algebraic and unitary invariants; classification of projections. Dimension function.

239. Boolean Algebras. (3) II.*Mr. Horn**

Prerequisite: course 226A or consent of the instructor.

Axioms and elementary properties, completeness properties, distributivity laws, ideal theory, sub-algebras and quotient algebras, representation theory, applications to topology, Boolean algebras with operators, closure algebras.

240. Topological Linear Algebras. (3) II.*Mr. Curtis**

Prerequisite: courses 226A and 228A-228B.

Representation of, and approximation in, certain Banach algebras. Operational calculus for several elements. Extension problems. Analytic function algebras. Inverse limits of Banach algebras.

241. Semigroups of Operators. (3) II.**Mr. Babbitt**

Prerequisite: course 228A-228B.

Theory of semigroups of operators, with applications to the Cauchy problem in partial differential equations.

243A-243B. Ordinary Differential Equations. (3-3) Yr.*Mr. Coddington**

Prerequisite: courses 224A, 209A, or consent of instructor.

Existence and uniqueness theorems, linear systems, systems with isolated singularities of the first and second kind, regular and singular boundary value problems, perturbation theory, Poincaré-Bendixson theory, stability, asymptotic behavior, and spectral theory of symmetric differential operators. Will normally be offered every other year.

* Not to be given, 1963-1964.

244. Partial Differential Operators. (3) II.

Mr. Schubert

Prerequisite: course 228A-228B and consent of instructor.

Linear partial differential operators of all orders, emphasizing functional analysis. Boundary value problems, expansions. Weak, strong, and distribution-solutions.

245A-245B. Partial Differential Inequalities. (3-3) Yr.

Mr. Redheffer

Prerequisite: courses 122A, 108.

Monotone operators, with application to broad classes of nonlinear partial differential equations. Uniqueness and stability, error estimation for numerical analysis, bounds for characteristic values, theorems on location of zeros, weak and strong maximum principles, asymptotic behavior, entire solutions, removable singularities.

246A-246B. Partial Differential Equations. (3-3) Yr.

Mr. Pukanszky

Prerequisite: course 224A or 209A or Engineering 181A, or consent of instructor.

The Cauchy-Kowalewski theorem. Characteristics. Formulation and rigorous classical analysis of elliptic, hyperbolic and parabolic equations of second order. Aspects of applications of current interest and augmentation of material to attack these problems.

***247A-247B. Tensor Analysis. (3-3) Yr.**

Mr. Sokolnikoff

Prerequisite: course 122A-122B or consent of the instructor.

247A. Vectors in n -dimensional and infinitely dimensional manifolds. Linear transformations. Algebra and calculus of tensors. Applications to geometry.

247B. Applications to differential geometry of curves and surfaces. First and second differential forms, geodesics in Riemannian manifolds. Equations of Gauss and Codazzi. Applications to various branches of applied mathematics, including the theory of relativity.

***251. Computational Aspects of Linear Problems. (3) II.**

Mr. Hestenes

Prerequisite: courses 111A or 136, and 139, or consent of the instructor.

Analysis of numerical methods for inverting matrices, solving systems of linear equations and inequalities, computing eigenvalues and eigenvectors of finite matrices, solving and evaluating linear games. Special attention to suitability of methods for electronic digital computers.

252. Computational Aspects of Partial Differential Equations. (3) I.

Prerequisite: courses 122AB, 139, or consent of the instructor.

Mr. Cheney

Finite difference methods: convergence, stability, error analysis, relaxation techniques. Methods based on minimum principles. Solutions in series form. Numerical solution of integral equations. Role of digital computing machines.

253. Approximation Theory. (3) II.

Mr. Motzkin

Prerequisite: course 138 or consent of the instructor.

Approximation problems and relevant spaces. Existence, uniqueness and oscillation of best approximations. Least p^{th} power and least maximum approximation. Infrafuctions. Unisolvence. Related problems in the complex domain and in geometry. Incompatible systems. Inequalities. Numerical methods. Estimates of the measure of approximation, characteristic for classes of approximees: theorems of Weierstrass and Bernstein.

260. Seminars in Mathematics. (3) I, II.

The Staff

Topics in various branches of mathematics and their applications, by means of lectures and informal conferences with members of the staff. Seminars for 1963-1964 will include:

Fall Semester

Sec. 1. Seminar for Master's Essay.

Mr. Dye

Sec. 2. Seminar in Inequalities.

Mr. Beckenbach

Sec. 3. Seminar in Combinatorial Problems.

Mr. Motzkin

Sec. 4. Seminar.

Sec. 5. Individual Studies.

The Staff

* Not to be given, 1963-1964.

Spring Semester

Sec. 1. Seminar for Master's Essay.	Mr. Dye
Sec. 2. Seminar in Inequalities.	Mr. Beckenbach
Sec. 3. Seminar in Numerical Analysis.	Mr. Cheney
Sec. 4. Seminar in Operator Theory.	Mr. Dye
Sec. 5. Seminar in Algebra.	Mr. Paige
Sec. 6. Seminar in p-adic Functions.	Mr. Straus
Sec. 7. Seminar in Topics in Complex Analysis.	Mr. Sario
Sec. 8. Seminar in Classical Harmonic Analysis.	Mr. Koosis
Sec. 9. Individual Studies.	The Staff

280. Mathematical Models and Applications. (3) I. Mr. Johnson

Prerequisite: B.A. degree with a mathematics major or equivalent.

This course is designed for students in the Mathematics-Education program. A development of mathematical theories to describe various empirical situations. Basic characterizing postulates are discussed with a logical structure of theorems developed from them. Such modern topics as Operations Research, Economic Models, Linear Programming, Theory of Games will be included.

***284A-284B. Advanced Mathematics for Teachers. (3-3) Yr.** ———

Prerequisite: B.A. degree with a mathematics major or equivalent.

This course is designed for students in the Mathematics-Education program. Some important ideas of algebra, geometry and the infinitesimal calculus which lead effectively from elementary to modern mathematics. Approaches to the number system, point sets, convex sets, geometric interpretations of algebra and analysis, integration, differentiation, infinite series and analytic functions.

290. Research in Mathematics. (1 to 6) I, II. The Staff**Professional Course in Method****370. The Teaching of Mathematics. (3) II.** Mr. Johnson

Prerequisite: course 4A or 37 and senior standing.

A critical inquiry into present-day tendencies in the teaching of mathematics.

STATISTICS**Lower Division Course****1. Elementary Statistics. (3) I, II.** Mr. Ferguson in charge

Emphasis is placed on the understanding of statistical methods. Topics covered are empirical and theoretical frequency distributions, sampling, estimation, hypothesis testing, correlation, regression, modern techniques.

Upper Division Courses**120A-120B. Probability and Statistics. (3-3) Yr.** Mr. Babbitt

(Replaces former Mathematics 120.)

Prerequisite: course 108, senior standing in mathematics, or consent of instructor. Designed for a student who desires to learn probability, and also theoretical statistics. Students with credit in Statistics 131A-131B will not receive credit for Statistics 120B.

First semester: basic laws of probability, discrete and continuous random variables, expectation, distribution, limit theorems. Second semester: basic distributions of statistics, sampling theory, estimation, hypothesis testing.

* Not to be given, 1963-1964.

131A-131B. Statistics. (3-3) Yr.

Mr. Hoel

Prerequisite: course 4B. Students with credit in Statistics 120B will not receive credit for Statistics 131A. Students with credit for Engineering 83 will receive one unit of credit for Statistics 131A.

A basic introductory course in the theory and applications of statistical methods. This course is designed for students who wish to learn statistical methods without first taking a course in probability and who are interested in applications.

Graduate Courses

231A-231B. Statistical Inference. (3-3) Yr.

Mr. Ferguson

Prerequisite: Statistics 120A-120B or Statistics 131A-131B; recommended: Mathematics 122A-122B.

Decision theory, the minimax and complete class theorems, the Neyman-Pearson theory of testing hypotheses, unbiased and invariant tests and estimates; applications to experimental designs, sequential analysis, and nonparametric inference.

***233. Stochastic Processes. (3) I.**

Mr. Babbitt

Prerequisite: an upper division course in probability or mathematical statistics, or consent of the instructor.

Elements of Markov processes, with applications to physics, biology, and engineering.

***240. Mathematical Theory of Design of Experiments. (3) II.** Mr. Massey

Prerequisite: Mathematics 108 and Statistics 120A-120B or Statistics 131A-131B, or consent of instructor.

Advanced statistical theory basic to the construction of experimental designs. Criteria for optimum designs. Methods of application to typical research problems.

260. Seminars. (3) I, II.

Mr. Hoel

Prerequisite Statistics 231A-231B.

Topics will be selected from theory of inference, theory of experimental design, multivariate analysis, sequential analysis, nonparametric methods.

NUMERICAL ANALYSIS RESEARCH

Numerical Analysis Research is a part of the Department of Mathematics of the University of California. It continues work formerly carried out on the campus by the Institute for Numerical Analysis of the National Bureau of Standards, which was replaced by this project on June 30, 1954. The group carries on basic research and training in numerical analysis and the efficient use of electronic digital computers for scientific and related purposes. It operates the SWAC, an electronic digital computing machine designed and built by the National Bureau of Standards with the financial support of the United States Air Force. The project provides facilities for large computation, which are available to University departments. With the cooperation of Numerical Analysis Research, the Department of Mathematics offers a series of courses and seminars to provide training in modern numerical analysis.

The research program of Numerical Analysis Research has been underwritten by the Office of Naval Research, United States Navy, and the Office of Ordnance Research, United States Army. The SWAC, library, and other equipment of the project are furnished by the United States Navy.

* Not to be given, 1963-1964.

MEDICAL MICROBIOLOGY AND IMMUNOLOGY

(Department Office, 33-241 Center for the Health Sciences)

Ruth A. Boak, M.D., *Professor of Microbiology and Immunology and Pediatrics.*

John M. Chapman, M.D., *Professor of Microbiology and Immunology, Public Health, and Preventive Medicine and Public Health.*

A. F. Rasmussen, M.D., *Professor of Microbiology and Immunology (Chairman of the Department).*

Charles M. Carpenter, M.D., *Emeritus Professor of Infectious Diseases.*

John F. Kessel, Ph.D., *Emeritus Professor of Infectious Diseases.*

William H. Hildemann, Ph.D., *Associate Professor of Microbiology and Immunology.*

David T. Imagawa, Ph.D., *Associate Professor of Microbiology and Immunology and Pediatrics.*

David L. McVickar, M.D., *Associate Professor of Microbiology and Immunology.*

Marietta Voge, Ph.D., *Associate Professor of Microbiology and Immunology.*

Henry E. Weimer, Ph.D., *Associate Professor of Microbiology and Immunology.*

Dexter H. Howard, Ph.D., *Assistant Professor of Microbiology and Immunology.*

James N. Miller, Ph.D., *Assistant Professor of Microbiology and Immunology.*

Margret I. Sellers, Ph.D., *Assistant Professor of Microbiology and Immunology.*

Jerrold A. Turner, M.D., *Assistant Professor of Microbiology and Immunology.*

The Department of Medical Microbiology and Immunology offers advanced study, leading to the M.S. and Ph.D. degrees in infectious diseases. The department is composed of the divisions of Bacteriology, Immunochemistry, Microbiologic Cytology, Mycology, Parasitology and Tropic Diseases, and Virology. The graduate program is designed for students whose primary interests are in the field of infectious agents related to medicine and host-parasite relationships, or for students seeking advanced training in one of the specialized fields.

Admission to Graduate Status

For admission to graduate status, a student must meet the requirements of the Graduate Division, and must hold an approved bachelor's degree with a major in a field related to Medical Microbiology and Immunology. Enrollment in the department is limited, and it will not be possible to accept a number of applicants who might qualify for admission were the laboratory facilities greater. Candidates will be selected on the basis of the following considerations:

1. Undergraduate and, where applicable, graduate scholastic record.
2. The results of an interview with members of the department, when possible.
3. Evaluation of the applicant's scientific potential and character on the basis of letters of recommendation.

Requirements for the Master's Degree

1. The general Graduate Division requirements (pages 162-165).
2. Chemistry 108A and 108B, Microbiology and Immunology 201.
3. A thesis (Plan I).

Requirements for the Doctor's Degree

1. The general Graduate Division requirements (pages 165-169).
2. Microbiology and Immunology 201, Microscopic Anatomy 101 (Histology), Pathology 231.

In addition to the formal requirements stated above, every student must pass, by the end of his third semester in graduate status, a written departmental examination testing his general knowledge in the field of Medical Microbiology and Immunology.

Graduate Courses

201. Microbiology and Immunology. (10) I. Mr. McVickar and the Staff

Lectures and laboratory. Study of the infectious agents of human disease with emphasis on host-parasite relationships and immunologic phenomena in immunity and disease, including identification of bacteria, fungi, animal parasites and viruses, and principles of prevention, treatment, and laboratory diagnosis.

208. Medical Virology. (4) II. Miss Sellers, Mr. Rasmussen

A study of viruses and rickettsiae causing human disease. It includes an introduction to methodology; virus-host cell relationships in representative experimental infections in animals, embryonated eggs and tissue cultures; pathogenesis, principles of immunity applicable to the control of disease in man.

209. Principles of Immunochemistry. (4) I. Mr. Weimer

A study of the chemistry of antigens, antibodies, and complement, and the mechanism of their interaction. The methods for their detection and measurement, as well as of the chemical basis of immunity and resistance to disease is considered. Techniques and methods involved in the study of antigen-antibody reactions are presented with emphasis on the quantitative aspects of serologic reactions.

251A-251B. Seminar in Microbiology and Immunology. (1-5) Yr.

Mr. Rasmussen and the Staff

Consideration of the history of infectious diseases, their host-parasite relationships, etiology, pathogenesis, epidemiology, diagnosis, and immunity.

252. Seminar in Medical Virology. (1) II. Miss Sellers

Review of current literature in the field of medical virology emphasizing fundamental host-cell interrelationships in human disease of viral origin. Selected topics will be discussed and results interpreted; conclusions and experimental methods will be evaluated.

253. Seminar in Medical Parasitology. (1) II. Mrs. Voge

Review of current and recent literature in the field of medical parasitology, emphasizing experimental work of medical or public health importance. Students will be expected to prepare reviews of selected subjects, and to discuss the contributions of various workers from the standpoints of experimental methods, results, their interpretation and their evaluation.

254. Seminar in Immunogenetics. (1) II. Mr. Hildemann

Review of current and recent literature in the field of immunogenetics, with emphasis on fundamental studies involving genetic and immunologic principles and techniques. Selected topics will be discussed and results interpreted; conclusions and experimental methods will be evaluated.

255. Seminar in Medical Mycology. (1) II. Mr. Howard, Mr. McVickar

Review of current and recent literature in the field of medical mycology, with emphasis on the host-parasite relationships in the human and animal mycoses. Students will be expected to prepare reviews of selected subjects and to discuss contributions of various workers from the standpoint of experimental methods, results, and their interpretation and evaluation.

291A-291B. Research in Microbiology and Immunology. (2-5) Yr.

Mr. Rasmussen and the Staff

A limited number of qualified graduate students may be admitted with the approval of the staff of the Department of Medical Microbiology and Immunology.

Letters and Science List.—All undergraduate courses in this department are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Course 4A; Physics 1A, 1B, 1C, 1D, or Physics 1A, 1B, 2B, or Physics 2A, 2B; Mathematics 1, 3A, 3B, 4A, 4B, or Mathematics 5A, 5B, 6A, 6B. Chemistry 1A is strongly recommended. Mathematics 4B may be taken during the junior year.

The Major.—Courses 104, 108, 131A, 131B, and two additional upper division meteorology courses; Mathematics 119A or 110AB or 110C, plus one additional upper division mathematics course; Physics 105 or Mathematics 125; and Physics 112 or Chemistry 110A.

Admission to Graduate Status

The department recognizes the desirability of wide variety in the background of students concerned with study of the various aspects of the atmosphere. In addition to those holding bachelor's degrees in meteorology, graduates with degrees in related disciplines—physics, mathematics, engineering, chemistry, geology, and geophysics—are encouraged to apply for graduate status in the department. Programs are arranged by consultation between the student and the department's graduate program committee, and considerable flexibility is maintained so that maximum advantage may be taken of the candidate's previous education.

Requirements for the Master's Degree

(a) Equivalent of meteorology, mathematics, and physics courses prescribed for the bachelor's degree. (For those who do not hold a bachelor's

¹ In residence fall semester only, 1963–1964.

degree in meteorology, this usually involves from 10 to 15 units of prescribed upper division meteorology courses.)

- (b) One of the following groups of courses:
 - (1) Meteorology 121, 151, 201 and 130 or 140 or 141.
 - (2) Meteorology 121, 130, 217 and 201 or 140 or 141.
 - (3) Meteorology 140, 141, 201 and 231 or 234.
 - (4) Meteorology 121, 201, 217 and 140 or 141.
- (c) At least one additional course from the following: Meteorology 230, 231, 232, 233, 234.
- (d) At least 2 units of individual study (Meteorology 297).
- (e) Meteorology 260 (for students following Plan II only).
- (f) A program of additional upper division or graduate courses in meteorology, mathematics and physics, approved by the department, to bring the total to 20 units including at least 8 graduate units for students following Plan I, and 24 units including at least 12 graduate units for students following Plan II.
- (g) Thesis approved by the student's thesis committee for students following Plan I, or comprehensive examination conducted by the department for students following Plan II.

Reading knowledge of a foreign language is not required for the master's degree.

Requirements for the Doctor's Degree

For the general requirements, see pages 165-169. Candidates should complete the foreign language requirements during the first year of graduate work.

The degree of Doctor of Philosophy is awarded principally for the completion of a satisfactory dissertation, which is an original contribution to knowledge in the field of meteorology. The areas of specialization in the department are: dynamic meteorology (fundamental hydrodynamics, theory of atmospheric waves, turbulence theory, and numerical weather prediction); synoptic meteorology (application of meteorological theory to the analysis of atmospheric structures, from the local to the planetary scale); meteorological physics (cloud physics, atmospheric electricity, atmospheric radiation and optics, upper atmospheric physics and atmospheric chemistry).

The preliminary written examinations conducted by the department include the area of the candidate's specialization and such important adjacent areas as are designated in the program approved by the candidate's guidance committee.

Lower Division Courses

3. Descriptive Meteorology. (3) II.

Mr. Pruppacher

Not open for credit to students who have credit for Geography 3 or Meteorology 4 or 4A. Elementary survey of the causes and distribution of weather and climate.

4. General Meteorology. (3) I.

Mr. Edinger

Prerequisite: Mathematics 1 and Physics 1B or 2A.

Composition, structure and circulation of the atmosphere, including elementary theory of storms and other weather disturbances. Theory of meteorological instruments and observations.

4A. General Meteorology. (5) I.

Mr. Edinger

Lecture, three hours; laboratory, six hours. Prerequisite: Mathematics 1 and Physics 1B or 2A. Students who have credit for Meteorology 4 will receive 2 units of credit.

Composition, structure and circulation of the atmosphere, including elementary theory of storms and other weather disturbances. Theory of meteorological instruments and observations. Practical exercises in surface and upper air observations, weather codes, and elementary weather map analysis.

Upper Division Courses**103. Oceanography. (3) I.**

Mrs. Malkus

Prerequisite: Meteorology 131A or consent of the instructor.

Global heat and water budgets; climatology, mechanisms and description of air-sea exchange. Introduction to dynamics of ocean currents, comparison with atmosphere.

104. Meteorological Physics. (3) I.

Mr. Pruppacher

Prerequisites: Mathematics 4B or 6B; Physics 1A, 1B, 1C, 1D or Physics 2A, 2B.

Elementary theory of atmospheric radiation; atmospheric optics; introduction to atmospheric electricity; physics of cloud and precipitation.

108. Physical Climatology. (3) II.

Mr. Palmer

Prerequisite: course 4A.

The general circulation of the atmosphere and the normal fields of temperature, cloudiness, and precipitation over the globe.

111. Modern Meteorological Instruments. (3) II.

Mr. Edinger

Lecture, two hours; laboratory, three hours. Prerequisite: course 4A.

A survey of modern instruments, their uses and limitations. Meteorological instrumentation, with emphasis on accuracy and applicability of various techniques; measurement of special meteorological elements; upper-air sounding methods; radar storm detection, fliers; rawins.

121. Dynamic Meteorology. (3) I.

Mr. Holmboe

Prerequisite: courses 131A-131B, with grades of C or better.

Kinematics and dynamics of the field of motion. Applications to stable and unstable atmospheric waves.

130. Introduction to Numerical Weather Prediction. (3) I.

Mr. Mintz

Prerequisite: courses 131A-131B.

Formulation and analysis of the problem of numerical weather prediction. Study of simple atmospheric models. Quasi-geostrophic approximation, baroclinic instability, energy conversions. Numerical errors and integration methods.

131A. Thermodynamics, Hydrostatics and Elementary Dynamics of the Atmosphere. (5) I.

Mr. Wurtele

Lecture, four hours; laboratory, three hours. Prerequisite: course 4A. Prerequisite or concurrent: Mathematics 110A and 110B, or 119A or 110C; Physics 112.

Thermal properties of air and water vapor. Adiabatic processes. Atmospheric soundings and hydrostatic stability. The equations of motion relative to the earth. Geostrophic and gradient flow. Frontogenesis and frontal equilibrium. Variation of wind with height. Vertical motion and convection.

131B. Dynamics of the Atmosphere. (5) II.

Mr. Mintz

Lecture, two hours; laboratory, twelve hours. Prerequisite: course 131A.

Differential properties of the velocity field: divergence, vorticity. The equation of continuity; the vorticity equation. Waves in zonal flow; long waves in the westerlies. Frontal waves and cyclones. Baroclinic processes. Energy conversions. Relations of cloud and weather to the field of motion.

140. Radiation Processes in the Atmosphere. (3) II.

Mr. Venkateswaran

Prerequisite: course 104 or Physics 108B and 110.

Radiative transfer in a planetary atmosphere, with application to the solar, sky, and heat radiation of the earth and atmosphere.

141. Physics of the Upper Atmosphere. (3) II.**Mr. Holzer**

Prerequisite: course 104, or Physics 108B or 118.

Direct and indirect methods of the study of upper atmospheric layers. Physical properties of the upper atmosphere; composition, temperature and pressure; ozone layer; aurora and airglow; ionosphere.

151. Principles of Weather Analysis and Forecasting. (5) I.

Prerequisite: courses 181A-181B.

Mr. Bjerknes, Mr. Neiburger

Advanced laboratory exercises in the analysis of the structure of wind and weather systems and the laws of their development and motion. Forecasting temperature, clouds, precipitation, fog, icing, turbulence, and severe storms.

199. Special Studies in Meteorology. (1-3) I, II. Mr. Edinger, Mr. Sekera

Prerequisite: senior standing and consent of the instructor.

Graduate Courses**201. Advanced Synoptic Meteorology. (3) II.****Mr. Bjerknes**

Prerequisite: course 181A-181B and 108.

217. Meteorological Hydrodynamics. (3) II.**Mr. Holmboe**

Prerequisite: course 121.

***230A-C-D. Advanced Topics in Numerical Weather Prediction.**

(2-2-2) I.

Prerequisite: course 180.

230B. Advanced Topics in Numerical Weather Prediction. (2) II.**Mr. Wurtele**

Computation in wave-number space, predictability of atmospheric motion.

231A-C-D. Advanced Topics on the Higher Atmosphere. (2-2-2) I.*231B. Advanced Topics on the Higher Atmosphere. (2) I. Mr. MacDonald**

Physical and chemical characteristics of the atmosphere above 120 km, including dynamics, tidal motion and wave propagation.

232A-D. Advanced Topics in Dynamic Meteorology. (3-3) I.*232B. Advanced Topics in Dynamic Meteorology. (3) I.****Mr. Sheppard**

Some problems of turbulence and turbulent transfer.

232C. Advanced Topics in Dynamic Meteorology. (3) I.*Mr. Wurtele**

Current theories of meteorological phenomena of scale of one to one hundred kilometers (mesoscale dynamics).

233A-B-C. Advanced Topics in Synoptic Meteorology and Physical Climatology. (2-2-2)*233D. Advanced Topics in Synoptic Meteorology and Physical Climatology.**

(2) I.

Mr. Palmer

Methods of climatological analysis.

234A-B. Advanced Topics in Physical Meteorology. (2-2-2) I, II.*234C. Advanced Topics in Physical Meteorology. (2) II.****Mr. Neiburger**

Meteorological aspects of air pollution.

234D. Advanced Topics in Physical Meteorology. (2) I.**Mr. Sekera, Mr. Venkateswaran**

Selected problems of radiative transfer in the atmosphere.

* Not to be given, 1963-1964.

260. Seminar in Meteorology. (2) I, II. Mr. Mintz, Mr. Sekera
 261. Seminar in Cloud Physics. (2) II. Mr. Neiburger
 262. Seminar in Meteorological Hydrodynamics. (2) I. Mr. Holmboe
 263. Seminar in Synoptic Meteorology and Climatology. (2) II. Mr. Mintz
 264. Seminar in Physical Meteorology. (2) I. Mr. Venkateswaran
 297. Individual Studies for Graduate Students. (1-4) I, II. Mrs. Malkus, Mr. Wurtele
 299. Research on Doctoral Dissertation. (1-6) I, II. Mr. Sekera

MICROBIOLOGY

Requirements for the Master's Degree

1. For the general requirements, see pages 162-165. Plan I is followed.
2. Microbiology is classed as a series of offerings in a field rather than in a department. For admission to this field, completion of an approved undergraduate major in bacteriology, biochemistry, botany, microbiology, or zoology is demanded.
3. A reading knowledge of French or German is essential. In exceptional cases proper substitution may be permitted with the approval of the department and the Dean of the Graduate Division.

The requirements for the master's degree ordinarily are met on the campus in Los Angeles, but if occasion demands, courses properly selected at other campuses of the University, will be accepted for partial fulfillment.

Requirements for the Doctor's Degree

1. For the general requirements, see pages 165-169.
2. The particular requirements of the group include the following: (a) Completion of an appropriate undergraduate major. (b) An effective reading knowledge of French and German. (c) General chemistry, organic chemistry, biochemistry, and quantitative analysis. (d) A year course in physics with appropriate laboratory. This must be Physics 2A-2B of the Los Angeles campus or its equivalent. (e) Sufficient training in mathematics to enable the student to handle simple statistical methods. (f) One semester course in each of the following: bacteriology, botany, and zoology. (g) Upper division work in at least two of the following fields: bacteriology, biochemistry, cytology, histology, mycology, zoology, fresh water and marine microbiology. (h) In addition, the executive committee of the group in microbiology will hold the student responsible for other work according to the particular field chosen. For example, a student working toward a degree in marine microbiology at the Scripps Institution of Oceanography would be obliged to comply with the prescribed preliminary requirement for a degree in oceanography or marine sciences.

Instructional and course facilities for selected graduate students in the field of microbiology are available on the campuses at Riverside, San Diego, and Los Angeles.

Graduate students in the department with majors in bacteriology should consult the chairman of the Department of Bacteriology concerning a recommended program for completion of requirements and the deadlines for satisfying these requirements.

The campus or campuses on which the student resides while working for a doctor's degree in microbiology will be determined by the nature of his work and by the general requirements.

Research in microbiology may be in the fields of agricultural bacteriology, bacteriology, biochemistry, cryptogamic botany, marine or fresh-water microbiology, mycology, phytoplankton, zoology and zooplankton.

Teaching Assistantships.—The staff considers teaching assistantships an important part of predoctoral training. Therefore, and regardless of other financial support which may be available, each graduate student, as one of the requirements for the doctorate, should serve not less than two semesters as a teaching assistant.

❖ MILITARY SCIENCE AND TACTICS

(Department Office, 132 Men's Gymnasium)

Raymond C. Ashby, Jr., A.B., Colonel, Infantry, *Professor of Military Science (Chairman of the Department)*.

George W. Schilling, Jr., A.B., Lieutenant Colonel, Infantry, *Associate Professor of Military Science*.

William E. Dismore, Jr., B.S., Captain, Chemical Corps, *Assistant Professor of Military Science*.

Irvin Darivoff, A.B., M.B.A., Captain, Engineer Corps, *Assistant Professor of Military Science*.

Letters and Science List.—All undergraduate courses in this department up to a total of 12 units are included in the Letters and Science List of Courses. Note: This in no way prejudices counting additional military science courses up to the 12 units of non-Letters and Science credit accepted toward the degree. For regulations governing this list, see page 72.

College of Engineering.—Lower division: 6 units are acceptable toward the baccalaureate. Upper division: 6 units of nonmajor field electives and the 3 units of optional electives, a total of 9, may be applied toward the baccalaureate.

ARMY RESERVE OFFICERS' TRAINING CORPS

The Army R.O.T.C. course provides college-level training in the general military science curriculum leading to a commission in the Army. Students in all academic fields are eligible for admission in the general military science program. The purpose of the course is to provide a general type of training to produce officers who may serve in any arm of service of the Army after further basic training in the appropriate service school. The length of such service is to be a period of six months to two years, contingent upon the requirements of the service, as prescribed by the Armed Forces Reserve

Act of 1955. It is the continuing effort of the Department of the Army to assign graduates to the arm or service most closely aligned with the individual's capabilities, professional training, and preference.

The course is divided into two general parts: (1) the two-year Basic Course for all qualified male students who select Army R.O.T.C. and (2) the Advanced Course for selected students who desire to complete an additional two years of R.O.T.C. training leading to a commission in the United States Army Reserve. Successful completion of the four-year R.O.T.C. branch general curriculum qualifies graduates for a commission in any arm of service. The interests, aptitudes, and educational accomplishments of the student are given careful consideration in order that he may be recommended for a commission in the arm of service for which he is best qualified.

The Universal Military Training and Service Act (65 Stat. 75; 50 U.S.C. App. 451-467) as amended, and as further amended by the Reserve Forces Act of 1955 (PL305, 84th Congress; DA Bul. 12, 1955) provides for deferment from the draft of regularly enrolled students currently pursuing a course in military science who meet the standards for acceptance and who agree to complete the Advanced Course training upon completion of the Basic Course. The purpose of deferring a student's active military service until completion of the R.O.T.C. course of instruction is to permit him to complete the entire four-year R.O.T.C. program prior to undertaking his active military service obligations. Additional information may be obtained from the department.

Basic Course (Lower Division)

The Basic Course is offered on an elective basis to all qualified lower division male students.

The objective of the two-year Basic Course R.O.T.C. curriculum is to acquaint the student with the fundamental principles of national security through the study of the military history of our country, to introduce the techniques and principles of modern warfare, and to develop the traits of character and leadership necessary to prepare him to discharge his citizenship obligations. These courses prepare the student for the Advanced Course. Draft deferments may be granted to qualified Basic Course students who intend to pursue the four-year R.O.T.C. training program.

All necessary equipment, uniforms, and textbooks are provided free of charge to students.

1A-1B First-Year Basic Military Science. (1-1) Yr.

The Staff

One hour of classwork and one hour of leadership laboratory.

Organization of the Army R.O.T.C., U.S. Army and National Security, individual weapons and marksmanship, leadership laboratory.

In addition, the student must complete a two-unit elective in one of the following fields: effective communication, science comprehension, general psychology, political development and political institutions.

20A-20B. Second-Year Basic Military Science. (2-2) Yr.

The Staff

Prerequisite: course 1A-1B. Two hours of classwork and one hour of leadership laboratory.

American military history, map and aerial photography reading, introduction to basic tactics and techniques, leadership laboratory.

The Advanced Course (Upper Division)

The Advanced Course of instruction is designed to produce junior officers who by their education, training, and inherent qualities are suitable for continued development as officers in any arm or service of the United States Army. Training in military leadership is emphasized. Instruction is given in subjects common to all branches of the Army and qualifies the graduate for the duties of a junior officer. Advanced Course students pursuing courses in basic science and engineering are fully qualified for commissions in the arms or service related to their academic course of study.

Admission to the Advanced Course is by selection from among qualified regularly enrolled students who meet the academic and physical requirements and who have demonstrated positive interest and leadership potential. Students may apply who have successfully completed one year of the Basic Course who have the credit for the Basic Course from other institutions authorized to present the equivalent instruction or who present evidence of satisfactory service in the Armed Forces. A student must qualify for appointment as second lieutenant prior to reaching twenty-eight years of age. All students accepted for entrance into the Advanced Course must have at least two more academic years remaining in either the graduate or undergraduate course before qualifying for their first baccalaureate degree.

Students accepted for admission to the Advanced Course receive approximately \$535 in pay during the two-year period (exclusive of summer camp) in addition to the use of all necessary equipment and textbooks free of charge. The officer-type uniform provided each student becomes his personal property upon successful completion of the Advanced Course.

Advanced Course students are required to attend a six-week course of training at R.O.T.C. Summer Camp during the summer vacation period following the completion of the first year of the Advanced Course; this Summer Camp is attended by Advanced Course R.O.T.C. students from several universities. The training at camp is designed to provide the broad background necessary for a junior officer and stresses practical work in leadership, physical development, and knowledge of the important roles played by all branches of the service in the military team. Supervised social and recreational activities are provided. The student is furnished uniforms, equipment, and receives \$78 per month and travel expenses to and from camp. Academic credit of 3 units for the six weeks of camp is granted by the University.

103A-103B. First-Year Advanced Military Science. (2-3) Yr. The Staff

Two hours of classwork 103A, three hours of classwork 103B, and one hour of leadership laboratory each week

Leadership, military teaching principles, branches of the Army, small-unit tactics and communications, precamp orientation, leadership laboratory.

In addition, the student must complete a three-unit elective in one of the following fields: effective communications, science comprehension, general psychology, political development and political institutions.

104A-104B. Second-Year Advanced Military Science. (2-3) Yr. The Staff

Prerequisite: Basic Course and course 103A-103B.

Two hours of classwork 104A, three hours of classwork 104B, and one hour of leadership laboratory each week.

Operations, logistics, army administration, military law, the role of the United States in world affairs, service orientation, leadership laboratory.

In addition, the student must complete a three-unit elective in one of the following fields: effective communications, science comprehension, general psychology, political development and political institutions.

Requirements for Entering Music Students.—All new students planning to complete a major or teaching minor in music are required to take certain tests prior to first enrollment in classes. These tests, described below, are administered during registration week, immediately preceding the beginning of classes. Further information may be obtained from the Department of Music.

Aptitude and Achievement Tests.—Every student, whether transferring previous college credit or not, must take standard tests of musical aptitude and achievement before enrolling in classes.

Piano Sight-Reading Tests.—Elementary keyboard sight-reading ability is prerequisite to all theory courses within the Department. Any student failing this test enrolls in Music B, a remedial course in sight reading. He may enroll concurrently in Music 1A and 3A. He may not enroll in Music 41E (Piano) as a means of removing this deficiency.

Advanced Standing Test.—Students transferring with credit for part of the 12 unit requirement in music theory (Music 1ABC and 3ABC) must take this test to determine their placement within the 1ABC and 3ABC sequences. If, as a result of the examination, the student is required to take a course for which he already has credit, he retains that credit but receives no further unit credit for the work repeated. Students transferring 12 or more units of music theory credits (Music 1ABC and 3ABC or the equivalent) are not held for the examination, and are eligible to take upper division courses having lower division theory prerequisites.

Students with *outstanding* aptitude and achievement, but with no previous college credit in music theory, will be considered for exemption from part or all of 1ABC and/or 3ABC.

College of Letters and Science

Letters and Science List.—All courses included in the series 1A to 30B; 100A to 115D, 118, 121A to 177, 197, and 199. For regulations governing this list, see page 72.

Preparation for the Major.—Courses 1A-1B-1C, 3A-3B-3C, 20A-20B, two semesters from the series 40A-K, and a year of University work in French, German, or Italian (or its high-school equivalent). Recommended: History 1A-1B and Physics 2A-2B or 10.

The Major.—Twenty-four units of upper division courses, distributed as follows: (a) course 100A-100B, (b) at least 4 units chosen from courses 121A to 177, (c) courses 104A-104B, 107A, and 109A, and (d) additional upper division courses in music, including four semesters from the series 190A-K.

College of Fine Arts

Distribution of Units.—The total number of units in Music Department courses which may be included in the 120 units required for the Bachelor of Arts degree may not exceed 54. Only 16 units from courses 40A-K, 41A-W, 190A-K, 191A-W, 192A-W, and 193 may be applied towards the bachelor's degree.

Preparation for the Major.—Courses 1A-1B-1C, 3A-3B-3C, 20A-20B, two semesters from the series 40A-K, and a year of University work in French, German, or Italian (or its high-school equivalent). Recommended: Physics 2A-2B or 10.

The Major.—Thirty-six units of upper division courses, distributed as follows: (a) course 100A-100B, (b) at least 4 units chosen from courses 121 to 177, (c) courses 104A-104B, 107A, and 109A, (d) four semesters from the series 190A-K, and (e) electives from upper division music courses to bring the total to 36 units.

Requirements for Teaching Credentials.—Within the 36 units required for the major, the candidates for a teaching credential must fulfill requirement (e) by including courses 110, 111, 115A-B-C-D. In addition he must take courses 41A or 191A (4 units), 41E or 191E (4 units, and/or proficiency examinations). For further information on teaching credentials, consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION and Dr. Gerow of the Department of Music.

Graduate Division

All students planning to become candidates for the Master of Arts or Doctor of Philosophy degrees in music are required to take Placement Examinations in the following subjects during their first semester of residence: *harmony, counterpoint, history and literature of music* (part I, before 1750; part II, after 1750), *formal analysis and identification of styles* (part I, before 1750; part II, after 1750), *score reading* (including *basic piano*) and *solo performance* in the student's principal medium. The student's transcript of credits must show at least a grade B average in each of the following subjects: *dictation, sight singing, keyboard harmony, orchestration, and con-*

ducting. Deficiencies in the record must be removed by examination or formal course work. The completion of these requirements in their entirety is prerequisite to the final examinations for the M.A. degree and the qualifying examination for the Ph.D. degree; they also function as guidance examinations which point out to the student possible weaknesses or gaps in his undergraduate work. These examinations are given in the fall and spring semester during the fourth week of instruction; some portion of the examinations may also be given during the summer sessions. The student will be allowed to take each examination no more than three times and all must be passed within a two-year period. As soon as possible, and in any case before being assigned a committee to guide his studies for a higher degree, the student must demonstrate his ability to write with insight on a musical subject in clear English and, if the student's field of concentration is composition, he must demonstrate his ability to compose music showing definite promise.

A. Requirements for the General Secondary Credential.—Consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

B. Requirements for Admission to Graduate Courses.—

1. *As a candidate for the general secondary credential:* ordinarily the undergraduate major in music, or its equivalent, including courses 41A or 191A (4 units), 41E or 191E (4 units), 100A–100B, 104A–104B, 107A, 109A, 110, 111, 115A–115B–115C–115D, 4 units chosen from courses 121A, 177.

2. *As a candidate for the master's degree:* ordinarily the undergraduate major of 24 upper division units of music.

C. Requirements for the Master's Degree.—

For the general requirements, see page 162. In addition, candidates for the Master of Arts degree in music must satisfy the following:

1. *Admission:* the candidate must have the bachelor's degree with a major in music (or equivalent) as stated in this bulletin.

2. *Thesis:* the thesis plan (page 164, Plan I) is favored. A musical composition in large form is acceptable as a thesis.

3. *Course of Study:* the planning of the course of study will be done under the guidance of the graduate adviser. The candidate may place emphasis upon composition, musicology, ethnomusicology, systematic musicology, or music education. He is expected to attend a seminar appropriate to his discipline during each semester of residence: *historical musicology*, courses 250, 256, 260A–260B; *composition*, courses 251A–251B, 252A–252B; *ethnomusicology*, course 280A–280B; *systematic musicology*, course 269, 272A–272B; *music education*, course 270A–270B. Only the following upper division courses will be allowed to count toward the unit requirement for the master's degree: 101, 102, 103A, 103B, 105, 106, 107B, 108A, 108B, 109B, 118, 121A, 121B, 122, 123, 124, 125, 126, 127, 128, 129, 132, 133, 134, 135, 136A*, 136B*, 139, 171, 172, 173, 174, 177, 179A†, 179B†, 197, 199. A maximum

* Will not count for students whose emphasis is ethnomusicology.

† May be applied only by students whose emphasis is music education.

of five units is allowed in courses 190A-K and 192A-W, but not more than three units in either series.

4. *Foreign Language*: a reading knowledge of French, German or Italian is required of all candidates for the degree.

5. *Course requirements*: all candidates are required to complete course 200A (Research Methods and Bibliography); all candidates save those whose field of specialization is composition must also complete course 200B.

6. *Examinations*: all candidates must take the *Placement Examinations* and pass them completely before taking the *Final Examination*.

D. Requirements for the Doctor's Degree.—

1. *General requirements*: candidates for the Ph.D. degree in music must fulfill the general requirements of the Graduate Division (see page 165). These include the completion of the undergraduate major in music in the College of Fine Arts or the College of Letters and Science, or an equivalent major completed elsewhere.

2. *The placement examinations*: passing the placement examinations described above is prerequisite to the qualifying examinations.

3. *Foreign language and other tools*: all candidates are expected to have a command of French and German, and of such other languages (Italian, Latin, Russian, Spanish) and skills (notation, statistics) as the field of specialization may require.

4. *Course requirements*: the candidate is required to complete course 200A-200B (Research Methods and Bibliography). He is also expected to attend a seminar appropriate to his discipline during each semester of residence (until the Ph.D. qualifying examinations have been passed): *historical musicology*, courses 250, 256, 260A-260B; *ethnomusicology*, courses 197, 280A-280B; *systematic musicology*, courses 269, 272A-272B; *music education*, course 270A-270B; *composition*, consult the Department of Music for requirements. Course 299 serves to guide the preparation of the dissertation and should normally be taken for two semesters after the completion of the qualifying examinations.

5. *Qualifying examinations*: before he is admitted to candidacy, the student must pass a series of qualifying examinations, both written and oral. The general written examinations required of all candidates consist of the following: (1) history of musical styles in Western civilization (3 hrs); (2) analysis of form, style, and texture in Western music (3 hrs); (3) an examination to demonstrate a basic knowledge of the music of non-Western cultures (2 hrs)*; and (4) a choice of one or more: acoustics of music, aesthetics of music, psychology of music, and organology (2 hrs). In the field of specialization further written examinations, totaling six hours, are required in two areas. Possible major fields are: *historical musicology* (the history and theory of Western art music), one area to be selected from ancient, medieval, renaissance, or baroque music, and one from classic, romantic, or twentieth-century music; *ethnomusicology* (the music of the non-Western world and folk and tribal music of all cultures),

* Candidates in music education may substitute an examination of equivalent length and scope in the general area of education for either (3) or (4).

two areas to be selected from contrasting musical cultures; *systematic musicology*, two areas to be selected from acoustics, psychology of music, aesthetics of music, and organology and technique of instruments; *music education*, one area to encompass historical, philosophical, and psychological bases, the other to be selected from music education emphasizing early childhood-elementary, secondary, college-university, or adult levels; *composition*, consult the Department of Music for requirements. The conclusion of the qualifying examinations, administered by the entire doctoral committee, is given in the form of an oral examination covering the general and specialized areas chosen from above as well as style identification and bibliography.

Lower Division Courses

THEORY AND LITERATURE

B. Sight Reading. (No credit) I, II.

Mrs. Turrill.

Two hours weekly. Although this course yields no credit, it displaces 2 units on the student's program. Every student failing the Sight Reading Test is required to take course B in the semester immediately following this failure.

Development of facility in sight reading at the piano. Preparatory exercises; accompaniments of the difficulty of Schubert's "Who Is Sylvia?"; simple four-part chorale harmonizations.

1A-1B-1C. Musicianship. (2-2-2) Three semesters. Beginning either semester.

Mr. Des Marais, Mr. Hutchinson, Mr. Lazarof, Mr. Stein, Mr. Travis

Three hours weekly, including one laboratory hour. Prerequisite: passing the Basic Music Test and concurrent registration in course 3A-3B-3C except as excused by the Advanced Standing Examination in Harmony

Ear training, sight singing, dictation, and keyboard harmony correlated with the corresponding semester of course 3A-3B-3C.

3A-3B-3C. Harmony. (2-2-2) Three semesters. Beginning either semester.

Mr. Des Marais, Mr. Hutchinson, Mr. Lazarof, Mr. Stein, Mr. Travis

Two hours weekly. Prerequisite: passing the Sight Reading Test and concurrent registration in course 1A-1B-1C except as excused by the Advanced Standing Examination in Musicianship.

The harmonization of figured basses and of given and original melodies; 3A deals with triads and passing and auxiliary tones; 3B continues with the addition of seventh chords, elementary modulation, and the remaining non-chord tones; 3C deals with chromatic harmony.

20A-20B. Survey of Musical Literature. (2-2) Yr. Beginning either semester.

Mr. Hanley, Mr. Tusler

Three hours weekly, including one listening hour. Prerequisite: course 3A or concurrent registration in 3B. 20A is prerequisite to 20B. Designed for the major and teaching minor in music. (Course 30A-30B is for general University students.)

The study of representative musical masterworks and their background.

30A-30B. Introduction to the Literature of Music. (2-2) Yr. Beginning either semester.

Mr. Des Marais, Mr. Hanley, Mr. Hutchinson,
Mr. Stevenson

Two hours lecture, one hour discussion, and one hour listening weekly. Course 30A is prerequisite to 30B. Designed for the general University student. Course 20A-20B is for the major and teaching minor in music.

A general survey of music literature, with emphasis on music from Bach's time to the present, including an introduction to technical and formal principles.

31. Fundamentals of Music. (3) I, II.**Mr. Tusler**

Two class meetings and two laboratory periods weekly. May not be applied toward the degree by the student whose major is music.

Singing, ear training, music reading, elementary harmony, transposition, and conducting.

PERFORMANCE

Courses in this series may be repeated for credit. Prerequisite: audition for consent of the instructor.

40A-K. Organizations. I, II.**40A. University Symphony Orchestra. (1)**

Four hours of rehearsal each week.

The study and performance of symphonic literature.

40B. University Concert Band. (1)**Mr. Sawhill**

Four hours of rehearsal each week.

40C. University Chorus. (1) No audition.

Three hours of rehearsal each week.

40D. University A Cappella Choir. (1)**Mr. Wagner**

Three hours of rehearsal each week.

The study and performance of choral literature.

40E. University Glee Club. (1)**Mr. Gerow, Mr. Moremen**

Three hours of rehearsal each week.

40F. Madrigal Singers. (1)**Mr. Moremen**

Three hours of rehearsal each week.

The study and performance of significant music of the madrigal school.

40G. Chamber Music Ensemble. (1)**Mr. Roth, Mr. Sawhill**

Three hours of rehearsal each week.

The study and interpretation of chamber music literature.

40H. Opera Workshop. (2)**Mrs. Limonick, Mr. Popper**

Eight hours of rehearsal each week.

The study of the musical, dramatic, and language techniques in opera through the performance of representative scenes and acts.

40J. Collegium Musicum. (1)**Mr. Rubsamen**

Three hours of rehearsal each week.

The study and performance of instrumental and vocal music of the Medieval, Renaissance, and Baroque periods, using the original instruments whenever possible.

40K. University Marching, Varsity, and Cadet Band. (1)

Four hours of rehearsal each week.

Mr. Sawhill, Mr. James**41A-W. Classes in Applied Music. (2) I, II.****41A. Voice.****Mr. Windward, Mr. Winger****41E. Piano.****Mrs. Turrill****41J. Organ.****Mr. Petran****41K. Violin.****Mr. Roth****41L. Viola.****Mr. Plummer****41M. Cello.****Mr. Pascarella****41N. Bass Viol.****Mr. Mercurio**

Upper Division Courses

- 100A-100B. History and Analysis of Music. (4-4) Yr. Beginning either semester.** Mr. Marrocco, Mr. Reaney, Mr. Revitt
 Five hours weekly, including one listing hour. Prerequisite: courses 3A-3B-3C, 20A-20B, or their equivalent. Course 100A (from antiquity to 1750) is not prerequisite to course 100B (from 1750 to the present).
 A study of the development of music; lectures, listening, technical analysis, and written reports.

THEORY

- 101. Advanced Keyboard Harmony. (2) I.** Mr. Des Marais
 Three hours weekly, including one laboratory hour. Prerequisite: course 3A-3B-3C.
 The reading of figured bass; sequences, modulations, etc., in the harmonic vocabulary of the eighteenth and nineteenth centuries.
- 102. Score Reading. (2) II.** Mr. Des Marais
 Three hours weekly, including one laboratory hour. Prerequisite: course 101 or consent of the instructor.
 Reading at the piano of several staves, the various C clefs, and parts for transposing instruments; chamber music and simple orchestral scores.
- 103A-103B. Advanced Harmony. (2-2) Yr.** Mr. Travis
 Prerequisite: course 3A-3B-3C.
 Modes and new scales. Freer concepts of modulation. Chords built on fourths. Bitonality and polytonality. The Hindemith, the 12-tone, and other systems. Modern uses of rhythm. Analysis of contemporary works.
- 104A-104B. Counterpoint. (2-2) Yr. Beginning either semester.**
 (Replaces the former course 5A-5B.) Mr. Des Marais
 Prerequisite: course 3A-3B or consent of the instructor.
 Two-voice writing and analysis of representative contrapuntal works in two and more voices. Course 104A, modal counterpoint, with emphasis on the motet; 104B, tonal counterpoint, with emphasis on the invention.
- 105. Advanced Modal Counterpoint. (3) II.** Mr. Nelson
 Prerequisite: course 104A and consent of the instructor.
 Writing in three and more voices, with emphasis on the motet.
- 106. Advanced Tonal Counterpoint. (3) I.** Mr. Hutchinson
 Prerequisite: course 104A-104B and consent of the instructor.
 Writing in three and more voices, with emphasis on the fugue.

107A-107B. Composition. (2-2) Yr.

Mr. Des Marais, Mr. Kremenliev, Mr. Lazorf, Mr. Vincent

Prerequisite: courses 3A-3B-3C, 104A-104B, 100A-100B, and consent of the instructor; 100A-100B may be taken concurrently.

Vocal and instrumental composition in the smaller forms.

108A-108B. Studies in Musical Analysis. (2-2) Yr.

Prerequisite: courses 3A-3B-3C, 20A-20B, 100A-100B, or consent of the instructor. The application of a broad analytical approach to compositions in widely divergent styles.

109A-109B. Orchestration.

Mr. Kremenliev, Mr. Vincent

Prerequisite: course 3A-3B-3C.

109A. sec. 1, and 109B. (2-2) yr.

For regular music majors.

Ranges and properties of orchestral instruments. Scoring for full orchestra. Problems of balance and sonority. Analysis of orchestral scores.

109A, sec. 2. (2) I, II.

For candidates for the special secondary teaching credential.

Theory and practice of writing for instrumental ensembles. The study of orchestral scores and an introduction to symphonic orchestration.

110. Choral Conducting. (2) I, II.

Mr. Moreman

Prerequisite: courses 1A-1B, 3A-3B, and 4 units of course 40.

The theory and practice of conducting choral organizations.

111. Instrumental Conducting. (2) I, II.

Prerequisite: courses 1A-1B, 3A-3B.

The theory and practice of conducting instrumental organizations.

115A-B-C-D. Instrumental Technique.

Mr. DeLancey, Mr. Tanner, Mr. Sawhill

A practical and theoretical study of the technique of orchestra and band instruments, including the principles of arranging music for representative combinations. Appropriate literature for instrumental ensembles.

115A. Strings. (2) I, II.**115B. Woodwind. (2) I, II.****115C. Brass. (2) I, II.****115D. Percussion and Ensemble. (2) I, II.****118. Acoustics of Music. (2) I, II.**

Mr. Petran

Prerequisite: one year of high school physics, Physics 10, or the equivalent.

A course covering the physical basis of musical sounds, including a discussion of the objective cause of consonance and dissonance, together with a treatment of the generation and the analysis of the tones produced by the various musical instruments and the voice. Illustrated lectures and class discussions.

HISTORY AND LITERATURE**121A-121B. Music of the Americas. (2-2) Yr.**

(Replaces former course 121.)

Mr. Stevenson, Mr. Marrocco

No prerequisite. Course 121A is not prerequisite to 121B.

First semester: a survey of music from pre-Columbian times to the present in the countries lying south of the United States. Second semester: a survey of music from colonial times to the present in the United States and Canada.

122. Music of Indonesia. (3) II.**Mr. Hood**

Prerequisite: course 136A-136B or consent of the instructor.

Study of the diverse musical cultures of Indonesia, with emphasis on the music, dance, theater, literature and historical background of Java and Bali, including a laboratory in gamelan performance. Two hours lecture and three hours supervised study in gamelan performance weekly.

123. Music in the Middle Ages, 900-1400. (3) I.**Mr. Rubsamen**

Prerequisite: courses 3A-3B-3C, 20A-20B.

A detailed study of the musical forms and the notation of sacred and secular music from the beginnings of polyphony to the end of the fourteenth century.

124. Music in the Renaissance Period, 1400-1600. (3) II.**Mr. Reaney**

Prerequisite: courses 3A-3B-3C, 20A-20B.

The meaning of the Renaissance as it applies to music. A study of musical forms, techniques, and aesthetic attitudes from the pre-Renaissance to Palestrina.

125. Music in the Baroque Period, 1600-1750. (3) I.

Prerequisite: courses 3A-3B-3C, 20A-20B.

The music of the baroque period from Monteverdi to Handel and J. S. Bach.

126. Music in the Classic Period, 1730-1827. (3) II.

Prerequisite: courses 3A-3B-3C, 20A-20B.

The music of the early classic schools and of Haydn, Mozart, and Beethoven.

127. Music in the Romantic Period, 1820-1900. (3) I.**Mr. Revitt**

Prerequisite: courses 3A-3B-3C, 20A-20B.

The music of the romantic period from Weber and Schubert to the end of the nineteenth century.

128. Music of the Twentieth Century. (3) II.**Mr. Tusler**

Prerequisite: courses 3A-3B-3C, 20A-20B.

A study of form, style, and idiom in music from 1900 to the present.

129. Music of the Balkans. (3) I.**Mr. Kremenliev**

Prerequisite: course 136A-136B, or consent of the instructor.

A survey of the music of the Balkan countries, including a study of Eastern and Western elements; performance on representative instruments. Two hours lectures and three hours supervised study in performance weekly.

130. Bach. (2) I.**Mr. Roth**

No prerequisite.

Primarily for the general University student. May not be applied toward the major in music.

131. Beethoven. (2) II.**Mr. Roth**

No prerequisite.

Primarily for the general University student. May not be applied toward the major in music.

132. Opera in the Classic Period. (2) II.**Mr. Popper**

Prerequisite: course 170 or its equivalent.

A study of eighteenth-century opera, with special concentration on the dramatic works of Gluck, Haydn, Mozart, and Beethoven.

133. The Operas of Wagner. (2) I.*Mr. Popper**

Prerequisite: course 170 or its equivalent.

134. The Operas of Verdi. (2) II.*Mr. Popper**

Prerequisite: course 170 or its equivalent.

* Offered in alternate years; not to be given, 1963-1964.

- 135. Opera of the Twentieth Century. (2) I.** Mr. Popper
Prerequisite: course 170 or its equivalent.
The history of opera from Debussy and Richard Strauss to the present. Analysis of representative masterworks.
- 136A-136B. Musical Cultures of the World. (3-3) Yr.**
Course 136A not prerequisite to 136B. Mr. Hood, Mr. Morton
A survey of the musical cultures of the world (excluding Western art music), the role of music in society and its relationship to other arts; consideration will also be given to scale structure, instruments, musical forms and performance standards.
- *137. Music for the Legitimate Drama and the Dramatic Motion Picture. (2) II.** Mr. Rubsamen
A history and analysis of incidental music for the theater from ancient Greece to the present. The place and function of background or mood music, overtures, entr'actes, and music that serves the action or locale.
- 138. Political Influences on Music. (2) II.** Mr. Rubsamen
The influence of revolution and dictatorship upon music and its allied arts from antiquity to the present.
- 139. Aesthetics of Music. (2) II.** Mr. Marrocco
A survey of the literature of music aesthetics from Plato to the present.
- 170. History of the Opera. (3) I.** Mr. Popper
Primarily for the general University student. May not be applied to the major in music. A survey of operatic music from its inception to the present day.
- 171. History and Literature of Church Music. (2) I.** Mr. Stevenson
Prerequisite: courses 3A-3B-3C, 20A-20B.
A study of the history and development of church music, including worship forms and liturgies.
- *172. Oratorio Literature. (2) II.** Mr. Stevenson
Prerequisite: courses 3A-3B-3C, 20A-20B.
A survey of oratorio music from its inception to the present day.
- 173. The Concerto. (2) II.** Mr. Revitt
Prerequisite: courses 3A-3B-3C, 20A-20B, or consent of the instructor.
Origins and development of the concerto, with emphasis on the classic period.
- *174. History of the Sonata. (2) I.** Mr. Revitt
Prerequisite: courses 3A-3B-3C, 20A-20B, or consent of the instructor.
The development of the sonata from its beginnings to the close of the romantic period.
- 175. Music Criticism. (2) II.** Mr. Goldberg
A study of factors in critical evaluation of musical works in performance.
- *177. The Art Song. (2) II.** Mr. Trotter
Prerequisite: courses 3A-3B-3C, 20A-20B, or consent of the instructor.
The study of the literature of the art song from its origins to the present day.
- 179A-179B. Instrumental and Choral Literature. (2-2) Yr.**
Mr. Sawhill, Mr. Gerow, Mr. Moreman
Course 179A is not prerequisite to 179B.
First semester: a study of instrumental works for string and wind ensembles. Second semester: a study of choral works from the Renaissance to the present day. In both semesters attention will be given to music suitable for use in the secondary schools.

* Offered in alternate years; not to be given, 1963-1964.

PERFORMANCE

Courses in this series may be repeated for credit. Prerequisite: audition for consent of the instructor.

190A-K. Organizations. I, II.

- 190A. University Symphony Orchestra. (1)** _____
 Four hours of rehearsal each week.
 The study and performance of symphonic literature.
- 190B. University Concert Band. (1)** Mr. Sawhill
 Four hours of rehearsal each week.
- 190C. University Chorus. (1) No audition.** Mr. Tusler
 Three hours of rehearsal each week.
- 190D. University A Cappella Choir. (1)** Mr. Wagner
 Three hours of rehearsal each week.
 The study and performance of choral literature.
- 190E. University Glee Club. (1)** Mr. Gerow, Mr. Moreman
 Three hours of rehearsal each week.
- 190F. Madrigal Singers. (1)** Mr. Moreman
 Three hours of rehearsal each week.
 The study and performance of significant music of the madrigal school.
- 190G. Chamber Music Ensemble. (1)** Mr. Roth, Mr. Sawhill
 Three hours of rehearsal each week.
 The study and interpretation of chamber music literature.
- 190H. Opera Workshop. (2)** Mrs. Limonick, Mr. Popper
 Eight hours of rehearsal each week.
 The study of the musical, dramatic, and language techniques in opera through the performance of representative scenes and acts.
- 190J. Collegium Musicum. (1)** Mr. Rubsamén
 Three hours of rehearsal each week.
 The study, through performance of representative music of the medieval, renaissance and baroque periods, using the original instruments wherever possible.
- 190K. University Marching, Varsity, and Cadet Band. (1)**
 Four hours of rehearsal each week. Mr. Sawhill, Mr. James

†191A-W. Classes in Applied Music. (2) I, II.

- 191A. Advanced Voice.** Mr. Moreman, Mr. Windward, Mr. Winger
 Prerequisite: 4 units of course 41A.
- 191E. Advanced Piano.** Mrs. Turrill
- 191J. Organ.** Mr. Petran
- 191K. Advanced Violin.** Mr. Roth
- 191L. Viola.** Mr. Plummer
- 191M. Cello.** Mr. Pascarella
- 191N. Bass Viol.** Mr. Mercurio

† Individual instruction for credit in voice, piano, violin, and cello is available through University Extension. For details consult the Department of Music.

191P. Flute.	Mr. Drexler
191Q. Oboe.	Mr. Gassman
191R. Clarinet.	Mr. Lurie
191S. Bassoon.	Mr. Moritz
191T. French Horn.	Mr. Lott
191U. Trumpet.	Mr. DiVall
191V. Trombone.	Mr. Tanner
191W. Percussion.	Mr. DeLancey

192A-W. Master Classes. (2) I, II.

192A. Voice.	Mr. Moreman, Mr. Windward, Mr. Winger
192E. Piano.	_____
192J. Organ.	Mr. Petran
192K. Violin.	Mr. Roth
192L. Viola.	Mr. Plummer
192M. Cello.	Mr. Pascarella
192N. Bass Viol.	Mr. Mercurio
192P. Flute.	Mr. Drexler
192Q. Oboe.	Mr. Gassman
192R. Clarinet.	Mr. Lurie
192S. Bassoon.	Mr. Moritz
192T. French Horn.	Mr. Lott
192U. Trumpet.	Mr. DiVall
192V. Trombone.	Mr. Tanner
192W. Percussion.	Mr. DeLancey

193. Studies in Accompanying. (1) I, II.

Open to qualified pianists; other instrumentalists and singers desiring work in repertoire and interpretation may also enroll.

Mrs. Limonick

SEMINARS AND SPECIAL STUDIES

197. Pro-Seminar in Ethnomusicology. (3) II.	Mr. Hood
Prerequisite: course 136A-136B or consent of the instructor.	
199. Special Studies in Music. (1-4) I, II.	The Staff
Prerequisite: senior standing and consent of the instructor.	

Graduate Courses

200A-200B. Research Methods and Bibliography. (3-3) Yr.	The Staff
210A-210B. Early Notation. (3-3) Yr.	Mr. Marrocco, Mr. Reaney
Prerequisite: course 100A-100B, or the equivalent.	

- 250. Seminar in the History of Music Theory. (3) II.** Mr. Reaney
Prerequisite: consent of the instructor.
- 251A-251B. Seminar in Orchestration. (3-3) Yr.** Mr. Kremenliev
Prerequisite: courses 107A-107B, 109A-109B, or the equivalents.
- 252A-252B. Seminar in Composition. (3-3) Yr.** Mr. Vincent
Prerequisite: course 107A-107B, 109A-109B, and either 105 or 106, or the equivalents.
This course may be repeated for credit.
- †253. Seminar: Notation and Transcription in Ethnomusicology. (3) II.** Mr. Hood
Prerequisite: course 136A-136B and 197, which may be taken concurrently.
- †254. Seminar: Field and Laboratory Methods in Ethnomusicology. (3) I.** Mr. Hood
Prerequisite: Music 136A-136B and 197, which may be taken concurrently.
- 255. Seminar in Musical Instruments of the World. (3) II.** Mr. Hood
Prerequisite: Music 136A-136B; course 118 recommended.
- 256. Seminar in Musical Form. (3) I.** Mr. Nelson
Prerequisite: course 100A-100B or the equivalent.
- *257A-257B. Seminar in American Music. (3-3) Yr.**
Prerequisite: course 121A-121B or the equivalent. Mr. Marrocco, Mr. Stevenson
- 260A-260B. Seminar in Historical Musicology. (3-3) Yr.** Mr. Rubsamen
Prerequisite: course 100A-100B or the equivalent and course 200A-200B, which may be taken concurrently.
- *266. Seminar in the Music of the Twentieth Century. (3) II.** The Staff
Prerequisite: consent of the instructor.
- *269. Seminar in the History of Instruments. (3) II.** Mr. Petran
Prerequisite: consent of the instructor.
- 270A-270B. Seminar in Music Education. (2-2) Yr.** Mr. Gerow
Prerequisite: consent of the instructor.
- 272A-272B. Seminar in Systematic Musicology. (3-3) Yr.** Mr. Petran
Prerequisite: courses 118 and Psychology 172A-172B, or consent of the instructor.
- *275. Seminar in the Aesthetics of Music. (3) I.** Mr. Marrocco
(Formerly numbered 268.)
Prerequisite: course 139 or the equivalent.
- 280A-280B. Seminar in Ethnomusicology. (3-3) Yr.** Mr. Hood
Prerequisite: course 136A-136B or the equivalent and course 200A-200B, which may be taken concurrently.
- 296. Individual Studies in Orchestration and Composition. (1-4) I, II.** The Staff
- 297. Individual Reading and Research. (1-4) I, II.** The Staff
- 299. Guidance of Master's Thesis or Doctoral Dissertation. (1-4) I, II.** The Staff

* Offered in alternate years; not to be given 1963-1964.

† Offered every three semesters; not to be given 1963-1964.

Professional Courses in Method

330. Music Education for Classroom Teachers. (3) I, II.

Mr. Gerow

Four hours weekly, including one laboratory hour. Prerequisite: junior standing and course 31 or the equivalent. Required of candidates for the general elementary credential whose major is not music. *Not open to students whose major is music.*

A professionalized course to equip the student to teach many phases of music in the modern school. Emphasis is placed upon exploring musical literature and interpretive activities.

370. The Teaching of Music. (3) I, II.

Mr. Gerow

Prerequisite: senior standing and the approval of the Department by interview and examination. Required of music majors who are candidates for the general secondary credential.

A study of the place and function of general music in secondary education, with some attention to the elementary curriculum. Three class meetings and one laboratory period weekly.

Related Courses in Other Departments

Integrated Arts 1A-1B. Man's Creative Experience in the Arts. (3-3) Yr.

Mr. Trissel

Psychology 172A-172B. Psychology of Music. (3-3) Yr.

Mr. Petran

NAVAL SCIENCE

(Department Office, 123 Men's Gymnasium)

Edwin N. Hitchcock, B.S., Capt., U. S. Navy, *Professor of Naval Science (Chairman of the Department).*

N. Grkovic, B.S., Cdr., U. S. Navy, *Associate Professor of Naval Science.*

A. C. Beverly, B.S., Maj., U. S. Marine Corps, *Assistant Professor of Naval Science.*

R. H. Frye, A.B., Lt., U. S. Navy, *Assistant Professor of Naval Science.*

J. F. Gaudet, A.B., Lt., U. S. Navy, *Assistant Professor of Naval Science.*

F. N. Mangol, A.B., Lt., U. S. Navy, *Assistant Professor of Naval Science.*

———, *Assistant Professor of Naval Science.*

Letters and Science List.—All undergraduate courses in this department up to a total of 12 units are included in the Letters and Science List of Courses. Note: This in no way prejudices counting additional Naval Science courses up to the 12 units of non-Letters and Science credit accepted toward the degree. For regulations governing this list, see page 72.

College of Engineering.—Credit for Naval Science:

Lower Division: 6 units are acceptable toward the baccalaureate.

Upper Division: 6 units of nonmajor field electives and the 3 units of optional electives, a total of 9, may be applied.

Naval Reserve Officers' Training Corps

By action of the Secretary of the Navy and of The Regents of the University of California in June, 1938, provision was made for the establishment of a unit of the Naval Reserve Officers' Training Corps on the Los Angeles campus.

The primary object of the Naval Reserve Officers' Training Corps is to provide at civil institutions systematic instruction and training which will qualify selected students of such institutions for appointment as officers in the Regular Navy, Naval Reserve, Marine Corps, and Marine Corps Reserve. The Naval Reserve Officers' Training Corps is expected to train junior officers for the Regular Navy, Naval Reserve, Marine Corps, and Marine Corps Reserve.

Courses in naval science are given for those who intend to complete the four years of training for a commission in the Regular Navy, Naval Reserve, Marine Corps, and Marine Corps Reserve. While only students signifying such a purpose will be admitted, students who for sufficient reasons are forced to discontinue their training before their commission is granted, will be permitted, at the end of two years, to count such training in lieu of the military training prescribed by the University. All courses in naval science described herein include infantry drill and laboratory sessions for two hours weekly for all Naval R.O.T.C. students.

Initial enrollment is restricted to able-bodied male students who are citizens of the United States, between the ages of seventeen and twenty-one years, never have been married, and agree to remain unmarried until commissioned or disenrolled. Students must pass the same physical examination as is required for all candidates for admission to the Naval Academy.

All courses listed are those prescribed by the Navy Department for the Naval Reserve Officers' Training Corps. The United States furnishes, on loan to the individual, arms, equipment, uniforms, and naval science textbooks for the use of these students. Upon satisfactory completion of the course, a uniform becomes the property of the student who was enrolled in the Regular or Contract status.

Types of N.R.O.T.C. Students.—Officer candidates in the N.R.O.T.C. will be of three types:

(a) *Regular N.R.O.T.C. students* are appointed Midshipmen, U.S.N.R., and receive retainer pay at a rate of \$600 per year for a maximum period of four years while under instruction at the N.R.O.T.C. institution or during summer training periods. Their tuition, fees, books, and laboratory expenses are paid by the U. S. government during the above period. These students assume an obligation to make all required summer practice cruises (three) and to remain a member of a regular or reserve component of the U. S. Naval Service until the sixth anniversary of receipt of original commission in that service, four years of which will be on active duty after commissioning as Ensigns, U. S. Navy, or Second Lieutenants, U. S. Marine Corps. Students enrolled in this status are selected by nation-wide examination and selection commencing in early December of the year preceding the student's entrance into the University in the fall.

(b) *Contract N.R.O.T.C. students* have the status of civilians who have entered into a mutual contract with the Navy. For administrative purposes, they are styled Midshipmen. During their junior and senior years they are entitled to commutation of subsistence from the first day during an academic term until they complete the course at the institution or their connection with the Naval Reserve Officers' Training Corps is severed in accordance with the

regulations prescribed, except that subsistence in kind will be furnished in lieu of commutation of subsistence for any periods devoted to cruises. The amount allowed for subsistence, which will be fixed from time to time by the Secretary of the Navy, will not exceed the value prescribed by law for a commuted ration in the Navy. Contract N.R.O.T.C. students agree to accept a commission in the Naval Reserve or in the Marine Corps Reserve to remain a member of a reserve component of the U. S. Naval Service until the sixth anniversary of receipt of original commission in that service and to serve not less than three years on active duty if ordered. Contract N.R.O.T.C. students are required to make one summer practice cruise.

Regular and contract students are deferred from induction until after completion or termination of their courses of instruction and so long as they continue in a regular or reserve status upon being commissioned.

(c) *Naval Science Students*

(1) With the approval of the academic authorities, and the Professor of Naval Science, students may be permitted to pursue naval science courses for college credit only. They are not eligible to make N.R.O.T.C. practice cruises nor to be paid any compensation or benefits.

(2) Naval science students may become eligible for enrollment in N.R.O.T.C. as candidates for commissions provided they comply in every respect with the requirements for original enrollment, when vacancies occur in the unit quota.

Credit may be allowed for work completed during practice cruises and summer camps at the rate of $\frac{1}{2}$ unit per each of two weeks' duty performed, not to exceed a total of 6 units.

Freshman Year

1A. Naval Orientation. (3) I.

A course in fundamentals of the naval science, its mission, ideals, standards, traditions, customs and duties required of the midshipmen. This orientation is vital in developing a common naval background and in stimulating an interest in the study of sea power.

1B. Evolution of Sea Power. (3) II.

The course in sea power concentrates in six broad and interlocked areas: (1) the influence of sea power on history; (2) the evolution of tactics; (3) the rationale of strategic decisions; (4) the development of ships; (5) the evolution of weapons; and (6) the qualities of character and professional competence which have made great naval leaders.

Sophomore Year

2A. Naval Weapons. (3) I, II.

Major areas to be covered in the course include weapon delivery problems, basic gunnery, typical fire control problems, antisubmarine warfare, missiles, nuclear weapons, and space technology. Theoretical presentation will be supplemented by practical work in the laboratory sessions.

2D. Naval Science Drill. (0) I, II.

Infantry drill under arms and classroom weapons systems demonstration. To be taken concurrently with Psychology 181. Professor of Naval Science approval required for substitution of other psychology courses.

Junior Year**101A. Navigation. (3) I.****Mr. Frye**

During the first semester, navigation and nautical astronomy are studied. The problems of determining position, direction, and distance on the water. Development of methods, use of instruments, tables, and almanacs in problem solving. The field of navigation is studied in its four major divisions: dead reckoning; piloting; electronic navigation and celestial navigation.

101B. Naval Operations. (3) II**Mr. Frye**

Solution of relative movement problems by application of radar and tactical information to the polar coordinate plot using vectors. Maneuvering instructions and tactics. Communication systems and introduction to cryptography. Types of electronics countermeasures. Aerology and typhoon evasion.

†103A-103B. Basic Strategy and Tactics. (3-3) Yr.**Mr. Beverly**

Concerns the evolution of the art of land warfare with particular attention given to military and foreign policies of the United States. The student gains a basic insight into the historical and sociological principles of national strategy and modern military tactics.

Senior Year**102A. Naval Engineering. (3) I.****Mr. Gaudet**

The first semester deals with naval machinery. Stress is on the basic steam cycle, including auxiliary equipment. Concepts of temperature, heat transfer, flow of fluids, gas turbine cycle, distillation and refrigeration are included. An introduction is made to physics of nuclear power, principles of nuclear reactors and problems of radiation shielding and instrumentation. Principles and application of marine stability.

102B. Principles and Problems of Naval Leadership. (3) II.**Mr. Gaudet**

Conceptual approaches to leadership, interpersonal relationships in Navy groups, motivational practices and counseling techniques, ethical and moral responsibilities of authority positions, extragroup relations as a representative of the Navy. Division Administration: function of the division officer, military law and courts.

†104A-104B. Amphibious Warfare. (3-3) Yr.**Mr. Beverly**

The primary function of the Marine Corps is to conduct amphibious warfare. Attention is given to strategic decisions and the tactical employment of amphibious troops and weapons. The midshipman is also given indoctrination in military law, coordinated with the development of administrative leadership qualities.

■ NEAR EASTERN AND AFRICAN LANGUAGES**(Department Office, 302 Royce Hall)**

Wolf Leslau, Docteur-es-Lettres, Professor of Hebrew and Semitic Linguistics
(Chairman of the Department).

Moshe Perlmann, Ph.D., Professor of Arabic.

Andreas Tietze, Ph.D., Professor of Turkish.

William E. Welmers, Ph.D., Professor of African Languages.

Julius Assfalg, Ph.D., Associate Professor of Armenian.

Rudolf Gelpke, Ph.D., Associate Professor of Persian.

† These courses to be pursued by candidates for commissions in the Marine Corps or Marine Corps Reserve in lieu of courses 101A, 101B, 102A, and 102B.

†Jonas C. Greenfield, Ph.D., *Associate Professor of Hebrew*.
 Arnold J. Band, Ph.D., *Assistant Professor of Hebrew*.
 Herbert A. Davidson, Ph.D., *Assistant Professor of Hebrew*.

Joseph R. Applegate, Ph.D., *Acting Assistant Professor of Berber Languages*.
 Ruth Blum, B.A., *Associate in Hebrew*.
 Margaret Bryan, M.A., *Lecturer in Swahili*.
 Janos Eckmann, Ph.D., *Acting Associate Professor of Turkish*.
 Haroun Haddad, Ph.D., *Lecturer in Arabic*.
 Richard Hovannisian, M.A., *Associate in Armenian*.
 Jacob Landau, Ph.D., *Visiting Associate Professor of Hebrew*.
 David L. Lieber, D.H.L., *Associate in Hebrew*.
 Girdhari Tikku, Ph.D., *Lecturer in Urdu*.
 Nada Tomriche, Ph.D., *Lecturer in Arabic*.
 Charles Wendell, M.A., *Acting Assistant Professor of Arabic*.
 A. Neil Skinner, M.A., *Lecturer in Hausa*.

Alexander Badawy, Ph.D., *Associate Professor of Archaeology*.
 †Paul Schachter, Ph.D., *Assistant Professor of English*.
 Miriam Lichtheim, Ph.D., *Lecturer in History*.

Letters and Science List.—All undergraduate courses in the department are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Bachelor of Arts Degree.—The degree is offered in both Hebrew and Arabic. In each case the student must both meet the prerequisites and take the courses prescribed for majors.

1. For a Hebrew major the prerequisites are Hebrew 1A-1B, 102A-102B, 150A-150B or their equivalents. The student is required to take 26 upper division units including Hebrew 103A-103B, 119A-119B or their equivalents; 6 units out of 120A, 120B, 120C, 120D; 6 units out of 130A, 130B, 140A, 140B, 140C, 140D; Hebrew 190A-190B; History 138A or 138B.
2. For an Arabic major the prerequisites are Arabic 1A-1B, 102A-102B, 150A-150B or their equivalents. The student is required to take 28 upper division units: Arabic 103A-103B, 119A-119B, 130A-130B, 140A-140B, 199; History 134A or 134B.

Requirements for the Master's Degree

1. For the general requirements, see pages 162-165.
2. Department program:
 - a) The master's degree is offered in four specialties: Hebrew, Arabic, Semitics, and Turkish. The candidate for the degree in Hebrew or Arabic will also be required to study another Semitic language. The candidate for the degree in Semitics will be required to study three Semitic

† Absent on leave, 1963-1964.

languages. The candidate for a degree in Turkish will be required to study two Turkic languages. The student may concentrate on either language or literature but will be required to do work in both. In addition, each candidate will be required to have competent knowledge of the history of his major culture area.

- b) For admission to the program a bachelor's degree is required with the major taken in Hebrew, Arabic or Semitics. Equivalent preparation, as determined by the department, may also be accepted.
- c) Course requirements: 24 units with a minimum of 12 graduate units taken within the department, the remaining 12 to be chosen after consultation with the department adviser. All candidates will be required to take Near Eastern Languages 200, Bibliography and Method.
- d) The candidate must be able to read one modern European language. The choice of the language will be determined in consultation with the departmental adviser. The student's knowledge of this language will be examined in the department at the end of the first semester of residence, and he must pass the Graduate Foreign Language Reading Examination in the same language by the end of the second semester of residence. It is also strongly recommended that the student who intends to continue toward a Ph.D. degree acquire a knowledge of a second European language while still a candidate for the M.A.
- e) Examination: The department follows Plan II (Comprehensive Examination).

Requirements for the Doctor of Philosophy Degree

1. For the general University requirements, see pages 165-169.

2. Requirements for the program:

- a) A reading knowledge of two foreign languages chosen from French, German, Italian, Spanish and Russian, or any other language approved by the departmental adviser. The student is expected to take the examination in one of the two languages at the beginning of his first semester in residence; the examination of the second not later than at the beginning of his third semester. The choice of languages must be approved by the adviser.
- b) The candidate for the degree may concentrate either in language or in literature. In either case, upon entrance to the program he is required to demonstrate competence in the language of his main interest and to have sufficient knowledge of a second language in his field of concentration. In the case of a student specializing in language, the second language should be genetically related to the main language of his interest, e.g., a Semitist is expected to know two Semitic languages; a Turkologist, two Turkic languages. In the case of a student specializing in literature, the second language should be a literary language taken from the cultural area related to the main language of his interest, e.g., a Hebraist can choose Aramaic, Akkadian, or Arabic; an Arabist can choose Persian or Turkish; a Turkologist can choose Arabic or Persian. This competence is to be acquired either in the Graduate Division of the

University of California or in another recognized Graduate School. In case of deficiencies, the student may be required to take additional work. The student is advised to take his M.A. degree prior to his Ph.D. degree.

3. Special Requirements for the degree:

- a) A candidate in languages is expected to take the equivalent of one year of general linguistics and one year of comparative grammar in his field of concentration, e.g., Semitics or Turkic. Moreover, he is required to achieve competence in three languages taken from his field of concentration with particular emphasis on two major languages. It is mainly the structural mastery of the languages and familiarity with their development and their position within the appropriate family of languages that are required. The student is advised to acquaint himself with the historical, literary, religious, and social background of the various languages of his interest. His fields of examination will be three languages and the literary and historical background of at least two of them.
- b) The candidate interested in literature will be required to be familiar with the history of literary criticism and methods of literary research as offered by the various departments of the University, particularly the course in literary criticism offered by the English department. His field of examination will be the literatures written in two languages within the cultural area of his concentration, and the historical and cultural background of these languages with emphasis on one of them.

ARABIC

Lower Division Course

1A-1B. Elementary Arabic. (4-4) Yr.

Mr. Wendell

Sections meet five hours weekly. Not open to students with previous training.

Upper Division Courses

102A-102B. Intermediate Arabic. (4-4) Yr.

Mr. Wendell

Prerequisite: Arabic 1A-1B or consent of the instructor. Student must be enrolled concurrently in Arabic 118A-118B.

103A-103B. Advanced Arabic. (3-3) Yr.

Mr. Perlmann

Prerequisite: Arabic 102A-102B or consent of the instructor. Student must be enrolled concurrently in Arabic 119A-119B.

110A-110B. Spoken Moroccan Arabic. (3-3) Yr.

Mr. Applegate

Prerequisite: consent of the instructor.

An introduction to the contemporary Arabic dialect of Morocco. Basic phonology, morphology and syntax will be presented with emphasis on oral practice.

111A-111B. Spoken Egyptian Arabic. (3-3) Yr.

Mrs. Tomiche

Prerequisite: consent of the instructor.

Introduction to the contemporary Arabic Dialect of Egypt. Phonology, morphology, and syntax will be presented with emphasis on oral practice.

118A-118B. Arabic Composition and Conversation. (1-1) Yr.

Mr. Haddad

Prerequisite: concurrent enrollment in Arabic 102A-102B.

Exercise in oral and written expression.

119A-119B. Advanced Arabic Composition. (2-2) Yr.

Prerequisite: consent of the instructor.

Mr. Perlmann in charge

Exercise in oral and written expression.

130A-130B. Classical Arabic Texts. (3-3) Yr.

Mrs. Tomiche

Prerequisite: Arabic 103A-103B or consent of the instructor.

Reading and interpretation of texts from classical Arabic literature: Koran, historiography, biography, geography and travelogues, philosophy, poetry.

Mr. Perlmann in charge

Prerequisite: consent of the instructor.

A course of lectures given in Arabic on major developments in Arab culture in the past, its problems in modern times, and their treatment in recent publications.

199. Special Studies in Arabic. (1-6) I, II.

The Staff

Prerequisite: consent of the instructor.

Graduate Courses**220A-220B. Islamic Texts. (3-3) Yr.**

Mr. Perlmann

220A: Scripture and interpretation in Islam; traditional scholarship; historical and literary problems of modern research; 220B: Selections from Hadith and from Ghazali.

230A-230B. Arabic Poetry. (2-2) Yr.

Readings in Arabic poetry from various periods.

240A-240B. Arab Historians. (3-3) Yr.

Mrs. Tomiche

Readings from the works of the most outstanding Arabian and Arabic-writing historians of the classical period of Islam.

250A-250B. Studies in Arabic Literature. (2-2) Yr.

The Staff

Seminar centering on a select phase or problem of literary history.

297. Individual Studies for Graduate Students. (1-6) I, II.

The Staff

299. Research on Thesis or Dissertation. (1-6) I, II.

The Staff

HEBREW**Lower Division Course****1A-1B. Elementary Hebrew. (4-4) Yr.**

Mrs. Blum

Sections meet five hours weekly.

Upper Division Courses**102A-102B. Intermediate Hebrew. (4-4) Yr.**

Mr. Davidson

Prerequisite: Hebrew 1A-1B or the equivalent.

103A-103B. Advanced Hebrew. (3-3) Yr.

Mr. Davidson

Prerequisite: Hebrew 102A-102B or the equivalent.

Selected modern literary texts.

118A-118B. Hebrew Conversation. (1-1) Yr.

The Staff

Class will meet two hours weekly. Open only to students who have completed or are currently enrolled in Hebrew 102A-102B.

119A-119B. Hebrew Conversation and Composition. (1-1) Yr. The Staff
Class will meet two hours weekly. Open only to students who have completed or are currently enrolled in Hebrew 103A-103B.

***120A-120B. Selected Texts of the Bible. (3-3) Yr.** Mr. Greenfield
Prerequisite: Hebrew 102A-102B or the equivalent. Courses 120A and 120B may be taken independently for credit.

Translations and analysis of portions of the Old Testament. Special attention will be given to texts of primary literary and historical importance.

120C-120D. Selected Texts of the Bible. (3-3) Yr. Mr. Lieber
Prerequisite: Hebrew 102A-102B or the equivalent. Courses 120C and 120D may be taken independently for credit.

Further readings in Biblical texts.

130A-130B. Medieval Hebrew Literature. (3-3) Yr. Mr. Band
Prerequisite: Hebrew 103A-103B or consent of the instructor.
Readings in medieval Hebrew prose and poetry with special attention to the literature of the "Golden Age."

135A-135B. Hebrew Bible Commentaries. (3-3) Yr. Mr. Davidson
Prerequisite: 6 units from Hebrew 120A, 120B, 120C, 120D or the equivalent.
Selected readings from Hebrew Bible commentaries, especially of the medieval period. Attention will be given to historical development and to a comparison of the approaches and methods of the various commentators.

***140A-140B. Modern Hebrew Poetry and Prose. (3-3) Yr.** Mr. Band
Prerequisite: Hebrew 103A-103B or consent of the instructor.
A study of the major Hebrew writers of the past hundred years: prose—Mendele, Ahad Ha'am, Agnon, Yizhar; poetry—Bialik, Tchernichovsky, Schneur, Greenberg, Shlonsky.

140C-140D. Modern Hebrew Poetry and Prose. (3-3) Yr. Mr. Band
Prerequisite: Hebrew 103A-103B or consent of the instructor.
Further study of major Hebrew writers of the past one hundred years.

150A-150B. A Survey of Hebrew Literature in English. (2-2) Yr. Mr. Band
Knowledge of Hebrew is not required. Courses 150A and 150B may be taken independently for credit.

150A. From Biblical period to 1300.

150B. From 1300 to the present day.

160A-160B. The Hebrew Essay. (3-3) Yr. Mr. Landau
Prerequisite: Hebrew 103A-103B or consent of the instructor.
The Hebrew essay from its rise in Europe in the late eighteenth century to the contemporary Israeli essay; the literary, political, sociological, philosophical, and scholarly essay will be studied.

***190A-190B. A Survey of Hebrew Grammar. (2-2) Yr.** Mr. Leslau
Prerequisite: Hebrew 102A-102B or consent of the instructor.
Descriptive and comparative study of the Hebrew phonology and morphology.

199. Special Studies in Hebrew. (1-6) I, II. The Staff
Prerequisite: consent of the instructor.
Studies in history, literature, and Semitic linguistics in accordance with the requirements of the student.

Graduate Courses

210A-210B. History of the Hebrew Language. (2-2) Yr. The Staff
Prerequisite: Hebrew 103A-103B or consent of the instructor.
The development of the Hebrew language in its various stages: Biblical, Mishnaic, Medieval, Modern and Israeli; differences in vocabulary, morphology, syntax and the influence of other languages will be studied; problems of language expansion in Israeli Hebrew will be treated.

***290A-290B. Comparative Morphology of the Semitic Languages. (2-2) Yr.**

Prerequisite: Semitics 280A-280B or consent of the instructor.
 Comparative study of the noun and verb of the various Semitic languages (Arabic, Hebrew, Ethiopic, Akkadian, and Aramaic.)

297. Individual Studies for Graduate Students. (1-6) I, II.

The Staff

299. Research on Thesis or Dissertation. (1-6) I, II.

The Staff

AFRICAN LANGUAGES**Upper Division Courses****101A-101B. Introductory Swahili. (4-4) Yr.**

Miss Bryan

Prerequisite: consent of the instructor. Class meets five times weekly.
 The major language of East Africa. Emphasis on oral competence, with careful attention to grammatical structure.

102A-102B. Advanced Swahili. (3-3) Yr.

Miss Bryan

Prerequisite: African Languages 101A-101B or the consent of the instructor. Class meets four times weekly.

105A-105B. Introductory Bambara. (3-3) Yr.

Mr. Welmers

Prerequisite: consent of the instructor.
 A major language of Mali and adjacent parts of West Africa. Emphasis on oral competence, particularly tonal accuracy with careful attention to grammatical structure.

***106A-106B. Luganda. (3-3) Yr.**

Prerequisite: consent of the instructor
 The major language of Uganda. Emphasis on oral competence with careful attention to grammatical structure.

107A-107B. Introductory Kpelle. (3-3) Yr.

Mr. Welmers

Prerequisite: consent of the instructor.
 Tribal language of Liberia and Guinea. Emphasis on oral competence, particularly tonal accuracy, with careful attention to grammatical structure.

108A-108B. Introductory Xhosa. (3-3) Yr.

Prerequisite: consent of the instructor.
 A major language of the Union of South Africa.

***109A-109B. Introductory Twi. (3-3) Yr.**

Mr. Schachter

Prerequisite: consent of the instructor.
 The major language of Ghana. Conversation, reading and grammatical analysis.

112A-112B. Introductory Hausa. (3-3) Yr.

Mr. Skinner

Major language of Western Nigeria. Emphasis on oral competence.

113A-113B. Advanced Hausa. (3-3) Yr.

Mr. Skinner

Prerequisite: African Languages 112A-112B or consent of the instructor.
 Continuing study of the language with emphasis on oral competence.

150A-150B. Traditional African Literature in English Translation. (2-2) Yr.

Oral, narrative and didactic prose and poetry of Sub-Saharan Africa and written prose and poetry of South Africa.

Courses 150A and 150B may be taken independently for credit.

* Not to be given, 1963-1964.

- 190. Survey of African Language Structure. (3) I.** Mr. Welmers
 Prerequisite: consent of the instructor.
 An introduction to the languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages. Linguistics 170 is recommended as a prior or concurrent course.
- 198. Special Courses. (1-4) I, II.** Mr. Welmers
 Prerequisite: Linguistics 170 or consent of the instructor.
 Instruction or supervised research in any African language for which adequate materials or a competent speaker is available.

Graduate Course

- 297. Individual Studies for Graduate Students. (1-6) I, II.** The Staff

Related Course in Another Department

- Linguistics and Philology 216. Typology of African Languages. (3) II.** Mr. Welmers

CAUCASIAN LANGUAGES

Upper Division Courses

- 101A-101B. Elementary Armenian. (3-3) Yr.** Mr. Hovannisian
 Grammar, reading, conversation, elementary composition.
- 102A-102B. Intermediate Armenian. (3-3) Yr.** Mr. Assfalg
 Prerequisite: Armenian 101A-101B or the equivalent.
- 111A-111B. Elementary Georgian. (3-3) Yr.** Mr. Assfalg
 Prerequisite: consent of the instructor.
 Script, grammar, simple reading in this main Caucasian language.
- 199. Special Studies in Armenian. (1-6) I, II.** Staff
 Prerequisite: consent of the instructor.

BERBER LANGUAGES

Upper Division Courses

- 101A-101B. Shilha. (3-3) Yr.** Mr. Applegate
 Prerequisite: consent of the instructor.
 Elements of Shilha, the language of the Berbers of southern Morocco. Grammar and conversation.
- 104A-104B. Kabyle. (3-3) Yr.** Mr. Applegate
 Prerequisite: consent of the instructor.
 A detailed study of the language of the Berbers in northern Algeria. The course will include a survey of the basic structural features and the analytic procedures used to prepare the structural descriptions.
- 105A-105B. Tamazight. (3-3) Yr.** Mr. Applegate
 Language of the Berbers of central and northern Morocco. The course will include the study of the phonology, morphology, and syntax of the language with a survey of the analytic procedures used in preparing structural descriptions.
- 106A-106B. Advanced Tamazight. (3-3) Yr.** Mr. Applegate
 Prerequisite: Berber 105A-105B or the consent of the instructor.
 Narrative, expository, and poetic styles in Tamazight. The course will include a survey of folk tales, superstitions, and poetry as well as additional study of the grammatical features of the language.
- 199. Special Studies in Berber Languages. (1-6) I, II.** Mr. Applegate
 Prerequisite: consent of the instructor.
 Study based on the requirements of the individual student.

PERSIAN**Upper Division Courses**

- 101A-101B. Elementary Persian.** (3-3) Yr. Mr. Gelpke
Not open to students with previous training.
- 102A-102B. Advanced Persian.** (3-3) Yr. Mr. Gelpke
Prerequisite: Persian 101A-101B or the equivalent.
- 118A-118B. Persian Conversation for Beginners.** (1-1) Yr. Mr. Tikku
Class will meet two hours weekly.
- 119A-119B. Advanced Persian Conversation.** (1-1) Yr. Mr. Tikku
Prerequisite: Persian 101A-101B. Class will meet two hours weekly.
- 150A-150B. A Survey of Modern Persian Literature in English.** (2-2) Yr. Mr. Tikku
Knowledge of Persian is not required. Courses 150A and 150B may be taken independently for credit.
- 199. Special Studies in Persian.** (1-6) I, II. The Staff
Prerequisite: consent of the instructor.
Historical and literary texts in accordance with the requirements of the students.

TURKISH**Upper Division Courses**

- 101A-101B. Elementary Turkish.** (3-3) Yr. Mr. Tietze
Not open to students with previous training.
- 102A-102B. Advanced Turkish.** (3-3) Yr. Mr. Tietze
Prerequisite: Turkish 101A-101B or the equivalent.
- ***110A-110B. Uzbek.** (3-3) Yr. Mr. Eckmann
Prerequisite: consent of the instructor.
Phonology, grammar, readings.
- ***111A-111B. Chagatai.** (3-3) Yr. Mr. Eckmann
Prerequisite: consent of the instructor.
Literary language of Central Asia. Grammar and readings.
- 112A-112B. Old Turkic (Uigur).** (3-3) Yr. Mr. Eckmann
Prerequisite: consent of the instructor.
Grammar, readings in 8th to 10th century texts.
- ***113A-113B. Kirghiz.** (3-3) Yr. Mr. Eckmann
Prerequisite: consent of the instructor.
Grammar and readings.
- 114A-114B. New Uigur.** (3-3) Yr. Mr. Eckmann
Prerequisite: Turkish 102A-102B or the equivalent.
An introduction to the phonology, morphology and syntax of New Uigur (Eastern Turkic), a Turkic language spoken in Eastern (Chinese) Turkestan, and partly in Western Turkestan (Kazakhstan) by about 3 million people. Reading of literary and folkloristic texts.
- 118A-118B. Turkish Conversation for Beginners.** (1-1) Yr. The Staff
Class will meet two hours weekly.
- 119A-119B. Turkish Conversation and Composition.** (1-1) Yr. The Staff
Prerequisite: Turkish 101A-101B or consent of the instructor. Class will meet two hours weekly.

* Not to be given, 1963-1964.

- *180A-180B. History of Turkish Studies. (2-2) Yr.** Mr. Eckmann
 Prerequisite: consent of the instructor.
 The course outlines the development of Turkish studies from their beginnings in the 18th century to the present day. Survey of the main topics and problems, readings and discussion of selected writings by representative scholars in the field.
- 190A-190B. A Survey of the Turkic Languages. (3-3) Yr.** Mr. Eckmann
 Prerequisite: consent of the instructor.
 Introduction to the historical grammar, classification, comparison of the linguistic features of the Turkic languages.
- 199. Special Studies in Turkish. (1-6) I, II.** The Staff
 Prerequisite: consent of the instructor.

Graduate Courses

- 210A-210B. Old Ottoman. (2-2) Yr.** Mr. Tietze
 Prerequisite: Turkish 102A-102B or consent of the instructor.
 The texts for the readings will be selected from literature (prose and poetry).
- 297. Individual Studies for Graduate Students. (1-6) I, II.** The Staff
- 299. Research on Thesis or Dissertation. (1-6) I, II.** The Staff

EGYPTIAN (ANCIENT)

- *101A-101B. Introduction to Hieroglyphics. (3-3) Yr.** Miss Lichtheim
 Prerequisite: consent of the instructor.
 Grammar and texts.
- 104A-104B. Coptic. (3-3) Yr.** Mr. Badawy
 Prerequisite: consent of the instructor.
 Grammar and texts.

URDU

- 101A-101B. Elementary Urdu. (3-3) Yr.** Mr. Tikku
 Prerequisite: consent of the instructor.
 Elements of Urdu, the language of Pakistan.
- 199. Special Studies in Urdu. (1-6) I, II.** Mr. Tikku
 Prerequisite: consent of the instructor.

ISLAMICS

- 299. Research on Thesis or Dissertation. (1-6) I, II.** The Staff

NEAR EASTERN LANGUAGES

- 200. Bibliography and Method of Near Eastern Languages and Literatures. (2) I, II.** The Staff
 Prerequisite: consent of the instructor.
 An introduction to the bibliography of all the Near Eastern Languages: morphology, lexicography, and literature.
- 240. Folklore and Mythology of the Near East. (2) II.** The Staff
 Prerequisite: Folklore 101 or the equivalent and consent of the instructor.
 Folklore and mythology of Palestine-Israel, Arabic countries, Turkey, Persia, Ethiopia.

* Not to be given, 1963-1964.

NURSING

(Department Office, 12-139C Center for the Health Sciences)

Lulu Wolf Hassenplug, R.N., M.P.H., *Professor of Nursing (Chairman of the Department).*

Laurie M. Gunter, R.N., Ph.D., *Associate Professor of Nursing.*

Dorothy E. Johnson, R.N., M.P.H., *Associate Professor of Pediatric Nursing.*

Harriet C. Moidel, R.N., M.A., *Associate Professor of Medical-Surgical Nursing.*

Agnes A. O'Leary, R.N., M.P.H., *Associate Professor of Public Health Nursing and Lecturer in Public Health (Vice-Chairman of the Department).*

The School of Nursing admits students of junior or higher standing and offers curricula leading to the degrees of Bachelor of Science and Master of Science in nursing.

Curricula offered for the Bachelor of Science degree:

1. Basic Program.

Preparation for the Major.—Completion of 60 units of college work including the courses listed below or transfer credit evaluated as equivalent:

<i>Course</i>	<i>Units</i>
General University requirements	
(1) Subject A	0
Foreign language (completion of course 2)*	0-8
Elementary algebra and plane geometry	0
English composition (English 1A)	3
Natural sciences	
(1) Chemistry 1A, 1B, 8	13
Physics 10†	0-3
(2) Bacteriology 1	4
Psychology 1B	3
Zoology 1A, 1B	8
Social sciences	
(1) History 6A-6B, 7A-7B, or 8A-8B	6
(or appropriate upper division courses—4 units)	
(2) Anthropology 2	3
Psychology 1A	3
Sociology 1 or 101	3
Humanities (two of the following three groups)	
(1) Literature; (2) Philosophy; (3) The Arts	8-12
Total units	54-69

The Major.—At least 60 units of required upper division nursing courses and elective courses designed to prepare university women for professional nursing responsibilities in the care of the patient and his family.

* Completion of course 2 in a foreign language or 3 years of one language in high school is required.

† This requirement will be waived for students who have completed with a grade of B or better a high school course, with laboratory, in physics.

2. Program for Registered Nurses.†

Preparation for the Major.—Same as basic program.

The Major.—A minimum of 60 units of coordinated upper division nursing and elective courses planned on the basis of professional need.

Upper Division Courses for Basic Program

100. Nursing and Social Change. (3) I.

Mrs. Gunter

A study of nursing as it affects and is affected by those factors which influence the health of the individual, the family, and the community, and the provision of nursing service.

†105A. Nursing Care of Adults and Children. (6) I.

Miss Carlson, Miss Dowd, Mrs. Kades, Mrs. Karpowich,
Mrs. Kerlin, Mrs. Lazor, Miss Meyers, Miss O'Grady,
Mrs. I. Palmer, Mrs. Schofield, Mrs. Wu

Lecture, three hours; laboratory, twelve hours.

Study of those principles which underlie the nurse's role in the promotion and maintenance of health and the prevention of illness. Guided participation in the care of selected patients and families.

†105B. Nursing Care of Adults and Children. (9) II.

Miss Carlson, Miss Dowd, Mrs. Kades, Mrs. Karpowich,
Mrs. Kerlin, Mrs. Lazor, Miss Meyers, Miss O'Grady,
Mrs. I. Palmer, Mrs. Schofield, Miss Swartz, Mrs. Wu

Lecture, five hours; laboratory, sixteen hours. Prerequisite: course 105A.

Study of the knowledge and skills utilized in the nursing care of adults and children with emphasis upon nutritional and drug therapies and upon the interrelationships of health practices and family life. Guided participation in nursing care of selected patients in hospital and community settings.

†105C. Nursing Care of Adults and Children. (8) I.

Miss Ancrum, Mrs. Argabrite, Mrs. Byrne, Miss Drummond,
Miss Hamcke, Miss Kleinknecht, Miss Lackey, Miss
Pueschel, Miss Ringholz, Miss Rowden, Miss Smith, Mrs.
Surprenant, Miss Swartz, Miss Thomasson

Lecture, four hours; laboratory, sixteen hours. Prerequisite: course 105B. P.E. 145A prerequisite or concurrent; Public Health 180 concurrent.

Guided participation in the nursing care of patients with increasingly complex health problems in hospital and community settings.

†105D. Nursing Care of Adults and Children. (8) II.

Miss Ancrum, Mrs. Argabrite, Mrs. Byrne, Miss Crowley, Miss
Drummond, Miss Hamcke, Miss Kleinknecht, Miss Lackey,
Miss Pueschel, Miss Ringholz, Miss Rowden, Miss Smith,
Mrs. Surprenant, Miss Thomasson

Lecture, four hours; laboratory, sixteen hours. Prerequisite: course 105C; Public Health 160A prerequisite or concurrent.

Principles basic to the maintenance and promotion of family and community health and to the care of patients with complicated acute and chronic illnesses. Nursing laboratory in general and psychiatric hospitals, industries, schools, and public health agencies.

†195. Fundamental Problems in Administering Nursing Services. (8) I.

Miss Argabrite, Miss Atkinson, Miss Crowley, Mrs. E. Kaufman

Lectures, four hours; laboratory, sixteen hours. Prerequisite: senior standing.

Analysis and synthesis of systems of administering nursing care programs including evaluation and prediction of success. Participation in administering nursing services.

† Automobile required.

† Registered Nurse Program to be terminated as a separate program after 1963-1964. Registered nurse students will enroll in the Basic Nursing Program beginning September, 1964.

199. Special Studies in Nursing. (1-3) I, II.**The Staff**

Prerequisite: senior standing and consent of the instructor.

Upper Division Courses for Registered Nurses***106A. Nursing Care of Adults and Children. (8) I, II.**

Miss Ancrum, Mrs. Argabrite, Mrs. Byrne, Miss Crowley, Miss Drummond, Miss Hamcke, Miss Kleinknecht, Miss Lackey, Miss Pueschel, Miss Ringholz, Miss Rowden, Miss Smith, Mrs. Surprenant, Miss Swartz, Miss Thomasson

Lecture, four hours; laboratory, sixteen hours. Prerequisite: senior standing; Physical Education 145A; prerequisite or concurrent; Public Health 180 concurrent.

Study of current concepts of nursing care of individuals and families with emphasis on health promotion, disease prevention and remedial and rehabilitative care of patients. Nursing laboratory in psychiatric and public health agencies, school health services, and other community facilities.

106B. Nursing Care of Adults and Children. (8) I, II.

Miss Ancrum, Mrs. Argabrite, Mrs. Byrne, Miss Crowley, Miss Drummond, Mrs. Gaspard, Miss Hamcke, Miss Kleinknecht, Miss Lackey, Miss Pueschel, Miss Ringholz, Miss Rowden, Miss Smith, Mrs. Surprenant, Miss Swartz, Miss Thomasson

Lecture, four hours; laboratory, sixteen hours. Prerequisite: course 106A; Public Health 160A prerequisite or concurrent.

Study of current concepts of nursing care with emphasis upon recent advances in the care of acutely and chronically ill adults and children. Nursing laboratory in hospitals and other community health facilities. Individual and group health teaching.

†110. Survey of Nursing. (3) II.**Mrs. Gunter**

Critical analysis of studies in nursing and their relationship to the development of the profession.

†144. Community Health Nursing, Including School Nursing. (4) I.**Miss O'Leary and the Staff**

Lecture, two hours; laboratory, eight hours. Prerequisite: consent of instructor. For graduate students. Automobile required.

A study of public health nursing, including school nursing; philosophy; functions; responsibilities; current practices, and their relationship to present and future health needs of people. Guided participation in a community health agency and/or school.

†165. Fundamentals of Psychiatric Nursing. (4) I.**Miss Palmer, Miss Pueschel**

Lecture, two hours; laboratory, eight hours. Prerequisite: consent of instructor. For graduate students.

Study of the changing concepts in the care of psychiatric patients, with guided participation in nursing care essential to meet the needs of the mentally ill patient and his family.

195. Fundamental Problems in Administering Nursing Services. (8) I.**Miss Johnson, Mrs. Karpowich, Mrs. E. Kaufman, Mrs. Moidel**

Lectures, four hours; laboratory, sixteen hours. Prerequisite: senior standing.

Analysis and synthesis of systems of administering nursing care programs including evaluation and prediction of success. Participation in administering nursing services.

199. Special Studies in Nursing. (1-3) I, II.**The Staff**

Prerequisite: senior standing and consent of the instructor.

* Registered nurse students will enroll in the basic program beginning September, 1964.

† Offered only in summer session beginning fall semester, 1964-1965.

‡ Not to be given, 1963-1964.

Graduate Courses

205A-205B. Nursing Research and Statistical Data. (2) I, II.

Prerequisite: upper division course in statistics.

Mrs. Gunter, Mr. Meyer

Exploration and evaluation of studies and research in nursing. Use of the scientific method and the handling of statistical data as an aid in the selection and solution of studies and thesis problems.

225. Human Relations in Administration. (2) I, II.

Mr. Ferguson

A systematic study of the principles of human relations in administration, with emphasis upon their application to the field of nursing.

230. Curriculum Development in Nursing. (2) I, II.

Mrs. Dunlap

A critical evaluation of present-day nursing curricula, with a consideration of objectives, teaching methods, source materials, community resources, and sequence of instruction. Individual and group studies in University nursing-curriculum building.

236. Current Concepts in Pediatric Nursing. (2) I, II.

Miss Johnson

A critical evaluation of new scientific discoveries in major clinical conditions occurring in childhood and of recent developments in the care and guidance of children from which principles and practices of pediatric nursing may be derived.

237A-237B. Psychiatric Concepts in Nursing and Community Health Programs. (2-2) Yr.

Miss Palmer

A study of theoretical and practical problems in human behavior which the nurse encounters when meeting mental health needs of individuals and their families.

252A-252B. Seminar in Nursing Service Administration. (2-2) Yr.

Prerequisite: consent of instructor.

Miss Arndt, Miss White, and the Staff

Evaluation of the fundamentals of hospital nursing service administration, including ward administration, personnel management, in-service education programs, nursing functions, team activities, and community relationships. Individual and group study and field work.

253. Seminar in Long-Term Illness Nursing. (2-4) I, II.

Miss Drummond

Prerequisite: consent of the instructor. Automobile required.

Study of the fundamentals of administration of long-term illness nursing, with emphasis upon program planning, supervision, personnel management, in-service education, and community activities. Individual and group study and field work.

254. Seminar in Nursing School Administration. (2-4) I, II.

Prerequisite: consent of the instructor.

Mrs. Hassenplug

Evaluation of the fundamentals of nursing school administration, including organization, control, personnel, physical and clinical facilities, curriculum, teaching, student selection, and student welfare. Individual and group study and field work.

256A-256B. Seminar in Public Health Nursing. (2-2) Yr.

Miss O'Leary

Automobile required.

Evaluation of the fundamentals of public health nursing administration, including agency interrelationships, student welfare, supervisory activities, and program planning in official and nonofficial agencies in urban and rural areas. Individual and group study and field work.

258A-258B. Seminar in Advanced Pediatric Nursing. (2-2) Yr.

Miss Johnson

Evaluation of the needs of infants and children at different age levels and the various programs designed to meet these needs in urban and rural areas. Individual and group study and field work in child-care programs.

261A-261B. Seminar in Advanced Psychiatric-Mental Health Nursing. (2-2) Yr.

Miss Palmer and the Staff

Critical analysis of the philosophy, therapeutic principles, skills, and techniques inherent in the professional nursing care of the mentally ill. Guided study and field work.

262A-262B. Seminar in Advanced Maternity Nursing. (2-2) Yr.**Mrs. Runnerstrom**

Evaluation of present obstetric practices, and analysis of recent advances and changing philosophy in the care of mother and baby; community organization for maternal and child care; individual and group study and field work.

270. Seminar in Advanced Medical-Surgical Nursing. (2-4) I, II.**Mrs. Moidel**

Evaluation of the fundamentals of medical-surgical nursing; implications for nursing in recent scientific advances; current trends in rehabilitation. Critical analysis of methods used in patient care and student teaching. Individual and group study and field work.

299. Research on Thesis. (No credit) I, II.**Miss Arndt, Miss White****332. Current Concepts in Community College Nursing Programs. (2) I, II.**

Lectures, two hours. Prerequisite: consent of the instructor.

Mrs. Dunlap

A study of theoretical and practical problems in associate degree programs in nursing. Individual and group study and field work.

370. Supervised Teaching of Nursing. (2-4) I, II.**Miss Kaufmann**

Lectures, two to four hours; laboratory, eight to sixteen hours. Prerequisite: graduate status; major seminar; consent of instructor.

Critical appraisal of the content of courses offered in collegiate nursing programs. Supervised teaching experience in the student's major field of nursing.

401. Guided Supervision in Nursing Services. (5) I, II.**The Staff**

Laboratory, thirty hours. Prerequisite: master's degree or the equivalent, or consent of the instructor. May be repeated for credit.

A course in guided supervision in nursing service in hospitals and/or health agencies which places emphasis upon supervisor-nurse-team relationships and the evaluation process. Opportunity is given to apply the theory of supervision and to handle supervisory problems.

454. Internship in Nursing School Administration. (3-5) I, II.**Mrs. Hassenplug**

Lectures, two to six hours; laboratory, sixteen to twenty-four hours. Prerequisite: completion of N254.

The internship in Nursing School Administration is organized to provide experience in administering either a junior college or baccalaureate program in nursing. The intern participates in seminars and has a guided experience in administering a nursing program.

475. Supervision of Nursing Services. (2-4) I, II.**Miss Arndt, Miss White**

Lectures, two to four hours; laboratory, eight to sixteen hours. Prerequisite: graduate status; major seminar; consent of instructor.

Critical appraisal of supervisory theory and process. Guided experience in supervision in hospitals and/or health agencies.

❖ NUTRITIONAL SCIENCES**(Department Office, 1209 Public Health Building)****Gladys A. Emerson, Ph.D., Professor of Nutrition.****Marian E. Swendseid, Ph.D., Professor of Nutrition and Biological Chemistry.****Roslyn B. Alfin-Slater, Ph.D., Associate Professor of Nutrition.****Edward L. Rada, Ph.D., Associate Professor of Economics.****Edith M. Carlisle, Ph.D., Lecturer in Nutrition.****Peggy Ann Foskett, B.S., Associate in Nutrition.****Florence C. McGucken, M.S., Lecturer in Nutrition.****Margaret Pan, M.S., Associate in Nutrition.**

School of Public Health

Curriculum requirements for the Bachelor of Science Degree and the Master of Science degree are described in the UCLA ANNOUNCEMENT OF THE SCHOOL OF PUBLIC HEALTH and on pages 152-159 of this bulletin.

Letters and Science List.—Courses 113 and 114 are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Lower Division Course

11. Nutrition and Food. (3) I.

Mrs. Carlisle

Lecture, one hour; laboratory, six hours.

Nutrition with emphasis on the selection and preparation of foods.

Upper Division Courses

100. Institutional Food Economics. (2) I.

Mrs. McGucken

Lecture, one hour; laboratory, three hours.

Production and distribution methods in food industries; grades and standards; legal control; the cost to consumers in relation to nutritive values.

101. Food Analysis. (3) I.

Mrs. Alfin-Slater, Mrs. Pan

Lecture, one hour; laboratory, six hours. Prerequisite: course 113.

The application of quantitative methods to the chemical and microbiological assay of foods.

102. Food Science. (3) II.

Mrs. Pan

Lecture, one hour; laboratory, six hours. Prerequisite: course 11, Chemistry 1A-1B.

The study of chemical, enzymatic and physical principles in food preparation.

111. Principles of Food and Nutrition. (2) II.

The Staff

A survey of the principles of nutrition and their application in normal conditions of growth and development. Food habits in relation to nutritive requirements and health. (Not open to students who have had Nutritional Science 11.)

113. Nutrition. (3-4) I.

Miss Swendseid, Mrs. Pan

Lecture, three hours; laboratory, three hours. Prerequisite: Chemistry 8, 9, Zoology 1A, 1B.

The chemistry and biochemistry of carbohydrates, fats, proteins, minerals, and vitamins in relation to human nutrition. Qualitative laboratory studies on the components of food.

114. Methods in Metabolism. (4) II.

Mrs. Alfin-Slater, Mrs. Pan

Lecture, two hours; laboratory, six hours. Prerequisite: course 101 or equivalent.

The influence of special diets on various phases of metabolism; methods for determining constituents in blood and urine.

*115. Nutritional Requirements. (2) II.

Mrs. Emerson

Prerequisite: Consent of instructor.

The experimental basis for the establishment of recommended dietary allowances.

116. Therapeutic Dietetics. (2) I.

Mrs. Carlisle

Lecture, one hour; laboratory, three hours. Prerequisite: courses 102, 113.

Modification of the normal diet for specific diseases; dietary calculations.

117. Evaluation of Nutritional Adequacy and Status. (2) I.

Prerequisite: courses 101, 113.

Mrs. Alfin-Slater

A critical study of the methods used to assess the nutritional adequacy of various foods and the nutritional status of individuals. Criteria for nutritional surveys.

* Not to be given, 1963-1964.

121. Quantity Food Study. (4) I, II.

Mrs. McGucken

Lecture, two hours; laboratory, six hours. Prerequisite: Nutritional Sciences 102 and Economics 1A-1B.

A study of economic principles and problems involved in the purchase and preparation of foods in quantity.

122. Institutional Organization and Management. (4) I, II.

Mrs. McGucken

Lecture, two hours; laboratory, six hours.

A study of organization and administration as applied to institutional households such as residence halls, hotels, hospitals, and school cafeterias.

142. The World's Food. (4) II.

Mr. Rada

Lecture, three hours; laboratory, three hours. Prerequisite: Economics 1A-1B.

The world's food sources; major food groups; human food requirements and consumption; food in developing economies; the international movement of foods; interrelations of food, population, and economic progress.

199. Special Studies in Nutritional Science. (1-3) I, II.

The Staff

Prerequisite: senior standing and consent of the instructor.

Graduate Courses**251. Seminar in Nutrition. (2) I, II.**

Miss Swendseid, Mrs. Alfin-Slater

Recent advances in the science of nutrition and in the dietetic treatment of disease. (May be repeated for credit.)

252. Nutritional Diagnosis. (2) I, II.

Mrs. Emerson

Prerequisite: course 113, Chemistry 108A-108B or Physiological Chemistry 101A-101B. (May be repeated for credit.)

Nutrition in the maintenance of health and treatment of disease.

***253. Bio-Chemistry and Nutrition of Lipids. (2) I.**

Mrs. Alfin-Slater

Lecture, TBA; laboratory, TBA. Prerequisite: course 113, Chemistry 108A-108B or Physiological Chemistry 101A-101B.

***254. Dietary Interrelationships. (2) II.**

Mrs. Alfin-Slater

Prerequisite: consent of the instructor, course 113 and Chemistry 108A-108B or Physiological Chemistry 101A-101B.

Nutrient and nutrient-hormone interrelationships.

***255. Safety Evaluation of Foods. (1) I.**

Mrs. Alfin-Slater

Prerequisite: consent of the instructor.

Chemical additives in food production, processing, distribution and use; possible toxic effects, accepted limits of tolerance, legal controls and regulation.

***256. Nutritional Problems in Developing Areas. (2) I.**

Mrs. Emerson

Prerequisite: consent of the instructor.

Manifestations and dietary treatment of nutritional deficiencies.

297. Individual Studies for Graduate Students. (1-4) I, II.

The Staff

Special problems in nutrition.

ORIENTAL LANGUAGES

(Department Office, 334 Royce Hall)

Kan Lao, B.A., Academician, *Professor of Oriental Languages.*Richard C. Rudolph, Ph.D., *Professor of Oriental Languages.*Ensho Ashikaga, M.Litt., Giko, *Associate Professor of Oriental Languages*
(*Chairman of the Department*).James T. Araki, Ph.D., *Assistant Professor of Oriental Languages.*Mieko S. Han, Ph.D., *Assistant Professor of Oriental Languages.*

* Not to be given, 1963-1964.

Y. C. Chu, M.A., *Lecturer in Chinese.*

Che-Hwei Lin, B.A., M.S. in L.S., *Lecturer in Japanese.*

Man-hing Mok, M.A., M.S., *Lecturer in Chinese.*

George Takahashi, M.A., *Associate in Japanese.*

Letters and Science List.—All undergraduate courses in Oriental languages are included in the Letters and Science Lists of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—For the major in Chinese, courses 1A-1B, 9A-9B and 42; for the major in Japanese, courses 1A-1B, 9A-9B and 32. Recommended for both majors: Anthropology 1, 2.

The Major.—Required for the major in Chinese: 24 upper division units, distributed as follows: 18 units in Chinese language courses*; courses 112, 195, and 199. In addition, Art 111B; and History 191A-191B.

Required for the major in Japanese: 24 upper division units distributed as follows: 18 units in Japanese language courses*; courses 132, 196, and 199. In addition, Art 111C; and History 191A-191B.

Recommended for both majors: Anthropology 110, Geography 124B. A reading knowledge of French and German should be acquired by those planning to go on to graduate work.

Requirements for Admission to Graduate Courses.—A candidate for admission to graduate courses in Oriental languages must meet, in addition to the general University requirements, the minimum requirements for an undergraduate major in this department. The candidate must pass a reading examination in French or German during the first semester of graduate study.

Requirements for the Master's Degree.—For the general requirements see page 162. The department favors the Comprehensive Examination plan, but under certain conditions the thesis plan may be approved.

Lower Division Courses

1A-1B. Elementary Modern Chinese. (4-4) Yr.

Mr. Chu

Not open to students with previous training. Five hours a week.

Introduction to the standard or "National Language" (Kuo Yü) of China.

5A-5B. Spoken Japanese. (3-3) Yr.

Mrs. Han

Prerequisite: consent of the instructor. Not open to those with previous training.

An introduction to standard colloquial Japanese. Emphasis on oral competence with careful attention to grammatical structure.

9A-9B. Elementary Modern Japanese. (4-4) Yr.

Mr. Takahashi and Staff

Not open to students with previous training. Five hours a week.

11A-11B. Spoken Chinese. (3-3) Yr.

Prerequisite: consent of the instructor.

13A-13B. Classical Chinese. (2-2) Yr.

Mr. Rudolph

Prerequisite: course 1A or consent of the instructor.

Introduction to the development of Chinese writing and the Classical language in which the bulk of Chinese literature is written.

* The following courses only will be counted as upper division language courses: 101A-101B, 109A-109B, 113A-113B, 119A-119B, 121A-121B, 129B-129B, 139, 163, 173, 179-179B.

32. History of Japanese Civilization. (2) II. Mr. Araki
A survey of the development of Japanese culture and its relationship to the Asiatic mainland.

42. History of Chinese Civilization. (2) I. Mr. Rudolph
No knowledge of Chinese is required.
A survey of the development of the outstanding aspects of Chinese culture from pre-historic to modern times.

95A-95B. Advanced Spoken Japanese. (3-3) Yr. Mrs. Han
A continuation of 5A-5B.

Upper Division Courses

101A-101B. Intermediate Chinese. (3-3) Yr. Mr. Chu
A continuation of 1A-1B.

109A-109B. Intermediate Modern Japanese. (3-3) Yr. Mr. Takahashi
A continuation of 9A-9B.

112. Chinese Literature in Translation. (2) II. Mr. Araki
No knowledge of Chinese is required.
Lectures and collateral reading of representative works—including classics, histories, belles-lettres, and fiction—in English translations.

113A-113B. Intermediate Classical Chinese. (2-2) Yr. Mr. Lao
Further readings in the classics.

119A-119B. Advanced Modern Japanese. (3-3) Yr. Mr. Araki
A continuation of 109A-109B.

121A-121B. Advanced Chinese. (3-3) Yr. Mr. Chu
A continuation of 101A-101B, with practice in newspaper style.

125. Sino-Japanese Calligraphy. (2) II. Mr. Ashikaga
Prerequisite: course 1A-1B or 9A-9B.
The writing systems of China and Japan in their various modern styles.

129A-129B. Classical Japanese and Kambun. (2-2) Yr. Mr. Ashikaga

132. Japanese Literature in Translation. (2) I. Mr. Araki
History of Japanese literature from the beginning to modern times, emphasizing Chinese, Buddhist, and Western influences.

139. Introduction to Buddhist Texts. (2) I. Mr. Ashikaga
Prerequisite: Oriental Languages 101B or 109B or the equivalent, and consent of the instructor.
Studies on Buddhist terminology.

152A. Chinese Poetry and Fiction. (3) I. Mr. Lao
Prerequisite: a reading knowledge of Chinese.

***152B. Japanese Poetry and Fiction. (3) II.** ———
Prerequisite: a reading knowledge of Japanese.

163. Readings in Chinese. (3) I. Mr. Lao
Prerequisite: course 113A-113B.
Selections from masters in the Ku wen style.

164A-164B. Tibetan. (2-2) Yr. Mr. Ashikaga

* Not to be given, 1963-1964.

170A. Archaeology of Early China. (2) I.**Mr. Rudolph**

No knowledge of Chinese is required.

Rise and development of antiquarianism from ancient times to the twentieth century: earliest interpretations of archaeological material; medieval collecting, museums and illustrated catalogues; field work and classification; early archaeological literature.

170B. Archaeology of Modern China. (2) II.**Mr. Rudolph**

No knowledge of Chinese is required.

Important sites and work since the beginning of scientific archaeology in China: Peking Man; a systematic survey of the palaeolithic, neolithic and bronze ages; archaeological work under the Communist regime.

***172A-172B. The Influence of Buddhism on Far Eastern Cultures. (3-3) Yr.**

The historical development of Buddhism in China and Japan and its influence on the culture, society and institutions of these areas. No language requirement.

173. Chinese Historical Texts. (2) II.**Mr. Lao**

Prerequisite: course 113A-113B.

175. The Structures of the Japanese and Korean Languages. (3) I.**Mrs. Han**

Prerequisite: consent of the instructor.

Phonology, morphology and syntax of Japanese and Korean.

179A-179B. Readings in Japanese. (3-3) Yr.**Mr. Ashikaga**

Prerequisite: course 129B, or consent of the instructor.

195. Chinese Bibliography. (2) I.**Mrs. Mok**

Prerequisite: Reading knowledge of Chinese and consent of the instructor.

196. Japanese Bibliography. (2) II.**Mr. Lin**

Prerequisite: Reading knowledge of Japanese and consent of the instructor.

198. Chinese Paleography. (2) II.**Mr. Lao**

Prerequisite: An advanced reading knowledge of classical Chinese and consent of the instructor.

The decipherment and interpretation of ancient texts on bone, bronze, stone and wood.

199. Special Studies in Oriental Languages. (1-4) I, II.**The Staff**

Prerequisite: senior standing in the department, or advanced reading knowledge of Chinese or Japanese, and consent of the instructor.

Graduate Courses**203A-203B. Chinese Philosophical Texts. (2-2) Yr.****213A-213B. Chinese Buddhist Texts. (3-3) Yr.****229A-229B. Japanese Buddhist Texts. (3-3) Yr.****252A-252B. Seminar in Japanese Literature. (3-3) Yr.****253A-253B. Seminar in Buddhist Studies. (2-2) Yr.****262. Seminar in Sinological Literature. (3) I.****275. Seminar in Chinese Cultural History. (3) II.****295. Bibliography and Methods of Research. (2) I.**

* Not to be given, 1963-1964.

PATHOLOGY

(Department Office, 13-265 Center for the Health Sciences)

Baldwin G. Lamson, M.D., *Professor of Pathology and Associate Director, Clinical Laboratories.*

Harrison Latta, M.D., *Professor of Pathology.*

Sidney C. Madden, M.D., *Professor of Pathology (Chairman of the Department).*

Louis J. Zeldis, M.D., *Professor of Pathology.*

Raymond A. Allen, M.D., *Associate Professor of Pathology.*

Edward R. Arquilla, M.D., *Associate Professor of Pathology.*

W. Jann Brown, M.D., *Associate Professor of Pathology.*

Robert S. Stone, M.D., *Associate Professor of Pathology.*

Roy L. Walford, Jr., M.D., *Associate Professor of Pathology.*

†Robert E. Anderson, M.D., *Assistant Professor of Pathology.*

Luciano Barajas, M.D., *Assistant Professor of Pathology.*

Thomas S. Edgington, M.D., *Assistant Professor of Pathology.*

Shinichi Hamashige, M.D., *Assistant Professor of Pathology.*

Gary M. Troup, M.D., *Assistant Professor of Pathology.*

Maurice A. Verity, M.D., *Assistant Professor of Pathology.*

†Drake W. Will, M.D., *Assistant Professor of Pathology and Director, Clinical Laboratories.*

Graduate Course

Graduate study programs in the department are offered to a limited number of medical students between the second and third or between the third and fourth years. For further information consult the chairman of the department. The following course is open to qualified nonmedical graduate students in so far as facilities permit.

231. Pathological Anatomy and Physiology. (11) I.

The Staff

Prerequisite: graduate student status and completion of a curriculum satisfying basic requirements for the study of human pathology. Candidates should make application to the Department of Pathology office. Limited to twelve students.

Demonstrations, discussions, and individual study of a student loan collection of microscopic slides preparations and of fresh specimens from recent autopsies, supplemented by fixed museum specimens, Kodachrome photomicrographs, and projection of microslides. The course of study includes general pathology and the special pathology of organ systems, emphasizing the correlation of abnormal anatomy with deranged physiology and chemistry. Laboratory exercises illustrative of major phenomena of disease are performed by students under staff supervision. The topic for the term paper should be selected in consultation with the instructor.

PHARMACOLOGY

(Department Office, 23-267 Center for the Health Sciences)

Donald J. Jenden, M.B., B.S., *Professor of Pharmacology.*

Dermot B. Taylor, M.A., M.D., *Professor of Pharmacology (Chairman of the Department).*

† Absent on leave, 1963-1964.

† John A. Bevan, M.B., B.S., M.R.C.S., L.R.C.P., *Associate Professor of Pharmacology.*

Robert George, Ph.D., *Associate Professor of Pharmacology.*

J. Heward Thompson, B.A., M.B., B.A.D., B.Ch., *Assistant Professor of Pharmacology.*

Barbara B. Brown, Ph.D., *Associate Clinical Professor of Pharmacology.*

Ernest C. Griesemer, Ph.D., *Assistant Clinical Professor of Pharmacology.*

Eskil A. Hultin, Ph.D., M.Sc., D.Sc., *Lecturer in Pharmacology.*

Admission to Graduate Status

In addition to meeting the requirements of the Graduate Division, the student must have received the bachelor's degree in a biological or physical science or in the premedical curriculum, provided that the following, or their equivalents, have been completed: 6 semester units of college mathematics, 8 units of physics, 16 units of chemistry (including quantitative analysis and organic chemistry), 8 units of zoology (including comparative gross and microscopic anatomy), 8 units of mammalian physiology (including laboratory), 10 units of biochemistry (including laboratory).

In suitable cases, students who have not completed the above requirements may be admitted to graduate status, but the deficiencies will have to be removed within a specified time.

Students may from time to time be required to pass such examinations as may be thought advisable by the staff of the department.

Requirements for the Degree of Master of Science

In addition to the general requirements of the Graduate Division as defined on pages 162–165 the student must complete the following:

1. Pharmacology 201. Mammalian Pharmacology and Toxicology.
2. Pharmacology 232. Fundamental Principles of Drug Action.
3. Pharmacology 233. Bioassay Theory.
4. Pharmacology 234. Experiments in Bioassay and Modes of Drug Action.
5. Pharmacology 251A–251B. Seminar.
6. Suitable additional courses in related subjects to make a total of 20 units.
7. A thesis.

The responsibility for completion of all technical requirements for the master's degree rests solely with the candidate. This includes application to the Graduate Division for advancement to candidacy during the first two weeks of the final semester in which the candidate hopes to qualify. The deadline for this application is set each semester by the Graduate Division.

Requirements for the Doctor's Degree

1. *Advancement to Candidacy.* In addition to the general requirements of the Graduate Division as defined on pages 165–169, the student must pass a series of qualifying examinations both written and oral. His guidance committee may also stipulate additional requirements. This committee will be appointed by the chairman of the department.

† Absent on leave, 1963–1964.

2. Departmental Requirements. The minimum requirements in addition to those for the master's degree in pharmacology and toxicology are:

- (1) Pharmacology 236. Neuropharmacology.
- (2) Reading knowledge of French and German. (See page 166.)
- (3) Two semesters of physical chemistry.
- (4) A course in calculus.
- (5) Such additional subjects as his guidance committee may designate.

The language and course requirements should be satisfied as soon as possible, and students must pass the examinations in foreign languages before applying for the qualifying examination.

The responsibility for completion of all technical requirements for the doctor's degree rests solely with the candidate.

Graduate Courses

201. Mammalian Pharmacology and Toxicology. (8) II.

Lectures, demonstrations, laboratories and conferences. Mr. Taylor and the Staff

A detailed and comprehensive consideration of the classification, description, modes of action and the pharmacological and toxicological actions of drugs with special reference to the principles governing their use in medicine.

232. Fundamental Principles of Drug Action. (2) I.

Mr. Taylor and the Staff

Advanced lectures on the scientific basis of pharmacological action. Interactions between drugs and cell components. Principles governing absorption, distribution, metabolism and excretion. Diffusion of drugs into and through tissues. Relationships between structure and action in relevant series of drugs.

233. Bioassay Theory. (1) I.

Mr. Dixon and the Staff

Prerequisite: Preventive Medicine 101 (Biostatistics).

The theory and practice of the application of statistical methods to the design of experiments and the analysis of data in pharmacology, toxicology and therapeutics.

234. Experiments in Bioassay and Modes of Drug Action. (1) I.

Mr. Taylor and the Staff

A detailed laboratory course on the bioassay of pharmacological agents and the experimental techniques involved in the elucidation of their modes of action.

235. Systemic Mammalian Pharmacology and Toxicology. (3) II.

Mr. Taylor and the Staff

A comprehensive lecture course in systemic general mammalian pharmacology including the classification, description and mode of action of pharmacological agents.

236. Neuropharmacology. (1) I, II.

Mr. Taylor and the Staff

Prerequisite: Neurophysiology.

An advanced course on the actions and mode of action of drugs acting on the nervous system. Interactions between drugs and nervous tissue. The movement of drugs and chemicals through the blood brain barrier and their distribution in the C.S.F. and brain. Problems of central transmission.

251A-251B. Seminar in Pharmacology. (1-1) Yr. Mr. Taylor and the Staff

290. Research in Pharmacology. (1-6) Yr. Mr. Taylor and the Staff

PHILOSOPHY

(Department Office, 3303 Humanities Building)

†Hans Meyerhoff, Ph.D., *Professor of Philosophy.*

Ernest A. Moody, Ph.D., *Professor of Philosophy (Chairman of the Department).*

Donald A. Piatt, Ph.D., *Professor of Philosophy.*

Abraham Robinson, Ph.D., *Professor of Philosophy and Mathematics.*

J. Wesley Robson, Ph.D., *Professor of Philosophy.*

† G. H. von Wright, Lic. Phil., *Flint Professor of Philosophy.*

*Robert M. Yost, Jr., Ph.D., *Professor of Philosophy.*

Rudolf Carnap, Ph.D., *Emeritus Professor of Philosophy.*

Hugh Miller, Ph.D., *Emeritus Professor of Philosophy.*

Donald Kalish, Ph.D., *Associate Professor of Philosophy.*

Richard Montague, Ph.D., *Associate Professor of Philosophy.*

†Herbert Morris, LL.B., D.Phil., *Associate Professor of Philosophy and Law.*

Douglas C. Long, M.A., Ph.D., *Assistant Professor of Philosophy.*

J. Howard Sobel, M.A., Ph.D., *Assistant Professor of Philosophy.*

Patrick Wilson, Ph.D., *Assistant Professor of Philosophy.*

———, *Visiting Professor of Philosophy.*

———, *Visiting Assistant Professor of Philosophy.*

Montgomery Furth, A.B., *Lecturer in Philosophy.*

David B. Kaplan, A.B., *Lecturer in Philosophy.*

Alfred R. Louch, Ph.D., *Visiting Assistant Professor of Philosophy.*

Letters and Science List.—All undergraduate courses in this department are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Courses 20A, 20B, and 31.

The Major.—Twenty-four units in upper division courses, including at least 3 units in each of the following four groups:

Group I. 114, 152, 153, 157, 158, 162, 163, 166, 173.

Group II. 102, 148, 184A, 184B, 187A, 187B, 191.

Group III. 104, 105, 121, 136, 146A, 146B, 147, 149, 188, 189, 193.

Group IV. 111, 112, 123, 170A, 170B, 180, 181, 197.

Requirements for Admission of Philosophy Majors to Graduate Courses.—Students may be admitted to a graduate course only if they have graduate standing and adequate preparation for this course.

Requirements for the Master's Degree.—For the general requirements, see page 162. In addition, candidates for the master's degree in philosophy must satisfy the following:

1. A reading knowledge of one of the following languages: Greek, Latin, French, or German.

† Absent on leave, 1963–1964.

* In residence fall semester only, 1963–1964.

* In residence spring semester only, 1963–1964.

2. At least 20 semester units in courses numbered over 100, 8 or more of which must be in courses numbered over 200, other than course 299.

3. An oral examination designed to test the student's general knowledge of philosophy.

4. A thesis supervised and approved by the department.

Requirements for the Doctor's Degree.—For the general requirements, see page 165. In addition, candidates for the doctor's degree in philosophy must satisfy the following:

1. A reading knowledge of two of the following languages: Greek, Latin, French, or German. On petition to the department, one of these may be replaced by another language especially relevant to the candidate's field of specialization.

2. At least 24 related upper division units approved by the adviser in any one of the following fields: (a) natural sciences and mathematics, (b) social sciences, (c) life sciences, (d) humanities, excluding philosophy.

3. Qualifying examinations for advancement to candidacy consisting of a written examination in each of the following fields: (1) History of Philosophy, (2) Logic, (3) Value Theory, (4) Metaphysics and Epistemology, and (5) a field of specializations within philosophy proposed by the candidate and approved by the department. These examinations are to be taken in two groups, two of the four fields in the first group, and the other two and the fifth or special examination in the second group. The student may choose which two of the four fields he is to take in the first group; the second group must be taken not later than one calendar year after the first group. The examinations are normally scheduled for the third and fourth weeks of the fall semester and for the third and fourth weeks of April in the spring semester. In addition to the written examinations, an oral examination is required in one of the four general philosophical fields and in a related field which will normally be represented by the nondepartmental members of the doctoral committee. During the period between admission to graduate standing and advancement to candidacy, a graduate student is normally required in each academic year of residence to take at least six units in philosophy courses numbered from 200 to 296 inclusive.

4. An oral examination in the field of the student's special interest as represented by his dissertation.

Lower Division Courses

All lower division courses are introductory and without prerequisite, except as otherwise stated.

6A-6B. Introduction to Philosophy. (3-3) Yr. Beginning either semester.

Mr. Long, Mr. Sobel, Mr. Wilson and Staff

Basic problems and ideas encountered in the moral and intellectual life of mankind are analyzed in systematic, rather than historical manner. 6A is devoted to the philosophy of morals, politics, and art; 6B to theories of knowledge, metaphysics, science, and religion. Recommended as a course to satisfy requirement (G) (2) in the College of Letters and Science.

Course 6A is a prerequisite to course 6B.

20A. History of Greek Philosophy. (3) I, II. Mr. Furth, Mr. Piatt
The beginnings of Western science and philosophy; Socrates, Plato, and Aristotle; Greek philosophies in the Roman world and in the Christian era.

20B. History of Modern Philosophy. (3) I, II. Mr. Furth, Mr. Louch
The Renaissance and the rise of modern science; rationalism in Descartes, Spinoza, Leibniz; empiricism in Locke, Berkeley, Hume; Kant and his successors; recent movements.

***25. Democratic and Totalitarian Ideologies. (3) I.** _____
Contemporary philosophic conceptions of the relation between the state, society, and culture.

31. Logic. (3) I, II. Mr. Kalish, Mr. Kaplan, Mr. Montague, Mr. Sobel
The elements of symbolic logic; forms of reasoning and structure of language. Recommended for students who plan to pursue more advanced studies in logic.

32. Logic, Second Course. (3) I, II. Mr. Kalish, Mr. Montague
Prerequisite: course 31, preferably in the preceding semester.
Symbolic logic: extension of the systematic development of course 31. Identity, definite descriptions, modal logic, and applications of logic.

Upper Division Courses

Normally, prerequisite for all upper division courses is upper division standing and such special prerequisites as are mentioned in the course listings. Philosophy majors are recommended to make a selection of upper division courses that is well balanced with respect to the principal fields of philosophy. Many courses in the department of philosophy contain material that is relevant to programs of study in the following areas: fine arts, literary and intellectual history, jurisprudence, social sciences, psychology, natural sciences, and mathematics. The following courses, which require little or no philosophical background, are especially suitable for nonmajors who are interested simply in taking a course in philosophy as an elective: 102, 104, 111, 112, 114, 121, 123, 136, 146A, 146B, 147, and 149.

102. Introduction to Modern Logic. (3) I. Mr. Robinson
(Former number 30. Not open for credit to students who have taken course 30 at UCLA in the fall of 1959 or subsequently.)

Prerequisite: open to lower-division students with the consent of the instructor.
A survey of elementary logic topics: sentential logic, axiomatic foundations of arithmetic, calculus of classes and relations, elementary theory of probability.

104. Ethics. (3) I. Mr. Piatt
The fundamental concepts and theories of morals; the history and development of ethical theory.

105. Ethics and Society. (3) II. _____
Prerequisite: course 25, or 104; or upper division standing in psychology or a social science.
A critical application of ethical theory to contemporary social problems and institutions.

111. Metaphysics. (3) II. _____
Prerequisite: 6 units of philosophy or consent of the instructor.
Metaphysical theories of the universe and man's place in it; types of metaphysical approaches to philosophical problems; relations of metaphysics to science and to other philosophical disciplines.

* Not to be given, 1963-1964.

112. Philosophy of Religion. (3) I.

The nature and existence of God; the concept of immortality; religious obligation and the question of free will; the systematic nature of theology and its relation to the philosophical enterprise.

***114. American Philosophy. (3) I.**

Philosophical foundations of American thought. Theories of human nature, political philosophy, and religion, from colonial times to the present.

121. Political Philosophy. (3) I.

Mr. Sobel

Prerequisite: 6 units of philosophy.

Analysis of fundamental political conceptions: the state, sovereignty, political obligation, natural rights, natural law, and others.

123. Existentialist Philosophies. (3) II.

Mr. Meyerhoff

An analysis of existentialist thought in modern philosophy: the nineteenth-century background (Kierkegaard and Nietzsche) and the major varieties of contemporary existentialism, both religious and nonreligious (Heidegger, Sartre, Marcel, and Buber).

136. Philosophy of Art. (3) II.

Mr. Wilson

The aesthetic experience; form and expression; the functions of art; bases of art criticism.

***146A. Philosophy in Literature. (3) I.**

Mr. Meyerhoff

A study of philosophical ideas expressed in the literary masterpieces of Plato, Lucretius, Dante, Shakespeare, Goethe, Tolstoy, Lewis Carroll, Thomas Mann, and others.

146B. Philosophy in Literature. (3) II.

Mr. Meyerhoff

A study of philosophical ideas expressed in contemporary literary masterpieces.

147. Social Philosophy. (3) I.

Mr. Louch

Prerequisite: 3 units in group III of the major, or upper division standing in history or a social science.

Examination of the sociology of knowledge, the objectivity of the social sciences, the meaning of culture, and other problems in social philosophy.

148. Philosophy of Science. (3) II.

Mr. Robinson

(Former number, 186.)

Prerequisite: course 81.

A general survey and philosophical analysis of the concepts and laws of modern natural science.

***149. Philosophy of History. (3) I.**

Mr. Meyerhoff

Prerequisite: 3 units in group III of the major, or upper division standing in history or a social science.

A survey of philosophical theories of history and an analysis of contemporary problems of historical knowledge.

152. Plato. (3) II.

Mr. Furth

Prerequisite: course 20A or consent of the instructor.

153. Aristotle. (3) I.

Mr. Moody

Prerequisite: course 20A or consent of the instructor.

157. Medieval Philosophy. (3) II.

Mr. Moody

(Former number, 157A-157B.)

Prerequisite: course 20A or the equivalent.

Western European philosophy from the twelfth to the early fifteenth century; the contributions of Aquinas, Duns Scotus, and Ockham, and the late medieval origins of seventeenth century rationalism and empiricism.

***158. Philosophy of Nature and Mathematical Physics: 1200 to 1600 A. D.**

(3) I.

Mr. Moody

Prerequisite: consent of the instructor.

A study of the origin and philosophical background of modern classical mechanics.

* Not to be given, 1963-1964.

- 162. Continental Rationalism. (3) II.** Mr. Yost
Prerequisite: course 20B.
The philosophies of Descartes, Spinoza, and Leibniz.
- 163. British Empiricism. (3) I.** Mr. Robson
Prerequisite: course 20B.
The philosophies of Locke, Berkeley, and Hume.
- 166. Kant. (3) I.** Mr. Wilson
Prerequisite: course 162 or 163.
- 170A. Contemporary Philosophy. (3) I.** Mr. Kaplan
Prerequisite: course 20B. Recommended: course 31.
Analysis of the views of several recent philosophers.
- 170B. Contemporary Philosophy. (3) II.** Mr. Louch
Prerequisite: course 20B. Recommended: course 31.
Analysis of the views of several recent philosophers.
- *173. Dialectical and Historical Materialism. (3) II.** Mr. Meyerhoff
An historical and critical approach to dialectical materialism; its evolution and development up to the present; its application to history, logic, psychology, ethics, and esthetics.
- *180. Philosophy of Mind. (3) I.** Mr. Long
Prerequisite: course 102 or 6 units of philosophy or upper division standing in psychology.
Analysis of psychological concepts.
- 181. Theory of Knowledge. (3) I.** Mr. Long
Prerequisite: 102 or the equivalent or 20A-20B.
Philosophical problems of perception, memory, belief, and knowledge.
- 184A. Introduction to Set Theory. (3) I.** Mr. Kalish
Prerequisite: course 32 (which with the consent of the instructor may be taken concurrently), or upper division standing in mathematics and consent of the instructor.
Introduction to axiomatic set theory: sets, natural numbers, relations, functions, cardinal equivalence, infinity.
- 184B. Introduction to Metamathematics. (3) II.** Mr. Montague
Prerequisite: course 32, and either course 184A or consent of the instructor.
Methodology of logic and the deductive sciences; consistency and completeness of formal systems; concepts of truth and logical truth.
- 187A. Philosophy of Language. (3) I.** Mr. Furth
Prerequisite: course 31 or 102 or the equivalent.
Analysis of concepts of meaning, communication and truth, with respect to natural languages.
- 187B. Semantics. (3) II.** Mr. Kalish
Prerequisite: course 31 or the equivalent.
Formalized languages; theory of truth; synonymy and analyticity; modal logic.
- 188. Ethical Theory. (3) II.** Mr. Sobel
Prerequisite: course 104.
A systematic study of moral philosophy; right and wrong; good and evil; and some leading theories about these topics.
- *189. Aesthetic Theory. (3) I.** _____
Prerequisite: course 20A-20B, 186.
A survey of the major philosophies of art from Plato to the present.

* Not to be given, 1963-1964.

***191. Philosophy of Mathematics. (3) I.**

Mr. Robinson

Prerequisite: course 184A or Mathematics 127B or consent of the instructor.

Axiomatic and set-theoretical foundations of systems of numbers: natural numbers, integers, rationals, reals, and complex numbers. Foundational approaches of Russell, Hilbert, and Brouwer.

***192. Legal Philosophy. (3) II.**

Mr. Morris

Prerequisite: course 121 or consent of the instructor.

Analysis of modern legal theories, fundamental legal conceptions, and the foundations of legal institutions.

193. The Logic of Normative Concepts and Discourse. (3) I. Mr. von Wright

Prerequisite: courses 104 and 31, or consent of the instructor.

Human acts, rules of action, prescriptions and teleological norms, practical inference, deontic logic, obligations and rights, the nature of moral norms.

199. Special Studies. (1-5) I, II.

The Staff (Mr. Moody in charge)

Prerequisite: senior standing and consent of the instructor.

Graduate Courses

Prerequisite for Graduate Courses.—See requirements listed above for admission of philosophy majors to graduate courses; graduate students from other departments may secure admission to graduate courses with the consent of the instructor.

201. Problems in Metaphysics and Epistemology. (3) II.

Mr. Yost

Prerequisite: 12 units in relevant subjects.

A presentation of fundamental issues and concepts presupposed in current metaphysical and epistemological inquiry. Not open for credit to students who have completed the equivalent of Philosophy 251 or Philosophy 252.

***204. History of Ethics. (3) II.**

Mr. Piatt

Prerequisite: course 104 or its equivalent and consent of the instructor.

A critical survey of the leading moral philosophies in the western world from Plato to the end of the nineteenth century.

205. Ethical Theory. (3) II.

Mr. Piatt

(Former number, 266.)

Prerequisite: course 104 or its equivalent and consent of the instructor.

Critical analysis of modern ethical theories, fundamental moral concepts, and the foundations of moral judgments.

***211. Later Greek Philosophy. (3) II.**

Prerequisite: course 20A and either 152 or 153.

The minor Socratic schools, Stoics and Epicureans, the post-Platonic Academy, the Peripatetic school, Pyrrhonism and Academic scepticism, Middle Platonism and Neoplatonism. Special emphasis will be given to the logic, metaphysics, and moral philosophy of the Old Stoa.

***212. Medieval Philosophy: Research Techniques. (3)**

Mr. Moody

Prerequisite: course 157 and reading knowledge of elementary Latin.

Training in the use of source materials, in early editions and manuscripts; problems of location and identification of texts; the technical language of scholastic philosophy, and problems of interpretation and textual criticism.

***215. The Philosophy of Immanuel Kant. (3)**

Prerequisite: course 166.

Intensive reading of one of the Critiques.

* Not to be given, 1963-1964.

***216. Studies in Nineteenth-Century Philosophy. (3) II.**

(Former number, 125.)

An intensive study of a philosophical movement or an individual philosopher during the nineteenth century.

217. Pragmatism. (3) I.

(Former number, 253.)

Prerequisite: consent of the instructor.

Mr. Piatt

222. Philosophy of Science. (3) I.

Prerequisite: course 32 and the consent of the instructor.

Mr. Montague

***223. Probability and Induction. (3) II.**

(Former number, 242.)

Prerequisite: course 184A-184B, or consent of the instructor.

Mr. Montague

***224. Non-standard Logics. (3) I.**

Prerequisite: course 32 or the equivalent, and consent of the instructor.

One or more of the following topics: multi-valued logic, modal logic, intuitionistic logic, intensional logic.

†231A-231B. Set Theory. (3-3) Yr.

Mr. Kalish, Mr. Montague

Prerequisite: Mathematics 127A or Philosophy 32 or the equivalent; Philosophy 184A is recommended.

Axiomatic set theory: Sets, relations, functions, cardinal and ordinal numbers, finiteness and infinity, infinite arithmetic, partial orderings, simple orderings, well orderings, the axiom of choice and the continuum hypothesis and their consequences, inaccessible numbers, results on independence and relative consistency.

Students may not receive credit for both Mathematics 231A and Philosophy 231A or for both Mathematics 231B and Philosophy 231B.

323A*-232B. Metamathematics. (3-3) Yr.

Prerequisite: course 184B or Mathematics 127A.

Mr. Kalish

251. Seminar: Metaphysics. (3) II.

Prerequisite: course 201, or consent of the instructor.

Mr. Long

252. Seminar: Theory of Knowledge. (3) II.

(Former number, 255.)

Prerequisite: course 181.

Mr. Louch

255. Seminar: Theory of Value. (3) I.

(Former number, 265.)

Mr. von Wright

***257. Seminar: Responsibility in Law and Morals. (3) II.**

(Former number, 267.)

Prerequisite: course 192.

Mr. Morris

***258. Seminar: Philosophy of Art. (3) II.**

(Former number, 269.)

Prerequisite: course 186.

Mr. Wilson

***259. Seminar: Philosophy of History. (3) II.**

(Former number, 254.)

Prerequisite: course 149.

Mr. Meyerhoff

***261. Seminar: Plato. (3) I.**

(Former number, 257.)

Prerequisite: course 152.

Mr. Meyerhoff

***262. Seminar: Aristotle. (3)**

Prerequisite: course 152 or 153.

* Not to be given, 1963-1964.

† To be given in 1963-1964 as Mathematics 231A-231B, Set Theory; Mr. Robinson, instructor.

- *264. Seminar: Medieval Philosophy. (3) I. Mr. Moody
- *266. Seminar: Hume. (3) I. Mr. Robson
(Former number, 258.)
- *268. Seminar: Phenomenology. (3) I. Mr. Meyerhoff
- *270. Seminar: Philosophy of Language. (3) II. Mr. Wilson
Prerequisite: consent of the instructor.
- *271. Seminar: Logic. (3) II. Mr. Robinson
(Former number, 241.)
Prerequisite: consent of instructor.
272. Seminar: Philosophical Applications of Logic. (3) II. Mr. Kaplan
Prerequisite: one of the following courses: 222, 223, 224, 231A, 231B, 232A, 232B
Mathematics 231A, 231B; and consent of the instructor.
- *273. Seminar: Foundations of Mathematics. (3) II. Mr. Robinson
Prerequisite: one of the following courses: 222, 223, 224, 231A, 231B, 232A, 232B,
Mathematics 231A, 231B; and consent of the instructor.
- *275. Seminar: Philosophy of Science. (3) I. Mr. Montague
Prerequisite: one of the following courses: 222, 223, 224, 231A, 231B, 232A, 232B,
Mathematics 231A, 231B; and consent of the instructor.
297. Individual Studies for Graduate Students. (2-4) I, II.
The Staff (Mr. Moody in charge)
Any properly qualified graduate student who wishes to pursue a problem through
reading or advanced study may do so if his proposed project is acceptable to a member
of the staff.
299. Research on Thesis or Dissertation. (2-6) I, II.
The Staff (Mr. Moody in charge)

PHYSICAL EDUCATION

(Department Offices, 206 Men's Gymnasium, 124 Women's Gymnasium)

Ben W. Miller, Ph.D., *Professor of Physical Education.*
 Laurence E. Morehouse, Ph.D., *Professor of Physical Education.*
 §Raymond A. Snyder, Ed.D., *Professor of Physical Education.*
 Carl Haven Young, Ed.D., *Professor of Physical Education.*
 John F. Bovard, Ph.D., *Professor of Physical Education, Emeritus.*
 Rosalind Cassidy, Ed.D., *Professor of Physical Education, Emeritus.*

Basic Physical Education Activities

Course Description.—The following descriptions may be used as a guide in selecting activities (Physical Education 1):

Apparatus and Tumbling—tumbling, horizontal bar, parallel bars, side horse, long horse, flying rings and trampoline.

Archery—history, terminology, safety rules, tournament procedures, basic fundamentals of good form in target shooting and other forms of archery.

Badminton—knowledges and skills of badminton, fundamental strokes, rules, etiquette, strategy, singles and doubles play.

Body Conditioning—selected activities, such as working with weights, running cross country, handball, and basketball.

Basketball—knowledges and skills of the game.

Body Mechanics—an understanding of individual movement postures, capacities and limitations in activities, and mechanics of efficient movement.

Bowling—fundamentals, scoring procedures, etiquette, and safety precautions. \$13 fee. No extra charge for bowling shoes.

¹ Sabbatical leave in residence, fall semester, 1963–1964.

² Sabbatical leave in residence, spring semester, 1963–1964.

Dance: folk—international dances, American square and round dances.

Modern—exploration of basic dance movement and experience in creating dance studies.

Social—basic forms and variations: waltz, fox trot, swing, and Latin-American dances.

Exercise and Figure Control—designed to develop knowledge and understanding of exercise techniques through practical application. Analysis of individual needs with supervision of individual programs.

Fencing—beginning knowledge and skill in foil fencing, historical development, terminology, fundamental skills and bout procedures.

Golf—basic patterns of swings, knowledges of choice of clubs, rules, etiquette, scoring and tournaments. Equipment provided by student or rented.

Ice Skating: Beginning (only)—includes terminology, etiquette, and skating, leading to figures and ice dances. Class meets once a week for 2 hours. Fee of \$15.00 includes skate rental. Student furnishes own transportation to and from rink.

Techniques of Relaxation—restricted to those referred by the Student Health Center.

Therapeutic Exercise—restricted and special supervised activities for students with "C" medical classification cards.

Self-Defense—basic skills and practice in the techniques of self-defense.

Skiing—ski terminology, fundamental stationary turns, moving turns, etiquette and safety. Equipment provided by student or rented.

Soccer—skills fundamentals; strategy and game management.

Sports Fundamentals—a variety of student-selected activities which best fit needs and interests of the student.

Swimming: Beginning—fundamental principles of movement applied to execution of basic strokes, elementary diving and personal survival skills.

Intermediate—review and individual correction of basic skills and diving.

Advanced—use of strokes in long distance, speed, and synchronized swimming. Beginning spring board diving.

Lifesaving and Water Safety—safety knowledges and skills of lifesaving.

Synchronized—exploration in strokes, stunts and accompaniment. Experiences in creating swimming studies.

Tennis: Beginning—base knowledges and skills of drives, volley, service, strategy, rules and etiquette.

Intermediate and Advanced—correction of individual faults and advanced techniques and strategy.

Track and Field—conditioning and testing in seven track events. Opportunity to participate in a track meet.

Trampoline—develops maximum proficiency in performance on the trampoline.

Volleyball—skills, team strategy, tournaments, and game variations.

Wrestling—basic skills and practice in the techniques of wrestling.

Complete uniform and towel are furnished by the Department of Physical Education, except that gym shoes and swimming caps are provided by the student.

Since the place of the first meeting of many classes is not the same as that listed in the class schedule, students should check bulletin boards in the men's and women's gymnasias.

No refund on the bowling fee will be made after the final date for filing study lists.

Letters and Science List.—Courses, 1, 130, and 139 are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

The departmental major, leading to the degree of Bachelor of Science in physical education, offers the opportunity for the following specializations:

1. Physical Education.

Students of physical education will pursue course work designed to develop and integrate concepts of human movement (kinesiology) and an allied field of inquiry, either psychology, sociology, or zoology. With the exception of the choice of one of the three allied fields and with the exception of the flexibility offered in the selection of certain courses in areas of specialization within the major, all undergraduate students will complete the same major course work leading to the B.S. degree.

Upon the completion of the undergraduate degree the student has several options. He may either: (1) Complete the fifth year to meet the California State Teaching Credential requirements; (2) proceed directly toward completion of the requirements for the M.S. degree; (3) work concurrently toward both the M.S. degree and the teaching credential; (4) proceed directly toward the Ph.D. degree in the allied field of inquiry; or, (5) proceed toward the Ed.D. degree in the School of Education.

Students intending to major in physical education should confer with a departmental adviser before registration.

In addition to the major in physical education each student must select an allied field of inquiry during his first year in the program. The alternatives are: (1) psychology; (2) sociology; or, (3) zoology. Transfer from one allied field to inquiry to another may be done at any time with the consent of an adviser and completion of required courses in the selected field.

Preparation for the Major.—The student will need to meet A to G requirements of the College of Letters and Science. Some courses included here do satisfy the criteria for both.

Each student will be expected to participate in a proficiency-skills test to determine strengths and weaknesses in required activity areas. Students requiring additional instruction will be referred to the appropriate activity courses until an acceptable level of performance is attained.

Physical Education courses—1, 4A-B-C-D, 10.

One of the following groups of related and allied field courses.

Plan I. (Allied Field: Psychology). Chemistry 1A or 2A; Sociology 1, Zoology 15, 25; Psychology 1A, 1B; Public Health 44.

Plan II. (Allied Field: Sociology). Chemistry or Physics or Mathematics; Zoology 15, 25; Psychology 1B; Public Health 44; Anthropology 2; Sociology 1, 12, 18.

Plan III. (Allied Field: Zoology). Chemistry 1A, 1B, 5A, 8; Physics 2A, 2B; Zoology 1A, 1B; Public Health 44; Psychology 1B; Sociology 1.

The Major.—Physical Education courses—110A, 110B, 120, 148, at least 3 units from each of two groups: (1) P.E. 114, 116, 118; (2) P.E. 124, 136, 160, 162A-I, 170; (3) P.E. 191, 193, 199.

Plan I. (Allied Field: Psychology). Psychology 105, 106A, 134, 137, one

course from each of three groups: (1) Psychology 148, 168; (2) Psychology 145, 147; (3) Psychology 108, 110, 112, 113, 161, 185, 187.

Plan II. (Allied Field: Sociology). Sociology 117, one course from each of three groups: (1) Sociology 128, 131; (2) Sociology 135, 143, 144, 182, 189; (3) Sociology 161, 162; one elective from an upper division Anthropology or Sociology course, or, from Political Science 166, 171, 172, 181, 186.

Plan III. (Allied Field: Zoology). Zoology 101A; two electives from Zoology 101B, 106, 109A, 109B, 118A, 122, 130A, 134.

2. Physical Therapy.

Affiliation Plan (leading to degree and certificate). This program includes three years of University work (90 units) and a fourteen-month course at the Children's Hospital School of Physical Therapy*, which is affiliated with the University. The hospital work, which is completed in the senior year, is accepted in fulfillment of the residence requirement provided 24 units have been completed in the University of California, Los Angeles, immediately prior to study at the Children's Hospital School of Physical Therapy. Students completing the combined program will receive the degree of Bachelor of Science and the Certificate in Physical Therapy.

Preparation for the Major.—Courses 43; P.H. 44; Chemistry 24; Physics 10; Zoology 15, 25; Psychology 1A, 1B or 33; plus 12 units of social science.

The Major.—Courses 110A–B; and the fourteen-month course at the Children's Hospital School of Physical Therapy. The Hospital program includes courses in anatomy, pathology, psychology, electrotherapy, hydrotherapy, massage, therapeutic exercise, physical therapy (as applied to medicine, neurology, orthopedics, surgery), ethics and administration, electives recommended by the American Medical Association and the American Physical Therapy Association, and clinical practice. A maximum of 30 units will be allowed for completion of the Hospital program.

3. Recreation.

No freshmen students will be admitted to the Recreation Major during the 1963–1964 Academic Year. This does not apply to transfer students.

This major is designed to develop leaders in recreation with a sound general education, and an insight into the social responsibilities of community agencies.

Preparation for the Major.—Physical Education 1, 23, 43; P.H. 44; Psychology 1A; Sociology 1; Life Sciences 1A–1B.

The Major.—At least 36 units of upper division courses, including Physical Education 132, 139, 140, 141, 142A, 143, 144; Dance 155, 190C–190D; and electives selected from Art 330; Business Administration 152; Education 110A; Psychology 145A–145B, 147; Sociology 126, 143; Physical Education 138, 330; Theater Arts 118A.

* Students completing the three-year University program are not assured admission to the Children's Hospital School of Physical Therapy. When the number of qualified applicants exceeds the available facilities, selection of students will be made on the basis of scholarship and personal qualifications, as determined from the transcript of record, examination, and by personal interview.

Teaching Minor in Physical Education

Not less than 23 units of coordinated courses, at least 6 of which are in the upper division. All courses must be approved by an adviser in the Department of Physical Education. For requirements, consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

The Minor in Recreation

Not less than 20 units of coordinated courses, at least 6 of which are in upper division. All courses must be approved by a recreation education adviser in the Department of Physical Education.

Courses: Physical Education 23, 43; Sociology 1; Psychology 1A; Physical Education 132, 138, 139, 140, 141, 142A, 144, 190C-190D, 199.

Requirements for the General Secondary Credential

Students may complete requirements for the general secondary credential with a major in physical education. For the general requirements, consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION. For more specific information, consult the Department of Physical Education.

Admission to Graduate Status

Students seeking admission to graduate status for work in the Department of Physical Education will be expected to meet the general requirements for admission to the University and the Graduate Division, as described on page 161. If there are questions as to the adequacy of the student's undergraduate preparation, consultation with the department in person or by mail is advised.

Requirements for the Master's Degree

The degree of Master of Science is awarded with concentrations in physical education or recreation. For the general requirements, see pages 162-165.

The graduate program emphasizes the declaration of a central problem area and a plan of work and related courses for its investigation rather than the accumulation of units to or beyond the minimum. Study under Plan I or Plan II (see page 164), is available.

The student is expected to have an initial interview with the departmental graduate studies chairman and to consult a departmental graduate adviser at the outset in order to plan his program. Two courses, Physical Education 250 and Physical Education 275, are required of all candidates. In addition, Physical Education 276 is required of all students following Plan I, and Physical Education 299 is required of all students following Plan II for the master's degree. The concentrations in physical education or recreation include other course requirements with which the student will become acquainted in conference with his adviser.

The current graduate offerings in adapted physical education for the Master of Science degree in Physical Education meet the eligibility requirements for taking the examination for certification in corrective therapy as determined by the Association for Physical and Mental Rehabilitation.

Requirements for the Degree of Doctor of Education

The Department of Physical Education participates with the School of Education in offering a program leading to the degree of Doctor of Education. A student considering this program should communicate with the Dean

of the School of Education in this regard. For admission and program requirements see pages 144 and 168. In addition consult the UCLA ANNOUNCEMENT OF THE SCHOOL EDUCATION. Specific information as to the degree should be obtained by correspondence or in conferences, well in advance of beginning course work, with the Dean of the School of Education and the Chairman of the Committee on Graduate Studies, Department of Physical Education.

Thesis Seminar for M.S. degree, Plan I. (No credit), I, II.

Comprehensive Study Group for M.S. degree, Plan II. (No credit), I, II.

Lower Division Courses

1. Physical Education Activities (Men and Women). (½) I, II.

Classes meet for a total of ninety minutes of actual instruction time weekly; these may include two or three meetings per week dependent upon the nature of the activity. Section assignments are made by the department. Only 4 units are accepted toward a degree. Students whose physical condition indicates the need for modified activity are referred to adapted physical education classes. Consult SCHEDULE OF CLASSES for complete list of activities. (Special equipment and course fee are required for certain activities. Information regarding these activities may be obtained from the department at the time of registration, or see pages 476-477 of this bulletin.)

2. Fundamentals of Human Performance (Men and Women). (1) I, II.

Required for Freshmen students in the College of Engineering. Lecture, one hour; laboratory, two one-half hour sessions.

A scientific study of the principles of physical conditioning and factors limiting human performance. Laboratory experiences include general body conditioning and an introduction to a variety of sports. Students are encouraged to obtain a high degree of proficiency in a minimum of two self-chosen activities.

4A-B-C-D. Fundamental Skills and Designs in Human Movement. (1-1-1-1)

Four hours, discussion, laboratory.

Prerequisite: course 4A—concurrent enrollment in P.E. 10.

4B-C-D, consent of instructor.

10. An Introduction to Kinesiology. (3) I, II.

Open only to students with concurrent enrollment in P.E. 4A.

Basic concepts in the nature of human movement, the laws of its development and the interactions of its variables.

Upper Division Courses

*101. Fundamentals of Kinesiology. (3) I, II.

Four hours, lecture and laboratory.

Not open to students who have completed course P.E. 10.

Elements of human movement, basic factors affecting its development; the interaction of its variables and its relationships to allied fields.

†102. Adapted Physical Education. (3) I, II.

Prerequisite: course 100.

Concerned with growth and developmental patterns with implications for special and regular physical education programs. Includes an analysis of postures and divergencies, with procedures for prevention and correction within the public schools.

110A-B. Analysis of Human Movement. (3-3) I, II.

Prerequisite: Zoology 15, 25, P.E. 10 or 101, or consent of instructor.

The study of the analysis and performance of human movement emphasizing effects of both individual and environmental variables.

* Not to be offered during the 1963-1964 academic year.

† Not to be offered after 1963-1964 academic year.

***114. Adapted Physical Education. (3) I.**

Four hours, lecture and laboratory.

Prerequisite: P.E. 110A-B and consent of instructor.

Adaptation of movement programs for the physically handicapped.

116. Motor Reeducation. (3) II.

Prerequisite: P.E. 110A-B, P.E. 120, consent of instructor.

Exploration of theories pertaining to motor reeducation.

118. Conditioning for Optimum Performance. (2) I.

Four hours, lecture and laboratory.

Prerequisite: P.E. 110A-B and consent of instructor.

Identification of theories and principles of conditioning underlying optimal performance.

***120. Determinants of Movement Behavior. (3) I, II.**

Prerequisite: Psychology 1B, Sociology 1 or 101, consent of instructor.

The bases and process of movement development with emphases upon individual and societal differences.

124. Guidance in Physical Education. (2) II.

Prerequisite: consent of instructor.

Responsibilities of personnel and appropriate tools and techniques for use in guidance in physical education.

130. History and Principles of Physical Education. (2) I, II.

An historical analysis of the forces and factors affecting programs of physical education. Philosophical bases are developed from which basic principles are evolved to serve as guides in the profession.

131. Administration of Physical Education. (3) I, II.

An analysis and study of the underlying philosophy, principles, policies, and procedures of administration as applied to physical education. Legal aspects and the interrelationships with the general school curriculum at the local, state, and national levels are considered.

132. Conduct of the Program of Sports. (2) I, II.

Section 1. Women physical education majors.

Section 2. All others.

Prerequisite: for women physical education majors, courses 130, 326A, and 326B, or consent of the instructor; no prerequisite for recreation majors.

Principles and policies underlying the program of sports in the secondary schools and community centers.

***136. Sports in American Life. (3) II.**

Prerequisite: consent of instructor.

Heritage and interrelationships of sports within American culture emphasizing issues, problems and trends.

***148. History of Physical Education in the United States. (3) I, II.**

Prerequisite: consent of instructor.

Historical development of physical education.

152. Organization of Public Performances. (2) I, II.

Section 1. Women physical education majors.

Section 2. Dance majors.

Purpose, sources of materials, production procedure for folk festivals, dance recitals, and other special events.

***160. Sports Programs. (2) I, II.**

Prerequisite: consent of instructor.

Principles and policies in the management of sports programs and special events.

* Not to be offered during 1963-1964 academic year.

***162A-I. Advanced Analysis of Sports. (One unit each)**

Two hours, lecture and laboratory.

Prerequisite: consent of instructor.

Analysis of strategy and skill with application of principles of movement. A—Aquatics (Coed). I; B—Basketball (Men). I; C—Field Sports (Women). I; D—Football (Men). I; E—Baseball (Men). II; F—Gymnastics (Coed). II; G—Team Sports (Women). II; H—Racquet Sports (Coed). II; I. Track and Field (Men). II.

***170. Planning and Management of Physical Education. (2) I, II.**

Prerequisite: upper division standing and consent of instructor.

Principles and policies applied to the unique organizational problems of physical education.

190A-190B. Field Work in Rehabilitation. (3 units each)

Prerequisite: course 102 or consent of the instructor.

Experience in public, private, and/or voluntary agency programs.

191. Measurement. (3) I, II.

Prerequisite: consent of instructor.

Introduction to the scientific measurement and evaluation in human movement.

193. Research Instrumentation. (2) I, II.

One hour lecture, two hours laboratory.

Prerequisite: senior standing and consent of instructor.

Familiarization with the theory and uses of scientific instruments for data collection in movement research.

199. Special Studies. (1-3) I, II.

May be repeated by honor students for a total of twelve units.

Prerequisite: senior standing and consent of the instructor.

Graduate Courses

201. Secondary School Curriculum in Physical Education. (2) I, II.

(Required of fifth-year students preparing for the general secondary credential.)

230. The Elementary School Program in Health, Physical, and Recreation Education. (2) I.

Prerequisite: consent of the instructor.

235. Advanced Evaluation Procedures. (2) II.

Prerequisite: course 185 or consent of the instructor.

250. Changing Perspectives in the Profession. Seminar. (2) I, II.

Seminar and group conferences. Prerequisite: consent of the instructor.

256. Administrative Problems in Physical Education. Seminar. (2) I.

Prerequisite: consent of the instructor.

257. Administrative Problems in Recreation. Seminar. (2) II.

Prerequisite: consent of the instructor.

258. Problems in Adapted Physical Education. (2) II.

Prerequisite: consent of the instructor.

259. Intertherapy Education. Seminar. (2) I.

Prerequisite: consent of the instructor.

The scope, functions, and interrelationships of physical therapy, occupational therapy, recreational therapy, and adapted physical education.

265. Foundations of the Curriculum. Seminar. (2) I.

Prerequisite: consent of the instructor.

* Not to be offered during 1963-1964 academic year.

266. Social Bases of the Profession. Seminar. (2) II.

Prerequisite: consent of the instructor.

Analysis of the social forces and relationships bearing on the fields of health, physical education, and recreation.

267. Physiological Bases of the Profession. Seminar. (2) I.

Prerequisite: consent of the instructor.

275. Seminar in Health, Physical, and Recreation Education. (2) I, II.

Prerequisite: consent of the instructor.

An exploration of research in the profession and a critical evaluation of needed studies through survey of literature and other sources leading to the identification and analysis of individual research problems.

276. Methods of Research in Health, Physical, and Recreation Education. Seminar. (2) I, II.

Prerequisite: course 275 or consent of the instructor.

The scientific methods and techniques of research in the organization, solution, and writing of theses, dissertations, and other research studies and projects.

280. Research in Health, Physical, and Recreation Education. Seminar. (2) I, II.

Prerequisite: consent of the instructor.

Individual and group analysis of student research problems in progress through discussion, interpretation, and critical evaluation of research methods and resources.

299. Independent Study. (2-4) I, II.

Prerequisite: course 275 or the equivalent and consent of the instructor.

Professional Courses in Method

326A-326B. Principles of Teaching Sports (Women). (2-2) Yr.

Must be taken concurrently with course 327A-327B.

A study of methods, curricular materials, and evaluation procedures as related to the teaching of sports in the secondary schools.

330. Health, Physical, and Recreation Education in the Elementary School. (3) I, II.

Prerequisite: upper division standing, course P.H. 44, or the equivalent, Education 110A and consent of the instructor.

Prerequisite to all supervised teaching for the kindergarten-primary or general elementary credentials.

370. Teaching of Physical Education. (3) I, II.

Two hours lecture, three hours laboratory.

Prerequisite: P.E. 110B or concurrent enrollment, senior standing and consent of instructor.

Class management, organization of teaching materials and methods of subject-matter presentation.

†371A-B-C-D. Technique of Teaching Activities (Men). (3-3-3-3)

Lecture, two hours; laboratory, four hours.

Prerequisite: upper division standing and consent of instructor.

A critical analysis of the methods and problems in teaching and coaching. Application is made to the secondary school teaching situation.

371A. Basketball and Speedball, II.

371B. Baseball and Volleyball, I.

371C. Football, I.

371D. Track and Field, Tumbling, Apparatus, II.

† Not to be offered after the 1963-1964 academic year.

RECREATION

Lower Division Courses

23. Recreational Activities. (2) I, II.

Fundamental skills and knowledges in a variety of social-recreational activities, with opportunity for planning, participation, and leadership in music, dramatics, games and sports, camping, arts and crafts, dance, informal gatherings, and hobbies.

43. Recreation for the Exceptional. (2) I, II.

Recreational activities as a means of rehabilitation for the exceptional child and adult in community or hospital. Includes group organization, teaching techniques, and modification of activities. Designed for social workers, nurses, therapists, recreation leaders, and teachers.

Upper Division Courses

*138. Recreation and the School. (2) I, II.

The role of the school and its staff in the total community recreation program.

139. Principles of Recreation. (3) I, II.

Philosophy and foundations of recreation, the environmental factors influencing it, and the basic principles underlying community organization and professional practice.

140. Organization of Community Recreation. (3) II.

Prerequisite: course 139 or consent of the instructor.

The organization of recreation in the community, with implications for the administration of public and voluntary agency programs.

141. Club Activities. (2) I.

The organization of clubs with emphasis upon leadership requirements and program planning to meet needs and interests of groups.

142A. Outdoor Education. (2) I.

Principles and practices of camping and outdoor education for the concepts underlying the use of land and water resources for recreation.

142B. Outdoor Education Leaderships. (2) II.

Prerequisite: course 142A or consent of the instructor.

Camping and outdoor education programs of public and private agencies and the role of the counselor as a leader and teacher. Field trips required.

143. Problems in Group Work. (2) II.

Principles and procedures of group work in recreation.

144. Recreation Survey. (2) I.

An examination of the fields and methods of recreation research, with special emphasis on the design and administration of the community recreation survey.

190C-190D. Field Work in Recreation. (3 units each)

Prerequisite: course 140 or consent of the instructor.

Experience in public, private, and/or voluntary agency programs.

PHYSICS

(Department Office, 115 Physics Building)

Alfredo Baños, Jr., Dr. Eng., Ph.D., *Professor of Physics*.

Hans E. Bömmel, Ph.D., *Professor of Physics*.

† Robert J. Finkelstein, Ph.D., *Professor of Physics*.

* Not to be given, 1963-1964.

† Absent on leave, 1963-1964.

John B. Gruber, Ph.D., *Assistant Professor of Physics.*

Roy P. Haddock, Ph.D., *Assistant Professor of Physics.*

Richard E. Norton, Ph.D., *Assistant Professor of Physics.*

†David I. Paul, Ph.D., *Assistant Professor of Physics.*

Philip Pincus, Ph.D., *Assistant Professor of Physics.*

Peter Schlein, Ph.D., *Assistant Professor of Physics.*

William Slater, Ph.D., *Assistant Professor of Physics.*

Edward Teller, Ph.D., Sc.D., *Professor of Physics at Large.*

Letters and Science List.—All undergraduate courses in physics except 370 are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major in Physics.—Required: Physics 1A, 1B, 1C, 1D (to be taken in the order listed), or, with the consent of a departmental adviser, Physics 2A, 1C, 1D or Physics 2A, 2B; Chemistry 1A, 1B; Mathematics 5A, 5B, 6A, 6B; or Mathematics 1 (or the equivalent special examination—see prerequisites for Mathematics 3A on page 403), 3A (taken concurrently with Mathematics 1 or after passing of the special mathematics examination—see prerequisites for Mathematics 3A on page 403), 3B, 4A, 4B; or their equivalents.

The Major in Physics leading to the degree of Bachelor of Science.—Effective fall semester 1963, the Department of Physics will offer a single program

† Absent on leave, 1963–1964.

of instruction leading to the B.S. degree only for all entering and transfer students. The following upper division courses in physics are required: 105, 110A, 110B, 112, 115, 124A, 140 plus six elective units of other upper division lecture courses and two of the following laboratories: 108C, 113C, 114C, 116C, 116D, 124C but not *both* 116C and 116D. Required: Mathematics 110AB (or Mathematics 110C, if preceded by Mathematics 6B) and Mathematics 110D or an alternate approved by a Physics Department adviser. An average grade of C or higher must be maintained in the above courses as well as a C average in all courses counted toward the major. Recommended: a reading knowledge of French, German and/or Russian. This major leads to the degree of Bachelor of Science in the College of Letters and Science.†

*The Major in Physics leading to the degree of Bachelor of Arts.**—The following upper division courses in physics, representing at least one course in each of the main subjects in physics, are required: 105, 107, 107C, 108B, 108C, 110, 112, 114A, 121, 113 or 124A, 113C or 114C or 124C. An average grade of C or higher must be maintained in the above courses. Required: Mathematics 110AB or 110C or 119A. Strongly recommended: Mathematics 122A–122B. Recommended: a reading knowledge of German and French. This major leads to the degree of Bachelor of Arts in the College of Letters and Science.‡

*Preparation for the Major in Applied Physics.**—Same as preparation for the major in physics. See above.

*The Major in Applied Physics.**—One of the following groups of courses prescribed to give a specialization in some particular field of physics is required.

(a) *Specialization in electronics*: Physics 105, 107, 107C, 108B, 108C, 110, 112, 114A, 116A, 116B, 116C, 116D, 121, 124A.

(b) *Specialization in spectroscopy*: Physics 105, 107, 107C, 108B, 108C, 110, 112, 113, 113C, 114A, 115, 116A, 116C, 121.

(c) *Specialization in acoustics and electronics*: Physics 105, 107, 107C, 108B, 108C, 112, 114A, 114B, 114C, 116A, 116B, 116C, 116D, 121.

(d) *Specialization in chemical physics*: Physics 105, 107, 107C, 108B, 108C, 112, 113, 113C or 124C, 116A, 121, 124A, Chemistry 8, 110A, 110B, 111.

(e) *Specialization in nuclear physics*: Physics 105, 107, 107C, 108B, 108C, 112, 113, 113C, 114A, 116A, 116C, 121, 124A, 124B, 124C.

(f) *Specialization in atmospheric physics*: Physics 105, 107, 107C, 108B, 108C, 110, 112, 113, 114A, 116A, 116C, 121, 124A; Meteorology 104. Meteorology 131A is recommended as an elective.

An average grade of C or higher must be maintained in the above courses. Also required: Mathematics 110AB, 110C, or 119A. Recommended: a reading knowledge of German and French. This major leads to a degree of Bachelor of Science in the College of Letters and Science. The College of Letters and

* This major is being discontinued and no new students will be accepted. Students already enrolled in this program must complete their degree requirements by June, 1965.

† A mimeographed brochure giving more detailed information than is contained in this bulletin, is obtainable from the office of the Department of Physics.

Science requires for the Bachelor of Science degree in applied physics 6, not 12, upper division units outside of physics.

Requirements for the General Secondary Credential

For the requirements, consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION; the credential is offered with the field major of physical sciences.

Requirements for the Degree of Master of Science

For the general requirements, see pages 162-165. Course 220A and one course from each of the following two groups: (a) 210A, 212, 215, or 231; (b) 208, 213, 214, 221A, or 224A, are required of all candidates. In addition, an over-all B average is required for all physics courses taken after the student has been admitted to graduate status.†

Requirements for the Degree of Doctor of Philosophy

For the general requirements, see pages 165-169. Candidates should complete the foreign language reading requirements during the first year of graduate work. Acceptable languages are French, German, and Russian. The qualifying examinations for candidates for the Ph.D. degree in physics include (1) a written comprehensive examination; (2) final written examinations in each of the four courses 220A, 221A, 210A, and 212; (3) a preliminary departmental oral examination; and (4) a special examination in the student's chosen field conducted by a committee appointed by the Graduate Council, upon nomination by the departmental chairman, to examine the student and guide him in his thesis project. For more detailed information, see Department of Physics brochure.†

Lower Division Courses

Physics 1A, 1B, 1C, and 1D form a sequence of courses in general physics for major students in physics and applied physics. All, or part, of the sequence is also required or recommended as first choice for major students in: astronomy, chemistry, engineering, meteorology, and certain interdepartmental fields of concentration. Students in departments other than those listed and with correct prerequisites may elect course 1A and any other courses in the sequence. (Course 1A is prerequisite to any of the other courses in the sequence.)

Physics 2A and 2B form a one-year sequence of courses in general physics which is required of students specializing in the following fields: agriculture, bacteriology, geology, medical technology, pre dentistry, premedicine, preop-tometry, prepublic health, and zoology. It is an alternate sequence (but only on approval of the appropriate departmental adviser) for major students in physics, applied physics, astronomy, chemistry, and meteorology. Students in

† A mimeographed brochure, giving more detailed information than is contained in this bulletin about the examinations required of candidates for all degrees in physics and other information of interest to graduate students in physics, is obtainable from the office of the Department of Physics.

other departments and with correct prerequisites may elect 2A or 2A and 2B. (Course 2A, or 1A, is always prerequisite to course 2B.)

Physics 10 is a one-semester, nonlaboratory course which surveys the whole field of general elementary physics. It is designed primarily for the liberal arts student.

In general, not more than 15 units of credit will be given for any amount of lower division work. Credit in excess of 15 units will be given only in exceptional cases, when approved by the department.

1A. General Physics: Mechanics of Solids. (3) I, II.

Mr. Baños, Mr. Slater, Mr. Stork

Lecture and demonstration, three hours; laboratory, two hours. Prerequisite: section 1: high school physics or chemistry; Mathematics 3A or 5A taken concurrently with Physics 1A. Section 2: high school physics or chemistry; Mathematics 5A, 3A or equivalent completed. Students who have credit for Physics 2A will be limited to one unit of credit for Physics 1A.

1B. General Physics: Mechanics of Fluids, Heat, and Sound. (3) I, II.

Lecture and demonstration, three hours; laboratory, two hours. Prerequisite: course 1A (or 2A on approval of an adviser); Mathematics 3A or 5A completed; Mathematics 3B or 5B taken concurrently with Physics 1B. Students who have credit for Physics 2A will be limited to one unit of credit for Physics 1B.

1C. General Physics: Electricity and Magnetism. (3) I, II. Mr. MacKenzie

Lecture and demonstration, three hours; laboratory, two hours. Prerequisite: course 1A (or 2A on approval of an adviser); Mathematics 3B or 5B completed; Mathematics 4A or 6A taken concurrently with Physics 1C.

Upper division credit will be allowed to students who are not majors in physics, who take the course while in the upper division, and who do not have upper division credit for Physics 1D or are not taking Physics 1D for upper division credit. Students who have credit for Physics 2B will be limited to 2 units of credit for Physics 1C.

1D. General Physics: Light and Modern Physics. (3) I, II. Mr. Prowse

Lecture and demonstration, three hours; laboratory, two hours. Prerequisite: Physics 1A and 1C (or 2A-2B on approval of an adviser); Mathematics 4A or 6A completed; Mathematics 4B or 6B taken concurrently with Physics 1D.

Upper division credit will be allowed to students who are not majors in physics, who take the course while in the upper division, and who do not have upper division credit for Physics 1C or are not taking Physics 1C for upper division credit. Students who have credit for Physics 2B will be limited to 2 units of credit for Physics 1D.

2A. General Physics: Mechanics, Heat, and Sound. (4) I, II. Mr. Watson

Lecture and demonstrations, four hours; laboratory, two hours. Prerequisite: three years of high school mathematics, or two years of high school mathematics and one 2- or 3-unit college course in algebra or trigonometry. Students who have credit for Physics 1A or 1B will be limited to 2 units of credit for Physics 2A. Physics 2A is not open for credit to students who have credit for Physics 1A and 1B.

2B. General Physics: Electricity, Magnetism, and Light. (4) I, II.

Mr. Gruber

Lecture and demonstrations, four hours; laboratory, two hours. Prerequisite: course 2A or 1A. Students who have credit for Physics 1C or 1D will be limited to 2 units of credit for Physics 2B. Physics 2B is not open for credit to students who have credit for Physics 1C and 1D.

10. General Physics. (3) I, II.

Mr. Kaplan

Prerequisite: high school algebra and plane geometry.

An introductory survey course in classical and modern physics designed primarily for liberal arts students.

Students enrolled in this course who desire laboratory work in lower division physics are referred to course 21 (10).

21. Supplementary Laboratory Courses in General Physics. (1 unit each; maximum of 2) Lower Division Staff (Mr. Watson in charge)

These courses, except 21 (10), are intended for students entering the University with partial credit in general physics and are part of the regular work of courses 1A, 1B, 1C, 1D, 2A, and 2B. Course 21 (10) is intended for students who wish a laboratory supplement to physics 10. Students should enroll under the appropriate one of the following numbers:

- 21 (1A). Mechanics of Solids. I, II.
- 21 (1B). Mechanics of Fluids and Sound. I, II.
- 21 (1C). Electricity and Magnetism. I, II.
- 21 (1D). Light and Modern Physics. I, II.
- 21 (2A). Mechanics, Heat, and Sound. I, II.
- 21 (2B). Electricity, Magnetism, and Light. I, II.
- 21 (10). General Physics. I, II.

41B. General Physics: Heat. (1) I, II.

Prerequisite: Physics 4A (Berkeley) or equivalent; Mathematics 3A or 5A or equivalent; Mathematics 3B or 5B taken concurrently with Physics 41B.

Equivalent to a part of 1B. Students enrolled under 41B will attend lectures and laboratories of 1B which deal with heat, and will take examinations only on those portions of the course.

Upper Division Courses

Prerequisite for all upper division courses: Physics 1A, 1B, 1C, 1D, or 2A, 1C, 1D, or 2A-2B; Mathematics 5A, 5B, 6A, 6B; or 3A, 3B, 4A, 4B; or the equivalents.

105. Analytical Mechanics. (3) I, II.

Mr. Slater, Mr. Chester

The kinematics and dynamics (statics and kinetics) of particles, systems of particles, and rigid bodies.

108B. Physical Optics. (3) I.

Mr. Gruber

Prerequisite: at least one semester of upper division study.

Wave motion. Interference, diffraction, absorption, scattering and polarization of light. Crystal optics. Relativity effects in optics.

108C. Physical Optics Laboratory. (1) I.

Mr. Satten

Laboratory to accompany 108B.

†110. Electricity and Magnetism. (3) II.

Mr. Ticho

Prerequisite: courses 105 and 107, or consent of the instructor.

A survey of field theory, to include systems of charge conductors and of linear circuits, simple dielectric and magnetic media, and the formulation of Maxwell's equations.

110A. Electromagnetic Theory. (3) I, II.

Mr. Ticho, Mr. Slater

Prerequisites: courses 1C and 1D; Mathematics 110AB.

Electrostatics: Gauss' theorem, electrostatic potential, multipoles, dielectric materials, energy in the electrostatic field. Currents and current densities; Ohm's law, equation of continuity. Magnetostatics: Ampere's Law, magnetic potentials, permeable materials, energetics, Faraday's induction law. Circuit theory.

***110B. Electromagnetic Theory.** (3) I.

Mr. Ticho

Prerequisite: course 110A.

Maxwell's equations: plane wave solutions, retarded potentials, dipole radiation, antenna theory, diffraction and interference phenomena. Fresnel laws, boundary conditions, wave guides. Electrical properties of matter, birefringence. Theory of relativity.

112. Thermodynamics and Introduction to Kinetic Theory. (3) I, II.

Mr. York, ———

* Not to be given, 1963-1964.

† To be given, 1963-1964.

113. Atomic Spectroscopy. (3) II.

Mr. Satten

Prerequisite: course 115.

Black body radiation and the origin of the quantum theory. Atomic spectra and quantum theoretical interpretations. Effects of electron and nuclear spins. X-ray spectra. Zeeman and Stark effects.

113C. Spectroscopy Laboratory. (1) II.

Mr. Satten

Prerequisite or concurrent: course 113.

114A. Mechanics of Wave Motion and Sound. (3) I, II.

Prerequisite: course 105.

Mr. Rudnick, ———

Vibration of particles and elastic bodies; mechanical sound sources; propagation in elastic media.

114B. Mechanics of Wave Motion and Sound. (3) II.

Mr. Leonard

Prerequisite: course 114A or the equivalent.

Propagation of sound in gases; reflection, refraction, interference, and diffraction of sound; acoustic impedance; applications.

114C. Mechanics of Wave Motion and Sound Laboratory. (2) II.

Mr. Leonard

Prerequisite: courses 107 and 107C completed, and 114B completed or taken concurrently, or consent of the instructor.

115. Elementary Quantum Mechanics. (3) I.

Mr. Saxon

Prerequisite: course 105; Mathematics 110AB or equivalent.

The classical background, basic ideas and methods of quantum mechanics.

116A. Electronics. (3) II.

Mr. MacKenzie

Prerequisite: course 107 or the equivalent.

Thermionic and photoelectric emission. Physics and characteristics of electronic devices, including vacuum tubes, gas tubes, and semiconductors; and associated circuits.

116B. Electronics. (3) I.

Mr. Leonard

Prerequisite: course 116A or the equivalent.

Wave filters, lines, and wave guides; ultra high frequency generators and measuring equipment.

116C. Electronics Laboratory. (2) II.

Mr. MacKenzie

Laboratory to accompany 116A.

116D. Electronics Laboratory. (2) I.

Mr. Leonard

Laboratory to accompany 116B.

117. Hydrodynamics. (3) I.

—————

119. Kinetic Theory and Solid State. (3) II.

Mr. Richardson

Prerequisite: course 112 or the equivalent.

121. Atomic Physics. (3) I, II.

—————

The atomic nature of matter and atomic composition. The propagation of electromagnetic waves and their interaction with matter. Special relativity. Atomic spectra and electron distribution. Basic concepts of wave mechanics.

124A. Nuclear Physics. (3) I.

—————

Prerequisite: course 115 or consent of the instructor.

Basic nuclear concepts. The origin and interaction with matter of alpha, beta, and gamma rays. Nuclear forces. Neutrons. Nuclear disintegration. Detection equipment. Particle accelerators. Fission.

124B. Nuclear Physics. (3) II.

—————

Prerequisite: course 124A or consent of the instructor.

Elements of wave mechanics, two nucleon systems, theory of alpha decay, nuclear forces, nuclear spin and magnetism, nuclear models, cosmic rays and subnuclear particles.

124C. Atomic and Nuclear Physics Laboratory. (1) I. _____

Prerequisite: course 121. Laboratory to accompany course 124A.

Electron diffraction. X-ray diffraction. Beta-ray spectroscopy. Neutron absorption. Artificial radioactivity. Rutherford scattering of alpha-particles and other experiments.

140. Solid State Physics. (3) I, II.

Mr. Bömmel

Prerequisite: course 115.

Classification of solids. Crystal structures and classes. Mechanical, thermal, electrical and magnetic properties including ferromagnetism and superconductivity. Imperfections in crystals.

198. Special Courses in Physics. (1-6) I, II. The Staff (Mr. Saxon in charge)**199. Special Studies in Physics. (1-5) I, II.**

The Staff (Mr. Richardson in charge)

Prerequisite: senior standing and consent of the instructor.

Graduate Courses***208. Advanced Classical Optics. (3) I.** _____

Recommended: course 210A or its equivalent.

Propagation of light waves in isotropic and anisotropic media on the basis of electromagnetic theory. Macroscopic and microscopic crystal and molecular optics.

210A. Electromagnetic Theory. (3) II. _____

An advanced course on electromagnetic theory based on the vector treatment of Maxwell's equations. The vector and scalar potentials, the Hertz polarization potentials, energy considerations, the electrostatic and magnetostatic fields, and a general discussion of plane homogeneous waves in unbounded, isotropic media. Boundary value problems.

***210B. Electromagnetic Theory. (3) I.**

Mr. Baños

Theory of wave propagation in cylindrical structures, with particular applications to wave guides and coaxial lines. The general theory of electromagnetic cavity resonators from the point of view of the Lagrangian formulation. Spherical waves and applications to the general problem of radiation. Introduction to relativistic electrodynamics.

212. Thermodynamics. (3) I.

Mr. Moszkowski

213. Molecular Spectroscopy. (3) I.

Mr. Satten

Prerequisite: a course in quantum mechanics.

The theory of molecular structure and spectra. Applications to optical, infrared, Raman, and microwave spectroscopy.

214. Advanced Acoustics. (3) I. _____**215. Statistical Mechanics. (3) II.** _____**217. Hydrodynamics. (3) II.**

Mr. Baños

Not open for credit to students who have credit for Meteorology 217.

218. Magnetohydrodynamics. (3) II.

Mr. Baños

An advanced course in hydromagnetics and plasma dynamics, starting, respectively, from conservation laws and from the Boltzmann equation. Stability considerations, force-free configurations, plasma oscillations, magneto-hydrodynamic waves, hydromagnetic shock, and hydromagnetic turbulence.

220A. Theoretical Mechanics. (3) I. _____***220B. Theoretical Mechanics. (3) II.** _____**221A. Quantum Mechanics. (3) II.** _____

(Numbered 220C prior to 1960-1961.)

* Not to be given, 1963-1964.

221B. Quantum Mechanics. (3) I.
(Numbered 220D prior to 1960-1961.)

Mr. Fronsdal

224A. Nuclear Physics. (3) I.

Mr. Richardson

An introduction to our present knowledge of the nucleus with particular emphasis on a critical evaluation of the evidence on the two-nucleon interaction. The properties of pi mesons are discussed and correlated with possible theories of nuclear forces.

224B. Nuclear Physics. (3) II.

Mr. Moszkowski

An advanced course in the structure of complex nuclei and nuclear radiation.

230. Relativistic Quantum Mechanics. (3) II.

Mr. Norton

An advanced course in the application of quantum mechanics to relativistic particles. A detailed discussion is given of the quantum theory of radiation, the Dirac equation, the interaction between charged particles and photons, scattering of charged particles, Feynman diagrams and renormalization problems.

231. Methods of Theoretical Physics. (3) I.

Mr. Bafios

An advanced course in which the general mathematical methods employed in the solution of boundary value problems arising in all chapters of theoretical physics are systematically developed and coordinated. A detailed discussion is given of the use of Green's functions, characteristic functions, variational methods, conformal mapping, and of integral equations the solution of which is based on the theory of the Fourier and Laplace transforms.

232. Relativity. (3) II.

The special and general theories of relativity with application to elementary particle physics and cosmology.

260. Seminar: Problems in Elementary Particle Physics and Field Theory.

(1-3) I, II.

Mr. Fronsdal, Mr. Norton

261A. Seminar in Special Problems in Theoretical Physics. (1-3) I, II.

261B. Seminar in Special Problems in Theoretical Physics. (1-3) II.

262A. Seminar in Physics of the Solid State. (1-3) I.

262B. Seminar in Physics of the Solid State. (1-3) I, II.

Mr. Bömmel

264. Seminar in Advanced Acoustics. (1-3) II.

266. Seminar in Propagation of Waves in Fluids. (1-3) II.

Mr. Rudnick

268. Seminar in Atomic Physics. (1-3) II.

Mr. Gruber

269A. Seminar in Nuclear Physics. (1-3) I, II.

Mr. Haddock, Mr. York

269B. Seminar in Elementary Particle Physics. (1-3) II.

281. Experimental Techniques in Modern Physics. (3) II.

Mr. Richardson

Essentially a laboratory course with some lectures on the theory of the techniques used. An effort is made to develop a critical research attitude on the part of the student and considerable freedom is allowed in the choice of problems to be attacked. High-vacuum technique, atomic magnetic resonance, magnetic spectrograph, electron diffraction, cloud chamber, electrical counting of particles, conduction of electricity through gases, etc.

284. Experimental Techniques in Acoustics. (2) II.

Mr. Rudnick

A laboratory course in experimental acoustics designed to train the student in the techniques and instrumentation used in modern acoustic research.

290A-290B. Research. (1-6; 1-6) Yr.

The Staff (Mr. Saxon in charge)

PHYSICAL SCIENCES

Professional Course in Methods

370. Methods and Materials for Teaching Physical Sciences. (3) II.

Prerequisite: graduate or senior standing.

Mr. Toon, Mr. Watson

Methods and materials for teaching physical sciences in secondary schools. Solution of special problems which arise in secondary school physical science courses.

PHYSIOLOGY

(Department Office, 23-238 Center for the Health Sciences)

W. Ross Adey, M.D., *Professor of Physiology and Anatomy.*

Nicholas S. Assali, M.D., *Professor of Physiology and Obstetrics and Gynecology.*

Mary A. B. Brazier, B.Sc., Ph.D., D.Sc., *Professor of Physiology, Anatomy and Biophysics and Nuclear Medicine in Residence.*

John Field, Ph.D., *Professor of Physiology and Lecturer in Medical History.*

Morton I. Grossman, M.D., Ph.D., *Professor of Physiology and Medicine in Residence.*

Victor E. Hall, M.D., *Professor of Physiology (Chairman of the Department).*

Allan Hemingway, Ph.D., *Professor of Physiology.*

Donald B. Lindsley, Ph.D., *Professor of Physiology and Psychology.*

Wilfried F. H. M. Mommaerts, Ph.D., *Professor of Physiology and Medicine and Director of the Los Angeles County Heart Association Cardiovascular Research Laboratory.*

Robert E. Smith, Ph.D., *Professor of Physiology.*

Ralph R. Sonnenschein, M.D., Ph.D., *Professor of Physiology.*

Aaron A. Cohen, M.D., *Assistant Professor of Physiology in Residence and Assistant Clinical Professor of Medicine.*

Leonard M. Linde, M.D., *Assistant Professor of Physiology and Pediatrics.*

George P. Moore, Ph.D., *Assistant Professor of Physiology.*

John F. Murray, M.D., *Assistant Professor of Physiology and Medicine.*

Sigmund T. Rich, D.V.M., *Lecturer in Physiology.*

John K. Turner, Ph.D., *Lecturer in Physiology.*

Admission to Graduate Status

Candidates for admission to graduate status in the Department of Physiology must conform to the general requirements set by the Graduate Division for admission to such status. In addition to meeting the requirements of the

Graduate Division, the students must have received the bachelor's degree in a biological or physical science or in the premedical curriculum, provided that 6 semester units of college mathematics, 8 units of physics, 16 units of chemistry (including quantitative analysis and organic chemistry), and 12 units of zoology (including comparative vertebrate anatomy) have been completed. Students will be expected to have completed courses in mathematics through calculus and in physical chemistry, or must take these in their first year of graduate work. In certain cases, at the discretion of the department, students with less than the above requirements may be admitted to graduate status, provided that all deficiencies are removed by satisfactory completion of the appropriate courses within a specified time after admission.

Requirements for the Master of Science Degree

1. General University Requirements.

Candidates for the Master of Science degree in physiology must conform to the general requirements set by the Graduate Division for this degree (pages 162-165). The candidate may elect either Plan I or Plan II as set forth in the general section on "Requirements for the Master's Degree."

2. Departmental Requirements.

Satisfactory completion of the following courses is required for the M.S. degree in physiology.

- (a) Physiology 101. (Mammalian Physiology)
- (b) Physiology 103. (Basic Neurology)
- (c) At least two of the following courses:
 - (1) Physiology 201. (Physiological Methods)
 - (2) Physiology 203. (Cellular Physiology)
 - (3) Physiology 204. (Cardiovascular Physiology)
 - (4) Physiology 205. (Physiology of Respiration)
 - (5) Physiology 206. (Gastrointestinal Physiology)
 - (6) Physiology 207. (Neurophysiology)
 - (7) Zoology 118B. (Advanced Endocrinology)

Or other such courses approved by the department.

- (d) Physiology 251A-251B. (Seminar)
- (e) Sufficient additional courses in physiology and related subjects to make a total of 20 units (Plan I) or 24 units (Plan II), including not less than 8 units (Plan I) or 12 units (Plan II) of graduate courses in physiology.
- (f) Mathematics to and including analytical geometry.
- (g) A thesis (Plan I) or a comprehensive final examination (Plan II).

Courses substantially similar in subject matter and scope may be substituted for the specific courses listed above at the discretion of the department.

All requirements for the M.S. degree may be satisfied by successful completion of three summer sessions, provided that the student has been admitted to graduate status prior to the beginning of the first summer session.

*Requirements for the Doctor's Degree**1. General University Requirements.*

Candidates for the doctorate in physiology must conform to the general requirements set by the Graduate Division for this degree pages 165-169).

*2. Departmental Requirements.**(a) Sequence of Graduate Studies.*

Each graduate student will normally pass through three phases of work in the department, each occupying approximately one year. In the *first phase*, he will ordinarily complete the basic departmental courses (Physiology 101 and 103) and as many of the other required courses as possible. As soon as he is ready to choose his area of specialization for dissertation research and the staff member who will be his supervisor, he should so inform the department chairman. At this time the department will appoint a guidance committee of staff members for him. In the *second phase*, he will complete his required courses and such additional studies as his guidance committee may require, begin work on his dissertation and prepare himself for the departmental examinations in his area. These examinations are both written and oral. When these (and the language examinations) have been successfully completed, he will take the University qualifying examination. The *third phase* will be devoted almost exclusively to completion of the dissertation.

It should be noted that the doctorate in physiology is not granted merely upon completion of routine requirements as to examinations, courses, and dissertation: fulfillment of such requirements is a prerequisite. The doctor's degree will be granted only to students who have clearly demonstrated both an adequate grasp of a broad field of knowledge and their ability to contribute to that field of knowledge by original and independent research.

(b) Course Requirements.

Three routes to the Ph.D. degree exist in this Department involving specialization in: (1) general and cellular physiology; (2) maintenance physiology (i.e., the physiology of the cardiovascular, respiratory, digestive, endocrine and excretory systems); and (3) neurophysiology.

The *first phase* is identical in these routes, the requirements ordinarily being:

- (1) Physiology 101. (Mammalian Physiology)
- (2) Physiology 103. (Basic Neurology)
- (3) Physiology 251A-251B. (Seminar)
- (4) Biophysics 101. (Elements of Medical Biophysics)
- (5) Biological Chemistry 101A and 101B, or Chemistry 108A and 108B. (General Biochemistry)
- (6) Anatomy 101 (Microscopic Anatomy) or Zoology 107 (Microanatomy)
- (7) Chemistry 109. (Physical Chemistry)
- (8) Courses in differential and integral calculus.
- (9) A course in statistical methods.

The *second and third phases* will comprise:

- (1) Any of the above courses not already completed.
- (2) Physiology 299A-299B in which dissertation research will be carried on;
- (3) Graduate courses appropriate to the student's specialization, i.e., for general and cellular physiology, Physiology 203 (2 semesters); for maintenance physiology, Physiology 204; for neurophysiology, Physiology 207, Physiology 208, Physiology 212.
- (4) Such additional courses as the student's adviser or Guidance Committee may require.
- (5) Physiology 251A-251B.

Courses substantially similar in subject matter and scope may be substituted for the specific courses listed above at the discretion of the department.

(c) *Foreign Languages.*

A reading knowledge of German and one other language of scientific importance is normally required.

Prospective candidates for the doctor's degree are responsible for completion of all technical requirements for this degree. Careful study of the requirements set by the Graduate Division (see pages 165-169 of this bulletin) will be necessary to accomplish this.

Upper Division Courses

101. Mammalian Physiology. (8) II.

Mr. Hall and the Staff

Lectures, laboratory and conferences. Prerequisite: Chemistry 1A, 1B and 8; Physics 2A and 2B; Zoology 1A and 1B; a course in microscopic anatomy; a course in gross anatomy, human or comparative; and consent of the instructor.

An analysis of the functional activities of the body as a whole and of lower levels of organization such as organ systems, organs, tissues, cells and subcellular structures, with emphasis on man. Topics include the circulation, blood, general and cellular metabolism, muscle function, respiration, digestion, kidney function, water and electrolyte balance, endocrine function, temperature regulation.

103. Basic Neurology. (3) II.

Mr. Tschirgi and the Staff

Lectures, two hours; laboratory and conference, six hours. Prerequisite: Chemistry 1A, 1B and 8; Physics 2A and 2B; Zoology 1A and 1B; a course in microscopic anatomy; a course in gross anatomy, human or comparative; and consent of the instructor. Concomitant registration in Anatomy 103 required.

A survey of the structure and function of the receptors, peripheral and central nervous system. Given jointly with the Department of Anatomy.

199. Special Studies. (1 to 6) I, II.

Mr. Hall and the Staff

Prerequisite: consent of the instructor.

Special studies in physiology, including either reading assignments or laboratory work or both, designed for appropriate training of each student who registers in this course.

Graduate Courses

201. Physiological Methods. (2) I.

Mr. Hemingway

Lecture, one hour; laboratory, two hours. Prerequisite: Chemistry 1A, 1B and 5A.

Training in the special procedures used in physiological research.

203. Cellular Physiology. (2) I, II.**Mr. Smith**

Prerequisite: consent of the instructor.

Relationship of metabolism and function in mammalian cells and consideration of factors regulating cell metabolism.

204. Cardiovascular Physiology. (2) I.**Mr. Hall**

Prerequisite: Physiology 101 and consent of the instructor.

Advanced consideration of special topics in the physiology of the circulatory system.

205. Physiology of Respiration. (2) I.**Mr. Hemingway**

Prerequisite: Physiology 101 and consent of the instructor.

Analysis of physiological mechanisms involved in respiration and its control in normal and stress situations.

206. Gastrointestinal Physiology. (2) I.**Mr. Sonnenschein**

Prerequisite: Physiology 101; and either Physiological Chemistry 101A, 101B and 101C or Chemistry 108A and 108B; and consent of the instructor.

Selected topics in normal and abnormal function of the gastrointestinal tract including mechanisms of motility, secretion, absorption and activities of the liver.

207. Neurophysiology. (2) I.**Miss Wenzel**

Prerequisite: consent of the instructor.

Seminar course designed to acquaint the student with behavioral techniques and concepts relevant to research problems encountered in modern neurophysiology, and to consider means of integrating them with neurophysiological methods.

208. Theoretical Physiology. (2) I.**Mr. Tschirgi**

Prerequisite: consent of the instructor.

A series of seminar-discussions concerning the homeostatic relationships between the organism and its environment.

210. Selected Topics in the History of Physiology. (1) I.**Mr. Field**

Lectures dealing with the historical development of scientific method and of scientific ideas in physiology.

211. Orientation in Biomedical Research. (1) I.**Mr. Hall**

Prerequisite: consent of the instructor.

A course for graduate and postdoctoral students in biomedical sciences. Lectures deal with method and logic of science, scientific writing, use of library facilities, professional career planning, public relations and the like.

212. Critical Topics in Physiology. (1-3) I, II.**The Staff**

Prerequisite: consent of the instructor.

Advanced treatment of critical topics in physiology by staff and guest lecturers for graduate and postdoctoral students in the biomedical sciences.

251A-251B. Seminar in Physiology. (1-1) I, II.**The Staff**

Prerequisite: consent of the instructor.

Review and discussion of current physiological literature, research in progress and special topics.

299A-299B. Research in Physiology. (1-6) I, II.**The Staff**

Prerequisite: consent of the instructor.

Research in mammalian and general physiology.

Professional Course**301. Methods and Techniques in the Use of Laboratory Animals. (1) I.****Mr. Rich**

One hour per week of lecture, demonstration or laboratory. Prerequisite: consent of the instructor.

An introductory course for graduate students in the medical and biological sciences, covering principles and practical problems in the handling and use of common laboratory animal species.

PLANT BIOCHEMISTRY

(Department Office, Room 112, Building A, 700 Gayley Ave.)

Sidney H. Cameron, Ph.D., *Professor of Plant Physiology.*

Arthur Wallace, Ph.D., *Professor of Plant Nutrition (Chairman of the Department).*

William H. Chandler, Ph.D., *Emeritus Professor of Horticulture.*

Robert W. Hodgson, M.S., *Emeritus Professor of Subtropical Horticulture.*

———, *Associate Professor of Plant Physiology.*

Leland M. Shannon, Ph.D., *Associate Professor of Plant Physiology.*

———, *Assistant Professor of Plant Physiology.*

Preparation for the Major.—Required courses, or their equivalent: Chemistry 1A, 1B, 8; Botany 1, 107. Recommended courses, or their equivalent: Irrigation and Soil Science 101; Zoology 150.

The Major.—Twelve units of upper division courses in the major, which should normally include Floriculture and Ornamental Horticulture 110.

Graduate Study.—Graduate work in plant biochemistry is offered as plant science. See pages 500–501 for description.

Upper Division Courses

111. Plant Metabolism. (2) I.

Mr. Shannon

Lecture-discussion, two hours. Prerequisite: Chemistry 8 or the equivalent.

Biochemical approach to major plant processes; metabolic pathways; formation and utilization of energy; structure and function of cellular constituents.

142. Mineral Metabolism in Plants. (3) II.

Mr. Wallace

Prerequisite: Chemistry 108B or equivalent.

Inorganic nutrition of plants including accumulation, transport, interactions, effects of deficiencies and excesses, nature of susceptibility to imbalances, and the role of metals in structure and function.

199. Special Studies. (2–4) I, II.

The Staff

Prerequisite: senior standing and consent of the instructor.

Graduate Courses

240. Horticultural Experimentation. (3) II.

Mr. Shannon

Lecture and discussion, three hours. Prerequisite: graduate standing and consent of the instructor.

A critical review and analysis of research problems in selected fields.

255A–255B. Seminar in Plant Biochemistry. (2–2) Yr.

The Staff

281A–281B. Research in Plant Biochemistry. (2–6; 2–6) Yr.

The Staff

PLANT PATHOLOGY

(Department Office, 288 Physics Building)

John G. Bald, Ph.D., *Professor of Plant Pathology.*

John T. Middleton, Ph.D., *Professor of Plant Pathology (Chairman of the Department), Riverside.*

The Major.—The major is offered on the Berkeley and Davis campuses. See the PROSPECTUS OF THE COLLEGE OF AGRICULTURE and consult the appropriate adviser for students in agriculture.

Upper Division Courses

***120. Plant Diseases. (4) I.**

Mr. Bald

Lecture, two hours; laboratory, six hours.

Prerequisite: Botany I or the equivalent. Recommended: Bacteriology I.

A general course treating on the nature, cause, and control of plant diseases. Insofar as practicable the illustrative materials will be drawn from subtropical fruit plants, floral, cultural, and ornamental plants.

***199. Special Studies. (2-4) I, II.**

The Staff

Prerequisite: senior standing and consent of the instructor.

Graduate Courses

***299. Research in Plant Pathology. (2-6) I, II.**

The Staff

PLANT SCIENCE

Programs leading to graduate degrees are offered by the Departments of Botany and Plant Biochemistry, Floriculture and Ornamental Horticulture, and Plant Biochemistry.

Admission to Graduate Status

Applicants for admission to the graduate program in Plant Science will be expected to submit evidence of adequate undergraduate preparation in the biological and physical sciences.

Requirements for the Master's Degree

The general requirements are given on pages 162-165. Students may follow Plan I or Plan II. Those following Plan II must pass a comprehensive written examination which may be taken toward the end of any semester. There is no foreign language requirement.

Requirements for the Doctor's Degree

The general requirements for the doctorate degree are set forth on pages 165-169. A student may proceed with his graduate work under either of the following plans.

Plan A

Advancement to candidacy for the Ph.D. requires completion of 24 units in the fields of anatomy, ecology, genetics, morphology, physiology and taxonomy with at least a B grade. Additional course work in botany and related subjects may be required by the guidance committee depending on the student's interest and preparation. Each prospective candidate is required to take a written screening examination no later than the third semester after admission; transfer students with a master's degree must take the examination not later than their second semester. A reading knowledge of German and one other foreign language approved by the student's guidance com-

* Not to be given, 1963-1964.

mittee is required. The qualifying examination is oral and is conducted by the Doctoral Committee. After acceptance of the dissertation, the candidate must pass a final oral examination which pertains primarily to the subject of the dissertation.

Plan B

A student must complete at least 24 units in the biological sciences with at least a B grade, including 8 upper division units in Plant Science. An additional 20 units are required from any of the following courses or their equivalents: Chemistry 112A-B (Organic), 108A-B (Biochemistry), 109 (Physical), Physics 2A-2B, and Mathematics 3A-3B. Additional course requirements may be made by the guidance committee depending on student's interests. Each prospective candidate is required to take a comprehensive written screening examination no later than the third semester after admission; transfer students with a master's degree must take the examination no later than their second semester. A reading knowledge of German and one other foreign language is required. Foreign students whose native language is not English may petition to use English as a second language. The qualifying examination is conducted by the Doctoral Committee. After acceptance of the dissertation, the candidate must pass a final oral examination which pertains primarily to the subject of the dissertation.

POLITICAL SCIENCE

(Department Office, 160 Haines Hall)

Irving Bernstein, Ph.D., *Professor of Political Science.*

John C. Bollens, Ph.D., *Professor of Political Science.*

† James S. Coleman, Ph.D., *Professor of Political Science.*

† Winston W. Crouch, Ph.D., *Professor of Political Science.*

Russell H. Fitzgibbon, Ph.D., LL.D., *Professor of Political Science.*

† J. A. C. Grant, Ph.D., *Professor of Political Science.*

† Ivan Hinderaker, Ph.D., *Professor of Political Science.*

Thomas P. Jenkin, Ph.D., *Professor of Political Science.*

Robert G. Neumann, Ph.D., *Professor of Political Science.*

Paul O. Proehl, J.D., *Professor of Political Science and Law.*

Foster H. Sherwood, Ph.D., LL.D., *Professor of Political Science and Lecturer in Law.*

H. Arthur Steiner, Ph.D., *Professor of Political Science.*

Malbone W. Graham, Ph.D., *Emeritus Professor of Political Science.*

Charles H. Titus, Ph.D., LL.D., *Emeritus Professor of Political Science.*

David T. Cattell, Ph.D., *Associate Professor of Political Science.*

Ernest A. Engelbert, Ph.D., *Associate Professor of Political Science.*

* David G. Farrelly, Ph.D., *Associate Professor of Political Science.*

Richard P. Longaker, Ph.D., *Associate Professor of Political Science (Chairman of the Department).*

† Dwaine Marxick, Ph.D., *Associate Professor of Political Science.*

Charles R. Nixon, Ph.D., *Associate Professor of Political Science.*

† Absent on leave, 1963-1964.

* In residence spring semester only, 1963-1964.

† Vincent Ostrom, Ph.D., *Associate Professor of Political Science.*
 Richard N. Rosecrance, Ph.D., *Associate Professor of Political Science.*
 William P. Gerberding, Ph.D., *Assistant Professor of Political Science.*
 Malcolm H. Kerr, Ph.D., *Assistant Professor of Political Science.*
 David C. Rapoport, Ph.D., *Assistant Professor of Political Science.*
 § Howard R. Swearer, Ph.D., *Assistant Professor of Political Science.*
 David A. Wilson, Ph.D., *Assistant Professor of Political Science.*
 Peter Woll, Ph.D., *Assistant Professor of Political Science.*
 Charles E. Young, Ph.D., *Assistant Professor of Political Science.*

Hans Baerwald, Ph.D., *Lecturer in Political Science.*
 Eliezer Erel, Ph.D., LL.B., *Acting Associate Professor of Law.*
 C. Sylvester Whitaker, M.A., *Acting Assistant Professor of Political Science.*

Letters and Science List.—All undergraduate courses in political science, except 104, are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Political Science 1 and 2. Course 103 may be substituted for course 2 for students entering with upper division standing.

The Major.—Twenty-four units in upper division political science courses numbered from 110 to 199. Courses 101, 102, 103, and 104 may not be applied to the major. The 24 units of permissible upper division course work must be so distributed that at least three courses are taken in *one* of the groups into which the upper division courses of the department are organized, and at least *one* course is taken in three of the remaining five groups. The group organization of courses is as follows:

- Group I (Political Theory), courses 110–118;
- Group II (International Law and Relations), courses 125–138;
- Group III (Politics), courses 141–148;
- Group IV (Comparative Government), courses 150–160B;
- Group V (Public Law), courses 161–168;
- Group VI (Public Administration and Local Government), courses 171–187.

Course 168 may be counted in Group III; courses 117, 133A–133B, 148, and 187 may be counted in Group V; courses 143, 166 and 168 may be counted in Group VI. Ungrouped courses 198 and 199 apply to the major but are not counted in meeting the minimal requirements for the distribution of course work among four principal groups.

The student must maintain an average grade C or higher in all upper division courses in political science. For other details, the student should consult a departmental adviser.

Related Curricula.—For the curricula in international relations and public service, see pages 85 and 90 of this bulletin.

† Absent on leave, 1963–1964.

§ Sabbatical leave, fall semester only, 1963–1964.

Admission to Graduate Status

Applicants who have completed the undergraduate major in political science, or its equivalent, with a minimum grade-point average of 3.00 will ordinarily be recommended for admission to the graduate programs in political science. They must meet the general University requirements noted in the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION. Students transferring from other institutions without the equivalent of the undergraduate major in political science at UCLA will be required to satisfy such conditions as may be indicated by the department before entering upon programs leading to graduate degrees.

Somewhat different admission requirements apply to the Master of Public Administration degree (page 505) administered by the department.

The prospective graduate candidate is required to submit two letters of recommendation and Graduate Record Examination (or Law School Aptitude Test Scores) to the Chairman, Committee on Graduate Studies, Department of Political Science. Candidates in Political Science should take the Aptitude Test and the Advanced Government Test of the Graduate Record Examination. The tests are given four times a year in various locations in the United States and several foreign countries.

Applications for the Graduate Record Examination may be secured by applying to the Educational Testing Service, 4640 Hollywood Boulevard, Los Angeles 27, California, or 20 Nassau Street, Princeton, New Jersey.

The Testing Service must be requested to forward the test results to the Secretary, Committee on Graduate Studies, Department of Political Science.

Graduate Fields of Study

Six fields of study are offered to graduate students: *Political Theory, International Law and Relations, Politics, Comparative Government, Public Law, Public Administration and Local Government.*

Candidates in regular status for the M.A. degree are examined at the end of the year in one of these fields. Candidates for the Ph.D. degree are examined in four fields, three of which must be within the six fields offered by the Department.

Students may take a fourth field outside the Department with the approval of the Department. Among the programs which may constitute a fourth field are African Studies, Latin American Studies, Russian and East European Studies and the National Defense Studies Program.

Requirements for the Master's Degree in Political Science

The Department normally requires a one field examination and overall evaluation at the end of the first year in residence. The thesis plan may be followed in individual cases with the approval of the Department. The candidate electing the thesis plan, however, must take one field examination before being advanced to candidacy for the Ph.D. degree.

At the end of the second semester of residence the graduate student will take a written examination in one field. An evaluation in depth will be made of the graduate student's capabilities and qualifications based on the following evidence: the written examination, ability to deal with the subject matter of the field and with general problems and concepts of Political Science in an oral examination, grade-point average, and faculty reports.

The oral examination will be conducted by two faculty members specializing in the chosen field and one other member. The Committee will recommend one of the following: (1) That the student receive the M.A. degree when all departmental and University requirements are met (satisfaction of the language requirement and satisfactory completion of 24 units approved by the Department), (2) That the student receive the M.A. degree when all departmental and University requirements are met (satisfaction of the language requirement and satisfactory completion of 24 units) and be encouraged to proceed toward the Ph.D., (3) That the student does not qualify for the M.A. degree.

The M.A. candidate normally will be required to take a graduate course and graduate seminar in his chosen field within the first year and is required to take courses in at least two other fields before the achievement of the M.A. degree. Twenty-four units in graduate status are required for the M.A. degree. Three units may be taken with the approval of the Department in another field. These three units may not apply toward the 12 units in the 200 series required in the major department. Candidates for the M.A. degree in political science are required to pass a reading examination in one modern foreign language, as administered by the Graduate Council. The language requirement must be met within the first three semesters, or further graduate work will not be permitted until the requirement is satisfied. All prospective graduate students are strongly urged to prepare for examination in one language before beginning the first semester of graduate work.

Special M.A. Sequence.—In special cases, and then only for compelling reasons, graduate students may follow a special sequence of study. The approval of the Committee on Graduate Studies is required for any such sequence. An evaluation examination will be administered to all students in the special sequence.

All students are required to maintain a minimum 3.00 average in their graduate work.

Requirements for the Doctor's Degree in Political Science

An M.A. in Political Science or the equivalent.

All students entering the Ph.D. program of the Department with Masters degrees from other universities are required to take a one field evaluation examination no later than one year after registration. All students are expected to demonstrate a reading knowledge of two modern foreign languages. Most Ph.D. candidates will have met the requirement in one of the two foreign languages as a result of completion of requirements for the M.A. degree. Language requirements must be met before the preliminary examinations are taken.

A guidance committee will be appointed after the M.A. examination for students proceeding to the Ph.D.; for graduate students entering the Department with a Master's degree a guidance committee will be appointed at the beginning of the first semester in residence. The Committee will meet when it is deemed advisable by the graduate student, the Chairman of the Department, or the Chairman of the Guidance Committee. It is to be emphasized that the graduate student should initiate individual consultation with members of the Committee since formal meetings of the entire Committee

will be kept at a minimum. The course of study for the Ph.D. will be arranged by the graduate student in consultation with the members of the guidance committee.

The written and oral preliminary examinations shall take place one to two years after the M.A. field examination or, for those entering with a Master's degree, one to two years after entrance. The examination will encompass four fields, three of which must be within the Department.

Advising

The procedure for Ph.D. candidates is outlined above.

M.A. candidates will meet with the Chairman of the Committee on Graduate Studies and will be assigned to a graduate adviser. The course of study will be worked out by the student in consultation with the adviser.

Financial Assistance

Application forms for teaching and research assistantships awarded by the Department may be obtained by applying to the Department. More detailed information on University grants and other forms of aid may be obtained either through the Department or from the Graduate Division of the University.

Master of Public Administration

The program leading to the degree of Master of Public Administration is organized both for those who have earned a bachelor's degree and wish to prepare for a career in governmental administration, and for more advanced public servants who wish to supplement knowledge already obtained and increase their level of competence in theoretical and practical aspects of public administration. The program is administered by the Department of Political Science but offers an opportunity for the student to do work in departmental and nondepartmental fields related to public administration. The M.P.A. degree program does not lead directly to a doctor's degree program.

1. *General Requirements.*—See pages 162–165 of this bulletin.

2. *Admission to the Program.*—(a) The student shall have received the degree of Bachelor of Arts with a major in public service or political science or a combination of undergraduate work and experience which the Master of Public Administration degree committee evaluates as satisfactory preparation. (b) Applicants must file a special application with the Director of the M.P.A. Program in the Department of Political Science, in addition to the application for admission to graduate status to be filed with the Graduate Division.

3. *Plan.*—Plan II will be followed. Programs for each candidate will be prepared in consultation with an advisory committee, and in accordance with program criteria defined below.

4. *Course Requirements.*—The candidate must complete an approved program of at least 24 units of upper division and graduate courses, consisting of not less than 12 units of graduate courses in the 200 series, distributed among the three fields of the program. In addition to these requirements, candidates must complete an approved internship in accordance with Section 8, below.

5. *Residence Requirement.*—The candidate must complete at least two semesters of graduate residence at the University of California.

6. *Program.*—Candidates must demonstrate competence in three fields; (1) administrative theory and methodology; (2) governmental institutions and management practices; and (3) public law and policy. General and specialized levels of competence in each of the three fields is expected of each student who becomes a candidate for the M.P.A. degree. Levels of competence for each field and relevant courses are indicated as follows:

A. Administrative Theory and Methodology.

(1) Level of competence.

(a) General background in administrative theory and the general methodological significance of research and analytical tools for controlling and organizing evidence for research and decision-making purposes.

(b) Specialized competence in a particular tool or skill relevant to research or administrative analysis, for example, statistics, accounting, data processing, operations research and systems analysis, foreign languages.

(2) Relevant courses: Political Science 181, 203, 218, 263. Other courses in Business Administration, Economics, Sociology, Psychology, and other related fields.

B. Governmental Institutions and Management Practices.

(1) Level of competence.

(a) General understanding of political institutions of the national, state and local governments as providing the context for the conduct of governmental and administrative activities.

(b) Specialized knowledge of the function of planning, organization and management, fiscal, personnel and other controls that are utilized in the management of American government.

(2) Relevant courses: Political Science 143, 144, 145, 146, 171, 172, 181, 184, 185, 186, 214, 228, 254, 262, and 263.

C. Public Law and Policy.

(1) Level of competence.

(a) A general level of understanding of the nature of a legal system, American public law and the role of administration in a rule of law.

(b) A specialized knowledge of one particular field or problems of administration (for example, welfare, economic development, personnel, law enforcement, labor, land use, water resources) with an understanding of the special nature of the problems of administration and control in that field, how the basic legal ideas were developed and the significance of these ideas in current administrative practices and problems of public policy.

(2) Relevant courses: Political Science 117, 143, 148, 161, 166, 167A-B, 168, 183, 187, 216, 252. Various offerings in other departments may also be relevant depending upon the special area of interest.

The M.P.A. committee will designate an advisory committee for each candidate upon nominations from the program director to meet with the candidate as early in the academic year as possible to consider plans for his program of study. Each candidate will be expected to prepare a formal statement of his

study program, subject to the advisory committee's approval, indicating specialized areas of study. Membership in the advisory committees will be designated to indicate representation of each of the three fields. Each student will be encouraged to meet informally or through a special readings or research arrangement (Political Science 298) with members of his advisory committee. These tutorial arrangements should serve to complement normal course and seminar instruction.

7. Comprehensive Examination.—The advisory committee is responsible for the administration of written examinations of approximately two hours' duration in each of the three fields of study. An oral examination will be administered by the M.P.A. committee as a whole following successful completion of the written examinations.

8. Internship.—Each candidate is required to complete an internship by working in a public agency, office, or council, prior to receiving the degree. The length and content of the internship must be in accordance with approved standards. In some instances experience prior to entrance into the program may be used to fulfill this requirement.

Lower Division Courses

1. Introduction to Government. (3) I, II.

The Staff

An introduction to the principles and problems of government with particular emphasis on national government in the United States. This course fulfills in part the requirement of American History and Institutions. Students who have credit for American Institutions 101 will receive only one unit of credit for Political Science 1.

2. Introduction to Government. (3) I, II.

The Staff

A comparative study of constitutional principles, governmental institutions, and political problems of selected governments abroad.

Upper Division Courses

Prerequisite for all upper division courses: upper division standing, except as indicated below.

Courses 101, 102, 103 may not be counted toward upper division requirements for the major.

101. American Institutions. (2) I, II.

The Staff

This course counts toward satisfaction of the "Requirement of American History and Institutions." (See page 43 of this bulletin.) It may not be applied toward the political science major, and is not open to students who have credit for Political Science 1.

The fundamental nature of the American constitutional system and of the ideals upon which it is based.

102. Contemporary World Politics. (3) I, II. Mr. Baerwald, Mr. Rosecrance

Current problems and issues in the foreign policies of the world powers since World War II, with particular attention to diplomatic, political, and security affairs. Open without prerequisite to both lower and upper division students, but not applicable to the requirements of the major in political science or international relations.

103. Principles of Political Science. (2) I, II.

The Staff

Prerequisite: course 1 or 2, or the equivalent.

Principles of political organization, comparatively considered; the major institutions and practices of government, such as political parties, legislatures, constitutions, etc., or the functions they perform in various countries.

GROUP I.—POLITICAL THEORY

110. History of Political Ideas. (3) I, II.

Mr. Jenkin, Mr. Nixon, Mr. Rapoport

An exposition and critical analysis of the ideas of the major political philosophers and schools from Plato to the seventeenth century.

112. Modern Political Theory. (3) I, II.

Mr. Jenkin, Mr. Nixon, Mr. Rapoport, Mr. Swearer

An exposition and critical analysis of the ideas of the major political philosophers from the seventeenth century to the present.

113. American Political Thought. (3) I, II.

Mr. Jenkin, Mr. Longaker, Mr. Nixon

A survey of the development of American ideas concerning political authority from Cotton and Williams to the present.

115. Theories of Political Change. (3) I, II.

Mr. Jenkin, Mr. Nixon, Mr. Rapoport

Prerequisite: course 112 or consent of instructor.

A critical examination of theories of political change, the relation of political change to changes in economic and social systems, and the relevance of such theories for the experience of both western and non-western societies.

117. Jurisprudence. (3) I, II.

Mr. Sherwood

Development of law and legal systems; comparison of methods and procedure in making and enforcing law in Roman and common law systems; consideration of fundamental legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. This course may be counted in either *Group I* or *Group V*.

118. Nature of the State. (3) I, II.

Mr. Jenkin, Mr. Swearer

Prerequisite: course 110, 112, or 113.

A systematic analysis of modern concepts and problems of political association.

GROUP II.—INTERNATIONAL LAW AND RELATIONS

125. Foreign Relations of the United States. (3) I, II.

Mr. Cattell, Mr. Gerberding, Mr. Rosecrance, Mr. Steiner

A survey of the factors and forces entering into the formation and carrying out of American foreign policy, with special emphasis on contemporary problems.

126. Latin-American International Relations. (3) I, II.

Mr. Fitzgibbon

The major problems of Latin-American international relations and organization in recent decades.

127. International Relations. (3) I, II.

Mr. Cattell, Mr. Rosecrance, Mr. Steiner

A general survey of the institutions and agencies of international government, including the United Nations, with major stress on outstanding issues in contemporary diplomacy.

130. World Politics and National Policies: Atlantic Area. (3) I, II.

Mr. Rosecrance

A contemporary survey of the foreign policies of the North Atlantic countries and of cooperative efforts to attain political, economic, and military coordination on a regional basis.

131. World Politics and National Policies: Soviet Sphere. (3) I, II.

Mr. Cattell, Mr. Swearer

A contemporary survey of the foreign policies and aspirations of the Soviet Union and other states in the Soviet bloc; analysis of content and effects of Communist doctrine affecting relations between the Soviet and democratic spheres.

- 132. New States in World Politics.** (2) I, II. Mr. Coleman, Mr. Wilson
An analysis of the foreign policies and the role in world politics of new states.
- 133A-133B. International Law.** (3-3) Yr. Mr. Erel, Mr. Proehl
A critical analysis of the general principles of the law of nations as demonstrated in the decisions of international and municipal tribunals and in the practices of nations. This course may be counted in either *Group II* or *Group V*.
- 134. International Relations of the Middle East.** (3) I, II. Mr. Kerr
A study of the relations among the countries of the Middle East with special reference to the policies of the Great Powers.
- 136. International Relations of the Western Pacific Area.** (3) I, II. Mr. Baerwald
The foreign policies of Japan, and the interests and policies of other countries, particularly the United States, in the Western Pacific Area.
- 138. International Relations of East Asia.** (3) II. Mr. Steiner, Mr. Wilson
The relations of the countries of the East Asian seaboard, especially China, with their neighbors and the other powers, with emphasis on contemporary interests and policies of the United States vis-a-vis China.
- 139A. American Defense Policy and Organization.** (2) I. The Staff
A study of the institutional and policy framework for decision making in the national defense field. This course may be counted in either *Group II* or *Group VI*.
- 139B. Defense Strategy and Policies in the Nuclear Age.** (2) II. The Staff
The problems of national defense strategy in an age of nuclear weapons and missiles; appropriate objectives of military policy, the role of strategic retaliatory forces, limited war, civil defense, maintaining coalitions and related problems.
- 139C. The Conduct of Modern War.** (3) I. The Staff
A study of World War II and the Korean War with special emphasis on problems of coalitions of nations in planning and operations.
- 139D. Modern Defense Finance.** (2) II. The Staff
A study of the fiscal problems of research and development, the procurement and maintenance of weapons systems and forces for specified periods, criteria for choices among alternatives. This course may be counted in either *Group II* or *Group VI*.

GROUP III—POLITICS

- 141. Politics.** (3) I, II. Mr. Gerberding
Prerequisite: consent of the instructor.
An analysis of political activities, with emphasis on methods of operating, capturing, and creating organizations.
- 142. Elections.** (2) I, II. Mr. Marvick
An analysis of the history, rules, procedures, techniques, and politics of the American system of elections.
- 143. Legislatures and Legislation.** (3) I, II. Mr. Gerberding, Mr. Marvick, Mr. Young
The functions of legislatures, the organization and procedure of typical legislative bodies, and the problems and principles of law making.
- 144. The American Presidency.** (3) I, II. Mr. Longaker
Historical development of the office, sources of constitutional authority and power; problems of contemporary presidential leadership in relations with Congress, the executive branch, political parties and the public; impact of social change and national security responsibilities on the office.
- 145. Political Parties.** (2) I, II. Mr. Farrelly, Mr. Gerberding, Mr. Marvick, Mr. Young
Organization, functions, and practices of political parties primarily in the United States.

146. Public Opinion and Propaganda. (2) I, II.

Mr. Farrelly, Mr. Marvick, Mr. Nixon

Prerequisite: upper division standing only.

A study of the nature and the means of formation of public opinion. Public opinion as a factor in popular government and as a control device in the modern state, with special reference to current conditions in American democracy.

147. Political Behavior Analysis. (3) I.

Mr. Marvick

An introduction to quantitative methods in the study of political behavior, especially in relation to voting patterns, political participation, and techniques of political action.

148. Government and Labor. (3) II.

Mr. Bernstein

The stakes of organized labor in public policy; organization of labor for dealing with government, political parties and the electorate; protection and regulation of collective bargaining; prohibition and regulation of unfair practices; regulation of the international affairs of unions. This course may be counted in either Group III, V or VI.

GROUP IV.—COMPARATIVE GOVERNMENT**150A. The Governments of Latin America. (3) I.**

Mr. Fitzgibbon

A comparative study of governmental and political development, organization and practices in the states of Middle America.

150B. The Governments of Latin America. (3) II.

Mr. Fitzgibbon

A comparative study of governmental and political development, organization and practices in the states of South America.

151. The Governments of the Middle East. (3) I, II.

Mr. Kerr

A comparative study of government in the Arab States, Turkey and Iran.

152. British Government. (3) I, II.

Mr. Jenkin, Mr. Rosecrance

The government and politics of the United Kingdom; the British constitution, parliament, parties and elections, foreign policies, administrative problems, and local governments.

153. The British Commonwealth of Nations. (2) I, II.

Mr. Rosecrance

The constitutional and political relations of the United Kingdom and dominion governments; the governments of Canada, Australia, New Zealand, and the Union of South Africa.

154. The Governments of Central Europe. (3) I, II.

Mr. Neumann

An intensive study of the political and constitutional organization of Germany and Danubian Europe, with special attention to contemporary political issues, parties, elections, and foreign relations.

155A. The Government of the Soviet Union. (3) I. Mr. Cattell, Mr. Swearer

An intensive study of the political and institutional organization of the Soviet Union and its component parts, with special attention to contemporary political issues, as well as party and governmental structures.

155B. Governments of Eastern Europe. (3) II. Mr. Cattell, Mr. Swearer

Prerequisite: course 155A, or the equivalent.

A study of the political and governmental organization of the communist countries of Eastern and Central Europe (exclusive of the U.S.S.R.) with special reference to the institutions, practices and ideologies including interregional relations.

156. The Governments of Tropical Africa. (3) I, II.

Mr. Coleman

The governments of the independent states and dependent territories of Africa south of the Sahara and north of the Union of South Africa, with special reference to comparative colonial policies, nationalism, and the problems of nation building.

157. The Governments of Western Europe. (3) I, II.

Mr. Neumann

The constitutional and political structure and development of the countries of western continental Europe, with special attention to contemporary problems.

158. Japanese Government and Politics. (3) I, II.

Mr. Baerwald

The structure and operation of the contemporary Japanese political system, with special attention to domestic political forces and problems.

159. Chinese Government and Politics. (3) I.

Mr. Steiner

Organization and structure of Chinese government, with particular attention to the policies, doctrines, and institutions of Chinese communism; political problems of contemporary China.

160A. Government and Politics in South Asia. (3) II.

Mr. Steiner

The political experiences and institutions of the Indian Subcontinent since 1947, with particular attention to the Republic of India, but also with reference to Pakistan and Ceylon.

160B. Government and Politics in Southeast Asia. (3) I, II.

Mr. Wilson

The institutional structures and political processes of states in Southeast Asia (Burma, Thailand, Malaya, Laos, Cambodia, Vietnam, Indonesia, The Philippines) attending principally to problems of institutional transformations and political stabilization.

GROUP V.—PUBLIC LAW**161. The Anglo-American Legal System. (3) I, II.**

Mr. Grant

Evolution of the English common law courts and their legal system, with special emphasis on the contributions made by canon law, the law merchant and equity; the theory of *stare decisis* as illustrated by the evolution of modern rules of negligence.

162. The Principles and History of Moslem Legal Institutions. (3) I. ———

The development of classical Islamic Law and its adjustment to modern conditions, with special consideration to be given to its governmental and judicial aspects.

166. Administrative Law. (3) I, II.

Mr. Sherwood

The rights, duties, and liabilities of public officers; relief against administrative action; extraordinary legal remedies; jurisdiction, conclusiveness, and judicial control; legal principles and tendencies in the development of public administration. This course may be counted in either Group V or Group VI.

167A. Constitutional Law. (3) I, II.

Mr. Farrelly, Mr. Grant, Mr. Longaker, Mr. Sherwood

General principles of constitutional law, federal and state; relations and powers of the federal government and the states.

167B. Constitutional Law. (3) I, II.

Mr. Farrelly, Mr. Grant, Mr. Longaker, Mr. Sherwood

Limitations on the federal government and the protection accorded to individual rights under the American constitutional system.

168. Government and Business. (3) I.

Mr. Bernstein, Mr. Woll

The stakes of business in public policy; organization of business for dealing with government, political parties, and the electorate; enforcement and regulation of competition; regulation of natural monopolies; government ownership and operation. This course may be counted in either Group III, V or VI.

GROUP VI.—PUBLIC ADMINISTRATION AND LOCAL GOVERNMENT**171. State and Local Government. (3) I, II.**

Mr. Bollens, Mr. Crouch

Development of state constitutions; the political, administrative, and judicial systems of state and county government; and relations between the state and local government, with special reference to California.

172. Municipal Government. (3) I, II.**Mr. Bollens, Mr. Crouch**

A study of the modern municipality in the United States; legal aspects of city government; local election problems; types of municipal government; problems of metropolitan areas; relationship of the cities to other units; problems bearing on city government today.

181. Principles of Public Administration. (3) I, II.**Mr. Bollens, Mr. Engelbert, Mr. Ostrom**

An introduction to modern theories of public administration; the relation of administration to the political process; and an analysis of special problems of public administration involving the regulation and control of resources, personnel, finance, organization, and public policy.

183. Problems in Public Administration. (3) I, II.**Mr. Bollens, Mr. Engelbert, Mr. Ostrom**

Problems of policy, organization and procedure in selected fields of public administration, with emphasis on administrative functions.

184. Metropolitan Area Government. (3) I, II.**Mr. Bollens**

An analysis of the problems, politics, organization, and functions of government in metropolitan areas.

185. Public Personnel Administration. (3) I, II. Mr. Crouch, Mr. Engelbert

The process of formulating and administering public personnel policies; concepts and principles utilized in selected governmental personnel systems. Focus will be primarily upon governmental systems in the United States (national, state, local, foreign service, military) but also comparisons will be made with selected other governmental systems.

186. National Policy and Administration. (3) I, II.**Mr. Engelbert, Mr. Marvick, Mr. Woll**

A study of the major policies and programs of the national government and their administration as illustrated in such areas as national defense, social welfare, agriculture, etc. Particular attention will be paid to the role of the President and other administrators in formulating public policy and in maintaining a responsible bureaucracy.

187. The Administrative Process. (3) I, II.**Mr. Sherwood, Mr. Woll**

An analysis of (1) judicial control of the way in which administrative agencies operate, and (2) within these limits, the most effective procedures as demonstrated by experience. This course may be counted in either *Group V* or *Group VI*.

UNGROUPED**197. Undergraduate Honors Seminars. (3) I, II.****The Staff**

Prerequisite: each of the following seminars shall be limited to a maximum enrollment of 15 students. Application for admission shall be filed at the Department office before the last day of instruction of the preceding semester, and the minimum prerequisites shall be at least 6 units of upper division courses in the field of the Honors Seminar, at least 12 units of upper division courses in Political Science, and a 2.75 overall grade-point average. The name of the Department staff member who will be in charge of each Honors Seminar in a particular semester and a description of the subject or subjects to be covered will be announced in the preceding semester. Applicants for admission will be notified as to whether or not they have been admitted before enrollment day of the semester for which an Honors Seminar application has been made.

197A. Honors Seminar in Political Theory (Group I).**197B. Honors Seminar in International Law and Relations (Group II).****197C. Honors Seminar in Politics (Group III).****197D. Honors Seminar in Comparative Government (Group IV).****197E. Honors Seminar in Public Law (Group V).****197F. Honors Seminar in Public Administration and Local Government (Group VI).**

198. Special Courses. (1-3) I, II.

Prerequisite: credit for 6 units of upper division courses in political science, and the special requirements necessary for the field selected for special study. Permission to register for this course is required of the instructor. These sections will be offered only to the extent justified by student demand. Each of them may take up in any given semester one or more special problems appropriate to the field.

Section 1. Techniques of Legal Research.

Mr. Farrelly, Mr. Grant, Mr. Sherwood

Section 2. Problems in International Relations.

Mr. Coleman, Mr. Rosecrance, Mr. Steiner

Section 3. Readings in Political Theory.

Mr. Jenkin, Mr. Nixon, Mr. Rapoport

Section 4. Methods of Administrative Management.

Mr. Bollens, Mr. Ostrom

Section 5. Problems in Comparative Government.

Mr. Neumann

Section 6. Problems in Politics and Legislation.

Mr. Gerberding, Mr. Longaker, Mr. Marvick

Section 7. Problems in Latin-American Political Institutions.

Mr. Fitzgibbon

Section 8. Problems of the Pacific Area.

Mr. Steiner

Section 9. Problems in Public Administration.

Mr. Bollens, Mr. Crouch

199. Special Studies. (1-5) I, II.

The Staff

Prerequisite: senior standing and consent of the instructor.

Graduate Courses**203. Scope and Methods. (3) I, II.**

The Staff

The scope, methods, techniques, interrelationships and literature of political science as a whole. The course includes an examination of the historical development of political science, of its relation to other social sciences, of methods of dealing with problems of political science, and of techniques of research.

211. Political Theory. (3) I, II.

Mr. Jenkin, Mr. Nixon, Mr. Rapoport

An analysis of the central problems of political theory and their relation to allied disciplines.

212. International Relations. (3) I, II.

Mr. Coleman, Mr. Rosecrance, Mr. Steiner

An intensive analysis of the principles and practices of international organization, chiefly as illustrated in the operation of the United Nations and its specialized agencies.

214. Politics. (3) I, II.

Mr. Longaker, Mr. Marvick

An analysis of political leaderships, with emphasis on the American presidency and its relation to various aspects of American politics, including Congress, political parties, elections, and public opinion.

215. Comparative Government. (3) I, II.

Mr. Coleman, Mr. Neumann

An intensive and systematic analysis, employing the comparative approach, of the basic principles and problems of government of the major states and areas.

216. Public Law. (3) I, II.

Mr. Grant, Mr. Longaker

A systematic analysis of the scope and nature of public law, with particular attention given to its materials and methods as illustrated in concepts and doctrines drawn from various of its subject fields.

218. Public Administration and Local Government. (3) I.

Mr. Bollens, Mr. Crouch, Mr. Engelbert, Mr. Woll

The nature and scope of public administration and its role in a democratic society; basic problems in the execution of public policies on all levels of government, such as organization, personnel, finance, internal management, administrative powers and responsibilities, intergovernment relationships, and the impact of public opinion, pressure groups, and political parties on administration.

221. Selected Texts in Political Theory. (3) I, II.

Mr. Jenkin, Mr. Nixon, Mr. Rapoport

A critical examination of major texts in political theory with particular attention to their philosophic system, their relations to the then contemporary political and intellectual currents, and the importance of the system for present-day political analysis.

228. Administrative Management. (3) II.

Mr. Crouch, Mr. Engelbert

An intensive study of the role of the modern budget process and of the personnel program in government administration. This course forms a part of the M.P.A. curriculum; it may be elected by other qualified graduate students.

Graduate Seminars

Prerequisite for all graduate seminars: advance consent of instructors.

250. Seminars in Regional and Area Political Studies.**250A. Latin-American Studies. (3)**

Mr. Fitzgibbon

250B. Russian and Slavic Studies. (3)

Mr. Cattell, Mr. Swearer

250C. Chinese and East Asian Studies. (3)

Mr. Steiner

250D. Japanese and Western Pacific Studies. (3)

Mr. Baerwald

250E. African Studies. (3)

Mr. Coleman

250F. Middle Eastern Studies. (3)

Mr. Kerr

250G. Commonwealth Studies. (3)**250H. Western European Studies. (3)**

Mr. Neumann

250J. Southeast Asian Studies. (3)

Mr. Wilson

252. Seminar in Public Law. (3)

Mr. Farrelly, Mr. Grant, Mr. Longaker, Mr. Sherwood

253. Seminar in International Relations. (3)

Mr. Coleman, Mr. Neumann, Mr. Steiner

254. Seminar in Public Administration. (3)

Mr. Crouch, Mr. Engelbert

256. Seminar in Comparative Government. (3)

Mr. Neumann, Mr. Steiner

257. Seminar in Political Theory. (3)

Mr. Jenkin, Mr. Nixon, Mr. Rapoport

259. Seminar in Political and Electoral Problems. (3)

Mr. Longaker, Mr. Marvick

262. Seminar in Municipal Government. (3)

Mr. Bollens, Mr. Crouch

263. Seminar in Political and Administrative Aspects of Planning. (3)

Mr. Bollens, Mr. Ostrom

264. Seminar on National Defense Problems. (3) I, II.

The Staff

271. Political Change. (3) I, II. Mr. Coleman, Mr. Fitzgibbon, Mr. Wilson

An interdisciplinary seminar directed toward the analysis of political change. To be offered by members of the Department of Political Science.

**298. Special Study and Research for M.A. Degree Candidates. (1-3) I, II.
The Staff****299. Special Study and Research for Ph.D. Degree Candidates. (2-6) I, II.
The Staff****401A-401B. Internship in Public Service. (1-3) I, II. Mr. Bollens**

Directed work in applying the techniques of public administration during a period of service in a governmental agency. A required course for students enrolled in the Master of Public Administration program. Open to other properly qualified graduate students upon application.

PREVENTIVE MEDICINE

(Department Office, A3-115C Center for the Health Sciences)

The Department of Preventive Medicine, in conjunction with the Department of Public Health, School of Public Health, offers a graduate program for certain qualified students. For information concerning courses and advanced degrees available, see the UCLA ANNOUNCEMENT OF THE SCHOOL OF PUBLIC HEALTH, the UCLA ANNOUNCEMENT OF THE SCHOOL OF MEDICINE, and pages 152-159 and 530-539 of this bulletin.

PSYCHIATRY

(Department Office, B8-262 Center for the Health Sciences)

Norman Q. Brill, M.D., *Professor of Psychiatry (Chairman of the Department).*

Ivan N. Mensh, Ph.D., *Professor of Medical Psychology and Head, Division of Medical Psychology.*

Frank F. Tallman, M.D., *Professor of Psychiatry and Head, Division of Social Psychiatry.*

Charles W. Tidd, M.D., *Professor of Psychiatry and Head, Division of Adult Psychiatry.*

Loring F. Chapman, Ph.D., *Associate Professor of Medical Psychology in Residence.*

Henry Lesse, M.D., *Associate Professor of Psychiatry in Residence.*

James T. Marsh, Ph.D., *Associate Professor of Medical Psychology.*

Arnold B. Scheibel, M.D., *Associate Professor of Psychiatry and Anatomy.*

Robert J. Stoller, M.D., *Associate Professor of Psychiatry.*

Robert Thompson, Ph.D., *Associate Professor of Medical Psychology in Residence.*

Frederic G. Worden, M.D., *Associate Professor of Psychiatry.*

Henry H. Work, M.D., *Associate Professor of Psychiatry and Head, Division of Child Psychiatry.*

William C. Beckwith, Ph.D., *Assistant Professor of Medical Psychology in Residence.*

- James H. Bryan, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Alexander B. Caldwell, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Paul V. Carlson, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Pietro Castelnovo-Tedesco, M.D., *Assistant Professor of Psychiatry in Residence.*
- Richard F. Docter, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Samuel Eiduson, Ph.D., *Assistant Professor of Biological Chemistry in Residence.*
- John B. Enright, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Herbert H. Eveloff, M.D., *Assistant Professor of Psychiatry in Residence.*
- Roderic Gorney, M.D., *Assistant Professor of Psychiatry in Residence.*
- Frank M. Hewett, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Ulrich B. Jacobsohn, M.D., *Assistant Professor of Psychiatry in Residence.*
- Wayne E. Jacobson, M.D., *Assistant Professor of Psychiatry in Residence.*
- Edward J. Kollar, M.D., *Assistant Professor of Psychiatry.*
- Edward Lichtenstein, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Ronald S. Mintz, M.D., *Assistant Professor of Psychiatry in Residence.*
- James O. Palmer, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Morris J. Paulson, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Stanley C. Plog, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Walter J. Raine, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Alexander C. Rosen, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- Lowell H. Storms, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- J. Thomas Ungerleider, M.D., *Assistant Professor of Psychiatry in Residence.*
- Charles W. Wahl, M.D., *Assistant Professor of Psychiatry and Head, Division of Psychosomatic Medicine.*
- Norris H. Weinberg, Ph.D., *Assistant Professor of Medical Psychology in Residence.*
- David Abrahams, M.D., *Instructor in Psychiatry in Residence.*
- Robert B. Edgerton, Ph.D., *Instructor in Anthropology in Residence.*
- Thomas V. Hoyer, M.D., *Instructor in Psychiatry in Residence.*
- Boyd M. Krout, M.D., *Instructor in Psychiatry in Residence.*
- Edward W. Maupin, Ph.D., *Instructor in Medical Psychology in Residence.*
- Eugene L. Ringuette, Ph.D., *Instructor in Medical Psychology in Residence.*
- Rita R. Rogers, M.D., *Instructor in Psychiatry in Residence.*
- James Q. Simmons, M.D., *Instructor in Psychiatry in Residence.*

Paul F. Slawson, M.D., *Instructor in Psychiatry in Residence.*

Stephan A. Tobin, Ph.D., *Instructor in Medical Psychology in Residence.*

Roberta Crutcher, M.D., *Lecturer in Psychiatry.*

Keith S. Ditman, M.D., *Lecturer in Psychiatry.*

Joaquin M. Fuster, M.D., *Lecturer in Psychiatry.*

Ronald R. Koegler, M.D., *Lecturer in Psychiatry.*

Admission to Graduate Status

1. General requirements of the Graduate Division.
2. Evidence of motivation, aptitude, and integrity.
3. Preliminary evaluation examinations.
4. The baccalaureate and the medical degrees.
5. A reading knowledge of one foreign language pertinent to the field of study.

Requirements for the degree of Master of Science in Psychiatry

General requirements of the Graduate Division (see pages 162-165). The candidate will ordinarily be required to follow Plan I as set forth in the general section on "Requirements for Master's Degree." However, in exceptional cases the candidate may, with the permission of the chairman of the department, be allowed to follow Plan II.

Graduate Courses

252. Seminar in Medical Psychology. (2) I.

Mr. Mensh

Presentation of the history and foundation of psychological methods and techniques; basic concepts in psychology and their application to psychiatry.

257A-257B. Psychiatric Seminar. (2-2) Yr.

Mr. Tidd

A presentation of the causes, nature and symptoms of mental and emotional disorders and the principles of their treatment.

262A-262B. Research Seminar. (1-1) Yr.

Mr. Brill

This conference will include additional instruction and discussion on scientific methodology and experimental design and statistics. There will be reports by members of the staff and invited guests from other departments on research work in progress and discussions of work in prospect.

264A-264B. Seminar in Child Psychiatry. (1-1) Yr.

Mr. Work

A study of the basic personality elements together with special problems encountered in work with children and the techniques of treatment.

273A-273B. Advanced Psychiatric Seminar. (2-2) Yr.

The Staff

A study of the basic contributions in the field of mental illness, including the historical background and relation to allied fields.

275A-275B. Research in Psychiatry. (6-6) Yr.

The Staff

Research in the field of psychiatry or allied fields under the supervision of the staff.

A group of elective courses are offered from which the candidate may choose, depending on the direction of his research interest, after consultation with the chairman.

Related Courses in Other Departments

Anatomy 255. Seminar in Endocrinology. (2) II.

Mr. Sawyer and Mr. Barraclough

- Pharmacology 232. Fundamental Principles of Drug Action. (2) I. Mr. Taylor
 Pharmacology 251A-251B. Seminar in Pharmacology. (1-1) I, II. The Staff
 Physiology 204. Cardiovascular Physiology. (2) I. Mr. Hall
 Physiology 205. Physiology of Respiration. (2) I. Mr. Hemingway
 Physiology 206. Gastrointestinal Physiology. (2) I. Mr. Sonnenschein
 Physiology 207. Neurophysiology. (2) I. Mr. Tschirgi

Special arrangements may be made for other elective courses.

PSYCHOLOGY

(Department Office, 3283 Franz Hall I)

- Harry W. Case, Ph.D., *Professor of Engineering and Professor of Psychology.*
 Roy M. Dorcus, Ph.D., *Professor of Psychology and Professor of Psychology in the School of Medicine.*
 Joseph A. Gengerelli, Ph.D., *Professor of Psychology.*
 Milton E. Hahn, Ph.D., *Professor of Psychology.*
 F. Nowell Jones, Ph.D., *Professor of Psychology (Chairman of the Department).*
 Harold H. Kelley, Ph.D., *Professor of Psychology (Vice-Chairman of the Department).*
 George F. J. Lehner, Ph.D., *Professor of Psychology.*
 Donald B. Lindsley, Ph.D., *Professor of Psychology and Professor of Physiology in the School of Medicine.*
 †Irving Maltzman, Ph.D., *Professor of Psychology.*
 Eliot H. Rodnick, Ph.D., *Professor of Psychology.*
 †John P. Seward, Ph.D., *Professor of Psychology.*
 Marion A. Wenger, Ph.D., *Professor of Psychology.*
 Howard C. Gilhousen, Ph.D., *Emeritus Professor of Psychology.*
 Kate Gordon Moore, Ph.D., *Emeritus Professor of Psychology.*
 Norman H. Anderson, Ph.D., *Associate Professor of Psychology.*
 Richard P. Barthol, Ph.D., *Associate Professor of Psychology.*
 Richard Centers, Ph.D., *Associate Professor of Psychology.*
 James C. Coleman, Ph.D., *Associate Professor of Psychology.*
 Andrew L. Comrey, Ph.D., *Associate Professor of Psychology.*
 Wendell E. Jeffrey, Ph.D., *Associate Professor of Psychology.*
 John H. Lyman, Ph.D., *Associate Professor of Engineering and Associate Professor of Psychology.*
 George E. Mount, Ph.D., *Associate Professor of Psychology and Associate Professor of Engineering.*
 †Allen Parducci, Ph.D., *Associate Professor of Psychology.*
 Bertram H. Raven, Ph.D., *Associate Professor of Psychology.*

† Absent on leave, 1963-1964.

† Sabbatical leave in residence fall semester, 1963-1964.

- Jessie L. Rhulman, Ed.D., *Associate Professor of Psychology.*
 Joseph G. Sheehan, Ph.D., *Associate Professor of Psychology.*
 S. Carolyn Fisher, Ph.D., *Associate Professor of Psychology, Emeritus.*
 ———, *Associate Professor of Psychology.*
 Charles M. Barnes, Ph.D., *Assistant Professor of Psychology.*
 William E. Broen, Ph.D., *Assistant Professor of Psychology.*
 Edward C. Carterette, Ph.D., *Assistant Professor of Psychology.*
 Kent M. Dallett, Ph.D., *Assistant Professor of Psychology.*
 Morton P. Friedman, Ph.D., *Assistant Professor of Psychology.*
 Allan L. Jacobson, Ph.D., *Assistant Professor of Psychology.*
 Michael J. Goldstein, Ph.D., *Assistant Professor of Psychology.*
 Jaques W. Kaswan, Ph.D., *Assistant Professor of Psychology.*
 Dolores D. Kluppel, Ph.D., *Assistant Professor of Psychology in Residence.*
 (Ole) Ivar Lovaas, Ph.D., *Assistant Professor of Psychology.*
 Charles Y. Nakamura, Ph.D., *Assistant Professor of Psychology.*
 Donald Novin, Ph.D., *Assistant Professor of Psychology.*
 Richard H. O'Connell, Ph.D., *Assistant Professor of Psychology.*
 David O. Sears, Ph.D., *Assistant Professor of Psychology.*
 James P. Thomas, Ph.D., *Assistant Professor of Psychology.*
 Tommy M. Tomlinson, Ph.D., *Assistant Professor of Psychology.*
 Thomas R. Trabasso, Ph.D., *Assistant Professor of Psychology.*
 Richard E. Whalen, Ph.D., *Assistant Professor of Psychology.*
 ———, *Assistant Professor of Psychology.*

- Bruno Klopfer, Ph.D., *Clinical Professor of Psychology.*
 Harry M. Grayson, Ph.D., *Clinical Professor of Psychology.*
 Frank J. Kirkner, Ph.D., *Clinical Professor of Psychology.*
 Thomas W. Richards, Ph.D., *Clinical Professor of Psychology.*
 J. Arthur Waites, Ph.D., *Clinical Professor of Psychology.*
 Myron Feld, M.D., *Associate Clinical Professor of Psychology.*
 Charlyne T. Herbert, Ph.D., *Associate Clinical Professor of Psychology.*
 Harrington V. Ingham, M.D., *Associate Clinical Professor of Psychology and Neuropsychiatrist, Student Health Service.*
 John H. McCormack, Ph.D., *Associate Clinical Professor of Psychology.*
 Barbara M. Stewart, Ph.D., *Associate Clinical Professor of Psychology.*
 Leonard V. Wendlund, Ph.D., *Associate Clinical Professor of Psychology.*
 Dorothy V. Anderson, Ph.D., *Assistant Clinical Professor of Psychology.*
 Laurence A. Petran, Ph.D., F.A.G.O., *Professor of Music and University Organist.*

- Arnold M. Binder, Ph.D., *Visiting Professor of Psychology.*
 Edward M. Eisenstein, Ph.D., *Lecturer in Psychology.*
 Phillip B. Gough, Ph.D., *Visiting Assistant Professor of Psychology.*
 Gladys M. Jewett, Ph.D., *Lecturer in Psychology and Manager, Student Counseling Center.*
 Allan W. Jones, Ph.D., *Lecturer in Psychology.*
 Lois E. Langland, Ph.D., *Lecturer in Psychology, Psychology Clinic; Counseling Psychologist and Assistant Manager, Student Counseling Center.*

- Leonore Rice Love, Ph.D., *Lecturer in Psychology, Psychology Clinic.*
 Phillip Oderberg, Ph.D., *Lecturer in Psychology, Psychology Clinic.*
 James O. Palmer, Ph.D., *Lecturer in Psychology, Psychology Clinic; and Assistant Professor of Medical Psychology in Residence.*
 Morris J. Paulson, Ph.D., *Lecturer in Psychology, Psychology Clinic, and Instructor in Medical Psychology in Residence.*
 Robert M. Peterson, Ph.D., *Lecturer in Psychology.*
 Alexander C. Rosen, Ph.D., *Lecturer in Psychology and Assistant Professor of Medical Psychology in Residence.*
 Stanley F. Schneider, Ph.D., *Lecturer in Psychology, Psychology Clinic.*
 J. Marvin Spiegelman, Ph.D., *Lecturer in Psychology.*
 Lowell H. Storms, Ph.D., *Lecturer in Psychology and Assistant Professor of Medical Psychology in Residence.*
 Frances B. Berres, M.A., *Supervisor in the Clinic School.*
 Elise S. Hahn, Ph.D., *Associate Professor of Speech and Associate in the Psychology Clinic.*
 Chester Jensen, M.A., *Teaching Supervisor in the Clinic School.*
 Katherine M. Kolodziejski, M.S.W., *Supervisor in the Psychology Clinic and Field Work Consultant in Social Welfare.*
 Evelyn Gentry Hooker, Ph.D., *Research Associate in Psychology.*
 Margaret Hubbard Jones, Ph.D., *Research Associate in Psychology.*
 Madeleine Louise H. Schlag-Rey, *Research Associate in Psychology.*

Letters and Science List.—All undergraduate courses in psychology are included in the Letters and Science Lists of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Required of all majors: Psychology 1A–1B. Upper division students changing to psychology should consult an adviser regarding lower division requirements. For nonmajors, course 101 will be acceptable as prerequisite for certain upper division courses as specified on page 522.

Recommended: courses from the following areas according to the student's interests. (a) natural science such as physics, chemistry, zoology, physiology; (b) social science such as anthropology, sociology, economics, political science, history; (c) mathematics, statistics; (d) humanities such as philosophy, languages, literature, art, music, drama.

Recommended for students who expect to do graduate study in psychology, at least 18 units, distributed among the following: (a) 6 units of cultural or social anthropology and/or sociology; (b) not less than 3 units of college chemistry; (c) one year of college physics, including laboratory; (d) not less than one year of work chosen from the following: general zoology, elementary physiology, elementary zoology and physiology, applied human physiology, general physiological biology, endocrinology, genetics; (e) it is strongly urged that these students take Mathematics 37A–37B. They should also plan to take such courses as will give them the reading knowledge of two foreign languages required for the Ph.D. degree.

The Major.—Courses 105, 106A, 131, 137, 145 or 148, plus other upper division courses in psychology, to a total of not less than 24 upper division

units. Upper division courses in other departments may not be substituted for this requirement. It is recommended that 105 and 106A be taken before other required courses.

General.—Undergraduates, preparing for graduate work, should include among their courses the following: statistics, experimental psychology, perception, learning, social psychology or personality. Students are rarely accepted whose upper division work falls below a B average (3.0).

Graduate Requirements

All students should obtain from the departmental office a statement of the graduate requirements in psychology.

The department offers the M.A. and Ph.D. degrees in psychology. For the Ph.D. degree, all students are required to obtain thorough grounding in research methodology and psychological theory. Specialized training is available in such areas of psychology as clinical, comparative, counseling, developmental, engineering, experimental, industrial, mathematical, measurement, physiological, and social.

Admission Requirements.—In addition to meeting the general graduate requirements listed on pages 161–169 of this bulletin, students must be admitted to the department by a selection committee within the department. Graduate enrollment is limited and candidates will be chosen on the following bases: (1) prior scholastic performance; (2) ratings and recommendations by professors and other individuals; (3) autobiographical material. Applicants should write to the Dean of the Graduate Division for an application form, and should, in addition, write to the Department of Psychology for other information and the necessary departmental forms. The completed departmental forms and transcripts must be received prior to February 15 for consideration for the following fall semester. Normally, all applicants will have had an undergraduate major in psychology; however, outstanding students who have majored in other areas will be considered. *The closing date of February 15 should be carefully noted.*

Requirements for the M.A. and Ph.D. Degrees

All entering graduate students must take certain core courses in the department during their first year in residence. Performance in these courses will determine (a) whether qualified to continue toward the Ph.D. degree, or (b) whether qualified for completion of the M.A. degree. Required core courses for persons entering with an M.A. degree will be determined by a reviewing committee and/or examination.

M.A. Degree.—The M.A. degree is not required of candidates for the Ph.D. degree; however, a student may qualify and apply for the M.A. degree after satisfactory completion of certain departmental core courses, comprehensive examinations, and the passing of a reading comprehension examination in one approved foreign language. The department follows Plan II. See page 164. A thesis is not required for the M.A. degree.

Ph.D. Degree.—Eligibility for an oral qualifying examination and admission to candidacy requires prior qualification in departmental core courses, qualification in comprehensive examinations in areas of specialization within

the department, and the passing of reading comprehension examinations in two approved foreign languages. The oral qualifying examination is administered by a committee of not less than five persons, three from the department and two from other departments. Each student must complete a satisfactory doctoral dissertation approved by his adviser and other members of the doctoral committee, after which he must pass a final oral examination on the dissertation and its implications.

Fellowships, Scholarships, Assistantships, and Stipends

At the present time almost all graduate students obtain work in the profession as assistants or trainees, or receive one of the many fellowships available within and without the University. Graduate students may also receive some financial assistance by serving as course readers. Applications for work or assistantships are sent to the department with the departmental application form; fellowship and scholarship forms may be obtained from and should be mailed to the Dean of the Graduate Division.

Lower Division Courses

1A. Introductory Psychology. (3) I, II. Mr. Dallett, Mr. Trabasso, ———

Consideration of facts and principles pertaining to the topics of perception, imagination, thought, feeling, and emotion, leading to the problems of experimental psychology, and the topics of intelligence and personality.

1B. Elementary Physiological Psychology. (3) I, II.

Prerequisite: course 1A.

Mr. Gengerelli, Mr. O'Connell, ———

Study of the integrative relations of psychological processes to nervous, muscular, and glandular features of the response mechanism, including the structure and functions of the sense organs.

33. Personal and Social Adjustment. (3) I, II. Mr. Lehner, Miss Rhulman

Prerequisite: course 1A.

The principles of mental hygiene. Orientation in the practical use of psychological principles in problems and circumstances encountered in college and later life.

Upper Division Courses

Except as otherwise indicated courses 1A and 1B are normally prerequisite to all upper division courses. For students not majoring in psychology, 1A, or 101, or the equivalent will meet the prerequisite for the following courses: 110, 112, 145, 147, 167A-B, 180, 181, 185, 186, 187.

101. Principles of Psychology. (3) I, II.

Mr. Novin

Open to upper division students who do not have credit for courses 1A and 1B.

A critical discussion of the basic topics in psychology. Elementary details, including essential information concerning nervous, muscular, and glandular mechanisms will be covered by examinations based on readings.

105. Elementary Statistics in Psychology. (3) I, II.

Mr. Comrey

Lecture, two hours; laboratory, two hours. Students who have credit for any other course in statistics will receive only one unit of credit for this course.

Measures of central tendency, variability and correlations. Applications of statistical inference to research in psychology. Reliability and validity of psychological tests and measurements.

106A. Experimental Psychology. (3) I, II.

Mr. Dallett, Mr. Lovaas, Mr. Mount, Mr. O'Connell

Lectures and demonstrations, two hours; laboratory, two hours; assigned readings.
Prerequisite or concurrent: course 105.

Methods, techniques, and typical results in experimental research in psychology.

107. Advanced Psychometric Methods. (3) I, II.

Mr. Gengerelli

Recommended: course 111; Mathematics 8B or 87. The application of higher statistical methods to psychological data.

108. Physiological Psychology. (3) I.

Mr. Wenger

Integrative activities, consciousness, intelligent behavior, receptor and effector processes in relation to neuromuscular structure and function. Facts, problems, and methods.

110. Educational Psychology. (3) I, II.

Miss Rhulman

A general survey of the basic principles of psychology that are pertinent to education. Includes a study of growth and development, abilities, intelligence, social and emotional factors, and principles of learning.

111. Psychological Measurement and Evaluation. (2) II.

Mr. Broen

(Former number, 105B.)

Prerequisite: course 105.

Further study of the principles of measurement, stressing basic concepts. Application to problems to test construction, administration, and interpretation.

112. Child Psychology. (3) I, II.

Mr. Jeffrey

An elaboration of the developmental aspects of physical, mental, social, and emotional growth from birth to adolescence.

113. Psychology of Adolescence. (2) II.

Miss Rhulman

Prerequisite: course 112.

The physical, psychological, and social development of the adolescent. Essentially a continuation of child psychology, but with relatively greater emphasis on personality formation and problems of social adjustment.

120. History of Psychology. (3) II.

Prerequisite: junior or senior standing or consent of the instructor.

An historical and systematic analysis of psychological thought and points of view.

131. Perception. (3) I, II.

Mr. Thomas

Lecture, two hours; laboratory, two hours.

Methods and approaches to the study of perception. Experimental results and theoretical interpretations. Laboratory demonstrations and individual experiments.

134. Motivation. (2) II.

Mr. Seward

Theories and experimentally determined facts concerning drives, needs, preferences, and desires.

135. Thinking. (2) I.

Mr. Friedman

An analysis of experimental studies of problem solving, reasoning, insight, concept formation, and related topics.

137. Fundamentals of Learning. (3) I, II.

Mr. Friedman, Mr. Seward

Lectures, two hours; laboratory, two hours. Prerequisite: course 105.

Experimental findings on animal and human conditioning; retention and transfer of training; the relation of learning and motivation. The course is intended to provide an empirical basis for theory and research in this area.

138. Feeling and Emotion. (2) II.

Mr. Wenger

The nature and basis of the affective factor in life, with particular emphasis on the critical evaluation of affective theory. This is not a course in personality and emotional adjustment.

139. Theories of Learning. (3) II.**Mr. Seward**

Lectures, two hours; laboratory, two hours. Prerequisite: course 137.

Critical discussion of the major theories in the light of experimental evidence. Students may conduct their own experiments.

142. Language and Communication. (3) I.**Mr. Carterette**

Prerequisite: course 105 or consent of instructor.

A survey of language behavior, communication and speech perception, including acquisition, sequential structure, and semantic aspects. Recent developments in linguistics, theory of information transfer, analysis and synthesis of speech. Social communication. Aphasia and speech pathology. Animal communication.

143. Propaganda and Public Opinion. (2) I.**Mr. Sears**

Prerequisite: course 145 or consent of the instructor.

Propaganda as a form of communication. The detection, analysis, and effects of propaganda. The creation, manipulation, and measurement of public opinion; the relation between public opinion and propaganda; the relation between the mass media of communication and public opinion and propaganda.

144. Psychological Interviewing and Case History Methods. (3) II.**Mr. Tomlinson**

Lectures, two hours; laboratory, two hours. Prerequisite: senior or graduate standing and permission of the instructor.

Procedures, methods, and problems in the collection of personal data in the interview situation.

145. Social Psychology, General Course. (3) I, II.**Mr. Kelley, Mr. Centers**

The interrelationships between the individual and his social environment. Social influences upon motivation, perception and behavior. The development and change of attitudes and opinions. Psychological analysis of small groups, social stratification and mass phenomena.

146. Attitude and Opinion Measurement. (3) I.**Mr. Centers**

Prerequisite: two semesters of social psychology or consent of the instructor.

The nature of attitudes and opinions, and their measurement by means of various types of attitude scales and public opinion surveys. Study design, formulation of questionnaires and interview schedules, sampling methods, techniques of interviewing, analysis of results, and applications to various psychological problems. Class projects and field work.

147. Psychological Approaches to the Social Sciences. (3) II.**Mr. Sears**

An analysis of the contribution of current psychological theory and research to the understanding of selected historical, social, and political problems.

148. Personality Structure and Development. (3) I.**Mr. Kaswan**

The physiological, behavioral, and cultural role of perception, learning, and motivation in personality. These topics will be discussed in the context of current research and major theories, such as those of Freud, Fromm, Horney, Sullivan, Miller and Dollard, Lewin, and others.

149. Group Dynamics. (3) I.**Mr. Raven**

Prerequisite: course 145.

The theory and phenomena of group behavior; effects of group membership on the individual; relations between groups; methods of group observation; role of groups in society.

150A. Animal Psychology. (3) I.**Mr. Whalen**

A survey of the determinants of species-specific behavior including genetic influences and learning.

150B. Animal Psychology. (3) II.**Mr. Whalen**

Prerequisite: course 150A or consent of instructor.

An analysis of current problems and research in animal behavior.

- 161. The Psychology of Exceptional Children. (3) II** Mr. Lovaas
 Prerequisite: course 112 or the equivalent.
 A study of the nature, diagnosis, and treatment of exceptional disabilities and problem behavior in individual children or special groups.
- 162. Speech Pathology. (3) I.** Mr. Sheehan
 Recommended: courses 108, 168.
 A clinical approach to speech problems with emphasis on stuttering and neurological disorders and their treatment.
- 167A. Learning Disorders. (2) I, II.** Mr. Coleman
 An examination of the psychological factors underlying the understanding, diagnosis and treatment of reading and other learning disorders in children, adolescents and young adults.
- 167B. Learning Disorders: Laboratory. (2-4) I, II.** Mr. Coleman
 Lecture, one hour; laboratory, five hours. Laboratory course for course 167A.
 This course provides supervised laboratory experience with remedial cases in the Clinic School. It is recommended that the course be taken concurrently with 167A.
- 168. Abnormal Psychology. (3) I, II.** Mr. Nakamura, Mr. Tomlinson
 Study of the dynamics and prevention of abnormal behavior, including neuroses, psychoses, character disorders, psychosomatic reactions and other abnormal personality patterns.
- 172A-172B. Psychology of Music. (3-3) Yr.** Mr. Petran
 A study of the psychological factors and problems in music from the points of view of the listener, performer, and composer.
- 180. Psychology of Advertising and Selling. (2) I.** Mr. Peterson
 The relative strength of the desires in buying; attention value of form, size, color, and typographical layout and methods of measuring the effectiveness of advertisements; characteristics of salesman.
- 181. Problems in Human Relations. (3) I, II.** Mr. Barthol, ———
 Understanding human relations, problems and developing skills in interpersonal relations. Topics include the effective use of human resources; group management and leadership skills; interviewing, counseling, and conference techniques. Does not carry credit toward major in psychology.
- 185. Personnel Psychology. (2) I.** Mr. Case
 The methods of selection, classification, and training of employees.
- 186. Occupational Counseling and Job Classification. (2) II.** Mr. Case
 Prerequisite: courses 105, 185.
 Principles of occupational counseling; nature and sources of occupational information; methods of job analysis and creation of job families.
- 187. Industrial Psychology. (2) II.** Mr. Barthol
 The psychological aspects of work methods, conditions of work, training, employee motivation, and morale.
- 188A-188B. Psychological Bases of Counseling. (2-2) Yr.** Mr. Hahn
 Prerequisite: open to senior and graduate students who have preparation in educational psychology, statistics, tests and measurements, mental hygiene, or abnormal psychology. Permission of the instructor.
 The logical and experimental approaches to human aptitudes, abilities, and interests as used in counseling. Mental organization, physiological and psychological traits, individual and group educational-vocational-personality characteristics, derivation of interest and ability pattern, pattern analysis and its counseling applications.

190A-190B. Honors Program in Psychology. (3-3) Yr.

Mr. Sears, Mr. Whalen

Prerequisite: invitation by departmental honors committee.

Opportunity for the development of creative ideas and their implementation by experimental research.

199. Special Studies in Psychology. (1-3) I, II.

The Staff

Prerequisite: senior standing and consent of the instructor. May be repeated for a total of six units.

Graduate Courses**200. Learning. (3) I.**

Mr. Trabasso

An intensive study of experimentation on the fundamental processes: reinforcement, extinction, generalization, and discrimination.

201. Perception. (3) I.

Mr. Thomas

Basic experiments and theories of perception and judgment, with applications to learning, motivation, and personality. Laboratory demonstrations and individual experiments.

202. Personality. (3) I.

Mr. Rodnick

A survey of cognitive, analytic, and learning theory approaches to the study of personality. Emphasis will be on the intensive exploration of selected concepts and related research.

203A. Advanced Psychological Statistics, I. (3) I.

Mr. Friedman

Prerequisite: 107 and Mathematics 37 or the equivalent.

Review of fundamental concepts. Basic statistical techniques as applied to the design and interpretation of experimental and observational research.

203B. Advanced Psychological Statistics, II. (3) II.

Mr. Anderson

Prerequisite: 203A.

Advanced experimental design and planning of investigations.

204. Physiological Correlates of Behavior. (3) II.

Mr. Lindsley

The physiological substrate of behavior and the neural and endocrine mechanisms which underlie psychological phenomena and behavior. New concepts of structural and functional organization in the nervous system and the ways these relate to behavioral and neurological dysfunction.

205. Social Psychology. (3) II.

Mr. Kelley

An intensive consideration of the concepts, theories, and major problems in social psychology, and the principal methods of research centering around them.

206. Experimental Laboratory. (3) II.

Mr. Friedman, Mr. Kaswan, Mr. Novin, Mr. Raven

Students will design and conduct original research projects under the supervision of the instructor in charge.

207. Quantitative and Laboratory Methods in Psychology. (3) II.

Mr. Mount

Fundamentals of measurement, laboratory techniques and instruments, sources and types of error, treatment and presentation of data, problems in the design and interpretation of experiments in representative areas of laboratory investigation.

208. Mathematical Psychology. (3) II.

Mr. Anderson

Prerequisite: Mathematics 37 or equivalent. Desirable: probability theory.

Construction and analysis of mathematical models of behavior. Emphasis on applications to research in learning, perception, social, and other areas.

209. Factor Analysis. (3) II.

Mr. Comrey

Theory and practice of factor analysis in psychological research. Methods of factor extraction and rotation. Applications of computers to computations in factor analysis.

210. Multivariate Analysis in Psychological Research. (3) I. Mr. Comrey
The use of multivariate techniques as they relate to the problems of personality profiles and psychological classification. Multiple discriminant functions, generalized distance functions, and multidimensional scaling.

211. Theory of Mental Tests. (3) II. Mr. Broen
Prerequisite: Psychology 107, 203A-203B.
Fundamental assumptions and equations of test theory. Methods of estimating the variables involved.

***212. Advanced Perception. (3) I.** Mr. Carterette
Prerequisite: Psychology 201.
Advanced study of topics in perception with emphasis on theories of perception.

***213. Psychology of Vision. (3) I.** Mr. Mount
Prerequisite: Psychology 201.
An advanced treatment of psychophysiology and psychophysics of vision with special attention to modern theories.

214. Psychology of Audition. (3) I. Mr. Carterette
Prerequisite: Psychology 201.
An advanced treatment of the psychophysiology and psychophysics of audition with special attention to modern theories.

***215. Psychophysics. (3) II.** Mr. Jones
Prerequisite: Psychology 201.
Intensive study of the psychophysical methods with laboratory applications.

216. Advanced Learning. (3) I. Mr. Anderson
Prerequisite: Psychology 200.
A discussion of experimental research and theoretical analyses of selected topics such as frustration, curiosity, effects of early experience, schedules of reinforcement, and verbal learning.

217A-217B. Clinical Psychology. (2-2) Yr. Mr. Broen, ———
Prerequisite: course 161 or 168, or the equivalent.

***218. Verbal Behavior and Thinking. (3) I.** Mr. Maltzman
Prerequisite: Psychology 200, recommended 135.
Experimental research and theories dealing with such topics as meaning, verbal conditioning, problem solving, originality, and normal and schizophrenic thinking.

***219. Theories of Behavior. (3) II.** Mr. Seward
Prerequisite: Psychology 200.
A critical analysis of the major premises influencing current research: Hull, Guthrie, Tolman, Skinner, Spence, Estes, and others.

222. Personality Dynamics. (2) II. Mr. Lehner
A survey of the theoretical views of Freud, Jung, Adler, Rank, and various modern writers, including Allport, Lewin, Murray and Murphy.

223. Hypnosis and Its Therapeutic Applications. (2) II. Mr. Dorcus
Prerequisite: course 257A, or the equivalent.
This course will acquaint the student with theories, techniques of induction, and its applications in therapy.

224A-224B. Theory and Practice in Projective Methods. (2-2) Yr.
Mr. Spiegelman, ———
Prerequisite: courses 217A, and 217B or 230A or 252A; consent of the instructor.
Recommended: courses 144, 230B.
Survey of theories and fields of application of projective methods, and supervised practice in techniques.

* Not to be given, 1963-1964.

***225. Rationale and Methods of Research in Projective Techniques. (3) I.**

Prerequisite: course 224A-224B. Recommended: course 203B.

Advanced Rorschach interpretation.

226. Experimental Approaches to Clinical Psychology. (2) II.

A survey of techniques and procedures employed in experimental and physiological psychology as they relate to problems in clinical psychology. Emphasis will be placed upon research in, and the development of, new psychodiagnostic measures, using the classical experimental literature on perception, attention, emotion, action, etc., as a guide.

227A-227B. Tools and Techniques of Diagnosis in Psychological Counseling. (3-3) Yr.

Mr. Hahn

Prerequisite: courses 105, 148, or the equivalents, recommendation of adviser, and consent of the instructor.

Study of the theoretical and practical problems arising from the use of psychological methods and instruments on case work material.

228. Psychophysiology of Brain Function. (2) I.

Mr. Lindsley

Modern concepts of the functional organization of the brain with particular reference to psychological phenomena and behavior. Recent advances in neurophysiology and electroencephalography bearing on perception, attention, drive, sleep-wakefulness, levels of consciousness, etc. Some emphasis on pathology of behavior resulting from brain injury.

230A-230B. Clinical Measurement Techniques. (3-3) I, II.

(Former number, 219A-219B.)

Mr. Goldstein, Mr. Sheehan

Prerequisite: course 217A or take concurrently.

Advanced study of tests in clinical diagnostic study, including individual and group tests of intelligence, structured personality tests, and projective techniques. Emphasis will be placed on application in the clinical situation. Lecture and laboratory.

231. Advanced Developmental Psychology. (3) I.

Mr. Jeffrey

Prerequisite: Psychology 112 or equivalent.

A consideration of the special problems of the control and measurement of the behavior of children as well as the young of other organisms with emphasis on preparing students for clinical and research work with children.

235A-235B. Advanced Industrial Psychology. (2-2) I, II.

Mr. Barthol

(Former number, 215A-215B.)

Selection and training of employees; factors influencing efficiency or work.

†252A-252B. Seminar in Mental Measurements. (3-3) Yr.

Mr. Comrey

253A-253B. Seminar in Physiological Psychology. (3-3) Yr.

Mr. Wenger

Prerequisite: course 108 or the equivalent.

254. Seminar in Experimental Child Psychology. (3) II.

Mr. Jeffrey

255. Seminar in Clinical Child Psychology. (3) II.

Mr. Nakamura

***256. Seminar in the Psychological Aspects of Aging. (3) I.**

Mr. Goldstein

257A. Introduction to Psychotherapy. (3) I.

Mr. Dorcus

Open to students enrolled in Psychology 279A-279B or 401A-401B, or upon consent of the instructor.

257B. Individual Psychotherapy. (3) II.

Mr. Ingham

Open to students enrolled in Psychology 279A-279B or 401A-401B, or upon consent of the instructor.

257C. Group Psychotherapy. (3) I.

Mr. Lehner

* Not to be given, 1963-1964.

† 252A not to be given, 1963-1964.

258A-258B. Seminar in Abnormal Psychology. (3-3) Yr.

Mr. Dorcus, ———

***259. Seminar in Learning Disorders. (3) II.**

Mr. Coleman

An intensive review and integration of experimental findings relating to the role of neurophysiological, psychological, and sociological factors in learning difficulties. Diagnostic and treatment implications will be explored.

262. Seminar in Clinical Psychology and Speech Pathology. (3) I.

Mr. Sheehan

263A-263B. Seminar in Social Psychology. (3-3) I, II.

Mr. Raven

Prerequisite: course 205 or permission of instructor.

Social psychological research and theories on perceptual and cognitive processes. Person perception, consistency and balance in cognitions, social factors in assimilation of information and influence.

264A-264B. Seminar in Group Behavior. (3-3) I, II.

Mr. Kelley

Prerequisite: course 205 or permission of instructor.

Special topics in interpersonal relations and group dynamics. Power control, structure and organization, group functioning.

266. Seminar in Opinion and Attitude Research. (3) I.

Mr. Centers

Prerequisite: course 205 or permission of instructor.

Method, research and theory relating to attitudes and beliefs. Particular attention to effects of mass communications and social influence.

***267. Critical Problems in Social Psychology. (3) I.**

Mr. Kelley

268. Individual Dynamics and Their Social and Cultural Determinants.

(3) II.

Mr. Centers

Consideration of the facts, problems and theories concerning the interdependence between motivation systems, value patterns, attitudes, beliefs, and other personality characteristics of the individual and the cultural and social environment.

277A-277B. Field Work in Personnel Psychology. (3-6; 3-6) Yr.

Mrs. Jewett and the Counseling Staff

Prerequisite: regular graduate standing and upper division or graduate work in tests and measurements, statistics, mental hygiene or abnormal psychology, and counseling methods; recommendation of the adviser and consent of the instructor.

Internship in the Student Counseling Center, which includes psychometrics, observation of counseling, preparation of case materials for counselors, record keeping, tests scoring, case discussions, and participation in other service activities. Minimum of ten hours per week, including one to two hours of staff meetings and conferences.

279A-279B. Field Work in Clinical and Counseling Psychology. (3-6; 3-6) Yr.

Prerequisite: consent of the adviser.

Students in the Veterans Administration Clinical Training Program are required to register for this course each semester.

Section 1. General Clinical Psychology.

The Clinical Staff

Practical work in hospitals and clinics in clinical diagnostic testing and psychotherapy.

Section 2. Speech Pathology.

Mr. Sheehan

Practical work in hospitals and clinics in diagnostic testing and psychotherapy with speech disorders.

Section 3. Counseling Psychology.

The Counseling Staff

280. Seminar in Advanced Mathematical Psychology. (3) I.

Prerequisite: Psychology 208 and permission of instructor.

281. Seminar in Critical Problems in Research Methods. (3) I.

Current critical problems in the area of research and quantitative methods. Topics selected will vary with the interests of students and instructor.

* Not to be given, 1963-1964.

- 282. Critical Problems in Sensation. (3) I.** Mr. Jones
Prerequisite: Psychology 201.
- 283. Language and Communication. (3) II.** Mr. Carterette
Prerequisite: Psychology 201.
- 284. Critical Problems in Perception. (3) I.** Mr. Kaswan
Prerequisite: Psychology 201.
- *285. Seminar in Conditioning. (3) I.** _____
Prerequisite: Psychology 200.
- *286. Seminar in Motivation. (3) I.** _____
Prerequisite: Psychology 200.
- *287. Seminar in Higher Mental Processes. (3) II.** Mr. Maltzman
Prerequisite: Psychology 218.
- 288. Problems in Behavior Theory. (3) II.** Mr. Seward
Prerequisite: Psychology 219.
Critical issues will be examined with emphasis on the experimental strategies necessary to resolve them.
- 289. Seminar in Comparative Learning. (3) II.** _____
Prerequisite: Psychology 200.
- *290. Critical Problems in Learning. (3) I.** _____
- *291. Seminar in Somesthesia and the Chemical Senses. (3) II.** Mr. Jones
- 293. Seminar in Research on Psychopathology. (3) II.** Mr. Rodnick
Prerequisite: courses 168 and 202, or the equivalent.
Current experimental research trends in psychopathology.
- 298. Special Problems in Psychology. (3) I, II.** The Staff
The content will depend upon the interests of the particular instructor.
- 299. Research in Psychology. (1-6) I, II.** The Staff
(Former number, 278A-278B.)
Required each semester of all graduate students, beginning with the first semester of the second year (except for terminal M.A. candidates).
- 401A-401B. Internship in Applied Psychology. (3-6; 3-6) Yr.**
Prerequisite: consent of the adviser.

PUBLIC HEALTH

(Department Office, 1209 Public Health Building)

Ruth Abernathy, Ph.D., *Professor of School Health Education.*

Fred A. Bryan, M.D., *Professor of Public Health, Professor of Preventive Medicine and Public Health, and Professor of Medicine.*

Albert F. Bush, M.S., *Professor of Sanitary Engineering and Professor of Engineering.*

* Not to be given, 1963-1964.

- John M. Chapman, M.D., M.P.H., *Professor of Epidemiology, Professor of Preventive Medicine and Public Health, and Professor of Medical Microbiology and Immunology.*
- Wilfrid J. Dixon, Ph.D., *Professor of Biostatistics and Professor of Preventive Medicine and Public Health, and Vice-Chairman of the Department.*
- Gladys A. Emerson, Ph.D., *Professor of Nutrition.*
- Jean S. Felton, M.D., *Professor of Occupational Health and Professor of Preventive Medicine and Public Health.*
- Lenor S. Goerke, M.D., M.S.P.H., *Professor of Public Health (Chairman of the Department) and Professor of Preventive Medicine and Public Health (Chairman of the Department).*
- Edward B. Johns, Ed.D., *Professor of School Health Education.*
- John W. Knutson, D.D.S., Dr.P.H., *Professor of Public Health and Professor of Dentistry.*
- Paul A. Lembcke, M.D., M.P.H., *Professor of Public Health and Professor of Preventive Medicine and Public Health.*
- Milton I. Roemer, M.D., M.P.H., *Professor of Public Health and Professor of Preventive Medicine and Public Health.*
- Marian E. Swendseid, Ph.D., *Professor of Nutrition and Biological Chemistry.*
- Frank F. Tallman, M.D., *Professor of Public Health Psychiatry and Professor of Psychiatry.*
- Daniel M. Wilner, Ph.D., *Professor of Behavioral Studies in Public Health and Professor of Preventive Medicine and Public Health.*
- Roslyn B. Alfin-Slater, Ph.D., *Associate Professor of Nutrition.*
- John Beeston, M.B., D.P.H., *Associate Professor of Public Health and Associate Professor of Preventive Medicine and Public Health.*
- Ralph Goldman, M.D., *Associate Professor of Geriatrics and Associate Professor of Medicine.*
- Alfred H. Katz, M.A., D.S.W., *Associate Professor of Public Health, Associate Professor of Social Welfare in Medicine and Associate Professor of Social Welfare.*
- Frank J. Massey, Ph.D., *Associate Professor of Biostatistics and Associate Professor of Preventive Medicine and Public Health.*
- Edward L. Rada, Ph.D., *Associate Professor of Economics.*
- Leo G. Reeder, Ph.D., *Associate Professor of Public Health, Associate Professor of Preventive Medicine and Public Health, and Lecturer in Sociology.*
- Guy W. Steuart, Ph.D., M.P.H., *Associate Professor of Public Health and Associate Professor of Preventive Medicine and Public Health.*
- Wilfred C. Sutton, Ed.D., *Associate Professor of School Health Education.*
- Henry H. Work, M.D., *Associate Professor of Public Health Psychiatry and Associate Professor of Psychiatry.*
- Joy G. Cauffman, Ph.D., *Assistant Professor of School Health Education.*
- Robert Windsor Day, Ph.D., M.D., M.P.H., *Assistant Professor of Public Health and Assistant Professor of Epidemiology.*
- Olive Jean Dunn, Ph.D., *Assistant Professor of Biostatistics and Assistant Professor of Preventive Medicine and Public Health.*
- Lonis W. Liverman, M.S.W., *Assistant Professor of Public Health and Assistant Professor of Social Welfare in Medicine.*

- Frederick J. Post, Ph.D., *Assistant Professor of Sanitary Science and Assistant Professor of Preventive Medicine and Public Health.*
 Marsden G. Wagner, M.D., M.S.P.H., *Assistant Professor of Public Health and Assistant Professor of Pediatrics.*
 Miriam G. Wilson, M.D., *Assistant Professor of Pediatrics.*
 ———, *Assistant Professor of Public Health Administration.*

- Richard H. Brennehan, Ph.D., *Lecturer in Occupational Health.*
 George Browning, M.D., M.P.H., *Lecturer in Public Health and Assistant Clinical Professor of Preventive Medicine and Public Health.*
 Edith M. Carlisle, Ph.D., *Lecturer in Nutrition.*
 Virginia A. Clark, Ph.D., *Lecturer in Public Health.*
 John T. Fodor, M.S., *Lecturer in School Health Education.*
 Dean W. Gilman, M.D., M.P.H., *Lecturer in Public Health.*
 John R. Goldsmith, M.D., M.P.H., *Lecturer in Public Health.*
 Robert W. Hayes, B.A., M.P.H., *Lecturer in Mental Hospital Administration.*
 Herbert L. Herschensohn, Sc.B., M.D., *Lecturer in Public Health, Associate Clinical Professor of Preventive Medicine and Public Health, and Associate Clinical Professor of Medicine.*
 Gerald A. Heidbreder, M.D., M.P.H., *Lecturer in Public Health and Assistant Clinical Professor of Infectious Diseases.*
 Olive G. Johnson, B.A., *Lecturer in Public Health and Associate in Preventive Medicine and Public Health.*
 Rutherford T. Johnstone, A.B., M.D., *Lecturer in Public Health, Clinical Professor of Medicine and Preventive Medicine and Public Health.*
 Gene G. Kassebaum, Ph.D., *Lecturer in Public Health.*
 Barbara M. Korsch, M.D., *Lecturer in Public Health and Associate Clinical Professor of Preventive Medicine.*
 Hallett A. Lewis, M.D., *Lecturer in Occupational Health.*
 Edward P. Luongo, M.D., *Lecturer in Public Health, Associate Clinical Professor of Medicine and Preventive Medicine and Public Health.*
 Harold Mazur, M.D., M.P.H., *Lecturer in Public Health.*
 Florence C. McGucken, M.S., *Lecturer in Nutrition.*
 Max R. Mickey, Jr., Ph.D., *Lecturer in Public Health.*
 Seward E. Miller, M.D., *Lecturer in Public Health and Clinical Professor of Preventive Medicine.*
 Byron O. Mork, M.D., M.P.H., *Lecturer in Public Health and Associate Clinical Professor of Preventive Medicine and Public Health.*
 Agnes A. O'Leary, R.N., M.P.H., *Lecturer in Public Health and Associate Professor of Public Health Nursing.*
 Harriett B. Randall, M.D., *Lecturer in Public Health.*
 Donald T. Rice, M.D., M.P.H., *Lecturer in Public Health and Preventive Medicine.*
 Clark M. Richardson, M.D., M.P.H., *Lecturer in Public Health.*
 Edward L. Russell, M.D., M.A., *Lecturer in Public Health.*
 Ernest M. Sable, A.B., M.P.H., *Lecturer in Hospital Administration.*
 Charles L. Senn, B.S.(C.E.), M.S.(P.A.), *Lecturer in Public Health.*
 Leo Tepper, M.D., M.P.H., *Lecturer in Tuberculosis Control.*
 Robert E. Thomas, M.D., *Lecturer in Community Mental Health.*

Packard Thurber, Jr., M.D., *Lecturer in Public Health and Associate Clinical Professor of Preventive Medicine and Public Health.*

J. Albert Torribio, M.S.S.W., M.S.W., *Lecturer in Health Education.*

Rosabelle P. Walkley, B.A., *Lecturer in Behavioral Sciences.*

David A. Ward, Ph.D., *Lecturer in Public Health.*

Thomas P. Weil, A.B., M.P.H., *Lecturer in Public Health.*

Edward J. Zaik, M.S., M.D., *Lecturer in Public Health, Associate Clinical Professor of Preventive Medicine and Public Health, and Associate Clinical Professor of Medicine.*

George Tarjan, M.D., *Clinical Professor of Psychiatry.*

Richard Call, M.D., *Associate Clinical Professor of Public Health.*

Alexander Andrew Doerner, M.D., *Associate Clinical Professor of Public Health and Associate Clinical Professor of Preventive Medicine and Public Health.*

Kenneth M. Eastman, B.S., *Associate Clinical Professor of Hospital Administration.*

Toby Freedman, M.D., *Associate Clinical Professor of Public Health and Associate Clinical Professor of Preventive Medicine and Public Health.*

Sidney Goren, Sc.D., *Associate Clinical Professor of Public Health.*

Carl E. Hopkins, Ph.D., *Associate Clinical Professor of Preventive Medicine and Public Health.*

Howard Laitin, Ph.D., *Associate Clinical Professor of Hospital and Medical Care Administration.*

Ralph E. Sachs, M.D., M.P.H., *Associate Clinical Professor of Public Health.*

Robert L. Smith, M.D., M.P.H., *Associate Clinical Professor of Public Health.*

Letters and Science List.—Course 5, 100, 110, 147, 160A are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

School of Public Health

Curriculum requirements for the Bachelor of Science degree and the Master of Science, Master of Public Health, Doctor of Public Health and Doctor of Philosophy degrees are described in the UCLA ANNOUNCEMENT OF THE SCHOOL OF PUBLIC HEALTH and on pages 152-159 of this bulletin.

Lower Division Courses

5. Introduction to Health and Human Ecology. (3) I, II. Mr. Beeston

An introduction to the understanding of the equilibrium between the internal forces in Man and the external forces in his environment which relate to health, and to the evolution, prevention, and control of disease.

44. Principles of Healthful Living. (3) I, II. The Staff

Fundamentals of healthful living; designed to provide scientific health information and promote desirable attitudes and practices. A prerequisite to Physical Education 330 for all elementary school credential candidates.

Upper Division Courses

100. Principles of Public Health. (3) I, II. Mr. Rice, Mr. Steuart

The identification of health service needs and the philosophy, principles and methods of community organization concerned with meeting these needs.

- 101. Introduction to Medical Science. (3) II.** Mr. Goldman
Prerequisite: at least 9 units from the following courses: Bacteriology 1; Chemistry 1A-1B; Zoology 1A-1B, 100A, 100B, 101A, 101B, 101C or 102; and consent of the instructor.
This course will present an introduction to disease processes. It is intended primarily for students in public health and is not open to premedical students.
- 102A-102B. Health Record Science. (3-3) Yr.** Miss Johnson
Lectures, two hours; laboratory, three hours. Prerequisite: enrollment as a major in public health.
Nosology. Principles and theories of systems and techniques used for organization, analysis, and maintenance of records and reports are studied and evaluated according to their use in varied situations.
- 106. Economic Problems of Families. (3) I.** Mr. Rada
Prerequisite: Economics 1A-1B.
An analysis of the major economic problems of production, income, and consumption affecting individuals and different types of American families.
- 107. Family Finance. (3) II.** Mr. Rada
Prerequisite: Economics 1A-1B, and course 106 or consent of the instructor.
Management of household income and assets in relation to expenditures. The role of savings, consumer credit, personal investment, home ownership, insurance, social security, and taxes in household financial planning.
- 108. Housing of American Families. (3) I.** Mr. Rada
Prerequisite: Economics 1A-1B; three field trips to be arranged.
The economic history of housing, standards of housing, essentials of healthful housing, supply and demand factors affecting housing prices, economic costs, government activities affecting housing; prevention and abolition of slums.
- 110. Environmental Health. (3) I, II.** Mr. Post
Prerequisite: Bacteriology 1, or Zoology 1A and Chemistry 1A.
The fundamentals of environmental sanitation, including an introduction to the relationship of the physical environment to preventive medicine.
- 112. Public Health Engineering. (3) I.** Mr. Senn
Prerequisite: course 110, and consent of the instructor.
Public Health engineering principles for nonengineers, relating to surveys, reviews and sanitary control of water supplies, waste disposal, ventilation and air pollution, drainage and building design and equipment.
- 130A. School Health Education. (3) I, II.** Miss Abernathy, Mrs. Cauffman, Mr. Fodor, Mr. Johns
(Formerly Physical Education 145A.)
Prerequisite: course 44 or consent of the instructor.
Organization and administration of the School Health Program; underlying principles, including legal aspects; administrative divisions of health instruction, health services, and healthful school living; and interrelationships with community health agencies.
- 130B. School Health Education. (3) I, II.** Mrs. Cauffman, Mr. Fodor, Mr. Sutton
(Formerly Physical Education 145B.)
Prerequisite: courses 44 and 130A or consent of the instructor.
Health instruction as an integral part of the total school and college program, and plans for in-service education.
- 131. Principles of School-Child Health. (3) I, II.** Mrs. Cauffman
(Formerly Physical Education 147.)
Prerequisite: course 44 or consent of the instructor (not open to school health education majors).
The history, philosophy and principles of health as applied to the needs of school children.

- 134. Community Health Education. (3) I, II.** Mr. Steuart, Mr. Torribio
Lectures, two hours; laboratory, three hours.
The theory, principles, and practices of education and community organization involved in promoting health. Consideration of health facts and fallacies, communication, and motivation of individuals, groups, and communities.
- 147. Principles of Epidemiology. (3) I, II.** Mr. Chapman
Lectures, two hours; laboratory, three hours. Prerequisite: Bacteriology 1, Zoology 1A-1B, course 160A.
Introduction to epidemiology including study of factors governing the occurrence of infectious and noninfectious diseases in populations. Laboratory problems illustrative of basic principles of epidemiology.
- 153. Public Health Microbiology. (4) I.** Mr. Post
Lectures, three hours; laboratory, three hours. Prerequisite: Bacteriology 1, Chemistry 1A-1B; primarily for seniors or graduate students.
Principles of microbiology relevant to sanitation of water, sewage, soil, refuse, milk and foods.
- 160A. Introduction to Biostatistics. (3) I, II.** Mr. Massey, Mrs. Dunn
Lectures, two hours; laboratory, three hours. Prerequisite: upper division standing; courses in the biological or physical sciences. Students who have completed courses in statistics may enroll only with the consent of the instructor.
Introduction to methods and concepts of statistical analysis. Sampling situations with special attention to those occurring in the biological sciences. Topics will include: distributions, tests of hypotheses, estimation, types of error, significance and confidence levels, sample size.
- 160B. Introduction to Biostatistics. (3) I, II.** Mr. Massey, Mrs. Dunn
Lectures, two hours; laboratory, three hours. Prerequisite: course 160A, or consent of the instructor.
Introduction to analysis of variance, regression, correlation, sequential analysis, distribution-free methods, bioassay.
- 160C. Introduction to Biostatistics. (3) I.** Mrs. Dunn, Mr. Massey
Lectures, two hours; laboratory, three hours. Prerequisite: courses 160A, 160B, or consent of the instructor.
Experimental design and analysis of variance as applied in modern research; linear and multiple regression, complete and incomplete block design, factorial experiments, Latin squares, analysis of covariance, multiple comparisons, and related topics.
- 161. Demography. (3) I.** Mrs. Dunn, Mr. Massey
Lectures, two hours; laboratory, three hours. Prerequisite: course 160A, or consent of the instructor.
The description of human populations including elements of vital statistics, demography and life tables. Methods of sampling from human populations with appropriate procedures for estimating parameters and for testing hypotheses.
- 170. Occupational Health. (2) I, II.** Mr. Bryan, Mr. Felton
A survey of the field of occupational health and hygiene. Discussion of occupational diseases and hazards, their evaluation, and methods of control; plant medical services and other organizations concerned with occupational health problems.
- 180. Survey of Public Health. (3) I, II.** Mr. Lembcke and the Staff
Lectures, three hours. Prerequisite: R.N., senior standing in the School of Nursing, or consent of the instructor.
Principles of epidemiology, public health administration, and occupational health.
- 198. Special Courses. (1-5) I, II.** The Staff
- 199. Special Studies. (1-5) I, II.** The Staff
Prerequisite: senior standing and consent of the instructor.

Graduate Courses

200A-200B. Principles of Health Administration and Organization. (3-3)

Yr.

Mr. Richardson, Mr. Wilner

Lectures, two hours; laboratory, three hours. Prerequisite: consent of the instructor.
The study of administrative theory, principles and practice in providing health services. Special consideration is given to the use of managerial techniques and procedures by social institutions organized to integrate medical programs of prevention, therapy, and rehabilitation.

201A. Hospital Administration. (3) I.

Mr. Lembcke, Mr. Roemer

Lectures, two hours; laboratory, three hours. Prerequisite: consent of the instructor.
On completion of course 201A, students will take 201B or 201C according to their particular interest and background.

Principles of the organization and administration of general hospitals and medical care agencies.

201B. Hospital Administration. (3) II.

Mr. Lembcke, Mr. Roemer

Lectures, two hours; laboratory, three hours. Prerequisite: course 201A.
Principles of the organization and administration of general hospitals and medical care agencies.

201C. Mental Hospital and Health Program Administration. (3) II.

Mr. Lembcke

Lectures, two hours; laboratory, three hours. Prerequisite: course 201A.
Study of the principles involved in planning, organizing, and administering institutional, outpatient, and preventive programs in the mental health field. Lectures, discussion, case studies, and field observation.

202A-202B. Medical Care Administration. (2-2) Yr.

Prerequisite: consent of the instructor.

Mr. Roemer, Mr. Lembcke

Medical economics, medical care resources, and medical care programs. Features of governmentally-sponsored medical care and voluntary health insurance in the United States and abroad. Problems of administration of medical care, methods of quality evaluation, and legislative issues.

203A-203B. Maternal and Child Health. (2-2) Yr.

Mr. Wagner

Prerequisite: consent of the instructor.

Study of medical and social programs affecting the life and health of mothers and children; problems of fertility, conception and pregnancy wastage, and the association of abnormal maternal factors with premature birth; and with later abnormalities in children.

210. Environmental Health. (3) II.

Mr. Senn

Prerequisite: course 110, or equivalent.

Theoretical considerations of the complex relationship of the physical environment to preventive medicine and public health.

213A. Environmental Science. (2) I.

Mr. Bush

Prerequisite: course 112, or equivalent, or consent of the instructor.

Advanced study of the relationship of the physical environment to man.

213B. Environmental Science. (2) II.

Mr. Post

Prerequisite: course 153, or equivalent, or consent of the instructor.

Advanced study of the relationship of the biological environment to man.

217. Epidemiology and Genetics. (2) II.

Mr. Day

Lecture, one hour; laboratory, three hours. Prerequisite: course 160A, Zoology 180A, graduate standing in the area of biomedical sciences and consent of the instructor.

Genetic mechanisms important in the etiology and distribution of disease in populations, diagnostic methods applicable to large groups, evaluation of genetic factors in the epidemiology of diseases of public health importance.

220A-220B. Occupational Health Administration. (2-2) Yr. Mr. Felton

Prerequisite: consent of the instructor.

A detailed consideration of the philosophy, organization, principles and operation of various types of occupational health programs with a review of pertinent literature, and a discussion of record systems, communications and relationships with rehabilitation and insurance programs.

221A-221B. Occupational Environmental Control. (2-2) Yr.

Mr. Bryan and the Staff

Lecture, one hour; laboratory, three hours. Prerequisite: consent of the instructor.

The identification, measurement, evaluation, and control of physical and chemical environmental factors affecting the health of industrial workers. Development and use of control measures and devices providing a safe occupational environment.

222. Air Pollution. (2) II.

Mr. Bryan and the Staff

Lecture, one hour; laboratory, three hours. Prerequisite: consent of the instructor.

Consideration of air pollution in cities as a health and control problem. The effects of exposure of the population to air pollutants produced by industrial wastes or manufacturing methods.

223. Occupational Radiologic Safety. (2) II.

Mr. Bryan

Prerequisite: consent of the instructor.

Uses of radioisotopes and various radiation-producing devices in industry. Types of radiation, their sources, detection, measurement, and monitoring. Biologic effects and methods of protection against typical radioactive materials and sources.

224. Environmental Toxicology. (2) I.

Mr. Bryan and the Staff

Prerequisite: courses 221A-221B and 274A-274B or consent of the instructor.

A discussion of the many toxic chemicals encountered in man's varied work environments with emphasis upon the specific action of toxic chemicals upon cells, selective affinity of toxic materials for tissues, and the toxic manifestations in man.

***225. Occupational Psychiatry. (2) II.**

Mr. Felton, Mr. Tallman

Prerequisite: Psychology 1A and 33 or equivalent, or Sociology 131, and consent of the instructor.

A consideration of the emotional problems of the worker as a factor in his ability to produce satisfactorily. The recognition, control, referral, and emergency treatment of the emotional and psychiatric problems of the industrial worker.

227. Environmental Physiology. (2) II.

Mr. Miller and the Staff

Prerequisite: consent of the instructor.

Man's physiologic responses to work and his adaptation and reaction to physical agents in his environment, including temperature, atmospheric pressure, gravity, radiation and light.

228. Occupational Diseases. (2) II.

Mr. Miller and the Staff

Prerequisite: courses 221A-221B, 274A-274B or consent of the instructor.

A detailed consideration of the etiology, pathology, clinical manifestations, diagnosis and treatment of selected occupational diseases with emphasis upon prevention.

234. Community Health Education. (2) I.

Mr. Stuart

Prerequisite: consent of the instructor.

Problems of social, economic, and cultural origin as they apply to sound community organization in the public health field. Examination of the health education activities of professional, voluntary, and official health agencies and analysis of their interrelationships.

235. Health Education in Clinical Settings. (2) II.

Mr. Stuart

Prerequisite: consent of the instructor.

Analysis of the role, methods, and techniques of health education pertaining to hospitals, clinics, and patient education. Observation and discussion of clinical activities in the medical center in relation to the process of health education.

* Not to be given, 1963-1964.

240A-240B. Biostatistics. (3-3) Yr.

Mr. Dixon, Mr. Massey

Prerequisite: courses 160A, 160B, 160C, Mathematics 4A, or consent of the instructor.

Quantitative methods in public health, medicine, and the biological sciences, statistical theory and application of problems in the design and analysis of experiments and surveys.

241. Advanced Biostatistics. (3) I.

Mrs. Dunn

Prerequisite: Statistics 131A-131B, Mathematics 108, plus the equivalent of 6 units of statistical methods.

Topics in probability and distribution theory leading toward multivariate analysis as it is used in biological and medical situations.

242. Multivariate Biostatistics. (3) II.

Mrs. Dunn

Prerequisite: course 241 or equivalent.

Multivariate analysis including topics from: component analysis, factor analysis, discriminant functions, analysis of dispersion, canonical analysis.

243. Mathematical Theory of Epidemics. (3) I.

Mr. Massey

Prerequisite: courses in upper division mathematics including statistics and probability.

Mathematical theory used in epidemic situations. Deterministic and stochastic models. Problems involved in applying the theory

245. Research Methods in Community Health. (2) II.

Prerequisite: course 160A, or equivalent.

Mr. Reeder and the Staff

Preparation for planning and conducting research projects; methods and techniques of community health research including discussion of current research projects and presentation of students' own research plans.

246A. Introduction to Epidemiology. (3) I.

Mr. Chapman and the Staff

Lectures, two hours; laboratory, three hours. Prerequisite: D.V.M., D.D.S., or M.D. degree; consent of the instructor.

An introduction to the principles and methods of epidemiology with examples drawn from both the infectious and chronic disease areas.

246B. Advanced Epidemiology. (3) II.

Mr. Chapman

Lectures, two hours; laboratory, three hours. Prerequisite: courses 160A, 246A.

Advanced study of epidemiology of acute and chronic disease including epidemiologic research methods and appraisal of current knowledge.

248. Epidemiologic Studies in Human Populations. (2) II.

Prerequisite: course 147 or 246A.

Mr. Chapman and the Staff

Studies of the application of epidemiologic methods and principles to a variety of disease situations within human populations.

249. Society, Culture, and Health. (2) I.

Mr. Reeder

Prerequisite: consent of the instructor.

Relationship of basic concepts in the behavioral sciences pertinent to health and medical care; cultural and social class variations in health status; health team and community relations; community decision-making in public health.

250. Current Problems in School Health Education. (2) I.

Mr. Johns

(Formerly Physical Education 254.)

Prerequisite: courses 130A, 130B or consent of the instructor.

A study of new findings in the health education content areas (such as nutrition, mental health, family health, consumer health, safety, communicable and chronic diseases).

252A-252B. Seminar in Public Health Psychiatry. (2-2) Yr.

The Staff

Prerequisite: consent of the instructor.

Study of community problems in mental disease, retardation, deviations, and delinquency, and the social agencies that have been developed to meet them. Covers also such areas as marriage counseling, divorce, psychological problems of aging, and forensic psychiatry. Emphasis is placed on the role of research in public health psychiatry.

253A-253B. Seminar in Medical Care Administration. (2-2) Yr.

Prerequisite: enrollment in course 202A-202B.

Advanced study, by the seminar method, of the areas of medical care described for course 202A-202B.

256A-256B. Seminar in International Health. (2-2) Yr.**Mr. Rice**

Prerequisite: consent of the instructor.

A survey and analysis of the problems and implications, and current research in the field of the field of World health and population levels, and a study of the origin, orientation and purpose of the multilateral and bilateral agencies functioning in this field.

257A-257B. Seminar in Health Administration and Organization. (2-2) Yr.**Mr. Wilner, Mr. Richardson**

(Numbered course 259A-259B prior to 1960-1961.)

Prerequisite: consent of the instructor, and enrollment in course 200A-200B.

Advanced study of the areas of health administration and organization described for course 200A-200B.

261A-261B. Seminar in Community Health Education. (1-1) Yr.

Prerequisite: consent of the instructor.

Mr. Steuart and the Staff**265A-265B. Seminar in Epidemiology. (1-1) Yr.**

(Numbered course 249 prior to 1960-1961.)

Mr. Chapman and the Staff

Prerequisite: major in epidemiology, or consent of the instructor.

Student presentations of pertinent material examining the methods and principles of epidemiology as applied to specific situations.

269A-269B. Seminar in Biostatistics. (1-1) Yr.

Prerequisite: consent of the instructor.

Mr. Dixon, Mrs. Dunn, Mr. Massey**274A-274B. Seminar in Occupational Health. (1-1) Yr.****Mr. Felton**

Prerequisite: consent of the instructor.

Intended primarily for industrial hygienists and physicians, a study of approximately 10 selected industries covering the materials, processes, techniques, working conditions, health problems, control measures, and organization, and administration of the health programs appropriate to those industries. Assignment of special problems with each industry studied.

280A-280B. Seminar in Environmental Health. (1-1) Yr.**Mr. Post**

Prerequisite: consent of the instructor.

290. Special Group Studies. (1-5) I, II.**The Staff**

Prerequisite: consent of the instructor.

A. Community and Institutions.

B. Environmental Health.

C. Epidemiology of Specific Diseases.

D. Hospital Administration.

E. International Health.

F. Maternal and Child Health.

G. Medical Care Administration.

H. Occupational Health.

J. Public Health Psychiatry.

297. Individual Studies for Graduate Students. (1-5) I, II.**The Staff**

Prerequisite: consent of the instructor.

299. Research for Thesis or Dissertation. (1-5) I, II.**The Staff**

Prerequisite: consent of the instructor.

402A-402B. Health Records: Planning, Analysis and Research. (3-3) Yr.**Miss Johnson**

Lectures, two hours; laboratory, three hours. Prerequisite: consent of the instructor.

Health and administrative research, using clinical records. Principles of planning for routine and special studies. Individual investigation in methods of obtaining and processing data to meet needs of programs in institution and agency. Introduction to principles of medical auditing; analysis of medical and health services.

RADIOLOGY

(Department Office, B5-117 Center for the Health Sciences)

Leslie R. Bennett, M.D., *Professor of Radiology.*

Andrew H. Dowdy, M.D., D.Sc., *Professor of Radiology (Chairman of the Department).*

Moses A. Greenfield, Ph.D., *Professor of Radiology.*

Raymond L. Libby, Ph.D., *Professor of Radiology.*

Bernard J. O'Loughlin, M.D., Ph.D., *Professor of Radiology.*

Richard E. Ottoman, M.D., *Professor of Radiology and Anatomy.*

Justin J. Stein, M.D., *Professor of Radiology.*

William N. Hanafee, M.D., *Associate Professor of Radiology.*

Gerald M. McDonnell, M.D., *Associate Professor of Radiology.*

Amos Norman, Ph.D., *Associate Professor of Radiology.*

Richard F. Riley, Ph.D., *Associate Professor of Radiology and Biological Chemistry.*

Joseph L. Westover, M.D., *Associate Professor of Radiology.*

Edward A. Langdon, M.D., *Assistant Professor of Radiology.*

John M. Riley, M.D., *Assistant Professor of Radiology.*

Milo M. Webber, M.D., *Assistant Professor of Radiology.*

———, *Assistant Professor of Radiology.*

Leo G. Rigler, M.D., *Visiting Professor of Radiology.*

Ross Golden, M.D., *Lecturer in Radiology.*

Theodore T. Ott, *Lecturer in Radiology.*

Requirements for Admission to Graduate Status

Candidates for admission to graduate status in the Department of Radiology must conform to the general requirements set by the Graduate Division for admission to such status. In addition to meeting the requirements of the Graduate Division, the student must have received the bachelor's degree from one of the colleges of this University, based on a curriculum that includes the requirements for full graduate status in a department of his major subject, or must have pursued successfully an equivalent course of study elsewhere.

All students admitted to graduate status in the Department of Radiology are required, during their first semester in residence, to take a preliminary examination in the physical, chemical, and biological foundations of medical physics and radiological sciences. Satisfactory performance in these examinations is prerequisite to continuation of graduate standing in the department. These examinations are designed to evaluate the scientific competence of the student and to facilitate the work of the staff in recommending a study program which will most effectively aid his development.

Areas of Study.—Study in the fields of radiation physics, radiation biology and radiation chemistry will be open to qualified candidates.

Requirements for the Degree of Master of Science in Radiology

1. General University Requirements. Candidates for the Master of Science degree in the radiological sciences must conform to the general requirements set by the Graduate Division for this degree. The candidate may elect either Plan I (thesis) or Plan II (comprehensive final examination) as set forth on on pages 162-165 of this bulletin.

2. Departmental Requirements.

- (a) Satisfactory completion of requisite departmental courses.
- (b) Satisfactory completion of work in a minor field.
- (c) Reading knowledge of one foreign language pertaining to the field of study.
- (d) A thesis (Plan I) or a comprehensive final examination (Plan II).

Requirements for the Doctor's Degree in Medical Physics (Radiology)

1. General University Requirements. Candidates for the doctorate in Medical Physics (Radiology) must conform to the general requirements set by the Graduate Division for this degree. It should be noted that the student must pass a series of written and oral examinations before admission to candidacy.

2. Departmental Requirements.

- (a) Admission to Candidacy. Admission to candidacy is granted only after the student has passed a qualifying oral examination in the physical, biological, and chemical foundations of medical physics. This examination may not be taken more than twice. The student's guidance committee will be appointed by the chairman of the department upon admission to regular status in the department.
- (b) Course Requirements.
 - (1) Normally graduate students will be required to take courses 200, 201, 204 and 206.
 - (2) Satisfactory completion of such courses as the guidance committee may recommend as appropriate for the development of the student.
- (c) Foreign Languages. A reading knowledge of French and German normally is required.
- (d) General. Prospective candidates for the doctor's degree are responsible for completion of all technical requirements for this degree.

It should be noted that the doctorate in Medical Physics (Radiology) is not granted merely upon completion of routine requirements as to examinations, courses and dissertation; fulfillment of such requirements is a prerequisite. The doctor's degree will be granted only to students who have clearly demonstrated both an adequate grasp of a broad field of knowledge and their ability to contribute to that field of knowledge by original and independent research.

Graduate Courses**200. Radioactivity—Principles and Measurements. (2) I.****Mr. Greenfield and the Staff**

This course gives the necessary physical and mathematical background for the use of radiation techniques and isotopes in biological research and measurements of nuclear radiations.

201. Applied Nuclear Physics. (2) II.**Mr. Libby and the Staff**

Isotope methodology in biological research; instrumentation, detection and the quantitative determination of radioactivity.

202A–202B. Clinical Radioisotopes. (1–5) I, II. Mr. Bennett and the Staff

Application of radioisotopes to clinical problems. Course intended for physicians and radiation physicists.

- 204. Introduction to Foundations of Radiobiology. (2) II.** Mr. Riley
Effects on chemical and biological systems; this course is intended primarily for residents in radiology and graduate students. Moderately advanced courses in physics, mathematics and chemistry will be required. Consent of instructor needed.
- 206A-206B. Radiological Physics. (2) I, II.** Mr. Greenfield and the Staff
Production and properties of x-rays, interaction of x-rays with a scattering medium, radium and radium dosage, radiation protection, clinical applications.
- 206C-206D. Radiological Physics Laboratory. (2) I, II.** Mr. Greenfield and the Staff
Techniques for measuring ionizing radiation; applications to x-ray and isotope dosimetry, radiation surveys.
- 207. Dosimetry and Health Physics. (1) I, II.** Mr. Bailly
Prerequisite: courses 200 and 206A and 206B or equivalent.
This course will include a comprehensive treatment of the basic phenomena in the dosimetry of ionizing radiations, the interpretation of physical measurements and dosimetric units, and the philosophy of protection design.
- 209. The Quantitative Culture of Mammalian Cells. (2) I or II.** Mr. Norman
Techniques for quantitative studies on mammalian cells in vitro with applications to radiation biology, genetics and virology. By permission of instructor.
- 211. Roentgenoscopy. (2-6) I or II.** Mr. O'Loughlin and the Staff
A survey of the mobility and density characteristics of various fluids, fat protein and mineral solids naturally occurring in the body, with more intensive study of their interrelationships and their similar tissues will also be explored. Dynamic physiological and pathological changes will be studied.
- 212. Radiation Therapy. (2-6) I or II.** Mr. Stein
A survey of basic principles of radiobiology, with special attention to reactions of neoplastic and inflammatory processes to ionizing radiation of various types. The distribution and summation of radiation effects and their relationship to the growth of cancer will be intensively studied. The systemic effects of radiation, radiation sickness, and the pharmacological problems posed will be of particular interest.
- 213. Roentgen Diagnosis. (2-6) I or II.** Mr. O'Loughlin and the Staff
Deliberate analysis of the graphically recorded changes noted roentgenoscopically as well as the tissue changes apparent with various disease entities. An attempt is made to understand the pathogenesis of these processes and to arrive at diagnostic and prognostic conclusions in each instance. Anatomical development is also studied, and differentiation between normal and abnormal growth is estimated.
- 214A-214B. Pediatric Radiology. (1) I, II.** Mr. O'Loughlin
Special methods in diseases in children.
- 218A-218B. Analytic Roentgenology. (2) I, II.** Mr. Dowdy and the Staff
Analytic studies of current autopsy and surgical material and the related roentgenograms.
- 220A-220B. Forensic Radiology, History and Ethics. (1) I, II.** Mr. Golden and Mr. Rigler
The history of radiology up to the present. Forensic and ethical problems in radiology. Special attention will be given to the radiologist's relations with his patient, his colleagues and the state.
- 260A-260B. Radiology Seminar. (1-3) I, II.** Mr. Dowdy and the Staff
Joint critical study by students and instructors of the fields of organized knowledge pertaining to radiology. Periodic contributions are made by visiting professors. Research in progress is discussed.

297A-297B. Research in Radiology. (2-6) I, II. Mr. Dowdy and the Staff

Prerequisite: approval of the Chairman of the Department.

Investigations authorized by the department chairman may be undertaken independently by the more advanced students but will usually be carried out under the guidance of appropriate members of the staff.

299. Research on Dissertation. (1-6) I, II. The Staff

Includes all research investigation undertaken by candidates for advanced degrees and by residents in Radiology.

Professional Courses

403A-403B. Combined Diagnostic Conference. (5) I, II.

Mr. O'Loughlin and the Staff

Group analysis of diagnostic problems found in hospital and clinical practice.

404A-404B. Radiation Therapy Conference. (1) I, II.

Mr. Stein and the Staff

Presentation of selected current therapeutic problem cases of general interest.

405. Consultative Tumor Board. (1-3) I or II. Mr. Dowdy and Mr. Stein

Presentation of tumor cases for diagnosis and appropriate therapy with discussion of differential diagnosis and combinations of theory such as surgery, x-ray, radium therapy, and isotopes.

413. Radiation Safety. (0) I or II. Mr. Libby and the Staff

This course is designed to instruct graduate students, residents, technicians and others in methods of safely handling and confining radioactive materials.

451A, 451B, 451S. Seminar in Radiology. (10) I, II.

Mr. Dowdy and the Staff

The Seminar in Radiology will consist of daily clinical teaching exercises.

Residency Training and Postdoctoral Graduate Work

A four-year residency training program is offered in the Department of Radiology. This program, which covers all the divisions of Radiology and the Seminar in Radiology (Radiology 451A, 451B, 451S), leads to a certificate awarded by the School of Medicine and the Department of Radiology. Requests for information concerning prerequisites and application for appointment may be addressed to the office of the Chairman, Department of Radiology, University of California, Los Angeles 24, California.

Research

Investigative activities are encouraged throughout the department, and other departments are encouraged to make use of the personnel and facilities of the Department of Radiology in research pertaining to radiology.

ROMANCE LANGUAGES AND LITERATURES

The Degree of Doctor of Philosophy in Romance Languages and Literatures

Candidates for the degree of Doctor of Philosophy in Romance languages and literatures will be accepted with major fields in French, Italian, or Spanish. The requirements listed below should be regarded as minimum requirements; guidance committees may supplement those listed.

§ See also French (page 327), Italian (page 384), and Spanish (page 551).

I. Minimum prerequisites for admission to candidacy:

1. A reading knowledge of Latin (equivalent at least to that gained in two high school years), French, German, Italian, and Spanish to be tested by a written examination.
2. An A.B. degree, with the equivalent of a major in French, Italian, or Spanish at the University of California.
3. The satisfactory completion of one year's work in the Graduate Division of the University or in another recognized graduate school.
4. The passing of qualifying examinations according to the regulations of the University.

II. Minimum requirements for the degree:

1. Two years of graduate study according to the regulation of the University as contained on pages 165-169 of this bulletin. An additional year of foreign study is recommended.
2. Within the general field of Romance languages and literature, specialization in one or more of the Romance literatures or in Romance philology.

A. Requirements for candidates whose principal interest is literary:

- (a) A specific knowledge of French, Italian, and Spanish literatures.

Each guidance committee will advise the candidate how best to meet the requirements in each of the fields.

- (b) A specific knowledge of the philology of the major field.

B. Requirements for candidates whose principal interest is philological:

- (a) A specific knowledge of Vulgar Latin, Old French, Old Provençal, Old Italian, and Old Spanish.
- (b) A specific acquaintance with French, Italian, Spanish, and Old Provençal literatures, with a special emphasis on the literature of the language of the student's main interest.

Each guidance committee will advise the candidate how best to meet the requirements in each of the fields.

SLAVIC LANGUAGES

(Department Office, 332 Royce Hall)

Henrik Birnbaum, Ph.D., *Associate Professor of Slavic Languages.*

Kenneth E. Harper, Ph.D., *Associate Professor of Slavic Languages.*

*Vladimir Markov, Ph.D., *Associate Professor of Slavic Languages (Chairman of the Department).*

†Dean S. Worth, Ph.D., *Associate Professor of Slavic Languages.*

†Gerta H. Worth, Ph.D., *Associate Professor of Slavic Languages.*

Edward H. Denzler, M.A., *Associate in Slavic Languages.*

Margarita Gisetti, M.A., *Associate in Slavic Languages.*

Galina Koulaeff, M.A., *Associate in Slavic Languages.*

Michael Shapiro, M.A., *Acting Instructor in Slavic Languages.*

Nina M. Wiren, *Associate in Slavic Languages.*

† Absent on leave, 1963-1964.

* Sabbatical leave in residence, fall semester, 1963-1964.

Letters and Science List.—All courses in Slavic Languages are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—Courses 1, 2, 3, 4, 18A–18B, 99; History 146A and either 146B or 147 (to be taken in the sophomore year).

The Major.—(1) Requirement in language: courses 103A–103B (or, with permission of the chairman, 104A–104B), 122A–122B, and four units chosen from courses 104A–104B, 111A–111B, 112A–112B, 124A–124B. (2) Requirement in literature: course 130 and 9 units chosen from courses 132, 137, 138, 143A–143B, 144, 145, 147, 149, 150, 160.

Admission to Graduate Status

The completion of the undergraduate major or its equivalent with a minimum grade-point average of 2.5 is required. Students entering from other institutions may be required to take a placement examination in Russian language and literature before enrolling in courses.

Requirements for the Master's Degree

1. For the general requirements, see pages 162–165. The department follows Plan II (comprehensive examination).

2. Application for advancement to candidacy may be made when the student has passed the reading examination in French or German. This examination must be passed no later than during the first month of the semester in which the candidate expects to take his written examinations.

3. *Language requirements:* The student must demonstrate

- (a) fluent reading, writing and speaking knowledge of Russian (normally equivalent to completion of courses 104B and 120) and
- (b) a reading knowledge of one western or southern Slavic language (normally equivalent to completion of course 111A–111B or 112A–112B).

4. *Course requirements:* 24 units in Slavic languages, of which at least 12 must be in strictly graduate courses, to include course 220 and at least one seminar course.

5. A final written examination, based both on course work and on reading suggested by the department, will cover the following fields:

- (a) *Linguistics:* an acquaintance with the basic elements of comparative Slavic linguistics and a thorough knowledge of the history and structure of Russian, including the techniques of historical and structural analysis;
- (b) *Literature:* an acquaintance with the history of Russian literature from its Kievan origins through the Soviet period, and a thorough knowledge of the major developments and figures of the nineteenth and early twentieth centuries.

6. A final oral examination will test the student in the fields of his major interests and on his general background. This examination will be conducted partly in English, partly in Russian.

Requirements for the Doctor's Degree

General Requirements.—See pages 165–169 of this bulletin.

Foreign Languages.—French and German are required.

Qualifying Examinations.—The nature and scope of a series of written qualifying examinations will be prescribed for each candidate by the department. All candidates are expected to have a sound general knowledge of both Slavic philology and Slavic literary history, at least equivalent to that required for the master's degree at this University. In particular, candidates specializing in Slavic literatures will be expected to demonstrate thorough knowledge of the history and structure of the language in which their major literature is written. In addition, candidates specializing in linguistics and literary history respectively will be expected to demonstrate a more detailed mastery of either:

- (a) *Slavic Linguistics*, including (a) Old Church Slavic and Comparative Slavic Linguistics and (b) the history and structure of one major and two minor Slavic languages (one each from the Eastern, Western, and Southern groups), which presupposes (c) reading knowledge of a third Slavic language in addition to Russian and the second language chosen for the master's degree; or
- (b) *Slavic Literatures*, including (a) the entire body of Russian literature from its origins until the present and (b) basic knowledge of the principles and problems of comparative Slavic literary history, which presupposes (c) knowledge of the major figures and developments in the literature of a second Slavic country.

Lower Division Courses

- 1. Beginning Russian.** (4) I, II. The Staff
The first course in the Russian language. To meet five times a week.
- *1G. Elementary Russian—Reading Course for Graduate Students.** (No credit) I, II. The Staff
Four hours a week.
- 2. Elementary Russian.** (4) I, II. The Staff
Prerequisite: course 1.
Continuation of course 1. To meet five times a week.
- 3–4. Second-Year Russian.** (4–4) Yr. Beginning either semester. The Staff
Prerequisite: courses 1, 2. Upper division students who are not majors in Slavic languages may receive upper division credit for this course. To meet five times a week.
- 18A–18B. Elementary Russian Conversation.** (1–1) Yr. The Staff
Prerequisite: grade A or B in course 2 or permission of the department.
A course in Russian conversation designed to accompany the lectures and recitations of courses 3 and 4. Open only to students who are taking 3 or 4.
- *99. Slavic Peoples and Cultures.** (2) I. Mr. Birnbaum
An introductory survey of Slavic peoples and civilizations, with emphasis upon the cultural aspects of their emergence and early development.

Upper Division Courses

- 103A–103B. Third-Year Russian.** (3–3) Yr. Mrs. Worth
Prerequisite: course 3–4.
- 104A–104B. Fourth Year Russian.** (3–3) Yr. Mr. Worth
Prerequisite: course 103A–103B.

* Not to be given, 1963–1964.

- 111A-111B. Elementary Polish. (3-3) Yr.** Mr. Birnbaum
Prerequisite: course 4, or consent of the instructor.
Basic course in the Polish language.
- *111C-111D. Advanced Polish. (3-3) Yr.** Mr. Birnbaum
Prerequisite: course 111A-111B.
- *112A-112B. Elementary Serbocroatian. (3-3) Yr.** _____
Prerequisite: course 4, or consent of the instructor.
Basic course in the Serbocroatian language.
- 112C-112D. Advanced Serbocroatian. (3-3) Yr.** _____
Prerequisite: course 112A-112B.
- 119A-119B. Intermediate Russian Conversation. (2-2) Yr.** Mrs. Wiren
Prerequisite: courses 3-4, 18A-18B, or the equivalent.
- 120A-120B. Advanced Russian Conversation. (2-2) Yr.** Mrs. Wiren
Prerequisite: course 119A-119B, or the equivalent.
- 122A-122B. The Russian Language. (3-3) Yr.** Mrs. Worth
Prerequisite: course 3-4.
Structure and development.
- 124A-124B. Advanced Russian Composition. (2-2) Yr.** Mr. Worth
Prerequisite: course 103A-103B.
- 130. Survey of Russian Literature to 1917. (3) I.** Mr. Harper, Mr. Markov
Lectures and reading in English. Required of all majors. Open to all upper division students, and to sophomores with the permission of the instructor.
- 132. Russian Literature since 1917. (3) II.** Mr. Harper
A survey of Soviet literature. Lectures and reading in English. Open to all upper division students.
- *137. The Russian Drama. (3) II.** Mr. Harper
A survey of Russian drama from the seventeenth century to the twentieth. Lectures and reading in English.
- 138. Russian Folk Literature. (3) I.** Mr. Markov
Prerequisite: course 4, or consent of the instructor.
Analysis of and reading in the various genres of Russian folk prose and poetry. Conducted in Russian.
- 143A-143B. Russian Novelists of the Nineteenth Century. (2-2) Yr.**
Mr. Harper, Mr. Markov
Lectures and reading in English. Open to all upper division students. Course 143A is not prerequisite to 143B.
- 144. Dostoyevsky. (3) II.** Mr. Harper
A study of Dostoyevsky's principal novels and short stories, in English. Open to all upper division students.
- *145. Tolstoy. (3) I.** Mr. Harper
A study of Tolstoy's principal novels, short stories, plays, and essays, in English. Open to all upper division students.
- *147. History of Russian Poetry. (3) I.** Mr. Markov
The development of epic, lyric, and dramatic poetry Conducted in English.
- *149. Readings in Russian Poetry. (3) II.** Mr. Markov
Prerequisite: courses 4 and 147, or consent of the instructor.
Analysis of representative Russian lyric poetry in the original; versification, imagery, style. Conducted in Russian.

- *150. Survey of Polish Literature. (3) II. Mr. Birnbaum
Lectures and reading in English.
160. Survey of Yugoslav Literatures. (3) II. _____
Lectures and reading in English.
199. Special Studies. (1-3) I, II. The Staff
Prerequisite: senior standing and consent of the department.

Graduate Courses

220. Old Church Slavic. (3) I. Mr. Birnbaum
- *221. Old Russian. (3) II. Mrs. Worth
Prerequisite: course 220.
- *222. Comparative Slavic Linguistics. (3) II. Mr. Birnbaum
Prerequisite: course 220. Recommended: Linguistics 180.
The development of Common Slavic from Indo-European and its divergence into the separate Slavic languages.
- *225A, B, C. The Structure of Modern Russian. Mr. Worth
- 225A. Phonetics and Phonology. (3) I. _____
- *225B. Morphology. (3) II. _____
- *225C. Syntax. (3) II. _____
226. Introduction to Western Slavic Languages. (3) II. Mr. Birnbaum
An introduction to the development of Western Slavic from Common Slavic and its divergence into the various Western Slavic Languages, with emphasis on Polish historical phonology and morphology.
- *227. Eastern Slavic Languages. (3) I. Mrs. Worth
Historical dialectology and synchronic comparison of the three Eastern Slavic languages (Russian, Ukrainian, Belorussian).
- *229. History of the Russian Language. (3) I. Mrs. Worth
Selected topics in the historical phonology, morphology, syntax, and lexicology of Russian, with emphasis on the development of the literary language.
239. Readings in Medieval Slavic Texts. (3) II. Mr. Birnbaum
Reading and analysis of Old Church Slavic texts and their development in the Russian, Serbian, Czech, etc., recensions.
- *240. Old Russian Literature. (3) I. Mr. Worth
Translated and original literature of the Kievan period.
- *241. Russian Literature of the XIV-XVII Centuries. (3) II. Mr. Birnbaum
Literature of the feudal period and the rise of Muscovite literature.
242. Eighteenth-Century Russian Literature. (3) I. Mr. Markov
Prose, poetry, and drama of the Classical period.
- *243. Pushkin. (3) II. Mr. Markov
- *246. Symbolism and Post-Symbolism. (3) II. Mr. Markov
- *265. Seminar in the Russian Novel. (3) I. Mr. Harper
- *266. Seminar in Russian Poetry. (3) I. Mr. Markov
267. Seminar in Russian Criticism. (3) II. Mr. Harper

* Not to be given, 1963-1964.

- *270. Seminar in Structural Analysis. (3) II. Mr. Worth
Selected problems in the structural analysis of Russian and/or other modern Slavic languages.
271. Seminar in Historical Linguistics. (3) I. Mrs. Worth, Mr. Birnbaum
Prerequisite: course 220.
Selected problems in the historical development of Russian and/or other Slavic languages.
- *273. Seminar in Slavic Epic Tradition. (3) II. Mr. Worth
Textual analysis, reconstruction, and literary significance of the *Igor' Tale*, *Zadonščina*, *Skazanie o Mamaevom Poboishche* and connected works.
297. Individual Studies for Graduate Students. (2-6) I, II. The Staff

❖ SOCIAL WELFARE

(Department Office, 238 Economics Building)

- Donald S. Howard, Ph.D., L.H.D., *Professor of Social Welfare.*
Karl de Schweinitz, L.H.D., *Emeritus Professor of Social Welfare.*
———, *Professor of Social Welfare.*
———, *Professor of Social Welfare.*
Mary E. Duren, M.S., *Associate Professor of Social Welfare.*
Alfred H. Katz, D.S.W., *Associate Professor of Social Welfare and Associate Professor of Social Welfare in Medicine.*
Olive M. Stone, Ph.D., *Associate Professor of Social Welfare.*
———, *Associate Professor of Social Welfare.*
Harry H. L. Kitano, Ph.D., *Assistant Professor of Social Welfare.*
———, *Assistant Professor of Social Welfare.*
- ◀
- Walter C. Bailey, Ph.D., *Lecturer in Social Welfare.*
Robert Brockman, M.S.W., *Field Work Consultant.*
Ralph L. Goff, M.S.W., *Lecturer in Social Welfare.*
Katherine M. Kolodziejski, M.S.W., *Field Work Consultant.*
Judd Marmor, M.D., *Lecturer in Social Welfare and Clinical Professor of Psychiatry.*
Peter L. Sandi, M.S.W., Jur.D., *Lecturer in Social Welfare.*
Edith Shapiro, M.S.W., *Field Work Consultant.*
Winifred E. Smith, M.S.W., *Field Work Consultant.*
Mary M. Thomes, Ph.D., *Acting Assistant Professor of Social Welfare.*
Lewis Yablonsky, Ph.D., *Acting Associate Professor of Social Welfare and Sociology.*

For information concerning the School of Social Welfare, see the UCLA ANNOUNCEMENT OF THE SCHOOL OF SOCIAL WELFARE and pages 159-161 of this bulletin.

Graduate Courses

201A. The Dynamics of Personal Well-Being. (2) I.

Problems of normal growth of individuals as revealed in fundamental human experiences; behavior, growth, and change in the individual in contemporary society; requirements for individual and group well-being.

* Not to be given, 1963-1964.

201B. Social, Economic, and Cultural Factors Affecting Social Work. (2) I.

The effects of various social, economic, and cultural factors and values upon the nature and needs of individuals, groups, and communities served by social workers, the effects of these factors upon the nature of the services rendered and upon the nature and programs of the agencies rendering them.

201C. Social Influences on Behavior. (2) II.

An analysis of the influences of various social groups upon conforming and deviant behavior, of the processes of social interaction and of social change as they may affect the design of social welfare programs and methods for prevention and rehabilitation.

202B. Social Aspects of Physical and Mental Health. (2) II.

Prerequisite: course 201A.

An orientation course directed toward an understanding of contemporary theories and therapies in the control and treatment of mental and emotional disabilities and the social implications of medical and psychological factors.

***204A. The Social Welfare Worker and the Law. (2) I.**

Law as an expression of social purpose; responsibility of social welfare workers to operate within the law and to interpret legal limitations upon and resources available to persons served; analysis of substantive law most frequently encountered in social welfare work.

210A. Social Welfare Programs. (2) II.

Brief survey of the historical development of social welfare programs, with emphasis on the contemporary structure and operations of welfare agencies; with interrelationship and responsibilities of federal, state and local governments, relationships between governmental and voluntary services; critical analysis of various types of service and the bases upon which these are made available.

210B. Criteria for Social Welfare Programs. (2) II.

Prerequisite: course 210A.

Discussion of standards by which effectiveness and adequacy of social welfare programs may be evaluated. Efforts will be made to help students become capable of judging the merits and weaknesses of various social welfare programs.

220A. Generic Concepts of Social Work Methods. (2) I.

The interindividual, group, and intergroup processes used by the social work practitioner in his day-to-day work in a social agency. An introduction to the distinctive characteristics of social work methods and to the basic concepts generic to all social work methods.

221A-221B. Social Casework. (2-2) Yr.

Introduction to the professional principles, methods, and techniques which form the basis of social casework practice. Emphasis is upon understanding the individual who presents the social problem, upon work with individuals in a group setting, and upon the use of agency services and community resources in the helping process. Concurrent field work is required.

221C. Advanced Social Casework. (2) I.

Prerequisite: course 221A-221B.

Examination and discussion of increasingly difficult case material illustrating principles of casework practice; critical analysis of the professional content of social casework and of the role of the professional caseworker in the helping process. Diagnosis and casework treatment with increased focus on the worker-client relationship and its manipulation in helping the client. Concurrent field work is required.

223A. Social Welfare Planning. (2) II.

The interrelationship and significance of community forces in determining the character and extent of social-work programs; the methods and processes by which cooperative action is achieved in determining social needs and in developing resources to meet them.

***226A. Administration of Social Welfare Services. (2) II.**

General principles of administration applicable to both public and private agencies; determining (or ascertaining) an agency's purpose and role; methods of carrying out that role effectively.

* Not to be given, 1963-1964.

***230A. History of Social Welfare. (2) I.**

An introduction to the history of social welfare, with particular reference to movements, organizations, leaders, and literature in the United States and the United Kingdom.

***250A. Seminar: Philosophy of Social Work. (2) II.**

Prerequisite: one year of full-time graduate study in a school of social welfare.

Critical analysis of the values underlying professional work, of the current and probable future roles of social welfare in the domestic and international scenes, and of social work's actual and potential contribution to the development and execution of broad social policy.

252A. Seminar: Social Casework. (2) I, II.

Prerequisite: course 221A-221B and consent of the instructor.

Advanced and specialized areas of technical or professional study in social casework. Course may be repeated provided duplication of subject matter is avoided.

260. Seminar in Social Welfare. (2) I, II.

Prerequisite: one year of full-time graduate study in a school of social welfare and consent of the instructor.

Advanced and specialized areas of technical or professional study. Course may be repeated provided duplication of subject matter is avoided.

280A. Social Welfare Research and Statistics. (2) II.

Sources, nature, uses, and limitations of social welfare statistical and research information and of broader social data relevant to social welfare activities. Application of selected statistical methods to and interpretation of social welfare data. Intensive analysis of major methods of research applicable to the field of social work.

280B-280C. Advanced Social-Work Research. (2-2) Yr.

Prerequisite: course 280A.

Application of research methods to selected social welfare problems through individual or group study projects.

401A-401B. Field Work. (2-6; 2-6) Yr.

Prerequisite: consent of the department.

The basic concepts and principles—scientific, philosophical, and professional—of the first graduate year program, as learned through planned experiences in a social agency. The application and use of these concepts and principles in the practice of social work.

401C-401D. Advanced Field Work. (2-6; 2-6) Yr.

Prerequisite: course 401A-401B and consent of the department.

The basic concepts and principles of the curriculum leading to the degree of Master of Social Welfare as learned through planned experiences in a social agency. The individual professional discipline of the social worker developed through integration of knowledge, skill, and philosophy. Identification from the data of professional experience of significant questions for individual and organizational study and research.

SPANISH AND PORTUGUESE

(Department Office, 5303 Humanities Building)

José R. Barcia, Licenciado en Filosofía y Letras, *Professor of Spanish.*

William E. Bull, Ph.D., *Professor of Spanish.*

John A. Crow, Ph.D., *Professor of Spanish.*

John E. Englekirk, Ph.D., *Professor of Spanish.*

Marion Albert Zeitlin, Ph.D., *Professor of Spanish and Portuguese.*

Hermenegildo Corbató, Ph.D., *Emeritus Professor of Spanish.*

Manuel Pedro Gonzalez, Ph.D., *Emeritus Professor of Spanish-American Literature.*

Anna Krause, Ph.D., *Emeritus Professor of Spanish.*

* Not to be given, 1963-1964.

James Richard Andrews, Ph.D., *Associate Professor of Spanish*.
 Donald F. Fogelquist, Ph.D., *Associate Professor of Spanish*.
 Stanley L. Robe, Ph.D., *Associate Professor of Spanish*.
 Aníbal Sánchez-Reulet, Ph.D., *Associate Professor of Spanish*.
 Joseph H. Silverman, Ph.D., *Associate Professor of Spanish*.
 †Samuel G. Armistead, Ph.D., *Assistant Professor of Spanish*.
 Claude L. Hulet, Ph.D., *Assistant Professor of Spanish*.
 C. P. Otero, Ph.D., *Assistant Professor of Spanish*.
 Maria L. de Lowther, M.A., *Assistant Professor of Spanish, Emeritus*.
 Shirley L. Arora, Ph.D., *Instructor in Spanish*.

Virginia G. Baños, Ph.D., *Lecturer in Spanish*.
 Leonor Montau, A.B., *Lecturer in Spanish*.
 George L. Voyt, J.D., *Associate in Spanish*.

Letters and Science List.—All undergraduate courses in Spanish and Portuguese except Spanish 370 are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

The Major.—Prerequisite: Courses 4, 25, 42 and 44, or equivalent with no grade lower than C. Required: at least 27 units of upper division Spanish, including courses 101, 114, 120A–120B, and 121A–121B. Courses 151 and 160A–160B may not be counted toward the preceding 27 units.

General Secondary Credential.—Majors preparing for the general secondary credential must present at least 40 units, including the following:

- (1) An approved major in Spanish, including courses 101, 115, 117, 118; and also 151 and 370.
- (2) At least 6 units in graduate courses in the major, including a minimum of 4 units chosen from courses 222 to 245.
- (3) Passing an examination in Spanish. (Consult graduate adviser.)

Teaching Minor in Spanish.—Spanish 370 and 17 units beyond Spanish 4 distributed as follows: 25, 101 or 103, 114, 115 and 6 units in literature normally chosen from 120A–120B or 121A–121B or 120B–121B.

The Master's Degree

1. General Requirements: see page 162. The Department favors Plan II, but, with departmental approval, Plan I may be followed. See page 164.
2. Departmental Requirements—Plan II:

a. Foreign Language Requirements: a reading knowledge of one other foreign language approved by the graduate adviser. This requirement must be met at least one semester before the awarding of the degree.

b. Course Requirement: 24 units in Spanish including courses 118, 127, and one seminar-type course (series 253–280). With the consent of the graduate adviser 4 units may be taken in closely related fields.

c. The Comprehensive Examination: Two three-hour written examinations to be given the next-to-the-last week preceding the final examination

period of each semester. In the first of these examinations the student will be expected to show a general knowledge of the history of the Spanish language and of Spanish and Spanish American literatures. In the second of these examinations the student will be expected to show a thorough acquaintance with the authors, works and movements of either (a) Spanish literature or (b) Spanish American literature. Reading lists will be available to the student and will constitute the basis for this second examination. Only those students who attain a superior rating in the examination will be encouraged to proceed to candidacy for the Ph.D. degree.

3. Departmental Requirements—Plan I:

a. **Guidance Committee:** The preparation and examination of each candidate will be the responsibility of a guidance committee composed of three members of the department. The chairman of the committee will be the instructor under whom the candidate proposes to write his thesis. The other two members will be appointed by the chairman of the department after consultation with the candidate and the chairman of his committee. The committee members shall be appointed to represent three different fields of interest within the department. No committee shall be appointed before a candidate has completed one full semester of work in graduate standing, including at least four units in the department, of which two must be in a course in the 200 series.

b. **Foreign Language Requirement:** the same as in Plan II.

c. **Course Requirement:** 20 units in Spanish including courses 118, 127 and a minimum of 8 units of courses in the 200 series. Course 290 may not displace any part of these 8 units. With the approval of the candidate's committee a maximum of 4 units may be taken in closely related fields.

d. **Thesis and Examination:** The subject and general plan of investigation for the thesis must be approved by the department and the instructor concerned before a guidance committee can be appointed. After completion of the thesis, the candidate must pass a two-hour oral examination testing his knowledge of the field of his thesis and his general competence. Only those students who attain a superior rating in the examination will be encouraged to proceed to candidacy for the Ph.D. degree.

The Ph.D. Degree in Hispanic Languages and Literatures

1. **General Requirements,** see page 165.

2. **Departmental Requirements:**

a. **Pre-Guidance Committee:** On entering the department the candidate will be assigned to a three member pre-guidance committee which will review the student's record, assist him in the preparation of his immediate program and, at the end of his first year of residence, determine whether or not he is prepared to proceed to candidacy for the degree.

b. **Foreign Language Requirement:** In addition to Spanish and Portuguese a reading knowledge of at least two other foreign languages to be chosen with the approval of the guidance committee in the light of the candidate's field of specialization. The candidate must pass the test in one of these two languages during the first year of residence and the other not later than the fourth semester in residence.

c. **Fields of Specialization:** The department recognizes the following fields of specialization, from which one major and four minor fields shall be selected.

- I. Spanish Literature from the Beginnings to the Golden Age.
- II. The Golden Age.
- III. XVIIIth and XIXth Century Spanish Literature.
- IV. XXth Century Spanish Literature.
- V. Colonial and XIXth Century Spanish American Literature.
- VI. XXth Century Spanish American Literature.
- VII. Luso-Brazilian Literature.
- VIII. Philology and Linguistics.

The field in which the candidate intends to present a dissertation will be designated as his major field.

d. **Specific Course Requirements:**

Students who choose literature as their major field must take Portuguese 120 and 121; Spanish 201, 203, and one graduate course in each of any six of the eight fields of specialization indicated above.

Students who choose philology and linguistics as their major fields must take Portuguese 120, 121, 202, 203, and Spanish 201, 203, 206, 222 and 223. A specific knowledge of Classical and Vulgar Latin and of Old French and (or) Old Italian are also required.

e. **Qualifying Examinations:** The qualifying examinations will consist of: (1) a five-hour written examination in the candidate's field of specialization; (2) four three-hour written examinations in other fields to be chosen in consultation with the candidate's guidance committee, and (3) a two-hour oral examination. The qualifying examinations are normally taken no later than six semesters after the B.A. and four semesters after receiving the M.A. They must take place within a period not to exceed four months.

f. **The Dissertation:** The dissertation may be on any subject within the general area of Spanish and Portuguese languages and literatures. It should be presented within a period of three years after formal advancement to candidacy for the degree. After the acceptance of the dissertation in its final form, the candidate is required to pass an oral examination which will cover principally the field within which the dissertation falls.

The Ph.D. Degree in Romance Languages and Literatures.

See page 543 of the UCLA ANNOUNCEMENT OF THE GRADUATE DIVISION, or consult departmental adviser.

Lower Division Courses

Any student who feels qualified to take a more advanced course than indicated by his prior work will be encouraged to do so upon examination or by recommendation of the instructor.

1. Elementary Spanish. (4) I, II.

The Staff

Meets five hours weekly including one hour of oral practice. This course corresponds to the first two years of high school Spanish.

1G. Reading Course for Graduate Students. (No credit) I, II.

The Staff

Meets four hours weekly.

2. Elementary Spanish. (4) I, II.**The Staff**

Meets five hours weekly, including one hour of oral practice. Prerequisite: course 1, two years of high school Spanish, or equivalent.

3. Intermediate Spanish. (4) I, II.**The Staff**

Meets five hours weekly, including one hour of oral practice. Prerequisite: course 2, three years of high school Spanish, or equivalent.

4. Intermediate Spanish. (4) I, II.**The Staff**

Meets four times weekly. Prerequisite: course 3, four years of high school Spanish, or equivalent.

8A-8B. Spanish Conversation. (1-1) Yr. Beginning each semester. The Staff

Meets two hours weekly. Prerequisite: course 8A is open to those who have completed course 3, or equivalent. Students who have completed course 2 with grades of A or B may be admitted.

9A-9B. Advanced Conversation. (1-1). Beginning each semester. The Staff

Meets two hours weekly. Prerequisite: course 8B or equivalent.

25. Reading and Composition. (3) I, II.**The Staff**

(Former number, 25A-25B.)

Prerequisite: course 4, or equivalent.

42. Civilization of Spain and Portugal. (3) I.**The Staff**

A background course for the study of Peninsular literature.

44. Civilization of Spanish America and Brazil. (3) II.**The Staff**

A background course for the study of Spanish American and Brazilian literatures.

Upper Division Courses

The basic prerequisite to all upper division courses except 160A-160B is Spanish 25 or the equivalent.

101. Intermediate Composition. (3) I, II.**Mrs. Baños, Mr. Crow**

(Former number, 101A-101B.)

Prerequisite: course 25.

Practice in writing Spanish. Attention to idioms, vocabulary building, paraphrasing, and summarizing, using as models the prose of contemporary Spanish and Spanish American authors.

103. Advanced Grammar. (3) I, II.**Mr. Armistead, Mr. Bull**

(Former number, 100.)

Prerequisite: course 25.

Demonstration and practice of significant systematic features of contemporary Spanish grammar, with emphasis on the problems that are the most troublesome for English-speaking students.

114. Advanced Composition. (3) I, II.**Mr. Hulet, Mr. Otero**

(Former number, 146.)

Prerequisite: course 101 or 103.

Intensive use of written Spanish for the purpose of acquiring facility in the language and the basic notions of style. Analysis of student's original compositions with a view to correcting his individual problems of expression.

115. Spanish Linguistics. (2) I.**Mr. Bull, Mr. Robe**

(Former number, 147.)

Prerequisite: course 101 or 103.

Theory and analytical procedures of general linguistics as applied to Spanish grammar, with special attention to the fundamental differences between the spoken and the written language.

- 117. Phonetics of the Spanish Language. (2) I; II.** Mr. Robe
(Former number, 148.)
Prerequisite: consent of the instructor.
Analysis of the pronunciation of contemporary Spanish, its phonemic and orthographic systems, with attention to differences between Peninsular and American Spanish. Exercises and drill directed toward individual needs.
- 118. History of the Spanish Language. (2) I.** Mr. Armistead, Mr. Silverman
(Former number, 149.)
Prerequisite: consent of the instructor.
Major features of the development of the language from its origins in Vulgar Latin to modern times. Contributions of other languages to the formation of Spanish.
- 120A-120B. Survey of Spanish Literature. (3-3) Yr.** The Staff
(Former number, 102A-102B.)
Beginning either semester. 120A covers from the beginnings of Spanish literature to 1700; 120B covers from 1700 to the present.
- 121A-121B. Survey of Spanish American Literature. (3-3) Yr.** Beginning each semester. The Staff
(Former number, 104A-104B.)
Course 121A includes study of main currents and authors up to 1880. 121B covers from 1880 to present.
- 122. Spanish Literature from the Beginnings to the Golden Age. (3) I.**
Prerequisite: course 120A. Mr. Andrews, Mr. Armistead
- 124. The Golden Age. (3) I.** Mr. Andrews, Mr. Silverman
(Former number, 117.)
Prerequisite: course 120A.
The main genres of the Golden Age with emphasis on at least one representative work for each.
- 127. Don Quijote. (3) II.** Mr. Andrews
(Former number, 115.)
Prerequisite: course 120A.
Directed reading and intensive study of the novel.
- *128. Neo-Classicism and Romanticism in Spain. (3) II.** Mr. Barcia
(Former number, 106.)
Prerequisite: course 120B.
The main manifestations of thought and literature from 1700 to 1850 with emphasis on representative works.
- 130. Spanish Literature from 1850 to 1898. (3) II.** Mr. Barcia
(Former number, 105.)
Prerequisite: course 120B.
The development of post-romantic literature with emphasis on representative works.
- 132. Spanish Literature in the XXth Century. (3) I.** Mr. Barcia, Mr. Otero
(Former number, 110.)
Prerequisite: course 120B.
Spanish poetry, theater, essay and novel since 1898 with emphasis on at least one representative work for each genre.
- 137. The Literature of Colonial Spanish America. (3) I.** Mr. Robe
Prerequisite: course 121A.
A study of the most important authors and movements in the various regions of Spanish America to 1810.
- 139. XIXth Century Spanish American Literature. (3) I.** Mr. Hulet
Prerequisite: course 121A.
A detailed study of the important writers and movements from 1810 to 1880.

* Not to be given, 1963-1964.

- 143. Spanish American Literature in the XXth Century. (3) II.** The Staff
Prerequisite: course 121B.
A detailed study of the important writers and movements since 1880.
- 147. Literary Criticism in Spain and Spanish America. (3) II.**
(Former number, 120.) Mr. Andrews, Mr. Otero
Prerequisite: course 120A-120B or 121A-121B.
Analysis and application of the methods of literary criticism; consideration given to critical approach in Spain and Spanish America.
- 149. Folk Literature of the Hispanic World. (3) II.** Mr. Robe
A study of the history and present dissemination of the main folk themes throughout the Hispanic countries.
- 151. Folk Song in Spain and Spanish America. (1) II.** Mr. Crow
(Former number, 108.)
Classes meet two hours weekly. Required of credential candidates. A study of the origins and development of Spanish folk music and of the different types of folk songs and folk poetry peculiar to the various regions of Spain and Spanish America.
- 160A-160B. Hispanic Literatures in Translation. (3-3) Yr.**
(Former number, 150A-150B.) Mr. Hulet, Mr. Silverman
Class readings and analysis of selected works in translation from the literatures of Spain and Portugal (160A) and Spanish America and Brazil (160B.)
- 199. Special Studies in Spanish. (1-3) I, II.** The Staff

Graduate Courses

- 201. Bibliography and Methods of Research. (2) I.** The Staff
Section A. Spanish and Portuguese Languages and Literatures. Section B. Latin American Languages and Literatures. Discussion and application of methods and techniques in research.
- 203. Historical Grammar. (3) II.** Mr. Armistead, Mr. Zeitlin
(Former number, 256.)
Prerequisite: course 118 or its equivalent.
Intensive study of the historical development of the Spanish language, in its phonology, morphology, syntax, and vocabulary.
- 206. Linguistics. (2) II.** Mr. Bull, Mr. Otero
Prerequisite: course 115 or equivalent.
A study of theoretical synchronic linguistics as applied to Spanish.
- 209. Dialectology. (2) II.** Mr. Robe
Prerequisite: course 115 or 117 or equivalent.
The major dialect areas of Peninsular and American Spanish, with the distinguishing features of each. Influence and contribution of cultural and historical features, including indigenous languages, to their formation.
- *222. Spanish Poetry to the Golden Age. (2) I.** Mr. Andrews, Mr. Armistead
(Former number, 201A.)
Readings and lectures on Spanish poetry from the beginnings to 1550.
- *223. Spanish Prose to the Golden Age. (2) II.** Mr. Armistead
Readings and lectures on Spanish prose from the beginnings to 1550.
- 224. The Poetry of the Golden Age. (2) I.** Mr. Andrews
(Former number, 201B.)
Readings and lectures on the main poets and poetic movements of the Golden Age.

* Not to be given, 1963-1964.

- *225. The Drama of the Golden Age. (2) I.** Mr. Silverman
(Former number, 209A.)
Readings and lectures on the "comedia."
- 226. Prose of the Golden Age. (2) I.** Mr. Silverman
(Former number, 215A.)
Readings and lectures on fictional, didactic, religious, and historical writings.
- 227. Cervantes. (2) II.** Mr. Andrews
Readings and lectures on the works of Cervantes.
- 230. Neo-Classic and Romantic Poetry and Drama. (2) I.** Mr. Barcia
(Former number, 203A.)
Readings and lectures on representative works of the two genres for the period.
- *231. The XIXth Century Novel. (2) I.** Mr. Barcia
(Former number, 203B.)
Readings and lectures on the novel of the XIXth century.
- 232. The Generation of 1898. (2) II.** Mr. Barcia, Mr. Otero
Readings and lectures on representative works of the generation.
- *233. Contemporary Spanish Drama. (2) II.** Mr. Barcia
Readings and lectures on the theater since 1898.
- *234. Contemporary Spanish Poetry. (2) I.** Mr. Barcia, Mr. Otero
Readings and lectures on poetry since 1898.
- 235. Contemporary Spanish Prose. (2) I.** Mr. Barcia, Mr. Otero
Readings and lectures on the novel, the short story, and the essay since 1898.
- 237. Chroniclers of the Americas. (2) I.** Mr. Robe
(Former number, 220.)
- 239. Neo-Classic and Romantic Prose and Poetry in Spanish America. (2) II.** Mr. Hulet, Mr. Sánchez-Reulet
An intensive study of Neo-Classicism and Romanticism in Spanish America.
- 240. The Modernist Movement. (2) I.** Mr. Englekirk, Mr. Fogelquist
(Former number, 243A.)
An intensive study of the important writers of this movement during the period 1880-1916.
- 243. Contemporary Spanish American Poetry. (2) I.** Mr. Fogelquist
(Former number, 242.)
Intensive study of the important poets of Spanish America since 1916.
- *244. Contemporary Spanish American Novel and Short Story. (2) I.** Mr. Crow, Mr. Sánchez-Reulet
(Formerly 240, 241.)
A study of the important novelists and short story writers from Modernism to the present.
- 245. Contemporary Spanish American Essay. (2) II.** Mr. Sánchez-Reulet
Intensive study of the important essayists of the XXth century.

Seminars

- *253. Studies in Medieval Spanish and Portuguese. (2) I.** Mr. Zeitlin
Prerequisite: course 203 or Portuguese 203.
Problems related to the historical development of Spanish and Portuguese. Directed toward independent research.

* Not to be given, 1963-1964.

- *256. Studies in Linguistics and Dialectology. (2) I.** Mr. Bull, Mr. Robe
(Former number, 255.)
Prerequisite: course 206 or 209.
Problems in the analysis and description of the contemporary language. Directed to ward independent research.

262A, B, C. Studies in Spanish Literature from the Beginnings to the Golden Age.

- *262A. Lyric Poetry. (2) II.** Mr. Andrews
Prerequisite: course 222.
This is a seminar in the series entitled Studies in Spanish Literatures from the Beginnings to the Golden Age.
- *262B. Epic Poetry. (2) II.** Mr. Armistead
Prerequisite: course 222.
This is a seminar in the series entitled Studies in Spanish Literature from the Beginnings to the Golden Age.
- *262C. Prose Writers. (2) I.** Mr. Armistead
Prerequisite: course 223.
This is a seminar in the series entitled Studies in Spanish Literature from the Beginnings to the Golden Age.

264A, B, C, D. Studies in the Golden Age.

- 264A. Poetry. (2) II.** Mr. Andrews
Prerequisite: course 224.
This is a seminar in the series entitled Studies in the Golden Age.
- *264B. The "Comedia." (2) II.** Mr. Silverman
Prerequisite: course 225.
This is a seminar in the series entitled Studies in the Golden Age.
- 264C. The Picaresque Novel. (2) II.** Mr. Silverman
Prerequisite: course 226.
This is a seminar in the series entitled Studies in the Golden Age.
- *264D. Don Quijote. (2) I.** Mr. Andrews
Prerequisite: course 227.
This is a seminar in the series entitled Studies in the Golden Age.

270A, B. Studies in XVIIIth and XIXth Century Spanish Literature.

- 270A. Poetry and Drama. (2) II.** Mr. Barcia
Prerequisite: course 230.
This is a seminar in the series entitled Studies in XVIIIth and XIXth Century Spanish Literature.
- 270B. The Novel. (2) II.** Mr. Barcia
Prerequisite: course 231.
This is a seminar in the series entitled Studies in XVIIIth and XIXth Century Spanish Literature.

272A, B, C. Studies in XXth Century Spanish Literature.

- *272A. The Novel. (2) II.** Mr. Barcia
Prerequisite: course 232 or 235.
This is a seminar in the series entitled Studies in XXth Century Spanish Literature.
- *272B. The Theater. (2) II.** Mr. Barcia
Prerequisite: course 233.
This is a seminar in the series entitled Studies in XXth Century Spanish Literature.

* Not to be given, 1963-1964.

- *272C. Poetry. (2) II.** Mr. Barcia, Mr. Otero
Prerequisite: course 234.
This is a seminar in the series entitled Studies in XXth Century Spanish Literature.
- *277. Studies in Colonial Spanish American Literature. (2) II.** Mr. Robe
Prerequisite: course 237.
This is a seminar with emphasis on individual study and research and group discussion of literary problems.
- *278. Studies in XIXth Century Spanish American Literature. (2) I.**
Prerequisite: course 239. Mr. Sánchez-Reulet
This is a seminar with emphasis on individual study and research and group discussion of literary problems.
- 280A, B, C, D. Studies in Contemporary Spanish American Literature.**
- 280A. Modernist Poetry. (2) II.** Mr. Englekirk
Prerequisite: course 240.
This is a seminar in the series entitled Studies in Contemporary Spanish American Literature.
- *280B. Post-Modernist Poetry. (2) II.** Mr. Fogelquist
Prerequisite: course 243.
This is a seminar in the series entitled Studies in Contemporary Spanish American Literature.
- *280C. Novel and Short Story. (2) I.** Mr. Crow
Prerequisite: course 244.
This is a seminar in the series entitled Studies in Contemporary Spanish American Literature.
- 280D. The Essay. (2) I.** Mr. Sánchez-Reulet
Prerequisite: course 245.
This is a seminar in the series entitled Studies in Contemporary Spanish American Literature.
- 290. Directed Studies. (2-6) I, II.** The Staff
- Professional Course in Method**
- 370. The Teaching of Spanish. (3) I.** Mr. Bull
Prerequisite: course 115.

PORTUGUESE

Lower Division Courses

- 1. Elementary Portuguese. (4) I.** Mr. Hulet, Mr. Zeitlin
- 2. Elementary Portuguese. (4) II.** Mr. Hulet, Mr. Zeitlin
Prerequisite: course I or equivalent.

Upper Division Courses

- 101A-101B. Advanced Reading and Composition. (2-2) Yr.**
Prerequisite: course 2 or equivalent. Mr. Hulet, Mr. Zeitlin
Oral and written composition and reading of contemporary prose.
- 120. Survey of Portuguese Literature. (3) I.** Mr. Englekirk, Mr. Zeitlin
(Former number, 122)
An introduction to the principal authors, works, and movements of Portuguese literature.

* Not to be given, 1963-1964.

- 121. Survey of Brazilian Literature.** (3) II. Mr. Hulet, Mr. Zeitlin
(Former number, 123)
An introduction to the principal authors, works, and movements of Brazilian literature.
- 199. Special Studies.** (1-3) I, II. The Staff
Prerequisite: consent of the instructor.

Graduate Courses

- 202. Old Portuguese Readings.** (2) I. Mr. Zeitlin
Intensive study of representative texts of medieval poetry and prose.
- 203. Historical Grammar.** (2) II. Mr. Zeitlin
The development of the Portuguese language from its origins to the present: phonology, morphology, syntax, and lexicography.
- 222. Camões.** (2) II. Mr. Zeitlin
Prerequisite: course 120.
An intensive study of the works of Camões, especially the *Lusíadas* and the lyric poetry.
- 236. The Brazilian Novel.** (2) I. Mr. Englekirk
Prerequisite: course 121.
Reading and discussion of the outstanding novels of the XIXth and XXth centuries.
- 290. Directed Studies.** (2-6) I, II. The Staff
Individual problem assignments in specific areas of interest and need in completion of advanced study and in preparation for the dissertation.

Related Courses (See page 332)

- French 201. History of the French Language.** (3) I, II. Mr. Nichols
- French 202. Old French.** (3) I, II. Mr. Nichols

■ SUBJECT A: ENGLISH COMPOSITION

(Department Office, 306 Royce Hall)

———, *Chairman, Committee on Subject A.*

Everett L. Jones, M.A., *Supervisor of Instruction in Subject A.*

Ella O. Hutchins, M.A., *Lecturer in Subject A.*

Gretchen G. Martin, M.A., *Associate in Subject A.*

Cathleen H. Wheat, Ph.D., *Lecturer in Subject A.*

Hortense H. Williams, M.A., *Lecturer in Subject A.*

Subject A. (No credit) I, II. The Staff

Fee, \$35.

Three hours weekly for one semester. Although this course yields no credit, it displaces 2 units on the student's program. Every student who does not pass the examination in Subject A is required to take, in the semester immediately following this failure, the course in Subject A. Sections are limited to thirty students. For further details see page 42 of this bulletin.

Training in correct writing, including drill in sentence and paragraph construction, diction, punctuation, grammar, and spelling. Weekly compositions and written tests on the text.

College of Letters and Science

Letters and Science List.—Courses 5A, 5B, 101, 102, 104, 105A, 105B, and 105C are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

† Absent on leave, 1963–1964.

College of Fine Arts

The Department of Theater Arts bases its work in theater, motion pictures, television, and radio on a solid foundation in the liberal arts. The purpose of the curriculum is to develop in its students a scholarly, creative, and professional approach to the theater arts. The aim of the Department is to train graduates who will eventually make original contributions in the field of their work.

The student majoring in theater arts must complete the requirements of the College of Fine Arts (see page 119), a common core of major courses, and certain controlled upper division electives in the major:

The Lower Division Courses.—5A, 5B, 20A, 30, Humanities 1A–1B; and either (Theater) 40A, 40B, 40E, 40F; or (Motion Pictures) 40A, 40B, 40C, 40D; or (Television-Radio) 40A, 40B, 40C, 40D.

The Upper Division Courses.—130, 147, 150, Classics 113, English 113A, 113B, 117J; either (Theater) 105A, 170A, 4 units of 179A; or (Motion Pictures) 105B, 170B, 4 units of 179B; or (Television-Radio) 105C, 170C, 4 units of 179C; and controlled upper division electives in theater arts to bring the total to 39 units.

The major requires 43 units in theater arts courses, 15 in the lower division and 28 in the upper division. *In no case may more than 50 units in theater arts apply in the 120-unit total required for the bachelor's degree.*

A maximum of 12 units from the following courses may apply on the 120-unit total: 40A to 40G and 140A, B, C, E, F, 143, and 144.

Students majoring in theater arts may not offer a minor in English.

General Secondary Teaching Credential

The Department also provides a specialization in Language Arts (Theater Arts and English) for those students seeking a general secondary credential. In addition to pursuing the following program, the student must interview a credential adviser in the School of Education concerning required courses in education.

The Lower Division Courses.—Courses 5A, 5B, 20A, 30, 40A, 40B, 40E, 40F; English 1A, 1B, 46A, 46B, Journalism 2.

The Upper Division Courses.—Courses 103, 105A, 130, 147, 150, 170A, (3 units); 179A (4 units); Classics 113; English 106L, 113A, 113B, 117J, 3 units from 131, 132, 190A, 190B; and approved electives chosen from Education 130 and upper division courses in theater arts to bring total to 39 units.

Graduate Courses.—At least 6 units completed in graduate status, including Theater Arts 200, 231, and 2 units chosen from 270, 272, and 299.

Graduate Division

Admission to Graduate Status

In addition to general requirements of the Graduate Division, the applicant must:

1. Have completed the undergraduate theater arts major or its equivalent.
2. Provide the department with the results of certain diagnostic tests and letters of reference. Information regarding this requirement should be

obtained from the chairman of the department at least three months prior to the beginning of the semester in which the student plans to enroll.

Requirements for the Master's Degree

The Department of Theater Arts follows Plan I or Plan II. (See page 164.)

The program requires at least one year (two semesters) of intensive study and laboratory exercises. In addition to the minimum courses for completion of the master's degree, the chairman of the department, in consultation with the other members of the student's advisory committee, may prescribe such additional courses as he believes are necessary to satisfy the educational needs of the student. All students are required to take an active part in the production program of the department as partial fulfillment of the degree requirements. In planning his course of study, the student will place his emphasis upon the theater, motion pictures, television, or radio. Any extensive concentration in one area of study, such as theatrical and dramatic history and literature or playwriting, ordinarily extends the student's residency. Students who wish to place their major emphasis on playwriting must submit a long play or a number of short plays for admission to the program.

Areas of Instruction

The Department of Theater Arts offers undergraduate courses in the following areas:

History, Theory, and Criticism.—Courses 5A–5B, 102, 104, 105A, 105B, 105C, 106, 108, 119, 134, 160.

Writing.—Courses 30, 130, 132, 181.

Directing.—Courses 150, 151A–151B, 152A, 152B, 152C.

Acting.—Courses 20A–20B, 120, 121A, 121B, 121C.

Design.—Courses 141, 147, 148A–148B, 180.

Workshops.—Courses 117, 170A, 170B, 170C, 171, 172, 179A–B–C, 182.

Theater Arts Techniques.—Courses 40A, 40B, 40C, 40D, 40E, 40F, 40G, 140A, 140B, 140C, 140E, 140F, 142A–142B, 143, 144, 146.

Courses to Serve Other Departments.—Course 101.

Teacher Preparation and Professional Courses.—Courses 103, 118A, 118B, 445, 473.

Lower Division Courses

5A–5B. History of Theater Arts. (2–2) I, II.

The history of the development of theater, motion pictures, radio, and television as composite arts and social institutions. A study of the evolution of these arts as influenced by different cultures, traditions, and technologies

5A. Development of the stage from the primitive theater to the present day.

Lectures, two hours.

Mr. Hethmon

5B. Development of motion pictures and broadcasting from their beginnings to the present day.

Lecture, two hours; laboratory, two hours.

Mr. Fielding

20A. Acting Fundamentals. (2) I, II.

Mrs. Fitzgerald, Mrs. Foulger, Mr. Morrison

Lecture, two hours; laboratory, two hours.

An introduction to the interpretation of drama through the art of the actor. Development of individual insights, skills, and disciplines in the presentation of dramatic material to an audience.

20B. Acting Fundamentals. (2) I, II.

Mr. Morrison and Staff

Lecture, two hours; laboratory, two hours. Prerequisite: course 20A or the consent of the instructor.

Intensive application of acting techniques through study and performance of selected scenes from stage, motion picture, and television scripts, involving problems of style in a wide range of dramatic materials.

30. Fundamentals of Dramaturgy. (2) I, II.

Mr. Borowsky

A course designed to stimulate the student's critical and creative faculties through the analysis of basic dramatic forms and the preparation of original material.

40A-B-C-D-E-F-G. Theater Arts Techniques.

Only 7 units from the following list of courses (40A-G) may be applied toward the A.B. degree.

40A. Scenery. (2) I, II.

Mr. Ross, ———, ———

Lecture, two hours; laboratory, two hours, plus assignments.

The analysis, planning and execution of staging concepts; the consideration of materials, construction methods, shop procedures and budget.

40B. Sound. (1) I, II.

Mr. Miller, Mr. Schloss, Mr. Sturcken and Staff

Lecture, one hour; laboratory, two hours, plus assignments.

Procedures and techniques related to audio recording and reproduction. The integration of sound with other elements of production.

40C. Camera. (2) I, II.

Mr. J. Young, Mr. M. Young

Lecture, two hours; laboratory, three hours.

Principles of lighting, pictorial composition, and camera operation.

40D. Editing. (2) I, II.

Mr. Schloss

Lecture, two hours; laboratory, three hours, plus additional hours to be arranged.

Editing principles and techniques. Laboratory practice in the creative and mechanical aspects of editing.

40E. Stage Lighting. (2) I, II.

Mr. Sturcken

Lecture, two hours; laboratory, two hours, plus assignments.

The design and application of stage lighting, including the study of instruments, control, color, and procedure.

40F. Costuming. (2) I, II.

Mrs. Hungerland

Lecture, two hours; laboratory, two hours, plus assignments.

Costume analysis and construction techniques. Laboratory practice in the making of a costume from design to performance.

40G. Studio Operations. (2) I, II.

The Staff

Lecture, two hours; laboratory, three hours.

Practice in the use of equipment and techniques necessary for studio and remote broadcasting.

Upper Division Courses**101. Introduction to Theater Arts. (2) I, II.**

Mr. Morrison and Staff

Lecture, two hours; laboratory, two hours.

A survey of theater, motion pictures, television and radio, together with critical analysis of their roles in contemporary culture, leading to an appreciation and understanding of the theater arts. A nontechnical presentation for the general student. Not open for credit in the theater arts major.

- 102. History of the European Theater. (2) I.** Mr. Melnitz
A one-semester survey of the development of the theater, with emphasis on the contributions of Europe from the Greeks to the twentieth century, based upon the most authoritative critical studies in the field.
- 103. Theater Arts in the Secondary Schools. (3) I, II.** Miss Motter
Critical examination of the theater arts in the secondary field; study and discussion of production, direction and acting in the secondary school.
- 104. History of the American Theater. (2) II.** _____
The history of the American theater from the Revolutionary War to the present.
- 105A-B-C. Main Currents in Theater. (2-2-2) I, II.** _____
The student is required to take one of the following three courses.
- 105A. Main Currents in Theater.** Mr. Hethmon
Lecture, two hours.
Critical examination of the leading theories of theater from 1887 to the present; study and discussion of modern styles of production. Required of theater majors only.
- 105B. Main Currents in Motion Pictures.** Mr. Gray
Lecture, two hours; laboratory, two hours.
An historical and critical survey, with examples, of the motion picture to date both as a medium of mass communication and entertainment and as a developing art form. Required of motion picture majors only.
- 105C. Main Currents in Television-Radio.** Mr. Kingson
Lecture, two hours; laboratory, two hours.
Critical survey of radio and television here and abroad. Consideration of the social responsibilities and educational implications of broadcasting. Required of television-radio majors only.
- 106. History of the Motion Picture. (3) II.** Mr. Gray
The history of the motion picture from its beginning to the present day.
- 108. Documentary and Educational Film. (2) I, II.** Mr. Brokaw
The philosophy of the documentary approach in the motion picture. The development of critical standards and an examination of the techniques of teaching and persuasion used in selected documentary, educational, and propaganda films for child and adult audiences.
- *117. Marionettes and Puppetry. (2) I, II.** Mr. Helstien
Lecture, two hours; laboratory, four hours. Prerequisite: courses 40A and 40E; or consent of the instructor. May be repeated for a maximum total of 4 units credit.
Study of the history and practice of the art of puppetry. An examination of the materials and methods of construction. Staging of puppet and marionette productions as laboratory practice.
- 118A-118B. Creative Dramatics. (2-2) I, II.** Mrs. Fitzgerald
Lecture, two hours; laboratory, one hour. Prerequisite: course 118A to precede 118B.
Studies of the principles and procedures of the informal approach to children's drama through creative interpretations of literature.
- 119. Children's Theater. (2) I, II.** Mrs. Fitzgerald
Theories and principles of production in the formal theater arts for children. Analysis and evaluation of appropriate theatrical forms.
- 120. Advanced Acting. (3) I, II.** Mr. Freud
Lecture, two hours; laboratory, four hours. Prerequisite: course 20A and the consent of the instructor.
Advanced study and practice in the art of acting.
- 121A, B, C. Problems of Acting in the Theater Arts.**
Lecture, two hours; laboratory, four hours. Prerequisite: courses 20A, 120 and consent of the instructor.
- 121A. Advanced Problems in Acting for the Stage. (3) I, II.** Mrs. Foulger

* Not to be given, 1963-1964.

121B. Advanced Problems in Acting for Motion Pictures and**Television and Radio. (3) I, II.****Mr. Friedman**

(Former number, 121C.)

121C. Special Problems in Acting for Theater Arts. (2) I, II.

(Former number, 122.)

Mr. Kingson

Intensive study of effective speech and movement in both dramatic and nondramatic performance for stage, motion pictures, television and radio.

130. Problems of Writing for Theater Arts. (3) I, II.**Mr. Borowsky, Mr. Hatch, Mr. Savage, Mr. Selden, Mr. C. Young**

Prerequisite: course 30 or the equivalent.

Application of dramaturgic principles to the preparation of material for production in theater arts.

132. Writing for Motion Pictures and Television. (3) I, II.**Mr. Borowsky, Mr. M. Young**

Prerequisite: courses 30, 130 and consent of the instructor. May be repeated for a maximum of 6 units.

Advanced course in the preparation of screenplays under supervision.

134. Manuscript Evaluation for Production. (2) I, II.**Mr. Savage**

(Former number 134A-134B.)

Prerequisite: courses 30, 130 and consent of the instructor. May be repeated for a maximum total of 4 units credit.

Principles and practices in the evaluation of manuscripts for theater, motion pictures, television, or radio production.

140A. Advanced Scenery. (2) II.

Lecture, two hours; laboratory, two hours. Prerequisite: course 40A.

Study of technical methods of staging theater productions, including design analysis related to production rigging, shifting, and construction techniques.

140B. Advanced Motion Picture Sound. (2) I, II.**Mr. J. Young**

Lecture, three hours; laboratory, three hours. Prerequisite: course 40B or consent of the instructor.

An advanced study of the creative use of sound, including the technical procedures of motion picture sound recording and reproduction.

140C. Advanced Motion Picture Photography. (2) I, II.**Mr. Clarke**

Lecture, three hours; laboratory, three hours, plus additional hours to be arranged. Prerequisite: course 40C.

The theories and disciplines of the cinematographic process. Control of photographic image through studio lighting, pictorial composition, camera movement and sensitometry.

140E. Advanced Stage Lighting. (2) I.**Mr. Sturcken**

Prerequisite: course 40E or consent of the instructor.

The study of stage lighting as an art; the interpretation of a script through the control of light and color in relation to design, actor, and audience.

140F. Advanced Costuming. (2) I, II.**Mrs. Hungerland**

Lecture, two hours; laboratory, two hours. Prerequisite: course 40F or consent of the instructor.

Advanced study of historical costume and the interpretation of theatrical costume design through the use of patterns, fabrics, and related costume techniques.

141. Costume Design for Theater. (2) I, II.**Mr. Jones**

Lecture, one hour; laboratory, three hours.

Design of costumes for theatrical presentations. The study of the use of silhouette, fabrics, color, and decoration as related to theatrical characterization.

142A. Color Cinematography. (2) II.**Mr. Trimble**

Prerequisite: course 40C or consent of the instructor.

History and theories of color photography with emphasis on present-day methods in motion picture and television production. A comparative study of additive and subtractive systems as employed by Technicolor, Ansco, Kodak, and others.

142B. Color Cinematography. (2) I, II.

Mr. Clarke

Lecture, two hours; laboratory, three hours. Prerequisite: courses 40C, 140C, 142A and consent of the instructor.

A laboratory course in the creative applications of color cinematography. The use of contemporary color film stocks, optical systems, single and multiframe color cameras, and studio production techniques to enhance the visualization of dramatic statements.

143. Scene Painting. (1) I, II.

Lecture, one hour; laboratory, one hour.

The study of scenic painting techniques and materials and their relation to the interpretation of scenic design.

144. Make-Up for Theater, Television and Motion Pictures. (1) I, II.

Lecture, one hour; laboratory, one hour.

Mr. Jones

The art of make-up and its relation to the production as a whole. History, aesthetics, materials, and procedures of make-up.

146. Cinematic Effects. (2) I.

Mr. Fielding

Lecture, two hours; laboratory, three hours. Prerequisite: consent of the instructor.

A study of the theory and literature of special processes in contemporary cinematography. Evaluation and experimental use of these processes.

147. Design for Theater Arts. (3) I, II.

Lecture, two hours; laboratory, three hours. Prerequisite: course 40A or consent of the instructor.

Basic principles of design as applied to the interpretation and presentation of the visual aspects of dramaturgy. Study of styles, techniques and methods of design for the theater arts. Translation of ideas into visual form.

148A-148B. Problems in Design for Theater Arts. (3-3) I, II.

Lecture, two hours; laboratory, three hours. Prerequisite: courses 40A, 147 and consent of the instructor.

***148A. Advanced study in design for theater.**

Mr. Jones

148B. Advanced study in design for motion pictures and television.**150. Direction for Theater Arts. (3) I, II.**

Mr. Hatch, Mr. Hawkins, Mr. Selden

Lecture, two hours; laboratory, three hours. Prerequisite: courses 30 and 130.

A basic study of the director's function in the interpretation of dramatic material for an audience.

151A-151B. Motion Picture Editing. (3-3) I, II.

Mr. Brokaw

Lecture, three hours; laboratory, three hours, plus additional hours to be arranged.

Prerequisite: course 40D and consent of the instructor.

A study of the role of editing in the creation of the motion picture. Laboratory practice in the creative aspects of film editing.

152A. Advanced Theater Direction. (3) I, II.

Mr. Hatch

Lecture, two hours; laboratory, to be arranged. Prerequisite: courses 30, 130, 150, and 170A.

Special problems in the direction of the one-act play for the stage.

152B. Advanced Motion Picture Direction. (3) I, II.

Mr. Hawkins, Mr. J. Young

Lecture, two hours; laboratory, to be arranged. Prerequisite: courses 30, 40C, 40D, 130, 150, and 170B.

A study of the director's use of the motion picture medium in the interpretation of dramatic material.

* Not to be given, 1963-1964.

152C. Advanced Television Direction. (3) I, II.**Mr. Miller**

Lecture, two hours; laboratory, to be arranged. Prerequisite: courses 30, 130, 150, and 170C.

A study of the director's use of the television medium in the interpretation of dramatic material. Television productions are video taped for criticism and analysis.

160. The Role of Management in Theater Arts. (2) I, II.**Mr. Morrison**

Lecture, two hours; quiz section, one hour.

A study of the artistic, social, and economic criteria for decision-making in the administration of the theater arts and the processes for carrying out those decisions. Considerations governing decisions affecting management of the various producing bodies in the theater arts.

170A, B, C. Workshop in Theater Arts. (3-3-3) I, II.

Lecture, two hours; laboratory, six hours. Prerequisite: courses 30, 130 and 150; to 170B add courses 40C and 40D. Only one of these courses may be taken for credit.

Production in the theater arts. The translation of ideas and concepts into their ultimate dramatic form.

170A. Workshop in Theater.**Mr. Sturcken****170B. Workshop in Motion Pictures.****Mr. Brokaw, Mr. Schloss, Mr. C. Young, Mr. J. Young****170C. Workshop in Television.****Mr. M. Young**

Television productions are video taped for criticism and analysis.

171. Advanced Theater Arts Workshop. (1-3) I, II.**Mr. Freud, Mr. Hawkins and Mr. Ross in charge**

Lecture, two hours; laboratory, six hours. Prerequisite: consent of the staff. May be repeated for a total maximum of 6 units credit.

Advanced production in theater arts.

172. Radio Workshop. (3) I, II.**Mr. Miller**

Lecture, two hours; laboratory, four hours. Prerequisite: consent of the instructor.

A basic laboratory course offering practice in the preparation of radio programs.

179A, B, C. Production Workshop in Theater Arts. (1-1-1) I, II.

These courses may be repeated for maximum credit of 4 units for the entire series.

Supervised workshop assignments related to the production programs of the department.

179A. Production Workshop in Theater.**——— and Staff****179B. Production Workshop in Motion Pictures.****The Staff****179C. Production Workshop in Television.****Mr. Ross****180. Animation Design in Theater Arts. (3) I, II.****Mr. Shull**

Lecture, three hours; laboratory, three hours.

History and use of speech, rhythm, and graphic design to form effective communication on film.

181. Writing for Animation. (3) I, II.**Mr. Shull**

Lecture, three hours; laboratory, three hours. Prerequisite: course 180 and consent of the instructor.

Research and practice in creative writing and planning for the animated film.

182. Animation Workshop. (3) I, II.**Mr. Shull**

Lecture, three hours; laboratory, three hours. Prerequisite: course 180 and consent of the instructor.

Organization and integration of the various creative arts used in animation to form a complete study of a selected topic.

199. Special Studies in Theater Arts. (1-4) I, II.

The Staff

Prerequisite: senior standing and consent of the instructor.

Graduate Courses

200. Bibliography and Methods of Research in Theater Arts. (2) I, II.

Mr. Fielding, Mr. Hatch, Mr. Hethmon

201. The Background of Theatrical Art. (3) I, II.

Mr. Boyle

An analysis of the aesthetic principles and content of the theater.

206A-206B. Advanced Playwriting. (3-3) Yr.

Mr. Savage, Mr. Selden

Guided completion of a full-length play, or study and preparation for the writing of a thesis play.

220. Policies and Problems of Television and Radio Broadcasting. (3) II.

Mr. Kingson

Advanced study in comparative radio and television broadcasting, with special emphasis upon British, Canadian, Continental, and Australian systems.

231. The Teaching of Secondary School Dramatics. (2) II.

Mr. Morrison

Study of current methods and problems of production as related to teaching on the secondary level. Restricted to candidates for teaching certificates and approved theater arts majors.

235. Advanced Motion Picture Editing. (3) I, II.

Mr. C. Young

Prerequisite: courses 40D, 151, and consent of the instructor.

Study and analysis of the editor's creative contribution to the structure and final form of the picture. The basis of rhythmic and dynamic montage, and application of all types of special effects.

239. Film Aesthetics. (3) I.

Mr. Gray

Study and analysis of the film in relation to other art forms.

240. Technical Methods and Practices in the Theater. (3) I, II.

Advanced studies in theater production planning and budgeting, theater architecture, stage design and lighting.

270. Seminar in the Documentary and Educational Film. (3) II.

Mr. Gray

Analysis of the nonfiction film in relation to the development of documentary and educational film scripts.

271. Seminar in the Fiction Film. (3) I.

Mr. Gray

Analysis of the technique employed in the fictional film; exercise in the preparation of story material and the development of fictional scripts.

272. Seminar in Theater History. (3) I, II.

Mr. Freud, Mr. Melnitz

Exploration of a selected area of theatrical history. Guided reading in University, Clark, and Huntington libraries. Presentation of fully annotated written report of independent investigation.

290. Research Projects in Theater Arts. (1) I, II.

Section 1. In Theater.

Section 2. In Motion Pictures.

Section 3. In Television or Radio.

Mr. Selden and Staff

Mr. Fielding and Staff

Mr. Friedman and Staff

291. Production Planning in Theater Arts. (1) I, II.

Section 1. In Theater.

Section 2. In Motion Pictures.

Section 3. In Television or Radio.

_____ and Staff

Mr. J. Young

Mr. Friedman

292. Advanced Problems in Nondramatic Television and Radio. (3-5) I, II.**Mr. M. Young**

A lecture and projects course in the writing and production of documentary programs. The course is designed to explore the field of documentary radio programs from the standpoint of subject matter and develop new techniques in writing and production.

299A-299B. Special Problems in Theater Arts. (2-5; 2-5) I, II. The Staff

Practical creative work in the area of theater arts which the student has designated his area of emphasis. Study may be pursued in the following areas: theatrical production, motion picture production, audio-visual educational production, television production, radio writing and production, and original research in theater arts.

Professional Courses**445. Motion Picture Techniques for Research and Instruction (3)****(Summer only)****Mr. Brokaw****(Former number, 145.)****Lecture, two hours; laboratory, three hours.**

An elementary course in the making of educational, scientific, and documentary films intended to serve workers in the professions. Class projects in the writing, planning, photography, editing, and recording of research and instructional films. Not open for credit in the Theater Arts major.

473. Workshop in Educational Television and Radio. (3) I, II.**(Former number, 173.)****Mr. Kingston****Lecture, two hours; laboratory, four hours.**

Backgrounds of educational television in the United States and abroad. New applications of broadcast and close-circuit television in the school and college curriculum. Production, distribution and utilization of instructional television.

Required Courses in Other Departments**Humanities 1A-1B. World Literature. (3-3) Yr.****Mr. Pasinetti****Classics 113. Ancient Drama. (2) I.****Mr. Travis****English 113A. British and Continental Drama, 1500-1850. (3) I, II.****Mr. Calderwood****English 113B. Modern Drama. (3) I, II.****Mr. Chandler****English 117J. Shakespeare. (3) I, II.****The Staff****Related Courses in Other Departments****Dance 34. Stage Movement. (2) I, II.****Dance 152. Organization of Public Dance Performances. (2) II.****Mrs. Scothorn****Dance 155. Folk Festivals. (2) II.****Miss Steinbiss****English 106D-106E. Fundamentals of Dramatic Writing. (3-3) Yr.****Mr. Savage****English 118. Children's Literature. (3) I, II.****Mrs. Sayers****Integrated Arts 1A-B. Man's Creative Experience in the Arts. (3-3) Yr.****Mr. Trissel****Music 137. Music for the Legitimate Drama, Screen, and Radio. (2) II.****Mr. Rubsamen**

Music 170. History of the Opera. (3) I.

Mr. Popper

Music 40H, 190H. Opera Workshop. (2-2)

Mrs. Limonick, Mr. Popper

Philosophy 136. Philosophy of Art. (3) II.

Mr. Wilson

ZOOLOGY

(Department Office, 2203 Life Sciences Building)

Gordon H. Ball, Ph.D., *Professor of Zoology.*

George A. Bartholomew, Ph.D., *Professor of Zoology.*

John N. Belkin, Ph.D., *Professor of Zoology.*

Theodore H. Bullock, Ph.D., *Professor of Zoology.*

Frederick Crescitelli, Ph.D., *Professor of Zoology.*

Waldo H. Furgason, Ph.D., *Professor of Zoology (Life Sciences).*

Theodore L. Jahn, Ph.D., *Professor of Zoology.*

Edgar L. Lazier, Ph.D., *Professor of Zoology.*

Fritiof S. Sjostrand, M.D., Ph.D., *Professor of Zoology.*

† Clara M. Szego (Clara Szego Roberts), Ph.D., *Professor of Zoology.*

Boyd W. Walker, Ph.D., *Professor of Zoology (Vice-Chairman of the Department).*

Bennet M. Allen, Ph.D., *Emeritus Professor of Zoology.*

Raymond B. Cowles, Ph.D., *Emeritus Professor of Zoology.*

Loye Holmes Miller, Ph.D., *Emeritus Professor of Biology.*

Nicholas E. Collias, Ph.D., *Associate Professor of Zoology.*

Thomas R. Howell, Ph.D., *Associate Professor of Zoology (Chairman of the Department).*

Thomas W. James, Ph.D., *Associate Professor of Zoology.*

J. Lee Kavanau, Ph.D., *Associate Professor of Zoology.*

Blaine H. Levedahl, Ph.D., *Associate Professor of Zoology.*

Otto H. Scherbaum, Ph.D., *Associate Professor of Zoology.*

Richard W. Siegel, Ph.D., *Associate Professor of Zoology.*

Henry J. Thompson, Ph.D., *Associate Professor of Botany (Life Sciences).*

Peter P. Vaughn, Ph.D., *Associate Professor of Zoology.*

Sarah Rogers Atsatt, Ph.D., *Associate Professor of Zoology, Emeritus.*

Albert A. Barber, Ph.D., *Assistant Professor of Zoology.*

Richard A. Boolootian, Ph.D., *Assistant Professor of Zoology.*

Elof A. Carlson, Ph.D., *Assistant Professor of Zoology.*

Malcolm S. Gordon, Ph.D., *Assistant Professor of Zoology.*

Robert C. Lasiewski, Ph.D., *Assistant Professor of Zoology.*

Monte Lloyd, Ph.D., *Assistant Professor of Zoology.*

Kenneth S. Norris, Ph.D., *Assistant Professor of Zoology.*

Vladimir Walters, Ph.D., *Assistant Professor of Zoology.*

J. Richard Whittaker, Ph.D., *Assistant Professor of Zoology.*

Wayne J. Baldwin, B.S., *Senior Museum Scientist, Ichthyology.*

O. Marcus Buchanan, B.S., *Museum Scientist, Ornithology and Mammalogy (Dickey Collection).*

† Sabbatical leave in residence, 1963-1964.

Jowett C. Chao, Ph.D., *Associate Research Zoologist.*
 Herbert A. Friedmann, Ph.D., *Professor of Zoology in Residence.*
 Lyle Herbst, M.A., *Lecturer in Life Science.*
 John B. Loefer, Ph.D., *Research Associate.*
 Maria Seraydarian, Ph.D., *Associate Research Zoologist.*

Letters and Science List.—All undergraduate courses in this department except 111H, and 370 are included in the Letters and Science List of Courses. For regulations governing this list, see page 72.

Preparation for the Major.—For students who will receive their bachelor's degrees in June 1966 or later: Required: courses 1A, 1B; Chemistry 1A, 1B, 5A, or 3A, 3B; Chemistry 8, 9, or 112A, 112B (112A, 112B are preferred); Physics 2A, 2B, or 1A, 1B, 1C, 1D. For students who will receive their bachelor's degrees before June 1966: Required: courses 1A, 1B; Chemistry 1A, 1B, or 3A, 3B; Physics 2A, 2B, or 1A, 1B, 1C, 1D. For all students: Recommended: German, French, and English 1B, or English 106S.

It is strongly recommended that students who plan to do graduate work in Zoology take, as undergraduates: Chemistry 112A, 112B, and Mathematics 3A, 3B, 4A. For many fields of graduate study in Zoology these courses are required; students are urged to seek the advice of staff members in the various fields.

The Major.—Twenty-two units of upper division work in zoology and 6 units of upper division work chosen from zoology or from approved related courses in anthropology, bacteriology, botany, chemistry, entomology, mathematics, paleontology, physics, or psychology. For students graduating after February 1965, the 22 upper division units in zoology must include courses 104A, 104B; 130A; 100A or 106; and 112 or 134. Students graduating in February 1965 or before may substitute 101A, 109A, or 142 for the 104A, 104B requirement.

Honors in Zoology.—A limited number of students who are qualified to carry out independent research may become candidates for Honors in Zoology. Candidates must take at least 6 units of Honors Research (Zoology 190) during the senior year. At the discretion of the staff, Honors students may be exempted from certain courses otherwise required for the major. During their final term, Honors candidates are required to submit and to defend orally before a faculty committee a written thesis describing the results of their research. Prerequisites for admission to candidacy for Honors in Zoology are a cumulative grade-point average of 3.0 in Zoology courses and permission of the Departmental Honors Committee. Applications for admission to Honors work should be made during the second semester of the junior year.

Curriculum for Medical Technologists. For details, see page 207.

Graduate Study

Students who plan to do graduate work in Zoology are advised to follow the recommendations for undergraduate preparation as listed under the section *Preparation for the Major*.

The department grants advanced degrees in zoology with specialization in the following fields: animal behavior, biophysics, embryology, comparative physiology, cytology, electron microscopy and ultra-structure, endocrinology,

entomology, general physiology, genetics, herpetology, histology, ichthyology, insect physiology, invertebrate zoology, mammalogy, neurophysiology, ornithology, parasitology, physiological ecology, population and community ecology, protozoology and protozoan physiology, radiation biology, vertebrate paleontology and vertebrate morphology, and vertebrate physiology.

Arrangements may be made for a limited number of students to major in zoology at the University of California, Los Angeles, and to do their research on the San Diego campus of the University in ichthyology, fisheries biology, invertebrate zoology, marine biology, or marine biochemistry under the direction of members of the staff of the Scripps Institution of Oceanography.

Requirements for the General Secondary Credential

Consult the UCLA ANNOUNCEMENT OF THE SCHOOL OF EDUCATION.

Requirements for the Master's Degree

In addition to the general requirements of the Graduate Division, the department may require written or oral examinations of any candidate for the master's degree. There is no foreign language requirement for the master's degree in zoology.

Requirement for the Doctor's Degree

In addition to the general requirements of the Graduate Division, students intending to become candidates for the Ph.D. degree must pass a written qualifying examination administered by the department.

Lower Division Courses

†1A. General Zoology. (4) I.

Mr. Boolootian

Lecture, two hours; laboratory, six hours; field trip.

Principles of animal biology, with emphasis on the invertebrates. Offered primarily for zoology majors, premedical, and pre dental students.

†1B. General Zoology. (4) I, II.

———, Mr. Gordon

Lecture, two hours; laboratory, six hours. Prerequisite: course 1A.

Principles of animal biology, with emphasis on comparative gross and microscopic anatomy and physiology of the vertebrates.

15. Elementary Zoology and Physiology. (5) I, II.

Mr. Levedahl, Mr. Barber

Lecture, three hours; laboratory, six hours. Not open to premedical, pre dental, or zoology majors.

25. General Human Anatomy. (3) I, II.

Mr. Vaughn, Mr. Walters

(Former number, 35.)

Lecture, two hours; laboratory, three hours. Prerequisite: course 15 and sophomore standing.

Upper Division Courses

100A. Vertebrate Embryology. (4) I.

Mr. Whittaker

(Formerly numbered 100.)

Lecture, two hours; laboratory, six hours. Prerequisite: courses 1A, 1B, or the equivalent.

Study of embryologic development of the main classes of vertebrates, with emphasis in the laboratory on the amphibian, bird, and mammal.

† Starting in the fall semester of 1964 a new year course in general biology (5-5) will be substituted for Zoology 1A-1B. It will serve as the introductory course for students majoring in bacteriology, botany, and zoology. The Zoology 1A-1B sequence will start for the last time in the fall semester, 1963.

***100B. Mammalian Embryology. (3) II.**

Lecture, two hours; laboratory, three hours. Prerequisite: course 100A.

The development of mammals, with emphasis on man and common laboratory mammals; selected topics on the physiology of the fetus and placental function.

101A. Introduction to General Physiology. (3) II.

Mr. Crescitelli

Prerequisite: courses 1A, 1B, or the equivalent. Chemistry 1A, 1B, 5A, 8; Physics 2A, 2B, or the equivalent are recommended.

Special emphasis on the physical and chemical properties of protoplasm; osmotic relations and permeability of living cells; physiological action of ions and principles of enzyme action.

***101B. General Physiology. (3) II.**

Mr. Crescitelli

Prerequisite: course 101A.

Continuation of course 101A with emphasis on oxidation-reduction systems, excitation, inhibition, respiration, and muscle contraction.

102. Vertebrate Physiology. (3) I.

Mr. James

Prerequisite: upper division standing.

Physiology of those systems which are concerned with the integration of body functions and with determination of behavior, with special emphasis on reflexes, motor coordination, and visceral functions. Designed particularly for majors in psychology and related fields. Not open to premedical, pre dental, or zoology majors.

†103. Experimental Embryology. (3) II.

Mr. Whittaker

Prerequisite: courses 1A, 1B, or the equivalent.

Principles governing histological and morphological differentiation; and analysis of the factors involved in growth and differentiation of cells and tissues.

†103C. Experimental Embryology Laboratory. (2) II.

Mr. Whittaker

Prerequisite or concurrent: course 103.

104A-104B. Introductory Physiology. (3-3) Yr.

Mr. Gordon, Mr. Lasiewski, Mr. Scherbaum, Mr. James

Lecture, two hours; laboratory, three hours. Prerequisite: Chemistry 1A, 1B, Physics 2A, 2B; Zoology 1B or the equivalent. Chemistry 5A, 8 strongly recommended. (Chemistry 5A, 8 will be required beginning fall, 1965). For students whose area of concentration is in physiology, Chemistry 112A, or 112B and Physics 1A, 1B, 1C are recommended in lieu of Chemistry 8 and Physics 2A, 2B.

106. Comparative Anatomy of the Vertebrates. (4) I, II.

Mr. Walters, Mr. Vaughn

Lecture, two hours; laboratory, six hours. Prerequisite: course 1B.

A study of the major concepts of vertebrate morphology, with particulars drawn from embryonic and fossil materials, as well as recent adult forms. Laboratory study mainly of the shark and cat.

107. Microanatomy. (4) I.

Mr. Sjöstrand

Lecture, two hours; laboratory, six hours. Prerequisite: course 1B.

The structure and activities of cells and tissues, with emphasis on the mammals. Designed for zoology majors.

†109. Comparative Vertebrate Physiology. (3) I.

Mr. Gordon

Lecture, two hours; laboratory, three hours. Prerequisite: course 104A-104B.

A detailed analysis of selected aspects of the physiology of the vertebrates.

110. Protozoology. (4) II.

Mr. Ball

Lecture, two hours; laboratory, six hours. Prerequisite: course 1A.

* Not to be given, 1963-1964.

† Given in alternate year. To be given in 1963-1964.

‡ Given in alternate years. Not to be given in 1963-1964.

- 111. Parasitology. (2) I.** Mr. Ball
Prerequisite: course 1A.
- 111C. Parasitology Laboratory. (2) I.** _____
Prerequisite or concurrent: course 111.
- 111H. Laboratory Aide Training in Parasitology. (2) I.** _____
Prerequisite or concurrent: course 111C.
For persons intending to become laboratory technologists.
- 112. Invertebrate Zoology. (4) II.** Mr. Boolootian
Lecture, two hours; laboratory and field, six hours. Prerequisite: upper division standing and general zoology.
A survey of structure, classification, natural history, and ecology of invertebrates.
- 115. Helminthology. (4) II.** _____
Lecture, two hours; laboratory, six hours. Prerequisite: courses 1A, 1B, 111.
A general course in the helminth parasites of animals.
- *118A. Introductory Endocrinology. (3) I.** Miss Szego
Prerequisite: course 1B or the equivalent. Chemistry 8 or 112 recommended.
A survey of the influences of hormonal mechanisms on body structure and function.
- †118B. Advanced Endocrinology. (3) II.** Miss Szego
Lecture, two hours; discussion and conference, one hour. Prerequisite: course 118A, Chemistry 8 or 112.
Continuation of course 118A. Detailed analysis of selected endocrine interrelationships and discussion of current research in the field.
- †118C. Endocrinology Laboratory. (3) II.** Miss Szego
Laboratory, six hours; discussion, one hour. Prerequisite or concurrent: course 118A or the equivalent, and consent of the instructor.
- 119. Isotopic Tracers in Biology. (3) I.** Mr. Barber
Lecture, two hours; discussion or demonstration, one hour. Prerequisite: one of the following: courses 101A, 118A, and 118B; Botany 160A; Bacteriology 106; or Chemistry 108A.
The use of isotopic tracers in the study of biological processes, including methods, problems investigated, interpretation of data, and possible future developments. For majors in the biological sciences.
- 122. Introduction to the Nervous System. (4) I.** Mr. Bullock
Lecture, three hours; laboratory, three hours. Prerequisite: course 1B, 15 or 102.
Structural and functional principles of the nervous system as a general biological phenomenon in vertebrates and invertebrates.
- †123. Invertebrate Embryology. (3) I.** Mr. Kavanau
Lecture, two hours; laboratory, three hours. Prerequisite: course 1A-1B or the equivalent.
Study of the embryonic development of various invertebrates.
- *125. Heredity and Evolution. (2) II.** Mr. Siegel
Prerequisite: junior standing. Not open to students who have taken course 1A, or to majors in zoology, botany, or bacteriology, or to premedical and pre dental students.
A survey of the concepts and facts basic to an appreciation of biologic systems and their evolutionary development.
- †126. Chemical Embryology. (3) II.** Mr. Whittaker
Prerequisite: course 103.
Chemical aspects of sex determination, gametogenesis, fertilization and early embryonic development.

* Not to be given, 1963-1964.

† Given in alternate years. Not to be given, 1963-1964.

***127. Immunobiology. (3) II.**

Prerequisite: one year of biological sciences, or consent of the instructor.

Principles of antibody production and action and the applications of immunological reactions to the solution of biological problems.

***129. Application of Optical Instruments to Biological Problems. (2) II.**

Mr. James

Lecture and demonstration, two hours. Prerequisite: Physics 1D or 2B.

A course designed for students in the biological sciences to acquaint them with the microscope, its potentialities and its limitations.

130A. Introductory Genetics. (2) I, II.

Mr. Carlson, Mr. Siegel

Lecture and discussion, two hours. Prerequisite: course 1A or the equivalent.

The principles of heredity and their bearings on reproduction and evolution.

130C. Genetics Laboratory. (2) I.

Mr. Carlson

Laboratory, six hours. Prerequisite or concurrent: course 130A.

Breeding experiments to illustrate the principles of genetics.

131A. Developmental Genetics. (2) I.

Mr. Siegel

Prerequisite: course 130A or Botany 140.

The interaction of genes, cytoplasm, and environment in the inheritance and determination of cellular characters and differentiation.

131B. Physiological Genetics. (2) II.

Mr. Carlson

Prerequisite: course 130A or Botany 140.

The roles of genes in the regulation of physiological processes, particularly at the molecular level.

***132A. General Cytology. (2) I.**

Prerequisite: course 1B; Chemistry 8.

The structure and function of cytoplasm and nucleus of animal cells.

***132B. Nuclear Cytology. (2) II.**

Prerequisite: courses 130A, 132A.

The morphology, chemical nature, and functions of the nucleus of animal cells, with emphasis on chromosomal structure and relation to genetics.

***132C. Cytology Laboratory. (2) I.**

Laboratory, six hours. Prerequisite or concurrent: course 132A or 132B.

133. Biology of the Cold-blooded Terrestrial Vertebrates. (4) II.

Mr. Norris

Lecture, two hours; laboratory, six hours; field trips. Prerequisite: course 134.

The systematics, distribution, physiology, and ecology of amphibians and reptiles.

134. Biology of the Vertebrates. (4) I, II.

Mr. Collias, Mr. Bartholomew

Lecture, three hours; laboratory, three hours; field trips. Prerequisite: course 1B.

The adaptations, behavior, ecology, and distribution of vertebrates. This course is prerequisite to courses 133, 135, and 141.

135. Ichthyology. (4) I.

Mr. Walker

Lecture, two hours; laboratory, six hours; field trips. Prerequisite: course 134.

The evolution, systematics, ecology, and biology of fishes, with special emphasis on local marine forms.

†137. Vertebrate Paleontology. (4) I.

Mr. Vaughn

Lecture, three hours; laboratory, three hours. Prerequisite: course 106 or consent of the instructor; recommended, Geology 8 or 101.

Study of the fossil record of the evolution of the vertebrates.

* Not to be given, 1963-1964.

† Given in alternate years. To be given, 1963-1964.

***138. Biology and Human Welfare. (3) II.**

Prerequisite: upper division standing, but no prerequisite courses.

History of major contributions of biology to human welfare, health, economics, and philosophy; and a survey of the resulting problems and aspects.

139. Biological Effects of Radiation. (3) II.

Mr. Levedahl

Prerequisite: upper division standing.

General biological responses following exposure of plants, animals, and man to ionizing radiations, especially those emanating from products of nuclear reactions.

140. Development of Biological Ideas. (3) I.

Mr. Furgason

Prerequisite: upper division standing and at least one year in the biological sciences.

History of the biological sciences.

141. Advanced Ornithology. (4) II.

Mr. Howell

Lecture, two hours; laboratory and field trips, six hours. Prerequisite: course 134 and consent of the instructor.

The systematics, distribution, physiology, and field biology of birds.

142. Comparative Invertebrate Physiology. (4) II.

Mr. Bullock

Lecture, two hours; laboratory, six hours. Prerequisite: courses 1A, 1B; recommended: courses 101, 112.

A survey of the differences in mechanism among animal groups of the several organ systems, nervous, endocrine, nutritive, respiratory, excretory, reproductive, circulatory, receptor, effector, etc.

150. General Entomology. (4) II.

Mr. Belkin

(Former number, Entomology 100.)

Lecture, two hours; laboratory, six hours, plus several field trips. Prerequisite: course 1A or Botany I or the equivalent.

The structure, physiology, life history, and classification of insects and related terrestrial arthropods.

151. Medical Entomology. (4) I.

Mr. Belkin

(Former number, Entomology 126.)

Lecture, two hours; laboratory, six hours, plus field trips. Prerequisite: course 1A or equivalent; recommended, courses 110, 111, 115.

***152. Principles of Systematic Zoology. (1-3) I.**

Mr. Belkin

(Former number, Entomology 112A.)

Lecture, three hours. Prerequisite: course 1A or the equivalent.

Taxonomic principles, concepts and methods; nomenclature, bibliographical methods.

154. Insect Physiology. (3) II.

Lecture, two hours; laboratory, three hours. Prerequisite: course 1A.

***159. Physical Ecology. (2) II.**

Mr. Bartholomew, Mr. Walker

Prerequisite: course 1B.

A survey of the physical and chemical factors of the environment as they affect the distribution and mode of life on animals.

160. Population Ecology. (4) I.

Mr. Lloyd

Lecture, two hours; laboratory, six hours. Prerequisite: Zoology 1B; one course in Statistics (may be taken concurrently); Zoology 112 or 134 or 150 or consent of instructor.

An introduction to ecology with special emphasis on the mechanisms which regulate animal numbers.

161. Community Ecology. (4) II.

Mr. Lloyd

Lecture, two hours; laboratory, six hours. Prerequisite: Zoology 1B, one course in Statistics (may be taken concurrently); Zoology 112 or 134 or 150 or consent of instructor.

The structure and operation of whole ecosystems, with special attention to community energetics, species diversity, and the quantitative description of animal habitats.

* Not to be given, 1963-1964.

190. Honors Research in Zoology. (1-5) I, II.

The Staff

Prerequisite: senior standing and permission of the Departmental Honors Committee.
Individual research designed to broaden and deepen the student's knowledge of some phase of zoology.

199. Special Studies. (1-3) I, II.

The Staff

Prerequisite: senior standing and consent of the instructor.

Graduate Courses**201. Advanced Cellular Physiology. (3) II.**

Mr. Jahn

Prerequisite or concurrent: course 101B.

The physiology of the cell membrane, including permeability, active transport of ions and metabolites, electrical properties, and the origin of bioelectromotive force.

***202A-202B-202C. Advanced General Physiology. (2-2-2) I.**

Prerequisite: courses 101A, 101B.

Mr. Crescitelli

Among topics discussed are respiration, enzymes, nerve physiology, vitamins, tracer techniques, and physiology of growth.

***205. Experimental Cell Biology. (3) II.**

Mr. James

Lecture, one hour; laboratory, six hours. Prerequisite: course 101A or equivalent.

The physiology of control mechanisms and the integration of metabolic systems at the cellular level. Individual experiments will be encouraged.

208. The Vertebrate Eye. (2) I.

Mr. Crescitelli

The morphology, physiology, and biochemistry of the vertebrate eye with special emphasis on its adaptive features.

210. Physiology of Protozoa. (2) I.

Mr. Jahn

Recommended: course 110.

Protoplasmic structure, locomotion, motor responses, respiration, excretion, metabolism, growth and nutrition of protozoa, especially as compared with other groups of organisms.

***211. The Physiology of Animal Parasites. (2) II.**

Prerequisite: courses 101A, 111.

Lectures on nutrition, metabolism, physiological ecology, and immunology and evolution of parasitic protozoa and helminths.

212. Advanced Invertebrate Zoology. (2) I.

Mr. Boolootian

Prerequisite: course 112.

Problems in functional adaptations, anatomy, development, and systematics of invertebrates; intraphyletic relationships as illustrated by an intensive study of one phylum.

†219. Radiation Biology. (3) I.

Mr. Barber

Lecture, two hours; laboratory, three hours. Prerequisite: course 101A or 109, 139 or consent of instructor.

The effects of ionizing and ultraviolet radiation from the points of view of physiology, pathology, cytology, and genetics.

***230. Advanced Genetics. (2) II.**

Mr. Siegel

Prerequisite or concurrent: course 130A or Botany 140.

Elucidation of genetics through the study of experimental animal cytogenetics, chromosomal alteration, position effect, irradiation effects, and mutations.

***231. Human Familial Genetics. (2) I.**

Prerequisite: course 130A.

A survey of human genetics with emphasis on methodology.

* Not to be given, 1963-1964.

† Absent on leave, 1963-1964.

232. Analytical Cytology. (2) II.

Prerequisite: course 132A or 132B.

Lecture, one hour; laboratory, three hours.

Application of physical and chemical methods to the determination of cell structure and function.

234A, B. Electron Microscopy in Molecular Biology. (5-5) I, II.

Mr. Sjöstrand

Lecture, two hours; laboratory, ten hours. Prerequisite: course 107 (can be taken concurrently), 129; Physics 1A, 1C, 1D; Chemistry 135, Chemistry 110A, or consent of instructor. Students registering will be required to supplement their laboratory with course 290.

Principles of electron microscopy and training in methods of high resolution electron microscopy as applied to molecular biology in connection with pursuing a research project.

237. The Behavior of Animals. (3) II.

Mr. Collias

Lecture, two hours; laboratory, three hours. Prerequisite: course 134.

Principles of ethology, including ecological significance, underlying mechanisms, and evolution of behavior, with special reference to natural conditions.

240A. Physiology of Contractile Tissues and Muscle. (3) I.

Lecture, two hours; laboratory, three hours. Prerequisite: course 101A.

240B. Comparative Physiology of Circulatory Systems. (3) II.

Lecture, two hours; laboratory, three hours. Prerequisite: course 240A.

242. Comparative Neurology. (2) I.

Mr. Bullock

Evolution of structure and function of nervous systems in invertebrates and vertebrates, with special reference to the central nervous system.

250. Survey of Animal Biology. (2) II.

Mr. Furgason

Prerequisite: course 140 and consent of the instructor.

A review of the basic concepts and theories of biological sciences as viewed with historical perspective and as related to contemporary viewpoints.

251A-251B. Seminar in Ecology of Amphibia and Reptiles. (2-2) Yr.

Mr. Norris

251C-251D. Seminar in Ecology of Birds and Mammals. (2-2) Yr.

Mr. Bartholomew, Mr. Howell

252A-252B. Seminar in Endocrinology. (2-2) Yr.

Miss Szego

253A-253B. Seminar in Genetics. (2-2) Yr.

Mr. Carlson, Mr. Siegel

Prerequisite: course 131A or 131B.

254A-254B. Seminar in Physiology of Development. (2-2) Yr.

Mr. Kavanau, Mr. Whittaker

255A-255B. Seminar in Protozoology and Parasitology. (2-2) Yr.

Mr. Allen, Mr. Ball

256. Seminar in Advanced Vertebrate Morphology. (3) I.

Mr. Walters

Prerequisite: course 106.

257. Seminar in Comparative Physiology. (2) II.

Mr. Bullock

258. Seminar in Physiology of Sense Organs. (2) II.**260A. Seminar in Ichthyology. (2) I.**

Mr. Walker, Mr. Gordon

‡ Given in alternate years. Not to be given, 1963-1964.

- 260B. Seminar in Fisheries Biology. (2) II. Mr. Walker, Mr. Gordon
261. Seminar in Cell Physiology. (2) I. Mr. Jahn
263. Seminar in Physiology of Microorganisms. (2) II. Mr. Jahn
- 264A-264B. Seminar in Kinetics of Biological Systems. (2-2) Yr.
Mr. Levedahl
266. Seminar in Vertebrate Paleontology. (2) II. Mr. Vaughn
- *267A-267B. Seminar in Animal Cytology. (2-2) Yr. ———
Prerequisite: any of the following: course 132A, 132B, 230, Botany 141.
268. Seminar on the Invertebrates. (2) II. Mr. Boolootian
269. Seminar in Animal Behavior. (2) I. Mr. Collias
270. Seminar in the Physiology of Growth. (2) II. Mr. Scherbaum
- 271A-271B. Seminar in Entomology. (2-2)
(Former number, Entomology 251A-251B.) Mr. Belkin
273. Seminar in Population Ecology. (2) I. Mr. Lloyd
274. Seminar in Community Ecology. (2) II. Mr. Lloyd
278. Seminar in Molecular Biology. (2) I. Mr. Sjöstrand
Prerequisites: Chemistry 112A, 112B; Chemistry 135 or Chemistry 108A and 108B.
- 290A-290B. Research in Zoology. (2-6; 2-6) Yr. The Staff
401. Theory and Practice of Instrumentation for Behavior Research. (3) I.
Mr. Kavanau
Lecture, two hours; laboratory, three hours. Prerequisites: Consent of the instructor. Applications of physical sensing methods and systems controls to behavior studies in the laboratory and field.

PALEONTOLOGY

Courses in general and invertebrate paleontology are offered by the Department of Geology (see page 332).

LIFE SCIENCES

1A-1B. Fundamentals of the Life Sciences. (3-3) Yr.

Lecture, demonstration, discussion, three hours. Mr. Thompson, Mr. Furgason

An integrated year-course designed primarily for students who are not majoring in the biological sciences. A nontechnical presentation of the fundamental biological concepts leading to an understanding of living things and man's place in the scientist's view of things. Both semesters must be satisfactorily completed to fulfill the College of Letters and Science requirement of at least 5 units of biological science.

370. Methods and Materials for Teaching Life Science. (3) II.

Mr. Herbst, Mr. Norris

Lecture, demonstration, field trips. Prerequisite: major in biological sciences, senior or graduate status, and one of the following courses: Botany 3, Zoology 112, 133, 134. Required of all prospective life science teachers who wish to secure the general secondary or junior college credential. It must be taken prior to practice teaching courses, Education G877, G878, and G879.

* Not to be given, 1963-1964.

BIOLOGY

12. Natural History. (3) I, II.

Mr. Collias, Mr. Norris

Lecture, three hours; demonstration, one hour; one required field trip in the semester.
Prerequisite: high school biological science or the equivalent, or consent of the instructor.

The biology of the environment, the common animals and some plants of southern California; their interrelationships, and their relationship to climate.
