UNIVERSITY OF CALIFORNIA, LOS ANGELES JUNE 1986 $4.00

Table of Contents

Academic Calendar iv

Chapter 1: About UCLA 1
- Introducing UCLA 2
- Academic Resources and Programs 6
- Student Life 12
- Student Services 18

Chapter 2: Undergraduate Study 21
- Undergraduate Admission 22
- Registration and Enrollment 25
- Undergraduate Fees and Financial Support 26
- Undergraduate Majors and Degrees 30
- Getting Your Bachelor's Degree .. 32
- Academic Resources and Assistance 35
- Academic Excellence 38

Chapter 3: Graduate Study 39
- Graduate Admission 41
- Graduate Majors and Degrees .. 42
- Registration and Enrollment 45
- Graduate Fees and Financial Support 47
- Requirements for Graduate Degrees 49
- Special Programs and Training .. 55
- General Policies and Regulations 56

Chapter 4: Academics 57
- Units and Grading Policy 58
- Leaving UCLA 62
- Organization: Colleges, Schools, Courses 64

Chapter 5: College of Letters and Science 67
- Letters and Science Majors 68
- The Study List 70
- Requirements for the Bachelor's Degrees 70
- Honors 76
- Preparing for a Professional School 77

About This Catalog

Chancellor: Charles E. Young
Assistant Vice Chancellor, Public Communications: Michael T. McManus
Director of Public Affairs Publications: Hallie Masler
Principal Editor: Leann J. Hennig
Design: Robin Weisz, Juliet Beynon

Photography: Philip Channing, Colin Crawford, Mark Harmel (cover), Terry O'Donnell, Norm Schindler, Frank D. Smith, Art Waldinger, Robin Weisz.

On the cover: The Franklin D. Murphy Sculpture Garden, featuring nearly 70 major works by late nineteenth- and twentieth-century masters, is a favorite spot for study, conversation, or just plain relaxation.

Want Extra Copies?

Copies of the 1986-87 *UCLA General Catalog* are available for purchase at the Students' Store. To obtain a copy by mail, send a check or money order for $6 within California or $7 outside California (includes UPS or first-class postage) to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024, ATTN: Mail Out. Make checks payable to ASUCLA. You may also charge the cost to your VISA or MasterCard by calling the Mail Out Department at (213) 825-6064.

Please note

Every effort has been made to ensure the accuracy of the information presented in the *UCLA General Catalog.* However, all courses, course descriptions, instructor designations, curricular degree requirements, and fees described herein are subject to change or deletion without notice.

Other information about UCLA may be found in the announcements of the Schools of Architecture and Urban Planning, Dentistry, Education, Engineering and Applied Science, Law, Library and Information Science, Management, Medicine, Nursing, Public Health, and Social Welfare, and in literature produced by the College of Fine Arts. Further details on graduate programs are available in the Graduate Division publication, *Standards and Procedures for Graduate Study at UCLA.*

Calendar

	Fall 1986	Winter 1987	Spring 1987
First day to file undergraduate application with admissions officer, 1147 Murphy Hall (last day will depend on number of applications received)	November 1, 1985	July 1, 1986	October 1, 1986
Last day to file application for graduate admission, readmission, or renewal of application with complete credentials and application fee, with Graduate Admissions Office, 1247 Murphy Hall	January 15, 1986	October 1	December 31
Last day to file graduate petitions for change of major with Graduate Division, 1225 Murphy Hall	January 15	October 1	December 31
First day to obtain Student Parking Request forms at Campus Parking Service	May 1	October 6	January 12, 1987
Distribution of registration materials by letter groups for continuing students	June 9	October 27	February 2
Schedule of Classes goes on sale at Students' Store, Ackerman Union and North Campus Student Center	June 11	October 29	February 4
New and reentrant students eligible to register by mail should receive Registration Forms at permanent address (weekly mailings)	June 23-August 15	November 3-26	February 6-25
Academic counseling for new students is available by appointment in college and school offices	July 1	Consult college or school	Consult college or school
Enrollment for student health insurance at A2-143 Center for the Health Sciences	July 1-October 10	December 1-January 16	March 23-April 10
Last day to submit Student Parking Request for campus parking permit	July 9 (1st run) August 19 (2nd run)	November 11	February 17
***First mailing date for continuing student registration (fee payment)**	July 16	October 27	February 2
***First mailing date for continuing student enrollment in classes**	July 16	November 5	February 11
Eligibility date for new and reentrant registration by mail (Statement of Legal Residence must be filed by this date in order to receive Registration Forms by mail)	August 1	October 31	January 30
***First mailing date for new and reentrant student registration (fee payment) and enrollment in classes**	August 6	November 14	February 20
Last day to file undergraduate application for readmission with Registrar, 1134 Murphy Hall (late applicants will pay a $50 late payment fee)	August 15	November 25	February 25
***Last mailing date for all students to enroll in classes**	August 29	November 19	February 27
***Last mailing date for all students to register (pay fees)**	August 29	December 12	March 13
Fee payments must be deposited in Cashier's Drop Slot, 1125 Murphy Hall	September 2-12	December 15-19	March 16-20
Mailing of Tentative Study List datamailer with results of enrollment processed by mail, and appointment for undergraduate enrollment in person	September 10	November 25	March 6
First mailing of validated Reg Card datamailer	September 10	December 19	March 13
Second mailing of validated Reg Card datamailer (Reg Cards for payments hereafter are available at 1134 Murphy Hall when quarter begins)	September 15	December 22	March 20
English as a Second Language Placement Examination (ESLPE)	September 16, 23	December 30	March 24
Chemistry/Mathematics Preliminary Examination	September 23	October 29	February 4
QUARTER BEGINS	September 23	January 5	March 30
Financial Aid check distribution to registered students begins	September 23	January 5	March 30
Issuing of UCLA Student I.D. Cards to new and reentering students begins	September 23	January 5	March 30
Registration (fee payment) in person, 8:30 a.m. to 5 p.m. (allow 45 minutes to complete process)	September 23-26	—	—
Undergraduate enrollment in person by appointment	September 23-26	December 4-6	March 12-14
French Placement Examination	September 24	January 5	March 30
Music Placement Examination	September 24	—	—
Spanish and Portuguese Placement Examination	September 25	December 29	March 26
Subject A Placement Examination and Proficiency Examinations for English 3	September 25	January 5	March 30
INSTRUCTION BEGINS	September 29	January 5	March 30
Changes in Study List without fee, 8:30 a.m. to 5 p.m.	September 29-October 10	December 8-12, January 5-16	March 16-20, 30-April 10

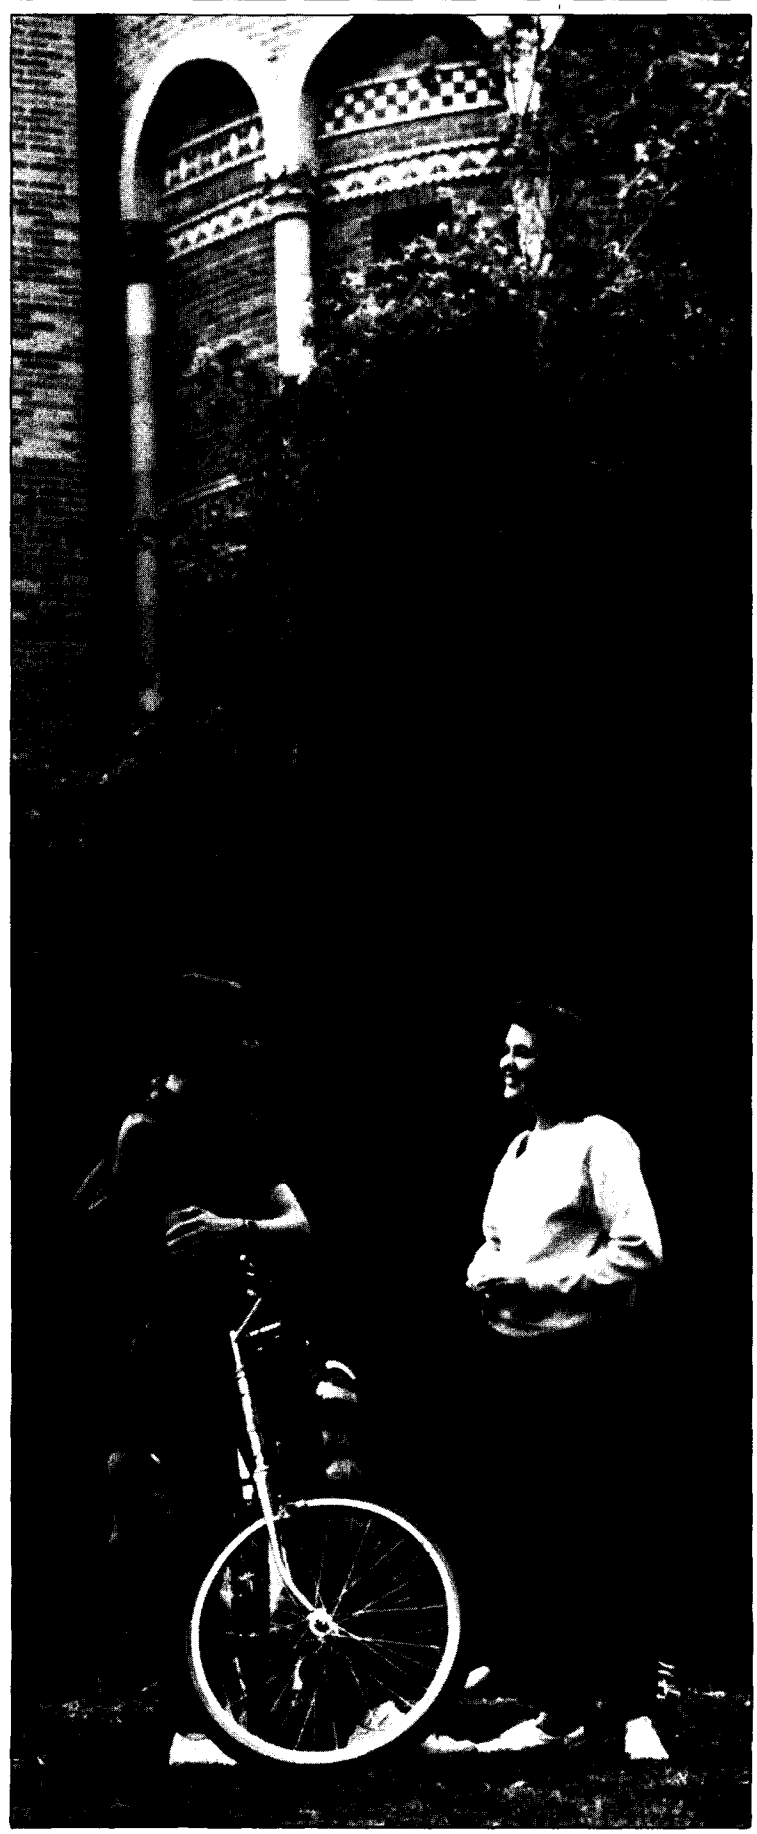
*Tentative dates; refer to *Schedule of Classes* for specific quarter.

	Fall 1986	Winter 1987	Spring 1987
LATE registration in person with $50 fee, 8:30 a.m. to 5 p.m.	September 29-October 10	December 22-24, 29-31, January 5-16	March 24-April 10
Graduate Study List Request should be filed with major department by 4 p.m.; all approved requests due to Registrar, 1134 Murphy Hall, by 5:15 p.m.	October 1	January 7	April 1
Last day: (1) To change Study List (add, drop courses) without fee (2) To check waiting lists for courses on computer (3) To file advancement to candidacy petitions for master's degree with Graduate Division, 1225 Murphy Hall (4) To file graduate leaves of absence with Graduate Division, 1225 Murphy Hall (5) To file Study List Request without fee (6) To file undergraduate request for fee reduction with college or school	October 10	January 16	April 10
Last day to register for ETS foreign language examinations in French, German, Russian, and Spanish	October 10	January 23	April 3
Registrar mails Official Study List datamailer to all registered students	October 13	January 20	April 13
WITH APPROVAL OF ACADEMIC DEAN: **(1) Last day for graduates to ADD courses with $3 petition fee** **(2) Last day for graduates to file Late Study List with $50 fee** **(3) Undergraduates approved for reduced fees are audited (must be enrolled in 10 units or less to be eligible for reduction)**	October 17	January 23	April 17
ETS foreign language examinations in French, German, Russian, and Spanish	October 18	January 31	April 11
Orientation meetings on format for master's theses and doctoral dissertations (see Theses and Dissertations Adviser, 141 Powell Library)	October 23-25	January 22-24	April 23-25
Last day to declare bachelor's degree candidacy for current quarter (without fee) with Registrar's Student Information, 1111 Murphy Hall	October 24	January 30	April 24
WITH APPROVAL OF ACADEMIC DEAN: **(1) Last day for undergraduates to ADD OR DROP courses with $3 petition fee** **(2) Last day for undergraduates to file Late Study List with $50 fee**	October 24	January 30	April 24
Last day for continuing students to file applications for undergraduate scholarships for 1987-88	—	February 1	—
Last day to submit final drafts of dissertations to doctoral committees for degrees to be conferred in current quarter	November 3	February 9	May 1
Last day: **(1) For undergraduates to change grading basis (optional P/NP) with $3 petition fee and APPROVAL OF ACADEMIC DEAN** **(2) To file removal of Incomplete petition ($5 fee) with Registrar's Student Information, 1111 Murphy Hall**	November 7	February 13	May 8
Last day to declare bachelor's degree candidacy (with $3 fee) with Registrar's Student Information, 1111 Murphy Hall	November 14	February 20	May 15
Last day to submit final drafts of theses to master's committees for degrees to be conferred in current quarter	November 17	February 23	May 18
Last day to file completed copies of theses for master's degrees and dissertations for doctoral degrees to be conferred in current quarter with Theses and Dissertations Adviser, 141 Powell Library	December 1	March 9	June 1
Last day to withdraw	December 5	March 13	June 5
WITH APPROVAL OF ACADEMIC DEAN: **(1) Last day for graduates to change grading basis (optional S/U) with $3 petition fee** **(2) Last day for graduates to DROP courses with $3 petition fee**	December 5	March 13	June 5
INSTRUCTION ENDS	December 6	March 14	June 6
Final Examinations	December 8-12	March 16-20	June 8-12
QUARTER ENDS	December 12	March 20	June 12
Last day to file applications for graduate merit-based financial support for 1987-88	January 15, 1987	Consult department	Consult department
Unofficial copy of previous quarter's grades available at Registrar's Student Information, 1111 Murphy Hall	January 31	May 1	August 1
Commencement			June 14
Academic and administrative holidays	July 4 September 1 November 27, 28 December 25, 26 January 1, 2	January 19 February 16 March 23	May 25

**Changes to Official Study List after this date will be considered only under extraordinary circumstances and with approval of the academic dean.

About UCLA

1



Introducing UCLA

". . . in 10 years . . . we shall look with amazement upon the development of this University, for it is certain to be greater, far greater, than the imagination of any of us can foresee."

— Ernest Carroll Moore
UCLA Director, 1919

Humble Beginnings

The year was 1880. With a population of 11,000, Los Angeles was a gaslit pueblo trying to convince the state to establish in Southern California a second Normal School like the one already existing in San Jose, some 300 miles to the north.

In March of the following year, the State Assembly approved the establishment of such a school. A group of enthusiastic citizens, over 200 of whom contributed between $2 and $500, purchased a site less than a mile from the business section. Soon the towering Victorian form of the school rose from an orange grove which, today, is the site of the Central Los Angeles Public Library. On August 29, 1882, the Los Angeles Branch of the State Normal School welcomed its first students.

By 1914, the little pueblo of Los Angeles had grown to a city of 350,000 and the school, whose enrollment far exceeded its capacity, moved to new quarters — a Hollywood ranch off a dirt road which would later become Vermont Avenue.

With a view toward expansion, Director Ernest Carroll Moore proposed in 1917 that the school become the first branch of the Berkeley-based University of California. Two years later, the Los Angeles State Normal School was replaced by the Southern Branch of the University of California, no longer merely a teacher's college but an institution that offered two years of instruction in Letters and Science. Third- and fourth-year courses were soon added, the first class of 300 students was graduated in 1925, and by 1927 the Southern Branch had earned its new name: The University of California at Los Angeles (the "at" became a comma in 1958).

The Move Westward

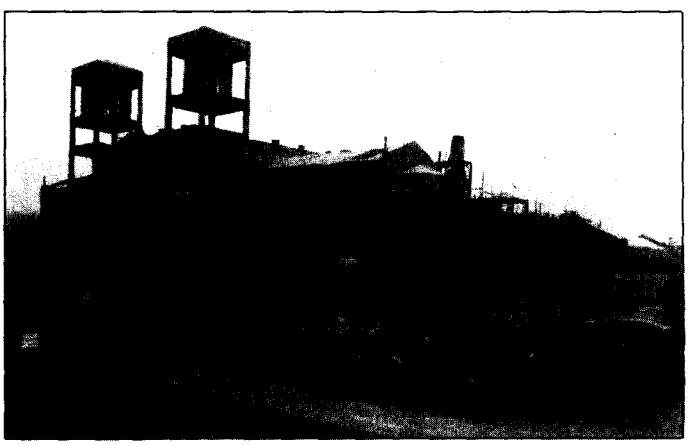
As the student population of the University continued to increase, the need for a new site became obvious and the search was soon underway for a permanent home for UCLA. On September 21, 1927, Director Moore turned the first shovelful of soil that broke ground for the creation of the campus of his dreams.

The choice of Westwood, set squarely in the path of westward-moving Los Angeles, no doubt was an important factor in determining UCLA's future growth. But in 1929, on the barren, chaparral-covered hills of Westwood, the four original buildings — Royce Hall, Powell Library, Haines and Kinsey Halls — formed a lonesome little cluster in the middle of four hundred empty acres. The campus hosted some 5,500 students that fall.

The first priority after the move to Westwood was to establish a graduate curriculum, essential for any major university. The Regents established the master's degree at UCLA in 1933 and, three years later, the doctorate. UCLA was fast becoming a full-fledged university offering advanced study in almost every field.

Los Angeles and the University nurtured each other through the years and both experienced phenomenal growth and development during the

Groundbreaking, September 21, 1927. Provost Ernest Carroll Moore wields the shovel as Regent Edward A. Dickson (to Dr. Moore's right) and others cheer.



Not the sound of symphony, but of chisel and saw: Royce Hall under construction, 1928.

Royce, Haines, Kinsey, and Moore Halls and Powell Library: the UCLA of 1929.

next half-century. UCLA's most spectacular period of growth occurred in the 25 years following World War II, when it tripled its prewar enrollment of 9,000 students and undertook what would become a $260 million building program that included residence halls, parking structures, laboratories, more classrooms, service buildings, athletic and recreational facilities, and a 715-bed teaching hospital which is now one of the largest and most highly respected in the world.

UCLA Today

Today, UCLA is a large and complex institution devoted to undergraduate and graduate scholarship, research, and public service. Known for academic excellence, many of its programs are rated among the best in the nation, some among the best in the world.

Nearly 150 buildings on 411 acres house 13 colleges and schools and serve over 34,000 students. UCLA's top administrative officer is Chancellor Charles E. Young who has provided dynamic leadership for the campus since he took office in the fall of 1968.

The Setting

UCLA is cradled in rolling green hills just five miles inland from the ocean, in one of the most attractive areas of Southern California. It is bordered on the north by the protected wilderness of the Santa Monica Mountains and at its southern gate by Westwood Village. Originally envisioned as a business district to serve UCLA, this picturesque little college town has mushroomed into an entertainment magnet for the entire Los Angeles area.

The cultural treasures of the Los Angeles County Museum of Art are a few miles to the east as are other museums, the community of Beverly Hills, the Music Center, and the downtown business area. Beyond that the deserts, snowcapped mountains, and ski resorts are little more than an hour's drive.

The Ambience

UCLA is a place of broad vistas, spacious quadrangles, and landscaped gardens. The stately Tudor Gothic and Italian Romanesque architecture of the early buildings blends with the contemporary and modern design of the newer structures. Royce Hall, one of the original four buildings, was recently renovated and remains the campus symbol. UCLA is a place of contrasts. Moods range from the activity of Bruin Walk to the serenity of the Japanese Garden. Attend a rock concert on the lawn, or a classical recital in Schoenberg Hall. Contemplate a Rodin or a Lachaise in the Sculpture Garden, or participate in a political rally in Meyerhoff Park.

UCLA is a place of surprises. A unique inverted fountain, where water flows over river rocks, recalls the Yellowstone creeks that inspired it. Enter the Bunche Hall Annex and discover a glorious atrium where palms and ferns glisten in filtered sunlight. Step inside the courtyard of Macgowan Hall and come face to face with the impressive stone Tower of Masks, created by the noted sculptress Anna Mahler.

UCLA is a place for serious study in a vibrant, dynamic atmosphere. You must visit the campus to appreciate it. **The Visitors Center,** located in 1417 Peter V. Ueberroth Building (206-8147), has a reception area where visitors are met, welcomed, and assisted. The center arranges group or personal tours of the campus all year round and provides information on campus exhibits and recreation areas. The **Office of Undergraduate Admissions and Relations with Schools** (825-8764) conducts tours for prospective undergraduates.

The Commitment to Research

UCLA is one of the outstanding "research universities" in the country. What does this mean to you as a student?

It means that the same faculty members teach both undergraduate and graduate courses and that these instructors create knowledge as well as transmit it. They spend a major portion of their time engaged in research in libraries and laboratories and out in the field.

At UCLA you are taught by the people making the discoveries, so you learn the latest findings on every front. You may exchange ideas with faculty members who are authorities in their fields, and you will be encouraged to participate in research to experience firsthand the discovery of new knowledge. This inseparable commitment to teaching and research is the hallmark of a research university.

The Question of Size

Although UCLA has a larger enrollment than other University of California campuses, it is small in comparison to some of the Midwestern universities. Its general campus population of some 30,500 students is equal to that at UC Berkeley, but the UCLA campus is enriched by an additional 3,800 men and women studying in its health science schools of Dentistry, Medicine, Nursing, and Public Health. UCLA makes the most of its size by offering an extraordinary breadth of high quality academic programs and a range of student opportunities available at few other universities in the country.

A major concern of the faculty and staff is to allow you, the student, to feel that you belong. UCLA provides orientation sessions and special academic assistance programs for new students, a staff of helpful advisers and counselors in every college and academic department, a myriad of student services, and unlimited opportunities for involvement and participation.

All UCLA students share the pride of attending one of the most prestigious educational institutions in the country. Beyond that, no one individual deals with the totality of UCLA. Campus life is made comfortable by interacting and identifying with only certain parts of the whole, whether they be your academic department, residence hall, fraternity or sorority, club or organization, or the spirit of Bruin victories on the athletic fields.

Many prospective students ask about the size of classes at UCLA. Standard instructional formats include lectures, discussion sections, seminars, and laboratory sessions. Lecture groups of more than 200 — especially in introductory courses — are not unusual, but in such cases students generally also enroll in discussion sections of about 25 students. Seminars and laboratory classes usually have fewer than 20 students. There is an overall ratio of one faculty member for approximately 17 students.

Most UCLA faculty members take a genuine interest in their students. They set aside office hours for receiving students, and most appreciate the opportunity for informal conversation. Even professors who seem remote in the classroom may be just the opposite on a one-to-one basis. A brief discussion can benefit both student and instructor.

Professors are often aided, especially in the small discussion sections, by teaching assistants (TAs). These are graduate students who teach on a part-time basis while pursuing their degree. Many students find it helpful to talk to the TAs about academic problems.

Hallmarks of Excellence

Recent surveys indicate that in overall excellence, UCLA is one of America's most prestigious and influential public universities. It is consistently rated among the best universities in the nation and is by far the youngest institution in this select group.

ACADEMICS — UCLA has two colleges and 11 professional schools. The College of Letters and Science and the College of Fine Arts offer programs leading to both undergraduate and graduate degrees, as do the School of Engineering and Applied Science and the School of Nursing. The other professional schools offer graduate programs exclusively: the Graduate School of Architecture and Urban Planning, Graduate School of Education, School of Law, Graduate School of Library and Information Science, Graduate School of Management, School of Social Welfare and, in the health sciences, the Schools of Dentistry, Medicine, and Public Health.

Few universities in the world offer the extraordinary range and diversity of academic programs that students enjoy at UCLA. Undergraduates may earn a Bachelor of Arts or Bachelor of Science degree in one of 102 different disciplines; graduate students may earn one of 77 master's and 92 doctoral and professional degrees.

THE FACULTY — Of the many factors that go into the making of a great university, no single factor is as important as its faculty. UCLA's distinguished faculty includes John Simon Guggenheim fellows and many members of both the National Academy of Sciences and the American Academy of Arts and Sciences. During the past academic year 15 faculty members received Fulbright scholarships to conduct research, lecture, and consult abroad, making UCLA the leading university nationwide for the second consecutive year in the number of scholars presented the prestigious award.

In a recent survey the Conference Board of Associated Research Councils evaluated the quality of the faculty in more than 150 American research universities. UCLA was judged second in the nation among public universities, and among the most highly rated overall. Of the 32 disciplines studied, 17 of UCLA's academic departments were ranked among the top 10 in the country.

RESEARCH — UCLA is among the six leading research universities in the country, receiving more than $170 million a year in extramural grants and contracts to support its research activities. The University hosts several hundred postdoctoral scholars each year who share its excellent research facilities. Its laboratories have seen major breakthroughs in scientific and medical research; its study centers have helped foster understanding among the various cultures of the world; ongoing pursuits of new knowledge in a myriad of vital areas continue to improve the quality of life for people around the world.

TEACHING — Although all UCLA faculty members engage in research and the discovery of new knowledge, they are equally dedicated to disseminating their findings in the classroom. Indeed, excellence in teaching is one of the main criteria for faculty promotion, and distinguished teaching awards are among those most highly prized by UCLA professors.

STUDENT BODY — The diversity of UCLA's student population — nearly equally divided between men and women — yields the wide range of opinion and perspective essential to a great university. Although the majority are from California, students come from all 50 states and more than 100 foreign countries to study at UCLA. International students number more than 2,100, making this one of the most popular American universities for students from abroad. Ethnic minorities comprise about one third of the undergraduates and 25 percent of the graduate student population.

NUMEROUS OTHER FACTORS — With nearly six million volumes, UCLA's library is rated among the finest in the country. Its athletic teams have made the University an acknowledged leader in intercollegiate sports. Its Center for the Performing Arts ranks as the largest, most diversified and comprehensive program of its kind in the country.

The University played a significant role in the 1984 Summer Olympics in Los Angeles, with a 4,000-athlete Olympic Village, all gymnastics and tennis events, the drug-testing laboratory, and most theatrical events of the Olympic Arts Festival on its campus.

All these factors plus its research facilities, its community service, and its international links with all parts of the world make UCLA today a very special kind of institution.

The University of California

The University of California traces its origins to 1868, when Governor Henry H. Haight signed the Organic Act providing that California's first "complete University" be created.

Classes began the following year at the College of California in Oakland. The first buildings on the Berkeley campus were completed in 1873, and the University moved into its new home. The following June, the University of California conferred bachelor's degrees on 12 graduates.

Today the University is one of the largest and most renowned centers of higher education in the world. Its nine campuses span the state, from Davis in the north to San Diego in the south. In between are Berkeley, San Francisco, Santa Cruz, Santa Barbara, Riverside, Irvine and, of course, Los Angeles.

All the campuses adhere to the same admission guidelines and high academic standards, yet each has its own distinct character, atmosphere, and — to some degree — academic individuality. Riverside, for example, excels in the plant sciences and entomology; Davis has a large agricultural school and offers the University's only veterinary medicine program; San Diego has excellent oceanography and marine biology programs; San Francisco is devoted exclusively to the health sciences. Among the campuses there are five medical schools and three law schools, as well as schools of architecture, business administration, education, engineering, and many others.

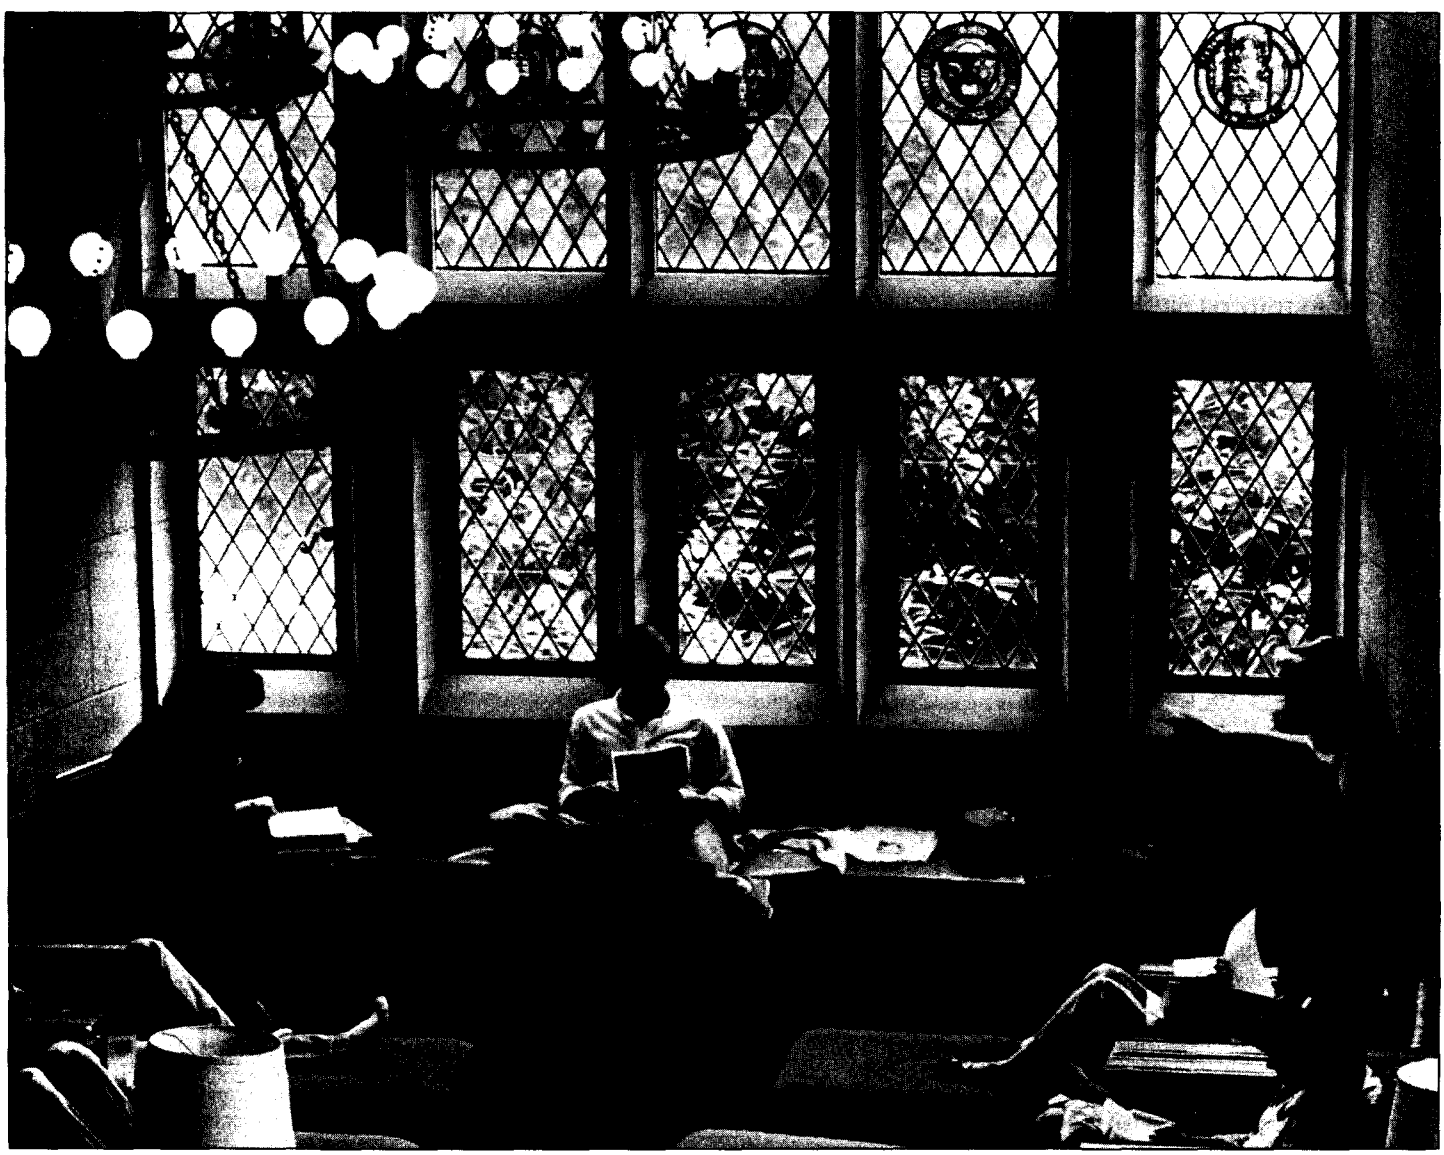
The UC campuses have a combined enrollment of 148,000 students, 90 percent of them California residents. About one fourth study at the graduate level. Some 150 laboratories, extension centers, and research and field stations strengthen teaching and research while providing public service to California and the nation. The collections of over 100 UC libraries on the nine campuses are surpassed in size on the American continent only by the Library of Congress collection.

The faculty of the University of California is internationally known for its distinguished academic achievements. On its nine campuses the University has 18 Nobel laureates, and membership in the National Academy of Sciences is the largest of any university in the country.

University Administration

The University of California system is governed by a **Board of Regents** whose regular members are appointed by the Governor of California. In addition to setting broad general policy and making budgetary decisions for the UC system, The Regents appoint the President of the University, the nine chancellors, and the directors, provosts, and deans who administer the affairs of the individual campuses and divisions of the University.

The Regents delegate authority in academic matters to the **Academic Senate,** which determines academic policy for the University as a whole. The Senate, composed of faculty and certain admininistrative officers, determines the conditions for admission and granting of degrees, authorizes and supervises courses and curricula, and advises University administrators on budgets and faculty appointments and promotions. Individual divisions of the Universitywide Academic Senate determine academic policy for each campus. Students participate in policy-making at both campuswide and systemwide levels.



Academic Resources and Programs

Research: The Discovery of Knowledge

As one of the largest research universities in the world, UCLA is renowned for its programs of faculty and student research; more than 3,000 funded programs are in progress at a given time. One focus of these efforts is a group of "organized research units" (ORUs) which provide an interdisciplinary approach to the search for knowledge.

ORUs are study centers and research institutes consisting of faculty and students from various departments engaged in continuing research of particular subjects. They do not offer courses of instruction or degrees, although several work in conjunction with interdepartmental instruction programs which lead to bachelor's and/or advanced degrees. ORUs provide invaluable experience for students and faculty in basic and applied research and greatly enhance UCLA's educational program and the overall academic quality of the University.

In the overview which follows, UCLA's organized research units are listed within five major divisions — health sciences, life sciences, physical sciences and engineering, social sciences, and arts and humanities. Within each division, representative groups and programs are included which, although not formally established as ORUs, are nevertheless doing important research in their respective areas.

Health Sciences

The **LABORATORY OF BIOMEDICAL AND ENVIRONMENTAL SCIENCES,** located in Warren Hall (900 Veteran Avenue, 825-9431) and funded through a contract with the Department of Energy, conducts research in the fields of biomolecular and cellular science, environmental biology, and nuclear medicine. Its major facilities include a cobalt radiation installation, a biomedical cyclotron, an ECAT III scanner, and environmentally controlled growth chambers.

The **BRAIN RESEARCH INSTITUTE,** center of neuroscience research at UCLA, is located in the Center for the Health Sciences (73-364 BRI, 825-5061). It has the largest investigative program of its kind in the country, with more than 140 scientists working on problems ranging from the nerve cell to human behavior. The institute provides an environment for specific multidisciplinary research and training on the structure and function of the brain.

The **DENTAL RESEARCH INSTITUTE,** with principal laboratories on the seventh floor of the School of Dentistry, fosters research related to oral health. Areas of investigation include biomaterials, clinical studies, craniofacial biology, immunology/immunogenetics, oral neurology/pain, periodontology, and ultrastructure/cell biology. The Office of the Director is located in 73-016 Center for the Health Sciences (206-8045).

The **MENTAL RETARDATION RESEARCH CENTER,** located in 58-258 NPI&H (825-5542), provides laboratories and clinical facilities for research and training in mental retardation and related aspects of human development. Its interdisciplinary activities range from anthropological studies to molecular aspects of inherited metabolic diseases.

The **JULES STEIN EYE INSTITUTE** is one of the best equipped centers for research and treatment of eye diseases anywhere in the world. This comprehensive facility, located in the Center for the Health Sciences (825-5051), is devoted to the study of vision, the care of patients with eye disease, and education in the broad field of ophthalmology. Outpatient, inpatient, and surgical facilities are provided.

In the health sciences, research carried out in ORUs is complemented by research on neurological and neuromuscular diseases in the **Jerry Lewis Neuromuscular Research Center,** the **Reed Neurological Research Center,** and the **Neuropsychiatric Institute and Hospital.** The **Jonsson Comprehensive Cancer Center,** one of 20 comprehensive centers in the nation, is renowned for the breadth and excellence of its cancer research. The **Center for Ulcer Research and Education** is a federally funded center doing basic and applied research on the origin and treatment of ulcers.

Life Sciences

The **MOLECULAR BIOLOGY INSTITUTE** provides the research and training resources in molecular biology for faculty from the College of Letters and Science and the School of Medicine, and includes the Parvin Cancer Research Laboratories. Administrative offices are located in 168 MBI (825-1018).

The **CENTER FOR THE STUDY OF WOMEN,** located in 236A Kinsey Hall (825-0590), coordinates and disseminates interdisciplinary research on women, focusing on three programmatic areas: women, work, and the economy; women, language, and the arts; and women, science, and health. The center promotes innovative research by sponsoring conferences, publications, a visiting scholars program, the Graduate Gender Studies Union, and ongoing colloquia on Women, Culture, and Theory and Women in Science. In collaboration with other UC campuses, women's studies programs, and community groups, the center seeks to address public policies affecting women's lives.

Physical Sciences and Engineering

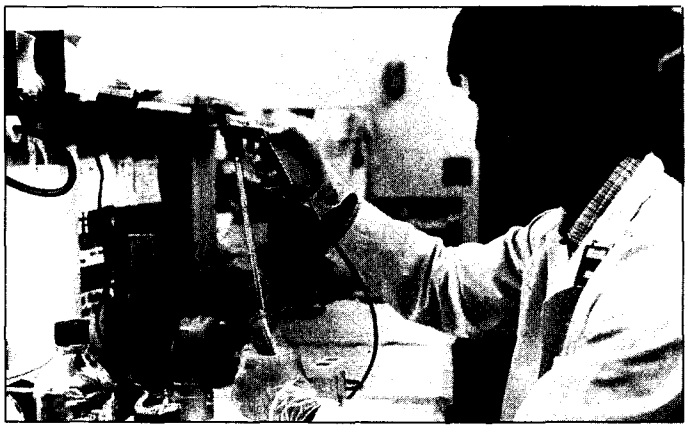
The **CRUMP INSTITUTE FOR MEDICAL ENGINEERING,** located in a modular unit on Circle Drive South at Westwood Plaza (825-4111), applies theory and engineering practice to problems in clinical medicine. Research focuses on noninvasive physiological monitoring of human subjects from infants to the aged, including development of experimental regimens, methods and equipment for data collection, and new mathematical techniques of data analysis, to assess the stability of these complex systems. Additional research areas include biochemical sensors, drug delivery systems, medical electronics, and biomechanics.

The **INSTITUTE OF GEOPHYSICS AND PLANETARY PHYSICS (IGPP)** is a Universitywide ORU; the branch at UCLA is engaged in research into the nature of the Earth, moon, and other planetary bodies, interplanetary space, and stellar interiors and their evolution. Laboratory studies include space physics, plasma astrophysics, fluid dynamics, meteoritics, seismology, climate dynamics, glaciology, petrology, geochronology, archaeology, and origins of life. The UCLA branch office is located in 3839 Slichter Hall (825-1664).

The **WHITE MOUNTAIN RESEARCH STATION** is a Universitywide ORU dedicated to high-altitude research. Four separate laboratory sites near Bishop, California, ranging up to 14,250 feet above sea level, include the highest permanent teaching and research facilities in North America. Research includes studies in archaeology and the biological and physical sciences. The administrative office is located in 6713 Geology (825-2093).

Among other interdisciplinary activities in the physical sciences and engineering at UCLA, a newly formed **Hazardous Waste Control Laboratory** is researching ways to reduce the volume and toxicity of hazardous wastes and dispose of the remainder in a safe manner. On another

frontier, an **Artificial Intelligence Laboratory** designed exclusively for research in this burgeoning field has opened under the wing of the Computer Science Department.



Social Sciences

The **INSTITUTE OF AMERICAN CULTURES** promotes the activities of four major ethnic centers whose goals are to study and illuminate the histories of our country's minorities, and to apply the University's capabilities to the analysis and solution of specific minority problems. These centers promote faculty research, encourage the development of new courses and degree programs, assist departments in recruiting scholars, build library and other resources, and publish literature to disseminate the results of their work.

The **Center for Afro-American Studies** (3111 Campbell Hall, 825-7403) conducts and sponsors research on the Afro-American experience, coordinates the Afro-American Studies curriculum, publishes research results, and sponsors community service programming.

The **American Indian Studies Center** (3220 Campbell Hall, 825-7315) is one of the largest centers of its kind in the country. It serves as an educational and research catalyst and includes a library, master's and postdoctoral fellowship programs, and a publishing unit that produces a number of books and a quarterly journal.

The **Asian American Studies Center** (3232 Campbell Hall, 825-2974) seeks to increase the knowledge and understanding of the experiences of Asian Pacific peoples in America and promotes the development of material resources related to Asian American studies.

The **Chicano Studies Research Center** (3121 Campbell Hall, 825-2363) facilitates interdisciplinary academic research related to the Chicano experience. The center has research and academic programs and maintains a publications unit and research library that are considered leading contributors to Chicano studies nationally.

In addition to the ethnic centers, UCLA has four major interdisciplinary **AREA STUDIES CENTERS** which coordinate teaching and research activities concerning major geographic areas. Some of the world's leading specialists on area studies have joined these centers, which rank among the best in the nation.

The **African Studies Center** (10244 Bunche Hall, 825-3686) is the major center for African studies in the Western U.S. It furthers teaching and research on Africa involving economics, linguistics, humanities, social sciences, and theater, film, and television. The center also works with the professional schools of Architecture and Urban Planning, Education, Management, and Public Health.

The **Latin American Center** (10343 Bunche Hall, 825-4571) encourages and coordinates interdisciplinary research, academic programs, and publications. By linking campus activities with developments in the field and in other institutional settings, the center benefits UCLA, the broader community of Latin Americanists, and the general public.

The **Gustave E. von Grunebaum Center for Near Eastern Studies** (10286 Bunche Hall, 825-1181) promotes research and training in basic problems related to the Near and Middle East countries in modern and medieval times. It also sponsors lectures, seminars, and conferences and promotes an extensive publications program.

The **Center for Russian and East European Studies** (334 Kinsey Hall, 825-4060) promotes and coordinates research on Russia and the countries of Eastern Europe through conferences, lectures, seminars, and academic exchange programs with Russian and Eastern European universities.

The **INSTITUTE OF INDUSTRIAL RELATIONS,** located in 1101G Campbell Hall (825-1964), has an interdisciplinary research and publishing program directed toward the study of labor law, labor-management relations, equal employment opportunity, occupational safety and health, and related issues. It also offers social policy and employment relations programs to the general public, unions, and management.

The **INSTITUTE FOR SOCIAL SCIENCE RESEARCH** promotes interdisciplinary research on a broad spectrum of contemporary sociological, psychological, political, and economic problems and community issues. Research components include the Survey Research Center and the Social Science Data Archive. Training in survey research methodology is available to students through participation in the annual Los Angeles area survey. The institute is located in 11252 Bunche Hall (825-0711).

Other interdisciplinary activities in the social sciences involve the study of arms control, nuclear proliferation, and international security in the **Center for International and Strategic Affairs.** A nationally respected **Business Forecasting Project** in UCLA's Graduate School of Management forecasts short-run and long-run economic activity both regionally and nationally. The **Center for the Study of Evaluation** in the Graduate School of Education is at the forefront of efforts to improve the quality of schooling in America through systematic evaluation practices. And the recently formed **Center for Pacific Rim Studies** promotes research, course offerings, seminars, and faculty and student exchange programs on the people and nations bordering the Pacific Ocean.

Arts and Humanities

The **INSTITUTE OF ARCHAEOLOGY,** located in 288 Kinsey Hall (206-8934), develops and coordinates the archaeological research and activities of more than 10 academic departments with field interests in the Americas, Asia, Africa, and Europe. Its major goal is to contribute to a reconstruction of the human past based on archaeological evidence. Activities include management of archives and laboratories such as the Rock Art Archive, public lectures, seminars, a publications program, field surveys, and excavations. The institute's Archaeological Survey coordinates research and data collection on Southern California archaeological sites.

The **CENTER FOR THE STUDY OF COMPARATIVE FOLKLORE AND MYTHOLOGY,** located in 1037 GSM (825-4242), supports and coordinates the comparative study of folklore and mythology. Resources include the Wayland D. Hand Library, the Visual Media and Folk Medicine Archives, the Archive of California and Western Folklore, the American Popular Beliefs and Superstitions Archive and Encyclopedia Project, the Archive of Folk Song and Music, and other collections of field recordings, records, and films.

The **CENTER FOR MEDIEVAL AND RENAISSANCE STUDIES** supports the research activities of some 20 academic departments dealing with the development of Western civilization between A.D. 300 and 1650. Major programs include training research assistants, appointing postdoctoral associates and visiting professors, organizing conferences and colloquia, and sponsoring publication of research. The center is located in 11365 Bunche Hall (825-1970, 825-1880).

The **CENTER FOR SEVENTEENTH- AND EIGHTEENTH-CENTURY STUDIES,** located in 1157 Bunche Hall (206-8552), coordinates the research activities of more than 60 faculty members studying the development of civilization in the early modern period. It is an extension of and includes the programs of UCLA's William Andrews Clark Memorial Library. Center programs involve appointing predoctoral and postdoctoral fellows and visiting professors, organizing conferences and colloquia, and sponsoring publication of research.

In other research activities, a recently established **Center for Bilingual Research and Second Language Education** is working to produce a society that is proficient in at least two languages. In the **Linguistics Phonetics Lab,** one of the best-known labs of its kind in the nation, researchers are finding new ways to analyze speech functions and make voiceprints for use in law enforcement. The University is establishing the **Armand Hammer Center for Leonardo Studies and Research** where scholars will have access to major resources for the study of the works of Leonardo da Vinci. And the College of Fine Arts has established an **Advanced Design Research Group** to develop innovative ways to manage and store information.

Resources for Research and Study

The University Library System

Library facilities are crucial to both study and research. The University Library on the UCLA campus is one of the country's largest and most renowned academic libraries, rated second in the nation last year by the Association of Research Libraries. The 19-branch system consists of the University Research Library, the College Library, the Clark Library, and 16 specialized subject libraries. Collectively they contain nearly six million volumes and extensive holdings of government publications, pamphlets, manuscripts, maps, microtext editions, music scores, recordings, photographs, and slides. They regularly receive over 80,000 serial publications.

The main card catalog in the University Research Library lists older holdings in all campus libraries. ORION, the library's on-line information system, provides location and holdings information for materials cataloged since 1977, plus current information for materials on order or in processing. *ORION on Fiche,* available in all campus libraries, is a quarterly microfiche list of information contained in the ORION data base.

Students have access to the stacks in most libraries. A handbook describing the organization, services, and hours of the University libraries is available in all of the campus branches.

The University Research Library

The University Research Library on north campus (825-1201) is a modern six-story building designed primarily as a graduate research library serving the social sciences and humanities. The building houses over two million volumes arranged in open stacks, as well as the Reference Room, Circulation Department, Graduate Reserve Service, Periodicals Room, and Audiovisual Service. The Microform Reading Service, with some 1,086,000 microcopies of newspapers, books, and periodicals, has a variety of reading and copying equipment. During academic sessions library hours on weekdays are 8 a.m. to 11 p.m. (6 p.m. Friday), Saturday 9 a.m. to 5 p.m., Sunday 1 to 10 p.m.

The **Department of Special Collections** in the Research Library contains rare books and pamphlets, the University Archives, early maps, and files of early California newspapers. Manuscript collections include the literary papers of Henry Miller and Anais Nin, as well as the private papers of Jack Benny, Charles Laughton, Carey McWilliams, King Vidor, and Nobel Peace Prize winner Dr. Ralph J. Bunche, a UCLA alumnus. Other significant holdings include the Michael Sadleir Collection of nineteenth-century fiction, generally regarded as the finest of its kind, and the Ahmanson-Murphy Collection of Early Italian Printing (1471-1550), with a concentration on Aldine imprints. The department also houses UCLA's Oral History Program, a national leader in the field with over 400 interviews with prominent individuals since the program was founded in 1959.

The **Public Affairs Service,** also housed in the Research Library, collects official publications of the United States government, the State of California, California counties and cities, selected United States state and local governments, foreign nations and selected foreign states and provinces, plus those of the United Nations and some of its specialized agencies and a number of other international organizations. Also housed are current English-language, nongovernmental pamphlets on public affairs representing a wide spectrum of political and social opinion, with strong emphasis on social welfare, economic, social, and political conditions, and industrial relations.

The College Library

The College Library, located in the Powell Library Building (825-1938), is designed to meet the basic study needs of most undergraduates. Its 245,000 books and periodicals are maintained in open stacks, with course reserve materials, lecture notes, past examinations, and APS (Academic Publishing Service) readings available for loan. During academic sessions library hours on weekdays are 8 a.m. to 10 p.m. (5 p.m. Friday), Saturday 10 a.m. to 6 p.m., Sunday noon to 9 p.m. The **Photographic Services** office, housed in the Powell Library Building, provides a complete photographic reproduction service for duplicating books, periodicals, manuscripts, and maps. The Powell Library Building, with study space for 1,100 students, is open daily until midnight.

Specialized Subject Libraries

The resources of the specialized campus libraries are devoted mainly to subjects of concern to the departments or professional schools which they serve, but their materials are available to all UCLA students and faculty. A recorded message (825-8301) provides current hours of service for each library.

The **Architecture and Urban Planning Library** includes materials treating architecture, building technology, city and regional planning, and selected environmental topics. The **Art Library** supports the department's art, design, and art history programs. For those interested in the Italian Renaissance, one of the greatest research centers in the world for the study of Leonardo da Vinci is the **Elmer Belt Library of Vinciana,** part of the Art Library.

The **Biomedical Library,** in the Center for the Health Sciences, is one of the finest libraries of its kind in the country. Its 440,000 volumes and over 7,000 serial subscriptions serve all the UCLA health and life science schools and the UCLA Medical Center.

The **Chemistry Library** includes material on chemistry, biochemistry, and molecular biology, while education, psychology, teaching English as a second language, and kinesiology are the principal subjects covered by the **Education and Psychology Library.** Materials for engineering, astronomy, computer science, meteorology, and mathematics are kept in the **Engineering and Mathematical Sciences Library.** The **English Reading Room** mainly duplicates the Research Library's holdings in English and American literature, and major subjects covered by the **Geology-Geophysics Library** include geoscience, invertebrate paleontology, planetary and space science, and hydrology.

The **UCLA Law Library** has a substantial collection of over 300,000 volumes selected to further the course of instruction in the School of Law and the legal research needs of the UCLA community, and the **Management Library** serves the Graduate School of Management and the various subjects related to business and management.

The **Map Library,** in Bunche Hall, houses maps, city plans, nautical charts, and technical books and serials on all aspects of cartography and is one of the largest of its kind in the Western U.S. The **Music Library** houses historical musicology and ethnomusicology materials, musical scores, recordings, and the personal collections of such composers as Henry Mancini, Alex North, and Ernst Toch. Materials in Chinese, Japanese, and Korean are available in the **Oriental Library,** and the **Physics Library** covers all aspects of that science, including acoustics and spectroscopy.

The **Theater Arts Library** is the home of many prestigious collections which have been donated to UCLA, such as those of Charlton Heston, Rosalind Russell, director William Wyler, and animator Walter Lantz. The collections include original scripts, contracts, correspondence, shooting diaries, and much more. And the **University Elementary School Library** contains contemporary materials for children from kindergarten through junior high school age.

The Clark Library

Supplementing the University Library is the **William Andrews Clark Memorial Library,** with its collection of some 80,000 volumes and 14,900 manuscripts related to English culture of the seventeenth and eighteenth centuries. Its John Dryden collection is among the most complete in the world. The library, located approximately 10 miles from the UCLA campus, contains noncirculating materials. Leaflets describing the Clark Library and information about University transportation to it are available at the Reference Desk in the Research Library.

Special Archive Collections

Three unique collections, the UCLA Film, Television, and Radio Archives, are a living resource equally respected by industry and scholars. Students use them to learn the finer points of production techniques and to study the careers of leading actors and directors, many of whom also use the archives. All three archive collections are located in 1438 Melnitz Hall and are open Monday through Friday from 9 a.m. to 5 p.m. For information and/or viewing appointments, call 206-8013.

The **FILM ARCHIVES,** with more than 30,000 titles, is the largest film center west of the Library of Congress. Among its outstanding collections are 27 million feet of Hearst Metrotone News Film dating back to 1919. Other noteworthy holdings include the nitrate print collection of Twentieth Century-Fox, the pre-1948 studio print holdings of Paramount Pictures, more than 600 Warner Brothers prints, and selected nitrate prints from the Columbia Studios collection.

The **TELEVISION ARCHIVES,** under joint auspices of the Academy of Television Arts and Sciences and UCLA, constitutes the nation's largest university collection of its kind. Its 25,000 titles include kinescope, telefilm, and videotapes spanning television history, with particular emphasis on drama and comedy from 1947 to the present. A special Collection of Television Technology and Design includes over 300 historical television cameras and receivers dating from the 1930s.

The **RADIO ARCHIVES** contains more than 40,000 broadcasts from the early 1930s to the present. Significant collections include 700 Hallmark Company broadcasts and personal collections featuring Jack Benny, Bing Crosby, and Dick Powell. The Collections of Clete Roberts and Edward R. Murrow highlight a range of news and documentary material.

Art Galleries and Museums

A tour of all the UCLA museums and art galleries will take you from one corner of campus to the other. Major art exhibitions, both traveling and assembled at UCLA, are displayed in the **WIGHT ART GALLERY,** located in the Dickson Art Center Gallery Building. More than 200,000 visitors each year come to see a series of 12 exhibitions of painting, sculpture, photography, prints and drawings, folk art, architecture, and design. For a

schedule of exhibitions, call 825-9345. The gallery is open Tuesday from 11 a.m. to 8 p.m., Wednesday through Friday from 11 a.m. to 5 p.m., and weekends from 1 to 5 p.m. Daily tours are given at 1 p.m. Group tours are by appointment; call 825-3264. The administrative office is located in 1100 Gallery Building (825-1461).

On the second floor of the Wight Gallery Building is the **GRUNWALD CENTER FOR THE GRAPHIC ARTS,** which houses a distinguished collection of some 30,000 prints, drawings, and photographs. Maintained as a study and research center for the benefit of students and the community, the center's permanent holdings include significant examples from the fifteenth century to the present. It is particularly noted for its collection of German expressionist prints formed by Fred Grunwald and comprehensive holdings of Matisse, Picasso, and Goya. The center, located in 2122 Gallery Building (825-3783), is open weekdays by appointment from 9 a.m. to 5 p.m.

The **FRANKLIN D. MURPHY SCULPTURE GARDEN,** located north of Bunche Hall, contains a collection of nearly 70 major works by Rodin, Matisse, Calder, Lachaise, Lipchitz, Moore, Miro, Hepworth, and many other late nineteenth- and twentieth-century masters. All works in the growing collection, situated on a picturesque five-acre expanse, are private gifts to the University.

The **MUSEUM OF CULTURAL HISTORY** is internationally known for the quality of its collections and exhibits. Its collections encompass the arts and material culture of much of the world, with particular emphasis on West and Central Africa, Oceania, and Latin America. The museum, located in 55A Haines Hall (825-4361), offers assistance with instruction and research and sponsors major exhibitions, lecture programs, and symposia. Gallery hours are noon to 5 p.m. Wednesday through Sunday.

Other Resources

The **OFFICE OF ACADEMIC COMPUTING (OAC),** with administrative offices in 4302 Math Sciences, is responsible for all general-purpose academic computing activities on the UCLA campus. OAC provides a broad range of services, including operation of IBM 3090 and 4341

computers for general campus use; facilities management and operation of the IBM 4381 for the Social Sciences Computing Program and of eight VAX 750 systems for the Program on Computing in the College of Letters and Science; assistance to individuals and departments in the selection and use of microcomputer hardware and software through the Microcomputer Support Office; maintenance of numerous public computing facilities and a large library of application software; instruction in the use of computer hardware and software through free noncredit classes; and professional consulting services.

UCLA's principal computing system is the IBM 3090, available to all colleges, schools, and departments within UCLA. Any registered student can also access the IBM 4341 computer for independent research or to learn computing skills. The campus network of mainframe computers allows students and faculty access to such modern computing services as ORION, the UCLA library information system; BITNET, a rapidly growing computer network connecting universities around the world; and a campuswide electronic mail system. To arrange for use of the IBM 3090 or 4341 computer, apply in the OAC User Relations Office (4302 Math Sciences, 825-7548) weekdays from 8 a.m. to 5 p.m.

The **DIVISION OF LABORATORY ANIMAL MEDICINE,** located in 1V-211 CHS (825-7281), is responsible for the procurement, husbandry, and general welfare of animals required for teaching and investigative services. It also administers the veterinary medical and husbandry programs throughout the campus.

The University of California **NATURAL RESERVE SYSTEM** offers 26 reserves statewide to be used for field studies in unspoiled natural sites and for protected scientific experiments. Several reserves are close enough to campus for daily access. For more information, contact Arthur Gibson, 124 Botany (825-8062).

The **BIOLOGICAL COLLECTIONS** of the Biology Department include marine fishes from the Eastern Pacific and Gulf of California, and birds and mammals primarily from the Western U.S., Mexico, and Central America. The department also maintains a more limited collection of amphibians, reptiles, and fossil vertebrates, as well as collections of algae, fungi, and bacteria. For more information, contact James Northern, 1303 Life Sciences (825-1282).

Although the UCLA campus as a whole has an attractive, park-like atmosphere, there are two distinctive garden areas worthy of special note. The eight-acre **MILDRED E. MATHIAS BOTANICAL GARDEN,** located in the southeast corner of campus, contains some 4,000 species of native and exotic plants. It is used for botanical and ornithological teaching and research. This peaceful wooded area, a center for testing the usefulness of woody subtropical plants, is a favorite spot for quiet strolls. The botanical garden also has a research Herbarium containing 250,000 dried plant specimens. The administrative office is located in 124 Botany (825-3620).

The **HANNAH CARTER JAPANESE GARDEN** in nearby Bel Air, designed and constructed by Japanese artisans and architects using native plants and artifacts, is an authentic Kyoto-style garden. The terraced two-acre garden contains such traditional and symbolic features as a teahouse, shrine, antique stone water basins, lanterns, waterfalls, and a pond with Japanese carp (koi) swimming among water lilies. The garden, a private gift to UCLA, is used by faculty and students for study and research, by departments for conferences and receptions, and by others seeking a serene setting for meditation and solitude. It is open to individual visitors and groups by reservation only. Hours are Tuesday 10 a.m. to 1 p.m. and Wednesday noon to 3 p.m. Friday is reserved for group visits. Call the Visitors Center at 206-8147.

Supplementary Educational Programs

In addition to the regular academic programs which are described in Chapters 5 through 17 of this catalog, the following optional programs are available to UCLA's undergraduate and graduate students.

Summer Sessions

UCLA offers more than 500 courses from approximately 50 UCLA departments in six-, eight-, and 10-week sessions. Many students take advantage of Summer Sessions to enroll in courses they were unable to take during the year, repeat courses in which they may have done poorly, lighten their academic load for the following quarter, or complete graduation requirements more quickly.

Admission to Summer Sessions does not constitute admission to the University in either undergraduate or graduate standing. Students who wish to attend UCLA in regular session must follow admission procedures described in Chapter 2 (undergraduate) or Chapter 3 (graduate).

If you a regularly enrolled undergraduate student, you may attend UCLA Summer Sessions for full unit and grade credit. Summer Sessions work is recorded on your UCLA transcript, and grades earned are computed into your grade-point average. Check with your college or school counselor about the possibility of applying these courses toward minimum unit requirements and for any limitations the college or school may impose on Summer Sessions study.

If you are a regularly enrolled graduate student, you may, with departmental approval, take regular session courses offered in Summer Sessions for credit toward a master's or doctoral degree; consult your graduate adviser in advance concerning this possibility. Summer Sessions courses may also satisfy the academic residence requirement for master's or doctoral degrees (see Chapter 3 for details).

Unlike enrollment in regular quarters, you may attend another college institution for credit while you are enrolled in Summer Sessions. Applications and more information on Summer Sessions are available in 1254 Murphy Hall (100 Dodd Hall after October 1, 1986), 825-8355.

University Extension

Serving approximately 100,000 adult students each year, UCLA Extension is one of the largest university continuing education programs in the world. It is designed to bring the benefits of the University — its scholars, research, and resources — to the community and the state as a whole.

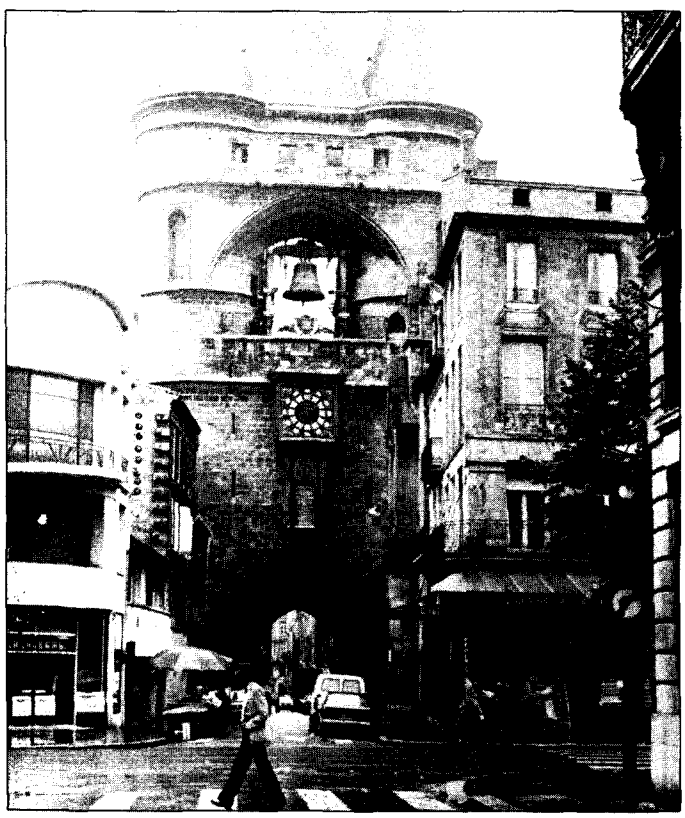
Many of UCLA's 4,600 Extension classes are innovative and experimental in content, format, and teaching methods. Credit and noncredit courses are offered in nearly every academic discipline and in many interdisciplinary areas. Many noncredit Extension courses offer the opportunity to earn Continuing Education Units, widely used for relicensure and other professional/career-related purposes.

Although registering for Extension courses does not constitute admission to regular session, degree credit earned through Extension may apply toward the UCLA bachelor's or master's degree; consult your college or school counselor or graduate adviser before enrolling. For more information, see the sections on "Concurrent Enrollment and Transfer of Credit" and "Courses of Instruction" in Chapter 4. Graduate students should also see "Transfer of Credit" in Chapter 3.

The Extension Advisory Service offers assistance in planning long- or short-term study through Extension. The office is located in 114 UCLA Extension, 10995 Le Conte Avenue (206-6201). To obtain the current *UCLA Extension Catalog,* call 825-8895. The Registration Office is open 8 a.m. to 6 p.m. weekdays and until 5 p.m. on Friday (825-9971).

Education Abroad Program (EAP)

Each year, more than 650 undergraduate and graduate students from UC campuses study at distinguished universities throughout the world. UCLA students remain registered here while overseas and receive UC units and grade points for work completed abroad. Currently, EAP offers study opportunities on more than 40 different campuses in 25 countries: Australia, Austria, Brazil, China, Egypt, England, France, Germany, Hong Kong, India, Ireland, Israel, Italy, Japan, Kenya, Mexico, Norway, Peru, Scotland, Sierra Leone, Spain, Sweden, Togo, U.S.S.R., and Wales. Participants generally spend a full academic year abroad, enjoying a unique opportunity to enhance language skills and become involved in the culture of the host country. A special orientation program and, when necessary, intensive language training are included. During the year UC faculty members at the host campus assist with scholastic or personal problems.



EAP students en route to classes at the Université de Bordeaux.

EAP is open to all undergraduate students who have completed a minimum of 90 quarter units (junior standing) prior to departure, at least a B average (3.0 GPA) overall at the time of application, and the support of the UCLA EAP Selection Committee. Some overseas study centers have a language requirement as well.

Graduate students who have completed at least one year of graduate work and have the approval of their graduate adviser and the dean of the Graduate Division may participate at most study centers.

Costs for participation in EAP vary from $5,200 to $8,000, but University financial aid is available. Applications must be filed several months in advance. For more information, contact the EAP Office in 2221B Bunche Hall (825-4889, 825-4995).

Education at Home Program

Students interested in early American history and culture have the opportunity to spend Winter Quarter 1987 "on location" in three Eastern cities. The Education at Home Program, conducted through the UC Riverside campus, is open to graduate students (with prior approval of their adviser) and undergraduates from any campus in the UC system.

Those selected for participation spend nine weeks in Williamsburg, one in Philadelphia, and a concluding week in Washington, D.C. Formal instruction consists of three American history courses (four units each) comprising classroom work and field trips to places of historical interest. An additional four units of independent study may be arranged. For further information, brochures, or applications, write to the Education at Home Program, Department of History, University of California, Riverside, CA 92521, or call (714) 787-3820.

Interdisciplinary Colloquia

Organized colloquia involving several disciplines are offered from time to time in conformity with faculty and student interests. They are open to all faculty members, interested undergraduates, and graduate students assigned to the colloquia by their advisers. Credit is not awarded directly but may be given through appropriate departmental courses. For information about the committees in charge of these colloquia, call the secretary to the provost of the College of Letters and Science at 825-4621.

African Studies — The African Studies Center annually sponsors at least one interdisciplinary colloquium on Africa which focuses on topics in the social sciences or humanities. It is the policy of the center to organize its colloquia so that they can be taken for course credit at the graduate or undergraduate level or attended as open lectures. For further information, contact the center at 825-2944.

The **Jacob Marschak Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences** provides a forum for interaction among faculty and students interested in the application of mathematics and statistics to the behavioral sciences. Disciplines include anthropology, architecture, artificial intelligence, biology, business, computer science, economics, education, engineering, geography, linguistics, management, operations research, philosophy, political science, psychology, public health, public planning and policy, sociology, and systems analysis. An Honors Collegium course (HC 190) is based on the Marschak Colloquium.

The colloquium sponsors presentations by leading experts in these fields, including faculty members from UCLA, other UC campuses, and other universities, and meets on alternate Fridays from 1 to 3 p.m. in 2270 GSM during the academic year. Announcements of presentations, including abstracts of the papers to be presented, are circulated and posted on campus; announcements also appear in *UCLA Today.* For further information, contact Lil Prupes at 825-1581.

Student Life

Living Accommodations

Where you live while attending UCLA can play an important role in your total college experience. Nearly half of UCLA freshmen live on campus, but the majority of undergraduates commute. About a quarter of the total student population lives at home.

There are many different housing options available, though the housing shortage on and near the UCLA campus means your first choice may not be available. You should therefore consider all housing options, decide early which ones you plan to pursue, and apply or follow up on them as soon as possible. If you plan to live off campus, arrive early to make your housing arrangements for the coming academic year. Some students even pay rent year-round to insure accommodations, and try to sublet during the summer months.

The **UCLA Community Housing Office,** 100 Sproul Hall, (213) 825-4491, provides information and current listings on University-owned apartments, cooperatives, fraternities, sororities, private apartments, roommates, rooms in private homes, room and board in exchange for work, and temporary housing. It also has bus schedules, area maps, neighborhood profiles, and counselors to help resolve landlord-tenant conflicts. A current Registration Card or letter of acceptance and a valid photo identification card are required for service.

The International Student Center on Hilgard Avenue helps international students find housing and may also provide temporary facilities until suitable permanent housing arrangements are made.

UCLA Housing Options: Information and Application, a booklet which covers the housing situation in much greater detail, is mailed to all students when they are accepted for admission (you may also request it prior to admission).

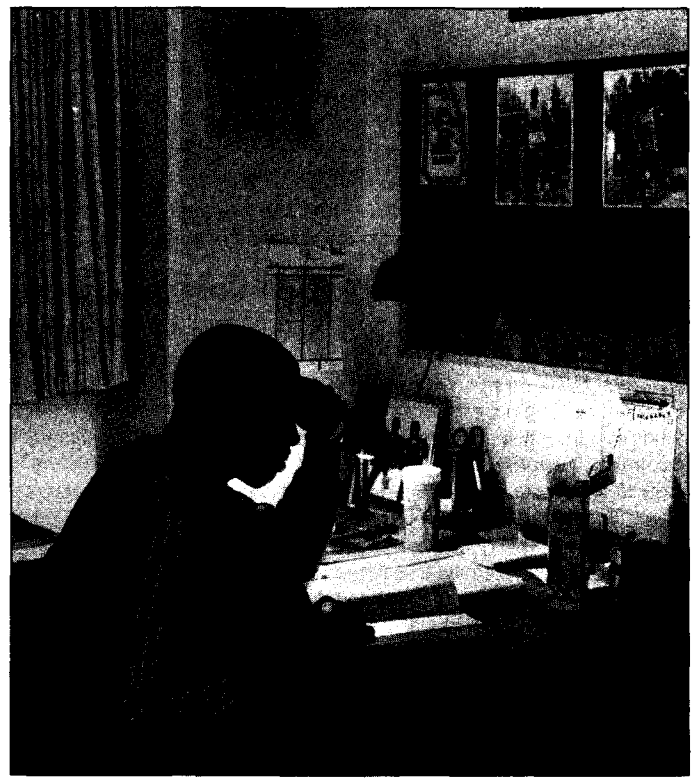
On-Campus Housing

Living on campus can add an extra dimension of enjoyment and convenience to your UCLA experience; the demand, however, currently exceeds the space available. Four residence halls (Dykstra, Hedrick, Rieber, and Sproul Halls) and two residential suite complexes (Northern and Southern) accommodate nearly 4,000 undergraduates. There is one residence hall, Mira Hershey Hall, which houses some 335 graduate students. All on-campus housing is coed and within walking distance to classrooms.

Residence hall rooms are shared by two students. Residential suites, shared by four students, consist of two bedrooms, a full bathroom, and a common living room. The residence hall cafeterias, which also accommodate students in the residential suites, serve 19 meals per week.

Applications for on-campus housing are contained in the *UCLA Housing Options: Information and Application* booklet, available at the UCLA On-Campus Housing Assignment Office, 270 De Neve Drive, (213) 825-4271. Applications should be submitted by:

March 24 (May 19 for graduate students) for Fall Quarter 1986
October 31 for Winter Quarter 1987
January 31 for Spring Quarter 1987
March 23, 1987 (May 18 for graduate students) for Fall Quarter 1987



On the day following each of these dates, a lottery will be held to determine the order in which students will be offered housing. The full cost for the 1986-87 academic year (Fall, Winter, and Spring Quarters, excluding vacation periods) ranges from $2,885 to $2,950 for residence halls and from $3,500 to $3,600 for suites, plus a $19.50 membership fee in the On-Campus Housing Student Association.

The **Office of Residential Life,** in the Residential Life Building next to Sproul Hall (825-3401), is responsible for the conduct of students in residence halls and suites and provides professional and student staff members to counsel residents on programming and other problems.

Family Student Housing

UCLA maintains nearly 650 off-campus apartments for married and single-parent students at Sawtelle and Sepulveda Boulevards and 60 units on Barrington Avenue, about five miles from campus. Unfurnished one-, two-, and three-bedroom units are available. Rentals for 1986-87, excluding utilities, are expected to range from $314 to $437 per month. Since waiting lists for family student housing are long, do not wait until you have been accepted to UCLA to apply. Verification of marriage and/or copies of children's birth certificates must accompany your application. Call the Family Student Housing Office at (213) 391-0686 for up-to-date information.

University-Owned Apartments

Nearly 190 shared apartments for single students in three off-campus facilities are maintained by the University. Two of the locations are within walking distance of campus and the third, about five miles south, has free shuttle bus service on weekdays during regular academic sessions. Rental rates vary depending on the location and size of the apartment. There is no waiting list; apartments are rented on a first come, first served basis. Listings are posted in the UCLA Community Housing Office.

Cooperatives

Cooperatives provide an atmosphere similar to residence halls except that you must work three to four hours per week as partial payment for room and board. There are five cooperatives within walking distance of campus. Room and board rates for 1985-86 varied between $510 and $850 per quarter. Cooperatives normally have long waiting lists, so apply early. For applications and specific information, write directly to each cooperative. Addresses are available in the UCLA Community Housing Office.

Fraternities and Sororities

Some 2,000 Bruins live in the fraternity and sorority houses which border the campus on the west and east sides respectively. To live in a "Greek" house you must participate in rush and join that particular organization, though membership does not guarantee housing accommodations. For more information, contact the Office of Greek Affairs (118 Men's Gym, 825-6322) or the Dean of Students Office (2224 Murphy Hall, 825-3871).

Apartments

If you would like to rent an apartment off campus, you must carefully consider the kind of living arrangements you can afford. Your financial situation may dictate how close you live to UCLA and whether you can live alone or share an apartment. Apartments within three miles of UCLA (Westwood, West Los Angeles, parts of Brentwood and Santa Monica) average $500 per month for efficiency units and $710 for one-bedroom units. Apartments more than four miles away (Palms, Mar Vista, Culver City) usually cost $50 to $100 less. Because they change daily, listings cannot be mailed or given over the phone; they are posted in the UCLA Community Housing Office. A roommate share board is also available.

Temporary Housing

If you need temporary quarters until you find something permanent, there are several hotels and motels within five miles of campus with varying rates and accommodations. Most temporary housing is available for no more than one to three months, though some may be for longer periods. Housesitting listings are few; sublets are most readily available from May to August. Hotel and motel listings, which may be requested by mail or phone, are available in the UCLA Community Housing Office. In addition, several fraternities have rooms to rent for the summer at low rates. Check with the Office of Greek Affairs, 118 Men's Gym (825-6322).

Transportation

There are several different means of transportation to and from campus other than using your car. Bus lines connect UCLA to Santa Monica, Culver City, Beverly Hills, and most of Los Angeles. Bicycles, mopeds, and motorcycles are all popular ways to get around; several bike paths in the local area make your ride easier and safer, and there are parking areas on campus specially marked and equipped for these vehicles. Many students also make their own carpooling and vanpooling arrangements to save money and make the daily commute more pleasant.

All of these alternatives are described in *How to Get to UCLA Without Using Your Car,* a booklet which also contains a ridesharing application, bus routes, area maps, and a host of helpful hints. It is available at the Campus Parking Service (Structure 8, Level 2, Westwood Plaza at Strathmore Place), at the UCLA Community Housing Office, and through the UCLA Ridesharing Office (825-7639).

Parking Space and Permits

A limited number of parking permits for campus lots are sold to students each quarter, but parking spaces on campus are at a premium and not all students who request a permit will receive one. Obtain a Student Parking Request at the Campus Parking Service (Structure 8, Level 2) and return it by the deadline. Check dates on the Calendar at the beginning of this catalog or in the quarterly *Schedule of Classes.*

Parking assignments are based on the distance you live from campus, work commitments, and other information you provide. Students with physical disabilities that preclude walking long distances may obtain recommendations for parking permits through Student Health Service. If you do not receive a permit, you must reapply every quarter to be reconsidered. For more information, call the Campus Parking Service at 825-9871.

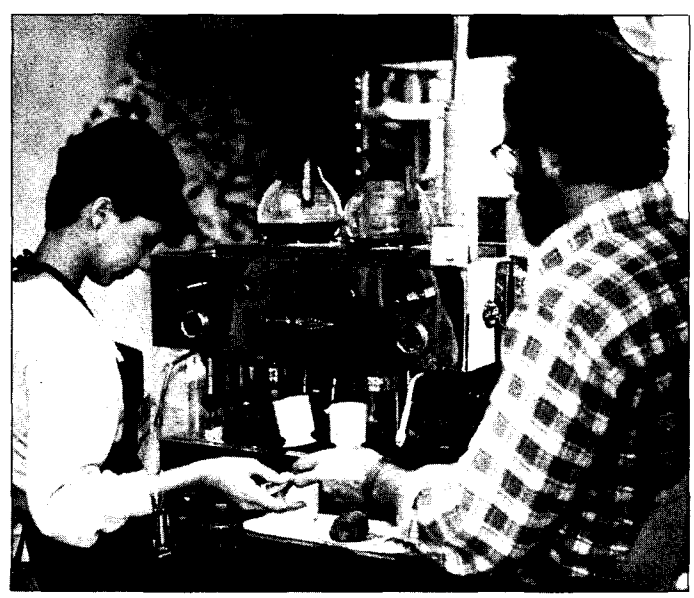
ASUCLA

Every registered UCLA student is a member of the Associated Students of UCLA (ASUCLA), one of the nation's largest such enterprises in terms of size, scope, and range of programs. The undergraduate and graduate student governments are integral parts of ASUCLA, which supports the following activities and services.

Food Service

ASUCLA operates the food service on the general campus and provides a number of innovative menu options at a variety of locations. Catering for special events is also available.

THE COOPERAGE — On the A Level of Ackerman Union, the Cooperage offers Mexican food, pizza, grill items, croissants, special salads, and soft ice cream. A stage and sound system for live entertainment and a large-screen TV for major events are available. The Cooperage is open weekdays from 8 a.m. to 12:30 a.m. (1:30 a.m. Friday), Saturday 11 a.m. to 1:30 a.m., Sunday noon to 11 p.m.



NORTH CAMPUS STUDENT CENTER — This facility, just south of the Research Library, offers a variety of pastas, deli and garden sandwiches, a wide selection of international-style entrees, hamburgers, and a salad bar. An outside cart offers pizza and organic sandwiches. North Campus is open for breakfast, lunch, and dinner. Hours are 7:30 a.m. to 11 p.m. weekdays (8 p.m. Friday), Saturday 10 a.m. to 6 p.m., Sunday 11 a.m. to 9 p.m.

THE BOMBSHELTER DELI AND BURGER BAR — This unique food service in the center of the Court of Sciences offers an assortment of traditional deli sandwiches, hamburgers, and salads at reasonable prices. "Gypsy breakfasts" are served in the morning. It is open weekdays from 7:30 a.m. to 5 p.m., Saturday 10 a.m. to 3 p.m.

THE TREEHOUSE — Located on the first floor of Ackerman Union, the Treehouse is open for breakfast, lunch, and dinner and features ranch-fried chicken, a chili bar, Italian-style dishes, and a variety of traditional American favorites. Grilled-to-order sandwiches are offered at the **Hole-in-the-Wall.** The Treehouse is open weekdays from 7 a.m. to 7:30 p.m. (3 p.m. Friday).

Adjacent to the Treehouse is the **Sandwich Room,** where you can find a variety of low-cost, made-to-order sandwiches, including Italian-style hot or cold submarine sandwiches. Hours are 8 a.m. to 4 p.m. weekdays (3 p.m. Friday) and Saturday 10 a.m. to 2:30 p.m.

CAMPUS CORNER — The oldest of the ASUCLA food facilities, the Campus Corner is located just across Bruin Walk from Kerckhoff Hall. Soft frozen yogurt, hamburgers and French fries, and a wide range of pita bread pocket sandwiches are available. It is open weekdays from 7:30 a.m. to 5 p.m. (4 p.m. Friday).

THE KERCKHOFF COFFEE HOUSE, on the second floor of Kerckhoff Hall, offers Baskin-Robbins ice cream specialties and a variety of teas, coffees, and potages (hearty soups). Live entertainment is featured almost every night. The Coffee House is open 7 a.m. to midnight weekdays and 10 a.m. to midnight weekends.

POTLATCH, a lounge on the first floor of the Graduate School of Management, offers a variety of sandwiches, snacks, and beverages. Hours are 8 a.m. to 9 p.m. Monday through Thursday and 9 a.m. to 2 p.m. Friday.

JAMES E. LU VALLE COMMONS, located adjacent to the Graduate School of Management, features gourmet pizza, grilled and deli specialties, and Jimmy's Coffee House (coffee, teas, and cheesecake). Hours are 7:30 a.m. to 10 p.m. weekdays (8 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday 11 a.m. to 8 p.m.

Students' Store

The ASUCLA Students' Store, the largest on-campus retail store in the nation, is actually a mini department store with four campus locations. The main store (B Level of Ackerman Union, 825-7711) offers textbooks, general books, school and art supplies, computers and electronic items, UCLA insignia merchandise (Bearwear), men's and women's sportswear, groceries, health/beauty aids, and greeting cards. The Health Sciences Store (13-126 CHS, 825-7721) specializes in books and supplies for dental and medical students, while the Lu Valle Commons Students' Store (just south of GSM, 825-7238) specializes in law and management books and supplies. The North Campus Shop (in the North Campus Student Center, 206-0751) is a small convenience store offering school supplies and snacks. Main store hours during school sessions are 7:45 a.m. to 7:30 p.m. weekdays (6 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday noon to 5 p.m.

Lecture Notes

The Lecture Notes Office (A206 Ackerman Union, 206-0882) publishes concise weekly summaries of about 130 of UCLA's large lecture classes. Hours during school sessions are 7:45 a.m. to 6:30 p.m. weekdays (6 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday noon to 5 p.m.

Job Opportunities on Campus

ASUCLA reserves over 1,800 part-time jobs in food service, the students' stores, Graphic Services, and other departments for UCLA students. Listings are posted outside the Personnel Office, 205 Kerckhoff Hall (825-7055).

The residence halls offer a number of positions, as do the University libraries; check at the residences and the Personnel Office in the University Research Library (825-7947). Other on-campus jobs may be available through the Placement and Career Planning Center (see "Student Services" later in this chapter).

Check Cashing and Money Orders

Cash is available via Home Federal automatic tellers at the North Campus Student Center and on the A Level of Ackerman Union.

Students with current UCLA identification may cash a personal check or traveler's check for up to $50 a day, with a service charge for each check, at the ASUCLA Service Center, 140 Kerckhoff Hall (825-2423). Check cashing hours are 9 a.m. to 4 p.m. weekdays.

Students, staff, and faculty may purchase money orders for up to $300 (cash only) at the same location. There is a service charge of 85¢ for each money order. Students, staff, and faculty may also rent post office boxes there at $12 per quarter for a small box and $15 for a large one. Hours for both services are 9 a.m. to 4 p.m. weekdays.

Graphic Services

ASUCLA Graphic Services, 150 Kerckhoff Hall (206-0894), is the campus center for photographic, printing, copying, typographic, and other graphic services. Portraits, photography, yearbook sittings, passport photographs, film, photo and darkroom supplies, and discount photofinishing are also provided. Hours are 8 a.m. to 6 p.m. weekdays and 10 a.m. to 3 p.m. Saturday. A satellite Graphic Services Center is located in Lu Valle Commons (825-7568).

Meeting Rooms

A variety of meeting rooms are available for use by the entire campus community. To reserve space in Ackerman Union or Kerckhoff Hall, contact the Student Union Operations Office on the A Level of Ackerman Union (825-2311). Contact the Food Service Office at the North Campus Student Center (206-0720) and the Main Office at Lu Valle Commons (825-7238) to reserve space at those locations.

Travel Service

The ASUCLA Travel Service, located on the A Level of Ackerman Union (825-9131), offers a wide range of domestic and international charter flights, land arrangements and charter packages, student tours, scheduled air and rail tickets, and other travel-related services. The Travel Service is open 8:30 a.m. to 6 p.m. weekdays and 11 a.m. to 3 p.m. Saturday.

Student Activities

The opportunities to participate in extracurricular activities at UCLA are virtually unlimited. Though it is impossible to list all the activities here, the following are just a few of the many ways you can get involved in campus life and expand your horizons beyond classroom learning.

Student Government

In addition to its **Services and Enterprises** division, which is responsible for the services described above, ASUCLA includes the **Undergraduate Students Association,** the **Graduate Students Association,** and the **Communications Board,** which publishes the *Daily Bruin* and other

campus publications. Governed by a 10-member Board of Control, ASUCLA operates and manages Ackerman Union, Kerckhoff Hall, the North Campus Student Center, and the James E. Lu Valle Commons.

Many facets of student life at UCLA are sponsored or organized in some way by student government. Getting involved in the decision-making process can be extremely rewarding and can offer avenues of expression you may not find in other aspects of your university experience.

Undergraduate Student Government — The Undergraduate Students Association (USA), located on the third floor of Kerckhoff Hall (825-4504),is governed by the Undergraduate Students Association Council. USAC administers the association's $500,000 annual operating budget through a network of student commissions (Academic Affairs, Campus Events, Community Service, Cultural Affairs, Facilities, Financial Supports, and Student Welfare) presided over by the student body president. The undergraduate student body elects officers annually.

A wide variety of **student government programs** benefit both campus and community. The Community Service Commission (825-2333) serves Los Angeles through such programs as Amigos del Barrio, offering academic and emotional support for Latino students; the Community Theater Workshop for children of low-income families; the UCLA Prison Coalition, providing activities for inmates of juvenile correctional institutions; and the UCLA Special Olympics, to name just a few. More than 1,250 students volunteer annually for community service participation.

Student government also supports the various special interest groups on campus, including the American Indian Students Association, Asian Coalition, Black Students Alliance, Gay and Lesbian Association, MEChA, and the UCLA Jewish Student Union.

The Campus Events Commission (825-1957) is responsible for such events as Mardi Gras and the Speakers Program (see below), as well as movie and concert programs providing campus entertainment at reduced prices.

Graduate Student Government — UCLA's Graduate Students Association (GSA) shares an equal voice with the Undergraduate Students Association in the governance of the Associated Students. For more details on the GSA, see "Administration" in Chapter 3.

Clubs and Organizations

Joining a club or organization is an excellent way to make new friends and find your niche on campus. UCLA has about 350 different clubs and registered organizations — more than you will find on almost any other university campus in the country. Political, athletic, recreational, cultural, academic, and religious clubs of almost every description are represented — and if you can't find one to suit your particular interest, you can start your own.

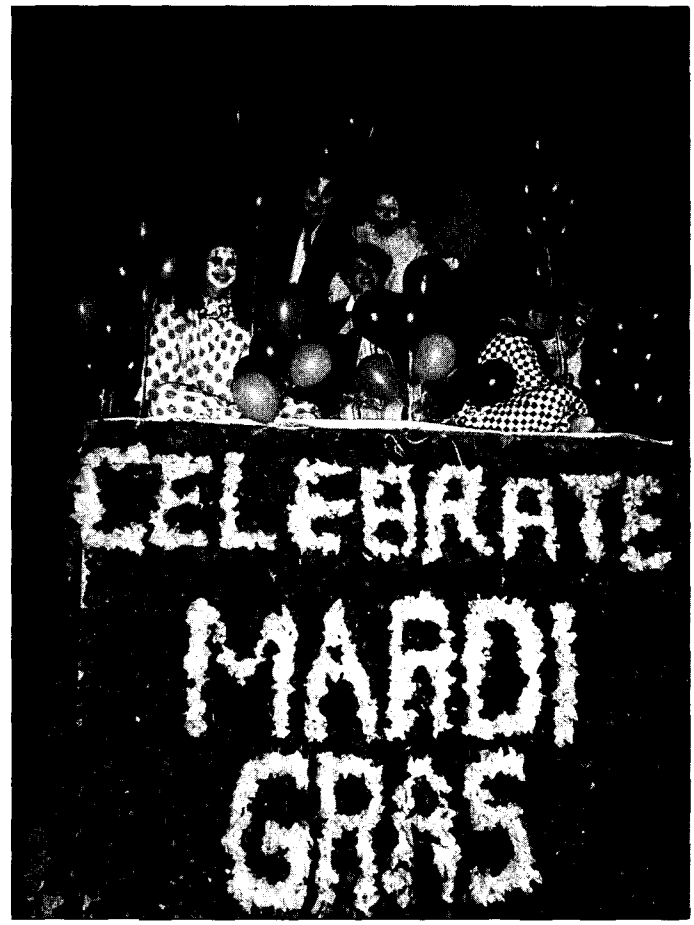
Clubs focusing on sports and recreation are listed in the University Recreation Association Office, located in the John Wooden Center (825-3701). For a full listing of registered student organizations, contact the **Center for Student Programming,** 161 Kerckhoff Hall (825-7041). This office can help you start a club or join an existing one, and serves as the official registry for all campus organizations. The center assists students with program development and fund-raising, monitors financial activities of student organizations, and interprets and enforces University rules and regulations.

Groups registered through the Center for Student Programming are eligible to use the services of the **Campus Activities Service Office (CASO),** 12 Royce Hall (825-8981). CASO offers technical advice in the public events area and operates most campus public assembly facilities, classrooms, and auditoriums. Official and general purpose bulletin boards on campus, general assignment lockers, and the sale of UCLA padlocks are administered by CASO.

Fraternities and Sororities

Serving as small, cohesive communities within the larger UCLA community, fraternities and sororities offer unique experiences and opportunities for personal growth. Some of the more than 5,000 Greek student members are leaders in scholarship, community service, student government, athletics, and other facets of UCLA organizational activity.

You can find out more about UCLA's fraternities and sororities by contacting the Office of Greek Affairs (118 Men's Gym, 825-6322) or the Dean of Students Office (2224 Murphy Hall, 825-3871).



Mardi Gras

UCLA's annual Mardi Gras has become the world's largest student-operated collegiate activity. Each Spring Quarter over 5,000 Bruins from all types of campus organizations help to prepare and present this carnival. Students design and operate more than 65 booths featuring games, food, and live entertainment. There are celebrity judges, carnival rides, clowns, balloons, fireworks, and much more.

The three-day event generates well over $100,000 annually for UCLA's official charity, UniCamp, a summer camp for underprivileged children in Los Angeles. For more information, contact the Mardi Gras Committee in 129 Kerckhoff Hall (825-8001) or the Campus Events Commission in 300A Kerckhoff Hall (825-1957).

UCLA Campus Events Speakers Program

Headed by the Campus Events Commission, the Speakers Program brings many of the foremost literary and political leaders and entertainers to the campus. Past speakers have included Jack Lemmon, Itzhak Perlman, Jane Fonda, David Letterman, Joan Rivers, Bob Hope, Gilda

Radner, Sean Penn, and Bette Davis from the entertainment world; Jimmy Carter, Jerry Brown, Gerald Ford, Justice William O. Douglas, and Senator Gary Hart representing government and politics; and authors Gore Vidal, John Irving, William F. Buckley, Jr., Gloria Steinem, and Hunter S. Thompson.

Publications and Broadcast Media

UCLA's publications and broadcast media, operated by the ASUCLA Communications Board, provide excellent training grounds for aspiring writers, journalists, photographers, radio announcers, and television performers while serving the communication needs of the campus and community. The following are the major student-operated sources of information on campus:

The ***Daily Bruin,*** with a circulation of 20,000, is the fourth largest daily newspaper in Los Angeles. As the principal outlet for campus news, the *Bruin* is published each weekday of the regular academic year (twice weekly during the summer) and is distributed free from kiosks around campus. Students work as reporters, editors, proofreaders, photographers, and advertising sales representatives; new staff members are always welcome. *Bruin* offices are located in 112 Kerckhoff Hall (825-9898).

Six student special interest papers are published twice each quarter to serve special segments of the campus community: ***Ha'Am*** for Jewish students, ***La Gente*** for Chicanos and Latinos, ***Nommo*** for black audiences, ***Pacific Ties*** for Asian readers, ***TenPercent*** for gay and lesbian groups, and ***Together*** for women. Each includes news and features on political and cultural affairs — both on and off campus — of interest to its audience. Prospective staffers are welcome. The offices of the special interest periodicals are located in 112 Kerckhoff Hall.

The UCLA yearbook, ***Bruin Life,*** is one of the largest student publication efforts on campus. Available each fall, it contains photographs and information on graduating seniors, athletic teams, fraternities and sororities, and campus activities. If you would like to participate on the yearbook staff, contact the office in 112F Kerckhoff Hall (825-2640).

Like many other large universities, UCLA has its own radio station. **KLA Radio** provides music, news, and sports 24 hours a day during the academic year (12 hours daily during Summer Sessions). The carrier current signal is sent to the residence halls and parts of Ackerman Union and Kerckhoff Hall on 53 AM and to many parts of the Los Angeles area on 99 Cable FM. The studios are located at the rear of the Grand Ballroom in 2400A Ackerman Union (825-9104; request line: 825-9999). All positions, including on-air, news staff, and advertising representatives, are open to students.

The Performing Arts

UCLA offers a rich variety of concerts, art exhibits, dance recitals, and theater productions as an integral part of University life. A full calendar of exceptional programs by the Music, Dance, and Theater, Film, and Television Departments of the College of Fine Arts provides opportunities for student involvement and personal growth.

The **Music Department** offers more than 20 performance organizations. Instrumentalists are invited to play with one of seven different bands and orchestras. An extensive ethnomusicology program allows you to perform with various non-Western and ethnic groups. Campus choral organizations include an A Cappella Choir, the Madrigal Singers, Men's and Women's Glee Clubs, and the University Chorus which, with 120 members, is the largest of the groups.

The **Dance Department** presents afternoon and evening modern dance concerts and demonstrations both on and off campus, and folk and ethnic performing groups meet regularly. Dance students have the opportunity to design and choreograph as well as perform.

The **Theater, Film, and Television Department,** one of the finest in the country, offers students several opportunities for artistic expression. Each year the Theater Division presents a series of major productions to the general public. The Motion Picture/Television Division produces about 300 student-directed films each year in addition to hundreds of television programs. Professionals appearing on campus frequently visit classes to share their skills, and many have established awards and scholarships in the performing arts at UCLA.

Be a Spectator

If you'd rather be entertained than do the entertaining, UCLA's **Center for the Performing Arts** stages more than 200 public concerts and events each year. Ever since Royce Hall was dedicated in 1929, UCLA has been a premiere West Coast showcase for both new talent and the world's leading artists. The Los Angeles Philharmonic and Chamber Orchestras perform regularly each season, as do several major dance ensembles, theatrical companies, and performance artists. Numerous celebrities have appeared on UCLA stages, from Luciano Pavarotti to Marcel Marceau, Isaac Stern to Cleo Laine, Pierre Boulez to Liv Ullman. Discount tickets for students, faculty, and staff are available to all events.

Sports and Athletics

Athletics play a major role in the University's mission to provide a well-rounded education both in and out of the classroom. UCLA continues to live up to its reputation as a national leader in intercollegiate sports. In 1984-85 the UCLA men's athletic program placed third in the national all-around excellence competition and has won the award six times. The women's program placed first in polls conducted by the *Santa Monica Evening Outlook* and the *Knoxville Journal.* UCLA is the only university in the country to win five National Collegiate Athletic Association (NCAA) men's and women's championships in a single year (1981-82).

MEN'S INTERCOLLEGIATE SPORTS — UCLA is a member of the Pacific-10 Conference, which includes Arizona State University; University of Arizona; University of California, Berkeley; Stanford University; University of Southern California; University of Oregon; Oregon State University; Washington State University; and the University of Washington. UCLA teams have won an overall total of 48 NCAA men's championships — second highest in the nation — including 15 in tennis, 11 in volleyball, and 10 in basketball under the legendary John Wooden. In addition, the basketball team, led by Coach Walt Hazzard, won the 1985 National Invitational Tournament (NIT) Championship, and the soccer team won the 1985 NCAA title. You can participate on the varsity level in football, basketball, track, baseball, tennis, crew, volleyball, gymnastics, swimming, water polo, golf, soccer, and cross-country. For more information, contact the Men's Athletic Office at 825-8699.

WOMEN'S INTERCOLLEGIATE SPORTS — With 10 different varsity sports, the UCLA women's program is one of the most extensive in the country, and UCLA has played an important role in establishing women's sports as part of the NCAA. Women's teams have won many national, regional, and conference titles, including the 1981-82, 1983-84, and 1984-85 NCAA championships in softball, the 1981-82 and 1982-83 track and field crowns, and the 1984 and 1985 volleyball titles. Other nationally ranked teams are those in basketball, swimming, tennis, cross-country, and gymnastics. Athletic grants-in-aid are available on a selective basis in most sports. For more information, contact the Women's Athletic Office at 825-8699.

INTERCOLLEGIATE ATHLETIC FACILITIES — UCLA's major indoor arena is the famed **Edwin W. Pauley Pavilion,** which seats 12,800 for UCLA basketball, volleyball, and gymnastics events. It was the site of the 1984 Summer Olympics gymnastics competition. Immediately adjacent, the **Elvin C. Drake Stadium** is the home of UCLA track and field competitions and site of many outdoor events including Commencement. The **Los Angeles Tennis Center,** a new 5,800-seat outdoor tennis stadium and clubhouse, was the site of the 1984 Olympic tennis competition. The refurbished **J.D. Morgan Intercollegiate Athletics Center** houses the newly established UCLA Athletic Hall of Fame. Off-campus facilities include the **Jackie Robinson Stadium** for varsity baseball, the **Marina del Rey Boathouse** for the UCLA crew and sailing programs, and the renowned **Rose Bowl** in Pasadena, home of the UCLA football team.

Athletics for Everyone

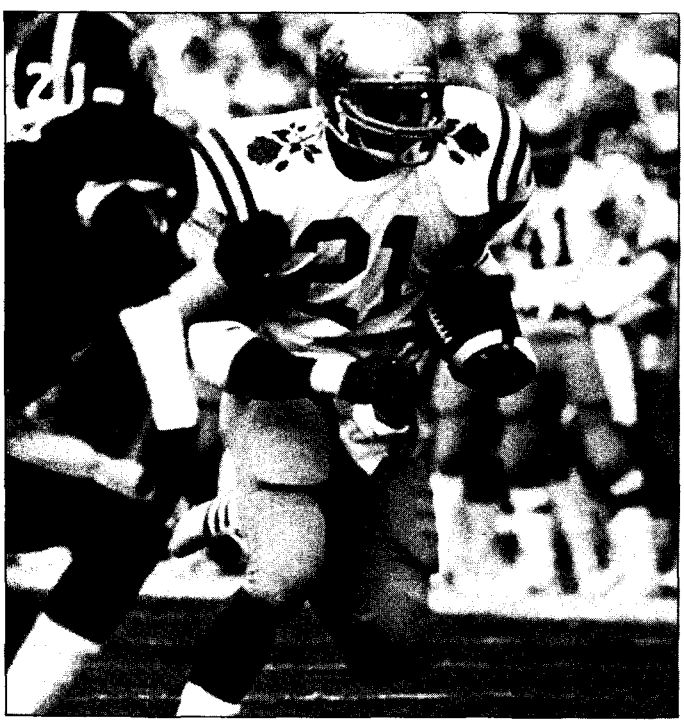
Whether you want to practice your favorite sport or learn a new one, you can do it all at UCLA. The extraordinary scope of athletic opportunities ranges from intercollegiate team play to an enjoyable jog around campus.

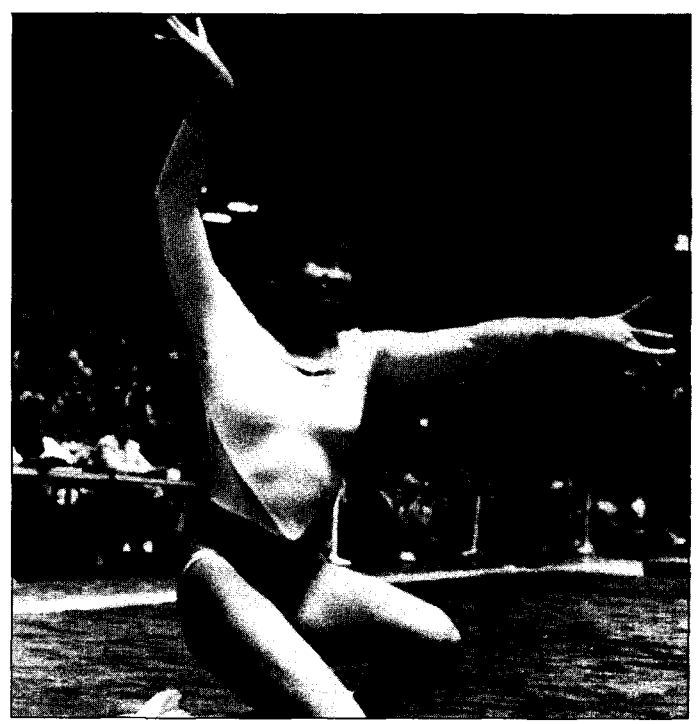
INTRAMURALS — Competitive intramural teams at UCLA are open to students, faculty, and staff. There are 40 activities in men's, women's, and coed competition, and many are divided into size or skill divisions so students at any level can get involved. For more information, contact the Intramural Sports Office in 2131 John Wooden Center (825-3701).

RECREATIONAL CLUBS AND CLASSES — Recreational clubs are formed at UCLA to bring people interested in a particular sport or activity together. Through more than 30 different clubs with a combined membership of some 2,000 students, you can learn (and meet people who enjoy) bowling, waterskiing, karate, rugby, or lacrosse, to name just a few. For club information, contact the University Recreation Association in the John Wooden Center (825-3701).

You'll also find a broad range of noncredit recreation classes in aquatics, boating and sailing, dance, fine arts, outdoor studies, physical fitness, and sports skills. For class information, contact the Recreation Instruction Program Office in the John Wooden Center (825-3701).

RECREATION FACILITIES — UCLA students have several major facilities in which to practice and play. The **John Wooden Recreation and Sports Center** is a comprehensive student activities building with several gymnasia, 10 racquetball/handball courts, a weight training facility, and exercise and martial arts workout rooms. The **Sunset Canyon Recreation Center,** open seven days a week the year round, features an Olympic-sized swimming pool, a family pool, picnic-barbeque areas, multipurpose play fields, an outdoor amphitheater, and various meeting rooms and lounges. Students also have the use of Pauley Pavilion, Drake Stadium, and the Los Angeles Tennis Center for recreational sports.





Student Services

UCLA students enjoy an extremely broad range of benefits and support services which enrich their college careers and help them attain their academic and career goals.

Academic Counseling

Many sources of academic counseling are available. Faculty advisers and counselors in each college and school help students with major selection, program planning, academic difficulties, degree requirements, and petitions for exceptions to these requirements.

Advisers in each major department counsel undergraduates concerning majors offered and their requirements, and possible career and graduate school options (see "Academic Resources and Assistance" in Chapter 2 of this catalog). In addition, special graduate advisers are available in each department to assist prospective and currently enrolled graduate students.

Placement and Career Planning Center

The Placement and Career Planning Center (PCPC) offers career guidance and placement services to all UCLA students. Services are located in the PCPC Building (825-2981) and in two satellite locations: 1349 GSM (specializing in management, 825-3325) and 5289 Boelter Hall (specializing in engineering and the physical sciences, 825-4606).

Career Development — A staff of career counselors assists you in career exploration and the job search. Information on planning further education and alternative careers is available in the Career Resources Library. In addition to bringing graduate school representatives to campus, the Campus Interview Program brings employer representatives to discuss career opportunities with seniors and graduate students, and career-related summer employment with continuing students. The direct referral service posts a large number of currently available jobs in a variety of organizations.

Student Employment — A job listing and referral system helps students and their spouses find part-time, temporary, or vacation employment. Career-related opportunities include internships and cooperative education possibilities.

Educational Career Services — This is a specialized source of information and counsel for students and alumni interested in university, college, and secondary and elementary school positions. Current lists of educational job opportunities, internships, and a professional file service are available.

Student Health Service

The Student Health Service (SHS) is designed to offer the health care and information you may need as a UCLA student. Services are provided on an appointment basis at little or no cost to all registered students on presentation of Registration and UCLA Student I.D. Cards. You are encouraged to select a clinician who will provide ongoing health care. Additional information on all phases of SHS is available in the *UCLA Student Health Service* booklet produced by SHS, or by calling SHS information at 825-4073.

Location and Hours — General and emergency care is available in A2-130 Center for the Health Sciences. Office hours are 8 a.m. to 5 p.m. weekdays except Tuesday, when service begins at 9 a.m. Emergency care is also available for athletic injuries at Gate 10 in Pauley Pavilion (825-5704) from 1:30 to 6:30 p.m. weekdays. For emergency care when these facilities are closed, you may obtain treatment at the UCLA Medical Center Emergency Room on a fee-for-service basis.

Primary Care Clinics provide outpatient diagnosis, treatment, and consultation for most general health care needs. Call 825-2463 to schedule an appointment.

Specialty Clinics provide specialized care when you are referred by the Primary Care Clinics. Services include dermatology, orthopedics, surgery, gynecology, internal medicine, allergy, chest, ENT (ear, nose, and throat), ophthalmology, urology, and neurology. Routine physicals, health clearances, immunizations, and travel shots are available for a moderate fee. Call 825-0861.

Women's Health Service provides care for routine women's health needs and treatment of gynecological problems. Family planning (birth control) services are available, as are testing, counseling, and referrals for pregnancy. Counseling for sexual problems and relationship concerns is also provided. Call 825-0854.

Men's Health Clinic, the newest SHS service and the first of its kind in the UC system, treats genital and urinary problems, both sexual and nonsexual in nature. The clinic also provides sexual counseling for UCLA's male students. Call 825-0861.

Dental Clinic services are available by appointment without need of a referral. While the primary function of this clinic is to treat dental emergencies, a limited number of general dentistry and dental hygienic services are available. Fees are charged for all services. Call 825-5858.

Outreach Programs, such as the Peer Health Counselor and Student Health Advocate Programs, provide peer care and educational counseling for health concerns. The programs allow students to be involved in the planning and delivery of all aspects of health care. Call 825-4730.

Supplemental Health Insurance is recommended for all fully enrolled students because certain major expenses, including hospitalization, surgery, and emergency room costs, are not covered by the regular SHS program. The University requires, as a condition of registration, that international students attending UCLA on nonimmigrant visas have adequate health insurance, and it reserves the right to make the same requirement of all students.

A low-cost insurance policy is available for purchase at SHS at the beginning of each quarter. Students are not automatically enrolled in the plan nor is coverage automatically renewed. The deadline for purchasing insurance for Fall Quarter is **October 10.** For information on insurance available through SHS, call 825-1856.

Student Psychological Services

Student Psychological Services offers short-term personal counsel and psychotherapy at two locations. The Mid-Campus Office is located in 4223 Math Sciences (825-0768, 825-4207); the South Campus Office is in A3-068 CHS (825-7985).

Psychologists, clinical social workers, and psychiatrists are available at both locations, offering assistance with situational stresses and emotional problems from the most mild to the most severe. These may include problems with interpersonal relationships, academic stress, loneliness, difficult decisions, sexual issues, anxiety, depression, or other concerns affecting the personal growth of students.

The service is confidential and free to regularly enrolled students. Students are seen individually or may choose from a number of groups offered each quarter. Appointments are made on weekdays between 8 a.m. and 5 p.m. Emergency counseling is also available.

Helpline

Helpline (825-HELP) provides information, referrals, crisis intervention, and a friendly ear when you don't know where else to turn. It is open daily from 5 p.m. to midnight (1 a.m. on Friday and Saturday). For more information, contact Clive D. Kennedy, Student Psychological Services, 4223 Math Sciences (825-4207).

Dean of Students Office

The Dean of Students Office, located in 2224 Murphy Hall (825-3871), exists to help you, either directly or by referral, with whatever needs you might have. Direct services include general counseling; sending emergency messages to students; and assisting in understanding University policies and procedures, including grievance procedures regarding student records, discrimination, student debts, and sexual harassment.

In addition, the office publishes "Official Notices" in the *Daily Bruin* at various times during the year. Such notices are important, and *all students are held responsible* for the information in them.

The Dean of Students Office also plays a role in administering campus discipline and applying the standards of citizenship which you are expected to follow at UCLA. Those standards involve complying with the policies and regulations governing this campus and being aware that infractions of those policies or regulations can result in disciplinary action. See "Student Conduct: Violation of University Policies" in the Appendix for more information.

Ombudsman

The Ombudsman is responsible for listening and responding to grievances from any member of the campus community (i.e., students, faculty, administrators, staff), for investigating those grievances where resolution has not been to the satisfaction of the concerned individual or where there are no established guidelines for resolution, and for resolving where possible, through mediation, those grievances (including sexual harassment). The office, located in 274 Kinsey Hall (825-7627), is independent in operation and is open from 8 a.m. to 5 p.m. weekdays; all matters are handled confidentially.

Student Legal Services

If you are a currently registered and enrolled student with a legal problem, you can get assistance free of charge from attorneys or law students under direct supervision of attorneys. They will help you solve legal problems, including those related to landlord/tenant relations, domestic relations, accident and injury problems, criminal matters, and contract and debt problems. Assistance is available on a walk-in basis from 9 a.m. to 12:30 p.m. weekdays in 70 Dodd Hall (825-9894).

Central Ticket Office

Tickets are available at two locations on the UCLA campus: the ticket office on the ground floor of the James E. West Center (825-2101) and the trailer at 650 Westwood Plaza (825-2953). Tickets for all UCLA events are sold at both locations. In addition, each location provides special ticket services as follows:

The West Center location offers student discount tickets to campus *athletic* events and local motion picture theaters. You may also purchase tickets to off-campus events through Ticketmaster and Ticketron, as well as student discount tickets for RTD buses and tokens for the Santa Monica bus system.

The 650 Westwood Plaza location offers student discount tickets for on-campus *cultural* events, subsidized by the Student Committee for the Arts (Registration and UCLA Student I.D. Cards must be shown). There is a limit of two tickets per person. Watch the *Daily Bruin* ads for ticket sale dates.

Services for International Students

The **Office of International Students and Scholars (OISS)** works closely with the **International Student Center** to provide services and programs specifically for UCLA's 6,500 international students and post-doctoral scholars. Together they provide a comprehensive orientation program for these students which helps them to pursue their academic goals, and a series of programs which allow them to share their viewpoints with American students and the community.

The OISS staff, located in 105 Men's Gym (825-1681), includes professional and peer counselors especially prepared to assist with questions about immigration, employment, government regulations, financial aid, cross-cultural adjustment, and personal matters.

The International Student Center, 1023 Hilgard Avenue (208-4587), focuses on student-community relations and helps with language, housing, and other problems in addition to sponsoring cultural, educational, and social programs.

Services for Disabled Students/Veterans

The **Special Services/Veterans Affairs Office,** A255 Murphy Hall (825-1501), provides information for veterans and their dependents about V.A. educational benefits, tutorial assistance, and V.A. work-study and loan programs. The office issues fee waivers to dependents of California veterans who are deceased or disabled because of service-connected injuries and who meet certain income restrictions. Fee waivers are also issued to eligible dependents of California police and fire department personnel who died in the line of duty.

Services provided by the office for disabled and handicapped students include assistance with registration and class enrollment, parking permits, fee deferments authorized by the California Department of Rehabilitation, readers for the blind, interpreters for the deaf, note takers, and examination proctors. Ramps, elevators, and specially equipped rest rooms for the handicapped are provided in all campus buildings.

The **Computer Program for the Disabled** provides two IBM PC/XT computer workstations with special equipment and training for UCLA students, faculty, and staff with physical disabilities, low vision, or blindness. The workstations are located in the Social Sciences Microcomputer Laboratory, 2434 Franz Hall. For further information, call 825-6227.

Women's Resource Center

The Women's Resource Center, located in 2 Dodd Hall (825-3945), offers services to all UCLA students, with special focus on women's needs.

The center presents workshops and support groups on many topics, including child care, self-defense, assertiveness training, rape prevention and education, career development, single parenting, returning to school, and personal relationships. It also offers referrals for medical, legal, career planning, personal counseling, and other services both on and off campus. A library includes specialized publications on women's issues. Internships are offered in areas such as creative writing, editing, legislative research, publicity, and program development.

The Women's Resource Center, committed to improving the status of women on campus, works with other campus agencies to help women reach their full potential.

Child Care Services

The **Child Care Center** provides full- and part-time care for children aged two months to six years. Fees range from $181 to $390 per month depending on care. Some grants are available for eligible student families. The center is located in Parking Lot 1 at 10833 Le Conte Avenue (825-5086).

The **Outreach Program** helps parents make off-campus child care arrangements. The Outreach Coordinator meets parents each Monday from noon to 1 p.m. in 2 Dodd Hall. For more information, call 825-8474.

The **UCLA Parent Toddler Group** is a cooperative nursery school open to children two to three and one-half years of age. Participating parents must work at school one morning in every four that their child attends. The school, open 9 a.m. to noon weekdays, is located in the Family Student Housing complex four miles south of campus at 3327 South Sepulveda Boulevard. For more information, call 391-9155 or 398-8739.

The **University Parents Cooperative Nursery School** offers a supportive educational environment to children of the UCLA community aged three to six years. Hours are 8:30 a.m. to noon and/or noon to 4 p.m. weekdays, with extended care available until 5:30 p.m. The nursery school is located in the Family Student Housing Community Center, 3327 South Sepulveda Boulevard (397-2735).

Safety and Security

Emergency: Campus Police — If you need to call the Campus Police Department, just dial two digits — **35** — from any campus phone. For nonemergency information, contact them at 601 Westwood Plaza (825-1491).

Escort Service — The Department of Community Safety provides free escort service every day of the year from dusk to 1 a.m. Uniformed escorts — specially trained UCLA students — are available to walk students, faculty, and staff members between campus buildings and local living areas or Westwood Village. To obtain an escort, call 825-1493 about 20 minutes before you need one.

Evening Van Service — The free service provides a safe and convenient mode of transportation around campus at night. Five vans operate Sunday through Thursday from 5 p.m. to midnight (6 p.m. to midnight in Spring Quarter) and serve many campus areas, including the residence halls, sororities, libraries, and living areas west of campus. For further information, call 825-1493.

UCLA Rape Prevention and Education Services are cosponsored by the Women's Resource Center and the Department of Community Safety. Services include workshops, self-defense classes, intake counseling, and referrals to offer women practical safety suggestions, increase physical and psychological preparedness, and heighten awareness of the complex issues of rape and sexual assault. For more information, call 206-8240 or 825-7661.

CPR — Free three-hour day or evening cardiopulmonary resuscitation classes (composed of a two-hour lecture and slide presentation and an hour of hands-on practice on Resusci-Annie torsos) are offered to UCLA students, staff, faculty, and visitors. For more information and scheduling, call 206-8886.

Important Phone Numbers

UCLA Police Department (24 hours)	825-1491
Police Emergency (from campus phones)	dial 35
UCLA Emergency Medical Center (24 hours)	825-2111
UCLA Escort Service (dusk to 1 a.m.)	825-1493
Helpline (5 p.m. to midnight)	825-HELP
Crime Information (5 p.m. to 7 a.m.)	825-7661

UCLA Alumni Association

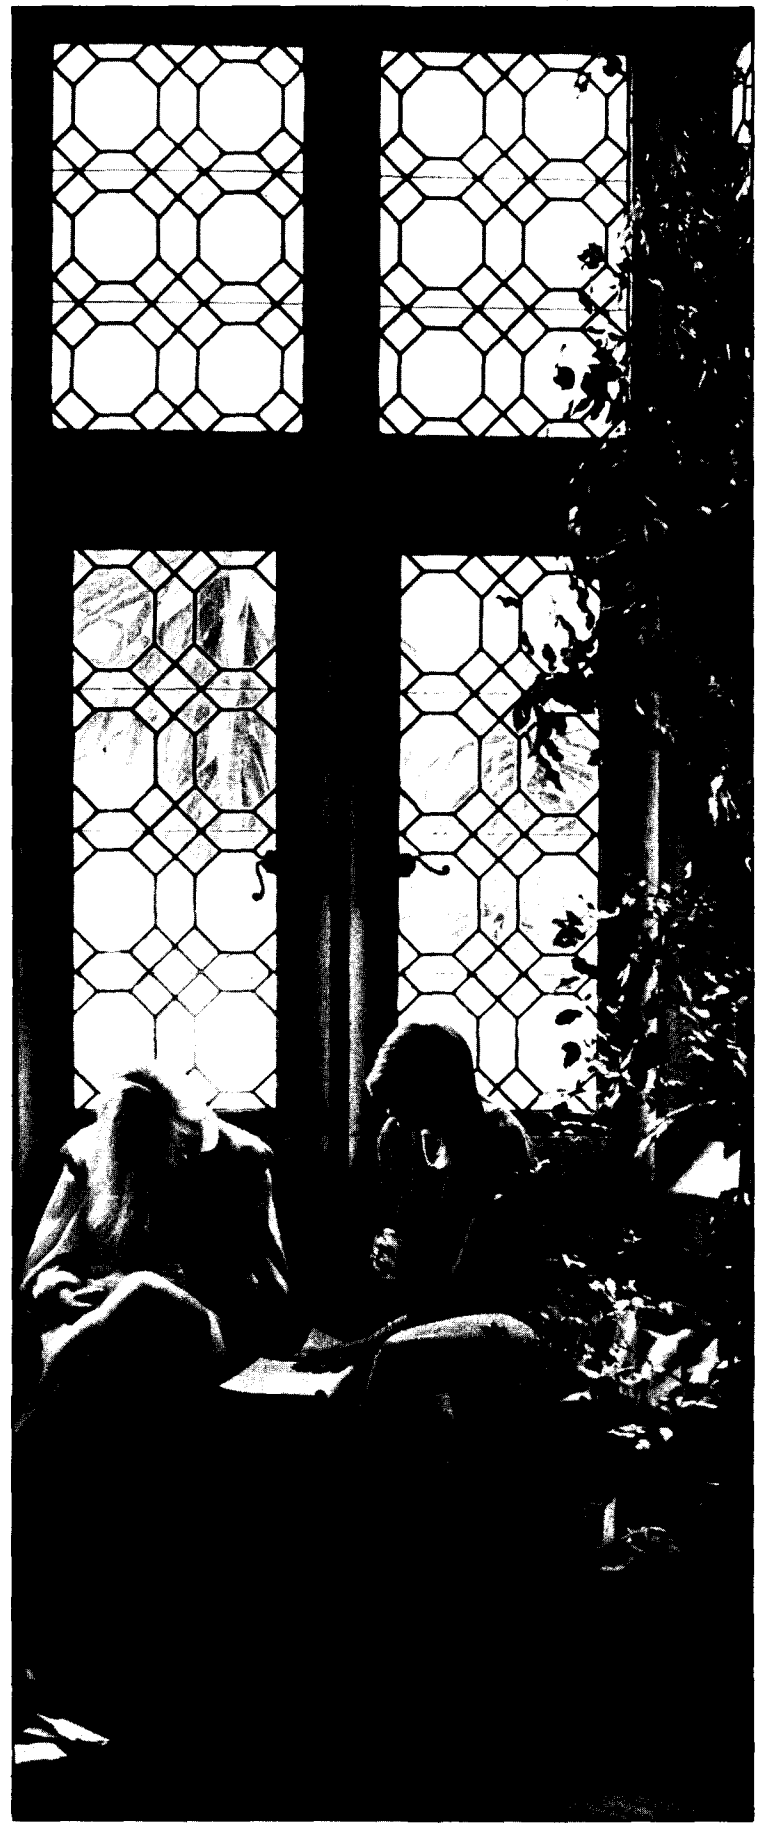
The UCLA Alumni Association, which celebrated its 50th anniversary in 1984, serves to advance the University's interests and to benefit students and alumni. With nearly 47,000 members, it ranks among the six largest dues-paying alumni groups in the country. Students, graduates, parents, faculty, staff, and University Extension students are all eligible to join one of approximately 90 regional clubs, professional and school organizations, and support and honorary clubs. Alumni participate in the many general interest programs as well.

The Alumni Association awards scholarships to freshmen and continuing students each year; sponsors UCLA's Homecoming festivities and holds "Dinners for Twelve Strangers," which bring together students, alumni, and faculty; and supports student events such as the Chancellor's Freshman and Graduate Receptions, Spring Sing, and Mardi Gras. The Alumni Travel Program enables alumni to participate in educational and cultural travel and to support UCLA athletic teams at major away games. The Governmental Relations Program promotes constructive relations between the University and government officials.

Benefits of Alumni Association membership include free library privileges as well as discounts on UCLA Fine Arts Productions, athletic events, group medical insurance, and travel programs. Graduating seniors who join receive special discounts on cap and gown rental, diploma lamination, graduation announcements, and an Extension class of their choice. The Alumni Association is located in the James E. West Center, 325 Westwood Plaza (825-3901).

Undergraduate Study

2



Undergraduate Admission

Information:
Undergraduate Admissions and Relations with Schools
1147 Murphy Hall
(213) 825-3101

The Office of Undergraduate Admissions and Relations with Schools (UARS) invites you to visit UCLA to discuss your prospects as a student and to experience the campus firsthand. The UARS Office schedules frequent student-guided individual and group tours of the campus which are both enjoyable and informative. Feel free to call the UARS Office at (213) 825-8764 for tour information; (213) 825-3101 for general information.

Preparing for University Work

A carefully planned program of high school courses best prepares you for University work. It can give you a definite edge in your undergraduate studies and a head start in your selected field. Most important, if you master certain basic skills in high school, you increase your chance of success at the University.

As a prospective UCLA freshman, you should give priority to completing the high school courses required for admission — the academic pattern of courses outlined later in this chapter. In addition, you should give careful thought to the general field of study, if not the specific major, you want to pursue. If you can make this decision early, you can take additional high school courses related to your field.

You should understand that the academic requirements for admission are **minimum** entrance standards. Completing the required high school courses with satisfactory grades will not automatically determine whether you will be selected for admission to UCLA, as students are chosen from a large number of highly competitive applicants. Most of these applicants will have met the minimum requirements; thus selection depends on additional factors.

Many elements are considered in the selection process, but the primary ones are (1) academic preparation — pattern and quality of courses, (2) performance in courses completed, and (3) scores received on the standardized college tests (Scholastic Aptitude Test or American College Test and achievement tests).

You should take as many honors and advanced placement courses as possible and should try to exceed the minimum academic subject requirements in all subjects, particularly mathematics, laboratory sciences, and foreign languages. High test scores are necessary in conjunction with strong performance in classes and a consistent pattern of courses. Overall performance must be well above average.

You must begin preparation for college at least by the ninth grade in order to allow you to progress through more than just the minimum required courses. If possible, you should begin academic coursework in the seventh and/or eighth grades, as this allows you to complete five or six years of college preparatory work. With the strength of solid preparation, students applying to UCLA will be in a competitive position for admission.

Applying for Admission

The first step in applying for admission is to obtain an *Undergraduate Application Packet* containing all necessary forms and instructions from your California high school or community college counselor or from any University of California Admissions Office. One application is used to apply to all UC campuses. You may apply to two UC campuses for the initial $35 application fee; for each additional campus you select, you must pay an extra $20 fee per campus. These fees are not refundable.

Complete the application, taking care to list the college or school you wish to attend at UCLA and your desired major. Send the completed application, along with the nonrefundable application fee, to University of California, P.O. Box 6600, Albany, CA 94706-0600.

Checks or money orders should be made payable to The Regents of the University of California. (If you have applied previously and were ineligible, or if you were admitted previously and did not register, you must file a new application for the quarter you want to attend and submit a new application fee.)

If you are in high school when you apply (freshman applicant), **do not** send your sixth and/or seventh semester high school transcripts. A final transcript, including a statement of graduation or proficiency, will be required at a later date. You must also submit official results of the Scholastic Aptitude Test (SAT) or American College Test (ACT) and three achievement tests.

If you have attended or are attending another college when you apply (transfer applicant), request that transcripts of all your high school and college work be sent to UCLA. **It is your responsibility to arrange for transcripts to be sent and to assure that they arrive promptly; hand-carried transcripts are not acceptable for final evaluation.** Transcripts and other documents cannot be returned or forwarded to other institutions.

When to Apply

The filing periods for applications are as follows:

Winter Quarter 1987:
File July 1-31, 1986 (Intercampus transfers only)
Spring Quarter 1987:
File October 1-31, 1986 (Junior-level transfers only)
Fall Quarter 1987:
File November 1-30, 1986 (Freshmen and transfers only)

(Applications for admission to Fall Quarter 1986 would have had to be filed during November 1985.)

Some departments, majors, colleges, or schools at UCLA may close to new applicants as enrollment targets are met. You should inquire just prior to the filing period to determine if your area of interest is open.

Notification of Admission

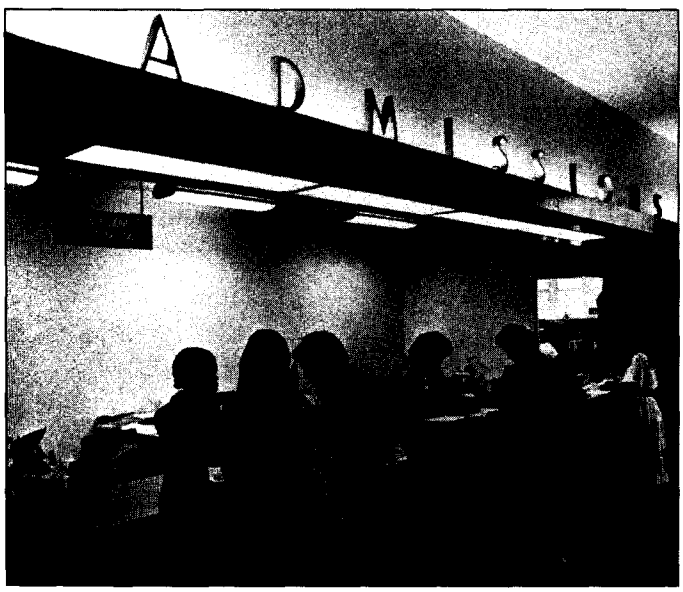
You will be mailed a notice, which you should keep, acknowledging receipt of your application. Later, you will receive a letter explaining your admission status. The length of time before admission notification varies depending on how complete your application is and how quickly your records are received. In general, most Fall Quarter applicants are notified by March 15.

If you are accepted for admission, you will be asked to sign and return a Statement of Intent to Register and a Statement of Legal Residence. A nonrefundable $50 deposit, also required at this time, will be applied to your University registration fee if you register in the quarter to which you are admitted.

Entrance Requirements

All campuses of the University of California have the same undergraduate admission requirements. The requirements are based on two principles: (1) the best indicator of success in the University is a record of high grades in previous schoolwork; (2) the completion of certain academic courses in high school prepares you to begin University work and choose a general field of study.

Fulfilling the admission requirements, however, does not necessarily assure admission to the campus of your first choice. Some UC campuses with enrollment limits, including UCLA, cannot admit all qualified undergraduate applicants. Many departmental programs of study attract more qualified applicants than can be accommodated each year. The selection of applicants is based on demonstrated high scholarship in preparatory work, which often goes well beyond the minimum eligibility requirements.



Note, too, that admission requirements vary for California residents and nonresidents. Since the University of California is partially state-funded, admission requirements are necessarily somewhat more restrictive for out-of-state applicants. The term "resident" as used here should not be confused with the definition of legal residence for tuition purposes as defined in the Appendix.

Admission as a Freshman

You are considered a freshman applicant if you have not enrolled in a regular session of any college-level institution since graduation from high school (except for summer session immediately following high school graduation). To qualify for admission as a freshman, you must meet three major requirements: **the Subject Requirement, the Scholarship Requirement, and the Examination Requirement.** These are the **minimum** requirements for admission to the University; meeting them does not automatically assure admission to UCLA.

Subject Requirement

Outlined below are the high school academic courses required for admission to the University of California. Each course must be completed with at least a grade of C. The requirement consists of 15 year-long courses, of which seven must be taken during your last two years in high school. These are the **minimum** courses required for admission; you are encouraged to exceed these requirements whenever possible.

(1) **History** — One year of United States history, or one-half year of United States history and one-half year of civics or American government.

(2) **English** — Four years of university preparatory courses in English composition and/or literature, with no more than one year accepted from the ninth grade.

(3) **Mathematics** — Three years of university preparatory courses (elementary algebra, geometry, and intermediate algebra).

(4) **Laboratory Science** — A one-year course in one laboratory science, taken in the tenth, eleventh, or twelfth grade.

(5) **Foreign Language** — Two years of one foreign language with a written literature.

(6) **College Preparatory Electives** — Four units, in addition to those required above, to be selected from at least two of the following subject areas: history, English, advanced mathematics, laboratory science, foreign language, social science, and fine arts. In general, elective courses should involve considerable reading and should develop your analytical and reasoning ability and skill with written and oral exposition.

Scholarship Requirement

Eligibility for admission to UCLA is based on a combination of your grade-point average (GPA) in the academic subject requirements and your American College Test (ACT) or Scholastic Aptitude Test (SAT) scores. For detailed scholarship requirements, see the *Undergraduate Application Packet* or contact Undergraduate Admissions and Relations with Schools (UARS).

Examination Requirement

All freshman applicants must submit scores from the following tests:

(1) One Aptitude Test:

- (a) The American College Test (ACT), composite score, OR
- (b) The Scholastic Aptitude Test (SAT), total score.

(2) Three College Board Achievement Tests (ACH) which must include:

- (a) English composition AND
- (b) Mathematics, level 1 or 2, AND
- (c) Either English literature, foreign languages, sciences, or social sciences.

For detailed information on admission requirements for freshman students, see the *Undergraduate Admission Packet* or contact UARS.

Admission as a Transfer Student

A transfer applicant has been a registered student (1) at another college or university or (2) in college-level extension courses. (This does not include attending a summer session immediately following high school graduation.) You **may not disregard** your college record and apply for admission as a freshman.

Requirements for admission as a transfer student vary depending on your high school record and the date of your high school graduation, though a GPA of 2.0 or better is required in transferable courses. If you wish to transfer to UCLA, you should follow these general guidelines:

(1) See your college counselor, who can help you identify the courses you should take to prepare for your intended major, and make certain the courses you are currently taking are transferable.

(2) Take as many English and mathematics courses as possible. UCLA's academic program is rigorous and requires a strong background in both critical and quantitative skills. English and mathematics are the most important subjects you can take.

(3) Begin to satisfy general education (breadth) requirements and fulfill prerequisites for your intended major. Because a sound liberal arts education encompasses more than an in-depth knowledge of one field, most colleges and schools at UCLA require that students take coursework in areas outside their major. Before transferring to UCLA, you can take courses to satisfy these general education requirements as well as fulfill some of the required "prerequisite" courses for your major.

For more detailed information on admission requirements for transfer students, see the *Undergraduate Application Packet* or contact UARS.

Intercampus Transfers

Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. For further information, see "Intercampus Transfer" in Chapter 4.

Senior-Level Applicants

Students attaining senior standing are not generally admitted by the University.

Second Bachelor's Degree Applicants

By policy, second BAs are not generally granted by the University.

Transfer Credit and Credit by Examination

The University gives unit credit to transfer students for certain courses completed at other accredited colleges and universities. To be accepted for credit, the courses must be comparable to those offered at the University, as determined by the Office of Undergraduate Admissions and Relations with Schools (UARS).

College credit for examinations given by national testing services is generally not allowed, except for the Advanced Placement examinations given by the College Board. Contact UARS for more information.

Applicants from Other Countries

To be considered for admission to the University of California, international students must have completed secondary school with a superior average in academic subjects and have earned a certificate of completion which would enable them to be admitted to a university in the home country.

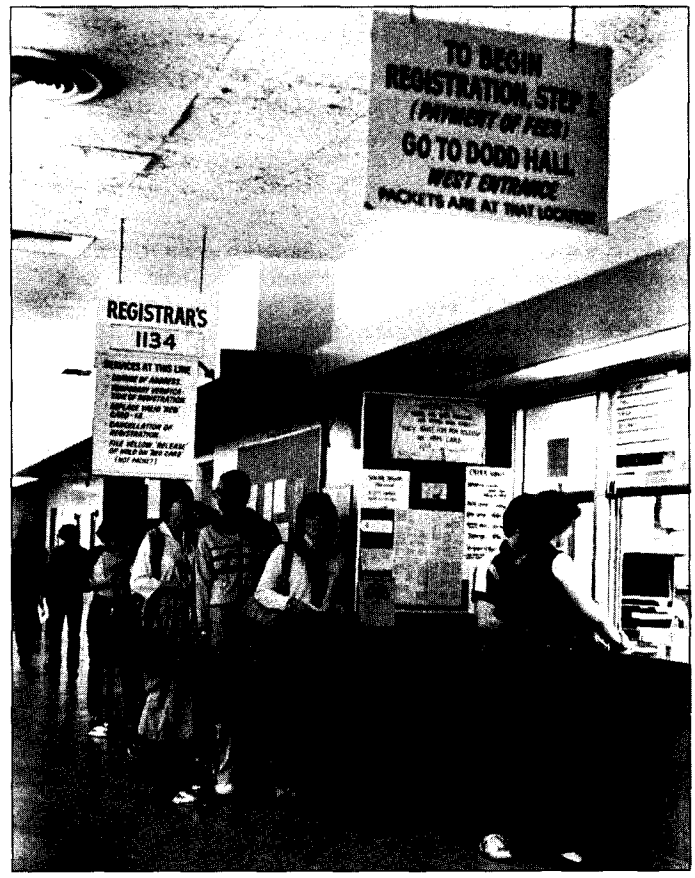
Your application for admission, copies of official certificates, and detailed records of all secondary schools attended should be submitted **as early as possible after the filing period opens** (see "When to Apply" at the beginning of this chapter). This will allow time for the necessary correspondence and, if you are admitted, to obtain your passport visa.

Students whose native language is not English must have sufficient command of English to benefit from instruction at UCLA. To demonstrate that command, you are required to pass the English as a Second Language Placement Examination (ESLPE) given by the University. If you do not pass the ESLPE, you are required to enroll in one or more ESL courses. In addition, you are advised to take the Test of English as a Foreign Language (TOEFL) as a preliminary means of testing your ability. Make arrangements for this test by writing to the Educational Testing Service, 1947 Center Street, Berkeley, CA 94704. Have your test results sent directly to the UCLA Office of Undergraduate Admissions and Relations with Schools.

All new and reentering international students must obtain clearance in person at the Student Health Service by completing and returning a Health Evaluation form, by verifying adequate health insurance coverage, and by establishing absence of active tuberculosis. In addition, all international students must obtain an annual health insurance clearance each fall at the SHS Insurance Office. For information, call (213) 825-4073.

Readmission

Undergraduate students are required to apply for readmission only if they were absent from the University for more than one quarter. Thus, if you complete a quarter and then withdraw, cancel, or fail to register for the next quarter, registration materials will be available for you for the term immediately following.



If you are absent for two or more consecutive quarters, you must file an application for readmission with the Registrar. During the 1986-87 academic year, all such students returning in the same standing (undergraduate) must file applications for readmission as follows:

Filing Deadlines

August 15 for Fall Quarter 1986
November 25 for Winter Quarter 1987
February 25 for Spring Quarter 1987

Applications are available at the Registrar's Office, 1134 Murphy Hall. Your completed application must be accompanied by a $35 application fee (nonrefundable) and transcripts of records from any other institutions (including University Extension) you attended during your absence. Within enrollment limitations, readmission is generally approved if you were in good academic standing (2.0 grade-point average) when you left the University, if coursework completed elsewhere in the interim is satisfactory, and if applications for readmission are filed on time. Contact the Registrar's Office at (213) 825-1091 for further information on readmission.

Registration and Enrollment

Information:
Registrar's Office
1134 Murphy Hall
(213) 825-1091

Detailed information on registration (fee payment) and enrollment procedures is contained in the quarterly *Schedule of Classes,* available for purchase at the Students' Store several weeks before the beginning of each quarter. To obtain a copy by mail, write to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024, Attn: Mail Out. Include a check or money order for $2 payable to ASUCLA.

Registration consists of paying fees and enrolling in classes. The Registration Form, issued by the Registrar, is used for paying fees and for requesting enrollment in classes. You must complete both processes by the established deadlines to be officially registered and enrolled for the quarter.

Registration may be accomplished by mail or in person. You may use a combination of both processes to pay fees and enroll in classes, but **all eligible students are encouraged to register by mail or use the Cashier's Drop Slot.** It will save you the time and trouble of waiting in line.

Last Mailing Dates

(Tentative only; refer to the *Schedule of Classes* for firm dates)

To Register (Pay Fees) by Mail:
August 29 for Fall Quarter 1986
December 12 for Winter Quarter 1987
March 13 for Spring Quarter 1987

To Enroll in Classes by Mail:
August 29 for Fall Quarter 1986
November 19 for Winter Quarter 1987
February 27 for Spring Quarter 1987

Enrollment in Classes

The quarterly *Schedule of Classes* contains up-to-date listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Using the *Schedule* and with the aid of academic counseling from your school or college advisers, you can assemble a program of courses (see "Choosing a Major" and "Planning a Program" later in this chapter).

You should plan two or three alternate programs in case your first choice of courses is not available. You may not choose two courses in the same final examination group and should not select classes that conflict in meeting times. If conflicts are unavoidable, consult with the instructor of each course at the first class meeting.

Enrolling in classes, like paying fees, is accomplished most effectively and most easily by mail. Because enrollment by mail is processed according to a postmarked date, you will increase your chances of getting the classes you want if you send your Study List Request to the Registrar's Office on the first mailing date. Consult the *Schedule of Classes* for firm dates and for all details on enrollment procedures.

You may enroll in classes in person on certain days preceding the beginning of classes each quarter. Hours are 8:30 a.m. to 5 p.m. on the following days:

Enrollment in Classes in Person

September 23-26 for Fall Quarter 1986
December 4-6 for Winter Quarter 1987
March 12-14 for Spring Quarter 1987

Study List Changes

Tentative Study Lists showing enrollment results are mailed to each student 10 days before the term begins. Before the first day of class, you may make program changes (add/drop courses, switch sections, or change grading options) by keeping the appointment to enroll which is printed on your Tentative Study List. Once instruction begins, and **through the tenth day (second week) of classes,** you may make as many program changes as you wish, without appointment and without fee, at the enrollment terminals in the Ackerman Union second-floor lounge.

Viewing Terminal — If you want to take an up-to-date look at your Study List or obtain an extra copy of it, you may do so before instruction begins or during the first 10 days of classes at the viewing terminal on the east balcony of Ackerman Union or at 1134 Murphy Hall. On each visit to the terminal, you will receive a copy of your Study List showing enrolled courses and waiting list courses, including your position on the waiting list. You may also use the viewing terminal to drop courses or change the grading basis of courses, but in order to add courses or switch sections you must use a regular enrollment terminal.

On the tenth day of instruction the Study List of enrolled courses becomes "official" and a computerized Official Study List is mailed to each registered student. (If you do not receive yours on time, obtain a copy in the Registration/Enrollment Office, 1134 Murphy Hall.) **You are responsible for all courses and the grading basis as listed on the Official Study List, and you cannot receive credit for courses not listed.** Unapproved withdrawal from or neglect of a course entered on the Study List will result in a failing grade.

Changes to your Official Study List require an Enrollment Petition from your college or school. Each petition costs $3, but you may make any number of changes on the same form. If you plan to add a course, you must bring a Permission to Enroll form from the instructor or ask the instructor to sign the petition. If you add a special studies (199) course, you must also bring an approved copy of the Petition for Enrollment in Special Studies 199 Course. The deadline to drop classes is the end of the fourth week of instruction (see Calendar).

Change of College or Major

Changing your college or major requires the approval of the college or department you want to attend. Applications are made by petition, which is available without charge from the college or school office. You may not change majors after the opening of the last quarter of your senior year.

Undergraduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA will vary according to personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar's Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay tuition of $1,362 per quarter (for a full definition of residence and nonresidence, see the Appendix of this catalog).

At the time of registration each quarter, all undergraduates must pay the following fixed fees. **Fees for Fall Quarter 1986 are current as of publication date but are subject to change without notice by The Regents.**

Quarterly Expenses, Fall 1986

University registration fee	$ 174
Education fee	241
Ackerman Student Union fee	4
Associated Students (ASUCLA) fee	8
Wooden Recreation Center fee	5
Total for California residents	**$ 432**
Nonresident tuition fee	$1,362
Total for nonresidents	**$1,794**

The registration fee covers certain student expenses for counseling service, all laboratory and course fees, athletic and gymnasium facilities and equipment, lockers, registration, graduation, and care and treatment on campus by the Student Health Service. This fee is charged whether or not you make use of these services.

Other Fees

Miscellaneous fees charged to UCLA undergraduates include a $50 charge for late payment of registration fees or late filing of the Study List (after the tenth day of classes). Minimal charges of $5 or less are assessed for most petitions and other special requests. A complete list of fees may be found in the *Schedule of Classes.*

Fee Refunds

Students who formally withdraw from the University during the first five weeks of instruction may receive partial refunds of fees. For the refund schedule and more information, see "Withdrawal" in Chapter 4 of this catalog or refer to the *Schedule of Classes.*

Reduced Fee Programs

UCLA recognizes the need for part-time study in special circumstances. If you have family or employment responsibilities or health problems which preclude full-time study, you may qualify for part-time enrollment.

If you have approval from your college or school to enroll in 10 units or less, you may qualify for a fee reduction. Nonresident students pay only half the nonresident tuition fee; residents pay one-half the education fee. You must file the Request for Fee Reduction form with your college or school by the tenth day of instruction. Fee assessment is based on total units enrolled as of Friday of the third week of instruction.

Lapse of Status

Your status may lapse if you fail to settle financial obligations when due (or make satisfactory arrangements with the Main Cashier if payment cannot be made) or if you fail to respond to official University notices.

With lapsed status you are not entitled to any University services except assistance toward reinstatement. After you have satisfied the obligation, a petition for reinstatement must be approved by the office recommending the lapse of status and filed with the Registrar's Office, 1111 Murphy Hall, with a $10 reinstatement fee.

Estimated Annual Budgets for California Residents

	Single, Commuter, Living at Parents' Home	Single, Living in UCLA Residence Hall, Co-Op, Sorority, or Fraternity	Single, Living in Off-Campus Apartment or House	Married, Living in UCLA Family Student Housing	Married, Living in Off-Campus Apartment or House
University Fees	$1,295	$1,295	$1,295	$1,295	$1,295
Books and Educational Supplies	525	525	525	525	525
Food and Rent	1,180	2,960*	4,400	6,500	8,200
Transportation	600	100	400	400	400
Personal	950	950**	950	2,300	2,300
Total Budget	**$4,550**	**$5,830**	**$7,570**	**$11,020**	**$12,720**

*If you are assigned a room in a residential suite, add $600.
**Includes $100 for extra meals during breaks.

For more information on housing, see Chapter 1 or contact the UCLA Community Housing Office in 100 Sproul Hall (825-4491).

Living Expenses

Printed on the previous page are the estimated yearly budgets for undergraduate California residents. Nonresidents must add the $4,086 annual tuition fee to their total expenses for an accurate estimate. Expenses cover the three regular session quarters of the 1986-87 academic year and do not include Summer Sessions. The budgets are designed to serve as a guide only.

Financial Support

Information:
Financial Aid Office
A107 Murphy Hall
(213) 206-0432

It is not required that you come from a low-income family in order to qualify for financial aid. You must, however, demonstrate "financial need," which is defined as the difference between the cost of attending UCLA and the amount that you and your family should be able to contribute. The University expects that students and their families will bear as much of the necessary cost of a student's education as their circumstances will permit.

The Financial Aid Office publishes a *Financial Aid Handbook* which provides more complete information than this catalog can give. You can get a copy free of charge from your high school counselor or from the Financial Aid Office, A107 Murphy Hall, University of California, Los Angeles, CA 90024.

Applying for Financial Aid

The deadline for filing all undergraduate financial aid applications for academic year 1987-88 is **early February 1987** (applications for 1986-87 would have had to be filed by February 1986). Because of the limits being placed on financial aid funding, meeting deadlines is more crucial than ever. Applications received after the deadline will be considered only if funds are still available. The *Daily Bruin* and other campus media publish information on deadline dates.

Prospective students must first apply for admission to UCLA by filing the *Undergraduate Application Packet* during the filing period (see "Undergraduate Admission" at the beginning of this chapter). On the application, check the boxes requesting financial aid and scholarship application materials.

Continuing students may obtain UCLA Scholarship and Financial Aid Application Packets at the Financial Aid Office in December of each year. Continuing students from foreign countries may obtain a Financial Aid Application for International Students at the Financial Aid Counseling Window, A107 Murphy Hall. No financial aid can be awarded to international students in their first year of attendance at UCLA.

Student Aid Application for California (SAAC)

One of the key assumptions of financial aid is that parents, to the extent that they can contribute, have primary responsibility for financing the cost of a student's education. To permit an evaluation of need, all students who apply for need-based aid must provide financial information on the Student Aid Application for California (SAAC). If you are financially independent, your own financial circumstances are analyzed rather than those of your parents (see the *Financial Aid Handbook* for the definition of financial independence).

The SAAC is used to apply for Pell Grants, funds administered by UCLA, and Cal Grants administered by the California Student Aid Commission. It is available at California high schools and colleges and the UCLA Financial Aid Office, and should be filed in early February with the College Scholarship Service, P.O. Box 70, Berkeley, CA 94701. Be sure to indicate that a report is to be sent to UCLA.

Kinds of Financial Aid

There are four basic kinds of aid: scholarships, grants, loans, and work-study employment. Since most students are eligible for several of these, the Financial Aid Office usually offers a combination "package" consisting of some money that is a gift (scholarship or grant) and some that will have to be paid back or worked for. If you indicate a preference for work or loan, we will attempt to honor it.

Unless otherwise stated, you must demonstrate financial need to qualify for aid, and you must be making normal academic progress as defined by your college or school and department.

Scholarships

Scholarships are gifts that do not have to be repaid. The Undergraduate Scholarship Program at UCLA rewards academic excellence and promise and provides assistance in meeting the expenses of an undergraduate education. Scholarships are expected to create opportunities for further academic growth and development.

With the exception of the Regents and Alumni Association Scholarships, financial need is a prerequisite for UCLA scholarships. Each year approximately $300,000 is awarded from the many different scholarship funds. Awards usually range from $100 to $1,500 and are not renewable. You must reapply each year for continued consideration.

Regents Scholarships

One of the highest honors that may be conferred on an undergraduate student is the awarding of a Regents Scholarship. Unlike other University scholarships, these are awarded for four years to students entering from high school, and for two years to juniors. A UCLA faculty committee selects Regents Scholars on the basis of their exceptional academic achievement and promise. Financial need is not a criterion for this award; scholars receive a yearly honorarium of $500 if they have no financial need. Scholars who establish financial need by filing the SAAC receive a yearly stipend to cover the amount of their need. In addition to the monetary awards, Regents Scholars receive special privileges.

National Merit Scholarships

UCLA sponsors a number of four-year scholarships for entering freshmen who are finalists in the National Merit Scholarship competition. Finalists who are admitted to UCLA must select UCLA as their institution of choice and must meet UCLA's scholarship criteria in order to receive a UCLA Merit Scholarship.

UCLA Alumni Association Scholarships

Alumni Scholarships are available to California high school graduates who will be UCLA freshmen in the Fall Quarter. No financial need is involved, but you must show academic promise. Alumni Scholarships are merit-based and competitively awarded. Amounts for 1986-87 range from $1,000 to $10,000. The Ralph Bunche Scholarship, also awarded by the UCLA Alumni Association and named in honor of the Nobel Peace Prize laureate and UCLA alumnus, is awarded to students who meet the University's Student Affirmative Action definition.

Prizes

The generosity of alumni and friends of the University provides for competitive prizes and awards in several fields. Selections are made by committees in appropriate academic departments. See your departmental adviser for details.

Grants

Grants are gifts that do not have to be repaid and are based solely on need. Whenever guidelines and funds permit, your financial aid package will include a grant.

Pell Grants

Pell Grants are federal aid programs intended to be the "floor" of financial aid packages. As such, they may be combined with other forms of aid in order to meet the full costs of education. Amounts for 1986-87 range from $250 to $2,300 and are determined by your own and your family's financial resources. U.S. citizens, permanent residents, and refugees are eligible to apply by filing the SAAC. The University requires all eligible undergraduates to apply for a Pell Grant.

Cal Grants A and B

California residents who have not completed more than nine quarters or six semesters of college work prior to September 1986 are eligible to apply for a California Student Aid Commission Cal Grant award. The SAAC and Cal Grant Supplements are the official applications for these programs. "Cal Grant A" awards are applied toward education and registration fees. They are based on need and academic achievement and are renewable each year. "Cal Grant B" awards are intended to assist low-income families and are renewable annually.

Grants-in-Aid

Grants-in-Aid provide eligible students with financial assistance from University funds. Awards range from $100 to $5,010. All students may apply.

Supplemental Educational Opportunity Grants

These awards are federally funded and are granted only to undergraduates with financial need. Awards range from $200 to $1,500.

Loans

Loans allow you to postpone paying some of the costs of your education until you have completed school. A financial aid offer almost always includes a long-term, low-interest loan. The loans come from revolving funds; most repayments are immediately reloaned to current students.

It is essential that borrowers realize their commitment and responsibility to repay according to repayment schedules. Before accepting a loan, you should assess your total educational debt and your ability to repay following graduation. If you are a first-time borrower, schedule an appointment with a financial aid counselor. The University will make every effort to assist you during the repayment of your obligation, but University services, including registration and the release of official transcripts, will be withheld if your loan becomes delinquent. Seriously delinquent accounts are referred to a professional collection agency for action.

All loan recipients must come to the Student Loan Services Office (A227 Murphy Hall) for a loan exit interview before leaving UCLA for any reason. This interview will help you understand your loan agreement and your rights and responsibilities. If you fail to participate in an exit interview, the University will place a hold on your academic records and registration materials. Call 825-9864 for an interview appointment before graduating, transferring, or withdrawing from UCLA.

National Direct Student Loans (NDSL)

These low-interest loans are available to all students who are U.S. citizens, permanent residents, or refugees and who are carrying at least one-half the full-time academic workload. Repayment begins nine months after you terminate at least half-time study. Minimum repayment is $90 per quarter, including interest, for a maximum of 10 years.

Nursing Loans

To be eligible for a nursing loan, you must be a U.S. citizen, permanent resident, or refugee and a student in the School of Nursing. Up to $2,500 is available per academic year. For more information, contact the financial aid counselor either in the Financial Aid Office or in the School of Nursing.

Emergency Educational Loans

You need not be receiving financial aid to apply for emergency loans. You may borrow up to $75 for immediate emergency needs; this amount is repayable within five weeks. To qualify, you must be a registered UCLA student with a satisfactory loan repayment record. Applications are available at the Student Loan Services Office, A227 Murphy Hall.

Guaranteed Student Loans (GSL)

Federal and California Guaranteed Student Loans are long-term budget-based loans made by banks, savings and loan associations, and credit unions. They are available to U.S. citizens, permanent residents, or refugees who are enrolled in at least a half-time program at UCLA. You should check with various lending institutions to determine their particular loan policies, but the Financial Aid Office must process applications before you submit them to a lending institution. Applications are available at the Financial Aid GSL Office, A129J Murphy Hall.

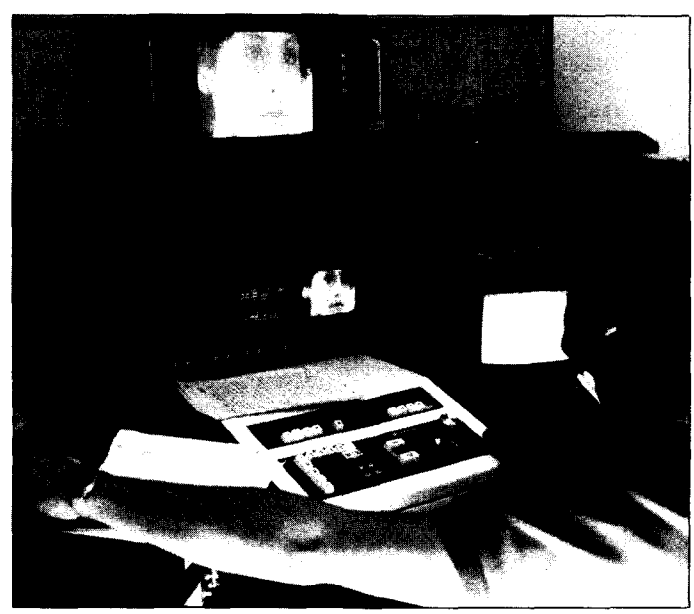
Repayment of the GSL begins six to nine months after graduation or withdrawal and continues for a maximum of 10 years. If you receive a federal or state interest subsidy, the loan is interest-free while you are a student and for six to nine months thereafter. Undergraduates may borrow $2,500 per academic year up to a total of $12,500. GSL processing takes approximately 10 to 12 weeks.

Work-Study Programs

Work-study is a need-based program designed to expand part-time job opportunities for students. The program allows you to work a maximum of 20 hours per week while attending school and 40 hours per week during breaks. An academic year's work-study award may range from $900 to $5,200, but your gross earnings may not exceed the amount awarded to you. There are two basic work-study programs available.

Under **College Work-Study,** the federal government pays a portion of your hourly wage; your employer contributes the balance. Whenever possible, work is related to your educational objectives. Employment may be on or off campus. Hourly pay rates comply with minimum wage laws and vary with the nature of your work, experience, and capabilities. To be eligible you must be a U.S. citizen, permanent resident, or a refugee.

The **President's Work-Study** program is administered in the same manner as College Work-Study except that The Regents of the University and your employer provide funding, and you are limited to on-campus jobs. All students are eligible to apply.



Undergraduate Majors and Degrees

Getting Your Bachelor's Degree

Colleges and Schools

The UCLA campus consists of 13 colleges and schools, most of which are subdivided into departments. The courses of instruction are administered within the departments.

Colleges at UCLA provide a broad, nonprofessionally oriented curriculum leading to both undergraduate and graduate degrees. UCLA has two colleges: the College of Letters and Science and the College of Fine Arts.

Schools provide training for specific professions and are authorized to grant professional degrees (e.g., Master of Business Administration, Master of Engineering, Doctor of Education). UCLA has 11 professional schools, two of which offer undergraduate degree programs: the School of Engineering and Applied Science and the School of Nursing.

Each of the colleges and schools has its own degree requirements and is headed by a dean or provost who has final academic authority. Thus, when you attend UCLA, you are enrolled not only at the University of California, Los Angeles campus, but in a specific college or school within the University. Your academic life is governed by the college or school which houses your major.

As the chart on the previous pages shows, UCLA offers Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees in a broad range of disciplines. There are no undergraduate minors at UCLA, but there are a number of special programs which you may complete as an adjunct to your major. The bachelor's degree (you may earn only one) is the culmination of your undergraduate work; master's and doctoral degrees are earned in graduate study.

Knowing Your Responsibilities

UCLA provides its students with a wide variety of academic assistance and personal support resources, but it is up to you to realize when you need help and to seek it out. It is also your responsibility to stay informed of rules, regulations, and policies affecting your life as a UCLA student and your academic standing, and to comply with them. Consult this catalog, the college and school announcements, and the *Schedule of Classes* for the information you need; watch for official announcements in the *Daily Bruin* and on campus bulletin boards. Meeting academic deadlines, monitoring your Study List for accuracy, completing prerequisites, and fulfilling degree requirements are all part of your academic duties as a student. Living up to your responsibilities will add immeasurably to the value and enjoyment of your education (also see "Student Conduct" in the Appendix of this catalog).

Choosing Your Major

One of the most important decisions you will have to make in college is your choice of major — the field of study which represents your principal academic interest and which will possibly contribute toward your career goals. Some students select their major at the time they fill out the University's application for admission. A far greater number, however, are undecided about their major.

If you are in the College of Letters and Science, you do not need to declare your major in your freshman year. The college allows you to attend with an undeclared major until the end of your sophomore year. In fact, if you are not certain of your specific academic goals, it is often wise to wait and explore the diversity of subject areas offered at UCLA.

Enroll in introductory courses (usually numbered below 100) in a variety of disciplines to learn the scope and vocabulary of the major. It is not unusual for students to become enthusiastic about disciplines previously unfamiliar to them. With careful planning, such courses may also apply toward fulfilling college requirements for whatever major you choose.

To narrow your choices further, carefully consider general college or school requirements, the description of courses offered in the major, and the departmental requirements for completing the program of study. Look at the books required for each course. Sit in on a few classes and talk with professors during their office hours. Discuss your interests and plans with a departmental counselor or faculty adviser, a college counselor, or with advisers in the Placement and Career Planning Center.

A few words of warning: certain majors, especially in fine arts, engineering, and the sciences, require early declaration. Some have enrollment quotas and will allow application by new majors only during a specified quarter. Check with the departmental adviser for the majors that interest you.

In addition, each UCLA undergraduate is limited to between 208 and 216 quarter units, depending on the college or school, to complete the academic program and fulfill all degree requirements. So, if you wait to declare a major, don't wait too long. In any case, you must declare a major by the beginning of your junior year (90 quarter units).

When you are ready to declare your major, or if you wish to change from one major to another, pick up a Petition for Change of Major at the college or school office. There is no fee for this petition.

Planning a Program

Every new student should obtain academic counseling before enrolling in classes at UCLA (counseling is required in the School of Engineering and Applied Science). Working with a tentative major in mind, you need to plan courses to satisfy all of the degree requirements while staying within the minimum and maximum number of units required for graduation. The Orientation program for new students will take you through a step-by-step plan for an effective program (see "Orientation" later in this chapter). If you cannot attend Orientation, see your college or school adviser or, if you have selected a major, make an appointment with your major department adviser before enrolling in classes.

Undergraduate Degree Requirements

In all campus units except the School of Engineering and Applied Science, you are required to earn a minimum of 180 units from all college coursework for the bachelor's degree at UCLA. A maximum of 208 units is allowed in the College of Fine Arts and the School of Nursing; in the College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. (If you have credit for English 1 taken Fall Quarter 1979 through Summer Quarter 1984 at UCLA, the minimum and maximum unit requirements are increased by two units: 182 for the minimum and 210, 218, or 230 for the maximum.) In the School of Engineering and Applied Science, the minimum units allowed are between 185 and 201 (depending on the program); 213 maximum units are allowed.

In working toward a bachelor's degree, you should be aware that in addition to unit requirements there are three levels of requirements which you must satisfy. The first level consists of Universitywide requirements which all undergraduates must satisfy; the rest vary depending on your major and the college or school which offers it.

(1) University requirements (Subject A, and American History and Institutions);

(2) College or school requirements (e.g., credit and scholarship, English composition, general education requirements);

(3) Departmental requirements (courses in preparation for the major and in satisfaction of the major).

University requirements are described below. Turn to "Requirements for the Bachelor's Degree" in the appropriate school or college chapter for a description of level 2 requirements, and then to the individual departments within each college and school for level 3 requirements.

University Requirements

The University of California has established two requirements which all undergraduates must satisfy in order to graduate: Subject A, and American History and Institutions. It is your responsibility to see that these requirements are fulfilled.

Subject A

Because proficiency in English composition is so important to successful performance in many courses, Subject A is the only requirement for graduation that you must satisfy before entering UCLA or during your first quarter in residence. You may meet this requirement by:

(1) Scoring 3, 4, or 5 on the College Entrance Examination Board (CEEB) Advanced Placement Test in English, OR

(2) Scoring 600 or better on the CEEB Achievement Test in English Composition, OR

(3) Presenting transfer credit for an acceptable college-level course in English composition at another institution, OR

(4) Passing a Subject A Placement Test required of all students who have not otherwise met the requirement.

If you do not meet the requirement in one of the ways described above, during your first quarter in residence at UCLA you must enroll in either English A or B (determined by performance on the Subject A Placement Test). Each course must be taken for a letter grade and passed with a grade of C or better. No credit toward a degree is granted for either course whether taken at UCLA or another UC campus. If you receive a final grade of C− or less, you must repeat the course during your next quarter in residence. You will not receive credit for any English course (except English A or B) unless the Subject A requirement is satisfied.

English as a Second Language (ESL) Students: If your native language is not English, you are required to take the English as a Second Language Placement Examination (ESLPE) even if you have received transfer credit for an acceptable college-level course in English composition at another institution (you are exempt from the Subject A examination). You may satisfy the Subject A requirement by (1) passing the ESLPE or (2) completing English (ESL) 33C with a grade of C or better (C− or a Passed grade is not acceptable). If you do not meet the requirement by either of the above methods, you must take (during your first quarter in residence at UCLA) either English (ESL) 33A, 33B, or 33C, depending on your ESLPE results. You must proceed in the English (ESL) 33 series until you complete course 33C with a grade of C or better. All units apply toward graduation but cannot be applied toward general education requirements.

American History and Institutions

This requirement is based on the principle that a U.S. citizen attending an American university should understand the history and public institutions of the United States under the federal and state constitutions. Candidates for a bachelor's degree must satisfy the requirement in American History and Institutions by one of the following methods:

(1) Completing a year's course in American history or American government, or a one-year combination of both, in high school with an average grade of B or better, OR

(2) Completing any one of the following UCLA courses with a grade of C or better, or a grade of Passed:

Afro-American Studies M104A, M104B, M158A, M158B, M158C
Chicano Studies M159A, M159B
Economics 183
English 80, 85, M104A, M104B, 115A, 170, 171, 172, 173, 174, 176, 177
Geography 136
History 6A, 6B, 6C, 7A, 7B, 145A, 145B, 146A, 146B, 147A, 147B, 148A, 148B, 148C, 149A, 149B, 150A, 150B, 150C, 151A, 151B, 152A, 152B, 153, 154A, 154B, 154C, 154D, 155A, 155B, 156A, 156B, 156C, 156D, 156E, 157A, 157B, 157C, M158A, M158B, M158C, 158D, 158E, M159A, M159B, 160, 161, 162, 163
Political Science 1, 70, 114A, 114B, 143, 144, 145, 172A, 172B, 180, 186

Equivalent courses completed in University Extension or at another college institution, and accepted by the Board of Admissions, may be used to fulfill the requirement, OR

(3) Presenting a satisfactory result of the requirement, by examination, as administered at another college or university within the state, OR

(4) Scoring 500 or better on the College Entrance Examination Board (CEEB) Achievement Test in American History, OR

(5) Scoring 3, 4, or 5 on the CEEB Advanced Placement Test in American History.

Candidates for a teaching credential, but not for a degree, must take one of the following courses: History 7A, 7B, 151A, 151B, Political Science 172A, or 172B.

Students attending the University on an F-1 or J-1 visa may petition for exemption from this requirement by showing proof of temporary residence in the United States.

For more information on this requirement, contact the undergraduate History counselor in 6248 Bunche Hall (825-3720).

Course Credit and Minimum Scholarship

In acceptable courses, the grades A through C and Passed denote satisfactory progress toward the bachelor's degree. The grades C− through D− yield unit credit toward the degree but must be offset by grades of C+ or better in other courses.

In order to qualify for a bachelor's degree in any college or school at UCLA, you must earn at least a C (2.0) average in all courses taken at any University of California campus. If you fail to maintain this level, you may be placed on academic probation or may become subject to dismissal.

Academic Probation

You will be placed on probation if your overall grade-point average falls between 1.5 and 1.99 or if you do not earn at least a 2.0 GPA in any one quarter. While you are on probation, you may not take any course on a Passed/Not Passed basis, and you may have to limit your Study List to 12 units.

You may terminate probation at the end of a regular quarter if you have attained a C (2.0) average for the term and a cumulative C average in all University work. If you do not end probation within two quarters, you may become subject to dismissal from the University.

Academic Dismissal

You will be subject to dismissal from the University under any of the following conditions:

(1) If your grade-point average in any one quarter is less than 1.5, OR

(2) If you do not earn at least a C (2.0) average in any quarter when you are on probation, OR

(3) If you do not end probation within two quarters.

Note: In some colleges and schools, you may be subject to disqualification for failing to meet minimum progress requirements. Check with your college or school counselor.

If you are subject to dismissal, your transcript will carry the notation "Academic Probation, Continuance Subject to Dean's Approval." You should make an appointment with your college or school counselor. Depending on your situation, you will be given conditions for continuation, or you will be dismissed from the University.

Your college or school counselor can explain the conditions for readmission if you wish to return to the University after dismissal (see "Readmission" earlier in this chapter).

Progress Toward the Bachelor's Degree

UCLA is a full-time educational institution, and students are expected to complete their undergraduate degree requirements and graduate within four years. Maintaining the recommended study load will enhance your learning experience and the coherence of your studies.

The normal program for undergraduate students is three to four courses (12 to 16 units) per quarter; colleges and schools enforce minimum enrollment or minimum progress regulations. Please read the degree requirements section under each college and school for specific Study List limits. See Chapter 4 for information on concurrent enrollment, credit by examination and credit from other institutions, and special studies (199) course limitations.

Academic Resources and Assistance

Alternative Academics

UCLA has a broad range of options that can lend an added dimension to your undergraduate academic program. You will find other services and programs available to both graduate students and undergraduates in Chapter 1 of this catalog.

Council on Educational Development

The Council on Educational Development (CED) offers special courses and programs that encourage educational diversity and enrichment for undergraduates. CED works closely with colleges, schools, and research centers on campus to support new academic programs and courses. Many of these courses cover socially important issues which, because they are new, are not taught in existing academic departments. Many involve nontraditional educational concepts, interdisciplinary topics, and subjects on the leading edge of faculty interest.

Each quarter several courses focus on medicine, law, and human values. Students analyze ethical, legal, and scientific values in medical and mental health care issues, such as genetic screening, human experimentation, patients' rights, and medical technology.

For information about CED courses, consult the *Schedule of Classes*. Your college, school, or department can advise you about degree credit for CED courses. The office is located in 80 Powell Library (825-5467).

EXPO Center

The Extramural Programs and Opportunities (EXPO) Center offers access to a wide variety of off-campus learning experiences. For more information on any of the programs or services listed below, contact the EXPO Center, A213 Ackerman Union (825-0831).

Government Internship Program — More than 2,700 UCLA students have learned about the inner workings of government while serving in this program, the largest of its kind in any university in the nation. Bruins serve full-time internships for one or more quarters on the staffs of elected officials, public interest groups, and government agencies in Sacramento, Washington, and overseas. Others are participating in business, banking, and the arts in New York and San Francisco. The positions carry a small stipend.

International Opportunity Counseling Service — The EXPO Center counsels students on study, travel, and work opportunities outside the United States, offering information on some 1,800 overseas study programs open to UCLA students. EXPO also maintains a library of current materials related to study and travel opportunities abroad. International Student Identity Cards and Youth Hostel memberships are issued at the center.

Volunteer Income Tax Assistance Program (VITA) — Each winter the VITA program provides free income tax aid to UCLA students and a variety of disadvantaged people off campus. Student volunteers receive extensive training by the IRS in preparing tax returns and tax counseling.

Field Studies Development

Field Studies Development, a division of the Office of Instructional Development, helps students, faculty, and academic departments to develop meaningful learning experiences outside the classroom. These may be in the form of internships, field studies or research, community service, or cooperative education programs. The office is located in 70 Powell Library (825-7867).

Departmental Field Studies Development — Coherent field programs for academic credit have been developed in anthropology, business and administration, Chicano studies, communication studies, English, geography, history, kinesiology, political science, psychology, sociology, and women's studies. Departmental coordinators work with you to develop field projects and find placements and academic sponsors.

Independent Field Studies — You may design internships and field study opportunities to meet your specific academic, personal, and career goals. A field study coordinator helps you with your plans on a one-to-one basis and helps arrange academic credit for an appropriate field studies project.

Developmental Disabilities Immersion Program (DDIP) — Cosponsored by Field Studies Development and the Departments of Psychology and Psychiatry, DDIP offers an intensive living, studying, and working experience in developmental disabilities. One session is offered each year during Winter and Spring Quarters. For more information, call 825-1627.

Freshman and Sophomore Programs

Honors Collegium

The Honors Collegium is an innovative educational alternative designed primarily for UCLA's promising freshmen and sophomores. For a complete description of this program, see Chapter 5 on the College of Letters and Science.

Professional Schools Seminar Program

This program offers seminars that explore topics bridging various academic disciplines and professional practice. Students seeking to define their own academic and career goals will gain valuable exposure to (1) research frontiers in the professions, (2) policy and ethical issues, and (3) historical and sociological perspectives on professional practice.

Seminars are offered in the Fall, Winter, and Spring Quarters. Enrollment is limited to allow students close contact with professional school faculty members; lower division students are preferred. For further information, contact the Program Office in 80 Powell Library (825-5467).

Individual Classes

Most departments offer the individual study (199) course for seniors — or juniors with at least a B average — who want to pursue a particular research interest. Consult your department or the departmental listings in this catalog for further information.

Individual Majors

Highly motivated students who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit.

The requirements for an individual major vary with each college and school at UCLA, although maintaining a high scholastic average is usually mandatory. Please refer to the appropriate college or school chapter.

Reserve Officer Training Corps (ROTC)

The University of California, in accordance with the National Defense Act of 1920 and with the concurrence of The Regents, offers courses and programs in military training. This voluntary training allows you to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing your college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). Equipment, uniforms, and textbooks are provided. The programs carry a monthly stipend in the junior and senior years, and additional financial aid is available to qualified students. Individual programs are described in detail in Chapter 5 on the College of Letters and Science.

Student Research Program (SRP)

The Student Research Program is designed to provide UCLA undergraduates with opportunities to work with senior faculty on research projects. You select a faculty sponsor and the two of you agree on a contract detailing the nature of your work and the specific research tasks to be completed. Your involvement can be either voluntary or, in some instances, for academic credit through an individual special studies 199 course. In addition, you will be eligible to have "Student Research Program" and a designation of the research department appear on your transcript.

All undergraduates in good academic standing are eligible to participate. Research opportunities exist in most academic departments within the College of Letters and Science. For further information, contact the SRP Office in A316 Murphy Hall (825-6443).

Advising and Academic Assistance

UCLA's academic standards are high, and many students find they need some form of academic assistance. Help is available in several forms: staff and student counselors, faculty advisers, services, and special programs. You need only to seek it out. This section will introduce you to the many kinds of assistance available to undergraduates. Refer to the section on "Student Services" in Chapter 1 for other helpful programs.

College and School Advisers

Each college, school, and academic department at UCLA has a staff of academic counselors and advisers who are knowledgeable and experienced. They are eager to help you plan your academic program, monitor your progress toward the bachelor's degree, provide information about college and major requirements and prerequisites, and assist you with academic problems, improving study habits, and program planning. Counseling offices for each undergraduate college and school are listed below.

College of Letters and Science — A316 Murphy Hall, 825-1965 or 825-3382 (**Division of Honors** — A311 Murphy Hall, 825-1553 or 825-3786)

College of Fine Arts — A239 Murphy Hall, 825-9705

School of Engineering and Applied Science — 6426 Boelter Hall, 825-2826

School of Nursing — 2-200 Louis Factor Building, 825-7181

Counseling Assistants

Counseling assistants (CAs) are UCLA graduate students who have been specially trained to help new students with the transition into University life. Although employed in the College of Letters and Science, they represent a number of academic disciplines in several colleges and schools on campus. CAs help new students during Orientation with program planning and course selection, and are available throughout the year for follow-up visits and to provide help with program planning, skill building, and personal support. You may make an appointment with a CA in A316 Murphy Hall (206-6681).

ASK Peer Counselors

The ASK program provides an extension to the counseling services available to College of Letters and Science undergraduates. ASK counselors are students trained to provide you with academic information, advisement, and referral in a convenient walk-up setting.

You can find ASK counselors at these outdoor campus locations: Campbell Hall (southwest corner), Placement and Career Planning Center, Powell Library (southeast corner), and Royce/Powell Quad, weekdays 10 a.m. to 2 p.m.; Murphy Hall and Schoenberg Hall, weekdays 9 a.m. to 3 p.m. During registration week every quarter ASK counselors also are available from 8 a.m. to 5 p.m. daily in the computer room and Grand Ballroom in Ackerman Union.

Preparatory Programs for New Students

The Office of Preparatory Programs, located in A316 Murphy Hall (206-1217), administers six important programs to help new students adjust and succeed academically at UCLA: Orientation, Freshman Summer Program, Transfer Summer Program, Academic Advancement Program, ARC Math/Sciences Tutorials, and ARC Composition Tutoring Lab and ESL Service Courses Tutorials. Since most of the courses which new students take are offered by the College of Letters and Science, the Office of Preparatory Programs is a part of that academic unit; however, the programs are open to new students enrolled in any college or school on campus.

Orientation

Orientation at UCLA provides a comprehensive introduction to campus life. During the summer and before the beginning of the Winter and Spring Quarters, special programs offer new undergraduates extensive academic counseling and educational planning. During Orientation you work in small groups with peer counselors. You gain insight into necessary academic skills, learn how to plan and construct your academic program, and become familiar with the educational opportunities, student services, and facilities available at UCLA. Individual counseling sessions help you adjust to University life and fulfill the advising requirements of some colleges and schools. Sessions for parents are also offered.

During the summer, Orientation offers three-day, two-night dormitory live-in programs for freshmen and both three-day, two-night and two-day, one-night programs for transfer students. Prior to the Winter and Spring Quarters, one-day on-campus programs are offered. There is a fee for participation. For more information, contact the Orientation Office in A316 Murphy Hall (206-6685).

Freshman Summer Program (FSP)

The Freshman Summer Program is a seven-week instructional program designed to help entering freshmen meet UCLA's high academic standards by improving composition, mathematical, and general learning skills.

Several hundred new freshmen get a head start every summer through the program's classroom instruction, tutorials, and academic advising workshops held for four hours each day. Special English courses — English A and B — help students improve writing skills and meet the University's initial composition requirement. The program's math courses prepare students for subsequent university-level math courses — including calculus — required for many majors at UCLA. Moreover, students receive guidance on academic planning and are assured enrollment in Fall Quarter classes.

FSP offers a firsthand introduction to UCLA. You can live in the residence halls (optional), take part in academic and personal counseling sessions, and generally get to know the campus and its facilities. The application fee is $10; if you have applied and are eligible for financial aid, there are no additional registration or tuition fees. (If you are not financial aid-eligible, you will have to pay a portion of the program's expense.) Other program costs are relatively low. You are eligible for the program if you have scored below 600 on the CEEB English Achievement Test and/or below 530 on the SAT Math, and if you have not taken advanced placement calculus. For more information, contact the Freshman Summer Program Office in 2235 Campbell Hall (206-1585).

Transfer Summer Program (TSP)

The Transfer Summer Program is an intensive seven-week instructional program to improve the composition and general learning skills of new transfer students. Its goal is to prepare such students for UCLA through approximately 16 hours per week of classroom instruction, tutorial assistance, and workshops.

The Transfer Summer Program consists of combinations of a composition course and an upper division course which, if completed successfully, yield credit toward your bachelor's degree. You have the option of residence hall living (strongly recommended) or commuter status; cultural, social, recreational activities, and counseling are available to help you adjust to UCLA. Academic advising sessions will help you plan — and guarantee your enrollment in — Fall Quarter classes. The application fee is $10; if you have applied and are eligible for financial aid, there are no additional registration or tuition fees. (If you are not financial aid-eligible, you will have to pay a portion of the program's expense.) Other program costs are relatively low.

For details on TSP, contact the Transfer Summer Program Office in 2235 Campbell Hall (206-1586).

Academic Advancement Program

The Academic Advancement Program (AAP), formerly EOP, is the primary student affirmative action program at UCLA. AAP provides academic and personal support each year to approximately 4,600 students from low-income families and ethnic groups historically underrepresented at UCLA. Its major goals are to help these students adjust to the University and to increase the likelihood of their college graduation. Among its services are peer counseling for all new students, professional/academic/personal counseling, individual and group tutoring sessions, and seminars to prepare students for graduate school entrance examinations.

Applicants must meet regular University requirements for undergraduate admission and must be U.S. citizens or permanent residents who are also residents of California (American Indians excepted). For more information, contact the AAP Office in 1209 Campbell Hall (825-1481).

ARC Math/Sciences Tutorials

The Academic Resources Center Math/Sciences Tutorials (3973 Math Sciences) provide an organized by-appointment tutorial program for most math courses between Mathematics A and 32A, Chemistry 2, 11A, and 11B, Physics 6A, 6B, 8A, 8B, and 10, and Biology 2 and 5. Trained tutors meet in small group sessions on a weekly basis, teaching methods to improve problem-solving skills and test-taking strategies. Requests for tutors must be made during the first four weeks of the quarter; early registration is advised.

For math and science courses not served by the appointment tutorials and for additional help with specific problems, the Math/Sciences Tutorials also coordinate a drop-in tutorial facility in 3970 and 3974 Math Sciences.

ARC Composition Tutoring Lab and ESL Service Courses Tutorials

The Academic Resources Center Composition Tutoring Lab, developed in collaboration with the UCLA Writing Programs, provides individual assistance to students enrolled in English A, B, and 3 and, as available, to students writing for other UCLA courses. The lab is staffed by trained undergraduate peer tutors who have shown outstanding ability in advanced composition courses.

The ARC ESL Service Courses Tutorials assist nonnative-speaking students with English grammar, idiom, pronunciation, and listening comprehension. Priority is given to students enrolled in English (ESL) 33A, 33B, and 33C, and other ESL courses. The tutors are all graduate students in the ESL Section.

Both of these services are located in 339 Kinsey Hall. For tutoring appointments and further information, call 206-1491.

Learning Resource Centers (LRC)

The Learning Resource Centers include the Language Laboratory, the Multimedia Learning Laboratory, and the Instructional Media Library. All of these resources rely on the new information technologies to help you improve academic skills, augment traditional classroom instruction, and enrich your educational experiences. For general information, contact the LRC Office in 46 Powell Library (206-1248).

Language Laboratory — Students enrolled in foreign language classes are assigned by faculty to practice pronunciation and comprehension skills in the laboratory, 190 Powell Library (206-8855). Audiotape programs which accompany specific texts used in classes and listening, recording, and monitoring equipment are available.

Multimedia Learning Laboratory — Today many academic programs in the sciences, arts, and humanities depend on materials that are available only in video or audio formats or as computer software. You can use these resources at your own pace in the Multimedia Learning Laboratory located in 290 Powell Library (206-1211). The noncirculating collection includes materials placed on reserve by faculty and assigned for independent study, as well as materials designed to help you develop a wide range of learning skills.

Instructional Media Library maintains a large collection of educational films, videotapes, and slide/tape modules which it lends to regularly scheduled UCLA classes and campus organizations. Reference books and catalogs from educational and feature film distributors are avaiable. The library staff offers assistance in researching films on any subject and obtaining materials from outside sources. Two preview rooms, located in 46 Powell Library, are available by appointment (825-0755).

Petitions

A petition is a piece of paper representing your need or desire to be excepted from any standard rule or regulation in the University. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whoever has authority over your particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between you, your college or school and, in some cases, the department chair, granting you an exception from the existing regulations.

Petitions are also used at UCLA to change your college or major, take more or fewer units than regulations permit, make late changes to your Study List, remove an Incomplete grade, or obtain credit by examination. In addition, you may petition for concurrent enrollment, double major, or waiver of scholarship requirements. Petitions for most of these exceptions are available from your college or school or department.

Academic Excellence

Eligible students receive the following honors and awards in recognition of academic achievement.

Dean's Honors List

The Colleges of Letters and Science and Fine Arts, and the School of Engineering and Applied Science, all award Dean's Honors to deserving students each quarter. The School of Nursing awards Dean's Honors on an annual basis. These honors are based on the grade-point average attained within a specified number of units. Consult your college or school for further information.

Honors with the Bachelor's Degree

Your college or school awards graduation honors according to your overall GPA at the beginning of your last quarter of academic work or at graduation. To be eligible, you must have completed at least 90 University of California units for a letter grade.

The levels of honors are *Summa cum laude, Magna cum laude,* and *Cum laude*. Specific requirements vary for each level and are included in the appropriate college and school chapters.

Departmental Honors

In all campus units except the School of Engineering and Applied Science, departmental honors and highest honors are awarded at graduation on your major department's recommendation, based on successful completion of a departmental honors program. Consult your department for its requirements.

Departmental Scholar Program

Departments may nominate exceptionally promising juniors and seniors as Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. Nominations are submitted to the college or school dean or provost for recommendation to the dean of the Graduate Division. If you are interested in becoming a Departmental Scholar, consult your department well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog).

Honor Societies

Alpha Lambda Delta and Phi Eta Sigma

Membership in these national freshman honor societies is based solely on academic achievement during your freshman year. To be eligible you must have a 3.5 GPA with 12 graded University of California units in the first quarter of your freshman year, or a cumulative 3.5 GPA at the end of the second and/or third quarters. Invitations are issued in Winter Quarter, and initiation is held during Spring Quarter. For more information, contact the Dean of Students Office, 2224 Murphy Hall (825-3871).

Mortar Board

Mortar Board is a national honor society for college seniors which recognizes scholastic ability (a 3.0 GPA is required), outstanding and continual leadership, and dedicated service to the community. Membership applications are available in the Dean of Students Office, 2224 Murphy Hall (825-3871), during Winter Quarter.

Phi Beta Kappa

Phi Beta Kappa is a national honorary society in the humanities, founded at the College of William and Mary in 1776. Membership is conferred for high scholastic standing and is determined by vote of the chapter council according to scholarship records. (Students do **not** apply for Phi Beta Kappa membership.)

At UCLA only graduating seniors are elected to membership. The annual election is held in May, with the initiation in June. At present, the minimum GPA considered is 3.65 (for 140 or more UC units); the minimum number of UC units considered is 75 (students at the 75-unit level must have at least a 3.85 GPA). A reasonable distribution of courses in the humanities and sciences is also required. (A Passed grade is computed approximately as a B, depending on number of courses taken and graded units.) If you are elected, you will be notified by mail. For more information, contact the Phi Beta Kappa Office, Division of Honors, A311 Murphy Hall (825-0192).

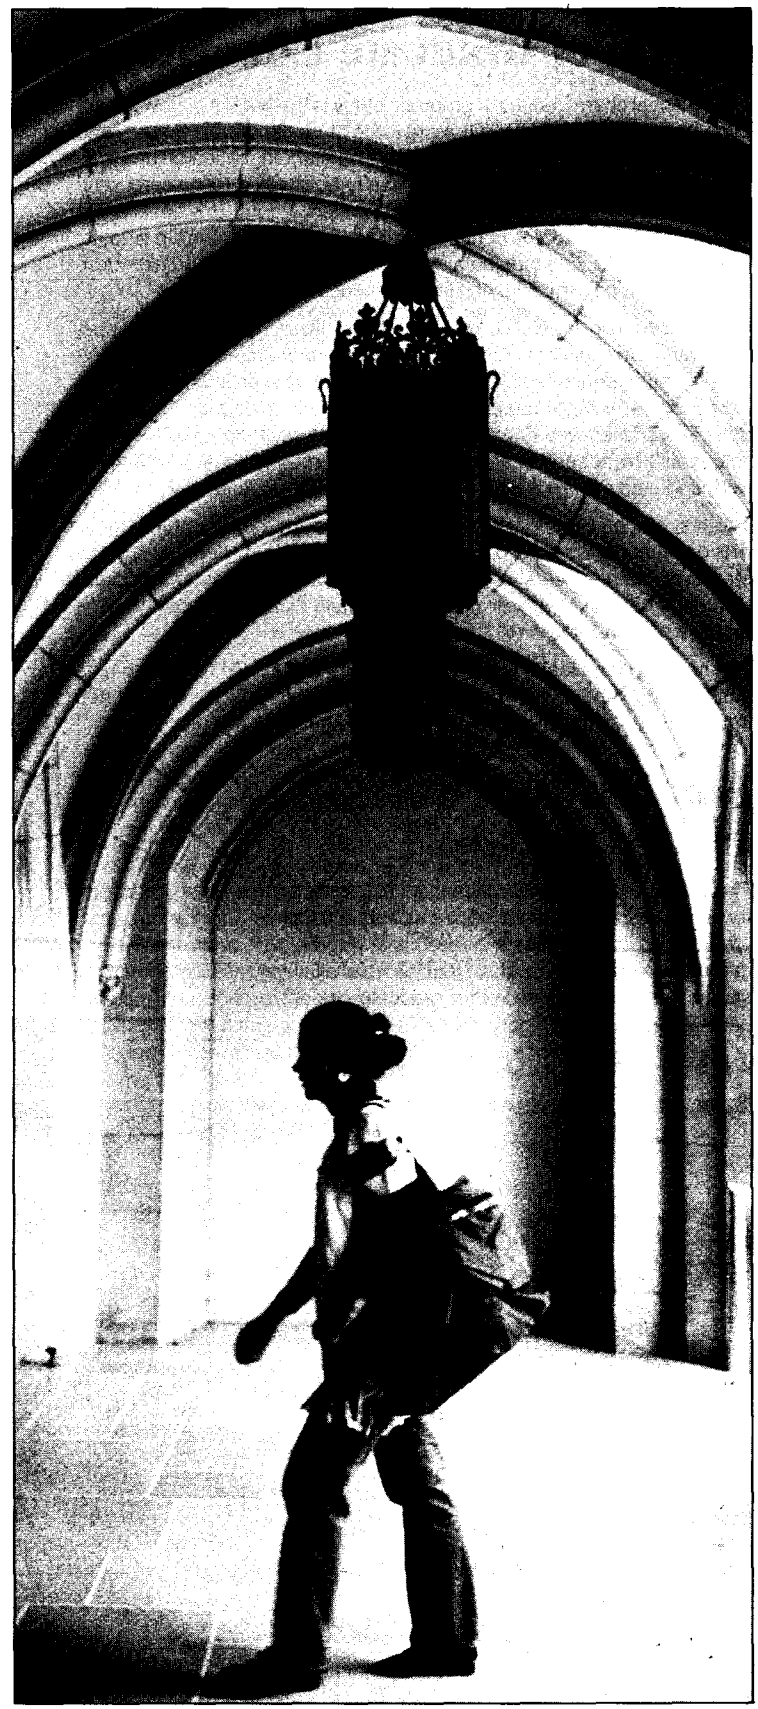
Outstanding Senior Award

The Outstanding Senior Award offers recognition to graduating seniors who have demonstrated scholastic excellence, creativity in the department, and service to the University and community. Nominations are accepted during Fall Quarter, and awards are presented at the annual Alumni Awards Ceremony in June. For more information, contact the UCLA Alumni Association in the James E. West Center, 325 Westwood Plaza (825-3901).

Graduate Study

Victoria A. Fromkin
Dean of the Graduate Division,
Vice Chancellor — Graduate Programs

3



Nature of Graduate Education

The principal characteristic of graduate study is the pursuit of new knowledge through research. At UCLA graduate students benefit from — and contribute to —the resources of one of the outstanding research universities in the country. A distinguished faculty committed to research and teaching, an extensive library system ranked among the best in the nation, excellent research centers, institutes, and laboratories in virtually every major discipline (see details in Chapter 1) all provide an extraordinary scope of opportunities for graduate endeavor.

Graduate training at UCLA takes place in the classroom, the laboratories, the libraries, in specialized seminars, through independent research, and in teaching experiences. As a graduate student, your education is enriched by the several hundred postdoctoral and visiting scholars from other universities who engage in research and teaching at UCLA every year. This unique research environment promotes the quality of original work and study which is the hallmark of graduate education.

The first stage of graduate education leads to the degree of Master of Arts or Master of Science, or one of several professional degrees such as Master of Business Administration or Juris Doctor. The master's program is intended to develop your mastery of a field and prepare you for the practice of a profession.

The second stage leads to a doctoral degree (Ph.D., Ed.D., etc.) and is designed to prepare you for creative activity and original research, often in association with college or university teaching.

Administration

The Graduate Division

The UCLA Graduate Division is responsible for administering policy established by the Academic Senate's Graduate Council for master's, doctoral, and certain graduate professional degree programs. It oversees graduate recruitment and admissions, fellowships, teaching and research assistantships and other graduate student support, affirmative action, and the maintenance of high quality standards in all UCLA graduate programs. The dean of the Graduate Division also serves as vice chancellor — graduate programs.

The Graduate Council

The Graduate Council is a standing committee of the UCLA Academic Senate. In keeping with the University's philosophy of shared governance, it establishes policy for graduate education at UCLA, including requirements, standards for admission, and graduate degree programs. It also makes recommendations regarding fellowships and apprentice personnel. A major responsibility of the Graduate Council is the periodic review and evaluation of all graduate programs.

The Graduate Adviser

After admission to a department, program, or school, each graduate student is assigned a graduate adviser who approves Official Study Lists and assists the student in program planning and completing degree requirements. The graduate adviser is available for counseling whenever needed, but departments usually require at least one student consultation each quarter. When the master's or doctoral committee is established, the faculty chair of that committee often assumes the adviser's role.

Graduate Students Association (GSA)

The Graduate Students Association is the official organization representing the interests of UCLA graduate students in academic, administrative, campus, and statewide areas. GSA appoints or elects graduate student members to important campus organizations and committees, including the ASUCLA Board of Control and the Student Fee Advisory Committee, as well as to departmental student organizations and committees of the Academic Senate. In addition, GSA sponsors various graduate student journals, programs, and social events, including Melnitz Movies (UCLA student film program) and publication of the monthly GSA newsletter, *Grad Voice*. The GSA Office is located in 301 Kerckhoff Hall (206-8512).

Graduate Admission

Information:
Graduate Admissions Office
1247 Murphy Hall
(213) 825-1711

Admission Requirements

U.S. applicants to graduate standing must hold a bachelor's degree from a regionally accredited institution comparable in standard and content to that awarded at the University of California. A scholastic average of B or better (or its equivalent if the letter grade system is not used) is required in the last two years of undergraduate coursework and in any postbaccalaureate study.

International applicants who have completed their postsecondary education outside the U.S. are expected to hold a degree, with above average scholarship, from a non-U.S. university or university-level institution. If your examinations have been graded Excellent, Very Good, Good, and Pass, you must have at least a Very Good general rating to qualify for admission. Students who hold a three-year ordinary or pass degree, or who hold a professional diploma in accounting, business, librarianship, social work, physical education, health education, etc., or a four-year degree, diploma, or higher certificate from a technical, vocational, or postsecondary specialized school, *should not apply for graduate admission.* Persons with memberships in professional associations such as Institutes of Chartered Accountants, the Institute of Chartered Secretaries and Administrators, etc., also do not qualify for graduate admission.

Meeting the minimum requirements does not ensure graduate admission, which is limited by the number of places available in UCLA's schools, colleges, and departments. Applications are evaluated in terms of scholastic qualifications and formal preparation for the graduate field of study. Departments may have special requirements for admission, which are included under individual departmental listings in this catalog.

Applying for Admission

Graduate students at UCLA must submit the *Application for Graduate Admission, Fellowship and Financial Aid* to the Graduate Division. You may obtain this form, in person or by mail, from your prospective school or department.

Applications are generally accepted for Fall, Winter, and Spring Quarters, although some departments limit admission to Fall Quarter due to course sequencing. Such restrictions are stated in this catalog's departmental listings and in the application packet. Enrollment in Summer Sessions courses does not constitute admission to graduate standing.

Applications and supporting papers should be on file in the Graduate Admissions Office by the following dates:

October 1, 1986, for Winter Quarter 1987
December 31, 1986, for Spring Quarter 1987
January 14, 1987, for Fall Quarter 1987

Applications postmarked after these dates will be considered only when enrollment and funding limitations permit.

Supporting papers and materials to be submitted, including official transcripts of record and a $35 nonrefundable application fee, are specified in the application packet. Unless the $35 fee was paid at another UC campus, applications received without the fee will not be processed. Submitted materials are not returnable.

Graduate Record Examination — If you are applying for admission to a department or school which requires Graduate Record Examination (GRE) scores, you should arrange to take the examination no later than February so your scores arrive on time. **GRE scores should be sent directly to your prospective department and not to the Graduate Division.**

1986-87 GRE Test Dates

October 11, 1986	February 7, 1987
December 13, 1986	April 11, 1987
June 6, 1987 (general only)	

GRE applications and information are available from offices of the Educational Testing Service, either at CN 6000, Princeton, NJ 08541-6000, or at 1947 Center Street, Berkeley, CA 94704. For information on GRE Fee Waivers, write to the Associate Program Director at the New Jersey address.

Letters of Recommendation — Most graduate professional schools, departments, and interdepartmental programs at UCLA require applicants to submit three letters of recommendation. Letters typically augment, validate, or explain information provided in the application and should be written by people qualified to analyze your abilities and academic promise. In some cases, these letters may mean the difference between acceptance and rejection. Letters should be sent directly to the prospective department. Forms to be used are included in the application packet.

International Applicants

Applicants who have credentials from universities and colleges in foreign countries should submit applications at least two months before the dates listed above. International applicants should have an academic degree or professional title and will be evaluated on the basis of grades (marks) and class or rank achieved. You should submit official transcripts of record, in duplicate, for all college and university work. Specific instructions are given in the application packet.

Proficiency in English

Test of English as a Foreign Language (TOEFL) — International students who hold a bachelor's or higher degree from a university in which English is the spoken tongue and the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from both the TOEFL and the UCLA English as a Second Language Placement Examination (ESLPE). *All other applicants* must take and pass the TOEFL, administered by the Educational Testing Service in some 95 foreign centers. Applications are available from the Educational Testing Service, CN 6000, Princeton, NJ 08541-6000.

UCLA English as a Second Language Placement Examination (ESLPE) — If your native language is not English, you are required to take the UCLA ESLPE (in addition to the TOEFL) before the term in which you are to register, even if you have received transfer credit for an acceptable college-level course in English composition at another institution. Depending on your ESLPE results, you may have to complete one

(continued on page 44)

Graduate Majors and Degrees

MAJORS	DEGREES	OTHER

*The department admits only applicants whose objective is the Ph.D.

or more courses in the English (ESL) 33A through 33C series, beginning in your first quarter in residence at UCLA. These courses must be passed with a grade of C or better. You should expect to spend a longer period of time at the University than would normally be necessary to complete a degree program if you are required to take any ESL courses. If you do not pass the ESLPE, your admission is deferred until you have acquired the necessary proficiency in English. Neither the Test of English as a Foreign Language (TOEFL) nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE.

Test of Spoken English — If you are an international student and wish an appointment as a teaching assistant, you should take the Test of Spoken English offered at the TOEFL Center in your home country.

No Degree Objective

UCLA has no special graduate, limited, or unclassified categories of admission. Under some circumstances, however, applicants may be admitted for coursework without a degree objective. Teachers with a master's degree who wish some refresher study, or international students on a year's stay in the United States, may wish to apply in this manner. Requirements for admission are the same as those for degree programs.

Duplication of Degrees

The University of California, in general, discourages the duplication of advanced degrees. At the same time, it recognizes that a professional degree does not duplicate an academic one, and that pressing needs may exist for degrees in different areas (see "Concurrent and Articulated Degree Programs" later in this chapter). If you are applying for a second academic degree at the same level or lower than the one you already hold, you are required to show compelling cause to the department. All degree requirements and University regulations apply just as they do for a first degree. Courses already applied to the earlier degree may not be applied to the second.

Summer Sessions Courses

Enrollment in Summer Sessions courses does not constitute admission to graduate standing, nor does it substitute for the required continuous registration in Fall, Winter, and Spring Quarters. If you wish to apply Summer Sessions courses to your subsequent graduate program, you should consult in advance with your departmental adviser. This is also true if you have been readmitted to graduate standing and you wish to resume graduate study in Summer Sessions. Information and applications are available from the Office of Summer Sessions, 1254 Murphy Hall (100 Dodd Hall after October 1, 1986). Also refer to the sections on "Academic Residence" and "Transfer of Credit" later in this chapter.

Renewal of Application

An offer of admission is valid for a specific quarter only. If you were not admitted, or failed to register in the quarter for which you were first accepted, you should file a Renewal of Application form for admission to a later quarter. Forms are available from the departments and should be submitted to the Graduate Admissions Office, 1247 Murphy Hall. Filing dates are the same as those for new applications. Forms should be accompanied by official transcripts, in duplicate, of any graduate work completed since the former application and by a $35 application fee.

You may file only one Renewal of Application without the $35 fee. Acceptance for admission at any earlier date does not guarantee approval of the renewal. Since application records are kept no longer than two years, you may apply for admission after this period only by completing a new application and providing all necessary documents.

Readmission

Students who are granted a formal leave of absence (see "Leaving UCLA" in Chapter 4) do not have to apply for readmission if they resume their graduate work in accordance with the terms of their leaves. All other continuing graduate students who fail to register for any regular session, or who fail to complete a quarter through cancellation or withdrawal, must compete for readmission with new applicants.

If you have registered at any time as a graduate student at UCLA and are returning after an absence (except a formal leave of absence), you must file an Application for Readmission. Forms are available from the departments and should be submitted to the Graduate Admissions Office, 1247 Murphy Hall. The following materials must accompany the Application for Readmission:

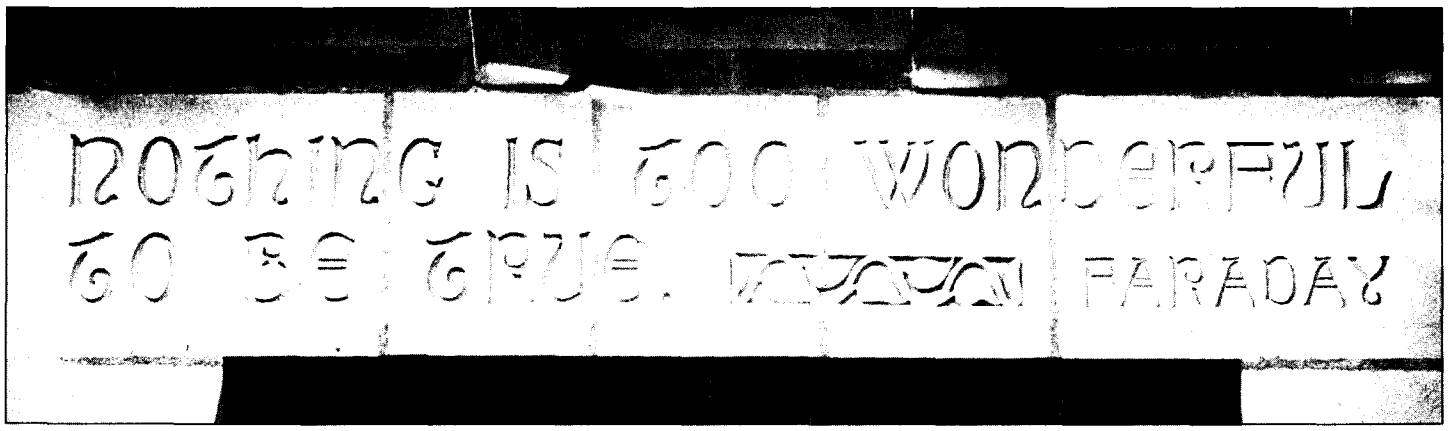
(1) A check or money order for $35 (nonrefundable) made payable to The Regents of the University of California.

(2) Official transcripts of record, in duplicate, for all graduate work completed since your last registration at UCLA. If you are returning to UCLA after more than 10 years, submit transcripts of all academic work previously submitted.

(3) The Graduate Petition for Change of Major, if appropriate. (If you are reapplying in a new major, request this form along with the Application for Readmission.)

Admission to the Schools of Dentistry, Law, and Medicine

Applicants for M.S. and Ph.D. programs in departments of the School of Medicine or Dentistry should apply for admission to the Graduate Division as described above. For admission to D.D.S., J.D., and M.D. degree programs in the Schools of Dentistry, Law, and Medicine, write to the respective schools for their announcement booklets and for information and application procedures.



Registration and Enrollment

Information:
Registrar's Office
1134 Murphy Hall
(213) 825-1091

Detailed information on registration (fee payment) and enrollment procedures is contained in the quarterly *Schedule of Classes*, available for purchase at the Students' Store several weeks before the beginning of each quarter. To obtain a copy by mail, write to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024, Attn: Mail Out. Include a check or money order for $2 payable to ASUCLA.

Registration consists of paying fees and enrolling in classes. The Registration Form, issued by the Registrar, is used for paying fees and for requesting enrollment in classes. You must complete both processes by the established deadlines to be officially registered and enrolled for the quarter.

Registration may be accomplished by mail or in person. You may use a combination of both processes to pay fees and enroll in classes, but **all eligible students are encouraged to register by mail or use the Cashier's Drop Slot.** It will save you the time and trouble of waiting in line.

Last Mailing Dates

(Tentative only; refer to the *Schedule of Classes* for firm dates)

To Register (Pay Fees) by Mail:
August 29 for Fall Quarter 1986
December 12 for Winter Quarter 1987
March 13 for Spring Quarter 1987

To Enroll in Classes by Mail:
August 29 for Fall Quarter 1986
November 19 for Winter Quarter 1987
February 27 for Spring Quarter 1987

Enrollment in Classes

Enrollment requests are processed from the completed Study List Request portion of the Registration Form. To be enrolled for credit, you must complete the request, obtain your adviser's signature approval, and file it with your major department by the tenth day of classes (there is a $50 fee for late filing of the Study List).

You are guaranteed enrollment in courses in your major department provided that department is coded correctly on your Study List Request. If you have recently changed majors and your Study List Request is incorrect, you need proof that the Graduate Division has approved the change. For guaranteed enrollment in restricted or possibly closed courses outside your major department, you must submit an approved Permission to Enroll form with the Study List Request.

You may enroll in classes in person on certain days preceding the beginning of classes each quarter. Hours are 8:30 a.m. to 5 p.m. on the following days:

Enrollment in Classes in Person

September 23-26 for Fall Quarter 1986
December 4-6 for Winter Quarter 1987
March 12-14 for Spring Quarter 1987

Change of Major

Continuing graduate students may petition for a change of major after discussing plans with — and obtaining the acceptance of — the new department. Forms for this purpose are available from, and should be filed with, the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. Deadlines are generally the same as those for the graduate admissions procedure, but you should consult with the adviser in the new program before filing an application.

Full-Time Graduate Program

Three graduate courses (or 12 units) per quarter are considered the normal enrollment for graduate students. A minimum of eight units is required for full-time standing for all students, including teaching assistants, research assistants, and fellowship awardees.

Teaching and research assistants are required to take at least two courses per quarter, or the equivalent of eight units, throughout their appointments. Those assistants who take a leave of absence or withdraw, terminate their appointments. Course 375 for teaching assistants and independent studies at the 500 level may be included in reaching the eight-unit load.

Graduate students holding fellowships must be enrolled full-time students, both before and after advancement to candidacy. The two courses required per quarter may include, among others, the 500 series (individual study or research).

Veterans are required to make normal progress toward the degree as stated by the major department. Information on Veterans Administration regulations is available in the Office of Special Services/Veterans Affairs, A255 Murphy Hall.

Continuous Registration

Graduate students are normally required to register in all three quarters of each academic year, including the quarter in which their degrees or certificates are to be awarded. If you are granted a formal leave of absence or are eligible to pay the filing fee for a degree (see below), you are exempt from this requirement. You must be registered in order to use University facilities or to take any University examination except the master's comprehensive or doctoral final oral examination.

If you fail to register or to file for an official leave of absence by the end of the second week of instruction, you are assumed to have withdrawn from UCLA. You will then have to reapply and compete for readmission with all other graduate applicants if you wish to return to graduate study at UCLA.

Continuing graduate students studying or doing research outside California throughout a quarter may register "in absentia" and pay one-half the registration fee, plus all other fees in full. Petitions for the reduced fee are available from the department and from the Graduate Fellowship and Assistantship Section, 1228 Murphy Hall.

Registration in the Final Quarter for the Award of the Degree

(1) You must register in the final quarter in which the degree is to be conferred if you are (a) completing coursework, (b) using library or other University facilities, (c) taking up faculty time other than for a final reading of the thesis or dissertation or to administer the comprehensive or final examination, or (d) participating in the In-Candidacy Fee Offset Grant Program and were not registered the quarter immediately preceding the quarter in which your dissertation is filed. If you were not continuously registered or on leave of absence and you are required to register to receive your degree, you must apply for readmission.

(2) If only the thesis or dissertation and/or comprehensive or final examination remain to be completed in your final quarter, you may be eligible to pay the filing fee instead of registering (see below).

(3) If you were registered in the preceding quarter and have completed all degree requirements, including final examinations and filing your thesis/dissertation, during the interval between quarters and before the first day of instruction, you are not required to register (or pay the filing fee) to receive your degree at the end of the following quarter.

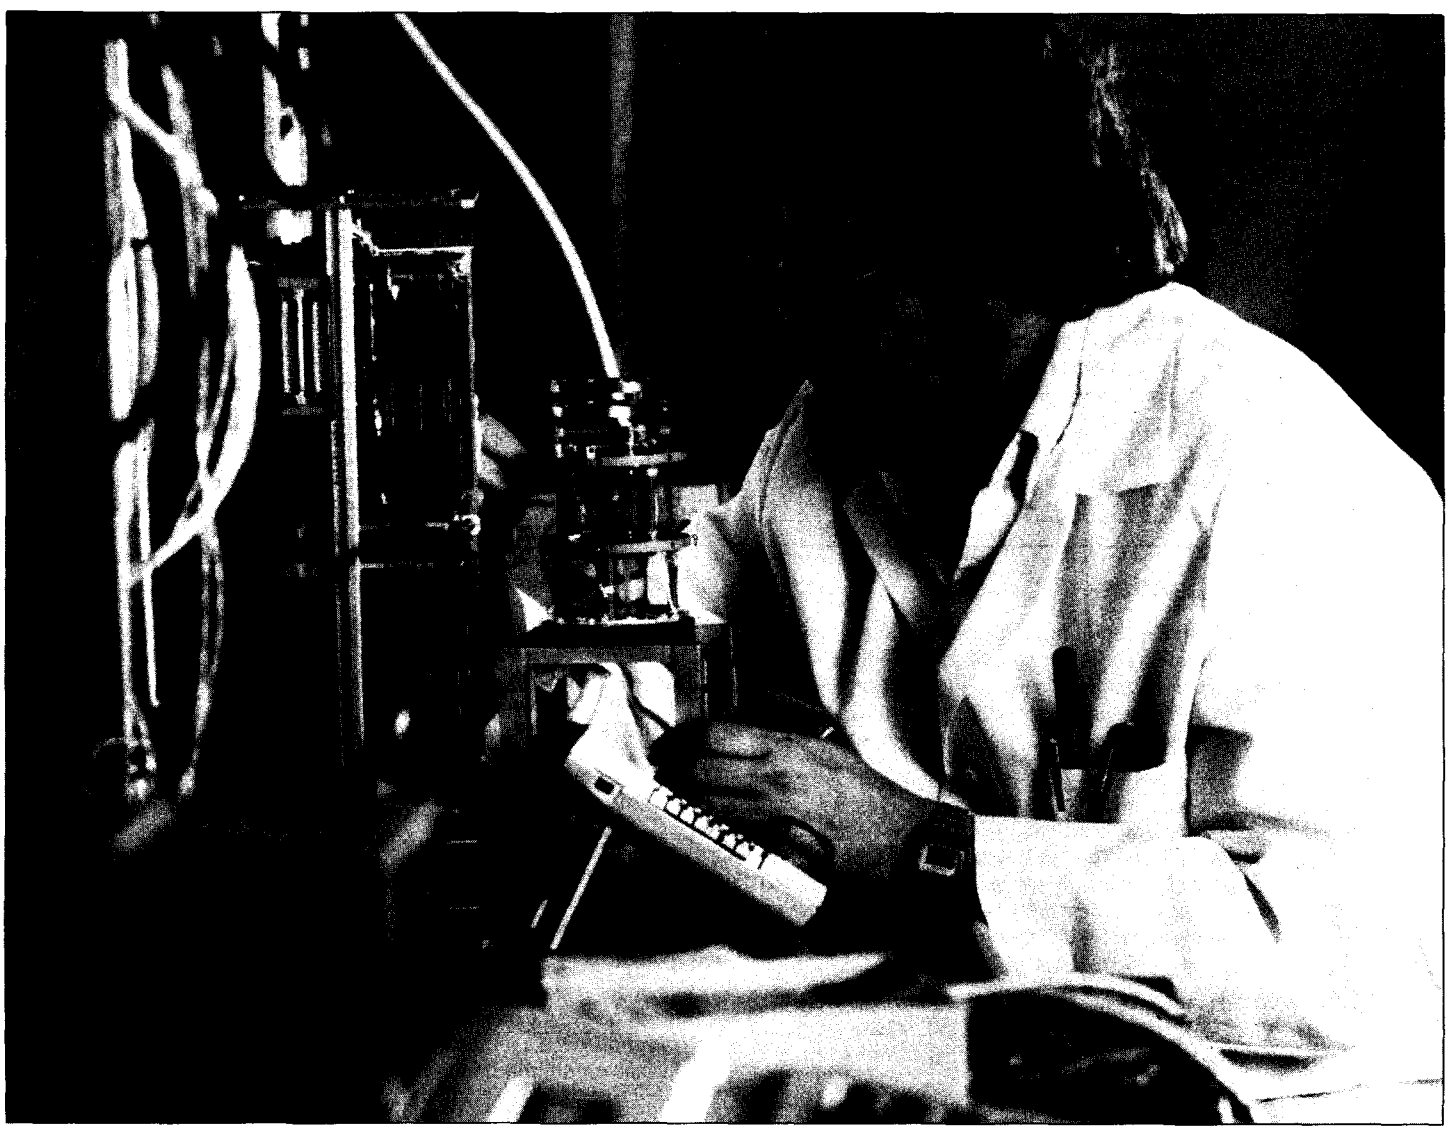
The Filing Fee

If you have completed all requirements for a degree except filing the thesis or dissertation and/or taking the master's comprehensive or doctoral final oral examination, you may be eligible to pay a filing fee of one-half the registration fee instead of registering and paying all required fees. Applications are available at the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. For eligibility conditions and further information on the filing fee and registration in the final quarter, please consult *Standards and Procedures for Graduate Study at UCLA,* available in 1225 Murphy Hall or in individual departments.

Health Evaluation

New students enrolling in the School of Dentistry, Education, Medicine, Nursing, or Social Welfare must complete and return to the Student Health Service the Health Evaluation form provided by their departments.

All new and reentering international students must obtain clearance in person at the Student Health Service by completing and returning a Health Evaluation form, by verifying adequate health insurance coverage, and by establishing absence of active tuberculosis. In addition, all international students must obtain an annual health insurance clearance each fall at the SHS Insurance Office. For information, call 825-4073.



Graduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA will vary according to your academic program, personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar's Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay tuition of $1,362 per quarter (for a full definition of residence and nonresidence, see the Appendix of this catalog).

At the time of registration each quarter, all graduate students (except Law School students*) must pay the following fixed fees. **Fees for Fall Quarter 1986 are current as of publication date but are subject to change without notice by The Regents.**

Quarterly Expenses, Fall 1986

University registration fee	$ 174
Education fee	261
Ackerman Student Union fee	4
Graduate Students Association (GSA) fee	5
Wooden Recreation Center fee	5
Total for California residents	**$ 449**
Nonresident tuition fee	$1,362
Total for nonresidents	**$1,811**

*Students in the School of Law should refer to that school's announcement for explanation of fees per semester.

Other Fees

Miscellaneous fees charged to UCLA graduate students include a $50 charge for late payment of registration fees or late filing of the Study List (after the tenth day of classes); $25 for advancement to doctoral candidacy; and $5 or less for most petitions and other special requests. A complete list of fees may be found in the *Schedule of Classes.*

Fee Refunds

Students who formally withdraw from the University during the first five weeks of instruction or take an approved leave of absence by the end of the second week of classes may receive partial refunds of fees. For the refund schedule and more information, see "Withdrawal" in Chapter 4 of this catalog or refer to the *Schedule of Classes.*

Nonresident Tuition Waivers

A limited number of nonresident tuition waivers are awarded each year to graduate students with distinguished academic records. Details of eligibility are available in your department or the Graduate Fellowship and Assistantship Section, 1228 Murphy Hall.

Lapse of Status

Your status may lapse if you fail to settle financial obligations when due (or make satisfactory arrangements with the Main Cashier if payment cannot be made) or if you fail to respond to official University notices.

With lapsed status you are not entitled to any University services except assistance toward reinstatement. After you have satisfied the obligation, a petition for reinstatement must be approved by the office recommending the lapse of status and filed with the Registrar's Office, 1111 Murphy Hall, with a $10 reinstatement fee.

Estimated Annual Budgets for California Residents

	Single, Commuter, Living at Parents' Home	Single, Living at UCLA Residence Hall, Co-Op, Sorority, or Fraternity	Single, Living in Off-Campus Apartment or House	Married, Living in UCLA Family Student Housing	Married, Living in Off-Campus Apartment or House
University Fees	$1,346	$1,346	$1,346	$1,346	$1,346
Books and Educational Supplies	675	675	675	675	675
Food and Rent	1,180	2,960	5,400	6,500	8,200
Transportation	600	100	400	400	400
Personal	949	1,549*	949	2,299	2,299
Total Budget	**$4,750**	**$6,630**	**$8,770**	**$11,220**	**$12,920**

*Includes $100 for extra meals during breaks.

For more information on housing, see Chapter 1 or contact the UCLA Community Housing Office in 100 Sproul Hall (825-4491).

Living Expenses

Printed on the previous page are the estimated yearly budgets for graduate California residents. Nonresidents must add the $4,086 annual tuition fee to their total expenses for an accurate estimate. Expenses cover the three regular session quarters of the 1986-87 academic year and do not include Summer Sessions. (Budgets for the Schools of Medicine, Dentistry, and Nursing are higher, reflecting the expense of specialized books and supplies; figures are available from your health professions counselor.)

Financial Support

Information:
Graduate Fellowship and Assistantship Section
1228 Murphy Hall
(213) 825-3521

As a major center for graduate study, UCLA offers its qualified graduate students substantial support through several types of financial assistance. Awards are based on either academic merit or financial need, but the two types are not mutually exclusive. You are strongly urged to apply in all categories for which you may qualify.

Entering graduate students interested in University-administered awards should complete the *Application for Graduate Admission, Fellowship and Financial Aid.* Readmitted students should request the Graduate Application for Readmission form, and continuing graduate students should complete the Fellowship and Assistantship Application for Continuing Students. Completed applications must be returned by **January 15.** (Some departments have earlier deadlines; consult the application packet for details.)

Graduate Student Support, a booklet describing the full range of financial assistance available, is published annually for continuing students by the Graduate Fellowship and Assistantship Section. Contact your department for more detailed information.

Awards Based on Academic Merit

The University administers several awards on the basis of scholarly achievement. Most awards are available in open competition, though some are restricted to new students or to specific departments. Some fellowship and scholarship awards are made from University funds; others are made from endowment funds held in trust by the University and given by interested friends and alumni. Still others come from annual donations by educational foundations, industry, government, and individual benefactors.

Assistantships

Academic apprenticeships train qualified students for careers in teaching and research, and compensate them for their services. **Teaching Assistantships** provide experience in teaching undergraduates, with faculty supervision. (Teaching assistants, associates, and fellows are eligible to receive partial payment at the beginning of the quarter in the form of an interest-free advance loan check. Interested students should apply to their departments.) **Research Assistantships** give students experience working on faculty-supervised research projects.

Fellowships and Grants

Most fellowship, traineeship, and grant awards are for one academic year (three quarters). Fellowships and grants provide stipends in varying amounts for qualified students. Nonresident tuition fellowships cover the tuition, for periods of one to three quarters, of selected graduate students who are not California residents.

In-Candidacy Fee Offset Grant Program

The In-Candidacy Fee Offset Grant Program pays the education fee for eligible doctoral students who have been advanced to candidacy. This program is described in detail in *Standards and Procedures for Graduate Study at UCLA,* available in 1225 Murphy Hall or in individual departments.

Graduate Affirmative Action Awards

These programs were established to increase the graduate enrollment of students from groups which, as a result of societal inequities, have been traditionally underrepresented in graduate education. These include American Indians, blacks, Chicanos, Filipinos, and Puerto Ricans. In addition, women are eligible in fields where they are underrepresented.

There is one need-based financial aid program (GAP), as well as several merit-based fellowship programs. Students are encouraged to apply for both need- and merit-based assistance; fellowship awards will reduce the size of financial aid support. All applicants for merit-based awards must be U.S. citizens. For more information on these programs, contact the Graduate Affirmative Affairs Office, 1242 Murphy Hall (825-2780).

(1) **Graduate Advancement Program (GAP)** — Awards are made on the basis of need as demonstrated by normal University financial aid standards and must meet GAP criteria. These awards differ from ordinary financial aid in that grants may be slightly larger and work-study awards do not require matching funds by employers.

(2) **Graduate and Professional Opportunity Program (G*POP)** — For 1986-87 awards provide stipends and fees to students in the fields of management, urban planning, biology, psychology, social welfare, and engineering. Continuation of this program is contingent on annual federal support.

(3) **Graduate Opportunity Fellowship Program (GOFP)** — Merit-based fellowships provide stipends and registration fees to students from groups traditionally underrepresented in graduate programs (e.g., women are eligible for fellowships in such fields as engineering and physical science).

(4) **Dorothy Danforth Compton Fellowship** — UCLA is one of 10 universities selected to receive a grant from the Danforth Foundation to support outstanding black, Mexican American, American Indian, and Puerto Rican students committed to careers in college and university teaching. A limited number of fellowships are awarded to Ph.D. students in the humanities, social sciences, health sciences, and fine arts. Applicants must be in departments offering a doctoral program having teaching or research provisions.

Awards Based on Financial Need

Because the cost of a graduate education may present a financial hardship, students who require assistance in meeting educational costs are encouraged to apply for aid based on their financial need. Need is defined as the difference between allowable school-related expenses and your financial resources.

Financial aid awards include educational grants, low-interest loans, and work-study employment. Students are usually awarded a financial aid "package" which is a combination of these forms of assistance. Further information is available at the Financial Aid Office, A107 Murphy Hall.

Requirements for Graduate Degrees

UCLA offers instruction leading to a broad range of master's and doctoral degrees, both academic and professional. Graduate students earn master's or doctoral degrees through distinguished achievement in study and research. Achievement in study is evaluated principally by means of the qualifying and comprehensive examinations. Achievement in research is judged by the merits of the thesis or dissertation.

The Master's Degree

University Minimum Standards

The requirements described here are minimum standards set by the University. Individual schools or departments may set higher standards and may require additional courses and/or examinations for their master's degree. You are advised to consult the appropriate school announcement or your graduate adviser.

Academic Residence

The minimum residence requirement consists of three academic quarters in graduate standing at the University of California, including at least two quarters at UCLA. Academic residency is established by successfully completing at least one graduate or upper division course (four units) during a quarter.

You may earn one quarter of residence for summer study in either of these ways: (1) enroll in two six-week Summer Sessions taking at least two units of upper division and/or graduate work in each session OR (2) enroll in one eight-week session for at least four units of credit. Residence earned through Summer Sessions enrollment is limited to one third of the degree requirements.

University Minimum Standards For Advanced Degrees*

REQUIREMENT	MASTER'S DEGREE	DOCTORAL DEGREE
ACADEMIC RESIDENCE	One year (three quarters) in graduate standing at University of California, two quarters at UCLA.	Two years (six quarters) in graduate standing at University of California, including three consecutive quarters at UCLA.** In most cases a longer period of residence is necessary.
PROGRAM OF STUDY	Nine graduate and upper division courses (36 units) in graduate standing, including at least five graduate courses.	No specific course requirements. Program is planned with adviser and guidance committee.
SCHOLARSHIP	B average required in all courses taken in graduate standing at UC and in all courses applied toward the master's degree.	B average required in all courses taken in graduate standing at UC.
FOREIGN LANGUAGE	Requirements are determined by individual departments and programs.	Requirements are determined by individual departments and programs.
ADVANCEMENT TO CANDIDACY	All requirements for advancement, including foreign language examinations, must be satisfied. Forms must be filed by second week of the quarter in which degree is to be awarded.	The departmental written and University Oral Qualifying Examinations must be passed; departmental, course, and language requirements must be completed. Advancement is officially granted when you obtain your committee chair's signature, pay the $25 fee, and return the application to the Graduate Division.
FINAL REQUIREMENT FOR THE DEGREE	Master's thesis or comprehensive examination (written, oral, or both).	Doctoral dissertation. A final oral examination in defense of the dissertation may also be required.

* Individual departments and programs may set higher standards. Please refer to departmental listings under the appropriate college or school chapter or consult with your graduate adviser for details.
** If the master's degree was earned at UCLA, one year of residence will have been satisfied.

Courses and Grades

The master's program at UCLA consists of at least nine graduate and upper division courses (or any number of fractional courses totaling 36 units) completed in graduate standing, of which at least five must be graduate. To maintain satisfactory progress toward the master's degree, UCLA requires at least a B average in all courses taken in graduate standing at the University and in all courses applied toward the master's degree.

Transfer of Credit

There are two general regulations governing transfer of credit. No courses completed before the award of the bachelor's degree may be applied toward a graduate degree unless you are a Departmental Scholar. Also, courses taken for any other degree may not be applied toward a master's degree at UCLA unless you are enrolled in a Graduate Council-approved concurrent degree program (see "Concurrent and Articulated Degree Programs" later in this chapter).

From Within the University — You may petition to have units and grade points for graduate work completed at other campuses of the University applied toward satisfaction of master's degree requirements at UCLA. Such courses may fulfill up to one half of both the total course and graduate course requirements, and one third of the academic residence requirement, but may not have been used to fulfill the requirements for another degree.

From Outside the University — With approval of the dean of the Graduate Division and your major department, courses completed with a grade of B or better in graduate standing at institutions outside the University of California may apply toward UCLA master's programs. However, courses taken for any degree awarded at another institution may not be applied toward a graduate degree at UCLA. A maximum of two courses (eight quarter units or five semester units) may be applied, but they cannot be used to reduce either the minimum graduate course requirement or the academic residence requirement.

From Summer Sessions — Regular session courses offered in UCLA Summer Sessions by regular faculty qualify for credit toward a higher degree with departmental approval. Courses offered by visiting faculty may apply, with a recommendation from the department chair. It is best to consult your graduate adviser about applying Summer Sessions courses to your graduate program.

From University Extension — University Extension courses (100 series) taken *before* July 1, 1969, may apply on approval of the department and dean of the Graduate Division. No more than two such courses (eight units) may be applied.

Extension courses taken *after* July 1, 1969, can be applied only if they were **concurrent** courses prefixed by XLC (offered for students in degree programs and open to Extension students by petition) in the 100, 200, or 400 series, completed with a grade of B or better. By petition to the dean of the Graduate Division and with departmental approval, a maximum of two such courses may be applied toward the nine-course minimum and the five-graduate-course requirements for the master's degree. The master's program, then, would include at least three courses in the 200 or 500 series for academic degrees, or three courses in the 200, 400, or 500 series for professional degrees.

If your master's program requires more than nine courses, concurrent Extension courses may be applied toward one-half the course requirements over the minimum of nine.

Grades earned in Extension courses or in courses taken outside the University of California are not included in computing your grade-point average nor may they be used to remove scholarship deficiencies. Correspondence courses are not applicable to graduate degrees.

Foreign Language Requirements

Foreign language requirements are determined by individual departments and programs. If your program has a language requirement, for maximum benefit you should fulfill it before you begin graduate study or as soon as possible thereafter. All foreign language requirements must be satisified before advancement to candidacy.

Depending on your department's regulations, you may fulfill foreign language requirements either by passing the Educational Testing Service (ETS) Graduate School Tests in French, German, Russian, or Spanish or (in languages not offered by ETS) by passing examinations given by UCLA language departments. You may register for the ETS examination at the University Extension Cashier's Office, 10995 Le Conte Avenue. UCLA enrollment is not required. Consult University Extension for registration procedures.

Some departments allow students to fulfill language requirements either by passing departmental examinations or by completing coursework in a foreign language. Certain departments may require additional languages, special competence, or other special procedures. In some departments, English satisfies the foreign language requirement if it is not your native language.

For further details on foreign language requirements, refer to *Standards and Procedures for Graduate Study at UCLA* or see your graduate adviser.

Advancement to Candidacy

When you have completed approximately half the program for the master's degree (usually at least two quarters), you should formally apply for advancement to candidacy. Application forms are available from your department or the Graduate Division, Student and Academic Affairs Section (1225 Murphy Hall), and must be filed in your major department no later than the second week of the quarter in which you expect to receive your degree (by the end of the second week of the first Summer Session for a September degree).

You may not be advanced to candidacy until all departmental requirements for advancement, including foreign language examinations, have been satisfied. You then have one year from the date of advancement to complete all requirements for the degree, including your thesis or comprehensive examination. Candidacy expires at the end of one year and reinstatement during the quarter in which you plan to receive the degree is by petition only.

Plans of Study

UCLA offers master's degrees under two plans: Plan I, the Master's Thesis, and Plan II, the Master's Comprehensive Examination. Some departments offer both plans, and you must consult with your adviser to determine the plan for meeting your degree requirements. University minimum requirements are the same under either plan.

Master's Thesis (Plan I)

After advancement to candidacy, students under Plan I must submit a thesis reporting on the results of their original investigation of a problem. While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject.

A thesis committee, consisting of at least three faculty members who hold regular professorial appointments at the University, is nominated by the department and appointed by the dean of the Graduate Division for each student (consult *Standards and Procedures for Graduate Study at UCLA* for more details on committee members' eligibility requirements). The thesis committee, which must be appointed before you may be advanced to candidacy, approves the subject and plan of the thesis, provides the guidance necessary to complete it, then reads and approves the completed manuscript. Approval must be unanimous among committee members.

Once the thesis committee and other concerned faculty have approved the subject for the thesis, work may begin. You are responsible for preparing the thesis in the proper form and for observing filing deadlines. For guidance in the final preparation of the thesis, you may:

(1) Consult the Theses and Dissertations Adviser, Office of the University Archivist, 141 Powell Library.

(2) Read *Regulations for Thesis and Dissertation Preparation,* available in the Graduate Division, Student and Academic Affairs Section, or in the Archivist's Office.

(3) Attend an orientation meeting on manuscript preparation and filing procedures conducted soon after the start of each quarter (see the Calendar at the beginning of this catalog).

When all members of the committee have approved the thesis and you are ready to file it, you must initiate the final steps in the process by submitting the original signature (approval) page, title page, and any other required forms to the Graduate Division, Student and Academic Affairs Section, where completion of degree requirements will be verified. After final approval by the dean of the Graduate Division, you must file the thesis with the Theses and Dissertations Adviser approximately two weeks before the degree is to be awarded. Deadlines for this academic year are:

December 1 for Fall Quarter 1986
March 9 for Winter Quarter 1987
June 1 for Spring Quarter 1987

Master's Comprehensive Examination (Plan II)

Following advancement to candidacy, students under Plan II must pass a comprehensive examination administered by a committee consisting of at least three faculty members appointed by the department. In some departments the comprehensive examination may serve as a screening examination for admission to doctoral programs. Information concerning this examination and its form (written, oral, or both) is available from your graduate adviser.

The Candidate in Philosophy Degree

In several departments, as approved by the Graduate Council, the intermediate degree of Candidate in Philosophy (C.Phil.) is awarded to qualified students on advancement to candidacy for the Ph.D. degree.

The C.Phil. is not a terminal degree but gives formal recognition to a definite state of progress toward the doctorate. Academic requirements are the same as for advancement to candidacy for the Ph.D. (see below). Four quarters in academic residence, three of them (usually the last three) in continuous residence at UCLA, are required. (Also refer to "Academic Residence" under doctoral programs below.)

The C.Phil. may not be conferred after or simultaneously with the Ph.D. For departments offering the C.Phil., see the degree chart at the beginning of this chapter. For further details, consult *Standards and Procedures for Graduate Study at UCLA,* available in 1225 Murphy Hall and in individual departments.

The Doctoral Degree

The doctorate, and specifically the Doctor of Philosophy degree, is awarded in recognition of a candidate's in-depth knowledge of a broad field of learning, and for demonstrated ability to make original and distinguished contributions to the field. More generally, the degree is an affidavit of critical aptitude in scholarship, imaginative enterprise in research, and proficiency and style in communication.

University Minimum Standards

The requirements described here are the University's minimum standards for doctoral degrees. Each department may adopt additional requirements according to the demands of the field of study. Consult your graduate adviser for details.

Academic Residence

The minimum residence requirement for the doctoral degree is two years (six quarters) in graduate standing at the University of California, including one year (usually the second) in continuous residence at UCLA. If you earned a master's degree at UCLA, one year of this requirement will have been met.

In most cases a longer period of residence is necessary, and from three to five years is generally considered optimal. Academic residency is established by successfully completing one graduate or upper division course (four units) during a quarter.

You may earn one quarter of residence for summer study in either of these ways: (1) enroll in two *consecutive* six-week Summer Sessions taking at least two units of upper division and/or graduate work in each session OR (2) enroll in one eight-week session for at least four units of credit. Residence earned through Summer Sessions enrollment is limited to one third of the degree requirements.

Program of Study and Scholarship

Programs of study for doctoral degrees are more individualized than those for master's degrees, permitting a higher degree of specialization. The University does not specify course requirements for doctoral programs. However, individual programs have coursework or other requirements which must be completed before taking the University Oral Qualifying Examination. You will determine your course of study in consultation with the adviser and guidance committee who supervise your activities until the doctoral committee is appointed.

Satisfactory progress toward the doctoral degree requires that you maintain at least a B average in all courses taken in graduate standing on any University of California campus.

Foreign Language Requirements

Most departments require doctoral candidates to demonstrate proficiency in one or more foreign languages, so that you can acquire broad knowledge in your field of study and keep abreast of foreign developments in the field.

You are urged to complete language requirements as early as possible in your graduate career. If your department requires two or more foreign languages, you must complete at least one before the Oral Qualifying Examination. See "Foreign Language Requirements" under the Master's Degree for information on fulfilling these requirements.

Examinations Before Advancement to Candidacy

A doctoral program generally involves two stages, separated by advancement to candidacy. The first stage is spent in fulfilling the coursework, teaching, and/or examinations required by the major department or group. You are supervised during this period by a departmental adviser and/or departmental guidance committee. This committee administers a departmental written and, in some cases, oral examination (not to be confused with the University Oral Qualifying Examination) after you complete the recommended or required work. Once all departmental and foreign language requirements are met, the department chair consults with you and then nominates a doctoral committee.

University Oral Qualifying Examination

The doctoral committee, consisting of at least five faculty members nominated by your department, is appointed by the dean of the Graduate Division (consult *Standards and Procedures for Graduate Study at UCLA* for details on committee membership). To determine your qualifications for advancement to candidacy, the committee administers the University Oral Qualifying Examination and, at its option, a written examination.

Advancement to Candidacy

You are eligible for advancement to doctoral candidacy after passing the University Oral Qualifying Examination with no more than one negative vote, completing four quarters of academic residence and any additional departmental requirements, and maintaining a 3.0 grade-point average in graduate standing. You must complete the application for candidacy form sent to you by the Registrar's Office, have it signed by your doctoral committee chair, pay a $25 advancement to candidacy fee, and submit the form to the Graduate Division, Student and Academic Affairs Section. You are officially advanced to candidacy on the date the completed form is submitted.

Writing the Dissertation

Once the doctoral committee approves the subject for your dissertation, the second or in-candidacy stage of the doctoral program begins and is devoted primarily to independent study and research and to the preparation of the dissertation, which demonstrates your ability for independent investigation. The doctoral committee guides your progress toward its completion.

Final Oral Examination

A final oral examination may be required at the option of any member of the doctoral committee, and in some departments is required of all doctoral candidates. The examination, for which all committee members must be present, may be held before you have prepared the final copy of your dissertation, but passing the examination (with no more than one negative vote of the committee members) does not imply approval of the final manuscript. Consult your doctoral committee chair or graduate adviser for further information.

Filing the Dissertation

You are responsible for following instructions on the preparation of the dissertation and for observing filing deadlines. For guidance in the preparation and submission of the dissertation and accompanying abstract, you may:

(1) Consult the Theses and Dissertations Adviser, Office of the University Archivist, 141 Powell Library.

(2) Read *Regulations for Thesis and Dissertation Preparation,* available in the Graduate Division, Student and Academic Affairs Section, or in the Archivist's Office.

(3) Attend an orientation meeting on manuscript preparation and filing procedures conducted soon after the start of each quarter (see the Calendar at the beginning of this catalog).

When your final dissertation has been approved by the doctoral committee and you are ready to file it, you must submit the original signature (approval) page and title page to the Graduate Division, Student and Academic Affairs Section, where completion of degree requirements will

be verified. After final approval by the dean of the Graduate Division, you must file two paper copies of the dissertation with the Theses and Dissertations Adviser approximately two weeks before the degree is to be awarded. Deadlines for this academic year are:

December 1 for Fall Quarter 1986
March 9 for Winter Quarter 1987
June 1 for Spring Quarter 1987

Individual Ph.D. Program

Although the University of California offers an extraordinary range of established doctoral programs, these cannot meet the needs and specific career goals of every student. The Individual Ph.D. Program therefore makes it possible for superior students to design their own coherent programs of interdisciplinary studies leading to the Ph.D. degree.

To qualify for this program, you must have been a full-time graduate student at UCLA for at least one year, making satisfactory progress toward a doctoral degree. After at least three faculty members have agreed to sponsor your proposal for an individual program of study, you may submit it to the Graduate Council for review. University minimum standards regarding courses, scholarship, residence, and dissertation apply. Further information on this program is available in the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall.

Interdepartmental Degree Programs

In addition to graduate degree programs offered within schools and departments, UCLA offers interdisciplinary programs involving two or more participating departments. A total of 26 interdepartmental programs offer bachelor's, master's, and doctoral degrees in some combination; several units offer all three degrees. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of faculty division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

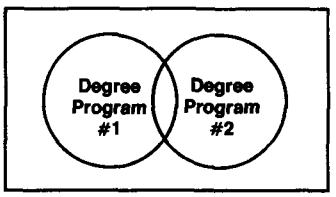
Interdepartmental degree programs which currently lead to advanced degrees are listed below. All are described more fully in Chapter 5 under the College of Letters and Science, with the exceptions of Environmental Science and Engineering which is in the School of Public Health and Neuroscience which is in the School of Medicine. For further information, contact the chair or graduate adviser of the specific program that interests you.

African Area Studies (M.A.)
Afro-American Studies (M.A.)
American Indian Studies (M.A.)
Applied Linguistics (Ph.D.)
Archaeology (M.A., Ph.D.)
Asian American Studies (M.A.)
Comparative Literature (M.A., Ph.D.)
Environmental Science and Engineering (D.Env.)
Folklore and Mythology (M.A., Ph.D.)
Indo-European Studies (Ph.D.)
Islamic Studies (M.A., Ph.D.)
Latin American Studies (M.A.)
Molecular Biology (Ph.D.)
Neuroscience (Ph.D.)
Romance Linguistics and Literature (M.A., Ph.D.)

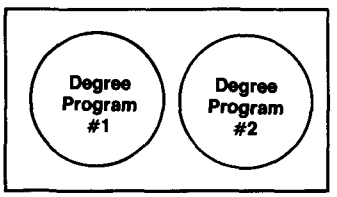
Concurrent and Articulated Degree Programs

Each of the programs described thus far leads to a single degree — either master's or doctoral. UCLA also offers concurrent and articulated degree programs, which allow you to earn two degrees simultaneously by combining two free-standing degree programs into a coordinated course of study. You may petition to design your own articulated program (with departmental and Graduate Division approval), but you may not apply credits for one degree to the other. Concurrent degree programs, which may not be individually designed, allow some credit overlap.

These programs accomplish several important objectives: they enable the University to respond to societal changes by creating new fields of study; they prepare students more fully for the world's complexities by combining the cultural (political-social-economic) aspects of their field with the tools of a professional degree; and they allow faculty members to cross departmental lines and interact on a broader scale.



Concurrent Degree Program
(Certain courses may apply to both degrees)



Articulated Degree Program
(No credit overlap)

Concurrent degree programs, by allowing a specified amount of credit to apply to both degrees, permit students to reduce the total number of courses required for the two degrees and thereby reduce the time normally required if courses were taken in sequence. Programs leading to concurrent degrees are offered in the following disciplines:

Architecture and Urban Planning, M.A. — Law, J.D.
Education, M.A., Ph.D., M.Ed., or Ed.D.— Law, J.D.
History, M.A. — Library and Information Science, M.L.S.
Latin American Studies, Interdepartmental M.A. — Architecture and Urban Planning, M.A.
Management, M.B.A. — Architecture and Urban Planning, M.A.
Management, M.B.A. — Computer Science, M.S. (School of Engineering and Applied Science)
Management, M.B.A. — Latin American Studies, Interdepartmental M.A.
Management, M.B.A. — Law, J.D.
Management, M.B.A. — Library and Information Science, M.L.S.
Management, M.B.A. — Public Health, M.P.H.

Articulated degree programs permit no credit overlap, and students must complete degree requirements separately for each degree. Programs leading to articulated degrees are offered in the following disciplines:

African Area Studies, Interdepartmental M.A. — Public Health, M.P.H.
African Area Studies, Interdepartmental M.A. — Theater, Film, and Television, M.F.A. in Motion Picture/Television
Latin American Studies, Interdepartmental M.A. — Education, M.Ed. in Curriculum
Latin American Studies, Interdepartmental M.A. — Engineering and Applied Science, M.S.
Latin American Studies, Interdepartmental M.A. — Library and Information Science, M.L.S.
Latin American Studies, Interdepartmental M.A. — Public Health, M.P.H.
Medicine, M.D. — Graduate Division health science major, Ph.D.
Oral Biology, M.S. — Dentistry, D.D.S. or Certificate

Inquiries about concurrent and articulated degree programs should be directed to graduate advisers in the departments and schools involved. Contact the Graduate Division, Student and Academic Affairs Section, for information on designing your own articulated programs.

Special Programs and Training

Graduate Cross-Enrollment Program with USC

As an integral part of an Academic Resource Sharing program linking UCLA with the University of Southern California, the Graduate Cross-Enrollment Program makes possible graduate student exchanges in many departments. The program is limited to specialized courses which would not otherwise be available to UCLA students.

If you have completed at least one quarter of graduate study at UCLA and have obtained the necessary approvals, you may enroll in a 501 course through your department. When you have completed the course at USC, **your grade will be forwarded to UCLA** to be recorded on your transcript (S/U grading only). Only eight units of cross-enrollment courses may be applied toward requirements for the master's degree, and these courses may not be used to satisfy the five-graduate-course requirement. Applications, available in the Graduate Division, Student and Academic Affairs Section, should be completed before the start of the term in which the course is offered.

Intercampus Exchange Program

If you have completed one quarter of graduate study at any campus of the University, you may attend another campus as an Intercampus Exchange Graduate Student with the approval of your department chair, the chair of the department or group in which you wish to study at the host campus, and the dean of the Graduate Division at both the home and host campuses. The privilege should be used only by students whose graduate study may be enhanced by work with certain faculty or use of facilities and resources accessible only at another campus.

Although you are considered to be in residence at your home campus, as an Intercampus Exchange Student you have library, health service, and other privileges at the host campus. Grades are transferred to your home campus and entered on your official record.

Applications are available in the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall, and should be filed at least four weeks before the beginning of the quarter in which you expect to enter the program.

Graduate students may also take advantage of the **Education Abroad and Education at Home Programs,** described in Chapter 1 of this catalog.

Postdoctoral and Visiting Scholars

The University makes opportunities and facilities available to qualified scholars — those holding doctoral degrees or foreign equivalents — to continue advanced study and research under faculty guidance. Postdoctoral Scholar standing, which does not lead to any degree, is limited to a maximum of three years and must begin within three years after the doctoral degree is awarded. Interested candidates should make advance arrangements with the relevant department or research unit.

The same opportunities are made available to Visiting Scholars — senior scholars and distinguished visitors holding doctoral degrees or foreign equivalents — who wish to pursue independent research or advanced study at UCLA for a limited time, normally no more than one year. Visiting Scholars are distinguished from Postdoctoral Scholars and academic appointees in that they usually have adequate support funds from sources outside the University.

Further information on both Postdoctoral and Visiting Scholars is available in the Fellowship and Assistantship Section, 1228 Murphy Hall.

General Policies and Regulations

Standards of Scholarship

To maintain satisfactory progress toward a graduate degree, UCLA requires at least a B (3.0) average in all courses taken in graduate standing at any campus of the University and in all courses applied toward advanced degrees. This standard applies to all graduate students, including candidates in certificate programs. In courses graded on an S/U basis, the grade of S (Satisfactory) is awarded for work which would otherwise receive a B or better. Grades S and U are not included in calculating grade-point averages.

Scholarship Probation

You are on probation and are subject to dismissal if your cumulative average in all work attempted in graduate standing falls below a B (3.0) or if work in any two consecutive quarters falls below a B average. The dean of the Graduate Division, in consultation with your department, determines your eligibility to continue graduate study in probationary status. If you are allowed to continue, you must make timely progress toward improving your grade-point average.

Disqualification and Appeal

If you are subject to disqualification for reasons other than failure to maintain the minimum grade-point average, you will have your records reviewed by the Graduate Division, in consultation with the graduate adviser. If disqualification results, you may submit a written appeal to the dean of the Graduate Division for reconsideration.

Appeals will be considered only if based on appropriate cause such as (1) procedural error, (2) judgments based on nonacademic criteria, (3) personal bias, or (4) specific mitigating circumstances contributing to performance. Alleged errors in academic judgment or evaluation are not considered appropriate causes for appeal.

In cases of appropriate cause, the dean of the Graduate Division refers the appeal to the Graduate Council's Committee on Instruction and Degree Requirements. You are required to submit a written statement on the basis for your appeal and are entitled to a personal appearance before the committee. After obtaining information on the matter from any appropriate person or office, the committee makes a recommendation to the dean of the Graduate Division, who makes the final decision. In reporting the decision, the committee includes the basis for the decision, its effective date, and any specific recommendations.

Graduate Student Complaints

Because of the separation of functions within the University, students are sometimes uncertain where they should direct their complaints. The following information may be helpful.

If you have complaints of a scholastic or professional nature involving faculty, you should take them up with the faculty member concerned or, if that is not feasible, with the chair of the department. If the department as a whole is involved, you should take the matter to the appropriate divisional or school dean. Should the issue not be resolved at that level, you may appeal to the dean of the Graduate Division, 1237 Murphy Hall.

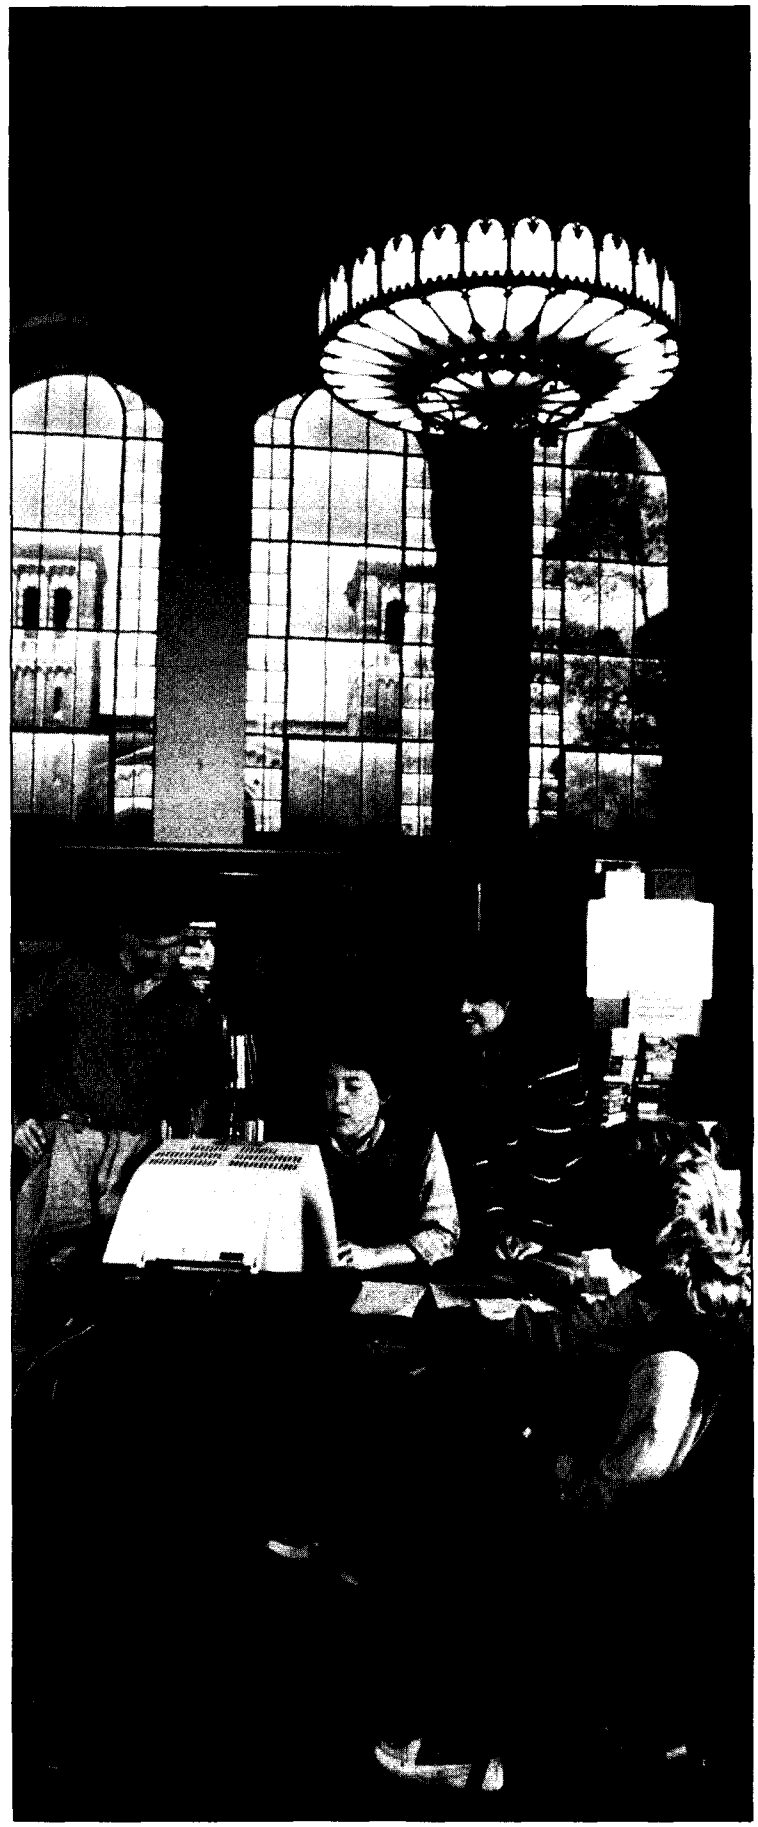
Complaints of misconduct against a student or group of students should be made at the dean of Students Office, 2224 Murphy Hall.

Complaints concerning alleged violation of the policies and regulations governing graduate study should be made to the dean or associate dean of the Graduate Division, 1237 Murphy Hall.

Complaints about a violation of University policy regarding the conduct of one or more faculty members should be made to the Charges Committee of the Academic Senate, 3125 Murphy Hall.

Academics

4



Units and Grading Policy

UCLA students are responsible for understanding the grading policies and regulations established by the Academic Senate. Should any semantic variations exist between explanations in this catalog and regulations in the *Manual of the Academic Senate*, the manual will prevail in all cases. Copies of the Senate manual are available for your review in the Academic Senate Office, 3125 Murphy Hall.

Grades

Instructors are required to assign a final grade for each student registered in a course. The following grades are used to report the quality of a student's work at UCLA:

Undergraduate Students

A = Superior
B = Good
C = Fair
D = Poor
F = Failure
P = Passed (achievement at grade C level or better)
NP = Not Passed
I = Incomplete
IP = In Progress
DR = Deferred Report

Graduate Students

A = Superior Achievement
B = Satisfactorily demonstrates potential for professional achievement
C = Passed but work does not indicate potential for professional achievement
F = Failure
S = Satisfactory (achievement at grade B level or better)
U = Unsatisfactory
I = Incomplete
IP = In Progress
DR = Deferred Report

For Undergraduates — The grade A may be modified by a minus (−) suffix, and the grades B, C, and D by a plus (+) or minus (−) suffix, to either raise or lower your grade-point average. The grades A, B, C, and P denote satisfactory progress toward the bachelor's degree, but a D grade must be offset by higher grades in the same quarter for you to remain in good academic standing. An F grade yields no unit or course credit.

For Graduate Students — The grades A, B, and C may be modified by a plus or minus suffix. The grades A, B, and S denote satisfactory progress toward the degree, but a C grade must be offset by higher grades in the same quarter for you to remain in good academic standing. Courses in which a C grade is received, however, may be applied toward graduate degrees.

(The Schools of Dentistry, Medicine, and Law maintain their own grading codes. If you are interested in programs in any of these schools, consult the appropriate school announcement.)

Grade Points

In computing scholarship standing, a course counts as four quarter units. Partial or multiple courses are counted proportionally (e.g., one-half course is equal to two units).

Grade points per unit are assigned by the Registrar as follows:

A+	= 4.0	C+	= 2.3
A	= 4.0	C	= 2.0
A−	= 3.7	C−	= 1.7
B+	= 3.3	D+	= 1.3
B	= 3.0	D	= 1.0
B−	= 2.7	D−	= 0.7

F, NP, U = 0

Courses in which you receive a P or S grade may count toward satisfaction of degree requirements, but these grades, as well as DR, I, and IP, are disregarded in determining your grade-point average. (If an I grade is later removed and a letter grade assigned, units and grade points are included in subsequent grade-point averages.)

Computing Your Grade-Point Average

Your grade-point average, or GPA, is determined by dividing the number of grade points earned by the number of units attempted. For example, suppose you take three four-unit courses and receive grades of A−, B−, and C+.

Grade Points	× *Course Units*	= *Total Grade Points*
A− = 3.7	4	14.8
B− = 2.7	4	10.8
C+ = 2.3	4	9.2
	12	34.8

To determine your GPA for the quarter, divide the total grade points earned (34.8) by the total course units attempted (12). Your GPA is 2.9.

For satisfactory standing, undergraduate students must maintain a C average (2.0 GPA) and graduate students a B average (3.0 GPA) in all courses taken at any campus of the University (except University Extension). Individual departments may require higher standards of achievement.

Only grades earned in regular session or Summer Sessions at any UC campus are computed in your UCLA grade-point average. Grades earned at another institution or in UCLA Extension do not affect your GPA.

Other schools and agencies may calculate grade-point averages differently from the University when evaluating your records for admission to graduate and professional school programs. You should contact them about their policies in this regard.

Class Standing

Undergraduate classification is determined by the number of units completed:

Classification	Completed Units
Freshman	0 - 44.9
Sophomore	45 - 89.9
Junior	90 - 134.9
Senior	135 or more

In all campus units except the School of Engineering and Applied Science, you are required to earn a minimum of 180 units from all college coursework for the bachelor's degree at UCLA. A maximum of 208 units is allowed in the College of Fine Arts and the School of Nursing; in the College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. (If you have credit for English 1 taken Fall Quarter 1979 through Summer Quarter 1984 at UCLA, the minimum and maximum unit requirements are increased by two units: 182 for the minimum and 210, 218, or 230 for the maximum.) In the School of Engineering and Applied Science, the minimum units allowed are between 185 and 201 (depending on the program); 213 maximum units are allowed. If you exceed the maximum, you may not be allowed to continue, except in rare cases approved by your college or school. See the degree requirements under each college and school for further details.

Graduate classification is based on your degree objective and whether or not you are advanced to candidacy for a doctorate.

Passed/Not Passed (P/NP) Grades

Undergraduate students in good standing who are enrolled in at least 12 units (14 in the School of Engineering and Applied Science) may take certain courses on a Passed/Not Passed basis.

By alleviating grading pressures, this option allows you to explore areas in which you have little or no previous experience. The grade P is assigned for a letter grade of C or better. Units earned this way count toward satisfaction of degree requirements but do not affect your GPA. You will receive neither units nor course credit for an NP grade.

You may enroll in one course each quarter on a P/NP basis (two courses if you have not elected the P/NP option in the preceding quarter). You may not elect this option for Summer Sessions courses without an approved petition. Your department or school may require that you take some or all courses in your major for a letter grade. Certain other courses or programs may also be exempt from the P/NP option; consult your college or school for details.

You may make program changes to or from P/NP grading through the fourth week of instruction (see the Calendar at the beginning of this catalog for exact dates); changes after the first two weeks of class require a petition ($3), available from your college or school.

Certain undergraduate courses are offered only on a Passed/Not Passed basis and are designated PN in the *Schedule of Classes.*

Satisfactory/Unsatisfactory (S/U) Grades

Graduate students in good standing (minimum 3.0 GPA) may enroll for S/U grading in one graduate or upper division course outside the major field each quarter, in addition to any courses offered only on an S/U grading basis within the major. The grade S is assigned for a letter grade of B or better, but units earned in this manner will not be counted in computing the GPA. You will receive neither units nor degree credit for a U grade. You may not elect the S/U option for Summer Sessions courses without an approved petition.

Courses taken on an S/U basis outside the major, and 500-series courses within the major, are applicable toward degree and/or academic residency requirements if so approved. Interdepartmental majors may not apply S/U courses to degree requirements, except for 500-series courses. Program changes to or from S/U grading may be made through the tenth week of instruction (see the Calendar at the beginning of this catalog); changes after the first two weeks of class require a petition ($3), available in the Graduate Division Office.

Certain graduate courses are offered only on a Satisfactory/Unsatisfactory basis and are designated SU in the *Schedule of Classes.*

Incomplete (I) Grades

Your instructor may assign the I grade when your work is of passing quality but is incomplete for a good cause (i.e., illness or other serious problems). It is your responsibility to discuss with the instructor the possibility of receiving an I grade as opposed to a nonpassing grade.

If an I grade is assigned, you may replace it with a passing grade and receive unit credit and grade points by satisfactorily completing the coursework as specified by the instructor. If the work is not completed by the end of the next full quarter in residence, the grade will lapse to an F, NP, or U as appropriate. Your college or school may extend this deadline in unusual cases.

Petitions for Removal of Incomplete Grade ($5) are available in your school or department office and should be filed no later than the sixth week of instruction in the next quarter of registration. (Note: Once an I grade is assigned, it remains on your transcript along with the passing grade you may later receive for the course.)

In Progress (IP) Grades

For certain courses extending over more than one quarter (identified by T1, T2, T3, or T4 in the *Schedule of Classes),* evaluation of student performance is deferred until the end of the final quarter of the course. Provisional grades of IP are assigned in the intervening quarter(s) and are replaced with the final grade when you complete the full sequence. The school or college faculty or the Graduate Council will determine credit if you do not complete the full sequence and petition for partial credit.

Deferred Report (DR) Grades

You may receive a DR grade when the instructor believes your work to be complete but cannot assign a grade because of disciplinary proceedings or other problems. If you are given a disciplinary DR grade, the Dean of Students Office will assist you in resolving the problem. For graduate students, the dean of the Graduate Division will set a deadline by which the DR will lapse to an F if the problem is not resolved and a grade assigned. The DR will be changed to a grade, or perhaps to an Incomplete, when the instructor provides written confirmation that you have resolved the situation. The DR grade is not included in determining your grade-point average.

Repetition of Courses

Certain courses, as noted in their course descriptions, may be repeated for credit. Other courses taken at the University (except Extension) may be repeated only according to the following guidelines:

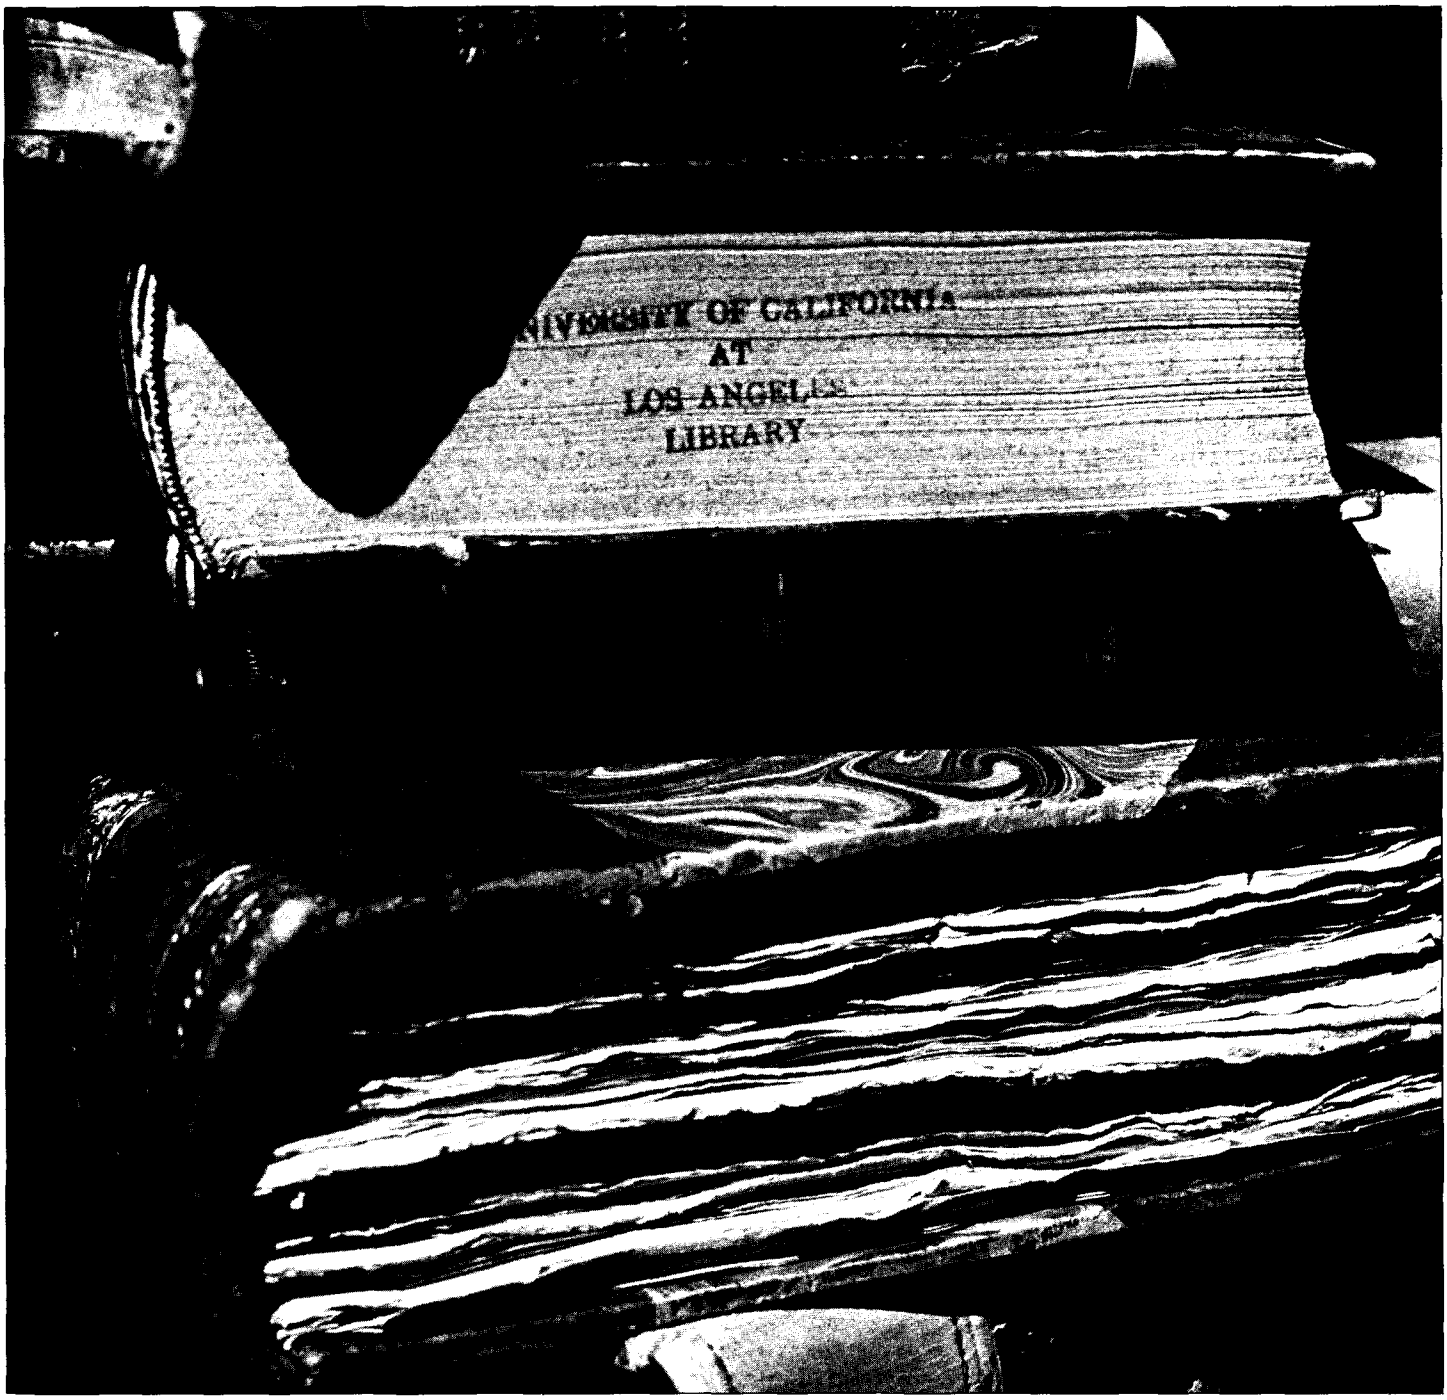
(1) To improve your grade-point average, you may repeat only those courses in which you receive a grade of C – or lower; NP or U grades may be repeated to gain unit credit. Courses in which you received a letter grade may not be repeated on a P/NP or S/U basis. Courses originally taken on a P/NP or S/U basis may be repeated either on the same basis or for a letter grade.

(2) Repetition of a course more than once requires the approval of your college or school or the dean of the Graduate Division, and is granted only under extraordinary circumstances.

(3) Degree credit for a course will be given only once, but the grade assigned each time you take the course will be permanently recorded on your transcript.

(4) For undergraduates who repeat a total of 16 units or less, only the most recently earned letter grades and grade points will be computed in the grade-point average. After repeating 16 units, however, your GPA will be based on all letter grades assigned and total units attempted.

(5) For graduate students, all courses in which a letter grade was given, including repeated courses, will be used in computing the grade-point average.



Correction of Grades

All grades except I, IP, and DR are final when filed by the instructor in the end-of-term course report. Thereafter, a grade change may be made only in case of a clerical or procedural error or other unusual circumstances. No grade may be revised by reexamination or, with the exception of the I and IP grades, by completing additional work. If you are dissatisfied with a grade, you should review your work with the instructor and receive an explanation of the grade assigned. See the Appendix for further details and procedures for appealing grades.

Credit by Examination

Students with high scholastic standing may earn credit for regular University courses by taking examinations rather than enrolling in the courses. This is accomplished by establishing, with a UCLA faculty member, an individual plan of study which may include oral and written work in addition to other requirements. To be eligible for this privilege, undergraduate students must have completed a minimum of 12 units at UCLA. Graduate students must be registered at the time of the examination and are limited to a maximum of three courses taken in this manner.

The results of these courses are entered on your record in the same way as regular courses, and corresponding grade points are assigned. Graduate credit earned by examination may be applied toward minimum course requirements for master's degrees but cannot apply to academic residence requirements for master's or doctoral degrees.

You will need approval from the appropriate instructors, the department, and your college or school or the dean of the Graduate Division, from whom petitions for credit by examination ($5 each) are available.

Other Academic Policies

Concurrent Enrollment and Transfer of Credit

Concurrent enrollment means taking courses for credit in UCLA regular session (Fall, Winter, or Spring Quarter) and at another college institution (including UCLA Extension) at the same time. **Concurrent enrollment is not permitted except in extraordinary circumstances, and no credit will be given for courses taken concurrently elsewhere** without the approval of your college or school. This does not apply to UCLA Summer Sessions (see "Summer Sessions" in Chapter 1).

Undergraduates

During the summer or during a quarter when you are not registered at UCLA, you may elect to take courses for credit at UCLA Extension, a community college, or another four-year institution (see limitations below). The Office of Undergraduate Admissions and Relations with Schools makes the final decision on credit transferability, but it is your responsibility to select courses with catalog descriptions similar to courses offered in regular session at UCLA. You should also avoid courses that are closely related to those you have already taken, as you cannot receive credit twice for the same or similar courses. If you wish to apply a specific course from another college toward satisfaction of degree requirements at UCLA, consult your college, school, or department counselor before taking the course.

Only grades earned in regular session or Summer Sessions at any UC campus will be computed into your UCLA grade-point average. You may, however, receive unit credit and satisfy course requirements with transferable work taken elsewhere. When you have completed the work, you must have the other college send a copy of your transcript to the UCLA Office of Undergraduate Admissions and Relations with Schools (UARS); you must also fill out a Transfer Credit Evaluation Request form in the UARS Office.

UCLA Extension — If you wish to receive degree credit for work taken through UCLA Extension, you should take courses that correspond in number to the undergraduate courses offered in regular session. The designation XL or XLC before the number of the Extension course signifies that the course is equivalent to the regular session course bearing the same number. No degree credit is given for courses numbered X300 through X499. Remember that concurrent enrollment in Extension and regular session is not permitted.

Community Colleges — The maximum number of community college units allowed toward the bachelor's degree is 105 quarter units (70 semester units). The UCLA Office of Undergraduate Admissions and Relations with Schools will not count community college courses beyond 105 quarter units, but you may still receive subject credit to satisfy lower division requirements. Consult your college or school counselors for possible further limitations. (To convert semester units into quarter units, multiply the semester units by 1.5.)

Graduates

With approval of the dean of the Graduate Division, certain courses completed outside of UCLA regular session may be applied toward the master's degree. For more details, see "Transfer of Credit" under "The Master's Degree," Chapter 3.

Transcript of Record

The Registrar prepares and permanently retains a record of each student's academic work. Your transcript reflects all undergraduate and graduate work completed in UCLA regular session and Summer Sessions. It lists chronologically your courses, units, grades, cumulative grade-point average, transfer credits, and total units.

Unofficial copies of student transcripts are issued several weeks after the end of each quarter (to learn your grades more quickly, leave postcards with your instructors). You should pick up your transcript and inform the Registrar immediately of any omissions or other discrepancies. Student copies are available at no charge from the Registrar's Office, 1111 Murphy Hall (students in the College of Fine Arts, the Schools of Nursing, Public Health, and Architecture and Urban Planning should pick up their transcripts in the respective college or school office). The Registrar verifies current quarter registration and full-time enrollment status for loan forms and other noncampus certifications, beginning on the first day of classes for undergraduates and the twelfth day of classes for graduates.

To have official transcripts sent to other schools or institutions, fill out a Request for Transcript of Record form at the Registrar's Office (transcripts cannot be issued without your signed request). The fee is $3 for the first copy and $1 for each additional transcript requested at the same time. Rush transcript service is available for an additional $5 charge. Transcripts become available within 48 hours after your last date of attendance. Transcripts of work completed elsewhere must be requested directly from the campus or institution concerned.

Certificate of Resident Study for International Students

In addition to a formal transcript, each college or school or the Graduate Division may issue a Certificate of Resident Study to a registered international student. To obtain this certificate, you must have completed a program of at least nine courses with a minimum 2.0 grade-point average, or have satisfactorily completed a research project over a period of nine months or more. The chair of your major department recommends the award of this certificate.

Registration Card

Your valid Registration Card (Reg Card) is your official student identification and is required, along with your UCLA Student I.D. Card, for most University services. Carry it with you as you will be asked to show it for student health services, library privileges, athletic and cultural student ticket rates, recreation center, check cashing, and many other campus services.

If you lose or do not receive your Reg Card, a temporary verification card (good for five days) will be issued without fee at the Registrar's Office, 1134 Murphy Hall. After the quarter begins, you may replace lost, destroyed, or mutilated cards at the Registrar's Office for a $3 fee. You must show proof of identity for verification or replacement cards.

UCLA Student I.D. Card

This card with photo is issued in your first term of registration and is valid with the current Reg Card as long as you remain in the same standing (graduate or undergraduate). It is required for most University services and student activities.

You will need a current Reg Card and other valid identification (driver's license, passport, or DMV I.D. card) to get your Student I.D. Card. Distribution hours and location will be announced in the registration issue of the *Daily Bruin*. You may replace lost or destroyed cards at 140 Kerckhoff Hall for a $3 fee.

Change of Name or Address

If you wish to change your name on your official record, fill out a name change form at the Registrar's Office in 1111 Murphy Hall. If you change your address, notify the Registrar's Office in 1134 Murphy Hall as soon as possible. Veterans receiving benefits must also notify the Office of Special Services/Veterans Affairs, A255 Murphy Hall.

Leaving UCLA

Intercampus Transfer

Undergraduate students registered in a regular session (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. There is a $35 nonrefundable fee, and deadlines are the same as admission application deadlines (see "Undergraduate Admission" in Chapter 2). Intercampus Transfer Applications and further information on requirements and procedures are available from the Registrar's Office, 1111 Murphy Hall.

Graduate students who wish to enroll as degree candidates at other UC campuses must apply for admission to those Graduate Divisions.

Absence During a Quarter

If you have to be absent from classes temporarily for reasons beyond your control, you should notify your instructors. Regardless of the reasons for absence, you will be required to complete all coursework. If you cannot complete the work on time because your absence is late in the quarter or prolonged, you may request that the instructors assign an Incomplete grade (see "Incomplete Grades" earlier in this chapter).

One Quarter Absence for Undergraduates

Undergraduate students who have completed at least one quarter at UCLA and fail to register for a quarter may return to the University the following quarter and preregister and preenroll as continuing students. If you plan to attend another institution (including University Extension) during your absence, you should consult your college or school counselor before enrolling elsewhere. When you return to UCLA you must provide the Office of Undergraduate Admissions and Relations with Schools with a transcript of any courses taken (see "Concurrent Enrollment and Transfer of Credit" earlier in this chapter). If you are absent for two or more consecutive quarters, you are no longer considered a continuing student and must compete for readmission with all other applicants.

Leave of Absence for Graduate Students

Graduate students in good standing may be granted leaves of absence, normally for periods of one to three quarters, on approval from the appropriate department and the Graduate Division. Leaves, which may be extended up to five years at the discretion of your department, must be requested before the end of the second week of class. Request forms are available at the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. For details on leaves of absence, see *Standards and Procedures for Graduate Study at UCLA,* available in the Graduate Division offices or in individual departments. Students on leaves of absence are not eligible to use University facilities (except libraries) or faculty time. Leaves of absence as described here do not apply to undergraduates.

Graduate students who fail to register for a quarter and do not take an official leave of absence are considered to have withdrawn from the University and must compete for readmission with all other applicants.

Cancellation

Before the first day of classes, you may cancel registration by submitting a written notice, together with your current Registration Card and Student I.D. Card, to the Registrar's Office, 1134 Murphy Hall. A $10 service charge will be deducted from your fee refund.

Undergraduates who return to the University for the following quarter may preregister and preenroll as continuing students. If you are absent longer than one quarter, you must apply for readmission. If you cancel in your first quarter at UCLA, you must reapply for admission when you return.

Graduate students who cancel their registration and do not receive a formal leave of absence must compete for readmission to return to the University.

Withdrawal

Withdrawing from the University means discontinuing attendance in all courses in which you are enrolled. If you withdraw during a quarter, you need to file a Notice of Withdrawal, available from your college, school, or Graduate Division office. Submit your Registration Card and Student I.D. Card along with the form or a fee will be deducted from any refund.

When you withdraw officially during the first five weeks of instruction, a percentage of your registration fee will be refunded as follows:

First and second weeks of instruction: 80% refund
Third week of instruction: 60% refund
Fourth week of instruction: 40% refund
Fifth week of instruction: 20% refund
After fifth week of instruction: no refund

Claims for refund must be presented within the academic (fiscal) year to which the claim is applicable. See the current *Schedule of Classes* for further details.

You may withdraw only if you have not taken any final examinations or otherwise completed the work in any of your classes. For undergraduates, one withdrawal places no restriction on readmission or continuation if you started the quarter in good academic standing. If you withdraw after one or more previous withdrawals or while in academic difficulty, a restriction may be placed on your continuance in undergraduate standing. Before withdrawing, you are urged to consult faculty, departmental, or college advisers to consider the full implications of this action.

If you register and subsequently discontinue coursework or stop payment on registration checks without an approved petition for withdrawal, leave of absence, or cancellation, you will receive F, NP, or U grades, as appropriate, for all courses in which you are enrolled for that quarter. No fees will be refunded, and future registration privileges may be curtailed or revoked. Transcripts will not be issued if you have outstanding financial obligations to the University.

Undergraduate Students — If you return to the University for the quarter following withdrawal, you may preregister and preenroll as a continuing student. If you return later than the following quarter, you must apply for readmission.

Graduate Students — If you do not complete a quarter, you are considered to have withdrawn from the University and must apply for readmission when you return.

Graduation from UCLA

Approximately eight out of every 10 UCLA freshmen eventually receive a baccalaureate degree, either from UCLA or from another campus or institution. According to a recent survey of UCLA alumni, two thirds of all

UCLA baccalaureate recipients go on to graduate school. For information on academic requirements for graduation, see "Undergraduate Degree Requirements" in Chapter 2.

Undergraduate Students

The awarding of the bachelor's degree does not happen automatically but is the culmination of a multistep procedure which involves your participation.

(1) The **Degree Candidacy** portion of your Registration Form must be completed and filed when you are a junior (minimum 90 quarter units earned) to let the Registrar's Office know when you intend to graduate. The "degree expected term" indicated on the form must be the same as the term in which you wish to graduate in order for your degree progress to be audited by the Registrar's Office. You cannot graduate without such an audit.

(2) **Degree Checks** are conducted by your school or college and the Registrar's Office to inform you of degree requirements remaining to be satisfied. If you have filed the Degree Candidacy portion of your Registration Form, you should receive your first degree check ("Status in Reference to the BA/BS Degree") about three quarters before you graduate and an updated one each subsequent quarter. Consult your college or school, or the Registrar's Office, 1111 Murphy Hall, if you have any questions or problems.

(3) **Announcement of Candidacy** is posted on the Registrar's bulletin board about four weeks into the quarter. Although this is not a guarantee of graduation, your name should appear on the list posted during your final quarter. If not, inform the degree clerk at 1111 Murphy Hall.

(4) **Important Degree Notice** is mailed to you only if your records indicate you will not have satisfied all degree requirements by the end of your last quarter. If you receive such a notice, contact your degree clerk as soon as possible for further information and instructions.

(5) **Certificate of Completion** is official proof that you have graduated. It is sent to you four to five weeks after your final quarter ends if you have successfully completed all courses that quarter and met all degree requirements.

Graduate Students

Candidates for both master's and doctoral degrees must be advanced to candidacy and complete all degree requirements, including the master's thesis or comprehensive examination, or doctoral dissertation, before the degree is conferred. A **Certificate of Completion,** certifying the award of the degree, is issued to all students four to five weeks after the end of the quarter in which all degree requirements are met. For full details on degree requirements and procedures for graduate students, see Chapter 3 on Graduate Study.

Degree Date

Degrees are awarded at the end of each quarter (Fall, Winter, Spring) and at the end of the second Summer Session. Refer to University calendars for the actual date of the final day in each quarter or Summer Session.

Diplomas

Diplomas for both undergraduates and graduate students are not distributed at Commencement but become available six to eight weeks after graduation. The Registrar's Office will notify you by mail when your diploma is ready. If you wish, the diploma can be sent to you by certified mail at a cost of $3 ($6 outside the U.S.). There is no diploma fee, although if the original is lost or stolen, there is a $25 charge for a duplicate diploma.

Commencement

Commencement exercises honoring candidates for undergraduate and graduate degrees will be held June 14. Students who have earned degrees in Summer Sessions 1986 or any quarter during the 1986-87 academic year are welcome to participate.

On Commencement Day at 10 a.m. all students, faculty, and guests gather in Drake Stadium for the conferring of degrees. This colorful pageant features an address by the Chancellor, student speakers, recognition of candidates who have achieved high academic distinction, and the awarding of the UCLA Medal. Following the formal ceremony, many departments, schools, and colleges hold informal gatherings at which prizes and honors are awarded and students and their families meet faculty members.

Academic regalia (caps, gowns, and hoods) become available through ASUCLA two weeks prior to Commencement. The rental fee is $14.50 for bachelor's candidates; $24 for master's and doctoral candidates. For further information, consult the *Commencement Handbook,* which is mailed to each candidate by the end of May. You may purchase graduation announcements at the ASUCLA Campus Photo Studio (150 Kerckhoff Hall).

Colleges and Schools

Organization

This catalog is organized into the 13 colleges and schools which are the University's component parts. Each of the following chapters is devoted to a single college or school. Each is introduced by general information on scope and emphasis, the academic departments it encompasses, admission standards, and requirements for undergraduate and graduate degrees.

The overall college or school description is followed, in alphabetical sequence, by its departmental listings. Here you will find faculty rosters, departmental degree requirements, requirements for the major, and descriptions of all courses (lower division, upper division, and graduate) offered by that department or interdepartmental degree program. (If you are not certain which college or school offers a particular program, see the organization chart on the inside front cover.)

Since the great majority of UCLA's students and degree programs are housed within the College of Letters and Science, that unit is presented first. It is followed by the other general campus units offering undergraduate programs: the College of Fine Arts and the School of Engineering and Applied Science. The graduate professional schools of Architecture and Urban Planning, Education, Law, Library and Information Science, Management, and Social Welfare follow in alphabetical sequence. The health science disciplines, which include the Schools of Dentistry, Medicine, Nursing, and Public Health, are the final chapters before the Appendix.

Courses of Instruction

Because the catalog must be prepared well in advance of the academic year it covers, it may not reflect recent changes in courses, curricula, and faculty listings. For more current information, consult the quarterly *Schedule of Classes* available in the Students' Store shortly before the beginning of each new quarter.

Courses listed in this catalog represent the total nonclinical offerings of each college, school, and department at UCLA. Certain courses listed may not be offered every quarter or every year. Where possible, the quarters in which a course is offered have been indicated in parentheses after the instructor's name (F = Fall, W = Winter, Sp = Spring, Sum = Summer).

Academic Credit

A course has a credit value of four quarter units unless otherwise specified in parentheses after the course title.

A listing such as **History 1A-1B-1C, Introduction to Western Civilization,** indicates three full four-unit courses, 1A, 1B, and 1C. The listing **Music 11A-11F, Musicianship (2 units each),** indicates six half-courses at two units each. A course may not be prerequisite to the next in the series unless so designated, but since policies vary among departments, you should check with the departmental counselor or adviser. Credit for a specific course may be dependent on completion of a subsequent course, as noted in the description.

Prerequisites

Education is a building process. It is difficult or impossible to learn advanced principles without first understanding elementary ones. Therefore, one or more lower division courses may be prerequisite to taking another lower division or an upper division course. Prerequisites should be noted carefully — it is your responsibility to meet these requirements in preparation for more advanced work. A course has no prerequisites if none is designated in departmental requirements or course descriptions.

Undergraduate Courses

Undergraduate courses are classified as lower division and upper division. **Lower division courses (numbered 1-99)** are often surveys offering preliminary introductions to the subject field. They are designed primarily for freshmen and sophomores, though upper division students may enroll for unit and grade credit. Lower division courses may not be applied toward graduate degrees.

Upper division courses (numbered 100-199) are open to all students who have met the prerequisites indicated in departmental requirements or the course description. Preparation generally includes at least one lower division course in the subject or two years of college work. With approval of the major department, graduate students may take 100-series courses toward satisfaction of master's degree requirements.

Courses numbered 98 and 198 are group study courses set up on a one-time basis in subjects for which no regular courses have been established. Because they vary in content and are offered irregularly, they are not listed in the catalog.

***Individual special studies courses* (numbered 199, 199F, 199H, and 199I)** involve supervised independent study and research requiring adequate background in the subject proposed for study. These courses are open to juniors (with a minimum 3.0 GPA in the major field), seniors, and graduate students. To enroll, you must complete the appropriate petition (available from the department) and have it approved by both the instructor in charge and the department chair.

Undergraduates may enroll in a maximum of eight units of 199, 199F, 199H, or 199I courses per quarter. After completing 16 units of 199 or 199H credit on a letter grade basis, you must take any additional 199 or 199H courses on a Passed/Not Passed basis. Independent field study courses (199F and 199I) must be taken on a Passed/Not Passed basis; a total of eight units is allowed. If you have an outstanding Incomplete grade in a 199, 199F, 199H, or 199I course, you may not register for another until the I grade is removed. See departmental listings and individual course descriptions for specific prerequisites and credit limitations.

Graduate Courses*

Graduate courses numbered 200-299 are generally open only to graduate students who have completed basic undergraduate courses in the subject. Courses and seminars in the 200 series can fulfill the minimum graduate course requirement for any advanced degree.

With departmental and instructor consent, and subject to requirements in the appropriate college or school, undergraduate students may enroll in 200-series courses for unit credit toward the bachelor's degree. If you take a graduate course as an undergraduate, you may not apply that same course later toward a higher degree.

Graduate courses numbered 300-399 are highly specialized teacher-training courses which are not applicable toward University minimum requirements for graduate degrees. They are acceptable toward the bachelor's degree only at the discretion of the individual college or school.

Graduate courses numbered 400-499 are designed for professional programs leading to graduate degrees other than the M.A., M.S., and Ph.D. These courses may not be used to satisfy minimum graduate course requirements for the M.A. or M.S. degree but may apply as electives.

Individual study and research courses (numbered 500-599) are reserved for advanced study and are not open to undergraduates. Courses are numbered as follows: 595/596 = directed individual study or research; 597 = preparation for master's comprehensive or doctoral qualifying examination; 598 = master's thesis research and preparation; and 599 = doctoral dissertation research and preparation. (Courses numbered 501 are not individual study and research but are cooperative programs held in conjunction with other institutions.) See individual departmental listings for specific limitations on 500-series courses.

*These definitions do not apply to the School of Law, which maintains its own course numbering system.

University Extension Courses

In general, you may not attend University of California Extension for degree credit if you are enrolled in UCLA regular session at the same time. However, certain Extension courses (numbered 1-199), prefixed by XL or XLC in the course listings, yield credit toward the bachelor's degree. Graduate students may petition to apply up to two XLC courses toward the master's degree. For more details, see "Concurrent Enrollment" earlier in this chapter.

Concurrent and Multiple Listings

Concurrently scheduled courses (identified by a capital C before the course number) are pairs of courses, usually within a single department or program, for which credit is given at two levels — undergraduate and graduate. Concurrently scheduled courses are offered at the same time and place with the same instructor, but work levels and performance standards are evaluated differently for students at each level. (Concurrently scheduled courses as described here should not be confused with concurrent courses offered through University Extension.)

Multiple-listed courses (identified by a capital M before the course number) are courses of the same format and level offered jointly by more than one department. For example, Byzantine Civilization is offered by the Department of Classics (Classics M170A) and the Department of History (History M122A). You will find that particular course listed under both departments in Chapter 5 on the College of Letters and Science.

Faculty Rosters

Faculty rosters in each academic department are listed in the following order:

- — Professors
- — Associate Professors
- — Assistant Professors
- — Lecturers
- — Adjunct and Visiting faculty in each of these four Academic Senate classifications

In the case of interdepartmental degree programs, all participating faculty members have appointments in regular academic departments. Participating faculty are listed in the above order, with the home department or specialty of each member indicated in parentheses.

College of Letters and Science

Raymond L. Orbach, Provost

5

"'The Idea of a Multiversity' is a city of infinite variety. Some get lost in the city; some rise to the top within it; most fashion their lives within one of its subcultures. . . . It offers . . . a vast range of choices, enough literally to stagger the mind. In this range of choices . . . (one) encounters the opportunities and the dilemma of freedom."

Clark Kerr, *The Uses of the University*

With nearly 20,000 students and 900 faculty, UCLA's College of Letters and Science is the largest academic unit in the UC system. Underscoring the "multiversity" concept, its four academic divisions of humanities, physical sciences, social sciences, and life sciences provide the framework for more than 100 majors leading to the Bachelor of Arts or Bachelor of Science as well as to master's and doctoral degrees.

The undergraduate programs in the college stress a "liberal arts education" which brings together perspectives from many fields in a unified approach to learning. Students learn some of the ways issues are analyzed, questions posed, and knowledge organized. After sampling many general subjects, they concentrate on one field or subject and are required to pursue it rigorously and in depth, according to the standards of scholars in the field. When they reach the graduate level, they will pose their own questions, analyze academic issues of their own making, and, through their research, participate in the creation of knowledge.

College of Letters and Science

A316 Murphy Hall, (213) 825-1965

The primary units of the College of Letters and Science are the academic departments which are grouped in four divisions: humanities, physical sciences, social sciences, and life sciences. Each division is headed by a dean who reports directly to the provost.

In addition to departmental advising, the Division of Undergraduate Programs and Services, under the direction of an associate provost, provides a network of student assistance within its two components: College Counseling Service and Preparatory Programs.

Undergraduate Study

The degree programs in the College of Letters and Science are designed to expose students to a variety of intellectual challenges by combining a wide distribution of courses and the opportunity to specialize in one particular field. To this end, you are required to select lower division courses that deal with the general foundations of human knowledge. In upper division courses you are relatively free to concentrate attention on one field of interest: your major.

You are expected to select a major by the beginning of your junior year. This may be a program of related upper division courses within a single department (departmental major) or a group of related courses involving a number of departments (interdepartmental major) or, under certain circumstances, a group of courses selected to meet your special need (individual major). The pursuit of such definite courses of study often requires knowledge of courses known as *prerequisites*.

Counseling Services

The College Counseling Service is located in A316 Murphy Hall. The staff is specially trained to assist you with questions pertaining to academic regulations and procedures, selection of courses, and the many options and alternatives available to enhance your university education.

Some questions can be answered at the college information window or by calling 825-1965. If you would like to confer with a counselor regarding overall degree requirements, academic difficulty, program planning, or assistance in selecting a major, you can arrange an appointment at the information window. Appointments with counseling assistants can be scheduled by calling 206-6681. Group counseling sessions on a variety of academic issues are offered throughout the year.

For information on the Learning Resource Centers, ASK peer counselors, and Preparatory Programs, see Chapter 2.

Your Major

Many entering freshmen are unsure about specific academic goals and request to be admitted to the college as "undeclared." These students often explore fields of study by taking introductory courses in the physical and life sciences, social sciences, and humanities in search of an area that most excites their interest (see "Choosing Your Major" in Chapter 2 of this catalog).

All students with 90 or more units toward a degree are expected to declare a premajor or a major. When you are ready to do so, obtain approval on a Petition for Declaration of Major from the department or interdepartmental degree committee which governs your intended major and file the form at the College Counseling Service Office.

You can obtain help with your academic planning from a variety of resources, including the College Counseling Service in A316 Murphy Hall (825-1687 or 825-1965) and the Placement and Career Planning Center (825-2981). In addition, faculty members and counselors in each college department are available to discuss in detail the courses and programs in their respective fields. For further suggestions, see "Advising and Academic Assistance" in Chapter 2.

Assessing Progress Toward Your Degree

One of your responsibilities as a UCLA student includes a regular monitoring of all requirements necessary for the degree. It is imperative that you read this catalog carefully and consult regularly with the Letters and Science counseling staff for confirmation of the requirements you need. "Degree checks" are available by appointment. Departmental counselors can advise you regarding progress and completion of your major requirements. A final audit of degree requirements will be sent to you by the Registrar's Office toward the end of your studies. However, it is important that you maintain an accurate assessment of progress toward your degree by utilizing departmental and College Counseling Service resources.

Minimum Progress

UCLA is a full-time institution, and it is expected that students will complete their undergraduate degree requirements promptly. The recommended study load for an undergraduate in the College of Letters and Science is 12 to 16 units per quarter.

According to Academic Senate regulations, Letters and Science undergraduates who do not pass at least 36 units during any three consecutive terms will be placed on probation, and students who do not pass at least 32 units during three consecutive terms will be subject to disqualification from registration at the University. Exceptions may be granted by the college due to poor health, family responsibilities, or regular employment requiring 50 percent time or more.

Letters and Science Majors

A major in the College of Letters and Science consists of at least nine and no more than 15 upper division courses (between 36 and 60 units). All courses applied toward the major and preparation for the major must be taken for a letter grade unless otherwise stipulated by the department. If you have been away from the University for several terms, you should consult with your major department or curriculum adviser concerning the requirements under which you will graduate.

There are three categories of majors in the College of Letters and Science:

Departmental Majors

A departmental major consists of a group of related upper division courses, of which at least six courses are in one department. These majors are supervised by established campus departments. There are 78 departmental majors currently offered by the college.

Majors and Degrees Offered

African Area Studies (M.A.)
African Languages (B.A.)
Afro-American Studies (B.A., M.A.)
American Indian Studies (M.A.)
Ancient Near Eastern Civilizations (B.A.)
Anthropology (B.A., M.A., Ph.D.)
Applied Linguistics (C.Phil., Ph.D.)
Applied Mathematics (B.S.)
Arabic (B.A.)
Archaeology (M.A., C.Phil., Ph.D.)
Asian American Studies (M.A.)
Astronomy (B.S., M.S., M.A.T., Ph.D.)
Atmospheric Sciences (B.S., M.S., C.Phil., Ph.D.)
Biochemistry (B.S., M.S., C.Phil., Ph.D.)
Biology (B.S., M.A., C.Phil., Ph.D.)
Chemistry (B.S., M.S., C.Phil., Ph.D.)
Chemistry/Materials Science (B.S.)
Chicano Studies (B.A.)
Chinese (B.A.)
Classical Civilization (B.A.)
Classics (B.A., M.A., C.Phil., Ph.D.)
Cognitive Science (B.A.)
Communication Studies (B.A.)
Comparative Literature (M.A., C.Phil., Ph.D.)
Cybernetics (B.S.)
East Asian Languages and Cultures (M.A., C.Phil., Ph.D.)
East Asian Studies (B.A.)
Economics (B.A., M.A., C.Phil., Ph.D.)
Economics/Business (B.A.)
Economics/International Area Studies (B.A.)
Economics/System Science (B.S.)
English (B.A., M.A., C.Phil., Ph.D.)
English/Greek (B.A.)
English/Latin (B.A.)
Folklore and Mythology (M.A., Ph.D.)
French (B.A., M.A., C.Phil., Ph.D.)
French and Linguistics (B.A.)
General Chemistry (B.S.)
General Physics (B.A.)
Geochemistry (M.S., C.Phil., Ph.D.)
Geography (B.A., M.A., C.Phil., Ph.D.)
Geography/Ecosystems (B.A.)
Geology (B.S., M.S., C.Phil., Ph.D.)
Geology — Engineering Geology (B.S.)
Geology — Geochemistry (B.S.)
Geology — Nonrenewable Natural Resources (B.S., M.S.)
Geology — Paleobiology (B.S.)
Geophysics — Applied Geophysics (B.S.)
Geophysics and Space Physics (B.S., M.S., Ph.D.)
German (B.A., M.A.)
Germanic Languages (C.Phil., Ph.D.)
Greek (B.A., M.A.)
Hebrew (B.A.)
Hispanic Languages and Literatures (C.Phil., Ph.D.)
History (B.A., M.A., C.Phil., Ph.D.)
History/Art History (B.A.)
Indo-European Studies (C.Phil., Ph.D.)
Islamic Studies (M.A., C.Phil., Ph.D.)
Italian (B.A., M.A., C.Phil., Ph.D.)
Italian and Special Fields (B.A.)
Japanese (B.A.)
Jewish Studies (B.A.)
Kinesiology (B.S., M.S., Ph.D.)
Latin (B.A., M.A.)
Latin American Studies (B.A., M.A.)
Linguistics (B.A., M.A., C.Phil., Ph.D.)
Linguistics and Computer Science (B.A.)
Linguistics and East Asian Languages and Cultures (B.A.)
Linguistics and English (B.A.)
Linguistics and French (B.A.)
Linguistics and Italian (B.A.)
Linguistics and Philosophy (B.A.)
Linguistics and Psychology (B.A.)
Linguistics and Scandinavian Languages (B.A.)
Linguistics and Spanish (B.A.)
Mathematics (B.S., M.A., M.A.T., C.Phil., Ph.D.)
Mathematics/Applied Science (B.S.)
Mathematics/Computer Science (B.S.)
Mathematics of Computation (B.S.)
Microbiology (B.S., M.A., Ph.D.)
Molecular Biology (Ph.D.)
Near Eastern Languages and Cultures (M.A., C.Phil., Ph.D.)
Near Eastern Studies (B.A.)
Philosophy (B.A., M.A., C.Phil., Ph.D.)
Physics (B.S., M.S., M.A.T., Ph.D.)
Political Science (B.A., M.A., C.Phil., Ph.D.)
Portuguese (B.A., M.A.)
Psychobiology (B.S.)
Psychology (B.A., M.A., C.Phil., Ph.D.)
Religion, Study of (B.A.)
Romance Linguistics and Literature (M.A., C.Phil., Ph.D.)
Russian Civilization (B.A.)
Russian Linguistics (B.A.)
Scandinavian (M.A.)
Scandinavian Languages (B.A.)
Slavic Languages and Literatures (B.A., M.A., C.Phil., Ph.D.)
Sociology (B.A., M.A., C.Phil., Ph.D.)
Spanish (B.A., M.A.)
Spanish and Linguistics (B.A.)
Spanish and Portuguese (B.A.)
Teaching English as a Second Language (M.A.)
World Arts and Cultures (B.A.)

Interdepartmental Majors

An interdepartmental major consists of at least 13 related upper division courses, of which no more than eight are in one department. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of departmental division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

The College of Letters and Science currently offers 24 interdepartmental majors. Although most lead to bachelor's degrees, there are some which lead to graduate degrees only. Check the chart of majors and degrees for the programs which interest you.

African Area Studies
Afro-American Studies
American Indian Studies
Applied Linguistics
Archaeology
Asian American Studies
Chemistry/Materials Science
Chicano Studies
Communication Studies
Comparative Literature
Cybernetics
East Asian Studies
Economics/System Science
Folklore and Mythology
History/Art History
Indo-European Studies
Islamic Studies
Latin American Studies
Mathematics/Computer Science
Molecular Biology
Near Eastern Studies
Religion, Study of
Romance Linguistics and Literature
World Arts and Cultures

You can find a detailed description of each of these majors under their respective headings later in this chapter.

Individual Majors

If you have some unusual but definite academic interest for which no suitable major is offered at the University and you have completed at least three quarters of work (nine courses) at the University with a grade-point average of 3.4 or better, you may plan an individual major. The consent of the dean of the Division of Honors and the assistance of a faculty adviser are required.

The major should consist of at least 12 and no more than 15 upper division courses, a majority of which are in departments offering a major in the college. A senior thesis is required. The title of the major will be entered in the memoranda column of your official transcript; your diploma will read "Individual Field of Concentration." For further details about individual majors, contact the Division of Honors in A311 Murphy Hall (825-1553).

Supplemental Programs

The college offers no "minors"; instead, you may choose from nine different programs which are not degree-granting majors, but are sequences of supplemental courses designed to enhance your work in certain areas. Each of these programs must be taken jointly with an organized departmental or interdepartmental major:

African Studies
Asian American Studies
Business and Administration
Computing, Program in
Diversified Liberal Arts
International Relations
Law and Society
Urban Studies or Organizational Studies
Women's Studies

Detailed descriptions of each program are given under their respective headings later in this chapter.

Student Research Program (SRP)

For information on this program, see "Alternative Academics" in Chapter 2.

Double Majors

If you are in good academic standing, you may be permitted to have a double major consisting of departmental majors from two departments within this college. They must both be completed within the maximum limit of 228 units, and you must obtain the approval of both departments.

With few exceptions, double majors in the same department are unacceptable. If the majors are not in the same division of the college, you must designate one of the two majors as the principal one for the purpose of satisfying general education requirements. No more than five upper division courses may be common to both majors.

Courses outside the division of the principal major which are required in preparation for that major may be used to satisfy general education requirements. Courses required for the secondary major (including preparation for the major) also may satisfy general education requirements.

Changing Your Major

If you are in good academic standing and wish to change your major, you may petition to do so provided you can complete the new major within the 216-unit limit (228 for double majors and special programs). Petitions must be submitted to and approved by the department or committee in charge of the new major. Admission to certain majors may be closed or restricted; changes are normally not permitted if you are on probation or have begun your last quarter.

If you fail to attain a grade-point average of 2.0 (C) in preparation for the major or major courses, you may be denied the privilege of entering or continuing in that major. Some departments may have higher grade-point requirements for their preparation and major courses; consult the appropriate department regarding minimum standards.

The Study List

The required study load for undergraduate students in the College of Letters and Science is 12 to 16 units (three to four courses) per quarter. For exceptions, see "Minimum Progress" earlier in this section. Three courses are recommended for students in the first quarter of the freshman year. All other students who have a C average or better may carry four and one-half courses (18 units) without petition. After the first quarter, you may petition to enroll in as many as five courses if you attained at least a B average the preceding quarter in a program of at least three graded courses. First-quarter transfer students from any other campus of the University may carry excess Study Lists on the same basis as students who have completed one or more quarters at UCLA; however, they are not encouraged to do so.

Requirements for the Bachelor's Degrees

Each student must meet three levels of requirements for the Bachelor of Arts or Bachelor of Science degree: University requirements, college requirements, and department requirements (including preparation for the major and major requirements). For details on the latter level, see the department and major of your choice.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see "Undergraduate Degree Requirements" in Chapter 2.

College Requirements

The College of Letters and Science has six types of requirements which must be satisfied for the award of the degree: unit, major and scholarship, residence, foreign language (effective Fall Quarter 1988), English composition, and general education requirements.

Unit Requirements

You must satisfactorily complete for credit a minimum of 180 units (45 courses) for the bachelor's degree. A maximum of 216 (228 for double majors and special programs) units is allowed. After having credit for 216 (or 228) units, you will not be permitted to continue except in rare cases which must be approved by the college. If you have credit for English 1 taken Fall Quarter 1979 through Summer Quarter 1984 at UCLA, you will be required to complete satisfactorily 182 units (45½ courses); a maximum of 218 (or 230) units is then allowed. If you have advanced placement (transfer) credit, you may exceed the unit maximum by the amount of that credit.

Structure of a Degree

Three levels of degree requirements are included within the 180-unit minimum/216- or 228-unit maximum limits for the bachelor's degree:

University Requirements

(1) Subject A or English as a Second Language (ESL)

(2) American History and Institutions

College Requirements

(1) English Composition or ESL Composition

(2) General Education

Department Requirements

(1) Preparation for the Major

(2) Major Requirements

The remaining units, defined as electives, are courses which vary according to your interests and goals. When selecting your courses, keep the following degree criteria in mind:

Scholarship

You must attain an overall 2.0 minimum grade-point average in the 180/216 or 228 units required and must satisfy the scholarship requirements of your major department (usually a 2.0 average in the preparation and major courses, but it may be higher in the former, according to departmental requirements).

Residence Requirement

See "Residence Requirements" later in this section.

Upper Division Unit Requirement

For students entering in Fall Quarter 1982 or later, at least 72 units (18 courses) must be upper division (numbered 100-199).

For students entering in Fall Quarter 1982 or later, at least 72 units (18 courses) of the above requirement must be upper division (numbered 100-199). Students entering prior to Fall Quarter 1982 must complete at least 52 units (13 courses) in upper division.

Scholarship and Major Requirements

You must attain at least a 2.0 (C) grade-point average in all courses undertaken at this University for receipt of the bachelor's degree. You must also attain a 2.0 GPA in a major and satisfy both the course and scholarship requirements of that major (including preparation for the major) in the College of Letters and Science.

Residence Requirements

Sixty-eight of the last 80 units completed for the degree must be earned in residence in the college. No more than 16 of the 68 units may be completed in UCLA Summer Sessions. While enrolled in the college you must complete at least 10 upper division courses (40 units), including six courses in the major. These residence requirements apply to all students, both continuing and transfer.

Foreign Language Requirements

The College of Letters and Science does not have a collegewide requirement for foreign language at this time, but one will become effective in Fall Quarter 1988 (see "General Education Requirements" below). Specific departments or majors within the college, however, may impose such requirements at present. Credit will not be allowed for a less advanced course in grammar and/or composition after you have completed a more advanced course. For other limitations, see "Credit Limitations" later in this section.

College credit for an international student's native language and literature is allowed for (1) courses taken in native colleges and universities or (2) upper division and graduate courses taken at the University of California or another English-speaking institution of approved standing (no credit is allowed for lower division courses).

English Composition Requirement

Note: You must complete the University's Subject A requirement prior to completing the college's English Composition requirement.

You may satisfy the English Composition requirement by taking one course from English 3, 4, Humanities 2A, 2B, 2C. The course must be taken for a letter grade, and you must receive at least a C; a grade of C – is not acceptable. Humanities 2A, 2B, or 2C may be applied toward the humanities general education requirements; English 3 or 4 may not be applied.

The composition requirement may also be satisfied by scoring 4 or 5 on the College Entrance Examination Board (CEEB) Advanced Placement Test in English or by passing the English 3 Proficiency Examination. Students scoring 660 or better on the CEEB English Achievement Test are eligible for this proficiency exam.

You must satisfy the composition requirement within your first three quarters in residence.

Transfer Students: If you have completed an English composition course graded Passed, you may take the English 3 Proficiency Examination by presenting a letter of authorization from the college to the Freshman Writing Program. If you have received a grade of C or better in a college composition course that has not satisfied the requirement, you may be eligible for the proficiency examination after a Freshman Writing Program interview. Eligible students must register for the examination in the Freshman Writing Program Office, 271 Kinsey Hall, before the first day of enrollment for the quarter.

If you have credit for 90 or more units and have not satisfied the requirement, you are expected to include an acceptable composition course on your Study List during your first quarter in residence in the college. If you are required to take English B to satisfy the Subject A requirement, you should, on completion of that requirement, take an acceptable composition course in your second quarter in residence.

English as a Second Language (ESL) Students: If your native language is not English, you may satisfy the English Composition requirement by completing English (ESL) 36 with a grade of C or better. Admission into course 36 is determined by a Composition Placement Test administered the first day of class each quarter. A low score on the test may require that you enroll in English (ESL) 35 prior to course 36.

General Education and Breadth Requirements

Effective Fall Quarter 1986, all entering students are required to fulfill the general education requirements. Continuing UCLA students in the College of Letters and Science who completed **16 or more units** before Fall Quarter 1983 are eligible to follow the breadth requirements as described in previous catalogs.

General Education Requirements

The general education requirements are intended to define a "core" of knowledge necessary to a liberal arts education. Majors are classified in the four divisions of the college; GE requirements specify a limited number of courses within smaller subgroups. This arrangement is designed to provide a conceptual overview of core areas without a formal core curriculum.

The requirements consist of two parts. You must (1) demonstrate basic proficiency in quantitative reasoning, foreign language, and English composition and (2) complete course requirements in each of the four divisions of the college: humanities, physical sciences, social sciences, and life sciences.

(1) Basic Proficiency Levels

Note: All courses taken to satisfy GE proficiency requirements must be completed with a grade of Passed or C or better.

(a) *Quantitative Reasoning:* May be satisfied by achieving an SAT mathematics score of 600 or better, a CEEB mathematics score of 550 or better, or by completing one of the following courses: Anthropology 186A; Computer Science 10C or 10F; Economics 40; Mathematics 2 or any higher numbered course except 38A, 38B, and 104; Philosophy 31; Political Science 6; Program in Computing 10A, 10B, 10C; Public Health 100A, 100B, 100C, 100D; or Sociology 18.

(b) *Foreign Language:* This requirement becomes effective for students entering UCLA in Fall Quarter 1988 and thereafter. At that time it may be satisfied by passing college-level language instruction through level three or by achieving a score indicating competence equivalent to level three on the Educational Testing Service Advanced Placement (AP) or UCLA departmental placement examination.

(c) *English Composition:* Same as the college English Composition requirement described above. Transfer students should consult the college concerning application of transfer courses toward these requirements and read individual course descriptions to avoid possible duplication. Local community college counselors have lists of courses applicable toward UCLA requirements.

(2) Course Requirements

As specified on the chart labeled "Courses to Fulfill GE Requirements" on the next page, you must pass four courses in the humanities (literature, philosophy, language and linguistics, culture and civilization, the arts), three courses in the physical sciences, four in the social sciences (two from historical analysis and two from social analysis), and three courses in the life sciences. In the humanities, at least one course must be from literature and no more than two may be from any single subgroup.

Courses required to satisfy the major or other courses taken in the major department may not be used to satisfy the general education requirements. However, courses outside the major which are required as preparation for a major may be used to satisfy these requirements.

Course Exemptions: Students majoring in the humanities are exempt from two courses, one of which is in their major subgroup. Students majoring in the physical sciences are exempt from two courses in the physical sciences group. Students in the social sciences are exempt from two courses in the subgroup of their major, and students in life sciences are exempt from two courses in the life sciences grouping. At least 14 courses (12, with exemptions) must be completed.

Advanced Placement Credit: For application of advanced placement (AP) credit on the general education requirements, see the chart later in this section or consult the College Counseling Service.

General Education Groupings by Major

For the purpose of these requirements, departmental and interdepartmental majors are classified in the divisions listed below. Not all courses within a department apply on GE requirements in the division of the major (e.g., psychology is listed as a life science; however, Psychology 10 appears as a social science under social analysis).

(A) Humanities

A1: Literature

African Languages
Arabic
Chinese
Classics
English
English/Greek
English/Latin
French
German
Greek
Hebrew
Italian (including Italian and Special Fields)
Japanese
Latin
Portuguese
Scandinavian Languages
Slavic Languages and Literatures
Spanish
Spanish and Portuguese
World Arts and Cultures

A2: Philosophy

Philosophy

A3: Language and Linguistics

French and Linguistics
Linguistics (including all Linguistics and special fields majors)
Russian Linguistics
Spanish and Linguistics

A4: Culture and Civilization

Ancient Near Eastern Civilizations
Classical Civilization
Jewish Studies
Near Eastern Studies
Religion, Study of
Russian Civilization

(B) Physical Sciences

Applied Mathematics
Astronomy
Atmospheric Sciences
Biochemistry
Chemistry
Chemistry/Materials Science
Cybernetics
Economics/System Science
General Chemistry
General Physics
Geology (including all specialization options)
Geophysics (including all specialization options)
Mathematics
Mathematics/Applied Science
Mathematics/Computer Science
Mathematics of Computation
Physics

(C) Social Sciences

C1: Historical Analysis

History
History/Art History

C2: Social Analysis

Afro-American Studies
Anthropology
Chicano Studies
Communication Studies
East Asian Studies
Economics (including all specialization options except Economics/System Science)
Geography
Geography/Ecosystems
Latin American Studies
Political Science
Sociology

(D) Life Sciences

Biology
Cognitive Science
Kinesiology
Microbiology
Psychobiology
Psychology

Courses to Fulfill GE Requirements*

(A) Humanities

Four courses, with at least one from Group A1 and no more than two courses from any single group:

(1) Literature

Classics 141, 142, 143, 144
East Asian Languages and Cultures 140A, 140B, 140C, 141A, 141B
English 10A, 10B, 10C, 70, 75, 80, 85, 90, 100A, 100B, 100C, 102
French 12, 114A, 114B, 114C, 144A, 144B, 144C
German 101A, 101B, 101C
Humanities 1A, 1B, 1C, 2A, 2B, 2C
Italian 50A, 50B
Russian 100, 119, 120, 125, 126
Spanish and Portuguese: Portuguese 120A, 120B, 130A, 130B, 140, Spanish 120A, 120B, 136A, 136B, 160A, 160B, 160C

(2) Philosophy

Philosophy 1, 2, 4, 5A, 6, 7, 8, 10, 21, 22

(3) Language and Linguistics

Linguistics 1, 100
Language: Formal University foreign language instruction at level four or higher; no more than one course at level four or higher may be used

(4) Culture and Civilization

Classics M70
East Asian Languages and Cultures 40A, 40B, 42
Folklore and Mythology 15, 101
German 100A, 100B, 100C
History M70
Italian 42A, 42B
Near Eastern Languages and Cultures: Berber 130, Iranian 169, 170, Jewish Studies 110, Turkic Languages 160
Slavic Languages and Literatures: Slavic 99, Bulgarian 99, Russian 99, Romanian 99
Spanish and Portuguese M42, M44

(5) The Arts

Art, Design, and Art History: Art 22, Art History 50, 51, 54, 55, 56, 57, Design 30A
Classics 151A, 151B, 151C, 151D
Dance 134A, 134B, 181A, 182A, 187A
Music (no more than one course from a single grouping):
(a) 2A, 2B, 137A, 137B, 138
(b) 130, 133, 134, 135A, 135B, 135C, 139, 188A through 188F, 189
(c) 131A, 131B, 140A, 140B, 140C, 141, 145, 152, 157
(d) 144
Theater, Film, and Television: Motion Picture/Television 106A through 106E, Theater 5A, 5B, 5C, 102A, 102B, 102D, 102E, 104D, 104E, 104F

(B) Physical Sciences

Three courses from the following:

Astronomy 3, 3H, 4, 81, 82
Atmospheric Sciences 2, 3, 6
Chemistry 2, 11A, 11B
Earth and Space Sciences 1 or 100, 2, 5, 9, 15
Engineering 11
Geography 1
Mathematics 3A, 3B, 3C, 3E, 31A, 31B, 32A, 32B
Physics 3A, 3B, 3C, 6A, 6B, 6C, 8A through 8E, 10, 11

(C) Social Sciences

Four courses, two from each group:

(1) Historical Analysis

Two courses from a single sequence are recommended:

Classics 10, 20
Economics 107
History 1A, 1B, 1C, 2, 3A, 3B, 3C, 4, 6A, 6B, 6C, 7A, 7B, 8A, 8B, 8C, 9A, 9B, 9C, 9D, 10A, 10B
Political Science 111A, 111B, 111C, 114A, 114B

(2) Social Analysis

Anthropology 5 or 22, 6, 33
Communication Studies 10
Economics 1 and/or 2 or 100**, 110
Geography 3, 4
Political Science 1, 20, 50
Psychology 10
Sociology 1

(D) Life Sciences

Three courses from the following:

Anthropology 1 and/or 2 or 11**
Biology 2, 5, 6, 7, 8, 10, 13, 20, 25
Earth and Space Sciences 115
Geography 2, 5
Kinesiology 12A, 12B, 13, 14
Microbiology 6
Psychology 15

Honors Collegium: Inquire at the Division of Honors (A311 Murphy Hall) for information on courses which satisfy any of the areas of the general education requirement.

*All students are required to fulfill *either* general education *or* breadth requirements, but not both. Refer to the box on page 71 to determine which of the sets of requirements you are required to fulfill.
**Check course descriptions for possible credit duplication.

Credit Limitations

Note: Transfer students with credit from other institutions (advanced standing credit) receive an evaluation from the Office of Undergraduate Admissions and Relations with Schools indicating the transferable units from their former institution(s); however, the following credit limitations may reduce the total number of transferred units which will apply toward the degree in the College of Letters and Science. Consult with a counselor in the College Counseling Service regarding these limitations.

The following credit limitations apply for all students enrolled in the college. In most cases units are not deducted until the final quarter before graduation. Consult a counselor in the College Counseling Service if you have questions.

Subject A

No degree credit will be granted for Subject A whether completed at UCLA or another UC campus. Consult a college counselor regarding Subject A equivalent courses from other UC campuses.

Community College

After completing 105 quarter units (26¼ courses) toward the degree in all institutions attended, you will be allowed no further unit credit for courses completed at a community college.

Physical Education

No more than four units in physical education activities courses may be applied toward the bachelor's degree.

300- and 400-Level Courses

No more than two courses (eight units) in the 300 and 400 series of courses may be applied toward the bachelor's degree. Credit is not granted for X300 and X400 courses taken in University Extension unless you have petitioned the college for approval before enrollment. Such petitions are rarely granted.

Performance Courses

No more than 12 units of music and/or dance performance courses (Dance 70 through 76B, 79A through 79Z, 171B through 176B, and Music 80A-80N and 81A-81Z) may be applied toward the bachelor's degree whether taken at UCLA or another institution. Letters and Science students electing these courses must enroll on a Passed/Not Passed basis only. For further information on these limits, see "Passed/Not Passed Grades" in Chapter 4.

College Level Examination Program

Credit earned through the College Level Examination Program (CLEP) will not be applied toward the bachelor's degree.

Advanced Placement (AP) Tests

Advanced Placement (AP) Test credit will not be applied toward a degree unless you had less than 36 units of credit at the time of the examination(s).

ROTC Courses

No more than 24 units of credit in aerospace studies, military science, or naval science may be applied to the 180-unit minimum required for the degree.

Independent Study Courses

No more than two courses (eight units) of credit may be taken per quarter in special independent study courses. The total number of units allowed in such courses for a letter grade is 16; see specific restrictions under each departmental listing.

Chemistry 2

No unit credit will be granted toward the degree for Chemistry 2 if one year of high school chemistry was completed with a grade of C or better*. The maximum deduction will be four units.

Physics 3A, 6A, 10

Any two or more courses from Physics 3A, 6A, and 10 will be limited to a total of six units of credit.

***Note: Effective Fall Quarter 1984 and thereafter, units and grade points will be deducted at graduation for the duplicated chemistry courses specified above.**

(continued on page 76)

Credit for Advanced Placement Tests

Test	UCLA Course Equivalents*	Credit Allowed on GE Requirements	Credit Allowed on Breadth Requirements
Art		No application for art

Statistics

No credit will be allowed for more than one lower division course in statistics or for more than one sequence of such courses whether taken at UCLA or another institution.

Education Abroad Program

Students participating in the Education Abroad Program may receive a maximum of 48 units of credit toward the degree in addition to the eight units maximum allowable for the Intensive Language Program.

Credit by Examination

Within the College of Letters and Science, eligibility for credit by examination is usually limited to students who have been approved as Departmental Scholars or who are admitted to a departmental honors program or the Division of Honors.

You may petition for credit by examination for one course at a time. The examination for that course must be taken successfully before you may petition for credit by examination in another course. Petitions for credit by examination ($5 each) are available only through an appointment with a counselor in the Division of Honors. Approval is given or withheld by the dean of the Division of Honors who may limit the number of such petitions you present.

Honors

College Honors

The Certificate of College Honors is the highest academic recognition the College of Letters and Science confers on its undergraduates. The College Honors program provides the exceptional Letters and Science undergraduate an opportunity to pursue individual excellence.

The certificate is awarded to graduating seniors with an overall University of California grade-point average of 3.5 or better who have completed either 44 units of honors coursework **or** 36 units of honors coursework that include a senior research project/thesis based on original research. With the assistance of Division of Honors counselors, you integrate this coursework throughout your undergraduate education with other University, college, and major requirements for the bachelor's degree. In this way, these units need not be above and beyond your other academic commitments.

Students in the College Honors program are entitled to specialized counseling within the division, preferential preenrollment in classes each quarter, access to specially designed honors classes, eligibility for unique scholarships and research stipends, attendance at special forums, speeches, and events, counseling on graduate and preprofessional programs, graduate library privileges, access to the honors computer facility, and a filing and mailing service for letters of recommendation. Incoming freshmen who are eligible for College Honors based on SAT scores and GPA are also assisted in obtaining on-campus student housing for the first year.

To qualify for College Honors, entering freshmen must (1) have an overall GPA of 3.5 or better and an SAT score of 1,300 or better (on one test date) **or** (2) graduate in the top three percent of their high school class. Continuing UCLA and transfer students with at least 12 or more graded units at UCLA and a cumulative UC GPA of 3.5 or better who can complete the honors course requirements prior to graduation are encouraged to participate, as are both regularly qualified and potentially successful underrepresented minority students.

You may apply for admission to College Honors at A311 Murphy Hall. For further information, attend one of the group meetings offered regularly by the Division of Honors.

Honors Status

A student in the College of Letters and Science who has demonstrated superior academic achievement is eligible to apply for admission to Honors Status, which is recorded on the transcript. Admission may be granted by the dean of the Division of Honors after completion of 12 or more graded units at UCLA with a cumulative UC grade-point average of no less than 3.5. Continued superior academic performance is required to remain in Honors Status. Apply at A311 Murphy Hall.

Students with Honors Status are entitled to specialized counseling within the division, access to the honors computer facility, and a filing and mailing service for letters of recommendation. Honors Status students are also eligible for research funding through the Division of Honors. For details on these programs, consult the Division of Honors or your major department.

Honors with the Bachelor's Degree

Honors with the Bachelor's Degree are awarded according to your overall grade-point average at the beginning of your last quarter of academic work or, if not then eligible, at graduation. To be eligible, you must have completed 90 or more graded units at the University of California. Coursework taken on the Education Abroad Program may not be applied toward Honors with the Bachelor's Degree. The levels of honors and the requirements for each level are: *Cum laude,* an overall average of 3.5; *Magna cum laude,* 3.65; *Summa cum laude,* 3.85.

Dean's Honors List

The Dean's Honors List recognizes high scholastic achievement in any one quarter. The following criteria are used to note Dean's Honors List on the student records: (1) a 3.75 GPA in any one quarter with at least 12 graded units and no grade of NP or I or (2) a 3.66 GPA and at least 56 grade points during the quarter, with no grade of NP or I. Dean's Honors List is automatically recorded on your transcript.

Departmental Scholar Program

Departments may nominate exceptionally promising undergraduate students (juniors and seniors) as Departmental Scholars to pursue bachelor's and master's degrees simultaneously.

Qualifications include completion of 24 courses (96 quarter units) at UCLA or the equivalent at a similar institution, the requirements in preparation for the major, and a UC cumulative GPA of 3.5 or better. You must also have at least one quarter's coursework remaining at UCLA. To obtain both the bachelor's and master's degrees you must be provisionally admitted to the Graduate Division, fulfill requirements for each program, and maintain a minimum B average. No course may be used to fulfill requirements for both degrees. If you are interested in becoming a Departmental Scholar, consult your department well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog). For further information, consult the Division of Honors.

The Honors Collegium

The Honors Collegium is a unique and innovative educational alternative designed primarily for students in their freshman and sophomore years. Refer to Honors Collegium later in this chapter for a complete description of the program.

Division of Honors Office

The Division of Honors, located in A311 Murphy Hall (825-1553, 825-3786), provides academic counseling and services for College Honors and Honors Status students, Departmental Scholars, Education Abroad Program students, students pursuing individual majors, and students participating in the High School Scholars program. The division also provides counseling for Regents Scholars, National Merit Scholars, and Alumni Scholars during their first year of attendance. Services offered include academic counseling, degree checks, assistance with petitions, and, for College Honors students only, letters of recommendation to graduate and professional schools.

A variety of scholarships and awards for qualified continuing students and graduating seniors is also available.

In addition, the Division of Honors administers Phi Beta Kappa (national honor society), the UCLA Debate Union, and the Summer Research Stipend Program.

Preparing for a Professional School

The programs that follow are not degree programs in the College of Letters and Science. The purpose of each grouping of courses is to assist you if you plan to apply to a professional school at the end of your sophomore (90 units) or junior (135 units) year.

If you are not accepted by a professional school, you must declare a major in the College of Letters and Science and complete the requirements for a degree without exceeding 216 units.

New students entering these curricula are listed as "undeclared" majors and are advised in the college unless an adviser is named below in the presentation of the curriculum.

Prehealth Care Advising Office

Information and counseling on preparing for health care professional schools and assistance in filing an application are available through the Prehealth Care Advising Office, College of Letters and Science. **Open counseling sessions are held weekly** for premeds, predents, prenurses, and other prehealth students (time and place are announced in the "What's Bruin" section of the *Daily Bruin* and are posted outside A328 Murphy Hall, 825-1817). Application blanks for AMCAS, MCAT, DAT, etc., may also be obtained from this office. Students in the Division of Honors can make counseling appointments in A311 Murphy Hall.

Predental Curriculum: Three Years

The College of Letters and Science offers a predental curriculum designed to fulfill the basic educational requirements for admission to several dental schools and the general educational requirements of the College of Letters and Science. You should determine and satisfy the specific requirements of the dental schools to which you expect to apply.

To be adequately prepared for the predental curriculum, you should take the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and foreign language.

The 135 quarter units of work required for admission to the UCLA School of Dentistry in this curriculum include the following:

General University Requirements: (1) Subject A; (2) American History and Institutions.

Specific UCLA School of Dentistry Requirements: (1) English 3 and 4; (2) Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, 25, Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or 8A, 8B, and 8C, Biology 5, 7, 8, 8L, Psychology 10.

Social sciences and humanities courses such as anthropology, history, economics, psychology, political science, appreciation of art and/or music, and philosophy should also be included.

For further information, consult *Admissions Requirements of U.S. and Canadian Dental Schools*, AADS, 1625 Massachusetts Avenue NW, Washington, DC 20036. Sample copies of the Dental Admission Test (DAT) are available in the Prehealth Care Advising Office; **open counseling sessions are held weekly** (call 825-1817 for details).

Predental Hygiene Curriculum: Two Years*

The University offers a four-year program in dental hygiene leading to the degree of Bachelor of Science. The first two years may be taken at Los Angeles; the last two years must be taken at the School of Dentistry at the University of California, San Francisco. Admission to UCSF is by competitive application.

The 90 quarter units of work required for admission to the School of Dentistry at UCSF include specific requirements as follows (the courses referred to are UCLA courses which fulfill the requirements):

Curriculum Requirements: (1) Subject A; (2) American History and Institutions (the examination in American History and Institutions may be taken at the UCSF School of Dentistry, but it is preferable to satisfy the requirements in the predental program); (3) one year of English which includes English 3; (4) Chemistry 11A, 11B/11BL, 21, 23, 25; (5) Biology 5, 5L, 7, 8, 8L; (6) Psychology 10 and one additional psychology course; (7) 16 units in social sciences and humanities, including foreign language (one course in speech and one in sociology are required). Courses in anatomy and physiology are strongly recommended.

Open counseling sessions are held weekly; call 825-1817 for details.

Premedical Studies: Four Years

If you intend to apply for admission to a medical school and wish to complete the requirements for a bachelor's degree before such admission, you should select a major within the College of Letters and Science. *Medical schools have no preference as to major. You should choose the major in which you are most interested and can do best.* In addition to fulfilling the requirements of the selected major, you should satisfy the specific requirements for medical schools to which you expect to apply.

High school preparation for premedical studies at the University should include English, three units; United States history, one unit; mathematics, three and one-half units; chemistry, one unit; physics, one unit; biology, one unit; foreign language (preferably French or German), two units. It is desirable that a course in freehand drawing be taken in high school.

The following courses are usually required for admission to the UCLA Medical School: (1) 12 quarter units of English, including at least one course in English composition; (2) Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, 25; (3) Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or 8A, 8B, and 8C; (4) two years of college biology to include the study of cellular, molecular, developmental, and genetic biology, including at least one year of upper division courses. Required lower division courses are Biology 5, 5L, 7, 8, 8L; suggested upper division courses are selected from Biology 110, 138, 144, CM156, 166. Courses in physical chemistry and calculus are strongly recommended. Course requirements for admission to other University of California medical schools vary slightly.

Because requirements for admission to medical schools outside the University of California also vary somewhat, you should consult the following publications: *Medical School Admission Requirements, USA and Canada*, Association of American Medical Colleges, 1 Dupont Circle NW, Washington, DC 20036; *The Education of Osteopathic Physicians*, AACOM, 4720 Montgomery Lane, Suite 609, Washington, DC 20014; and *The New MCAT Student Manual* (also an AAMC publication available at the above AAMC address). **Open counseling sessions are held weekly;** call 825-1817 for details.

Prenursing Curriculum: Two Years

The University offers a four-year course leading to the Bachelor of Science degree in Nursing. The prenursing curriculum in the College of Letters and Science is designed to prepare you for the program in the UCLA School of Nursing. You should apply to the School of Nursing when you have completed or have in progress 84 quarter credits of liberal arts courses with a grade-point average of at least 2.8. Since you must apply during the Fall Quarter of the year prior to the year in which you wish to be enrolled, you must present your proposed curriculum for the remaining quarters.

Because enrollment in the UCLA School of Nursing is limited, you should become familiar with the admission requirements of other nursing programs as early as possible. Contact schools of nursing directly and attend **open counseling sessions** in UCLA's School of Nursing (times are posted in the Office of Student Affairs, 2-200 Factor Building) and those given by the Prehealth Care Advising Office (posted outside A328 Murphy Hall, 825-1817).

*The UCSF School of Dentistry reserves the right to limit enrollment if applications exceed available facilities and to require interviews and aptitude tests if they are necessary in the selection of the class. For further information, see the *Announcement of the School of Dentistry, UC San Francisco.*

New students admitted to the college in this curriculum are counseled in the college as "undeclared" majors but may seek additional advisement during posted weekly open counseling sessions. Students in the college who do not transfer to the UCLA School of Nursing must declare a major and be able to complete all degree requirements within 216 units.

Prenursing Requirements for the UCLA School of Nursing: (1) Anthropology 5; (2) Biology 5, 7; (3) Chemistry 11A, 15, 15L; (4) English 3; (5) Kinesiology 13; (6) Microbiology 10 or 101; (7) Physics 10 or one year of high school physics; (8) Psychology 10, 15; (9) Public Health 161; (10) Sociology 1; (11) recommended electives in the social and biological sciences. All required prenursing courses must be completed for a letter grade.

Preoptometry Curriculum: Three Years

A three-year program designed to prepare you for admission to optometric schools may be completed in the College of Letters and Science. If you are planning to transfer to the School of Optometry at Berkeley, you should contact Assistant Dean Carter of the School of Optometry, University of California, Berkeley, CA 94720, (415) 642-9537, as early in your preprofessional studies as possible.

You will be adequately prepared for preoptometric studies if you have taken the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and two years of one foreign language.

The 135 quarter units of work required for admission to the School of Optometry, UC Berkeley, include the following: (1) Subject A; (2) American History and Institutions.

Specific UC Berkeley School of Optometry Requirements: (1) English 3, 4; (2) Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23; (3) Physics 6A, 6B, and 6C, or 8A, 8B, and 8C; (4) Biology 5, 5L, 7, 8, 8L; (5) Psychology 10; (6) Mathematics 3A, 3B, and 3C, or 31A, 31B, and 50 or Psychology 41; (7) Microbiology 10; (8) Kinesiology 12A, 12B, 13. Recommended: two upper division courses in the biological sciences, preferably in neuroanatomy and neurophysiology.

The balance of the 135 quarter units required for admission may be selected from the social sciences, foreign languages, and the humanities.

For further information, obtain the booklet *Information for Applicants to Schools and Colleges of Optometry* from the American Optometric Association, 243 Lindbergh Boulevard, St. Louis, MO 63141. **Open counseling sessions are held weekly;** call 825-1817 for details.

Prepharmacy Curriculum: Two Years

The School of Pharmacy on the San Francisco campus of the University offers a four-year curriculum leading to the degree of Doctor of Pharmacy. To be admitted to this curriculum you must have met all requirements for admission to the University and have completed, with an average grade of C (2.0) or better, at least 90 quarter units of the program below. Students taking prepharmacy work at the University of California are normally enrolled in the College of Letters and Science. If taken elsewhere, the courses elected must be equivalent to those offered at the University. To complete prepharmacy studies in the minimum time, you should take elementary chemistry, trigonometry, and a full year of intermediate algebra in high school.*

Curriculum Requirements (First Year): (1) Subject A; (2) English 3, 4; (3) Chemistry 11A, 11B/11BL, 11C/11CL; (4) trigonometry and intermediate algebra (if not completed in high school); (5) 28 quarter units of electives selected from courses in foreign language, social sciences, and humanities (within the two-year preparation).

Curriculum Requirements (Second Year): (1) Biology 5, 7, 8, 8L; (2) Physics 3A and 3B, or 6A and 6B, or 8A and 8B; (3) Mathematics 3A and 3B, or 31A and 31B; (4) Chemistry 21, 23; (5) American History and Institutions.

For further information, contact Robert LeWinter, Director of Pharmaceutical Services, 17-135 Center for the Health Sciences (206-6555). **Open counseling sessions are held weekly;** call 825-1817 for details.

Prephysical Therapy Curriculum: Three or Four Years

Students who intend to apply for admission to a physical therapy school should select a major (kinesiology and psychology are commonly selected) and complete the following prerequisite courses: Kinesiology 12A, 12B, and 13 or 14; Biology 5, 7; Chemistry 11A, 11B/11BL, 15, 15L; Physics 3A, 3B, 3C; Psychology 10, 115, 127, 130. Recommended: one course in statistics and one in computing. The prerequisite courses should be taken for a letter grade; GPAs for these courses should not be lower than 3.0, with no grade lower than a C.

Information on physical therapy programs in California may be obtained from the Student Affairs Office in the Department of Kinesiology, 2834 Slichter Hall (825-3891). You should write each school early in your sophomore year for specific admission requirements and application deadlines. Information concerning out-of-state programs may be obtained from the American Physical Therapy Association, 1156 15th St. NW, Washington, DC 20005.

*Students who have completed the two-year prepharmacy curriculum at Los Angeles cannot be assured of admission to the School of Pharmacy on the San Francisco campus. A personal interview may be required. Applicants should contact the school in early fall of the year preceding the September of proposed admission. Contact the Office of Student Affairs, School of Pharmacy. Applications may be obtained from the office of the Director of Admissions, University of California Medical Center, San Francisco, CA 94143-0446, (415) 476-2732. For further information, see the *Announcement of the School of Pharmacy, San Francisco*, which may be obtained from the Dean, School of Pharmacy, University of California Medical Center, San Francisco, CA 94143-0446.

Prepublic Health Studies

The professional and academic fields of public health need individuals from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds and training, including mathematics and the physical, biological, and social sciences. Preparation typically includes a minimum of two courses each in mathematics, biological sciences, and social sciences, and one course in physical sciences.

Interested students and those who wish to apply to the UCLA School of Public Health should review the school's announcement booklet for additional requirements or recommendations for entry into the various programs of study.

Prelaw Studies

Law schools have no preference with regard to specific majors or particular courses. Admission to law school is based on the quality of your academic work, LSAT scores, and other qualities as reflected in letters of recommendation, in the written application, and in interviews. The College of Letters and Science offers advising on preparing for and applying to law schools through **weekly drop-in counseling sessions.** For the time and place of the drop-in sessions, see the "What's Bruin" section of the *Daily Bruin* or call 825-1965. Students in the Division of Honors can make counseling appointments in A311 Murphy Hall.

For additional information, see the *Law School Admission Bulletin* within the "Law School Admission Service Packet" (available at the Admissions Office, UCLA Law School).

Graduate Study

The College of Letters and Science provides graduate students virtually unlimited opportunities for academic pursuit, faculty-sponsored research, and fieldwork relative to specific programs and career goals.

With Graduate Division approval and subject to University minimum requirements, each department sets its own standards for admission and other requirements for the award of the master's and doctoral degrees. See the departmental listings which follow for specific requirements and procedures.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Scope and Objectives

The basic objective of the African Area Studies Program is an intellectual one — to provide interested students with the opportunity to engage in intensive study and research on Africa on an interdisciplinary basis. The program offers high quality African area courses in a wide range of fields, including not only the social sciences and humanities, but increasingly in the professional fields as well. The Master of Arts is not a professional degree, but students are encouraged to enroll in courses in the several professional schools on campus. Articulated degree programs are also offered.

Academic flexibility draws many students to the program. Because there are more than 65 faculty members on campus with African interest and experience in approximately 20 different disciplines, students have multiple options to design individual programs.

According to a recent survey, 37 percent of the program's graduates are continuing study at the postgraduate level, 25 percent are employed in higher education, and 24 percent work with international or foreign organizations in 20 countries.

Master of Arts Degree

Admission

In addition to the University minimum requirements, applicants are required to (1) take the Graduate Record Examination (GRE), (2) submit three letters of recommendation from academic referees, one of which may be from an employer if the applicant has been away from school for some time, (3) submit a sample research project as evidence of serious scholarly potential, and (4) present a resume describing both academic and professional experience.

In addition to meeting the requirements of the Graduate Division, you must have adequate preparation in undergraduate fields related to the program. Required preparation for the M.A. degree in African Area Studies is a Bachelor of Arts in the social sciences or arts and humanities.

Major Fields or Subdisciplines

Studies are concentrated in a major and minor discipline in the social sciences, arts and humanities, or professional schools. For more information and a brochure describing the program, contact the Assistant Graduate Adviser, African Studies Center, 10244 Bunche Hall, UCLA, Los Angeles, CA 90024.

Foreign Language Requirement

You are required to satisfy the language requirement in one of the following ways: (1) take three courses (12 units) in an African language with an average grade of B or better (these courses may not be applied toward the nine courses required for the degree); (2) pass a Linguistics Department examination in an African language not regularly offered; (3) prove that you are a native speaker of an African language; (4) prove that you have a Foreign Service Institute rating of three or above in an African language.

Course Requirements

A minimum of nine courses are required for the M.A., at least five of which must be at the graduate level. The courses must be distributed between disciplines as follows: (1) major discipline — a minimum of five courses, of which three must be at the graduate level. Sociology and anthropology may be taken as a combined major. Other combined majors must be approved by the graduate adviser; (2) minor discipline — a minimum of three courses, of which two must be at the graduate level; (3) third discipline — a course on Africa, preferably of the survey or methodology type, or the yearly colloquium sponsored by the African Studies Center. In addition, African Area Studies M229B and/or History 275 are strongly recommended for all students in the program.

No more than one course graded on an S/U basis may be applied toward the minimum of nine courses required for the degree, except with consent of the graduate adviser. One course in the 500 series may be applied toward the total course requirement and toward the minimum graduate course requirement. With consent of the graduate adviser, another 500-level course may be allowed but may not be applied toward the minimum graduate course requirement.

Thesis Plan

The program normally requires a written comprehensive examination for the M.A. degree. In exceptional cases, and with consent of the graduate adviser, a thesis may be substituted for the comprehensive examination. If you wish to follow the thesis plan, you should select, in consultation with the graduate adviser, a faculty committee to supervise your thesis. The thesis must reflect both the major and minor areas of emphasis. Normally the thesis should be submitted to the committee at the beginning of your fourth quarter in residence and should be approved before the end of that quarter. If the committee does not approve the thesis, you will have failed the requirement and will not be allowed to resubmit the thesis.

Comprehensive Examination Plan

If you select the comprehensive examination plan, you will be required to take a written examination administered by a three-person committee. It is your responsibility to make arrangements for this examination with faculty members in appropriate departments. Exceptions will be granted only with consent of the graduate adviser. The examination will normally be three hours in length.

An oral examination may be held at the discretion of the examining committee after it has read the written examination. If you fail the comprehensive examination, you may retake it only once with consent of the graduate adviser.

Minor Field Certification: To effectively demonstrate competence in your minor field, you must successfully complete the three required courses with grades of B or better. In individual cases, if competence is not demonstrated by the coursework, a question on the minor field will be included in the comprehensive examination.

African Development Studies within the M.A. in African Area Studies

Students interested in an interdisciplinary program in African development studies within the existing master's program should consult the graduate adviser. Coursework focuses on planning and development.

Cooperative Degree Programs

In the articulated degree programs described below, no course may be used for credit toward more than one degree. Thus, courses that have been applied toward the completion of the M.A. degree in African Area Studies may not also be applied toward any other degree.

For more information on any of the cooperative degree programs, contact the Graduate Adviser or Assistant Graduate Adviser, M.A. Program in African Area Studies.

M.F.A./M.A.-African Area Studies

The African Area Studies Program and the Motion Picture/Television Division of the Department of Theater, Film, and Television have an articulated degree program which allows students to combine study for the M.A. in African Area Studies and the M.F.A., with a specialization in motion picture/television. Additional information is available from Teshome Gabriel, Graduate Adviser, African Area Studies Program, and the Graduate Adviser, Graduate Student Affairs Office, Motion Picture/Television Division, UCLA Theater, Film, and Television Department.

M.P.H./M.A.-African Area Studies

The African Area Studies Program and the School of Public Health have an articulated degree program whereby you can work sequentially for the master's degree in African area studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees. Potential applicants may also contact the Office of Student Affairs, UCLA School of Public Health.

English Language Teaching and Research

If you wish to prepare for English language teaching and research, you have two options: (1) selected Africa-related courses in English as a Second Language can be selected as a major or minor field for the M.A. degree or (2) for more extensive study, the M.A. degree can be combined with the postgraduate certificate in TESL by taking additional specified courses.

Graduate Courses

M229B. Africana Bibliography and Research Methods. (Same as Library and Information Science M229B.) Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using the full range of available information resources, including library collections of books, serials, and computerized data bases. Mr. Lauer

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

African Area Studies Course List

All courses are not offered every academic year. You should verify courses with the respective departments.

African Languages (Linguistics) 1A-1B-1C. Elementary Swahili
2A-2B-2C. Intermediate Swahili
7A-7B-7C. Elementary Zulu
8A-8B-8C. Intermediate Zulu
11A-11B-11C. Elementary Yoruba
31A-31B-31C. Elementary Bambara
41A-41B-41C. Elementary Hausa
42A-42B-42C. Intermediate Hausa
103A-103B-103C. Advanced Swahili
143A-143B-143C. Advanced Hausa
150A-150B. African Literature in English Translation
190. Survey of African Languages
199. Special Studies in African Languages
270. Seminar in African Literature

Anthropology 112. Old Stone Age Archaeology
M115S. Historical Archaeology
118A, 118B. Museum Studies
121A. Fossil Man and His Culture
121B. The Australopithecines
121C. Evolution of the Genus *Homo*
133P. Social and Psychological Aspects of Myth and Ritual
133R. Aesthetic Anthropology
135Q. The Individual in Culture
137. Ethnography on Film
152P. Comparative Systems of Social Inequality
155. Illness in Non-Western Societies
156. Comparative Religion
158. Hunting and Gathering Societies
160. Introduction to Social Action Anthropology
161. Development Anthropology
165. Demographic Problems in Nonindustrial Societies
M168. Health in Culture and Society
171. Civilization of Sub-Saharan Africa
212P. Selected Topics in Hunter-Gatherer Archaeology
221A-221B. Fossil Evidence for Human Evolution
230Q. Cultural Anthropology
233P. Symbolic Anthropology
233Q. Aesthetic Anthropology
239P. Selected Topics in Field Training in Ethnography
M247A. Ethnographic Film
250. Social Anthropology
252P. Social Inequality
254. Kinship
255. Comparative Political Institutions
M262P. Culture and Human Reproduction
M263. Medical Anthropology
M266. Medical Anthropology in Public Health
M267B-M267C. Ethnographic Film Direction
271. African Cultures
280. Anthropology Theory

Architecture and Urban Planning 210A. A History of Planning Thought since 1800
210B. Colloquium in Planning Theory
217A-217B. Comprehensive Planning Project
232A. Introduction to Regional Planning: The Evolution of Regional Planning Doctrines
232B. Spatial Planning: Regional and International Development
233. The Political Economy of Urbanization
235A-235B. Urbanization and Rural Development in Third World Countries
236A. Urban and Regional Economic Development I
253. Social Theory for Planners
268. Advanced Seminar in Natural Environment and Resources
269. Special Topics in Natural Environment and Resources
279. Housing for Developing Countries

Art History (Art, Design, and Art History) 55. Africa, Oceania, and Native America
101A, 101B, 101C. Egyptian Art and Archaeology
118C. The Arts of Sub-Saharan Africa
C119A. Advanced Studies in African Art: Western Africa
C119B. Advanced Studies in African Art: Central Africa
201. Historiography of Art History
203. Museum Studies
C216A. Advanced Studies in African Art: Western Africa
C216B. Advanced Studies in African Art: Central Africa
219C. African Art
220. Oceanic, Pre-Columbian, African, and Native North American Art

Berber (Near Eastern Languages) 101A-101B-101C. Elementary Berber
102A-102B-102C. Advanced Berber
130. The Berbers
Dance 172B. Dance of Ghana
182A. Dance Cultures of Africa
Dutch and Afrikaans (Germanic Languages) 105A. Elementary Afrikaans
105B. Intermediate Afrikaans
112. Dutch, Flemish, Afrikaans Literature in Translation
135. Introduction to Afrikaans Literature
Economics 110. Economic Problems of Underdeveloped Countries
111. Theories of Economic Growth and Development
112. Policies for Economic Development
211. Economic Development
212. Applied Topics in Economic Development
213A-213B. Selected Problems of Underdeveloped Areas
Education 204C. Education and National Development
238. Cross-National Analysis of Higher Education
253B. Seminar: African Education
253F. Seminar: Education in Revolutionary Societies
261D. Seminar: The Community College
English 114. World Literatures in English
M261. Studies in African Literature in English
English (ESL) 109J. Introduction to Literature for ESL Students
109K. Literature in the ESL Context
220K. Materials Development for Language Teaching
221K. Media for Language Teaching
223K. Role of English as a Second Language in Bilingual Education
280K. Language Policy in Developing Countries
M285K. Studies in African Literature in English
Folklore and Mythology M154A-M154B. The Afro-American Musical Heritage
M155. Oral Traditions in Africa
M235. African Myth and Mythology
French 221A. Introduction to the Study of the French-African Literatures
221B. French-African Literature of Madagascar and Bantu Africa
Geography 101. Coastal Geomorphology
108. World Vegetation
109. Ecology of Vegetation
112. Animal Geography: Biophysical Aspects
117. Animal Geography: Cultural Aspects
118. Medical Geography
122. Man and Environment in Africa
128. The World's Ecosystems: Problems and Issues
133. Cultural Geography of the Modern World
169. The Earth from Above
188. Northern Africa
189. Middle and Southern Africa
202. Fluvial Geomorphology Seminar
203. Glacial Geomorphology Seminar
212. Advanced Biogeography: Animals
229. Seminar: Man and Environment
232. Advanced Cultural Geography
233. Seminar: Cultural Geography
242. Advanced Population Geography
269. Remote Sensing of Environment
M278. Dating Techniques in Environmental Sciences and Archaeology
288. Northern Africa
289. Middle and Southern Africa
291. The Arid Lands
History 10A-10B. Introduction to the Civilizations of Africa
M158B-M158C. Introduction to Afro-American History
175A. Topics in African History: Prehistoric Africa — Technological and Cultural Traditions
175B. Topics in African History: Africa and the Slave Trade
175C. Topics in African History: Africa in the Age of Imperialism
176A-176B. History of West Africa
178A-178B. History of Eastern Africa
179A-179B. History of Southern Africa
197. Undergraduate Seminars
200N. Advanced Historiography: Africa
201N. Topics in History: Africa
275. Introduction to the Professional Study of African History
276. African Archaeology: Field Techniques
277. African Archaeology: Data Analysis
278A-278B. Seminar in African History
Motion Picture/Television (Theater, Film, and Television) 106C. History of African, Asian, and Latin American Film
108. History of Documentary Film
112. Film and Social Change
M209C. Ethnographic Film
219. Seminar in Film and Society
221. Seminar in Film Authors
M265A-M265B. Ethnographic Film Direction
276. Seminar in Non-Western Films
Music 81E. Music and Dance of Ghana
91E. Music and Dance of Ghana
140B. Musical Cultures of the World
143A-143B. Music of Africa
M154A-M154B. The Afro-American Musical Heritage
157. Music of Brazil
280. Seminar in Ethnomusicology
287. Seminar in African Music
C290A-C290B. Proseminar in Ethnomusicology
Political Science 139A-139Z. Special Studies in International Relations
165. Government and Politics in North Africa
166A-166B-166C. Government and Politics in Sub-Saharan Africa
167. Ideology and Development in World Politics
C250E. Seminars in Regional and Area Political Studies: African Studies
C271. Seminar in Political Change
Public Health 112. Principles of Epidemiology
114. Epidemiology I
160. Principles of Food and Nutrition
161. Nutrition and Health
171B. Family Health and Population: Principles and Issues
179A. Health Problems and Programs in Africa
179B. African Health Sector Analysis Seminar
186. The World's Population and Food
212H. Epidemiology of Arthropod-Borne Disease
214. Infectious and Tropical Disease Epidemiology
218A, 218B. Protozoal Diseases of Man
220A, 220B. Helminthic Diseases of Man
222. Seminar in Epidemiology: Infectious and Tropical Disease
240. Health Care Issues in International Perspective
270. Maternal and Child Nutrition
272. Seminar on Current Issues in Maternal and Child Health
M274A-M274B. Population Policy and Fertility
M274C. Seminar in Population Policy and Fertility
275. Human Lactation: Biological and Public Health Significance
470A. International Health Agencies and Programs
470B. Advanced Issues in International Health
472A. Maternal and Child Health in Developing Areas
472B. Recent Developments in Maternal and Child Health in Disadvantaged Countries
472D. Overseas Refugee Health Programs
475. Planning and Development of Family Health Programs
477. Assessment of Family Nutrition
478. Anthropometric Nutritional Assessment
479D. Nutrition Education and Training: Third World Considerations
Sociology 112. Development of Sociological Theory
113. Contemporary Sociological Theory
114. Marxist Sociology
120. Social Change
124. Ethnic and Status Groups
126. Social Demography
130. Social Processes in Africa
160. The Demography and Sociology of Women's Economic Roles
212A-212B. Marxist Methodology
213A-213B. Techniques of Demographic and Ecological Analysis
217A-217B. Ethnographic Fieldwork
218A-218B. Ethnomethodological Methods
256. Demography
274. Selected Problems in the Sociology of Africa
M287A-M287B. Population Policy and Fertility
M287C. Seminar in Population Policy and Fertility
Theater (Theater, Film, and Television) 102E. Theater of the Non-European World
202P. Seminar in Traditions of African Theater

African Studies
(Interdepartmental)

10244 Bunche Hall, (213) 825-2944

Professors

Christopher Ehret, Ph.D. *(History), Chair*
Richard L. Sklar, Ph.D. *(Political Science)*

Associate Professor

Thomas J. Hinnebusch, Ph.D. *(Linguistics)*

Scope and Objectives

This special undergraduate program is designed primarily for (1) students who plan to live and work in Africa or who are interested in government and public service careers involving African affairs and (2) students who plan to pursue graduate work in one of the social sciences or Near Eastern and African languages, with primary concentration on the African field.

The philosophy of the program is that people with a solid background in one of the established disciplines can make the best contribution to an understanding of Africa and its problems. Thus, the program can be taken only jointly with work toward a bachelor's degree, normally in one of the following fields: anthropology, economics, geography, history, linguistics, political science, or sociology. Students completing this special program will receive a degree with a major in a selected discipline and specialization in African studies. The chair of the committee in charge will certify completion of the Special Program in African Studies.

Special Undergraduate Program

Preparation for the Program

Required: Two courses from History 10A, 10B, and African Languages 190. Training in Arabic, French, Portuguese, or an African language is highly recommended.

Upper Division

Students are required to take a departmental major in the social sciences or, by special arrangement with the committee chair, in the humanities or arts. In addition, they are required to take a course related to Africa in each of four departments. One required upper division course related to Africa may, however, be replaced by a three-quarter sequence of any African language.

For more information, contact the Assistant Graduate Adviser, African Studies Center, 10244 Bunche Hall (825-2944) or Professor Christopher Ehret, History, 6265 Bunche Hall (825-4093, 825-4601).

Afro-American Studies (Interdepartmental)

3111 Campbell Hall, (213) 825-7403

Professors

Alden Ashforth, Ph.D. *(Music)*
Gordon L. Berry, Ed.D. *(Education)*
Stanley Coben, Ph.D. *(History)*
Mazisi R. Kunene, M.A. *(Linguistics)*
Claudia Mitchell-Kernan, Ph.D. *(Anthropology), Cochair*
Boniface I. Obichere, D.Phil. *(History)*

Associate Professors

J. Eugene Grigsby III, Ph.D. *(Architecture and Urban Planning)*
Robert A. Hill, M.Sc. *(History)*
James H. Johnson, Ph.D. *(Geography)*
Hector F. Myers, Ph.D. *(Psychology)*
Melvin Oliver, Ph.D. *(Sociology), Cochair*
Alfred E. Osborne, Jr., Ph.D. *(Management)*
Gloria J. Powell, M.D., *in Residence (Psychiatry)*
Romeria Tidwell, Ph.D. *(Education)*
Gail E. Wyatt, Ph.D., *in Residence (Psychiatry)*
Richard A. Yarborough, Ph.D. *(English)*

Assistant Professors

Margaret W. Creel, Ph.D. *(History)*
Jacqueline C. DjeDje, Ph.D. *(Music)*
Halford H. Fairchild, Ph.D. *(Psychology)*
Vickie M. Mays, Ph.D. *(Psychology)*
Warren Pinckney, Ph.D. *(Music)*
Beverly J. Robinson, Ph.D. *(Theater, Film, and Television)*

Adjunct Associate Professor

Karen Hill Scott, Ed.D. *(Architecture and Urban Planning)*

Adjunct and Visiting Lecturers

Barbara A. Bass, M.S.W., *Adjunct (Psychiatry)*
Kenny Burrell, B.A., *Visiting*

Scope and Objectives

The Afro-American studies major is a relatively new major at UCLA. Originally born during the late 1960s and early 1970s, the program was designed to fill a void that existed at UCLA in terms of social science material relevant to the black experience. Students and faculty currently associated with the program see the Afro-American studies major as meeting a number of academic, personal, and social needs.

The program offers both a Bachelor of Arts and a Master of Arts degree. While it is important that students become expert within a traditional discipline, it is even more important that students examine both the truth and the fiction regarding the Afro-American experience in the United States. For Afro-American students, this leads to a heightening of self-awareness and self-pride. For non-Afro-American students, such a major provides a broadening of perspectives to take into account more than a singular cultural view.

The fundamental goal of the curriculum is to provide students with a comprehensive and multidisciplinary introduction to the crucial life experiences of Afro-Americans. This goal is achieved in two primary ways. First, it provides an interdisciplinary exposure to particular features of the Afro-American experience. Majors gain an in-depth understanding of the historical, anthropological, sociological, psychological, economic, and political aspects of Afro-America. The curriculum also provides opportunities to study the literary, musical, and artistic heritage of peoples of African descent. Second, students gain expertise in the concepts, theories, and methods of a traditional academic discipline. Majors are required to select an area of concentration in one of the following fields: anthropology, economics, English, history, philosophy, political science, psychology, or sociology (concentrations in departments not listed must be approved by the program adviser).

Bachelor of Arts Degree

The B.A. program in Afro-American Studies made a number of changes in the degree requirements for the 1983-84 academic year. Students declaring an Afro-American studies major after Spring Quarter 1983 must satisfy the requirements that follow. Students who declared the major prior to Spring Quarter 1983 may satisfy either the new requirements or those described in the 1982-83 *UCLA Undergraduate Catalog*. Because of the evolving nature of the program, you should periodically check with the program office for additional changes and/or updates. Majors should also closely consult the 1986-87 *Afro-American Studies Catalog and Directory*, available from the program office.

Preparation for the Major

Required: History 10A and the lower division courses listed in one of the following concentrations, plus three courses from at least two additional concentrations (prerequisites for the courses listed must be completed before enrolling in a given course; this is especially important for the quantitative courses in economics and psychology): *anthropology:* Anthropology 1 (or 11), 2, 5, 6; *economics:* Economics 1, 2, 40, Mathematics 3A, 3E (or 3A and 3B, or 31A and 31B); *English:* English 3, 4, 10A, 10B, 10C (all must be taken in sequence); *history:* History 1A-1B-1C, 6A-6B-6C, 10B, and 99 (or 100 or 101); *philosophy:* Philosophy 4, 21, 22, 31; *political science:* Political Science 1, 6, 20, Sociology 1, Economics 1; *psychology:* Mathematics 2, Psychology 10, 41, 42, Biology 2, Anthropology 11, Physics 10 (or 3A or 6A or 8A), one year of high school chemistry (or Chemistry 2 or 11A); *sociology:* Mathematics 2, Sociology 1, 18, Linguistics 1, Anthropology 22. You are strongly urged to complete the required lower division courses within the first two years of the major.

The Major

Required: (1) Anthropology M164, English M104A or M104B, History M158B-M158C; (2) four upper division and/or graduate courses in Afro-American studies (or four departmental courses that are multiple-listed with Afro-American Studies); (3) six upper division electives within the department of concentration selected from the approved courses listed below; (4) two upper division electives outside the department of concentration selected from the approved courses list. Note: You may petition the committee which administers the degree program to have a course not on the approved list accepted for the major. In arranging a course of study, you should select a combination of courses that will best meet your current and future educational and career goals.

Approved courses (recommended courses are in bold):

Afro-American Studies **100B, 145, M164, M172, M197, 197B**

Anthropology 110, **111,** 115P, 115Q, 120, 122, 123, 124, **125A, 125B, 130,** 131, 133P, 134, 135A, 135B, **135Q,** 135R, **136P,** M136Q, 137, 138, **M140,** 142A, 142B, **C145, 150, 151, 152, 153A, 153B,** 155, 158, 161, M163, **M164, 166, 167,** M168, **171,** 182, 186A, 186B, 187, **199**

Economics **101A, 101B, 102, 103A through 103Z,** 107, **110,** 111, 112, **120, 121,** 130, 133, M135, M136, 141, 144, 147A, 147B, 150, **151,** 160, 161, **180,** 183, 190, 191, 192, **199**

English 80, 85, 100A, 100B, 100C, 100D, **M104A, M104B,** M105, 106, M107, 108A, 108B, **109, M111A,** 114, 115A, 118, 131A through 131H, 136A, 136B, 136C, 140A, 140B, 141A, 141B, 142A, 142B, 143, 171, 172, 173, 174, **178,** 188, 189, **190, M197, 199**

History 100, 101, M104A, M104B, 107A, 107B, 109A, 109B, 135A, 135B, **145A, 145B, 146A, 146B, 147A,** 147B, 148A, 148B, 148C, 149A, 149B, **154A, 154B, 156A, 156B,** 156C, 156D, 156E, **M158A, M158B, M158C, 158D, 158E,** M159A, M159B, 160, 161, 166, **175A, 175B, 175C,** 176A, 176B, 177, 178A, 178B, 179A, 179B, 193A, **199**

Philosophy 100A, 100B, 101A, 101B, 102, **104,** 126A, 126B, **126C,** 129, **150,** 151A, 151B, 153A, 156, 166, **172,** 178, 182, **192, 199**

Political Science **102, 104A, 104B, M105, M106,** 111A, 111B, 111C, 113, **114A, 114B,** 115, **116,** 119A, 119B, 120, 124, 125, 126, 131, **C137A, 137B,** M139A, **M140,** 141, **142,** 145, **146, M147, 165, 166A, 166B, 166C, 167, 168L,** 170, 172A, 172B, 173, 174, 175A, 175B, 180, 182A, 182B, 186, 187, 188A, **188B,** 191, **199**

Psychology **42,** 102, **110, 111,** 112B, **115,** 116, 118B, M119, **120,** 121, 123, **125, 127,** 129A, 129B, **130, 132, M133B, 135, 136A,** C136B, 137C, 137D, M138, **139, M142,** 143, 147, 148, 150, **151,** M163, M165, **170A, 170B, M172, 175, 176,** 177, 179, **192, 193, 194, 195, 199** (note: courses 110, 115, 120, 125, 127, 135, M142, and 151 should be taken by students planning to pursue graduate study in psychology)

Sociology 102A through 102Z, **109,** 110, **112, 113, 114, 115, 118, 120,** 122, **123, 124, 125,** 126, 128, 129, **130,** 131, **136, 138,** 140, 142, M143, 145, 146, **147, 150, 151,** 152, 153, 154, **155,** 157, M158, 160, 161, 162, 163, **197, 199**

Honors Option

Students participating in the honors option are required to complete an independent research paper or project undertaken with the guidance of a faculty member. If you are an Afro-American studies major with a grade-point average of 3.5 or better, you complete the honors option by writing an undergraduate thesis. For more information, contact the curriculum coordinator of the Afro-American Studies Program.

Double Major Option

Some students elect to complete the requirements of two majors (Afro-American studies and another). If you are interested in this option, you must maintain good academic standing and complete both majors within the 228-unit maximum imposed by the college. Courses used to satisfy the requirements for the principal major may also be used to satisfy the requirements for the secondary one, but no more than five courses may be common to both majors. Because of the complexity of the double major, you are encouraged to plan your curriculum early and to do so in consultation with the college counselors and/or the Afro-American Studies Program adviser or curriculum coordinator.

Master of Arts Degree

The Master of Arts program in Afro-American Studies is international in scope, focusing on Afro-American cultures in the United States, the Caribbean, and South America. The program prepares students for positions in the job market, as well as further graduate study (i.e., Ph.D. level) in their traditional disciplines.

Admission

Applicants for admission must possess a bachelor's degree in the social sciences or humanities and demonstrate an interest in Afro-American studies either through their previous course of study or in their future plans. Students are selected on the basis of the following criteria: (1) an official transcript; (2) three academic letters of recommendation; (3) a minimum 3.0 (B) average in the junior/senior years of college; (4) a statement of purpose describing the applicant's background in Afro-American studies, proposed program of study, and future career goals; (5) scores on the verbal and quantitative sections of the Graduate Record Examination (GRE); (6) an original term paper or research paper which best expresses the applicant's interests and abilities; (7) other evidence of promise deemed relevant such as work experience, accomplishments, or community and public service.

Admission to the program is limited to the Fall Quarter. The application deadline for the 1987-88 academic year is January 30, 1987 (earlier for international students). Prospective students may request applications from the M.A. Degree Program in Afro-American Studies, Center for Afro-American Studies, 3111 Campbell Hall, UCLA, Los Angeles, CA 90024.

Major Fields

The M.A. in Afro-American Studies is interdepartmental, with formal support linkages to nine disciplinary departments: Anthropology, English, History, Linguistics, Music, Philosophy, Political Science, Psychology, and Sociology. Related courses are also offered in the following schools and departments: Art, Dance, Economics, Geography, Psychiatry and Biobehavioral Sciences, Theater, Film, and Television, Folklore and Mythology, Latin American Studies, African Studies, Education, Library and Information Science, Management, Public Health, and Social Welfare.

Foreign Language Requirement

You are required to satisfy the language requirement in one of the following ways: (1) successfully completing two years of coursework in a foreign language at the college level; (2) passing a foreign language proficiency examination approved by your guidance committee and deemed appropriate by the program committee; or (3) demonstrating competence in the use of the computer as an aid in social research.

Course Requirements

A total of 14 upper division and graduate courses are required for the degree. Of that number, only four may be selected from upper division listings. The program has a structured core of seven required courses. You are required to take Afro-American Studies M200A and three courses from the 200B through 200F series. These courses should normally be taken in your first year of study. The second year is devoted to acquiring disciplinary competence in your cognate field, and six courses must be selected from that discipline. Finally, course 270A is required, and courses 270B-270C are to be taken in conjunction with work in the discipline of your choice. These seminars are expected to facilitate completion of your thesis. One course (four units) in the 500 series may be applied toward either the total course requirement or the minimum graduate course requirement.

Thesis Plan

The thesis is the final report on the results of your original investigation. Before beginning work on the thesis, you should consult closely with your academic adviser and the thesis committee. See the 1986-87 *Afro-American Studies Catalog* for details concerning thesis requirements.

Comprehensive Examination Option

You may elect to complete the M.A. degree through the comprehensive examination option. The written examination is administered by a committee consisting of at least three faculty members appointed by the program and is offered on a regular basis.

Upper Division Courses

100B. Psychology from an Afro-American Perspective. A survey of psychological literature relevant to Afro-Americans, with emphasis on contributions of Afro-American psychologists. Topics include the history of psychology, testing and intelligence, the family, personality and motivation, racism and race relations, education, community psychology, and the future of Afro-American psychology.

Mr. Fairchild (Sp)

C101A-C101Z. Special Topics in Afro-American Studies. Prerequisite: consent of instructor. Variable topics. May be repeated for credit. Concurrently scheduled with courses C201A-C201Z.

M104A. Early Afro-American Literature. (Formerly numbered M104.) (Same as English M104A.) Prerequisite: satisfaction of Subject A requirement. An introductory survey of the Afro-American literary tradition from the 18th century to World War I, including oral and written forms (folktales, spirituals, sermons; prose, poetry). Emphasis on the use of literature in the antislavery movement and the rise of black writing at the turn of the century. Writers studied include Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Paul Laurence Dunbar, Charles W. Chesnutt, Booker T. Washington, Pauline Hopkins, W.E.B. DuBois, and James W. Johnson.
Mr. Yarborough

M104B. Afro-American Literature since the 1920s. (Formerly numbered M104.) (Same as English M104B.) Prerequisite: satisfaction of Subject A requirement. An introductory survey of the Afro-American literary tradition from the 1920s to the present, including oral and written forms (ballads, blues, speeches; prose, poetry, drama). Emphasis on the Harlem Renaissance and black writing in the 1960s. Writers studied include Jean Toomer, Claude McKay, Langston Hughes, Stirling Brown, Richard Wright, James Baldwin, Gwendolyn Brooks, Ralph Ellison, Toni Morrison, Amiri Baraka (LeRoi Jones), and Alice Walker. Mr. Yarborough

145. Ellingtonia. The music of Duke Ellington, his life, and the far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the United States. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cooties Williams, and Mercer Ellington. Mr. Burrell (W)

M158A. Comparative Slavery Systems. (Same as History M158A.) Lecture, three hours. An examination of the slavery experience in various New World slave societies, with emphasis on outlining the similarities and the differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

M158B-M158C. Introduction to Afro-American History. (Same as History M158B-M158C.) Lecture, three hours. A survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: the transition from Africa to New World slavery, the transition from slavery to freedom, and the transition from rural to urban milieus.
Ms. Creel, Mr. Hill

M164. The Afro-American Experience in the United States. (Same as Anthropology M164.) Promotes understanding of contemporary sociocultural forms among Afro-Americans in the United States by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on the utilization of anthropological concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans. Ms. Mitchell-Kernan (F)

M172. The Afro-American Woman in the U.S. (Same as Psychology M172 and Women's Studies M172.) Prerequisite: upper division standing. The impact of the social, psychological, political, and economic forces which impact on the interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group. Ms. Mays

M197. Topics in Afro-American Literature. (Same as English M197.) A variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890-1914; Contemporary Afro-American Fiction. May be repeated for credit. Mr. Yarborough

197B. Special Studies in Comparative Literature: Caribbean Literature. A general introduction to the literature of the English-speaking Caribbean by reviewing its historical and geographical background. To analyze the historical process toward self-determination in the literature, the following topics are included: (1) alienation and the search for community, (2) "external" relationships (the ancestor, the kinsman, the other), and (3) form and language.

Graduate Courses

M200A. Advanced Historiography: Afro-American. (Same as History M200V.) Seminar, three hours. May be repeated for credit. Ms. Creel

200B. Seminar in the Political Economy of Race. Prerequisite: consent of instructor. A seminar on political economy, with special reference to black political economy and with focus on the dynamics of allocation of wealth and power resources among social classes and racial and ethnic groups in the United States. Presented in a context that is at once comparative and international, the seminar emphasizes internationalism and transnationalism as well as the uniqueness of the Afro-American condition. It attempts to relate the black condition in the United States to the socioeconomic system of this country and to compare it to the political, social, and economic conditions of African peoples elsewhere.

M200C. Selected Problems in Urban Sociology. (Same as Sociology M262.) Seminar. Prerequisite: consent of instructor. Mr. Light, Mr. Oliver

M200D. Afro-American Sociolinguistics: Black English. (Same as Anthropology CM243Q.) Lecture, three hours. Prerequisite: consent of instructor. Basic information on Black American English, an important minority dialect in the United States. The social implications of minority dialects examined from the perspectives of their genesis, maintenance, and social functions. General problems and issues in the fields of sociolinguistics examined through a case study approach. Students are required to conduct research in consultation with the instructor, as well as participate in group discussion.
Ms. Mitchell-Kernan (W)

M200E. Studies in Afro-American Literature. (Same as English M262.) Prerequisite: consent of instructor. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on the aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit.

200F. African-American Psychology. (Formerly numbered 220B.) Seminar. Prerequisite: consent of instructor. Survey of the psychological literature as it pertains to persons of African-American descent. A critical review of the implications of "mainstream" research on African-Americans, including a discussion of research on the family, academic achievement, and psychological assessment (testing). Emphasis also on theoretical approaches advanced by African-American scholars: African philosophy, perspectives on racism in psychology, and research in the black community. Mr. Fairchild (Sp)

C201A-C201Z. Special Topics in Afro-American Studies. Prerequisite: consent of instructor. Variable topics. May be repeated for credit. Concurrently scheduled with courses C101A-C101Z.

270A. Research Methods. (Formerly numbered 220A.) Seminar. Prerequisite: consent of instructor. An introduction to a variety of research methods, including experimental, quasi-experimental, observational, and survey research methodologies. The functions of research, research proposal writing, theory development and hypothesis testing, sampling theory, data collection, data processing and analysis, and interpretation. The ethics of research and preparing the research report.

270B-270C. Research Seminar. (Formerly numbered 220B-220C.) Prerequisite: consent of instructor. Designed to provide students with an opportunity to put their research skills into practical application. During the first quarter, all students meet under the direction of a faculty member and engage in a colloquium in which they share conceptual schemata and research design. Students spend the second quarter completing their projects.

596. Directed Readings and Tutorials. Provides students with an umbrella under which they can pursue specialized interests from which there is insufficient demand to warrant offering a formal course.

American Indian Studies

Melissa L. Meyer, Ph.D. *(History)*

Scope and Objectives

Because UCLA possesses a substantial number of faculty in the humanities and social sciences engaged in teaching and conducting research on American Indians, the nation's first interdisciplinary M.A. in American Indian Studies was established here.

The M.A. program draws primarily on existing courses in the participating departments, where research and research methodologies are of primary concern. Students are exposed to Indian-related research in a number of different disciplines; demonstration of research skills is required. They will graduate with the training they need to teach Native American studies or to serve in an administrative capacity in Indian programs. The M.A. program is coordinated by the American Indian Studies Center and ranks among the top Indian studies programs in the country.

Master of Arts Degree

Admission

A bachelor's degree from an accredited undergraduate institution is required for admission to the M.A. program in American Indian Studies. You must demonstrate interest in American Indian studies either by formal coursework, independent study, or practical experience. As part of the application, you must submit a detailed account of your background, potential career plan, and interest in American Indian studies. Preference is given to individuals with undergraduate majors relevant to the proposed areas of concentration within the M.A. degree: anthropology, English, history, linguistics, literature, sociology, fine arts, or American Indian studies.

Entering students must meet the University's minimum admission requirement of a 3.0 grade-point average in all work completed during the last two undergraduate years and in all prior graduate work. The Graduate Record Examination (GRE) is not required, but you are encouraged to take the examination and submit test results as part of the documents supporting your enrollment application. At least three faculty letters of recommendation must be submitted. Admission to the program is limited to the Fall Quarter. You may obtain application forms and further information from the Committee to Administer the M.A. Degree in American Indian Studies, American Indian Studies Center, 3220 Campbell Hall, UCLA, Los Angeles, CA 90024.

Major Fields or Subdisciplines

The American Indian Studies M.A. is an interdepartmental program with 10 participating academic schools and departments: Anthropology, Art, Dance, English, History, Law, Library and Information Science, Linguistics, Music, and Sociology. The 10 disciplines are grouped into four areas of concentration: history and law; expressive arts; social relations; and language, literature, and folklore. Courses related to the American Indian Studies M.A. are also offered in the following schools and departments: Architecture and Urban Planning, Education, Political Science, Social Welfare, and Psychology.

Foreign Language Requirement

Students in the M.A. program must successfully complete Linguistics 114, which has been designed to show how languages are primary vehicles for understanding American Indian culture.

Course Requirements

(1) A minimum of 10 courses is required, at least seven of which must be graduate courses. Four courses are required: American Indian Studies M200A, M200B, M200C (which must be taken in the first year), and Linguistics 114, which must be taken by the end of the second year. In addition, one of the remaining six courses must be a graduate course concerned with research methodology.

(2) All M.A. candidates will select one of the following areas of concentration: (a) history and law, (b) expressive arts, (c) social relations, (d) language, literature, and folklore. You can petition for optional combinations of interdisciplinary work through the program committee. In addition to the four required courses, you must complete a minimum of four courses in your area of concentration. Three of these must be graduate-level courses. Two additional courses are to be chosen from other areas of concentration. Courses must be selected from an approved list maintained by the program.

(3) Two courses in the 500 series may be applied toward the total course requirement; however, only one 596 course may be applied toward the minimum graduate course requirement.

Thesis or Comprehensive Examination Plan

You may select either (1) a thesis plan or (2) a comprehensive examination plan to complete the degree program. The committee members supervising the thesis or administering the comprehensive examination will be selected by you with the consent of the program committee. Copies of the thesis must be submitted to each member of the committee by the fifth week of the quarter in which you expect to graduate. If you choose the comprehensive examination plan, you must demonstrate in written or oral examination your competency in the major and minor areas of study.

Upper Division Course

197. Special Topics in American Indian Studies. Variable topics selected from the following: Myth and Folklore of Indian Societies; Contemporary American Indian Literature; Social Science Perspectives of American Indian Life; Law and the American Indian; History of the American Indians (cultural area); Dance and Music of the American Indians (cultural area); American Indian Policy. Topics are announced in the *Schedule of Classes*. May be repeated twice for credit. (F,W,Sp)

Graduate Courses

M200A. Advanced Historiography: American Indian Peoples. (Same as History M200W.) Seminar, three hours.

M200B. Cultural World Views of Native America. (Formerly numbered 200B.) (Same as English M266.) Seminar, three hours. Exploration of written literary texts drawn from oral cultures and expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches drawn from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology. Ms. Heth, Mr. Lincoln

M200C. Contemporary Issues of the American Indian. (Formerly numbered 200C.) (Same as Anthropology M269.) Introduction to the most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on the historical background presented in course M200A and the cultural and expressive experience of American Indians presented in course M200B. Ms. Heth, Ms. Joe

201. Topics in American Indian Studies. Discussion, three hours. Prerequisite: consent of instructor.

Jane Wellenkamp, Ph.D., *Visiting*

Scope and Objectives

Anthropology today is classed as a social science, but its roots are in both the biological sciences and humanistic studies. It still constitutes a bridge linking these three areas of knowledge, and the department has strong ties with other disciplines ranging from anatomy and genetics to linguistics, classics, and fine arts.

The department recognizes the following five fields in anthropology:

Archaeology is the study of cultures of the past, where knowledge of their characteristics is obtained primarily from material evidence left in the ground, supplemented in some cases by historical and inscriptional records.

Biological anthropology studies the diversity of the human physical characteristics and the biological characteristics underlying human behavior. The faculty in this field specializes in one of four subfields: (1) primatology or the study of the characteristics of monkeys and apes; (2) paleoanthropology, the study of fossil hominids and the evolution of man; (3) human genetics; and (4) evolutionary ecology of human and nonhuman primates.

Cultural anthropology is the investigation of ideational systems, including religious beliefs and mythologies, philosophical and other cognitive conceptions, world views and aesthetic configurations, and technologies transmitted from generation to generation.

Linguistic anthropology examines the diversity of natural languages and other communicative systems, the sociocultural patterning of their use, and their relationship to the cultural knowledge of their speakers.

Social anthropology, closely tied to sociology, studies the structure of human communities and the institutionalized social interaction systems. It examines the diversity of family forms and kinship, governance and political systems, law and the resolution of conflict, economic collaboration, social status and role, and certain aspects of religion.

Cutting across the five fields are three other categories of course offerings: the **anthropology of social action, regional cultures,** and **history and theory.**

The department offers the Bachelor of Arts degree in Anthropology for undergraduates; the graduate program leads to the Master of Arts and Ph.D. degrees. Studies in anthropology are particularly valuable for students planning careers in which an understanding of human behavior and cultural diversity is desirable, such as medicine, public health, nursing, law, education, and social welfare. Because of its breadth of outlook, anthropology also offers an ideal basis for those seeking a general education in our increasingly interdependent world.

Bachelor of Arts Degree

Preparation for the Majors

Required: Anthropology 1, 2, 5, 6. All courses must be taken for a letter grade.

All undergraduate anthropology majors must earn a minimum grade of C in all anthropology courses required for the major and must maintain a minimum 2.0 GPA in the major overall.

The Majors

The Department of Anthropology offers a choice between two undergraduate majors:

(1) General major

(2) Preprofessional major

To provide a comprehensive understanding of the disciplines as a whole, you must take at least one course in each of the five fields (see "Scope and Objectives" above). One core course is offered in each field (archaeology offers a choice of two), but you may take any course to fulfill this requirement if the prerequisites have been met.

The **general major** is designed for students interested in an anthropological understanding of human behavior who plan to pursue personal or professional goals other than those of anthropologists. Students taking the general major must complete 14 (four-unit) upper division courses for a letter grade as follows:

(1) One upper division course in each of the five fields: archaeology, biological anthropology, cultural anthropology, linguistic anthropology, and social anthropology.

(2) One upper division course in the category of regional cultures.

(3) Four additional upper division courses in anthropology.

(4) Four upper division courses (unless otherwise designated) in related fields drawn from a list maintained in the department.

The **preprofessional major** is designed primarily for students planning to make a career in anthropology and is expected of students entering the graduate program in anthropology at UCLA. Students taking the preprofessional major must complete 16 (four-unit) upper division courses for a letter grade as follows:

(1) One upper division course in each of the five fields: archaeology, biological anthropology, cultural anthropology, linguistic anthropology, and social anthropology.

(2) One upper division course in the category of regional cultures.

(3) Two upper division courses in the category of history and theory.

(4) One course in statistics (this requirement will normally be met by taking Anthropology 186A but may also be met by courses drawn from a list maintained in the department).

(5) Three or four additional upper division courses in anthropology.

(6) Three or four upper division courses (unless otherwise designated) in related fields drawn from a list maintained in the department.

(7) Competence in a foreign language (see below).

Foreign Language

For the preprofessional major the department requires proficiency in one foreign language to ensure that you have the communication skills and cultural insights offered by such proficiency. Any spoken language or any extinct language with a substantial body of literature is acceptable. This requirement may be met by (1) completing the fifth quarter of one foreign language or (2) demonstrating foreign language proficiency at level five. Courses taken to satisfy the foreign language requirement may be taken on a Passed/Not Passed basis and may be applied toward satisfaction of the Letters and Science general education requirements in the humanities.

Honors Program

The honors program is designed for majors who are interested in carrying out an independent research project that will culminate in an honors paper. A special honors seminar is also offered during the junior year. A 3.5 departmental grade-point average is normally required for admission, but students with a lower GPA may apply to the honors committee for admission. Application should be made at the beginning of the junior year. Anthropology 198A, 199HA, 199HB, and 199HC are required. Course 199HA should be taken in the Spring Quarter of the junior year; honors students then take courses 199HB and 199HC in the Fall and Winter Quarters of their senior year (to write the honors paper).

Graduate Study

Admission

Admission to the graduate program in anthropology is ordinarily restricted to the Fall Quarter. For admission in the Winter or Spring Quarters, you must make a formal written request to the departmental admissions committee. The department does not require an undergraduate major in anthropology, though this is desirable. Promising students with a B.A. or M.A. in another field may be admitted, in which case a program of background studies based on previous training and current objectives will be formulated. Knowledge of a foreign language is not required for admission, but completion of the language requirement before beginning work is highly recommended, and such students are at an advantage in the selection process.

Applications and all supporting material must be submitted by the following dates to be considered for admission for:

Winter Quarter 1987 — October 1, 1986
Spring Quarter 1987 — December 30, 1986
Fall Quarter 1987 — December 30, 1986

The Graduate Admissions Office (Graduate Division, 1247 Murphy Hall, UCLA, Los Angeles, CA 90024) requires submission of an official application; official transcripts of record, in duplicate, from each college or university at which work has been completed; and a statement of purpose.

In addition, you must submit the following directly to the Graduate Counselor (Department of Anthropology, 341 Haines Hall, UCLA, Los Angeles, CA 90024):

(1) Three letters of recommendation (preferably from anthropologists).

(2) Graduate Record Examination (GRE) scores.

(3) A research or term paper.

The department requires two faculty members to sponsor an applicant before admission is recommended.

For further information on the departmental program, a graduate syllabus may be obtained without charge by writing to the above departmental address.

Master of Arts Degree

Foreign Language Requirement

M.A. language requirements may be met by:

(1) Passing the Educational Testing Service (ETS) examination in a foreign language with a score of 500 or better.

(2) Passing a departmental examination or other demonstrations of proficiency in a foreign language by petition to the department chair and the dean of the Graduate Division.

Students whose native language is not English may petition to have the requirement waived. Formal written petition for such waiver should be submitted to the guidance committee, department chair, and the Graduate Division.

Core Course Requirements

You may demonstrate basic knowledge in the five fields by one or a combination of the following: (1) passing the core course with a grade of B or better, (2) petitioning that work taken elsewhere constitutes the equivalent of such courses, or (3) passing a special examination in each, in the Spring Quarter of your first year in residence. Courses taken while in graduate standing to meet these field requirements may also serve to meet course unit demands for the M.A. degree.

Course Requirements

The minimum course load is three courses (12 units) per quarter, but this requirement may be waived by petition to the department chair. An M.A. degree requires nine courses (36 units) taken for a letter grade with a minimum 3.0 grade-point average.

(1) Four courses may be upper division (100 series).

(2) At least five must be graduate seminars (200 series).

(3) Three courses may be outside the major with consent of the guidance committee.

(4) Two courses may be anthropology independent studies (see department for course numbers) with consent of the committee.

Eight units of Anthropology 596 taken for a letter grade may be applied toward the total M.A. course requirement, with four of these units applicable toward the minimum graduate course requirement.

Comprehensive Examination Plan

The master's degree program is on the comprehensive examination plan. The examination consists of two parts: (1) a written examination and (2) a master's paper.

Written Examination: You must pass an examination in one of the five fields to demonstrate competence and intellectual promise in the field of specialization. This examination must be taken in the Spring Quarter and, in case of failure, may be taken a second time the following year. Students admitted in Winter or Spring Quarter who have the equivalent of two quarters or more of graduate work in anthropology are required to take the examination in the Spring Quarter of their first year. Students not having an adequate background must take it the following academic year.

Master's Paper: You must submit an original paper based on field, laboratory, or library research by the end of your fifth quarter in residence. The guidance committee will assist you in formulating the research paper, monitoring its progress, and evaluating the paper after you submit it. In this assignment, you are urged to work closely with your advisers.

Ph.D. Degree

Admission

If you are entering the department with an M.A. in Anthropology from another university or in a field other than anthropology, you will have to satisfy all master's degree requirements with the exception of the master's paper. To fulfill this requirement, you may submit your prior master's thesis or a research paper written as a graduate student (whether or not in anthropology). Only after satisfying these requirements will a student be admitted into the Ph.D. program.

Foreign Language Requirement

You must satisfy the Ph.D. language requirement before formally nominating the five-member doctoral committee and before taking the qualifying examinations. Any language useful for field study and/or library research is acceptable. You must submit to your departmental committee a comprehensive annotated bibliography and demonstrate familiarity with its contents by taking a written or oral examination. The format of the examination is determined by your doctoral committee. Students who speak English as a second language may waive the language requirement by petition to their committee, the department chair, and the Graduate Division. Under unusual circumstances, the department will consider alternate means of fulfilling the requirement.

Course Requirements

You must be in residence for one year between receipt of the M.A. degree and advancement to doctoral candidacy. During this time, coursework must be done with at least three different members of the faculty. You must be enrolled in a minimum of 12 units (this requirement may be waived by petition to the department chair) or be on an official leave of absence.

Qualifying Examinations

Qualifying examinations are conducted in two parts: (1) a written examination and (2) the University Oral Qualifying Examination. The timing of the examinations is arranged with members of the doctoral committee, but they may not take place earlier than the third quarter after receiving the M.A. degree. The written examination must be completed within the first eight weeks of the given quarter; the University Oral Qualifying Examination is expected to be completed in the same quarter, but no later than the following term.

The format for the written examination is to be determined by the doctoral committee which will examine you in three subfields of your choice. Two of these three subfields will be drawn from a list available in the department; the third will be specific to your needs, interests, and dissertation plans. After you successfully complete the written examination, the doctoral committee administers the University Oral Qualifying Examination, in which you are required to present a defense of your dissertation proposal. The committee determines the conditions for reexamination should you fail either examination.

Final Oral Examination

This examination, administered by the doctoral committee, focuses on your dissertation and is required of all candidates. It may be waived by petition to the Graduate Division with consent of the doctoral committee.

Lower Division Courses

1. The Principles of Human Evolution: Genetic Basis. Lecture, three hours; discussion, one hour. Required as preparation for the major. Human population biology in the conceptual framework of evolutionary processes. Emphasis on the genetic basis of evolution, population biology, and diversity among living populations.

2. The Principles of Human Evolution: Comparative Analysis. Lecture, three hours; discussion, one hour. Required as preparation for the major. Not open for credit to students with credit for course 11. Human population biology in the conceptual framework of evolutionary processes. Emphasis on comparative primate behavior, structural anatomy, and the fossil record.

5. Principles of Cultural Anthropology. Lecture, three hours; discussion, one hour. Required as preparation for the major. Not open for credit to students with credit for course 22. The character of culture and nature of social behavior as developed through anthropological study of contemporary peoples.

6. Culture History. Lecture, three hours; discussion, one hour. Required as preparation for the major. The development of culture from its first beginnings to the advent of writing, as developed through archaeological investigation.

11. The Evolution of Man. Lecture, three hours; discussion, one hour. Does not satisfy major requirements. Not open for credit to students with credit for course 2. Emphasis on evolutionary processes and the evolutionary past of the human species.

22. General Cultural Anthropology. Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 5. An introduction to the cultural understanding of human behavior designed for students who do not plan further work in anthropology. Emphasis on those concepts and theories that are applicable to everyday life and professional activities in the modern world. Examples of institutions and individual behavior of modern America counterpointed against studies of primitive life.

33. Culture and Communication. Lecture, three hours. The role of culture in structuring how people communicate with one another, with emphasis on the importance of language as a symbolic guide to one's culture. Topics include cultural differences in verbal and nonverbal behavior, imagined and actual differences in male and female speech, language and education, verbal style and interactional strategy, language taboos, and the sociocultural factors which promote and retard language change. Emphasis on patterns of language use, rather than details of language structure.

44. Culture and the Visual Arts. Lecture, two hours; discussion, one hour. In our contemporary urban societies, looking at art objects and other aesthetic forms is a significant part of our everyday cultural experience. The anthropological approach offered helps achieve a better understanding of the formal qualities and the symbolic meanings of Western and non-Western art objects present in our visual environment. Mr. Maquet

Upper Division Courses

Courses 1 and 2, 5, 6, or upper division standing are prerequisite to all upper division courses, unless otherwise stated. All upper division courses with letter designations (A, B, P, Q, etc.) may be taken independently unless otherwise stated.

Archaeology

110. World Archaeology. Prerequisite: upper division standing or consent of instructor. A broad survey of human culture history from its Stone Age beginnings to the establishment of the primary civilizations of the Old and New Worlds. Intended for students with a general interest in archaeology and in an anthropological approach to the study of the past. (Alternate core course for archaeology field.) Mr. Sackett

111. The Study of Archaeology. A survey of contemporary prehistoric archaeology. Emphasis on what archaeologists do, and how and why they do it. Contributions of archaeology to the modern world. Intended for students with a desire to explore the nature of anthropological archaeology. (Alternate core course for archaeology field.) Mr. Hill

112. Old Stone Age Archaeology. Prerequisite: course 6 or consent of instructor. The development of Paleolithic cultural traditions in Europe, Africa, Asia, and the New World. Emphasis on the ordering and interpretation of archaeological data, Pleistocene geology and chronology, and the relationship between human cultural and biological evolution. Mr. Sackett

113P. Archaeology of North America. Prerequisite: course 5, 6, or 22, or consent of instructor. Prehistory of the North American Indians; the evolution of Indian societies from earliest times to (and including) contemporary Indians; approaches and methods of American archaeology. Mr. Meighan

113Q. The Prehistory of California Indian Cultures. Examination of the California archaeological record from earliest human evidence to historic times, with emphasis on the development of cultural diversity. Mr. Meighan

113R. Southwestern Archaeology. Examination of the prehistory of the American Southwest from Early Man to historic times. Emphasis on describing and explaining cultural variation and change, employing an ecological and evolutionary perspective. Special attention to the "Great Events" (agriculture, town living, and the Great Abandonment). Evolutionary processes generalized and related to contemporary world problems. Mr. Hill

114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere). Pre-Hispanic and Conquest period native cultures of Western Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Toltec-Aztec and Mixteca civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements. Mr. Nicholson

114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere). Pre-Hispanic and Conquest period native cultures of Eastern Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Lowland and Highland Maya civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements. Mr. Nicholson

114R. Ancient Civilizations of Andean South America. Prerequisite: course 5, 6, or 22. Pre-Hispanic and Conquest period native cultures of Andean South America, as revealed by archaeology and early Spanish writing. The Inca and their predecessors in Peru, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements. Mr. Donnan

115P. Archaeological Field Training. Prerequisite: consent of instructor. Procedures of archaeological excavation, mapping, stratigraphy, collecting, and recording of archaeological data (field class conducted off campus).

115Q. Archaeological Research Techniques. Prerequisite: course 6 or consent of instructor. An introduction to the techniques of discovery and analysis that archaeologists have found useful in research. Special attention to sampling, typology, and locational analysis. Consideration of techniques for the measurement of such important variables as population size, diet, seasonality, specialization, and exchange. Mr. Hill

115R. Strategy of Archaeology. Prerequisite: course 6 or consent of instructor. An introduction to problem formulation, theory, and method in archaeology, with emphasis on the development of research designs. Focus on how archaeological research is conceived and planned, with consideration of differing viewpoints and their usefulness. Mr. Hill

M115S. Historical Archaeology. (Same as History M103.) A survey of the aims and methods of historical archaeology as practiced on both sides of the Atlantic, with case studies drawn from North America, the Caribbean, Africa, and Europe. Mr. Posnansky

116P. Laboratory Analysis in Archaeology. Lecture, three hours. Prerequisite: consent of instructor. Preparation of archaeological reports for publication. Laboratory description of archaeological collections: typology, documentation, preparation of illustrations, and presentation of archaeological data for scholarly publications. Students work with museum collections of archaeological finds: ceramics, basketry, implements of bone, stone, and shell. Mr. Meighan

M116Q. Dating Techniques in Environmental Sciences and Archaeology. (Same as Geography M178.) Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. Introduction to scientific dating methods such as radiocarbon dating, radiation damage methods, biological dating techniques, and magnetic dating, and applications in environmental sciences, archaeology, and physical anthropology. Mr. Berger

118A. Museum Studies. Prerequisite: consent of instructor. Method and theory of museum operation. Discussion and demonstration of acquisition accession, storage, photography, conservation, and exhibition. Analysis of museum research, publication, and teaching, as well as museum administration and funding. Lectures and demonstrations structured to illustrate how the various aspects of museum operation are interrelated. Mr. Donnan and the Museum Staff

118B. Museum Studies. Prerequisites: course 118A, consent of instructor. Two areas of museum operation are selected by the students from those discussed and demonstrated in course 118A. Students are then required to develop expertise in these areas through a combination of library research and a series of assignments carried out in the museum. Mr. Donnan and the Museum Staff

Biological Anthropology

120. Survey of Biological Anthropology. Prerequisites: courses 1, 2, or equivalent. Limited to majors and graduate students in anthropology. A survey of biological anthropology including all major subareas. A lecture/seminar format requires attendance at a recitation section in addition to lectures. (Core course for biological field.) Mr. Williams

121A. Fossil Man and His Culture. Recommended prerequisites: courses 1, 2. Course 121A should be taken before 121B and 121C. Introduction to method and theory in paleoanthropology. Primate evolution, Cretaceous through the Miocene. Ms. Kennedy

121B. The Australopithecines. Prerequisite: consent of instructor. Recommended: courses 1, 2, 121A. The morphology, ecology, and behavior of the genus *Australopithecus*. The history of their discoveries and their place in human evolution. Ms. Kennedy

121C. Evolution of the Genus *Homo*. Prerequisite: consent of instructor. Recommended: courses 1, 2, 121A, 121B. The origin and evolution of the genus *Homo*, including archaic sapiens and the Neanderthals. The morphology, ecology, and behavior of these groups. Course ends with the appearance of modern man. Ms. Kennedy

122. Biology, Society, and Culture. Prerequisite: course 2. An investigation of the interaction between human biology and human behavior. Particular emphasis on the influences of human biological evolution on human cultural evolution and human cultural evolution on human biological evolution.

123. Human Genetics. Recommended prerequisite: course 1. Discussion of the nature and causes of human biological variation. Development and comparison of evolutionary models of genetic and phenotypic changes. Emphasis on geographical and cultural contributions to the development of observed patterns of human biological variation.

123P. Aging: An Anthropological Perspective. Lecture, three hours. An exploration of aging from an evolutionary and cross-cultural perspective. A survey of the mechanisms of mammalian aging, population demography and life-table modification, age-group systems, and the effects of modernization on these systems in non-Western societies. Mr. Mai

124. Evolution and Biology of Human Behavior. A comparative survey of the behavior patterns of preliterate and Paleolithic peoples and those of nonhuman primates. Assessment of biological variables fundamental to human and prehuman behavior with regard to theories on the evolution of human culture.

124P. Evolution of Human Sexual Behavior. Lecture, three hours. Prerequisite: consent of instructor. Recommended: course 1, 2, or 11 or equivalent. Examination of human sexual relations and social behavior from an evolutionary perspective. Emphasis on theories and evidence for differences between men and women in their patterns of growth, maturation, fertility, mortality, parenting, and relations with members of the opposite sex. Mr. Bailey

125A-125B. The Genetics of Human Diversity. Course 125A or equivalent is prerequisite to 125B. A survey of human biological diversity. Emphasis on genetics at the population level for both discrete and quantitative variation. Analytic methods and evolutionary hypotheses.

127P. Primate Evolution. Prerequisite: upper division standing. A survey of the primate paleontological and evolutionary record, encompassing prosimians, New and Old World monkeys, and hominoids. Attendant aspects of paleoecology and behavior.

128A-128B. Primate Behavior Nonhuman to Human. Prerequisite: upper division standing. Course 128A is prerequisite to 128B. Review of primate behavior as known from laboratory and field studies. Theoretical issues and the evolution of causal processes, structure and function of animal behavior, with special reference to nonhuman primates. Discussion of human behavior as the product of such evolutionary processes. In Progress grading.

129P. Laboratory Methods in Biological Anthropology: Skeletal. Prerequisites: courses 1, 2, consent of instructor. Limited to majors and graduate students. Laboratory methodology and analysis of human variation on skeletal material.

129Q. Paleopathology. Lecture, one hour; laboratory, three hours. Prerequisites: course 129P, upper division standing, consent of instructor. Investigation into diseases, trauma, health status, subsistence activities, and ethnic mutilation (i.e., cranial deformation, trepanation) through analysis of human skeletal materials. Course has a worldwide scope, although there is some emphasis on the New World. Ms. Kennedy

Cultural Anthropology

130. The Study of Culture. Lecture, three hours. Prerequisite: one lower division anthropology course or equivalent. The 20th-century elaboration and development of the concept of culture from the Boasian period to the present. Survey of the major schools of anthropological thought, such as historical particularism, psychological anthropology, functionalism, cultural materialism, structuralism, and symbolic anthropology. Examination of the utility of the culture concept in more applied areas of anthropology. (Core course for cultural field.)

130P. The Study of the Individual in Society and Culture. Lecture, three hours. Prerequisite: course 5 or 22 or consent of instructor. Examination of the relationships between the individual and society and culture. Topics include the extent to which individuals shape and are shaped by social and cultural systems, the role of the individual in social and cultural change, assumptions about human nature and individual needs and goals in social theory, the relationship between personality and role and between "private" and "public" symbols, individual variation within and between cultures, and deviance and abnormality. Mr. Hollan, Ms. Wellenkamp

131. American Culture. Prerequisite: upper division standing. An examination of American life in historical and contemporary terms, with special reference to the individual life cycle, in order to offer a systematic analysis of American culture and society in a cross-cultural perspective. Mr. Oswalt

132. Technology and Environment. Significance of material culture in archaeology and ethnology; problems of invention and the acceptance of innovations; the ecological and sociological concomitants of technological systems; selected problems in material culture.

133P. Social and Psychological Aspects of Myth and Ritual. The social and psychological significance of myth, ritual, and symbolism, with particular attention to anthropological theories and interpretations of religious belief systems. Ms. Levine

133Q. Symbolic Systems. Prerequisite: upper division standing or consent of instructor. An analysis of the anthropological research and theory on the cultural systems of thought, behavior, and communication expressed in a symbolic mode (as distinguished from the discursive, instrumental, and causal modes). Methods for the study of symbolic meaning, including the experiential approach. Mr. Maquet

133R. Aesthetic Anthropology. Prerequisite: upper division standing. Elaboration of a cross-cultural notion of visual aesthetic phenomena that meets the requirements of anthropological research. Aesthetic phenomena as cultural; their integration in a cultural system; their relationships with other elements in the interplay of social forces. Mr. Maquet

134. Personality and Cultural Systems: Enculturation. Prerequisite: upper division standing or consent of instructor. The relationship between individual and culture, with focus on enculturative learning as modality of personality forms and internal dynamics of culture change. Major emphasis on cultural influences of cognition, perception, thought processes, socialization, and development of value. Mr. Wilbert

134P. Anthropology of Self and Identity. Lecture, three hours. Prerequisite: course 22 or equivalent. Survey of the anthropological literature on person, self, and identity. Examination of the conceptual and theoretical relationships among these terms as well as an exploration of their use in contemporary ethnography. P/NP or letter grading. Mr. Hollan

135A. Introduction to Psychological Anthropology: Historical Development. (Formerly numbered 135P.) Lecture, three hours. Prerequisite: course 22 or consent of instructor. Survey of the field of psychological anthropology, with emphasis on the early foundations and historical development of the field. Topics include the study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings. P/NP or letter grading. Ms. Wellenkamp

135B. Introduction to Psychological Anthropology: Current Topics and Research. (Formerly numbered 135P.) Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Survey of the field of psychological anthropology, with emphasis on current topics and research. Topics include the study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings. P/NP or letter grading. Mr. Hollan

135Q. The Individual in Culture. Prerequisite: upper division anthropology, sociology, or psychology standing. The balance for freedom and determinism for individuals and societies in the interrelation of personality, social structure, and culture. Survey of the nature and limits of human plasticity; the variability and uniformity of personality within and between cultures; the relation of normal and abnormal conformity and deviance.

135R. Cross-Cultural Socialization and Childhood. Lecture, three hours. Introduction to ethnographic data on socialization and child training. Theories explaining cross-cultural variability in socialization practices. Current methods and research topics in the field. Mr. Weisner

135S. Anthropology of Deviance and Abnormality. Lecture, three hours. Prerequisites: course 22 or equivalent, consent of instructor. The relationship between culture and the recognition of, responses toward, and forms of deviant and abnormal behavior. Mr. Hollan

136P. Ethnology: Field Training. Training in ethnographic field methods. Execution of individual and group ethnographic field research projects.

M136Q. A Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Psychiatry M112 and Psychology M155.) Prerequisite: consent of instructor. The skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in the social sciences. Mr. Gallimore, Mr. Turner, Mr. Weisner (W)

137. Ethnography on Film. Intensive examination of filmed and written ethnographies of a wide range of the world's peoples, with the purposes of (1) comparing visual with written data and evidences and (2) developing criteria for adequate written and film ethnography. Mr. Moerman

138. Methods and Techniques of Ethnohistory. Introduction to the problems and procedures of extracting cultural data from documentary sources and their interpretation and analysis. The relevant documentary sources of various New World regions are selected as case histories to illustrate more concretely the problems and challenges in this major area of anthropological concern. Mr. Nicholson

139. Field Methods in Cultural Anthropology. Lecture, three hours. Prerequisite: upper division standing. Corequisite: course 139L. Introduction to the skills and tools of data ascertainment through fieldwork in cultural anthropology. Emphasis on techniques, methods, and concepts of ethnographical research and how basic observational information is systematized for presentation, analysis, and cross-cultural comparison. Mr. Wilbert

139L. Field Methods in Cultural Anthropology. Laboratory, three hours. Prerequisite: upper division standing. Corequisite: course 139. A supervised practicum of field methods in cultural anthropology. Field methods and techniques presented in course 139 practiced and applied in simulated field situations. Discussion of styles of presenting ethnographical information. Mr. Wilbert

Linguistic Anthropology

M140. Language in Culture. (Same as Linguistics M146.) Prerequisite: upper division standing or consent of instructor. The study of language as an aspect of culture; the relation of habitual thought and behavior to language; and language and the classification of experience. A holistic approach to the study of language, with emphasis on the relationship of linguistic anthropology to the fields of biological, cultural, and social anthropology, as well as archaeology. (Core course for linguistics field.) Mr. Kroskrity

141. The Ethnography of Communication: Introduction and Practicum. Prerequisite: upper division standing or consent of instructor. Course has two interrelated objectives: (1) to introduce students to the ethnography of communication—the description and analysis of situated communicative behavior — and the sociocultural knowledge which it reflects and (2) to train students to recognize, describe, and analyze the relevant linguistic, proxemic, and kinesic aspects of face to face interaction. Mr. Kroskrity

142A-142B. Human Social Ethology. Prerequisite: consent of instructor. Course 142A is a strongly recommended prerequisite to 142B. Students make primary records (sound tape, videotape, or film) of naturally occurring social interactions. These are analyzed in class for the interactive tasks, resources, and accomplishments displayed. Laboratory and fieldwork outside of class and minimal fees to offset costs of equipment maintenance and insurance required. Mr. Moerman

143A. Field Methods in Linguistic Anthropology: Practical Phonetics. Practice in elicitation from informants for the purposes of analysis of phonological systems and development of practical transcription, as a preliminary to learning to speak the native language and to the recording of ethnographic materials in native language. No prior experience in linguistics is assumed. Mr. Kroskrity

143B. Field Methods in Linguistic Anthropology: Syntax, Semantics, Textual Cohesion. Prerequisite: course 143A, equivalent experience, or consent of instructor. The skills and strategies necessary for conducting investigations into the syntactic, semantic, and textual (or discourse) structures of field languages. Practice with native speakers of various non-Indo-European languages is an important aspect of student participation. Mr. Kroskrity

144. American Indian Ethnolinguistics and Sociolinguistics. Prerequisite: prior coursework in either anthropology, linguistics, or American Indian studies. Introduction and comparative analysis of the sociocultural aspects of language use in Native North American Indian speech communities. Specific foci include both micro- and macro-sociolinguistic topics. Micro-sociolinguistic topics are comprised of such issues as multilingualism, cultural differences regarding appropriate communicative behavior and variation within speech communities (e.g., male and female speech, baby talk, ceremonial speech, etc.). Macro-sociolinguistic considerations include language contact and its relationship to language change and language in American Indian education. Mr. Kroskrity

C145. Afro-American Sociolinguistics: Black English. Lecture, three hours. Prerequisite: consent of instructor. Basic information on Black American English, an important minority dialect in the United States. The social implications of minority dialects examined from the perspectives of their genesis, maintenance, and social functions. General problems and issues in the fields of sociolinguistics examined through a case study approach. Concurrently scheduled with course CM243Q. Ms. Mitchell-Kernan (W)

Social Anthropology

150. The Study of Social Systems. Lecture, three hours. Prerequisite: course 5 or 6 or Sociology 1 or consent of instructor. The general principles of the organization of society; the relation of these to the technological complexity and ecological conditions of the culture; the principles of evolutionary development of social systems. (Core course for social field.) Mr. Goldschmidt

151. Marriage, Family, and Kinship. Prerequisite: course 5 or 22. A survey of marital patterns, descent, and family structure in a range of societies. Emphasis on the relationship between kinship and other aspects of the sociocultural system and on the importance of kinship for general anthropological research. Ms. Levine

152. Traditional Political Systems. Prerequisite: course 150 or consent of instructor. Political organization in preindustrial societies of varying degrees of complexity. Law and the maintenance of order; corporate groups; ideology. The relations of political institutions to other institutions of society. Ms. Levine

152P. Comparative Systems of Social Inequality. Lecture, three hours. Prerequisite: course 5 or 22 or consent of instructor. Exploration of the cultural causes and consequences of systems of social inequality based on rank, caste, class, ethnicity, or sex, with examples from Asian, Pacific, European, African, and American societies. Mr. Hammond

153A-153B. Production and Exchange in Traditional Societies. A review of economic and ecological approaches to studying organization of production and exchange. Economic life viewed from three perspectives: adaptation, decision making, and social structure. Comparative theories discussed in the context of ethnographic evidence from a wide variety of cultural systems. **153A.** Nonstratified Societies; **153B.** Stratified Societies. Mr. Earle, Mr. Johnson

154. Principles of Social Structure. Prerequisites: course 5 or 22 or Sociology 1, upper division standing in anthropology or sociology. The methods and theory which derive from Emile Durkheim in France and Radcliffe-Brown in England. The variety of approaches and concerns in social anthropology. Use of ethnographic material to illustrate the methods and concepts used by social anthropologists. Ms. Levine

155. Illness in Non-Western Societies. Prerequisites: course 5 or 22 or Sociology 1 and upper division standing, or consent of instructor. An analysis of the cultural modes of thought and social structures associated with illness in non-Western societies. Emphasis on the social roles involved in the diagnosis and curing. Ms. Levine

156. Comparative Religion. A survey of various methodologies in the comparative study of religious ideologies and action systems, including the understanding of particular religions through descriptive and structural approaches, and the identification of social and psychological factors which may account for variation in religious systems cross-culturally. Mr. Newman

157. Intentional Communities. Prerequisite: upper division standing or consent of instructor. Communes and monasteries, ashram and kibbutz are voluntarily joined societal units, offering complete life-styles perceived as alternatives to the mainstream cultures and stressing the affective involvement of the members. Discussion in a comparative perspective of questions such as the following: institutional goals stated in the community's "charter"; system of acquisition or production; internal organization; ideational configurations; individual experience; sociological and psychological functions; criteria of success and failure; subculture and counterculture. Mr. Maquet

158. Hunting and Gathering Societies. Prerequisite: course 5. A survey of hunting and gathering societies. Examination of their distinctive features from both an ecological and cultural viewpoint. Discussion of the possibility of developing a general framework for synthesizing these two viewpoints. This synthesis is used as a basis for illustrating the relevance of hunting and gathering societies as an understanding of complex societies. Mr. Read

Social Action/Applied Anthropology

160. Introduction to Social Action Anthropology. Lecture, three hours. Prerequisites: course 5 or 22 and upper division standing, or consent of instructor. Application of anthropology to such domestic and international issues as poverty, discrimination, public health, mental health, child welfare, education, delinquency and drug abuse, aging, housing and community organization, economic development, environmental protection, population control, diplomacy, warfare and revolution, the protection of native peoples, disaster relief, and refugee resettlement. Survey of career opportunities in applied anthropology. Mr. Hammond

160P. Internships in Applied Anthropology. Prerequisite: course 160. Designed to give students firsthand experience working in agencies in the public and private sectors (e.g., hospitals, mental health clinics, community development agencies, schools, etc.) selected for their relevance to students' prospective professional interests in applied anthropology. Eight to 12 hours in the field, complemented by weekly seminars, field evaluations, and the preparation of a field journal. Mr. Hammond

161. Development Anthropology. Prerequisites: course 5 and upper division standing, or consent of instructor. Comparative study of the peasantization of tribal peoples, the proletarization of peasants, and the urbanization of ruralities. Particular emphasis on the relation between national, international, and localized sociocultural systems; the theory of social movements. Alternative theoretical constructs critically discussed. Ms. Levine

162. Contemporary American Indian Problems. Contemporary problems of the American Indian both on and off the reservation. Topics include self-determination, land claims, activism, urban Indians, and role of the Bureau of Indian Affairs.

M163. Women in Culture and Society. (Same as Women's Studies M163.) Prerequisite: course 5 or 22. A systematic approach to the study of sex roles from an anthropological perspective. A critical review of relevant theoretical issues supported by ethnographic material from traditional cultures and contemporary American culture. Ms. Joe, Ms. Levine

M164. The Afro-American Experience in the United States. (Same as Afro-American Studies M164.) Promotes understanding of contemporary sociocultural forms among Afro-Americans in the United States by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on the utilization of anthropological concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans. Ms. Mitchell-Kernan (F)

165. Demographic Problems in Nonindustrial Societies. Prerequisite: course 5 or 22. The dynamic interaction between environment, cultural belief, social structure, and population in hunting and gathering, pastoral, horticultural, and agricultural societies. The principle theories of population change and current issues in population policy considered in light of the anthropological evidence. Ms. Levine

166. Comparative Minority Relations. Prerequisites: courses 5, 6. Comparative study of minority relations, social discrimination, and prejudice. Emphasis on cross-cultural perspectives and psychocultural analysis. Cases are taken from the U.S., Latin America, India, and other areas. Discussion of the factors responsible for discrimination and the cultural-psychological consequences of class, caste, or minority status of the individuals. Ms. Rodríguez

M166P. Mexican and Chicano Folklore in Cultural Context. (Same as Folklore M109.) Lecture, three hours. Prerequisite: consent of instructor. A historical and sociocultural survey of the folklore of peoples of Mexican cultural background within Mexico and the United States. Emphasis on folklore as indices of Mexican and Chicano identity, as communicated through such traditional forms as narrative, song, music, customs, beliefs, crafts, and foodways.

167. Urban Anthropology. Open to upper division majors in the social sciences, and others with consent of instructor. A survey of urbanization throughout the world, with emphasis on urban adaptation of rural migrants. Special focus on the problems of rural-urban migration of ethnic minority groups and subsequent adaptation of them within the United States explored in terms of the methods and perspectives of anthropology. Ms. Rodríguez

167P. Psychoanalysis and Anthropology. Lecture, three hours. Exploration of mutual relations between anthropology and psychoanalysis, considering both theory and method. History of and current developments in psychoanalysis; anthropological critiques of psychoanalytic theory and method, toward a cross-cultural psychoanalytic approach. Mr. Johnson

M168. Health in Culture and Society. (Same as Nursing M158.) Prerequisite: upper division standing. An examination of the theories and methods of medical anthropology in relation to cross-cultural health systems, role networks, attitude and belief systems of the participants. Emphasis on interaction networks in health care systems.

169. Modernization in the Middle East. Lecture, three hours. Prerequisite: course 5 or 22 or consent of instructor. Exploration of how Middle Eastern Muslim societies have responded to contemporary Western challenges — political, economic, technological, cultural, and military. Critical examination of contrastive models of economic development and nation-building policies employed by Turkey, Egypt, Iran, and Saudi Arabia and their consequences for these countries and the region. Mr. Shahrani

Regional Cultures

Africa

171. Civilization of Sub-Saharan Africa. Prerequisite: upper division standing or consent of instructor. A comprehensive overview of the sociocultural world of sub-Saharan Africa, interpreted as a broad cultural unit with its specific African configurations and as a plurality of civilizations, each based on a particular association of an environment (dry savanna, grassland, equatorial forest, highlands) with a dominant technique of acquisition/production (hunting/gathering, cereals growing, cattle herding, commercial crops, industry). Mr. Maquet

North America

172P. North American Indian Cultures. An examination of American Indian cultures from early historic time to modern development. Mr. Oswalt

172Q. Cultures of the California Indians. An examination of the cultural diversity of the Indians of California: their technology, social organization, and religions. Mr. Meighan

172R. Cultures of the Pueblo Southwest. Prerequisite: course 5, 6, 22, upper division standing, or consent of instructor. A survey of ethnographic and ethnohistorical research of the Pueblo Indians (Hopi, Zuni, Tanoan, and Keresan) and their immediate neighbors. Basic information on the history, languages, social organization, and traditional cultural systems of these groups. Mr. Kroskrity

172S. Theory and Method in the Pueblo Southwest. Prerequisite: course 172R or consent of instructor. Selected problems in Southwestern ethnology, viewing the Pueblo Southwest as an important locus for anthropological theory and method. Exploration of such theories as early culture and personality theory, functionalism, and symbolic anthropology in their application to the Pueblos and the Navajo. Methodological considerations include the use of life histories, the problem of objectivity, and the use of native languages as field tools. Mr. Kroskrity

M172T. Ethnohistory of Hispanic Cultures in the U.S. Southwest. (Formerly numbered 172T.) (Same as Chicano Studies M172T.) Lecture, three hours. Prerequisite: course 5 or 22 or consent of instructor. An ethnography of the social and cultural adaptations of the Hispanic peoples in the U.S. Southwest: their respective social organization, economic and political institutions, sacred and secular belief systems, and expressive cultures. P/NP (undergraduates), S/U (graduates), or letter grading. Ms. Rodríguez

172U. Eskimos. Prerequisite: upper division standing. A survey on historical, ethnographic, and contemporary Eskimo life stressing their importance in anthropological theory and practice. Particular emphasis on Eskimo origins, technology, and modern administration. Mr. Oswalt

Middle America

173P. Cultures of Middle America. An introduction to the social and cultural anthropology of Middle America, with emphasis on indigenous communities. Aspects of economics, society, politics, and religion reviewed in light of their historical development and current distribution.

173Q. Latin American Communities. An overview of the social and cultural anthropology of small communities in Latin America. Similarities and contrasts in social organization and interpersonal relations described in the context of economic, political, and cultural environments. Mr. Johnson

South America

174P. Ethnography of South American Indians. Introduction to the ethnography of South American Indians, with special emphasis on Lowland South America. Survey of the history and development of man and society in this world area and examination of exemplary cultures symptomatic of the various levels of cultural achievement. Mr. Wilbert

174Q. Ethnology of South American Indians. Prerequisite: course 174P or consent of instructor. Introduction to the ethnology of South American Indians, with special emphasis on Lowland South America. The methods and theories applied to the study of man and culture on the subcontinent, including biological anthropology, linguistics, and sociocultural anthropology. Mr. Wilbert

Asia

175P. Civilizations and Cultures of Southeast Asia. An introduction to the understanding and appreciation of the peoples, cultures, and societies of the Philippines, Indonesia, Malaysia, Thailand, Burma, Laos, Cambodia, and Vietnam seen against their historical and ecological backgrounds. Use of slides and other media along with texts, lectures, and discussion. Mr. Moerman

175Q. Civilizations of South Asia. Examination of the civilizations of Sri Lanka, India, Pakistan, Bangladesh, and the Himalayan states. Ideational systems, social institutions, and techniques of production discussed in the framework of a few contemporary civilizations, each focused on a major religious tradition (Hinduism, Buddhism, and Islam). Ms. Levine, Mr. Maquet

175R. Civilizations of Inner Asia. Overview of culture and society among the diverse peoples of Inner Asia, including Mongolia, Tibet, and Soviet Central Asia. Topics include environment and economic adaptation, politics in traditional isolation and within the framework of recent national integration, kinship, forms of marriage and the status of women, religion and the social order in Hindu-Buddhist culture contact zone, and current problems of modernization. Ms. Levine

175S. Japan. Prerequisite: course 22. An overview of contemporary Japanese society. General introduction; kinship; marriage and family life; social mobility and education; norms and values; religions; patterns of interpersonal relations; social deviance.

Middle East

176. Cultures of the Middle East. Lecture, three hours. Prerequisite: course 5 or consent of instructor. The unity and diversity of the social institutions and cultural forms in the Arab countries of North Africa and the Near East, Israel, Turkey, Iran, and Afghanistan. Mr. Shahrani

Pacific

177. Cultures of the Pacific. The four major culture areas of Australia, Melanesia, Polynesia, and Micronesia. General geographical features, prehistory, and language distribution of the whole region. Distinctive sociocultural features of each culture area presented in the context of their adaptive significance. Mr. Newman

History and Theory

182. The History of Anthropology. A brief survey of the development of Western social science, particularly anthropology, from Greek and Roman thought to the emergence of evolutionary theory and the concept of culture in the late 19th century. The "root paradigm" of Western social science and its influence on such notables as Durkheim, Freud, Hall, Lombroso, Marx, Piaget, Terman, and others. Consideration of how this influences ethnocentrism and Eurocentrism, sexism, racism, the perception of deviance, and our view of culture in general.

183. History of Archaeology. Prerequisite: at least one upper division course in archaeology or consent of instructor. The development of world archaeology from the Renaissance to the present. Presentation of how each of the major branches of archaeology has evolved a special character determined by the peculiarities of its own data, methods, and intellectual affiliation. Mr. Sackett

184. History of Human Evolutionary Theory. The men, the events, and the spirit of the time which mark man's attempts to understand his origins and diversity. Mr. Williams

185. History of Social Anthropology. Prerequisites: course 5 or 22 or Sociology 1, upper division standing in anthropology or sociology. A systematic survey of the development of social anthropology in France and Britain from the Enlightenment to the present. Review of major early concepts of French sociology and British structuralist-functionalism and current concerns in social theory. Ms. Levine

186A-186B. Quantitative Methods and Models in Anthropology. Prerequisite: upper division standing. Introduction to quantitative methods of data analysis and the modeling of sociocultural systems. **186A.** Methods of data analysis and topics such as data description, sampling, estimation procedures, and hypothesis testing. **186B.** Topics from statistical modeling (e.g., linear regression models) and deterministic modeling (e.g., network models, kinship structures, systems, models). Mr. Read

187. Theory and Method in Sociocultural Anthropology. Prerequisite: at least eight units of upper division social and cultural anthropology. A review of the major theoretical orientations in sociocultural anthropology, with special emphasis on the research methods that have been found most useful in each. Examination of the relevance of philosophy of science to sociocultural anthropology; identification of theoretical and methodological links to other social sciences. Mr. Johnson

C188. Simulation in Anthropology. Discussion, three hours; laboratory, three hours. Prerequisites: upper division standing, successful completion of courses 1 or 120, and 186A, or equivalent, consent of instructor. Introduction to the theory, appropriate use, and validation of simulation; review of the history of simulation methods in anthropology; the use of the microcomputer as a research tool. Intensive introduction to dynamic approximations of theoretical demographic and population processes. Concurrently scheduled with course C288. P/NP or letter grading. Mr. Mai

Special Studies

191. Writing for Anthropology. Prerequisite: course 5. Teaching of writing skills in various academic forms, including term papers, essay examinations, journal articles, and reports. Class projects require student writing and evaluation of professional writing. Emphasis on the organization and presentation of a scholarly argument. Mr. Earle

197. Economic Development and Culture Change. Seminar, three hours. Prerequisites: courses 5 and 22, or consent of instructor. Exploration of the cultural dimensions of such Third World development issues as technological innovation, economic change, politics, modernization, labor power training, migration, population planning, disaster relief, refugee resettlement, and the protection of indigenous peoples. Mr. Hammond

197H. Departmental Honors Seminar. (Formerly numbered 198H.) Seminar, three hours. Prerequisites: a 3.5 GPA in at least two upper division anthropology courses and eligibility for Letters and Science honors status, or consent of instructor. Five discussion segments dealing with major debates, questions, and issues in each of the departmental fields (social, cultural, biological, and linguistic anthropology, and archaeology). Discussion each week in a seminar format of readings on a major topic.

199. Special Studies in Anthropology (2 to 8 units). Prerequisite: consent of instructor. Eight units may be applied toward the upper division anthropology courses required for the major.

199HA. Directed Studies for Honors. Discussion, three hours. Prerequisite: honors major in anthropology. Discussion meetings with the adviser to help define the research and preparation for the project. Extensive reading and research in the field of the proposed honors thesis. The project often involves summer fieldwork. In Progress grading (credit to be given only on completion of course 199HC). (Sp)

199HB. Directed Studies for Honors. Prerequisites: course 199HA and honors major in anthropology, or consent of instructor. Must be taken in Fall Quarter of the senior year. Continued reading and research directed toward the analysis and presentation of data in a draft of the honors thesis (no more than 30 pages). In Progress grading (credit to be given only on completion of course 199HC). (F)

199HC. Directed Studies for Honors. Prerequisites: courses 199HA, 199HB, and honors major in anthropology, or consent of instructor. Preparation of the final version of the honors thesis (no more than 30 pages) that argues a central thesis of anthropological relevance. Must be submitted by the last day of class in Winter Quarter of the senior year. (W)

Graduate Courses

Admission to all graduate courses is subject to consent of instructor and completion of appropriate course requirements (when so indicated). Graduate courses are normally nonrepetitive in content but may be repeated for credit with consent of instructor and graduate counselor.

203. Core Seminar: Sociocultural Anthropology. Seminar, three hours. Prerequisites: two courses from 130, 135P, 150, or equivalent, or consent of instructor. The essential concepts, theories, and methodologies of sociocultural anthropology. Reading of and critical discussion on a body of significant literature.

Archaeology

210. Analytical Methods in Archaeological Studies. Prerequisites: one quarter of statistics, consent of instructor. Data analysis procedures in archaeology. Emphasis on the conceptual framework for the analysis of archaeological data, beginning at the level of the attribute and ending at the level of the region. Mr. Read

211. Regional Analysis in Archaeology. Prerequisite: consent of instructor. Course 210 is not prerequisite to 211. Survey of the analytical methods used in archaeology to study prehistoric settlement systems. Specific issues include settlement distribution with respect to natural resources, settlement hierarchy, and patterns of exchange. Mr. Earle

212P. Selected Topics in Hunter-Gatherer Archaeology. Prerequisite: consent of instructor. Regional studies in the development of early human culture. May be repeated for credit. Mr. Meighan

212Q. Problems in Southwestern Archaeology. Prerequisite: consent of instructor. A consideration of prehistoric cultural systems in the American Southwest, with emphasis on the description and explanation of organizational variability and change. Specific research questions vary with each course offering. May be repeated for credit. Mr. Hill

212R. Problems in Oceanic Archaeology. Lecture, three hours. Prerequisite: consent of instructor. The prehistory of Oceania. Content may vary, but problems considered include the history and process of island occupation, island adaptation, and the evolution of social stratification. May be repeated for credit. Mr. Earle

213. Selected Topics in Problems in Old World Archaeology. Prerequisite: consent of instructor. May be repeated for credit. Mr. Sackett

214. Selected Topics in Prehistoric Civilizations of the New World. Prerequisite: consent of instructor. The Mesoamerican and Andean civilizations normally constitute the major focus of the seminar. May be repeated for credit. Mr. Donnan, Mr. Nicholson

215. Field Training in Archaeology (4 to 8 units). Prerequisite: prior experience in archaeology. Advanced training in archaeological excavation techniques, including organization of projects, supervision of field crews, methodology of field recording, and preliminary analysis of field data. May be repeated for credit. Mr. Meighan

M216. Dating Techniques in Environmental Sciences and Archaeology. (Same as Geography M278.) Lecture, three hours. Prerequisite: consent of instructor. A colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and biological anthropology, as well as laboratory instruction and experimental work. May be repeated for credit. Mr. Berger

217. Explanation of Societal Change. Prerequisite: consent of instructor. Examination of the processes of societal evolution, emphasizing the usefulness of a variety of explanatory models drawn from general systems theory, ecology, anthropology, and other sources. Specific research questions vary with each course offering. May be repeated for credit. Mr. Hill

218. Style and Ethnicity. (Not the same as course 218 prior to Fall Quarter 1986.) Seminar, three hours. Prerequisite: consent of instructor. How stylistic variation in material culture informs on and mediates the shape, boundaries, and interrelations of ethnic groups. Aimed primarily toward archaeologists and ethnographers, seminar also welcomes students specifically interested in either material culture or style as such. Mr. Sackett

M219A-M219B. Graduate Core Seminars in Archaeology (6 units each). (Same as Archaeology M201A-M201B.) Seminar, three hours. Required of anthropology students in the archaeology field. Seminar discussions based on a carefully selected list of 30 to 40 major archaeological works. These core courses provide students with a foundation in the breadth of knowledge required by a professional archaeologist. Archaeological historiography, a survey of world archaeology, and archaeological techniques. Emphasis on an appreciation of the multidisciplinary background of modern archaeology and the relevant interpretative strategies. May be repeated for credit with consent of adviser.

Biological Anthropology

220. Current Problems in Biological Anthropology. Prerequisite: consent of instructor. A detailed examination of current research in biological anthropology (specific topics to be announced). Emphasis on the nature of hypotheses and their testing in ongoing student and faculty research. May be repeated for credit.

221A-221B. Fossil Evidence for Human Evolution. Prerequisite: consent of instructor. An examination and analysis of the fossil evidence for man's evolution. Ms. Kennedy

222P. Population Genetics of Man. Prerequisite: consent of instructor. An introductory course in statistics. The study of population concepts, probability, the conditions of gene frequency equilibria, and factors causing gene frequency change. Mr. Williams

M222Q. Probability Models and Statistical Methods in Genetics. (Same as Biomathematics M246.) Lecture, three hours. Prerequisites: course 222P, Mathematics 3A, two quarters of statistics, graduate standing. An introduction to probability models and statistical methods in genetics. Maximum likelihood methods for estimated genetic parameters introduced and discussed in detail. Mr. Read (W)

M222R. Applied Genetic Modeling. (Same as Biomathematics M207B.) Lecture, three hours; discussion, one hour. Prerequisites: course M222Q and graduate standing, or consent of instructor. Methods of computer-oriented genetic analysis. Topics include segregation and linkage analysis, polygenic (quantitative) models, and population structure. Includes a laboratory for hands-on computer analysis of genetic data; laboratory reports required. Ms. Spence (F, even years)

222S. Population Genetics. Prerequisite: consent of instructor. A consideration of some of the special methods of the genetics of human populations and their current application in research. May be repeated for credit. Mr. Williams

223. The Roots of Human Behavior. Prerequisite: consent of instructor. An examination of the behavior of living nonhuman primates and of the evolution and biological basis of human behavior. May be repeated for credit.

223P. Biology and Ecology of Foraging Peoples. Prerequisite: consent of instructor. Detailed discussions of topical issues in the study of foraging societies, including the perspectives of cultural ecology and ethno-archaeology. Primary emphasis on theoretical and practical topics in human ecology and biology, including health and nutrition, growth and development, life history variables, foraging, and sex differences. Mr. Bailey

224. Selected Topics in Field Training in Biological Anthropology. Prerequisite: consent of instructor. Examination of current hypotheses in student and faculty field research. Emphasis on new approaches to field and field-oriented laboratory investigations of primate ecology, behavior, anatomy, physiology, and evolution (specific topics to be announced). May be repeated for credit.

225. Analysis of Biological Anthropology Field Data. Prerequisite: course 224, other field training course, or consent of instructor. Pragmatic and theoretical aspects of research on wild primates from planning and expedition through final data analysis (discussion topics to be announced). May be repeated for credit.

226. Biological Anthropology Colloquium. Selected topics on the status of current research in biological anthropology. May be repeated for credit. S/U grading.

227. Monkeys, Apes, and Language. Lecture, three hours. Prerequisite: consent of instructor. A review of recent research on animal communication and its relation to the evolution of human language. Topics range from the neurophysiological control of vocalizations in a variety of species to the social function of communication, particularly among free-ranging primates. The "ape-language" projects examined in detail.

228. Mating Systems in Birds and Mammals. Lecture, three hours. Prerequisite: consent of instructor. Survey of the evolution of different mating systems in birds and mammals, with special focus on nonhuman primates. Emphasis on social and ecological selective pressures acting on male and female reproductive behavior and partial investment. The validity of applying evolutionary theory to human reproductive behavior.

M228A-M228B. Seminar in Behavioral Biology. (Same as Biology M252A-M252B, Education M229A-M229B, Physiology M252A-M252B, Psychiatry M291A-M291B, and Psychology M230A-M230B.) Discussion, six hours. Prerequisite: consent of instructor. Basic seminar for graduates interested in behavioral biology. An interdisciplinary course dealing with behavioral research in anthropology, biology, psychology, and the medical sciences. Proximate causation, development, and evolution in animal behavior. Physiology and the organization of behavior. Vertebrate social organization. Animal communication. The application of natural selection theory to human social behavior. In Progress grading.

M229A-M229B-M229C. Seminar: Selected Topics in Human Ethology. (Same as Education M281A-M281B-M281C and Psychiatry M279A-M279B-M279C.) Ethologists now use successful animal behavior methodology to study human behavior. When is this appropriate, how can it contribute? Each quarter covers one level of analysis: describing and recording behavior; causation; development, especially longitudinal studies; adaptation; evolutionary origins. Mr. Blurton Jones (F,W,Sp)

Cultural Anthropology

230P. Ethnology. Prerequisite: consent of instructor. A seminar on ethnological method and theory concentrating on ideational systems. May be repeated for credit. Mr. Wilbert

230Q. Cultural Anthropology. Prerequisite: consent of instructor. Special problems in cultural anthropology. May be repeated for credit. Mr. Goldschmidt

231. Asian Americans: Personality and Identity. Prerequisite: graduate standing. The effect of class, caste, and race on the Asian American personality within the framework of anthropological theories.

232. Cultural and Psychological Aspects of Rites of Passage. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Examination of rites of passage from both sociocultural and psychological perspectives. Exploration of general aspects (those common to rites of passage in general) as well as specific aspects (e.g., of puberty rites, of the rites of a particular culture) through an examination of the early anthropological literature on the subject and more recent formulations. S/U or letter grading. Ms. Wellenkamp

M232P. Cultural Modes of Thought. (Formerly numbered 232P.) (Same as Psychiatry M212.) Lecture, three hours. Prerequisite: consent of instructor. An examination of the influences of culture on learning, perception, thinking, and intelligence. The fields of cross-cultural psychology, in addition to cognitive anthropology. Focus on learning and thinking in non-Western cultures, including problems of education in ethnic areas within the U.S. Mr. Price-Williams

232Q. Myth and Ritual. Prerequisite: consent of instructor. The nature and function of myth and ritual in nonindustrialized societies. Its associated value systems and philosophies examined as infrastructure of culture rather than as phenomena proposed by structuralist rationalism and cultural material empiricism. May be repeated for credit. Mr. Wilbert

M232R. South American Folklore and Mythology Studies. (Same as Folklore M257.) Prerequisite: course 174P or consent of instructor. An examination of oral traditions and related ethnological data from various South American Indian societies against the background of the religious systems of these people. Mr. Wilbert

M232S. The Ethnography of Humor. (Same as Folklore M214.) Lecture, three hours. Prerequisite: graduate standing in folklore and mythology or anthropology. An examination and analysis of selected humorous expressions and events in cross-cultural perspective, with emphasis on the major psychological and sociocultural approaches to their study and interpretation.

232T. Person, Self, and Identity in Contemporary Anthropology. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Survey of the anthropological literature on person, self, and identity. The conceptual and theoretical relationships among these terms and their use in contemporary ethnography. S/U or letter grading.

232U. Issues in the Anthropology of Emotion. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Issues and problems in the anthropological study of emotion, such as the extent to which culture shapes emotional experience and expression in everyday contexts and in ritual and the ways in which concepts of emotion vary cross-culturally. S/U or letter grading. Ms. Wellenkamp

233P. Symbolic Anthropology. Prerequisite: course 133R or consent of instructor. Nature of symbolic relations (as distinguished from other referential ones), significance of symbolic systems (in terms of action, cognition, affectivity, contemplation), symbolic and isomorphic logic (as opposed to the causal one) are among the questions to be selected for analysis and discussion. May be repeated for credit. Mr. Maquet

233Q. Aesthetic Anthropology. Prerequisite: course 133R or consent of instructor. Selected questions concerning the visual aesthetic phenomena in their relationships with the sociocultural context examined in depth. May be repeated for credit. Mr. Maquet

M234A-M234B. Seminar in Psychocultural Studies. (Formerly numbered 234A-234B.) (Same as Psychiatry M210A-M210B.) Lecture, three hours. Prerequisite: consent of instructor. A two-quarter sequence devoted to the present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives on change. Mr. Edgerton, Mr. Price-Williams

M234P. Transcultural Psychiatry. (Same as Psychiatry M222.) Lecture, three hours. Prerequisite: consent of instructor. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatries, and the questions of "sick" societies. May be repeated for credit. Mr. Kennedy

M234Q. Psychological Anthropology. (Same as Psychiatry M272.) Lecture, three hours. Prerequisite: consent of instructor. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they are related to culture. Topics vary from quarter to quarter. May be repeated for credit. Mr. Edgerton

M234R. Sociocultural Perspectives on Mental Retardation. (Formerly numbered 234R.) (Same as Psychiatry M211.) Lecture, three hours. Prerequisite: consent of instructor. Exploration of concepts such as "intelligence," "competence," and "adaptive behavior" in varying non-Western societies as background to the study of the phenomenon of mental retardation in the West, particularly the United States. Topics include cross-cultural perspectives, the history of institutional confinement, the policies of deinstitutionalization and normalization, and current issues involving adaptation and "quality of life." Discussion of topics such as communicative competence, work, crime, deviance, sexuality, and marriage. May be repeated for credit. Mr. Edgerton

M235A-M235B. The Individual in Culture. (Formerly numbered 235A-235B.) (Same as Psychiatry M213A-M213B.) Lecture, three hours. Course M235A is prerequisite to M235B. In Progress grading.

M236P. Selected Topics in the Cross-Cultural Study of Socialization and Childhood. (Formerly numbered 236P.) (Same as Psychiatry M214.) Lecture, three hours. Prerequisite: consent of instructor. Methods, ethnographic data, and theoretical orientations. Emphasis on current research. May be repeated for credit. Mr. Weisner

M236Q. A Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Education M222A and Psychiatry M235.) Lecture, three hours. Prerequisite: consent of instructor. The skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some of the uses of observations and their implications for research in the social sciences. Students are expected to integrate observational work into their current research interests. May be repeated for credit. Mr. Gallimore, Mr. Turner, Mr. Weisner (W)

M237A-M237B. Basic Core Courses in Mental Retardation Research (2 units each). (Same as Psychiatry M219A-M219B.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Required of all MRRC trainees. A systematic overview of mental retardation and the sciences basic to this field of study. The language, methods, aims, and contributions of the various disciplines that contribute to the field. The last two weeks of the second quarter are spent discussing and preparing multidisciplinary research designs with potential for the prevention or amelioration of mental retardation. S/U grading. Mr. Buchwald, Mr. Edgerton

238. Evolution of Technology. Lecture, three hours. Description, analysis, and interpretation of technological developments from the time material culture originated to the Industrial Revolution. S/U or letter grading. Mr. Oswalt

239P. Selected Topics in Field Training in Ethnography (4 to 8 units). Prerequisite: consent of instructor. Supervised collection of ethnographic information in the field. Students spend full time in the field for most of the quarter.

239Q. Analysis of Field Data. Prerequisite: course 239P or other field training course. Supervised analysis of ethnographic materials by students who have participated in a related field training course. Students work with their own as well as general project data in the preparation of articles for professional journals. May be repeated for credit.

Linguistic Anthropology

240. Seminar in Language and Culture. Prerequisite: consent of instructor. The development of anthropological linguistics, modern linguistic theory, and its application to the study of nonlinguistic aspects of culture, including relationship of language to world view, comparative historical linguistics to prehistory, lexico-statistics, semantic analysis, linguistic acculturation, sociolinguistics, and ethnolinguistics. Mr. Kroskrity

M241. Topics in Linguistic Anthropology. (Same as Linguistics M246C.) Prerequisite: consent of instructor. Problems in relations of language, culture, and society. May be repeated for credit.

242. The Ethnography of Communication. Prerequisite: graduate standing or consent of instructor. A seminar devoted to examining representative scholarship from the fields of sociolinguistics and the ethnography of communication. Particular attention to theoretical developments including the relationship of the ethnography of communication to such disciplines as anthropology, linguistics, and sociology. Topical foci include style and strategy, speech variation, varieties of noncasual speech genres, languages and ethnicity, and nonverbal communication behavior. Mr. Kroskrity

243P. American Indian Ethnolinguistics and Sociolinguistics. Prerequisites: prior coursework in either anthropology, linguistics, or American Indian studies, consent of instructor. The social and cultural aspects of language use in Native North American speech communities. Specific foci include both micro-sociolinguistic topics (such as multilingualism, cultural differences regarding appropriate communicative behavior, and variation within speech communities) and macro-sociolinguistic topics (such as language contact, language change, and language in American Indian education). Graduate students conduct library and/or other research and participate in group discussion. Mr. Kroskrity

CM243Q. Afro-American Sociolinguistics: Black English. (Same as Afro-American Studies M200D.) Lecture, three hours. Prerequisite: consent of instructor. Basic information on Black American English, an important minority dialect in the United States. The social implications of minority dialects examined from the perspectives of their genesis, maintenance, and social functions. General problems and issues in the fields of sociolinguistics examined through a case study approach. Concurrently scheduled with course C145. Students are required to conduct research in consultation with the instructor, as well as participate in group discussion. Ms. Mitchell-Kernan (W)

244. Topics in Language Socialization. Prerequisite: consent of instructor. Selected topics in the study of language socialization, with a special focus on the development of discourse skills and the mastery of situationally appropriate speech. May be repeated for credit. Ms. Mitchell-Kernan

245. Linguistic and Intracultural Variation. Prerequisite: consent of instructor. The problem of variation as it impinges on the disciplines of anthropology and linguistics. Among the objectives of the course are the following: to acknowledge the importance of speech variation in anthropological linguistics research, to critically assess a broad and representative sample of modern scholarship devoted to the study of intra-individual and interindividual variation, and to evaluate the utility and potential applicability of recent linguistic models to anthropological linguistics and anthropological theory. Mr. Kroskrity

246. Research Design and Field Training in Linguistic Anthropology. Prerequisite: consent of instructor. Supervised collection of linguistic information in the field. Students spend full time in the field for most of the quarter. May be repeated for credit. S/U or letter grading.

247. Analysis of Linguistic Field Data. Prerequisite: course 246, other field training course, or consent of instructor. Supervised analysis of linguistic field data by students who have participated in a related field training course. Students work with their own as well as general project data in the preparation of articles for professional journals. May be repeated for credit. S/U or letter grading.

M247A. Ethnographic Film. (Same as Motion Picture/Television M209C.) Lecture/discussion, four hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Discussion of the history, methods, and criteria for the use of film as a medium for the preservation and communication of human cultures. Filming assignments are given to increase the understanding of the theoretical and practical aspects of ethnographic filming. Consideration of the potential of both film and video for fieldwork.
Mr. Boehm, Mr. Hawkins, Mr. Moerman (F)

248. Practicum in a Field Language (4 to 8 units). Prerequisite: consent of instructor. Intensive training in an indigenous language as preparation for work in the field.

Social Anthropology

250. Social Anthropology. Prerequisite: consent of instructor. Intensive examination of current theoretical views and literature. Ms. Levine

251P. Cultural Ecology. Prerequisite: consent of instructor. May be repeated for credit. Mr. Johnson

251Q. Cultural Ecology of Lowland South America. Prerequisite: consent of instructor. Seminar on traditional adaptations to the lowland environment, with special emphasis on the tropical forest. Explanatory principles accounting for cultural differences, with emphasis on effects of modern changes on the people and their environment. Mr. Johnson

252. Special Topics in Social Process. Prerequisite: consent of instructor. Selected aspects of the literature on cultural and social process. The significance of repeated and/or cumulative sequences of events in a variety of social and cultural contexts. Understanding approaches compared with normative concepts and ideal models. May be repeated for credit.

252P. Social Inequality. Lecture, three hours. Prerequisites: course 152P, upper division standing, consent of instructor. Analysis of particular problems in understanding systems of structured social inequality based on rank, caste, class, ethnicity, or sex. Participants serve as seminar discussion leaders and present a research paper. S/U or letter grading. Mr. Hammond

253. Economic Anthropology. Prerequisite: consent of instructor. May be repeated for credit.

254. Kinship. Prerequisite: consent of instructor. May be repeated for credit. Ms. Levine

255. Comparative Political Institutions. Prerequisite: consent of instructor. May be repeated for credit.

257. Social Interaction. Prerequisite: consent of instructor. Emphasis on issues for ethnographic theory and practice raised by developments in anthropological, sociological, psychological, linguistic, and ethnological contributions to our understanding of the organization of face-to-face behavior. May be repeated for credit. Mr. Moerman

258. Comparative Studies of Intentional Communities. Prerequisite: course 157 or consent of instructor. Questions concerning the ideational, societal, and individual significance of intentional communities selected and discussed in depth, with reference to particular collectivities. May be repeated for credit. Mr. Maquet

259. Cultural Ecology of Nomadic Pastoral Societies. Seminar, three hours. Prerequisite: upper division standing or consent of instructor. Examination of nomadic pastoralism both as a form of subsistence and economic strategy, and a mode of sociopolitical adaptation to ecologically marginal and sociopolitically heterogeneous regions of Asia and Africa. Mr. Shahrani

Social Action/Applied Anthropology

260. Urban Anthropology. Prerequisite: course 167 or consent of instructor. An intensive anthropological examination of the urban setting as a human environment.

261. Comparative Minority Relations. Prerequisite: consent of instructor. An analysis of the major theoretical and methodological issues in the study of minority relations from a comparative perspective. Consensus, conflict, and pluralistic constructs analyzed and their strengths as explanatory devices investigated as they pertain to dependent populations in North America, Latin America, Southern Africa, India, Asia, and the Euro-Slavic continent. May be repeated for credit. Ms. Rodríguez

261P. Issues in Development Anthropology. Lecture, three hours. Prerequisite: course 160 or 161 or consent of instructor. Selected problems in economic development in Third World countries in the context of related issues such as health and education, environmental protection, housing and urbanization, promotion of local participation, women's roles, protection of indigenous minorities, infrastructural development, diplomacy, warfare and revolution, and migration and refugee resettlement, with recommendations for action. Mr. Hammond

262. The Cultural Context of Health Care. Prerequisite: consent of instructor. Concepts and treatment of illness and disease in cross-cultural perspectives, with emphasis on research problems and methods. The anthropological approach to health-related research and the intersections of anthropology and problem areas in public health and psychiatry (such as epidemiology, fertility regulation, socialization, and developmental disabilities). Mr. Johnson

M262P. Culture and Human Reproduction. (Same as Public Health M276.) Lecture, two hours; discussion, two hours. Prerequisites: Public Health 110, 112, 172, 474, or equivalent, consent of instructor. Exploration of human behavior related to reproduction. Cross-cultural exploration of biological and behavioral factors, with particular reference to human adaptation. Ms. Scrimshaw

M263. Medical Anthropology. (Same as Nursing M217.) Lecture, three hours. Prerequisite: course M168 or consent of instructor. Any of the topics covered in course M168 are selected each quarter for intensive literature review and independent projects. May be repeated for credit.

263P. Gender Systems. Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Current theoretical developments in understanding gender systems cross-culturally, with emphasis on the relationship between systems of gender, economy, ideational systems, and social inequality. Selection of ethnographic cases from the recent literature. S/U or letter grading. Ms. Levine

M263Q. Social Relations, Illness, and Health. (Same as Psychiatry M273.) Prerequisite: one upper division course in anthropology, sociology, or psychology. Social structural factors that influence how health is defined and illness experienced, managed, and treated in the U.S. and abroad. Topics include the determinants of household health, institutional issues in the delivery of health services, and gender and health. Ms. Browner (Sp)

264. Ethnography of the Mexican/Chicano People in North America. Prerequisite: graduate standing or consent of instructor. Recommended: course M172T. A research course on topics in the ethnography of the Mexican/Chicano people in North America, including social organization, economic and political systems, belief and value systems, linguistic and expressive adaptations, and individuals and their cultural contexts. Topics vary according to interest and are announced prior to the beginning of the quarter. May be repeated for credit. Ms. Rodríguez

265. Public Archaeology. Prerequisite: consent of instructor. Archaeology as part of the national heritage, both in the U.S. and other countries. Legal, ethical, cultural, and scholarly aspects of salvage and contact archaeology. Designed for researchers and managers of cultural resources. Mr. Meighan

M266. Medical Anthropology in Public Health. (Same as Public Health M271.) Prerequisites: Public Health 110, 112, one upper division course in psychology, sociology, or anthropology, or equivalent, consent of instructor. Cross-cultural aspects of human behavior as they relate to perception, treatment, incidence, and prevalence of disease and illness. Ms. Scrimshaw

M267B-M267C. Ethnographic Film Direction (4 or 8 units each). (Same as Motion Picture/Television M265A-M265B.) Lecture, four hours; laboratory, to be arranged. Prerequisites: course M247A, graduate standing, consent of instructor. Further consideration of the methods and criteria for the use of film as a medium for the preservation and communication of human cultures. Production of films and videotapes on topics selected by students.
Mr. Boehm, Mr. Hawkins, Mr. Moerman
(W, M267B; Sp, M267C)

268. Issues in Social Action Anthropology. Prerequisites: course 160, upper division standing, consent of instructor. Analysis of specific problems in social action anthropology and recommendations for their resolution. Emphasis on professional preparation for careers in applied anthropology.
Mr. Hammond

M269. Contemporary Issues of the American Indian. (Same as American Indian Studies M200C.) Introduction to the most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on the historical background presented in American Indian Studies M200A and the cultural and expressive experience of American Indians presented in American Indian Studies M200B. Ms. Heth, Ms. Joe

Regional Cultures

271. African Cultures. Prerequisite: consent of instructor. Survey of the literature and problems of African culture.

M272. Indians of South America. (Same as Latin American Studies M250A.) Lecture, three hours. Prerequisite: consent of instructor. Survey of the literature and research topics related to Indian cultures of South America. May be repeated for credit.
Mr. Wilbert

273. Cultures of the Middle East. Prerequisite: course 176 or consent of instructor. Survey of the literature and problems of the various cultures of the Middle East.

274. Cultures of the Pacific Islands. Prerequisite: consent of instructor. Topics in the contemporary sociocultural anthropology and classic ethnography of Melanesia, Polynesia, and Micronesia. May be repeated for credit. Mr. Newman

275. Ethnicity in the Southwest. Discussion, three hours. Prerequisite: graduate standing. Comparative focus on ethnic relations among Indian, Mexican American, and Anglo populations within four subregions of the U.S. Southwest: the lower Rio Grande valley of south Texas, the Rio Arriba of northern New Mexico, western Arizona, and Southern California.
Ms. Rodríguez

276. Cultures of Southeast Asia. Prerequisite: consent of instructor. Discussion of recent and current anthropological research in Southeast Asia. Depending on their level of preparation, students produce a topical annotated bibliography, critique, or proposal for research. S/U or letter grading. Mr. Moerman

History and Theory

280. Anthropology Theory. Prerequisite: graduate standing in anthropology or consent of instructor. The range of theories that anthropologists have employed in describing and explaining variability in sociocultural phenomena. The organization of particular theories, as well as issues that separate divergent theories. Emphasis on up-to-date examples of different theoretical perspectives. Major perspectives include evolutionism, cultural ecology, British functionalism, French functionalism, structuralism, cultural and personality, psychological anthropology (Freudian, neo-Freudian, non-Freudian), behavioral anthropology, cognitive anthropology, and ethnosemantics.

281. Selected Topics in the History of Anthropology. Prerequisite: consent of instructor. Particular problems in the history of anthropology as dictated by the interests of students and faculty. May be repeated for credit.

282. Research Design in Cultural Anthropology. Prerequisite: consent of instructor. Primarily intended for graduate students preparing for fieldwork. The unique position of anthropology among the sciences and the resulting problems for scientific research design. Review of typical research problems and appropriate methods. Students prepare their own research designs and present them for class discussion.
Mr. Johnson

283. Mathematical Models in Anthropology. Prerequisite: consent of instructor. Current topics and issues in mathematical anthropology. An overview of a variety of mathematical approaches relevant to theory, systems theory, decision theory, Markov processes, etc. Mr. Read

M284. Qualitative Research Methodology. (Same as Public Health M273.) Discussion, three hours; laboratory, one hour. Prerequisites: Public Health 100A and 125 or 181, an undergraduate or graduate course in social psychology, anthropology, or sociology, consent of instructor. Intensive seminar-field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care.
Ms. Scrimshaw

285. Schools, Domains, and Strategies in World Archaeology. (Not the same as course 285 prior to Fall Quarter 1986.) Seminar, three hours. Prerequisite: consent of instructor. A comparative examination of the schools of world archaeology, contrasting their respective data bases, research strategies, and relations to allied intellectual disciplines. Archaeologists from all departments are welcome, as are students interested in the history or philosophy of science.
Mr. Sackett

286. Quantitative Methods in Anthropology. Laboratory, three hours. Prerequisites: courses 186A-186B or equivalent, consent of instructor. Computer-aided methods of quantitative data analysis, including multivariate techniques, in the context of student research data sets. Mr. Read

286P. Selected Topics in Computer Simulation and Modeling. Seminar, three hours. Prerequisites: courses 186A and C188/C288, or equivalent, consent of instructor. Recommended: course 186B. Applications of computer simulations and/or models to specific problem areas of interest to anthropologists. Problem areas rotate with each offering and include cognitive ecological, demographic, evolutionary, and other theoretical foci. S/U or letter grading.
Mr. Mai

C288. Simulation in Anthropology. Discussion, three hours; laboratory, three hours. Prerequisites: graduate standing, successful completion of courses 1 or 120, and 186A, or equivalent, consent of instructor. Introduction to the theory, appropriate use, and validation of simulation; review of the history of simulation methods in anthropology; the use of the microcomputer as a research tool. Intensive introduction to dynamic approximations of theoretical demographic and population processes. Concurrently scheduled with course C188. Graduate students are required to meet one additional hour each week to discuss relevant simulation literature. S/U or letter grading.
Mr. Mai

M289. Computer Methodologies in Latin American Studies and Anthropology. (Same as Latin American Studies M225.) Lecture, three hours. Prerequisite: consent of instructor. Basic principles of computing and information processing, along with their potential application in Latin American research. Examination of the impact that computers are having in Latin American society. Mr. Behrens

291. The Roots of Human Behavior. Prerequisite: consent of instructor. An examination of the behavior of living nonhuman primates and of the evolution and biological basis of human behavior.

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Individual Studies for Graduate Students (2 to 8 units). Prerequisite: consent of instructor. Directed individual studies. S/U or letter grading.

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units).

598. Research for and Preparation of M.A. Thesis (2 to 8 units). Prerequisite: consent of instructor (faculty adviser). Preparation of research data and writing of M.A. thesis. S/U grading.

599. Research for Ph.D. Dissertation (2 to 12 units). Prerequisite: consent of instructor. Ph.D. dissertation research or writing. Students must have completed the qualifying examinations and ordinarily take no other coursework.

Diana Savas, M.A., *Visiting (English as a Second Language)*

Scope and Objectives

Since language permeates every aspect of our social, economic, political, and academic pursuits, it is small wonder that we have deep abiding curiosity about its origin, its use, and its acquisition. The UCLA doctoral program in applied linguistics provides a rich and supportive environment for graduate students and faculty to define and resolve questions that satisfy that curiosity.

The combined faculties of the Department of Linguistics and the English as a Second Language (ESL) Section, as well as professors in Psychology, Sociology, and Education, represent a wide range of expertise and experience in language-related research. Their guidance and collaboration with students as they apply relevant elements of linguistics, psycholinguistics, and sociolinguistics result in substantial research findings in the area of language use, education, acquisition, and analysis. Graduates of the program are well prepared to pursue academic and professional careers at the highest level of service and inquiry.

Ph.D. Degree

Admission

The basic requirement for admission is the completion of the UCLA Master of Arts degree in Teaching English as a Second Language (TESL) or in Linguistics or the equivalent of one of these. Applicants with a graduate degree in TESL, linguistics, applied linguistics, psycholinguistics, or sociolinguistics from another recognized institution may be admitted provided they then make up the courses in one or the other of the two UCLA M.A. programs whose equivalents they have not yet taken. Students with graduate degrees in other related disciplines (such as a foreign language, English, education, psychology, sociology, or anthropology) are advised to complete the UCLA M.A. in Linguistics or TESL before seeking admission to the Ph.D. program.

Prospective candidates are required to submit (1) three letters of recommendation from professors who are well acquainted with their academic background; (2) a definite and complete statement of the type of dissertation they hope to prepare; (3) copies of any relevant professional publications, M.A. theses, or substantial papers they may have written. The Aptitude Test of the Graduate Record Examination (GRE) should also be taken (required only of applicants whose native language is English). Applications for admission to Fall Quarter, which is when most students are admitted, should reach the Graduate Admissions Office by the preceding December 30; the supporting materials should reach the Applied Linguistics Program (3300A Rolfe Hall, UCLA, Los Angeles, CA 90024) no later than February 15.

Admission criteria include graduate and undergraduate grade-point averages, relevant professional experience, command of a foreign language, the quality of the M.A. thesis, and any language-related publications the candidate may have written.

Major Fields and Specializations

Four areas of specialization are available: language analysis, language education, language acquisition, and language use. For details on each specialization, contact the program office.

Foreign Language Requirement

Before advancement to candidacy, students whose native language is English must demonstrate proficiency in two foreign languages by one of the following: (1) a reading examination; (2) a research paper based on extensive sources in the language; (3) a conversation examination showing knowledge in depth; (4) an Educational Testing Service (ETS) graduate examination. You may substitute three graduate courses in research design and statistics for one of the two foreign languages. In consultation with the interdepartmental committee, you must select the most appropriate means of fulfilling the requirement.

Course Requirements

In addition to fulfilling the general University requirements, candidates for the Ph.D. in Applied Linguistics must meet the program requirements listed below.

Basic Preparation: Any of the following courses not already taken must be completed as early as possible and before advancement to candidacy for the degree. For basic preparation in linguistics, you can select either a phonetics and phonology track or a syntax and semantics track. For both tracks, you must take Linguistics 120A and either Linguistics 120B, 127, or English 122K. Students selecting the phonetics and phonology track would then take Linguistics C165A/C200A, followed by Linguistics 201A or 203. Students selecting the syntax and semantics track would take Linguistics C165B/C200B, followed by Linguistics 206A or 206B or 207. For basic preparation in TESL, you must take English 241K, 370K, and 380K. Course 370K, which is organized as a general orientation to the ESL field, must be taken at UCLA. If you have taken courses equivalent to any of the remaining courses at another institution, you will not be required to take them at UCLA. If you have at least one year of experience in teaching a second language, you may be exempt from course 380K.

Units and Courses: As a breadth requirement, all candidates must take at least 32 units of graduate-level coursework (in the 200 or 500 series). These 32 units may not include courses taken while completing basic preparation courses, Linguistics 275, English 400K, or Applied Linguistics 597 or 599. No more than eight of the 32 units may be in 596 courses, and these should be in Applied Linguistics 596, if possible.

The 32 units (eight courses) must include at least two courses in each of the specializations of language analysis and language education,

as well as two courses in either language acquisition or language use. (None of the aforementioned six courses may be 596 courses taken in departments other than Linguistics or English.) An additional two courses are required in the specialization in which the dissertation research will be done. Thus, a student who opted for a dissertation in language acquisition would take a minimum of four courses in that area, plus two in language analysis and two in language education.

Appropriate graduate courses taken at UCLA after completion of the M.A. but before admission to the doctoral program may be applied toward the eight-course requirement for the Ph.D. Credit may be transferred for up to two courses taken at another institution, but only for graduate-level courses taken after completion of the M.A. and preferably taken within the framework of UCLA's Applied Linguistics 501.

Within Graduate Division limits, courses that may be taken on an S/U basis include undergraduate courses taken as prerequisites to needed graduate courses, undergraduate courses not required, reading courses in a foreign language, graduate courses taken in addition to the required 32 units, Applied Linguistics 501, 597, 599, English 400K, and Linguistics 275. All other courses must be taken for letter grades.

Research Papers

In lieu of a written qualifying examination, two original research papers of publishable quality in different areas of specialization are required. These may be revised or extended seminar papers but must be prepared after admission to the Ph.D. program. The topics of these papers are to be selected by the student, in consultation with appropriate faculty members and with consent of the Ph.D. program adviser. Each of the finished papers is evaluated by two faculty members.

All candidates are required to prepare a dissertation as a demonstration of their ability to carry out original research under the guidance of their doctoral committee. The doctoral committee also administers the University Oral Qualifying Examination before advancement to Ph.D. candidacy.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

As the dissertation nears completion, you must make a public report on the results of your research. This may be done, at your choice, at a meeting of the colloquium of either the Department of Linguistics or the ESL Section. You must, therefore, enroll in either English 400K or Linguistics 275 during the appropriate quarter. The public report will determine whether a final oral examination will be required.

Graduate Courses

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA Ph.D. program adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading. (F,W,Sp)

596. Directed Individual Study (4 to 8 units). Prerequisite: doctoral standing. Independent study in an area of applied linguistics. Up to eight units may be applied toward the Ph.D. course requirements. May be repeated for credit. (F,W,Sp)

597. Preparation for Ph.D. Candidacy Examination (4 to 8 units). Prerequisite: completion of at least six courses of the 32-unit requirement for the Ph.D. May not be applied toward the 32-unit requirement. May be repeated for credit. S/U grading. (F,W,Sp)

599. Research for and Preparation of Ph.D. Dissertation (4 to 16 units). Prerequisite: advancement to Ph.D. candidacy. Required of all Ph.D. candidates each quarter they are registered and engaged in dissertation preparation. May be repeated for credit, but may not be applied toward the Ph.D. course requirements. S/U grading. (F,W,Sp)

Applied Linguistics Course List

Language Acquisition

Education 212A. Learning and Education

212B. Motivation and Affect in the Educative Process

212C. Cognition and Creativity in Education

217D. Language Development and Education

English 260K. Psycholinguistics and Language Teaching

261K. Second Language Acquisition

269K. Current Issues in Language Acquisition

Linguistics 254. Topics in Linguistics I: Proseminar

Psychiatry 257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders

Psychology 240A-240B. Developmental Psychology

260A-260B. Proseminar in Cognitive Psychology

263. Psycholinguistics

Language Analysis

English 249K. Current Issues in Language Analysis

250K. Advanced Seminar in Cohesion Analysis of English Structure

251K. Advanced Seminar in Interlanguage Analysis

252K. Advanced Seminar in Contextual Analysis of English Structure

Linguistics 201A, 201B. Phonological Theory

206A, 206B. Syntactic Theory

210A, 210B. Field Methods

220. Linguistic Areas

225. Linguistic Structures

251. Topics in Phonetics and Phonology I: Proseminar

252. Topics in Syntax and Semantics I: Proseminar

253. Topics in Language Variation I: Proseminar

254. Topics in Linguistics I: Proseminar

Spanish (Spanish and Portuguese) 256A-256B. Studies in Spanish Linguistics

Language Education

Education 204A. Topics and Issues in International and Comparative Education

204D. Minority Education in Cross-Cultural Perspective

210A. Basic Concepts in Educational Research

210B. Experimental Design in Educational Research

210C. Experimental Design: Advanced Topics

210D. Experimental Design: Multivariate Analysis (courses 210A-210D are highly recommended for statistical work, but only two may be applied toward the eight-course requirement)

211A. The Measurement of Educational Achievement and Aptitude

211B. Measurement in Education: Underlying Theory

262B. Seminar: Reading

262F. Seminar: Research Topics in Bilingual/Multicultural Education

264. Seminar: Teacher Education

English 220K. Materials Development for Language Teaching

221K. Media for Language Teaching

222K. Language Testing for Teachers of English as a Second Language

223K. Role of English as a Second Language in Bilingual Eduation

M224K. The Teaching of English for Minority Groups

277K. Experiential Seminar in Second Language Learning

229K. Current Issues in Language Education

232K. Advanced Seminar in the Construction and Administration of Language Tests

Language Use

Anthropology M232P. Cultural Modes of Thought

M234Q. Psychological Anthropology

240. Seminar in Language and Culture

M241. Topics in Linguistic Anthropology

244. Topics in Language Socialization

Education 200B. Survey Research Methods in Education

English 223K. Role of English as a Second Language in Bilingual Education

242. Language and Literature

M262. Studies in Afro-American Literature

275. Stylistics and the Teaching of English

280K. Language Policy in Developing Countries

281K. Language Policy in the United States

282K. Intercultural Communication and the Teaching of English as a Second Language

283K. Discourse Analysis

284K. English for Specific Purposes

M285K. Studies in African Literature in English

289K. Current Issues in Language Use

Linguistics 251. Topics in Phonetics and Phonology I: Proseminar

252. Topics in Syntax and Semantics I: Proseminar

254. Topics in Linguistics I: Proseminar

Sociology 216A-216B. Survey Research Methods

217A-217B. Ethnographic Fieldwork

238A-238B. Fieldwork in Minority Communities

266. Selected Problems in the Analysis of Conversation

267. Selected Problems in Communication

Spanish (Spanish and Portuguese) 209. Dialectology

257. Studies in Dialectology

Archaeology
(Interdepartmental)

288 Kinsey Hall, (213) 825-4169

Professors

Robert Brown, Ph.D. *(Art History)*

Lecturer

David S. Whitley, Ph.D. *(Anthropology)*

Adjunct Professor

Leona M. Libby, Ph.D. *(Environmental and Archaeological Sciences)*

Scope and Objectives

The interdisciplinary program offers M.A. and Ph.D. degrees in Archaeology. It brings together interests and specialties represented by those departments offering courses in archaeology, as well as others offering courses relevant to archaeology. Qualified undergraduates may enroll in courses offered by the program provided they receive consent of the instructor.

The primary purpose of the program is to train scholars in archaeology for university-level teaching and research and other professional aims. Its resources are intended for those archaeology students whose academic goals cannot be met within any single department and who, consequently, require an individually designed plan of study combining academic preparation in two or more departments. Applications are especially encouraged from students whose interests may form bridges with disciplines and departments not offering archaeology (e.g., botany, geology, mathematics, statistics, zoology, etc.). There are opportunities for participation in a variety of field, laboratory, and computer studies on a worldwide scale.

Requirements for Graduate Degrees

Admission

Any undergraduate major may be considered for admission to the program although those applicants who have had little previous archaeological education may be admitted under probationary status and may be required to take a series of courses to make up deficiencies. A Graduate Record Examination (GRE) Aptitude Test report is required. The following application materials should be submitted directly to the chair of the program: an acceptable plan of study (including a statement of objectives, an outline of projected coursework, and a general indication of an M.A. paper or dissertation topic); three letters of recommendation; a research paper preferably relevant to archaeology or comparable evidence of scholarly work. Applicants are accepted for admission to the Fall Quarter only. The program's "Study Guidelines" brochure will be sent to applicants on request to the Chair, Archaeology Program, 288 Kinsey Hall, UCLA, Los Angeles, CA 90024.

Major Fields or Subdisciplines

Africa; analysis of archaeological materials; ancient Near East; Andean South America; Caribbean; China and the Far East; classical Greece and Rome; dating techniques in archaeological sciences; Europe; India and Central Asia; Mesoamerica; Pacific; paleoenvironmental studies; Western North America.

Other areas of specialization are also available.

Fieldwork

No graduate degree will be awarded until you have worked in the field and have demonstrated your competency to direct field research in archaeology. Both theoretical and practical knowledge of methods and techniques used in the field are necessary.

This requirement may be met in several ways. Ordinarily you will take a regular UCLA field course such as Anthropology 115P (which satisfies the M.A. field course requirement) or Archaeology 259, Ancient Near East 261, or History 276 (which satisfy both the M.A. and Ph.D. field requirements), or similar courses offered by other departments. Comparable courses offered by other institutions may also be accepted. An informal report, submitted by the director of an excavation, describing work performed by the students under supervision, may be sufficient. Excepting the four courses listed above, any given formula to fulfill the requirement will have to be cleared in advance with the chair of the program.

Master of Arts Degree

The structure of the M.A. program includes the successful completion within seven academic quarters of fieldwork (described above) plus the following requirements.

Foreign Language Requirement

The ability to read at least one modern foreign language, relevant to your field of interest and approved by your adviser, is required for the M.A. You may meet this requirement by (1) passing an examination administered by the Educational Testing Service (ETS) with a score of 500 or better; (2) completing the third course in an introductory, regular sequence of the selected language at UCLA with a minimum grade of A; (3) taking a reading examination (in Spanish, French, or German) administered by the program.

The foreign language requirement must be completed by the end of the sixth quarter in residence, unless an earlier deadline is imposed by the adviser.

Course Requirements

A minimum of 42 units (at least nine courses, of which five must be graduate) taken for a letter grade are required, to be distributed as follows: a minimum of five courses (26 units) in the 200 and 500 series, including Archaeology 200 (six units), M201A-M201B (six units each), and two elective graduate courses*, one of which may be course 596. Course 596 may be taken twice for a maximum of 12 units, but only six units may be applied toward the minimum graduate course requirement (a letter grade is given for the course). Four upper division elective courses* (a minimum of 16 units, excluding 199s) are also required.

Comprehensive Examination Plan

You will be required to take a comprehensive core examination during your third quarter in residence. This written examination is based largely on a reading list of about 30 volumes

*Of the six combined elective courses, no more than four may be offered by the same department. At least one must be *outside* the student's sphere of regional interest to be selected from a pool of eligible courses by the student's adviser.

which have been the focus of the seminar discussions in Archaeology M201A-M201B. The examination will be graded high pass, pass, or no pass and may be repeated once.

M.A. Paper

A master's-level research paper, normally no longer than 20 to 35 pages and graded by the three members of the committee, is to be submitted by the end of the third week of the seventh quarter to the chair of the program.

Ph.D. Degree

Admission

Completion of a master's program is required. Applicants who do not have a UCLA M.A. in Archaeology should refer to the admission section under "Requirements for Graduate Degrees" above. Admission to the doctoral program for students completing a UCLA M.A. in Archaeology is based on written recommendation by all three members of the M.A. committee and at least a high pass on either the M.A. core examination or the M.A. paper.

Doctoral students entering the program with an M.A. from another university will be required to pass the comprehensive core examination (see "Master of Arts Degree") unless they can demonstrate to the chair and the members of the admissions committee that the examination should be waived.

Foreign Language Requirement

Reading competence in two modern foreign languages relevant to your interests is normally required. Competence may be demonstrated as outlined for the master's degree.

Course Requirements

You must be enrolled in a minimum of 12 units per quarter. Archaeology 200 is required. There are no other restrictions or requirements concerning courses.

Qualifying Examinations

By the end of the fourth quarter of the doctoral program, after the foreign language requirement has been fulfilled, you must take a written qualifying examination in the following three areas: (1) topical specialization; (2) analytical theory, method, and technique; (3) regional culture history. If you pass this examination, you may then make arrangements to take the oral examination. If the written examination or any portion thereof is failed, you may make one further attempt if your committee deems it appropriate.

The University Oral Qualifying Examination must be taken by the end of the sixth quarter of the doctoral program. You will be required to submit to the doctoral committee a formal dissertation proposal (of about 10 pages), including the particular research problem on which you will be examined during the oral qualifying examination.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination may be waived by your doctoral committee.

Upper Division Course

C110. Archaeological Materials Identification and Characterization (6 units). Lecture, three hours; laboratory, four hours. A laboratory-oriented introduction for archaeologists to the identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C210.

Graduate Courses

200. Archaeology Colloquium (1 or 6 units). Discussion, two hours. Prerequisite: archaeology major or consent of instructor. Required of all students. The development of archaeology as a discipline. Major intellectual trends and current issues in archaeology. Scientific and humanistic viewpoints presented by archaeologists from different academic departments. May be repeated for credit, but may be applied only twice toward the departmental M.A. requirements. S/U grading only for students enrolled for one unit.

M201A-M201B. Graduate Core Seminars in Archaeology (6 units each). (Same as Anthropology M219A-M219B.) Seminar, three hours. Required of all M.A. students. Seminar discussions based on a carefully selected list of 30 to 40 major archaeological works. These compulsory core courses provide students with a foundation in the breadth of knowledge required by a professional archaeologist. Archaeological historiography, a survey of world archaeology, and archaeological techniques. Emphasis on an appreciation of the multidisciplinary background of modern archaeology and the relevant interpretative strategies. May be repeated for credit with consent of adviser.

205. Special Topics in Archaeology (6 units). Lecture/discussion, three hours. Prerequisite: graduate standing in archaeology or in other departments. Special advanced topics in archaeology, such as new strategies, methodologies, excavation projects, regional synthesis, or comparisons on a worldwide basis, including current work by the core faculty of the program and special visitors.

C210. Archaeological Materials Identification and Characterization (6 units). (Formerly numbered 210.) Lecture, three hours; laboratory, four hours. A laboratory-oriented introduction for archaeologists to the identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C110.

M213. Archaeological and Paleontological Applications of Stable Isotopes (6 units). (Formerly numbered 211.) (Same as Earth and Space Sciences M213.) Lecture, three hours. Application of natural variations in stable isotope ratios in fossilized biological and nonbiological materials to a variety of archaeological and paleontological problems. Topics include the basis for isotope distributions in archaeological and paleontological materials; analytical procedures for measuring isotopic ratios; dietary reconstruction; paleoclimatic analysis; determination of provenience of archaeological materials; analysis of aspects of the biochemistry and physiology of fossil animals.

Mr. DeNiro (F)

259. Fieldwork in Archaeology (2 to 12 units). Prerequisite: consent of instructor. Participation in archaeological field excavations or museum research under supervision of staff archaeologists at UCLA. A minimum of one month of field time away from the campus is required. May be repeated for credit with consent of adviser.

596. Individual Studies for Graduate Students (2 to 12 units). Hours to be arranged. Prerequisite: consent of instructor. May be repeated for credit with consent of adviser.

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units). Prerequisites: completion of formal coursework, passing of language examinations before enrollment, consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

598. M.A. Paper Preparation (2 to 12 units). Prerequisite: consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

599. Ph.D. Dissertation Research and Preparation (2 to 12 units). Prerequisite: consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

Related Courses in Other Departments

Related courses, not listed individually, include regional geography, ancient and regional history, ethnography, folklore, history of technology, and the earth sciences. Also recommended are the appropriate modern and ancient languages for your area of study.

Most archaeology courses are taught in the various departments. The following is a list of such courses, by topic and department. You are encouraged to examine the course listings of all departments for a truly interdisciplinary course of study.

Methodology and History

Ancient Near East (Near Eastern Languages) 261. Practical Field Archaeology

Anthropology 115P. Archaeological Field Training

115Q. Archaeological Research Techniques

115R. Strategy of Archaeology

Don T. Nakanishi, Ph.D. *(Education)*
Paul Ong, Ph.D. *(Architecture and Urban Planning)*

Scope and Objectives

The Asian American Studies Program, an interdepartmental program supported by the Asian American Studies Center, promotes the study of Asian and Pacific peoples in the United States from several disciplines. The undergraduate program provides a general introduction to Asian American studies for those who anticipate advanced work at the graduate level or careers in research and community work related to the Asian American. Although no undergraduate major is offered in Asian American studies, students may participate in the program through a departmental major or the interdepartmental major in East Asian studies. The graduate program leads to an M.A. degree.

A major goal of the program is to communicate the experiences of Asians as an American ethnic group. Courses examine the important issues and concerns of Asian Americans, including their history, mental health, social organization, and culture.

Special Undergraduate Program

Preparation for the Program

Required: Asian American Studies 100A-100B.

Upper Division

Since this is not a degree-granting program, students participating in it must complete an organized major.

For further information on the undergraduate program, contact the Curriculum Coordinator, Asian American Studies Center, at the above address.

Master of Arts Degree

Admission

In addition to the University's minimum requirements, applicants are expected to present evidence of their previous interest in Asian American studies through courses taken at the undergraduate level, by research papers written independently or for related classes, or by work experience in an Asian American community. In any case, applicants are required to submit a paper or article, preferably on Asian Americans, directly to the Asian American Studies Program (3232 Campbell Hall, UCLA, Los Angeles, CA 90024) as part of their application. Three letters of recommendation are also required.

Major Fields

Since the program is interdepartmental, its major fields are determined by the participating faculty from various departments.

Research Tool Requirement

The research tool requirement may be satisfied by one of two options:

(1) Asian Language: A minimum of two full years of study in an Asian language at the university level or equivalent. This requirement may be fulfilled before entering the program, but you must pass a proficiency examination administered by the Asian American Studies Center and the interdepartmental committee.

(2) Research Methods: Three upper division or graduate courses in research methods (e.g., statistics, computer science, field and observational techniques, experimental techniques, archival methods). Specific courses must be approved by the interdepartmental committee.

You must justify your choice of option in a written statement. The rationale must specify the courses selected and how they directly relate to research and career goals.

Course Requirements

A total of 11 upper division and graduate courses is required for the degree. Of that number, seven must be graduate courses, including the required Asian American Studies 200A, 200B, 200C. Three of the graduate courses must be selected from Anthropology 231, Education 253G, History 201H, Sociology 261.

Two courses in the 500 series may be applied toward the required 11 courses; however, only one of the two may be applied toward the required seven graduate courses.

Thesis Plan

The thesis committee is normally constituted at the beginning of your second year in residence, at which time you are expected to submit a plan for approval. After the approval of the thesis, the committee will conduct an oral examination on its subject.

Upper Division Courses

100A-100B. Introduction to Asian American Studies. An introduction to Asian American studies. **100A.** The history of Asians in America. **100B.** Contemporary Asian American communities.

103. Asian Americans and the Law. Survey of major federal and California case and legislative law directed specifically toward Asian Americans from 1850 to World War II and relocation. Major subject areas include Japanese relocation orders, anti-Asiatic labor legislation, legal prohibitions against Asians' right to testify, case law on Asian women, and equal educational opportunity for Asians.

105. Asian American Women. Lecture, three hours. The condition of Asian women in America. Topics include racial and cultural stereotypes, women in Asian American history, and contemporary issues and concerns of Asian American women. Current approaches to Asian American women presented and evaluated. Ms. Cheng

M107. Asian American Personality and Mental Health. (Formerly numbered 197.) (Same as Psychology M107.) Lecture, three hours. Prerequisite: Psychology 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors/resources, and immigrant and minority group status. Mr. Sue

197. Topics in Asian American Studies. Lecture, three hours. Variable topics selected from the following: Pilipino American Experience; Japanese American History; Korean American Experience; Asian American Literature; Asian American Communities.

Graduate Courses

200A. Critical Issues in Asian American Studies. Prerequisites: graduate standing, consent of instructor. Examines and seeks to develop a critical appreciation of the research literature on Asians in America and to develop alternative interpretations of the Asian American experience. Topics include Asian American history and economic/political and social/psychological issues. Ms. Cheng

200B. Critical Issues in Asian American Studies. Prerequisites: graduate standing, consent of instructor. A critical review of research methods, strategies, and philosophies in Asian American studies. Mr. Nakanishi

200C. Critical Issues in Asian American Communities. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Evaluation of traditional and contemporary theories and models of community for their appropriateness to understanding Asian Pacific American communities. Consideration of specific topics which explicate the development, structure, and dynamics of Asian Pacific American communities in studying community issues and concerns. Ms. Cheng, Mr. Sue

297. Topics in Asian American Studies.

M297A. Topics in Asian American Literature. (Same as English M260A.) Lecture, three hours. A graduate seminar that examines and critically evaluates writings of Asian Americans.

490. Writing Workshop for Graduate Students (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Practice in writing reports, grant proposals, abstracts, theses, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various Asian American journals helps students improve both their prose style and editorial abilities. Four units may be applied toward the M.A. degree requirements. May be repeated once for credit. S/U grading. Ms. Cheung

596. Directed Individual Study or Research (2 to 8 units). Hours to be arranged. Prerequisite: consent of instructor.

598. Research for and Preparation of M.A. Thesis (2 to 8 units). Prerequisite: consent of instructor. Preparation of research data and writing of M.A. thesis. S/U grading.

Assistant Professor
Matthew Malkan, Ph.D.

Scope and Objectives

Astronomy, the oldest science, has now become a meeting place of nearly all physical sciences. It is difficult for any educated person to escape the awe and wonder of such things as the nature of the other planets, the likelihood of black holes in space, the origin and future of the universe, and the possibility of life elsewhere.

The Astronomy Department, therefore, has several educational missions: to develop skills in graduate students which will enable them to make contributions at the frontier of astronomical research, to prepare undergraduate majors for entry into a graduate program, and to provide insight and understanding for nonmajors and nonscience students.

Graduate training of future astronomers, up to the Ph.D. level, is the department's first responsibility. Applicants must have solid backgrounds in physics and mathematics. The program provides training in both theoretical and observational astronomy; its strengths, at present, are in solar physics, stellar structure and evolution, magnetohydrodynamics, gaseous nebulae and interstellar medium, optical design, galaxies, quasars, and observational and theoretical cosmology.

The department's second responsibility is to the undergraduate astronomy major who hopes for a career in astronomy. Some Bachelor of Science degree recipients go on to graduate work; some opt for teaching careers, for which their training in physics, astronomy, and mathematics is most useful; still others find excellent jobs in industry, where their broad background in physical science with a specialty in astronomy makes them particularly valuable (especially in computer science, space, and aeronautical fields).

Classes for Nonmajors

The department offers general courses to all University students, including those who are not science oriented. Astronomy 3, 4, 5, and 6 are nonmathematical courses open to the general University student normally not intending to major in the physical sciences.

Astronomy 3 is the fundamental course recommended for every University student who does not major in physical sciences and should be taken in the first or second year. If you had an astronomical introductory course in high school, you should take either course 3H or 4, 5, or 6.

Astronomy 4, 5, and 6 are nonmathematical courses which develop the topics covered in course 3 to somewhat greater depths. Course 4 details the stars and stellar systems; course 5 concentrates on the problem of life in the universe; course 6 discusses the structure and evolution of the universe and the historical development of our ideas about it. These three courses may be taken in any order by students with a grade of C or better in course 3, or whose astronomical knowledge is on a similar level.

Students who have had at least two courses in high school algebra and one course in trigonometry are advised to take, instead of Astronomy 3, the parallel honors course, Astronomy 3H. Declared or potential majors in astronomy or in physical sciences should take course 3H if they need an elementary introductory course in astronomy.

Astronomy 81 and 82 are general survey courses recommended for science majors in their second year. They represent a serious and systematic introduction to astrophysics and require a good background in physics and mathematics (at least two quarters of the Physics 8 series and two quarters of the Mathematics 31/32 series).

Students of junior and senior standing in physics or related sciences are invited to select any of these courses: 115, 117, 127, 140, 180.

Bachelor of Science Degree

Preparation for the Major

Required: Astronomy 81, 82, Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E, Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 3 or 10A. *Recommended:* Chemistry 11A. Systematic study of astronomy should begin with Astronomy 81 and 82, taken in the second year.

The Major

Required: Astronomy 115, 117, 127, 140, 180; Physics 105A, 105B, 110A, 110B, 115A, 115B, 131. *Recommended:* Earth and Space Sciences 101, Physics 108, 112, 123, 124, 132.

Honors Program

Senior majors in astronomy with a 3.4 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astronomy. In addition to completing all courses required for the major, the honors student must complete two quarters of Astronomy 199. To receive honors and highest honors at graduation, the grade-point average must remain at 3.4 or better, and the work in course 199 must reflect original research and be accepted by the departmental honors committee.

Graduate Study

Admission

The basic requirement for admission is a bachelor's degree in physics or astronomy. Students in closely related fields (e.g., mathematics or chemistry) may be admitted at the discretion of the department. All students who apply should submit at least three letters of recommendation and take the Graduate Record Examination (GRE) Aptitude Test and Advanced Test in Physics. For further information, contact the Graduate Adviser, Department of Astronomy, 8979 Math Sciences, UCLA, Los Angeles, CA 90024.

New students and those who have not been admitted to candidacy for the Ph.D. should consult with the graduate adviser at the beginning of Fall Quarter to determine a program for the year.

Master of Science Degree

Course Requirements

Nine courses are required for the master's degree, of which at least five must be at the graduate level in astronomy. The B segments of the graduate multiple-term courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

Comprehensive Examination Plan

To receive the master's degree, you must obtain at least a B average in the departmental written comprehensive examinations. The examinations are divided into sections, with one section for each course in the A or B series that you may apply toward the M.S., M.A.T., or Ph.D. requirements. The examination is scheduled at the time the final examination for the course would normally be scheduled and is letter graded. You may repeat failed courses for credit but may not repeat the departmental examinations for departmental credit.

Master of Arts in Teaching

Course Requirements

Nine courses are required for the academic portion of the M.A.T. program. They must include at least five graduate courses in astronomy, mathematics, or physics, or 100- or 200-series courses in education required for the teaching credential. The B segments of the graduate multiple-term courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Although it does not count for degree credit, Physics 370 is also required. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

In order to obtain a secondary credential with the M.A.T. in Astronomy, additional courses in education, including supervised teaching, should be taken.

Comprehensive Examination Plan

This plan is the same as for the M.S. degree.

Ph.D. Degree

Course Requirements

Required for the degree are Astronomy 200, 204A, 208A, 217A, 219A, 227A, 230A; at least four courses from 204B, 208B, 217B, 219B, 227B, 230B; and at least two courses (projects) from 204C, 208C, 217C, 219C, 227C, 230C. You are required to take course 250 each quarter in residence.

Teaching Experience

Before receiving a Ph.D., you are required to spend at least three quarters as a teaching assistant at UCLA or have equivalent experience elsewhere.

Comprehensive Examinations

The departmental written comprehensive examinations are the same as described under the M.S. degree. To be qualified to go on to the Ph.D., you must receive a minimum score on these examinations.

After the written comprehensive examinations are completed, you must then fulfill the normal University requirements for a dissertation and pass the University Oral Qualifying Examination.

Projects

During the Fall Quarters of the second and third years, you are expected to complete a research project. You should work closely with one of the staff both when the project subject is selected and throughout the course of the work. The projects may be a continuation of work begun during the preceding Spring Quarter; the goals of the project should be selected to reflect the amount of work completed in the Spring Quarter.

The evaluation of the projects is based as much on the quality of the written report as on the quality of the research itself. The project report should include statements of the project goals, the relationship of the project to broader issues in astronomy, the techniques selected to attack the project problem, and the reasons for this choice. If the project is original and interesting, but incomplete, you would be encouraged to complete it later, but the grade assigned is based on the portion completed by the end of the Fall Quarter.

Final Oral Examination

You must pass a final examination after completing your dissertation.

Lower Division Courses

3. Astronomy: The Nature of the Universe. Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3H or 81 or 82. No special mathematical preparation is required beyond that necessary for admission to the University in freshman standing. A course for the general University student, normally not intending to major in physical sciences, on the development of ideas in astronomy and what has been learned of the nature of the universe, including recent discoveries and developments.
Mr. Epps, Mr. Malkan, Mr. Plavec

3H. Introductory Astronomy and Astrophysics. Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3. Introduction to astronomy and astrophysics for freshmen who are seriously interested in science. Course requires the ability to understand mathematical and physical concepts, but high school algebra and trigonometry classes provide sufficient qualification. Particularly recommended for declared or potential majors in astronomy or in physical and mathematical sciences. Mr. Jura

4. The Universe of Stars and Stellar Systems. Lecture, three hours; discussion, one hour. Prerequisite: course 3 or 3H or equivalent. An essentially nonmathematical course for the general University student with previous introduction to astronomy; a sequel to course 3, dealing in greater detail with stars and stellar systems. Various observed types of stars in relation to their internal structure and evolutionary state. Interacting binary stars, pulsating stars, explosive stars (novae and supernovae). Mass loss from stars, stellar wind. Galactic and planetary nebulae and their relation to stars. Interstellar medium. Initial stages of stellar evolution (protostars, T Tauri stars) and final stages (degenerate and collapsed stars). Stellar systems from clusters to galaxies.
Mr. Epps, Mr. Plavec

5. Life in the Universe. Lecture, three hours; discussion, one hour. Prerequisite: prior introduction to astronomy or consent of instructor. Life on earth and the prospects for life elsewhere in the context of the evolution of the universe from the simple to the complex. Course material is primarily from astronomy and biology but includes some chemistry, geology, and physics. Selected topics are treated in some depth, but with little or no formal mathematics.
Mr. Zuckerman (W)

6. Cosmology: Our Changing Concepts of the Universe. Lecture, three hours; discussion, one hour. Prerequisite: course 3 or 3H or equivalent. An essentially nonmathematical exposition of our ideas about the structure and evolution of the universe. Historical development of the ideas up to the present time. Problem of cosmic center and cosmic edge. Space and time. Curvature of space. General relativity. Black holes. The expanding universe and cosmological redshift. Early stages of the universe, Big Bang, current ideas of the inflationary universe.
Mr. Malkan (Sp)

10. Practice in Observing (2 units). Laboratory, two and one-half hours one evening per week. Prerequisites: knowledge of plane trigonometry and prior or concurrent course in astronomy, or consent of instructor. Practical work for beginners, including telescopic observations and laboratory exercises cognate to an introductory course in astronomy. (F)

81. Astrophysics I: Stars and Nebulae. (Formerly numbered 101.) Lecture, three hours; laboratory, one hour. Prerequisites: Mathematics 31A, 31B, Physics 8A, or equivalent, or consent of instructor. Open to qualified sophomore and upper division students. A survey of our knowledge about stars: their distances, masses, luminosities, temperatures, and interrelations between these parameters. Methods and importance for astrophysics. Variable stars. Planetary and gaseous nebulae. Mr. Plavec (W)

82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology. (Formerly numbered 101.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 31A, 31B, Physics 8A, or equivalent. Recommended: course 81, Physics 8B, 8C. Open to qualified sophomore and upper division students. Basic principles of stellar structure and evolution. Red giants, white dwarfs, novae, supernovae, neutron stars, and black holes. Pulsars and galactic X-ray sources. The Milky Way galaxy and the interstellar medium. Extragalactic astronomy, galaxy clustering, active galactic nuclei, and quasars. Introduction to cosmology: Hubble law, thermal history of the Big Bang, and the earliest moments of the universe.
Mr. Coroniti

Upper Division Courses

115. Statistical Mechanics and Its Application to Astrophysics. Lecture, three hours. Prerequisites: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 8A, 8B, 8C, 8D. Particle distributions, partition functions, black body radiation, the Saha equation, degeneracy. Applications to stellar atmospheres, stellar interiors, and the interstellar medium.
Mr. Epps, Mr. Jura (W)

117. Radiation and Fluids in Astrophysics. Lecture, three hours. Prerequisites: course 115 or equivalent and junior standing in astronomy or physics, or consent of instructor. Emission and absorption of radiation by matter, spectroscopy, spectral lines, and radiative transfer. Hydrodynamics and shock waves. Applications to stars, to the interstellar and intergalactic media, and to the early universe.
Mr. Jura, Mr. Morris (Sp)

127. Stellar Atmospheres, Interiors, and Evolution. Lecture, three hours. Prerequisite: senior standing in astronomy or physics or consent of instructor. Recommended: courses 115, 117. Physical conditions in stellar interiors. Energy production in stars. Stellar evolution from star formation through the normally observed stages to white dwarfs, neutron stars, and black holes. Novae, supernovae, other variable stars, chromospheres and coronae of the sun and stars. Evolution of binary stars. Analysis of stellar atmospheres. Mr. Plavec, Mr. Ulrich (Sp)

140. Stellar Systems and Cosmology. Lecture, three hours. Prerequisite: senior standing in astronomy or physics or consent of instructor. Properties of star clusters and galaxies, with particular emphasis on the Milky Way galaxy. Clusters and superclusters of galaxies. Extragalactic distance scale. Quasars and active galaxies. Topics in cosmology, including the expansion of the universe, microwave background, galaxy formation from primordial fluctuations, and observational constraints on the Big Bang. Mr. Morris, Mr. Wright (W)

180. Astrophysics Laboratory. Lecture, two hours; laboratory, four hours. Prerequisites: junior or senior standing in astronomy, physics, or a related field, consent of instructor. Lectures cover statistical methods in astrophysics, one- and two-dimensional random processes, and numerical methods. Laboratory experiments involve radio astronomy, interferometry, narrowband solar imaging, and visual photometry. Emphasis on use of computers for the automatic collection of data and for processing 2-D astronomical images. Mr. Wright (F)

199. Special Studies (2 or 4 units). Prerequisites: senior standing in astronomy or physics (with an outstanding record), consent of instructor. Special studies with an individual faculty member. With prior consent, the course may be used to carry out a meritorious observing program at the UCLA students' observatory, or in special cases, with the 24-inch reflector.

Graduate Courses

Prerequisite to all graduate courses is consent of instructor. Courses 204A through 230C are offered in alternate years and consist of three quarters according to the following scheme: level A (Winter Quarter, four units) — a basic survey course presenting the minimum knowledge in the field expected of all students who wish to obtain the Ph.D., but who do not necessarily plan to specialize in the field covered by the course; level B (Spring Quarter, six units) — advanced level for those considering the possibility of taking up a research project in the field; level C (Fall Quarter, following academic year, 10 units) — individual research projects supervised by the instructor in the form of a laboratory. Course 240 is equivalent to the B courses.

200. Introduction to Graduate Study of Astronomy. Required of all new graduate students. Surveys the various fields of astronomy and astrophysics; gives first acquaintance with working methods and with the department. Survey of basic astronomical nomenclature; the background in physics and mathematics outlined as required in graduate courses.

201. Astrophysics of the Solar System. Prerequisite: graduate standing or consent of instructor. The sun, solar phenomena, and solar-terrestrial relationships. The interplanetary medium and astronomical plasma physics, comets, meteorites, meteors, satellites and planets, planetary atmospheres. Origin and evolution of the solar system. Mr. Ulrich

204A-204B-204C. Observational Astronomy (4 units, 6 units, 10 units). Star catalogs and charts. Radiation measurements, photoelectric photometry, and solid-state detectors. Radio and infrared techniques. Spectroscopic observations. Includes laboratory work. Mr. Epps, Mr. Ulrich, Mr. Wright

208A-208B-208C. The Interstellar Medium (4 units, 6 units, 10 units). Dynamics and physics of interstellar gas and dust. Radio observations of the interstellar medium. Diffuse and planetary nebulae. Magnetic fields in space. Star formation. Topics in high-energy astrophysics.
Mr. Jura, Mr. Zuckerman

217A-217B-217C. Stellar Photospheres (4 units, 6 units, 10 units). Physics of stellar photospheres and radiative transfer. The continuous and line spectra of stars. Chemical abundances in stars. Stars with extended and unstable atmospheres.
Mr. Plavec, Mr. Ulrich

219A-219B-219C. Stellar Systems (4 units, 6 units, 10 units). Statistical astronomy. Distance determination. Stellar motions and populations. Stellar dynamics. Structure of the galaxy. Galaxies and clusters of galaxies. Distribution of matter in space. Cosmology. Mr. Malkan, Mr. Wright

227A-227B-227C. Stellar Structure and Evolution (4 units, 6 units, 10 units). Structure and evolution of the stars. Stellar energy sources and problems of nucleosynthesis. Theory of variable stars. Evolution of and mass exchange in binary stars. Final state of stellar evolution and degenerate stars. Supernova processes. Practical computation of stellar structure and evolution.
Mr. Plavec, Mr. Ulrich, Mr. Zuckerman

230A-230B-230C. High-Energy Astrophysics (4 units, 6 units, 10 units). High-energy radiation processes. Observational techniques of X-ray and gamma ray astronomy. Theory and observational results of X-ray and gamma ray sources, pulsars, radio galaxies, and quasars. Mr. Coroniti, Mr. Wright

240. Modern Problems in Astronomy and Astrophysics. Special topics offered by distinguished visiting professors. Open to qualified graduate students in astronomy and in related fields (physics, atmospheric sciences, earth and space sciences). May be repeated for credit.

250. Seminar on Current Astronomical Research (2 units). Required of all graduate students. Current astronomical problems. S/U grading. (F,W,Sp)

M285. Origin and Evolution of the Solar System. (Same as Earth and Space Sciences M285.) Dynamical problems of the solar system; chemical evidences from geochemistry, meteorites, and the solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of the planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading. Mr. Kaula

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

The following courses may be repeated at the discretion of the department:

596A. Directed Individual Studies (4 to 10 units).

596L. Advanced Study and Research at Lick Observatory (4 to 12 units). Intended for graduate students who require observational experience, as well as those working on observational problems for their thesis. Mr. Kraft

599. Ph.D. Research and Writing (10 to 12 units).

Atmospheric Sciences

7127 Math Sciences, (213) 825-1217

Professors

Akio Arakawa, D.Sc. *(Atmospheric Dynamics)*
Michael Ghil, Ph.D. *(Climate Dynamics)*
George L. Siscoe, Ph.D. *(Atmospheric Physics), Chair*
Richard M. Thorne, Ph.D. *(Atmospheric Physics)*
Sekharipuram V. Venkateswaran, Ph.D. *(Atmospheric Physics)*
Morton G. Wurtele, Ph.D. *(Atmospheric Dynamics)*
Michio Yanai, D.Sc. *(Atmospheric Dynamics)*
James G. Edinger, Ph.D., *Emeritus*
Yale Mintz, Ph.D., *Emeritus*
Hans R. Pruppacher, Ph.D., *Emeritus*

Assistant Professors

Carlos R. Mechoso, Ph.D. *(Atmospheric Dynamics)*
Derek C. Montague, Ph.D. *(Atmospheric Chemistry)*
Roger M. Wakimoto, Ph.D. *(Atmospheric Dynamics)*

Scope and Objectives

The atmospheric sciences present a wide variety of problems of compelling scientific interest and increasing social concern. This is exemplified by the efforts to improve air quality, the depredations caused by severe storms and floods, the attempts to control or modify weather phenomena, the problems of long-range weather forecasts and climate change, the expanding scientific frontiers into our outer atmosphere and the atmospheres of other planets.

The department offers a broad curriculum in dynamic and synoptic meteorology, upper atmospheric and space physics, cloud microphysics, atmospheric chemistry, and radiative transfer in planetary atmospheres.

The Bachelor of Science degree may qualify students for entry-level technical positions or represent valuable background for training in other professions. Master of Science and Ph.D. degree holders work in universities, research centers, laboratories, and government services and, increasingly, in the rapidly burgeoning private sector.

Bachelor of Science Degree

Preparation for the Major

Required: Atmospheric Sciences 1A, 3A, 10H, 11, Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL, 8E, Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Chemistry 11A, Program in Computing 3.

The Major

Required: Atmospheric Sciences 104A, 104B, 104C, M140, 161, Physics 131; three courses from Atmospheric Sciences 141, 142, 143, 144, 145, M154; two courses from Physics 110A, 110B, 112, M122, 132, 140, Chemistry 110A, 110B, Mathematics 135A, 135B, 136, 140A, 140B. Students preparing for graduate studies in atmospheric chemistry should take Chemistry 11B, 11C, 110A, 110B; students preparing for graduate studies in cloud physics, precipitation, and atmospheric chemistry should take Atmospheric Sciences 145, Physics 140, Mathematics 135A-135B, 140A; students preparing for graduate studies in upper atmospheric and space physics should take Atmospheric Sciences 145, M154, Physics M122; students preparing for graduate studies in dynamics/synoptics should take Atmospheric Sciences 141, 142, Physics 132.

Graduate Study

The Department of Atmospheric Sciences offers the M.S., C.Phil., and Ph.D. degrees.

Admission

There are no admission requirements in addition to University minimum requirements and no application form in addition to the one used by the Graduate Admissions Office. Three letters of recommendation are required. For departmental brochures and information, write to Department of Atmospheric Sciences, 7127 Math Sciences, UCLA, Los Angeles, CA 90024. In addition to students holding bachelor's degrees in meteorology or atmospheric sciences, graduates with degrees in related disciplines—astronomy, chemistry, engineering, geophysics, mathematics, and physics—are encouraged to apply for graduate standing in the department. Programs are arranged by consultation between the student and the department's graduate advisers, and considerable flexibility is maintained so that maximum advantage may be taken of the candidate's previous education.

Major Fields or Subdisciplines

Dynamic and synoptic meteorology; cloud physics, precipitation, and atmospheric chemistry; radiation; upper atmospheric and space physics.

Master of Science Degree

Course Requirements

A total of nine courses must be completed, five of which must be in the 200 or 500 series. You must also attain a grade of B (3.0) or better in one course in each of two fields other than your field of specialization. The only formal course requirement beyond the UCLA general requirements is Atmospheric Sciences 260 in which you must present a formal seminar attended and graded by all faculty. Only one 500-series course (four units) may be applied toward the minimum graduate course requirement for the M.S. degree.

Comprehensive Examination Plan

The comprehensive examination is based on coursework given during a prior two-year period. The examination is usually conducted at the end of the Fall and Spring Quarters, but special arrangements can be made for the Winter Quarter. A grade-point average of 3.0 is required for a pass at the M.S. level; a GPA of 3.5 or better allows you to continue toward entry into the Ph.D. program. You are permitted two attempts to obtain the requisite grade either for termination at the M.S. level or for continuation toward a Ph.D. You must, however, attempt the examination by the end of your first two years of study and if necessary, retake the examination at the earliest available time.

Thesis Plan

If you have a grade-point average of 3.5 or better, you may petition the department to obtain the M.S. by writing an original thesis. The petition must be received by the graduate advisers at least one year before you complete the degree (at the end of your first year of study). Provided you maintain a high academic standard in coursework, the accepted thesis may be used instead of the comprehensive examination for continuation toward the Ph.D. program.

Ph.D. Degree

Course Requirements

Students entering the department with an M.S. degree have no specific course requirements. The graduate advisers may, at their discretion, prescribe courses in areas in which they deem students to have insufficient background to help them in preparing to pass the comprehensive examination.

Teaching Experience

There is no formal requirement for teaching experience, but it is strongly encouraged, and approximately 95 percent of our graduate students serve as teaching assistants for one or more quarters.

Qualifying Examinations

After passing the comprehensive examination at the requisite level or completing the M.S. thesis in this department, you must take a further in-depth written or oral examination in your area of research specialization conducted by your departmental guidance committee. Subsequently, a full doctoral committee is appointed to conduct the University Oral Qualifying Examination on your selected dissertation topic and related areas and the final dissertation defense which is required of all students. Each of these examinations must be passed in no more than two attempts.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

This examination is required of all students.

Lower Division Courses

1. Introduction to Weather Maps and Weather Forecasting. Lecture, three hours. An introduction to weather maps and satellite imagery and their use in making a weather forecast. Discussions also include the structure of the National Weather Service and the services it provides to the general public. Course allows students to make weather forecasts for Los Angeles and one city east of the Rocky Mountains.
Mr. Wakimoto (F)

1A. Introduction to Weather Maps and Weather Forecasting. Lecture, three hours; discussion, one hour. Prerequisite: atmospheric sciences major. A course for majors parallel to course 1.
Mr. Wakimoto (F)

2. Air Pollution. Lecture, three hours; discussion, one hour. A Letters and Science general education requirement course for all students interested in the causes and effects of high concentrations of pollution in the atmosphere. Topics include the nature and sources of gaseous and particulate pollutants, their transport, dispersion, modification, and removal, with emphasis on atmospheric processes on scales ranging from individual sources to global effects; interaction with the biosphere and the oceans; stratospheric pollution. Mr. Montague (Sp)

3. Introduction to the Atmospheric Environment. Lecture, three hours; discussion, one hour. A course specifically designed to satisfy in part the Letters and Science general education requirement of students majoring outside the physical sciences. The nature and causes of weather phenomena, including winds, clouds, rain, lightning, tornadoes and hurricanes, solar and terrestrial radiation; phenomena of the higher atmosphere; the ionosphere and the auroras; causes of air pollution; proposed methods and status of weather modification.
Mr. Siscoe, Mr. Venkateswaren (F,W,Sp)

3A. Introduction to the Atmospheric Environment. Lecture, three hours; discussion, one hour. Prerequisite: atmospheric sciences major. A course for majors parallel to course 3; discussion section includes use of calculus.
Mr. Siscoe, Mr. Venkateswaren (F,W,Sp)

4. California Weather and Climate. (Not the same as course 4 prior to Fall Quarter 1986.) Lecture, two hours; laboratory, two hours; field trips. The climate and weather in California. Topics include marine layer, sea-land breeze, low-level temperature inversion, severe weather, satellite interpretation, weather forecasting, and use of interactive computing in weather analysis. Mr. Wakimoto

5. Climates of Other Worlds. Lecture, three hours; discussion, one hour. Introduction to the atmospheres of planets and their satellites in the solar system using information obtained during the recent planetary exploration program. An elementary description of the origin and evolution of atmospheres on the planets. Climates on the planets, the conditions necessary for the evolution of life, and its resulting effect on the planetary environment.
Mr. Thorne

6. Climate and Climatic Change. Lecture, three hours; discussion, one hour. A course specifically designed to satisfy in part the Letters and Science general education requirement of students majoring outside the physical sciences. Introduction to the physical causes of climate, the classification of climate, and the global distribution of climate types. Description of climate changes over time scales ranging from the lifetime of earth to el niño events. Discussion of the causes of climatic change (e.g., the long-term steady increase in solar luminosity, short-term fluctuations in solar luminosity, changes in the earth's orbit, changes in atmospheric composition, volcanoes, anthropogenic changes such as increased CO_2 and nuclear war). State of the art in modeling and predicting climate. Mr. Venkateswaran (Sp)

7. Meteorology in History and Art. Lecture, three hours; discussion, one hour. The impact of weather and climate on society, their dominant role in mythology and religion, their prominence in art, literature, and music. The major developments in man's understanding of nature as reflected through his reaction to and thoughts about the sky and its phenomena. Mr. Siscoe

8. Clouds, Rain, and Storms. (Formerly numbered 4.) Lecture, three hours; discussion, one hour. The raindrop and the ice crystal. Relation of meteorological conditions to cloud types. Precipitation mechanisms from clouds. Different scales of atmospheric cloud organization. Description and dynamics of spectacular weather systems, ranging from tornadoes to hurricanes. Severe weather forecasting. Mr. Venkateswaran

10H. Introduction to Atmospheric Sciences. (Formerly numbered 3H.) Lecture, three hours; discussion, one hour. Prerequisite: Physics 8D or exceptional performance in high school mathematics and physics or consent of instructor. An introductory course in atmospheric phenomena and atmospheric processes, required of atmospheric sciences majors and recommended for honors students who are declared or potential majors in the physical sciences or engineering. Mr. Wurtele (W)

11. Introduction to Weather Analysis. Lecture, two hours; laboratory, three hours. Prerequisites: course 10H, Mathematics 33A. The mean structure of the atmosphere. General characteristics and source regions of air masses. Polar-front theory. Weather in relation to disturbances. Upper-level wind structure and its relationship to cyclone development. Laboratories include an introduction to scalar analysis, hourly airways observations, synoptic and rawinsonde code. Students make weather forecasts for different areas of the United States. Mr. Wakimoto (Sp)

Upper Division Courses

101. Meteorology and Society. Lecture, three hours; discussion, one hour. Prerequisite: upper division or graduate standing. Intended for students in architecture, urban planning, law, and engineering, and all students interested in the impact of weather on society. The impacts on and uses of meteorology in society. Climate and architectural planning. Weather and engineering structures. Forensic meteorology in civil cases. The uses and abuses of short- and long-term weather forecasts and their current validity. The status of attempts to modify climate — in particular, to increase rainfall. Meteorology and public policy — in particular, air pollution legislation and acid rain investigations. Mr. Wurtele

104A. Atmospheric Thermodynamics. Lecture, three hours; discussion, two hours. Prerequisites: Chemistry 11A, Mathematics 33B, Physics 8D. Basic thermodynamics, including the first, second, and third laws. Atmospheric statics. Dry adiabatic processes. Phase changes of water and moist adiabatic processes. Introduction to cloud microphysics. Gravitational stability. Mr. Montague (F)

104B. Introduction to Dynamic and Synoptic Meteorology I. Lecture, two hours; laboratory, three hours. Prerequisites: courses 10H, 11. Atmospheric continuum. The properties of velocity field: vorticity, divergence, streamlines and trajectories, stream function and velocity potential. The equation of motion for fluids. Special atmospheric cases such as the geostrophic wind, gradient wind, ageostrophic wind, and thermal wind. Mr. Wakimoto (Sp)

104C. Introduction to Dynamic and Synoptic Meteorology II. Lecture, two hours; laboratory, three hours. Prerequisite: course 104B. The conservation of mass and the equation of continuity. Transformation of the vertical coordinate. Circulation and the vorticity equation. The thermodynamic energy equation. Mr. Wakimoto (W)

M140. Introduction to Fluid Dynamics. (Formerly numbered M149.) (Same as Earth and Space Sciences M140.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Surface and internal gravity waves. Rotating frame. Viscous flow. Mr. Wurtele (F)

141. Atmospheric Motion I. (Formerly numbered 150.) Lecture, three hours; discussion, two hours. Prerequisite: course M140. Structure and dynamics of large-scale motions in the atmosphere. The quasi-static equilibrium. Quasi-geostrophic motions. Rossby waves. Extratropical cyclones. Fronts and frontogenesis. The general circulation of the atmosphere. Mr. Yanai (W)

142. Atmospheric Motion II. (Formerly numbered 151.) Lecture, three hours; discussion, one hour. Prerequisite: course 141. Small-scale nonhydrostatic motions in the atmosphere. Internal gravity waves. Atmospheric turbulence and convection. The planetary boundary layer. Elementary cumulus dynamics. Mesoscale weather systems. Hurricanes and tropical disturbances. Mr. Yanai (Sp)

143. Physical Oceanography. Lecture, three hours; discussion, one hour. Prerequisite: course 141. Physical structure of the oceans. Observations of ocean currents. Boundary layers. Wind-driven oceanic circulations. Barotropic and thermohaline oceanic circulations. Models of the Gulf Stream. Coastal upwelling. Wind-mixed layers and thermoclines. Surface waves. Tides. Mr. Mechoso (W)

144. Micrometeorology and Air Pollution Meteorology. Lecture, three hours; discussion, one hour. Prerequisite: course 142. Wind and temperature structure in the surface layer; mesoscale weather and wind systems; turbulence and diffusion; evaporation; transport, diffusion, and transformation of atmospheric contaminants. Mr. Wurtele (Sp)

145. Atmospheric Physics. Lecture, three hours; discussion, one hour. Prerequisites: Physics 8E, 131. Physics of gases; properties and behavior of cloud particles; atmospheric electricity; solar and terrestrial radiation; atmospheric waves, scattering, visibility, and optics; remote sensing. Mr. Siscoe, Mr. Thorne

M154. Solar Terrestrial Physics. (Same as Earth and Space Sciences M154.) Lecture, three hours; discussion, one hour. Prerequisite or corequisite: Physics 110B. Particle and electromagnetic emissions from the sun under quiet and under disturbed conditions. The solar wind. The magnetospheres and the ionospheres of the earth and other planets. Geomagnetic phenomena. Aurora and airglow. Mr. Venkateswaren (F)

161. Numerical Methods in Atmospheric Sciences. Lecture, two hours; laboratory, three hours. Prerequisites: course 141 and Program in Computing 3, or consent of instructor. Numerical solutions of problems selected from atmospheric sciences. Matrix inversion. Solution of the oscillation, decay, advection, and vorticity equations. Mr. Mechoso (W)

M180. Nonlinear Waves. (Same as Earth and Space Sciences M180.) Lecture, three hours; discussion, one hour. Prerequisite: course M140 or consent of instructor. Basic concepts and examples of nonlinear wave behavior: limit cycles, attractors, bifurcations, relaxation, subharmonics, solitons, periodic versus chaotic behavior, Lorenz masks and Rossler bands. Mr. Newman

195. Senior Paper. Prerequisite: senior standing in atmospheric sciences. Supervised through individual consultation with an appropriate faculty member, students write a research paper on a topic of their own choosing within their area of concentration in the major. May be used for writing an honors thesis. (F,W,Sp)

198. Operational Meteorology (2 units). Laboratory, six hours. Prerequisite: junior or senior standing in atmospheric sciences. Daily contact with weather data and forecasting, satellite and radar data. Introduction to weather forecasting for aviation, air pollution, marine weather, fire weather, and public use. Includes daily weather map discussions and visits to observing, radiosonde, and radar installations. Mr. Wakimoto

199. Special Studies in Meteorology (2 or 4 units). Prerequisite: consent of instructor. Special individual study.

Graduate Courses

200A. Introduction to Physics of Clouds and Precipitation. (Formerly numbered 152.) Lecture, three hours. Macroscopic and microscopic description of clouds and precipitation; phase change processes in the atmosphere; theory of drop forming and ice forming nuclei; development of precipitation in clouds; cloud chemistry, cloud electricity. Mr. Siscoe (W)

200B. Atmospheric Radiation. (Formerly numbered 153.) Lecture, three hours. Thermal radiation from the sun and planets. Transfer of thermal radiation through planetary atmospheres. Radiation budget. Scattering of electromagnetic radiation by atoms. Molecules, dust, and aerosols. Remote sensing. Meteorological optics. (W)

200C. Introduction to Atmospheric Chemistry. (Formerly numbered 156.) Lecture, three hours. Chemical composition and history of the atmosphere: natural cycles of important minor constituents; relevance and application of elementary chemical kinetics, thermochemistry, spectroscopy, and photochemistry to chemical processes in the lower and upper atmosphere; chemical aspects of air pollution and aerosol formation. Mr. Montague

Dynamic and Synoptic Meteorology

201. Mesometeorology. Lecture, three hours. Prerequisite: consent of instructor. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, airmass thunderstorms, multicell storms, supercell tornadoes, gust fronts, downbursts, microbursts, and the dry line. Discussions on the design of a field project.

203. Dynamics of Fronts. Lecture, three hours. Prerequisites: courses 209, 210A. Margules relations; early Norwegian cyclone models; quasi-geostrophic and semi-geostrophic frontogenesis; orography and surface friction; mesoscale organizations near fronts: observations and theory; frontogenesis as a problem in nonlinear dynamics.

206. Atmospheric Convection. Lecture, three hours. Prerequisite: course M140 or consent of instructor. Rayleigh convection. Buoyant convection from isolated sources. Thermodynamics of moist air. Theory of moist convection. Observations of atmospheric convection. Models of cumulus convection. Mr. Yanai (F)

208A. Atmospheric Turbulence. Lecture, three hours. Kinematics of homogeneous and shear flow turbulence. Surface and planetary boundary layers, including heat transfer and turbulent convection. Survey of field and laboratory observations and their interpretation by theory. Mr. Wurtele

208B. Atmospheric Diffusion and Air Pollution. Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution control. Mr. Wurtele

209. Introduction to Geophysical Fluid Dynamics. Lecture, three hours. Equation of motion in a rotating frame, with special emphasis on its application to the shallow-water model. Potential vorticity. Geostrophic motion. Gravity and Rossby waves. Geostrophic adjustment. Quasi-geostrophic motion. Laplace's tidal equation. Kelvin and mixed Rossby gravity waves. Mr. Arakawa

210A. Atmospheric Wave Motions. Lecture, three hours. Prerequisite: course 209. Oscillations of a compressible, stratified, and rotating atmosphere. Scale analysis and dynamics of quasi-geostrophic motion. Quasi-geostrophic wave instability. Vertical propagation of wave energy. Mr. Arakawa (W)

210B. Dynamics of Planetary Circulations. Lecture, three hours. Prerequisite: course 210A. Interaction between waves and mean zonal and meridional circulations. Vacillation. Regimes of thermally forced planetary circulations and their stability. Frontogenesis. Geostrophic turbulence. Forced planetary waves. Mr. Mechoso

212A. Numerical Methods in Geophysical Fluid Dynamics. Lecture, three hours. Prerequisite or corequisite: course 209. Basic numerical methods for initial-boundary value problems in fluid dynamics, with emphasis on applications to atmospheric and oceanographic problems. Finite difference methods and truncation error. Linear and nonlinear computational instability. Computational modes and computational boundary conditions. Spectral methods. Mr. Arakawa (F)

212B. Numerical Modeling of the Atmosphere. Lecture, three hours. Prerequisites: courses 210A and 212A, or consent of instructor. Physical and computational design of numerical weather prediction and climate simulation models. The basic dynamical models. Vertical, horizontal, and time differencing. Parameterizations of sub-grid scale processes. Mr. Arakawa

213. General Circulation of the Atmosphere. (Formerly numbered 151.) Lecture, three hours; discussion, one hour. Observed mean circulations of the atmosphere. The momentum, heat, and moisture budgets and the energy cycle. Laboratory experiments. Basic dynamics of the Hadley and Rossby resumes. Vertical propagation of planetary waves. Stratospheric sudden warming. Mr. Arakawa (Sp)

214A. Climatic Equilibria. Lecture, three hours. The general circulation of the atmosphere and oceans. Radiative transfer and energy-balance models. Multiple equilibria and their stability. Variational principles and stochastic perturbations. Coupled energy-balance models of the atmosphere and oceans. Sensitivity of climate to external and internal changes. Mr. Ghil

214B. Climatic Oscillations. Climatic history of our planet. Quaternary glaciations. Fluid dynamics of the atmosphere and oceans, ice sheets and mantle. Oscillatory models of glaciation cycles. Bifurcations from equilibria to periodic and aperiodic solutions. The predictability of climatic change on various time scales. Mr. Ghil

216A. Tropical Motions with Moist Processes. Lecture, three hours. Prerequisite: course 206. Cumulus convection and the boundary layer in the tropics. Interaction of cumulus convection with the large-scale motion. Tropical cyclones. Monsoon meteorology. Mr. Yanai (W)

216B. Wave Motions in the Tropical Atmosphere. Lecture, three hours. Prerequisite: course 210A. Basic theory of equatorially trapped waves. Introduction to spectral analysis. Observations of tropical wave disturbances. Generation mechanisms of tropical waves. The quasi-biennial and semiannual oscillations. Mr. Yanai (W)

218. Dynamics of the Atmosphere-Ocean Systems. Lecture, three hours. Transfer of properties between atmosphere and ocean; wind-driven ocean currents; coastal upwelling. Air-sea interactions. Effects of the oceans on climate. Mr. Mechoso

219. Special Topics in Dynamic Meteorology (2 to 4 units). Content varies from year to year. S/U grading.

Cloud Physics, Precipitation, and Atmospheric Chemistry

221A. Atmospheric Chemistry I. Lecture, three hours. Prerequisite: course 200C or consent of instructor. Clean air chemistry of the troposphere; trace gases of biogenic and anthropogenic origin; tropospheric air pollution chemistry; physical and chemical properties of atmospheric aerosols; wet and dry deposition of pollutant gases and aerosol particles. Mr. Montague

221B. Atmospheric Chemistry II. Lecture, three hours. Prerequisite: course 200C or consent of instructor. Composition of the stratosphere, mesosphere, and ionosphere; chemistry of ground and excited state neutrals and of ions in the upper atmosphere; stratospheric pollution; chemistry of the airglow and nightglow; chemistry of other atmospheres. Mr. Montague

223A. Cloud and Precipitation Physics I. Lecture, three hours. Prerequisite: course 200A or consent of instructor. Microstructure of atmospheric clouds; structure of the three phases of water substance, including surface effects; thermodynamic theory for equilibrium between the three phases of water substance, including surface effects; theory of homogeneous and heterogeneous nucleation of water drops and ice crystals. Mr. Montague (F)

223B. Cloud and Precipitation Physics II. Lecture, three hours. Prerequisite: course 223A. Theory of the growth and evaporation of water drops and ice crystals by diffusion of water vapor; hydrodynamics of rigid bodies in a viscous medium; hydrodynamics of cloud drops, rain drops, and atmospheric ice particles; growth of cloud drops and atmospheric ice particles by collision. Mr. Montague (Sp)

224. Atmospheric Electricity. Lecture, three hours. Prerequisites: course 223B, Physics 110A, 110B. Fair weather electricity; atmospheric ions; electric structure of stormy and nonstormy clouds; electric charge generation mechanisms in atmospheric clouds; physics of thunder and lightning; effect of electric fields and charges on cloud and precipitation formation.

228A. Clouds and Radiation. Lecture, three hours. Radiation budget of cloudy atmospheres, including cloud-albedo feedback mechanisms; dependence of cloud radiative properties on microphysical parameters; test-bed modeling techniques of radiative effect of clouds; radiative dynamical interactions in cloudy atmospheres.

228B. Radar Meteorology. Lecture, three hours. Radar detection of spherical and nonspherical particles; use of radar in studying size distributions of cloud and precipitation particles, precipitation intensity and amount, updraft velocities, horizontal wind speed, and turbulence; radar observations of convective clouds, thunderstorms, tornadoes, hurricanes, squall lines, and fronts; clear air echoes.

Radiation

235. Infrared Radiative Transfer. Lecture, three hours. Prerequisite: course 200B. Theory of radiative transfer. Approximate solutions to the equation of transfer. Absorption spectroscopy; band models; absorption by atmospheric gases; fluxes and heating rates. Satellite radiation measurements.

236. Scattering Processes in the Atmosphere. Lecture, three hours. Prerequisite: course 200B. Equation of transfer in a scattering medium. Stokes formalism; Rayleigh and Mie theories; polarization of skylight; scattering in a turbid atmosphere, aerosols and their effects on the radiation balance of the atmosphere. Experimental methods of determining aerosol parameters and their significance to meteorology.

238. Radiative Transfer in the Earth's Atmosphere. Lecture, three hours. Prerequisite: course 200B. Critical review of methods available to calculate the transfer of radiation (visible, ultraviolet, and infrared) through the atmosphere. Computations of fluxes and heating rates using various methods. Familiarity with the available techniques in the literature provided.

Upper Atmospheric and Space Physics

240A. Solar System Magnetohydrodynamics. Lecture, three hours. Prerequisite: course M154 or consent of instructor. Derivation of the MHD equations with two fluid aspects, generalized Ohm's law, small amplitude waves, discontinuities, shock waves, and instabilities. Applications to the statics and dynamics of the solar wind and planetary magnetospheres and to solar wind-magnetosphere-ionosphere coupling. Mr. Siscoe

240B. Solar System Microscopic Plasma Processes. Lecture, three hours. Prerequisite: course M154 or consent of instructor. Adiabatic charged particle dynamics; incoherent radiation processes; collective effects in a plasma; propagation characteristics of electrostatic and electromagnetic waves; introduction to resonant interaction between charged particles and plasma waves. Mr. Thorne

240C. Ionospheric Plasmas. Lecture, three hours. Prerequisites: courses M154, 240B. Formation of planetary ionospheric layers; transport processes; currents and electric fields; ionospheric plasma instabilities; nonlinear effects and artificial modification. Mr. Venkateswaran

246. Physics of the Ionosphere. Lecture, three hours. Prerequisites: Physics 110A and 110B, or consent of instructor. Structure, composition, and dynamics of ionospheric layers. Mr. Venkateswaran (Sp)

247. Radiation Belt Plasma Physics. Prerequisite: course 240B or consent of instructor. Turbulent plasma instabilities and their relation to satellite observations and magnetospheric structure. Processes responsible for the source, loss, and transport of energetic radiation belt particles. Mr. Thorne

248. Advanced Topics in Interaction between Lower and Upper Atmospheres. Lecture, three hours. Content varies from year to year. Mr. Venkateswaran

249. Special Topics in Solar Planetary Relations (2 to 4 units). Selected topics of current research interest in solar wind, magnetospheric, or ionospheric physics.

254. Radiative and Photochemical Processes of the Middle Atmosphere. Lecture, three hours. Prerequisites: courses 200B, 246, 255. Ultraviolet absorption processes. Infrared transfer by CO_2 and O_3. Radiative and photochemical roles of other trace constituents. Remote sensing of the middle atmosphere. Mr. Venkateswaran

255. Dynamics of the Stratosphere and the Mesosphere. Lecture, three hours. Prerequisite: course 210A. Photochemistry and radiation regime of the middle atmosphere; propagation of waves of tropospheric origin; radiative and photochemical damping effects; excitation and propagation of atmospheric tides; wave-zonal wind interactions; internal instabilities; theories of circulation features, including annual, semiannual, and quasi-biennial oscillations and the buildup and breakdown of polar vortex.
Mr. Venkateswaran

256. Remote Sensing. Prerequisite: course 255 or consent of instructor. Remote sensing of stratospheric temperature and composition — theory and practice. Mr. Venkateswaran

257. Radiation, Pollution, and Climate. Lecture, three hours. A breadth requirement for graduate students; specific background in radiation is not assumed. External and feedback influences of radiation and climate/carbon dioxide and climate/cloud albedo problems. Effects of photochemical, thermal, and particulate pollution on urban and global climates. Climate modeling. Mr. Venkateswaran

Special Studies

260. Seminar in Meteorology (2 units).

261. Seminar in Atmospheric Dynamics (2 units).

262. Seminar in Cloud and Precipitation Physics (2 units).

263. Seminar in Atmospheric Radiation (2 units).

264. Seminar in Physics of the Upper Atmosphere (2 units).

M270A-M270B-M270C. Seminar in Climate Dynamics (2 to 4 units). (Same as Earth and Space Sciences M270A-M270B-M270C and Geography M270A-M270B-M270C.) Lecture, two hours. Prerequisite: consent of instructor. The archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. The climate of other planets. The modeling, simulation, and prediction of modern climate on the monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading. Mr. Berger, Mr. Ghil, Mr. Schubert

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Studies for Graduate Students (2 to 8 units).

597. Preparation for Comprehensive Examinations (2 to 8 units).

598. Research and Preparation of M.S. Thesis (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Catherine Jacobs, Ph.D.
Eric Mundall, Ph.D.
Steve Strand, Ph.D.

Scope and Objectives

Studies in biology touch every aspect of human existence, and seeking answers to human problems is a major challenge to modern biology. To meet this challenge, the Biology Department offers a wide spectrum of undergraduate and graduate instruction in population, organismic, developmental, cell, and molecular biology. All of these subject areas relate in some way to practical problems facing contemporary society, and all influence individual and collective decisions on matters ranging from environmental degradation to viruses and cancer.

The Bachelor of Science degree combines essential background studies in mathematics, chemistry, and physics with a general introduction to all of these biological subjects, as well as advanced in-depth exposure to some of them. The Master of Arts and Ph.D. degrees provide opportunities for advanced, concentrated study. The Master of Arts degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The Ph.D. degree requires independent and innovative research that ultimately results in a dissertation.

Bachelor of Science Degree

The Bachelor of Science degree is divided into three areas of concentration which build on similar lower division introductory courses and differ primarily in the upper division requirements. The first area of concentration — general biology — is designed for students who desire exposure to a wide range of biological subjects and for most students who will later seek admission to health sciences-related professional schools. The program offers great flexibility and can serve as adequate preparation for subsequent graduate study in any field of biology. The remaining two areas of concentration — molecular, cellular, and developmental biology (MCD) and ecology, behavior, and evolution (EBE) — provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.

Pre-Biology Major

Students who have not completed all the courses required as preparation for the major are considered pre-biology majors. After completing those courses with a grade of C– or better in each, students must petition to enter the biology major in the Undergraduate Advising Office, 2312 Life Sciences.

In order to be admitted as pre-biology majors, transfer students who have 80 or more units must have completed one year of general chemistry with laboratory, Biology 5 and 7, or equivalent, and at least one of the following: (1) one year of calculus, (2) one year of calculus-based physics, or (3) two courses in organic chemistry with laboratory.

General Biology Concentration

Preparation for the Major: Biology 5, 5L, 6, 7, 8, 8L; Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, 25; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: One course in morphology and systematics (Biology 100, 101, 105, 110, 153, or Microbiology 101); one course in developmental and molecular biology (Biology 138, 141, 143, 144, or 146); one course in physiology (Biology 158, 162, 166, 167, or 170); two additional upper division biology courses; four additional upper division courses in biology, chemistry, mathematics (except Mathematics 104, 106), microbiology, physics, or from Anthropology 125A, 125B, Biomathematics 110, Earth and Space Sciences 115, 120, Geography 108, 110, 112, Public Health 100B, 100C.

Molecular, Cellular, and Developmental Biology (MCD) Concentration

Preparation for the Major: Biology 5, 5L, 7, 8, 8L; Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, 25; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: Three courses in developmental and molecular biology (Biology 138 or 141, 143, 144); four courses in biological chemistry (Chemistry 110A, 133A, 156, 157A); one of the following laboratory courses or sets of laboratory courses: Biology 158, 162, 166, M185/M186/M187, 142A and 157, or 171 and 172A; two additional upper division courses from the following list not used to satisfy another requirement: Biology 110, 138, 141, 145A, 149, 155, CM156, 157, 158, 162, 166, 171, 177, M185, 190A through 190D, 199, Microbiology 101.

Ecology, Behavior, and Evolution (EBE) Concentration

Preparation for the Major: Biology 5, 5L, 6, 7, 8, 8L; Chemistry 11A, 11B/11BL; 11C/11CL; Mathematics 31A, 31B, 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL,and 8D/8DL; Chemistry 21, 23, and 25, or Chemistry 15, Mathematics 32B, and 33A.

The Major: One course in morphology and systematics (Biology 100, 101, 105, 110, or 152); one course in physiology (Biology 162, 166, 167, or 170); three courses in ecology, behavior, and evolution (Biology 111, 120, 122, 129, 135); one field quarter consisting of two to four courses from the Field Biology Quarter (FBQ), Catalina Marine Biology Quarter (CMBQ), or equivalent; additional upper division courses in biology, chemistry, mathematics (except Mathematics 104, 106), microbiology, or physics, as necessary to bring the total number of upper division courses to nine (recommended: Biology 119, M127, 130, 146, 168 in ecological and behavioral processes and Biology 103, 107, 112, 113, 114, 115 in taxon-oriented biology).

Additional Requirements

(1) A six-unit course counts as only one course toward requirements for the major.

(2) A maximum of eight units of Biology 190 or four units of Biology 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

(3) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Biology majors must earn a C– or better in each course, with at least a 2.0 (C) overall average in all courses applied toward the major.

Honors

An overall GPA of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 GPA in the major at graduation and who have successfully completed Biology 190A-190B.

Field Biology

The department offers two quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ) and the Catalina Marine Biology Quarter (CMBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter occurs during Spring Quarter and involves some combination of Biology 113, 114, 115, 124, 125, 126, 128, 131, and 132. The Catalina Marine Biology Quarter occurs during Fall Quarter and includes some combination of Biology 102, C104, 123, 147, 148, 164, and 165. To participate, you must enroll in all courses in the respective program. Participants in both programs are selected by personal interview during Winter Quarter. Although most participants are upper division biology majors, both programs are available to any upper division student with adequate biological background. Information and applications are available in the Undergraduate Advising Office.

Graduate Study

The department offers M.A. and Ph.D. degrees in Biology, with specialization in a wide spectrum of fields. Students who plan to enter graduate school are urged to seek the advice of staff members in their field of interest.

Admission

The department encourages applications from students in all areas of science, but expects successful applicants to have or to acquire a background comparable to the requirements for the bachelor's degree in biology at UCLA. A background in chemistry, physics, and mathematics is desirable. Deficiencies in these or other subjects must be made up at the earliest opportunity. Undergraduates who are prospective applicants should remedy their deficiencies by preparatory study at an appropriate institution. The Graduate Division or the department may initially restrict applicants with less distinguished accomplishments.

The department is organized for administrative purposes into two divisions based on mutual interest. Applications should be directed to either Division I (molecular, cell, and developmental biology) or Division II (organismic and population biology). The major fields and subdisciplines are listed under faculty interests in the departmental brochure.

All applicants must take the Aptitude Test (verbal, quantitative, and analytical) of the Graduate Record Examination (GRE). The Advanced Test in Biology is also required.

Three letters of recommendation are required. These should be from professors, supervisors, or others who may provide an evaluation of motivation, accomplishments or potential in research, scholarly activities, teaching, and related academic functions.

Applications, departmental brochures, and additional information may be obtained from the Graduate Affairs Office, Department of Biology, 2316 Life Sciences, UCLA, Los Angeles, CA 90024.

Program of Study

Study consists of coursework and research within the department and within related programs in biochemistry, geology, microbiology, and molecular biology on campus. Opportunities are also available off campus for intensive study of marine biology at the Catalina Marine Science Center in the Fall Quarter (CMBQ), field biology in the Spring Quarter (FBQ), and tropical biology through courses offered by the Organization for Tropical Studies.

You also are required to complete the departmental written qualifying examination, given in the Fall and Spring Quarters, at an early point in your graduate career.

Foreign Language Requirement

No foreign language is prerequisite to admission to the M.A. or Ph.D. program, and there is no uniform language requirement for obtaining the Ph.D. However, in the pursuit of certain subspecialties of biology, you may be required to gain proficiency in one or more foreign languages.

Master of Arts Degree

Admission

Applications are evaluated by the appropriate divisional admissions committee and are accepted for admission to Fall Quarter only.

Course Requirements

The program consists of at least nine courses completed in graduate standing, of which at least five must be graduate (200 series) courses. The remainder may be courses in the 100, 200, or 500 series as noted below. No more than two 596 courses (eight units) may be applied toward the nine courses required for the degree; only one 596 course (four units) may be applied toward the minimum graduate course requirement. Courses graded S/U may not be applied toward the minimum requirement, except that an S/U-graded course outside the major and applicable to the degree may be applied, provided that no more than one such course is taken per quarter.

Specific course requirements are established for you by your guidance committee.

Thesis Plan

A thesis reporting the results of an original investigation, written to conform to the requirements of the Graduate Division, is presented to and approved by the master's thesis committee of three faculty members. Before beginning work on the thesis, you must obtain approval of the subject and general plan from the faculty members concerned and from the thesis committee.

Comprehensive Examination Plan

If you select this plan, you must take a three-hour examination prepared and graded by your committee or committee chair and approved by the graduate adviser. The examination is graded pass or fail. If you fail, recommendation for or against a second examination must be made by the graduate adviser.

Ph.D. Degree

Admission

Each division determines admission of students to the Ph.D. program separately. Ph.D. students in Division I (molecular, cell, and developmental biology) are admitted in the Fall Quarter. Applications to Division II (organismic and population biology) are reviewed by the division's admissions committee which advises prospective sponsors about the desirability of admission.

Course Requirements

There are no formal course requirements for the Ph.D., although specific requirements may be established individually by your guidance committee. You must enroll for full-time study, as defined by the Graduate Division.

You are strongly encouraged to rotate laboratory and/or course experience with several faculty members during your first year of study as an aid to selecting a permanent adviser.

Teaching Experience

Each student is required to complete one academic year as a teaching assistant.

Oral Qualifying Examination

The University Oral Qualifying Examination is conducted by the doctoral committee as prescribed by the Graduate Division. It includes your preparation, presentation, and defense of an original written research proposal. The examination is graded pass, fail, or repeat. A failure requires dismissal. The second attempt at the examination is graded pass/fail. The examination must be completed by the end of the third year following first registration. You are advanced to candidacy following successful completion of this examination.

Candidate in Philosophy Degree

Requirements for the C.Phil. degree are identical with those for advancement to candidacy for the Ph.D., except that only four quarters of academic residence are required, including three quarters in continuous residence at UCLA. The C.Phil. is not given as a terminal degree.

Final Oral Examination

Final approval of the dissertation in the department is accomplished when the committee approves the written form and is satisfied with the final oral examination.

Lower Division Courses

2. Principles of Biology. Lecture, three hours; laboratory, 90 minutes. Designed for nonmajors. Not open to students with credit for course 5 or 7. Lectures include the structure and chemical composition of cells, animal structure and diversity, cellular respiration, photosynthesis, major organ systems with emphasis on human cell division, reproduction, development, ecology, population growth, genetics, evolution. Laboratory includes structure and function of cells, morphology of plants and animals, circulatory and nervous systems, embryology, plant diversity and adaptation, human genetics.

5. Biology of Organisms. Lecture, three hours; discussion/demonstration, two hours. Comparative morphology and embryology of the major plant and animal phyla; function of organ systems, including gas exchange, transport, regulation of the internal environment, hormones, coordination, and the nervous system.

5L. Organismic and Environmental Biology Laboratory (2 units). (Formerly numbered 6L.) Lecture, one hour; laboratory, three hours. Prerequisite: course 5. Introductory biology laboratory, including basic cell and microorganism organization, morphology and diversity of organisms, population biology, evolution, and community ecology.

6. Ecology, Evolution, and Behavior. Lecture, three hours; discussion, two hours. Prerequisites: course 5 and Mathematics 3A or 31A. A survey of the principles of population growth and ecology, competition, predation, community ecology, environmental physiology, population genetics, natural selection, and speciation.

7. Introductory Cellular and Molecular Biology. Lecture, three hours; discussion/laboratory, two hours. Prerequisites: course 5 and Chemistry 15 or 21. An integrated introduction to cellular and subcellular biology, including cells and organelles, molecular biology, cell cycles, and developmental biology.

8. Introductory Genetics. Lecture, three hours; discussion/demonstration, 90 minutes. Prerequisite: course 7. Principles of Mendelian inheritance and the chromosomal basis of heredity in prokaryotes and eukaryotes, recombination, biochemical genetics, mutation, DNA, the genetic code, gene regulation, genes in populations.

8L. Cellular and Molecular Biology Laboratory (2 units). Laboratory, three hours. Prerequisites: courses 5L, 8 (may be taken concurrently). Introductory laboratory experience, including bacterial growth, mitosis and meiosis, genetics, molecular biology, and developmental biology.

10. Plants and Civilization. Lecture, three hours; demonstration, one hour. Designed for nonmajors. The origin of crop plants; man's role in the development, distribution, and modification of food, fiber, medicinal, and other plants in relation to their natural history. Mr. A. Gibson (F,Sp)

13. Evolution of Life. Lecture, three hours; discussion, one hour. Not open to life sciences majors. Limited to 100 students. An introduction to biology within the framework of evolutionary theory. The relationships of evolutionary thought to other areas of knowledge and society. Natural selection and the origin of variation examined in the context of genetics, molecular biology, physiology, phylogeny, population dynamics, behavior, and ecology. Emphasis on the critical role of historical processes. (F)

20. Introduction to Human Heredity. Lecture, two hours; discussion, one hour; laboratory, two hours. Not open to students with a prior college course in genetics; not intended to satisfy the requirements of medical or dental schools. Man's inheritance and its biological basis introduced through lectures, readings, and laboratory exercises with *Drosophila*. Topics include prenatal development, Mendelizing factors, the role of chromosomes in heredity, and the role of genes in disease and population structure. (Sp)

25. The Oceans. Lecture, three hours; discussion, one hour. Not open to students in the sciences or to students with credit for Earth and Space Sciences 15. Limited to 40 students. Physical and chemical processes that take place in the oceans, with emphasis on their effects on organisms. (W)

30. Biology of Cancer. An introduction to molecular, cellular, and clinical aspects of cancer and a consideration of the sociological and psychological impact of cancer on the individual and society. Each lecture/discussion period is given by an invited lecturer who is prominent in cancer research or treatment. P/NP grading.

35. Mathematical Ideas in Biology. Lecture, three hours; discussion, one hour. Prerequisites: one year of calculus, consent of instructor. The use of mathematical ideas and analysis in the formulation and evaluation of theories of biological phenomena such as growth, growth control, biological rate processes, and applications of random walk theory. Coverage of topics tailored to specific student interests.
Mr. Kavanau

Upper Division Courses

Course 5L is prerequisite to all upper division laboratory courses. Course 8 is prerequisite to all upper division courses in cell, molecular, and developmental biology. If you do not complete course 8, you will be dropped from those courses.

100. Biology of Lower Plants (6 units). Lecture, four hours; laboratory, six hours. Prerequisite: course 5 or equivalent or consent of instructor. An introduction to the biology of algae, fungi, and bryophytes, with emphasis on form, function, and development, and the role of lower plants in the environment. Students are strongly encouraged to take both courses 100 and 101 since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.
Mr. Chapman

101. Biology of Vascular Plants (6 units). Lecture, three hours; laboratory, six hours. Prerequisite: course 5 or equivalent or consent of instructor. An introduction to the diversity in form and reproduction of vascular plants, with emphasis on development, evolution, and function. Students are strongly encouraged to take both courses 100 and 101 since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

102. Biology of Marine Invertebrates. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of "Preparation for the Major" courses or consent of instructor. Morphology, systematics, life histories and natural history, ecology, behavior, and physiology of marine invertebrates; emphasis on local invertebrates of Southern California and their habitats. Given at the *Catalina Marine Science Center.*
Mr. Morin, Mr. Muscatine

103. Taxonomy of Flowering Plants (4 or 8 units). *Offered either as a quarter-long course for four units or as an eight-unit course as part of the Field Biology Quarter.* The four-unit course has lecture, two hours; laboratory, six hours. The evolution, systematics, morphology, principles of taxonomy, phylogenetic systems, nomenclature, and modern methods of investigation. The eight-unit course covers the same basic lecture and laboratory material in five intensive weeks, followed by an extended field trip where students do individual field projects. Mr. A. Gibson

C104. Experimental Invertebrate Zoology (6 units). (Formerly numbered 106A.) Lecture, two hours; laboratory, 12 hours. Prerequisites: courses 105, 129, and 166 or 167 (either may be taken concurrently). Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C212. Mr. Morin

105. Biology of Invertebrates (6 units). Lecture, three hours; laboratory/field trips, six hours. Prerequisite: completion of "Preparation for the Major" courses or consent of instructor. Introduction to the systematics, evolution, natural history, morphology, and physiology of the invertebrates.
Mr. Morin, Mr. Muscatine

106. Experimental Marine Invertebrate Biology (6 units). (Formerly numbered 106B.) Lecture, two hours; laboratory, 12 hours. Prerequisites: courses 105 and 166 (latter may be taken concurrently), or equivalent, or consent of instructor. An advanced course of natural history, physiology, biochemistry of invertebrates, with emphasis on independent laboratory and field investigations. Mr. Muscatine

107. Entomology (6 or 8 units). Prerequisites: courses 5, 6. *Offered either as a quarter-long course for six units or as an eight-unit course as part of the Field Biology Quarter.* The six-unit course has lecture, three hours; laboratory, six hours; additional field trips. The morphology, physiology, development, systematics, behavior, and ecology of insects. The eight-unit course covers the same basic lecture and laboratory material in two and one-half intensive weeks, followed by an extended field trip where students do individual field projects in insect biology.
Mr. Greenfield

110. Vertebrate Morphology. Lecture, three hours; laboratory, four hours. Prerequisites: courses 5, 5L, 6. A study of vertebrate morphology and evolution from the viewpoint of comparative anatomy of adult forms, developmental anatomy, and paleontology. Laboratory study of selected vertebrates.
Mr. Vaughn (F,W)

111. Biology of Vertebrates. Lecture, three hours; demonstration/field trips/discussion, three hours. Prerequisites: courses 5, 5L, 6. The adaptations, behavior, and ecology of vertebrates.
Mr. Bartholomew, Mr. Howell, Mr. Vitt

112. Ichthyology. Lecture, two hours; laboratory, six hours; field trips. Prerequisites: courses 5, 6, and 110 or 111, or consent of instructor. Limited to 24 students. The biology of freshwater and marine fishes, with emphasis on their evolution, systematics, morphology, zoogeography, and ecology. Field trips examine the fishes of the Southern California shoreline, tidepools, and coastal streams. Mr. Buth

113. Herpetology (4 or 8 units). Prerequisites: courses 5, 6. Recommended: courses 111, 120, 122. *Offered alternately as a four-unit course to be given during a conventional academic quarter or as an eight-unit course as part of the Field Biology Quarter.* The four-unit course has lecture, three hours; laboratory, six hours; approximately four weekend field trips. The systematics, distribution, physiology, behavior, and ecology of amphibians and reptiles. The eight-unit course covers the same basic lecture and laboratory material in two intensive weeks, followed by an extended field trip where students do individual field projects in behavior, physiological ecology, or field ecology.

114. Ornithology. Lecture, two hours; laboratory/discussion/field trips, six hours. Prerequisites: course 111, consent of instructor. Limited enrollment. The systematics, distribution, physiology, behavior, and ecology of birds. Mr. Howell

115. Mammalogy. Lecture, three hours; laboratory, four hours; field trips. Prerequisites: course 111 or equivalent, consent of instructor. The evolution, ecology, behavior, and physiology of mammals.

116AH. Honors Seminar in Organismic and Evolutionary Biology (2 units). Prerequisites: course 5 and honors program standing, or consent of instructor. Reading and group discussion of organismic topics introduced in course 5. Students are expected to participate in the honors program and continue into course 116BH. P/NP (for students unable to take course 116BH due to academic or scheduling problems) or In Progress (credit to be given only on completion of course 116BH) grading.

116BH. Honors Seminar in Organismic and Evolutionary Biology (2 units). Prerequisites: courses 6, 116AH. Reading and group discussion of evolutionary and ecological topics introduced in course 6. Students are expected to participate in the honors program and must have taken course 116AH the previous quarter.

117. Vertebrate Paleontology. (Formerly numbered M117.) Lecture, three hours; laboratory, three hours. Prerequisite: course 110. Recommended: a course in general geology. Limited enrollment. The fossil record of the evolution of the vertebrates, with emphasis on the morphology of primitive forms in the series from fish to mammal. Mr. Vaughn (Sp)

M118. Paleobotany. (Same as Earth and Space Sciences M118.) Lecture, three hours; laboratory, three hours. Prerequisite: one course in biological science or consent of instructor. Recommended: Earth and Space Sciences 2 or equivalent. Survey of morphology, paleobiology, and evolution of vascular and nonvascular plants during geologic time, with particular emphasis on major evolutionary events.
Mr. Schopf

119. Mathematical Ecology. Lecture, three hours. Prerequisites: course 6 and Mathematics 32A, or consent of instructor. Recommended: course 122. Use of models of population growth and interspecies interactions, formulated as multidimensional, nonlinear differential, or difference equations, to explore the structure and dynamics of ecological populations and communities. Mr. Vance

120. Evolutionary Biology. Lecture, three hours; laboratory, two hours. Prerequisite: completion of "Preparation for the Major" courses. Highly recommended: Mathematics 31A, 31B, 32A. Recommended for biology majors specializing in environmental and population biology. Introduction to the mechanics and processes of evolution, with emphasis on natural selection, population genetics, speciation, evolutionary rates, and patterns of adaptation.
Mr. Cody, Mr. Hespenheide (W)

121. Seminar in Ecology (2 units). Prerequisites: course 120 or 122, consent of instructor. Undergraduate seminar in ecology; reading and discussion of current research, including preparation of review paper or annotated bibliography. May be repeated twice for credit. Mr. Hespenheide

122. Ecology. Lecture, three hours; laboratory, three hours. Prerequisite: completion of "Preparation for the Major" courses. Highly recommended: Mathematics 31A, 31B, 32A. Recommended for biology majors specializing in environmental and population biology. Introduction to population and community ecology, with emphasis on the growth and distribution of populations, interactions between species, and the structure, dynamics, and functions of communities and ecosystems. Mr. Cody, Mr. Vance (F)

123. Ecology of Marine Communities. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of "Preparation for the Major" courses or consent of instructor. Field study of the natural history and ecology of marine organisms and communities, involving an independent research project. Given at the *Catalina Marine Science Center.* Mr. Vance

124. Field Ecology (4 or 8 units). Lecture, two hours; laboratory or field trip, 10 hours. Prerequisites: courses 5, 6. Recommended: courses 111, 120, 122. *Offered either as a quarter-long course with weekend field trips or as a single field trip conducted between quarters, followed by lectures and tutorials for three weeks. When the course is given as part of the Field Biology Quarter, it is eight units and lasts for five weeks.* Field and laboratory research in ecology, the collection, analysis, and write-up of numerical data, with emphasis on design and execution of field studies. Mr. Cody

125. Plant Population Ecology (4 or 8 units). Lecture, two hours; laboratory, six hours; field trips. Prerequisites: course 120, consent of instructor. *Offered either as a quarter-long course for four units or in the Field Biology Quarter as a concentrated five-week course for eight units.* A study of ecological variation, structure, distribution, and reproductive biology of plant populations, emphasizing field studies of selected populations and ecosystems. Mr. Cody

126. Behavioral Ecology (4 or 8 units). Prerequisites: courses 5, 6. *Offered either as a quarter-long course for four units or as an eight-unit course as part of the Field Biology Quarter.* The four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. The eight-unit course covers the same basic lecture material in five intensive weeks, followed by an extended field trip where students do individual projects in behavioral ecology. Mr. Narins

M127. Soils, Plants, and Society. (Same as Geography M127.) Lecture, three hours; field trip. Prerequisites: Chemistry 11A, 11B, and 11C, or equivalent, or consent of instructor. A general treatment of soil development and morphology and the physical and chemical properties of soils as they relate to plant growth and distribution; soil resources, management, conservation, and cultural aspects. Use of soil profiles examined on the field trip to explain developmental phenomena. Mr. Lunt

128. Plant Physiological Ecology (4 or 8 units). Lecture, three hours; laboratory/field, three hours. A study of plant-environmental interactions under natural conditions. Emphasis on transpiration and photosynthesis, leaf temperatures, and water movement in the soil-plant-atmosphere continuum. Individual student projects. *When the course is given as part of the Field Biology Quarter, it is eight units, and the individual research project is correspondingly expanded.* Mr. Nobel

129. The Behavior of Animals. Lecture, three hours; discussion, three hours. Prerequisite: course 111 or consent of instructor. Ecological significance, underlying mechanisms, and evolution of behavior, with special reference to animal sociology under natural conditions.

130. Behavior Research Problems. Lecture, three hours; laboratory, two hours. Prerequisites: courses 5, 6, consent of instructor. Systems controls and nonobtrusive sensing procedures for behavior studies in the laboratory and field. Rationale, design, and limitations of laboratory studies of behavior. Mr. Kavanau

131. Insect Ecology (4 or 8 units). Lecture, two hours; laboratory or field trip, eight hours. Prerequisites: course 120 or 122, consent of instructor. *Offered either as a quarter-long course with weekend field trips or as part of the Field Biology Quarter (eight units; amount of fieldwork increased accordingly).* Analysis of the ecological roles of insects in terrestrial communities, with emphasis on interactions with both plants and vertebrates. Group and individual field projects. Mr. Greenfield, Mr. Hespenheide

132. Field Behavioral Ecology (8 units). Lecture, two hours; laboratory/field trip, 10 hours. Prerequisites: courses 5, 6. Recommended: course 129. *A five-week course offered only as part of the Field Biology Quarter.* Field research in behavioral ecology, emphasizing animal communication. The design and execution of individual and small group field projects during an extended field trip. Mr. Greenfield, Mr. Narins

C134. Physiological Ecology of Desert Animals (2 units). Prerequisites: courses 111, and 166 or 167. A consideration of ecologically relevant aspects of animal physiology, with emphasis on desert animals. Concurrently scheduled with course C214. Mr. Bartholomew, Mr. Nagy

135. Population Genetics. Lecture, three hours; discussion, one hour. Prerequisite: course 8. Highly recommended: Mathematics 31A, 31B. Basic principles of genetics of population, dealing with the genetic structure of natural populations and the mechanisms of evolution. Equilibrium conditions and the forces altering gene frequencies, polygenic inheritance, and the methods of quantitative genetics. Mr. Taylor

136A-136B-136C. Seminar in Genetics (2 units each). Prerequisites: course 8, consent of instructor. Undergraduate seminar in genetics; reading and group discussion of current research in genetics. Mr. Siegel (F,W,Sp)

138. Developmental Biology. Lecture, three hours; discussion, one hour. Prerequisite: completion of "Preparation for the Major" courses. Synopsis of fundamental concepts in embryology and a survey of current topics in developmental biology. Ms. Lengyel, Mr. O'Connor, Mr. Tobin

139. Introductory Laboratory in Developmental Biology. Lecture, two hours; laboratory, six hours. Prerequisites: course 138, consent of instructor. Introductory course in developmental biology, including cell and organ culture and biochemical analysis of developing systems.

141. Molecular Basis of Plant Differentiation and Development. Lecture, three hours; discussion, one hour. Prerequisites: courses 5, 7, 8. An in-depth study of the basic processes of development and the molecular aspects of the developmental process as it relates to the plant kingdom. Discussion of a variety of developing systems (protistons, fungi, lower and higher plants), with the goal of developing a unified concept of differentiation. Mr. Goldberg, Ms. Tobin (Sp)

142A-142B-142C. Seminar on Topics in Developmental Biology (2 units each). Prerequisites: course 138, consent of instructor. Undergraduate seminar on topics in developmental biology. Reading and group discussions of current research. Ms. Lengyel, Mr. O'Connor, Mr. Tobin (F,W,Sp)

143. Molecular Cell Biology. Lecture, three hours; discussion, one hour. Prerequisites: courses 5, 7, 8, chemistry courses through Chemistry 25. Molecular biology as applied to the study of eukaryotic cells. Molecular aspects of organelles such as the nucleus, mitochondrion, cytoskeleton, golgi apparatus, plasma membrane, and extracellular matrix. Other topics include molecular evolution, the cell cycle, and the cell biology of cancer. Ms. Bulinski, Mr. Simpson

144. Molecular Biology. Lecture, three hours; discussion, one hour. Prerequisites: courses 7, 8. Strongly recommended: Chemistry 25. A course in molecular biology emphasizing the synthesis, structure, function, and interactions of biological macromolecules.

145A-145B-145C. Molecular Biology Laboratory. Laboratory, 12 hours. Prerequisite: consent of instructor. Highly recommended: course 144. A course in experimental molecular biology in which students carry out original research under supervision. Space is limited, and arrangements must be made in advance with the instructor. Mr. Salser (F,W,Sp)

146. Physiochemical Biology. Lecture, three hours; discussion, one hour. Prerequisites: courses 5 and 7, or consent of instructor, and Physics 6C or equivalent. A physiochemical analysis of the physiology of cells and organelles, with emphasis on membranes, thermodynamics of solute and water movement, light absorption, and subcellular energy transduction. Mr. Nobel (F)

147. Biological Oceanography. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of "Preparation for the Major" courses or consent of instructor. Lectures include physical, chemical, and biological factors affecting the composition and distribution of plankton. Natural history of major phytoplankton and zooplankton taxa; production in marine food chains; adaptation to pelagic habitats. Laboratory includes systematics, morphology of major plankton taxa; experimental studies of local marine plankton, with emphasis on measurement of feeding, primary and secondary productivity, and nutrient flux. Given at the *Catalina Marine Science Center.* Mr. Muscatine

148. Biology of Marine Plants. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of "Preparation for the Major" courses or consent of instructor. An introduction to the general biology of marine algae, including basics of structure reproduction, life histories, systematics, and an introduction to the physiology and ecology of marine algae. Techniques in culture and laboratory investigation and utilization of algae. Given at the *Catalina Marine Science Center.* Mr. Chapman

149. Plant Biochemistry and Photosynthesis. Prerequisite: completion of "Preparation for the Major" courses. A survey course emphasizing plant-specific biochemistry, including photosynthesis; nitrogen fixation and metabolism; sulfur metabolism; respiration; plant pigments, lipids, proteins, and nucleic acids; the cell wall; terpenes; alkaloids and flavenoids. Mr. Thornber

152. Functional Plant Anatomy. Lecture, three hours; laboratory, six hours. Prerequisites: courses 5, 7, or equivalent, or consent of instructor. The structure and functional significance of the various cell and tissue types in higher plants, plus the patterns of growth and differentiation in roots, stems, leaves, flowers, and fruits.

153. Functional Histology. Lecture, three hours; laboratory, four hours. Prerequisite: completion of "Preparation for the Major" courses. Correspondence of function and structure in vertebrate organs and tissues at cellular and subcellular levels. Mr. Cascarano, Mr. James

154. Functional Ultrastructure of Cells and Tissues. Lecture, three hours; discussion, one hour. Prerequisites: course 5 or 7, Chemistry 21, 23, 25, or equivalent. Basic life processes at the supramolecular and molecular levels of cells. Functional significance of membrane structure, molecular basis of absorption, secretion, and muscle contraction. Conventional and advanced methods in ultrastructural analysis, electron microscopy. Interpretations of structural information. Mr. Sjostrand

155. Analytical Microscopy and Cytology. Lecture, three hours; laboratory, three hours. Prerequisites: Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or equivalent, or consent of instructor. Designed for students in the biological sciences to acquaint them with quantitative cytology, with emphasis on bright field, dark field, phase contrast, interference, polarization analysis, fluorescence microscopy, and epi-illumination. Mr. James

CM156. Human Genetics. (Same as Biomathematics CM156.) Lecture, three hours; discussion, one hour. Prerequisites: course 8, Chemistry 25. The application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and the methodologies appropriate to answer such questions. Concurrently scheduled with course CM256. Mr. Merriam, Ms. Spence (Sp)

157. Gene Manipulation: Genetic Engineering. Lecture, three hours; discussion, two hours. Prerequisite: course 138 or 144 or consent of instructor. A survey of the methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry.
Mr. Salser

158. Cell Biology (6 units). Lecture, three hours; laboratory, six hours. Prerequisite: completion of "Preparation for the Major" courses. The cell biology of eukaryotic cells, with emphasis on the correlation of structure and function at the molecular, organellar, and cellular levels.
Mr. Cascarano, Mr. James, Mr. Simpson

162. Plant Physiology (6 units). Lecture, four hours; laboratory, four hours. Prerequisites: courses 5, 7, Chemistry 25. Hormonal control of growth and development. Photomorphogenesis. Photoperiodism, biorhythms, and flowering. Water movement within the plant body and between the plant and its environment. Salt uptake and transport. Photochemical and physiological aspects of photosynthesis. Aspects of plant cell metabolism. The nitrogen cycle.
Mr. Laties (F)

163. Plant Physiology Laboratory. Lecture, one hour; discussion, one hour; laboratory, eight hours. Prerequisite: course 162. Limited enrollment. Students are introduced to the instrumentation used in plant physiology research by performing experiments based on the lecture material in course 162. Subsequently, students working singly or in groups undertake a research project of their own design.

164. Field Biology of Marine Fishes. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of "Preparation for the Major" courses or consent of instructor. Selected aspects of the natural history, ecology, and behavior of the diverse assemblage of local marine fishes. Fieldwork strongly emphasized. Given at the *Catalina Marine Science Center.* Mr. Buth

165. Ecological Physiology of Marine Vertebrates. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of "Preparation for the Major" courses or consent of instructor. Introduction to the physiological adaptations of marine vertebrates to the major physicochemical variables in the oceans of the world and to the major marine habitats. Laboratory work emphasizes marine vertebrates of Southern California waters. Given at the *Catalina Marine Science Center.* Mr. Gordon

166. Animal Physiology (6 units). Lecture, three hours; laboratory, five hours. Prerequisite: completion of "Preparation for the Major" courses. Not open for credit to students with credit for course 167 or 170. An introduction to physiological principles, with emphasis on organ systems and intact organisms.

167. Regulatory Physiology (6 units). Lecture, three hours; laboratory, five hours. Prerequisites: courses 5L, 6, 7. Not open for credit to students with credit for course 166 or 170. An introduction to whole animal and organ physiology. Primary considerations to neuronal and endocrine regulations of body functions and integration of organ systems.
Mr. Engelmann

168. Insect Physiology. Lecture, two hours; laboratory, six hours. Prerequisite: course 158 or 166 or 167 or equivalent. Survey of the physiology of insects, with emphasis on functional adaptations.
Mr. Engelmann

169. Comparative Physiology. Lecture, three hours; laboratory, four hours. Prerequisites: courses 158, 166. A detailed analysis of selected aspects of invertebrate and vertebrate physiology. Mr. Gordon

170. Animal Environmental Physiology (6 units). Lecture, three hours; laboratory, five hours. Prerequisite: completion of preparation for the major courses. Not open for credit to students with credit for course 166 or 167. Recommended for students concentrating in ecology, behavior, and evolution (EBE). An introduction to the physiology of organs, organ systems, and organisms, with emphasis on environmental interactions and adaptations.
Mr. Nagy, Mr. Narins

171. Principles of Neurobiology. Lecture, three hours; discussion, one hour. Prerequisite: course 166 or consent of instructor. An introduction to basic principles of neurobiology, including a description of the structure of neurons and nervous systems; the ionic mechanisms responsible for generating membrane potentials, action potentials, and synaptic potentials; the properties of synaptic transmission, the information transduction and coding in sensory pathways, and the neural control of movement; development of and trophic interactions between cells of the nervous system. Mr. Eckert, Mr. O'Lague

172A-172B. Introductory Laboratory in Neurophysiology. Laboratory, eight hours. Prerequisite: course 171 or consent of instructor. Limited enrollment. Courses must be taken concurrently. Laboratory investigation of the function of central and peripheral nervous systems in invertebrates and vertebrates. Emphasis on electrophysiological approaches to basic neurophysiological problems.
Mr. Eckert, Mr. O'Lague

173. Anatomy and Physiology of Sense Organs. Lecture, three hours; discussion, one hour. Prerequisite: course 171 or equivalent. The anatomy and physiology of the sense organs, with emphasis on comparative aspects. Mr. Narins

177. Introductory General Endocrinology. Lecture, three hours; discussion, one hour. Prerequisites: course 158 or 166 or equivalent, one course in biochemistry. Principles of chemical integration in biological systems.

179. Invertebrate Endocrinology. Lecture, three hours. Prerequisite: course 158 or 166 or 167 or consent of instructor. A comprehensive treatment of invertebrate endocrinology. Mr. Engelmann

180. Advanced Topics in General Endocrinology. Lecture, three hours; discussion, one hour. Prerequisite: course 177 or consent of instructor. Detailed consideration of selected mechanisms in endocrine control of growth and differentiation.

181. Parasitology and Symbiosis (6 units). Lecture, three hours; laboratory, six hours. Prerequisites: courses 5, 7. An introduction to the principles, biology, and evolution of infectiousness, symbiosis, and parasitism, emphasizing protozoan and helminth parasites, including those of man. Mr. MacInnis

182. Experimental Parasitology. Laboratory, eight hours. Prerequisite: consent of instructor. Introduction to the use of parasites in experiments concerning basic biological problems and to problems concerning parasitism. Mr. MacInnis

M185. Immunology. (Same as Microbiology M185 and Microbiology and Immunology M185.) Lecture, three hours; discussion, one hour. Prerequisites: course 8, Chemistry 23, 25. Recommended corequisite: Chemistry 152 or 156. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cell immune reactions. Mr. Clark, Mr. Sercarz (F)

M186. Experimental Design in Immunology. (Same as Microbiology M186 and Microbiology and Immunology M186.) Laboratory, 12 hours. Prerequisites: course M185, consent of instructor. Corequisite: course M187. Emphasis on a limited number of situations designed to train the student in organizing and evaluating immunological laboratory experiments. Mr. Clark, Mr. Sercarz (W)

M187. Immunology Seminar (2 units). (Same as Microbiology M187 and Microbiology and Immunology M187.) Prerequisites: course M185, consent of instructor. Corequisite: course M186. Student presentation of selected papers from the immunology literature. Designed to serve as a forum for the critical analysis of research papers.
Mr. Clark, Mr. Sercarz (W)

188. Seminar on Biology and Society (2 units). Prerequisite: consent of instructor. Investigations and discussions of current socially important issues involving substantial biological considerations, either or both as background for policy and as consequences of policy. Mr. Gordon, Ms. Tobin

190A-190D. Honors Research in Biology (2 to 4 units each). Prerequisites: senior standing, consent of undergraduate adviser. Individual research designed to broaden and deepen the student's knowledge of some phase of biology. Must be taken for at least two quarters and for a total of at least eight units. In Progress grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C-190D (letter grading). A report on progress must be presented to the undergraduate adviser each quarter a 190 course is taken. A maximum of eight units may be applied toward the biology major. (F,W,Sp)

199. Special Studies (2 to 16 units). Prerequisite: consent of instructor and undergraduate adviser, based on a written proposal outlining the study or research to be undertaken. The proposal should be worked out in consultation with the instructor and submitted for approval to the undergraduate adviser before the day instruction begins in that quarter. At the end of the quarter a report describing the progress of the study or research and signed by the student and the instructor must be presented to the undergraduate adviser. Students who wish to take more than eight units of course 199 in any one quarter must obtain authorization from the department chair and the appropriate dean. Only one 199 course may be applied toward the biology major. (F,W,Sp)

Graduate Courses

Consent of instructor is required for admission to all graduate courses. Additional prerequisites are stated in the course descriptions.

201. Topics in Organismal Plant Biology. Lecture, three hours; laboratory, three hours. Topics in organismic plant biology, including plant cell and tissue characteristics, plant growth and development, transport of solutes, gas exchange, environmental physiology, and the biology of phytohormones.
Mr. Phinney

202. Principles of Systematics and Taxonomy. Lecture, three hours; discussion, two hours. Prerequisite: course 120. The concepts, principles, and methods involved in the inference of evolutionary relationships and the application of biological nomenclature. Mr. Buth

203. Marine Botany and Physiology (8 units). Lecture/laboratory. Structure, reproduction, life histories, systematics, and biology of marine algae; techniques in culture and cytological investigation of algal material. Given at the *Catalina Marine Science Center.*

204A. Advanced Algae. A consideration of current research in experimental phycology. Topics include a discussion of the appropriate aspects of chemical and physical oceanography and limnology; algal physiology; experimental ecology of benthic and planktonic algae. Mr. Chapman

204B. Advanced Algae. Lecture, three hours; laboratory, six hours. Designed to introduce students to current concepts in algal systematics. Laboratory section is designed to teach students, by practical application to unknowns, how to identify algae by appropriate application of keys. Mr. Chapman

205. Marine Invertebrate Biology (8 units). Functional morphology, life histories, and systematics of marine invertebrates of all major and most minor taxa; emphasis on the living animal and its habitat. Given at the *Catalina Marine Science Center.*

206. Advanced Ichthyology. Lecture, three hours; laboratory, three hours. Prerequisite: course 111 or 112. Advanced study of various aspects of fish biology. Theme varies from year to year. May be repeated for credit. Mr. Buth

207. Molecular and Cellular Biophysics. Lecture, three hours. Prerequisites: Chemistry 25, 110A, Mathematics 32A or equivalent, and Physics 6C, or consent of instructor. Strongly recommended: Chemistry 110B or 156. Development of areas of physics, including thermodynamics, diffusion, statistical mechanics, and molecular forces. Application to areas of molecular and cellular biology, including macromolecule characterization, enzyme catalysis, assembly of biological structures, membrane properties, active transport, electrophysiology, and energy transduction. Biological applications of probability, statistics, and fluctuations. Mr. Jackson

208. Advanced Vertebrate Morphology. Lecture, two hours; laboratory, eight hours. Prerequisites: course 110 or equivalent, consent of instructor. Emphasis on a functional approach to evolution of the vertebrate locomotor, feeding, and circulatory systems. Laboratory includes comparative and experimental analyses of morphological adaptation. Independent project required. May be repeated once for credit.

209. Behavior of Arthropods. Lecture, three hours; discussion, one hour. Prerequisites: course 105 or 107 or equivalent, consent of instructor. Advanced study of topics in the behavior of terrestrial arthropods, including communication, feeding, reproductive, and social behavior. Emphasis on both mechanistic and adaptive approaches toward understanding behavior. Independent project required.
Mr. Greenfield

210. Advanced Ornithology. Lecture, two hours; laboratory, two hours; fieldwork, two hours. Prerequisites: course 114 or equivalent, consent of instructor. Advanced study of topics in avian biology, including systematics, distribution, behavior, and ecology. Students carry out individual study projects in laboratory, museum, or field. Mr. Howell

211. Animal Sociology. Lecture, two hours; discussion, two hours. Prerequisite: course 129 or equivalent. The description, analysis, physiology, ecology, and evolution of different social systems in animals.

C212. Experimental Invertebrate Zoology (6 units). Lecture, two hours; laboratory, 12 hours. Prerequisites: courses 105, 129, and 166 or 167 (either may be taken concurrently). Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C104. Mr. Morin

213. Community Ecology (2 units). Lecture, three hours. Prerequisites: course 122 or equivalent, one year of calculus. Investigation of the structure and function of animal communities, in theory and in practice (includes the concepts of coexistence, competition, niche, and diversity). Mr. Cody

C214. Ecological Physiology (2 units). (Formerly numbered 214.) A consideration of ecologically relevant aspects of animal physiology. Concurrently scheduled with course C134.
Mr. Bartholomew, Mr. Nagy

215. Theoretical Population Biology. Lecture, three hours. Prerequisites: courses 6, 8, and Mathematics 3C or 32A, or consent of instructor. Not open to students with credit for course 119. The use of mathematical models in studying ecological and evolutionary systems. Relevant mathematical techniques discussed include basic calculus, differential equations, linear algebra, and probability.
Mr. Taylor, Mr. Vance

217. Marine Ecology (8 units). Structure, diversity, and energetics of marine communities; behavior, population dynamics, and biogeography of component species; associated oceanography and geology. Given at the *Catalina Marine Science Center.*
Mr. Vance

218. Oceanology (8 units). Ecology and dynamics of pelagic and benthic associations; physiochemical properties of seawater and marine substrates and their biological significance; qualitative and quantitative methods of oceanology. Given at the *Catalina Marine Science Center.*

219. Animal Behavior in Laboratory and Field. Discussion, two hours; laboratory, six to eight hours. Prerequisites: course 129, consent of instructor. Limited enrollment. Laboratory and field studies of selected problems in animal behavior.

221. Genetic Analysis. Lecture/discussion, three hours. Prerequisite: course 8 or equivalent. Examples of genetic analysis in eukaryotic organisms by means of mutation and chromosome changes. Readings in the literature are provided. Topics include *Drosophila* chromosome behavior, techniques of gene localization, the one gene-one chromomere hypothesis, meiotic mutants, mosaic animals and cell lineage, behavior, and X chromosome inactivation.
Mr. Merriam

222A-222F. Topics in Genetics. Prerequisite: course 8. Intensive study of selected topics.

223A-223B. Advanced Genetics Laboratories. Laboratory, nine hours. Prerequisites: course 8 or equivalent, consent of instructor. Original research with supervision in eukaryotic genetics. Topics include transmission, developmental and behavioral genetics. May not be repeated for credit.
Mr. Merriam, Mr. Siegel

224. Developmental Biology of Marine Organisms (8 units). Descriptive and experimental studies of developmental stages of marine plants and animals; patterns of reproductive biology; larval biology; metamorphosis. Given at the *Catalina Marine Science Center.*

225. Special Topics in Development. Lecture, three hours. Variable topics emphasizing the control of eukaryotic gene expression and morphogenesis. Special attention to the role of hormones in the modulation of gene expression during development.
Mr. O'Connor

227. Chromosome Structure and Replication. Lecture, three hours. Prerequisite: course 8, Chemistry 157A, 157B, or consent of instructor. A survey of biochemical and biophysical investigations of the structure and replication of chromosomal nucleic acids, with emphasis on bacterial and viral systems.
Mr. Ray

228. Prokaryotic and Eukaryotic Gene Systems (2 units). Presentations concerning current experimental approaches in the study of DNA replication, organization, transcription, and translation.
Mr. Grunstein, Mr. Ray

229. Structural Macromolecules. Lecture, three hours; discussion, one hour. The comprehensive molecular biology of selected structural proteins and polysaccharides, including cellular synthesis, structure and physical properties, and integrated biological functions. Mr. Fessler

M230A. Structural Molecular Biology (2 units). (Same as Chemistry M230A and Microbiology M230A.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor based on a written research proposal. Fundamentals of electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals.
Mr. Eiserling, Ms. Kasamatsu (F, alternate years)

M230B. Structural Molecular Biology. (Same as Chemistry M230B.) Lecture, three hours; discussion, one hour. Prerequisites: Physics 6C, Mathematics 3C, consent of instructor. Selected topics from the principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading. Mr. Eiserling, Mr. Lake (W)

M230C. Structural Molecular Biology Laboratory. (Same as Chemistry M230C and Microbiology M230C.) Laboratory, 10 hours. Prerequisite: consent of instructor based on a written research proposal. Practical experience with electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals.
Mr. Eiserling, Ms. Kasamatsu (F, alternate years)

M230D. Structural Molecular Biology Laboratory (2 units). (Same as Chemistry M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building.
Mr. Eiserling, Mr. Lake (W)

M231A. Paradigms of Evolution. (Same as Anatomy M223.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. The range of conceptual foundations underlying evolutionary studies in various fields of biology, biochemistry, geology, and physics today. S/U or letter grading.
Mr. Brunk, Mr. Campbell

231B. Molecular Evolution. (Formerly numbered 231.) Lecture, three hours; discussion, one hour. Current topics in molecular evolution. Concepts and methodology in lectures, discussion, and student presentations. S/U or letter grading. Mr. Brunk

232. Experimental Molecular Developmental Biology (8 units). Lecture, one hour; discussion, two hours; laboratory, 12 hours. Prerequisites: courses 138, 144, and/or consent of instructor. A laboratory course in the biochemical expression and regulation of differentiation in eukaryotes.
Mr. Fessler, Ms. Lengyel, Mr. Tobin

233A-233B. Electron Microscopy of Cells (8 units each). Lecture, four hours; laboratory, 20 hours; demonstration, three hours. Electron microscopic techniques applied to structure of cells and to molecular structure of cellular components. Intensive training in electron microscopy techniques and in the use of the electron microscope for high resolution electron microscopy. Mr. Sjostrand

234A. Advanced Topics in Developmental Biology. (Formerly numbered 234.) Especially intended for first- and second-year graduate students as an overview of research questions on developmental biology available within the Biology Department and of the significant new advances in the discipline. Fundamental questions in developmental biology are approached with examples from current literature. Topics include differential gene activity, gene localization, maternal effect and homeotic mutations, the determined cell state, cell identification, hormone receptors and hormone-mediated responses, and developmental neurobiology and emphasize the analysis of genes implicated in development. Students are strongly encouraged to take both courses 234A and 234B, since these represent a survey of modern biology as appropriate preparation for graduate study. S/U or letter grading.

234B. Advanced Topics in Cell Biology. Lecture, two hours; discussion, two hours. Especially intended for first- and second-year graduate students as an overview of research questions on cell biology available within the Biology Department and of the significant new advances within the discipline. Fundamental questions in cell biology are approached with examples from current literature.

235. Current Topics in *Escherichia coli* Genetics (2 units). (Formerly numbered 246.) Prerequisite: course 596. Seminar on topics from current literature in *Escherichia coli* molecular genetics, with emphasis on using nonsense suppression to effect protein engineering and to study mechanisms of mutagenesis.
Mr. Miller (F)

236. Experimental Cell Biology. Lecture, two hours; discussion, one hour; laboratory, four hours. Prerequisites: course 158, consent of instructor. Theoretical and experimental analysis of systems utilized in the study of cellular metabolism and physiology; cell organelles, cell populations, and organized tissues.
Mr. Cascarano, Mr. James

238. Structure, Function, and Biogenesis of the Mitochondrion. Lecture, three hours. Prerequisites: course 158, consent of instructor. Origin, maintenance, and function of the mitochondrion as an example of a highly organized subcellular organelle in the eukaryotic cell. Mr. Simpson

M239. Techniques in Nucleic Acid Research (2 units). (Same as Microbiology M239.) Highly recommended corequisite: course M239L. Advanced methods in characterization of genes, including sequence determination. Isolation of nucleic acids by centrifugation, chromatography, and electrophoresis, and characterization by restriction mapping and blot hybridization. Cloning in bacterial and plasmid vectors, sequence determination by the dideoxy technique, computer analysis of sequences.
Mr. Nierlich, Mr. Simpson (Sp, alternate years)

M239L. Laboratory in Nucleic Acid Research (6 units). (Formerly numbered M239.) (Same as Microbiology M239L.) Laboratory, 12 hours. Corequisite: course M239. Laboratory in advanced methods in characterization of genes, including sequence determination. Isolation of nucleic acids by centrifugation, chromatography, and electrophoresis, and characterization by restriction mapping and blot hybridization. Cloning in bacterial and plasmid vectors, sequence determination by the dideoxy technique, computer analysis of sequences.
Mr. Nierlich, Mr. Simpson (Sp, alternate years)

240. Physiology of Marine Animals (8 units). Lecture and laboratory studies on cellular, tissue, organ, and animal physiology; regulatory biology; metabolic characteristics of cells, energy transformations. Given at the *Catalina Marine Science Center.*

241. Laboratory in Advanced Electrophysiology (8 units). Laboratory, 12 hours. Prerequisites: courses 172A-172B or equivalent, consent of instructor. In-depth involvement in individual research projects under staff guidance. Approximately two projects each quarter. May be repeated twice for credit.
Mr. Eckert, Mr. O'Lague

242. Topics in Neurobiology. Lecture, three hours. Prerequisites: course 171 or equivalent, consent of instructor. Selected current problems in neurobiology discussed in depth, with emphasis on analysis of original papers. May be repeated for credit.
Mr. Eckert, Mr. O'Lague

243. Animal Communication. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 3C, Physics 6C, consent of instructor. Open to qualified undergraduates with consent of instructor. Physical properties of animal signals and the physiological mechanisms underlying their generation and reception. Lectures treat signal analysis, signal transmission, and receptor design in light of the constraints placed on each of the sensory modalities. Examples of communication systems using visual, auditory, chemical, electrical, and magnetic cues, with emphasis on biological adaptations for efficiently signaling species-specific information. Mr. Narins

244. Advanced Insect Physiology. Lecture, two hours; laboratory, five hours. Prerequisite: course 168 or consent of instructor. A detailed discussion of current problems in insect physiology, with advanced laboratory. Mr. Engelmann

245. Advanced Topics in Cell Biology (2 units). Seminar, one hour; discussion, one hour. Prerequisite: course 138 or 158 or equivalent. Includes a seminar section on a current topic in cell biology and a discussion section on the seminar topic. Students prepare one such seminar each quarter, using the reading list provided as background, and select a topic with the aid of current literature and consent of instructor. May be repeated for credit. S/U grading.
Ms. Bulinski

M246. Computer Analysis of Genetic Organization. (Same as Microbiology M246.) Lecture, two hours; laboratory, six hours. Prerequisites: courses 8, and 144 or Microbiology 119 or equivalent. Lectures and laboratory instruction in contemporary procedures for the analysis of nucleic acid and protein sequence data with the computer. No prior computer experience is necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.
Mr. Nierlich, Mr. Simpson (Sp, alternate years)

247. Advanced Plant Biology. (Formerly numbered 247A-247F.) Lecture, three hours; discussion, two hours. Prerequisite: course 141 or 162 or equivalent. Open to undergraduates with consent of instructor. Designed to expose first-year graduate students to topics of current interest in plant biology. Subjects include plant genetics, growth and development, organelle structure, development and function, and plant-specific metabolic processes (photosynthesis, nitrogen fixation, metabolism of small molecules). S/U or letter grading.

M248. Molecular Genetics. (Same as Biological Chemistry M248.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Basic concepts in modern genetics, drawing examples from both eukaryotic and prokaryotic systems. Emphasis on the use of genetic techniques for addressing fundamental questions in biochemistry and molecular biology. Topics include mutagenesis, mutant selection, recombination, genetic mapping, complementation, transposable elements, gene organization, genetic regulation, and molecular evolution.
Ms. Calame, Mr. McEntee, Mr. Miller, Mr. Shapiro (Sp)

249. Biochemistry of Parasitism. Lecture, three hours. Biochemical and physiological aspects of parasite-host relationships. Mr. MacInnis

M250A. Molecular Genetics of the Immune System (2 units). (Same as Microbiology M258A and Microbiology and Immunology M258A.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on immunoglobulin I and II, oncogenes of the immune system, T cell antigen receptor, and loci affecting differentiation. S/U or letter grading.
Mr. Wall and the Staff (W, five weeks)

M250B. T and B Cell Function (2 units). (Same as Microbiology M258B and Microbiology and Immunology M258B.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on ontogeny, activation, and effector function of T and B cells. S/U or letter grading.
Mr. Bonavida and the Staff (W, five weeks)

M250C. Major Histocompatibility Complexes (2 units). (Same as Microbiology M258C and Microbiology and Immunology M258C.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on the structure of human and murine MHC chromosomal regions and genes, MHC polymorphism, MHC-like systems, MHC-linked genes, MHC and disease, and nonimmune function of MHC. S/U or letter grading.
Mr. Clark, Ms. Scofield (Sp, five weeks)

M250D. Immunopathology (2 units). (Same as Microbiology M258D and Microbiology and Immunology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on tolerance and autoimmunity, autoimmune disease models, immune complex disease, immediate hypersensitivity and its cellular basis, and natural and acquired immune deficiency disease. S/U or letter grading.
Mr. Fahey, Mr. Porter (Sp, five weeks)

M250E. Immunoregulation (2 units). (Same as Microbiology M258E and Microbiology and Immunology M258E.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on idiotype networks, suppressor T cells, tolerance at T and B cell levels, and Ir gene control. S/U or letter grading.
Mr. Sercarz (F, five weeks)

M250F. Immunochemistry (2 units). (Same as Microbiology M258F and Microbiology and Immunology M258F.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on the immunochemistry of antibodies, antigens, and complement, antigenic recognition, antibody restriction. S/U or letter grading.
Mr. Schumaker, Ms. Wisnieski (F or Sp, five weeks)

251. Seminar in Systematics (2 units).
Mr. Buth, Mr. A. Gibson

M252A-M252B. Seminar in Behavioral Biology. (Same as Anthropology M228A-M228B, Education M229A-M229B, Physiology M252A-M252B, Psychiatry M291A-M291B, and Psychology M230A-M230B.) Discussion, six hours. Prerequisite: consent of instructor. Basic seminar for graduates interested in behavioral biology. An interdisciplinary course dealing with behavioral research in anthropology, biology, psychology, and the medical sciences. Proximate causation, development, and evolution in animal behavior. Physiology and the organization of behavior. Vertebrate social organization. Animal communication. The application of natural selection theory to human social behavior. In Progress grading.

253. Seminar in Plant Structure (2 units).
Mr. Phinney

254. Seminar in Plant Morphogenesis (2 units).
Mr. Phinney

255. Seminar in Invertebrate Zoology (2 units).
Mr. Morin, Mr. Muscatine

CM256. Human Genetics. (Same as Biomathematics CM256.) Lecture, three hours; discussion, one hour. Prerequisites: course 8, Chemistry 25. The application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and the methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students.
Mr. Merriam, Ms. Spence (Sp)

257. Gene Manipulation: Genetic Engineering. Lecture, three hours; discussion, two hours. Prerequisite: course 138 or 144 or consent of instructor. A survey of the methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry.
Mr. Salser

257B. Gene Manipulation: Advanced Course (2 units). Lecture, 90 minutes; discussion, one hour. Prerequisite: course 157 or 257. Additional topics in the methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry. S/U or letter grading.
Mr. Salser

258. Seminar in Ichthyology. Discussion, two hours. Prerequisite: course 111 or 112. Student presentations and discussion of specific topics in ichthyology. Theme varies from year to year. May be repeated for credit. Mr. Buth

259. Seminar in Herpetology (2 units). Discussion, three hours. Prerequisite: course 113 or consent of instructor. Seminar in current approaches to herpetology. Main theme varies from year to year in areas such as biogeography, ecology, behavior, environmental physiology. Mr. Vitt

260. Seminar in Biology of Terrestrial Vertebrates (2 units). Mr. Bartholomew, Mr. Howell

262. Seminar in Vertebrate Paleontology (2 units). Mr. Vaughn

263. Seminar in Population Genetics. Discussion, three to six hours. Seminar on topics of current interest in population genetics, such as kin selection, sociobiology, cultural evolution, conservation genetics, etc. Mr. Taylor

264. Evolutionary Concepts (2 units). Lecture, three hours. Exploration in depth of evolutionary concepts, their diversity, biological interpretations, and impact on social and humanistic patterns of today and the past.

265. Seminar in Biophysical Plant Ecology (2 units). Mr. Nobel

266. Seminar in Plant Ecology (2 units). Mr. Cody, Mr. Thompson

267. Seminar on Current Topics in Evolutionary Ecology (2 units). Mr. Cody

268. Seminar in Population Biology (2 units). Mr. Cody

269. Seminar in Animal Ecology (2 units). Discussion, three hours. Advanced study of specific topics in animal ecology and related fields.

270. Seminar in Environmental Physiology (2 units). S/U grading. Mr. Bartholomew, Mr. Nagy

271. Seminar in Phycology and Mycology (2 units). Prerequisites: course 100 or equivalent, consent of instructor. Advanced study in biology of algae and fungi. Topics in physiological ecology, physiology, and biochemistry of algae and fungi, and their industrial uses. Algae and fungi as experimental organisms. Phylogeny and origin of eukaryote organisms. Evolutionary origin of chloroplasts. Mr. Chapman

272. Seminar in Marine Biology (2 units). Mr. Gordon, Mr. Morin, Mr. Muscatine

273. Seminar in Entomology (2 units). Discussion of specific topics in entomology and related fields. The main theme varies from year to year, but usually emphasizes areas such as behavior, ecology, and evolution. S/U grading. Mr. Greenfield

274. Seminar in Behavioral Ecology (2 units). Discussion of theoretical and empirical aspects of topics in behavioral ecology. Mr. R. Gibson (W)

275. Seminar in Behavior Research Problems. Lecture, three hours; laboratory, two hours. Prerequisite: course 130. Mr. Kavanau

276. Seminar in Molecular Genetics (2 units). Topics vary each quarter. Mr. Salser

277. Seminar in Genetics (2 units). Mr. Ebersold, Mr. Merriam, Mr. Siegel

278. Seminar in Information Processing in Eukaryote Cells (2 units). Discussion, three hours. Prerequisites: course 8, Chemistry 157A, and 157B, or consent of instructor. Structure and organization of eukaryote DNA; nuclear RNA species; definition and properties of eukaryote mRNA; translation of mRNA; current related topics. Mr. Clark

279. Seminar in Developmental Biology (2 units). S/U grading. Mr. Tobin

280. Seminar in Chromosome Structure and Replication (2 units). Prerequisite: course 227. Current topics in the field of control and mechanism of DNA replication. Mr. Ray

281. Seminar in Molecular Biology (2 units). Mr. Brunk, Mr. Fessler, Mr. Ray

M282. Major Histocompatibility Complexes: Genetics, Biochemistry, and Biology (2 units). (Formerly numbered 282.) (Same as Microbiology and Immunology M282.) Lecture, one hour; discussion, one hour. Prerequisites: course M185 or equivalent, genetics, biochemistry. Lectures and discussion of key papers underlying the present concepts of MHC structure and function. Emphasis on the murine MHC (H-2), but where appropriate and illustrative, the human MHC discussed. Mr. Clark (W)

283. Seminar on Topics in Cell Biology (2 units). A discussion of various topics on the biology of eukaryotic cells. Topics vary from year to year and include bioenergetics, motility, organelle DNA, membrane structure and function, oncogenic transformation, nuclear organization and function. Mr. Simpson

284. Seminar in Structural Macromolecules (2 units). Lecture, one hour; discussion, three hours. Prerequisites: courses 138, 144, and/or consent of instructor. In-depth analysis of current problems in the biology, biochemistry, and molecular biology of structural macromolecules, involving critical evaluation of recent findings and publications on the biosynthesis, structure, and biodegradation of these molecules. Mr. Fessler

285. Seminar in Protein Synthesis (2 units). Discussion, three hours. Prerequisites: course 144 and/or consent of instructor. A detailed analysis of the current understanding of the structural and functional events occurring during protein synthesis. Mr. Lake

286. Seminar in Plant Development (2 units). Lecture, one hour; discussion, two hours. Prerequisites: a course in plant physiology, at least one advanced undergraduate or graduate course in plant development or biochemistry, and Chemistry 157A, 157B, or equivalent. Seminar on specific topics in plant development. Content varies each quarter. Mr. Phinney, Ms. Tobin

287. Seminar in Comparative Cell Physiology (2 units). Mr. Cascarano, Mr. James

288. Seminar in Plant Cell Biology (2 units). Recommended prerequisite: course 162. Ms. Gonzalez

289. Seminar in Plant Physiology (2 units). Mr. Laties

290. Seminar in Comparative Physiology (2 units). Mr. Gordon, Mr. Narins

291. Seminar in Physiology and Biochemistry of Arthropods (2 units). Mr. Engelmann

292. Seminar on Topics in Ultrastructure (2 units).

294. Seminar on Current Aspects of Photosynthesis (2 units). Mr. Thornber

295. Seminar in Neurophysiology (2 units). Mr. Eckert, Mr. O'Lague

296. Seminar in Biological Applications of Flow Cytometry (2 units). Lecture, two hours; demonstration, one hour. Prerequisite: graduate standing or consent of instructor. Initial lecture focuses on instrumentation design and operation. Subsequent lectures present specific biological paradigms whose unresolved questions can best be answered by means of fluorescent flow cytometry. The latter portion of the seminar is topical and varies from year to year. Mr. O'Connor

297. Seminar in Molecular Endocrinology (2 units).

M298. Seminar on Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M298, Chemistry M298, Microbiology M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. committee. Each student conducts or participates in discussions on assigned topics. May be repeated for credit. (F,W,Sp)

299. Seminar in Parasitology (2 units). Mr. MacInnis

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Preparation for the Teaching of Biology in Higher Education (2 units). Prerequisites: graduate standing, consent of instructor. Study of problems and methodologies in teaching biology, which includes workshops, seminars, apprentice teaching, and peer observation. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Individual (or Tutorial) Studies (2 to 12 units).

596F. Directed Individual (or Tutorial) Studies (2 to 8 units). Directed individual (or tutorial) studies at the Catalina Marine Science Center.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examination (2 to 12 units). May not be applied toward the M.A. or Ph.D. course requirements. S/U grading.

598. M.A. Thesis Research and Writing (2 to 12 units).

599. Ph.D. Dissertation Research and Writing (2 to 12 units).

Business and Administration (Interdepartmental)

A316 Murphy Hall, (213) 825-1965

Additional Coursework for Students Interested in Business and Administration

The Program in Business and Administration is not a major, but a sequence of supplemental courses designed to prepare students for the complexities of a career in business and administration. Students complete one of the many majors in the College of Letters and Science, as well as a sequence of courses.

For example, if you are interested in international business, you might wish to major in a foreign language to become familiar with the literature and culture of other countries, and then add this program to gain a basic understanding of economics, accounting, and statistics. Other students interested in working for a governmental agency or nonprofit corporation might wish to add this program to a social science major. Students with an interest in a liberal arts area, who are not planning to go to graduate school, may wish to complete this program to prepare for a job in business while pursuing a major of their choice. (Note: This program may **not** be taken with any economics major. Students with a particular interest in accounting, banking, and finance are directed to the economics/business major.)

Completion of this program in addition to a Letters and Science major will give you the basic skills and knowledge most employers seek. Courses used to satisfy either the major or general education requirements may also be applied toward the requirements of this program.

A minimum grade of C – is necessary to apply courses to this program, with an overall C average in the program. You may satisfy one of the field studies course requirements by completing an independent study course (199), taken in an appropriate department with prior consent of the program faculty adviser. You also are required to seek guidance from a field studies coordinator in choosing and researching your topic.

To enter the program, you must file a petition with the College Counseling Service in the College of Letters and Science *by the time you have completed 120 units.* If you do not complete the program prior to graduation, you must petition out of the program to be eligible to graduate. *All degree requirements, including the specific requirements for this program, must be fulfilled within 228 units.* When you have successfully completed all program requirements, you receive a certificate of completion. A statement of completion is also noted on your transcript.

For further information and help in assessing the appropriateness of this program and how it relates to your career/education goals, contact the College Counseling Service in the College of Letters and Science.

The following requirements are in effect for students entering UCLA in Fall Quarter 1986 (check with the College Counseling Service regarding requirement changes).

Core Courses

Required: Economics 1 and 2, or 100; Management 1A, 1B; one course in statistics; one course in mathematics (except Mathematics A, 1, 38A, 38B, 50, 104); two courses from English 4, 30, 100W, 131A through 131H, 136A, 136B, Speech 1 (English 136A and 136B are In Progress courses; credit is given only on completion of both courses).

Analytical Skills

Required: Three courses from one of the following areas: (1) *quantitative methods:* Program in Computing 10A, 10B, 10C, 30, Computer Science 141, Anthropology 186A, 186B, Economics 141, 147A, 147B, Geography 171, Political Science 6, 102, Psychology M142, 144, 150, 151, Sociology 109, 116, 118; (2) *critical reasoning:* Engineering 11, 12, Philosophy 9, 31, 32, Psychology 112C.

Field Studies

Required: Any three courses from the following list:

Business and Administration Communications and Interactions: Communication Studies 100, 101, Geography 146, Psychology 136A, 137A, 174, Sociology 152.

Business Logistics: Geography 145, 148, 149, Sociology 141.

Cognitive Science: Linguistics 1 or 100, 10, Materials Science and Engineering M107A or Psychology M153, Psychology 110, 112A, 112B, 112C, 112E.

Contemporary Administration: Anthropology 150, Geography 148, Political Science 173, 190, Psychology 148, Sociology 141.

Contexts: Honors Collegium 57, 60, 61.

Government and Business: History 155A, 155B, Political Science 142, 173, 174.

History of American Business: History 148A, 148B, 149A, 149B, Political Science 173, 174.

Labor Studies: History 155A, 155B, Political Science 174, 185, Psychology M137E, 148, Sociology 128.

National and International Business and Administration: History 125E, 148C, 149B, Political Science 124, 129, 130, 186.

Urban and Metropolitan Administration: Anthropology 160, 160P, 167, Geography 145, 150, Political Science 180, 182A, 182B, Psychology 175, Sociology 125.

United States Business Institutions: History 149A, Political Science 173, Sociology 121, 141.

Jay D. Gralla, Ph.D. *(Biochemistry)*
John M. Jordan, Ph.D. *(Biochemistry)*
Harold G. Martinson, Ph.D. *(Biochemistry and Molecular Biology)*
R. Stanley Williams, Ph.D. *(Physical Chemistry)*

Assistant Professors

Robert E. Cohen, Ph.D. *(Biochemistry)*
David Farrelly, Ph.D. *(Theoretical Chemistry)*
Juli F. Feigon, Ph.D. *(Biochemistry)*
Peter M. Felker, Ph.D. *(Chemical Physics)*
William H. Hersh, Ph.D. *(Organic and Organometallic Chemistry)*
Douglas C. Rees, Ph.D. *(Biochemistry)*
Robert L. Whetten, Ph.D. *(Physical Chemistry)*

Lecturers

Sandra I. Lamb, Ph.D. *(Chemistry)*
Lawrence H. Levine, Ph.D. *(Chemistry)*
Arlene A. Russell, Ph.D. *(Chemistry)*

Adjunct Professor

Seymour Siegel, Ph.D. *(Physical Chemistry)*

Scope and Objectives

Chemistry is concerned with the composition, structure, and properties of substances, the transformations of these substances into others by reactions, and the kinds of energy changes that accompany these reactions. The department is organized in four interrelated and overlapping subdisciplines that deal primarily with the chemistry of inorganic substances (inorganic chemistry), the chemistry of carbon compounds (organic chemistry), the chemistry of living systems (biochemistry), and the physical behavior of substances in relation to their structures and chemical properties (physical chemistry).

The department offers three undergraduate majors: one in chemistry with an emphasis on inorganic, organic, or physical chemistry, a second major in biochemistry, and a third in general chemistry. The chemistry and biochemistry majors are designed to prepare students for graduate studies in each field, for entry into professional schools in the health sciences, and for careers in industries and businesses that depend on chemically and biochemically based technology. The general chemistry major is intended for students who wish to acquire considerable chemical background in preparation for careers outside chemistry.

Graduate research and training programs leading to the M.S. and Ph.D. degrees in Chemistry and in Biochemistry are also offered.

Undergraduate Study

Admission

Regular and transfer students who have the prerequisites for the various courses are not thereby assured of admission to those courses. The department may deny admission to any course if a grade of C – or below was received in a prerequisite, or if in the opinion of the department the student shows other evidence of inadequate preparation.

Transfer students with more than 84 quarter units will be accepted into the departmental majors only if they have completed the following courses or their equivalents: the entire Chemistry 11 series, Mathematics 31A, 31B, 32A, Physics 8A, 8B/8BL, 8C/8CL (or a year of calculus-based physics). For *biochemistry* majors, a year of biology may replace the physics. For *chemistry* majors, Mathematics 32B is recommended.

Transfer students with more than 105 quarter units will be accepted into the departmental majors only if they have completed the following courses or their equivalents: the entire Chemistry 11 series and 21, Mathematics 31A, 31B, 32A, Physics 8A, 8B/8BL, 8C/8CL (or a year of calculus-based physics). *Biochemistry* majors also should have completed a course in the biology of organisms; *chemistry* majors should have completed Mathematics 32B.

Entering transfer students who have successfully completed a year course (including laboratory) in general college chemistry intended for science and engineering students should enter course 21. Transfer students should consult the department's Undergraduate Office for assistance in planning their programs.

You may not take or repeat a chemistry or biochemistry course for credit if you have credit for a more advanced course which has the first course as a prerequisite.

Courses used to fulfill any of the requirements for any of the departmental majors must be taken for a letter grade. Seminar courses, individual study courses, and research courses (e.g., 190, 199) may not be applied toward the requirements for the majors.

Each of the major programs is outlined below. Students may contact Dorothy Seymour, Undergraduate Counselor, for help and advice (4016 Young Hall).

Preliminary Examination for Chemistry 11A

If you wish to enroll in Chemistry 11A or 11AH, you must take the Chemistry/Mathematics Preliminary Examination in Chemistry during the enrollment period for the quarter in which you intend to take these courses. Enrollment usually is limited to students who have passed the examination. It will be given in 2250 Young Hall on Tuesday, September 23, 1986; Wednesday, October 29, 1986; Wednesday, February 4, 1987; and Saturday, May 30, 1987.

If your performance on the examination does not qualify you for immediate admission to Chemistry 11A, but you wish to enroll in a subsequent quarter, you may be eligible for enrollment in Los Angeles City College (LACC) Chemistry 17. This course is given at UCLA during the Fall Quarter (and occasionally other quarters) expressly for UCLA students preparing for Chemistry 11A. If you successfully complete LACC course 17, you are entitled to admission to course 11A for the next three quarters. Offered on a Passed/Not Passed basis, LACC course 17 carries no UCLA graduation credit but does displace four units on your Study List. It is *not* an acceptable substitute for course 11A.

Bachelor of Science in Chemistry

For students who intend to pursue a career in chemistry.

Preparation for the Major

Required: Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23; Biochemistry 25; Physics 8A, 8B/8BL, 8C/8CL (8D/8DL strongly recommended); Mathematics 31A, 31B, 32A, 32B, 33A. No specific foreign language is required; however, reading knowledge of German (at least at the level of German 3) is strongly recommended if you are planning to pursue graduate work in chemistry.

The Major

Required: Chemistry 110A, 110B, 113A, 114 (or 114H), 133A, 133B, 133C, 173, and two other upper division or graduate courses in the department, including at least one laboratory course from 136, 144, 154, 174, 184.

Bachelor of Science in Biochemistry

For students preparing for careers in biochemistry or other fields requiring extensive preparation in both chemistry and biology.

Preparation for the Major

Required: Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23; Biochemistry 25; Mathematics 31A, 31B, 32A, 33A; three courses (including laboratory) from Physics 6A*, 6B, 6C, 8A, 8B/8BL, 8C/8CL, 8D/8DL; Biology 5, 8, 8L.

*If physics courses from both the 6 and 8 series are taken, undue duplication must be avoided.

The Major

Required: Chemistry 110A, 133A, 133B, 133C; Biochemistry 154, 156, 157A, 157B; one course from each of the following five categories: (1) Microbiology 101; (2) Biology 138, 141, 153, 154, CM156, or Microbiology C111; (3) Biology 158, 162, 166, 167, or Microbiology 113; (4) one upper division or graduate-level course in biology, chemistry and biochemistry, or microbiology; (5) one upper division or graduate-level course in biology, biological chemistry, chemistry and biochemistry, mathematics, microbiology, or physics. Courses selected to satisfy categories 4 and 5 must be approved by the undergraduate adviser (Biochemistry).

Bachelor of Science in *General Chemistry*

For students who wish to acquire considerable chemical background in preparation for careers outside chemistry. The requirements are accordingly quite flexible. The major may be appropriate for some students who plan to enter professional schools, such as those of medicine, dentistry, or public health.

Preparation for the Major

Required: Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23; Biochemistry 25; Mathematics 31A, 31B, 32A, 33A; three courses (including laboratory) from Physics 6A*, 6B, 6C, 8A, 8B/8BL, 8C/8CL, 8D/8DL.

*If physics courses from both the 6 and 8 series are taken, undue duplication must be avoided.

To enter the major, you must complete the preparation courses with at least a 2.0 average.

The Major

Required: Six upper division courses in the department, including at least one in physical chemistry and at least two with laboratory work; six additional upper division courses. A 2.0 average is required in all upper division courses in the department. The program should be coherent in terms of your interests and objectives and must be based on a written proposal and approved by the undergraduate adviser (Chemistry).

Graduate Study

The department offers programs of study and research leading to the M.S. and Ph.D. degrees in both Chemistry and Biochemistry. Candidates for advanced degrees may specialize in the following fields: biochemistry, inorganic, organic, or physical chemistry.

If you are planning to work toward the Ph.D., you should not seek an M.S. degree first, but should apply directly to the Ph.D. program. Application materials may be obtained by writing to Phyllis Jergenson, Graduate Office, Department of Chemistry and Biochemistry, 4006 Young Hall, UCLA, Los Angeles, CA 90024.

Admission

An excellent undergraduate record is required in addition to the University minimum requirements. Graduate Record Examination (GRE) Aptitude and Advanced Tests are recommended.

Each student admitted to graduate standing is given orientation examinations at the beginning of the first quarter in physical, organic, analytical, and inorganic chemistry or biochemistry. The main purpose of the orientation requirement is to help you and your adviser plan a suitable course program. The examinations include material covered in upper division courses in biochemistry, physical, organic, and inorganic chemistry. All courses suggested because of deficiencies in undergraduate preparation are normally to be completed by the end of the first year.

You are encouraged to become familiar with research activities of all faculty in your area of interest and to join a research group as soon as possible. Biochemistry students rotate through at least two research groups during the Fall and Winter Quarters, with a final selection made during the Spring Quarter.

Foreign Language Requirement

Language requirements for the different areas of specialization are as follows: *biochemistry* — none; *inorganic* — German or a coordinated course in computer programming; *organic* — German; *physical* — German or French or, with consent of the research director, a substitute course program or a coordinated course in computer programming. Either the Educational Testing Service (ETS) examination (with a score of 500) or the departmental examination is acceptable. The substitute course program should consist of 10 units of coordinated upper division or graduate courses forming a minor field of concentration. These courses may be taken on an S/U grading basis but may not be applied toward the departmental course requirements. There is no language requirement for the M.S. degrees.

Master of Science Degrees

Course Requirements

Chemistry M.S.: At least nine courses (36 units) are required, of which at least five (20 units) must be graduate courses and the remainder upper division courses. You must take a minimum of two courses in your major area and one course in an outside area. Choices may be made from the following:

Inorganic — Chemistry 174, 207, C275, C276A, 276B, 277, 279

Organic — Chemistry 207, 232, 236, 241A through 241Z, 242, C243A, C243B, 244, 245, 246

Physical — Chemistry C215A, C215B, 215C, 215D, C223A, C223B, 223C, 225

Substitutions may be made with consent of the area adviser. With consent of the graduate adviser, courses of directed individual study, but not research courses, may replace any of the courses listed above.

Up to 24 units of course 596 or 598 may be applied toward the total course requirement; up to 20 units may be applied toward the minimum graduate course requirement.

Plan I (thesis plan) is the preferred method of attaining the M.S. in Chemistry. However, in exceptional cases where Plan II (comprehensive examination plan) is used, an additional six units of course 597 and six units from course 228, 248, or 278 may be applied toward the graduate course requirement and the total course requirement.

Biochemistry M.S.: The M.S. in Biochemistry may be obtained by the thesis plan or the comprehensive examination plan. Course requirements vary for each plan, as follows.

Plan I (Thesis Plan): A total of 36 units is required. Of these, 20 must be at the graduate level and include a minimum of 12 units from Chemistry M253, M255, M263, M267. Registration in course 268 is required for three quarters but is not applicable to the 36-unit requirement.

Up to 22 units of course 596 or 598 may be applied toward the total course requirement; up to eight units may be applied toward the graduate course requirement.

After completion of course requirements, you should consult your research adviser to form a thesis committee.

Plan II (Comprehensive Examination Plan): A total of 36 units is required. Of these, 20 must be at the graduate level and include a minimum of 12 units from Chemistry M253, M255, M263, M267. You may apply six units of course 268 and six units of course 597 to the graduate course requirement and the total course requirement. With the exception of Chemistry 268 and 597, all courses must be taken for a letter grade.

Ph.D. Degrees

Course Requirements

Chemistry Ph.D.: Candidates in each area of specialization should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. If your projected research falls in an area which differs appreciably from that anticipated by the field requirements listed below, you may be permitted appropriate modifications. Required coursework must be completed prior to advancement to candidacy.

Inorganic Chemistry

(1) Required background material: Chemistry 173; (2) two courses from C276A, 276B, 277; (3) two courses from 174, 207, 271A through 271Z, C275, 279; (4) two courses from physical chemistry (C213B, C215A, C215B, 215D, C223A) or organic chemistry (232, 236, 241A through 241Z, 242, C243A, C243B, 244, 245, 246) or biochemistry (157A); (5) Chemistry 278.

Organic Chemistry

(1) Required background material: Chemistry 133A, 133B, 133C, 136, 144; (2) courses C243A, C243B; (3) one course from C213B, 245, C276A; (4) one additional course from physical chemistry (C215A, 221A through 221Z, C223A) or inorganic chemistry (173, 174, C275, C276A) or biochemistry (157A, 157B); (5) two courses from 207, 232, 236, 241A through 241Z, 242, 244, 245, 246; (6) Chemistry 248.

Physical Chemistry

(1) Required background material: Chemistry 110A, 110B, 113A; (2) courses C215A, C215B, C223A, C223B, or equivalent; (3) course 228 each quarter; (4) one quarter of course 218 (for presentation of research); (5) two courses (for letter grade credit) from C210C, 215C, 215D, 223C, 225; (6) two courses (with S/U grading option) from C210C, 215C, 215D, 221A through 221F, 223C, 225, C243A, C276A, 277, Mathematics 146, Physics 213A, 105A, 110A, 110B, 131, 132, 140. Substitutions may be made with consent of the graduate adviser (physical chemistry).

Biochemistry Ph.D.: Candidates should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. Required coursework must be completed before advancement to candidacy.

(1) Required background material: Chemistry 110A, 133A, 133B, 133C, 156, 157A, 157B, some coursework in the life sciences, and some biochemistry laboratory experience. Deficiencies in background may be made up after admission.

(2) Core courses M253, M255, M263, M267 (18 units).

(3) An additional 12 units of upper division or graduate courses subject to the consent of the graduate adviser. It is recommended that eight of these units be from other than biochemistry offerings. Advanced courses taken elsewhere or as an undergraduate may be substituted for some of these units in appropriate cases. Seminar courses are normally not applicable.

(4) Chemistry 258 for three quarters.

Teaching Experience

One year of teaching experience is required.

Qualifying Examinations

Rather than a single comprehensive examination, the department gives all Ph.D. candidates a series of written tests called cumulative examinations. These are designed to encourage and test the continued growth of professional competency through coursework, study of the literature, departmental seminars, and informal discussions with colleagues.

Three examinations are given per quarter at approximately monthly intervals. If you enter directly into the Ph.D. program and perform satisfactorily on the orientation examination in your special area, you may begin writing the examinations immediately. You must begin by the start of your second quarter in residence and must continue until you have passed five. To remain in good standing, you should pass at least one of the first six examinations attempted and three out of nine. Fifteen attempts will normally be the maximum.

At the end of the first and second year, your overall progress is evaluated by the graduate study committee, taking into account performance in courses, cumulative examinations, and research. The committee may recommend that you (1) proceed to the oral examination, (2) be redirected to the M.S. program, or (3) be terminated.

The University Oral Qualifying Examination is based on your research proposal which should represent independent work and should offer the doctoral committee an opportunity to judge your ability to think creatively and to formulate significant ideas for research. The examination is to be attempted by the end of the seventh quarter (sixth quarter for biochemistry). Failure to comply with this time schedule may result in disqualification from the Ph.D. program unless permission has been given by the area adviser. The committee's decision to advance you to candidacy, to allow you to repeat the oral, or to disqualify you is based on the quality of the written proposal, the adequacy of the oral presentation, your overall record at UCLA as reflected in coursework and examinations, and your research ability.

When a satisfactory report on the completion of the written and oral qualifying examinations, course requirements, and the departmental language requirement has been submitted, you are eligible for formal advancement to candidacy for the Ph.D.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination is optional with the doctoral committee.

Lower Division Courses

2. Introductory Chemistry. Lecture, two hours; discussion, two hours. Not open to students with credit for course 11A. Designed to meet part of the Letters and Science requirements for nonscience majors and similar requirements in other colleges. The concept of the submicroscopic world of chemistry, ranging from protons to proteins in subject matter. Refer to "Requirements for the Bachelor's Degrees" in the College of Letters and Science section of this catalog for other credit limitations on this course.
Mr. Farrington, Mr. Hardwick (F,W,Sp)

11A. General Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: high school chemistry or equivalent background and three and one-half years of high school mathematics. Recommended: high school physics. Required of all majors in chemistry and biochemistry. (Students lacking the prerequisites may qualify for admission by exceptional performance on the Chemistry/Mathematics Preliminary Examination.) All students who intend to take this course must take the Chemistry/Mathematics Preliminary Examination (enrollment is usually limited to students who have passed the examination). Atomic theory and stoichiometry; states of matter and phase equilibrium; gases; liquids and solutions; acids, bases, and salts; equilibria in gases and solutions; solubility and solubility equilibria; oxidation and reduction.
Mr. Baur, Mr. Farrington, Mr. Trueblood (F,W,Sp)

11AH. General Chemistry (Honors). Lecture, four hours; discussion, one hour. Prerequisites: high school chemistry or equivalent background and three and one-half years of high school mathematics. Recommended: high school physics. (Students lacking the prerequisites may qualify for admission by exceptional performance on the Chemistry/Mathematics Preliminary Examination.) All students who intend to take this course must take the Chemistry/Mathematics Preliminary Examination (enrollment is usually limited to students who have passed the examination). An honors course parallel to course 11A.
Mr. El-Sayed, Mr. Gelbart (F)

11B. General Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 11A or 11AH with a grade of C – or better or consent of instructor. Thermochemistry and thermodynamics; electrochemistry; chemical kinetics; quantum theory and electronic structure of atoms; periodicity of chemical properties.
Mr. Kaesz, Mr. Kivelson, Mr. Knobler (F,W,Sp)

11BH. General Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisites: course 11AH with a grade of B – or better or course 11A, and consent of instructor. An honors course parallel to course 11B. Mr. Baur, Mr. Nicol (W)

11BL. General Chemistry Laboratory (1 unit). Laboratory, four hours. Prerequisite: course 11A with a grade of C – or better or consent of instructor. Corequisite: course 11B (or must already have been passed with a grade of C – or better). Enrollment priority, if needed, given to those taking course 11B concurrently. Use of the balance; volumetric techniques; equilibria; thermochemistry; quantitative analysis using volumetric and potentiometric procedures; Beer's Law. (F,W,Sp)

11C. General Chemistry (3 units). Lecture, two hours. Prerequisite: course 11B or 11BH with a grade of C – or better or consent of instructor. Bonding and molecular structure; descriptive inorganic chemistry presented in terms of the principles discussed in courses 11A and 11B.
Mr. Farrington, Mr. Hawthorne, Ms. Valentine (F,W,Sp)

11CH. General Chemistry (Honors) (3 units). Lecture, two hours. Prerequisites: course 11BL with a grade of B – or better or course 11B, and consent of instructor. An honors course parallel to course 11C.
Mr. El-Sayed, Mr. McMillan (Sp)

11CL. General Chemistry Laboratory (2 units). Laboratory, eight hours. Prerequisite: course 11BL with a grade of C – or better. Corequisite: course 11C (or must already have been passed with a grade of C – or better). Enrollment priority, if needed, given to those taking course 11C concurrently. Rates of reactions; quantitative volumetric analysis; qualitative inorganic analysis; inorganic synthesis; column chromatography; colorimetric analysis. (F,W,Sp)

15. Organic Chemistry and Biochemistry for Prenursing and Kinesiology. Prerequisite: course 11A with a grade of C – or better. Not open to students with credit for course 21. Recommended for students in certain areas of kinesiology and in the prenursing, prephysical therapy, and predental hygiene curricula. Does not meet requirements for admission to medical and dental schools nor does it satisfy the requirements of any major in Letters and Science other than certain areas of kinesiology. An introduction to the structures and reactions of organic compounds, particularly with respect to their roles and their transformations in living systems. Ms. Lamb (F,W)

15L. Chemistry Laboratory for Prenursing and Kinesiology (1 unit). Laboratory, four hours. Corequisite: course 15 (or must already have been passed with a grade of C – or better). Does not meet requirements for admission to medical and dental schools. An introduction to quantitative work with aqueous solutions and to the preparation, isolation, and characterization of organic compounds, particularly some of those important in living systems. Ms. Lamb (F)

21. Organic Structure and Reactions. Lecture/discussion. Prerequisites: courses 11C, 11CL (may be taken concurrently), with grades of C – or better, or consent of instructor. Structure, reactivity, and properties of organic compounds. The theory of functional groups, chemical bonds, molecular structure, and stereochemistry of organic compounds.
Mr. Cram, Mr. Hersh (F,W,Sp)

23. Bioorganic Structure and Reactions. Lecture, three hours; discussion, one hour; laboratory, four hours. Prerequisites: courses 11CL and 21 with grades of C – or better or consent of instructor. Organic structures and reactions of biochemical interest. The classes of compounds most important to biological functions: amino acids, carbohydrates, etc. Sulfur, phosphorous, and anhydride chemistry. Methods of separation, purification, and analysis of organic compounds: extraction, crystallization, distillation, and chromatography.
Mr. Clarke, Mr. Jordan, Ms. Lamb (F,W,Sp)

25. Elementary Biochemistry. Lecture, three hours; discussion, one hour; laboratory, four hours. Prerequisite: course 23 with a grade of C – or better or consent of instructor. Protein structure and function; enzyme catalysis; intermediary metabolism; cell constituents; properties and biosynthesis of nucleic acids and proteins. Purification and characterization of biological macromolecules; spectrophotometry; catalysis; enzyme kinetics; gel filtration and paper chromatography; viscosity; utilization of radioisotopes.
Mr. Reisler, Mr. Weiss, Mr. West (F,W,Sp)

96. Special Courses in Chemistry (1 to 4 units). To be arranged. Prerequisite: consent of undergraduate adviser (Chemistry). (F,W,Sp)

Upper Division Courses

103. Environmental Chemistry. Prerequisites: courses 21, 23, and 25, or consent of instructor. Chemical aspects of air and water pollution, solid waste disposal, energy resources, and pesticide effects. Chemical reactions in the environment and the effect of chemical processes on the environment.
Mr. Baur, Ms. Lamb (Sp)

110A. Physical Chemistry: Chemical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisites: course 11C, Physics 8B or 6C (may be taken concurrently), Mathematics 31A, 31B, 32A or, for life science majors, Mathematics 3C. An understanding of partial differentiation such as that obtained in Mathematics 3C or 32A is very desirable. Properties of gases; laws of thermodynamics; free energy; entropy; chemical potential and chemical equilibrium; thermodynamics of solutions.
Mr. Bernstein, Mr. McMillan, Mr. Trueblood (F,W,Sp)

110B. Physical Chemistry: Chemical Equilibrium, Electrochemistry, and Kinetics. Lecture, four hours; discussion, one hour. Prerequisites: course 110A, Physics 8C. Introduction to statistical thermodynamics, kinetic theory of gases, chemical kinetics, phase equilibria, chemical equilibria in solutions, electrochemistry.
Mr. Kivelson, Mr. McMillan, Mr. Reiss (W,Sp)

C110C. Physical Chemistry: Charges, Fields, and Matter. (Formerly numbered 110C.) Lecture, three hours; discussion, one hour. Prerequisite: course 110A. Topics include electromagnetic fields in matter — susceptibilities, molar polarization and refraction, multipoles, van der Waals forces; classical EM waves — propagation, refraction, scattering, absorption, optical rotation and rotatory dispersion, magnetic effects; radiation — multipoles, black-body, Einstein coefficients, lasers; scattering and diffraction — Rayleigh, Mie, Raman, X-ray, electron, neutron, nuclear — by particles, molecules, lattices; resonance phenomena — light, EPR, NMR, NQR, Mössbauer; electrolytes — ion activity, conductivity, rate effects. May be concurrently scheduled with course C210C.
Mr. McMillan (Sp)

113A. Physical Chemistry: Introduction to Quantum Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: course 11C, Physics 6C or 8C, Mathematics 31A, 31B, 32A, 33A. An introduction to the principles and applications of quantum chemistry; atomic structure and spectra; harmonic oscillator; rigid rotor, molecular spectra.
Mr. Bayes, Mr. Gelbart, Mr. Scott (F,Sp)

C113B. Physical Chemistry: Introduction to Molecular Spectroscopy. Lecture/quiz, five hours. Prerequisite: course 113A or equivalent. Spectroscopic applications of basic quantum chemistry, including light-matter interaction, origin of selection rules, rotation-vibration spectra, anharmonic effects, electronic spectra, Franck-Condon principle, and topics from Raman, microwave, ESR, NMR, laser spectroscopy, and radiationless transitions. May be concurrently scheduled with course C213B.
Mr. Bayes, Mr. Williams (W)

114. Physical Chemistry Laboratory. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 11CL, 110A, 110B, and 113A, or consent of instructor. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes spectroscopy, thermodynamic measurements, and chemical dynamics.
Mr. Bayes, Mr. Trueblood, Mr. Williams (F,W,Sp)

114H. Physical Chemistry Laboratory (Honors). Lecture, two hours; laboratory, eight hours. Prerequisites: courses 11CL, 110A, 110B, and 113A, with grades of B or better, or consent of instructor. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes topics in physical chemistry to be selected in consultation with the instructor.
Mr. Bayes, Mr. Trueblood, Mr. Wiliams (F,W,Sp)

C115A-C115B. Quantum Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C115A or Physics 115B is prerequisite to C115B. Students entering course C115A are normally expected to take course C115B the following quarter. Designed for chemistry students with a serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C215A-C215B.
Mr. Farrelly, Mr. Gelbart (W, C115A; Sp, C115B)

121. Special Topics in Physical Chemistry. Prerequisite: course 110B. Recommended: course 113A, Physics 8D. Topics of considerable research interest presented at a level suitable for students who have completed the junior-year courses in physical chemistry. (Sp)

C123A-C123B. Classical and Statistical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisite: course 110B or 156. Recommended: course 113A. Rigorous presentation of the fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic polyatomic gases, the solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, the imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C223A-C223B.
Mr. Reiss, Mr. Scott (F, C123A; W, C123B)

125. Computers in Chemistry. Lecture, three hours. Prerequisites: courses 110A, 110B, 113A, a working knowledge of FORTRAN IV or PL/1. Discussion of computer techniques, including matrix manipulation, solution of differential equations, data acquisition, and instrumental control, and their applications to chemical problems in quantum mechanics, thermodynamics, and kinetics. Mr. Levine (F)

133A. Intermediate Organic Chemistry. Prerequisites: courses 21, 23, 25 (may be taken concurrently), with grades of C or better, or consent of instructor. Structure, reactivity, and spectroscopic properties of organic compounds. Mr. Anet, Mr. Foote (F,Sp)

133B. Intermediate Organic Chemistry. Lecture, three hours; laboratory, four hours. Prerequisite: course 133A with a grade of C − or better. Lectures include reactions, mechanisms, and synthesis in organic chemistry; common classes of compounds and reactions. Laboratory includes methods of organic reactions, synthesis, isolation, and characterization.
Mr. Anet, Mr. Foote (F,W)

133BG. Intermediate Organic Chemistry (2 units). Lecture/quiz, three hours. Open only with consent of graduate adviser (Chemistry) to graduate students who have not taken course 133B at UCLA.
Mr. Anet, Mr. Foote (F,W)

133C. Intermediate Organic Chemistry. Lecture, two hours; laboratory, eight hours. Prerequisite: course 133B with a grade of C − or better. Lectures include reactions, mechanisms, and synthesis in organic chemistry; complex molecules and natural products; polymers. Laboratory includes methods of organic reactions, synthesis, isolation, and characterization. Mr. Anet, Mr. Foote (W,Sp)

133CG. Intermediate Organic Chemistry (2 units). Lecture/quiz, three hours. Open only with consent of graduate adviser (Chemistry) to graduate students who have not taken course 133C at UCLA.
Mr. Anet, Mr. Foote (W,Sp)

136. Organic Structural Methods. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 133A, 133B, 133C, or equivalent, with grades of C − or better, or consent of instructor. A laboratory course in organic structure determination by chemical and spectroscopic methods; microtechniques.
Mr. Foote (F)

C143A. Structure and Mechanism in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110B, 113A, 133C (may be taken concurrently), or equivalent, with grades of C − or better, or consent of instructor. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C243A.
Mr. Chapman

C143B. Mechanism and Structure in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course C143A with a grade of C − or better or consent of instructor. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C243B. Mr. Chapman

144. Laboratory Methods in Organic Synthesis. Lecture, two hours; laboratory, eight hours. Prerequisite: course 133C or equivalent instruction, including spectroscopic methods of organic chemistry, with a grade of C − or better, or consent of instructor. Laboratory methods of synthetic organic chemistry, including reactions under inert atmosphere, semimicroscale reaction techniques, synthesis of natural products, and molecules of theoretical interest.
Mr. Jung (Sp)

144G. Laboratory Methods in Organic Synthesis (2 units). Consists of the lecture portion only of course 144. Open only with consent of graduate adviser to graduate students who have not taken course 144 at UCLA and who do not wish to take the laboratory portion of course 144. Mr. Jung

152. Biochemistry. Lecture, four hours; discussion, one hour. Prerequisite: course 25. Not open to students with credit for course 157A. Survey of biochemistry. May not be applied toward the chemistry or biochemistry major. Mr. Boyer, Mr. Smith (F)

154. Biochemical Methods. Lecture/quiz, two hours; laboratory, eight hours. Prerequisite: course 25. Recommended: course 152 or 157A. Applications of biochemical procedures to metabolic reactions; properties of living systems; enzymes; proteins; nucleic acids and other tissue constituents.
Mr. Clarke, Mr. Gralla, Mr. Martinson (F,W,Sp)

156. Biophysical Chemistry. Lecture, four hours; discussion, one hour. Prerequisite: course 110A. Solution thermodynamics of biochemical systems; biochemical kinetics; energy levels, spectroscopy, and bonding; topics from structural, hydrodynamic, statistical, and electrochemical methods of biochemistry.
Mr. Eisenberg, Mr. Rees, Mr. Schumaker (F,Sp)

157A. Biochemistry. Lecture, four hours; discussion, one hour. Prerequisites: courses 110A, 133B (may be taken concurrently). Enzymes; metabolic pathways and their integration and regulation; biological energetics.
Mr. Atkinson, Mr. Clarke, Mr. West (W)

157B. Biochemistry. Lecture, four hours; discussion, one hour. Prerequisite: course 157A. Biosynthetic metabolism; synthesis of nucleic acids and proteins and control of these processes.
Mr. Atkinson, Mr. Clarke, Mr. Jordan (Sp)

173. Structural Inorganic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite or corequisite: course 110A. Recommended: courses 113A or 156, and 133B. Introductory survey of structure and bonding in inorganic compounds; molecular stereochemistry; donor-acceptor interactions; coordination compounds of the transition metals; elements of crystal-field and ligand-field theory.
Mr. Hawthorne, Mr. Kaesz, Mr. Zink (F,W,Sp)

174. Inorganic and Metalorganic Laboratory Methods. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 133A, 133B, and 173, or consent of instructor. Synthesis of inorganic compounds, including air-sensitive materials; dry-box, vacuum line, and high-pressure techniques; Schlenck methods; chromatographic and ion exchange separations.
Mr. Hawthorne, Mr. Kaesz (W)

C175. Inorganic Reaction Mechanics. Lecture/discussion. Prerequisites: courses 110A, 110B, 113A, 173, or equivalent. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free/radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C275. Mr. Hawthorne, Ms. Valentine (F)

C176. Group Theory and Applications to Inorganic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 113A, 173, or equivalent. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C276A. Mr. Strouse, Mr. Zink (F)

184. Chemical Instrumentation. Lecture/quiz, two hours; laboratory, eight hours. Prerequisite: course 110A. Theory and practice of instrumental techniques of chemical and structural analysis, including atomic absorption spectroscopy, gas chromatography, mass spectrometry, nuclear magnetic resonance, polarography, X-ray fluorescence, and other modern methods.
Mr. Strouse, Mr. Wasson, Mr. Williams (F,Sp)

190. Undergraduate Thesis Research. Prerequisites: two quarters of course 199 on related material, consent of undergraduate adviser and research director. Final quarter of an integrated one-year research project. May consist of experimental and/or theoretical research or, in some cases, a comprehensive review of a given area. A thesis embodying the totality of the year's work is to be submitted and an oral presentation made. The course is suggested, but not required, for those seeking departmental honors at graduation. (F,W,Sp)

196. Special Courses in Chemistry (1 to 4 units). Hours to be arranged. Prerequisite: consent of undergraduate adviser (Chemistry). (F,W,Sp)

199A-199ZZ. Directed Individual Study or Research for Undergraduate Students (2 to 8 units). To be arranged with faculty member who will direct the research. Prerequisites: advanced junior standing with a 3.0 GPA or senior standing in the major, consent of department chair. A proposal must be received one week prior to the first day of the quarter. Additional details on requirements and application may be obtained from the undergraduate counselor. P/NP grading. (F, W, Sp)

Graduate Courses

207. Organometallic Chemistry. Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Survey of synthesis, structure, and reactivity (emphasizing a mechanistic approach) of compounds containing carbon bonded to elements selected from the main group metals, the metalloids, and the transition metals, including olefin complexes and metal carbonyls; applications in catalysis and organic synthesis.
Mr. Hawthorne (Sp)

C210C. Physical Chemistry: Charges, Fields, and Matter. Lecture, three hours; discussion, one hour. Prerequisite: course 110A. Topics include electromagnetic fields in matter — susceptibilities, molar polarization and refraction, multipoles, van der Waals forces; classical EM waves — propagation, refraction, scattering, absorption, optical rotation and rotatory dispersion, magnetic effects; radiation — multipoles, black-body, Einstein coefficients, lasers; scattering and diffraction — Rayleigh, Mie, Raman, X-ray, electron, neutron, nuclear — by particles, molecules, lattices; resonance phenomena — light, EPR, NMR, NQR, Mössbauer; electrolytes — ion activity, conductivity, rate effects. May be concurrently scheduled with course C110C. S/U or letter grading.
Mr. McMillan (Sp)

C213B. Physical Chemistry: Molecular Spectroscopy. Lecture/quiz, five hours. Prerequisite: course 113A or equivalent. Spectroscopic applications of basic quantum chemistry, including light-matter interaction, origin of selection rules, rotation-vibration spectra, anharmonic effects, electronic spectra, Franck-Condon principle, and topics from Raman, microwave, ESR, NMR, laser spectroscopy, and radiationless transitions. May be concurrently scheduled with course C113B. Independent study project required of graduate students. Mr. Bayes, Mr. Williams (W)

C215A-C215B. Quantum Chemistry: Methods. Lecture, four hours; discussion, one hour. Prerequisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C215A or Physics 115B is prerequisite to C215B. Students entering course C215A are normally expected to take course C215B the following quarter. Designed for chemistry students with a serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C115A-C115B.
Mr. Farrelly, Mr. Gelbart (W, C215A; Sp, C215B)

215C. Advanced Quantum Chemistry: Applications. Lecture, three hours; discussion, one hour. Prerequisites: course C215B, Physics 131, or equivalent. Topics in quantum chemistry selected from molecular structure, collision processes, theory of solids, symmetry and its applications, and theory of electromagnetic radiation. S/U or letter grading.
Mr. Bernstein (F)

215D. Molecular Spectra, Diffraction, and Structure. Lecture, three hours; discussion, one hour. Prerequisites: course C215B, Physics 131, or equivalent. Selected topics from electronic spectra of atoms and molecules; vibrational, rotational, and Raman spectra; magnetic resonance spectra; X-ray, neutron, and electron diffraction; coherence effects. S/U or letter grading. Mr. El-Sayed (W)

218. Physical Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

221A-221Z. Advanced Topics in Physical Chemistry (2 to 4 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in physical chemistry, generally taught by a staff member whose research interests embrace that specialty. S/U or letter grading.

C223A-C223B. Classical and Statistical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisite: course 110B or 156. Recommended: course 113A. Presentation of the fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic polyatomic gases, the solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, the imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C123A-C123B.
Mr. Reiss, Mr. Scott (F, C223A; W, C223B)

223C. Statistical Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses C215B, C223B, Physics 131, or equivalent. Fundamentals of statistical mechanics; classical equations of state; Coulomb systems; phase transitions; quantum statistical mechanics; quantum corrections to the equation of state; density matrix; second quantization. S/U or letter grading.

225. Chemical Kinetics. Lecture, three hours; discussion, one hour. Prerequisites: courses C215B, C223B. Classical experimental and theoretical approaches to the study of rates and mechanisms of chemical reactions. Modern experimental techniques and molecular-level theory of reaction dynamics. Examples of well-studied elementary reactions. S/U or letter grading. Mr. Bernstein (Sp)

228. Chemical Physics Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

M230A. Structural Molecular Biology (2 units). (Same as Biology M230A and Microbiology M230A.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor based on a written research proposal. Fundamentals of electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals.
Mr. Eiserling, Ms. Kasamatsu (F, alternate years)

M230B. Structural Molecular Biology. (Same as Biology M230B.) Lecture, three hours; discussion, one hour. Prerequisites: Physics 6C, Mathematics 3C, consent of instructor. Selected topics from the principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading. Mr. Eiserling, Mr. Lake (W)

M230C. Structural Molecular Biology Laboratory. (Same as Biology M230C and Microbiology M230C.) Laboratory, 10 hours. Prerequisite: consent of instructor based on a written research proposal. Practical experience with electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals.
Mr. Eiserling, Ms. Kasamatsu (F, alternate years)

M230D. Structural Molecular Biology Laboratory (2 units). (Same as Biology M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building.
Mr. Eiserling, Mr. Lake (W)

232. Stereochemistry and Conformational Analysis. Lecture/discussion, three hours. Prerequisite or corequisite: course C143A or consent of instructor. Molecular symmetry, chirality, prochirality, stereochemistry in vinyl polymers, atropisomerism, diastereomeric interactions in solution, conformations of acyclic and cyclic molecules. Mr. Jung

236. Spectroscopic Methods of Organic Chemistry. Lecture, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Problem solving using proton and carbon 13 nuclear magnetic resonance, infrared spectroscopy, and mass spectrometry; new techniques in NMR, IR, and MS, with emphasis on Fourier transform NMR. Mr. Hersh

241A-241Z. Special Topics in Organic Chemistry (2 to 4 units each). Prerequisite or corequisite: course C243A or equivalent or consent of instructor. Each course encompasses a recognized specialty in organic chemistry, generally taught by a staff member whose research interests embrace that specialty.

242. Organic Photochemistry. Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Interactions of light with organic molecules; mechanistic and preparative photochemistry.

C243A. Organic Chemistry: Structure and Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses 110B, 113A, 133C (may be taken concurrently), or equivalent, with grades of C – or better, or consent of instructor. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C143A. S/U or letter grading. Mr. Chapman (F)

C243B. Organic Chemistry: Mechanism and Structure. Lecture, three hours; discussion, one hour. Prerequisite: course C243A or consent of instructor. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C143B.

Mr. Chapman (W)

244. Strategy and Design in Organic Synthesis. Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. The theory behind the planning of syntheses of complex molecules from simpler ones. Organic reactions and their use in the synthetic process. The reasoning and art involved in organic synthesis.

245. Applications of Electronic Theory in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite or corequisite: course C243A or consent of instructor. A review of molecular orbital theory; introduction to alternative theoretical methods; aromaticity and homoaromaticity; Hückel and Möbius conjugation; Woodward-Hoffmann theory of concerted pericyclic reactions; through-bond and through-space interactions; an introduction to photoelectron spectroscopy; frontier molecular orbital theory; related special topics.

246. Bioorganic Chemistry. Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Organic chemical models for biological processes; synthetic models for enzymic complexation, catalysis, and inhibition; models for transport; solid support chemistry; mechanisms for differential complexation.

247. Organic Colloquium (2 units). Seminars in organic chemistry and related areas presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

248. Organic Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

249. Problems in Advanced Organic Chemistry (2 units). Problems in organic reaction mechanisms, synthesis, structure determination, stereochemistry, spectroscopy, electronic theory, photochemistry, and organometallic chemistry, with emphasis on current literature. Intended primarily for first- and second-year graduate students as preparation for cumulative examinations. May be repeated for credit. S/U grading.

250. Topics in the Biochemistry and Molecular Biology of Animal Cells. Lecture, three hours. Prerequisites: courses 133A, 133B, 133C, or equivalent, 157A, 157B, courses in genetics and molecular biology, consent of instructor. Structure and organization of animal cells, cell-cell contact, motility of cell and mobility of cellular components, chromosome structure, interactions between cytoplasm and nucleus, genetic analysis in higher eukaryotic cells, biochemistry of tissue development and organization.

Mr. Jordan and Invited Speakers

251A-251Z. Advanced Topics in Biochemistry (2 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in biochemistry, generally taught by a staff member whose research interests embrace that specialty.

M253. Macromolecular Structure (6 units). (Same as Biological Chemistry M253.) Lecture or recitation, five hours. Prerequisites: courses 110A, 156, 157A, and 157B, or Biological Chemistry 101A-101B or 201A-201B, or equivalent, or consent of instructor. Chemical and physical properties of proteins, nucleic acids, and other macromolecular complexes, with emphasis on theory and methodology; correlation of structure and biological properties; chemical synthesis and properties of polypeptides and polynucleotides. (F)

254. Advanced Biochemical Methods. Lecture/quiz, two hours; laboratory, eight hours. Prerequisite: course 156 or consent of instructor. Recommended corequisites: courses 157A, 157B. Theoretical and practical basis of metabolic, chromatographic, kinetic, electrophoretic, ultracentrifugal, isotopic, and other techniques as applied to biochemical systems.

Mr. Eisenberg, Mr. Shumaker (W)

M255. Biological Catalysis (2 units). (Same as Biological Chemistry M255.) Prerequisites: course 110A, one course from 156, 157A, 157B or Biological Chemistry 101A or 101B, or equivalent, or consent of instructor. Reaction mechanisms in molecular biology; experimental approaches for the study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; the design of pharmacologically active agents and artificial enzymes. Mr. Sigman (Sp)

M257. Physical Chemistry of Biological Macromolecules (2 units). (Same as Biological Chemistry M257.) Prerequisite: course 25 or 110A or consent of instructor. Theory of hydrodynamic, thermodynamic, and optical techniques used to study the structure and function of biological macromolecules.

Mr. Schumaker (W)

258. Biochemistry Student Seminar (2 units). Seminars presented by graduate students on topics of current biochemical interest. May be repeated for credit. S/U grading.

259. Mechanisms in Regulation of Transcription. Lecture, three hours. Prerequisite: course M253 or M267 or consent of instructor. Prokaryotic operons; initiation and termination; DNA regulatory sequences and regulator protein-DNA interactions; RNA polymerases; regulation of eukaryotic transcription; hormones, differentiation, the cell cycle; role of chromatin structure in mediating regulation.

Mr. Gralla, Mr. Martinson (Sp)

M261. Advanced Chemistry and Biochemistry of Lipids. (Same as Biological Chemistry M261.) Lecture, three hours; discussion, one hour. Prerequisites: courses 157A and 157B or Biological Chemistry 101A-101B or 201A-201B, or equivalent. Comprehensive treatment of lipid nutrition and metabolic-nutrient interactions . (W)

262. Biological Energy Transductions. Lecture, three hours. Prerequisite: course 157B or equivalent. Molecular basis of energy-transducing processes, including oxidative and photosynthetic phosphorylation, other energy-linked oxidative functions, membrane active transport, muscle contraction, and special sensory functions. Mr. Boyer (W)

M263. Metabolism and Its Regulation. (Formerly numbered M255.) (Same as Biological Chemistry M263.) Lecture, three hours. Prerequisites: course 110A, one course from 156, 157A, 157B or Biological Chemistry 101A or 101B, or equivalent, or consent of instructor. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function.

Mr. Atkinson, Mr. Weiss (Sp)

M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics (2 units each). (Formerly numbered M264.) (Same as Biological Chemistry M264A-M264B-M264C.) Prerequisites: course M261 or equivalent, consent of instructor. The biochemistry, morphology, and physiology of atherosclerosis. Emphasis on the chemistry of lipoproteins and the role of plasma lipoproteins in the regulation of tissue lipid metabolism and the development of atherosclerosis. Each course may be taken independently for credit.

266. Seminar in Techniques for the Study of Gene Regulation (2 units). Prerequisite: course 259 or consent of instructor. A seminar to discuss specific experimental approaches being taken in the study of gene regulation. Emphasis on the specific biochemical techniques being used to study regulatory protein-DNA interactions in diverse biological model systems.

M267. Macromolecular Metabolism and Subcellular Organization (6 units). (Same as Biological Chemistry M267.) Lecture or recitation, five hours. Prerequisites: courses 157A and 157B or Biological Chemistry 101A-101B or 201A-201B, or equivalent. Recommended: course M253. Metabolism of nucleic acids and proteins; biosynthesis of complex lipids and polysaccharides; structure and properties of cellular organelles.

Mr. Herschman, Mr. Martinson (W)

268. Biochemistry Research Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students on topics of current biochemical research interest. May be repeated for credit. S/U grading.

M269. Developmental Biochemistry (2 units). (Same as Biological Chemistry M269.) Prerequisite: course M267 or consent of instructor. Biochemical aspects of development, specific tissue and cell function, and differential gene expression. The biochemistry of cell division, macromolecular synthesis, chromatin function in gene expression, cell-cell interactions, membrane organization, and growth as they contribute to such topics as hormone induction, morphogenesis, and viral transformation. Emphasis on the use of differentiating *in vivo* systems and cell culture as models. Mr. Harary, Mr. Herschman

271A-271Z. Advanced Topics in Inorganic Chemistry (2 to 4 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in inorganic chemistry, generally taught by a staff member whose research interests embrace that specialty.

C275. Inorganic Chemistry: Reaction Mechanisms. Lecture/discussion. Prerequisites: courses 110A, 110B, 113A, 173, or equivalent. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free/radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C175.

Mr. Hawthorne, Ms. Valentine (F)

C276A. Inorganic Chemistry: Group Theory and Spectroscopy. Lecture, three hours; discussion, one hour. Prerequisites: courses 113A, 173, or equivalent. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C176. S/U or letter grading.
Mr. Strouse, Mr. Zink (F)

276B. Physical Methods for the Characterization of Inorganic Compounds. Lecture, three hours. Prerequisite: course C276A or consent of instructor. Applications of spectroscopic techniques, including 1R, Raman, visible, UV, NMR, ESR, and NQR, to the elucidation of structure and bonding in inorganic and organometallic compounds.
Mr. Strouse, Mr. Zink (W)

277. Crystal Structure Analysis. Lecture, three hours. Theory and practice of modern crystallography, with emphasis on practical experience in structure determination. Topics include crystallographic symmetry, scattering theory, data collection, Fourier analysis, heavy atom techniques, direct methods, isomorphous replacement, crystallographic refinement, error analysis, and common pitfalls. S/U or letter grading. Mr. Dickerson, Mr. Eisenberg, Mr. Strouse, Mr. Trueblood

278. Inorganic Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

279. Bioinorganic Chemistry. Lecture, three hours. Prerequisites: courses 110A and either 156 or 173. The role of metal ions in biology; introduction to metalloenzymes and metalloproteins; metal ion interactions with nucleic acids; metal ion metabolism.
Ms. Valentine (W)

M298. Seminar on Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M298, Biology M298, Microbiology M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. committee. Each student conducts or participates in discussions on assigned topics. May be repeated for credit. (F,W,Sp)

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 16 units). To be arranged with faculty member who will direct the study or research. May be repeated for credit. S/U grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 4 units). Prerequisite: consent of graduate adviser (Chemistry). S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 16 units). Each faculty member supervises research of M.S. students and holds research group meetings, seminars, and discussions with the students.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Each faculty member supervises research of Ph.D. students and holds research group meetings, seminars, and discussions with the students.

Chemistry/ Materials Science (Interdepartmental)

6532 Boelter Hall, (213) 825-5534

Professors

David L. Douglass, Ph.D. *(Materials Science and Engineering)*
Bruce S. Dunn, Ph.D. *(Materials Science and Engineering)*
M. Frederick Hawthorne, Ph.D. *(Chemistry)*
Herbert D. Kaesz, Ph.D. *(Chemistry)*
John D. Mackenzie, Ph.D. *(Materials Science and Engineering)*
Malcolm F. Nicol, Ph.D. *(Chemistry)*
Kanji Ono, Ph.D. *(Materials Science and Engineering)*
Howard Reiss, Ph.D. *(Chemistry)*

Scope and Objectives

The undergraduate major is designed for students who are interested in solid-state chemistry, the preparation of engineering materials such as semiconductors, glasses, ceramics, metals, and polymers, the reactivity of such materials in different environments, and how chemical compositions affect properties. It provides appropriate preparation for graduate studies in many fields emphasizing interdisciplinary research involving chemistry, engineering, and applied science.

Bachelor of Science Degree

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, Physics 8A, 8B, 8C/8CL, 8D/8DL, Program in Computing 10A, Materials Science and Engineering 14, Chemistry 11A or 11AH, 11B or 11BH, 11C or 11CH, 11BL or 11CL, 21 (may be replaced by 133A if offered as part of the major), English 3.

The Major

Required: Chemistry 110A, 110B, 113A, C113B or C115A-C115B, 114, 173, one or two courses from C123A, C123B, 133A, 133B, 133C, 174, C175, C176; Materials Science and Engineering 144A, 146A, 147A, three to four courses from 140D, 141, 142A, 143A, 145A, 145B, 146F, 147B, 147E, two courses from 142L, 144L, 146L.

For further information, contact Barbara Brooks, Materials Science and Engineering, 6532 Boelter Hall.

Chicano Studies (Interdepartmental)

David E. López, Ph.D. *(Sociology)*
Raymund A. Paredes, Ph.D. *(English)*
Raymond A. Rocco, Ph.D. *(Political Science)*
Concepción Valadez, Ph.D. *(Education)*
Simon González, Ed.D., *Emeritus (Education)*

Assistant Professors

Felipe Castro, Ph.D. *(Psychology)*
Carlos V. Grijalva, Ph.D. *(Psychology)*
Guillermo Hernández, Ph.D. *(Spanish)*
Rebecca Morales, Ph.D. *(Architecture and Urban Planning)*
Sylvia Rodríguez, Ph.D. *(Anthropology)*

Adjunct Professor

Armando Morales, D.S.W. *(Psychiatry)*

Visiting Lecturers

Steven J. Loza, Ph.D. *(Music)*
Romulus E. Zamora, M.F.A. *(Theater, Film, and Television)*

Scope and Objectives

Today there is a demand for individuals with extensive knowledge of the Chicano community. Opportunities are developing in both the public and private sector that call for men and women academically prepared and aware of the history, culture, and current problems facing Mexican communities. The Chicano studies major provides students with the language and cross-cultural studies background that will enhance their qualifications for positions in schools, governmental organizations, and private enterprise.

The program, coordinated through the Chicano Studies Research Center, is multidisciplinary and leads to the Bachelor of Arts degree. Special features include a field studies project, a Spring Quarter colloquium, and a guest speaker series.

Bachelor of Arts Degree

The B.A. program in Chicano Studies is designed to provide systematic instruction for liberal arts and preprofessional majors who wish concentrated study of the Chicano experience. Viewed as developmental, the program subjects the Chicano reality to critical investigation, including the social, economic, educational, historical, political, and psychological analysis of the Chicano.

The major is recommended for students preparing for graduate study as well as for public service careers. You are encouraged to spend up to one year in either (1) a service agency in the Chicano community or (2) a professional research project on the Chicano experience.

Preparation for the Major

Required: One course from each of the following departments: Anthropology 5, 6, or 22; Economics 1 or 2; History 6A, 6B, or 6C; Political Science 1; Sociology 1; Spanish 5 or equivalent. You must complete prerequisites for all courses selected.

The Major

This consists of three elements, one of which is optional (you must complete prerequisites for all courses in the major):

(1) **Major Core** (nine courses): Chicano Studies M102, M105, M145, M147, M159A, M159B, M172T; History 197; Sociology 124* or 155*.

(2) **Major Concentration:** Four courses in one discipline, selected from Anthropology 115P, 135A, 135B, 135Q, 136P, 138, M140, 150, 154, 166, 167, 185; Economics 110, 120, 121, 150, 151, 152, 172; English M104A, M104B, 106, 171, 172, 173, 174, 188, 189, 190; History 147B, 153, 154B, 160, 162, 163; Library and Information Science 111C, Political Science 115, 142, 149, 172B, 173, 174, 182A, 186, 190, 191; Psychology 127, 130, 134, 135, 136A, 137A, 137C, 143, 175; Sociology 109, 113, 120, 123, 125, 140, 142, M143, and 155* or 124*; Spanish 100A, 100B, 105A, 105B, 107, 115, M118A, M118B, 136A, 136B, 137, 139, 142, 143, 144, M149. You may petition the committee in charge of the major to include in the major concentration area a course not on the approved list. CED courses may be applied by petition.

*Course may not be used for both the major core and major concentration.

(3) **Optional Multidisciplinary Senior Thesis** — Prerequisite: senior standing. Chicano studies majors have the option during their senior year to enroll in two 199 courses in their major concentration area, with the intention of producing a Chicano studies undergraduate thesis related to the major concentration. Enrollment in the two 199 courses is with the advice and consent of a faculty member. The first quarter includes thesis conceptualization and formulation, along with preliminary data collection for the thesis. The second quarter entails completion of the data collection, analysis of the data, and termination of the thesis.

Course Limitations: No more than two 199 courses may be applied toward the major concentration; 199 courses applied toward the multidisciplinary senior thesis option may not also be applied toward the major concentration area. Registration in 199 courses must be approved in writing by the department chair and either the chair or adviser for the Chicano studies major. No more than two CED courses may be applied toward the major concentration.

Upper Division Courses

M102. The Mexican-American and the Schools. (Same as Education M102.) Prerequisite: consent of instructor. Review of research and teaching strategies. Analysis of school policies and practices and their effect on the development of Mexican-American and Chicano youth and communities.

M103C. The Origins and Evolution of Chicano Theater. (Same as Theater M103C.) Lecture, three hours. Prerequisite: upper division standing. An exploration of the development of Chicano theater from its beginnings in the legends and rituals of ancient Mexico to the work of Luis Valdez (late 1960s).
Mr. Zamora

M103D. Contemporary Chicano Theater. (Same as Theater M103D.) Lecture, three hours. Prerequisite: upper division standing. A study of recent trends in Chicano theater as reflected in the works of contemporary Chicano dramatists and theater artists.
Mr. Zamora

M105. The Chicano Experience in Literature. (Same as English M105.) Prerequisite: satisfaction of Subject A requirement. The study of literature in English by and about Chicanos. Survey of the depiction of the Chicano experience in American literature generally, with emphasis on the development of Chicano literature itself, its cultural backgrounds, and distinctive uses of language. Mr. Paredes

M145. Introduction to Chicano Literature. (Same as Spanish M145.) Lecture, three hours. Prerequisite: Spanish 25 or 26. Recommended: Spanish 136B. Introduction to texts representative of the Chicano literary heritage. A sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most of the required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to the characteristics and development of the Chicano literary corpus.
Mr. Hernández

M147. Minority Group Politics. (Same as Political Science M147.) Lecture, three hours; discussion, one hour. Prerequisites: Political Science 1 plus one of the following: one additional 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. A systematic evaluation of the functioning of the American polity related to problems of race and ethnicity. Topics include leadership, organization, ideology, conventional versus unconventional political behavior, inter-minority relations, co-optation, symbolism, and repression. Mr. Rocco

M159A. History of the Chicano Peoples. (Same as History M159A.) Lecture, three hours. A survey lecture course on the historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides an integrated understanding of change over time in the Mexican community by inquiry into the major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination and resistance. Developments related to historical events of significance occurring both in the United States and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper. Mr. Gómez-Quiñones

M159B. History of the Chicano Peoples. (Same as History M159B.) Lecture, three hours. A survey lecture course on the historical development of the Mexican (Chicano) community and people of Mexican descent in the United States through the 20th century, with special focus on labor and politics. Provides an integrated understanding of change over time in the Mexican community by inquiry into the major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the United States and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper.
Mr. Gómez-Quiñones

M172T. Ethnohistory of Hispanic Cultures in the U.S. Southwest. (Same as Anthropology M172T.) Lecture, three hours. Prerequisite: Anthropology 5 or 22 or consent of instructor. An ethnography of the social and cultural adaptations of the Hispanic peoples in the U.S. Southwest: their respective social organization, economic and political institutions, sacred and secular belief systems, and expressive cultures. P/NP (undergraduates), S/U (graduates), or letter grading. Ms. Rodríguez

Evelyn Venable Mohr, M.A., *Emeritus*

Scope and Objectives

The general objective of the Classics Department is to provide a thorough knowledge of the Greek and Roman languages and culture. To this end, it offers elementary and advanced courses in the languages, the reading and analysis of Greek and Roman authors, the history of Greek and Roman literature, classical art, archaeology, mythology, philosophy, and religion. The department is also strong in three fields which are not commonly taught in classics departments, namely classical linguistics, medieval Latin, and Byzantine studies.

Bachelor of Arts degrees are offered in Classical Civilization, in Greek, in Latin, and in the Classics (i.e., Greek and Latin). Other undergraduate degrees include the B.A. in English/Greek and in English/Latin, offered jointly with the English Department. Students considering a major in the department should consult the adviser as soon as possible in their University career, but in no case later than the point at which they are about to take upper division courses. Graduate degrees include the Master of Arts in Classics (Greek and Latin), Greek, and Latin, and the Ph.D. in Classics.

Bachelor of Arts in Classical Civilization

The purpose of the classical civilization major is to provide a balanced, yet focused, view of the ancient civilizations of Greece and Rome, both historically unique and universally typical human creations. The approach to the subject is accordingly both causal and comparative. The areas of study include the elements of culture — religion, mythology, philosophy, art, literature, language, the socioeconomic system, and politics. The requirements of the major encourage both breadth and depth: eight of the 14 required upper division courses (four from this department and four from other departments) must be taken in one of the four areas of concentration listed below; the remaining six upper division courses taken in this department may be selected to reflect your varied interests in the areas outside your concentration. The culmination of the program will be a senior paper, written during your senior year under professorial supervision. While this major is not designed to qualify you for graduate study in classics, it does not preclude a transition to advanced study in classics or related fields.

Preparation for the Major

Required: Classics 10 and 20.

The Major

Required: (1) Classics 195 and nine upper division courses in this department, of which no more than three may be selected from either Greek 100 through 130 or Latin 100 through 133 and of which four must be selected from the courses listed below under any one of the four areas of concentration; (2) any four related courses in other departments listed below in your chosen area of concentration. Total courses required: 14.

Areas of Concentration

(1) **Language and Society:** Classics 180, three courses from either Latin 100 through 133 or Greek 100 through 130. *Related courses:* Anthropology M140, Communication Studies 100, History 115A-115B-115C, 116A-116B, 117A-117B, 118, Linguistics 100, M150, 170, Philosophy 127A, 127B, 172.

(2) **Religion and Mythology:** Classics 145, 150A, 150B, 152, 161, 162, 165, 166A, 166B, 168. *Related courses:* Anthropology 133P, 156, English M111A, History 115A-115B-115C, 116A-116B, 117A-117B, 118, Ancient Near East (Near Eastern Languages) 170.

(3) **Literature and Society:** Classics 141, 142, 143, 144, 145, 150A, 150B, 152, 162, 165. *Related courses:* Anthropology 133R, 150, 152, 154, M163, 185, Communication Studies 100, 142, English 109, 190, History 115A-115B-115C, 116A-116B, 117A-117B, 118, Humanities 102, C105, C107, C111, Philosophy 101A, 101B, 102, Political Science 111A, Sociology 125, 159, Theater 102A, 102D.

(4) **Ancient Art, Architecture, and Urbanistics:** Classics 150A, 150B, 151A, 151B, 151C, 151D, 152. *Related courses:* Art History 103A, 103B, 103C, 103D, 105A, Geography 151, Sociology 125, same history and anthropology courses as above under item 3.

Bachelor of Arts in Greek

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Nine upper division courses in Greek, including course 110; (2) one upper division course in Latin; (3) Classics 142 and either 141 or 143; (4) two courses in Greek or Roman history (History 115B-115C, 116A-116B, 117A-117B); (5) two additional courses in one or two of the related areas: classical archaeology (Classics 151A, 151B, 151C, 151D), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics 145, Philosophy 101A, 101B, 102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170A, M170B), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Bachelor of Arts in Latin

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Nine upper division courses in Latin, including course 110; (2) one upper division course in Greek; (3) Classics 143 and either 141 or 142; (4) two courses in Greek or Roman history (History 115B-115C, 116A-116B, 117A-117B); (5) two additional courses in one or two of the related areas: classical archaeology (Classics 151A, 151B, 151C, 151D), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics 145, Philosophy 101A, 101B, 102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170A, M170B), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Bachelor of Arts in Classics (Greek and Latin)

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Twelve upper division courses, six in Greek and six in Latin, including Greek 110 and Latin 110; (2) one course from Classics 141, 142, 143; (3) one course in Greek or Roman history (History 115B, 115C, 116A, 116B, 117A, 117B); (4) one additional course in two of the related areas: classical archaeology (Classics 151A, 151B, 151C, 151D), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics 145, Philosophy 101A, 101B, 102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170A, M170B), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Note: Students in the classics, Greek, and Latin majors are permitted to take Greek 200A-200B-200C and Latin 200A-200B-200C. Two of these courses may replace one course in requirement 3 of the Greek and Latin majors and requirement 2 of the classics major, as well as two courses in requirement 1 of all three majors, thereby reducing the total number of required courses by one.

Bachelor of Arts in English/Greek

Preparation for the Major

Required: English 4, 10A, 10B, 10C, Greek 1, 2, 3.

The Major

Required: (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Greek, including courses 100 and either 101A or 101B, selected in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

Bachelor of Arts in English/Latin

Preparation for the Major

Required: English 4, 10A, 10B, 10C, Latin 1, 2, 3.

The Major

Required: (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Latin, including courses 105 and 113, selected in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

Master of Arts Degrees

Admission

Requirements for admission to the M.A. programs are a UCLA B.A. degree, or the equivalent, with a major in classics (for the Classics M.A.), Greek (for the Greek M.A.), or Latin (for the Latin M.A.) and a grade-point average of at least 3.0 in the major; a statement of purpose; three letters of recommendation, normally from previous instructors in the classics; and the Graduate Record Examination (while there is no minimum required score, the GRE is used as a criterion in uncertain cases, as well as to assess applications for teaching assistantships and other financial assistance from the department). In cases of deficient preparation or doubtful equivalency to a UCLA B.A., the department may grant provisional admission, requiring additional coursework or a written examination. Applicants for the Classics M.A. program who are deficient in Greek (or Latin) may be admitted to the Latin (or Greek) program, then permitted to transfer into the classics program when the deficiencies have been removed. The department uses the same application form as the Graduate Admissions Office, which may be obtained from the Department of Classics (7349 Bunche Hall, UCLA, Los Angeles, CA 90024) or Graduate Admissions.

Major Fields or Subdisciplines

The department offers M.A. degrees in Classics (Greek and Latin), Greek, and Latin.

Foreign Language Requirement

In addition to taking courses in Greek and/or Latin, you must demonstrate proficiency in German, French, or Italian during your first year of study, either by passing German 5, French 5, or Italian 5 at UCLA (or an equivalent course) with a minimum grade of C, or by examination. For German and French, the examination is the standard Educational Testing Service (ETS) reading examination (you need a minimum score of 500); for Italian, a written translation examination is administered by the department.

Course Requirements

For the Classics M.A., nine courses are required. These must include Greek 210 and Latin 210, one course each from the Greek 200A-200B-200C and Latin 200A-200B-200C series, and one course in the 201 through 229 series in each language. The three remaining courses are to be selected in consultation with the graduate adviser from the upper division and graduate courses offered by the department (or exceptionally by other UC departments or programs).

Nine courses are required for the Greek and Latin M.A. degrees. The University requires that at least five be graduate courses. For the Greek M.A., these must include Greek 210, two courses from the Greek 200A-200B-200C series, one course from the Greek 201 through 229 series, three additional upper division or graduate Greek courses, and two additional upper division or graduate courses to be selected in consultation with the graduate adviser. The Latin M.A. course requirements are identical except for the substitution of Latin for Greek courses.

No more than one 596 course may be applied toward the M.A. course requirements.

Comprehensive Examination Plan

The department follows the comprehensive examination plan for the M.A. degrees. Before the examination, you are expected to complete the departmental reading lists in Greek (for the Greek M.A.) or Latin authors (for the Latin M.A.) or in Greek and Latin authors (for the Classics M.A.). The examinations consist of three two-hour written tests on sight translations from Greek and prepared texts from the Greek reading list (for the Classics and Greek M.A.), sight translations from Latin and prepared passages from the Latin reading list (for the Classics and Latin M.A.), and the history of Greek and Latin literature (Greek or Latin for the Greek or Latin M.A.). The three examinations may be taken on three separate days, which need not be during the same quarter. The M.A. examinations are normally given at the beginning of each quarter. All examinations may be repeated once; in exceptional cases and with consent of the departmental faculty, more than once.

Ph.D. Degree

Admission

In addition to an M.A. degree (see below), the department requires a statement of purpose. Students without a UCLA M.A. must also submit three letters of recommendation, normally from previous instructors in the classics, and the Graduate Record Examination (while there is no minimum required score, the GRE is used as a criterion in uncertain cases, as well as to assess applications for teaching assistantships and other financial assistance from the department). The department uses the same application form as the Graduate Admissions Office, which may be obtained from the department or Graduate Admissions.

A UCLA M.A. degree in Classics (Greek and Latin), Greek, or Latin, with distinction, or an equivalent degree is required. In cases of doubtful equivalency to the UCLA M.A. degree, the department may allow provisional admission.

Major Fields or Subdisciplines

The department offers the Ph.D. degree in Classics with the following areas of specialization: classical literature and philology, classical linguistics, ancient history, ancient philosophy, classical archaeology, patristic and Byzantine studies, medieval Latin studies.

Foreign Language Requirement

New students in the doctoral program will normally have demonstrated proficiency in French, German, or Italian as described in the requirements for the M.A. degree. During the first year of study in the Ph.D. program, you must demonstrate proficiency in either French (Italian may be substituted with consent of the regular departmental faculty) or German, whichever was not used to satisfy the M.A. requirement. If Italian or French was used to satisfy the M.A. requirement, German must be taken.

Course Requirements

At least one full year of graduate study (normally eight to nine courses) is required as preparation for the qualifying examinations. You may choose any of the areas of specialization listed above and, if entering with a UCLA M.A. in Classics or the equivalent, may take courses entirely within the area of specialization; if you specialize in classical literature and philology, you may concentrate on Greek or Latin as research interests dictate. If you enter with a UCLA Greek M.A. or the equivalent, you must take, in addition, Latin 210, one course from the Latin 200A-200B-200C series, and one course from the Latin 201 through 229 series if you have not previously taken these courses. If you enter with a UCLA Latin M.A. or the equivalent, you must satisfy identical course requirements in Greek.

Qualifying Examinations

Before the qualifying examinations, you must complete the departmental Ph.D. reading list in either Greek or Latin authors, which is in addition to the M.A. reading lists and varies somewhat according to the area of specialization. In addition, students entering with the Greek M.A. must complete the Latin M.A. reading list; students entering with the Latin M.A. must complete the Greek M.A. reading list. Students are advanced to candidacy as a result of passing the qualifying examinations (which consist of written examinations covering translation, the reading lists, and your area of specialization) and the University Oral Qualifying Examination covering both the area of specialization and the general field of classical studies. Each examination may normally be repeated once.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

An oral defense of the dissertation, which is written under the supervision of the individual adviser and must contribute significantly to research on the subject, may be required or waived at the discretion of the doctoral committee.

Classics

Lower Division Courses

10. Survey of Classical Greek Culture. Knowledge of Greek is not required. Lectures, many illustrated, on Greek life and culture from the age of Homer to the Roman Conquest. Discussion of art, literature, philosophy, and mythology.
Mr. Blank, Mr. Lattimore (F,W)

20. Survey of Roman Civilization. Knowledge of Latin is not required. A study of life and culture of Rome from the time of its foundation to the end of antiquity. A survey of art, literature, and political thought of the Romans. Selections from Latin authors are read in translation.
Mr. Blank, Mr. Frischer, Mr. Goldberg (W,Sp)

68F. Freshman Seminar on Comparative Mythology. Discussion, three hours. Prerequisite: freshman standing. Ways of studying myth through history, especially in ancient Near Eastern and Indo-European cultures. Comparison of myths on both diffusionary and genetic models. Reconstruction of protomyths common to prehistoric Western Asia and Europe.
Mr. Puhvel (F,W,Sp)

M70. Survey of Medieval Greek Culture. (Same as History M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including the discovery of America). Mr. Dyck

71F. Power and Imagination in Byzantium. Discussion, three hours. Prerequisite: freshman standing. A study of the relations of authority and the intelligentsia in the highly centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform.
Mr. Dyck (F,W,Sp)

Upper Division Courses

141. A Survey of Greek Literature in English. A study of classical Greek literature, exclusive of the drama, with readings in English.
Mr. Haslam, Ms. King

142. Ancient Drama. A study of Greek and/or Latin drama in translation.
Mr. Dyck, Mr. Goldberg, Mr. Haslam, Ms. King

143. A Survey of Latin Literature in English. A study of classical Latin literature, exclusive of the drama, with readings in English.
Mr. Blank, Mr. Dyck, Mr. Frischer, Mr. Goldberg

144. A Survey of Greek and Roman Epic in Translation. Homer's *Iliad* and *Odyssey,* Vergil's *Aeneid,* and Ovid's *Metamorphoses,* studied in translation.
Ms. Bergren, Ms. King

145. Ancient Greek and Roman Philosophy. Lecture, two hours; discussion, one hour. A study of some of the major Greek and Roman philosophical texts, including those of the Pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on the historical and cultural setting of the texts, their literary form, interrelations, and contribution to the discussion of basic philosophical issues. Mr. Blank

150A. Origins of the Western View of Women: The Female in Greek Thought. (Formerly numbered 150.) Lecture, three hours. An interdisciplinary study of the concept of the female in the various forms of thought developed by the Greeks (e.g., epic, tragedy, comedy, history, political philosophy, gynecology). Special emphasis on how these texts lay the foundation for the Western view of women. Ms. Bergren

150B. Origins of the Western View of Women: The Female in Roman and Early Christian Thought. (Formerly numbered 150.) Lecture, three hours. Course 150A is not prerequisite to 150B. An interdisciplinary study of the concept of the female in Roman and early Christian thought. Special emphasis on the status of the female with regard to sexuality, procreation, and the sacred. Ms. Bergren

151A. Classical Archaeology: The Aegean Bronze Age. Knowledge of Greek is not required. A survey of the prehistoric art and archaeology of the Greek lands.

151B. Classical Archaeology: Greco-Roman Architecture. Knowledge of Greek and Latin is not required. A general introduction to the study of Aegean, Greek, and Roman architecture. Mr. Lattimore

151C. Classical Archaeology: Greco-Roman Sculpture. Knowledge of Greek and Latin is not required. A general introduction to the study of Aegean, Greek, and Roman sculpture. Mr. Lattimore

151D. Classical Archaeology: Greco-Roman Painting. Knowledge of Greek and Latin is not required. A general introduction to the study of Aegean, Greek, and Roman painting. Mr. Lattimore

152. The Ancient City. A study of urban planning in the ancient world, with particular attention to the cities of classical Greece and Rome, but with consideration also to comparable developments in the ancient Near and Far East. Examination of questions of architectural space and organization, of the form, design, and function of the major municipal areas and buildings, and of the provision of public amenities by detailed reference to significant archaeological sites and contemporary sources. Mr. Frischer, Mr. Lattimore

161. Introduction to Classical Mythology. The origins of classical myth; the substance of divine myth and heroic saga; the place of myth in religion; a survey of the study of classical mythology.
Mr. Lattimore, Mr. Puhvel

162. Classical Myth in Literature. The use of myth in the principal authors and genres of Greek and Roman literature, with examples of its influence in later literatures.

165. Ancient Athletics. A study of ancient Greek and Roman athletics and their connections with religion, politics, literature, and art. Mr. Lattimore

166A. Greek Religion. A study of the religion of the ancient Greeks. Mr. Blank, Mr. Dyck

166B. Roman Religion. A study of the religion of the ancient Romans. Mr. Frischer

168. Introduction to Comparative Mythology. Prerequisite: course 161 or consent of instructor. The religious, mythical, and historical traditions of Greece and Rome compared with each other and with those of other ancient Near Eastern and European societies. Mr. Puhvel

M170A. Byzantine Civilization. (Same as History M122A.) Emphasis on Byzantine theology.
Mr. Dyck

M170B. Byzantine Civilization. (Same as History M122B.) Literature, relations with Rome, and the Renaissance. Mr. Dyck

180. Introduction to Classical Linguistics. Prerequisites: Greek 3, Latin 3. Basics of the comparative grammar of Greek and Latin in relation to one another and in the frame of Indo-European linguistics.
Mr. Puhvel

195. Senior Paper. Limited to seniors in classical civilization. Supervised through individual consultation with an appropriate faculty member, students write a research paper on a topic of their own choosing within their area of concentration in the major.

199. Special Studies in Classics (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

200. History of Classical Scholarship. Mr. Dyck

230A-230B. Language in Ancient Asia Minor. Prerequisite: consent of instructor. Survey of the language situation in Anatolia in the 2nd and 1st Millennia B.C. Readings in Hittite, Palaic, Luwian, Hieroglyphic, Lycian, and Lydian texts. Anatolian-Greek relationships and survivals in classical and Hellenistic times. Mr. Puhvel

240. Etruscology. Prerequisite: consent of instructor. A survey of scholarly research on Etruscan language and culture, with analysis of epigraphic material.
Mr. Puhvel

244. Textual Criticism: Studies in the Preparation of a Critical Edition of Greek and/or Latin Texts. Seminar, three hours. The different steps required in the preparation of a critical edition of an ancient text: localizing the manuscripts; collation; establishing the stemma; selecting the right reading on the basis of knowledge of the context, of the language of the author, and of the sources; emendations; formulation of the *apparatus criticus* and the *apparatus fontium.*
Mr. Haslam, Mr. Levine, Mr. Löfstedt

246. Greek and Latin Meter. Prerequisite: consent of instructor. A comprehensive study of meter as it functions in classical poetry. Mr. Haslam

251A. Seminar in Classical Archaeology. The Aegean Bronze Age.

251B. Seminar in Classical Archaeology. Greco-Roman architecture. Mr. Frischer, Mr. Lattimore

251C. Seminar in Classical Archaeology. Greco-Roman sculpture. Mr. Lattimore

251D. Seminar in Classical Archaeology. Greco-Roman painting. Mr. Lattimore

252. Topography and Monuments of Athens. Detailed studies in the topography and monuments of Athens, combining the evidence of literature, inscriptions, and actual remains. Mr. Lattimore

253. Topography and Monuments of Rome. Detailed studies in the topography and monuments of ancient Rome, combining the evidence of literature, inscriptions, and actual remains.
Mr. Frischer, Mr. Lattimore

260. Topics in Ancient Religion. Seminar, three hours. Prerequisite: consent of instructor.
Ms. Bergren, Mr. Frischer, Mr. Lattimore

268. Seminar in Comparative Mythology. Prerequisites: course 168, consent of instructor. Advanced study of selected topics in comparing Greek and Roman traditions with other ancient Near Eastern and European societies. Mr. Puhvel

287. Graduate Colloquium in Classical Literature. (Formerly numbered M287.) A survey of the basic methods of and approaches to classical scholarship, including textual criticism, literary interpretation and theory, hermeneutics, interdisciplinary studies, and computer applications to classics. Emphasis varies from year to year, depending on instructor(s). May be repeated for credit with topic change. S/U grading. (F,W,Sp)

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Greek

Lower Division Courses

1. Elementary Greek. Lecture, five hours. (F)

2. Elementary Greek. Lecture, five hours. Prerequisite: course 1. (W)

3. Elementary Greek. Lecture, five hours. Prerequisite: course 2. (Sp)

40. The Greek Element in English. Knowledge of Greek is not required. A study of the derivation and usage of English words of Greek origin: analysis into their component elements directed toward understanding of form and meaning. Mr. Blank

Upper Division Courses

Note: Greek 3 is prerequisite to 100, which is prerequisite to 101A through 106 and 110 through 124.

100. Readings in Greek Prose. Prerequisite: course 3. Reading of Plato's *Apology* or a text of comparable difficulty. Ms. Bergren, Mr. Haslam

101A. Homer: *Odyssey.* Mr. Haslam, Ms. King, Mr. Puhvel

101B. Homer: *Iliad.* Mr. Haslam, Ms. King, Mr. Puhvel

102. Lyric Poets. Selections from Archilochus to Bacchylides. Ms. Bergren, Mr. Haslam

103. Aeschylus. Ms. Bergren, Mr. Blank, Mr. Haslam

104. Sophocles. Ms. Bergren, Mr. Haslam, Ms. King

105. Euripides. Mr. Frischer, Mr. Haslam, Ms. King

106. Aristophanes. Ms. Bergren, Mr. Haslam

110. The Study of Greek Prose. Work in sight reading and grammatical analysis of Attic prose texts; writing Attic prose. Mr. Blank, Mr. Haslam

111. Herodotus. Mr. Blank, Mr. Lattimore

112. Thucydides. Mr. Haslam, Ms. King, Mr. Lattimore

113. Attic Orators. Mr. Dyck, Mr. Haslam, Mr. Lattimore

121. Plato. Mr. Blank, Mr. Frischer, Ms. King

122. Plato: *Republic.* Ms. Bergren, Mr. Blank, Mr. Haslam

123. Aristotle: *Poetics and Rhetoric.* Mr. Blank, Mr. Haslam

124. Artistotle: *Ethics.* Mr. Blank, Mr. Dyck, Mr. Frischer

130. Readings in the New Testament. Prerequisite: course 3. Mr. Dyck, Mr. Haslam

131. Readings in Later Greek. Prerequisite: course 100. Topics vary from year to year and include "Longinus," On the Sublime; Marcus Aurelius; Arrian; the Second Sophistic; Plutarch; later epic; epigram; epistolographi Graeci. Mr. Blank, Mr. Dyck, Mr. Haslam

132. Survey of Byzantine Literature. Prerequisite: course 100. Readings based on (1) *Anthology of Byzantine Prose,* ed. Nigel Wilson and (2) *Oxford Book of Medieval and Modern Greek Verse,* ed. C.A. Trypanis, or if unavailable, *Poeti bizantini,* ed. R. Cantarella. In addition, necessary historical and cultural background provided by readings and lectures. Mr. Dyck

133. Readings in Byzantine Literature. Prerequisite: course 132. Topics vary from year to year and include Procopius, Agathias, Michael Psellus, the Alexiad of Anna Comnena, and Digenis Akritas. Mr. Dyck

199. Special Studies in Greek (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

The 200-series courses which are designated A and B (e.g., 201A-201B) are double courses. Course A is a preseminar and is normally prerequisite to course B, a seminar.

200A-200B-200C. History of Greek Literature. Prerequisite: consent of instructor. Lectures on the history of Greek literature, supplemented on the part of the student by independent reading of Greek texts in the original. Ms. Bergren, Mr. Haslam, Ms. King

201A-201B. Homer: *Iliad.* Ms. Bergren, Mr. Haslam, Ms. King

202A-202B. Homer: *Odyssey and the Epic Cycle.* Ms. Bergren, Mr. Haslam, Ms. King

203. Hesiod. Ms. Bergren, Mr. Frischer

204. Homeric Hymns. Ms. Bergren

205. Seminar in Aeschylus. Ms. Bergren, Mr. Blank, Mr. Haslam

206A-206B. Sophocles. Mr. Haslam, Mr. Lattimore

207A-207B. Euripides. Mr. Frischer, Mr. Haslam, Ms. King

208A-208B. Aristophanes. Ms. Bergren

209. Seminar in Hellenistic Poetry. Mr. Frischer, Mr. Haslam

210. Advanced Greek Prose Composition. Prerequisite: course 110 or equivalent. Mr. Haslam

211A-211B. Herodotus. Mr. Blank

212A-212B. Thucydides. Mr. Haslam, Mr. Lattimore

213. Seminar in Greek Historiography. Mr. Haslam

214. Demosthenes. Mr. Dyck

215. Early Greek Orators. Studies in the works of Antiphon, Andocides, and Lysias. Mr. Dyck

216. Menander. Prerequisite: reading knowledge of classical Greek. Mr. Frischer, Mr. Goldberg

217A. Greek Lyric Poetry: Archaic Lyric. Prerequisite: consent of instructor. A study of lyric poetry of the Archaic period, both choral and monodic, with elegiac and iambic included. Ms. Bergren, Mr. Haslam

217B. Greek Lyric Poetry: Pindar and Bacchylides. Prerequisite: consent of instructor. A study of the choral odes of Pindar and Bacchylides, with special attention to the conventions of the epinician. Ms. Bergren, Mr. Haslam

221. Seminar in the Pre-Socratic Philosophers. Mr. Blank, Mr. Frischer

222A-222B. Plato. Ms. Bergren, Mr. Blank

223A-223B. Aristotle. Mr. Blank, Mr. Dyck, Mr. Frischer

224. Seminar in Post-Aristotelian Philosophy. Mr. Blank, Mr. Frischer

231A-231B-231C. Seminar in Later Greek and Byzantine Literature. Prerequisite: consent of instructor. Studies in various aspects of Byzantine Greek language and literature. Topics vary from year to year. Each course may be taken independently and may be repeated for credit with topic change. Mr. Blank, Mr. Dyck

233. Byzantine Poetry. A study of the main representatives of both religious and secular poetry. Mr. Dyck

240A-240B. History of the Greek Language. Prerequisite: consent of instructor. **240A.** The linguistic history of classical Greek. **240B.** Postclassical, medieval, and modern Greek. Mr. Dyck

241. Greek Epigraphy. A survey of Greek historical inscriptions, chiefly Attic. Mr. Dyck

242. Greek Dialects and Historical Grammar. Prerequisite: consent of instructor. The linguistic situation in early Greece. Readings in classical Greek dialectal texts. Greek grammar in the context of common Greek and Indo-European linguistics. Mr. Puhvel

243. Mycenaean Greek. Prerequisite: consent of instructor. Script, language, and grammar of the Linear B inscriptions; their relevance to ancient Greek linguistic and cultural history. Mr. Puhvel

244. Greek Papyrology. Prerequisites: reading knowledge of Greek, consent of instructor. An introduction to Greek papyri, considered both as historical documents and as carriers of literature. Mr. Haslam

245. Greek Palaeography. Studies in the development of the book hand in Greek manuscripts earlier than the invention of printing. Mr. Blank

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Latin

Lower Division Courses

1. Elementary Latin. Lecture, five hours. (F)

1G. Elementary Latin for Graduate Students (No credit). Concurrently scheduled with course 14.

2. Elementary Latin. Lecture, five hours. Prerequisite: course 1. (W)

3. Elementary Latin. Lecture, five hours. Prerequisite: course 2. (Sp)

14. Elementary Latin: Intensive (8 units). All the declensions of nouns and adjectives, all conjugations in the indicative mood, and the primary uses of the subjunctive mood. Emphasis on the development of the ability to read easy selections of classical prose.

40. The Latin Element in English. Knowledge of Latin is not required. A study of the derivation and usage of English words of Latin origin; analysis into their component elements directed toward understanding of form and meaning. Mr. Lattimore

Upper Division Courses

Note: Latin 3 is prerequisite to 100, which is normally prerequisite to all other 100-series courses in classical Latin authors.

100. Readings in Latin Prose and Poetry. Lecture, three hours. Prerequisite: course 3 or equivalent. Close study of a prose text supplemented with related readings in poetry. Attention to historical and cultural context. Course is normally prerequisite to other courses in the Latin 100 series. Mr. Blank, Mr. Levine

101. Plautus. Mr. Goldberg, Mr. Löfstedt

102. Terence. Mr. Goldberg, Mr. Löfstedt

103. Lucretius. Mr. Blank, Mr. Frischer, Mr. Levine

104. Ovid. Ms. Bergren

105. Vergil: Selections from *Aeneid I-VI.* (Formerly numbered 105A). Mr. Haslam, Ms. King, Mr. Levine

106. Catullus. Mr. Haslam, Mr. Levine

107. Horace. Mr. Frischer, Mr. Levine

108. Roman Elegy. Selections from Catullus, Tibullus, and Propertius. Mr. Frischer, Mr. Levine

109. Roman Satire. Selections from the *Epistles* of Horace, the *Satires* of Juvenal, and the *Epigrams* of Martial. Mr. Levine

110. The Study of Latin Prose. Work in sight reading and grammatical analysis of classical prose texts; writing of classical prose. Mr. Blank, Mr. Levine

111. Livy. Mr. Frischer, Mr. Löfstedt

112. Tacitus. Mr. Frischer, Mr. Löfstedt

113. Cicero: The Orations. Mr. Dyck, Mr. Frischer

114. Roman Epistolography: Cicero and Pliny. Mr. Blank, Mr. Dyck, Mr. Frischer

115. Caesar. Mr. Dyck

116. Petronius. Mr. Frischer, Mr. Löfstedt

117. Sallust.

118. Seneca. A selection of Seneca's works is read in Latin. Mr. Blank, Mr. Löfstedt

120. The Vulgate. Lecture, three hours. Prerequisite: course 3 or consent of instructor. Reading of selected chapters of St. Jerome's translation of the Bible, with emphasis on unclassical features of the Latin. Mr. Löfstedt

130. Introduction to Medieval Latin. Prerequisite: course 3 or consent of instructor. Reading of easy prose texts, with emphasis on basic language training. Mr. Löfstedt

131. Medieval Latin Prose. Prerequisite: course 130 or consent of instructor. Extensive reading of selected texts in prose, with emphasis on the idiosyncrasies of medieval Latin. Mr. Löfstedt

133. Medieval Latin Poetry. Prerequisite: one upper division language course in Latin or consent of instructor. Mr. Löfstedt

199. Special Studies in Latin (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

The 200-series courses which are designated A and B (e.g., 203A and 203B) are double courses. Course A is a preseminar and is normally prerequisite to course B, a seminar.

200A-200B-200C. History of Latin Literature. Prerequisite: consent of instructor. Lectures on the history of Latin literature, supplemented on the part of the student by independent reading of Latin texts in the original. Mr. Frischer, Mr. Goldberg, Mr. Levine

201. The Roman Epic Tradition. Seminar, three hours. Close study of one epic poet other than Vergil (e.g., Ennius, Lucan, Valerius Flaccus, Statius, Silius Italicus), with attention to the literary tradition of epic. May be repeated for credit with topic change.

202. Seminar in Catullus. A detailed consideration of the entire Catullan corpus. Mr. Levine

203A. Elegiac Poetry. Mr. Frischer, Mr. Levine

203B. Propertius. Mr. Frischer, Mr. Levine

204A-204B. Vergil's *Aeneid*. Mr. Haslam, Ms. King

205. Seminar in Vergil's Bucolics. Mr. Frischer, Ms. King

206. Horace. Mr. Frischer

207. Roman Comedy. Prerequisite: consent of instructor. Survey of the history of Roman comedy. Reading of one comedy by Plautus or Terence, with emphasis on language and meter. Mr. Goldberg, Mr. Löfstedt

208. Ovid. Prerequisite: reading knowledge of classical Latin. A detailed study of the poetic works of Ovid. Readings in the original with discussion of the secondary literature and scholarship. May be repeated for credit with topic change. Ms. Bergren

209. Seminar in Roman Satire. A detailed study of an individual satirist, with attention to his position in the development of the satirical genre in Roman literature. Choice of author varies from year to year. Close study of the text, of the characteristics of the writer as a social critic and artist, and of the contemporary literary and social environment.

210. Advanced Latin Prose Composition. Prerequisite: course 110 or equivalent. Mr. Levine

211A-211B-211C. Seminar in the Roman Historians. A study of considerable portions of the writings of:

211A. Sallust.

211B. Livy. Mr. Frischer

211C. Tacitus. Mr. Frischer

215. Seminar in the Roman Novel. Works such as Petronius' *Satyricon* and Apuleius' *Metamorphoses:* a study of the literary problems. May be repeated for credit with topic change. Mr. Blank, Mr. Frischer

216. Roman Rhetoric. Seminar, three hours. Close study of one rhetorical text (e.g., *Rhetorica ad Herennium*, Cicero's *de Oratore*, Seneca's *Controversiae* or *Suasoriae*, Quintilian's *Institutio*), with attention to its place in the rhetorical tradition. May be repeated with topic change. Mr. Dyck, Mr. Frischer

220. Cicero's Orations. (Formerly numbered 220B.) Seminar, three hours. Mr. Dyck, Mr. Frischer

221A. Cicero's Philosophical Works. Mr. Dyck, Mr. Frischer, Mr. Levine

221B. Cicero: De Natura Deorum. Mr. Dyck, Mr. Frischer, Mr. Levine

222. Seminar in Roman Stoicism. Prerequisite: reading knowledge of Greek and Latin. Mr. Blank, Mr. Dyck, Mr. Frischer

223. Lucretius. Mr. Blank, Mr. Frischer

224. Seneca. Seminar, three hours. Detailed study of one work of prose or poetry by the younger Seneca. Emphasis on literary and philological problems, with some attention to philosophical and historical matters as well. May be repeated with topic change. Mr. Goldberg

231A-231B. Seminar in Medieval Latin. Prerequisite: at least one upper division course in Latin or consent of instructor. Studies in various areas of the language and literature of medieval Latin. May be repeated for credit with consent of instructor. Mr. Löfstedt

232. Vulgar Latin. Prerequisite: consent of instructor. History and characteristics of popular Latin; its development into the early forms of the Romance languages. Mr. Löfstedt

240. History of the Latin Language. Prerequisite: consent of instructor. The development of Latin from the earliest monuments until its emergence in the Romance languages. Mr. Löfstedt

242. Italic Dialects and Latin Historical Grammar. Prerequisite: consent of instructor. The linguistic situation in early Italy. Readings in Oscan, Umbrian, and early Latin texts. Latin grammar in the context of Italic and Indo-European linguistics. Mr. Puhvel

243. Seminar in Latin Palaeography. Studies in the development of the book hand in Latin manuscripts earlier than the invention of printing. Mr. Levine

370. The Teaching of Latin. Prerequisite: graduate standing or consent of instructor. Techniques for teaching; organization of courses; review of the content of the curriculum offered in junior and senior high schools.

495. College Teaching of Latin (2 units). Prerequisites: appointment as a teaching assistant, consent of instructor. Methodology of instruction in conjunction with classroom practice. May be repeated for credit. S/U grading. Mr. Goldberg

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Related Courses in Other Departments

Ancient Near East (Near Eastern Languages) 170. Introduction to Biblical Studies

272. Semitic Background of the New Testament

Art History (Art, Design, and Art History) 103A. Greek Art

103B. Hellenistic Art

103C. Roman Art

223. Classical Art

History 115A-115B-115C. History of the Ancient Mediterranean World

116A-116B. History of Ancient Greece

117A-117B. History of Rome

121A-121B. Medieval Europe

123A-123B. Byzantine History

215A-215B. Seminar in Ancient History

216A-216B. Seminar in Byzantine History

222A-222B. Seminar in Medieval Intellectual History and History of Science

Indo-European Studies 132. European Archaeology: The Bronze Age

M150. Introduction to Indo-European Linguistics

210. Indo-European Linguistics: Advanced Course

280A-280B. Seminar in Indo-European Linguistics

Philosophy 101A. Plato — Earlier Dialogues

101B. Plato — Later Dialogues

102. Aristotle

Courses on Other Campuses

Exchange and resource-sharing programs make it possible for UCLA students to take classics and classics-related courses at other schools in the Southern California area (i.e., University of Southern California and the Irvine, Riverside, and Santa Barbara campuses of the University of California). The graduate and undergraduate advisers should be consulted for specific details.

Communication Studies
(Interdepartmental)

232 Royce Hall, (213) 825-3303

Professors

Patricia M. Greenfield, Ph.D. *(Psychology)*
Steven H. Shiffrin, J.D. *(Law)*
Donald E. Hargis, Ph.D., *Emeritus*

Associate Professors

Patrice French, Ph.D.
Neil M. Malamuth, Ph.D., *Chair*
Paul I. Rosenthal, Ph.D.

Assistant Professor

Donald O. Case, Ph.D. *(Library and Information Science)*

Lecturers

Jeffrey I. Cole, Ph.D.
L. Geoffrey Cowan, LL.B.
Diana M. Meehan, Ph.D.
Janet Weathers, Ph.D.

Scope and Objectives

The major in communication studies is an interdisciplinary program leading to a Bachelor of Arts degree. It seeks to provide students with a comprehensive knowledge of the nature of human communication, the symbol systems by which it functions, the environments in which it occurs, its media, and its effects. Employing critical and empirical approaches, the major draws its resources from the social sciences, humanities, and fine arts. Two areas of specialty are offered: the specialization in mass communication centers on formal and institutional communication systems and the macrocosmic social contexts in which they function; the specialization in interpersonal communication centers on face-to-face communicative interaction in the small group environment.

Bachelor of Arts Degree

Students selecting the major in communication studies must complete the required lower division prerequisites and a minimum of 16 upper division courses as set forth below. Enrollment in the major is limited. Admission to the major will be by application to the committee in charge. Applications are available in the program office.

Preparation for the Major

Required: Communication Studies 10, Linguistics 1, Psychology 10, Sociology 1. Linguistics 2 is required for students who specialize in interpersonal communication.

The Major

Required Core Courses: Communication Studies 100 and 101 and one course from Anthropology M140, Communication Studies 102, or Linguistics 100.

Specializations

Mass Communication: (1) Theory and method — Communication Studies 140, 152, and either Communication Studies 147 or Sociology 122, and one course from Political Science 141, Psychology 137B, or Sociology 150; (2) modes of mass communication — two courses from Communication Studies 160, 165, 170; (3) media and media history — two courses from Communication Studies 187, Motion Picture/Television 106A, 108, 110A, and either Motion Picture/Television 116 or Communication Studies 175; (4) electives (five courses) — two courses from Communication Studies 115, 120, 130, Psychology 135 or Sociology 154, Psychology 137A or Sociology 152, Sociology 155; three courses from one of the following groups: (a) language theory — Communication Studies 142, 150, Linguistics 100, 170, Philosophy 172, Psychology 123; (b) American studies — English 115A, History 148A, 148B, 148C, 150A, 150B, 156A, 156B, Political Science 114A, 114B; (c) social systematics — Anthropology 133P, 133R, 135A, 135B, 142A, 142B, Sociology C144A, C144B, and either Sociology 151 or Anthropology 134.

Interpersonal Communication: (1) Theory — Psychology 135 or Sociology 154, Psychology 137A or Sociology 152; (2) methods — three courses from Communication Studies 115, 120, Management 182, Psychology 174; (3) heterogeneous groups communication — three courses from Anthropology 166, Communication Studies 130, Sociology 124, 155; (4) electives (five courses) — two courses from Communication Studies 147 or Sociology 122, Communication Studies 140, 152, 160, 165, 170; three courses from one of the following groups: (a) language theory — Communication Studies 142, 150, Linguistics 100, 170, Philosophy 172, Psychology 123; (b) media and media history — Communication Studies 187, Motion Picture/Television 106A, 108, 110A, and either Communication Studies 175 or Motion Picture/Television 116; (c) social systematics — Anthropology 133P, 133R, 135A, 135B, 142A, 142B, Sociology C144A, C144B, and either Anthropology 134 or Sociology 151.

Lower Division Course

10. Introduction to Communication Studies. An introduction to the fields of mass communication and interpersonal communication. Study of modes, media, and effects of mass communication, interpersonal processes, and communication theory.
Mr. Cole (F,W,Sp)

Upper Division Courses

100. Communication Theory. Prerequisite: course 10, Linguistics 1, Sociology 1, Psychology 10, or consent of instructor. Analysis of the fundamental nature of human communication; its physical, linguistic, psychological, and sociological bases. Study of theoretical models explicating the process and constituents of the communicative act.
Ms. French, Ms. Weathers

101. Freedom of Communication. Analysis of legal, political, and philosophical issues entailed in the rights of free expression, access to an audience, and access to information. Study of court decisions governing freedom of communication in the United States. Mr. Cowan, Mr. Rosenthal (F,Sp)

102. The Code of Human Communication. Prerequisite: course 10, Sociology 1, Psychology 10, Linguistics 1, or consent of instructor. The structural analysis and description of human communication codes; the development of language; characteristics of the source, channels, and destination in human communication. Ms. French, Ms. Weathers

115. Dyadic Communication and Interpersonal Relationships. Prerequisite: course 100. The developmental approach to the study of communication in dyadic relationships. Analysis of differences in the stages of relationships in terms of communication rules and verbal and nonverbal messages.
Ms. Weathers

120. Principles and Types of Group Communication. Prerequisite: course 100 or consent of instructor. Analysis of the purposes, principles, and types of small group communication. Particular emphasis on the organization of and participation in problem-solving discussion. Ms. Weathers

130. Cultural Factors in Interpersonal Communication. Prerequisite: course 100 or consent of instructor. Study of cultural factors as they affect the quality and processes of interpersonal communication; exercises in the participation, analysis, and criticism of interethnic and interracial communications in the small group configuration. Ms. Weathers

140. Theory of Persuasive Communication. Prerequisite: course 100 or consent of instructor. The dynamics of communication designed to influence human conduct; analysis of the structure of persuasive discourse; integration of theoretical materials drawn from relevant disciplines of the humanities and social sciences. Mr. Rosenthal

142. Rhetorical Theory. Prerequisite: course 100 or consent of instructor. Survey of the major classical and neoclassical treatises on rhetoric. Analysis of the theories of Plato, Aristotle, Cicero, Quintilian, St. Augustine, Blair, Whately, Campbell, and other leading works in the theory of rhetoric.

147. Mass Communication and Social Systems. Prerequisite: course 100 or consent of instructor. Comparative analysis of major theories about relationships between mass media and social systems from the interpersonal to the international level; emphasis on empirical research. Ms. Meehan

150. Analysis of Communication Content. Prerequisite: course 100 or consent of instructor. Study of methodologies for the qualitative and quantitative analysis of the content of communications.
Ms. French

152. Analysis of Communication Effects. Prerequisite: course 100 or consent of instructor. Survey of experimental and field research on the effects of communications. Study of source, message, and environmental factors affecting audience response.
Ms. Greenfield, Mr. Malamuth

153. The Media and Aggression Against Women. Lecture, two hours; discussion, two hours. Prerequisite: course 152 or consent of instructor. Study of the growing body of literature on the relationship between the mass media and aggression against women. Consideration of both the role of the media as reflecting cultural values and scripts and its potentially powerful role as a socializing agent of the culture. Analysis of research on the role of individual differences among members of a culture as mediators of the impact of the media. Mr. Malamuth

155. Communication Technology and Public Policy. Prerequisite: course 10. An introduction to modern communication technology and policy, with special attention to current policy issues, the institutions which make policy decisions, and the social, economic, and technological trends which create policy problems. Modern communication technologies surveyed include cable television, teletext, viewdata, and satellite, microwave cellular, and subcarrier communication. Mr. Case, Mr. Cole

160. Political Communication. Prerequisites: courses 100 and 101, or consent of instructor. Study of the nature and function of communication in the political sphere; analysis of contemporary and historical communications within established political institutions; state papers; deliberative discourses; electoral campaigns. Ms. Meehan

165. Agitational Communication. Prerequisites: courses 100 and 101, or consent of instructor. Theory of agitation; agitation as a force for change in existing institutions and policies in a democratic society. Intensive study of selected agitational movements and the technique and content of their communications.

170. Legal Communication. Prerequisites: courses 100 and 101, or consent of instructor. Study of the trial and appellate processes as systems of communication. Analysis of the elements of the juridical process as they affect the quality of communication content. Study of the rules of evidence, jury behavior, and the structure of legal discourse. Mr. Rosenthal

171. Seminar in the Theories of Freedom of Speech and Press. Prerequisites: course 101, consent of instructor. An exploration of the relationship between the freedoms of speech and press and values of liberty, self-realization, self-government, truth, dignity, respect, justice, equality, association, and community. Study of the significance of these values examined in connection with issues such as obscenity, defamation, access to the media, and the control of commercial, corporate, and government speech. Mr. Shiffrin

175. Criticism and the Public Arts. Prerequisite: course 10 or consent of instructor. An introduction to methods and problems of criticism in the public arts. Study of several types of critical methods: formalistic, analogue, pragmatic, and aesthetic criticism. Topics include the definition of art and criticism, the aesthetic media, genre and resources of film, television, theater, and public discourse, the varieties of critical method, the problems of critical judgment.

185. Field Studies in Communication (2 to 4 units). (Formerly numbered 199F.) Discussion, two hours; fieldwork, seven to 14 hours (depending on unit value). Prerequisites: senior standing in communication studies, consent of instructor. Fieldwork in communication. Students participate in two-hour seminar sessions and spend seven hours in approved community settings each week for each two units of credit. May be taken for a maximum of six units. P/NP grading. Ms. Gregory

187. Ethical and Policy Issues in the Institutions of Mass Communication. Prerequisites: courses 10, 101. An intensive examination of the ethical and policy issues arising from the interaction of media institutions (print, film, broadcasting, and the new technologies) and societal institutions (Congress, federal agencies, courts, the Presidency, schools, churches, political action groups, advertisers, and audiences). Mr. Cole

197. Undergraduate Honors Proseminar. Prerequisites: senior standing, 3.5 GPA in communication studies major, 3.3 GPA overall. Limited enrollment. Variable topics course involving specialized study of selected aspects of the field of human communication.

199. Special Studies (2 to 8 units). To be arranged with faculty member who will direct the study. Prerequisites: senior standing, consent of instructor. Independent study for seniors who desire an intensive or specialized investigation of selected research topics.

199H. Special Studies for Honors Candidates (2 to 8 units). To be arranged with faculty member who will direct the study. Prerequisites: senior and honors program standing. Independent study for honors undergraduates who desire an intensive or specialized investigation of selected research topics.

Comparative Literature
(Interdepartmental)

334D Royce Hall, (213) 825-7650

Professors

Michael J. B. Allen, Ph.D. *(English)*
Arnold J. Band, Ph.D. *(Hebrew and Comparative Literature)*
A. R. Braunmuller, Ph.D. *(English)*
Daniel G. Calder, Ph.D. *(English)*
Margherita Cottino-Jones, Ph.D. *(Italian)*
Hassan el Nouty, Docteur ès Lettres *(French)*
Eric Gans, Ph.D. *(French)*
Peter Haidu, Ph.D. *(French)*
Carroll B. Johnson, Ph.D. *(Spanish)*
Henry A. Kelly, Ph.D. *(English)*

Kathleen L. Komar, Ph.D. *(German and Comparative Literature)*
Robert M. Maniquis, Ph.D. *(English)*

Assistant Professor

Lucia Re, Ph.D. *(Italian and Comparative Literature)*

Visiting Professor

Hans Robert Jauss, Ph.D.

Scope and Objectives

Standing at the forefront of innovative literary analysis and criticism, comparative literature is one of the most exciting fields in the humanities. As a discipline it requires exceptional linguistic ability and high intellectual caliber. UCLA's graduate interdepartmental program offers students the opportunity to work with faculty in any of the University's language and literature departments as well as with the Comparative Literature Program faculty.

Comparative literature at UCLA focuses on those elements which define literature in general, such as genre, period, theme, language, and theory. Courses are designed to provide students with a historical understanding of the concepts of genre and period by studying specific genres and periods or literary movements. Paradigmatic or thematic courses offer another way of examining literature synchronically or diachronically regardless of language boundaries.

Courses in literary criticism and theory inquire into the premises of specific critical approaches, and of criticism itself, in order to provide further insight into the intellectual and moral concerns of literature and the world it reflects. Thus, through the study of these various assumptions and aspects of literature and criticism, students learn not only to cross linguistic boundaries, but to join them — to compare and to contrast, to analyze and, finally, to synthesize the text and the subtext, the structure and the history which define, undermine, and transcend the text and its reader.

Master of Arts Degree

Admission

A bachelor's degree in literature, ancient or modern, is a prerequisite for admission to the program. Students not having a literature major in their B.A. program are required to demonstrate the equivalent knowledge and comprehension of one literature before being considered a graduate student in good standing. Applicants are expected to have at least a 3.4 grade-point average in upper division literature courses, take the Graduate Record Examination (GRE), and submit three letters of recommendation to the Comparative Literature Program (334D Royce Hall, UCLA, Los Angeles, CA 90024). Applicants should have literary proficiency in one foreign language and at least an elementary knowledge of a second.

Areas of Study

Your study plan should combine work in the major and minor literatures by focusing on a limited area in which these literatures may be explored. The area may be a literary period (e.g., Romanticism), a genre (e.g., the novel), or a theoretical problem.

The major literature is the area of your primary concentration. You specialize in one historically defined period (e.g., medieval, Renaissance, and baroque, neoclassicism and 18th century, Romanticism to modern), but a general knowledge of the major literature is a prerequisite for the specialization.

In the minor literature, you focus on a period comparable to the area of specialization in the major literature, although you may not have as much historical depth and breadth as in the major literature.

Foreign Language Requirement

Literary proficiency in the major and minor literatures is an essential prerequisite for courses and degrees in comparative literature. You should be able to take graduate classes conducted in the languages of your specialization, speak the major foreign language adequately, and read literary texts in that language with "literary proficiency" (i.e., with sensitivity to stylistic nuances).

Before completing the M.A., you must demonstrate a knowledge of two foreign languages. Proficiency in one must be certified by completing two or more upper division and/or graduate literature courses in the appropriate language department. (You must prove more than elementary language competency in order to take these courses.) The second language requirement may be satisfied either by completing two years of language classes, by taking one upper division literature class, or by passing the Educational Testing Service (ETS) foreign language examination with a score of 600 or better. Translation examinations may be administered by departmental members in languages for which no ETS examination is available.

Course Requirements

The following 12 courses are the minimum course requirements. Some students will take extra courses to make up deficiencies.

(1) Four comparative literature courses, including Comparative Literature 200 and one course in literary theory such as 201, 202, 203, or 204; the comparative study of one genre (e.g., the novel, the epic, the lyric, the drama); the comparative study of one period or movement (e.g., baroque, Romanticism).

(2) Five courses (three must be graduate, two may be upper division) in your major literature.

(3) Three courses, either graduate or upper division, in your minor literature. You should study periods, genres, or problems in the minor literature which lend themselves to comparison with similar elements in your major literature.

Of the above required courses, eight units at most may be in the 500 series. Course 596 or 597 may be applied toward the minimum course requirement and the graduate course requirement.

Comprehensive Examination Plan

The examination for the M.A. is both written and oral, testing both historical knowledge and comprehension of methodology. There are three possible results of the examination: you may receive an M.A. degree and be allowed to progress toward the Ph.D., be granted a terminal M.A., or fail the examination altogether. The program allows a maximum of two attempts to pass the M.A. examinations.

The written examinations test your skill in literary analysis and detailed knowledge of specified works in the major and minor literatures. The examinations are based on reading lists from the works of at least 15 authors in the major literature and the works of at least 10 authors in the minor literature. Normally, the reading list consists of approximately 24 to 30 works in the major literature and 12 to 15 works in the minor literature. For more details on the reading list, contact the program office.

Ph.D. Degree

Admission

For entrance into the Ph.D. program, an M.A. degree in Comparative Literature is normally required. Students with an M.A. degree in one national literature, extensive knowledge of a second, and the ability to read literary texts in a third language may be considered for admission. Applicants should submit three letters of recommendation. Students entering with any degree other than an M.A. in Comparative Literature from UCLA are required to pass a "permission to proceed" examination before being allowed to continue toward the Ph.D. It should be taken within your first year in residence.

Major Fields or Subdisciplines

The study plan for the Ph.D. should combine work in the major and two minor literatures by focusing on a limited area in which these literatures may be explored. This area may be a literary period or a particular aspect common to several literatures (e.g., a genre like tragedy or the novel, or a phenomenon like neoclassicism or the baroque). It may also be a critical or theoretical problem, involving analyses of styles or modes of interpretation; comparisons of classical and modern genres and themes; questions about the artistic process in different art forms; or problems in literary aesthetics or epistemology.

Foreign Language Requirement

You must have literary proficiency in at least two foreign languages before taking the qualifying examination. A reading knowledge of a third foreign language is strongly recommended. Two of the three languages offered for the Ph.D. must be from different language groups (e.g., Romance and Germanic, English and Slavic). If you intend to offer three literatures written in foreign languages for your Ph.D. degree, you are expected to have literary proficiency in the three pertinent foreign languages. A classical language is usually necessary for anyone majoring in a period prior to the 19th century. The language requirements for the Ph.D. are to be fulfilled in the same way as those for the M.A. degree.

Course Requirements

All students entering with an M.A. must take a minimum of six graduate courses, and often up to 12 courses. Those whose M.A. is not in Comparative Literature at UCLA will have to take three of the required six courses in comparative literature and one from each of the major and minor literatures. Other relevant or necessary courses are determined in consultation with a graduate adviser. None of the minimum required courses may be in the 500 series. Although only six courses are required, you are strongly advised to take at least two and usually three courses in each of your literatures.

If you have taken your M.A. in Comparative Literature at UCLA, two of the required graduate courses should be comparative literature courses and one of the two should have a theoretical orientation (such as Comparative Literature 202, 203, 204). Three courses in the second minor are normally recommended.

Teaching Experience

Teaching experience is not required but is highly recommended.

Qualifying Examinations

The examinations are both written and oral and may be taken over a period of two to three quarters. The written examinations are based on reading lists for the major and two minor literatures.

For the major literature, you may select one of the following examination formats:

(1) A written examination divided into two parts, each based on a reading list of at least 25 to 30 items and three to four hours in length. The first part evaluates your broad historical knowledge of the major field; the second part tests specific knowledge of your particular period or critical problem.

(2) A written examination and a prospectus (25 to 30 pages) to be discussed during the University Oral Qualifying Examination. The written examination evaluates your broad historical knowledge of the major field and is based on a reading list of 25 to 30 items. The prospectus must be submitted at least two weeks before the oral qualifying examination and should identify the proposed dissertation topic, give an example of the problem and method of the dissertation, outline the dissertation as a whole, and present a bibliography of relevant material.

If you select the second format, you must pass three courses given by your major department in your period or area of specialization before you can take the oral qualifying examination. Coursework taken for the M.A. degree may not be applied.

A three- to four-hour written examination is taken in each of the minor literatures. These examinations are based on approved reading lists of 25 to 30 items.

The University Oral Qualifying Examination must be taken within 60 days after you pass the last written examination and covers three areas:

(1) Competence as determined by the reading lists and the written examinations.

(2) Both a familiarity with major critical texts pertaining to the reading lists and competence in general literary theory.

(3) The proposed dissertation topic. If you select the first format for your major literature written examination, this section of the oral examination is a minor part and focuses on a brief dissertation prospectus of six to 10 pages. If you select the second format, this section of the oral examination is a major part and focuses on the dissertation prospectus (25 to 30 pages) prepared as part of the written examination.

The program allows a maximum of two attempts to pass the Ph.D. examinations.

The doctoral dissertation must demonstrate original critical work in the field. Although a topic comparing literatures is commonly undertaken, comparative literature students may write a dissertation on a single subject in a single field provided that their wide range of knowledge is demonstrated by the quality of the work.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Graduate Courses

200. The Methodology of Comparative Literature (6 units). Seminar, four hours. Prerequisite: consent of instructor. A study of the methodology of comparative literature and the theory of literature.

201. Contemporary Theories of Criticism. Prerequisite: course 200 or equivalent. An advanced course in the theory of literature focusing on structuralist, psychoanalytic, and Marxist approaches.

202. Problems in the Theory of Literature. Prerequisites: reading knowledge of French or German, course 201 or equivalent. A study of specific topics in the theory of literature for advanced students in criticism and literary theory. May be repeated for credit.

203. Problems of the Sign in Literature. An inquiry into the theoretical bases and implications of the sign as metaphysical, logical, and grammatical categories. Many texts central to Western thinking dwell on the sign as a concept-tool in order to focus on the relationship between words and things, language and reality, the linguistic medium in its meaning-producing functions. Excerpts from Plato, Aristotle, Augustine, Locke, Vico, and Hegel lead to a discussion of the "sciences" envisioned by Saussure (semiology) and Peirce (semiotics) and propounded by contemporary theorists such as Barthes, Hjelmslev, and Greimas. Ms. Kao

204. Psychoanalytic Approaches to Literature. Prerequisite: course 200 or the equivalent criticism course in English. A study of the development of modern psychoanalytic approaches to literature, with particular stress on affective theories of criticism. Readings include Freud and the early psychoanalytic critics, contemporary psychoanalytic critics of literature, and modern British and American psychoanalytic theorists (Winnicott, Schafer) whose work is applicable to literary theory. Mr. Hutter

C205. The Comic Spirit. Prerequisite: reading knowledge of one appropriate foreign language. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate the varieties of comic expression. May be concurrently scheduled with Humanities C105. Graduate students are required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week. Mr. Band

206. Reception Theory and Literary Hermeneutics. The major premises of reception theory and literary hermeneutics presented and analyzed in a seminar by one of the foremost proponents in the field. Students read some of the professor's major published texts as well as parts of works in progress and discuss them within the context of modern literary theory. Seminar paper required. Mr. Jauss

C207. The Classical Tradition: Epic. Seminar, three hours. Prerequisite: reading knowledge of Greek, Latin, or Italian. Analysis of the *Iliad,* the *Odyssey,* the *Aeneid,* the *Gerusalemme Liberata,* and *Paradise Lost* both in relation to their contemporary societies and to the literary traditions. Emphasis on how poets build on the work of their predecessors. May be concurrently scheduled with Humanities C107. Graduate students are required to prepare papers based on texts read in the original languages and may meet as a group one additional hour each week. Ms. King

C209. The Crisis of Consciousness in Modern Literature. Prerequisite: reading knowledge of one appropriate foreign language. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on the works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with Humanities C109. Graduate students are required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week. Ms. Komar

C211. The Classical Tradition: Tragedy. Seminar, three hours. Prerequisite: knowledge of one appropriate foreign language, usually Greek or French. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in the modern period. May be concurrently scheduled with Humanities C111. Graduate students are required to prepare papers based on texts read in the original languages and may meet as a group one additional hour each week. Ms. King

C229. Archetypal Heroes in Literature. Lecture, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Survey and analysis of the function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. Concurrently scheduled with Humanities C129. Graduate students are required to prepare papers based on texts read in the original language and to meet as a group one additional hour each week. Ms. King

230. Translation Workshop. Prerequisites: solid reading knowledge of at least one foreign language, consent of instructor. Open to qualified undergraduates with proper language preparation. The theory and practice of literary translation. Analyses of significant theoretical contributions to the field. Weekly exercises in translation technique with genres, periods, and authors at the discretion of the participants. Mr. Heim

C239. Early Medieval Literature. Prerequisite: reading knowledge of one appropriate foreign language. A survey of the Latin and Germanic literatures from the fall of Rome to the beginning of the 12th century. May be concurrently scheduled with Humanities C139. Graduate students are required to write papers based on texts read in the original languages and may meet as a group one additional hour each week. Mr. Calder

C240. Medieval Epics. Prerequisite: reading knowledge of one appropriate foreign language. Consideration of five medieval epics *(Beowulf, El Cid, Chanson de Roland, Nibelungenlied,* and *Njalssaga),* with two objectives: first, a critical understanding of each work, and second, an understanding of the nature of epic literature. Assignments consist of an extended seminar paper and short oral reports. May be concurrently scheduled with Humanities C140. Graduate students are required to prepare papers based on texts read in the original languages. Mr. Condren

C241. The Literary Mediation of History in the Renaissance. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. An analysis of the presence and the treatment of history in the rhetoric of Renaissance authors ranging from the Italian humanists to Machiavelli and Shakespeare. Other authors include Poliziano and Lorenzo de' Medici. May be concurrently scheduled with Humanities C141. Graduate students are required to prepare papers based on texts read in the original languages and may meet as a group one additional hour each week. Ms. Re

C245. Renaissance Drama. Prerequisite: reading knowledge of one appropriate foreign language. A broad introduction to the subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with Humanities C145. Graduate students are required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week. Mr. Braunmuller

C265. The French Revolution and European Literature. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Part of the UCLA French Revolution Bicentennial Program. A course in cultural criticism using plays, poetry, popular tracts, etc., to explore the context and connections of the French Revolution to European culture. Authors range from Voltaire and Rousseau to Tom Paine, Coleridge, Wordsworth, Goethe, and Kant. Concurrently scheduled with Humanities C165. Graduate students are required to prepare papers based on texts read in the original languages and may meet as a group one additional hour each week. Mr. Maniquis

C268. Romantic Autobiography. Discussion, three hours. The evolution of the autobiography from spiritual (Augustine) and secular (Cellini) sources to the transition in the 18th century which blended features of the epic poem and the quest-romance. Wordsworth's *Prelude* came to represent the best example of this mixture. Major examples of the Romantic autobiography to be studied include Rousseau's *Confessions,* Wordsworth's *Prelude,* and Goethe's *Wilhelm Meister's Apprenticeship.* Later novels that develop and extend the genre include Joyce's *Portrait of the Artist as a Young Man* and Proust's *Swann's Way.* May be concurrently scheduled with Humanities C168. Ms. Packer

C270. The Dream in English and German Romantic Literature. Lecture, three hours; discussion, one hour. Prerequisite: reading knowledge of one appropriate foreign language. A study of the use of the dream as a standard narrative technique in English and German Romantic literature. May be concurrently scheduled with Humanities C170. Graduate students may be required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week. Mr. Burwick

C271. Dramatic Theory and Criticism in German and English Romanticism. (Formerly numbered 271.) Seminar, three hours. Prerequisite: reading knowledge of German. The generic conception of drama in the critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on the role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with Humanities C171. Mr. Burwick

C272. The Grotesque in Romantic Literature and Art. Prerequisite: reading knowledge of one appropriate foreign language. A study of the grotesque in the visual and verbal arts of the Romantic period; the aesthetics of tragic-comic interaction, the demonic vision, and the satirical sketches of man's abnormality and perversity. May be concurrently scheduled with Humanities C172. Graduate students are required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week. Mr. Burwick

C273. Theory and Texts of the Fantastic. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. An attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffman, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with Humanities C173. Graduate students are required to prepare papers based on texts read in the original languages and may meet as a group one additional hour each week. Ms. Re

274. The Search for Organic Forms. Prerequisite: reading knowledge of French or German. A seminar devoted to theories of the "organic" in the 18th and 19th centuries, with special emphasis on Rousseau and Goethe. Studies of the transition made between theories of nature and theories of state.
Mr. Maniquis

C275. The 19th-Century Novel. Seminar, three hours. Prerequisite: reading knowledge of French or German. A comparative study of the 19th-century novel in England and on the continent. Novels are selected so as to allow the seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with Humanities C175.
Mr. Lehan

C276. Fiction and History. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Analysis of the use of historical events, situations, and characters in literary works of the Renaissance and/or the modern period. Texts and individual assignments range from Renaissance historical narratives (the Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendahl, Verga, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence the authors' choice and use of historical material. May be concurrently scheduled with Humanities C176. Graduate students are required to prepare papers based on texts read in the original languages. Mr. Pasinetti, Ms. Re

C278. Darwinism and Literature. Seminar, three hours. Prerequisites: graduate standing or consent of instructor, reading knowledge of one appropriate foreign language. The impact of Darwin's theories on European and American literature. While texts include major works in the development of naturalism, such as novels by Zola, Hardy, Crane, or Dreiser and plays by Strindberg and Ibsen, the course moves forward into the continuing influence of other "determinist" and behaviorally oriented theories in works by authors such as Mann, Sartre, Camus, Stevens, and Skinner. May be concurrently scheduled with Humanities C178. Graduate students are required to prepare papers based on texts read in the original languages and may meet as a group one additional hour each week. Mr. Shideler

C280. The Symbolist Tradition in Poetry. Prerequisite: reading knowledge of either French or German. A study of the symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with Humanities C180. Graduate students are required to prepare papers based on texts read in the original languages and may meet as a group one additional hour each week.
Mr. Shideler

C281. Poetry and Poetics of the Post-Symbolist Period. Prerequisite: reading knowledge of French or German. A study of some of the dominant poetic trends and figures in American and European poetry in the first half of the 20th century, including such surrealists as Apollinaire and Breton, imagists, and major individual poets such as Pound, Eliot, Valery, Rilke, George, and Stevens. May be concurrently scheduled with Humanities C181. Graduate students are required to prepare papers based on texts read in the original languages and may meet as a group one additional hour each week.
Ms. Komar, Mr. Shideler

C283. Novel, Crime, Ritual. Discussion, three hours. Prerequisite: reading knowledge of one appropriate foreign language. An investigation of a range of novels dealing with ritual and crime and their relation to the novel form. Readings include such texts as de Ayala's *Belarmino and Apolonio,* Singer's *The Magician of Lublin,* selected stories from Babel's *Red Cavalry,* a Dickens' novel, and Laclos' *Liasions Dangereuses.* Concurrently scheduled with Humanities C183. Graduate students are required to prepare papers based on texts read in the original language.
Mr. Baumgarten

C284. The Alternate Tradition: In Search of a Female Voice in Contemporary Literature. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with Humanities C184. Graduate students are required to prepare papers based on texts read in the original languages whenever possible. Ms. King, Ms. Komar

C285. The Modern Continental Novel. Lecture, three hours. Prerequisite: reading knowledge of at least one appropriate foreign language. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass are used to focus on the development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with Humanities C185. Graduate students are required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week. Mr. Lehan

292. The Psychological Novel. Prerequisites: major in literature, reading knowledge of French. A comparative study of French and English novels which both precede and follow the development of psychoanalysis. Selected readings of Freud, in addition to the required fiction. Mr. Hutter

C297. The Mystery Novel. Prerequisite: reading knowledge of French. A study of mystery and detective fiction in England, France, and the United States. Development of the origin, form, and historical significance of mystery fiction through close readings of selected works. May be concurrently scheduled with Humanities C117. Graduate students are required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week. Mr. Hutter

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Preparation for the Teaching of Literature and Composition. Lecture, three hours. Seminar on problems and methods of presenting literary texts as exemplary materials in the teaching of composition. Deals with theory and classroom practice and involves individual counseling and faculty evaluation of TAs' performance. May not be applied toward the M.A. course requirements. S/U grading.

596. Directed Individual Study or Research (2 to 12 units). Prerequisite: graduate standing in comparative literature. Necessary for students in comparative literature who need additional individual study and research. May be repeated for credit. S/U grading.

596X. Directed Individual Study (2 to 4 units). Preparation for foreign language examination. S/U grading.

597. Preparation for M.A. and Ph.D. Examinations (2 to 12 units). Prerequisite: graduate standing. Preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be repeated for credit. S/U grading.

599. Research for Ph.D. Dissertation (2 to 12 units). Prerequisite: doctoral standing. Research for and preparation of Ph.D. dissertation. May be repeated for credit. S/U grading.

Associate Professor

Peter M. Narins, Ph.D. *(Biology)*

Assistant Professor

Elliot M. Landaw, M.D., Ph.D. *(Biomathematics)*

Scope and Objectives

The major in cybernetics is designed primarily for highly motivated undergraduates interested in interdisciplinary activities in life sciences, behavioral sciences, and engineering and computer sciences. Preparation for the major consists of a broad foundation in basic sciences — chemistry, biology, physics, and mathematics, plus introduction to psychology and computing. The major itself provides an introduction to modeling, information processing, control and system analysis, with emphasis on quantitative ideas and methodologies. Mathematical and other analytical skills are essential in the major.

Cybernetics majors have three options for in-depth studies: life sciences, behavioral sciences, or engineering and applied mathematical sciences. The major is appropriate preparation for employment or for graduate studies in any of these areas, with emphasis on interdisciplinary activities. It is also appropriate preparation for professional school studies in medicine, public health, management, dentistry, and engineering.

Bachelor of Science Degree

Pre-Cybernetics Major

You may apply for the pre-cybernetics major via petition if you are a sophomore and have taken at least three of the premajor mathematics courses with a 2.7 GPA or better and three

other premajor courses. Together, all preparation for the major courses, including mathematics, must be completed with at least a 3.0 GPA. Transfer students must meet the same academic requirements, based on all courses transferred from another institution which satisfy premajor requirements.

Preparation for the Major

Required: A minimum of 72 units (18 full courses), including Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23; Biology 5, 7; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 6A, 6B, and 6C, or 8A, 8B, and 8C; Psychology 10; Program in Computing 10A. Additional recommended course lists are available in the program office and/or the College Counseling Service in the College of Letters and Science.

The Major

Admission to the major is by petition only and is based on successful completion of all preparation for the major courses and requirements (2.7 GPA in mathematics, 3.0 GPA overall, and a minimum grade of C in all courses).

The major consists of a methodology core (five and one-half courses), a specialization area (seven courses), and a cybernetics breadth requirement (three courses). Each course in the major must be completed with a grade of C or better.

Methodology Core: Four subject areas as follows:

(1) One overview course: Computer Science 196A.

(2) Two courses in probability and statistics from one of the following groups: (a) Mathematics 152A and 152B, or (b) Mathematics 150A or Electrical Engineering 131A and either Mathematics 150B or 152B, or (c) Public Health 101A and 101B.

(3) Two courses in signals and control systems (one from each group): (a) Computer Science 170 or Electrical Engineering 102 and (b) Electrical Engineering 141 or Mechanical, Aerospace, and Nuclear Engineering 171A.

(4) One course in modeling and computer simulation: Computer Science M196B.

Applications/Specialization Areas: A minimum of seven courses in either life sciences, behavioral sciences, or engineering and applied mathematics. A continually updated and approved list of courses in each specialization area is available in the program office and the College Counseling Service.

With few exceptions, courses in the life sciences area are in biology, microbiology, chemistry, and biochemistry, as well as in departments of the School of Medicine. Courses in the behavioral sciences area are in psychology, linguistics, and economics. And courses in the engineering and applied mathematics area are in engineering, computer science, and mathematics.

Cybernetics Breadth Requirement: One course from each of the applications/specialization areas selected from the current approved list.

Specialization in Computing

You may select this area as an option in the existing applications/specialization areas. Program in Computing 10B, 10C, 30, and Computer Science 141 are required, in addition to six courses selected from an approved list. You will graduate with a bachelor's degree in cybernetics and a specialization in computing.

Honors Program

Junior and senior majors who have completed all preparation for the major courses and have an overall grade-point average of 3.0 or better and a 3.5 or better in required major courses may apply for admission to the honors program, in which honors-designated sections of selected courses are required. Students pursuing highest honors must, in addition, complete a senior thesis based on an approved research topic. Those who successfully complete the program (3.0 GPA or better overall, 3.5 or better in major coursework, and a grade of B or better in required honors courses) are awarded a degree with honors. At the discretion of the faculty sponsor and the Interdepartmental Committee, students demonstrating exceptional ability on the senior research thesis are awarded highest honors.

Upper Division Course

195H. Honors Thesis. Limited to cybernetics honors majors. Honors thesis preparation and submission, under the direction of a faculty sponsor on the Cybernetics Interdepartmental Committee. P/NP grading.

Diversified Liberal Arts (Interdepartmental)

A316 Murphy Hall, (213) 825-1965

Undergraduate Certificate Program

The Diversified Liberal Arts Program (DLAP) is not a major, but a special certificate program through which you may receive credit toward a credential to teach in California elementary schools. To earn the credential, you must complete the Teacher Credential Program in the Graduate School of Education. In addition, you must either earn a satisfactory score on the Commons Section of the National Teachers Examination or complete the DLAP in the College of Letters and Science.

To earn the certificate in diversified liberal arts, you must complete a major in the College of Letters and Science. You must also complete DLAP requirements in four areas: (1) English, (2) mathematics and the physical and/or life sciences, (3) social sciences, (4) humanities, fine arts, and foreign language.

Requirements for one of these areas will normally be satisfied by courses taken for your major; in addition, you must complete seven courses (28 units) in each of two other areas and eight courses (32 units) in a fourth area. A grade of C or better must be earned in all courses specifically required for the program (i.e., English 120A, Mathematics 38A, 38B, 104, History 7A, 7B). A C – or a Passed grade is not acceptable in these courses. A minimum C (2.0) grade-point average is required in each of the four areas.

Courses in divisions outside the major, which are required as preparation for or as part of the major, may be applied toward the area course requirements. However, no course may be applied toward more than one area. You are expected to satisfy the general education requirements of the College of Letters and Science; courses used to satisfy these requirements may also be applied toward the Diversified Liberal Arts Program.

If you plan to pursue the program, you should begin to take courses in your freshman year that will fulfill these requirements. You must petition for admission to the program and are advised to do so as soon as possible. Transfer students may petition to have suitable courses completed at other institutions applied toward the course requirements of this program. The college will certify completion of the program.

If you do not complete the program prior to graduation, you must petition out of the program to be eligible to graduate.

For further information about the program, contact a counselor in the College of Letters and Science Counseling Service, A316 Murphy Hall (825-3382). For information regarding the Teacher Credential Program in the Graduate School of Education, see a counselor in 201 Moore Hall (825-8326).

Area 1. English

Composition and Grammar (Required): Two courses: English 120A plus one course in satisfaction of the English Composition requirement. If you wish to complete the Area 1 requirements with additional composition and grammar, the courses must be selected from English 130, Linguistics 1, 100.

Literature (Required): One course from English 10A, 10B, 10C, 70, 75, 80, 85, 90, 112, 113, Humanities 1A, 1B, 1C, or any other upper division courses in English literature for which you have satisfied the prerequisites. You may complete more than one course from this list to satisfy the Area 1 course requirement.

Speech (Required): One course from Communication Studies 10, 100, Speech 1, 2, 107. You may complete more than one course from this list to fulfill the Area 1 course requirement.

Area 2. Mathematics and the Physical or Life Sciences

Mathematics (Required): Mathematics 38A, 38B, 104. Substitutions of other courses in mathematics may be made with the written consent of the College of Letters and Science.

Physical or Life Sciences (Required): A minimum of 12 units in physical sciences and/or life sciences, apart from mathematics.

The remaining courses for Area 2 may be selected from any courses in the physical or life sciences that satisfy the general education requirements (mathematics courses may be included).

Area 3. Social Sciences

History (Required): One course from History 7A, 7B. Other courses which may satisfy the Area 3 requirement are those listed as fulfilling the social science general education requirements.

Area 4. Humanities, Fine Arts, and Foreign Language

Although there are no specific course requirements, courses applied toward this area must be selected from those courses listed as fulfilling the humanities general education requirements. The following may also be applied toward Area 4: any courses in foreign language; Dance 1A, 1B, 1C; English 4, 30; Music 1A, 1B, 113A, 113B; Theater 118A, 118B, 119A.

Takeo Susuki, D.Sc. *(Geology)*

Scope and Objectives

The disciplines of geology, geochemistry, and geophysics are concerned with the structure and evolution of the solar system, the earth, and life: essentially, the physical environment and its interaction with biota. These studies entail the application of fundamental physics and chemistry to a broad subject area stretching from astronomy at one extreme to biology at the other. Areas which are emphasized at UCLA include isotope and trace element analyses, petrology and mineralogy, sedimentology, paleobiology and organic geochemistry, structural geology and tectonophysics, the earth's interior, planetary physics, space plasmas, and economic geology.

The variety of techniques applied lead to several specializations within the three main disciplines. Students completing their studies with a B.S. or M.S. degree usually are employed by industry. The greatest number go to oil companies, but many are also employed in other types of mineral exploitation, construction, and environment-related activities.

Bachelor of Science in Geology

Engineering Geology Specialty

Preparation for the Major: Earth and Space Sciences 1 or 1H, 51A, 51B, 51C, 61; Biology 2; Chemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A, 33A; Physics 8A, 8B/8BL, 8C/8CL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C–.

The Major: Earth and Space Sciences 103A, 103B, 111, 112, 121A-121B, 135, M139; Civil Engineering 108, 184A, 185A, 185B, 185L; one course from Earth and Space Sciences 136C, 137, 141, 150, Geography 100, Civil Engineering 184B, 184D.

Geochemistry Specialty

Preparation for the Major: Earth and Space Sciences 1 or 1H, 51A, 51B, 51C, 61; Biology 2; Chemistry 11A, 11B/11BL, 11C/11CL, 21; Mathematics 31A, 31B, 32A, 33A (32B, 33B recommended); Physics 8A, 8B/8BL, 8C/8CL (8D recommended); Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C–.

The Major: Earth and Space Sciences 103A, 103B, 111, 130, 131; Chemistry 110A, 110B, 114 (or Chemistry 23 and 25 or 184 or Earth and Space Sciences 132); three courses from Chemistry 23, Earth and Space Sciences 112, 119, 121A-121B, 128A, 128B; two earth and space sciences or chemistry courses with consent of adviser.

Geology Specialty

Preparation for the Major: Earth and Space Sciences 1 or 1H, 2, 51A, 51B, 51C, 61; Biology 2; Chemistry 11A, 11B/11BL, 11C; Mathematics 31A, 31B, 32A; Physics 8A, 8B/8BL, and 8C/8CL or 6B; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C–.

The Major: Earth and Space Sciences 103A, 103B, 103C, 111, 112, 115, 121A-121B, 135, and four additional courses from 114, 119, 122, 128A, 128B, 130, 131, 132, 133, 136C, 137, M139, 141, 144, 150.

Nonrenewable Natural Resources Specialty

Preparation for the Major: Earth and Space Sciences 1 or 1H, 2, 51A, 51B, 51C, 61; Biology 2; Chemistry 11A, 11B/11BL, 11C; Mathematics 31A, 31B, 32A; Physics 8A, 8B/8BL, and 8C/8CL or 6B; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C–.

The Major: Earth and Space Sciences 103A, 103B, 103C, 111, 112, 121A-121B, 128A or 128B, 135, 136C, 137, and two additional courses from 128A or 128B, 138, M139, 141, 150.

Paleobiology Specialty

Preparation for the Major: Earth and Space Sciences 1 or 1H, 2, 51A, 51B, 51C, 61; Biology 5, 5L, 6; Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23; Mathematics 31A, 31B, and 32A, or 3A, 3B, and 32A; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C–.

The Major: Earth and Space Sciences 103A, 103B, 111, 112, 115, 132; seven courses from Chemistry 25, Public Health 101A, 101B, Biology 100, 101, 102, 103, 105, 110, 111, 117, 120, 122, 123, 164, 165, Earth and Space Sciences M118, 119, 121A, 121B, 133, 141, 144.

Bachelor of Science in Geophysics

Applied Geophysics Specialty

Preparation for the Major: Earth and Space Sciences 1 or 1H, 51A, 51B, 51C, 61; Chemistry 11A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C−.

The Major: Earth and Space Sciences 111, 112, 122, 136A, 136B, 136C; Physics 105A, 105B, 110A, 110B, 114; three courses from Earth and Space Sciences 101, 103A, 103B, 131, 137, M139, M154, 205, 265, Mathematics 140A, 140B, 140C, 152A, 152B, Physics 112, 115A, 116, 131, 132, or other courses with consent of adviser.

Geophysics and Space Physics Specialty

Preparation for the Major: Earth and Space Sciences 1 or 1H, 9; Chemistry 11A, 11B/11BL, 11C; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C−.

The Major: Earth and Space Sciences 122, M140, M154; Physics 105A, 105B, 110A, 110B, 112; Physics 131 or Mathematics 145; three courses from Earth and Space Sciences 101, 119, 131, 136A, 136B, 150, 205, 233, Atmospheric Sciences 200B, one of Mathematics 140A, 140B, or 140C; three science electives with consent of adviser.

Students planning to do graduate work in specialized careers in earth science should, when possible, take appropriate courses in departments outside the major in addition to those already specified. Suggested graduate programs for various fields of emphasis are available in the Student Affairs Office, 3683 Geology, and provide guidelines in selecting upper division courses.

Qualified undergraduate students may, with consent of their advisers and the instructor, take Earth and Space Sciences graduate courses numbered from 200A through 250.

Honors in Geology or Geophysics

The honors program in geology or geophysics is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a member of the faculty. Requirements for admission to candidacy are the same as those required for admission to the Honors Program of the College of Letters and Science. Qualified students wishing to enter the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geology or geophysics are awarded at graduation to those students who have a cumulative GPA of 3.5, who have completed at least 90 graded units at the University of California, and who have completed a minimum of two quarters (eight units) of Earth and Space Sciences 199H leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

Graduate Study

Admission

Application may be made for admission to any quarter. Graduate Record Examination (GRE) scores are required; the examination should be taken at least six weeks before the deadline. Also required are three letters of recommendation which should be sent to the Graduate Adviser, Department of Earth and Space Sciences, 3683 Geology, UCLA, Los Angeles, CA 90024. Application forms and a brochure giving information about the department may be obtained from the graduate adviser. Students who wish to apply for fellowships or teaching assistantships should be aware that these are allocated in February for the following academic year; completed applications should be received by January.

Major Fields and Subdisciplines

The Department of Earth and Space Sciences offers programs leading to the M.S. and Ph.D. degrees in Geochemistry, in Geology, and in Geophysics and Space Physics. The program in geochemistry offers study in biogeochemistry, crystal chemistry, experimental petrology, isotopic studies of stable and radioactive elements, marine geochemistry, meteorite research, planetology, and lunar geochemistry. The program in geology offers study in geomorphology, glaciology, micropaleontology, mineral deposits, mineralogy, nonrenewable natural resources, organic geochemistry, paleobiology, petrology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields. The program in geophysics and space physics offers study in applied geophysics, the earth's interior (seismology, gravity, thermal regime, geomagnetism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydromagnetism), planetology (orbital dynamics, planetary interiors, surfaces and atmospheres, solar-system origin), and space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays). Other comparable areas of study are also possible.

Foreign Language Requirement

Advising committees may require one or more foreign language in special individual cases. The committees determine how the requirement is to be fulfilled.

Master of Science in Geochemistry

Admission

A bachelor's degree in chemistry, geology, physics, or a related field is required. Applicants must have outstanding records in the basic sciences, physics, chemistry, and mathematics. The Graduate Record Examination (GRE) Advanced Test may be in any appropriate field of science.

Course Requirements

A minimum of nine courses is required for the degree, at least six of which must be graduate-level courses. Each course of study is worked out individually between you and the advising committee. You are expected to attain, either through prior training or through prescribed coursework, a common mastery of the subject matter of Earth and Space Sciences 51A, 51B, 51C, 130, 131, 234A or 234B, and Chemistry 110A, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology. You must take course 235A, 235B, or 235C each quarter.

Sixteen units of 500-series courses (596, 597, 598) may be applied toward the total course requirement; 12 units may be applied toward the minimum graduate course requirement.

Thesis Plan

The thesis must be approved by the research director (usually the chair of your advising committee), as well as by the other members of the advising committee. No examination is required of students who write a thesis.

Comprehensive Examination Plan

If you elect this plan, the advising committee will prepare and administer the final examination (normally oral). In most cases, a failed final examination can be repeated once.

Master of Science in Geology

Admission

A bachelor's degree in geology, biology, chemistry, physics, or other science is required. Applicants must have outstanding records in the relevant basic sciences and mathematics.

Course Requirements

Each course of study is worked out individually between you and the advising committee. It may include appropriate courses offered by other departments. Unless you have already

passed Earth and Space Sciences 61 and 111, you are required to take either 195G or 61 and 111 during your first year in residence. Depending on performance in course 195G, you may subsequently be required to take either 111 or 61 and 111.

Courses applied toward the 36-unit minimum requirement must be from the 100, 200, or 500 series in the physical or life sciences. At least 24 units must be graduate-level courses, of which at least four units must be a geology seminar (courses 251 through 260). Except for courses 597 and 598, those graded on an S/U basis may not be applied toward the requirements. The advising committees may require additional courses in light of individual educational objectives and backgrounds.

Eight units of 500-series courses (596, 597, 598) may be applied toward the total course requirement; four units may be applied toward the minimum graduate course requirement.

Specialization in Nonrenewable Natural Resources

The objective of this program is to prepare students for professional careers in the geology of metallic, nonmetallic, and fossil energy resources. Individual courses of study are arranged in consultation with the committee for graduate study in nonrenewable natural resources. Relevant subjects include mineral deposits, mining and exploration geology, geophysical exploration, petroleum and coal geology, depositional systems, and basin analysis. Particularly relevant courses include Earth and Space Sciences 128A, 128B, 130, 131, 132, 136A, 136B, 136C, 137, 138, 144, 150, 227, 241, 254, 258, and 268, as well as selected courses in chemistry, engineering, the social sciences, law, and management.

Thesis Plan

This plan is normally required for students not continuing to the doctorate. The thesis subject may be selected at once and the research undertaken concurrently with coursework; in any event, it should normally be selected within your first year in residence. The completed thesis must be approved by the thesis committee. If it is not, the committee may recommend either termination of graduate study or further coursework or research or both, leading to a revised thesis. Revision and resubmission is not normally permitted more than once.

Comprehensive Examination Plan

This plan is recommended for those continuing to the Ph.D. The examination consists of a six-hour written part covering your major field of study and a subsequent oral part which may be more general in scope. If the examination is failed, the advising committee may recommend either termination of graduate study or further coursework followed by another examination. Reexamination is not normally permitted more than once.

Master of Science in Geophysics and Space Physics

Admission

A bachelor's degree in a physical science, engineering, mathematics, or other field is required. Undergraduate work must include junior- or senior-level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Graduate Record Examination (GRE) Advanced Test scores are preferable in physics, although mathematics or geology scores are also acceptable.

Qualified students may proceed directly toward the Ph.D. degree, although most obtain the M.S. degree in the process.

Course Requirements

Courses applied toward the 36-unit minimum requirement must include Earth and Space Sciences 200A, 200B, and 200C and at least 12 additional units of 200-series (graduate) courses. At least half of these must fall within a single field of concentration (applied geophysics, earth's interior, geophysical fluid dynamics, planetology, or space physics) selected in consultation with your faculty adviser, and the remainder must contribute to your general competence in geophysics and space physics. Courses from the 500 series and courses graded on an S/U basis may not be applied toward the minimum requirement; 500-series courses also may not be applied toward any other degree requirements.

Thesis Plan

This plan is an optional alternative to the comprehensive examination plan. At least two members of the thesis committee must be from the department.

Comprehensive Examination Plan

The examination is the comprehensive part of the written qualifying examination taken by doctoral students, but the passing level for the master's degree is less rigorous. The examination is on the level of the introductory courses (200A, 200B, 200C). It lasts six hours and is given every June and December. It must be first attempted by the end of the fourth quarter of enrollment. If failed, it must be retaken the next time it is given. Permission to take it a third time may be granted by the graduate adviser in extenuating circumstances.

Specialization in Applied Geophysics

The objective of this program is to provide advanced technical training to students who plan to do detailed analysis of geophysical data in industry, mainly in petroleum exploration. Undergraduate preparation for admission is equivalent to a B.S. in Geophysics (applied geophysics specialty), including a common mastery of the subject matter of Earth and Space Sciences 111, 112, 122, 136A, 136B, 136C, Physics 105A, 105B, 110A, 110B, and 114. Exceptions may be allowed, but in particular, deficiency in geophysical fieldwork must be made up.

Course Requirements: Courses applied toward the 36-unit minimum requirement must include Earth and Space Sciences 200A and 202, plus at least two courses from 203, 204, 205, 222. Eight additional units of graduate-level courses are required; courses 200B, 208, M224A, M224B are recommended. Eight units of 500-series courses (596, 598) may be applied toward the graduate course requirement.

Thesis Plan: A thesis is required for this specialization. A qualifying examination on the suitability of the proposed thesis should be taken by your fourth quarter in residence. You are also required to take a final examination on the adequacy of your completed thesis.

Ph.D. in Geochemistry

Admission

Admission requirements are the same as those for the M.S. in Geochemistry.

Course Requirements

Each course of study is worked out individually in consultation with your advising committee. You are expected to complete at least the minimum number of courses which are required for the M.S. in Geochemistry and to attain, either through prior training or through prescribed coursework, a common mastery of the subject matter of Earth and Space Sciences 51A, 51B, 51C, 130, 131, 234A or 234B, and Chemistry 110A, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology. You must take course 235A, 235B, or 235C each quarter.

Qualifying Examinations

The departmental written qualifying examination must be taken before the end of the first year of the doctoral program if you have a master's degree; otherwise, it must be taken before the end of the second year of enrollment. It may be given in either a question-answer format or in a proposal format, at your discretion. Contact the department for details of each format. In case of failure, an examination of either format may be repeated at the discretion of the examining committee.

After passing the written qualifying examination, you must nominate your doctoral committee and arrange a time for the University Oral Qualifying Examination. This examination determines the suitability of the selected problem for the dissertation and your ability to research the problem but is not limited to these topics. Repetition of a failed examination is at the option of the doctoral committee.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination is normally required.

Ph.D. in Geology

Admission

Admission requirements are the same as those for the M.S. in Geology.

Course Requirements

Each course of study is worked out individually in consultation with your advising committee. It may include appropriate courses offered by other departments. Unless you have already passed Earth and Space Sciences 61 and 111, you are required to take either 195G or 61 and 111 during your first year in residence. Depending on performance in course 195G, you may subsequently be required to take either 111 or 61 and 111. You also are expected to complete at least the minimum number of courses which are required for the M.S. in Geology and must take a geology seminar each year.

Qualifying Examinations

The departmental written qualifying examination must be taken before the end of the first year of the doctoral program if you have a master's degree; otherwise, it must be taken before the end of the second year of enrollment. It is given in either a question-answer format or in a proposal-proposition format, at your discretion. Contact the department for details of each format.

After passing the written qualifying examination, you must nominate your doctoral committee and arrange a time for the University Oral Qualifying Examination. This examination determines the suitability of the selected problem for the dissertation and your ability to research the problem but is not limited to these topics. Repetition of a failed examination is at the discretion of the doctoral committee.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination is normally required.

Ph.D. in Geophysics and Space Physics

Admission

Admission requirements are the same as those for the M.S. in Geophysics and Space Physics.

Course Requirements

There are no specific requirements.

Qualifying Examinations

In this program the written qualifying examination is divided into three stages: (1) the fundamental physics examinations, (2) the comprehensive examination, and (3) the field examination. Examinations 1 and 2 must be passed before undertaking examination 3. Students not passing these examinations within three years, two years, and four years, respectively, after entering the program are subject to dismissal. Contact the department for details on each of the three stages.

You must nominate the doctoral committee and arrange a time for the University Oral Qualifying Examination as soon as possible after passing the field examination. This examination determines the suitability of the selected problem for the dissertation and your ability to research the problem but is not limited to these topics. Repetition of a failed examination is at the option of the doctoral committee. If you do not pass this examination within five years after entering the program, you are subject to dismissal.

Final Oral Examination

The examination is required.

Lower Division Courses

1. Introduction to Earth Science. Lecture, three hours; laboratory, two hours. Not open to students with credit for or currently enrolled in course 1H or 100. Elements of earth science; study of earth materials; the nature and interpretation of geologic evidence; study of geologic processes; historical aspects of geology.
Mr. DeNiro, Mr. Farmer, Mr. Nelson (F,W,Sp)

1H. Fundamentals of Earth Science. Lecture, three hours; laboratory, two hours; two field days. Not open to students with credit for or currently enrolled in course 1 or 100. Particularly recommended for future physical science majors with strong high school or some lower division preparation. Introduction to earth materials, physical geology, and tectonics, with examples of geophysical and geochemical methods.
Mr. Rosenfeld (F)

2. Earth History. Lecture, three hours; laboratory, three hours; fieldwork. Prerequisite: course 1 or 1H. Methods of historical science; consideration of special problems relating to the physical and biological evolution of the earth from earliest time to the present. Mr. Ingersoll, Mr. Nelson (W)

5. Earth Science and Society: Geological Ecological Interactions. Lecture, three hours; discussion, two hours; field trips. Geologic aspects of major environmental problems, with emphasis on lithosphere-biosphere interactions. Problems of exploration and exploitation of fossil fuel resources. Comparison of society-produced materials and natural cycles.
Mr. Reed (Sp)

8. Earthquakes. Lecture, three hours. The causes and effects of earthquakes, with special emphasis on the problems of living with earthquakes in Southern California. Topics include the relationship between earthquakes and local and regional geology, types of earthquakes, past and future earthquakes in California, earthquake engineering, disaster preparedness, and prospects for predicting or controlling earthquakes. Mr. Coleman (Sp)

9. Origin and Evolution of the Solar System. Lecture, three hours. Properties of the sun, planets, asteroids, and comets. Astronomical observations relevant to understanding the solar system and its origin. Dynamical problems, including examination of fallacious hypotheses. Meteoritic evidence regarding the earliest history of the solar system. Chemical models of the solar nebula. Space exploration and its planning. Mr. Russell (W)

10. Geology of California. Lecture, two hours; laboratory, two hours (alternate weeks); 10 field days. Prerequisite: course 1 or 1H. General survey of major geologic features and geologic history of California; its relationship to large-scale crustal motions of Western North America and the Eastern Pacific. Environmental geology; study of geologic hazards such as earthquakes, landslides; aspects of urban geology.
Mr. Carlisle

15. Introduction to Oceanography. Lecture, three hours; discussion, one hour. Not open for credit to students with credit for Biology 25. Processes responsible for the chemical composition of the ocean and current circulation patterns. Seafloor spreading and morphology of the ocean floor. Biological productivity, marine ecology, and minerals forming in the ocean. Mr. Farmer, Mr. Kaplan (F,Sp)

20. Natural History of Southern California. Lecture, one hour; laboratory, three hours; seven field weekends. Identification, distribution, diversity of plants, animals, and communities; environmental factors influencing distribution in alpine to lower desert life zones. Identification, interpretation, and physical history of rocks, landforms, and structural geologic features within the physiographic regions of Southern California. Emphasis on field-based learning related to integrated aspects of natural history. Mr. Hall

51A. Mineralogy-Petrology. Lecture, three hours; laboratory, six hours. Prerequisite: course 1 or 1H or consent of instructor. Recommended: completion of chemistry requirement. Mineralogic crystal chemistry; relation of physical properties to structure. Structural classification and petrogenesis of the main rock-forming minerals. Laboratory study of crystallography and identification of minerals in igneous, sedimentary, and metamorphic rocks. Mr. Dollase (F)

51B. Mineralogy-Petrology. Lecture, three hours; laboratory, six hours. Prerequisites: course 51A and an introductory course in high school or college physics, or consent of instructor. Principles of optical crystallography. Utilization of optical properties to identify nonopaque minerals in immersion media and in thin section. Presentation of sufficient theory to understand the operations performed in the laboratory.
Mr. Dollase (W)

51C. Mineralogy-Petrology. Lecture, three hours; laboratory, six hours. Prerequisite: course 51B. Composition, occurrence, and origin of igneous, sedimentary, and metamorphic rocks; megascopic and microscopic study of rocks. Mr. Barton (Sp)

61. Elements of Field Geology. (Formerly numbered 111A.) Lecture, two hours; laboratory, three hours; fieldwork, one day per week. Prerequisites: courses 1 or 1H, and 2, or consent of instructor. Majors must have completed or be concurrently enrolled in course 51C. Techniques of geologic mapping; preparation of geologic reports; methods of mapping faults and folds, sedimentary, igneous, and metamorphic terrains, and Quaternary deposits; introduction to field methods in engineering and environmental geology, petroleum geology, and mining geology and mineral exploration; interpretation of geologic maps; field exercises in pace-and-compass topographic and geologic mapping. Mr. Bird, Mr. Shreve (F,Sp)

Upper Division Courses

100. Principles of Earth Science. Lecture, three hours. Designed for nonmajors. Not open to students with credit for course 1 or 1H. Fundamentals of physical geology and earth history; major problems of geology, such as continental drift and development of large-scale features of the earth; physical and biological evolution. Mr. Carlisle (W)

101. Introduction to Geophysics and Space Physics. Lecture, three hours. Prerequisites: Physics 8A, 8B, 8C, Mathematics 31A, 31B, 32A. Designed primarily for students majoring in a physical science or mathematics. A survey of geophysics, the physics of the planets, their atmospheres, and the interplanetary medium, with emphasis on topics of current research interest. Mr. Schubert (Sp)

103A. Igneous Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisites: courses 51A, 51B, 51C, Chemistry 11B, Mathematics 31B, Physics 8B. Recommended: Mathematics 32A. Mineralogy, chemical composition, and field occurrence of igneous rocks with reference to their origin by melting in the earth. Introduction to thermodynamics as applied to petrology. The formation of magma, its movement, eruption, crystallization, and chemical evolution. Petrologic structure of the crust and mantle and its relation to seismology. Overview of the petrological and chemical evolution of the earth, moon, and other planets from their origin to the present. Mr. Ernst (F)

103B. Sedimentary Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103A. Recommended: course 61. Study of sedimentary rocks based on the characteristics of sedimentary particles and the dynamics of depositional processes. Lectures focus on development of depositional facies models, and laboratories emphasize recognition of sedimentary deposits from each major depositional facies. Mr. Reed (W)

103C. Metamorphic Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103B. Interpretation of metamorphic rocks based on field occurrence, mineralogical composition, texture, and the application of physical and chemical principles. Mr. Rosenfeld (Sp)

105. Nonrenewable Resources and Society. Lecture, three hours; discussion, two hours. Prerequisite: course 1 or 1H or consent of instructor. Topics include geological and economic characteristics of mineral resources, exploration, recovery, risks, exhaustibility, mineral law, land-use conflicts, taxation, and environmental concerns. Mr. Carlisle (F)

111. Stratigraphic and Field Geology (6 units). (Formerly numbered 111B.) Lecture, two hours; laboratory, three hours; fieldwork, one day per week. Prerequisite: course 61 or consent of instructor. Principles of stratigraphy; geologic mapping of a selected area; preparation of a geologic report. Mr. Hall, Mr. Reed (W)

111G. Field Geology (2 to 4 units). (Formerly numbered 111AG-111BG.) Prerequisite: graduate standing or consent of instructor. Geologic mapping, principles of stratigraphy, structural geology, and map interpretation.

112. Structural Geology. Lecture, three hours; laboratory, six hours. Prerequisite: course 1 or consent of instructor. Recommended: course 51C. Planar and linear structures at different scales in sedimentary, metamorphic, and igneous rocks. Faults and folds, their description, classification, and kinematic and dynamic analysis. Deformation, strength, fracture, and rheological properties of rocks. Mr. Christie (F)

114. Introduction to Stress and Deformation. Lecture, three hours; discussion, three hours. Prerequisite: course 112 or consent of instructor. An introduction to the quantitative treatment of strain in geological bodies, the stresses that cause them, and their rheological behavior. Stress and strain fields in folds, near faults, and in and near intruding magma bodies. Mr. Oertel

115. Principles of Paleontology. Lecture, three hours; laboratory, two hours; field trips. Principles governing the evolution and distribution of fossils; the geologic history of plants, invertebrates, and vertebrates. Mr. Farmer (F,Sp)

M118. Paleobotany. (Same as Biology M118.) Lecture, three hours; laboratory, three hours. Prerequisite: one course in biological sciences or consent of instructor. Recommended: course 2 or equivalent. Survey of morphology, paleobiology, and evolution of vascular and nonvascular plants during geologic time, with particular emphasis on major evolutionary events. Mr. Schopf

119. Continental Drift and Plate Tectonics. Lecture, three hours. Prerequisites: upper division standing and an introductory course in geology (course 1, 1H, 100, or equivalent), or consent of instructor. Classical concepts of sedimentation and tectonics. Alfred Wegener's theory of continental drift and ensuing controversy. Physiography of continents and oceans. Geophysical evidence regarding the nature of the ocean floor. Magnetic stratigraphy. Seafloor spreading. The plate tectonic model and its driving mechanisms. Tectonic, igneous, and metamorphic processes at plate boundaries. Mr. Christie (W)

120. Rubey Colloquium: Major Advances in Earth Science. (Formerly numbered 120A, 120B.) Lecture, three hours. Prerequisite: upper division standing. Lectures on major advances in earth science offered by distinguished authorities (including regular faculty). Supervision of continuity and assessment of student performance by a faculty member. Content varies from year to year. If laboratory work is required, course 199 must be taken concurrently. (W)

121A-121B. Advanced Field Geology (6 units each). Fieldwork, eight weeks. Prerequisites: courses 61, 103B, 111. Courses 121A and 121B must be taken concurrently. Problems in field geology; preparation of geologic maps and cross-sections; preparation of written geologic reports in the field and a final written summary geologic report of selected areas. Mr. Ernst, Mr. Nelson (Sum)

122. Physics of the Earth. Lecture, three hours; discussion, one hour. Prerequisites: Physics 8A, 8B, 8C, Mathematics 31A, 31B, and 32A, or consent of instructor. Application of physics to the structure and evolution of the solid earth. Seismology, convection and heat flow, gravity, geomagnetism, rock magnetism, and the relation of these topics to plate tectonics and other problems of current geophysical interest. Mr. Anderson (W)

128A. Mineral Deposits. Lecture, three hours; laboratory, three hours. Prerequisite: course 51C. Origin and occurrence of important mineral deposits, with emphasis on chalcophile elements and sulfide ores. (Alternates yearly with course 128B.) Mr. Barton (Sp)

128B. Mineral Deposits. Lecture, three hours; laboratory, three hours. Prerequisite: course 51C. Origin and occurrence of important mineral deposits, with emphasis on siderophile and lithophile elements and their minerals. (Alternates yearly with course 128A.) Mr. Barton, Mr. Carlisle

130. Isotope Geochemistry. Lecture, three hours; discussion, one hour. Prerequisites: junior or senior standing in physical or biological science, consent of instructor. Theoretical aspects of geochronology, particularly carbon 14 dating. Application of radioisotopes to the hydrologic cycle and to atmospheric circulation. Stable isotope distribution in nature. Exchange mechanisms and their applications to paleotemperatures, hydrology, mineral formation, and origin of biological deposits. (Alternates yearly with course 131.) Mr. Kaplan

131. Geochemistry. Lecture, three hours; discussion, one hour. Prerequisite: junior or senior standing in chemistry, physics, or earth and space sciences. Origin and abundance of the elements and their isotopes; distribution and chemistry of the elements in the earth, oceans, and atmosphere; chemistry of the earth's interior, phase transformations at high pressure and temperature. (Alternates yearly with course 130.) Mr. Boettcher (Sp)

132. Principles of Biogeochemistry. Lecture, three hours; laboratory, four hours. Prerequisite: Chemistry 21. Organic substances as evidence for origin and biochemical evolution of life; origin and development of petroleum; comparative properties of recent and ancient sediments and application of molecular stratigraphy to modern and ancient sediments. Mr. DeNiro (W)

133. Regional Geology. Lecture, three hours; discussion, two hours. Prerequisites: courses 61 and 111, or consent of instructor. Application of geologic, stratigraphic, paleontologic, biologic, and climatic principles to a specific province or provinces. Emphasis on tectonic evolution of selected regions. Mr. Ernst, Mr. Nelson (Sp)

135. Introduction to Applied Geophysics. Lecture, three hours; laboratory, one hour. Prerequisites: Physics 8A, 8B, 8C or 6B, Mathematics 31A, 31B, 32A, and Program in Computing 3 or 10A, or consent of instructor. Not open for credit to students with credit for course 136A. Principles and techniques of gravimetric, seismic, magnetic, and other geophysical methods of exploration for ores, petroleum, and other economic minerals. Mr. McPherron (F)

136A. Applied Geophysics. Lecture, three hours; laboratory/field trips, three hours. Prerequisites: Physics 8A, 8B, 8C, 8D, Mathematics 33A, Program in Computing 3 or 10A. Not open for credit to students with credit for course 135. Seismic reflection and refraction, Fourier analysis and deconvolution, vibroseis, synthetic seismograms, marine seismics, seismic interpretation, gravity and magnetic fields, inversion uniqueness and depth rules. Mr. Davis (F)

136B. Applied Geophysics. Lecture, three hours; laboratory/field trips, six hours. Prerequisites: course 136A and Program in Computing 3 or 10A, or consent of instructor. Principles and techniques of exploration for mineral deposits using natural and artificial electric and magnetic fields. Methods include self potential, resistivity, induced polarization, electromagnetics, magnetotellurics, magnetics. Mr. Jackson (W)

136C. Field Geophysics (6 units). Lecture, three hours; discussion, one hour; laboratory, two hours; fieldwork, 10 hours. Prerequisites: course 135 or 136A, consent of instructor. Application of seismic, gravimetric, magnetic, electrical, and other geophysical methods to geologic and engineering problems. Practical aspects of geophysical exploration, including planning, data collection, data reduction, and interpretation. Fieldwork on unsolved problems (weeklong field trip). Mr. Jackson

136D. Advanced Field Geophysics (6 units). Lecture, six hours; laboratory, six hours; fieldwork, 12 hours. Prerequisites: course 135 or 136A, consent of instructor. Application of seismic reflection, seismic refraction, gravity, magnetic, electrical, and electromagnetic methods to geologic problems. Planning, data collection, data reduction, and interpretation. Use of computer in applied geophysics. Mr. Davis, Mr. Jackson (Sum, six weeks)

137. Petroleum Geology. Lecture, three hours. Prerequisites: courses 61 and 111, or consent of instructor. Geology applied to exploration for and production of natural gas and petroleum; techniques of surface and subsurface geology; problems of petroleum geology. Mr. Bonham (F)

138. Exploration and Mining Geology. Lecture, three hours; discussion, two hours; laboratory, four hours; field trip. Prerequisite: course 51C. Geological principles applied to the exploration for and evaluation of mineral deposits; geological techniques at operating mines; mine economics; exploration geology and mineral resource economics. Mr. Carlisle (F)

M139. Engineering and Environmental Geology. (Same as Architecture and Urban Planning M195.) Lecture, two and one-half hours. Prerequisite: course 1 or 100. Recommended: course 111A. Principles and practice of soil mechanics and foundation engineering in light of geologic conditions, recognition, prediction, and control or abatement of subsidence, landslides, earthquakes, and other geologic aspects of urban planning and subsurface disposal of liquids and solid wastes. Mr. Merifield (W)

M140. Introduction to Fluid Dynamics. (Formerly numbered M149.) (Same as Atmospheric Sciences M140.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Surface and internal gravity waves. Rotating frame. Viscous flow. Mr. Schubert, Mr. Wurtele (F)

141. Basin Analysis. Lecture, three hours; laboratory, six hours. Prerequisites: courses 103B, 111. Interpretation of sedimentary rock records in terms of tectonics and basin evolution. Sedimentary patterns in modern plate settings serve to focus interpretations of deformed rocks in complex structural regions. Mr. Ingersoll (F)

144. Marine Geology. Lecture, three hours; field trips. Prerequisite: senior standing. Recent marine sedimentology and geochemistry; oceanography morphology, structure and geologic history of the ocean basins.

150. Remote Sensing for Earth Sciences. Lecture, three hours. Open to upper division and graduate students. Remote sensing related to the development of natural resources. Characteristics of the electromagnetic spectrum and review of remote sensing devices. Applicability to land-use classification, soil survey, urban studies, vegetation classification; emphasis on geologic interpretation of imagery. Mr. Sabins (W)

M154. Solar Terrestrial Physics. (Same as Atmospheric Sciences M154.) Lecture, three hours; discussion, one hour. Prerequisite or corequisite: Physics 110B. Particle and electromagnetic emissions from the sun under quiet and under disturbed conditions. The solar wind. The magnetospheres and the ionospheres of the earth and other planets. Geomagnetic phenomena. Aurora and airglow. Mr. Venkateswaren (F)

M180. Nonlinear Waves. (Same as Atmospheric Sciences M180.) Lecture, three hours; discussion, one hour. Prerequisite: course M140 or consent of instructor. Basic concepts and examples of nonlinear wave behavior: limit cycles, attractors, bifurcations, relaxation, subharmonics, solitons, periodic versus chaotic behavior, Lorenz masks and Rossler bands. Mr. Newman

190. Earth and Space Sciences Colloquium (1 unit). Lecture, 90 minutes. Prerequisite: consent of instructor. Current topics of research in the department. May be repeated for credit. P/NP grading. Mr. Farmer (W)

195G. Field Geology for Graduate Students (2 units). Field mapping; preparation of a geologic report. P/NP grading. Mr. Nelson (F)

199. Special Studies in Earth and Space Sciences (2 to 8 units). May be repeated for credit.

199H. Honors Research in Earth and Space Sciences. Prerequisites: senior standing, consent of departmental honors committee. Individual research designed to broaden and deepen the student's knowledge of some phase of earth and space sciences.

Graduate Courses

200A. Introduction to Geophysics and Space Physics I: The Solid Earth and Planets. Lecture, three hours. Prerequisites: Physics 105A, 110A, 112, and 131, or consent of instructor. Geochemistry, cosmochemistry, and petrology; geotectonics; gravity field; seismology; heat transfer, thermal and mechanical evolution of the mantle; the core and geomagnetism; lunar and planetary interiors. Mr. Davis (F)

200B. Introduction to Geophysics and Space Physics II: Oceans and Atmospheres. Lecture, three hours. Prerequisites: Physics 105A, 110A, 112, and 131, or consent of instructor. Evolution, chemistry, and heat balance of oceans and atmospheres; molecular spectra, radiative transfer, and planetary observations; dynamics of oceans and atmospheres. Mr. Schubert (W)

200C. Introduction to Geophysics and Space Physics III: Plasmas — Aeronomy and the Interplanetary Medium. Lecture, three hours. Prerequisites: Physics 105A, 110B, 112, and 131, or consent of instructor. Solar surface features, heating and expansion of corona, solar wind, plasma and magnetic fields, interaction of the solar wind with the earth, magnetospheric phenomena. Mr. McPherron (Sp)

201. Classical Mechanics. Lecture, three hours. Kinematics, variational principles and Lagrange's equations, rotational dynamics. Hamilton equations of motion, linear and nonlinear perturbation theory, applications to the solar system. Mr. Newman (Sp, alternate years)

202. Continuum Mechanics. Lecture, three hours. Kinematics and dynamics of continuous media. Properties of stress, strain, and rate-of-strain tensors. Conservation laws. Rotating systems, boundary layers, and dynamical similarity. Mr. Schubert (F)

203. Electrodynamics. Prerequisite: upper division electromagnetic theory course or consent of instructor. Maxwell's equations and boundary conditions; momentum, angular momentum, and energy of electromagnetic fields; plane electromagnetic and magnetohydrodynamic waves; wave guides, simple radiating systems, and diffraction. Mr. Coleman (W)

204. Time-Series Analysis and Spectral Estimation. Lecture, three hours. Prerequisites: intermediate courses in calculus (including linear algebra and complex variables) and computer programming (including FORTRAN). Basic methods in time-series analysis, including spectral estimation, prediction, and signal detection, in application to problems in geophysics, atmospheric physics, and space physics. Topics include Fourier transforms (continuous, discrete, FFT), time series (Z-transforms, deconvolution), maximum entropy spectral analysis, autoregressive and moving average methods (AR, MA, ARMA), and multichannel prediction and spectral analysis. Mr. Newman

205. Inverse Theory and Data Interpretation. Lecture, three hours. Prerequisites: Mathematics 115A and 150A-150B-150C, or consent of instructor. The inverse modeling problem — determination of model parameters consistent with experimental data, considering the effects of random errors and nonuniqueness. Emphasis on linear and quasi-linear problems; nonlinear problems also discussed. Tools used include matrix theory, quadratic forms, orthogonal rotations, statistics, the principal axis transformation for rectangular matrices, Backus-Gilbert resolving kernels, and Lagrange multipliers. Examples taken from a broad range of physical sciences. Mr. Jackson (F)

208. Geothermics. Lecture, two and one-half hours; discussion, 30 minutes. Prerequisite: Mathematics 33A or consent of instructor. Basic concepts of heat transfer applied to the solutions of geological and geophysical problems, including continental heat flow, cooling of oceanic lithosphere, solidification of magmas, thermal and subsidence history of sedimentary basins, frictional heating on fault zones, mantle geotherms, temperature in descending slabs, thermal convection in geothermal regions. Mr. Schubert

210. Advanced Paleontology. Lecture, two hours; laboratory, six hours; field trips. Prerequisite: course 115 or advanced standing in biological science. Lectures emphasize evolutionary, ecological, stratigraphic, and taxonomic aspects of fossil invertebrates. Fieldwork and laboratory are devoted to a research project and written report. Content varies from year to year. May be repeated for credit.

M211. Hydrodynamic Instabilities and Turbulence. (Same as Mathematics M263.) Lecture, three hours. An introduction to the theories of hydrodynamic instability and the nonstatistical description of turbulence; stability bounds by the energy method; linear theory of instability; finite amplitude theories of post-instability flows; bounds on properties of turbulent flows by variational techniques. (Alternate years)

212. Paleoecology. Lecture, two hours; laboratory, six hours; field trips. Prerequisite: course 115 or advanced standing in biological science. How and where animals and plants lived in the past; study of habits and habitats of animals, changes in habits and habitats, and the distribution of animals through time and space. Content varies from year to year. May be repeated for credit. Mr. Hall

M213. Archaeological and Paleontological Applications of Stable Isotopes (6 units). (Same as Archaeology M213.) Lecture, three hours. Application of natural variations in stable isotope ratios in fossilized biological and nonbiological materials to a variety of archaeological and paleontological problems. Topics include the basis for isotope distributions in archaeological and paleontological materials; analytical procedures for measuring isotope ratios; dietary reconstruction; paleoclimatic analysis; determination of provenience of archaeological materials; analysis of aspects of the biochemistry and physiology of fossil animals. Mr. DeNiro (F)

214. Geophysical Fluid Dynamics. Lecture, three hours. Prerequisite: consent of instructor. Dynamics of stationary and transient motions in rotating systems; Ekman boundary layer theory; inertial oscillations; B-plane approximation; Rossby waves; theory of thermally induced motions; applications to flow phenomena in planetary atmospheres, in the oceans, and in the earth's core. (Sp, alternate years)

215. Paleobiology of Plant Microorganisms. Lecture, two hours; laboratory, six hours. Prerequisite: course 115 or advanced standing in biological science. Survey of morphology, evolution, and diversification, environmental interactions, and stratigraphic value of bacteria, algae, and fungi, with emphasis on dinoflagellates and acritarchs, chrysomonads, silicoflagellates, ebridians and diatoms, discoasters, and coccolithophorids. (Alternates yearly with course 216.) (W)

216. Micropaleontology. Lecture, two hours; laboratory, six hours. Prerequisite: course 115 or advanced standing in biological science. Survey of microfossils of the animal kingdom, their systematics, morphology, ecology, evolutionary history, and stratigraphic use, with emphasis on foraminiferans, radiolarians, chitinozoans, tintinnids, ostracods, scolecodonts, and conodonts. (Alternates yearly with course 215.)

219. Planetary and Orbital Dynamics. Solar system dynamical evolution; figure and gravitational field of a planet; satellite orbits; earth-moon system evolution; rotational dynamics, including effects of nonrigidity and energy dissipation. Mr. Kaula

220. Principles of Paleobiology. Lecture/discussion, three hours. Prerequisite: graduate standing in science. Open to qualified undergraduates in biological and physical sciences with consent of instructor. Current and classic problems in paleobiology, with emphasis on interdisciplinary problems involving aspects of biology, geology, organic geochemistry, and cosmology. Content varies from year to year. May be repeated for credit. Mr. Schopf (W)

222. Introduction to Seismology. Lecture, three hours. Types of seismic waves; travel-time seismology; epicenter location; amplitude variations; seismograph theory; explosion seismology; seismicity; focal conditions; surface wave analysis; microseisms and tsunamis. Mr. Davis (Sp)

M224A. Elastic Wave Propagation I. (Same as Mechanical, Aerospace, and Nuclear Engineering M257A.) Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 158A or 166A or consent of instructor. Review of elasticity theory; elastic waves in unbounded media; reflection and refraction of plane elastic waves; surface waves and guided waves in multilayered media; waves generated by concentrated loads; radiation from dislocations; attenuation; representative applications in engineering and seismology. Mr. Mal (F)

M224B. Elastic Wave Propagation II. (Same as Mechanical, Aerospace, and Nuclear Engineering M257B.) Prerequisite: course M224A. Diffraction and scattering of elastic waves by isolated cracks and inclusions; normal mode theories for the vibration of finite elastic bodies; dynamic theories of fracture; representative applications in engineering and seismology. Mr. Knopoff (W)

225A. Physics and Chemistry of Planetary Interiors I. Chemical compositions of the earth and planets; high pressure and temperature effects, phase transitions, and equations of state; variations of density and temperature with depth; thermal and compositional evolution. Mr. Anderson, Mr. Boettcher

225B. Physics and Chemistry of Planetary Interiors II. Lateral inhomogeneities in the earth: seismic velocities, petrology, geothermal and gravitational variations; evidences of motion; remanent magnetism, seismic motions; postglacial rebound; plate tectonics; rheology of mantle; thermal convection. Mr. Schubert

226. Theoretical Geomorphology. Lecture, three hours. Prerequisites: Mathematics 33A and one course in elementary probability theory, or consent of instructor. Analysis of the intellectual foundations and objectives of modern geomorphology, illuminated by selected past and present theories of river profiles, slope processes, and channel networks. Reading and discussion of original sources. Preparation of term paper.
Mr. Shreve (Sp, approximately every third year)

227. Resource Evaluation Field Methods. Lecture, one hour; laboratory, three hours; field trips. Prerequisites: courses 111B and 128A or 128B or 138, or consent of instructor. Techniques of mapping, sampling, appropriate laboratory studies, economic or socioeconomic evaluation of a variety of nonrenewable natural sources; preparation of reports. Mr. Carlisle

228. Planetary Magnetism. Prerequisite: consent of instructor. Description and analysis of the magnetic fields of the earth and planets. Origin and history of the earth's magnetic field: core dynamics, dynamo theory, paleomagnetism.

229. Planetary Atmospheres. Lecture, three hours. Prerequisite: course 200B or consent of instructor. Planetary atmospheric structure, dynamics, and composition. Topics include spacecraft observations; origin and evolution of atmospheres; photochemistry, radiation mechanisms, and transport; atmospheric waves and general circulation; wave-mean flow and turbulence; remote sensing and inversion techniques. Mr. Newman

230. X-Ray Crystallography. Lecture, three hours; laboratory, three hours. Prerequisite: course 51C. Point, translation, and space group symmetry, diffraction of X ray, reciprocal lattice theory, single crystal X-ray methods, diffraction symmetry and elementary crystal structure analysis. (Alternates yearly with course 231.) Mr. Dollase (Sp)

231. Crystal Chemistry and Structure of Minerals. Lecture, three hours; laboratory, three hours. Prerequisite: course 51C. Bonding, interatomic configurations, polymorphic transformations, isotypism, thermal and positional disorder; survey of the structures of the common minerals, and relation of physical and chemical properties to crystal structure. (Alternates yearly with course 230.) Mr. Dollase

233. Mineral Physics and Equation of State. Lecture, three hours. Prerequisite: consent of instructor. Interrelationship of the physical properties of rock-forming minerals: optical reflectivity, refraction index, sound velocity, elastic constants, specific heat, and thermal expansivity. Determination of pressure, volume, and temperature relationships and planet-forming compounds. Variation of elastic constants with temperature and pressure. Application of shock-wave experiments to equations of state. Mr. Anderson

234A. Thermodynamic and Geometric Principles of Phase Equilibria. Prerequisites: course 51C and Chemistry 110B, or consent of instructor. Thermodynamic bases of phase transformations and of phase rules. Geometric representation of multicomponent systems using pressure, temperature, chemical potential, molal volume, and the fugacity of oxygen, water, and other volatile components as variable parameters. Mr. Boettcher (W)

234B. Petrologic Phase Equilibria. Lecture, three hours; discussion, three hours. Prerequisites: course 51C and Chemistry 110B, or consent of instructor. Principles governing homogeneous and heterogeneous equilibria, with selected applications to mineral stability relations in igneous and metamorphic rocks (fractional crystallization, partial melting, hydrothermal solutions, element partitioning in coexisting phases). Mr. Ernst

235A-235B-235C. Current Research in Geochemistry (1 unit each). Prerequisite: graduate standing in earth and space sciences. Seminars presented by staff, outside speakers, and graduate students stressing current research in earth and planetary chemistry. May be repeated for credit. S/U grading.

236. Igneous Petrology. (Formerly numbered 236A, 236B.) Lecture, two hours; laboratory, six hours. Prerequisites: an introductory course in petrology and petrography, knowledge of differential equations. Understanding the genesis of igneous rocks based on geochemical, tectonophysical, and other geological evidence and principles. Mr. DePaolo (W)

237. Geochemistry of Solutions. Lecture, three hours. Prerequisites: courses 103A, 103C, Chemistry 110A, and 110B, or consent of instructor. Classical thermodynamics applied to mineral solutions, silicate melts, and low- and high-temperature aqueous solutions and gases. Chemical kinetics and its application to geologic problems. Mr. Barton (F)

238. Metamorphic Petrology. Lecture, three hours; laboratory, six hours. Prerequisite: an introductory course in petrology and petrography or consent of instructor. Interpretation of metamorphic rocks in the light of observation, theory, and experiment. Geological relations, petrographic evidence, metamorphic zoning, thermodynamics of phase equilibria, projections, chemographic relationships, use of piezobirefringent haloes, Rayleigh depletion model, isotopic fractionation, environmental factors of metamorphism. Laboratory study of representative metamorphic rocks and suites of rocks selected to illustrate topics discussed in lectures. Mr. Rosenfeld (F)

239. Structural Petrology of Deformed Rocks. Discussion, three hours; laboratory, three hours. Prerequisites: courses 51C, 112. Recommended: courses 245A-245B, 249. Use of universal stage. Microscopic study of textures, structures, and preferred orientations of minerals in tectonites. Deformation mechanisms in crystals and aggregates. Theories of development of preferred orientation. Application of experimental data to the interpretation of microfabrics. (Alternates yearly with course 249.) Mr. Christie

240. Space Plasma Physics. Lecture, three hours. Prerequisite: course 203 or Physics 210A. The physics of plasmas in space, including treatments based on magnetohydrodynamics and kinetic theory. Applications to solar or planetary winds; steady-state magnetospheres; magnetospheric convection; substorm processes; magnetic merging; field-aligned currents and magnetosphere-ionosphere coupling; ring current dynamics; and wave particle instabilities. Mr. Russell (F)

241. Sedimentary Petrology. Lecture, two hours; laboratory, six hours. Prerequisites: courses 51C, 103B. Texture, composition, structure, and modes or origin of the sedimentary rocks. Content varies from year to year. Mr. Reed (F)

242. Sandstone Petrology. Lecture, two hours; laboratory, four hours. Prerequisite or corequisite: course 141. Petrographic study of sandstones, with emphasis on provenance, petrofacies, and paleotectonic reconstructions. Mr. Ingersoll (Sp)

244. Tectonics of Sedimentary Basins. Lecture, two hours; discussion, two hours; field trips. Prerequisites: courses 103B, 119. Recommended: course 141. Plate-tectonic settings of sedimentary basins. Basin analysis, stratigraphy, paleoenvironments, sedimentology, and related subjects in the context of plate-tectonic controls on basin evolution. Mr. Ingersoll (W)

245A-245B. Stress and Deformation. Lecture, three hours. Prerequisites: Physics 8A, 8B, Mathematics 32A, and 32B, or consent of instructor. Recommended: Mathematics 33A. Scalars, vectors, tensors; subscript notation; rotation and inversion of axes, transformation matrix; stress; finite homogeneous strain, rotation; infinitesimal strain, strain rate; Mohr's circle construction and other graphical methods; flow laws. Mr. Oertel

246. Stress in the Lithosphere. Lecture, three hours. Prerequisite: course 202 or 245A or Civil Engineering 108 or consent of instructor. Overcoring, hydrofracture, fault plane solutions, seismic stress drops; effects of erosion, cooling, earth ellipticity, topography, and density anomalies. State of stress in plate boundaries and interiors. Application of finite element and analytic methods to stress determination. Mr. Bird (Sp)

247. Glaciology. Lecture, three hours. Prerequisite: course 245A or equivalent or consent of instructor. Occurrence and classification of glaciers; accumulation and ablation; glacier budget; mechanical properties of ice; glacier flow; crevasses; textural and structural features; thermal relationships; bed slip; climatic response; catastrophic advances. Mr. Shreve (Sp, every third year)

248. Advanced Structural Geology. Lecture, three hours; discussion, two hours. Prerequisites: courses 111A, 111B. Principles governing fracture, folding, and flow of rocks; solutions of structural problems at various scales; regional tectonic problems. Mr. Christie, Mr. Oertel

249. Structural Analysis of Deformed Rocks. Discussion, three hours; laboratory, three hours. Prerequisites: courses 111A, 111B, and 112, or consent of instructor. Recommended: course 248. Geometrical analysis of megascopic structures in terranes with complex or multiple deformations. Analysis of strain from deformed primary features. Interpretation of structural history in metamorphic terranes. (Alternates yearly with course 239.) Mr. Christie

250. Dynamics of the Solar Wind. Parker's hydrodynamic solution and spiral magnetic field model; effects of magnetic field and solar rotation; shock waves, discontinuities, small amplitude wave propagation, large-scale structure; interaction with the moon, planets, and interstellar medium, stellar winds and stellar spindown. Mr. Coleman

251. Seminar in Mineralogy. Lecture, three hours. Examination of groups of rock-forming minerals (e.g., feldspars), integrating such aspects as crystal structure, crystal chemistry, phase equilibria, and petrogenesis. Mr. Dollase (Sp)

252. Seminar in Geochemistry. Lecture, two hours; discussion, two hours. Phase equilibria under crustal conditions, chemistry of ocean waters, recent and ancient sediments, structure and chemistry of the upper mantle, geochronology, cosmochronology, and cosmochemistry. Mr. Kaplan, Mr. Wasson (F,W)

253. Seminar in Petrology. Lecture, three hours. Problems of igneous or metamorphic petrology: methods of evaluating physical conditions of metamorphism; diffusion in mineralogic systems; origin of ultramafic rocks and problems of the mantle; element fractionation among coexisting phases; other current subjects in the field. S/U or letter grading.
Mr. Rosenfeld

254. Seminar in Sedimentology. Lecture, three hours. Processes of sediment transport and deposition; deep sea sediments; deltas and estuaries; petrology of carbonates, sandstones, and lutites; stratigraphy; paleoenvironmental studies. Mr. Reed

255. Seminar in Structural Geology and Tectonics. Lecture, three hours. Flow and fracture in the earth's crust from microscopic to continental scale and in experiments. Examples may include metamorphic terranes, glaciers, plutons, volcanoes, and consolidated or unconsolidated sediments. Modern concepts of the oceanic basins; processes leading to segregation of continental-type rocks.
Mr. Oertel (Sp)

256. Seminar in Glaciology and Geomorphology. Lecture, three hours. Glacier physics, theoretical geomorphology, river mechanics, statistical models.
Mr. Shreve (W)

257. Seminar in Paleontology. Lecture, three hours. Current biogeologic literature and research on evolution of selected groups of animals and plants, numerical taxonomy, organism-environmental relationships, origin and development of life, biostratigraphy, paleoecology, biogeography, and biostatistics.

258. Seminar in Mineral Deposits. Lecture, three hours. Problems of distribution, composition, and formation of mineral deposits; mineral economics; investigations of opaque minerals by microscopic or other techniques. Mr. Barton, Mr. Carlisle (F)

259. Seminar in Paleotectonics. (Not the same as course 259 prior to Fall Quarter 1986.) Lecture, two hours; discussion, two hours. Prerequisite: course 244 or consent of instructor. Basin evolution and paleogeography, with emphasis on the Phanerozoic of the Western United States. Mr. Ingersoll (Sp)

260. Seminar in Advanced Topics in Geology (2 to 4 units). (Formerly numbered 259.) Topics vary. May be repeated for credit.

261. Topics in Magnetospheric Plasma Physics. Lectures, discussions, and exercises on specific advanced topics in magnetospheric plasma physics. Previous courses examined magnetic storms, magnetospheric substorms, ultralow frequency waves, and adiabatic particle motion in the earth's radiation belts.

265. Instrumentation, Data Processing, and Data Analysis in Space Physics. Lecture, three hours. Principles, testing, and operations of magnetometers and other instruments. Data processing, display, and archiving. Time-series analysis techniques, including filtering. Fourier series, eigenanalysis, and power spectra. Mr. McPherron

268. Seminar in Resource Analysis. Lecture, three hours. Prerequisite: consent of instructor. Geological, geophysical, economic, and technological factors in studies of optimum use of mineral and energy resources. Emphasis on different mineral or energy sources from time to time. Mr. Carlisle (Sp)

M270A-M270B-M270C. Seminar in Climate Dynamics (2 to 4 units). (Same as Atmospheric Sciences M270A-M270B-M270C and Geography M270A-M270B-M270C.) Lecture, two hours. Prerequisite: consent of instructor. The archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantel. The climate of other planets. The modeling, simulation, and prediction of modern climate on the monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading. Mr. Berger, Mr. Ghil, Mr. Schubert

282. Seminar in Geophysics. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Seismology, geophysical prospecting, electromagnetic prospecting. Selected topics in earth physics. Content varies from year to year. May be repeated for credit.

284. Seminar in Mineral Physics and Rock Physics (2 to 4 units). Prerequisite: course 233 or 234A. Seminar for students interested in rock physics, mineral physics, and aspects of seismology and petrology. Students present seminars in their research topics. Topics include equations of state, acoustic properties of minerals under pressure, dielectric properties of minerals, properties of the earth's deep mantle and core, compression of porous aggregates, fracture dynamics, lattice dynamics of low symmetry crystals, laboratory analogs of earthquakes.
Mr. Anderson

M285. Origin and Evolution of the Solar System. (Same as Astronomy M285.) Dynamical problems of the solar system; chemical evidences from geochemistry, meteorites, and the solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of the planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.
Mr. Kaula

286A-286B-286C. Seminar in Planetology (2 units each). Problems of current interest concerning the moon, planets, and meteorites. May be repeated for credit. S/U grading.

287A-287B-287C. Seminar in Seismology and the Earth's Interior (2 units each). Problems of current interest in seismology and the earth's interior. May be repeated for credit. S/U grading.

288A-288B-288C. Seminar in Space Physics (2 units each). Problems of current interest concerning particles and fields in space. May be repeated for credit. S/U grading.

289A-289B-289C. Seminar in Fluid Dynamics (2 units each). Problems of current interest in fluid dynamics, with emphasis on geophysical applications. May be repeated for credit. S/U grading.

290. Seminar in Time-Series Analysis (2 units). Discussion, three hours. Discussion of recent research in spectral estimation, filtering, and signal detection applied to geophysical problems. S/U grading.
Mr. Jackson

295. Earth and Space Sciences Colloquium (1 to 2 units). Reading and discussion in the frontiers of earth and space sciences.

297. Advanced Techniques in Geological Research (2 to 4 units). S/U grading.

298. Advanced Topics in Earth and Space Sciences (2 to 4 units).

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Individual Study and/or Research (2 to 12 units). May be repeated. S/U or letter grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). S/U grading.

598. M.S. Research and Thesis Preparation (2 to 12 units). May be repeated. S/U grading.

599. Ph.D. Research and Dissertation Preparation (2 to 12 units). S/U grading.

East Asian Languages and Cultures

290 Royce Hall, (213) 206-8235

Professors

Robert C. Epp, Ph.D. *(Japanese)*
William R. LaFleur, Ph.D. *(Japanese), Chair*
E. Perry Link, Jr., Ph.D. *(Chinese)*
Hartmut E. F. Scharfe, Ph.D. *(Sanskrit)*
Kenneth K. S. Chen, Ph.D., *Emeritus*
Kan Lao, B.A., *Emeritus*
Richard C. Rudolph, Ph.D., *Emeritus*

Associate Professors

Noriko Akatsuka, Ph.D. *(Japanese)*
Ben Befu, Ph.D. *(Japanese)*
Hung-hsiang Chou, Ph.D. *(Chinese)*
Herbert E. Plutschow, Ph.D. *(Japanese)*
Richard E. Strassberg, Ph.D. *(Chinese)*
Shirleen S. Wong, Ph.D. *(Chinese)*

Assistant Professor

Robert E. Buswell, Ph.D. *(Chinese)*

Lecturers

Y. C. Chu, M.A. *(Chinese)*
Kuo-yi Pao (Unensečen), M.A., M.S., *Emeritus*

Visiting Lecturers

Lisa Chang Ahnert, M.A. *(Chinese)*
Ikuyo Nishide, B.A. *(Japanese)*
Tomi Suzuki, M.A. *(Japanese)*

Scope and Objectives

The Department of East Asian Languages and Cultures aims to provide students with an exposure to the rich cultural heritage of East Asia. This is accomplished through courses in language, literature, thought, religion, archaeology, and other aspects of culture. For undergraduates the department offers a program leading to the B.A. degree in Chinese or Japanese, in which the emphasis is on the language and culture of China or Japan. The language program aims to develop the four skills of speaking, aural comprehension, reading, and writing in a balanced and mutually supportive manner.

At the graduate level, the department offers a program leading to an M.A. degree in several fields of East Asian culture. The program aims to give students a solid mastery of these fields preparatory to careers in teaching or in areas such as journalism, business, banking, or government service. The Ph.D. program, which is very selective, trains research scholars for academic careers in specialized fields.

Bachelor of Arts in Chinese

Preparation for the Major

Required: East Asian Languages and Cultures 1A-1B-1C, 11A-11B-11C, 40A, History 9B-9C. Anthropology 22, East Asian Languages and Cultures 113A, and English 4 are recommended.

The Major

Required: A total of 11½ courses, of which seven must be upper division language courses, including at least two vernacular language courses from East Asian Languages and Cultures 121A, 121B, 121C, 124A, 124B, 124C, 151A, 151B, and at least four classical language courses from 113A, 113B, 113C, 152A, 152B, 163A, 163B, 163C.

The remaining four and one-half required courses must include East Asian Languages and Cultures 140A or 140B or 140C; one course from 170A, 170B, 173, or 183; 199 (at least two units in the senior year); Art History 114B; and either History 182A, 182B, 182C, or 183.

English 100A, 100B, 100C, and additional courses in Chinese history are recommended. Students planning to undertake graduate study are urged to include in their undergraduate program additional courses in classical Chinese and beginning courses in Japanese. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Bachelor of Arts in Japanese

Preparation for the Major

Required: East Asian Languages and Cultures 9A-9B-9C, 19A-19B-19C, 40B, History 9B-9C. Anthropology 22 and English 4 are recommended.

The Major

Required: A total of 11½ courses, of which seven must be upper division language courses selected from East Asian Languages and Cultures 119A, 119B, 129, 134A, 134B, 137, 139, 145, C166, CM176, C178, 179A, 179B, C181, C182. The seven courses must include 119B, 129, and 134A or 134B or C166 or C178.

The remaining four and one-half required courses must include East Asian Languages and Cultures 141A or 141B; one course from 174 or 184; 199 (at least two units in the senior year); Art History 114C; and either History 187A, 187B, or 187C.

English 100A, 100B, 100C, and additional courses in Japanese history are recommended. Students planning to undertake graduate study are urged to include in their undergraduate program three courses in classical Japanese and beginning courses in Chinese. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Master of Arts Degree

Admission

To qualify for admission you are expected to (1) meet general University requirements, (2) have taken a minimum of three quarter courses or the equivalent in classical Chinese or Japanese, and (3) present a B.A. degree from a Department of East Asian Languages and Cultures similar to UCLA's. Applicants with the B.A. in another field or from departments whose requirements are less rigorous will be admitted to the Department of East Asian Languages and Cultures (290 Royce Hall, UCLA, Los Angeles, CA 90024) only if they can meet the requisite standards within one year. Selection is based on (1) prior scholastic performance, (2) recommendations by professors, (3) score on the Graduate Record Examination (GRE) Aptitude Test, and (4) strength and suitability of purpose.

International students are also required to take the Test of English as a Foreign Language administered by the Educational Testing Service (ETS), unless this test is not offered in their country of residence. International students must also take a test in translation from Chinese or Japanese into English, either with the comprehensive examinations or earlier.

Major Fields or Subdisciplines

M.A. students may specialize in either Chinese language and culture or Japanese language and culture.

Language Requirements

Students majoring in Chinese must have completed at least one year of modern Japanese with a grade of B or better; those majoring in Japanese must have completed one year of classical or modern Chinese with a grade of B or better. This requirement may be fulfilled before admission to the M.A. program.

International students may also be required to take English (ESL) 33A, 33B, 33C, 34, 36, or other ESL courses.

Course Requirements

Nine courses are required for the degree, of which five must be graduate courses. East Asian Languages and Cultures 295 is required for the Chinese major, and course 296 is required for the Japanese major. In unusual cases and with departmental consent, courses taken outside the department that are appropriate to your program may be applied toward the nine courses but not toward the five graduate courses. Courses in the 500 series and those taken to meet admission standards and language requirements may not be applied toward the total course requirement.

Comprehensive Examination Plan

All students take comprehensive examinations in the literature and cultural history of either China or Japan. In addition, you are required to present two seminar research papers. The results of the examinations and the quality of the papers determine whether you will be admitted to the Ph.D. program.

Ph.D. Degree

Admission

An M.A. degree in the field or in a related field is required. Selection among qualified applicants from outside the department is based on the four criteria listed under admission to the M.A. degree, plus a recent research paper by the applicant. Students with an M.A. in the department are judged on their M.A. record, plus three letters of recommendation. Those with an M.A. from other institutions must also take a translation examination.

International students must meet the same requirements specified for such students in the M.A. program, including a translation examination at the time of the qualifying examinations or earlier.

Major Fields or Subdisciplines

The department emphasizes three major fields at the Ph.D. level: (1) Chinese language and literature with the subdisciplines of poetry, drama, fiction, and modern literature; (2) Japanese language and literature with the subdisciplines of ancient, medieval, early modern, and modern literature; (3) Buddhism with the subdisciplines of Chinese and Japanese Buddhism. In addition, a program in ancient Chinese civilization or Japanese linguistics may be arranged by petition. Departmental faculty will also participate in the design of individual Ph.D. programs.

Foreign Language Requirement

You must demonstrate a reading knowledge of French or German by passing the Graduate School Foreign Language Test administered by the Educational Testing Service (minimum score of 500) or by passing a level five course with a grade of B or better. With the consent of the department, Russian may be substituted.

Course Requirements

Students entering the program with an M.A. in a different field, or in the same field but from another institution, must meet the standards of the department's M.A. coursework in addition to fulfilling Ph.D. course requirements. A minimum of five courses (not including courses taken to meet the language requirements listed below) beyond the M.A. degree is required. In addition, students majoring in Chinese must take three years of modern Japanese or the equivalent (i.e., one course beyond East Asian Languages and Cultures 119B); those major-

ing in Japanese must take two years of classical Chinese or the equivalent (i.e., three courses beyond East Asian Languages and Cultures 113C). Those majoring in Buddhist studies must also take appropriate courses in Sanskrit or Pali. A grade of B or better is required in courses taken to fulfill the language requirements.

Qualifying Examinations

You must take three written examinations, as follows:

(1) For students in Chinese literature:

(a) A general examination in Chinese literature.

(b) Examinations in two of the following approved fields (which cannot be from the same group): (1) Chinese poetry, Chinese drama, Chinese fiction, modern Chinese literature; (2) ancient Chinese civilization, Chinese Buddhism or another field of Chinese thought or religion; (3) Japanese literature; (4) a field offered in another department or interdepartmental program.

(2) For students in Japanese literature:

(a) A general examination in Japanese literature.

(b) Examinations in two of the following approved fields (which cannot be from the same group): (1) ancient, medieval, early modern, or modern Japanese literature; (2) Japanese Buddhism or another field of Japanese thought or religion; (3) Chinese literature; (4) a field offered in another department or interdepartmental program.

(3) For students in Buddhism, ancient Chinese civilization, or Japanese linguistics:

(a) An examination in your major language area.

(b) A general examination in your major field.

(c) An examination in an approved subfield within your major field.

(d) A general examination in another approved field inside or outside the department.

The qualifying examinations must be taken within a four-week period after satisfying all language and course requirements. With consent of the department, you may repeat the examinations once only.

After successful completion of the written examinations, the department appoints a doctoral committee whose chair serves as your dissertation adviser. Preferably within six months, but no more than a year after your written examinations, you must pass the University Oral Qualifying Examination on the proposed dissertation topic and in appropriate related areas of study. With department consent, you may repeat the examination once.

Within three years after you have advanced to candidacy, you must present a dissertation embodying the results of independent investigation. If you fail to meet the five-year time limit for the completion of the dissertation, you may be required to take the written qualifying examinations again.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

A final oral defense of the dissertation is optional at the discretion of the doctoral committee.

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1A-1B-1C. Elementary Modern Chinese. Lecture, five hours. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Students whose knowledge of Chinese disqualifies them for these courses should take courses 2A-2B-2C or more advanced courses. An introduction to standard spoken Chinese and Chinese characters, with emphasis on conversation. Ms. Ahnert, Mr. Chu

2A-2B-2C. Elementary Mandarin for Speakers of Chinese Dialects. Lecture, five hours. Beginning courses specially designed for students who speak, or have some familiarity with, a non-Mandarin dialect of Chinese. All aspects of Mandarin, with emphasis on Mandarin pronunciation and usage. Mr. Chu

7A-7B-7C. Elementary Modern Korean. Lecture, three hours; discussion, two hours. Not open to students who, from whatever source, already know the language. An introduction to standard spoken Korean and Korean writing, with emphasis on conversation.

9A-9B-9C. Elementary Modern Japanese. Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Introduction to modern Japanese with attention to conversation, grammar, and the written forms. Conversation drill based on material covered in class. Ms. Akatsuka

11A-11B-11C. Intermediate Modern Chinese. Lecture, three hours; laboratory, one hour. Students with credit for courses 2A-2B-2C, or whose background and experience are equivalent to course 2C, should take courses 12A-12B-12C rather than these courses. A continuation of courses 1A-1B-1C, with balanced instruction in reading, writing, and conversation. Ms. Ahnert

12A-12B-12C. Intermediate Mandarin for Speakers of Chinese Dialects. Lecture, three hours; laboratory, one hour. A continuation of courses 2A-2B-2C, covering all aspects of Mandarin but emphasizing those that differ from other dialects of Chinese.

15A-15B-15C. Intermediate Spoken Japanese (2 units each). Lecture, three hours. Prerequisites: course 9C, consent of department. Limited to students with credit for courses 9A-9B-9C. May be taken concurrently with courses 19A-19B-19C. Conversational Japanese. Ms. Nishide

19A-19B-19C. Intermediate Modern Japanese. Lecture, three hours; laboratory, two hours. Prerequisite: course 9C or equivalent. A continuation of courses 9A-9B-9C. Readings in modern Japanese, with emphasis on comprehension and structural analysis. Mr. Epp

40A. Chinese Civilization. Knowledge of Chinese is not required. A survey of the development of the outstanding aspects of Chinese culture from prehistoric to modern times. Mr. Chou

40B. Japanese Civilization. Knowledge of Japanese is not required. A survey of the development of Japanese culture and its relationship to the Asiatic mainland. Mr. Plutschow

42. The Tea Ceremony: An Introduction to the History of Japanese Culture in Theory and Practice. Lecture, three hours; demonstration. The history and culture of Japan as revealed through study and practice of the Tea Ceremony. Topics include Buddhism, aesthetics, calligraphy, painting, architecture, gardens, ceramics, and politics. Mr. Plutschow

Upper Division Courses

113A-113B-113C. Introduction to Classical Chinese. (Formerly numbered 13A-13B-13C and 113A-113B.) Lecture, three hours. Prerequisite: course 1C or consent of instructor. Grammar and readings in selected texts. Ms. Wong

119A-119B. Advanced Modern Japanese. Lecture, three hours; laboratory, one hour. A continuation of courses 19A-19B-19C. Emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation in modern Japanese.

121A-121B-121C. Advanced Modern Chinese. Prerequisite: course 11C. Readings in modern prose and newspaper style. Mr. Chu

122A-122B. Readings in Modern Chinese Literature. Lecture, three hours. Prerequisite: course 121B or consent of instructor. Readings and discussion of works of modern Chinese literature. **122A.** Poetry and Prose; **122B.** Drama and Fiction. Mr. Link

124A-124B-124C. Readings in Modern Expository Chinese. Lecture, three hours. Prerequisite: course 121B or consent of instructor. Readings in the social sciences, including Chinese Communist materials. **124A.** Nationalist Chinese Materials (including the May 4th Movement); **124B.** Political and Military Materials of Communist China; **124C.** Economic and Educational Materials of Communist China. Mr. Chu

126. Post-1949 Chinese Literature. Prerequisite: course 121B or consent of instructor. Reading and discussion of selected works in contemporary poetry, drama, and fiction, with emphasis on the People's Republic of China. Mr. Link

128. Readings in Modern Korean Literature. Prerequisite: reading knowledge of modern Korean. Reading and discussion of selected works in modern Korean literature. P/NP or letter grading.

129. Introduction to Classical Japanese. Lecture, three hours. Prerequisite: course 119B or consent of instructor. Introduction to literary Japanese, with readings and discussions in the prose and poetry of the Heian period. Mr. Befu

134A. Introduction to Kawabata Yasunari. Lecture, three hours. Prerequisite: course 19C. Reading and analysis of the Nobel Laureate's short stories, with particular emphasis on their emotional structure. Mr. Epp

134B. Introduction to Mushakoji Saneatsu. Lecture, three hours. Prerequisite: course 19C. Reading and discussion of Mushakoji's prose, fiction, and poetry. Mr. Epp

135. Buddhist Themes in Asian Literature. Knowledge of Asian languages is not required. A survey of selected works of Buddhist literature of India, China, and Japan. Includes canonical works such as the *Lotus Sutra* and noncanonical works of poetry, prose, and drama containing Buddhist themes. Mr. LaFleur

137. Introduction to Kambun and Other Literary Styles. Lecture, three hours. Prerequisite: course 119B or consent of instructor. Introduction to Kambun, the Japanese literary rendering of classical Chinese, and Sorobun, the epistolary style. Mr. Befu, Mr. Plutschow

139. Introduction to Buddhist Texts. Lecture, three hours. Prerequisite: course 113C, 119A, or 121A. Studies in Buddhist terminology.

140A-140B-140C. Chinese Literature in Translation. Knowledge of Chinese is not required. Open to freshmen and sophomores, as well as all other students. Lectures and collateral reading of representative works in English translation. **140A.** Poetry from Earliest Times to the 19th Century; **140B.** Drama and Fiction from the 13th Century to the End of the Ch'ing Period; **140C.** 20th-Century Poetry, Drama, Fiction.
Mr. Link, Mr. Strassberg, Ms. Wong

141A-141B. Japanese Literature in Translation. Knowledge of Japanese is not required. Open to freshmen and sophomores, as well as all other students. A survey of Japanese literature from the beginning to modern times, emphasizing Chinese, Buddhist, and Western influences. **141A.** Beginning to 1600; **141B.** 1600 to Modern Times.
Mr. Plutschow

145. Readings in Modern Expository Japanese. Prerequisite: course 119A. Readings in contemporary affairs, including politics, economics, trade, and social issues, taken from current Japanese newspapers and journals. Mr. Plutschow

151A-151B. Readings in Traditional Chinese Fiction. Prerequisite: course 11C or equivalent or consent of instructor. Selected readings from the classic Chinese novels. Designed primarily as a language course; emphasis on translation and obtaining a command of the various literary styles, as well as on critical interpretation of the texts. Mr. Strassberg

152A-152B. Readings in Classical Chinese Poetry. Lecture, three hours. Prerequisite: course 113C or consent of instructor. Discussion and collateral reading of representative works selected on the basis of such critical concerns as thematic patterns, image clusters, genres, and the characteristics of major poets. Ms. Wong

154A-154B. Mongolian. Lecture, three hours; laboratory, one hour. To be offered when requested by a sufficient number of students.

160. Elementary Sanskrit. Introduction to script and grammar, with reading exercises and attention to the significance of Sanskrit for the understanding of other Indo-European languages. Mr. Scharfe

161. Intermediate Sanskrit. Prerequisite: course 160 or equivalent. Advanced aspects of grammar and the reading of literary texts. Mr. Scharfe

162. Advanced Sanskrit. Prerequisite: course 161 or equivalent. Reading of the entire Bhagavadgita or a comparable amount of other Sanskrit literature.
Mr. Scharfe

163A-163B-163C. Readings in Chinese Literary Texts. Lecture, three hours. Prerequisite: course 113C.

165. Readings in Sanskrit. Prerequisite: course 162 or equivalent. Extensive reading in such texts as best serve the students' needs. Mr. Scharfe

C166. Kawabata's Contemporaries. (Formerly numbered 153A.) Lecture, three hours. Prerequisite: course 119A or 134A or 134B. Readings in the fiction and poetry of such writers as Ibuse Masuji, Maruyama Kaoru, Ozaki Kazuo, Tsuboi Sakae, and Yokomitsu Riichi. Concurrently scheduled with course C266.
Mr. Epp (W, odd years)

167. Introduction to Indic Philosophy. A survey of the main trends in Indian philosophy from ancient to modern times. Mr. Scharfe

170A-170B. Archaeology in Early and Modern China:

170A. Introduction to Chinese Archaeology. Early Chinese study of their own past, types of artifacts, antiquarianism, and the beginnings of scientific archaeology in China before 1949. Mr. Chou

170B. Archaeology in the People's Republic of China. Survey of major excavations of sites of all periods, carried out under the intensive archaeological program of the PRC, and the interpretation of the archaeological findings. Mr. Chou

172. Introduction to Buddhism. Knowledge of Asian languages is not required. Life of the Buddha and fundamental doctrines of Buddhism; Buddhist writings; the monastic order; early sects. The popular cult. The rise and development of Mahayana Buddhism: writings and doctrines. The Tantric doctrines and the end of Indian Buddhism. Mr. Buswell

173. Chinese Buddhism. Knowledge of Asian languages is not required. The introduction and development of Buddhism in China, interaction between Buddhism and Chinese culture, rise of the Chinese schools of Buddhism such as Pure Land and Zen, contributions to Chinese culture. Mr. Buswell

174. Japanese Buddhism. Knowledge of Asian languages is not required. The development of Buddhism in Japan and its influence on Japanese culture, with emphasis on the arts. Mr. LaFleur

CM176. Introduction to the Structure of Japanese. (Formerly numbered 175.) (Same as Linguistics M176.) Lecture, three hours. Prerequisite: two years of Japanese. Knowledge of linguistics is not required. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in the form of a contrastive analysis of Japanese and English. Concurrently scheduled with course C276. Ms. Akatsuka

177. Kyoto through Classical Japanese Literature. Lecture, three hours. Recommended prerequisite: course 40B. Knowledge of Japanese is not required. An investigation of the history and life of the city as seen through Japanese literature. P/NP or letter grading. Mr. Plutschow

C178. Introduction to Shiga Naoya. (Formerly numbered 153B.) Lecture, three hours. Prerequisite: course 119A or 134A or 134B. Reading and discussion of Shiga's short stories, with special emphasis on his I-novel technique until 1918. Concurrently scheduled with course C278.
Mr. Epp (W, even years)

179A. Readings in Medieval Japanese Literature. Lecture, three hours. Prerequisite: course 129 or consent of instructor. Readings and discussion in the prose, poetry, and drama to 1600. Mr. Plutschow

179B. Readings in Edo Literature. Lecture, three hours. Prerequisite: course 129. Readings and discussion in the prose, poetry, and drama from 1600 to 1868. Mr. Befu

C181. Readings in the Japanese Family System. (Formerly numbered 142A.) Lecture, three hours. Prerequisite: course 119B or equivalent. Analysis and discussion of post-World War II articles criticizing the family system and the way it has functioned in the past. Concurrently scheduled with course C281.
Mr. Epp (Sp)

C182. Human Problems in the Modernization of Japan. (Formerly numbered 142B.) Lecture, three hours. Prerequisite: course 119B. Analysis and discussion of articles dealing with the definition of modernization in Japanese society and the relation of modernization to traditional values, self-awareness, and the role of the intellectual. Concurrently scheduled with course C282. Mr. Epp (Sp)

183. Introduction to Chinese Thought. Lecture, three hours. Knowledge of Asian languages is not required. A general survey of indigenous Chinese thought from the Chou period to circa 1800, covering Confucianism, Taoism, Mo-tzu, the legalists, the influence of Buddhism, the development of neo-Taoism and neo-Confucianism.

184. Introduction to Japanese Thought. Lecture, three hours. Knowledge of Asian languages is not required. A general survey of Japanese thought from early to modern times, including analyses of Shinto mythology, forms of Confucianism, the ethic of bushido, the National Learning School, and modern Japanese philosophers such as Nishida Kitaro and Watsuji Tetsuro. Attention also to representative types of contemporary thinking about Japanese thought, especially the question of what might qualify as recognizably "Japanese" in aesthetics, ethics, and philosophy. Mr. LaFleur

185. Introduction to Korean Thought. Lecture, three hours. A general survey of Korean thought from the earliest records to the 20th century, including shamanism, Taoism, Buddhism, Christianity, and neo-Confucianism. Korean traditions and those found in India, China, Japan, and the West.
Ms. Kim

188. Chinese Etymology and Calligraphy. Prerequisite: one year of classical Chinese or consent of instructor. Covers (1) the development of the Chinese writing system from the "Pottery Inscriptions" 6,000 years ago to the modern "Simplified Forms" and the studies of the Six Scripts principles which were used to form Chinese characters and (2) the aesthetic training of calligraphic art and its appreciation, with focus on the ways of recognizing and interpreting the "Cursive Style," a common form of handwriting.
Mr. Chou

189. Chinese Brush Painting. Lecture, two hours; studio, two hours. A combination studio-lecture course surveying the aesthetics and techniques of Chinese literati painting. Emphasis on realizing the philosophical ideals of critical treatises through mastery of the traditional materials and elements of landscape. Mr. Strassberg

199. Special Studies in East Asian Languages and Cultures (2 to 4 units). Prerequisites: senior standing in department or advanced reading knowledge of Chinese or Japanese, consent of instructor. Required of senior majors. Special individual study. May be repeated once with consent of instructor.

Graduate Courses

203A-203B. Chinese Philosophical Texts. May be repeated for credit with consent of instructor.
Mr. Strassberg

213. Chinese Buddhist Texts. May be repeated for credit with consent of instructor.

214A-214B. Pali and Prakrits. Prerequisites: knowledge of Sanskrit equivalent to course 161, consent of instructor. Grammatical studies and reading of texts. Comparative considerations. Mr. Scharfe

221A-221B. Introduction to Panini's Grammar. Prerequisite: course 162 or equivalent. Reading of selected passages of the text, with an introduction to Panini's technique. Mr. Scharfe

M222A-M222B. Vedic. (Same as Iranian M222A-M222B.) Prerequisites: knowledge of Sanskrit equivalent to course 162, consent of instructor. Characteristics of the Vedic dialect and readings in the Rig-Vedic hymns. Only course M222B may be repeated for credit. Mr. Schmidt

223. Seminar: Linguistic Analysis of Japanese Narratives. Prerequisite: course CM176 or consent of instructor. Analysis of selected modern and classical Japanese narratives. Emphasis on exploration of how grammatical features such as tense, aspect, voice, and point of view are utilized to achieve desired literary effects. May be repeated for credit with consent of instructor. Ms. Akatsuka

229A-229B. Japanese Buddhist Texts. May be repeated for credit with consent of instructor.
Mr. LaFleur

240. Advanced Chinese Classics. Reading and discussion of selected works in classical Chinese, including various types of literary prose and historical narratives, with attention to stylistic features and historical development. May be repeated for credit with consent of instructor. Ms. Wong

242A-242B. Japanese Classics:

242A. Prose and Poetry to 1600.

242B. Prose and Poetry from 1600 to 1868. May be repeated for credit with consent of instructor.
Mr. Befu

243. Seminar in No and Kyogen. Lecture, three to four hours. Prerequisite: knowledge of classical Japanese. Readings of selected No and Kyogen texts from the Muromachi and Edo periods, as well as readings of critical writings and discussion of theories. May be repeated for credit with consent of instructor. S/U or letter grading. Mr. LaFleur

244. Seminar in Traditional Chinese Fiction and Drama. Prerequisite: reading knowledge of colloquial and literary Chinese. Seminar topics alternate yearly between traditional fiction and drama, with emphasis on generic, hermeneutical, and historical approaches. Topics in fiction selected from narrative genres from the Chou through the Ch'ing periods. Topics in drama selected from *tsa-chü* and *ch'uan-ch'i*. May be repeated for credit with consent of instructor. *Mr. Strassberg*

245. Seminar in Modern Japanese Fiction. Lecture, three hours. May be repeated for credit with consent of instructor. Ms. Suzuki (F)

246. Modern Japanese Poetry. Lecture, three hours. Studies of individual poets who became established between World War I and World War II and who consequently illustrate the transitional artists trying to modernize their tradition. May be repeated for credit. S/U or letter grading. Mr. Epp

247. Selected Readings in Sanskrit Texts. May be repeated for credit with consent of instructor. Mr. Scharfe

250. Seminar in Medieval Japanese Literature. Prerequisite: one year of classical Japanese. Selected readings in travel poetry, travel diaries, and other genres of Japanese travel literature of the Heian, Kamakura, Nambokucho, and Muromachi periods. May be repeated for credit with consent of instructor. Mr. Plutschow

251. Seminar: Selected Topics in Modern Chinese Literature. Prerequisite: consent of instructor. Selected readings in 20th-century Chinese literature, emphasizing fiction. Discussion of individual research projects. May be repeated for credit. Mr. Link

252. Seminar: Selected Topics in Japanese Literature. May be repeated for credit. Mr. Befu

253. Seminar: Selected Topics in Japanese Buddhism. May be repeated for credit. Mr. LaFleur

255. Seminar: Selected Topics in Chinese or Indian Buddhism. May be repeated for credit.

261A-261B. Seminar in Classical Chinese Poetry. Prerequisites: courses 152A and/or 152B, or consent of instructor. **261A.** Chinese poetry from the *Shih-ching* phase to the 6th century, with emphasis on the evolution of the lyric form during the Southern Dynasties (ca. 400-600). **261B.** The development of *shih* and *tz'u* from the T'ang period (ca. 600-900) and onward; traditional and modern critical approaches to classical Chinese poetry. Ms. Wong

C266. Kawabata's Contemporaries. Lecture, three hours. Prerequisite: course 119A or 134A or 134B. Not open for credit to students with credit for course C166 or former course 153A. Readings in the fiction and poetry of such writers as Ibuse Masuji, Maruyama Kaoru, Ozaki Kazuo, Tsuboi Sakae, and Yokomitsu Riichi. Concurrently scheduled with course C166. Graduate students write a research paper and present written or oral reports on outside readings. Mr. Epp (W, odd years)

270. Seminar: Selected Topics in Chinese Archaeology. Prerequisite: course 170A or 170B or consent of instructor. Discussion and research on major problems about Chinese archaeology and the different interpretations to the most important archaeological finds, with emphasis on the studies of the Xia and Shang cultures and the Xia and Shang dynasties. May be repeated for credit. Mr. Chou

275. Seminar: Selected Topics in Chinese Cultural History. Prerequisite: consent of instructor. Discussion and research on the major problems related to Chinese culture, such as beginnings of the Chinese civilization and the Chinese dynastic history. Other topics include the cultural developments of ancient and medieval China. May be repeated for credit. Mr. Chou

C276. Structure of Japanese. Lecture, three hours. Prerequisite: two years of Japanese. Knowledge of linguistics is not required. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in the form of a contrastive analysis of Japanese and English. Concurrently scheduled with course CM176. S/U or letter grading. Ms. Akatsuka

C278. Introduction to Shiga Naoya. Lecture, three hours. Prerequisite: course 119A or 134A or 134B. Not open for credit to students with credit for course C178 or former course 153B. Reading and discussion of Shiga's short stories, with special emphasis on his I-novel technique until 1918. Concurrently scheduled with course C178. Graduate students write a research paper and present written or oral reports on outside readings. Mr. Epp (W, even years)

C281. Readings in the Japanese Family System. Lecture, three hours. Prerequisite: course 119B or equivalent. Not open for credit to students with credit for course C181 or former course 142A. Analysis and discussion of post-World War II articles criticizing the family system and the way it has functioned in the past. Concurrently scheduled with course C181. Graduate students write a research paper and present written or oral reports on outside readings. Mr. Epp (Sp)

C282. Human Problems in the Modernization of Japan. Lecture, three hours. Prerequisite: course 119B. Not open for credit to students with credit for course C182 or former course 142B. Analysis and discussion of articles dealing with the definition of modernization in Japanese society and the relation of modernization to traditional values, self-awareness, and the role of the intellectual. Concurrently scheduled with course C182. Graduate students write a research paper and present written or oral reports on outside readings. Mr. Epp (Sp)

285. Selected Topics in Buddhist Culture. May be repeated for credit with consent of instructor. Mr. LaFleur

295. Bibliography and Methods of Research in Chinese. Required of all graduate students in Chinese. Lectures and discussion on the research methodology dealing with traditional Chinese materials, with emphasis on bibliography training (including the most up-to-date indexes in Chinese studies), punctuation practice, knowledge of textual criticism, and rare book editions. Mr. Chou

296. Bibliography and Methods of Research in Japanese. Required of all graduate students in Japanese. Mr. Befu

299. Independent Study. Prerequisite: graduate standing. Guided research and writing of a research paper. May be repeated, but only four units may be applied toward the M.A. degree. May not be applied toward the Ph.D. degree. (F,W,Sp)

301. Teaching an Oriental Language as a Foreign Language.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

You may repeat the courses below with consent of instructor; however, none may be applied toward the minimum course requirement for the M.A.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Individual Studies (4 to 12 units). S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (4 to 12 units). S/U grading.

Scope and Objectives

This undergraduate major is designed for those who wish to study the Chinese- and Japanese-speaking areas of East Asia and/or engage in business there. It offers a social science approach, combined with language study and work in the humanities.

Bachelor of Arts Degree

Preparation for the Major

Required: History 9B-9C; East Asian Languages and Cultures 1A-1B-1C or 9A-9B-9C or a parallel Cantonese sequence; East Asian Languages and Cultures 11A-11B-11C or 19A-19B-19C. Students planning to pursue classical Chinese in the major will need East Asian Languages and Cultures 113A-113B-113C in addition to the above courses.

The Major

This consists of three parts:

(1) Four courses from Anthropology 175S, Asian American Studies 100A, 100B, Geography 186, History 161, 182A, 182B, 182C, 183, 184, 186, 187A, 187B, 187C, Political Science 135, 136, 159, 160, Sociology 134.

(2) Five courses from the following: any upper division courses in the social sciences listed above not being used to satisfy that requirement; any upper division courses in the Department of East Asian Languages and Cultures not being used to satisfy other parts of the major requirements; any new upper division courses relevant to East Asian or Asian American studies (including no more than three CED courses) which may be approved by the Executive Committee of the college on the recommendation of the advisory committee; Art History 114B, 114C, C115B, C115C; Music 140C, 141, 145, 146A, 146B, 146C, 147A, 147B*.

(3) The prescribed courses in one of the following areas (courses offered to satisfy this requirement may not be applied toward other parts of the major requirements): (a) *archaeology:* any four courses from East Asian Languages and Cultures 170A, 170B, Anthropology 112*, 115Q*, 115R*; (b) *geography:* Geography 133, 186, and two additional upper division geography courses; (c) *history:* four upper division or graduate courses in East Asian or Southeast Asian history (History 182A, 182B, 182C, 183, 184, 186, 187A, 187B, 187C, 190A, 190B, 197 when in the East Asian field); (d) *political science:* Political Science 115* and three courses from 135, 136, C137A, 137B, 159, 160, 161, C197 when in the East Asian field; (e) *sociology:* Sociology 124* and three courses from 113*, 126*, 134*, 151*, 154.

*Courses so marked have prerequisites which are not included among the courses mentioned here.

Sean R. Becketti, Ph.D.
Trudy Cameron, Ph.D.
David Dollar, Ph.D.
John C. Haltiwanger, Ph.D.
David K. Levine, Ph.D.
Sule Ozler, Ph.D.
Mark W. Plant, Ph.D.
Marc S. Robinson, Ph.D.
Sunil Sharma, Ph.D.
Carol Simon, Ph.D.
Kenneth Sokoloff, Ph.D.
Michael Waldman, Ph.D.

Scope and Objectives

UCLA's Economics Department is ranked among the 10 best in the nation according to a recent survey conducted by the Conference Board of the Associated Research Councils. Its undergraduate program is designed for students who wish to gain a thorough understanding of economic analysis. Emphasis is on economic principles applied to resolving interpersonal conflicts of interest and coordinating productive activity in a world of scarce resources. Because students must gain a thorough theoretical and technical competence before extensive study of the applied specializations in the discipline, the analytic core of the major in economics is closely structured. Some courses are appropriate for nonmajors, but the curriculum is most suitable for students who wish to make the study of economics the primary focus in their undergraduate education.

The undergraduate major provides analytical training in reference to socioeconomic phenomena and provides an excellent theoretical background for those pursuing graduate education in law, management, public administration, journalism, social welfare, architecture and urban planning, and education, as well as economics.

The graduate program is designed primarily for students pursuing the Ph.D. degree. The doctorate is awarded to those students who have achieved the level of study and training required for a professional economist. The degree recognizes students' ability to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas. A Master of Arts program is also offered, which involves coursework and comprehensive examinations designed for the Ph.D. student.

Bachelor of Arts in Economics

Pre-Economics Major

While you are completing the lower division preparation courses for the major, you may be classified as a pre-economics major. When you have completed the preparation courses for the major and before you reach 100 quarter units (but no later than 135 quarter units), you must petition to enter the major at the undergraduate counselor's office in 2253 Bunche Hall.

Preparation for the Major

Required: English 4 or 30 or two 100W courses; Economics 1, 2, 40 (or Mathematics 50 as a substitute for course 40); two courses in calculus (i.e., Mathematics 3A and 3B, or 3A and 3E, or 31A and 31B. Mathematics 3E is specifically designed for economics). All courses must be completed for a letter grade.

A 2.0 (C) grade is required in each premajor course, with a combined 2.5 GPA required in the economics and mathematics courses. You must petition for major standing by the time you attain 135 quarter units.

Repetition of more than one preparation course or of any preparation course more than once will result in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: Ten upper division courses in economics which must include Economics 101A, 101B, 102, and at least one course in three different fields in economics selected from the list below (all courses must be completed for a letter grade). Economics 100, 110, and 190 may not be included among the 10 upper division courses. One or two of the 10 courses may include Management 120 and/or 130 and/or 133 (Learning Center courses or courses transferred from other institutions may not be applied toward this option).

A grade of C or better is required in each of courses 101A, 101B, and 102. In addition, you must have a 2.0 grade-point average (computed separately) for both upper division economics and management courses (i.e., a grade-point deficiency in economics courses cannot be offset by grade points earned in management courses and vice versa). Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

Major Fields

Economic theory (courses 101A, 101B, 102, 103A-103Z, 104, 107); economic development (courses 111, 112); regional economics (courses 120, 121); public finance (courses 130, 133, M135, M136); statistics, mathematical economics, and econometrics (courses 141, 142, 143, 144, 145, 146, 147A, 147B); labor economics (courses 150, 151, 152); money and banking (courses 160, 161); government and industry (courses 170, 171, 172, 173, 174, 175, 176); economic institutions (courses 180, 181A, 181B, 182, 183); international economics (courses 191, 192).

Bachelor of Arts in Economics/Business

This program offers students a business orientation in their undergraduate studies. Designed to prepare students for careers in business and for professional business education at the graduate level, the program requires students to include specific courses offered by the department and the Graduate School of Management (see "The Major").

Admission

Resources for the program are limited, and only 250 students per year are admitted. Applications for admission are handled exclusively by the Department of Economics and are available only once or twice a year. To apply you must have completed at least 72 quarter units (but no more than 135 quarter units), one 12-unit quarter of residence in regular session at UCLA, and all courses listed under "Preparation for the Major." In addition, you must be enrolled in UCLA regular session at the time of application and have an overall UCLA grade-point average of 3.0 (B), an average of 3.0 in the economics courses, and a 3.0 average in all preparation courses except English.

Note: The requisite grade-point averages plus completion of the preparation for the major courses do not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration.

Preparation for the Major

Required: Economics 1, 2, 40 (or Mathematics 50); English 4 or 30 or two 100W courses; Management 1A, 1B; Mathematics 3A and 3B, or 3A and 3E, or 31A and 31B (Mathematics 3E is specifically designed for economics). All courses must be completed for a letter grade.

Repetition of more than one preparation course or of any preparation course more than once will result in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor in 2253 Bunche Hall before enrolling in any courses for the major.

The Major

Required: Economics 101A, 101B, 102, and at least two courses from 104, 173, 174; four other upper division courses in economics in at least two different fields; four upper division courses from Management 120, 122, 124, 130, 133, 140, and tax accounting (currently Management 197A). Learning Center courses or courses transferred from other institutions, including UCLA Extension, may not be applied toward the management part of the major. All major courses must be completed for a letter grade. Transfer credit for any of the major courses is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

You must maintain a UCLA 3.0 grade-point average throughout your program and must have a 3.0 GPA (computed separately) for both management and economics courses in order to remain in the major (i.e., a grade-point deficiency in economics courses cannot be offset by grade points earned in management courses and vice versa when computing the upper division grade-point minimum).

Bachelor of Arts in Economics/International Area Studies

This program is for students who wish to attain a specialized knowledge of a particular geographical area in addition to the economics analysis provided by the major. It should be useful to those who plan careers in international business or government service. The department encourages participation in the University of California Education Abroad Program or other recognized international study programs. Experience in foreign firms or institutions would be an advantage but yields no academic unit credit toward the major.

Admission

Qualified students must submit written applications to the undergraduate counselor in 2253 Bunche Hall to be admitted. To apply you must have completed at least 72 quarter units, one 12-unit quarter of residence in regular session at UCLA, and all courses listed under "Preparation for the Major." In addition, you must be enrolled in UCLA regular session at the time of application. All courses must be completed for a letter grade. A minimum 2.0 (C) grade is required in each premajor course, with a combined 2.5 GPA in the economics and mathematics courses. Language course preparation need not be completed at the time of admission but must be completed before preparing the research paper required in Economics 199. Your program as a whole must be approved by the Economics faculty adviser before you are admitted to the major; you must apply before you reach 135 quarter units.

Preparation for the Major

Required: Economics 1, 2, 40 (or Mathematics 50 as a substitute for course 40); two courses in calculus (i.e., Mathematics 3A and 3B, or 3A and 3E, or 31A and 31B. Mathematics 3E is specifically designed for economics). You also must complete the sixth quarter course (or equivalent) of any modern language (e.g., French 6, German 6, Russian 6, Spanish 25; these are most frequently offered in fulfillment of this requirement, but also see the offerings under Portuguese, Italian, Germanic Languages, Near Eastern Languages, African Languages, and East Asian Languages and Cultures).

Repetition of more than one preparation course or of any preparation course more than once will result in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: A total 15 upper division courses selected from economics and the list of "Approved Noneconomics Courses" below. Eleven must be from economics, including Economics 101A, 101B, 102 (with a grade of C or better in each), 191, 192, 199, and five courses from at least two different fields in economics (selected from the "Major Fields" listed under the regular economics major). Four of the remaining upper division courses must be chosen from the approved list below and must include selections from at least two different departments. Economics 199 must be completed in your last quarter before graduation and includes the preparation of a research paper on the economy of the country or region of your specialization, sponsored and supervised by an Economics faculty member. Sources in the language of the region or country must be utilized. The noneconomics courses, the research paper, and the language learned must show consistency of purpose.

One or two of the five upper division economics electives may include Management 120 and/or 130 and/or 133 (Learning Center courses or courses transferred from other institutions may not be applied toward this option). A 2.5 GPA (computed separately from the economics courses) is also required in the management courses applied to this option.

Transfer credit for any courses to be applied toward the upper division requirements is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

To remain in the major you must maintain a 2.5 GPA for both economics and noneconomics courses, computed separately (i.e., a grade-point deficiency in economics courses cannot be offset by grade points earned in noneconomics courses and vice versa).

Approved Noneconomics Courses

Anthropology 171, 175P, 175Q, 175R, 175S, 176, 177; Geography 181, 182A, 182B, 183, 184, 185, 186, 187, 188, 189, 190; History 106C, 107B, 108A, 109B, 110B, 111B, 112C, 113, 125E, 126E, 128D, 129C, 131C, 131D, 132B, 133B, 134B, 141B, 142A, 142B, 143, 144, 167A, 167B, 167C, 171, 173, 176B, 177, 178A, 178B, 179B, 184, 187C, 188B, 190B; Political Science 152 through 165, 166A, 166B, 166C; Sociology 130, 131, 132, 133, 134; others by department approval.

Specialization in Computing

Majors in economics, economics/business, and economics/international area studies may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61, (3) completing at least two courses from Economics 104, 145, 146, 147A, 147B, 199 (course 199 must be approved as relevant to both the specialization in computing and economics by the vice chair for Undergraduate Affairs). A grade of C or better is required in each course.

Bachelor of Science in Economics/System Science

The degree is described following the Economics Department courses.

Graduate Study

Admission

Applicants for graduate study who satisfy the University minimum requirements are eligible to apply. It is strongly recommended that you have undergraduate training in economics, mathematics, and statistics. You must also submit a full record of prior university experience, three letters of reference, and your scores in the Graduate Record Examination (GRE) Aptitude and Advanced Economics Tests.

The Department of Economics (2263 Bunche Hall, UCLA, Los Angeles, CA 90024) admits students only for the Fall Quarter of each academic year. The deadline for submitting the admission/fellowship application is December 31.

Major Fields or Subdisciplines

Economic theory; economic development; urban and regional economics; public finance; mathematical economics; statistics and econometrics; labor economics; money and banking; industrial organization; economic institutions; international economics; uncertainty and information.

Master of Arts Degree

Course Requirements

Candidates for the Master of Arts degree in Economics should have completed the equivalent of an undergraduate major in economics. The department requires nine upper division and graduate-level courses in economics completed in graduate standing at UCLA. These courses must include Economics 101A, 101B, and 102 with a grade of B or better and 107 with a grade of C or better.

Graduate-level courses in economic theory and history of economic thought may be substituted for these undergraduate courses. At least five of the nine courses must be strictly graduate economics courses.

You must also have completed, if not previously taken, two courses in calculus and one in statistics. Economics 144 may be used as one of the calculus courses and Economics 40 as the statistics course.

With consent of the graduate chair, you may offer a maximum of two courses in other social sciences such as history, management, mathematics, psychology, education, or philosophy in partial satisfaction of the degree requirements; however, you must still take five graduate economics courses.

Four units of course 596 may be applied toward the total course requirement and the minimum graduate course requirement.

Comprehensive Examination Plan

The comprehensive examination requirement for the master's degree may be met in one of the following three ways:

(1) A master's pass (M) or better in each of two full doctoral comprehensive examinations.

(2) Two master's passes (M) or better in each of two doctoral examinations, with one of the examinations being either the micro or macro half of the theory comprehensive.

(3) Three grades of master's pass (M) or better in the quantitative methods examination and in each half of the theory comprehensive. If you achieve a B+ average in Economics 246B and 246C, you automatically receive a pass (P) grade in the quantitative methods examination.

The macro and micro parts of the theory examination may be taken or repeated either separately or together, and the grades on each part will be recorded separately for meeting the requirements for the M.A. and Ph.D. degrees.

Ph.D. Degree

Foreign Language Requirement

Ph.D. candidates must offer one foreign language or a substitute program in mathematics prior to sitting for the University Oral Qualifying Examination. If the language option is selected, you are required to show a proficiency in one language — French, German, Russian, or Spanish — by passing the Educational Testing Service (ETS) examination with a grade of 500 or better. Students whose native language is not English may substitute English for the language requirement by petitioning the dean of the Graduate Division. If the mathematics substitute is selected, you must show proficiency in mathematics above that ordinarily required of Ph.D. candidates. Since elementary calculus is, as noted above, considered basic for all economists, the three required language-substitute courses must be at a level above first-year calculus. Specifically, Mathematics 32 and 110 or above fulfill the requirement.

Course Requirements

The specific course requirements which must be fulfilled prior to taking the University Oral Qualifying Examination are the following:

(1) *Quantitative Methods:* The requirement may be satisfied in any of the following ways: (a) achieving a B+ average in Economics 246B and 246C; (b) achieving a B average in at least two quarters of the advanced econometrics sequence (courses 247, 248, 249); (c) passing the quantitative methods waiver examination administered at the beginning of Fall Quarter.

(2) *U.S. or European Economic History:* You must take one upper division undergraduate course in either United States or European economic history with a grade of B or better. Economics 181A, 181B, or 183 may be taken to satisfy this requirement.

(3) *History of Economic Theory:* You must take one upper division undergraduate course in the history of economic theory with a grade of C or better. Economics 107 may be taken to satisfy this requirement.

You may petition the graduate committee to substitute any one of the above requirements with comparable coursework taken at a previous institution.

Qualifying Examinations

You are responsible for contacting the graduate adviser for additional regulations covering these examinations.

You are expected to take the theory comprehensive at the end of the Spring Quarter of your first year or in the beginning of the Fall Quarter of your second year. During the second and third years, you will have to pass further written examinations in three elective fields.

Written examinations are graded H (honors pass), P (pass at the Ph.D. level), M (pass at the M.A. level), and F (fail). You are considered to have completed your theory and elective field examinations when you have earned at least four P grades.

The macro and micro parts of the theory examination may be taken or repeated separately or together, and the grades on each part are recorded separately for meeting the requirements for the M.A. and Ph.D. degrees. For the Ph.D. degree, the overall theory grade will be the lower of the grades on each of the macro and micro parts.

In order to be advanced to candidacy, you are required to present a paper in a departmental workshop. It is recommended that this be done by the end of your third year.

The University Oral Qualifying Examination, administered by your doctoral committee, is scheduled after successful completion of all the written examinations, other course requirements, and the foreign language requirement, and after the submission of a written dissertation proposal. The examination focuses on, but is not limited to, the dissertation proposal.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

A final oral examination on the doctoral dissertation is required unless it is waived by the committee that supervises the dissertation.

Lower Division Courses

1. Principles of Economics. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. An introduction to the principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on allocation of resources and distribution of income through the price system.

2. Principles of Economics. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. An introduction to the principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregative economics, including national income, monetary and fiscal policy, and international trade.

3. Lower Division Research Seminar in Microeconomics. Prerequisite: course 1. Limited to freshmen and sophomores. Seminar in which students do an intensive research project under guidance of regular faculty. Students select topics in consultation with instructor (topics limited to materials covered in course 1), write papers, and present them at the seminar.

4. Lower Division Research Seminar in Macroeconomics. Prerequisite: course 2. Limited to freshmen and sophomores. Seminar in which students do an intensive research project under guidance of regular faculty. Students select topics in consultation with instructor (topics limited to material covered in course 2), write papers, and present them at the seminar.

40. Introduction to Statistical Methods. Lecture, three hours; discussion, one hour. Not open to students with credit for Mathematics 50, 150A-150B-150C, 152A-152B, or Management 115. Elements of statistical analysis. Presentation and interpretation of data; descriptive statistics; theory of probability and basic sampling distributions; statistical inference, including principles of estimation and tests of hypotheses; introduction to regression and correlation.

Upper Division Courses

Courses 1 and 2, or 100 are prerequisite to all upper division courses in economics.

100. Economic Principles and Problems. Lecture, three hours. Not open to students with credit for course 1 or 2. The principles of economics with application to current economic problems. May not be used to fulfill entrance requirements for any Economics Department major. Mr. Murphy (F,W,Sp)

101A. Microeconomic Theory. Lecture, three hours; discussion, one hour. Prerequisites: two courses in calculus or consent of instructor. The laws of demand, supply, returns, and costs; price and output determination in different market situations.
Mr. Hirshleifer, Mr. Ostroy, Mr. Riley

101B. Microeconomic Theory. Lecture, three hours; discussion, one hour. Prerequisite: course 101A. Theory of factor pricing and income distribution; general equilibrium; implications of the pricing process for the optimum allocation of resources; interest and capital. Mr. Hirshleifer, Mr. Ostroy

102. Macroeconomic Theory. Lecture, three hours; discussion, one hour. Prerequisites: two courses in calculus or consent of instructor. Theory of income, employment, and the price level. Analysis of secular growth and business fluctuations; introduction to monetary and fiscal policy.
Mr. Clower, Mr. Darby, Mr. Thompson

103A-103Z. Upper Division Research Seminar: Applications of Economic Theory. Prerequisites: course 101A and others as set by instructor. Limited enrollment seminars in which students usually write a research paper on a topic selected in consultation with instructor.

M103A. Political and Economic Issues in the Proliferation of Nuclear Weapons. (Same as Political Science M139A.) An interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of the acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues.
Mr. Intriligator (alternate years)

103B. Economics of Energy. Prerequisites: courses 101A, 101B, 102. Topics include pricing and taxation of exhaustible resources, interactions between energy and the economy, institutions such as OPEC and oil price controls, oil debt and the balance of payments, energy conservation, and future technologies.
Mr. Robinson

104. Managerial Economics. Lecture, three hours. Prerequisite: course 101A. Enrollment priority to economics/business students. Application of economic principles to business decisions. Allocating joint costs. Implicit costs of capacity constraints. Problems in capital budgeting, financing, and pricing. The role of interest rates in business decisions. Mr. Riley

107. History of Economic Theory. Lecture, three hours. A survey of economic analysis from Grecian antiquity to the early 20th century, concentrating on the 18th and 19th centuries; special attention to selected writers, including Aristotle, the Mercantilists, the Physiocrats, Hume, Smith, Malthus, Ricardo, Marx, Marginalists, and Marshall.
Mr. Allen, Mr. Hilton

110. Economic Problems of Underdeveloped Countries. Lecture, three hours. Limited to non-Economics Department majors. Not open for credit to students with credit for course 111 or 112. A survey of the major issues of development economics. Economic structure of low income countries and primary causes for their limited economic growth. Economic goals and policy alternatives open to their leaders. Possible roles of developed countries. May not be applied toward any Economics Department major.
Mr. Edwards

111. Theories of Economic Growth and Development. Lecture, three hours. Prerequisite: course 101A. Growth models, theory of production under constraints, relative factor prices and their impact on choice of technology, investment criteria, role of the market, economic planning in less developed areas.
Mr. Edwards

112. Policies for Economic Development. Lecture, three hours. Prerequisite: course 102 or 111. Suggested strategies for economic development: inflation, balanced growth, industry vs. agriculture, import substitution, export-oriented expansion, foreign aid, and others. Selected case studies. Mr. Edwards

120. Introduction to Urban and Regional Economics. Lecture, three hours. Prerequisite: course 101A or consent of instructor. A survey of the broad range of policy and theoretical issues that are raised when economic analysis is applied in an urban setting. Topics include urbanization and urban growth, housing markets, location decisions of households and firms, transportation, urban labor markets, and the local public sector. Mr. Ellickson, Mr. Hirsch

121. Urban Economic Analysis. Lecture, three hours. Prerequisites: courses 101A, 101B, and 120, or consent of instructor. Urban economic analysis requires the development of analytical tools that are different in some respects from the standard methodology presented in course 101A or 101B. The construction and implementation of these tools, with applications to urban location decisions, housing, transportation, labor markets, and the local public sector.
Mr. Ellickson, Mr. Hirsch

130. Public Finance. Lecture, three hours. Prerequisites: courses 101A and 101B, or consent of instructor. Contrast between organization of economic activity by government and the private sector. Analysis of alternative norms for governmental activity. Methods of assessing benefits of alternative public expenditure projects and burdens of alternative forms of taxations. The use of fiscal policy to achieve economic targets. Techniques of debt management and their interaction with monetary policy.
Mr. Haltiwanger, Mr. Plant, Mr. Robinson

133. State and Local Finance. Lecture, three hours. Prerequisite: course 130. The division of functions and revenues between state and local governments; the revenues, expenditures, and indebtedness of these governments. Analyses of state and local tax systems. Mr. Hirsch

M135. Economic Models of Public Choice. (Formerly numbered M135A.) (Same as Political Science M105.) Prerequisites: course 101A, any lower division political science course other than Political Science 1, and junior/senior standing, or consent of instructor. Analysis of the methods and consequences of arriving at collective decisions through political mechanisms. Topics include the free-rider problem, voting and majority choice, demand revelation, and political bargaining. Mr. Hirshleifer, Mr. Rogowski, Mr. Stein, Mr. Wallerstein

M136. Economic Models of Political Conflict and Conflict Resolution. (Formerly numbered M135B.) (Same as Political Science M106.) Prerequisites: course 101A, any lower division political science course other than Political Science 1, and junior/senior standing, or consent of instructor. Biological, cultural, and organizational sources of political conflict. The role of threats, promises, commitments. Models of the onset and termination of conflict. The conduct of war: strategy and tactics.
Mr. Hirshleifer, Mr. Stein

141. Principles of Statistical Decision. Lecture, three hours. Prerequisite: course 40 or equivalent. Errors of the first and second kind; economic loss functions; prior probabilities and Bayes' theorem. Analysis of classical and Bayesian approaches. Application to inventory and production problems. The value of information and implications for sampling design.
Mr. Ellickson, Mr. Hirshleifer, Mr. McCall, Mr. Ostroy

142. Probabilistic Microeconomics. Lecture, three hours. Prerequisites: courses 40 (or 41), 101A, 101B. Combination of the basic probability introduced in course 40 (or 41) with the microeconomic models presented in courses 101A and 101B in order to explain phenomena such as insurance, job search, and stock market behavior. Optimal production and consumption under uncertainty. A review of probability and an introduction to alternative measures of risk and risk aversion. Mr. McCall

143. Applied Regression Analysis. Lecture, three hours; discussion/computer tutorial, one hour. Prerequisite: course 40 or equivalent. Not open to students with credit for course 147A or 147B. Review of simple regression; the assumptions of the classical linear regression model; multiple regression, estimation, and inference; violations of the assumptions of the classical model (multicollinearity, heteroscedasticity, autocorrelation); autoregressive models, dummy variables. Emphasis on practical experience with regression analysis and interpretation; matrix algebra not required. Ms. Cameron, Mr. Plant (F,W)

144. Introduction to Mathematical Methods in Economics. Lecture, three hours. Prerequisites: courses 101A, 101B, two courses in calculus. An introduction to the use of calculus in economic analysis. Topics include partial differentiation, optimization, integration, and differential and difference equations, with applications to the theory of the household and the firm, capital theory, and economic dynamics.
Mr. Ellickson, Mr. Intriligator, Mr. Riley

145. Topics in Mathematical Economics. Lecture, three hours. Prerequisite: course 144. Possible topics include theory of economic growth; competitive equilibrium analysis; examination of market failure and the role for market intervention.
Mr. Ellickson, Mr. Ostroy

146. Linear Models in Economics. Lecture, three hours. Prerequisite: a course in linear or matrix algebra. Not open for credit to students with credit for Mathematics 144, Electrical Engineering 136, or former Electrical Engineering 129A. Possible topics include the duality theory of linear programming and the simplex algorithm, input-output analysis, and two-person zero-sum games.
Mr. McCall, Mr. Ostroy (Sp)

147A. Introduction to Econometrics. Lecture, three hours. Prerequisites: two courses in calculus and course 41 (or Mathematics 150A-150B or 152A-152B), or consent of instructor. An introduction to econometrics, including a review of matrix algebra and statistical theory; the linear regression model; model specification; data collection; estimation and hypothesis testing; and an introduction to simultaneous equations models. Original econometric paper required.
Mr. Ellickson, Mr. Intriligator, Mr. Levine

147B. Applications of Econometrics. Lecture, three hours. Prerequisite: course 147A. Econometric models and data; forecasting, policy analysis, estimation of simultaneous equations models, applications of econometrics. Major original econometric paper required.
Mr. Ellickson, Mr. Intriligator, Mr. Levine

150. Wage Theory. Lecture, three hours. Prerequisites: courses 101A and 101B, or consent of instructor. The supply and demand for labor. Analysis of government, union, and other constraints on the competitive system of wage determination. Wage level and structure. Wages and human capital theory.
Mr. Haltiwanger, Mr. Plant, Mr. Waldman

151. Labor, Wages, and Income. Lecture, three hours. Prerequisite: course 150 or consent of instructor. Selected topics in labor theory; income distribution; business cycles and unemployment; investments in human capital and life cycles; migration; human fertility; marriage and divorce, etc.

152. Trade Unions and Professional Associations. Lecture, three hours. Comparative behavior of unions and professional associations; criteria for wage maximization; quantification of gains; analysis of legal framework applying to such organizations.
Mr. Hilton

160. Money and Banking. Lecture, three hours. Recommended prerequisite: course 102. Principles of money and banking in the United States; legal and institutional framework; money supply process; instruments, effects, and practice of monetary policy.
Mr. Darby

161. Monetary Theory. Lecture, three hours. Prerequisite: course 160. The nature of money and monetary exchange; level and term structure of interest rates; level and growth rate of money; transmission of monetary shocks; theory and practice of monetary policy. Mr. Clower, Mr. Darby

170. Monopoly and Competition. Lecture, three hours. Prerequisite: course 101A. A comparison of economic and legal treatments of the competitive process. Monopoly competition, and collusion as economic theory, as antitrust doctrine, and as fact. Source of monopoly. Predatory behavior. Misleading practices in theory and policy. The general problem of the relationship between private rights of action and competitive entry. Mr. Demsetz, Mr. Klein

171. Industrial Organization: Theory and Tactics. Lecture, three hours. Prerequisite: course 101A. Study of pricing and output decisions of firms under conditions of less than perfect competition or monopoly; theories of oligopoly and monopolistic competition; information costs and advertising; examination of pricing practices such as price discrimination, tie-in selling, predatory pricing, and resale price maintenance. Mr. Demsetz, Mr. Klein

172. Economic Analysis of Laws and Legal Institutions. Lecture, three hours. Prerequisite: course 101A. Application of economic theory to legal rule formulation: study of the economic nature and consequences of alternative legal arrangements, with special reference to property rights. Application of economic theory to analysis of effects of laws relative to property, contracts, torts, crimes, taxation, and constitutional issues. Analysis of the legal process.
Mr. Demsetz, Mr. Hirsch

173. Centralized Markets. Lecture, three hours. Prerequisite: course 101A. Enrollment priority to economics/business students. Organization and function of stock, bond, commodity, and foreign exchange markets. Theory and evidence relating to the efficiency of these markets in evaluating information , to their role in facilitating risk-bearing and capital allocation. The interrelationship between business finance and organized capital markets.
Mr. Demsetz, Mr. Klein, Ms. Simon

174. The Organization of the Firm. Lecture, three hours. Prerequisite: course 101A. Enrollment priority to economics/business students. The role of the firm in traditional economic theory and modern developments in the theory of the firm. The functions of ownership and management in the face of risk and opportunism. The internal organization of the firm. The problem of separation of ownership from control in the modern corporation. Determinates of firm size, vertical integration, and degree of specialization of the activities of firms. Decision making within the firm in a democratic setting. Mr. Demsetz, Mr. Klein

175. Economics of Transportation. Lecture, three hours. Recommended prerequisite: course 101A. The economic characteristics of transport; the functions of the different agencies; pricing and resource allocation in transport; public regulation of transport; urban transport; the modern transport problem. Mr. Hilton

176. Business and Government. Lecture, three hours. Prerequisites: courses 101A, 101B. Several aspects of the interaction between business and government, including the regulation of prices, entry, working conditions, natural resource use, policies of taxation, and subsidy of business. Mr. Demsetz

180. Comparative Economic Systems. Lecture, three hours. Prerequisites: courses 101A, 101B. A comparative analysis of capitalist and socialist economies. Pure models; attention to actual economies selected in the light of those models and the march of events. Mr. Murphy

181A. Development of Economic Institutions in Western Europe. (Formerly numbered C181.) Lecture, three hours. Prerequisite: upper division standing. European economic history, 900-1700. Custom, command, and market modes of organization. Evolution of property rights, contract forms, and monetary arrangements. Decline of feudal institutions, especially serfdom. The open field village and enclosures. Crafts manufacturing and guild organization. Development of banking. Public finances and the role of government. (Offered approximately every third year.) Mr. Leijonhufvud

181B. Development of Economic Institutions in Western Europe. (Formerly numbered C181.) Lecture, three hours. Prerequisite: upper division standing. European economic history, 1700-1914. The industrial revolution in Britain and its spread to the continent. The rise of factories, industrial firms, and unions. Changes in the standard of living and demographic consequences. Imperial expansion and the decline of Britain. Worldwide diffusion of economic growth and the Gerschenkron hypothesis. (Offered approximately every other year.) Mr. Sokoloff

182. Centralized Economics Systems. Lecture, three hours. Prerequisites: courses 101A, 101B. Introduction to the theory of centralized systems and an examination of some centralized economies. Considerable attention to the economy of the U.S.S.R.; some attention to other economies selected in light of the centralized model and with a view to the march of current events. Mr. Murphy

183. Development of Economic Institutions in the United States. Lecture, three hours. A study of the changing economic conditions in the U.S. from Colonial times to the early 20th century and the effects of these changes on American society. Mr. Sokoloff

190. International Economics. Lecture, three hours. Limited to non-Economics Department majors. Not open to students with credit for course 191 or 192. A general introduction to international economics, based on an examination of the theory of trade and the means and significance of balance of payments adjustments, with analysis of major issues of international commercial and monetary policy confronting national and international agencies. May not be applied toward any Economics Department major. Mr. Becketti

191. International Trade Theory. Lecture, three hours. Prerequisite: course 101B. Not open to students with credit for course 190. The theory of international trade: the bases, direction, terms, volume, and gains of trade. The effects of tariffs, quantitative restrictions, and international integration. The effects of free and restricted trade on economic welfare and political stability. Mr. Dollar

192. International Finance. Lecture, three hours. Prerequisite: course 102. Not open to students with credit for course 190. Emphasis on the interpretation of the balance of payments and the adjustment to national and international equilibria through changes in price levels, exchange rates, and national income. Other topics include making international payments, determination of exchange rates under various monetary standards, capital movements, exchange controls, and international monetary organization. Ms. Ozler

199. Special Studies in Economics (2 or 4 units). Prerequisites: courses 101A, 101B, junior/senior standing, consent of instructor. May be repeated but may be applied only once toward the major requirements.

Graduate Courses

201A. Theory of Consumption and Exchange. Preferences, demand, exchange, pricing, and markets in an exchange economy. Emphasis on derivation and interpretation of theorems, illustrated by applications. Mr. Hirshleifer

201B. Theory of Production and Distribution. Theory of the firm, with particular attention to the demand for factors of production in the short and long runs. May cover an introduction to general equilibrium theory and welfare economics. Mr. Welch

201C. Theory of Interest and Capital. Intertemporal choice and equilibrium, interest, and accumulation of capital, decisions under uncertainty, and the allocation of risk.

202A. Macroeconomics I (Macrostatics). The Keynesian income-expenditure approach. Expenditures functions. Money demand and supply functions. The IS-LM model and its extensions. Large-scale macroeconometric models. Mr. Darby, Mr. Leijonhufvud

202B. Macroeconomics II (Macrodynamics). The neoclassical growth model. Money and growth. Adjustment dynamics. Rational expectations. Unemployment and inflation. The Keynesianmonetarist controversy. International macroeconomics. Stabilization policy. Mr. Darby, Mr. Leijonhufvud

202C. Macroeconomics III (Disequilibrium Approaches and Critiques). Microfoundations. The Wicksellian theme. Keynes and the classics. Theory of effective demand failures. Critiques and critics of mainstream macroeconomics. Mr. Darby, Mr. Leijonhufvud

M203A. Economics of Decision. (Same as Management M203A.) Prerequisites: rudiments of economic theory, calculus, probability, and statistics. Norms and facts of decision making in the household, business, and government. Consistent behavior in terms of personal utilities and probabilities. Multiattribute value theory. Departures from consistency: descriptive theories of behavior and resulting models. Mr. Erlenkotter, Mr. Sarin

M203B. Economics of Information. (Same as Management M203B.) Discussion, three hours. Prerequisites: rudiments of economic theory of the firm, calculus, probability, and statistics; course M203A or consent of instructor. Optimal decision and information rules. Risk aversion, stochastic dominance, and their impact on economic decisions in a stochastic environment. Mr. Lippman

M203C. Economics of Organization. (Same as Management M203C.) Prerequisites: courses M203A, M203B. Rational models of teams. Relation to the theory of games.

204A-204Z. Applications of Economic Theory. (Formerly numbered 204A-204H.) Lecture, three hours.

M205. Topics in Applied Game Theory. (Formerly numbered M204C.) (Same as Political Science M241.) Lecture, three hours. Prerequisites: calculus or introductory probability, and graduate standing in economics or consent of instructor. Survey and application of the major solution concepts to models of bargaining, oligopoly, cost allocation, voting power, etc. Course paper consists of a substantial game-theoretic model on a topic in the student's particular field of interest. Mr. Shapley

207. History of Economic Theory. Mr. Allen

211. Economic Development. Prerequisite: graduate standing in economics or consent of instructor. General survey of current literature, emphasizing empirical tests of development theories. Mr. Edwards

212. Applied Topics in Economic Development. Prerequisite: course 211 or consent of instructor. Applications of theories of development to case studies, including project analysis, policy-making at the national level, and economic planning, occasionally with emphasis on a single applied research area for the entire quarter. Mr. Edwards, Mr. Harberger

213A-213B. Selected Problems of Underdeveloped Areas. Seminars for graduate students.

221. Urban and Regional Economic Analysis I. Development of theoretical and empirical analysis of the major urban markets, including land and housing, transportation, labor, and the local public sector. Particular emphasis on interdependencies within and between these markets. Mr. Ellickson, Mr. Hirsch

222. Urban and Regional Economic Analysis II. Prerequisite: course 221. Development of theoretical and empirical analysis of the major urban markets, including land and housing, transportation, labor, and the local public sector. Particular emphasis on interdependencies within and between these markets. Mr. Ellickson, Mr. Hirsch

231. Public Finance. Criteria for organization of economic activity by government and the private sector. Use of cost-benefit analysis in selection of proposed public projects. Effects of various taxes. Use of tax policy in influencing level of economic activity and distribution of wealth. Debt management and its interaction with monetary and fiscal policy. Mr. Harberger, Mr. Somers

232. Economics of Government Expenditures. Evaluation of various areas of government expenditure on basis of efficiency and other criteria. Selection of appropriate discount rate. Use of program budgeting techniques to control expenditure. Areas covered include education, judicial system, prison reform reclamation, health insurance, child care, energy conservation, regulatory activity, defense. Mr. Somers

233. Topics in Public Finance. Lecture, three hours. Discussion of tax incidence and optimal taxation; analysis of various taxes: personal income, corporate income, property, capital gains, consumption, and windfall profits. The excess burden and the incidence of these tax policies, with emphasis on the different types of models economists have used to consider these questions. Other topics of current interest may be covered from year to year.

234. Economics of Federalism. Theories of perfect games and social organization. Collective goods, collective defense, and the role of government. Local public goods, spillovers, and intergovernmental relations. Mr. Thompson

M240. Control and Coordination in Economics. (Same as Computer Science M222.) Prerequisite: graduate standing in economics or engineering or consent of instructor. Recommended: appropriate mathematics course. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization, coordination in teams; certainty equivalence and separation theorems; stochastic and learning models. Bayesian approach to price and output rate adjustment.

241A-241B-241C. The Economics of Uncertainty and Information. Prerequisites: calculus, introductory probability. Examination of how individuals adapt to the fact of uncertainty, with special emphasis on topics such as private versus social risk, adverse selection and moral hazard, and asset pricing under uncertainty. The ways in which individuals overcome uncertainty by engaging in informational activities. Topics include speculation, innovation, market signaling, and rational expectations. Emphasis switch from event uncertainty to market uncertainty, with focus on price searching, queueing, Brownian motion, and auction design. Mr. Hirshleifer, Mr. McCall, Mr. Riley

M242A-M242B. Game Theory. (Formerly numbered 242A-242B.) (Same as Political Science M242A-M242B.) Lecture, three hours. Prerequisites: course 245A or suitable mathematics courses. Elements of the theory of cooperative and noncooperative games, with applications to economic models. Strategic and coalitional games, minimax, Nash-Cournot equilibrium, bargaining theory, the core, value, and other solution concepts; applications to oligopoly, general exchange and production economies, allocation of joint costs. Mr. Shapley

243A-243B-243C. Workshop in Mathematical Economic Theory. Prerequisite: consent of instructor. Workshop for dissertation writers and predissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading. Mr. Intriligator, Mr. Ostroy, Mr. Riley

244. Economic Modeling. Designed to help students learn to switch back and forth from the precise language of mathematics, as they analyze economic phenomena. Emphasis on the techniques of multivariate constrained optimization. Development of modeling skills by considering a sequence of economic issues (e.g., peak load pricing, regulation monopoly, capital asset pricing, Pareto efficiency). Mr. McCall, Mr. Riley

245A-245B-245C. Advanced Theory and Mathematical Economics. Prerequisite: course 201C or equivalent or consent of instructor. Selected advanced theoretical topics of current interest and an introduction to modern mathematical economics, including general equilibrium theory. Mr. Intriligator, Mr. Ostroy, Mr. Riley

246A. Statistical Foundations of Econometrics. Lecture, three hours. Provides the statistical tools necessary for an understanding of econometric techniques. Topics include random variables, distribution and density functions, sampling, estimators, estimation techniques, and statistical inference. Use of economic problems and examples.

246B. Introduction to Theory of Econometrics. Least-squares regress, generalized least squares, serial correlation, errors-in-variables, simultaneous equations, multicollinearity. Mr. Intriligator

246C. Applications of Econometrics. Selected econometric studies of consumption, investment, asset demand production functions, goods markets, factor markets, industrial organization, public finance, international trade. Instruction on use of computer. Students expected to write a research paper.

247. Single Equation Econometrics. Linear regression, specification error, autocorrelation, nonnormality, nonlinear estimation, outliers, qualitative dependent variables, aggregation structural change. Mr. Leamer

249. Multiple Equation Econometrics. Multivariate regression, error-in-variables, simultaneous equations, proxy variables (latent variables). Mr. Intriligator, Mr. Leamer

M249. Special Topics in Econometrics. (Formerly numbered 249.) (Same as Political Science M249.) Prerequisites: courses 247, 248. A seminar on one of several special topics such as Bayesian inference, time-series methods, nonlinear estimation, or qualitative variables, depending on the particular interests of the instructor. Mr. Intriligator, Mr. Leamer, Mr. McCall

251. Labor Economics I. Analysis of wage determination in competitive labor markets. Extension of wage determination to schooling and occupational choice. Empirical literature of life cycle earnings profiles. Special topics include discrimination, minimum wage legislation, and unionism. Mr. Welch

252. Labor Economics II. Prerequisite: course 251. Models of life cycle learning and work behavior together with one-period models of labor supply. Special emphasis on the recent literature of family decisions concerning labor supply behavior of women. Mr. Welch

253. Labor Problems. Mr. Welch

254A-254B-254C. Studies in Human Resource Economics. Prerequisite: consent of instructor. Workshop for dissertation writers and predissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. S/U grading. Mr. Welch

261. Monetary Economics I. Prerequisites: courses 202A, 202B, 202C. The existence of money; financial institutions and markets; supply of money; demand for money; money and wealth; money and growth; money and fluctuations in real income, employment, and inflation; interest rates; international monetary arrangements; monetary policy. Mr. Clower, Mr. Leijonhufvud, Mr. Thompson

262. Monetary Economics II. Prerequisites: courses 202A, 202B, 202C. The existence of money; financial institutions and markets; supply of money; demand for money; money and wealth; money and growth; money and fluctuations in real income, employment, and inflation; interest rates; international monetary arrangements; monetary policy. Mr. Clower, Mr. Leijonhufvud, Mr. Thompson

263A-263B-263C. Studies in Monetary Economics. Prerequisite: consent of instructor. Workshop for dissertation writers and predissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading. Mr. Darby

271. Industrial Organization, Price Policies, and Regulation: Theory. Analysis of the institutional resolution of the problem of economic organization. Major economic aspects of the property right system underlying these institutions. The firm and the market compared from the perspective of alternative arrangements for allocating resources. Traditional problems of competition, monopoly, and industrial concentration. Brief analysis of those portions of antitrust policy bearing on industrial structure. Mr. Demsetz

272. Industrial Organization, Price Policies, and Regulation: Policy. Prerequisite: course 271. Study of firm organization and pricing under conditions of less than perfect competition; information costs and advertising; economic and legal analysis of marketing practices, such as discrimination, tie-in selling, resale price maintenance, exclusive dealing, and territorial arrangements. Mr. Klein

273. Public Utility Regulation. Theory, practice, and consequences of regulation in electric power, gas, water, telecommunications, broadcasting, and other regulated industries; experience of unregulated monopoly and public enterprises by way of contrast. Mr. Hilton

274. Mathematical Theory in Industrial Organization. Lecture, three hours. Prerequisites: courses 201A, 201B, 201C. Formal modeling of the theory of industrial organization: the principal-agent problem; entry deterrence; endogenous price discrimination; monopolistic competition; new approaches to rationality. Mr. Waldman

275. National Transport Policy. Regulation of surface and air carriers; pricing and investment in public transport facilities; policy toward the merchant marine. Mr. Hilton

277A-277B-277C. Workshop in Law and Economics. Prerequisites: graduate standing, consent of instructor. Workshop for dissertation writers and predissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading. Mr. Demsetz, Mr. Klein

279A-279B-279C. Dissertation Research Workshop in Economic Organization. Discussion, three hours. Prerequisite: consent of instructor. A workshop for advanced graduate students writing dissertations in the areas of transaction and information costs and the role these costs play in economic organizations and market processes. S/U grading. Mr. Demsetz, Mr. Klein

281. Evolution of Economic Institutions in Western Europe. (Formerly numbered C281.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Seminar on selected topics in European economic history, with emphasis on theoretical analysis of institutions and institutional change. Examples: theories of serfdom and its disappearance, open field system and enclosures, social classes and class conflict, guild vs. factory organization of manufacturing. Mr. Leijonhufvud

282. Soviet Economic Theory and Organization. The overall strategy of planning used by U.S.S.R. planners and specific planning methods, interpreted broadly to cover not only instructions and objectives but also institutional arrangements. Intended and unintended outcomes of the methods. Mr. Murphy

283. Evolution of Economic Institutions in the United States. An introduction to the professional literature of American economic history and to the most important substantive issues raised therein. Mr. Sokoloff

291. International Trade Theory. Theoretical and empirical analysis of the microeconomic relationships among countries. The determinants of commodity and factor flows, prices, and factor rewards. The effects of trade barrier. Mr. Allen, Mr. Leamer

292. International Finance. Theory of evidence on the balance of payments, exchange rate determination, international transmission of inflation and business cycles, macroeconomic policy in open economics, alternative monetary systems. Mr. Allen, Mr. Edwards, Mr. Leamer

293A-293B-293C. International Economics: Selected Topics. (Formerly numbered 293A-293B.) Discussion, three hours. Student presentation of dissertation research, lectures by visiting experts and resident faculty members, and student discussion of current published research, to expose students to critical analysis of their work and to suggest dissertation topics. S/U grading (based on oral and written performance). Mr. Edwards, Mr. Harberger, Mr. Leamer

299A-299B-299C. Workshop for Preparing a Dissertation Proposal. (Formerly numbered 299.) Lecture, three hours. Workshop for third-year graduate students who are preparing for their oral qualifying examination. Presentation of journal articles for critical analysis to develop students' analytical skills. Presentation of students' own research for critical analysis by fellow students and faculty. Workshop open to research in all fields of economics. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Individual Study (2 to 8 units). Directed individual study or research. S/U grading.

597. Individual Study: Graduate Examinations (2 to 8 units). Directed individual study in preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. S/U grading.

599. Individual Research: Ph.D. Dissertation (2 to 8 units). Prerequisite: advancement to Ph.D. candidacy. Directed individual research in preparation of Ph.D. dissertation. S/U grading.

Economics/System Science
(Interdepartmental)

2263 Bunche Hall, (213) 825-1011

Professors

Masanao Aoki, Ph.D. *(Computer Science)*
Bryan C. Ellickson, Ph.D. *(Economics)*
Michael D. Intriligator, Ph.D. *(Economics)*
Stephen E. Jacobsen, Ph.D. *(Electrical Engineering)*

Scope and Objectives

The major is an alternative to the regular departmental major in economics and combines work in the School of Engineering and Applied Science with preparation in economic theory and in those aspects of mathematics and statistics necessary for the study of quantitative aspects of economics and systems theory. The major is appropriate for students with interests in such areas as economic theory, mathematical economics, econometrics, feedback and control systems, optimization, computing techniques, and the modeling and analysis of various socioeconomic systems.

Bachelor of Science Degree

Admission

Written applications are accepted from April 1 to May 15 only. Ten to 15 students are admitted based on space availability, completion of preparation for the major courses, and the GPA in those courses. Minimum qualifications for admission include the completion of six preparatory courses (four of the mathematics courses with a minimum GPA of 3.0 exclusively must be included) and an overall 2.75 GPA in the preparatory courses. Any transfer credit applied to the major will be used in GPA calculations; physics grades will not be calculated into the GPA.

Preparation for the Major

Required: Economics 1 and 2; Computer Science 10C or 10F or Program in Computing 3 or 10A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Strongly recommended but not required: Physics 8A, 8B, 8C, 8D. All courses must be completed for a letter grade of C – or better.

Repetition of more than one preparation course or of any preparation course more than once will result in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor in 2253 Bunche Hall before enrolling in any courses for the major.

The Major

Required: Fourteen upper division courses as follows: six courses in economics selected from Economics 101A and above, including 101A, 101B, 102, and one course from 141, 142, 144, 145, 146, 147A, 147B; six courses in system science selected from Computer Science 170, Electrical Engineering 102, 103, 131A, 131B, 136, 141, 142, including 131A (or Mathematics 150A or 152A) and 131B (or Mathematics 151 or 152B); two courses in mathematics selected from Mathematics 110A and above (such mathematics courses may not also be applied toward the system science requirements).

Recommended courses include Computer Science 170 and Electrical Engineering 141 and 142 in the area of dynamic systems analysis and Electrical Engineering 136 in the area of optimization.

All upper division major courses must be completed for a letter grade of C – or better, with an overall 2.0 GPA.

Education

The College of Letters and Science offers a program of courses through which you may receive credit toward a credential to teach in California elementary schools. For details, see "Diversified Liberal Arts" earlier in this chapter.

David Stuart Rodes, Ph.D.
Jerome Cushman, A.B., B.S.L.S., *Emeritus*
Everett L. Jones, M.A., *Emeritus*

Adjunct Professor

Brian Moore

Scope and Objectives

An interest in English and American literature draws many students to the Department of English, which also offers courses in other fields, including the history and structure of the English language itself. Although committed to no single method or approach, the department encourages an emphasis on literary history and requires of its undergraduate majors a firsthand acquaintance with such influential writers as Chaucer, Milton, and Shakespeare. Students may range outward from this core to a rich variety of other fields — literary criticism, for example, or the ethnic literatures and popular culture of America, or the relation of literature to such complementary disciplines as history, sociology, psychology, and philosophy. Qualified students may elect a concentration in creative writing or an interdisciplinary program in American studies.

An understanding and appreciation of literature can furnish lifelong rewards. In addition to such personal benefits, the department seeks to impart the capacity to make balanced critical judgments and the ability to write the English language persuasively, with point and effect. Such skills are essential to success in a variety of professions for which the major in English can provide excellent preparation, including law, administration, business, and teaching.

A graduate program leading to the Master of Arts degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the Ph.D. degree. Because the Ph.D. program may require six years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

Bachelor of Arts Degree

Admission to Courses in English

You must have completed the Subject A requirement before taking any courses in English (other than English A or B). For further information regarding Subject A, see "Undergraduate Degree Requirements" in Chapter 2.

Preparation for the Major

Required: English 3, 4, 10A, 10B, 10C taken in the stated sequence (each course is a prerequisite for the next course).

Extra-Departmental Requirement in Foreign Literature or Foreign Language: All English majors must have completed either (1) level five or equivalent in any one foreign language or (2) any combination of five courses in foreign language and foreign literature, including foreign literature in translation (see course listings later in this section of the catalog). Italian 46 and former courses 46A-46B-46C may not be applied. For option 2, the department especially recommends Classics 144, Humanities C107, 116. These courses may be taken on a P/NP grading basis.

The Major

Required: English 141A or 141B, 142A, 142B, 143, at least one course from the 180 series, and a minimum of seven additional upper division English courses. At least five of the seven courses must be selected from 140A, 140B, 142C, or 150 through 190. At least one of the seven courses must be in literature before 1800 (the 150 series).

You are encouraged to choose additional electives from courses 140A through M197. English 140A is especially recommended if you plan graduate work in literature. You may wish to select several courses in the relevant classical and postclassical foreign literatures and thought; the department especially recommends Classics 144, 161, Humanities C107, 116.

Special Programs

The department offers special programs in American studies and general literature. For both programs, the regular "Preparation for the Major" sequence as well as the departmental foreign language requirement apply. Because of the specialized nature of these programs, students planning to do graduate work in English should consult the departmental counselor before selecting either of these.

American Studies: This program consists of nine upper division courses in English and six related upper division courses taken in other departments. The nine English courses must include 109 and 178; two courses from 142A, 142B, 143; three courses from 170, 171, 172, 173, 174; and one course pertaining to American studies selected from the 180 or 190 series, taken preferably in the senior year. Of the six upper division courses in other departments, four must be in a selected discipline (history, political science, art, etc.). One of the four courses must deal with the methodology of the discipline, while the other three must explicitly treat American culture. The courses must be selected in consultation with the English departmental counselor.

General Literature: This program consists of nine upper division courses in English or American literature and six upper division courses in foreign literatures (at least one of which must be taught in the original language). The nine English courses must include 142A and 142B; 141A, 141B, or 143; at least one course from the 150 series; and four electives selected from courses 140A through M197 (students intending graduate work in literature are especially encouraged to take English 140A). A listing of acceptable courses may be obtained from the department.

Creative Writing Major

For this major, you must satisfy all requirements listed under "Preparation for the Major," including the foreign language requirement. The major consists of English 142A and 142B and a minimum of 10 additional upper division English courses: three creative writing courses from the 133A through 135C series, taken in a single genre (poetry, short story, or drama), three literature courses paralleling the creative writing specialization, and four electives selected from courses 140A through M197. If you are planning to choose this major, you are encouraged to take course 20; for further details, contact the departmental counselor.

Major for International Students

The department offers a special major in English to bona fide international students whose native language is other than English. For this major, you must satisfy all requirements listed under "Preparation for the Major"; you may fulfill the departmental foreign language requirement with your own native language. The following 12 courses are required for the major itself: English (ESL) 103J, 106J, 109J; two courses from English 100A through 199; 122; 142A, 142B; and four additional courses from those numbered 140A through 199. If you complete this major and wish to pursue graduate study, you should consult the departmental counselor about programs of study and requirements for admission.

Teaching Credential in English

If you wish to obtain a credential to teach English, you should declare your intention at the beginning of your junior year and seek the advice of the departmental counselor in planning a coherent program. The department requires English 120A or 120B or 120C, 130, and at least one American literature course selected from 170 through 174 as part of, or in addition to, the major. You must also complete English 300 before you can be certified to begin student teaching. You are encouraged to select additional courses in language, children's literature, literature for adolescents, American literature, and literature for minorities as some of your electives. Note: *Students who enter the Graduate School of Education seeking a credential to teach English must, before beginning their required practice teaching assignment, be certified by the Department of English as prepared to teach this subject; the department will not certify any student who has not completed the courses specified above.* For additional information on courses leading to the teaching credential, consult the Graduate School of Education (201 Moore Hall) or the Department of English.

Honors Program

Admission: The honors program is open to English majors with a 3.5 departmental and a 3.25 overall grade-point average. If you have a lower GPA, you may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. You should apply by the second quarter of your junior year. For application forms and further information, contact the departmental counselor.

Requirements: All honors students are required to take English 140A during the junior year and one seminar from the English 180 through 189 sequence, preferably before the senior year. In the Fall Quarter of your senior year, you must take course 199HA. During the Winter and Spring Quarters, you take courses 199HB and 199HC, in which you write a thesis under the direction of a faculty member. The thesis determines whether you receive high honors, honors, or no honors.

M.A. and Ph.D. Degrees

All students admitted into the UCLA English graduate program with a B.A. must enter the M.A. course of study, which also serves as the first phase of the doctoral program for those who wish to pursue the Ph.D. The M.A. degree may be obtained either by passing the first qualifying examination (which also grants admission into the second phase of the doctoral program) or by writing a thesis. Students admitted with a master's degree may waive most course requirements but must pass the first qualifying examination.

Admission

Admission to the program is based on a thorough review of the student's academic record. Ordinarily, students holding the B.A. are expected to meet these minimum requirements: an undergraduate major or program that provides preparation for advanced study of literature; a grade-point average in all English courses and in the junior and senior years of at least 3.5; and a recent (within the last five

years) score on the Graduate Record Examination (GRE) of 650 on both the verbal section of the general test and the Literature in English Subject Test or a combined score of 1,300. Applicants holding the M.A. are expected to have a grade-point average of at least 3.7 in all graduate courses and correspondingly higher scores on the Literature in English Subject Test. A minimum of three letters of recommendation attesting to your ability to succeed in graduate study are also required. Care should be taken with the statement of purpose, since it is considered a sample of your writing ability. For a descriptive brochure, write to the Graduate Counselor, Department of English, 2225 Rolfe Hall, UCLA, Los Angeles, CA 90024.

If you are limited on admission to the M.A. program, you may continue in the doctoral program by passing the first qualifying examination. If you elect the M.A. thesis option, you may, on completion of that course of study, petition to enter the doctoral program provided you have maintained a grade-point average of at least 3.7 in your graduate studies and are recommended by your thesis committee. Such petitions are not automatically approved and should be accompanied by appropriate supporting materials.

Foreign Language Requirement

If you are pursuing only the M.A. degree, you may fulfill the language requirement by demonstrating a reading knowledge of any foreign language. This requirement should be satisfied at the beginning of your first quarter in residence, but in any event no later than the mid-point of the quarter in which you complete all degree requirements.

If you are pursuing the Ph.D., you are normally expected to have a reading knowledge of two foreign languages, or to demonstrate a superior proficiency in a single language. The departmentally approved languages are French, German, Italian, Spanish, Latin, and Greek, but other languages may be substituted by petition on the basis of a special research interest.

Course Requirements

Nine letter-graded English courses from the 200 series are required for the M.A., including one course in bibliography (English 200) and one course in literary criticism (course 201) in your first year. If you enter the program with an M.A. in English, you are presumed to have fulfilled the nine-course requirement but must take courses 200 and 201 or their equivalents prior to the first qualifying examination. You are also urged to begin fulfilling the second-stage requirements at this time.

Teaching Experience

Although teaching experience is not required, most students in the Ph.D. program have the opportunity to serve as teaching assistants after passing English 495A and being in the program for at least one year. Teaching assistantships are awarded on the basis of merit.

Qualifying Examinations

The doctoral program is divided into three stages, the first two of which culminate in the first and second qualifying examinations.

First Stage

First Qualifying Examination Option: If you select the examination option for the M.A. or are pursuing the Ph.D. degree, you take the first qualifying examination after passing the nine required courses and satisfying at least one of the foreign language requirements. The examination consists of four written tests of four hours each. The four parts are graded high pass, pass, low pass, or fail; in order to pass the examination as a whole, you must have maintained a passing grade on each of the parts. A grade of low pass on all four parts is considered a failure; the graduate faculty decides in each case whether to grant an M.A. and whether you will be admitted to the second stage of the Ph.D. program. Further details on breadth, philology, and bibliography requirements are available from the department.

Thesis Option: If you select the thesis option for the M.A., you must request a thesis committee (three faculty members) from the graduate counselor at least two quarters before completing the program. The committee then meets with you to consider your thesis proposal. Your thesis should not be less than 40 nor more than 60 pages in length.

Second Stage

In this stage of the program, you must take five courses from the 200 series in English, including a minimum of three seminars. You are encouraged to take as many seminars as possible (any graduate seminar may be repeated for credit), as well as suitable courses in other departments. When sufficiently well prepared and after satisfying the second language requirement, you take the second qualifying examination.

Second Qualifying Examination: The University Oral Qualifying Examination, at least two hours in length, consists of two parts. The first covers a 100-year period or longer in English or American literature. The second part deals with your prospectus, a substantially researched paper which has been approved by the committee chair and distributed to the committee at least one week before the scheduled examination. The committee must certify both that you are competent in the historical field and that the prospectus has been approved. If you fail one or both parts of the examination, you may, at the discretion of the committee, repeat it once only.

Third Stage

Once you have passed the second qualifying examination, you may advance to candidacy and, on application, receive the Candidate in Philosophy (C.Phil.) degree. You may then proceed with the writing of the dissertation.

Final Oral Examination

A final oral defense of the dissertation is optional with the doctoral committee but is usually not required.

Lower Division Courses

A. Basic Review of English Usage (No credit). See listing under "English Composition."

B. Fundamentals of Exposition (No credit). See listing under "English Composition."

3. English Composition, Rhetoric, and Language. See listing under "English Composition."

3H. English Composition, Rhetoric, and Language (Honors). See listing under "English Composition."

4. Critical Reading and Writing. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent. An introduction to literary analysis, with close reading and carefully written exposition of selections from one or more of the principal modes of literature: poetry, prose fiction, and drama. Minimum of six papers (three to five pages each).

4H. Critical Reading and Writing (Honors). Discussion, three hours. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent, consent of department. An introduction to literary analysis, with close reading and carefully written exposition of selections from one or more of the principal modes of literature: poetry, prose fiction, and drama. Minimum of six papers (three to five pages each).

10A. English Literature to 1660. Prerequisites: satisfaction of Subject A requirement, courses 3, 4. A study of selected works of the period, beginning with selections from Old English poetry and including writings by Chaucer, Spenser, Shakespeare, Donne, and Milton. Minimum of three papers (three to five pages each) or equivalent.

Mr. Allen, Mr. Condren, Mr. Rodes

10B. English Literature, 1660-1832. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A. A study of selected works of the period, including writings by Dryden, Pope, Swift, Wordsworth, and Keats. Minimum of three papers (three to five pages each) or equivalent.

Mr. Batten, Mr. Burwick, Mr. Novak

10C. English Literature, 1832 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B. A study of selected works of the period, including writings by Tennyson, Arnold, Browning, Yeats, Joyce, and Eliot. Minimum of three papers (three to five pages each) or equivalent.

Mr. Berst, Mr. Kolb, Mr. Solomon

20. Introduction to Creative Writing. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent, submission of creative or expository writing samples to a screening committee. Designed to introduce the fundamentals of creative writing. Emphasis either on poetry, fiction, or drama, depending on the wishes of the instructor(s) during any given quarter. Readings from assigned texts and weekly writing assignments required.

30. Intermediate Exposition. See listing under "English Composition."

70. Major British Authors before 1800. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10A or 10B. A study of selected masterpieces of English literature before 1800, including the works of such writers as Chaucer, Shakespeare, Donne, Milton, Swift, Pope, Johnson, and Fielding.
Mr. Rousseau

75. Major British Authors, 1800 to the Present. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10B or 10C. A study of selected masterpieces of English literature from 1800 to the present, including the works of such writers as Wordsworth, Coleridge, Keats, Tennyson, Dickens, Browning, Yeats, Joyce, and Eliot.
Mr. Berst, Mr. Hutter, Mr. Kolb

80. Major American Authors. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for any courses in the 170 series. An introduction to the chief American authors, with emphasis on the poetry, nonnarrative prose, and short fiction of such writers as Poe, Dickinson, Emerson, Whitman, Twain, Frost, and Hemingway. Mr. Rubin-Dorsky, Mr. Wortham

85. The American Novel. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 171, 172, or 174. The development, with emphasis on form, of the American novel from its beginning to the present day. Includes works of such novelists as Hawthorne, James, Fitzgerald, and Faulkner.
Mr. Paredes, Mr. Rubin-Dorsky

90. Shakespeare. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 142A or 142B. A survey of Shakespeare's plays, including comedies, tragedies, and histories, selected to represent Shakespeare's breadth, artistic progress, and total dramatic achievement.
Mr. Guffey, Mr. Rodes, Ms. Rowe

Upper Division Courses

100A. Introduction to Poetry. Prerequisite: satisfaction of Subject A requirement. Recommended for teaching credential candidates. A study of critical issues (metrics, diction, figurative language, symbolism, irony and ambiguity, form and structure) and aesthetic issues, including evaluative criteria, followed by the close critical analysis of a selection of representative poems. Mr. Grose, Mr. Sheats, Mr. Thorslev

100B. Introduction to Drama. Prerequisite: satisfaction of Subject A requirement. Examination of representative plays; readings may range from Greek to modern drama. Emphasis on critical approaches to the dramatic text; study of issues such as plot construction, characterization, special uses of language in drama, methods of evaluation. Mr. Berst

100C. Introduction to Fiction. Prerequisite: satisfaction of Subject A requirement. An introduction to prose narrative, its techniques and forms. Analysis of short and long narratives and of critical issues such as plot, characterization, setting, narrative voice, realistic and nonrealistic forms. Mr. Anderson

100D. Introduction to Special Topics and Genres. Prerequisite: satisfaction of Subject A requirement. A study of a particular topic, genre, or subgenre in literature, such as satire, biography, parody, or a specialized classification of literature. May be repeated for credit. Mr. Tennyson, Mr. Thorslev

100W. Intensive Writing (2 units). See listing under "English Composition."

100WH. Intensive Writing (Honors) (2 units). See listing under "English Composition."

102. The Short Story in England and America. Prerequisite: satisfaction of Subject A requirement. A historical survey of the short story as a genre, from the 19th century to the present. Mr. Anderson

103. Jewish American Fiction. Prerequisite: satisfaction of Subject A requirement. The study of the fiction of Jewish writers in America, such as Bellow, Malamud, and Roth, focusing on the encounter of Jewish ethical ideals and social values with the contemporary environment. Mr. Novak

M104A. Early Afro-American Literature. (Formerly numbered M104.) (Same as Afro-American Studies M104A.) Prerequisite: satisfaction of Subject A requirement. An introductory survey of the Afro-American literary tradition from the 18th century to World War I, including oral and written forms (folktales, spirituals, sermons; prose, poetry). Emphasis on the use of literature in the antislavery movement and the rise of black writing at the turn of the century. Writers studied include Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Paul Laurence Dunbar, Charles W. Chesnutt, Booker T. Washington, Pauline Hopkins, W.E.B. DuBois, and James W. Johnson. Mr. Yarborough

M104B. Afro-American Literature since the 1920s. (Formerly numbered M104). (Same as Afro-American Studies M104B.) Prerequisite: satisfaction of Subject A requirement. An introductory survey of the Afro-American literary tradition from the 1920s to the present, including oral and written forms (ballads, blues, speeches; prose, poetry, drama). Emphasis on the Harlem Renaissance and black writing in the 1960s. Writers studied include Jean Toomer, Claude McKay, Langston Hughes, Stirling Brown, Richard Wright, James Baldwin, Gwendolyn Brooks, Ralph Ellison, Toni Morrison, Amiri Baraka (LeRoi Jones), and Alice Walker. Mr. Yarborough

M105. The Chicano Experience in Literature. (Same as Chicano Studies M105.) Prerequisite: satisfaction of Subject A requirement. The study of literature in English by and about Chicanos. Survey of the depiction of the Chicano experience in American literature generally, with emphasis on the development of Chicano literature itself, its cultural backgrounds, and distinctive uses of language. Mr. Paredes

106. Native American Literary Studies. Prerequisite: satisfaction of Subject A requirement. The study of Native American oral cultures through translated documents (song-poems, life-stories, myths, tales, dream visions, speeches) and/or the images in writing about Native Americans (poetry, fiction, history, anthropology, sociology). Mr. Lincoln

M107. Women in Literature. (Same as Women's Studies M107.) Prerequisite: satisfaction of Subject A requirement. A survey of literary works by and about women. The delineation of women in English and American literature, studies in historical and contemporary themes, and the evolution of forms and techniques in poetry, fiction, and biography.
Ms. Brienza, Ms. Mellor, Ms. Rowe, Ms. Yeazell

108A-108B. The English Bible as Literature. Prerequisite: satisfaction of Subject A requirement. The principal literary monuments of the Old and New Testaments in the King James Version. **108A.** The Old Testament; **108B.** The New Testament.
Mr. Dearing, Mr. Post

108C. The English Bible as Literature: Special Topics. Prerequisite: satisfaction of Subject A requirement. A study of the English Bible, with attention to particular literary themes, motifs, and genres. Possible discussion of the influence of the Bible on discrete periods or individual authors in English literature. May be repeated for credit.
Mr. Dearing, Mr. Kinsman

109. Interdisciplinary Approaches to Literature. Prerequisite: satisfaction of Subject A requirement. The study of British or American literature in relation to other disciplines such as history, politics, philosophy, psychology. May be repeated for credit.
Mr. Burwick, Mr. Maniquis

110. Studies in Individual Authors. Prerequisite: satisfaction of Subject A requirement. The specialized study of the work of a single poet, dramatist, prose writer, or novelist. May be repeated for credit.

M111A. The Literature of Myth and Oral Tradition. (Same as Folklore M111.) Prerequisite: satisfaction of Subject A requirement. A study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples. Mr. Nagy

M111B. Anglo-American Folk Song. (Same as Folklore CM106.) Prerequisites: satisfaction of Subject A requirement, junior standing. A survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. Mr. Wilgus

M111C. British Folklore and Mythology. (Same as Folklore M121.) Prerequisites: satisfaction of Subject A requirement, junior standing. A survey of the folklore of the peoples of Britain, with attention to their history, function, and regional differences.
Mr. Nagy, Mr. Porter

M111D. Celtic Mythology. (Same as Folklore M122.) Prerequisite: Folklore 101 or consent of instructor. A survey of the early materials, chiefly literary, for the study of the mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales. Mr. Ford

M111E. Survey of Medieval Celtic Literature. (Same as Folklore M112.) Prerequisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh is not required. A general course dealing with Celtic literature from the earliest times to the 14th century. Mr. Ford

M111F. Celtic Folklore. (Same as Folklore M127.) Prerequisite: Folklore 101 or consent of instructor. The folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research. Mr. Nagy

M111G. Oral Traditions in Africa. (Same as Folklore M155.) Prerequisite: upper division standing. A survey of African folk traditions: folktale, epic, heroic poetry, and folk song.

112. Children's Literature. Prerequisite: satisfaction of Subject A requirement. A study of the historical backgrounds and development of types of children's literature, folklore and oral tradition, levels of interest, criticism and evaluation, illustration and bibliography.

113. Literature for Adolescents and Young Adults. Prerequisite: satisfaction of Subject A requirement. Analysis and evaluation of the literature intended mainly for students in junior and senior high schools. Review of mature books that are popularly suggested for this age group; study of the interests and reading habits of young adults.

114. World Literatures in English. Prerequisites: satisfaction of Subject A requirement, consent of instructor. A survey of contemporary literature from English-speaking regions of the world, reviewing the major genres from several countries and making cross-comparisons with the literatures. Generalizations concerning the nature of the English used by such writers. May be repeated for credit.
Mr. Kinsman, Mr. Povey

115A. American Popular Literature. (Formerly numbered 115.) Prerequisite: satisfaction of Subject A requirement. A study of the main currents of popular and cultural taste as reflected in such genres as dime novels, detective fiction, and Western stories.
Mr. Nagy, Mr. Paredes

115B. British Popular Literature. Prerequisite: satisfaction of Subject A requirement. Readings in the literature of the British masses, from 16th-century broadsides to contemporary novels. An examination of the social functions of literature. Mr. Nagy

116. Science Fiction. Prerequisite: satisfaction of Subject A requirement. A study of science fiction and speculative literatures. Mr. Guffey

117. Detective Fiction. Prerequisite: satisfaction of Subject A requirement. A study of British and American detective fiction and the literature of detection.
Mr. Hutter

118. Film and Literature. Prerequisite: satisfaction of Subject A requirement. A study of the interdisciplinary relationships between film and literature, including theme and structure, and focusing on cinematic adaptations of literary works. Mr. Goodwin

120A. *Language Study for Teachers:* Elementary School. See listing under "English Composition."

120B. Language Study for Teachers of English: Secondary and Postsecondary. See listing under "English Composition."

120C. Language Study for Teachers of Subjects Other Than English: Secondary and Postsecondary. See listing under "English Composition."

121. The History of the English Language. Prerequisite: satisfaction of Subject A requirement. A study directed toward English majors of the main features in the grammatical, lexical, and phonetic condition of the English language from Indo-European time to the present. Mr. Condren, Ms. Minkova

122. Introduction to the Structure of Present-Day English. Prerequisite: satisfaction of Subject A requirement. An introduction to the techniques of linguistic description as applied to the pronunciation, grammar, and vocabulary of modern English.
Ms. Minkova

130. Composition for Teachers. See listing under "English Composition."

131A-131H. Advanced Exposition. See listing under "English Composition."

133A-133B-133C. Creative Writing: Poetry. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). Weekly exercises in the writing of poetry, with practice in the standard forms and metres and the study of techniques. Classroom discussion based on student use. Only one course in the sequence may be repeated for credit.
Mr. Gullans, Mr. Kessler, Mr. Yenser

134A-134B-134C. Creative Writing: Short Story. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). Three stories of average length to be completed during each quarter. Some of these may, with the instructor's consent and the student's wish, be substantial revisions of the other stories presented. Classroom discussion based on stories presented. Only one course in the sequence may be repeated for credit.
Mr. Goldberg, Mr. Kessler, Mr. Moore

135A-135B-135C. Creative Writing: Drama. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). An exploration of the capacity of each student to write for the theater. Class discussion of student writing, individual conferences, rehearsed readings, and laboratory productions. Only one course in the sequence may be repeated for credit. Mr. Kessler, Mr. Rodes

136A-136B-136C. Practical Writing and Editing. See listing under "English Composition."

137. Advanced Computer Techniques for Students of English. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C, and Program in Computing 1 and 10A or consent of instructor. Concurrent instruction in writing computer programs for literary study and in the kinds of literary research that can be aided by computers. BASIC is taught; students must know how to operate a computer. Principles of computer science neither assumed nor taught. Mr. Dearing

140A. Criticism: History and Theory. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of some of the major historical documents and theoretical statements in the history of literary criticism, including works by such writers as Plato, Aristotle, Horace, Sidney, Dryden, Johnson, Kant, Coleridge, Wordsworth, Shelley, Arnold, James, Croce, and T. S. Eliot, with emphasis on the major critical positions posed and developed by these writers, the basis of their theoretical positions, and the practical consequences of those positions. Possible discussion of recent trends in criticism.
Mr. Kolb, Mr. Pecora, Mr. Solomon

140B. Criticism: Special Topics. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of limited periods and specialized issues and approaches in the history of literary criticism, including moral, biographical, sociological, psychological, formal, structural, and deconstructionist. Area of concentration determined by instructor and listed in the *Schedule of Classes*. Some study of literary texts, to illuminate the value and practical application of the approach, may be required.
Mr. Riddel, Mr. Solomon

141A. Chaucer: *The Canterbury Tales*. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Introductory study of Chaucer's language, versification, and historical and literary background, including analysis and discussion of his long major poem, *The Canterbury Tales*. Satisfies the department's Chaucer requirement.
Mr. Condren, Mr. Kolve, Ms. Ridley

141B. Chaucer: *Troilus and Criseyde* and Selected Minor Works. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of *Troilus and Criseyde* and selected minor works of Chaucer, such as *The Book of the Duchess, The House of Fame, The Parliament of Fowls*, etc. Satisfies the department's Chaucer requirement.
Mr. Condren, Mr. Kelly, Ms. Ridley

142A. Shakespeare: The Poems and Early Plays. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. An intensive study of selected poems and representative comedies, histories, and tragedies through *Hamlet*.
Mr. Allen, Ms. Cheung, Mr. Post

142B. Shakespeare: The Later Plays. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C, 142A. An intensive study of representative problem plays, major tragedies, Roman plays, and romances.
Mr. Braunmuller, Mr. Foakes, Mr. Kipling

142C. Shakespeare: Selected Topics. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C, 142A, 142B. Designed for students interested in further study of Shakespeare. Limits of investigation set by individual instructors.
Mr. Allen, Mr. Braunmuller, Mr. Rodes

143. Milton. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the major works of Milton, with emphasis on *Paradise Lost*. Mr. Grose, Mr. Guffey, Ms. Rowe

150. Later Medieval Literature. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Reading and historical explication of the major writers of the 14th and 15th centuries (e.g., the Gawain-poet, Langland, Gower, Malory, miracle and morality plays, prose, lyrics, and the minor poems of Chaucer). The more difficult texts read in modernized form. Mr. Condren, Mr. Kinsman, Mr. Kipling

151. Elizabethan Literature. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of English literature of the 16th century, with special emphasis on the development and interrelationships of poetry, prose, fiction, and literary theory and criticism during the reign of Elizabeth I.
Mr. Kipling, Mr. Weiner

152. The Drama to 1642. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the English drama, excluding Shakespeare, from its beginning to the closing of the theaters, with special emphasis on plays of the Elizabethan and Jacobean periods.
Mr. Braunmuller, Mr. Kipling

153. Literature of the Early 17th Century, 1600-1660. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the major works as literary documents and as products of 17th-century thought. The work of Milton excluded.
Mr. Grose, Mr. Gullans, Mr. Post

154. Literature of the Restoration and Earlier 18th Century, 1660-1730. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the major works as literary documents and as products of the Restoration and earlier 18th-century thought.
Mr. Dearing, Mr. Roper, Mr. Rousseau

155. Literature of the Later 18th Century, 1730-1798. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of major works as literary documents and as products of later 18th-century thought.
Mr. Dearing, Mr. Novak, Mr. Roper

156. The Drama, 1660-1842. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A survey of the English drama from the Restoration to the Licensing Act.
Mr. Batten, Mr. Novak, Mr. Rodes

157. The Novel to 1832. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A survey of the works of the major English novelists from Defoe through Scott.
Mr. Batten, Mr. Lehan, Mr. Rousseau

160. Earlier Romantic Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. An intensive study of the poetry and prose of Blake, Wordsworth, and Coleridge, with collateral readings from such authors as Godwin, Burke, Paine, Burns, Southey, Lamb, DeQuincey, and Scott. Mr. Maniquis, Ms. Mellor, Mr. Sheats

161. Later Romantic Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. An intensive study of the poetry and prose of Keats, Shelley, and Byron, with collateral readings from such authors as Hazlitt, Hunt, Landor, Clare, Moore, and Peacock.
Mr. Burwick, Mr. Maniquis, Mr. Thorslev

162. Earlier Victorian Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the poetry and prose of the Victorian age from the passage of the first Reform Bill through the high Victorian period, including such authors as Tennyson, Browning, Arnold, Carlyle, Mill, and Newman. Mr. Kolb, Mr. Tennyson

163. Later Victorian Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the poetry and prose of the later Victorian age from Pre-Raphaelitism through the aesthetic and decadent movements, along with other intellectual trends, including such authors as Ruskin, Swinburne, Pater, Hopkins, Hardy, Wilde, and Yeats. Mr. Kolb, Mr. Tennyson

164. The Novel, 1832-1900. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A survey of the major English novelists from Dickens through Hardy.
Mr. Anderson, Mr. Hutter, Ms. Yeazell

165. 20th-Century British Poetry. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A survey of the major British poets, including Yeats, Eliot, Auden, and Hughes, from 1900 to the present. Mr. Bedient, Mr. Kolb, Mr. North

166. 20th-Century British Fiction. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A survey of the major British novelists and short story writers, including Conrad, Joyce, Woolf, and Lawrence, from 1900 to the present.
Ms. Brienza, Mr. Lincoln, Mr. Pecora

167. The Drama, 1842-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C (for theater, film, and television majors the 10A, 10B, 10C prerequisites are waived). A survey of British and American drama, with its principal continental influences, from 1842 through World War II.
Mr. Berst, Mr. Braunmuller, Mr. Goodwin

168. The Drama, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of British and American drama, with its principal continental influences, since World War II. Mr. Berst, Mr. Braunmuller

170. American Literature to 1800. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A historical survey of American literature through the Colonial and early national periods.
Mr. Colacurcio

171. American Literature, 1801-1865. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A historical survey of American literature, including fiction, from the beginning of the 19th century to the end of the Civil War.
Ms. Packer, Mr. Rubin-Dorsky, Mr. Wortham

172. American Literature, 1866-1912. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A historical survey of American literature from the end of the Civil War to the founding of *Poetry* magazine.
Ms. Banta, Mr. Rubin-Dorsky, Mr. Wortham

173. American Poetry, 1912-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. The development of American poetry from 1912 through World War II, including the works of Frost, Eliot, Pound, Williams, and Stevens.
Mr. Bedient, Mr. Riddel, Mr. Yenser

174. American Fiction, 1912-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. The development of the American novel and short story from 1912 through World War II, including the works of Hemingway, Fitzgerald, Faulkner, and Stein.
Mr. Goodwin, Mr. Lehan, Mr. Yarborough

176. American Poetry, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of contemporary American poetry. Mr. Riddel, Mr. Yenser

177. American Fiction, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the contemporary novel and short story.
Ms. Brienza, Mr. Goldberg

178. Perspectives in the Study of American Culture. (Formerly numbered 175.) Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. An interdisciplinary study of American literature in its relationships to other disciplines, including art, architecture, film, history, music, politics, and various social sciences, with emphasis on the application of literary methodology to a historical survey of American culture. Mr. Goodwin, Mr. Paredes

Courses 180 through 189 are designed to permit a small number of students (normally 15) to engage in concentrated study in an area in which they have a particular interest and in which they have taken adequate upper division background courses. **Prerequisites:** satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. For the author, period, genre, or subject to be studied, see the *Schedule of Classes* for any given quarter. For further details, see the departmental counselor. Courses may be repeated for credit.

180. Specialized Studies in Medieval Literature.

180X. Specialized Studies in Literature.

181. Specialized Studies in Renaissance Literature.

182. Specialized Studies in 17th-Century Literature.

183. Specialized Studies in 18th-Century Literature.

184. Specialized Studies in Romantic Literature.

185. Specialized Studies in Victorian Literature.

186. Specialized Studies in 20th-Century British Literature.

187. Specalized Studies in Colonial American Literature.

188. Specialized Studies in 19th-Century American Literature.

189. Specialized Studies in 20th-Century American Literature.

190. Literature and Society. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. The intensive study of some aspect of the relationship between literature and social, economic, or political history. May be repeated for credit.
Mr. Goodwin

M197. Topics in Afro-American Literature. (Same as Afro-American Studies M197.) A variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890-1914; Contemporary Afro-American Fiction. May be repeated for credit.
Mr. Yarborough

197H. Honors Seminar for Freshmen and Sophomores. Seminar, three hours. Prerequisites: courses 3, 4. Limited to 15 students. Recommended for lower division students who anticipate entering the honors program in English during their junior year. Content varies; see departmental counselor for information.
Mr. Batten

199. Special Studies in English (2 to 4 units). Prerequisite: consent of instructor. An intensive directed research project. To enroll or obtain information, see departmental counselor.

199HA. Honors Seminar. Prerequisite: course 140A. An introduction to research techniques and a study of various approaches and applications of critical methodology as it relates to the interpretation and evaluation of texts. Mr. Solomon (F)

199HB-199HC. Honors Tutorial. (Formerly numbered 199H.) Prerequisites: course 199HA, consent of instructor. A tutorial in which students write a thesis under the direction of a faculty member. In Progress grading. (W, Sp)

199I. Independent Study for Internships (2 to 4 units). Prerequisite: consent of instructor. An independent study course to be supervised jointly by the Field Studies Office and the faculty supervisor. Further supervision to be provided by the business for which the student is doing the internship. P/NP grading.

Rhetoric

170. Rhetoric of Winston Churchill. Prerequisites: English B, upper division standing. An intensive study of the speeches of Winston Churchill during the wilderness years, the 1930s, and the wartime years. The background and impact of these speeches.
Mr. Phelps

171. Rhetoric of Franklin Roosevelt. Prerequisites: English B, upper division standing. An intensive study of major speeches and fireside chats during Roosevelt's presidency. The background and impact of these speeches. Mr. Phelps

172. Rhetoric of Harry S. Truman. Prerequisites: English B, upper division standing. An intensive study of the major speeches of President Harry S. Truman. The background and impact of these speeches examined in relation to the social and political context of the Truman years. Mr. Phelps

180. Contemporary Rhetorical Theory. Prerequisites: senior standing, one course from 170, 171, or 172, consent of instructor. Intensive study of contemporary rhetorical theory, including Winans, Woolbert, Phillips, Brignance, Blankenship, and others. Reports and papers. Mr. Phelps

Graduate Courses

200. Approaches to Literary Research. The bibliographical tools of English and American literary scholarship; an introduction to descriptive bibliography and basic methods of research.
Mr. Batten, Mr. Kipling

201. The History of Literary Criticism. The study of the major documents in Western literary theory from Plato to the present.
Mr. Lehan, Mr. Pecora, Mr. Solomon

202. Enumerative and Descriptive Bibliography. Problems in bibliography, texts, and editions, with practical application in compiling bibliographies, editing texts, and approaching literature through textual criticism. Mr. Dearing

203. Computers and Literary Research. Prior knowledge in this area is not required. Practice in writing and using computer programs for the analysis of literary style, content, and authorship.
Mr. Dearing

204. History of Rhetoric. Reading of the basic texts in the history of rhetoric and selections from standard commentaries. Survey of the classical period and the medieval-to-modern period in alternate years.
Mr. Lanham

M205. Perspectives in American Folklore Research. (Same as Folklore M205.) Prerequisites: Folklore 101, one other upper division folklore course. An examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on the principal conceptual schemes and research orientations employed in the study of folklore in American society.
Mr. Georges, Mr. Jones, Mr. Stern

210. History of the English Language. A detailed study of the history, characteristics, and changing forms of the language from its origin until about 1900.
Ms. Minkova

211. Old English. Study of Old English grammar, lexicon, phonology, and pronunciation to enable the student to read the literature silently and aloud. Reading of as much of the more interesting Old English prose and poetry as can be read in a quarter.
Mr. Calder, Mr. Condren

212. Middle English. Prerequisite: course 211. Detailed study of the linguistic aspects of Middle English and of representative examples of the better prose and poetry.
Mr. Condren, Ms. Minkova, Ms. Ridley

213. Early Modern English. (Not the same as course 213 prior to Fall Quarter 1985.) Detailed study of the phonology, morphology, syntax, and vocabulary of English between 1450 and 1750. Description and analysis of the changes in the language in relation to the intellectual, political, and social characteristics of the period. Ms. Minkova

214. Modern English. (Formerly numbered 213.) Description and analysis of modern English phonology, grammar, and vocabulary, using the theory and techniques of contemporary linguistics. A survey of the evolution of American English and an account of the characteristic phonological and grammatical features of the major regional varieties of English around the world. Ms. Minkova

216A-216B. Old Irish. Prerequisite: consent of instructor. Studies in grammar. Readings in the glosses and other texts. Comparative considerations.
Mr. Ford, Mr. Nagy

217A-217B. Medieval Welsh. Prerequisite: consent of instructor. Studies in grammar. Readings in the Mabinogi and other texts. Comparative considerations. Mr. Ford

218. Celtic Linguistics. Prerequisite: consent of instructor. A survey of salient features of the Celtic linguistic stock in its Gaelic and British branches, with reference to the position of Celtic within Indo-European languages. Mr. Ford

The following courses stress wide reading in major authors, works, and intellectual developments.

220. Readings in Medieval Literature.
Mr. Kelly, Mr. Kolve, Ms. Ridley

221. Readings in Renaissance Literature.
Mr. Allen, Mr. Kinsman, Mr. Lanham

222. Readings in Earlier 17th-Century Literature.
Mr. Guffey, Mr. Gullans, Mr. Sellin

223. Readings in Restoration and 18th-Century Literature. Mr. Novak, Mr. Roper, Mr. Rousseau

224. Readings in Romantic Literature. Mr. Burwick, Ms. Mellor, Mr. Thorslev

225. Readings in Victorian Literature. Mr. Tennyson, Mr. Welsh

226A. Readings in Earlier American Literature. Mr. Colacurcio, Mr. Rubin-Dorsky, Mr. Wortham

226B. Readings in 19th-Century American Literature. Ms. Packer, Mr. Wortham

227. Readings in 20th-Century American Literature. Mr. Lehan, Mr. Paredes, Mr. Riddel

228. Readings in 20th-Century British Literature. Mr. Bedient, Mr. Kessler

229A. Readings in the Novel. Mr. Lehan, Mr. Novak

229B. Readings in the Drama. Mr. Berst, Mr. Braunmuller

Seminar courses (230 through 260) are open to all graduate students with adequate preparation and may be repeated for credit. Enrollment is with consent of instructor; continuing students must sign up for seminars before the end of the preceding quarter. A prospectus announcing topics for all seminars will be available in the department office in early summer for the ensuing academic year.

230. Workshop in Creative Writing. Prerequisite: consent of instructor, following submission of writing samples in the specified genre (poetry, fiction, or drama). May be repeated but may not satisfy more than one of the nine courses required for the first qualifying examination nor any of the five courses required for the second qualifying examination. Mr. Kessler, Mr. Yenser

M235. African Myth and Mythology. (Same as Folklore M235.) Prerequisite: graduate standing. The methods of analyzing and appreciating African myths and mythological systems.

239. Explication (2 units). Lecture, one hour; discussion, one hour. Recommended for first-stage Ph.D. candidates. Seminar to provide training in practical criticism. May be repeated for credit. S/U grading. Mr. Roper, Mr. Yenser

240. Studies in the History of the English Language. Individual seminars dealing with any single historical period from the Old English period to the present or the development of a particular linguistic characteristic (phonology, syntax, semantics, dialectology) through various periods. Ms. Minkova

241. Studies in the Structure of the English Language. Prerequisite: consent of instructor. Topics in various aspects of the structure of modern English, especially syntax and semantics. Ms. Minkova

242. Language and Literature. The application of linguistics to literary analysis. Individual seminars dealing with a historical period (medieval and Renaissance, neoclassical, or 19th century and modern), specific authors, or the contributions of specific groups of linguists to literary analysis. Ms. Brienza, Mr. Grose, Mr. Lanham

M243A. The Ballad. (Same as Folklore M243A.) Prerequisite: consent of instructor. A study of the English and Scottish popular ballads and their American derivatives, with some attention to European analogues. Mr. Wilgus

M243B. Problems in Ballad Scholarship. (Same as Folklore M243B.) Prerequisite: course M243A or consent of instructor. Intensive investigation of a problem or problems in the study of the popular ballad. Mr. Wilgus

244. Old and Medieval English Literature. Studies in the poetry and prose of Old and medieval English literature; limits of investigation set by individual instructor. Mr. Calder, Mr. Kelly, Mr. Kolve

245. Chaucer. Mr. Condren, Mr. Kelly, Ms. Ridley

246. Renaissance Literature. Studies in the poetry and prose of Renaissance English literature, exclusive of Shakespeare; limits of investigation set by individual instructor. Mr. Allen, Mr. Kinsman, Mr. Kipling

247. Shakespeare. Mr. Allen, Mr. Braunmuller, Mr. Foakes

248. Earlier 17th-Century Literature. Studies in the poetry and prose of 17th-century English literature up to the Restoration; limits of investigation set by individual instructor. Mr. Guffey, Mr. Gullans, Mr. Sellin

249. Milton. Studies in the poetry and prose of John Milton; particular emphasis set by individual instructor. Mr. Grose, Mr. Post, Mr. Sellin

250. Restoration and 18th-Century Literature. Studies in English poetry and prose, 1660 to 1800; limits of investigation set by individual instructor. Mr. Novak, Mr. Roper, Mr. Rousseau

251. The Romantic Writers. Mr. Burwick, Mr. Sheats, Mr. Thorslev

252. Victorian Literature. Studies in English poetry and prose of the Victorian period; limits of investigation set by individual instructor. Mr. Kolb, Mr. Tennyson

253. Contemporary British Literature. Mr. Bedient, Mr. Kessler, Mr. Yenser

254. American Literature to 1900. Studies in Colonial and 19th-century American literature; limits of investigation set by individual instructor. Ms. Banta, Mr. Colacurcio, Ms. Packer

255. Contemporary American Literature. Studies in contemporary American poetry and prose; limits of investigation set by individual instructor. Mr. Lehan, Mr. Riddel, Mr. Yenser

256. Studies in the Drama. Studies in the drama as a genre from its beginning to the present; limits of investigation set by individual instructor. Mr. Berst, Mr. Braunmuller, Mr. Foakes

257. Studies in Poetry. Studies in various themes and forms of poetry from Old English to the present; limits of investigation set by individual instructor. Mr. Bedient, Mr. Kessler, Mr. Riddel

258. Studies in the Novel. Studies in the evolution of the genre from its beginning to the present; limits of investigation set by individual instructor. Mr. Lehan, Mr. Novak, Mr. Welsh

259. Studies in Criticism. Mr. Guffey, Mr. Hutter, Mr. Riddel

260. Studies in Literature and its Relationship to the Arts and Sciences. Studies in the interrelationships of literature, the arts, and the sciences; limits of investigation set by individual instructor. Mr. Guffey, Mr. Lincoln, Mr. Rousseau

M260A. Topics in Asian American Literature. (Same as Asian American Studies M297A.) Lecture, three hours. A graduate seminar that examines and critically evaluates writings of Asian Americans.

M261. Studies in African Literature in English. (Formerly numbered M271.) (Same as English as a Second Language M285K.) Prerequisite: consent of instructor. Special problems and trends of African literature in English. Mr. Povey (W)

M262. Studies in Afro-American Literature. (Formerly numbered M273.) (Same as Afro-American Studies M200E.) Prerequisite: consent of instructor. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on the aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit.

263. Celtic Literature. Lecture, three hours. Prerequisite: knowledge of one of the ancient or modern Celtic languages. Studies in the poetry and prose of early and modern Celtic literatures, chiefly Irish and Welsh; limits of investigation set by individual instructor. Mr. Ford, Mr. Nagy

264. Studies in Rhetoric. Lecture, three hours. Special topics in classical and modern rhetoric, including substantial practice in the rhetorical analysis of literary texts. Mr. Lanham

265. Seminar in Literary Data Processing. Prerequisites: courses 200, 203. Subjects alternate between (1) team writing of a large program to solve or help solve a research problem proposed by a faculty member (who usually joins in supervising the seminar) and (2) compilation and interpretation of literary statistics (with cooperation of a member of the Statistical/Biomathematical Consulting Clinic). Mr. Dearing

M266. Cultural World Views of Native America. (Same as American Indian Studies M200B.) Seminar, three hours. Exploration of written literary texts drawn from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches drawn from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology.

270A-270B. English for the Two-Year College. Prerequisite: course 120B or 275. Discussion and practice of two-year college instruction in reading and composition. In Progress grading.

272. Current Issues in the Teaching of English. Prerequisite: course 120B or Linguistics 100. Focus on one of a variety of topics of special current interest. Mr. Lanham

M274. The Teaching of English for Minority Groups. (Formerly numbered 274.) (Same as English as a Second Language M224K.) Prerequisites: English (ESL) 370K and Linguistics 100, or consent of instructor. In-depth description of the dialects of English and of other languages (such as Spanish) used by groups of students in American schools. The origins, variations within, and current status of language varieties such as Black English and Chicano Spanish, relevant research, and educational implications. Mr. Bowen, Ms. McGroarty

275. Stylistics and the Teaching of English. Strongly recommended for teaching assistants. An introduction to the study of language and style and its application to the teaching of English, including rhetoric, linguistics, and grammar. Ms. Brienza, Mr. Lanham

300. The Teaching of English. See listing under "English Composition."

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May not be substituted for any departmental enrollment requirements. May be repeated for credit. S/U grading.

495A-495B. Supervised Teacher Preparation (2 units each). See listing under "English Composition."

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Individual Study. Prerequisite: graduate standing. For students preparing for first qualifying examination. May not be applied toward any course requirement for the degree. S/U grading.

597. Preparation for Ph.D. Examinations (4 or 8 units). For second-stage Ph.D. students preparing for second qualifying examination. S/U grading.

598. M.A. Research and Thesis Preparation. Prerequisite: graduate standing. May not be applied toward any course requirement for the degree. S/U grading.

599. Ph.D. Dissertation Research (4 or 8 units). Limited to Ph.D. candidates unable to enroll in seminars in their fields or to candidates concurrently enrolled in such seminars. (Exception to this rule must be requested by petition.) S/U grading.

Scope and Objectives

Students need writing proficiency at every stage of their university careers. Although UCLA does not have a composition major, the UCLA Writing Programs and the Composition Section of the English Department offer a series of courses introducing the varieties of university discourse and providing basic to highly skilled instruction. Besides courses which satisfy the University's Subject A and English Composition requirements, the program offers writing courses linked with courses in other departments, intermediate and advanced courses in exposition, language and composition courses for teachers, and a sequence of courses in professional writing and editing.

Subject A

Every student who does not satisfy the Subject A requirement by presenting transfer credit or acceptable test scores is required to take, in the quarter immediately following admission to the University, either English A or B. Placement in these courses is determined by performance on the Subject A Placement Test. For more information regarding Subject A, see "Undergraduate Degree Requirements" in Chapter 2.

Composition Requirement

Each of the University's colleges and schools sets its own composition requirement. Completing English 3 with a grade of C or better meets the requirement in all divisions. For further information about the composition requirement, see the introductory copy for your college or school.

Students who score 660 or better on the CEEB English Achievement Test are eligible to take the English Proficiency Examination. Outstanding performance on this examination fulfills the composition requirement. For further information, contact the Freshman Writing Program.

Lower Division Courses

A. Basic Review of English Usage (No credit). Lecture, five hours. Prerequisite: placement into English A determined by performance on the Subject A Placement Test. English A displaces four units on the student's Study List but yields no credit toward a degree. A preliminary course in academic writing, offering workshop exercises in reading, writing, and revision. Students learn grammar and mechanics primarily through practice and imitation. Completion of this course with a grade of C or better or demonstration of minimum competence on the Subject A Placement Test is prerequisite to English B.

B. Fundamentals of Exposition (No credit). (Formerly numbered 1A.) Prerequisite: English A or qualifying score on Subject A Placement Test. English B displaces four units on the student's Study List but yields no credit toward a degree. Designed to develop the proficiency in expository writing required for successful University work. Lectures, readings, class discussions, and assignments in writing and revision. Completion of this course with a grade of C or better meets the Subject A requirement.

3. English Composition, Rhetoric, and Language. Lecture, three hours. Prerequisite: satisfaction of Subject A requirement by examination or by completion of course B with a grade of C or better. Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each). Completion of this course with a grade of C or better satisfies the English Composition requirement.

3H. English Composition, Rhetoric, and Language (Honors). Lecture, three hours. Prerequisites: satisfaction of Subject A requirement, consent of department. Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each).

30. Intermediate Exposition. Prerequisite: satisfaction of Subject A and English Composition requirements. An intermediate course in academic writing which follows course 3 and teaches students how to write longer papers built on more complex, demanding texts. Readings include at least two books dealing with issues central to the humanities, social sciences, or life sciences. Writing assignments include a research project appropriate to students' majors.

Upper Division Courses

100W. Intensive Writing (2 units). Prerequisite: course 3. Students must be concurrently enrolled in a course offered in conjunction with English 100W (refer to the *Schedule of Classes* for courses so designated). Designed to teach analytic paper writing, with emphasis on revision techniques. Material for writing assignments comes from adjunct course, and assignments reflect and develop writing skills needed in that course. May be repeated for credit with consent of instructor.

100WH. Intensive Writing (Honors) (2 units). Prerequisite: course 3. Students must be concurrently enrolled in an honors course offered in conjunction with English 100WH (refer to the *Schedule of Classes* for courses so designated). Designed to teach analytic paper writing, with emphasis on revision techniques. Material for writing assignments comes from adjunct course, and assignments reflect and develop writing skills needed in that course. May be repeated for credit with consent of instructor.

120A. Language Study for Teachers: Elementary School. Prerequisite: satisfaction of Subject A requirement. A survey of topics in English linguistics of special interest to elementary school teachers. Subjects include approaches to English grammar; language acquisition and development; language attitudes; regional and social dialects of American English; bilingual schooling; contribution of English language study to the teaching of reading, writing, spelling, and literature.

120B. Language Study for Teachers of English: Secondary and Postsecondary. Prerequisite: satisfaction of Subject A requirement. A rapid review of English grammar and an introduction to basic concepts in sociolinguistics, dialectology, and stylistics applied to the analysis and evaluation of writing samples from students in junior and senior high school and junior college.

120C. Language Study for Teachers of Subjects Other Than English: Secondary and Postsecondary. Prerequisite: satisfaction of Subject A requirement. Designed to introduce teachers of subjects other than English to basic concepts in language acquisition, dialectology, sociolinguistics, and composition.

130. Composition for Teachers. Prerequisites: satisfaction of Subject A requirement, courses 3, 4. Preparation for future teachers of English composition in the writing and criticism of the kinds of prose discourse usually taught in primary and secondary schools and in junior college.

131A-131H. Advanced Exposition. (Formerly numbered 131.) Prerequisites: satisfaction of Subject A and English Composition requirements, upper division standing. A writing course designed to help students develop stylistic and argumentative virtuosity in various rhetorical contexts, including different sections that emphasize the principles of effective writing in major professions. May be taken P/NP by English majors, though English majors who wish to use the course to satisfy departmental prerequisites must take it for a letter grade. Each course may be taken independently for credit. **131A.** General; **131B.** Business; **131C.** Prehealth Care; **131D.** Journalism/Communication Studies; **131E.** Prelaw; **131F.** Fine Arts; **131G.** Science and Technology; **131H.** Honors.

136A-136B-136C. Practical Writing and Editing. Lecture, three hours. Prerequisites: satisfaction of Subject A requirement, course 3, one course from the 131 series, consent of instructor. A sequence in practical writing and editing ability specifically designed to prepare students for a career. Analysis of prose and literary styles necessary to the variety of writing in professional, nonacademic fields combined whenever possible with practical experience in a variety of writing internships and training in a wide range of editorial skills. *In Progress* grading for courses 136A-136B only.

Graduate Courses

300. The Teaching of English. Required of candidates for the single subject credential in English. Study of theories of rhetoric, composition, reading, and literature as they apply to the secondary school English curriculum.

495A-495B. Supervised Teacher Preparation (2 units each). (Formerly numbered 495.) Discussion, one hour; laboratory, 30 minutes. **495A.** Required of all applicants for a teaching assistantship in English. The practical concerns of designing a course, creating assignments, grading papers, and holding conferences for English 3 classes. **495B.** Must be taken concurrently with the first teaching assignment. It examines the specialized problems which occur in teaching English 3 and introduces students to techniques for teaching English B and ESL. In Progress and S/U grading. Ms. Pfoff, Mr. Rose

Scope and Objectives

The Teaching English as a Second Language (TESL) Program is designed for students who wish to develop research skills related to the teaching and learning of English as an additional language. The program is a two-year course of graduate study leading to a Master of Arts degree.

The first year of the program is designed to improve teachers' performance in the ESL classroom. The second year provides an opportunity to investigate in depth some particular aspect of teaching and learning English as a second language. The course of study includes a practical element: observing classes, preparing lesson plans, and actual classroom teaching. There is, however, a greater emphasis on theory in the program. Students are expected to become familiar with current theories regarding the nature of language, as well as the ways in which people acquire and use language. They are also expected to be able to relate theoretical guidelines to practical procedures. The program is therefore not appropriate for the student who is interested exclusively in receiving vocational training. Admission preference is granted to applicants with strong research interests.

In addition, the ESL Section and the Linguistics Department offer an interdepartmental degree program leading to a Ph.D. in Applied Linguistics. For information, write to the Applied Linguistics Program, 3300A Rolfe Hall, UCLA, Los Angeles, CA 90024. (Also see the section on Applied Linguistics earlier in this chapter.)

A limited number of teaching assistantships are available to qualified M.A. and Ph.D. students. For information and applications, write to the Academic Director, ESL Service Courses, 3312 Rolfe Hall, UCLA, Los Angeles, CA 90024.

Master of Arts in Teaching English as a Second Language

Admission

Students normally apply for the M.A. in TESL if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only at the beginning of Fall Quarter. To be admitted to the M.A. program, U.S. citizens and students from other countries must have the equivalent of an American bachelor's degree.

After admission, you must maintain a grade-point average of at least B (3.0). A GPA of 3.25 (B+) is required in order to continue into the second year of the M.A. program and must be maintained throughout the second year.

Applications for admission may be obtained from the graduate adviser and are due by December 30 of the year prior to admission. The program requires three letters of recommendation in support of the application. You are requested to submit the letters of recommendation directly to the Graduate Adviser, English as a Second Language Section, 3300A Rolfe Hall, UCLA, Los Angeles, CA 90024. Since admission is limited to approximately 30 students per year, it is important that supporting papers be submitted by February 15.

The admissions committee screens all applications, using the following criteria: grade-point average (must be 3.0 or better), Graduate Record Examination (GRE) scores, (required only of applicants whose native language is English), letters of recommendation, statement of purpose, and relevant professional experience. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study TESL at UCLA; (2) special qualifications and experience as a teacher; (3) knowledge of languages other than English; and (4) knowledge of other cultures.

Foreign Language Requirement

Students whose native language is English generally use their Fall and Winter Quarter electives to acquire or perfect a knowledge of the native language or dialect of the pupils to whom they expect to teach English. This can be done by taking any one of four combinations of two courses: (1) two foreign language courses; (2) one foreign language course plus a corresponding course in the Linguistics 220 or 225 series; (3) one foreign language course plus English M274; (4) English 227K plus an unrestrictive elective.

Those particularly interested in working with Mexican-American, Asian American, or American Indian pupils will normally choose the third of these alternatives. When there is doubt as to which language will be most appropriate, a non-European language should be selected because of the greater broadening of linguistic horizons that such a selection offers. Foreign language courses that deal with linguistic structure should be selected whenever possible.

Nonnative speakers of English, depending on the results of the University's English as a Second Language Placement Examination (ESLPE), may be required to take a course to improve their practical command of English.

Exemption from the foreign language requirement may be granted if you can demonstrate a strong need to take other electives and have

an unusually extensive background of previous foreign language study. For more information, contact the graduate adviser.

First-Year Curriculum

The typical course of study for the first year of the M.A. program is as follows (descriptions of the English courses mentioned here may be found at the end of this section):

Fall Quarter: Linguistics 100, English 370K, foreign language requirement or elective (course depends on language requirement plan)

Winter Quarter: English 122K, 241K, foreign language requirement or elective (course depends on language requirement plan)

Spring Quarter: English 106K or 107K or 109K, 380K, Linguistics 103 or English 103K

Exceptions to the above requirements will be made only after consultation with the graduate adviser.

Of the nine courses required the first year, at least seven must be in TESL, English, linguistics, or structure of language courses in language departments.

Successful completion of the above courses qualifies students for a TESL certificate (which is not a California State Teaching Credential).

Teaching Experience

One quarter of supervised teaching is required during the first year unless you have had extensive teaching experience. If this requirement is completed at UCLA in an adult education setting, you will be eligible for the California Adult Education Credential in ESL. The California Basic Educational Skills Test is required of all applicants for the credential.

Second-Year Curriculum

A total of 14 courses is required for the M.A. degree, including a minimum of four 200-series courses. Four of the nine courses taken during the first year (usually Linguistics 100, Linguistics 103 or English 103K, English 122K and 241K) and, in special cases, two of the electives (100 or 200 series only) are applied toward the University's nine-course minimum requirement for master's degrees. This leaves five courses, at least two of which must be at the graduate level, to be completed in consultation with the graduate adviser during the second year.

Eight units of 500-series courses may be applied toward the M.A. degree. You must enroll in course 598K each quarter you are registered; however, only four units may be applied toward the degree (to be taken either in Spring Quarter of your first year or Fall Quarter of the second year).

English 400K is a seminar in which TESL M.A. candidates present and defend the results of their thesis research. Enrollment is required in the Spring Quarter but does not count as one of the 14 courses required for the M.A.

The electives taken during the second year should be selected, in consultation with the faculty M.A. adviser and the chair of your thesis committee, as a sequence of related courses relevant to your thesis topic. Any changes in the approved program must be approved by both the committee chair and the M.A. adviser.

Thesis Plan

By the end of the fourth quarter, a thesis proposal, signed by two faculty members, is submitted to the faculty. At this time, plans for the thesis are approved and the thesis committee is established. An outside member is required.

Undergraduate Courses

Courses 33A, 33B, 33C, 34, 35, 36, 103J, 106J, 107J, 109J are only for students whose native language is other than English. Placement in these courses is established on the basis of the English as a Second Language Placement Examination (ESLPE), which students whose native language is not English must take instead of the Subject A Placement Test (see "Subject A" in Chapter 2). Depending on the results of this examination, entering students are (1) exempt from any special ESL requirement; (2) required to take course 33C; (3) required to take course 33B followed by course 33C; (4) required to take course 33A followed by courses 33B and 33C; or (5) required to spend a quarter studying elementary English exclusively, through UCLA Extension, followed by courses 33A, 33B, 33C. You must enroll in the course(s) during your first term in residence at UCLA and each subsequent term until you complete course 33C with a grade of C or better.

You may satisfy the English Composition requirement by completing English (ESL) 36 with a grade of C or better. Admission into course 36 is determined by a Composition Placement Test administered the first day of class each quarter. A low score on the test may require that you enroll in English (ESL) 35 prior to course 36.

Lower Division Courses

33A. Low Intermediate English as a Second Language. Recitation, eight hours; laboratory, two hours. Prerequisite: grade of C or better in XL832 or proficiency demonstrated on the English as a Second Language Placement Examination. Intensive instruction in the structure of English, with focus on vocabulary building, listening and speaking skills, and basic composition techniques.

33B. High Intermediate English as a Second Language. Recitation, five hours. Prerequisite: grade of C or better in course 33A or proficiency demonstrated on the English as a Second Language Placement Examination. Emphasis on reading comprehension, vocabulary development, and composition techniques, with additional work on structure and oral skills.

33C. Advanced English as a Second Language. Recitation, five hours. Prerequisite: grade of C or better in course 33B or proficiency demonstrated on the English as a Second Language Placement Examination. Emphasis on academic writing, reading, research skills, and lecture comprehension.

34. Oral Communication Skills for ESL Students. Prerequisite: grade of C or better in course 33C or proficiency demonstrated on the English as a Second Language Placement Examination. Develops oral skills that prepare nonnative speakers of English to participate in class discussion, make oral presentations before an audience, respond to questions, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

35. Developmental Composition for ESL Students. Prerequisite: grade of C or better in course 33C or proficiency demonstrated on the English as a Second Language Placement Examination. Developmental composition skills for ESL students, with focus on the mechanics of writing, grammatical structures, and recognition of and practice with the major academic discourse modes.

36. Intermediate Composition for ESL Students. Prerequisites: grade of C or better in course 33C or 35 or proficiency demonstrated on the English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Designed to improve English language writing skills for nonnative speakers of English. Special attention to grammatical structures, principles and methods of exposition, and writing for academic purposes.

Upper Division Courses

103J. Phonetics for ESL Students. Prerequisite: grade of C or better in course 33C or proficiency demonstrated on the English as a Second Language Placement Examination. A detailed and systematic study of the sounds of American English and the way in which they are put together in connected speech, applied to the improvement of the student's own accent. Mr. Bowen, Ms. Brinton

103K. Phonetics for Teachers of English as a Second Language. Prerequisite: consent of instructor. Analysis of the phonological structure of contemporary English, with attention to the differences between British and American speech. Drill directed toward individual needs. Mr. Andersen, Mr. Bowen

106J. Advanced Composition for ESL Students. Prerequisites: grade of C or better in course 33C or proficiency demonstrated on the English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Exercises in writing based on readings, with the aim of developing idiomatic control of expression.
Ms. Brinton, Ms. Erickson, Mr. Rand

106K. Writing in the ESL Context. Provides opportunities for practice and improvement in writing skills and thus fulfills the composition requirement for the TESL M.A. degree. Survey of important theoretical and methodological issues related to the teaching of writing/composition to ESL students and examination of appropriate classroom materials and authentic student compositions. Ms. Kroll

107J. Advanced Reading for ESL Students. Prerequisite: grade of C or better in course 33C or proficiency demonstrated on the English as a Second Language Placement Examination. Identification through example of the essential cognitive strategies necessary to efficient reading for academic purposes. Development of these strategies through exercises and guided practice using authentic university texts from a variety of content areas.
Ms. Hatch, Ms. Kroll

107K. Reading in the ESL Context. Provides opportunities for practice and improvement in reading and writing skills and thus fulfills the composition requirement for the TESL M.A. degree. Survey of important theoretical and methodological issues related to the teaching of reading and writing to ESL students and examination of appropriate classroom materials.
Ms. Hatch, Ms. Kroll

109J. Introduction to Literature for ESL Students. Prerequisite: grade of C or better in course 33C or proficiency demonstrated on the English as a Second Language Placement Examination. Selections from English and American literature presented so as to make full allowance for the students' linguistic and cultural problems and to contribute to an increasing command of the English language.
Ms. Brinton, Mr. Povey

109K. Literature in the ESL Context. Provides opportunities for practice and improvement in writing skills and thus fulfills the composition requirement for the TESL M.A. degree. Survey of important theoretical and methodological issues related to the teaching of literature to ESL students and examination of appropriate classroom materials. Strong emphasis on the cultural basis for literature. Mr. Povey

122K. Introduction to the Structure of Present-Day English (for Teachers of English as a Second Language). Prerequisite: Linguistics 100 or consent of instructor. Introductory study of those grammatical structures of English most important in the ESL classroom. Aims to provide insights from traditional, structural, and particularly transformational grammar.
Ms. Celce-Murcia (W)

Graduate Courses

All graduate courses are open to qualified graduate students from other departments with consent of department.

209K. Current Issues in Experimental Design and Statistics for Applied Linguistics. (Formerly numbered 272K.) Specialized topics of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current theoretical methodological trends in the field.
Ms. Hatch, Mr. Rand (F,Sp)

220K. Materials Development for Language Teaching. (Formerly numbered 272K.) Prerequisites: course 370K, at least two years of ESL/EFL teaching experience. Planning and preparation of an original set of language teaching materials geared to the needs of a specified group of learners. Revision of first drafts and evaluation of one's own work and that of one's peers. Ms. Celce-Murcia (Sp)

221K. Media for Language Teaching. (Formerly numbered 272K.) A rationale and pedagogical application for using media equipment and materials in the language classroom. Training in standard classroom media equipment operation and basic materials production techniques, focusing on the application to ESL instruction. Ms. Brinton (W)

222K. Language Testing for Teachers of English as a Second Language. (Formerly numbered 261K.) Prerequisites: course 370K, Linguistics 100. Theories and techniques for language assessment across the skill areas. Emphasis on classroom testing and the functions of testing within a language program. Basic statistical concepts and hands-on experience with the construction of language tests.
Mr. Rand (W)

223K. Role of English as a Second Language in Bilingual Education. (Formerly numbered 210K.) Prerequisites: course 370K, Linguistics 100. Survey of the literature, presentation of major research, and discussion of bilingual education programs in the United States. The linguistic, psychological, and sociological manifestations of bilingualism, with particular reference to aspects of learning, teaching, and testing language skills.
Mr. Campbell, Ms. McGroarty (F)

M224K. The Teaching of English for Minority Groups. (Formerly numbered 224K.) (Same as English M274.) Prerequisites: course 370K and Linguistics 100, or consent of instructor. In-depth description of the dialects of English and of other languages (such as Spanish) used by groups of students in American schools. The origins, variations within, and current status of language varieties such as Black English and Chicano Spanish, relevant research, and educational implications.
Mr. Bowen, Ms. McGroarty

225K. Program Evaluation in Applied Linguistics. Evaluation of the effectiveness of ESL curriculum and instruction, including the assessment of teacher behavior. Prevalent evaluation theories, the writing of evaluation proposals, developing program monitoring procedures, selecting appropriate evaluation design plans, framing the decision context, and reporting evaluation results. Mr. Campbell

227K. Experiential Seminar in Second Language Learning. Discussion, two hours; laboratory, four hours. Prerequisite: graduate standing. Students retrospect on a language learning experience (by keeping a daily journal and in weekly discussion meetings) and relate this experience to current issues in second and foreign language acquisition and/or second/foreign language learning teaching (drawing on the published literature). Students learn an uncommonly taught language with the use of authentic language materials (video and audio recordings and print material). Discussion of the experience and issues to develop a topic for a final term paper on one particular issue relevant to the goals of the course.
Mr. Andersen

229K. Current Issues in Language Education. (Formerly numbered 272K.) Specialized topics in language education of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of theoretical and practical import in the field.

232K. Advanced Seminar in the Construction and Administration of Language Tests. (Formerly numbered 263K.) Prerequisite: course 222K or consent of instructor. Designed to explore current issues in language testing research from both theoretical and practical perspectives and to provide actual experience in addressing a current issue. Specific topics vary according to trends in the field. Mr. Henning

241K. Contrastive and Error Analysis in the ESL Context. (Formerly numbered 250K.) Prerequisites: course 370K, Linguistics 100. Analysis of English and other languages at the phonological, grammatical, lexical, and cultural levels. Preparing analyses of interlanguage for research purposes. Preparation of lesson plans for helping specific groups of students overcome common errors identified through the analyses. Observation of ESL classes.
Mr. Andersen, Mr. Bowen, Mr. Schumann (W)

249K. Current Issues in Language Analysis. (Formerly numbered 272K.) Specialized topics in language analysis of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of theoretical import in the field.
Mr. Andersen, Ms. Celce-Murcia, Mr. Schumann

250K. Advanced Seminar in Cohesion Analysis of English Structure. (Formerly numbered M250K.) Prerequisite: course 122K or consent of instructor. Investigation in depth of selected linguistic features of oral and written texts that go beyond the sentence level and thus signal cohesion. Study of structures to determine their function in a variety of English texts representing several discourse types.
Ms. Celce-Murcia (F)

251K. Advanced Seminar in Interlanguage Analysis. (Formerly numbered 272K.) Prerequisite: course 241K. Analysis of interlanguage from various points of view (e.g., topic-comment structure, tense, aspect, modality, thematic structure of utterances), with the aim of understanding how interlanguage is organized. Original research projects.
Mr. Andersen, Ms. Hatch, Mr. Schumann

252K. Advanced Seminar in Contextual Analysis of English Structure. Prerequisite: course 122K or consent of instructor. Examination of selected words and structures in oral and written English texts to determine when and why the word or structure occurs. Emphasis on factors such as meaning, discourse genre, social/pragmatic function, and relative frequency. However, the starting point in the analysis is syntax (i.e., what are the structural properties — form, distribution — of the word(s) or structure(s) under consideration?). Ms. Celce-Murcia (F)

260K. Psycholinguistics and Language Teaching. Prerequisites: course 370K and Linguistics 100, or consent of instructor. An exploration of those areas of psycholinguistics covering foreign language acquisition; types and theories of bilingualism; learning theories underlying the current methods of teaching foreign languages. Ms. Hatch, Mr. Schumann (F)

261K. Second Language Acquisition. (Formerly numbered 262K.) Prerequisite: consent of instructor. Review of the literature on child and adult second language acquisition. Language variables (phonological, morphological, sentential, and discourse levels) and social and psychological variables which may account for differences in learning.
Mr. Andersen, Ms. Hatch, Mr. Schumann (F)

269K. Current Issues in Language Acquisition (2 to 4 units). (Formerly numbered 272K.) Specialized topics in language acquisition of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of theoretical concern in the field.
Mr. Andersen, Ms. Hatch, Mr. Schumann (W)

271K. Cross-Linguistic Topics in Second Language Acquisition. Lecture, one hour; discussion, three hours. Prerequisites: course 261K, Linguistics 100. Advanced seminar on second language acquisition in which a particular linguistic topic (e.g., development of tense-aspect, reference, subordination, agreement) is pursued from cross-linguistic and cross-disciplinary perspectives. Focus on language-specific vs. universal (i.e., cross-linguistically valid) mechanisms of second language development. Readings from research on a variety of languages in second language acquisition and related research on first language acquisition, pidgins and creoles, language contact, and language loss. May be repeated for credit with topic change. Mr. Andersen

280K. Language Policy in Developing Countries. (Formerly numbered 270K.) Prerequisite: consent of instructor. Use of and need for English in countries such as Nigeria and the Philippines; factors affecting language policy in their school systems; applicability of research techniques of sociolinguistics and psycholinguistics to problems of language policy.
Mr. Povey

281K. Language Policy in the United States. Prerequisite: consent of instructor. Use of and need for the teaching of languages, both English and others, in the United States. Issues related to matters of language choice and language planning undertaken for various purposes; factors affecting language use, change, and standardization in the U.S.
Ms. McGroarty

282K. Intercultural Communication and the Teaching of English as a Second Language. (Formerly numbered 272K.) Prerequisite: consent of instructor. An introduction to the field of cross-cultural communication, with special attention to the cultural influences on language use. Presentation of theoretical frameworks describing variations in language use; discussion of literature and development of awareness and knowledge regarding cultural norms of language learning and use. Ms. McGroarty

283K. Discourse Analysis. (Formerly numbered 272K.) A survey course covering language teaching and discourse analysis; discourse analysis and syntax; planned and unplanned discourse; conversational analysis; analysis of speech events; unequal power discourse; and analysis of classroom discourse.
Ms. Hatch (W)

284K. English for Specific Purposes. (Formerly numbered 264K.) Study of methodologies for needs analysis, curriculum development, and testing for specific academic, professional, and vocational groups who require English as a foreign or second language. Mr. Campbell (Sp)

M285K. Studies in African Literature in English. (Formerly numbered 285K.) (Same as English M261.) Prerequisite: consent of instructor. Special problems and trends of African literature in English. Mr. Povey (W)

289K. Current Issues in Language Use. (Formerly numbered 272K.) Specialized topics in language use and related areas of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of concern in the field. Mr. Campbell, Ms. Hatch, Ms. McGroarty (Sp)

370K. The Teaching of English as a Second Language. Lecture, six hours. Prerequisite: consent of instructor. Bibliography, survey, and evaluation of methods and materials. The nature of language learning. Analysis of the differences between two languages as a basis of instruction. Mr. Bowen, Mr. Campbell, Mr. Schumann (F)

375K. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. Ms. Altman (F,W,Sp)

380K. Supervised Teaching: English as a Second Language or Dialect. Prerequisite: course 370K. Team teaching at the elementary, secondary, or adult level under the supervision of a senior staff member. S/U grading. Ms. Brinton (Sp)

400K. TESL Colloquium. Prerequisite: consent of TESL M.A. adviser. M.A. candidates present and defend the results of their thesis research. Required of all candidates but may not be applied toward the M.A. degree requirements. Candidates for the Ph.D. in Applied Linguistics may also use this course to report on their dissertations. S/U grading. Mr. Andersen, Ms. Celce-Murcia, Mr. Rand (Sp)

495K. Training and Supervision of Teaching Assistants (2 units). (Formerly numbered 495KA-495KB.) Lecture, two or more hours. Corequisite: appointment as a teaching assistant. Orientation, preparation, and supervision of graduate students who have responsibility for teaching ESL courses at UCLA. Syllabus revision and materials preparation. May not be applied toward the degree requirements for the M.A. or certificate in TESL or Ph.D. in Applied Linguistics. S/U grading. Ms. Altman (F,W)

596K. Directed Individual Study. Prerequisite: graduate standing. Independent study in an area related to English as a second language. May not be repeated for credit.

598K. M.A. Research and Thesis Preparation (4 to 8 units). Prerequisite: graduate standing. Survey of research needs and thesis preparation. Includes optional section on experimental design and statistical methods in Fall Quarter. Credit (four units) toward the degree is allowed only once, but all M.A. candidates must enroll in the course each quarter they are registered and engaged in thesis preparation. S/U grading. (F, Sp)

Environmental Science and Engineering
(Interdepartmental)

This interdisciplinary graduate program, which leads to the Doctor of Environmental Science and Engineering (D.Env.) degree, provides scientific training in the enlightened management of the environment through a broad range of environmental disciplines. For details on this program, see Chapter 17 on the School of Public Health.

Ethnic Arts
(Interdepartmental)

This undergraduate major is now called "World Arts and Cultures." See Chapter 6 on the College of Fine Arts for details.

Folklore and Mythology
(Interdepartmental)

Scope and Objectives

The interdisciplinary Folklore and Mythology Program, which leads to the Master of Arts and Ph.D. degrees, provides coordinated study of the traditional life-styles of specific societies and culture areas, on the one hand, and systematic training in the research methods and investigative techniques of cross-cultural study, on the other. Courses focus on the nature, history, and functions of such traditional forms as narrative, song, music, art, dance, and speech and consider the part they play in human development and cultural existence. The program examines the ways in which human traditions both reflect and contribute to continuity and consistency in thought and life.

Trained folklorists pursue careers in teaching, research, governmental agencies, museum work and administration, performing groups and arts management, social work, the medical and legal professions, and business. Their responsibilities include documenting cultural and ethnic traditions, introducing traditional artists and their works to interested audiences, describing transformations of traditional processes and forms, and preserving on tape and film the customs and mores of social groups and individuals.

Although no undergraduate degree program is offered in folklore and mythology, students majoring in world arts and cultures may select folklore and mythology as their area of concentration. A variety of undergraduate courses offered by departments or by faculty participating in the interdepartmental program is also available to all University students. Those with undergraduate preparation in folklore and mythology studies may continue their work on the graduate level. For planning coursework, you should consult departmental counselors and the chair of the committee which administers the interdepartmental program.

Master of Arts Degree

Admission

Two letters of recommendation from former instructors or other comparable references are required and should be sent to the Chair, Folklore and Mythology Program, 1041 GSM, UCLA, Los Angeles, CA 90024.

Foreign Language Requirement

Reading knowledge of French, German, or Spanish is required. You have the option of demonstrating proficiency either by:

(1) Passing the fifth quarter or fourth semester course in the selected foreign language at a college or university with a grade of B or equivalent no more than five years before graduate enrollment, or

(2) Successfully completing the Educational Testing Service GSFLT examination with a score of 550 or better, or

(3) Passing a reading examination administered and evaluated by members of the program faculty (or by outside faculty for languages not familiar to the program faculty).

Course Requirements

All degree candidates, whether electing the thesis or the comprehensive examination plan (see below), must complete the following courses: Folklore 200, 201A, 201B, 216, and at least one course from each of the following groups:

Group 1: One course in folk song or folk music.

Group 2: One course in the folklore and mythology of a specific culture or culture area.

Group 3: One course in the mythology of a specific culture or in the principles of mythology.

Group 4: One graduate seminar in an area of folklore and mythology.

Only eight units of course 596 may be applied toward the minimum course requirements.

Thesis Plan

If you select this plan, you must complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included) and submit an acceptable thesis, prepared under the direction of a member of the program faculty. Submission of the thesis is followed by an oral examination covering the fields of folklore and mythology studies. You must complete all degree requirements in a maximum of six regular academic quarters.

The thesis committee, composed of three or more faculty members selected with the approval of the chair of the interdepartmental committee, is appointed no later than the quarter before you expect to complete the requirements. No outside members are required.

Comprehensive Examination Plan

If you plan to pursue a Ph.D. degree in Folklore and Mythology, you must elect this plan and must complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included). After completion of the coursework, you are expected to demonstrate competence in written and final oral examinations requiring a grasp of (1) theoretical bases, major documents, and research methods and techniques of folklore and mythology studies; (2) two forms of folklore and mythology; and (3) the folklore and mythology of a specific country, continent, or geographical area. You must complete all degree requirements in a maximum of six regular academic quarters.

Ph.D. Degree

Admission

Requirements for admission to the doctoral program include completing the requirements for the M.A. degree in Folklore and Mythology (or equivalent) and the written comprehensive examination. You will be admitted to the doctoral program on the recommendation of the interdepartmental committee (you may secure provisional admission in order to complete the admission requirements).

Major Fields or Subdisciplines

You must develop a competency in (1) a major field of folklore and mythology and (2) an area of concentration within a related discipline. These areas are selected with the approval of the guidance committee.

Foreign Language Requirement

Reading knowledge of German and another language approved by the guidance committee is required. You may demonstrate proficiency in any of the three ways described above under "Foreign Language Requirement" for the master's degree.

The foreign language examinations must be completed before you attempt the qualifying examinations.

Course Requirements

Before attempting the qualifying examinations, you must complete a minimum of nine courses or seminars in the 200 series (or substitutes recommended by the guidance committee) in (1) folklore and mythology and (2) an area of concentration within a related discipline.

Qualifying Examinations

After the required preparation, you complete a written examination covering (1) your specialization in folklore and mythology and (2) your related area of concentration. The examination is administered by a committee appointed with the approval of the interdepartmental committee and includes one or more members from your related discipline.

The written examination is followed by the University Oral Qualifying Examination covering the same two areas listed above, which you must pass in order to be advanced to candidacy. The oral examination is administered by the doctoral committee, which also considers and approves your dissertation topic.

Final Oral Examination

An oral defense of the dissertation may be required, to be determined by your doctoral committee after you complete the oral qualifying examination.

Lower Division Course

15. Introduction to American Folklore Studies. Lecture/discussion. A cultural-historical survey of the role of folklore in the development of American civilization and of the influence of the American experience in shaping folklore in American society; attention also to representative areas of inquiry and analytical procedures.

Upper Division Courses

101. Introduction to Folklore. A survey of the various forms of folklore and an examination of their historical and social significance.
Mr. Nagy, Mr. Porter

CM106. Anglo-American Folk Song. (Formerly numbered M106.) (Same as English M111B.) Prerequisites: satisfaction of Subject A requirement, junior standing. A survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. May be concurrently scheduled with course C206. Mr. Wilgus

C107. Folklore in Urban Environments. Lecture, three hours. Prerequisites: course 15 or 101 and/or consent of instructor. Exploration of the expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through the dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C207.
Mr. Jones, Mr. Stern

108. Afro-American Folklore and Culture. Prerequisite: course 101 or consent of instructor. A study of the traditional genres or forms of Afro-American folklore and their cultural functions. Ms. Robinson

M109. Mexican and Chicano Folklore in Cultural Context. (Same as Anthropology M166P.) Lecture, three hours. Prerequisite: consent of instructor. A historical and sociocultural survey of the folklore of peoples of Mexican cultural background within Mexico and the United States. Emphasis on folklore as indices of Mexican and Chicano identity, as communicated through such traditional forms as narrative, song, music, customs, beliefs, crafts, and foodways.

M111. The Literature of Myth and Oral Tradition. (Same as English M111A.) Prerequisite: satisfaction of Subject A requirement. A study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples. Mr. Nagy

M112. Survey of Medieval Celtic Literature. (Same as English M111E.) Prerequisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh is not required. A general course dealing with Celtic literature from the earliest times to the 14th century.
Mr. Ford

113. The Arthurian Tradition. Prerequisite: consent of instructor. A survey of the traditions relating to the British King Arthur from medieval times to the present day. Coverage includes both oral traditions and written texts; attention also to modern versions of Arthurian material in other mediums (e.g., opera, film).
Mr. Porter

118. Folk Art and Technology. Prerequisite: junior standing. A general course concerned with the material manifestations of folk culture and the theoretical concepts and methodologies utilized in their analysis.
Mr. Jones

M121. British Folklore and Mythology. (Same as English M111C.) Prerequisites: satisfaction of Subject A requirement, junior standing. A survey of the folklore of the peoples of Britain, with attention to their history, function, and regional differences.
Mr. Nagy, Mr. Porter

M122. Celtic Mythology. (Same as English M111D.) Prerequisite: course 101 or consent of instructor. A survey of the early materials, chiefly literary, for the study of the mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales. Mr. Ford

M123A. Finnish Folklore and Mythology. (Same as Scandinavian M123A.) The methods and results of Finnish folklore studies and the mythic traditions of the Finns. Special attention to the oral epic, beliefs, and legends. Ms. Rank

M123B. Finnish Folk Song and Ballad. (Same as Scandinavian M123B.) Course M123A is not prerequisite to M123B. A survey of Finnish balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. Ms. Rank

124. Finnish Folk Art and Technology. Material manifestations of Finnish folk culture: village layout and architecture, folk technology, arts and crafts, textiles, costumes, and design. Ms. Rank

M125. Folklore and Mythology of the Lapps. (Same as Scandinavian M125.) Survey of Lappish beliefs, customs, and various genres of oral tradition, including tales, legends, songs, and music. Attention also to the material manifestations of Lappish culture: arts and crafts, textiles, costume, folk technology. Ms. Rank

M126. Baltic and Slavic Folklore and Mythology. (Same as Slavic M179.) Lecture, three hours. A general course for students interested in folklore and mythology and for those interested in Indo-European mythic antiquities. Mrs. Gimbutas

M127. Celtic Folklore. (Same as English M111F.) Prerequisite: course 101 or consent of instructor. The folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research. Mr. Nagy

M128. Hungarian Folklore and Mythology. (Same as Hungarian M135.) A general course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research. Ms. Birnbaum

M129. Folklore and Mythology of the Ugric Peoples. (Same as Hungarian M136.) Survey of the traditions of the smaller Ugric nationalities (Voguls, Ostyaks, etc.). Ms. Birnbaum

130. North American Indian Folklore and Mythology Studies. Prerequisite: course 101 or consent of instructor. An examination of folkloristic and mythological data recorded from various North American Indian peoples within the contexts of the principal ideological frameworks which have been evolved historically for the analysis of such data. Mr. Georges

131. Folklore of India. Prerequisite: course 101 or consent of instructor. A survey of the folklore of India, with special reference to the content and dissemination of oral epics, ballads, legends, and beliefs. Mr. Jairazbhoy

M140. From Boccaccio to Basile (in English). (Same as Italian M140.) Lecture, three hours. A study of the origins and the development of the Italian novella in its themes, in its structure, in its historical context, and in its European ramifications. Designed for students in other departments who wish to become acquainted with either the premises or the growth of similar literary genres. Also intended for students majoring in folklore and mythology, who are given an insight into Italian popular tales when these (as in the case of Boccaccio) were translated into highly sophisticated literary forms, as well as when (as in the case of Basile) they become embedded into the folk tradition of the Western world. Mrs. Cottino-Jones

M142. Introduction to Jewish Folklore. (Same as Jewish Studies M143.) The nature of Jewish folklore; narrative, folk song, folk art, folk religion, and the methods and perspectives used in their analysis. Mr. Stern

M149. Folk Literature of the Hispanic World. (Same as Spanish M149.) Lecture, three hours. A study of the history and present dissemination of the principal forms of folk literature throughout the Hispanic countries. Ms. Arora

M150. Russian Folk Literature. (Same as Russian M150.) Lecture, three hours. Lectures and readings in Russian.

M154A-M154B. The Afro-American Musical Heritage. (Same as Music M154A-M154B.) Prerequisite: Music 1A or consent of instructor. Course M154A is prerequisite to M154B. A study of Afro-American rhythm, dance, music, field hollers, work songs, spirituals, blues, and jazz; the contrast between West African, Afro-American, and Afro-Brazilian musical traditions. Ms. DjeDje

M155. Oral Traditions in Africa. (Same as English M111G.) Prerequisite: upper division standing. A survey of African folk traditions: folktale, epic, heroic poetry, and folk song.

163. Folklore and Oral History. Prerequisite: junior standing. An examination of the relationships between folk tradition and oral history; how history may be derived from tradition; how traditions are embedded in historical sources; how the folk traditionalize history to reflect their point of view. Mr. Stern

M170. Russian Folklore. (Same as Russian M170.) Lecture, three hours. A general introduction to Russian folklore, including a survey of genres and related folkloric phenomena. Lectures and readings in English.

172. Folklore in Ethnic Context. Prerequisite: course 15 or 101 or consent of instructor. The role of folklore in ethnic relations; the processes by which ethnic folklore is generated, transmitted, and maintained by immigrant groups and subsequent generations. Mr. Georges, Mr. Stern

M180. Analytical Approaches to Folk Music. (Same as Music M180.) Prerequisites: Music 5A-5B-5C or consent of instructor. An intensive study of the methods and techniques necessary to the understanding of Western folk music. Mr. Porter

M181. Folk Music of Western Europe. (Same as Music M181.) Prerequisite: consent of instructor. Introduction to the forms and styles of traditional music in Western Europe. Historical and ethnological perspectives on this music combined with numerous recorded examples from the major cultural subdivisions of the region. Mr. Porter

190. Selected Topics in Folklore and Mythology Studies. Prerequisites: course 15 or 101, consent of instructor. A proseminar focusing on selected problems, data, or themes in folklore and mythology studies.

199. Special Studies in Folklore (2 to 4 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

200. Folklore Bibliography, Theory, and Research Methods. A basic course in theory and bibliography for folklore students, including the techniques of research necessary for serious folklore study. Mr. Georges, Mr. Ward

201A. Folklore Collecting and Field Research. Prerequisite: course 200. Discussion/demonstration concerning the theoretical concepts, methods, and techniques of data gathering and field research in folklore. Mr. Jones, Mr. Stern, Mr. Wilgus

201B. Folklore Collecting and Field Research. Prerequisite: course 201A. The supervised completion of a fieldwork project developed in course 201A. Mr. Jones, Mr. Stern, Mr. Wilgus

M202. Folklore Archiving. (Formerly numbered M202A-M202B.) (Same as Library and Information Science M202.) Lecture, two hours; laboratory, two hours. Exploration and analysis of alternative data indexing, storage, and retrieval systems and procedures for folklore archival collections, supplemented by first-hand experience in creating and managing data bases, utilizing both manual and computerized techniques. Mr. Georges, Mr. Stern

M205. Perspectives in American Folklore Research. (Same as English M205.) Prerequisites: course 101, one other upper division folklore course. An examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on the principal conceptual schemes and research orientations employed in the study of folklore in American society. Mr. Georges, Mr. Jones, Mr. Stern

C206. Anglo-American Folk Song. Prerequisite: graduate standing. A survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. May be concurrently scheduled with course CM106. Mr. Wilgus

C207. Folklore in Urban Environments. Lecture, three hours. Prerequisites: course 200 and/or consent of instructor. Exploration of the expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through the dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C107. Mr. Jones, Mr. Stern

208. Afro-American Folklore and Culture. Prerequisite: graduate standing. The theoretical and methodological constructs which have contributed to the body of black cultural expression in the United States. Ms. Robinson

213. Folk Belief and Custom. Prerequisites: course 101 and one course from 118, M121, M122, M123A, M123B, 124, M125, M126, M128, M149, M150, Anthropology 156, German 134, 240A, 240B, 240C. A study of beliefs and customs in the folk community: the life cycle, calendrical and agricultural customs, and legal antiquities. Mr. Jones, Mr. Ward

M214. The Ethnography of Humor. (Same as Anthropology M232S.) Lecture, three hours. Prerequisite: graduate standing in folklore and mythology or anthropology. An examination and analysis of selected humorous expressions and events in cross-cultural perspective, with emphasis on the major psychological and sociocultural approaches to their study and interpretation.

215. The Popular Legend. Prerequisite: course 200 or consent of instructor. A study of the categories of legendry and their relation to myth, custom, ritual, popular beliefs, and ballads. Mr. Ward

216. The Folktale. Prerequisite: course 200 or consent of instructor. Mr. Georges, Mr. Ward

217. Folk Speech. Prerequisite: course 101, CM106, or M111. Recommended: Anthropology M140, English 121, or Linguistics 100. A study of the ethnography of communication and its relevance to the study of social and regional dialects, proverbs, riddles, onomastics, folk poetry and verse, and traditional humor. Mr. Georges

218. Folk Art, Craft, and Aesthetics. Lecture, three hours. Prerequisite: course 200. An examination of research orientations and findings in regard to what has been called folk art, craft, and aesthetics. Major perspectives and areas of inquiry from the latter part of the 19th century to the present. Mr. Jones

M219. Seminar in the Puppet Theater. (Same as Theater M217B.) Lecture, three hours. Prerequisite: consent of instructor. Studies in the puppet theaters of the world: techniques, literature, aesthetics.

228. Seminar: Topics in Celtic Folklore and Mythology. Lecture, three hours. Prerequisites: course 200, coursework in Celtic studies. Preparation for the advanced study of and research in important areas of Irish oral tradition and folklore/mythology scholarship. Possible topics include pagan Celtic Britain/Ireland; comparative Celtic mythology; Celtic origin legends; literary and oral saints' legends; the Irish Fenian (Ossianic) tradition of ballads *(laoidhe/duain)* and prose tales; "fairy" beliefs; collecting and archiving methods of the Irish Folklore Commission; folklore studies and nationalism. Mr. Ford, Mr. Nagy

M230A-M230B. Folk Tradition in Italian Literature. (Same as Italian M230A-M230B.) Lecture, two hours.

M235. African Myth and Mythology. (Same as English M235.) Prerequisite: graduate standing. The methods of analyzing and appreciating African myths and mythological systems.

240. Introduction to Jewish Folk Literature. Prerequisites: upper division standing and consent of instructor, or graduate standing. An examination of both the historic and generic methods used in the study of Jewish folk literature. Mr. Stern

M241. Folklore and Mythology of the Near East. (Same as Near Eastern Languages M241.) Prerequisite: course 101 or equivalent.

M243A. The Ballad. (Same as English M243A.) Prerequisite: consent of instructor. A study of the English and Scottish popular ballads and their American derivatives, with some attention to European analogues. Mr. Wilgus

M243B. Problems in Ballad Scholarship. (Same as English M243B.) Prerequisite: course M243A or consent of instructor. Intensive investigation of a problem or problems in the study of the popular ballad. Mr. Wilgus

248. Theory and Method in Latin American Folklore Studies. A historical survey of folklore scholarship in Latin America, with emphasis on the theoretical bases, methods, and techniques employed in the study and analysis of traditional tales, songs, music, linguistic expression.

M249. Folk Literature of the Spanish and Portuguese Worlds. (Same as Portuguese M249 and Spanish M249.) Lecture, three hours. An intensive study of the folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech. Ms. Arora

251. Seminar in Finno-Ugric Folklore and Mythology. Advanced studies in the folk traditions and mythologies of the Finno-Ugric speaking nations.

M257. South American Folklore and Mythology Studies. (Same as Anthropology M232R.) Prerequisite: Anthropology 174P or consent of instructor. An examination of oral traditions and related ethnological data from various South American Indian societies against the background of the religious systems of these people. Mr. Wilbert

M258. Seminar in Folk Music. (Same as Music M258.) Seminar, three hours. Prerequisite: consent of instructor. Mr. Porter, Mr. Wilgus

259. Seminar in Folklore. Prerequisites: course 200, consent of instructor.

M286A-M286B. Studies in Hispanic Folk Literature. (Formerly numbered M286A-M286B-M286C.) (Same as Spanish M286A-M286B.) Lecture, two hours. Ms. Arora

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. Mr. Georges, Mr. Jones

400A-400B-400C. Directed Professional Activities. Prerequisite: consent of department chair. Directed individual projects in professional editing, bibliography, discography, filmography, festival direction, and other professional activities. May not be applied toward the M.A. course requirements. May be repeated for credit. S/U grading.

495. The Teaching of Folklore and Mythology. (Formerly numbered 495A-495B.) Lecture, three hours. Prerequisite: course 200. Analysis and design of alternative organizational schemes, teaching aids and techniques, and evaluation methods for folklore and mythology courses at the college level, with opportunities for observation and apprentice teaching. May not be applied toward M.A. or Ph.D. course requirements. S/U grading. Mr. Georges, Mr. Jones

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Studies in Folklore (2 to 6 units).

597A. Preparation for M.A. Comprehensive Examination (2 to 4 units). Prerequisites: graduate standing in folklore and mythology, consent of instructor. S/U grading.

597B. Preparation for Ph.D. Qualifying Examinations (4 to 8 units). Prerequisites: successful completion of M.A. comprehensive examination, consent of instructor. S/U grading.

598. M.A. Thesis Preparation (2 to 4 units).

599. Ph.D. Dissertation Research (4 to 8 units). Prerequisite: advancement to Ph.D. candidacy. S/U grading.

Scope and Objectives

French is second only to English as a language of international culture, and French literature is perhaps the richest and most consistently significant of all world literatures. In recent decades French critical thought has maintained a dominant position in the Western world. The French Department seeks to give its students not merely a background in French language and literature, but an opportunity to synthesize literary and linguistic study with examination of the critical intellectual questions of our time.

The lower division program is designed to provide a minimal competence in French after one year and a thorough basic knowledge of the language after two years. From the first day of French 1 all instruction is conducted in French.

The upper division program is chiefly devoted to perfecting linguistic skills and to the study of French literature. Courses in civilization and linguistics are also offered. Students graduating with a Bachelor of Arts in French should be fully fluent in French and possess a thorough background in French literature and civilization.

The graduate program comprises training in the various fields of French literature and thought, as well as in literary criticism and analysis. A number of courses in linguistics and stylistics are also offered. The department offers both the M.A. and Ph.D. degrees and admits several new graduate students each year, including many from France and a wide variety of other countries.

Bachelor of Arts Degrees

Preparation for the Majors

Required: French 1, 2, 3, 4, 5, 6, 12, and 15, or equivalent. You will normally take course 6 before undertaking course 12 or 15. If you received a grade of A in course 5, you may enroll in course 12 concurrently with course 6, with consent of instructor.

The Majors

Four majors are offered by the department:

Plan A leads to the Bachelor of Arts in French and subsequently to the standard elementary or secondary credential. *Required:* Fifteen full courses of upper division work, including French 100A, 100B, 100C, 103, 114A-114B-114C; two quarters from courses 130A through 132*; three courses in French literature from 115A through 120D**; three elective courses normally selected from upper division courses in the Department of French in language, civilization, or literature. A maximum of one upper division course outside the department may be included in the major program with consent of the undergraduate adviser.

*A course in French history may be substituted for one of these with consent of the major adviser.
**In all major plans one course from the 121 series and or one undergraduate seminar (French 150 through 160, not including 157) may be substituted for courses in the 115A through 120D offerings.

Plan A credential candidates must take 15 upper division French Department courses, including French 105, in order to qualify for a waiver of the national teacher examination for the single subject credential in French.

Plan B, with emphasis on literature, leads to the Bachelor of Arts in French and subsequently to the master's degree. *Required:* Fifteen full courses of upper division work, including French 100A, 100B, 100C, 103, 114A-114B-114C; six courses in French literature from 115A through 120D**; two elective upper division courses to be selected in consultation with a major adviser, either from the Department of French, from the humanities or social sciences division of the College of Letters and Science, or from the College of Fine Arts.

Plan C (French Studies) is a core program in French allowing for individual selection of relevant courses in related fields in the humanities, social sciences, linguistics, etc. *Required:* Fifteen full courses of upper division work, including French 100A, 100B, 100C, 103, 114A-114B-114C; three courses in French literature from 115A through 120D**; five upper division elective courses in the fields relevant to French studies to be selected in or out of the Department of French in consultation with the undergraduate adviser. This program does not normally prepare you for admission to the master's program in French at UCLA.

Plan D (French and Linguistics) leads to a Bachelor of Arts degree in French and Linguistics. In addition to the normal preparation for the major, you are required to complete the sixth quarter of work in one other foreign language or the third quarter in each of two other foreign languages. *Required:* French 100A, 100B, 100C, 103, 114A-114B-114C; two courses from French 105, 106, 107, 108A; Linguistics 100, 103, 110, 120A, 120B, and 164 or C165A or C165B.

It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the undergraduate level.

If your knowledge of French exceeds the preparation usually received in courses preparing for the major and if you demonstrate the requisite attainment in French 100A, 100B, or 100C, you may substitute for those courses in grammar and composition an equivalent number of upper division courses in the Department of French in consultation with an adviser. All prospective French majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

**In all major plans one course from the 121 series and/or one undergraduate seminar (French 150 through 160, not including 157) may be substituted for courses in the 115A through 120D offerings.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA Department of French. A maximum of eight units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. You must maintain a C average in upper division major courses in order to remain in any of the French majors.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French consult a major adviser before registering for upper division courses.

Honors Program

The honors program is designed for French majors who have fulfilled their lower division requirements and have a 3.5 departmental grade-point average (students with a lower GPA may also apply for admission to the program). If you are interested, contact the department during your junior year.

To graduate with departmental honors, you must take French 140A and 140B and/or two upper division literature courses for honors credit. In order to receive honors credit for a nonhonors upper division literature course, you must arrange with the professor to do an extra honors project. On the basis of your coursework, you are expected to choose a research topic you wish to pursue in greater depth. You must then take course 140C where you will receive personal supervision from a faculty member in researching and writing the topic. The three courses count as literature courses for the purpose of satisfying major requirements.

Teaching Credential in French

If you wish a single subject teaching credential in French, you must have the consent of the French Department in order to gain admission to student teaching. For the single subject credential, consent is contingent on a major (or equivalent) in French and the successful completion of French 370. For additional information, consult the Graduate School of Education (201 Moore Hall) and/or the Department of French.

Master of Arts Degree

Admission

The Graduate Record Examination (GRE) Aptitude Test, a sample of written work in French, and three letters of recommendation are required and should be sent to the Department of French, 160 Haines Hall, UCLA, Los Angeles, CA 90024. A Bachelor of Arts in French is desirable but not mandatory.

Major Fields or Subdisciplines

The corpus of French literature is divided into three chronological periods: (1) medieval/Renaissance; (2) classical (roughly the 17th and 18th centuries); and (3) modern (since 1800), with Franco-African literature as an option.

Foreign Language Requirement

The foreign language requirement will be fulfilled by passing a course of at least level three in either German, Latin, Spanish, or Italian; by passing the University reading examination in one of these languages; or by passing the Educational Testing Service (ETS) language examination with a score of 500 or better. In special cases, substitution of another foreign language will be accepted if approved by the graduate adviser. You must complete the foreign language requirement before you submit your M.A. thesis (Plan I) or take the M.A. examination (Plan II). All candidates for the M.A. must be proficient in spoken French.

Plans of Study

The department offers two master's programs: Plan I (thesis plan) and Plan II (comprehensive examination plan).

Plans I and II Course Requirements: French 201, 202, and 203A or 203B are required and should be taken as early as possible. A total of 12 courses in French are required, including at least three courses in each of two periods. At least eight of the courses must be at the graduate level. Students in Plan I may include four units of credit for course 598.

Plan I Admission Requirements and Oral Qualifying Examination: You may apply to the chair of the department for admission into Plan I after completing at least six graduate courses (200 series), four of which must be literature courses in the French Department. The minimum admission requirements are a 3.5 graduate GPA in French and letters from two graduate professors in the department specifically recommending admission into this plan.

Final admission into Plan I (i.e., permission to write the thesis) is contingent on passing a one-hour oral examination in the two periods prepared. If you fail this examination, the examining committee will determine whether you may be permitted another attempt or be advised to take the comprehensive examination (Plan II).

The thesis should demonstrate proficiency in the methods and concepts of literary research; a suitable length is normally about 50 pages. A tentative outline of the proposed thesis must be approved by the thesis committee in writing before work on the thesis is begun. Final approval of the thesis by the committee is also required.

Plan II Comprehensive Examination: You must pass written examinations of four hours in length in each of the two periods prepared, a two-hour *explication de texte,* and an oral examination in French. The examinations are given in the Fall and Spring Quarters and may be retaken once.

Terminal M.A. Degree

Decision to award a terminal M.A. degree is made by the department on the basis of (1) M.A. examination papers, (2) oral examination, and (3) overall appraisal of record.

Ph.D. Degree

Admission

Completion of a master's degree with recommendation for continuance by the M.A. committee is required; outside applicants need an M.A. degree or equivalent and three letters of recommendation, as well as the Graduate Record Examination (GRE) Aptitude Test and a sample of written work in French.

Admitted students holding the M.A. or *Maîtrise* from another institution must take an oral *examen de passage* in two periods of literary history in order to be formally admitted to the doctoral program. This examination, administered by the M.A. committee, should be taken during your first year in residence. In case of failure it may be repeated once.

Major Fields or Subdisciplines

The corpus of French literature is divided into three chronological periods: (1) medieval/Renaissance; (2) classical (roughly the 17th and 18th centuries); and (3) modern (since 1800), with Franco-African literature as an option.

Foreign Language Requirement

(1) Languages are divided into three groups: Latin; German and Russian; and other Romance languages. You must study two languages up to levels five and six respectively, with no more than one from any one group. The languages selected must be approved by your guidance committee. Language requirements may also be satisfied by taking the Educational Testing Service (ETS) examination with level five corresponding to a score of 550 and level six, 600. Substitution of another language, when warranted by the nature of your specialization, must be recommended by the guidance committee and approved by the graduate adviser.

(2) When the nature of your specialization requires the knowledge of a third language (in addition to the two normally required), the guidance committee is expected to take into account the extra work implied in making its other recommendations.

(3) Language requirements are to be completed before taking the doctoral qualifying examination.

Course Requirements

The following courses are required: (1) French 201, 202, and 203A or 203B; (2) at least four seminars, two of which should be in your proposed period of specialization; (3) at least two graduate courses in other departments related to the area of specialization. In addition, you are expected to follow the guidance committee's suggestions in taking courses in preparation for the doctoral qualifying examination.

Qualifying Examinations

Four written examinations of four hours each are required as follows: (1) focused specifically in the area of the prospective dissertation topic; (2) dealing with a more general subject related to the dissertation topic; (3) in a cognate field related to the methodology or approach you plan to employ in the dissertation; (4) in the period not covered at the M.A. level.

The topics to be dealt with in parts 1, 2, and 3 are determined by prior consultation with the doctoral guidance committee. At the discretion of the department, you may be permitted to retake a failed examination once.

After passing the written examinations, you are admitted to the University Oral Qualfying Examination. This examination, normally of two hours duration, bears chiefly on parts 1 and 2 of the written examinations and on the proposed dissertation subject. You are expected to submit a written outline of research plans before the oral examination.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

This examination is no longer required but may be imposed at the discretion of an individual doctoral committee.

Lower Division Courses

Students who have had special advantages in preparation may, through placement examinations or with recommendation of the instructor, be permitted a more advanced program. No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary French. Lecture, five hours. Not open for credit to students who have completed two years of high school French or equivalent with grades of C or better. Ms. Hamel-Baccash in charge

1G. Elementary French for Graduate Students (3 units). Preparation for ETS or other language examinations. A passing grade does not imply satisfaction of language requirements. S/U grading.
Ms. Brichant

2. Elementary French. Lecture, five hours. Prerequisite: course 1 with a grade of C – or better or one year of high school French. Not normally open for credit to students who have completed two years of high school French or equivalent.
Ms. Hamel-Baccash in charge

2G. Elementary French for Graduate Students (3 units). Prerequisite: course 1G or equivalent. Preparation for ETS or other language examinations. A passing grade does not imply satisfaction of language requirements. May be repeated. S/U grading.
Ms. Brichant

3. Elementary French. Lecture, five hours. Prerequisite: course 2 with a grade of C – or better or two years of high school French or advanced placement standing. Ms. Hamel-Baccash in charge

4. Intermediate French. Lecture, five hours. Prerequisite: course 3 with a grade of C – or better or three years of high school French or advanced placement standing. Ms. Hamel-Baccash in charge

5. Intermediate French. Lecture, five hours. Prerequisite: course 4 with a grade of C – or better or four years of high school French or advanced placement standing. Ms. Hamel-Baccash in charge

6. Intermediate French. Lecture, five hours. Prerequisite: course 5 with a grade of C – or better or advanced placement standing.
Ms. Hamel-Baccash in charge

10A-10D. French Conversation (2 units each). Discussion, three hours. Prerequisite: course 3 with a grade of A or B or consent of department.
Mr. de Martini in charge

12. Introduction to the Study of French Literature. Lecture, three hours. Prerequisite: course 6 or equivalent or consent of instructor. Principles of literary analysis as applied to selected texts in poetry and prose.

15. Theory and Correction of Diction. Prerequisite: course 6 or consent of instructor. French pronunciation, diction, intonation in theory and practice; phonetic transcription, phonetic evolution of the modern language; remedial exercises; recordings.
Ms. Korol-Ward in charge

Upper Division Courses

Prerequisites to all upper division courses taken in partial fulfillment of the French major are French 6, 12, 15, or equivalent. Credit is ordinarily not allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Courses 104, 105, 106, 107, and 108A are not sequential and may be taken in any order, provided the prerequisites for each course are fulfilled.

100A. Advanced Grammar I. Prerequisites: courses 6 and (normally) 15, or equivalent. A placement examination is administered, and qualified students are advanced to course 100B or 100C. Ms. Brichant

100B. Advanced Grammar II. Prerequisite: course 100A or equivalent. A placement examination is administered, and qualified students are advanced to course 100C or 103. Ms. Brichant

100C. Advanced Grammar III. Prerequisite: course 100B or equivalent. A placement examination is administered, and qualified students are advanced to course 103. Ms. Brichant

103. Advanced Stylistics. Lecture, three hours. Prerequisite: course 100C or equivalent. Required of all majors, as well as of all candidates for the standard credential in elementary or secondary teaching.
Ms. Korol-Ward in charge

104. Literary Composition. Lecture, two hours. Prerequisite: course 103 or consent of instructor.

105. French Linguistics. Lecture, three hours. Prerequisite: consent of instructor.

106. Advanced French Phonetics. Lecture, two hours. Prerequisite: consent of instructor.
Ms. Korol-Ward

107. Contemporary Spoken French. Discussion, three hours; laboratory, added as needed. Prerequisite: course 103 or consent of instructor.

108A-108B-108C. Advanced Practical Translation. Lecture, three hours:

108A. Prerequisite: course 103 with a grade of B or consent of instructor. An introduction to the translation of advanced texts of general interest, with work in the theory of translation.

108B. Prerequisite: course 108A or consent of instructor. Practice in the translation of technical documents and texts; comparative stylistics of translation.

108C. Prerequisite: course 108B or consent of instructor. Advanced work in areas of general and specialized interest, with exercises in consecutive and simultaneous translation.

114A-114B-114C. Survey of French Literature I, II, III. Prerequisite: course 12 or equivalent. A survey of French literature from the medieval period through the 20th century:

114A. Medieval and Renaissance Literature.

114B. Literature of the Classical Era (17th and 18th Centuries).

114C. Modern Literature (19th and 20th Centuries).

115A-115D. Medieval French Literature:

115A. The Medieval Epic.

115B. The Medieval Romance.

115C. The Medieval Theater.

115D. Medieval Lyric Poetry. Mr. Haidu

116A-116D. The Renaissance:

116A. Rabelais and His Time.

116B. Ronsard and His Time.

116C. Montaigne and His Time.

116D. Renaissance Theater.
Mr. Bensimon, Mr. Carron

117A-117D. The 17th Century:

117A. Corneille and the Baroque.

117B. The Classical Theater: Racine and His Contemporaries.

117C. Moliere and the Comedy of the 17th Century.

117D. Philosophers, Moralists, and Novelists of the 17th Century. Ms. Melzer

118A-118D. The 18th Century:

118A. Comedy and Drama.

118B. Voltaire and the Encyclopedists.

118C. Diderot and Rousseau.

118D. The Novel. Mr. Coleman, Mr. Werner

119A-119D. The 19th Century:

119A. Romanticism.

119B. The Generation of 1848.

119C. Naturalism and Symbolism.

119D. The Turn of the Century.
Mr. el Nouty, Mr. Gans

120A-120D. The 20th Century:

120A. Gide, Proust, and Their Time.

120B. Post-World War I French Writers.

120C. Sartre, Camus, and Their Time.

120D. Contemporary French Writers.
Ms. Kao, Mr. Reid

121A-121D. Contemporary Literature of French Expression. Lecture, three hours:

121A. Franco-African Literature.

121B. French-Canadian Literature.

121C. Franco-Helvetian and Franco-Belgian Literature.

121D. Franco-Caribbean Literature.
Mr. Coleman, Mr. el Nouty

122. French Folklore and Young People's Literature. Ms. Korol-Ward

123. French Popular Literature. "Romans policiers," "Theatre des boulevards," "chansons-poemes," etc.

124. Dramatic Interpretation. Study of the techniques of stage direction and interpretation of French drama. A survey of some of the different theories and approaches used on the French stage. Each student acts in or directs a scene from a play to be performed under rehearsal conditions. Ms. Korol-Ward

130A-130B-130C. History of French Civilization and Institutions. Prerequisites: courses 6, 12, 15:

130A. France from Prehistoric Times to the End of the Middle Ages. (Formerly numbered 135.) Lecture, three hours. A fourth hour may be required for the viewing of films and other laboratory activities.
Ms. Brichant

130B. From the Renaissance to the End of the "Ancien Régime." (Formerly numbered 134.) Lecture, three hours. A fourth hour may be required for the viewing of films and other laboratory activities.
Ms. Brichant

130C. From the End of the "Ancien Régime" to 1918. (Formerly numbered 133.) Lecture, three hours. A fourth hour may be required for the viewing of films and other laboratory activities. Ms. Brichant

132. Contemporary France and Its Institutions. Lecture, three hours. Social, cultural, political, economic, and technological aspects of the position of France within the Common Market and other international organizations. Ms. Brichant

138. Cinema and Literature in Contemporary France. Lecture, three hours. Additional hours may be required for the viewing of films and other laboratory activities.

140A-140B-140C. Honors Program in French. Prerequisites: junior or senior standing in French with a 3.5 GPA in the major, a 3.3 overall average, consent of department:

140A. Honors Seminar in French. Seminar on different aspects of a selected literary genre, such as drama, poetry, the novel, etc. Ms. Melzer in charge

140B. Honors Seminar in French. Seminar on a selected theme or particular problem of French literature, civilization, or ideas. Ms. Melzer in charge

140C. Honors Tutorial in French. Individual study on a topic related to that of course 140A or 140B leading to an essay to be written under the guidance of a faculty member. Ms. Melzer in charge

The following courses may not be taken for graduate credit but may be taken as the equivalent of out-of-department electives by undergraduate majors.

142. Contemporary French Theater in Translation. Lecture, two hours.

143. Modern French Thought. Lecture, two hours. Reading and discussion in translation of contemporary works.

144A-144B-144C. The French Novel in Translation. Lecture, two hours. Authors to be studied are announced each quarter.

145. Topics in French Literature. To be announced each quarter. May not be taken for major or graduate credit but may be considered as an out-of-department elective for the purpose of satisfying major requirements.

Courses 150 through 157 may be repeated once for credit with consent of the major adviser.

150. Studies in Medieval Literature.

151. Studies in 16th-Century Literature.

152. Studies in 17th-Century Literature.

153. Studies in 18th-Century Literature.

154. Studies in 19th-Century Literature.

155. Studies in 20th-Century Literature.

156. Studies in Contemporary Literature of French Expression.

157. Studies in the French Language.

158. Woman in French Literature. Lecture, three hours. Exploration of a selected aspect of the situation of woman in French literature as author, character, symbol, etc.

160. Studies in the History of Ideas. Specific themes which address a particular problem of French literature, civilization, or ideas. May be repeated for credit with consent of major adviser.

199. Special Studies in French (2 to 8 units). Prerequisites: junior or senior standing, consent of instructor, consultation with undergraduate adviser. May be repeated once.

Graduate Courses

201. Literary Research and Composition. (Formerly numbered 201D.) Lecture, three hours. Practical work of an advanced nature in the expression and presentation of literary research.

202. Techniques of Literary Analysis. Lecture, three hours. Practice in the close analysis of literary texts.

203A-203B. French Literary Criticism. (Formerly numbered 203A-203B-203C.) Lecture, three hours:

203A. History of Literary Theory. The evolution of literary theory from classical times to the 20th century.

203B. Modern Theories of Criticism.
Mr. Coleman, Ms. Kao, Mr. Reid

204A. Phonology and Morphology from Vulgar Latin to French Classicism. The evolution of the French language. Required of candidates for the Ph.D. in Romance Linguistics and Literature who specialize in philology.

204B. Syntax and Semantics from Vulgar Latin to French Classicism. The evolution of the French language. Required of candidates for the Ph.D. in Romance Linguistics and Literature who specialize in philology.

205A-205D. The Intellectual Background of French Literature:

205A. Scholasticism (with Ancient Sources), Humanism.

205B. Rationalism, Empiricism, Positivism.

205C. Criticism, Idealism, Dialectical Materialism.

205D. Phenomenology, Existentialism, Structuralism.

206. French Linguistics. Prerequisite: course 105 or Linguistics 100 or equivalent. Discussion of modern linguistic theory in the area of French grammar, syntax, and semantics.

207. Introduction to Stylistics. Discussion of the basic stylistic devices of the French language.

215A-215F. The Medieval Language and Literature. (Formerly numbered 215A-215E.):

215A. Old and Middle French. Course 215A is prerequisite to 215B through 215F. Phonology and morphology of the language. Introduction to Old French texts.

215B. The Chanson de geste.

215C. The Romance.

215D. Medieval Theater.

215E. Provencal Poetry.

215F. Medieval French Poetry. Mr. Haidu

216A-216H. The Renaissance:

216A. Topics in Early 16th-Century French Literature.

216B. Topics in the Pleiade.

216C. Topics in Late 16th-Century French Literature.

216D. Ronsard.

216E. Rabelais and Prose Writers.

216F. Baroque Poetry.

216G. Montaigne.

216H. Theater. Mr. Bensimon, Mr. Carron

217A-217I. The 17th Century:

217A. Topics in Classical Theater.

217B. Topics in Nondramatic Literary Genres.
217C. Topics in Classical Prose and Thought.
217D. Moliere.
217E. Corneille.
217F. Racine.
217G. The Novel.
217H. Moralists.
217I. Religious Thought. Ms. Melzer
218A-218D. The 18th Century:
218A. Topics in the Early Enlightenment, 1680-1747.
218B. Topics in the Enlightenment, 1748-1765.
218C. Topics in the Late Enlightenment, 1766-1791.
218D. The Theater. Mr. Coleman, Mr. Werner
219A-219K. The 19th Century:
219A. Topics in Romanticism.
219B. Topics in Realism and Naturalism.
219C. Topics in Symbolism.
219D. Poetry.
219E. The Novel.
219F. The Theater.
219G. Historians and Critics.
219H. Victor Hugo.
219I. Balzac.
219J. Independent Novelists.
219K. Intellectual Trends. Mr. el Nouty, Mr. Gans
220A-220P. The 20th Century:
220A. From Symbolism to Surrealism: Selected Topics.
220B. From Surrealism to Existentialism: Selected Topics.
220C. From Existentialism to the Present: Selected Topics.
220D. Paul Valery.
220E. Marcel Proust.
220F. Andre Gide.
220G. Andre Malraux.
220H. The Theater.
220I. The Anti-Theater.
220J. The Novel.
220K. The Antinovel.
220L. Surrealism.
220M. Existentialism.
220O. Poetry.
220P. Cinema and Literature. Ms. Kao, Mr. Reid
221A-221D. French-African Literature:
221A. Introduction to the Study of the French-African Literatures.
221B. French-African Literature of Madagascar and Bantu Africa.
221C. French-African Literature of Berbero-Sudanese and Arabo-Islamic Africa.
221D. Franco-Caribbean Literature. Mr. el Nouty

Courses 250A through 260B may be repeated for credit.

250A-250B. Studies in Medieval Literature. Mr. Haidu
251A-251B. Studies in the Renaissance. Mr. Bensimon and the Staff
252A-252B. Studies in the Baroque. Mr. Bensimon and the Staff
253A-253B. Studies in the 17th Century. Ms. Melzer
254A-254B. Studies in the 18th Century. Mr. Coleman, Mr. Werner
255A-255B. Studies in the 19th Century. Mr. el Nouty, Mr. Gans
256A-256B. Studies in Contemporary Literature. Ms. Kao, Mr. Reid
257A-257B. Studies in French-African Literature. Mr. el Nouty and the Staff
258A-258B. Studies in Literary Criticism. Mr. Gans and the Staff
259A-259B. Studies in Philosophy and Literature.
260A-260B. Studies in the History of Ideas. Particular problems of French literature and ideas.
261. Studies in French Linguistics.
262. Studies in Stylistics.
270. Introduction to Methods of Literary Research. Prerequisite: graduate standing. Lectures by specialists on aspects of literary research, ranging from bibliography to new critical approaches.
310A-310B. The Teaching of French in the Elementary School and at the Junior High Level:
310A. Lecture, three hours. Prerequisite: consent of instructor. Theory of French teaching in the elementary school and at the junior high level. Required for the standard elementary credential.
310B. Hours to be arranged. Observation of language teaching in the elementary school and at the junior high level. Required for the standard elementary credential.
370. The Teaching of French in the Secondary School and at the College Level: Observation. Prerequisite: course 103. Observation of language teaching in the secondary school and at the college level. Ms. Hamel-Baccash
372. The Language Laboratory (2 units). Prerequisite: consent of instructor. New electronic techniques for language instruction. Pedagogical and practical problems of making tapes, installing and organizing a laboratory; control procedures. Mr. de Martini
375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. Ms. Hamel-Baccash
495. The Teaching of French in the Secondary School and at the College Level. Prerequisite: course 370. Theory of language teaching.
596. Directed Individual Studies or Research (2 to 4 units).
597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). May be repeated for a maximum of 16 units. S/U grading.
598. Research for and Preparation of M.A. Thesis (2 to 4 units). Prerequisite: consent of instructor. A maximum of four units may be applied toward the M.A. degree requirements. S/U grading.
599. Research for and Preparation of Ph.D. Dissertation (2 to 8 units).

Jonathan D. Sauer, Ph.D.
Allen J. Scott, Ph.D.
Werner H. Terjung, Ph.D.
Norman J. W. Thrower, Ph.D.
Hartmut Walter, Ph.D.
Henry J. Bruman, Ph.D., *Emeritus*
Huey L. Kostanick, Ph.D., *Emeritus*
Richard F. Logan, Ph.D., *Emeritus*
Clifford H. MacFadden, Ph.D., *Emeritus*
Howard J. Nelson, Ph.D., *Emeritus*
Benjamin E. Thomas, Ph.D., *Emeritus*

Associate Professors

J. Nicholas Entrikin, Ph.D.
Gerry A. Hale, Ph.D.
James H. Johnson, Ph.D.
Christopher L. Salter, Ph.D.
Stanley W. Trimble, Ph.D.

Assistant Professors

Susan W. Beatty, Ph.D.
Lisa J. Graumlich, Ph.D.
Robert McMaster, Ph.D.
Frank W. Weirich, Ph.D.

Scope and Objectives

Geographical knowledge deals with the description and analysis of the spatial distribution of those conditions (either naturally occurring or humanly produced) that form the material basis for the reproduction of social life. It also entails understanding the relationships between such conditions and the qualities of social life achieved under given economic, political, social, and cultural systems.

The research and teaching interests of the faculty, ranked sixth nationally by the Conference Board of Associated Research Councils, cover major areas of geographical knowledge and underlie both the undergraduate and graduate instructional programs. These areas of interest may be broadly grouped into basic environmental studies, applied environmental studies, cultural and historical geography, economic and urban geography, political and social geography, geographical procedures, and regional geography.

The undergraduate program is designed for students who wish to gain a thorough understanding of geographical analysis, with emphasis on ecological, physical, social-spatial, and historical theories and methods of analysis applied to a wide range of biophysical, material, and social questions. The department offers two undergraduate majors that lead to the Bachelor of Arts degree: (1) the major in geography and (2) the major in geography/

ecosystems. The majors prepare students for employment opportunities in both the public and private sectors (in environmental analysis, assessment, and management, map making and remote sensing, regional analysis, economic and urban spatial analysis, and teaching) and for graduate study in law, management, urban and regional planning, education, other biophysical and social sciences, and applied programs, as well as in geography.

Producing geographers of high quality is the principal goal of the graduate program, designed primarily for students pursuing the Ph.D. degree. The Master of Arts program, which involves coursework and a thesis, serves as an essential building-block of the doctoral program. The doctorate is awarded to those students who have achieved the level of geographical knowledge and training required of a professional geographer. The degree recognizes the ability of students to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

Bachelor of Arts in Geography

Geography majors are encouraged to consult with the undergraduate adviser for the planning of a program suitable to their particular and individual objectives.

Preparation for the Major

Required: Geography 1, 2, 3, 4, and Mathematics 50 or equivalent. A mathematics background, such as Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, is recommended. All courses must be completed for a letter grade.

The Major

Required: A minimum of 10 upper division courses in geography taken for a letter grade. In meeting this requirement, you must take three courses from Group I — The Environment; three courses from Group II — Human Geography; one course from Group III — Procedures; two courses from Group IV — Regions; and one elective upper division course in geography. You are encouraged to take more than 10 upper division courses. A C average in the major is required for graduation.

Foreign Language/Mathematics Requirement

Every geography major is required to pass five quarter courses in foreign language (in no more than two languages) or mathematics, in any combination. Each year of high school language (but not mathematics) will be accepted as equivalent to one quarter course. A score of 500 on an Educational Testing Service (ETS) language examination will also satisfy this requirement. In mathematics, only Mathematics 2, 3A, 3B, 3C, 5, 31A, 31B, 32A, or equivalent are acceptable. A grade of Passed or C (or better) is required in all courses intended to satisfy this requirement. These courses may be used to meet the general education requirements of the college. (Note: Students should be aware of the college restrictions on duplication of high school foreign language.)

Allied Fields

You must develop some competence in one or two allied fields. This requirement consists of at least four upper division courses selected from at least one but not more than two of the following disciplines: anthropology, atmospheric sciences, biology, chemistry, earth and space sciences, economics, folklore, history, management, philosophy, physics, political science, psychology, public health, sociology. Architecture and Urban Planning 187, 190, and M195 are also acceptable. Other disciplines require departmental consent.

Honors Program

Honors in the geography major may be obtained through procedures described under Geography 199HA-199HB.

Bachelor of Arts in Geography/Ecosystems

The major in geography/ecosystems offers a choice of three plans, each of which has its foundations within the Department of Geography but is essentially interdisciplinary in scope.

Plan 1 (Environmental Policy) has a social science orientation and is designed primarily for students whose environmental interests focus on policy issues concerning environmental management and conservation.

Plan 2 (Natural Resources) has a biogeographic orientation and is designed for students whose environmental interests focus on the conservation and management of renewable natural resources.

Plan 3 (Environmental Engineering) has a physical geography/technological orientation and is designed primarily for students interested in the physical and technological aspects of environmental conservation and management.

All three plans have certain features in common: (1) a high degree of emphasis is placed on student input and interaction with the faculty — particularly with respect to seminars; (2) you are encouraged to consult with the undergraduate adviser in planning a program; (3) all courses required for the major, both geography and non-geography, must be taken for a letter grade. A C average in the major is required for graduation.

Plan 1 (Environmental Policy)

Preparation for the Major: Biology 2, Economics 1, 2, Engineering 11, Geography 1, 2, 5, Mathematics 50, Program in Computing 10A. Geography 3, 4, and 6 are recommended. A mathematics background, such as Mathematics 2, 3A, 3B, and 3C, or 31A, 31B, and 32A, is also recommended.

The Major: Geography 129, three courses from Group Ia, two courses from Group Ib, one course from Group III.

Electives: Six courses from the following: Anthropology 132, 150, 153A, 153B, 167; Architecture and Urban Planning 190; Communication Studies 120; Economics 110, 111, 170; English 131A through 131H; Geography: no more than three courses from 100 through 199; one course only from History 195A through M195G; Political Science 141, 142, 167, 170, 191; Psychology M138; Public Health 150, 152, 154, 186; Sociology 120, 125.

Plan 2 (Natural Resources)

Preparation for the Major: Biology 5, 6, Chemistry 11A, Economics 1, Engineering 11, Geography 1, 2, 5, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, 50, Program in Computing 10A. Economics 2, Geography 3, 4, and 6, and Microbiology 6 are recommended.

The Major: One course from Biology 103, 111, M118; Earth and Space Sciences 150; Geography 129, three courses from Group Ia, two courses from Group Ib, two courses from Group III.

Electives: No more than three courses may be taken in any one department to satisfy the elective requirement. Six courses should be selected from the following: Anthropology 132, 167; Biology 103, 111, M118, 120, 122, 125, 131, 135, 147; Civil Engineering 181A, 184A, 184D; Earth and Space Sciences M139; Economics 111, 170; English 131A through 131H; Geography: no more than three courses from 100 through 199; Materials Science and Engineering M107A; Mechanical, Aerospace, and Nuclear Engineering 180A; Public Health 103,152, 154. Biology courses taken for elective requirements may not be applied toward the major requirement in biology.

Plan 3 (Environmental Engineering)

Preparation for the Major: Biology 2, Chemistry 11A, Earth and Space Sciences 1 or 100, Economics 1, Engineering 11, Geography 1, 2, 5, Mathematics 31A, 31B, 32A, 33A, 50, Program in Computing 3 or 10A. Chemistry 11B/11BL, 11C/11CL, Geography 3, 4, 6, Mathematics 33B, Physics 8A, 8B are recommended.

The Major: Earth and Space Sciences M139, 150; Geography 129, five courses from Group I (100, 104, 105, 124, and 106 or M127), two courses from Group III, including 160 or 168.

Electives: Six courses from the following: Atmospheric Sciences 144; Civil Engineering M134A, 181A, 184A, 184B, 184D, 184E; Earth

and Space Sciences 105; Economics 110; Electrical Engineering 103; English 131A through 131H; Geography: no more than three courses from 100 through 199; Mathematics 115A, 141A, 141B; Mechanical, Aerospace, and Nuclear Engineering 103, M105A, M105D, 153A, 180A; Public Health 150.

Honors Program

Honors may be awarded if you attain and maintain at least a 3.4 GPA in the major (including the senior thesis) from the beginning of your senior year to graduation. The thesis (Geography 196) is a substantial though not necessarily lengthy contribution to ecosystem analysis that must be submitted no later than early in your final quarter.

Specialization in Computing

Majors in geography and geography/ecosystems may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course (Mathematics 32A and 32B are also highly recommended), (3) completing at least two courses from Geography 104, 167, 168, 171.

Graduate Study

Admission

Application may be made for admission to any quarter. You must submit an official application, a complete set of transcripts of prior university coursework, the results of the Graduate Record Examination (GRE) Aptitude Test, and three letters of evaluation. You should normally have (1) completed the undergraduate major in geography or its equivalent, (2) received a B.A. degree, (3) attained at least a 3.3 grade-point average in courses taken in your junior and senior years and in the major for admission to the M.A. program and a 3.5 GPA for the Ph.D. (exceptions may be made if your record indicates unusual promise), (4) attained a high GRE score (normally well above 1,100) in the combined verbal and quantitative sections, (5) strong letters evaluating past academic and, possible professional, performance and potential for high achievement in the graduate program.

Non-geography majors entering the graduate program are required to make up identified deficiencies. Normally this entails completing from three to six upper division courses during your first year in residence. Under most circumstances these courses are to be distributed evenly between Groups I and II and are in addition to those required for the M.A. or Ph.D. degree.

Admission to the Ph.D. program usually requires an M.A. or M.S. degree. You must provide clear evidence of your ability to conduct substantive research and to articulate your ideas clearly in writing. In addition, a faculty member must be willing to serve as your interim adviser, so it is advisable to establish prior contact with potential advisers before the decision to admit is made. Under rare circumstances, you may proceed directly toward the Ph.D. degree without taking a master's degree.

The Test of English as a Foreign Language (TOEFL) is normally required of all international applicants whose native language is not English.

Information and graduate brochures may be obtained by writing to the Graduate Adviser, Department of Geography, 1255 Bunche Hall, UCLA, Los Angeles, CA 90024.

Major Fields or Subdisciplines

Students commonly specialize in one or more of the following areas of geographical knowledge: environmental studies, geomorphology, climatology, biogeography, cartography, and economic, social, political, cultural, historical, urban, and regional geography. At the M.A. level students emphasize at least one of these specialized areas; the written qualifying examinations for the Ph.D. include three papers in the major fields or subdisciplines. However, because geographical knowledge and its associated research questions frequently transcend disciplinary and subdisciplinary boundaries, you are expected to refine and deepen your research interests further, in consultation with knowledgeable faculty members, within, across, and beyond these organized research and teaching areas.

Master of Arts Degree

Course Requirements

You must complete at least nine courses, seven of which must be at the graduate level, including the required core courses (Geography 298A, 298B, 298C). The core courses must be completed within two years and with a grade of B– or better in each (if you enter with a geography major, you should complete them in your first year). Your program must have the approval of your committee chair and the graduate adviser each quarter.

Only one 500-series course may be applied toward the minimum course requirement for the master's degree and toward the minimum graduate course requirement.

Research Tool Requirement

At least one research tool (a foreign language or a series of mathematics or statistics courses) is required. The requirement varies according to each subdisciplinary area or region. At least a B average must be attained in any series of courses taken, and the requirement must be met prior to approval of the thesis proposal by your guidance committee. If a foreign language is selected, the requirement may be fulfilled by (1) taking a series of courses, (2) passing the Educational Testing Service (ETS) examination with a score of 500 or better, or (3) passing a formal departmental written examination.

Thesis Plan

You must present a thesis, based in whole or in part on original investigation. Selection of a thesis topic, creation of a scientific design, and conduct of the investigation proceed initially under the supervision of the informal guidance committee, and later under the official thesis committee. The thesis proposal should include the exact nature of the problem to be researched, an outline of the subject matter, the proposed methods of research, the degree of originality involved, and the anticipated time of completion of the study.

Ph.D. Degree

Course Requirements

You must successfully complete, within two years and with a grade of B– or better in each, the required core courses (Geography 298A, 298B, 298C) if these have not already been taken at the M.A. level. If you enter with a geography degree, you should complete them in your first year. You are also required to take at least three graduate geography courses in addition to your M.A. coursework (excluding 298A, 298B, 298C, 375, 495, and the 500 series) and three upper division or graduate courses in one or two fields (outside of geography) allied to your major research area or subdisciplinary specialization, subject to approval of your committee. The allied field requirement must be met before you can take the oral qualifying examination. Your total program must be approved by the graduate adviser each quarter.

Research Tool Requirement

At least one research tool (a foreign language, statistics, mathematics) is required. The requirement varies according to each subdisciplinary area or region and is required in addition to the M.A. tool requirement. Students who receive their M.A.s elsewhere need to fulfill the UCLA tool requirement for the M.A. (credit may be given for research tools acquired at other institutions). At least a B average must be attained in any series of courses taken, and the requirement must be met prior to approval of the thesis proposal by your guidance committee. If a foreign language is selected, the requirement may be met by (1) taking a series of courses, (2) passing the Educational Testing Service (ETS) examination with a score of 500 or better, or (3) passing a formal departmental written examination.

Qualifying Examinations

You are expected to take the written qualifying examination, which consists of five written papers and is administered by your guidance committee, no later than the sixth quarter of the Ph.D. program (exceptions may be made in case you are entering from disciplines outside geography). The examination may be taken over a period of no more than two weeks. In case of failure, you may make one further attempt, but no sooner than three months nor longer than one year after the first examination. Preparation of your dissertation proposal follows successful completion of the written qualifying examination.

The University Oral Qualifying Examination, conducted by your official doctoral committee, focuses on your dissertation proposal. Once you have successfully completed the oral qualifying examination, you are eligible for advancement to candidacy. In instances of failure, the oral examination may be repeated once.

The dissertation is the ultimate focus of your Ph.D. program and demonstrates an ability for independent investigation in a selected field of study. The dissertation should be designed and executed in such a way as to make a significant original contribution to geographic research, a contribution that is worthy of publication, in part or as a whole, in a reputable scientific medium.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

A final oral defense of the dissertation may be required by the dissertation committee.

Lower Division Courses

Contact the department office to learn of additional offerings, seminar topics, and specific instructors for the quarter you wish to enroll in courses in geography.

1. Physical Environment. Lecture, three hours; laboratory, one hour. A study of the earth's physical environment, with particular reference to the nature and distribution of landforms and climate.

2. Biogeography. Lecture, three hours; laboratory, one hour. Prerequisite: course 1 or equivalent. A study of the earth's biosphere, with particular reference to the evolution and distribution of plants, animals, and soils. May not be offered each quarter.

3. Cultural Geography. Lecture, three hours; discussion, one hour. A broad examination of the basic cultural variables in the human occupance of the earth's surface. Ecological, spatial, and historical approach.

4. Human Location and Behavior. Lecture, three hours; laboratory, one hour. Introduction to the basic concepts used in modern urban and economic geography. Emphasis on giving a better understanding of the effects of location on human behavior. Discussion and practical exercises on the analysis of problems in the Los Angeles urban environment.

5. People and the Earth's Ecosystems. Lecture, three hours; laboratory, one hour. An examination of the historical and contemporary roles of man as a major agent of biological change in the earth's ecosystems.

6. Maps and Mapping. Lecture, two hours; laboratory, two hours; independent study, one hour. Introduction to maps and their role in society. Fundamentals of reading and use of both reference and thematic maps. Influence of maps on attitudes toward and images of the geographic environment. Introductory survey of the fields of cartography and remote sensing.

10. Freshman Seminar in Geography. Staff-student discussion, three hours; reading period, one hour. Prerequisite: course 1 or 2 or 3 or 4 or 5 as befits the theme. A seminar designed to explore various themes and issues pertinent to environment and people. Seminar topics are advertised in the department during previous quarter.

Upper Division Courses

Group I: The Environment

(Ia) Basic Environmental Studies

100. Principles of Geomorphology. Lecture, three hours; discussion, one hour. Prerequisite: course 1 or Earth and Space Sciences 1 or 100 or consent of instructor. Strongly recommended: introductory physics and chemistry. A study of the processes that shape the world's landforms, with emphasis on weathering, mass movement, and fluvial erosion, transport, deposition; energy and material transfers; space and time considerations. Mr. Orme

100A. Principles of Geomorphology: Field and Laboratory (2 units). Laboratory/fieldwork, six hours. Prerequisite or corequisite: course 100. Field and laboratory investigations of weathering, mass movement, fluvial erosion, transport, deposition; related geomorphic phenomena. Mr. Orme

101. Coastal Geomorphology. Lecture, three hours; discussion, one hour. Prerequisite: course 100. A study of the origin and development of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, seacliffs, and coral reefs, together with coastal zone management. Mr. Orme

101A. Coastal Geomorphology: Field and Laboratory (2 units). Laboratory/fieldwork, six hours. Prerequisite or corequisite: course 101. Field and laboratory investigations of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, and seacliffs, together with coastal zone management. Mr. Orme

103. Glacial Geomorphology. Lecture, three hours; reading period, one hour. Prerequisites: course 100, upper division standing. An introduction to both mountain and continental glaciers, glacial processes, and deposits. Topics include the classification of glaciers, mass balance, glacier motion, erosion processes, glaciofluvial and glaciolacustrine deposition. Mr. Weirich

103A. Glacial Geomorphology: Field and Laboratory (2 units). Laboratory/fieldwork, six hours. Corequisites: courses 100, 103. Field and laboratory investigations of glacial and glaciofluvial processes of erosion, transport, and deposition. Mr. Weirich

104. Climatology. Lecture, three hours; reading period, one hour. Examination of the many relations between climate and the world of man. Application of basic energy budget concepts to the microclimates of relevance to the ecosystems of agriculture, animals, man, and urban places. Mr. Terjung

105. Hydrology. Lecture, three hours; reading period, one hour. Prerequisite: course 1 or equivalent. The role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Field projects required. Mr. Trimble

105A. Hydrology: Field and Laboratory (2 units). Laboratory/fieldwork, six hours. Prerequisite or corequisite: course 105. Field and laboratory investigations into the role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Students solve applied hydrology problems in lab and make hydrologic measurements in the field. Mr. Trimble

106. Soils. Lecture, three hours; reading period, one hour. Prerequisites: course 1 or equivalent and Chemistry 11A, or consent of instructor. A study of the origins, evolution, properties, and utilization of soils, with special emphasis on the world's major soil groups. Ms. Beatty

106A. Soils: Laboratory (2 units). Prerequisite or corequisite: course 106. A study of the natural development of soils, physical and chemical properties of soil, and uses of soil. Analyses of pH, moisture, texture, nutrients, and organics. Includes a one-day field trip. Ms. Beatty

107. Soil and Water Conservation. Lecture, three hours; discussion, one hour. Prerequisite: course 105 or Civil Engineering 184A or equivalent. Recommended: courses 100, 106, 160. A systematic study of the processes of and the hazards posed by erosion, sedimentation, and pollution and the techniques needed to conserve soil and maintain environmental quality. The scope includes agriculture, forest engineering, mining, and other rural uses of land. Mr. Trimble

108. World Vegetation. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 2, or equivalent, or consent of instructor. Characteristics, distribution, environmental and cultural relationships of the world's principal vegetation patterns. Mr. Sauer

109. Ecology of Vegetation. Lecture, three hours; fieldwork, 12 hours total. Prerequisites: course 2 and Mathematics 50, or consent of instructor. Principles of plant ecology at the community and ecosystem levels. Emphasis on structure, dynamics, and measurement of the characteristics of terrestrial vegetation. Ms. Beatty

109A. Ecology of Vegetation: Laboratory (2 units). Prerequisites: course 2 and Mathematics 50, or consent of instructor. Methods of sampling and a variety of current data analysis techniques involving multivariate statistics and computer use. Worksheets, research papers, and two one-day field trips. Ms. Beatty

110. Plant Migration. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, and Biology 2, or equivalent, or consent of instructor. Mechanisms of geographic patterning of natural and artificially modified vegetation. Emphasis on range changes for which there is direct fossil or documentary evidence. Mr. Sauer

112. Animal Geography: Biophysical Aspects. Lecture, three hours; laboratory, two hours. Prerequisites: courses 1, 2, Biology 2. A study of the factors and principles of animal distribution and dispersal on continents and islands of the earth in time and space. Mr. Bennett, Mr. Walter

113. Clastic Sedimentation Processes in Geomorphology. Lecture, three hours. Prerequisites: course 1, 100, and 105, or equivalent, or consent of instructor. Recommended: courses 101, 103, 107, or equivalent. A study of clastic sedimentation transport and deposition processes in geomorphology. Topics include basic fluid mechanics and sediment transport; the tectonic framework of sedimentation; a general overview of depositional environments; and a more detailed discussion of selected environments. Mr. Weirich

(Ib) Applied Environmental Studies

116. Origins and Histories of Crop Plants. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, and Biology 2, or equivalent, or consent of instructor. Geographic patterns of domestication and diffusion of useful plants from antiquity to the present, based on detailed case histories of selected species. Mr. Sauer

117. Animal Geography: Cultural Aspects. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 5, Biology 2, or equivalent. A study of human cultural factors influencing animal distributions; the roles of animals in human societies; origins and diffusion of domesticated animals.
Mr. Bennett, Mr. Walter

118. Medical Geography. Lecture, three hours; reading period, one hour. Prerequisite: course 5 or consent of instructor. An examination of patterns of population-place-disease interactions and some effects of change and development on disease etiology and problems of health care.

119. Agricultural and Pastoral Ecosystems. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 5, 116, and 112 or 117, or equivalent. Recommended: courses 120, 121. Students who do not meet the prerequisites should not attempt this course. A geographical, ecological, and historical analysis of the world's agricultural and pastoral systems. Emphasis on energy flows, nutrient cycles, and ecological and social problems associated with the various systems. Mr. Bennett

120. Conservation of Resources: North America. Prerequisites: courses 1 and 2, or equivalent, or upper division standing. An analysis of the basic principles and problems associated with the conservation of natural resources in the United States and Canada.
Mr. Bennett, Mr. McKnight, Mr. Trimble

121. Conservation of Resources: Underdeveloped World. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 120, or equivalent, upper division standing. An analysis of the principles and problems of the conservation of natural resources of the underdeveloped world.
Mr. Bennett

122. Man and Environment in Africa. Lecture, three hours; discussion, one hour. Prerequisites: courses 1, 2, 5. An analysis of the unique ecosystems of tropical and subtropical Africa, with respect to traditional and modern human impacts on vegetation, wildlife, and other natural resources. A discussion of development goals in relation to socioeconomic policies and Africa's environmental heritage. Mr. Walter

123. Bioresource Management. Lecture, three hours; discussion, one hour. Prerequisites: courses 2, 5. Recommended: introductory statistics (i.e., Mathematics 50 or Economics 40). Theory and practice of the management and conservation of bioresources. Introduction to wildlife management, endangered species conservation, and the design and maintenance of National Parks and ecological reserves. Mr. Walter

124. Environmental Impact Analysis. Lecture, three hours; discussion, one hour. Prerequisites: at least two courses from 100 through M127 and Mathematics 50. Recommended: courses 2, 5, 128. Introduction to the interdisciplinary analysis of local and regional impacts on environmental systems. Evaluation of state and federal concepts for the analysis of environmental impact.

125. Marine Ecosystems. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 5, Biology 5, 7, or equivalent. Description and analysis of the principal marine ecosystems, with particular emphasis on those which are chiefly affected by human activity. Detailed evaluation of the ecological and conservation problems associated with human use of marine ecosystems.

M127. Soil, Plants, and Society. (Same as Biology M127.) Lecture, three hours; field trip. Prerequisites: Chemistry 11A, 11B, and 11C, or equivalent, or consent of instructor. A general treatment of soil development and morphology and the physical and chemical properties of soils as they relate to plant growth and distribution; soil resources, management, conservation, and cultural aspects. Use of soil profiles examined on the field trip to explain developmental phenomena. Mr. Lunt

128. The World's Ecosystems: Problems and Issues. Lecture, three hours; discussion, one hour. Prerequisite: course 120 or 121. Identification of past, current, and projected problems associated with man-induced ecological disturbances. Identification and evaluation of the societal and biophysical factors which have contributed to the identified ecological disequilibria.

129. Problems of the Environment: Seminar. Lecture, three hours; reading period, two hours. Prerequisites: senior standing, four courses from Group I. Highly recommended: Mathematics 152A. Limited enrollment. Qualitative-quantitative analysis of problems associated with rational protection and use of selected environmental systems (urban, rural, forest, desert, coastal, water, soil, or others).

Group II: Human Geography

(IIa) Cultural and Historical Geography

130. Geographical Discovery and Exploration. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A survey of the history of exploration, from earliest times to modern, with emphasis on the period from Marco Polo to the present.
Mr. Dunbar, Mr. Thrower

133. Cultural Geography of the Modern World. Lecture, three hours; reading period, one hour. Prerequisite: course 3 or equivalent. An evolutionary and structural approach to the sociocultural geography of the modern world system, with particular emphasis on the structure and functioning of its core, semiperiphery, and periphery.
Mr. Entrikin, Mr. Hale, Mr. Salter

135. Reading the Cultural Landscape: Perspectives and Processes. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Understanding personal and societal environmental preferences begins with analysis of the landscape. Attitudes toward the cultural or humanized landscape, methods of landscape analysis, problem landscapes, and environments of the future through lectures, readings, and field study.
Mr. Salter

136. Historical Geography of the United States. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A study of the evolution of the cultural landscapes of the area that is now the United States. Examination of past geographies and of geographical change through time. Mr. Dunbar

140. Political Geography. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. The principles of political geography as developed through regional studies of political phenomena throughout the world. Current problems in domestic and international affairs. Mr. Hale

142. Population Geography. Lecture, three hours; reading period, one hour. A study of the social and behavioral perspectives influencing people in their patterns of demographic change, migration, and mobility, with special emphasis on spatial relationships and selected case studies. Mr. Clark

(IIb) Economic and Urban Geography

145. Spatial Organization of Society. Lecture, three hours; reading period, one hour. Prerequisites: course 4 and elementary statistics, or consent of instructor. A study of the spatial structure of society as an expression of human decisions. Emphasis on the processes affecting city size and distribution, the internal structure of cities, rural land use, and industrial location. Mr. Johnson, Mr. Scott

146. Human Spatial Behavior. Lecture, three hours; reading period, one hour. Prerequisites: course 4 and elementary statistics, or consent of instructor. A study of human behavior within the spatial context. Regularities in patterns of trade, consumer behavior, migration, mobility, communication, and diffusion.
Mr. Johnson

148. Economic Geography. Lecture, three hours; reading period, one hour. Prerequisite: course 4 or consent of instructor. Geographical aspects of economic production and growth. The general theory of the space-economy. Land-use processes. Location of industry. Regional development. Mr. Scott

149. Transportation Geography. Prerequisite: course 3 or 4 or upper division standing. A study of the geographical aspects of transportation, focusing on the characteristics and functions of the various modes and on the complexities of intra-urban transport.

150. Urban Geography. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. An analysis of the development, functions, spatial patterns, and geographic problems of American cities.
Mr. Clark, Mr. Johnson, Mr. Scott

151. Historical Geography of Cities. Prerequisites: courses 3 and 4, or equivalent, or upper division standing. A survey of the diffusion and growth of cities in Western civilization. The development of city systems and the evolution of urban internal spatial structure.

152. World Cities. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing. A discussion of the growth and structure of selected cities as illustrations of the processes of urbanization in different countries and societies. Topics include rural to urban migration, cities as centers of power, spatial organization, and the tendency to megalopolitanization. Mr. Clark

156. Metropolitan Los Angeles. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing. A study of the origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of the Los Angeles metropolitan area.

159. Problems in Human Geography. Staff-student discussion, three hours; reading period, one hour. Prerequisites: two courses from Group II, senior standing. Limited to 15 students. A seminar course in which students carry out intensive research projects. Designed as a "capstone" to courses in this group, the subjects of research grow out of prior work.

Group III: Procedures

160. Field and Laboratory Analysis in Geomorphology. (Formerly numbered 160, 162.) Laboratory/fieldwork, eight hours. Prerequisites: course 100 and two courses from 101, 103, 105, 106, 107. Limited to geography and ecosystems majors, with enrollment priority to seniors, then to juniors. Students must preenroll in the department during the prior quarter. Examination of field and laboratory procedures and intellectual concepts used in the observation, measurement, analysis, and interpretation of landforms, constituent materials, and relevant processes.
Mr. Orme, Mr. Trimble, Mr. Weirich

161. Field Analysis: Cultural Geography. Fieldwork, once a week from 8 to 5. Prerequisites: courses 1, 3, two upper division courses in geography, consent of instructor. Enrollment priority to geography majors. The observation, analysis, and mapping of landscape phenomena of human origin. Techniques of data collection examined for such topics as settlement form and pattern, environmental change, historical and demographic change, and land use.
Mr. Salter

163. Field and Laboratory Analysis: Biogeography. Laboratory/fieldwork, eight hours. Prerequisites: courses 2, 5, or equivalent, two courses from 106, 108, 109, 112. Limited to geography and ecosystems majors, with enrollment priority to ecosystems majors. Examination of field and laboratory procedures and intellectual concepts used in the observation, measurement, analysis, and interpretation of phenomena pertinent to biogeography and interrelated human influences. Mr. Walter

167. Cartography (6 units). Lecture, two hours; laboratory, six hours; independent study, three hours. Prerequisites: courses 1 and 3, or equivalent, or consent of instructor. Survey of the field of cartography. Theory and construction of map projections, compilation procedures, principles of generalization, symbolization, terrain representation, lettering, drafting and scribing, and map reproduction methods.
Mr. McMaster

168. Computer Cartography. Lecture, two hours; laboratory, two hours; independent study, two hours. Prerequisites: Program in Computing 3 or 10A, consent of instructor. Recommended: course 167. Theory and methods of mapping quantitative information with a computer. Problems of acquiring and processing machine-readable map data and representing them as point symbols and surfaces.
Mr. McMaster

169. The Earth from Above. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 3, and 4, or consent of instructor. The interface between cartography and remote sensing. By means of a wide variety of imagery from maps and satellite photos, different landscapes analyzed and explained.
Mr. Thrower

171. Quantitative Analysis. Lecture, three hours; laboratory, one hour. Prerequisite: Mathematics 50 or consent of instructor. An introduction to the methods of measurement and interpretation of geographic distributions and associations.
Mr. Clark, Mr. McMaster

M178. Dating Techniques in Environmental Sciences and Archaeology. (Same as Anthropology M116Q.) Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. Introduction to scientific dating methods such as radiocarbon dating, radiation damage methods, biological dating techniques, and magnetic dating, and applications in environmental sciences, archaeology, and physical anthropology. Mr. Berger

Group IV: Regions

180. North America. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Delimitation and analysis of the principal geographic regions of the United States and Canada. Mr. McKnight

181. Middle America. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A study of the geographic factors, physical and cultural, that are basic to an understanding of the historical development of Middle America and of the contemporary economic and cultural geography of Mexico and the countries of Central America and the West Indies.
Mr. Bennett

182A. Spanish South America. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A study of the geographic factors, physical and cultural, that are basic to an understanding of the historical development of Spanish South America and of the contemporary economic and cultural geography of the individual Spanish-speaking countries.
Mr. Bennett

182B. Brazil. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A study of the geographic factors, physical and cultural, that are basic to an understanding of the historical development of Portuguese South America and of the contemporary economic and cultural geography of Brazil.
Mr. Bennett

183. Europe. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A study of geographic conditions and their relation to economic, social, and political problems in Europe.
Mr. Thrower

184. Soviet Union. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A study of geographic conditions and their relation to economic, social, and political problems in the Soviet Union.

185. South and Southeast Asia. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A regional synthesis with varying emphasis on the people of South or Southeast Asia in their physical, biotic, and cultural environment and its dynamic transformation.

186. Contemporary China. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A systematic geographic analysis of the elements of landscape, resources, population, and socioeconomic characteristics of the People's Republic of China. The dynamics that have led to China's major role in the East Asian and international scene, with special attention to China-Japan and Sino-American relations and their geographic bases. Mr. Salter

187. Middle East. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. An analysis of the economic, social, and political geography of the area extending from Iran to Morocco and from Turkey to Sudan. Emphasis on geographical themes and problems during historical and modern times.
Mr. Hale

188. Northern Africa. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. An analysis of the economic, social, and political geography of the area including Mediterranean Africa, the Sahara, the Sudanic belt, and the eastern Horn. Emphasis on geographical themes and problems during historical and modern times. Mr. Hale

189. Middle and Southern Africa. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. The regions of Africa south of the Sahara (middle and southern Africa) in terms of physical features, human settlement, economic production, and political patterns. Mr. Hale

190. Australasia. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A regional synthesis of the physical and cultural features which characterize Australia, New Zealand, and the islands of the South Pacific. Mr. McKnight

191. California. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A systematic and regional treatment of the geography of California, including the physical, cultural, and economic aspects and detailed studies of the various regions.
Mr. McKnight

Special Studies

196. Senior Thesis in Ecosystems Analysis. Hours to be arranged. Prerequisites: courses 129, 160 or 163, senior standing. Preparation and data collection and analysis for a senior thesis under the guidance and assistance of a faculty sponsor. (F,W,Sp)

199. Special Study (2 to 8 units). Hours to be arranged. Prerequisites: junior standing with a B average in the major or senior standing, consent of instructor.

199HA-199HB. Honors in Geography I, II. Hours to be arranged. Prerequisites: a 3.25 overall GPA, at least five upper division geography courses with a 3.5 GPA. **199HA.** An independent study course taught by a team of two faculty members who assist the student with bibliographic research and/or field research on a topic of mutual interest to the student and the faculty members. Successful completion of course 199HA entails the preparation of a detailed bibliography and outline (to be evaluated by the two faculty members) for the writing of a substantial paper during course 199HB. If that work is determined to be of A quality, the student is allowed to continue in the honors program. If that work is graded B or below, credit is awarded, but the student is not permitted to continue in the honors program. **199HB.** Devoted to the writing of the substantial paper researched and outlined in course 199HA. It also is evaluated by the two faculty members. If the paper is determined to be of A quality, the student graduates with honors in geography. If the paper is graded B or below, credit is awarded, but the student does not receive honors.

Graduate Courses

Group I: The Environment

200. History and Paradigms of Geomorphology. Lecture, two hours; discussion, one hour; reading period, eight hours. Prerequisites: course 100 and two courses from 101, 103, 105, 106, 107. Analysis of geomorphic theories since the scientific revolution, with emphasis on catastrophism, uniformitarianism, glacial theories, isostasy and eustasy, evolution and cyclicity, thermodynamics and mechanics, quantification, and current paradigms. View of each theme in its contemporary milieu. Mr. Orme

201. Coastal Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 101. Discussion of selected topics pertaining to geomorphic processes and responses observable in the coastal zone. May be repeated for credit. Mr. Orme

202. Fluvial Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100 and 105, or Civil Engineering 184A. Discussion of selected topics pertaining to the action of running water in shaping the physical landscape. May be repeated for credit.
Mr. Trimble

203. Glacial Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 103. Discussion of selected topics pertaining to the action of snow and ice in arctic and alpine environments. May be repeated for credit. Mr. Weirich

204A-204B-204C. Advanced Climatology. Lecture, three hours; laboratory, one hour. Prerequisites: course 104, first year of calculus, and acquaintance with FORTRAN IV, or consent of instructor. Courses must be taken in sequence. An introduction to the tools and concepts of environmental physics of relevance to natural and man-made landscapes. Such basic intellectual, mathematical, and computer programming tools are of special concern to physical geographers, ecologists, and architects.
Mr. Terjung

205. Seminar: Climatology. Discussion, three hours; reading period, one hour. Prerequisites: courses 204A-204B-204C or equivalent, consent of instructor. Selected topics. May be repeated for credit. Mr. Terjung

208. Advanced Biogeography: Plants. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 108 and 110 or 116, or equivalent, or consent of instructor. An intensive review and analysis of physical and cultural factors influencing plant distributions. Mr. Sauer

212. Advanced Biogeography: Animals. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 112 or 117 or equivalent or consent of instructor. An intensive review and analysis of biophysical and cultural factors influencing animal distributions. Mr. Bennett, Mr. Walter

213. Seminar: Biogeography. Discussion, three hours; reading period, two hours. Prerequisites: course 208 or 212 or equivalent, consent of instructor. Related research projects growing out of course 208 or 212. May be repeated for credit.

215. Seminar: Quaternary Studies. Discussion, three hours; reading period, two hours. Prerequisites: courses 202 or 204A-204B-204C or 208 or 212 or an appropriate graduate course in anthropology, botany, earth and space sciences, or zoology, or consent of instructor. An analysis of the changing environment of the Quaternary period. May be repeated for credit. Mr. Orme

218. Advanced Medical Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 118 or consent of instructor. An in-depth study of selected topics in medical geography and an intense review of recent research.

223. Seminar: Humid Tropics. Discussion, three hours; reading period, two hours. Prerequisite: consent of instructor. Selected topics. Biophysical and cultural complexes of the humid tropics, with emphasis on problems related to human settlement and livelihood. May be repeated for credit. Mr. Bennett

227. Water Quality Management. Discussion, three hours; reading period, one hour. Prerequisites: graduate standing, consent of instructor. Discussion of the basic technical, regional planning, and public policy issues in water quality management.

229. Seminar: Man and Environment. Discussion, three hours; reading period, two hours. Prerequisite: course 128 or equivalent. An analysis of man's perception of the environment throughout history and in different parts of the world and its impact on past, present, and future ecosystems.

Group II: Human Geography

232. Advanced Cultural Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 133 or equivalent or consent of instructor. Lectures and discussions around specific aspects of the development of cultural landscape in different geographic environments. Mr. Hale, Mr. Salter

233. Seminar: Cultural Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 232 or 236 or equivalent, consent of instructor. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit. Mr. Entrikin, Mr. Hale, Mr. Salter

236. Advanced Historical Geography of the United States. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: course 136, consent of instructor. Some major themes in American historical geography. Mr. Dunbar

237. Seminar: Historical Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 236, consent of instructor. Theory and practice of historical geography in North America and Europe. May be repeated for credit. Mr. Dunbar

240. Advanced Political Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 140 or equivalent or consent of instructor. Intensive study of the theories and principles of political geography and German geopolitics. Selected regions used as specific examples of differing techniques of study in geopolitics. Mr. Hale

241. Seminar: Political Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 240 or equivalent, consent of instructor. Related research projects growing out of course 240. May be repeated for credit. Mr. Hale

242. Advanced Population Geography. Lecture, three hours; reading period, one hour. Prerequisite: course 142 or equivalent or consent of instructor. A study of population dynamics and migration, spatial variation in population composition, and population resource problems, diffusion, and epidemiology.

248. Location and Space Economy. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 145 and 146, or consent of instructor. Methods of locational analysis as applied to problems of regional growth and development. Mr. Scott

249. Seminar: Economic Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 248 or equivalent, consent of instructor. Related research projects growing out of course 248. May be repeated for credit. Mr. Scott

250. Urban Systems. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 145 and 146, or consent of instructor. A general study of the hierarchy of urban places, including diffusion within the urban hierarchy and theories to account for the location and size distribution of cities. Mr. Clark

251. Seminar: Urban Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 250 or equivalent, consent of instructor. Related research projects growing out of course 250. May be repeated for credit.

252. Location and Social Structure within the City. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 145 and 146, or consent of instructor. A study of the links between urban social and urban spatial structure, emphasizing urban residential land use, social areas of the city, and accessibility and urban form. Mr. Scott

254. Migration and Residential Mobility. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: consent of instructor. The description and modeling of national, regional, and intra-urban migration. Mr. Clark

Group III: Procedures

260. Advanced Field and Laboratory Analysis in Geomorphology. Laboratory/fieldwork, 10 hours. Prerequisites: graduate standing, two courses from 200, 201, 202, 203, 215. Examination of advanced field and laboratory procedures used in contemporary geomorphic research, with emphasis on scientific design, instrumentation, and data evaluation. Mr. Orme, Mr. Trimble, Mr. Weirich

261. Advanced Field Analysis: Cultural Geography (8 units). Fieldwork, once a week from 8 to 5. Prerequisites: one or more courses from 232, 233, 250, 251. Field methods and analysis applied to the cultural landscape, especially in Southern California, with particular reference to settlement, agriculture, and environmental modification. Mr. Salter

262. Advanced Field Analysis: Biogeography (8 units). Fieldwork, 10 hours. Prerequisite: consent of instructor. Observation, measurement, and analysis of biogeographic phenomena, including identification and evaluation of biotic populations and communities and their modifications resulting from the impact of human activity.

265. Geographical Bibliography. Lecture, one hour; discussion, two hours; reading period, one hour. Prerequisite: consent of instructor. A survey of the literature of geography, with special reference to periodicals. Intended for beginning graduate students. Mr. Dunbar

267. Advanced Cartography. Laboratory, three hours; independent study, two hours. Prerequisite: course 167 or equivalent or consent of instructor. Advanced work in the theory and practical application of modern cartographic principles. Special emphasis on terrain representation, quantitative and computer mapping, scribing, color separation, and reproduction of maps. Mr. McMaster, Mr. Thrower

269. Remote Sensing of Environment. Laboratory, three hours; independent study, two hours. Prerequisite: course 167 or equivalent or consent of instructor. The study of aerial photographs and other remote sensing images as tools for geographical research. Particular attention to the analysis of landscapes and the interpretation of interrelationships of individual features in their physical and cultural complex. Mr. Thrower

M270A-M270B-M270C. Seminar in Climate Dynamics (2 to 4 units). (Same as Atmospheric Sciences M270A-M270B-M270C and Earth and Space Sciences M270A-M270B-M270C.) Lecture, two hours. The archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantel. The climate of other planets. The modeling, simulation, and prediction of modern climate on the monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading. Mr. Berger, Mr. Ghil, Mr. Schubert

M272. Spatial Statistics. (Same as Architecture and Urban Planning M215B.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: course 171 or Mathematics 50, consent of instructor. Specific techniques useful in the analysis of spatial distributions, including both point and areal patterns and emphasizing spatial descriptive statistics, probability models of spatial distributions, and statistical surfaces. Mr. Clark

273. Seminar: Model Building for Spatial Analysis. Discussion, three hours. Prerequisite: consent of instructor. Discussions of the philosophy and methodology of model building, with emphasis on the problems unique to models of spatial structure. Individual research topics. May be repeated for credit. Mr. Clark

M278. Dating Techniques in Environmental Sciences and Archaeology. (Same as Anthropology M216.) Lecture, three hours. Prerequisite: consent of instructor. A colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and biological anthropology, as well as laboratory instruction and experimental work. May be repeated for credit. Mr. Berger

Group IV: Regions

Courses 280 through 291 may be repeated for credit (lecture, two hours; discussion, two hours).

280. North America. Prerequisite: course 180 or consent of instructor. Mr. McKnight

281. Middle America. Prerequisites: course 181, consent of instructor. Mr. Bennett

282. South America. Prerequisites: course 182A or 182B, consent of instructor. Mr. Bennett

283. Europe. Prerequisites: course 183, consent of instructor. Mr. Thrower

284. Soviet Union. Prerequisites: course 184, consent of instructor.

285. South and Southeast Asia. Prerequisites: course 185, consent of instructor.

286. Eastern Asia. Prerequisites: course 186, consent of instructor. Mr. Salter

287. Middle East. Prerequisites: course 187, consent of instructor. Mr. Hale

288. Northern Africa. Prerequisites: course 188, consent of instructor. Mr. Hale

289. Middle and Southern Africa. Prerequisites: course 189, consent of instructor.

290. Australia. Prerequisites: course 190, consent of instructor. Mr. McKnight

291. The Arid Lands. Prerequisites: courses 104, 106, 108, 116, 120, 148, or equivalent, consent of instructor. An investigation of the physical and cultural complexes of the world's arid regions. Salient factors include climate, landforms, water, soils, natural vegetation, and the various aspects of human occupance, including future possibilities for human utilization.

292. Advanced Regional Geography: Selected Regions. Lecture, three hours; discussion, one hour. Prerequisite: appropriate upper division regional course. A lecture series devoted to a specific region at the discretion of instructor. May be repeated for credit.

Seminar

295. Seminar: Geographic Thought. Discussion, three hours; reading period, two hours. Prerequisites: graduate standing, consent of instructor. Discussion and study of topics significant to the growth of the modern philosophy of geography. Mr. Entrikin

Core Courses

298A. Philosophical Issues in Geographical Inquiry. (Formerly numbered 200A.) Lecture, three hours. Prerequisite: consent of instructor. A discussion of geographical research within the context of philosophical debates concerning the nature of scientific inquiry. Mr. Entrikin

298B. History of Modern Geography. (Formerly numbered 200B.) Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. The evolution of the field of geography in the 19th and 20th centuries, with emphasis on the professionalization of geography and its emergence as a modern academic discipline. Mr. Dunbar

298C. Statistical Methods for Geographic Research. (Formerly numbered 200C.) Lecture, three hours; laboratory, two hours. Prerequisite: course 171 or equivalent. The use of linear models, discriminant functions, and factor analysis to analyze problems in geography. Mr. Clark

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching of College Geography (2 units). Discussion, one hour; laboratory, three hours. Prerequisite: consent of instructor. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). Prerequisite: consent of instructor. Special individual study. May be repeated for credit. S/U grading.

598. Research for and Preparation of M.A. Thesis (2 to 8 units). Prerequisite: consent of instructor. Independent study. May be repeated for credit. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 8 units). Prerequisite: consent of instructor. Independent study.

Germanic Languages

302 Royce Hall, (213) 825-3955

Professors

Ehrhard Bahr, Ph.D. *(German)*
Franz H. Bäuml, Ph.D. *(German)*
Marianna D. Birnbaum, Ph.D., *in Residence (Hungarian)*
Wolfgang Nehring, Ph.D. *(German)*
Hans Wagener, Ph.D. *(German), Chair*
Donald J. Ward, Ph.D. *(German and Folklore)*
Terence H. Wilbur, Ph.D. *(Germanic Linguistics and Philology)*

Emeritus Professors

Gustave Otto Arlt, Ph.D., LL.D.
Carl William Hagge, Ph.D.
Wayland D. Hand, Ph.D.
William J. Mulloy, Ph.D.
Victor A. Oswald, Jr., Ph.D.
Eli Sobel, Ph.D.
Erik Wahlgren, Ph.D.

Associate Professors

Jesse L. Byock, Ph.D. *(Old Norse)*
Janet R. Hadda, Ph.D. *(Yiddish)*
Robert S. Kirsner, Ph.D. *(Dutch and Afrikaans)*
Kathleen L. Komar, Ph.D. *(German)*
Vern W. Robinson, Ph.D., *Emeritus*

Assistant Professors

T. Craig Christy, Ph.D. *(Germanic Linguistics and Philology)*
Steven D. Martinson, Ph.D. *(German)*

Lecturer

Jutta Landa, Ph.D. *(German)*

Visiting Lecturer

Barbara Bopp, Ph.D. *(German), TA Coordinator*

Scope and Objectives

The Department of Germanic Languages offers an extraordinary scope of Germanic languages and literatures, including philology, linguistics, and folklore. This broad range of studies offers training in specialized fields, in addition to providing a strong background in the literary and cultural traditions. The courses of instruction are designed to enable students to become effective teachers and productive scholars in either German or Germanic languages and literatures, including Germanic folklore, Hungarian, and Finnish.

Undergraduate majors in both German and Scandinavian languages lead to Bachelor of Arts degrees. The graduate program offers Master of Arts degrees in German and Scandinavian and a Ph.D. in Germanic Languages, with a variety of specialized fields available. The department also offers courses in Dutch and Afrikaans, Hungarian, Old Norse studies, and Yiddish, and a program in Finno-Ugric languages and literatures, which are open to all students.

Bachelor of Arts in German

The undergraduate program in German is comprised of lower division courses in the German language and upper division courses in German language, linguistics, literature, civilization, and folklore. While the nucleus of the undergraduate program consists of training in language and literature, students majoring in German will be prepared for a wide range of graduate studies and activities in related fields.

Preparation for the Major

Required: German 1, 2, 3, 4, 5, 6, or equivalent. Course 1 is not open for credit to students who have completed two years of high school German or equivalent with grades of C or better. Students who have completed two semesters of college German should enroll in course 4. Placement examinations may be given in instances where the proper level is difficult to determine. Native speakers of German must consult the undergraduate adviser. For additional information, all students are encouraged to contact the undergraduate adviser.

The Major

Required: Fifteen upper division German courses as follows: Group I — German 100A or 100B or 100C, 108A, 108B, 129; Group II — four courses from 100A or 100B or 100C (whichever has not been taken to satisfy the Group I requirement), 101A, 101B, 101C, 121A, 128, 134; Group III — three courses from 103, 105, 106, 107, 137; Group IV — four courses from 121B, 122, 123, 124, 126, 127, 130, 132. Native speakers of German should consult the undergraduate adviser before enrolling in course 108A, 108B, or 128. German

majors, especially those who wish to pursue graduate studies in German, are encouraged to enroll in courses in German history and philosophy in those respective departments and are strongly urged to acquire reading knowledge of French.

Departmental Honors

To qualify for graduation with departmental honors, you must earn a cumulative grade-point average of 3.6 or better in upper division German courses and a 3.3 overall GPA, and complete German 195 with a grade of A. Contact the departmental honors adviser for procedures, special arrangements, possible exceptions, and other information.

Teaching Credential in German

Students desiring the general secondary credential in German should consult the Graduate School of Education (201 Moore Hall) and the Department of Germanic Languages.

Graduate Study

The Department of Germanic Languages offers the advanced degree candidate a scope and variety of studies unique among departments of German in the United States. The department provides programs of study leading to the M.A. in German, the M.A. in Scandinavian, and the Ph.D. in Germanic Languages, with specialized fields in all areas of German literature, Germanic philology and linguistics, Germanic folklore, Scandinavian literature and philology, Netherlandic languages and literatures, and Yiddish studies. In addition, the department offers a program in Finno-Ugric languages and literatures. This wide range of studies within the Germanic languages and cultures enables the Ph.D. candidate to acquire competence in several specialized fields.

For brochures and other information, contact the Department of Germanic Languages, 302 Royce Hall, UCLA, Los Angeles, CA 90024.

Master of Arts in German

Admission

A bachelor's degree in German with a minimum grade-point average of 3.0 from an accredited U.S. institution or the equivalent is required. Candidates deficient in their undergraduate preparation may be admitted but will be required to take remedial courses, as recommended by the graduate adviser. A placement examination in German language or literature may be required. Three letters of recommendation are also required.

Major Fields or Subdisciplines

There are two M.A. plans that differ with respect to the course requirements and the comprehensive examinations. Plan A is for students who plan to terminate their studies with the M.A. and a teaching credential. Plan B is for students whose main interests are literary and linguistic rather than pedagogical and for students who plan to proceed toward the Ph.D.

Foreign Language Requirement

Before advancement to candidacy for the M.A., you must pass the Graduate School Foreign Language Test reading examination in French with a score of 500 or better. The test is administered through University Extension at the beginning of each quarter, including the summer.

Course Requirements

Plan A requires a minimum of nine upper division and graduate courses, of which at least five courses must be graduate level (200 or 500 series). German 128, 129 (or equivalent), and 370 are required. Undergraduate credit for these courses (or equivalent) is applicable in satisfaction of these requirements.

Plan B requires a minimum of nine upper division and graduate courses, of which at least six courses must be graduate level (200 or 500 series). One seminar must be included.

Course 596 may be taken twice; course 597 may be taken once before the M.A. degree; course 598 may be taken three times. However, only one 500-series course may be applied toward the M.A. course requirements.

Thesis Plan

If you choose this plan, a thesis committee will be established no later than the end of your fourth quarter of graduate study to evaluate the proposal for the thesis. After acceptance of the thesis you must pass a two-hour oral examination in the field of the thesis, as well as in the fields listed below under the comprehensive examination plan.

Comprehensive Examination Plan

Examinations are offered each quarter, beginning with the written part during the fifth week of each quarter. Under exceptional circumstances the chair of the department will receive petitions for M.A. examinations during the summer recess.

One examination committee is appointed for each quarter. The members of the committee administer the written and oral examinations. The M.A. examination consists of two written examinations of three hours each, followed by a one-hour oral examination.

Part 1 of the written examinations covers various fields. In the case of Plan A, the origin and development of the standard German language and contemporary standards of the German language are included. In the case of Plan B, bibliography, Middle High German, and the history of the German language are included. Part 2 of the written examinations covers major works and authors of German literature from earliest times to the present and concepts of literary criticism. After you have taken the written examinations, the M.A. committee decides whether you may proceed to the oral examination. If you fail the oral examination, the M.A. committee decides whether you must repeat the entire examination or only the oral portion.

If you apply for an M.A. under Plan B (to proceed toward the Ph.D.) and are awarded a terminal M.A., you may repeat the examinations if you choose not to have the M.A. degree officially awarded before the reexamination.

Ph.D. in Germanic Languages

Admission

An M.A. degree in German from an accredited U.S. institution or equivalent (e.g., *Staatsexamen* in German) is required. In case of significant deficiencies in prior training, the graduate advisers make appropriate study or course recommendations. All deficiencies must be removed prior to application for admission to candidacy for the qualifying examinations. Applicants without an M.A. in German (e.g., with an M.A. in Comparative Literature or in Linguistics) will be required to pass the written part of the M.A. comprehensive examination before beginning doctoral work in the department. Applicants with an M.A. in Scandinavian who wish to major in Scandinavian literature and philology must take a formal minor in German. Three letters of recommendation are also required.

Major and Minor Fields of Study

The department offers two Ph.D. programs. The first program requires a major and a minor field in order to give students the broadest possible education and preparation for professional flexibility in research and teaching. The second program does not require a minor and is designed to enable students to complete their studies toward the Ph.D. more expeditiously.

If you select the first program, you must, as soon as possible after admission, declare your major and minor fields. The field in which you plan to present a dissertation is your major field and is selected from the four fields in which the degree is offered: (1) German literature, (2) Germanic philology and linguistics, (3) Scandinavian literature and philology, or (4) Germanic folklore.

If you select German literature as your major field, you must choose one of the following: (1) German literature before 1700 or (2) German literature from 1700 to the present.

The minor field may be selected from the following options: (1) German literature before 1600; (2) German literature from 1600 through Romanticism; (3) German literature from Romanticism to the present; (4) German philology and linguistics; (5) modern Scandinavian literature; (6) Germanic folklore; (7) Yiddish;

(8) Dutch and Afrikaans; (9) Old Norse studies. If your major field is German literature, you may not choose options 1 through 3. As a special option, you may select an extra-departmental minor which must be individually endorsed by a majority of the departmental faculty members on the basis of your dissertation plans.

The second Ph.D. program allows specialization in either of the following two areas: (1) modern German literature (1600 to the present) or (2) Germanics — older German literature (to 1600), Germanic philology and linguistics (including Old Norse and Dutch linguistics), Germanic folklore. If you select the latter area, you are expected to choose two of these three fields, with special emphasis on one.

Foreign Language Requirement

In addition to French, a second language examination is required either in a modern Scandinavian language or in Dutch and Afrikaans or in Latin or in Yiddish (substitution of another language may be approved by petition).

Course Requirements

There are no course requirements per se for the Ph.D. in Germanic Languages. However, the following rules apply: (1) you must have successfully completed at least three seminars in residence before taking the qualifying examinations for the Ph.D.; (2) specific course requirements may be assigned to new students by the graduate adviser.

Qualifying Examinations

The written examinations consist of three parts for the first Ph.D. program and two parts for the second program: (1) first half of major field (three hours); (2) second half of major field (three hours); (3) minor field (three hours).

You may take the written examinations in the major or minor field any time after admission to the doctoral program and fulfillment of all prerequisite requirements. The major field examinations are given within a period of seven school days and completed no later than four weeks before instruction ends in a given quarter.

Written examinations may be repeated in case of failure. A repetition of the major examination includes both parts of the major field. When you have completed the written examinations successfully, the chair of the guidance committee schedules the University Oral Qualifying Examination to be administered by the doctoral committee as soon as possible after completion of the written examinations.

Advancement to candidacy takes place when you have (1) passed the graduate reading examination in French; (2) passed a departmental reading examination either in a modern Scandinavian language or in Dutch and Afrikaans or in Latin or in Yiddish (or an approved substitute language); (3) successfully completed three seminars; (4) passed the qualifying examinations. When you pass the oral examination, you advance to candidacy and proceed to the writing of the dissertation.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

After your completed dissertation is accepted by the certifying members of the doctoral committee, you may be required to defend the dissertation in a final oral examination.

German

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Students with demonstrated preparation may be permitted to transfer to a more advanced course with consent of the instructor.

1. Elementary German. Lecture, five hours; laboratory, one hour. Not open for credit to students who have completed two years of high school German or equivalent with grades of C or better. Students are, however, credited with four units toward the minimum progress requirement. Ms. Bopp

1G. Elementary German for Graduate Students. Preparation for the Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.
Mr. Christy, Mr. Wilbur

2. Elementary German. Lecture, five hours; laboratory, one hour. Prerequisite: course 1. Not open for credit to students who have completed two years of high school German or equivalent with grades of C or better. Students are, however, credited with four units toward the minimum progress requirement.
Ms. Bopp

2G. Elementary German for Graduate Students. Preparation for the Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.
Mr. Christy, Mr. Wilbur

3. Elementary German. Lecture, five hours; laboratory, one hour. Prerequisite: course 2 or two years of high school German. Ms. Bopp

4. Intermediate German. Lecture, five hours. Prerequisite: course 3 or three years of high school German. Ms. Bopp

5. Intermediate German. Prerequisite: course 4 or four years of high school German. Ms. Bopp

6. Intermediate German. Prerequisite: course 5 or equivalent. Ms. Bopp

12. German Conversation (2 units). Prerequisite: course 1 or one year of high school German. Use of German language teaching films; students have the opportunity to practice spoken German in small groups. Ms. Bopp

14. Intermediate Conversation (2 units). Prerequisite: course 3 or three years of high school German. Students have the opportunity to practice spoken German in small groups. Ms. Bopp

95. Freshman Seminar. Course of variable content limited to topics of current interest and offered whenever a staff member is available.

Upper Division Courses

Prerequisite for all upper division courses (except 100A, 100B, 100C, 119A through 119F, 121A, 121B) is course 6 or equivalent or consent of instructor.

Courses in the German 119 literature series may not be applied toward completion of the major in German.

Courses Open to Majors and Nonmajors; No Credit to Graduate Students in German

100A. German Civilization and Culture before 1700. Lectures, discussions, and readings in English; knowledge of German is not required. A study of the development of German civilization and institutions from the earliest times to 1700. Study of German culture as represented in its literature, art, music, and architecture. Mr. Bäuml, Mr. Wagener, Mr. Ward

100B. Modern German Civilization and Culture from 1700 to 1919. Lectures, discussions, and readings in English; knowledge of German is not required. A study of the development of German civilization and institutions from 1700 to 1919. Study of German culture as represented in its literature, art, music, and architecture. Mr. Wagener

100C. German Civilization and Culture in the 20th Century. Lectures, discussions, and readings in English; knowledge of German is not required. A study of the development of German culture and institutions from 1919 to the present, emphasizing developments in literature, the arts, and architecture.
Mr. Bahr, Mr. Wagener

101A. Introduction to German Poetry. Close analysis of representative examples of German lyric poetry from early as well as modern literary periods, including a systematic consideration of poetic conventions and forms, diction, tone, imagery, symbolism, and metrics. Course should be taken at the beginning of literary studies.
Mr. Bahr, Ms. Komar, Mr. Wagener

101B. Introduction to German Drama. Analysis of selected examples of drama (e.g., tragedy, comedy, one-act play, lyric drama, lyric theater, etc.), including a systematic introduction to dramatic forms, techniques, and theories. Texts selected from modern literature as well as from other periods. Course should be taken at the beginning of literary studies.
Mr. Bahr, Mr. Martinson, Mr. Nehring

101C. Introduction to German Narrative Prose. Analysis of significant examples of narrative prose (e.g., short story, novelle, novel, fairy tale, etc.), including a systematic introduction to narrative forms, techniques, styles. Texts selected from modern literature as well as from older periods. Course should be taken at the beginning of literary studies.
Ms. Komar, Mr. Nehring

102. Business German. Prerequisites: courses 1, 2, 3, 4, 5, 6. German for business studies: exercises in German business correspondence, terminology of export and import, readings and translations in the field of business German. Ms. Landa

103. Introduction to German Enlightenment, *Sturm und Drang*, and Classicism. Reading and discussion of representative works by Lessing, Goethe, and Schiller; their historical and social background, their relationship to music (Bach, Mozart) and philosophy (Leibniz, Kant), as well as their place in the history of ideas. Mr. Bahr, Mr. Martinson

105. Introduction to 19th-Century German Literature. Reading and analysis of selected works from Romanticism to realism. Ms. Komar, Mr. Nehring

106. Introduction to Modern Literature. Analysis of selected works of the period from 1890 to 1945.
Mr. Nehring, Mr. Wagener

107. Introduction to Contemporary Literature. Analysis of selected works of the period from 1945 to the present time.

108A. Composition and Conversation.
Mr. Christy, Ms. Landa, Mr. Martinson

108B. Composition and Conversation. Prerequisite: course 108A or consent of instructor.
Mr. Christy, Ms. Landa, Mr. Martinson

Courses Not Open for Credit to Majors or Graduate Students in German

119A. German Literature in the Age of Chivalry, in English Translation. Lecture, three hours. Study and analysis of literary monuments in English translation in their social and cultural settings, including courtly love lyrics, Arthurian epics, and heroic epics. May not be applied toward completion of the major in German. Mr. Bäuml, Mr. Ward

119B. Weimar Classicism and Its Influence, in English Translation. Lecture, three hours. Study and analysis of works in English translation from the classic age of German literature and concentrating on the major works of Lessing, Goethe, and Schiller and their reflection in the modern period. May not be applied toward completion of the major in German.
Mr. Bahr, Mr. Martinson

119C. The Faust Tradition from the Renaissance to the Modern Age, in English Translation. (Formerly numbered 119J.) Lecture, three hours. Readings and discussions in English of the Faust theme and tradition in European literature and intellectual history, including the chapbook of *Doktor Faustus*, Christopher Marlowe's and Goethe's Faust dramas, and Bulgakow, as well as Thomas Mann's novel, *Doktor Faustus: The Life of the German Composer Adrian Leverkühn*. May not be applied toward completion of the major in German.
Mr. Bahr, Mr. Martinson

119D. The Romantic Heritage in German Literature, in English Translation. (Formerly numbered 119C.) Lecture, three hours. Study and analysis of literary works in English translation that reflect German Romantic imagination from the end of the 18th century into the 20th century. May not be applied toward completion of the major in German.
Ms. Komar, Mr. Nehring

119E. Pattern and Chaos: Modern German Literature and Thought, in English Translation. (Formerly numbered 119D, 119E, 119F.) Lecture, three hours. Selected works in English translation of German authors, poets, and thinkers from the late 19th through the 20th century, such as Nietzsche, Thomas Mann, Kafka, Brecht, Grass, Christa Wolf. Topics vary from quarter to quarter. May not be applied toward completion of the major in German. May be repeated for credit.

119F. From Dream to Nightmare: The German-Jewish Experience, in English Translation. (Formerly numbered 119G.) Lecture, three hours. Study and analysis of works in English translation reflecting the process of German-Jewish assimilation and disenfranchisement, including authors such as Mendelssohn, Heine, Schnitzler, Kafka, Feuchtwanger, Anne Frank, Sachs, Celan, and Becker.
Ms. Hadda

Courses Open for Credit to Majors, Nonmajors, and Graduate Students in German

121A. Special Problems in Literature. Lecture, three hours. Prerequisite: upper division standing. Varying topics of current importance and immediate relevance to literary study. Designed to introduce students to contemporary trends in literary study and predominantly concerned with topics related to German literature and criticism.

121B. The German Film in Cultural Context. A survey of various aspects of the German film in relationship to literary, artistic, and political directions of the times, with emphasis on the film as a separate mode of artistic expression.

121C. Selected Topics in German Culture and Civilization. Lecture, three hours. Required of all German majors who are candidates for the standard credential in secondary teaching.

122. Studies in German Literature before 1750. Prerequisites: three upper division courses (including course 100A) or consent of instructor. Readings and analysis of major works from the Middle Ages to the baroque. Mr. Bäuml, Mr. Wagener, Mr. Ward

123. Goethe. Prerequisites: courses 100A or 100B and 103, or consent of instructor. Reading and discussion of representative works (except *Faust*) from Goethe's early period to his maturity and old age.
Mr. Bahr, Mr. Martinson

124. Romanticism. Prerequisites: courses 100A or 100B and 105, or consent of instructor. Reading and analysis of major works of the Romantic period. Authors include Tieck, Novalis, E.T.A. Hoffmann, and Eichendorff. Ms. Komar, Mr. Nehring

126. Advanced Study in Modern Literature. Prerequisites: courses 100A, 100B, or 100C, and 106, or consent of instructor. Reading and analysis of a wide range of the literature from 1890 to 1945.
Mr. Nehring, Mr. Wagener

127. Advanced Study in Contemporary Literature. Prerequisites: courses 100A, 100B, or 100C, and 107, or consent of instructor. Analysis of a wide range of German literature from 1945 to the present.

128. Advanced Composition, Grammar, and Conversation. Prerequisites: courses 108A and 108B, or consent of instructor. Mr. Christy, Ms. Landa

129. German Phonetics. Study of the articulatory basis of the sounds of German and practice in standard pronunciation. Mr. Christy

130. Methodology of Literary Criticism. Prerequisite: senior standing or consent of instructor. Introduction to the methodology of literary criticism, including a systematic study of motif, topos, plot, space and time, semantics, stylistics, rhetoric, metrics, imagery (emblem, metaphor, allegory, symbol), structural elements (act, stanza, book, flashback, anticipation, interior monologue), narrator and reader response, humor and irony, hermeneutics.
Mr. Bahr, Mr. Bäuml, Mr. Martinson

132. Goethe's *Faust*. Prerequisites: courses 100A or 100B and 123, or consent of instructor. Detailed interpretation of Goethe's *Faust*, Parts I and II, together with general consideration of other treatments of the Faust theme in European literature.
Mr. Bahr, Mr. Martinson

134. German Folklore. A survey of the various genres of German folklore. Mr. Ward

137. Language and Linguistics. Prerequisites: courses 100A or 100B, 108A. Introduction to the historical development of the German language; theories and methods of linguistics. Mr. Christy

195. Senior Thesis Course. Extensive reading, research, and writing of senior thesis. May be used for writing honors thesis.

199A-199ZZ. Special Studies (2 to 4 units). Prerequisite: consent of instructor. To be arranged with faculty member who will direct the study (course section to be identified by a two-letter code using initials of sponsoring instructor — see department for code). A course of independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite.

Graduate Courses

201A. Bibliography, Research Methods, and Scholarly Writing. Lecture, three hours. Introduction to the current state of advanced research and analysis of literary and philological materials, with emphasis on bibliographies and such tools of research as reference works, series publications, journals, archives, literary histories, and computer data banks. Practical exercises in the analysis of sources, compilation and presentation of bibliographies, and the writing of research papers. Mr. Bahr, Mr. Ward

201C. Theories of Literary Criticism. Analysis and discussion of the foundations of literary criticism and current theories such as hermeneutics, positivism, psychology, sociology, intellectual history (Geistesgeschichte), New Criticism, Marxist Criticism, Russian and Czech Formalism, structuralism, and semiotics.
Mr. Bahr, Mr. Bäuml

202A. Middle High German. Introduction to the grammar, syntax, and vocabulary of the Middle High German language. Exercises in reading Middle High German literary works, combined with a study of the sociocultural contexts in which the works of the medieval period were produced and performed.
Mr. Bäuml

202B. Readings in Middle High German Literature. Extensive reading of the literary monuments of the medieval period in Germany. Introduction to the cultural and literary history of the Middle Ages.
Mr. Bäuml, Mr. Ward

203A. The Courtly Epic. An analysis of the major epics of the medieval period in Germany, such as Hartmann's *Erec* and *Iwein*, Wolfram's *Parzival*, and Gottfried's *Tristan*. A study of courtly society, as well as an introduction to methods of interpretation and analysis. Mr. Bäuml

203B. The Courtly Lyric. Analysis of the medieval songs of courtly performers, beginning with Der von Kürenberg and ending with Johannes von Hadlaub. Study of the sociocultural context in which the songs were produced and performed, and an introduction to methods of interpretation and analysis.
Mr. Bäuml, Mr. Ward

203C. The Heroic Epic. A survey of German heroic literature, beginning with the *Hildebrandslied* and including such works as the *Nibelungenlied*, *Kudrun*, and the Dietrich epics. Methods of analysis and interpretation, as well as an analysis of thematic and formal characteristics of the different epics.
Mr. Bäuml, Mr. Ward

204. Renaissance and Reformation Literature. The literature of the 15th and 16th centuries, including an introduction to and the study of the early New High German language. Selected readings from the works of such authors as Sebastian Brant, Martin Luther, Hans Sachs, and Johann Fischart.
Mr. Bäuml, Mr. Wagener, Mr. Ward

205. Baroque Literature. Definition of the term baroque; development of modern baroque scholarship; influence of foreign models; analysis of sample theoretical writings (prosodies) and of representative poems, dramas, novels, and prose satires of the 17th century. Mr. Wagener

206A. Enlightenment and Sentimentalism. Study of representative authors of the earlier part of the 18th century from Gottsched through Lessing, including such authors as Leibniz, Thomasius, Wolff, Bodmer and Breitinger, Johann Elias Schlegel, Haller, Brockes, Anacreontic poets, Gessner, Klopstock, Mendelssohn, and Wieland.
Mr. Bahr, Mr. Martinson

206B. *Sturm und Drang*. Study of representative authors of the *Sturm und Drang* period, such as Herder, Forster, Gerstenberg, Leisewitz, Klinger, Wagner, R.M. Lenz, Moritz, Heinse, Schubart, and the young Goethe and Schiller. Mr. Bahr, Mr. Martinson

207A. Classicism: Goethe. Selected topics from the works of Goethe in the period from 1786 to 1832, such as *Iphigenie auf Tauris*, *Torquato Tasso*, *Wilhelm Meisters Lehrjahre*, *Die natürliche Tochter*, *Pandora*, and poetry selections. Mr. Bahr

207B. Classicism: Schiller. Selected topics from the critical and dramatic works of Schiller in the period from 1793 to 1805, such as *Über Anmut und Würde*, *Über das Erhabene*, *Wallenstein*, *Maria Stuart*, *Jungfrau von Orleans*, and *Wilhelm Tell*.
Mr. Bahr, Mr. Martinson

208. Romanticism. Analysis of selected works of the Romantic period by authors such as Wackenroder, Tieck, the brothers Schlegel, Novalis, Hölderlin, Brentano, Arnim, the brothers Grimm, "Bonaventura," E.T.A. Hoffmann, Eichendorff, and others. Course may be genre or topic oriented.
Ms. Komar, Mr. Nehring

209A. 19th-Century Lyrics. The development of German lyric poetry from the classic/Romantic period to symbolism. Discussion of forms, attitudes, tendencies. Analyses may include poetry by Romantic authors, as well as Heine, Platen, the political poets of *Vormärz,* Droste-Hülshoff, Keller, Storm, C.F. Meyer, Nietzsche, George, and others.
Ms. Komar, Mr. Nehring

209B. 19th-Century Drama. Reading and analysis of selected dramas by Kleist, Büchner, Hebbel, Grillparzer, and others. Discussion and analyses may include topics such as *Schicksalstragödie,* bourgeois trivial drama, sociopolitical drama, historical drama, Viennese *Volkstheater.* Ms. Komar, Mr. Nehring

209C. 19th-Century Narrative Prose. Analysis of German prose works from Romanticism to naturalism. Discussion of the problem of reality and literary realism with respect to narrative techniques. Authors may include Heine, Büchner, Droste-Hülshoff, Stifter, Gotthelf, Keller, C.F. Meyer, Fontane, and the early naturalists. Ms. Komar, Mr. Nehring

210A. Naturalism and Symbolism. Sociological background and theoretical writings concerning naturalism and symbolism. Analysis of representative poems, dramas, and shorter narratives by authors such as Holz, G. Hauptmann, George, Hofmannsthal, Rilke.
Mr. Nehring, Mr. Wagener

210B. Expressionism and Neorealism. Historical and sociological background in the period from 1910 to 1933. Literary magazines, theoretical writings, poetry of expressionism and Dadaism, expressionist dramas, and shorter narratives. Definition and representative works of neorealism. Mr. Wagener

210C. 20th-Century Novel to 1945. Analysis of selected 20th-century novels written prior to 1945. Authors of different literary and historical eras, such as Broch, Döblin, Hesse, Kafka, Heinrich Mann, Thomas Mann, and Rilke. Ms. Komar, Mr. Wagener

211A. Contemporary Novel. Study of selected novels in the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland, such as Böll, Grass, Handke, Frisch, and Christa Wolf, analyzed and placed in the context of literary, cultural, and political trends.

211B. Contemporary Lyrics and Drama. A study of selected dramas and poems in the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland, such as Dürrenmatt, Frisch, Handke, Celan, and Brecht, analyzed and placed in the context of literary, cultural, and political trends.

217. History of the German Language. A historical survey of the development of the standard literary German language from the time of Indo-European unity through proto-Germanic, West Germanic, the medieval period, the Reformation, the baroque period, and the Enlightenment until its final codification at the end of the 19th century. Mr. Christy, Mr. Wilbur

230. Survey of Germanic Philology. A systematic survey of the major problems in the field of Germanic linguistics: the origin and historical diffusion of the Germanic dialects and their classification; problems in the evolution of the nominal and verbal morphology of the various dialects; problems in the phonological evolution of the various dialects. Mr. Wilbur

231. Gothic. A systematic study of the phonology and grammar of the Gothic language, with readings in Wulfila's translation of the Bible and an introduction to the history of the Goths and their place in the development of modern Europe. Mr. Wilbur

232. Old High German. An introduction to the earliest phases of German literature, with extensive readings in the major documents of that period (750-1050). Emphasis on the grammatical interpretation of these documents and the identification of the dialects used in their composition. Mr. Christy, Mr. Wilbur

233. Old Saxon. An introduction to the study of the earlist documents in Old Low German. Readings in the *Heliand* and the study of the *Old Saxon Genesis.*
Mr. Christy, Mr. Wilbur

240A. Theories, Methods, and History of Germanic Folklore. The history of Germanic folklore studied in the context of European cultural history. The evolution of the theories and methods of the discipline as developed by Herder, the Grimms, Bolte, Meier, Naumann, Bausinger, and others. Mr. Ward

240B. Folk Song and Ballad. Analysis of the poetic and musical aspects of German folk songs and ballads. Study of thematic and formalistic evolution of text and music, combined with an introduction to the theories and methods of analysis of folk music and the function of folk song in its social context.
Mr. Ward

240C. Oral Prose Genres. Study of the thematic and formal characteristics of legends, folktales, jests, proverbs, and riddles. The role of popular narrative in its sociocultural context in German history and a survey of methods of analysis of narratives, texts, and contexts. Mr. Ward

245B. Germanic Antiquities. Survey of the prehistory and early history of Germanic civilization from the Bronze Age to the end of the migrations on the basis of archaeological, historic, and philological evidence. Uses of methods of comparative ethnography, religion, and myth to interpret the evidence.
Mr. Ward

251. Seminar in Syntax and Phonology of German. Topics selected from the field of contemporary German syntax and phonology according to the needs and preparation of the students enrolled (e.g., *Dialektgeographie,* generative phonology, generative syntax, *Valenztheorie, Texttheorie).* Mr. Wilbur

252. Seminar in Historical and Comparative German Linguistics. Topics selected from the field of historical German phonology and syntax according to the needs and preparation of the students enrolled (e.g., the West Germanic problem and the classification of the Germanic languages, the development of Germanic verbal and nominal morphology, proto-Germanic syntax). Mr. Wilbur

253. Seminar in Medieval Literature. Selected topics in medieval literature, with emphasis on problems in literary analysis and the applicability of various types of analysis to medieval texts.
Mr. Bäuml, Mr. Ward

254. Seminar in Renaissance and Reformation. Seminar on selected literary or philological problems, such as a particular genre, author, or theme. Studies on textual analysis or pertinent research to apply the methods of literary history to the literature of the 15th and 16th centuries. Mr. Bäuml, Mr. Ward

255. Seminar in Baroque Literature. Seminar on selected problems of German baroque literature, such as a particular genre, author, or theme. Textual analysis supplemented by critical review of research and the application of methods of literary analysis pertinent to the literature of this age.
Mr. Wagener

256. Seminar in Enlightenment and *Sturm und Drang.* Selected topics in 18th-century literature, such as utopian literature, love and money as motifs, family structure and family life, image of women and women's literature, Jacobin literature, seduction and betrayal as motifs, nobility and middle class in 18th-century literature. Textual analysis and review of current research. Mr. Bahr, Mr. Martinson

257. Seminar in the Age of Goethe. Selected topics in German literature between 1775 and 1832, such as Schiller's theoretical writings, Goethe's *Faust II,* Goethe's *Wanderjahre* and *West-Östlicher Divan,* Goethe's *Faust II* and Hegel's *Phänomenologie des Geistes,* the French Revolution and German classicism. Textual analysis and review of current research.
Mr. Bahr

258. Seminar in Romanticism. Discussion of a specific author or topic from the Romantic period, possibly in close connection with course 208. Critical review of secondary works. Ms. Komar, Mr. Nehring

259. Seminar in 19th-Century Literature. Discussion of a specific author or topic of 19th-century literature, possibly in close connection with course 209A, 209B, or 209C. Critical review of secondary works.
Ms. Komar, Mr. Nehring

260. Seminar in the Modern Period. Seminar on a selected genre, author, or theme of 20th-century German literature prior to 1945.
Mr. Bahr, Mr. Nehring, Mr. Wagener

261. Seminar in Contemporary Literature. Study of selected works, a specific author, genre, period, or topic from 1945 to the present. Texts analyzed and placed in the context of literary, cultural, and political trends.

262. Seminar in Germanic Folklore. Detailed research on individual aspects of Germanic folklore. The topic selected generally is drawn from the course in the German 240 series that preceded the seminar. Emphasis on problems of theory and method.
Mr. Ward

263. Seminar in Theories of Literature. Specialization in literary theories, such as *Rezeptionsästhetik,* Neo-Marxist Criticism, New Criticism, psychology or sociology of literature, structuralism, semiology, and hermeneutics. Mr. Bahr, Mr. Bäuml

370. The Teaching of German in Secondary Schools. Lecture, three hours; discussion periods. Prerequisite: graduate standing or consent of instructor. Required of all candidates for the general secondary credential in German.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495A-495B. Preparation for College Teaching of German (2 units each). Study of problems and methods in teaching German on the college level. Theory and classroom practice, observation, and critical evaluation. May not be applied toward the M.A. course requirements. In Progress and S/U grading.

596. Directed Individual Study or Research. To be arranged with faculty member who will direct the study or research (course section to be identified by a two-letter code using initials of sponsoring instructor — see department for code). May be repeated once; however, only one course in the 500 series may be applied toward the M.A. graduate course requirement. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. To be arranged with faculty member who will direct the study (course section to be identified by a two-letter code using initials of sponsoring instructor — see department for code). May be taken only once before and only once after the M.A. degree, except for Ph.D. candidates with a formal minor field of studies who may take the course twice after the M.A., once in the major and once in the minor. Only one course in the 500 series may be applied toward the M.A. graduate course requirement. S/U grading.

598. Research for and Preparation of M.A. Thesis (4 to 12 units). To be arranged with faculty member who will direct the study (course section to be identified by a two-letter code using initials of sponsoring instructor — see department for code). Only one course in the 500 series may be applied toward the M.A. graduate course requirement. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (4 to 12 units). To be arranged with faculty member who will direct the study (course section to be identified by a two-letter code using initials of sponsoring instructor — see department for code). May be repeated. S/U grading.

Dutch and Afrikaans

Upper Division Courses

103A. Elementary Dutch. (Formerly numbered 101A.) Lecture/language laboratory. Introduction to the standard language of the Netherlands and one of the three standard languages of Belgium. Practice in grammar, listening, speaking, reading, and writing. Mr. Kirsner

103B. Elementary Dutch. (Formerly numbered 101C.) Lecture/language laboratory. Prerequisite: course 103A or equivalent. Mr. Kirsner

103C. Intermediate Dutch. (Formerly numbered 101D.) Lecture/language laboratory. Prerequisite: course 103B or equivalent. Grammatical exercises, conversation, reading and analysis of simple texts. Mr. Kirsner

105A. Elementary Afrikaans. (Formerly numbered 101B.) Lecture/language laboratory. Introduction to a sister language of modern Dutch and a national language of South Africa. Grammar, practice in listening, speaking, reading, and writing. Mr. Kirsner

105B. Intermediate Afrikaans. (Formerly numbered 101E.) Lecture/language laboratory. Prerequisite: course 105A or equivalent. Grammatical exercises; reading and linguistic analysis of texts from both literary and nonliterary sources. Mr. Kirsner

112. Dutch, Flemish, Afrikaans Literature in Translation. Readings and analysis of selected works in translation from Dutch, Flemish, and Afrikaans literature. Mr. Kirsner

120. Introduction to Dutch Studies. Prerequisite: consent of instructor. Brief review of Dutch grammar. Reading and discussion of selections from contemporary Dutch literature, contemporary Dutch literary criticism, and modern Dutch linguistics. Emphasis on developing reading skill and on acquiring familiarity with and an appreciation of the scope of 20th-century Neerlandistiek. Mr. Kirsner

131. Introduction to Modern Dutch Literature. Discussion, three hours. Prerequisite: course 103B or 120 or equivalent. Selected works of the literature of the Netherlands and northern (Flemish) Belgium from the mid-1850s to the present, including novels by such writers as Multatuli, Couperus, Hermans, Mulisch, and Reve and poetry by such groups as the symbolist Beweging van Tachtig and the post-War Beweging van Vijftig. Mr. Kirsner

135. Introduction to Afrikaans Literature. Discussion, three hours. Prerequisite: course 105B or equivalent. Analysis of selected works from the founding of the Genootskap van Regte Afrikaners in 1875 to the present time, including novels by recent writers such as Leroux and Brink, as well as the work of poets such as Eybers, Opperman, W.E.G. Louw, Van Wyk Louw, and Breytenbach. Mr. Kirsner

199. Special Studies in Dutch and Afrikaans (2 to 4 units). Mr. Kirsner

Graduate Courses

234. The Structure of Modern Standard Dutch. A detailed examination, from contrasting theoretical viewpoints, of central problems in Dutch phonology, grammar, and semantics, with attention to related phenomena in German, English, and Afrikaans. Equivalent to Linguistics 225. Mr. Kirsner

596. Directed Individual Study or Research in Dutch and Afrikaans. To be arranged with faculty member who will direct the study or research (course section to be identified by a two-letter code using initials of sponsoring instructor — see department for code). May be repeated once. S/U grading. Mr. Kirsner

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with faculty member who will direct the study (see department for code). S/U grading. Mr. Kirsner

Hungarian

Upper Division Courses

101A. Elementary Hungarian. Introduction to grammar and reading exercises, with emphasis on the spoken language. Ms. Birnbaum

101B. Elementary Hungarian. Prerequisite: course 101A or equivalent. Grammatical exercises, conversation, and reading of texts. Ms. Birnbaum

101C. Elementary Hungarian. Prerequisite: course 101B or equivalent. Conversation and readings in literary texts. Ms. Birnbaum

101D. Advanced Hungarian. Prerequisites: courses 101A, 101B, 101C, or equivalent. Grammar, conversation, vocabulary building. Ms. Birnbaum

101E. Advanced Hungarian. Prerequisites: courses 101A-101D or equivalent. Conversation, reading, and discussion of literary texts. Ms. Birnbaum

101F. Advanced Hungarian. Prerequisites: courses 101A-101E or equivalent. Conversation and review of Hungarian grammar from a typological point of view. Ms. Birnbaum

120A-120B. Readings in Hungarian. Prerequisite: course 101C or equivalent. Selections of Hungarian prose and poetry read in the original. Ms. Birnbaum

120C. Readings in Hungarian Literature. Prerequisites: reading knowledge of Hungarian, course 101C or equivalent. Selections of Hungarian prose and poetry read in the original. Discussion conducted in Hungarian. Ms. Birnbaum

121A-121B. Survey of Hungarian Literature in Translation. Intended for students in general and comparative literature, as well as students interested in Finno-Ugric studies. Survey of main trends and contacts with other literatures. Ms. Birnbaum

130. Hungarian Civilization and Culture. A study of Hungarian civilization and institutions from the earliest times to the present. Study of Hungarian culture as represented in its arts (literature, fine arts, music). Ms. Birnbaum

M135. Hungarian Folklore and Mythology. (Same as Folklore M128.) A general course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research. Ms. Birnbaum

M136. Folklore and Mythology of the Ugric Peoples. (Same as Folklore M129.) Survey of the traditions of the smaller Ugric nationalities (Voguls, Ostyaks, etc.). Ms. Birnbaum

199. Special Studies in Hungarian (2 to 4 units). Prerequisite: consent of instructor. A course of independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Ms. Birnbaum

Old Norse Studies

Lower Division Course

40. The Heroic Journey in Northern Myth, Legend, and Epic. A comparison of the journeys of heroes. Readings in mythology, legend, folktale, and epic, including the *Nibelungenlied*, the *Volsunga saga*, the *Eddas*, and *Beowulf*. Cultural and historic backgrounds to the texts. All readings in English. Mr. Byock

Upper Division Courses

139. The Saga. Lecture, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration to the history and culture that produced this literature. Mr. Byock

140. Viking Civilization and Literature. Readings in the history, society, and culture of the early Scandinavians. All texts in English: Old Norse sagas, *Eddas*, and early ballad literature. Mr. Byock

C145. Old Norse Literature and Society. Lecture, three hours. Readings in primary texts in conjunction with the critical literature. Specific issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C223. Mr. Byock

151. Elementary Old Norse. Introduction to the grammar and pronunciation of Old Norse. Selected readings from the sagas and the *Prose Edda*. Mr. Byock

152. Intermediate Old Norse. Prerequisite: course 151 or equivalent. Continued grammar, pronunciation, and readings from the *Eddas* and the sagas of the Icelanders, the Norwegian kings, and the legendary heroes. Mr. Byock

153. Modern Icelandic. Prerequisite: course 152 or equivalent. Grammar, readings, and conversation. Mr. Byock

199. Special Studies in Old Norse (2 or 4 units). Prerequisite: consent of instructor. A course of independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Mr. Byock

Graduate Courses

221. Advanced Old Norse Prose. Prerequisite: course 152 or equivalent. Readings of major saga texts. Also, secondary sources which bear on specific issues in Old Norse literature and medieval Scandinavian history. Mr. Byock

222. Advanced Old Norse Poetry. Prerequisite: course 152 or equivalent. Readings of mythological and heroic poems from the *Poetic Edda*. Secondary sources used where appropriate. Mr. Byock

C223. Old Norse Literature and Society. Lecture, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C145. Mr. Byock

245A. Germanic and Scandinavian Mythology. Lecture, three hours. A study of Northern myth and religion through a close reading of the Eddic texts and secondary sources. Mr. Byock

596. Directed Individual Study or Research. To be arranged with faculty member who will direct the study or research (course section to be identified by a two-letter code using initials of sponsoring instructor — see department for code). May be repeated once; however, only one course in the 500 series may be applied toward the M.A. graduate course requirement. S/U grading. Mr. Byock

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with faculty member who will direct the study (see department for code). S/U grading. Mr. Byock

Yiddish

Lower Division Courses

1. Elementary Yiddish. Introduction to grammar; instruction in listening, speaking, reading, and writing skills. Ms. Hadda

2. Elementary Yiddish. Prerequisite: course 1 or equivalent. Ms. Hadda

3. Elementary Yiddish. Prerequisite: course 2 or equivalent. Ms. Hadda

Upper Division Courses

104. Intermediate Yiddish. Prerequisite: course 3 or equivalent. Grammatical exercises, reading and linguistic analysis of texts, conversation. Ms. Hadda

121A. 20th-Century Yiddish Poetry in English Translation. Prerequisite: upper division standing or consent of instructor. Readings in 20th-century Yiddish poetry and drama. Ms. Hadda

121B. 20th-Century Yiddish Prose and Drama in English Translation. Prerequisite: upper division standing or consent of instructor. Readings in 20th-century Yiddish prose. Ms. Hadda

121C. Special Topics in Yiddish Literature in English Translation. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. Ms. Hadda

131A. Modern Yiddish Poetry. Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish poetry. Ms. Hadda

131B. Modern Yiddish Prose and Drama. Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish prose and drama. Ms. Hadda

131C. Special Topics in Yiddish Literature. Prerequisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20-century literature. Ms. Hadda

199. Special Studies in Yiddish (2 to 4 units). Prerequisite: consent of instructor. A course of independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Ms. Hadda

Graduate Courses

596. Directed Individual Study or Research in Yiddish. To be arranged with faculty member who will direct the study or research (course section to be identified by a two-letter code using initials of sponsoring instructor — see department for code). May be repeated once. S/U grading. Ms. Hadda

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with faculty member who will direct the study (see department for code). S/U grading. Mr. Hadda

Scandinavian Section

332 Royce Hall, (213) 825-2432

Professors

Ross P. Shideler, Ph.D.
Kenneth G. Chapman, Ph.D., *Emeritus*
Erik Wahlgren, Ph.D., *Emeritus*

Associate Professors

James R. Massengale, Ph.D.
Mary Kay Norseng, Ph.D., *Vice Chair*

Adjunct Lecturers

Inkeri A. Rank, M.A., M.Ed. *(Finnish Studies)*
Jules L. Zentner, Ph.D.

Scope and Objectives

Scandinavia consists of five Northern European countries: Denmark, Finland, Iceland, Norway, and Sweden. Together with the Faroe Islands and Greenland, these countries form a geographic bridge between the American and European continents and a political bridge between the West and Eastern Europe. For all students of literature, history, and social planning, Scandinavia is of particular interest.

The modern Scandinavian program educates students about Scandinavia through the study of its languages and literatures. The Scandinavian Section offers both undergraduate and graduate degrees in the languages and literatures of Denmark, Norway, and Sweden, as well as a strong set of course offerings in Finnish language, literature, and folklore. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and graduate majors are expected to concentrate on one Scandinavian language, though they will study the literatures of the other language areas.

Bachelor of Arts in Scandinavian Languages

Preparation for the Major

Required: Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, 25, and 30, or equivalent.

The Major

Required: Twelve upper division courses in Scandinavian, including 105 and 106 or 110 for two quarters and 141, 142, 143. As an option, three upper division courses in a related field may be taken. These three courses must be approved in advance by the undergraduate adviser. It is recommended that students who plan to do graduate work in Scandinavian take German 1 through 6.

Master of Arts in Scandinavian

Admission

In addition to the University minimum requirements, prospective students in the M.A. program in Scandinavian must have an undergraduate major in Scandinavian languages or equivalent. If you are deficient in the undergraduate major, you must complete it by taking the appropriate courses as recommended by the graduate adviser. A placement examination in the Scandinavian languages, as well as in German, may be required.

Three letters of recommendation are required by the Graduate Division.

For a brochure describing the program and requirements, write to the Scandinavian Section, 332 Royce Hall, UCLA, Los Angeles, CA 90024.

Major Fields or Subdisciplines

There are no specifically designated major fields or subdisciplines in the M.A. program, but students emphasize one modern language and literature area in Danish, Norwegian, or Swedish.

Foreign Language Requirement

Reading knowledge of French or German is required (in addition, of course, to a knowledge of the Scandinavian languages). You must pass the Graduate School Foreign Language Test reading examination in French or German with a score of 500 or better or must pass at least one upper division course in French or German.

Course Requirements

A total of 12 courses is required for the M.A. degree. These include a minimum of nine upper division and graduate courses in Scandinavian languages, at least five of which must be graduate courses. Three courses on the upper division or graduate level may be taken in a related field of linguistic or literary study to be determined in consultation with the graduate adviser; at least one of these must be on the graduate level. Comparative Literature 200 or an equivalent course in methodology is required as one of the 12 courses.

Three 596 courses (12 units) may be applied toward the total course requirement, but only one (four units) may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

A comprehensive examination, based on the required coursework and a reading list, is required of all candidates for the M.A. degree. The examination is given whenever you have completed the course requirements and feel prepared to be examined on both the coursework and the reading list.

The comprehensive examination is both written and oral; students who fail may be reexamined once without petitioning.

For the Ph.D. degree in Germanic Languages with Scandinavian literature as a major or minor field, see the "Ph.D. in Germanic Languages."

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Students with demonstrated preparation may be permitted a more advanced program by the section or may be transferred to a more advanced course with consent of the instructor.

Native speakers of Norwegian, Swedish, or Danish may not enroll in any language course (including courses 105, 106, 110) in the Scandinavian Section, except by petition in writing to the section. Non-Scandinavian students with a knowledge of one of these Scandinavian languages may not take courses in the others except by petition in writing. Petitions must include a description of the student's linguistic background and the reason for wanting to take the language course in question.

1. Elementary Swedish.

2. Elementary Swedish. Prerequisite: course 1 or equivalent. Mr. Massengale, Mr. Shideler

3. Elementary Swedish. Prerequisite: course 2 or equivalent. Mr. Massengale, Mr. Shideler

4. Intermediate Swedish. Prerequisite: course 3 or equivalent. Mr. Massengale, Mr. Shideler

5. Intermediate Swedish. Prerequisite: course 4 or equivalent. Mr. Massengale, Mr. Shideler

11. Elementary Norwegian. Ms. Norseng

12. Elementary Norwegian. Prerequisite: course 11 or equivalent. Ms. Norseng

13. Elementary Norwegian. Prerequisite: course 12 or equivalent. Ms. Norseng

14. Intermediate Norwegian. Prerequisite: course 13 or equivalent. Ms. Norseng

15. Intermediate Norwegian. Prerequisite: course 14 or equivalent. Ms. Norseng

21. Elementary Danish. Mr. Massengale

22. Elementary Danish. Prerequisite: course 21 or equivalent. Mr. Massengale

23. Elementary Danish. Prerequisite: course 22 or equivalent. Mr. Massengale

24. Intermediate Danish. Prerequisite: course 23 or equivalent. Mr. Massengale

25. Intermediate Danish. Prerequisite: course 24 or equivalent. Mr. Massengale

30. Intermediate Danish, Norwegian, and Swedish. Prerequisite: course 5 or 15 or 25 or equivalent. Readings in Danish, Norwegian, and Swedish. Written and oral exercises. P/NP (undergraduates), S/U (graduates), or letter grading.

50. Introduction to Scandinavian Literature. Lecture, three hours. Intended for students in general and for those wishing to prepare for more advanced and specialized studies of Scandinavian literature and culture. Selected works from the literature of Norway, Sweden, Denmark, Iceland, and Finland, ranging from myth, national epic, saga, and folktale through modern novel, poem, play, short story, and film script, read in English and critically discussed.

60. Ingmar Bergman and Other Swedish Filmmakers. Discussion, three hours. Knowledge of a Scandinavian language or of film is not required. Intended for students in general and for those preparing for more advanced studies in Scandinavian literature or culture. A history of Swedish film, emphasizing how it reflects social and cultural aspects of Scandinavian life. Discussion and analysis of representative Bergman and other Swedish films.

Upper Division Courses

105. Advanced Swedish. Prerequisite: course 30 or equivalent. Readings, composition, and conversation in Swedish. Mr. Massengale, Mr. Shideler

106. Advanced Swedish. Prerequisite: course 105 or equivalent. Readings, composition, and conversation in Swedish. Mr. Massengale, Mr. Shideler

110. Advanced Danish and Norwegian. Prerequisite: course 30 or equivalent. Readings, composition, and conversation in Danish and Norwegian. May be repeated once for credit.
Mr. Massengale, Ms. Norseng

M123A. Finnish Folklore and Mythology. (Same as Folklore M123A.) The methods and results of Finnish folklore studies and the mythic traditions of the Finns. Special attention to the oral epic, beliefs, and legends. Ms. Rank

M123B. Finnish Folk Song and Ballad. (Same as Folklore M123B.) Course M123A is not prerequisite to M123B. A survey of Finnish balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. Ms. Rank

M125. Folklore and Mythology of the Lapps. (Same as Folklore M125.) Survey of Lappish beliefs, customs, and various genres of oral tradition, including tales, legends, songs, and music. Attention also to the material manifestations of Lappish culture: arts and crafts, textiles, costume, folk technology.
Ms. Rank

130. Elementary Finnish. Introduction to pronunciation and grammar. Ms. Rank

131. Intermediate Finnish. Prerequisite: course 130 or equivalent. Grammatical exercises and readings.
Ms. Rank

132. Advanced Finnish. Prerequisite: course 131 or equivalent. Readings, composition, and conversation. Ms. Rank

138. Survey of Finnish Literature. Conducted in English; knowledge of Finnish is not required. Intended for students in general and comparative literature, as well as students interested in Finnish studies. Readings and discussions of selected works from the literature of Finland in the 19th and 20th centuries.
Ms. Rank

141. Backgrounds of Scandinavian Literature. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language is not required. Readings and discussions of representative texts selected from the literature of the medieval, Renaissance, baroque, and Enlightenment periods. Mr. Massengale

142. Scandinavian Literature of the 19th Century. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language is not required. Readings and discussions of selected works from the literature of Scandinavia in the 19th century.
Mr. Massengale, Ms. Norseng

143. Modern Scandinavian Literature. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language is not required. Readings and discussions of selected works of modern Scandinavian literature.
Mr. Massengale, Ms. Norseng, Mr. Shideler

C144. Henrik Ibsen. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language is not required. Readings and discussions of selected plays by Henrik Ibsen. May be concurrently scheduled with course C251. Ms. Norseng

C145. August Strindberg. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language is not required. Readings and discussions of selected plays by August Strindberg. May be concurrently scheduled with course C252.
Mr. Massengale, Mr. Shideler

C146. Søren Kierkegaard. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language is not required. Readings and discussions of selected works by Søren Kierkegaard. May be concurrently scheduled with course C253. Mr. Massengale

C147. Knut Hamsun. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language is not required. Readings and discussions of selected works by Knut Hamsun. May be concurrently scheduled with course C254. Ms. Norseng

C180. Literature and Scandinavian Society. Knowledge of one Scandinavian language may be required. Discussion of selected aspects of Scandinavian society based on readings of the contemporary literature as well as other documentary material. May be repeated for credit (as determined by undergraduate adviser) with topic change. May be concurrently scheduled with course C263.
Mr. Massengale, Ms. Norseng, Mr. Shideler

181. Contemporary Swedish Literature. Prerequisite: reading knowledge of a Scandinavian language. Reading and analysis of selected texts by major 20th-century Swedish authors, including not only specific novelists, playwrights, and poets, but placing them within a social and historical milieu. Mr. Shideler

C182. The Theory of the Scandinavian Novel. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language is not required. The predominant structures of the novel, the Scandinavian novel in particular, starting with its beginnings, concentrating on the rise of the novel in the 19th century, and following the novel's evolution in the 20th century. Emphasis on the works of such writers as Kierkegaard, Andersen, Almquist, Jacobsen, Hamsun, and Hansen. May be concurrently scheduled with course C264.
Mr. Massengale, Ms. Norseng, Mr. Shideler

183. The Scandinavian Ballads. Lecture, three hours. Prerequisite: reading knowledge of a Scandinavian language. A survey of Danish, Norwegian, and Swedish ballads, with attention to their historical development, poetic content, and musical/poetic structure. Mr. Massengale

184. Hans Christian Andersen. Lecture, three hours. Conducted in English; knowledge of a Scandinavian language is not required. Study of the works of Hans Christian Andersen, the Danish novelist, dramatist, and writer of tales, including a consideration of his literary background and of his times. Analysis of his works in terms of their structure, style, and meaning. P/NP or letter grading. Mr. Massengale

190. Honors Course in Scandinavian. Prerequisites: senior standing with a minimum 3.0 GPA in the major, consent of the honors committee. Intensive study of a selected special topic in Scandinavian. Discussions, oral and written reports.

199A-199ZZ. Special Studies in Scandinavian (2 or 4 units). Prerequisites: senior or graduate standing, consent of instructor. To be arranged with faculty member who will direct the study (course section to be identified by a two-letter code using initials of sponsoring instructor — see section for code). A course of independent study designed for graduates or senior undergraduates who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite.

Graduate Courses

C251. Henrik Ibsen. Prerequisites: advanced knowledge of Norwegian, consent of instructor. Intensive study of the works of Henrik Ibsen. May be concurrently scheduled with course C144.
Ms. Norseng

C252. August Strindberg. Prerequisites: advanced knowledge of Swedish, consent of instructor. Intensive study of the works of August Strindberg. May be concurrently scheduled with course C145.
Mr. Massengale, Mr. Shideler

C253. Søren Kierkegaard. Prerequisites: advanced knowledge of Danish, consent of instructor. Intensive study of the works of Søren Kierkegaard. May be concurrently scheduled with course C146.
Mr. Massengale

C254. Knut Hamsun. Prerequisites: advanced knowledge of Norwegian, consent of instructor. Intensive study of the works of Knut Hamsun. May be concurrently scheduled with course C147.
Ms. Norseng

C263. Seminar in Scandinavian Studies. Prerequisites: graduate standing or consent of instructor, knowledge of a Scandinavian language. Intensive study of selected aspects of Scandinavian society based on readings in the literature as well as other documentary material. May be repeated for credit (as determined by graduate adviser) with topic change. May be concurrently scheduled with course C180.
Mr. Massengale, Ms. Norseng, Mr. Shideler

C264. The Theory of the Scandinavian Novel. Prerequisites: advanced knowledge of a Scandinavian language, consent of instructor. The predominant structures of the novel, the Scandinavian novel in particular, starting with its beginnings, concentrating on the rise of the novel in the 19th century, and following the novel's evolution in the 20th century. Emphasis on the works of such writers as Kierkegaard, Andersen, Almquist, Jacobsen, Hamsun, and Hansen. May be concurrently scheduled with course C182.
Mr. Massengale, Ms. Norseng, Mr. Shideler

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. To be arranged with faculty member who will direct the study or research. Twelve units may be applied toward the total course requirement, but only four units may be applied toward the minimum graduate course requirement. May be repeated twice. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (4 to 8 units). To be arranged with faculty member who will direct the study or research. May be repeated once. May not be applied toward the M.A. minimum course requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. To be arranged with faculty member who will direct the study or research. May be repeated. S/U grading.

Stanley A. Wolpert, Ph.D.

Emeritus Professors

Milton Anastos, Ph.D.
Truesdell S. Brown, Ph.D.
John G. Burke, Ph.D.
John W. Caughey, Ph.D.
Raymond H. Fisher, Ph.D.
Jere C. King, Ph.D.
Gerhart B. Ladner, Ph.D.
Andrew Lossky, Ph.D.
Lynn White, jr., Ph.D.
Robert A. Wilson, Ph.D.

Associate Professors

Edward G. Berenson, Ph.D.
Robert G. Frank, Ph.D.
Robert A. Hill, M.Sc.
Michael G. Morony, Ph.D.
M. Norton Wise, Ph.D.
Mary A. Yeager, Ph.D.

Assistant Professors

Ruth Bloch, Ph.D.
Margaret W. Creel, Ph.D.
Melissa L. Meyer, Ph.D.
Debora L. Silverman, Ph.D.
Albion M. Urdank, Ph.D.
Scott L. Waugh, Ph.D.

Lecturers

Ludwig Lauerhass, Ph.D.
Albert Hoxie, M.A., *Emeritus*

Adjunct Associate Professor

S. Scott Bartchy, Ph.D.

Scope and Objectives

History is the study of the past of our own society and how it emerged out of the traditions that produced it. At the same time, self-knowledge for students of history comes not only from self-discovery, but from a comparison of their own tradition and experience with those of others. It is only by studying the history of other civilizations and cultures that we can hope to gain perspective on our own.

The course offerings in history at UCLA are designed to bring about an understanding of the forces that have shaped the many cultures of this country and the world. UCLA has one of the largest, most distinguished, and most diverse history faculties in the country. Its main emphasis is on the many aspects of social history, but intellectual, cultural, and political history are also strongly represented.

Of all undergraduate majors, history is probably the most flexible and far-reaching. Leading to a Bachelor of Arts degree, it is excellent preparation for a wide variety of careers — law, teaching, business, the communications media, public services, and medicine.

The department offers graduate programs leading to the M.A. and Ph.D. and accepts qualified applicants for either or both degrees. There is also a joint master's program with the Graduate School of Library and Information Science. Traditionally, the M.A. and Ph.D. in History have led to careers in high school, college, and university teaching. Increasingly, they are also being put to use in government service, international business, museum and archival work, and journalism.

Bachelor of Arts Degree

Preparation for the Major and the Major

The History Department's undergraduate program consists of 16 courses in history (six lower division — the "Preparation for the Major"; 10 upper division — the "Major") and four courses in the social sciences outside the department. The following courses are required in the program:

(1) History 1A-1B-1C.

(2) Two courses in U.S. history.

(3) Two courses in non-Western history from the same area (i.e., Latin America, Asia, Near and Middle East, Africa) or in science and technology. Candidates for the California Standard Teaching Credential may not choose science and technology to fulfill their non-Western requirement.

(4) History 99 (for freshmen and sophomores), 101 (for juniors and seniors), or 100.

(5) History 197 or 199.

(6) Four courses in the social sciences outside of history or in other related disciplines as explained below.

The requirements for U.S. and non-Western history may be met with either upper or lower division courses. Normally only six lower division courses in history need to be included in your program, so if you meet the U.S. history requirement at the lower division level, you will have to meet the non-Western requirement at the upper division level (or vice versa). If you choose to meet both requirements at the lower division level, you will still be required to take

10 upper division courses to fulfill upper division requirements. The department recommends the following lower division courses to meet the U.S. history and non-Western requirements: History 2; 3A-3B-3C; 3D; 6A-6B-6C; 7A-7B; 8A, 8B; 9A-9B-9C; 9D plus one suitable upper division course; 10A-10B. If only one non-Western course is taken in lower division, an appropriate upper division non-Western course must be included in the major.

All history majors are required to take at least four courses in other departments in the social sciences, whether lower or upper division (anthropology, geography, economics, political science, sociology, psychology). These courses may not be taken on a Passed/Not Passed basis. A one-quarter course from the History 6A-6B-6C sequence may be applied toward this requirement, provided the same quarter course is not used to satisfy any other requirement of the major.

By petition, you may replace up to two social science courses with courses in humanities, fine arts, or natural sciences relevant to your program in history. Courses in communication studies do not fulfill this requirement.

Only two courses offered outside the History Department may be applied as major courses without petition: Anatomy (Medical History) 107A-107B.

Transfer students with deficiencies in lower division courses may by petition substitute appropriate upper division courses in history for the lower division requirements. See the undergraduate counselor.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

Advanced Placement Credit in History: The College of Letters and Science allows 10 quarter units toward the B.A. for each Advanced Placement Test in history. The History Department applies this credit to the "Preparation for the Major" as follows: AP European History fulfills History 1C; AP American History with a score of 4 or 5 allows eight units of History 7A-7B credit on the history preparation. The excess units may be applied only toward the degree.

Honors Program

The honors program is designed for history majors who are interested in carrying out a year-long independent research project that culminates in an honors thesis. Special honors seminars are also offered during the junior year. A 3.5 departmental grade-point average is normally required for admission, but students with a lower GPA may apply to the honors committee for admission. Application should be made at the beginning of the junior year.

History 101H is required, as are History 199HA-199HB-199HC, which count as three of the 10 required upper division courses. Course 199HA is taken in the Spring Quarter of the junior year; honors students then take courses 199HB and 199HC in the Fall and Winter Quarters of their senior year under the guidance of the sponsoring professor. The Justin Turner Prize is awarded for the outstanding honors thesis.

Teaching Credential in History

If, based on your history major program, you would like a waiver of the national teacher examination for the single subject credential in history, you must complete (1) History 7A-7B or two quarters of courses 6A-6B-6C, (2) courses 1A-1B-1C, (3) course 163, and (4) two upper division courses in modern European history from the 125A-125F or 126A-126E sequences. You may not select history of science as a non-Western field.

Master of Arts Degree

Admission

For admission to graduate standing in the Department of History, you should normally have completed the undergraduate major or its equivalent, have received a Bachelor of Arts degree or its equivalent from an accredited college or university, and have maintained at least a B+ average in upper division work. You also need three letters of recommendation and the scores of the Aptitude Test of the Graduate Record Examination (GRE) submitted to the department. Students not meeting the grade-point average requirements may be admitted in exceptional cases if their letters of recommendation, GRE scores, or other factors indicate unusual promise. Applicants with a year or more of graduate study at other institutions should have attained a GPA of 3.5 or better if they wish to work toward the Ph.D. degree. Applications should be submitted before December 30; notification will be made on or before May 1. Except for extraordinary cases, students are expected to begin their graduate work in the Fall Quarter.

There is no screening examination. Nonhistory majors may be required to take specified courses, depending on their background and fields of specialization. Because applicants are admitted to pursue graduate work in a specific field, a change of fields after admission requires the approval of the relevant field committee.

An annual *Guide to Graduate Study in History* which explains the requirements and procedures of the graduate program in detail is mailed to all new graduate students who have filed a Statement of Intent to Register (prior to registration). The guide lists faculty, their representative publications, and descriptions of courses offered during the year, and is available from the Graduate Adviser, Department of History, 6265 Bunche Hall, UCLA, Los Angeles, CA 90024.

Major Fields or Subdisciplines

The comprehensive examination covers one of the following fields: (1) ancient (includes ancient Near East); (2) medieval (includes Byzantine and medieval Jewish history); (3) Europe, 1550 to present (includes British history and the British Empire); (4) Africa; (5) Near East (includes Armenia); (6) India and Southeast Asia; (7) East Asia; (8) Latin America; (9) United States; (10) history of science; (11) special fields (students in the history of religions, Russian history, and modern Jewish history will normally be examined in one of the above fields, but with consent of the faculty in these fields may petition the graduate guidance and curriculum committee for an M.A. examination in their field of specialization).

Foreign Language Requirement

If you are contemplating graduate work in history, you should begin study of a foreign language as an undergraduate since reading knowledge of one foreign language approved by the department is required. For French, German, Russian, or Spanish, a score of 500 on the GSFLT is required. Students of United States, Near East, and African history may use departmentally administered translation examinations in French, Spanish, or German in place of the GSFLT. Students of European history must pass departmentally administered examinations in these three languages. For other languages, certification is required by the department teaching the language according to that department's standards.

Course Requirements

The department requires a minimum (and preferably a maximum) of nine upper division and graduate courses in history, at least six of which must be graduate courses. No course in the 300 series may be applied toward this requirement, and only one in the 500 series may be applied. For students in United States history, a minimum of seven of the nine courses must be at the 200 level, including at least one two-quarter seminar and History 245. Students in European history must include course 225, and Africanists must take course 275.

Comprehensive Examination Plan

The department follows the comprehensive examination plan. Individual fields specify fulfillment of the examination requirement by (1) a three-hour written examination designed to assess your ability to synthesize a broad field of knowledge or (2) the submission of three essays written for at least two different professors as part of your program of study. At least two of these papers must have been submitted for graduate courses in the 200 series. Students in the United States field must submit the paper from the two-quarter research seminar in United States history.

Field examiners administer the M.A. comprehensive examinations in November, March, and May of each academic year. The committee will recommend the following examination results: pass to continue, pass subject to reevaluation, terminal pass, fail. In cases where the M.A. is awarded pass subject to reevaluation, the field M.A. committee will reevaluate your progress after an additional three quarters of study. Only in exceptional cases are oral examinations required for the M.A. degree.

M.L.S./M.A.-History

This concurrent degree program of the Department of History and the Graduate School of Library and Information Science allows you to combine historical study with the tools of the information professional and to obtain two degrees — the M.L.S. and the M.A. in History. The best sequence of coursework should be discussed with the advisers from this department and the Graduate School of Library and Information Science.

Ph.D. Degree

Admission

Admission requirements for the Ph.D. program are the same as those for the M.A., but applicants for the doctorate are urged to seek an interview or to correspond with a member of the faculty in the field in which they intend to work. Students may be admitted with subject deficiencies, but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree.

While no examination is required for admission to a Ph.D. program, evaluation examinations are given to determine your continuance to the Ph.D. degree.

An annual *Guide to Graduate Study in History* which explains the requirements and procedures of the graduate program in detail is mailed to all new graduate students who have filed a Statement of Intent to Register (prior to registration). The guide lists faculty, their representative publications, and descriptions of courses offered during the year, and is available from the graduate adviser.

Major Fields or Subdisciplines

Ancient Greece; ancient Rome; medieval constitutional and legal; medieval social and economic; medieval ecclesiastical and religious; medieval intellectual and cultural (medieval history specialists may offer no more than two of these fields in medieval history); Byzantine; Russia since 862; Southeast Europe (Balkans); England, 1485-1763; England since 1763; the British Empire; the Near East, 500-1500; the Near East since 1500; ancient Near East; Armenian; survey of African history; topics in African history (preferably on a regional basis); history of science to 1600; history of science since 1600; Europe, Renaissance-Reformation; Europe, Renaissance to the French Revolution; Europe since 1740; European socioeconomic history; European intellectual and cultural history; psychohistory; China, 900-1800; China since 1800; modern Japan; South Asia; Southeast Asia; Latin America, 1492-1830; Latin America since 1759; history of religions; Jewish history; history of Christianity; comparative history; United States: (1) mastery of the general field of United States history sufficient to teach a college-level survey course and (2) a specialized field selected from the following: Afro-American, American diplomatic, American West, American Indian, California, history of the South, Civil War and Reconstruction, Colonial, cultural, economic, immigration, intellectual, Jeffersonian and Jacksonian American (1800-1850), labor, Mexican-American, social, the new nation (1763-1800), 20th century, urban, women's history. Both the general and a specialized field must be offered by specialists in United States history, and only two fields in United States history are permitted. Either field 1 or 2 or both may be selected as minor fields for the Ph.D.

Candidates offering a field in comparative history as a fourth field for the Ph.D. degree should select a topic for comparison which would usually coincide with time-area spans of the other three fields defined for the Ph.D. qualifying examinations.

Candidates in the history of science program must select three of the above fields and either the history of medicine or an allied field.

All candidates may offer for examination an approved allied field outside the Department of History.

Foreign Language Requirement

Foreign language requirements vary according to the major field, although reading knowledge of the prescribed language(s) (one for U.S. history students, at least two for all others) is required. For details, consult the *Program Requirements for UCLA Graduate Degrees, 1986-87: Department of History* or your graduate adviser.

Course Requirements

You must meet (1) the special requirements for admission listed above and (2) the general requirements set forth under the Graduate Division. A program, extending over the full time of study, must be approved by the department. You are required to complete at least one continuing two- or three-quarter seminar or, alternatively, a continuing sequence of at least two graduate courses approved by the graduate guidance and curriculum committee, which results in a substantial research paper based at least in part on primary sources. If this requirement is met entirely or in part by a sequence of directed study courses (History 596), you must take the course(s) for a letter grade. Students of United States history should complete course 245. Students of European history must complete course 225, and students of African history must complete course 275 unless exempted by special petition. Courses taken to fulfill M.A. degree requirements may also be used to satisfy Ph.D. requirements.

Teaching Experience

The department cannot provide teaching experience for all Ph.D. candidates and cannot therefore require it for the degree. You should, however, be able to demonstrate ability to give instruction in your field.

Qualifying Examinations

Full-time graduate students must schedule the written qualifying examination by the end of the ninth quarter of graduate work. The written examination includes the major field only, is normally prepared and administered by the chair of your doctoral committee, and is read by the entire committee before you take the oral qualifying examination. The members of the doctoral committee determine whether or not an examination may be repeated (normally only once).

The written examination must be passed and a dissertation prospectus (approved by the doctoral committee chair) must be written before taking the University Oral Qualifying Examination. In the oral examination you are examined in four fields, one of which may be an approved allied field. You should select fields in consultation with your faculty sponsor and must receive the department's approval of all four fields. If you fail the oral qualifying examination, you may repeat it once (normally within a period of six months) with the consent of the doctoral committee.

After passing the oral qualifying examination, you are advanced to candidacy and may begin work on the dissertation.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

If required by the qualifying examination committee, a final oral examination will be conducted after completion of the dissertation to cover the field within which the dissertation falls. After approving a dissertation, the chair of the doctoral committee may, with the unanimous consent of the entire committee, recommend a waiver of the final oral examination.

Lower Division Courses

1A-1B-1C. Introduction to Western Civilization. Lecture, two hours; discussion, two hours. A broad, historical study of major elements in Western heritage from the world of the Greeks to that of the 20th century, designed to further beginning students' general education, introduce them to ideas, attitudes, and institutions basic to Western civilization, and to acquaint them, through reading and critical discussion, with representative contemporary documents and writings of enduring interest.

1AH-1BH-1CH. Introduction to Western Civilization (Honors). Lecture, two hours; discussion, two hours. A broad, historical study of major elements in Western heritage from the world of the Greeks to that of the 20th century, designed to further beginning students' general education, introduce them to ideas, attitudes, and institutions basic to Western civilization, and to acquaint them, through reading and critical discussion, with representative contemporary documents and writings of enduring interest.
Mr. Berenson, Mr. Sabean

2. History of Technology from Antiquity to the 20th Century. Lecture, three hours. Designed for students in the natural sciences, social sciences, and fine arts. A survey of the development of man's ability to understand more fully and to utilize more efficiently the natural environment, stressing technology's changing social, economic, scientific, and cultural relationships. Mr. Burke

3A-3B-3C. Introduction to the History of Science. Lecture, three hours; discussion, two hours. History majors may not apply these courses on the science general education requirements:

3A. The Scientific Revolution. A survey of the beginnings of the physical sciences involving the transformation from Aristotelian to Newtonian cosmology, the mechanization of the natural world, the rise of experimental science, and the origin of scientific societies.
Mr. Westman, Mr. Wise

3B. The Physical Sciences since the Enlightenment. A broad survey of the development of ideas in classical and modern physical science since Newton. Theories of matter, but more specifically chemistry, thermodynamics, electromagnetic theory of light, energy conservation, relativity, and quantum mechanics.
Mr. Wise

3C. The Biological Sciences, 1800-1955. A survey of the development of the biological sciences from the period of Bichat and Müller to the discovery of the double helix. Mr. Frank

3D. Themes in the History of Medicine. Lecture, three hours. Prerequisite: sophomore standing. Limited to 30 students. Examination, through illustrated lectures and focused discussion of primary sources, of five important themes in the development of modern medicine: the nature of diagnosis, the emergence of surgery, epidemics, the conception and treatment of insanity, and the use of medical technology.
Mr. Frank

4. Introduction to the History of Religions. Lecture, three hours; discussion, one hour. A discussion of the various systems, ideas, and fashions of thought that have dominated Western approaches to the religions of the world since antiquity. Survey of the development from classical Greek and early Christian theories to modern history with its discoveries of the religions of India, China, the ancient Near East, etc., and the problem of the encounter of various religions in the 19th and 20th centuries. Mr. Bolle

5A-5B. Survey of British History. Lecture, three hours; discussion, one hour. Designed for students wanting a general orientation to British history and those in English literature and prelaw. A survey of the history of England and (after the union between England and Scotland) Great Britain. **5A.** The Middle Ages to the Glorious Revolution in 1688; **5B.** 1688 to the 20th Century. Mr. Urdank, Mr. Waugh

6A-6B-6C. History of the American Peoples. Lecture, two hours; discussion, two hours. A survey of the American peoples from the advent of aboriginal society to the present, emphasizing racial and ethnic interaction, industrialization, urbanization, and cultural change. Ms. Appleby, Mr. Nash, Mr. Saxton

6BH. History of the American Peoples (Honors). Lecture, two hours; discussion, two hours. A survey of the American peoples from the advent of aboriginal society to the present, emphasizing racial and ethnic interaction, industrialization, urbanization, and cultural change. Mr. Monkkonen

7A-7B. Survey of the Political History of the U.S. Lecture, two hours; discussion, two hours. This sequence (or two quarters of course 6) is strongly recommended for history majors planning to take more advanced courses in U.S. history. Designed for students in the social sciences and other departments who desire a thorough grounding in American political culture. A survey of the history of the U.S. from the Revolutionary era to the present. Emphasis on political developments and the social, cultural, and economic bases of American politics.
Ms. Appleby, Mr. Gatell, Mr. Howe, Mr. Saxton

8A. Latin America: Reform and Revolution. Lecture, three hours; discussion, one hour. A general introduction to Latin America emphasizing those institutions from the past which have shaped the present and the struggle for change in the 20th century. Movies and discussions complement the topical lectures. Mr. E.B. Burns and the Staff

8B. Latin American Social History. Lecture, three hours; discussion, one hour. Course 8A is not prerequisite to 8B. The historical and contemporary perspective of the role of ordinary people in Latin American society. Each lecture/film session centers on a major Latin American movie illustrative of a theme in social history. Mr. E.B. Burns and the Staff

8C. Central America: The Struggle for Change. Lecture, three hours; discussion, one hour. The economic growth and accompanying dependency of Central America from independence until the Great Depression and the turbulent consequences of that combination from 1930 to the present. Attention to the common characteristics of the five nations, as well as their individuality. Mr. E.B. Burns

9A-9D. Introduction to Asian Civilizations:

9A. History of India. Lecture, three hours; discussion, one hour. An introductory survey for beginning students of the major cultural, social, and political ideas, traditions, and institutions of Indic civilization.
Mr. Wolpert

9B. History of China. Lecture, three hours; discussion, one hour. Survey of the history of China: the evolution of characteristic Chinese institutions and modes of thought from antiquity to 1950; the problems of political change; China's response to the Western impact in modern times.

9C. History of Japan. Lecture, three hours; discussion, one hour. A survey of Japanese history from earliest recorded time to the present, with emphasis on the development of Japan as a cultural daughter of China. Attention to the manner in which Chinese culture was Japanized and the aspects of Japanese civilization which became unique. The creation of the modern state in the last century and the impact of Western civilization on Japanese culture.
Mr. Notehelfer

9D. History of the Near and Middle East. Lecture, three hours. An introduction to the history of the Muslim world from the advent of Islam to the present day.
Ms. Marsot

10A-10B. Introduction to the Civilizations of Africa. Lecture, three hours; discussion, one hour. Intended for students with a general interest in Africa, but also strongly recommended for those intending to take upper division courses in African history. Exploration of African cultures on a thematic basis within a wider framework of political change over time.

M70. Survey of Medieval Greek Culture. (Same as Classics M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including the discovery of America). Mr. Dyck

97H. Three Trials. (Formerly numbered 98H.) Discussion, three hours. Prerequisite: consent of instructor. Limited to 20 students. An intensive study of three trials, each of which led to the execution of the accused: Socrates, Jesus of Nazareth, and Joan of Arc. View of each trial as a conflict between legitimate but irreconcilable interests and world views. For each, the class constitutes itself as a court (prosecution, defense, jury) and reviews the verdict of the original trial.
Mr. Benson

99. Introduction to Historical Practice. Seminar, three hours. Limited to freshmen and sophomores. Discussion classes of not more than 15 students meeting with a faculty member. Exploration of how works of history are written, with emphasis on problems of historiography and method.

99H. Introduction to Historical Practice (Honors). Seminar, three hours. Limited to freshmen and sophomores. Discussion classes of not more than 15 students meeting with a faculty member. Exploration of how works of history are written, with emphasis on problems of historiography and method.
Mr. E.B. Burns, Mr. Posnansky

Upper Division Courses

Prerequisite for all upper division courses is upper division standing or consent of instructor, unless otherwise stated. Certain graduate courses (200 series) are open to students with upper division standing and consent of instructor.

100. History and Historians. Lecture, three hours. A study of historiography, including the intellectual processes by which history is written, the results of these processes, and the sources and development of history. Attention also to representative historians.
Mr. Reill

101. Introduction to Historical Practice. Seminar, three hours. Limited to juniors and seniors. Discussion classes of not more than 15 students meeting with a faculty member. Exploration of how works of history are written, with emphasis on problems of historiography and method.

101H. Introduction to Historical Practice (Honors). Seminar, three hours. Limited to juniors and seniors in the history honors program. Discussion classes of not more than 15 students meeting with a faculty member. Emphasis on problems in the philosophy of history, historiography, and historical method.

102. Explorations in Psychoanalysis and History. Lecture, three hours. Limited to 35 students. The art of psychological and historical interpretation; assessment of recent writings in the field of psychohistory.
Mr. Loewenberg, Mr. Wohl

M103. Historical Archaeology. (Same as Anthropology M115S.) A survey of the aims and methods of historical archaeology as practiced on both sides of the Atlantic, with case studies drawn from North America, the Caribbean, Africa, and Europe.
Mr. Posnansky

M104A-M104B. Ancient Egyptian Civilization. (Same as Ancient Near East M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. The political and cultural institutions of ancient Egypt and the ideas on which they were based. **M104A.** Chronological discussion of Prehistory, the Old and Middle Kingdom; **M104B.** The New Kingdom and the Late period until 332 B.C.
Mr. Callender (alternate years)

105. History of Ancient Mesopotamia and Syria. Lecture, three hours. The political and cultural development of the "Fertile Crescent," including Palestine, from the Neolithic to the Achaemenid period. Mr. Buccellati

106A-106B-106C. Survey of the Middle East from 500 to the Present. Lecture, three hours. Background and circumstances of the rise of Islam, the creation of the Islamic Empire, and its development. The rise of Dynastic Successor States and the Modern Nation States. Social, intellectual, political, and economic development:

106A. 500 to 1300. Mr. Morony

106B. 1300 to 1700. Ms. Marsot

106C. 1700 to the Present. Ms. Keddie

107A-107B. Islamic Civilization. Lecture, three hours:

107A. Premodern Islam. Origins of Islamic civilization, Muhammad and the Quran; development of Islamic doctrine, ritual, piety and law, sectarian Islam, and mysticism. Mr. Morony

107B. Islam in the Modern World. Reform movements, legal issues, sociopolitical trends, movements of opposition. Ms. Keddie, Ms. Marsot

108A-108B. History of the Arabs. Lecture, three hours. Course 108A is prerequisite to 108B. Political, social, intellectual, and economic history of the Arabs from the 18th century to the present. Ms. Marsot

109A-109B. History of North Africa from the Moslem Conquest. Lecture, three hours:

109A. To 1578. Mr. Morony

109B. From 1578 to the Present. Ms. Marsot

110A-110B. Iranian History. Lecture, three hours. Political, social, and cultural history of Persia:

110A. Islamic Iran to 1800. Mr. Banani

110B. Iran from 1800 to the Present. Ms. Keddie

111A-111B. History of the Turks. Lecture, three hours. A survey of the society, government, and political history of the Turks from earliest times to the present:

111A. Origins to 1808. Turkish origins, early Central Asian and Middle Eastern states. The rise and fall of the Ottoman Empire. Mr. Shaw

111B. 1808 to the Present. Modernization of the Ottoman Empire, 1808-1923. The Turkish Republic. The Turks in the world. Mr. Shaw

112A-112B-112C. Armenian History. Lecture, three hours:

112A. Armenia in Ancient and Medieval Times, 2nd Millenium B.C. to A.D. 11th Century. Mr. Hovannisian

112B. Armenia from the Cilician Kingdom through the Periods of Foreign Domination and National Stirrings, 11th to 19th Centuries. Mr. Hovannisian

112C. Armenia in Modern and Contemporary Times, 19th and 20th Centuries. The Armenian question and genocide, national republic, Soviet Armenia, and the dispersion. Mr. Hovannisian

C112D. Introduction to Armenian Oral History. Lecture/discussion, three hours. The uses and techniques of Armenian oral history; the preinterview, the interview, and postinterview procedures; methods of compilation and evaluation. Field assignments and interviews. May be concurrently scheduled with course C212. Mr. Hovannisian

113. The Caucasus under Russian and Soviet Rule. Lecture, three hours. A survey of the political, economic, social, and cultural history of the Caucasus region since 1801. The Georgian, Armenian, and Azerbaijani response to Russian and Soviet rule; the nationality question and the Soviet national republics. Mr. Hovannisian

115A-115B-115C. History of the Ancient Mediterranean World. Lecture, three hours:

115A. A survey of the history of the ancient East from earliest times to the foundation of the Persian Empire. Mr. Mellor

115B. The history and institutions of the Greeks from their arrival to the death of Alexander. Mr. Chambers, Mr. Mellor

115C. The history and institutions of Rome from the founding of the city to the death of Constantine. Mr. Chambers, Mr. Mellor

116A-116B. History of Ancient Greece. Lecture, three hours:

116A. The Rise of the Greek City-State. Emphasis on the archaic period and the early classical age through the Persian Wars. Mr. Chambers

116B. The Classical Period. The clash between Athens and Sparta, the consequent rise of Macedonia, and the aftermath of Alexander the Great. Mr. Chambers

117A-117B. History of Rome. Lecture, three hours:

117A. To the Death of Caesar. Emphasis on the development of imperialism and on the constitutional and social struggles of the late republic. Mr. Mellor

117B. From the Death of Caesar to the Time of Constantine. The early empire treated in more detail supplemented by a survey of the social and economic changes in the 3rd century. Mr. Mellor

118. Introduction to Roman Law. Lecture, three hours. Survey of the public (constitutional), criminal, and private law of the Romans. Topics include the social context of Roman law, the historical evolution of Roman law, mechanisms and procedures by which the law was administered, and the content of private law. Mr. Mellor

119. The Christian Church, 100-1517. Lecture, three hours. Constitutional, political, and economic history of the Church: Christianization of the Roman Empire and the Germanic kingdoms; governance and institutions of the Church; relations between Church and monarchy; the high tide of papalism; crises of authority on the eve of the Reformation. Mr. Benson

120. The Christian Religion, 100-1350. Lecture, three hours. The religious experience of Christians — conversion, doctrine, belief, heresy, spirituality, worship, liturgy, and art. The religious life of lay Christians, as well as that of the Church's institutional, intellectual, and spiritual leaders. Mr. Benson

121A-121B. Medieval Europe. Lecture, three hours. Recommended prerequisite: Western civilization. A basic introduction to Western Europe from Latin antiquity to the age of discovery, with emphasis on the medieval use of Greco-Roman antiquity, the history of the manuscript book, and the growth of literacy:

121A. 400 to 1000. Mr. Rouse

121B. 1000 to 1500. Mr. Rouse

121C. Medieval Civilization: The Mediterranean Heartlands. Lecture, three hours. A survey of Western Mediterranean Europe, social-economic-cultural within a political framework, including its relation with other cultures. Mr. R.I. Burns

121D. Medieval People: The 13th Century. Lecture, three hours. Movements and creative contributions to Western culture in this central century of the Middle Ages, as seen in its representative men and works. Mr. R.I. Burns

M122A-M122B. Byzantine Civilization:

M122A. (Same as Classics M170A.) Emphasis on Byzantine theology. Mr. Dyck

M122B. (Same as Classics M170B.) Literature, relations with Rome, and the Renaissance. Mr. Dyck

123A-123B. Byzantine History. Lecture, three hours. The political, socioeconomic, religious, and cultural continuity in the millennial history of Byzantium. The reforms of Diocletian. Byzantium's relations with Latin Europe, Slavs, Sassanids, Arabs, and Turks. Mr. Vryonis

125A-125F. History of Modern Europe. (Formerly numbered 125A-125E.) Lecture, three hours:

125A. The Renaissance: Power and Culture in the Italian City-States. Mr. Martines

125B. The Reformation: Church and Religion in Early 16th Century. Revolutionary tendencies in German society. The peasant uprising. Theology and political thought of Erasmus, Luther, Zwingli, Calvin, and the Anabaptists. The new churches. The effects of the Reformation on society. Mr. Clasen

125C. Absolutism and Enlightenment: Europe under the Old Regime. State, society, and culture in Europe from the mid-17th century until the eve of the French Revolution. Mr. Sabean

125D. Europe, 1789-1900. The French Revolution and Napoleon. The Industrial Revolution. The uprisings of 1848. The unification of Germany and Italy. Industrialization and imperialism. The rise of socialism. Population growth and changes in social structure. Mr. Reill, Mr. Silverman

125E. Europe in the 20th Century. International rivalries. The First World War and its impact on thought and society. Fascism and Communism. World War II. European recovery and integration. Mr. Loewenberg, Mr. Wohl

125F. Europe: 1945 to the Present. The legacy of World War II. Reconstruction and recovery in Western Europe. The East European revolution. The Jugoslav exception. Scandinavian socialism. The German problem. European integration and the Common Market. Gaullism. The events of 1968 and their aftermath. Eurocommunism and the resurgence of the Left in Western Europe. Poland and the limitations of change in the Soviet Bloc. Mr. Wohl

126A-126E. Cultural and Intellectual History of Modern Europe. Lecture, three hours. Climates of taste and climates of opinion. Educational, moral, and religious attitudes; the art, thought, and manners of the time in a historical context:

126A. 16th Century. Mr. Clasen, Mr. Westman

126B. 17th Century. Mr. Funkenstein

126C. 18th Century. Mr. Reill

126D. 19th Century. Mr. Loewenberg, Mr. Weber

126E. 20th Century. Mr. Loewenberg, Mr. Weber, Mr. Wohl

127A-127B. War and Diplomacy in Europe. Lecture, three hours:

127A. 1650 to 1815. Survey of military and diplomatic history, seen in relation to social and economic developments and the growth of the state. Mr. Symcox

127B. 1815 to 1945. The balance of power; the growth of the nation state; imperial and colonial rivalries; the two World Wars. Mr. Symcox

128A-128D. History of Modern France. Lecture, three hours:

128A. France, 1450-1620. Institutions of the French monarchy and territorial formation of France in the 15th century. French humanism. Catholic and Protestant Reformations in 16th-century France. French wars of religion.

128B. France, 1620-1770. Political and intellectual history of France, principally in the 17th century, with special emphasis on the role of Richelieu and Louis XIV.

128C. A Time of Revolutions, 1770-1871. Social and political history of three kingdoms, three republics, and two empires. Mr. Weber

128D. The Making of a Modern France, 1871 to the Present. From oligarchy to democratic bureaucracy in two wars and three republics. Mr. Weber

129A-129B-129C. History of Modern Germany and Austria. Lecture, three hours:

129A. 1500 to 1648. The political structure of empire and territories, the economy, social classes, daily life, book publishing and universities, the Reformation and Counter Reformation, the Thirty Years' War, military entrepreneurship, population losses, the Peace of Westfalia. Mr. Clasen

129B. 1648 to 1848. Survey of social, economic, cultural, and political history, including the rise of absolutist and bureaucratic government, Enlightenment and reform, the emergence of Austro-Prussian dualism, the transformation of the German economy, the impact of the French Revolution and the German reform movement, Restoration and Metternichian reaction, the rise of Romanticism, and the causes and failure of the Revolutions of 1848. Mr. Reill

129C. 1848 to Present. Revolutions of 1848, Prussian constitutional struggle, German unification, the Bismarckian and Wilhelmine eras in Germany and the Ausgleich in Austria, liberalism, industrialism, anti-Semitism, social democracy, the World Wars, revolutions, republics, Fascism and Nazism, occupation, and the Austrian, German Federal, and German Democratic Republics. Mr. Loewenberg

130A-130B-130C. Europe in the Age of Revolution, 1750-1850. Lecture, three hours:

130A. The End of the Old Regime. Economic development from ca. 1750. The agrarian revolution. The Enlightenment: social criticism and political economy. The intellectual origins of the French Revolution. The new sensibility: rococo, neoclassicism, proto-Romanticism. The first signs of discontent: Geneva, Corsica, Poland. The American war of independence and its effect on the European state-system; its intellectual effects. Mr. Symcox

130B. The Crisis of the Old Regime and the Revolution. The revolution in France, 1787-1799. Spread of revolution to other parts of Europe and varying responses. The impact of war on revolutionary France after 1792 and the spread of the revolution by military force. Jacobism in France and outside. Parallel movements abroad (e.g., Ireland, Haiti, Poland). Satellite regimes set up in Europe. Mr. Symcox

130C. Napoleonic Europe and the Restoration. Napoleon's ascendancy in France from 1799: internal effects. Restructuring of Europe under Napoleon and the nationalist reactions. Industrial and political change in Britain: Anglo-French world rivalry to 1815. The restoration: what could be restored and what could not. Rising national consciousness against Metternich's system. The continuing revolutionary tradition: 1821, 1830, 1848. Romanticism at its apogee. Conclusion: how the world of 1850 differed from that of 1750. Mr. Symcox

131A-131D. History of Russia. Lecture, three hours:

131A. From the Origins to the Rise of Muscovy. Kievan Russia and its culture, Appanage principalities and towns; the Mongol invasion; the unification of the Russian state by Muscovy, Autocracy and its Servitors; serfdom. Mr. Krekić

131B. Imperial Russia from Peter the Great to Nicholas II. Westernization of state and society; centralization at home and expansion abroad; the peasant problem; beginnings of industrialization; movements of political and social protest; the non-Russian peoples; political reforms and social changes; the Revolution of 1905; Russia in World War I; the fall of the old regime. Mr. Rogger

131C. Revolutionary Russia and the Soviet Union. The Revolutions of 1917, Civil War, consolidation of the Bolshevik Regime; succession crisis and ascendancy of Stalin, collectivization and industrialization; foreign policy and World War II; death of Stalin, de-Stalinization, developments since; stagnation or stability? Mr. Rogger

131D. Intellectual History. Social thought and movements in modern Russia, late 18th to early 20th century. Mr. Rogger

132A-132B. History of Italy. Lecture, three hours:

132A. 1530 to 1815. Survey of social, economic, political, and cultural history covering the eclipse of the Italian economy and the city-state, the rise of absolutist governments. Enlightenment reforms and the origins of the Risorgimento. Mr. Symcox

132B. 1861 to the Present. Political, economic, social, diplomatic, and ideological developments. Mr. Wohl

133A-133B. The Social History of Spain and Portugal. Lecture, three hours:

133A. The Age of Silver in Spain and Portugal, 1479-1789. The development of popular history in the Iberian Peninsula. Emphasis on peasants and urban history, gold routes, slave trade, history of women, and the development of different types of collective violence.

133B. Rebellion and Revolution in Modern Spain and Portugal, 1789 to the Present. Spain's position in Europe and its potentialities for social change discussed through investigations of urban history, agrarian social structure, history of women, problems of slow industrial development, imperialism, anarchism, and labor history.

134A. Southeastern Europe, 500-1500. Lecture, three hours. A political, economic, and cultural survey of the independent Balkan states in the Middle Ages. Mr. Krekić

134B. Southeastern Europe, 1500-1918. Lecture, three hours. The Balkans under Ottoman rule, movements of national liberation, and the formation of nation states. Mr. Krekić

135A-135B. Marxist Theory and History. Lecture, three hours. Course 135A is generally prerequisite to 135B. Introduction to Marxist philosophy and method; conception of historical stages; competing Marxist analyses of transition from feudalism to capitalist economy via reading *Capital;* theory of politics and state in relationship to historical interpretation of 19th-century European revolutions; capitalist crises. Mr. Brenner

136A-136Z. Topics in European History. Lecture, three hours. Integrated introduction to important aspects of European history, with emphasis on a specific topic within a broad framework:

136A. Social Movements.

136B. Peasants and Agrarian Society. Mr. Brenner

136C. Urban Society. Mr. Symcox

136F. The Family. The social history of the family in Western Europe since the Middle Ages. Household and family organization of peasants, artisans, and aristocrats; kinship, child-rearing, parental authority, marriage and inheritance systems; attitudes toward love, sex, and children.

136G. Psychohistory. Mr. Loewenberg, Mr. Wohl

136I. Special Topics.

136J-136K-136L. History of Women in Europe. Lecture, three hours. European women through the ages, prehistory to the present, with emphasis on the role of women in society, the family, religion, the workplace, and politics. **136J.** Ancient and Medieval; **136K.** 1348 to 1814; **136L.** 1814 to the Present. Ms. Norberg

137A-137B. Survey of English History. Lecture, three hours. A basic survey of English history from the Wars of the Roses to the present, dealing with changes in society, economics, and ideas from an agrarian, medieval monarchy to an industrial national and social democracy:

137A. 1450 to 1660.

137B. 1660 to the Present.

138A-138B. Medieval England. Lecture, three hours:

138A. Anglo-Saxon England and the Norman Conquest, 900-1215. The nature of the society that emerged from the Viking invasions; the conquest and colonization by the Normans; the principles of lordship by which they ruled, to the Magna Carta (1215). Mr. Rouse

138B. England in the High Middle Ages: Magna Carta to 1400. Emphasis on the social and economic developments that underlay constitutional change, peasant revolt, the Black Death, and the Hundred Years' War. Mr. Rouse

139. Renaissance England. Lecture, three hours. Culture and society. Emphasis on literary culture (Elizabethans, Jacobeans, Carolines), with readings and lectures on different aspects of political and economic life as required for a serious understanding of the culture. Mr. Martines

140A-140B. Early Modern England, 1450-1700. Lecture, three hours:

140A. The Development of Capitalism in England, Especially the Countryside, 1450-1700. The transformation of class relations; the emergence of political conflicts; state centralization and military aristocracy, Crown versus Parliament, the English Revolution. Mr. Brenner

140B. Analysis of the Transformation of Religious and Political Ideology in Relationship to Socioeconomic and Political Conflicts. Recommended prerequisite: course 140A. The English Reformation and the development of the State; Protestantism and political opposition; religious radicalism and the English Revolution. Mr. Brenner

141A-141B. Modern England. Lecture, three hours. Analysis of the English economy, society, and polity since 1688, focusing on the dynamics of both stability and change:

141A. 18th and 19th Centuries, 1688-1832. Mr. Urdank

141B. 19th and 20th Centuries, 1832 to World War II and its Aftermath. Mr. Urdank

142A-142B. The British Empire since 1783. Lecture, three hours. The political and economic development of the British Empire, including the evolution of colonial nationalism, the development of the commonwealth idea, and changes in British colonial policy. Mr. SarDesai

143. History of Canada. Lecture, three hours. A survey of the growth of Canada into a modern state from its beginnings under the French and British colonial empires.

144. History of Australasia. Lecture, three hours. The history of Australia and New Zealand from the European settlement, with emphasis on the interrelationships between the settlers and the aborigines; comparisons and contrasts between the Australian and New Zealand experience.

145A. Colonial America, 1600-1763. Lecture, three hours. An examination of the molding of an American society in English North America from 1600 to 1763. Emphasis on the interaction of three converging cultures: Western European, West African, and American Indian. Ms. Appleby, Ms. Bloch, Mr. Nash

145B. Revolutionary America, 1760-1800. Lecture, three hours. An inquiry into the origins and consequences of the American Revolution, the nature of the revolutionary process, the creation of a constitutional national government, and the development of a capitalist economy. Ms. Appleby, Ms. Bloch, Mr. Nash

146A-146B. The United States, 1800-1850. Lecture, three hours:

146A. Jeffersonian America. Jeffersonian Republican ascendancy and the Era of Good Feelings, 1800-1828; disintegration of the Federalist opposition; the testing of American nationality in the second war with Britain; beginnings of the transportation and industrial revolutions; restructuring of politics in an increasingly egalitarian age. Mr. Gatell, Mr. Howe

146B. Jacksonian America and Beyond. The "Jacksonian Revolution" and its aftermath, 1829-1850; the problem of national power versus state sovereignty; problems of rapid social change through industrialization and urbanization; reform impulse; antislavery movements; territorial expansion as focus for sectional rivalry. Mr. Gatell, Mr. Howe

147A. The United States: Civil War and Reconstruction. Lecture, three hours. Topics include the rise of sectionalism, the antislavery crusade; the formation of the Confederate States; the war years; political and social reconstruction. Ms. Creel

147B. The United States, 1875-1900. Lecture, three hours. American political, social, and institutional history in a period of great change. Emphasis on the altering concepts of the role of government and the responses to that alteration. Mr. Saxton

148A-148B. The United States: The 20th Century. Lecture, three hours. The political, economic, intellectual, and cultural aspects of American democracy in the 20th century. Mr. Coben, Mr. Weiss

148C. The United States since 1945. Lecture, three hours. A history of the political, social, and diplomatic developments that have shaped the United States since 1945. Mr. Dallek, Mr. Weiss

149A-149B. American Economic History. Lecture, three hours:

149A. 1790 to 1910. The roles of economic forces, institutions, individuals, and groups in promoting or impeding effective change in the American economy, 1790-1910. During this period the technical skeleton of the modern industrial structure was formed. Why and how the American economy evolved into a dual economy, characterized by a center of firms large in size and influence and a periphery of smaller firms. Ms. Yeager

149B. 1910 to the Present. The dynamics of change in the dual economy, focusing in greater detail on interrelationships between macro and micro developments in the economy and on the growing interdependency between the U.S. and the world economy, 1910 to the present. Ms. Yeager

150A-150B. Intellectual History of the United States. Lecture, three hours. The principal ideas about humanity and God, nature and society, which have been at work in American history. The sources of these ideas, their connections with one another, their relationship to American life, and their expression in great documents of American thought. Mr. Howe

150C. History of Religion in the United States. Lecture, three hours. Consideration of the religious dimension of people's experience in the United States. Examination of a number of religious traditions which have been important in this country, with emphasis on relating developments in religion to other aspects of American culture. Mr. Howe

151A-151B. Constitutional History of the United States. Lecture, three hours:

151A. The Origins and Development of Constitutionalism in the United States. Particular emphasis on the framing of the Federal Constitution in 1787 and its subsequent interpretation. Topics include judicial review, significance of the Marshall Court, and the effects of slavery and the Civil War on the Constitution. Mr. Gatell

151B. Constitutionalism since the Civil War. Particular emphasis on the development of the Supreme Court, the due process revolution, the Court and political questions, and the fact of judicial supremacy within self-prescribed limits.

152A-152B. American Diplomatic History. Lecture, three hours:

152A. The establishment of an independent foreign policy, the territorial expansion of the United States, and the emergence of a world power. Mr. Dallek

152B. The Role of the United States in the 20th-Century World. Mr. Dallek

153. The United States and the Philippines. Lecture, three hours. Recommended: knowledge of Southeast Asian or United States history, or both. An examination of the interrelationships of immigration and of colonialism and independence between the United States and the Philippines, focused mainly within the time period of 1898 to the present. Mr. Saxton

154A-154B. United States Urban History. Lecture, three hours:

154A. The Preindustrial and Early Industrial City. Emphasis on the social, spatial, and economic development of U.S. cities. Special attention to the social consequences of the preindustrial and early industrial economic relationships. Mr. Monkkonen

154B. The Industrial and Postindustrial City. Course 154A is not prerequisite to 154B. Emphasis on the mature urban network, with concentration on social, spatial, and economic interaction. The issues of mass society, neighborhood, crime, poverty, ethnicity, and racial discrimination. Mr. Monkkonen

154C-154D. History of American Architecture and Urban Planning, 1600 to the Present. Lecture, three hours. Aspects of American cultural history as explored through architecture, urban planning, and the allied arts, with emphasis on the development of an architectural consciousness in America, ways in which the built environment has affected its users and observers, and the extent to which it has reflected their values and ways of living. **154C.** 1600 to 1890; **154D.** 1890 to the Present. Mr. Hines

155A-155B. American and European Working Class Movements. Lecture, three hours. Major episodes in the institutional, economic, and cultural development of the American working class from Colonial times to the present, emphasizing both organized and unorganized labor in a comparative context. A.F. of L., rise of industrial unionism, and labor politics. Mr. Laslett

156A-156B. American Social History, 1750-1960. Lecture, three hours. A historical analysis of American society and culture, with emphasis on the family, religious values, Afro-American life, women's work, urbanization and industrialization, immigration and nativism, and movements for social reform. **156A.** 1750 to 1860; **156B.** 1860 to 1960. Mr. Coben

156C-156D-156E. Social History of American Women. Lecture, three hours. A survey of the major demographic, economic, social, and intellectual factors shaping the lives of women in families, at work, and in larger social collectivities. Emphasis on class, regional, racial, and ethnic comparisons:

156C. Colonial and Early National, 1600-1820. Ms. Sklar

156D. Victorian and Industrial, 1800-1920. Ms. Sklar

156E. 20th Century, 1900-1975. Ms. Sklar

157A-157B-157C. North American Indian History. Lecture, three hours. History of Native Americans from contact to the present, with emphasis on the ethnohistorical dimensions of culture change, Indian political processes, and the continuity of Native American cultures. Focus on selected Indian peoples in each period:

157A. Contact to 1760. Ms. Meyer

157B. 1760 to 1860. Ms. Meyer

157C. 1860 to the Present. Ms. Meyer

M158A. Comparative Slavery Systems. (Formerly numbered 158A.) (Same as Afro-American Studies M158A.) Lecture, three hours. An examination of the slavery experience in various New World slave societies, with emphasis on outlining the similarities and the differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

M158B-M158C. Introduction to Afro-American History. (Formerly numbered 158B-158C.) (Same as Afro-American Studies M158B-M158C.) Lecture, three hours. A survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: the transition from Africa to New World slavery, the transition from slavery to freedom, the transition from rural to urban milieus. Ms. Creel, Mr. Hill

158D. Afro-American Urban History. Lecture, three hours. An examination of Afro-American urban life prior to 1945, with emphasis on the transformation from slavery to freedom and the shift from Southern to Northern areas. The forces which both propelled Afro-Americans to the cities and which also inhibited their adjustment to them.

158E. Afro-American Nationalism in the First Half of the 20th Century. Lecture, three hours. A critical examination of the Afro-American search in the first half of the 20th century for national/group cohesion through collectively built institutions, associations, organized protest movements, and ideological self-definition. Mr. Hill

M159A. History of the Chicano Peoples. (Formerly numbered 159A.) (Same as Chicano Studies M159A.) Lecture, three hours. A survey lecture course on the historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides an integrated understanding of change over time in the Mexican community by inquiry into the major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination and resistance. Developments related to historical events of significance occurring both in the United States and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper. Mr. Gómez-Quiñones

M159B. History of the Chicano Peoples. (Formerly numbered 159B.) (Same as Chicano Studies M159B.) Lecture, three hours. A survey lecture course on the historical development of the Mexican (Chicano) community and people of Mexican descent in the United States through the 20th century, with special focus on labor and politics. Provides an integrated understanding of change over time in the Mexican community by inquiry into the major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the United States and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper. Mr. Gómez-Quiñones

160. The Immigrant in America. Lecture, three hours. A historical analysis of the social and economic causes and effects of immigration, particularly after the 1880s, emphasizing the problems of acculturation and adjustment. The restrictionists and the implications of immigration policy on U.S. foreign policy. Mr. Laslett

161. Asians in American History. Lecture, three hours. A study of the politically troubling question of entry into the United States of immigrants ineligible for citizenship and their citizen children in American history.

162. The American West. Lecture, three hours. A study of the West as frontier and as region, in transit from the Atlantic seaboard to the Pacific, from the 17th century to the present. Mr. Hundley

163. History of California. Lecture, three hours. The economic, social, intellectual, and political development of California from the earliest times to the present. Mr. Hundley

165A-165B. Colonial Latin America. Lecture, three hours. Studies in the general development of Latin America prior to 1825, with emphasis on social history. Mr. Lockhart

165C. Indians of Colonial Mexico. Lecture, three hours. A survey of the social and cultural history of the Indians of Mexico, especially central Mexico, from the time of the European conquest until Mexican independence, emphasizing an internal view of Indian groups and patterns on the basis of records produced by the Indians themselves. Mr. Lockhart

166. Latin America in the 19th Century. Lecture, three hours. An intensive analysis of the economic, social, and political problems of the Latin American nations from their independence to around 1910. Mr. E.B. Burns, Mr. Burr

167A-167D. Latin America in the 20th Century. (Formerly numbered 167A-167B-167C.) Lecture, three hours. Experiments in national development analyzed to relate the timing of social changes to economic, political, cultural, and geographic context. Successive country case studies each focus on world pressures and interplay of overlapping themes: the struggle between centralized and decentralized government agencies (emphasized in course 167A), the role of personalist leaders (emphasized in course 167B), definition of the national polity (emphasized in course 167C), and "rightist" and "leftist" models of development (emphasized in course 167D). Mexico is treated in course 171. Within each course, countries are studied according to the chronological contribution to the theme emphasized:

167A. Haiti, Uruguay, Costa Rica, Cuba, Chile. Mr. Wilkie

167B. Bolivia, Dominican Republic, Argentina, Paraguay, Venezuela. Mr. Wilkie

167C. Panama, Colombia, Ecuador, Honduras, El Salvador. Mr. Wilkie

167D. Brazil, Guatemala, Peru, Nicaragua. Mr. Wilkie

168. History of Latin American International Relations. Lecture, three hours. Emphasis on the developing interests of the Latin American nations in their relationship with one another and with other areas of the world, beginning with 19th-century independence. Mr. Burr

169. Latin American Elitelore. Lecture, three hours. Prerequisite: course 167A, 167B, 167C, or 171. Elitelore (defined as oral or noninstitutionalized knowledge involving the leaders' conceptual and perceptual life history views) in contrast to folklore (the followers' traditional or popular views). Elitelore genres include oral history, literature, and cinema. Mr. Wilkie

170A. Latin American Cultural History. (Formerly numbered 170.) Lecture, three hours. Intellectual, artistic, and folk expressions of the Latin American spirit and character examined in readings and lectures, with emphasis on the unique contribution of Latin Americans to develop self-interpretation. Music, films, and slides supplement discussions. Mr. E.B. Burns, Mr. Wilkie

170B. The Classic Travel Accounts of Latin America since 1735. Lecture, three hours. Recommended for prospective researchers before they select their region of study. Introduction to "enlightened traveler" accounts as they reveal cultural change from wide-ranging spatial and temporal vantage points. Comparison of published works to photographic series to analyze the great variety of geographic regions, peoples, customs, occupations, dress, food, architecture, and transportation in the 20 countries of the area. Mr. Wilkie

171. The Mexican Revolution since 1910. Lecture, three hours. Examination of the concept of "permanent crisis" to describe and explain the structure of "permanent revolution" under "one-party democracy." Analysis of unresolved colonial and 19th-century problems and crises that have influenced modern-day Mexico, if in modified form. Mr. Wilkie

173. Modern Brazil. Lecture, three hours. Selected topics in the political, economic, social, and cultural development of Brazil, with emphasis on modernization and the struggle for change, 1850 to the present. Discussions, films, slides, and guest speakers supplement and complement the lectures. Mr. E.B. Burns

174. Brazilian Intellectual History. Lecture, three hours. The general intellectual development of Brazil, with emphasis on those introspective movements in which the Brazilians attempted to interpret themselves, their nation, and their civilization. Mr. E.B. Burns

175A-175Z. Topics in African History. Lecture, three hours. Prerequisite: one prior course in African history at UCLA or consent of instructor. Examination of specific topics which have a continental application rather than proceeding on a strictly chronological or regional basis:

175A. Prehistoric Africa—Technological and Cultural Traditions. A survey of the nondocumentary sources of early African history, with particular reference to technological, economic, and cultural developments from the origins of Man until the colonial period. Mr. Posnansky

175B. Africa and the Slave Trade. The social, economic, political, and cultural impact of the slave trade on African society, with emphasis on the Atlantic trade without neglecting those of the ancient Mediterranean, Islamic, and Indian Ocean worlds. Abolition and the African diaspora. Mr. Alpers, Mr. Obichere

175C. Africa in the Age of Imperialism. Topics include the penetration of pre-capitalist social formations by capital, the emergence of classes, the nature of the colonial and postcolonial state, and the struggle for national liberation in a global context. Mr. Alpers, Mr. Obichere

176A-176B. History of West Africa. Lecture, three hours:

176A. West Africa from Earliest Times to 1800. Mr. Obichere, Mr. Posnansky

176B. West Africa since 1800. Mr. Obichere

176C. Social and Economic History of West Africa since 1600. Lecture, three hours. An analysis of the main currents of West African social, cultural, and economic history since the fall of the Songhai Empire, with emphasis on the family, religious values, education, urbanization, migrations, the arts, slavery, and the slave trade. The roles of economic forces and institutions in promoting or inhibiting economic change in West Africa; ethnic diversity and socio-political integration; colonial economic systems and the efforts at economic planning and development since the 1950s. Mr. Obichere

177. Ethiopia and the Horn of Africa. Lecture, three hours. Survey of the history of Ethiopia, Somalia, and Sudan. Mr. Alpers, Mr. Ehret

178A-178B. History of Eastern Africa. Lecture, three hours:

178A. The cultural diversity of Eastern African societies, the growth of more complex political systems, and the impact of international trade to the later 19th century. Mr. Alpers, Mr. Ehret, Mr. Posnansky

178B. The economic, social, and political history of Eastern Africa since the imposition of colonial rule, with emphasis on underdevelopment and protest. Mr. Alpers, Mr. Ehret, Mr. Posnansky

179A-179B. History of Southern Africa. Lecture, three hours:

179A. History of Southern Africa from the Origins to 1870. The origins of the South African peoples and their interactions to 1870. Attention to social and economic as well as political aspects. Mr. Ehret

179B. History of Southern Africa since 1870. The interactions between the inhabitants of Southern Africa since 1870. Attention to social and economic as well as political aspects.

182A-182B-182C. History of China. Lecture, three hours:

182A. Origins to 900. Bronze Age and Iron Age China; the classical thinkers; the birth of the imperial state and the development of an aristocratic society.

182B. 900 to 1500. Prerequisite: course 9B or 182A or equivalent readings. The end of aristocratic rule; the mature imperial state and bureaucratic government; the foreign presence; trade, agriculture, and the growth of cities.

182C. 1500 to 1800. The background to modern China; landholding and agriculture; nascent capitalism; peasant movements; neo-Confucianism and the Manchu state.

183. Modern China, 1840-1920. Lecture, three hours. From the Opium War to the May Fourth Movement, imperialism, semi-colonial China, and popular movements; some attention to contrasts between established and revolutionary interpretations. Mr. Huang

184. The Chinese Revolution. Lecture, three hours. From the founding of the Chinese Communist Party to the present. Special emphasis on the evolution of Mao's thought, the history of the Communist movement, the conditions in the Chinese countryside, the revolutionary developments under the People's Republic. Mr. Huang

186. Diplomatic History of the Far East. Lecture, three hours. The role of the Far Eastern states in the international community, beginning with the establishment of the Treaty System in China and the opening of Japan to intercourse with the rest of the world in 1854.

187A-187B-187C. Japanese History. Lecture, three hours. The political, economic, and cultural development of Japan from prehistory to the present:

187A. Ancient: Prehistory to 1600. Mr. Notehelfer

187B. Early Modern: 1600 to 1868. Mr. Notehelfer

187C. Modern: 1868 to the Present. Mr. Notehelfer

188A. Early History of India. Lecture, three hours. Introduction to the civilization and institutions of India. A survey of the history and culture of the South Asian subcontinent from the earliest times to the founding of the Mughal Empire. Mr. Wolpert

188B. Recent History of India and Pakistan. Lecture, three hours. History of the South Asian subcontinent from the founding of the Mughal Empire through the eras of European expansion, British rule, and the nationalist movement to the present. Mr. Wolpert

190A-190B. History of Southeast Asia. Lecture, three hours:

190A. Early History of Southeast Asia. A political and cultural history of the peoples of Southeast Asia from the earliest times to about 1815. Mr. SarDesai

190B. Southeast Asia since 1815. History of modern Southeast Asia, with emphasis on expansion of European influence in the political and economic spheres, growth of nationalism, and the process of decolonization. Mr. SarDesai

M191A-M191B. Survey of Jewish History. (Same as Jewish Studies M191A-M191B.) Lecture, three hours. A survey of social, political, and religious developments:

M191A. From Biblical Times to the End of the Middle Ages. Mr. Funkenstein

M191B. From the End of the Middle Ages to the Present. Mr. Funkenstein

M191C-M191D. Focal Themes in Jewish History. (Same as Jewish Studies M191C-M191D). Lecture, three hours. Treatment in depth of one major theme in Jewish history (such as the history of Messianic Movements, the structure of the Jewish communities) through the ages. Mr. Funkenstein

191E-191F. The Third Reich and the Jews. Lecture, three hours:

191E. The history of modern anti-Semitic ideologies and movements. The rise of national socialism in Germany. Development and execution of Nazi anti-Jewish policy to the outbreak of World War II.

191F. The Second World War. Implementation of Nazi plans for the extermination of Jews in Nazi-dominated Europe. Life in the Nazi-imposed ghettos. Forms of Jewish resistance. The fate of the Jewish populations in the occupied territories.

192A-192B. Jewish Intellectual History. Lecture, three hours. The development of Jewish self-understanding in relation to the intellectual climate of the environment as expressed in the halacha, in philosophy, and in cabbalism. **192A.** The Medieval Period; **192B.** The Modern Period. Mr. Funkenstein

193A. History of Religions: Myth. Lecture, three hours. The nature and function of myth in the history of religion and culture. Examples selected from nonliterate as well as from other Asian and European traditions. Mr. Bolle

193B. Religions of South and Southeast Asia. Lecture, three hours. Prerequisite: course 4 or 193A. Topics vary from year to year and include religion of the Veda; Brahmanism; (later) Hinduism. See *Schedule of Classes* for specifics. May be taken independently for credit. Mr. Bolle

193C. Religions of South and Southeast Asia. Lecture, three hours. Prerequisite: course 4 or 193A. Topics vary from year to year and include Buddhism in India; the religions of Java and Bali; the nonliterate traditions of India and Southeast Asia. See *Schedule of Classes* for specifics. May be taken independently for credit. Mr. Bolle

193D. Religions of the Ancient Near East. Lecture, three hours. The main polytheistic systems of the ancient Near East, with emphasis on Mesopotamia and Syria and with reference to the religion of ancient Israel: varying concepts of divinity, hierarchies of gods, prayer and cult, magics, wisdom, and moral conduct. Mr. Buccellati

193E. Special Topics in the History of Religions. Lecture, three hours. Topics are announced in the *Schedule of Classes* and include ancient Germanic cults; Renaissance mysticism; mystics of the low countries; goddesses; religion in a secular age. Mr. Bolle

194A. History of the Early Christians. (Formerly numbered 198X.) Lecture, three hours. The Christian movement from its origins to ca. 160 C.E., stressing its continuity/discontinuity with Judaism, the various responses to Jesus of Nazareth, the writings produced during this period, the movement's encounters with its religious, social, and political world, and methods of research. Mr. Bartchy

194B. The Religious Environment of the Early Christians. (Formerly numbered 198G.) Lecture, three hours. The rich variety in religious practice and thought in the Mediterranean world of the 1st century C.E. as in the context of the developing Christian movement. Topics include the Pharisees, Qumran, Philo, Stoics, Epicureans, traditional Greek and Roman religions, "mysteries," astrology, magic, gnosticism, and emperor-worship. Mr. Bartchy

195A-195D. History of Science. Lecture, three hours. Science and scientific thought in relationship to society:

195A. Medieval and Renaissance Science. Prerequisite: course 3A or consent of instructor. Continuity and discontinuity in scientific traditions from the 12th to the 17th century; interrelationships between theology, scientific thought, and social conditions. Theories of force, motion, and space; some attention to the occult sciences. Mr. Funkenstein, Mr. Westman

195B. Perspectives on the Early Modern Physical Sciences. Prerequisite: course 3A or consent of instructor. A detailed view of selected topics in the development of the physical sciences from 1600 to 1750, with focus on explanations of historical change in science. Normally, four topics are studied in order to cover a broad range of scientific, philosophical, and social issues.

195C. The Classical Physical Sciences: 18th and 19th Centuries. Prerequisite: course 3B or consent of instructor. The development of classical physical science from Newton's mechanics to Maxwell's electromagnetic theory, with special attention to demands of the Enlightenment, the Industrial Revolution, and 19th-century professionalized science. Mr. Wise

195D. Physical Sciences in the 20th Century. Prerequisite: course 3B or consent of instructor. A nonmathematical but nevertheless detailed look at selected physical sciences and scientific issues (e.g., the birth of quantum mechanics and relativity; stellar evolution and cosmological theories; nuclear physics, nuclear weapons, and nuclear policy; and the changing character of industrialized science). Mr. Wise

M195F-M195G. History of Biological Sciences. (Same as Anatomy/Medical History M108A-M108B.) Lecture, three hours. **M195F.** Biological Sciences from Ancient Times to the Early 19th Century. **M195G.** Biological Sciences from the Early 19th Century to the Mid-20th Century. Mr. Frank (F,W)

197. Undergraduate Seminars. Seminar, three hours. Limited to 15 students meeting with a faculty member. Organized on a topics basis with readings, discussions, papers. Signups and descriptions of offerings each quarter are available in the undergraduate counselor's office (6248 Bunche Hall). May be repeated once for credit. When concurrently scheduled with courses 201A-201U or 203, undergraduates must obtain instructor's consent to enroll.

199. Special Studies in History. An intensive directed research program. Eight units may be applied toward the major requirements.

199HA-199HB-199HC. Directed Studies for Honors. Limited to history honors majors. In Progress grading:

199HA. Seminar meetings to help students define their research topics and explore problems of historical research. Extensive reading and research in the field of the proposed honors thesis.

199HB. Continued reading and research culminating in a draft of the honors thesis.

199HC. Revisions of the draft and preparation of polished honors thesis; oral examination on thesis.

199I. Independent Study for Internships. Prerequisite: maintenance of a 3.0 grade-point average in the major. An independent study course to be supervised jointly by the Field Studies Office and the faculty adviser. Further supervision to be provided by the business for which the student is doing the internship. May not be used to satisfy the requirement for course 197 or 199. Normally, only four units of internship with the History Department are allowed. P/NP grading.

Graduate Courses

Admission to all graduate courses is subject to the instructor's consent and to appropriate language qualifications. For multiterm courses, credit and grades are given only on completion of the full seminar sequence, with In Progress grading until the last term unless otherwise noted. Topics courses and seminars may be repeated.

200A-200U. Advanced Historiography. Seminar, three hours. **200A.** Ancient Greece; **200B.** Ancient Rome; **200C.** Medieval; **200D.** Early Modern Europe; **200E.** Modern Europe; **200F.** Russia/Eastern Europe; **200G.** Britain; **200H.** United States; **200I.** Latin America; **200J.** Near East; **200K.** India; **200L.** China; **200M.** Japan; **200N.** Africa; **200O.** Science/Technology; **200P.** History of Religions; **200Q.** Theory of History; **200R.** Jewish History; **200S.** Armenia and the Caucasus; **200T.** Southeast Asia; **200U.** Psychohistory. May be repeated for credit.

M200V. Advanced Historiography: Afro-American. (Same as Afro-American Studies M200A.) Seminar, three hours. May be repeated for credit. Ms. Creel

M200W. Advanced Historiography: American Indian Peoples. (Same as American Indian Studies M200A.) Seminar, three hours.

200X. Advanced Historiography: Oral History. Seminar, three hours. An introduction to the practice, method, and theory of oral history.

201A-201U. Topics in History. Seminar, three hours. Topic titles are the same as for courses 200A-200U. A graduate course involving reading, lecturing, and discussion of selected topics. Does not fulfill the seminar requirements for the Ph.D. degree. May be repeated for credit. When concurrently scheduled with course 197, undergraduates must obtain instructor's consent to enroll.

202A-202B. Seminar in Comparative Modern Economic History. Discussion, three hours. Prerequisite: graduate standing. The study of problems of modern economics in the 19th and 20th centuries, including such topics as industrialization, growth, demography, development, and economic change. In Progress grading. Ms. Yeager

203. Topics in Comparative History. Seminar, three hours. Possible topics include study of European expansion and its impact on non-European societies, the American Revolution in an international perspective, etc.

204A-204B. Seminar in Near and Middle Eastern History. Seminar, three hours. Methodology, socioeconomic and political change in the Arab world. Ms. Marsot

205A-205B. Seminar in Medieval Middle Eastern History. Seminar, three hours. Mr. Morony

206A-206B. Seminar in the Social History of the Middle East. Seminar, three hours. The interrelationship of city, tribe, and village in the Middle East; the role of such definable social groups as women, religious classes, middle classes, landlords, tribesmen, and peasants; social change. Ms. Keddie

M207. Seminar in Ancient Mesopotamia. (Same as Ancient Near East M250.) Seminar, three hours. Selected topics on the political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit. Mr. Buccellati

209A-209B. Seminar in Ottoman and Modern Turkish History. Seminar, three hours. Mr. Shaw

211A-211B. Seminar in Armenian History. Seminar, three hours. Mr. Hovannisian

C212. Methods in Armenian Oral History. Seminar, three hours. Prerequisite: proficiency in the Armenian language. Lectures and laboratory in the methods of taking, processing, and utilizing depositions and other oral sources for Armenian history, including a project assignment in the field. May be concurrently scheduled with course C112D. Mr. Hovannisian

215A-215B. Seminar in Ancient History. Seminar, three hours. Mr. Chambers, Mr. Mellor

216A-216B. Seminar in Byzantine History. Seminar, three hours. Mr. Vryonis

217. Sources and Handbooks of Medieval History. Seminar, three hours. Prerequisite: reading knowledge of German or French. An introduction to types of medieval source materials and the handbooks needed to use them. Mr. Rouse

218. Medieval Latin Literary History. Seminar, three hours. Recommended prerequisite: reading knowledge of Latin and German or French. An examination of aspects of medieval history through the study of paleography, medieval libraries, and the transmission of ancient medieval authors. Mr. Rouse

219A. Paleography I. Seminar, three hours. Prerequisite: reading knowledge of Latin and German or French. A history of the manuscript book from antiquity through the Carolingian renaissance, with emphasis on dating and localization as well as on proficiency in reading. Mr. Rouse (alternate years)

219B. Paleography II. Seminar, three hours. Prerequisite: reading knowledge of Latin and German or French. A history of the manuscript book from the Carolingian renaissance through the invention of printing, with emphasis on dating and localization as well as on proficiency in reading. Mr. Rouse (alternate years)

220A-220B. Seminar in Church and Monarchy in the Middle Ages. Seminar, three hours. Textual studies and interpretative problems in the constitutional, legal, and intellectual history of the Latin church and of the Western European monarchies, with special attention to the German monarchy, from the 11th to the 14th century. Mr. Benson

221A-221B. Seminar in Medieval History. Seminar, three hours. Mr. R.I. Burns

222A-222B. Seminar in Medieval Intellectual History and History of Science. Seminar, three hours. Selected problems from medieval and early modern philosophy, science, political theory, theology.
Mr. Funkenstein

225. Colloquium for Entering Graduate Students in Modern European History. Seminar, three hours. Normally limited to and required of all modern European history graduate students. An introduction to the topics, methods, and historiography of modern European history.

226A-226B. Seminar in the Italian Renaissance. Seminar, three hours. Mr. Martines

227A-227B. Seminar in the Reformation. Seminar, three hours. Mr. Clasen

229A-229B. Seminar in Early Modern European History. Seminar, three hours.
Mr. Martines, Mr. Symcox

230A-230B. Seminar in Modern European History. Seminar, three hours.
Mr. Loewenberg and the Staff

231A-231B. Seminar in Modern European Intellectual and Cultural History. Seminar, three hours.
Mr. Loewenberg, Mr. Weber, Mr. Wohl

232A-232B. Seminar in French History of the 19th and 20th Centuries. Seminar, three hours.
Mr. Weber

233A-233B. Seminar in Russian History. Seminar, three hours. Mr. Rogger

234A-234B. Seminar in the Modern History of Spain, Portugal, and Italy. Seminar, three hours.
Mr. Wohl

239A-239B. Seminar in English History: Middle Ages. Seminar, three hours.

240A-240B. Seminar in English History: Modern History. Seminar, three hours.

244A-244B. Seminar in British Empire History. Seminar, three hours.

245. Colloquium in U.S. History. Seminar, three hours. Normally limited to and required of all entering graduate students in U.S. history. A critical introduction to the historical method, with emphasis on new methodological and conceptual approaches, the use of source materials, and the current state of U.S. historiography.

246A-246B-246C. Introduction to United States History. Seminar, three hours. A graduate survey of the significant literature dealing with United States history from the Colonial period to the present. Each course may be taken independently for credit:

246A. Colonial Period. Ms. Appleby, Mr. Nash

246B. 1790 to 1900.
Mr. Gatell, Mr. Howe, Mr. Saxton

246C. 20th Century.
Mr. Coben, Mr. Dallek, Mr. Weiss

247A-247B. Seminar in Early American History. Seminar, three hours. Ms. Appleby, Mr. Nash

249A-249B. Seminar in Jacksonian America. Seminar, three hours. Mr. Gatell

250A-250B. Seminar in United States History of the Middle 19th Century. Seminar, three hours.
Mr. Gatell, Mr. Howe

252A-252B. Seminar in Recent United States History to 1930. Seminar, three hours.
Mr. Coben, Mr. Hines

253A-253B. Seminar in Recent United States History since 1930. Seminar, three hours.
Mr. Hines, Mr. Weiss

254A-254B. Seminar in United States Social and/or Intellectual History. Seminar, three hours.
Mr. Howe, Mr. Saxton

255A-255B. Seminar in the History of Business and Government in the American Economy. Seminar, three hours. Ms. Yeager

256A-256B. Seminar in American Diplomatic History. Seminar, three hours. Mr. Dallek

257A-257B. Seminar in United States Urban History. Seminar, three hours.
Mr. Hines, Mr. Monkkonen

258A-258B. Seminar in Working Class History. Seminar, three hours. Mr. Laslett, Mr. Saxton

259A-259B. Seminar in Social History of Women in the U.S. Seminar, three hours. Ms. Sklar

260A-260B. Seminar in Native American History. Seminar, three hours.

261A-261B. Seminar in Afro-American History. Seminar, three hours. Social and political history of the Afro-American, including emphasis on the development and structure of race relations in America; racial concepts and dilemmas, black and white.
Ms. Creel, Mr. Hill

262A-262B. Seminar in Chicano History. Seminar, three hours. Mr. Gómez-Quiñones

263A-263B. Seminar in the History of the American West. Seminar, three hours. Mr. Hundley

M264. History of American Education. (Same as Education M201C.) Seminar, three hours. The intellectual and social forces impinging on American education from the 1860s to the present. Analysis of the relation between these forces and the values, curriculum, structural organization, and functions of education. Mr. S. Cohen

M265. Latin American Research Resources. (Same as Latin American Studies M200 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide the experience and competency required for future bibliographic and research sophistication as the basis for enhanced research results. Mr. Lauerhass

266A-266B. Seminar in Colonial Latin American History. Seminar, three hours. Mr. Lockhart

267A-267B. Seminar in Latin American History: 19th and 20th Centuries. Seminar, three hours.
Mr. Burr

M268A-M268B. Seminar in Recent Latin American History. (Formerly numbered 268A-268B.) (Same as Latin American Studies M268A-M268B.) Seminar, three hours. Reading knowledge of Spanish and Portuguese is normally required. A seminar devoted to selected topics of an interdisciplinary nature. In Progress grading. Mr. Wilkie

275. Introduction to the Professional Study of African History. Seminar, three hours. Required of all entering graduate students in African history. Strongly recommended for students with a history concentration in the African Area Studies M.A. program. Source identification, research methodologies, historiographical traditions, historical interpretation, and approaches to teaching.

276. African Archaeology: Field Techniques (2 to 8 units). Seminar, three hours. Prerequisite: any introductory course in archaeology and preferably an African history course. A field course on an African excavation to provide the basic skills-reconnaissance, surveying, excavation techniques, conservation, and scientific sampling required by an archaeologist in Africa, together with an introduction to ethnographic survey and oral data collection.
Mr. Posnansky

277. African Archaeology: Data Analysis (2 to 8 units). Seminar, three hours. Prerequisite or corequisite: course 276. A field course to equip students to handle finds from excavations. Analysis, description, illustration, and interpretation of an actual archaeological and/or ethnographic collection.
Mr. Posnansky

278A-278B. Seminar in African History. Seminar, three hours.

282A-282B-282C. Seminar in Chinese History. Seminar, three hours. Mr. Huang

285A-285B. Seminar in Modern Japanese History. Seminar, three hours. Mr. Notehelfer

288A-288B. Seminar in South Asia. Seminar, three hours. Mr. Wolpert

289A-289B. Seminar in Southeast Asia. Seminar, three hours. Mr. SarDesai

291A-291B. Seminar in Jewish History. Seminar, three hours. Studies in the intellectual and social history of the Jewish people from ancient times to the modern period. Mr. Funkenstein

293A-293B. Seminar in the History of Religions. Seminar, three hours. Mr. Bolle

295. Theories of Scientific Change. Seminar, three hours. Historical and philosophical perspectives on science, focusing on the rationality of scientific change and the logic and psychology of scientific discovery. Readings and seminar-style discussions of such authors as Popper, Kuhn, Toulmin, Lakatos, Holton, Buchdahl, Feyerabend, and others.
Mr. Westman

297A-297B. Seminar in the History of Science. Seminar, three hours. Mr. Westman, Mr. Wise

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students (2 units). Prerequisite: consent of instructor. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work, help students improve their own writing. May be repeated once. S/U grading.
Ms. Strenski

495. The Teaching of History. Prerequisite: graduate standing. Required of all new teaching assistants. Lectures, readings, discussions, and practice teaching sessions within the structure of a seminar. Students receive unit credit toward full-time equivalence but not toward the nine-course requirement for the M.A. degree. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Studies (1 to 8 units). Prerequisites: graduate standing, consent of instructor. Individual directed reading arranged with professor. M.A. candidates may take this course only once. Number of times Ph.D. candidates may take this course is subject to consent of the graduate studies committee. S/U or letter grading.

597. Directed Studies for Graduate Examinations (1 to 8 units). Preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. S/U grading.

599. Ph.D. Research and Writing (1 to 8 units). Prerequisite: advancement to Ph.D. candidacy.

History/Art History
(Interdepartmental)

An intercollege, interdepartmental major in history/art history is open to students in both the College of Letters and Science and the College of Fine Arts. You enroll in the college of your choice and fulfill the general education requirements of that college. For details on the undergraduate major, see Chapter 6 on the College of Fine Arts.

Honors Collegium

A311 Murphy Hall, (213) 825-1553

The Honors Collegium is an unusual educational alternative designed primarily for students in their freshman and sophomore years. Entering freshmen with at least a 580 SAT verbal score who have satisfied the Subject A/English B requirement and continuing students with a UCLA grade-point average of 3.0 who have satisfied the Subject A/English B requirement may enroll in specially devised Honors Collegium courses with an interdisciplinary emphasis. The Collegium offers small classes and individual attention. It encourages animated discussion among students, as well as between students and professors. And it seeks to provoke scholarly exchange across the major disciplines in the University. Core courses are offered regularly to provide a foundation in the physical and life sciences, humanities, and social sciences. A wide selection of special courses, varied each year, completes the curriculum.

Each Collegium course is staffed by a director who is distinguished in teaching and scholarship, by a variable number of visiting lecturers, and by additional specialists in their fields. Many Collegium courses satisfy general education requirements and serve as preparation for numerous majors in the College of Letters and Science. Counselors are available in the Division of Honors, A311 Murphy Hall, to advise and help you plan an integrated academic program.

In 1986-87 the Honors Collegium will offer the following one-quarter courses carrying from four to six units of credit each. Those courses marked "CORE" are part of the core curriculum; students are encouraged to take core courses in sequence.

Lower Division Courses

40. Origin and Evolution of the Solar System and the Earth. (CORE) Lecture/discussion, three hours. An investigation into the nature of space (astronomical) and time (geological) of the solar system, including comparative planetology; a study of the formation of the earth, its geological time scale, and the development of its atmosphere and hydrosphere. P/NP or letter grading. Mr. Ernst, Mr. Newman (F)

41. Origin and Evolution of Life and Humans. (CORE) Lecture/discussion, three hours. An investigation into the origin of living systems, the advent of an oxygen-rich atmosphere, the rise of life on land, the emergence of primitive hominids, and the appearance of modern human cultures at the dawn of cultural history. P/NP or letter grading.
Mr. Sackett, Mr. Schopf (W)

42. The Making of a Scientific Culture. (CORE) Lecture, three hours; discussion, one hour. An examination of the way in which science has shaped modern perceptual modes, institutions, and economic and political systems, including such material as Darwinian evolution, thermodynamics, genetics, and the problems of quantum physics. P/NP or letter grading.
Mr. Wise (F)

43. Mind, Brains, Humans, and Computers. Seminar, three hours; computer laboratory, three hours. Prerequisite: consent of instructor. Investigation into the mind/body problem and into current theories of what constitutes the mind, including a study of artificial intelligence and the essentials of programming in LISP (an artificial intelligence program). P/NP or letter grading. Mr. Taylor (F)

47. Brains: Structure, Function, and Evolution. Seminar, three hours. An examination of current perspectives on the structure, function, and evolution of brains to uncover the organization of the brain itself, and the ways in which the two structures correspond. A course in the philosophy of knowledge, not in neuroscience. Mr. Goldberg (Sp)

49. Computers, Science, and Computer Science. Seminar, three hours. A study of computers and the nature of automatic computation, both in theory and in current practice, including discussion of information, processing, artificial intelligence, social effects of computerization, and the capabilities and limitations of computer technology. Mr. Kay (Sp)

50. Greek Views of Humanity. (CORE) Lecture, three hours; discussion, one hour. Greek views of human experience as expressed in the literary forms invented or developed by the Greeks: epic, history, tragedy, comedy, and philosophy; study of the way in which Greek texts provide a foundation for subsequent Western literature and thought. P/NP or letter grading. Ms. Bergren (F)

51. Renaissance Views of Humanity. (CORE) Lecture, three hours; discussion, one hour. A study of the ideals and literary forms of the Renaissance and of the interplay between Christian theology and reborn classical aspirations. Investigation, through authors ranging from Erasmus to Shakespeare, of individualism, authority, and concepts of history and honor. P/NP or letter grading. Ms. King (W)

52. The Rise and Fall of the 19th-Century Novel. (CORE) Lecture, three hours; discussion, one hour. An explanation of the narrative strategies used by such authors as Austen, Stendhal, Balzac, Dickens, Turgenev, Flaubert, and Fontane, including a discussion of the historical and political circumstances, as well as the cultural and ideological assumptions, underlying 19th-century realism. Ms. Re (Sp)

54. Literature and Performance. Seminar, three hours. An exploration of the ways in which literature is affected by readings, by performance, and by oral tradition. Students research the nature either of a specific work (as affected by performance) or a presentation of a work (as in the one-man shows of Dickens and Twain). P/NP or letter grading.
Mr. Hutter (F)

56. Structure and Development of Language. Lecture, four hours; discussion, one hour. A study of the nature of human language, including its formal character (phonetics, syntax), differences and similarities between sign languages and spoken languages, language acquisition, the relationship between languages and other mental abilities, and the autonomous nature of language as a system of knowledge. P/NP or letter grading. Ms. Curtiss (W)

57. Religion and Human Experience: Suffering and Salvation (6 units). Lecture, four hours; discussion, one hour; oral skills seminar, two hours. An investigation into the philosophical, moral, and religious problems raised by the understanding of good and evil; an analysis of potential responses: pessimism, stoicism, rebellion, escapism, etc. Readings include such authors as St. Benedict, Dostoevsky, Euripedes, Hume, Kierkegaard, Rousseau, and Weil. P/NP or letter grading. Ms. Adams (Sp)

58. The Masculine and the Feminine: Politics and Love. Seminar, two and one-half hours. A study of the philosophical and literary imagination of the patriarchal Western tradition as it shapes and is shaped by concepts of masculinity and femininity. Emphasis on comedic texts that address the conflict between the state (masculinity represented in militarism and legal authority) and the feminine principle of a family or a love interest. Ms. Melzer (Sp)

61. Social Theory in the 20th Century (6 units). (CORE) Lecture, three hours; discussion, one hour; writing seminar, two hours. An examination of the strikingly subjective thrust of 20th-century social thought which has emphasized cultural and emotional structures rather than the material, objective world. Focus on psychoanalysis, structuralism, functionalism, existentialism, and phenomenology in readings from Durkheim to Jean-Paul Sartre. P/NP or letter grading. Mr. Alexander, Mr. Entrikin (W)

62. Community and Self-Interest in the History of American Culture. (CORE) Lecture, three hours; discussion, one hour. An exploration of the historical origins of the frequently contradictory values which inform American thought and culture: hierarchy and equality, institutional constraints and voluntarism, a collective sense of mission and a belief in the autonomous individual. Ms. Bloch (W)

63. Evolution of Modern Urban Society. Seminar, three hours. An analysis of the late 20th-century city through a study of the urban past, addressing topics ranging from population process to the nature of community, from crime to finance, from politics to pollution. Includes opportunity for computer analysis of a data base. P/NP or letter grading.
Mr. Monkonnen (Sp)

66. The Classics of Zen. Seminar, two and one-half hours. Introduction to characteristic thought forms and cultural expressions of the people of China, Korea, and Japan through the major classical texts (in translation) of the East Asian tradition of Zen. Discussion of the contemporary relevance of the classical texts. Mr. LaFleur (W)

67. The Trial of Galileo. Seminar, three hours. An appreciation of science as a historical process. The trial and condemnation of Galileo raise questions about the scientific issues at stake, the legal, political, and religious complexities impinging on the decision, the real or apparent conflict between science and religion, and the meaning of the Galileo affair today.
Mr. Westman (Sp)

68. History of Social Thought (6 units). (CORE) Lecture, three hours; discussion, one hour; writing seminar, two hours. A study of the significant forms of social theory and social change from the English Revolution to the beginning of the 20th century, including readings from Hobbes, Rousseau, Smith, Tocqueville, Marx, and Freud. P/NP or letter grading.
Mr. Prager (F)

70. Genetic Engineering in Medicine and Agriculture. Lecture/discussion. An overview of the principles of cell and molecular biology and of the technical details of genetic engineering; discussion of the benefits and detriments of the new biotechnology in relation to medicine, agriculture, and general social issues. Mr. Goldberg (F)

71. The Physics of Music. Seminar, three hours; laboratory/demonstration, two hours. An exploration of the relationship between musical sound as a physical phenomenon and the aesthetic perception of it as music. The physical principles of instruments, the role of room acoustics, and the theoretical basis of sound reproduction, including digital recording and signal processing. Mr. Greene (Sp)

80. The Literature of Diversity: Cultural Experience in America. Seminar, three hours. An examination of the richness and variety of American culture as revealed in literary works generally neglected in traditional surveys. Theories of ethnicity and nationalism, presented in such works as *Black Elk Speaks, Their Eyes Were Watching God,* Mexican Corridos on immigration, and *China Men.* P/NP or letter grading.
Mr. Paredes (F)

81. The City in History and Literature. Seminar. A study of literature, concentrating on the rise of the commercial city, moving to the industrial city and to the postindustrial or "global" city; a parallel study of scholarly hypotheses, research, revision, and critical methodology. Mr. Lehan (W)

83. Politics and the Rhetoric of Literature (6 units). (Formerly numbered 15.) Seminar, four hours; writing seminar, two hours. An examination of the relationship among politics, rhetoric, and literature. The study of literature from classical times to the present, broadening into a general discussion of the development of political discourse in Western thought, particularly the conflict between the self and the state, between ideology and the practical business of living. P/NP or letter grading.
Ms. Wilson (W)

84. Tools of Thought: The Creative Process Dissected. Seminar, three hours. Investigation of the thesis that, despite differences in the products of scientists, artists, and professionals, the creative process by which these people solve their problems is very similar. Readings include classic works in the sciences, humanities, and arts. Students apply course material to their particular field of study. P/NP or letter grading. Mr. Root-Bernstein (Sp)

90. The French Revolution: Ideologies and Images (6 units). Lecture, two and one-half hours; discussion, one hour; writing seminar, two hours. An examination of the history of the French Revolution as a series of world historical events and as a source of dominant ideologies and images that have influenced the culture of France, Western Europe, and North and South America. P/NP or letter grading.
Mr. Maniquis (Sp)

91. Intervention and Democracy. Lecture/discussion. A study of United States intervention — whether by means of overt threat such as force or economic sanctions, or by means of covert action — in the internal affairs of other countries: Vietnam, Zaire, Chile, Greece, Iran, and Cuba. Mr. Zeitlin (W)

92. Technological Hazards. Seminar, three hours. The scientific study of hazards and disasters resulting from failure or misapplication of technologies which threaten the social, physical, and biological support systems of the earth. Hazards range from asbestos in hair dryers to the threat of nuclear war.
Mr. Johnson (Sp)

93. Geopolitics and Strategy in the Modern Era, 1945-1985. Seminar, three hours. An investigation into the geopolitical interests of the United States, the U.S.S.R., and Western Europe, including an analysis of strategies (psychological, guerrilla, and classical warfare, terrorism, etc.) in the conflict between East and West and of strategies appropriate for a nuclear age. P/NP or letter grading. Mr. Chaliand (Sp)

Humanities

Professors

Arnold J. Band, Ph.D. *(Hebrew and Comparative Literature)*
A. R. Braunmuller, Ph.D. *(English)*
Philip Levine, Ph.D. *(Classics)*
Ross P. Shideler, Ph.D. *(Scandinavian and Comparative Literature), Chair*
Pier-Maria Pasinetti, Ph.D., *Emeritus (Italian and Comparative Literature)*

Associate Professors

Albert D. Hutter, Ph.D. *(English)*
Katherine C. King, Ph.D. *(Classics and Comparative Literature)*
Kathleen L. Komar, Ph.D. *(German and Comparative Literature)*

Assistant Professor

Lucia Re, Ph.D. *(Italian and Comparative Literature)*

Lower Division Courses

The following courses are made up of selected masterpieces of world literature. They are recommended to satisfy the humanities general education requirements in the College of Letters and Science.

1A. World Literature: Antiquity to Early Middle Ages. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2A. A study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as the *Iliad* or the *Odyssey*, Greek tragedies, portions of the Bible, Virgil, Petronius, St. Augustine, and others such as *Gilgamesh* or *Tristan and Yseult*.

1B. World Literature: Late Middle Ages to the 17th Century. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2B. A study of major texts in world literature, with emphasis on Western civilization. Texts include works and authors such as Chaucer's *Canterbury Tales*, Dante's *Divine Comedy*, Boccaccio's *Decameron*, Cervantes' *Don Quixote*, Shakespeare, Calderon, Moliere, and Racine.

1C. World Literature: Age of Enlightenment to the 20th Century. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2C. A study of major texts in world literature, with emphasis on Western civilization. Authors include Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, Joyce, Woolf, and Stevens.

2A. Survey of Literature: Antiquity to Early Middle Ages. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1A. Fulfills the College of Letters and Science English Composition requirement and the College of Fine Arts Critical Reading and Writing requirement. The study of selected texts from antiquity to the Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as the *Iliad*, Greek tragedies, the *Aeneid*, Petronious, St. Augustine, or *Tristan and Yseult*.

2B. Survey of Literature: Late Middle Ages to the 17th Century. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1B. Fulfills the College of Letters and Science English Composition requirement and the College of Fine Arts Critical Reading and Writing requirement. The study of selected texts from the Middle Ages to the 17th century, with emphasis on literary analysis and expository writing. Texts may include works and authors such as Chaucer, Dante's *Divine Comedy*, Cervantes' *Don Quixote*, Shakespeare, Calderon, Moliere, and Racine.

2C. Survey of Literature: Age of Enlightenment to the 20th Century. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1C. Fulfills the College of Letters and Science English Composition requirement and the College of Fine Arts Critical Reading and Writing requirement. The study of selected texts from the Age of Enlightenment to the 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, and James Joyce or Wallace Stevens.

Upper Division Courses

101. The Romantic Dilemma. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. The theme of Romantic individualism and rebellion, pursued through literary examples of Romantic hero types (and antitypes) from Rousseau and Goethe to Dostoevsky and Hesse.

102. Satire. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. The changing nature of satire as illustrated by examples of the genre from Horace and Juvenal to Ionesco and Nabokov.

104. The 20th-Century Continental Novel: Mann and Proust. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. An intensive study of *The Magic Mountain* and *The Remembrance of Things Past* as works of art and as expressions of the sense of social and cultural dissolution felt in early 20th-century Europe.
Mr. Pasinetti

C105. The Comic Spirit. Prerequisites: upper division standing, literature major. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate the varieties of comic expression. May be concurrently scheduled with Comparative Literature C205. Undergraduates read all works in translation.
Mr. Band

M106. Hebrew Literature in English — The Literary Traditions of Ancient Israel: Bible and Apocrypha. (Same as Jewish Studies M150A.) Lecture, three hours. A study of the literary culture of ancient Israel through an examination of the principal compositional strategies of the Hebrew Bible and the Apocrypha (read in translation). Mr. Band

C107. The Classical Tradition: Epic. Seminar, three hours. Prerequisites: upper division standing, literature major, consent of instructor. Analysis of the *Iliad*, the *Odyssey*, the *Aeneid*, the *Gerusalemme Liberata*, and *Paradise Lost* both in relation to their contemporary societies and to the literary traditions. Emphasis on how poets build on the work of their predecessors. May be concurrently scheduled with Comparative Literature C207. Ms. King

C109. The Crisis of Consciousness in Modern Literature. Prerequisites: upper division standing, literature major. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on the works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with Comparative Literature C209. Undergraduates read all works in translation. Ms. Komar

110. Man and His Fictions. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. The art of tale-telling and the nature of narrative. Examination of the wisdom or knowledge the tales possess, how the exchange of tales defines and sustains a community, and how a narrator clarifies form and meaning for the audience.
Ms. Komar

C111. The Classical Tradition: Tragedy. Seminar, three hours. Prerequisite: upper division standing or consent of instructor. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in the modern period. May be concurrently scheduled with Comparative Literature C211.
Ms. King

114. The Short Novel. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. A study of selected short novels as works of literary art and as relevant intellectual statements. Texts by Melville, Flaubert, Dostoevsky, Kafka, et al. Mr. Pasinetti

115. Four Modern Dramatists. A study of several works by four major modern dramatists, focusing on understanding specific elements in each work and the authors' possible interrelations. Pirandello, Beckett, and Pinter are read; the fourth author is selected from Ionesco, Giradoux, Cocteau. Mr. Braunmuller

116. Man and Society in the Renaissance. Lecture, three hours; discussion, one hour. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Explorations of a change in Western man's relationship to his world, himself, and his art; reading of such works as *Don Quixote,* the *Essays of Montaigne, Gargantua and Pantagruel, The Praise of Folly, Utopia.* Mr. Allen

C117. The Mystery Novel. Prerequisites: upper division standing and literature major, or consent of instructor. A study of mystery and detective fiction in England, France, and the United States. Development of the origin, form, and historical significance of mystery fiction through close readings of selected works. May be concurrently scheduled with Comparative Literature C297. Undergraduates read all works in translation. Mr. Hutter

C129. Archetypal Heroes in Literature. Lecture, three hours. Prerequisite: upper division standing. Survey and analysis of the function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. Concurrently scheduled with Comparative Literature C229. Undergraduates read all works in translation. Ms. King

138. Ancient and Medieval Oral Poetry. Prerequisites: upper division standing, literature major. A study of primary texts believed to be orally composed, their origins, characteristic forms, and function. Readings include such primary texts as the *Odyssey, Beowulf, The Song of Roland,* and selections of Norse poetry, as well as comparative material such as the *Aeneid,* the Norse sagas, and discussions of modern African and Yugoslavian oral poetry.

C139. Early Medieval Literature. Prerequisites: upper division standing, literature major. A survey of the Latin and Germanic literatures from the fall of Rome to the beginning of the 12th century. May be concurrently scheduled with Comparative Literature C239. Undergraduates read all works in translation.
Mr. Calder

C140. Medieval Epics. Prerequisites: upper division standing, literature major. Consideration of five medieval epics *(Beowulf, El Cid, Chanson de Roland, Nibelungenlied,* and *Njalssaga),* with two objectives: first, a critical understanding of each work, and second, an understanding of the nature of epic literature. Assignments consist of an extended seminar paper and short oral reports. May be concurrently scheduled with Comparative Literature C240. Undergraduates read all works in translation. Mr. Condren

C141. The Literary Mediation of History in the Renaissance. Seminar, three hours. Prerequisites: upper division standing, literature major. An analysis of the presence and the treatment of history in the rhetoric of Renaissance authors ranging from the Italian humanists to Machiavelli and Shakespeare. Other authors include Poliziano and Lorenzo de' Medici. May be concurrently scheduled with Comparative Literature C241. Undergraduates read all works in translation. Ms. Re

C145. Renaissance Drama. Prerequisites: upper division standing and literature major, or consent of instructor. A broad introduction to the subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with Comparative Literature C245. Undergraduates read all works in translation. Mr. Braunmuller

C165. The French Revolution and European Literature. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Part of the UCLA French Revolution Bicentennial Program. A course in cultural criticism using plays, poetry, popular tracts, etc., to explore the context and connections of the French Revolution to European culture. Authors range from Voltaire and Rousseau to Tom Paine, Coleridge, Wordsworth, Goethe, and Kant. Concurrently scheduled with Comparative Literature C265. Undergraduates read all works in translation; term paper required.
Mr. Maniquis

C168. Romantic Autobiography. Discussion, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. The evolution of the autobiography from spiritual (Augustine) and secular (Cellini) sources to the transition in the 18th century which blended features of the epic poem and the quest-romance. Wordsworth's *Prelude* came to represent the best example of this mixture. Major examples of the Romantic autobiography to be studied include Rousseau's *Confessions,* Wordsworth's *Prelude,* and Goethe's *Wilhelm Meister's Apprenticeship.* Later novels that develop and extend the genre include Joyce's *Portrait of the Artist as a Young Man* and Proust's *Swann's Way.* May be concurrently scheduled with Comparative Literature C268. Undergraduates read all works in translation.
Ms. Packer

C170. The Dream in English and German Romantic Literature. Lecture, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. A study of the use of the dream as a standard narrative technique in English and German Romantic literature. May be concurrently scheduled with Comparative Literature C270. Undergraduates read all works in translation. Mr. Burwick

C171. Dramatic Theory and Criticism in German and English Romanticism. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. The generic conception of drama in the critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on the role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with Comparative Literature C271. Undergraduates read all works in translation.
Mr. Burwick

C172. The Grotesque in Romantic Literature and Art. Prerequisites: upper division standing and literature major, or consent of instructor. A study of the grotesque in the visual and verbal arts of the Romantic period; the aesthetics of tragic-comic interaction, the demonic vision, and the satirical sketches of man's abnormality and perversity. May be concurrently scheduled with Comparative Literature C272. Undergraduates read all works in translation.
Mr. Burwick

C173. Theory and Texts of the Fantastic. Seminar, three hours. Prerequisites: upper division standing, literature major. An attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffman, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with Comparative Literature C273. Undergraduates read all works in translation. Ms. Re

C175. The 19th-Century Novel. Seminar, three hours. Prerequisites: upper division standing, literature major. A comparative study of the 19th-century novel in England and on the continent. Novels are selected so as to allow the seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with Comparative Literature C275. Undergraduates read all works in translation.
Mr. Lehan

C176. Fiction and History. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Analysis of the use of historical events, situations, and characters in literary works of the Renaissance and/or the modern period. Texts and individual assignments range from Renaissance historical narratives (the Italian humanists, Machiavelli) to 19th- and 20-century novels by authors such as Stendahl, Verga, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence the authors' choice and use of historical material. May be concurrently scheduled with Comparative Literature C276.
Mr. Pasinetti, Ms. Re

C178. Darwinism and Literature. (Formerly numbered 178.) Seminar, three hours. Prerequisite: upper division standing or consent of instructor. The impact of Darwin's theories on European and American literature. While texts include major works in the development of naturalism, such as novels by Zola, Hardy, Crane, or Dreiser and plays by Strindberg and Ibsen, the course moves forward into the continuing influence of other "determinist" and behaviorally oriented theories in works by authors such as Mann, Sartre, Camus, Stevens, and Skinner. May be concurrently scheduled with Comparative Literature C278.
Mr. Shideler

C180. The Symbolist Tradition in Poetry. Prerequisites: upper division standing and literature major, or consent of instructor. A study of the symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with Comparative Literature C280. Undergraduates read all works in translation. Mr. Shideler

C181. Poetry and Poetics of the Post-Symbolist Period. Prerequisites: upper division standing and literature major, or consent of instructor. A study of some of the dominant poetic trends and figures in American and European poetry in the first half of the 20th century, including such surrealists as Pound, Eliot, Valery, Rilke, George, and Stevens. May be concurrently scheduled with Comparative Literature C281. Undergraduates read all works in translation.
Ms. Komar, Mr. Shideler

182. The Semiotics of Story and Film: An Introduction to Narrative Semiotics. Discussion, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. An investigation of the theoretical aspects of semiotics and their application to specific narratives in prose and film.
Mr. Haidu

C183. Novel, Crime, Ritual. Discussion, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. An investigation of a range of novels dealing with ritual and crime and their relation to the novel form. Readings include such texts as de Ayala's *Belarmino and Apolonio,* Singer's *The Magician of Lublin,* selected stories from Babel's *Red Cavalry,* a Dickens' novel, and Laclos' *Liasions Dangereuses.* Concurrently scheduled with Comparative Literature C283. Undergraduates read all works in translation. Mr. Baumgarten

C184. The Alternative Tradition: In Search of a Female Voice in Contemporary Literature. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with Comparative Literature C284. Undergraduates read all works in translation. Ms. King, Ms. Komar

C185. The Modern Continental Novel. Lecture, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass are used to focus on the development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with Comparative Literature C285. Undergraduates read all works in translation. Mr. Lehan

Indo-European Studies (Interdepartmental)

1037 Graduate School of Management, (213) 825-4242

Alan H. Timberlake, Ph.D. *(Slavic Languages and Literatures)*
Terence H. Wilbur, Ph.D. *(Germanic Languages)*

Associate Professor

Joseph F. Nagy, Ph.D. *(Celtic Languages and Literatures)*

Scope and Objectives

The prime aim of this graduate program is the integral study of Indo-European culture, based on comparative linguistics, archaeology, social structure, and religion. The Ph.D. in Indo-European Studies is offered with three alternative major emphases: Indo-European linguistics, Indo-Iranian or other specialized language area studies, and European and related archaeology.

Ph.D. Degree

Admission

Students admitted to graduate standing must have a B.A. degree with a major in an Indo-European language field (e.g., German, Slavic, Celtic, Romance languages, Latin, Greek), linguistics (with concentration in historical and comparative linguistics), anthropology, or archaeology. Letters of recommendation (at least two, preferably three or four) are required; Graduate Record Examination (GRE) scores are not required. Potential applicants may request a brochure by writing to the Indo-European Studies Program, c/o Folklore and Mythology Center, 1037 GSM, UCLA, Los Angeles, CA 90024.

Admission to the program itself constitutes admission to the doctoral program; there is no master's degree offered. Should deficiencies exist in prerequisites to specific work at the graduate level, you may be granted provisional admission and directed to remove those deficiencies in the initial period of enrollment.

Major Fields or Subdisciplines

The Ph.D. in Indo-European Studies is offered with three alternative major emphases: (1) Indo-European linguistics; (2) Indo-Iranian or other specialized language area studies; (3) European and related archaeology.

Foreign Language Requirement

French and German are required, one during the first year. A third language is added only when relevant to your field of specialization. Proficiency in a language may be demonstrated by (1) passing the Educational Testing Service (ETS) examination with a score of 600 or better, (2) completing a level five course with a grade of B or better, or (3) passing a departmental reading examination.

Course Requirements

The course requirements vary among the three major fields of specialization. General requirements for all students regardless of specialization include knowledge of Vedic Sanskrit and Homeric Greek, basic competence in Indo-European linguistics (including Indo-European Studies M150 and 210), mythology (e.g., Classics 168), archaeology (including Indo-European Studies 131, 132). Additional requirements by field are as follows:

(1) *Linguistics:* An advanced seminar in comparative grammar, a minimum of four ancient Indo-European languages from different subbranches, and additional units in courses offered by Linguistics (e.g., phonetics, structural linguistics) and related departments. These additional units should be selected in consultation with your adviser.

(2) *Indo-Iranian or Other Specialized Language Area:* An advanced seminar in comparative grammar, a minimum of two ancient Indo-European languages from different subbranches, and additional units in the area of specialization, to be selected in consultation with your adviser.

(3) *European and Related Archaeology:* A minimum of one ancient Indo-European language, an advanced seminar in European archaeology, a course in analytical methods in archaeology, and additional units in archaeology, anthropology, and related fields, to be selected in consultation with your adviser.

Teaching Experience

Teaching experience is highly desired, but not available within the program and therefore is not required. The program works closely with its constituent departments in an attempt to provide some teaching experience.

Qualifying Examinations

When you have completed the required coursework, a series of written examinations covering the major and minor fields are administered. These consist of translation and analysis of set texts from the ancient Indo-European languages and diagnostic examinations in the other fields. Following successful completion of the written examinations, the University Oral Qualifying Examination, based on the written examinations and the dissertation prospectus, is administered by the doctoral committee. It is intended to probe your grasp of the entire field. Should you fail either the written or oral examinations, the interdepartmental degree committee may allow reexamination. After successful completion of the written and oral examinations, you are advanced to doctoral candidacy and begin work on the dissertation.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination is designed to allow the committee to evaluate the dissertation within the discipline and within your own specialization. Although it is stated as a requirement, individual circumstances have on occasion dictated waiver of the final oral examination.

Upper Division Courses

131. European Archaeology: Proto-Civilizations of Europe. A survey of European cultures from the beginning of the food-producing economy in the 7th Millennium B.C. to the beginning of the Bronze Age in the 3rd Millennium B.C. Mrs. Gimbutas

132. European Archaeology: The Bronze Age. Prerequisite: course 131 or consent of instructor. A survey of European cultures from around 3000 B.C. to the period of the destruction of the Mycenaean culture about 1200 B.C. The Aegean area and the rest of Europe. Mrs. Gimbutas

M150. Introduction to Indo-European Linguistics. (Same as Linguistics M150.) Prerequisites: one year of college-level study (course 3 or better, eight units minimum) of either Greek or Latin and either German or Russian. A survey of the Indo-European languages from ancient to modern times; their relationships and chief characteristics. Mr. Anttila (Sp)

199. Special Studies (2 to 8 units).

Graduate Courses

210. Indo-European Linguistics: Advanced Course. Prerequisite: course M150 or equivalent. Comparative study of phonology, morphology, syntax, and lexicon. Problems in analysis and reconstruction. Mr. Anttila (F)

250A-250B. European Archaeology. (Formerly numbered M250A-M250B.) Prerequisite: consent of instructor. Studies in ancient European archaeological materials and their relationship to the Near East, Western Siberia, and Central Asia. May be repeated for credit. In Progress grading. Mrs. Gimbutas

280A-280B. Seminar in Indo-European Linguistics. Prerequisite: course 210. Selected topics in Indo-European comparative grammar for advanced graduate students. In Progress grading.

596. Directed Individual Studies (2 to 8 units).

597. Preparation for Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

International Relations

4256 Bunche Hall, (213) 825-3862

Scope and Objectives

The Special Undergraduate Program in International Relations can only be taken jointly with a major in political science, and all requirements for the political science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in political science and specialization in international relations. The program is designed to serve the needs of (1) students desiring a general education focused on international affairs and (2) students preparing for graduate work in international affairs, whether in a social science or area study.

The program is also beneficial for (1) students planning careers (in business, law, journalism, or library service) with an international emphasis and (2) those preparing to teach social science in the secondary schools. These students should structure their programs primarily to meet the preparation requirements of the professional school or teaching credential of their choice.

Courses in management and administration, and in oral and written communications, ordinarily increase the career options of students in this program.

Special Undergraduate Program

Preparation for the Program

Required: Political Science 20, 50, and two courses from 10, 40, 70, 80; History 1A-1B-1C or any three courses from 5A, 5B, 8A, 8B, 8C, 9A, 9B, 9C, 9D, 10A, 10B; Economics 1 and 2, or 100; Sociology 1; Anthropology 5 or 22; Geography 3 or 5.

Upper Division

The political science major should be completed as follows: any four upper division political science courses in each of Fields II and IV and two additional courses both in Field I, Field III, Field V, or Field VI.

Other required social science courses include one course from Geography 140, 181, 182A, 182B, 183, 184, 185, 186, 187, 188, 189, 190; one course from Anthropology 171, 173P, 173Q, 174P, 174Q, 175P, 175Q, 175R, 175S, 176, 177; two courses from Economics 110, 111, 112, 180, 181A, 181B, 182, 190, 191, 192; two courses from History 116A, 116B, 117A, 127A, 127B, 142A, 142B, 148C, 152A, 152B, 168, 186.

Completion of the sixth quarter course (or equivalent as prescribed by the language department), with a grade of C or better, of any modern foreign language is also required. French 6, German 6, Spanish 25, and Russian 6 are most frequently offered in fulfillment of this requirement, but also refer to the offerings listed under Portuguese, Italian, Germanic Languages, Near Eastern Languages and Cultures, African Languages, and East Asian Languages and Cultures. Arabic, Chinese, French, German, Japanese, Russian, and Spanish are the languages of widest career utility in international affairs.

All courses must be taken for a letter grade.

Area Focus

Students are advised but not required to concentrate their political science, geography, history, and language courses so as to achieve broad familiarity with one area, such as Latin America, Africa, the Atlantic area, the Soviet sphere, East Asia, Southeast Asia, South Asia, or the Middle East.

For further information, contact Vicki Waldman, Political Science Counselor, in the program office.

Nazif M. Shahrani, Ph.D. *(Anthropology)*

Scope and Objectives

The undergraduate major in this discipline is called "Near Eastern Studies." For details, see the program by that name later in this chapter.

The interdepartmental program for the Master of Arts and Ph.D. degrees in Islamic Studies is designed primarily for students desiring to prepare for an academic career. It may, however, be found useful for students seeking a general education and desiring a special emphasis in this particular area or for those who plan to live and work in this area, whose career will be aided by a knowledge of the people, languages, and institutions. (Such a career might be centered on teaching, research, business, engineering, journalism, librarianship, or government service.) Subject to the limitations of the program, the special course of studies is formulated for candidates according to their experience and requirements.

Master of Arts Degree

Admission

In addition to the general University requirements, a Bachelor of Arts degree in Near Eastern Studies or equivalent is required. The interdepartmental degree committee passes on your application for admission to the program. You are normally expected to have completed the equivalent of Arabic 102A-102B-102C and Iranian 102A-102B-102C or Turkic Languages 102B-102C. In addition, you should have completed the equivalent of two years of Near Eastern history (classical and modern). Some coursework in Islamic culture and institutions may be applied toward the history requirement. Deficiencies in any of these prerequisites will have to be removed by taking the appropriate courses without credit toward the advanced degree. No special application form is required.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applicants. No screening examination is required.

A departmental brochure may be obtained by writing to the G.E. von Grunebaum Center for Near Eastern Studies, 10286 Bunche Hall, UCLA, Los Angeles, CA 90024.

Major Fields or Subdisciplines

Arabic, Persian, Turkish, history of the Near East, political science, anthropology, sociology, Islamic art, Near Eastern music.

Foreign Language Requirement

You are required to show proficiency in either French or German. You are expected to pass the Educational Testing Service (ETS) graduate foreign language reading examination in French or German by the end of your third quarter in residence.

Course Requirements

A minimum of nine courses is required, five of which must be graduate. You must take no fewer than four courses on the appropriate level in the two Near Eastern languages of your choice, and no fewer than five courses selected from the relevant upper division and graduate courses in history, political science, or any of the other fields represented in the program. The selection must be limited to two of these disciplines. The omission of history may be approved only in exceptional cases. Eight units of 500-series courses may be applied toward the total course requirement, as well as toward the minimum graduate course requirement, provided they are not in the same discipline.

Comprehensive Examination Plan

The thesis plan is not available in this program. You must pass written examinations in two Near Eastern languages and literatures, the history of the Near East, and one other social science. The examinations are constructed by the instructor responsible for each discipline. Reexamination in exceptional cases is determined by the interdepartmental degree committee. The examiner or examiners are appointed by the chair of the interdepartmental degree committee.

Ph.D. Degree

Admission

Students intending to work for the Ph.D. in Islamic Studies are normally expected first to fulfill all requirements for the M.A. degree. Those who enter the program with an M.A. from another university should have attained a level of preparation in languages, history, and social sciences equivalent to that required for the M.A. at UCLA. Those who have not done so should make up any deficiencies by taking the appropriate courses without credit toward the degree. No special application form is required, but applications must be accompanied by three letters of recommendation.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applicants.

A departmental brochure may be obtained by writing to the G.E. von Grunebaum Center for Near Eastern Studies, 10286 Bunche Hall, UCLA, Los Angeles, CA 90024.

Major Fields or Subdisciplines

Arabic, Persian, Turkish, history, anthropology, sociology, political science, Islamic art, Near Eastern music.

Foreign Language Requirement

At the beginning of your first quarter in residence, you must present to the chair of the interdepartmental degree committee a written statement explaining your preparation in one of the two modern languages required by the University (generally French and German). You are expected to pass the graduate foreign language reading examination in both languages by the end of your second year in residence. For work in some fields, a reading knowledge of Italian, Spanish, or Russian may be substituted for one of the above European languages after satisfactory advisement. The Educational Testing Service (ETS) examination is acceptable.

Course Requirements

If you are entering directly into the Ph.D. program, course requirements are the same as in the M.A. program. Beyond this, you continue advanced courses in your two Near Eastern languages, in Near Eastern history, and in one of the social sciences, on specific advisement of the interdepartmental degree committee.

Qualifying Examinations

Written qualifying examinations in four fields are required: two Near Eastern languages and literatures as approved by the advisory committee, the whole range of Near Eastern history, and one other social science field (anthropology, political science, sociology). After successfully completing the written examinations, you must pass the University Oral Qualifying Examination in order to be advanced to doctor-

al candidacy. Reexamination in any field is at the discretion of the doctoral committee in consultation with the chair of the program.

Research proposals, dossiers, research papers, propositions, etc., are not permitted as alternatives to the written qualifying examinations.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

With the approval of the doctoral committee at the time of the oral qualifying examination, the final oral examination may be waived.

Islamic Studies Course List

Anthropology 130. The Study of Culture
133P. Social and Psychological Aspects of Myth and Ritual
150. Comparative Society
156. Comparative Religion
161. Development Anthropology
M163. Women in Culture and Society
167. Urban Anthropology
176. Cultures of the Middle East
215. Field Training in Archaeology
230P. Ethnology
230Q. Cultural Anthropology
M232P. Cultural Modes of Thought
232Q. Myth and Ritual
239P. Selected Topics in Field Training in Ethnography
239Q. Analysis of Field Data
273. Cultures of the Middle East

Arabic (Near Eastern Languages) 102A-102B-102C. Intermediate Literary Arabic
111A-111B-111C. Elementary Spoken Egyptian Arabic
112A-112B-112C. Advanced Spoken Egyptian Arabic
114A-114B-114C. Spoken Moroccan Arabic
120. Islamic Texts
130. Classical Arabic Texts
132. Philosophical and Kalam Texts
140. Modern Arabic Texts
141. Modern Arabic Literature
150A-150B. Survey of Arabic Literature in English
199. Special Studies in Arabic
220. Seminar in Islamic Texts
230. Medieval Literary Texts
240. Seminar in Arab Historians and Geographers
250. Seminar in Arabic Literature
596. Directed Individual Study
597. Examination Preparation
599. Ph.D. Dissertation Research and Preparation

Archaeology 259. Fieldwork in Archaeology
596. Individual Studies for Graduate Students
597. Preparation for Ph.D. Qualifying Examinations

Armenian (Near Eastern Languages) 130A-130B. Elementary Classical Armenian
131A-131B. Intermediate Classical Armenian
132A-132B. Advanced Classical Armenian
210. History of the Armenian Language
220. Armenian Literature of the Golden Age (A.D. 5th Century)

Art History (Art, Design, and Art History) 104A. Western Islamic Art
104B. Eastern Islamic Art
C104C. Problems in Islamic Art
105E. Byzantine Art
213. Problems in Islamic Art
C214. Problems in Islamic Art

Berber (Near Eastern Languages) 101A-101B-101C. Elementary Berber
102A-102B-102C. Advanced Berber
130. The Berbers
199. Special Studies in Berber Languages

Classics M170A, M170B. Byzantine Civilization

French 121A. Franco-African Literature
221A. Introduction to the Study of the French-African Literatures
221C. French-African Literature of Berbero-Sudanese and Arabo-Islamic Africa
257A-257B. Studies in French-African Literature

Geography 187. Middle East
188. Northern Africa
287. Middle East
288. Northern Africa

Greek (Classics) 231A-231B-231C. Seminar in Later Greek and Byzantine Literature

Hebrew (Near Eastern Languages) 230. Seminar in Medieval Hebrew Literature
231. Texts in Judeo-Arabic

History 106A-106B-106C. Survey of the Middle East from 500 to the Present
107A-107B. Islamic Civilization
108A-108B. History of the Arabs
109A-109B. History of North Africa from the Moslem Conquest
110A-110B. Iranian History
111A-111B. History of the Turks
123A-123B. Byzantine History
188B. Recent History of India and Pakistan
190A-190B. History of Southeast Asia
204A-204B. Seminar in Near and Middle Eastern History
205A-205B. Seminar in Medieval Middle Eastern History
206A-206B. Seminar in the Social History of the Middle East
209A-209B. Seminar in Ottoman and Modern Turkish History
216A-216B. Seminar in Byzantine History
596. Directed Studies
597. Directed Studies for Graduate Examinations
599. Ph.D. Research and Writing

Iranian (Near Eastern Languages) 101A-101B-101C. Elementary Persian
102A-102B-102C. Intermediate Persian
103A-103B-103C. Advanced Persian
140. Contemporary Persian Belle Lettres
141. Contemporary Persian Analytical Prose

Lecturers

Mirella Cheeseman, Dottore in Legge
Althea Reynolds, B.A., *Emeritus*

Scope and Objectives

Italian art and letters provide an invaluable key to understanding many facets of European civilization. Examined in its own right or studied comparatively, Italian culture offers unmatched rewards. The UCLA faculty views transmitting the Italian language as inseparable from transmission of the culture, so students consider in depth virtually all aspects of Italian civilization. After their linguistic initiation, ideally including a year abroad, students may pursue advanced studies in the department exclusively and through a wide range of interdisciplinary programs.

Bachelor of Arts degrees are offered in Italian and in Italian and Special Fields. Graduate study leads to the Master of Arts degree in Italian (with specializations in literature and language) and to the Ph.D. (literature specialization). In addition, the department participates extensively in the interdepartmental graduate programs in Romance Linguistics and Literature, Comparative Literature, and Folklore and Mythology.

Bachelor of Arts in Italian

The program of studies leading to the Bachelor of Arts in Italian consists of two distinct phases: preparation in the language and study of the literature. While literature courses constitute the bulk of the program, a good knowledge of the language is prerequisite to all upper division literature courses credited toward the major in Italian. The use of Italian is stressed at all levels of study. Detailed information on programs and specific degree requirements are available in the department publication, *Programs in Italian Studies,* and in the department office.

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 25, or equivalent.

The Major

Required: Fourteen upper division courses out of 16 courses regularly offered every year or every other academic year, including Italian 101, 102A-102B-102C, 113A-113B, 190. An additional seven are to be selected from courses 114A through 122.

Three upper division courses from other departments are strongly recommended, as follows: Classics 143, History 132A or 132B, and English 110. Also recommended: Art History 106A, 106B, or 106C; upper division courses in another literature and philosophy and a second language (Latin, French, Spanish, or German, at least on level three). Programs must be organized in consultation with the departmental undergraduate adviser.

Study in Italy

You are encouraged to spend up to one year in Italy either to (1) study with an education abroad program or (2) study in an Italian university. You are also urged to take advantage of summer language workshops and study programs, either at American campuses or in Italy. The Department of Italian offers an intensive, eight-week summer Italian studies program. For information on *Casa Italiana*, contact the department or the Summer Sessions Office, 100 Dodd Hall.

Honors Program

Majors with an overall grade-point average of 3.25 and a 3.5 GPA or better in Italian are eligible to participate in the honors program. Prerequisites: Italian 102A-102B-102C.

Candidates select three upper division literature courses in which additional readings are required. In the last quarter of your senior year, you are required to write a thesis on a subject related to one of the three above-mentioned courses. The average for the three courses should not fall below A−. Applications should be made during the last quarter of your junior year.

Bachelor of Arts in Italian and Special Fields

Study programs fulfilling requirements for the major have been developed with the Departments of Anthropology, Art, Design, and Art History, Classics (Latin), English, French, History, Linguistics, Music, Philosophy, Political Science, Spanish and Portuguese, and Theater, Film, and Television. Consult the Italian undergraduate adviser for requirements in the various fields of specialization.

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, or equivalent, plus additional required courses associated with the field of specialization selected in consultation with the undergraduate adviser.

The Major

Required: Fourteen upper division courses, seven of which must be in Italian. Italian 102A-102B-102C are required, while the remaining four may be selected from courses 113A through 122 as determined by your area of specialization. The other seven courses are to be selected from offerings in another department, as determined by the field of specialization.

Study Lists each quarter must be planned in consultation with the undergraduate adviser. Courses are assigned in accordance with your needs as determined by the area of specialization pursued. In certain cases, as many as two courses (eight units) at the graduate level may be applied toward the 14-course minimum requirement.

Master of Arts Degree

Admission

Three letters of recommendation should be sent to the Graduate Adviser, Department of Italian, 340 Royce Hall, UCLA, Los Angeles, CA 90024.

Files of prospective graduate students meeting the University minimum requirements are screened by the departmental committee on admissions. Because the department offers the master's degree as a step toward the Ph.D. degree, all students admitted to the M.A. program are designated as "first-stage doctoral students" in order to distinguish them from students in terminal master's degree programs. This is for administrative purposes only and has no bearing on your acceptance in the program if you do not indicate on the application that your final degree objective is the Ph.D. Admission on a provisional basis may be recommended in case of deficiencies in preparation.

Major Fields or Subdisciplines

The M.A. degree is available with specializations in Italian literature and language.

Foreign Language Requirement

Reading knowledge of one other foreign language approved by the graduate adviser or successful completion of courses through at least level three is required. This requirement must be met at least one quarter before the comprehensive examination.

Course Requirements

Italian Literature Specialization

(1) For the thesis plan, 12 courses are required, including Italian 200A, 200B, 200C, and 205B. At least nine courses must be in the 200 series.

(2) For the comprehensive examination plan, 12 courses are required, including Italian 200A, 200B, 200C, and 205B. The other eight courses must be distributed in three main literary periods — Middle Ages, Renaissance, modern (at least two courses in each period). Three of these courses may be upper division if approved by the graduate adviser. Related courses in other departments, such as History 205A-205B and Art History 230, are strongly recommended.

Italian Language Specialization

(1) For the thesis plan, 12 courses are required, including Italian 200A, 200B, 200C, 259A-259B, Latin 232, and Linguistics 100 or 140 or both. At least nine courses must be in the 200 series.

(2) For the comprehensive examination plan, 12 courses are required, including Italian 130, 200A, 200B, 200C, 259A-259B, and Latin 232 or Italian 210A or both. The others should be courses on the Middle Ages (seminar on Dante strongly recommended), Renaissance, and modern times.

No 500-series courses may be applied toward the M.A. course requirements.

Thesis Plan

This plan is recommended for research-oriented students of exceptional merit. If you have completed your first year of graduate work with at least a 3.7 grade-point average, you may be nominated by one of the faculty members of the department for application to the thesis plan.

At this point you must have completed Italian 200A, 200B, 200C, 205B, and at least two other graduate courses in Italian. On acceptance, the guidance committee helps you select six more graduate courses in preparation for the thesis.

The thesis must be at least 50 pages long and follow the rules and style of the UCLA Ph.D. dissertation regulations. It must be submitted in the Spring Quarter of your second year of graduate work. After completion of the thesis, you must pass an oral examination testing your knowledge in the field of the thesis and your general competence in Italian literature.

Comprehensive Examination Plan

In general, the department favors the comprehensive examination plan, which consists of a minimum four-hour written examination to be given before the final examination period of the Fall and Spring Quarters. The examination tests your general competency and does not have major and minor fields of emphasis. After the written examination, you are required to take an oral examination. In case of failure, you may be reexamined once, subject to approval by the examination committee and the chair of the department.

Ph.D. Degree

Admission

Three letters of recommendation from professionals in the field of Italian studies should be sent to the Graduate Adviser, Department of Italian, 340 Royce Hall, UCLA, Los Angeles, CA 90024.

Prerequisite for entering the department's doctoral program is an M.A. in Italian literature from UCLA or another university in the United States or the equivalent. Students with a master's degree from another institution, or the equivalent, will be required to pass part 1 of the Ph.D. qualifying examinations by the end of their third quarter in residence. They should expect to take part 2 of the examinations after approximately eight quarters.

Students admitted to the Ph.D. program without the M.A. degree must take the qualifying examinations (part 2) at the end of the twelfth quarter in residence, carrying a normal course load.

Students holding the M.A. from UCLA will normally take part 2 of the qualifying examinations at the end of their sixth quarter in residence.

Major Fields or Subdisciplines

Two centuries of Italian literature in the medieval, Renaissance and baroque, or modern areas comprise the major fields, while two centuries of Italian literature from any of these areas make up the minor fields.

You may select a major in a literary genre or a minor outside the department, provided that it relates to your major field of specialization and has the department's approval.

Foreign Language Requirement

This requirement is normally met by passing courses through level three in at least two of the following languages: Latin, French, German, Spanish (subject to departmental approval). A foreign language used to satisfy the requirement for the master's degree in Italian may be applied toward fulfillment of this requirement. The language requirement must be satisfied before taking part 2 of the qualifying examinations, either by Educational Testing Service (ETS) or departmental examination or by petition for course credit to the Graduate Division.

Course Requirements

In addition to those required for the master's degree, at least 10 other quarter courses, of which no more than two 596 courses may apply, are required. You also will take such courses as your guidance committee may prescribe for the qualifying examinations (such as Italian 596 or 597). All courses from Italian 201 on may be applied toward the Ph.D. degree.

Qualifying Examinations

The comprehensive examination for the M.A. in Italian at UCLA corresponds to part 1 of the Ph.D. qualifying examinations.

The department also requires both written and oral qualifying examinations (part 2), which must be taken during the same academic year, although not necessarily during the same quarter. Normally taken six quarters after the M.A. degree, the written examination consists of two parts: an eight-hour examination in your major field and a six-hour examination in your minor field. Additionally, a two-hour University Oral Qualifying Examination is required for advancement to doctoral candidacy. A summary of requirements entitled "Regulations for the Ph.D. Examination" is available in the department. In case of failure, you may be reexamined on unanimous approval of the guidance committee, after at least one academic quarter of additional residence.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

After acceptance of the dissertation in its final form, you may be required to take an oral examination which covers principally the field within which the dissertation falls.

Lower Division Courses

Enrollment in the Italian open language laboratory is required of all students in Italian 1, 1A, 2, 2A, and 3.

1. Elementary Italian — Beginning. Lecture, five hours; laboratory, one hour.
Mrs. Cheeseman in charge

1A. Elementary Italian — Accelerated (8 units). Lecture, 10 hours; laboratory, two hours. Designed for those students having the capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 1 and 2. Mrs. Cheeseman in charge

1G. Special Reading Course. Readings, three hours. Open to graduate students in other fields. Preparation for the Graduate Division foreign language reading requirement. S/U grading.

2. Elementary Italian — Continued. Lecture, five hours; laboratory, one hour. Prerequisite: course 1 or one year of high school Italian.
Mrs. Cheeseman in charge

2A. Elementary Italian — Accelerated (Continued) (8 units). Lecture, 10 hours; laboratory, two hours. Prerequisite: course 1A or 2 or two years of high school Italian. Designed for those students having the capacity and desire to learn the language at a much faster pace than normal. Encompasses the material ordinarily intended for courses 3 and 4.
Mrs. Cheeseman in charge

2G. Special Reading Course. Readings, three hours. Open to graduate students in other fields. Preparation for the Graduate Division foreign language reading requirement.

3. Elementary Italian — Continued. Lecture, five hours; laboratory, one hour. Prerequisite: course 2 or two years of high school Italian.
Mrs. Cheeseman in charge

3A. Intermediate Italian — Accelerated (8 units). Lecture, six hours; laboratory, two hours. Prerequisite: course 2A or 3 or three years of high school Italian. Designed for those students having the capacity and desire to learn the language at a much faster pace than normal. Encompasses the material ordinarily intended for courses 4 and 5.
Mrs. Cheeseman in charge

4. Intermediate Italian. Lecture, five hours; laboratory, one hour. Prerequisite: course 3 or three years of high school Italian. Mrs. Cheeseman in charge

5. Intermediate Italian. Lecture, five hours; laboratory, one hour. Prerequisite: course 4 or four years of high school Italian. Mrs. Cheeseman in charge

7. Elementary Italian Conversation. Lecture, five hours (first six-week session). Encompasses conversational material included in course 1, with emphasis on traveler's vocabulary. (Sum)

8A-8B-8C. Italian Conversation (2 units each). Prerequisite: consent of instructor. Intended for students who have taken three to six quarters of language instruction and have developed considerable skills in Italian. Designed to improve further students' spoken proficiency through constant exposure and practice of the language. Each course may be repeated once for credit. Mrs. Reynolds in charge

25. Advanced Italian. Lecture, five hours. Prerequisite: course 5. An advanced grammar and composition course with readings from select literary works.
Mrs. Cheeseman in charge

42A-42B. Italian Civilization or Italy through the Ages. Lecture, three hours. A general survey of the history, literature, art, music, and architecture audiovisually illustrated, with emphasis on Italy's cultural contributions to Western civilization. A service course designed to meet the general education requirements:

42A. From the Origins through the Renaissance.
Mrs. Cottino-Jones, Mr. Tuttle

42B. From the Enlightenment to Modern Italy.

46. Italian Cinema and Culture. (Formerly numbered 46A-46B-46C.) Lecture, two hours; discussion, one hour; film screenings, two to three hours. A survey of the development of Italian cinema and culture from the 1900s to the present through an analysis of the principal aesthetic, literary, artistic, and philosophical movements in Italy as reflected in the works of the nation's filmmakers and writers.
Ms. Re (F,W,Sp)

50A-50B. Main Trends in Italian Literature:

50A. Italian Literature to the Baroque Period. A study of selected works of the major writers of the period, including Dante, Petrarch, Boccaccio, Ariosto, Machiavelli, Castiglione, Tasso, Bruno, Galileo, Marino.

50B. Italian Literature from 1700 to the Present. A study of selected works by the major writers of the period, including Vico, Parini, Alfieri, Foscolo, Leopardi, Manzoni, Verga, Pirandello, Svevo, Moravia, Ungaretti, Montale.

Upper Division Courses

Sixteen quarter units in Italian or equivalent are required for admission to any upper division course. Upper division courses for the majors are conducted in Italian.

101. Preparation for Advanced Italian Studies. Lecture, three hours. Designed to acquaint juniors with the research tools fundamental to the study of Italian culture, with emphasis on how to find texts and collateral material, how to utilize bibliographies, dictionaries, encyclopedias, manuals, and periodicals, and how to proceed in literary analysis.
Mr. Chiappelli

102A-102B-102C. The Italian Cultural Experience. Lecture, three hours. A study of the cultural development of Italy conducted especially with a view to contemporary situations:

102A. From the Disruption of Roman Unity to Feudal and Communal Society and Culture.

102B. From Renaissance Civilization to the Baroque Age.

102C. Historical and Cultural Issues from the Age of Enlightenment to Our Day.

105. Tradition and Innovation in Italian Culture. Lecture, three hours. Italy's basic social structures and cultural institutions delineated through their historical development and as they are manifest in the stresses to which the industrializing state currently is subject. Mr. Tuttle

110A-110B. The *Divine Comedy* in English. Lecture, three hours.

113A-113B. Dante's *Divina Commedia.* Lecture, three hours. Focus on the *Divine Comedy.* Selected readings from the text integrated with relevant information on scholasticism, classical tradition, medieval literature and poetics, and the sociopolitical structure of Dante's world:

113A. General Introduction and Readings from *Inferno.*

113B. Readings from *Purgatorio* and *Paradiso.*
Mr. Cecchetti

114A-114B. Italian Literature of the Middle Ages. Lecture, three hours. Emphasis on Stil Novo, Dante's minor works, Petrarch, and Boccaccio.
Mrs. Cottino-Jones, Mr. Tuttle

116A-116B. Italian Literature of the Renaissance. Lecture, three hours. Emphasis on Lorenzo de' Medici, Poliziano, Castiglione, Machiavelli, Ariosto, Tasso.
Mr. Betti

118. Italian Literature of the 18th Century. Lecture, three hours. Emphasis on Goldoni, Parini, Alfieri.
Mr. Betti

119. Italian Literature of the 19th Century. Lecture, three hours. Survey of the Romantic age as it expresses values and national aspirations of 19th-century Italy. Emphasis on the innovative approach to poetry as seen in the works of Foscolo and Leopardi and to the sociohistorical novels of Foscolo, Manzoni, and Verga. Mr. Betti

120. Italian Literature of the 20th Century. Lecture, three hours. A brief introduction to Italian literature after unification of the country, followed by concentration on selected writers seen in their political, social, and artistic contexts. Mr. Cecchetti

121. Italian Cinema. Lecture, three hours. A comparative study of specific literary works and their translations into films and of the different techniques in the two forms of expression. Texts include literary works, screenplays, and works on literary and film theory.

122. The Italian Theater. Lecture, three hours. Emphasis on what is alive today (read and performed) in the Italian theater. Texts range from the Renaissance to the present. Mrs. Cottino-Jones

130. Advanced Grammar and Composition (Teaching). Lecture, three hours. A study in depth of the idiomatic phenomena of the language from both the grammatical and syntactical points of view.
Mrs. Cheeseman

131. Reading and Reciting. Lecture, three hours. Prerequisite: consent of instructor based on sufficient knowledge of Italian. Emphasis on diction, interpretation, and performance of one-act plays as vehicles for perfection of pronunciation, comprehension, and fluency. May be repeated twice for credit.
Mrs. Reynolds

M140. From Boccaccio to Basile (in English). (Same as Folklore M140.) Lecture, three hours. A study of the origins and the development of the Italian novella in its themes, in its structure, in its historical context, and in its European ramifications. Designed for students in other departments who wish to become acquainted with either the premises or the growth of similar literary genres. Also intended for students majoring in folklore and mythology, who are given an insight into Italian popular tales when these (as in the case of Boccaccio) were translated into highly sophisticated literary forms, as well as when (as in the case of Basile) they become embedded into the folk tradition of the Western world.
Mrs. Cottino-Jones

150. Modern Italian Fiction in Translation. Lecture, three hours.

M158. Women in Italian Culture. (Same as Women's Studies M158.) Lecture, three hours. Designed with the intent of examining the role that women have played in Italian society. Concentration alternatively on the world of the medieval and Renaissance "matriarch" and on the "liberated" women of our times. Historical and political documents and social and religious taboos presented and discussed, together with other data derived from literature and art. Italian majors are required to read texts in Italian and to prepare papers written in Italian.
Mrs. Cottino-Jones, Ms. Re

190. History of the Italian Language. Lecture, three hours. The main forces which have shaped literary or standard Italian and specific ways in which the language has evolved. Tracing of its changing relations with other European languages and survey of the effects wrought by historical events, changes in taste, and altered social functions. Mr. Tuttle

195. Special Fields Research (2 units). Limited to senior Italian and special fields majors. Unscheduled tutorial in which a paper (15 to 20 pages) is to be written in either Italian or English which requires students to unify and synthesize their experience of combining two disciplines of study. Paper is graded by an ad hoc committee of faculty from the department, with the chair in charge.

199. Special Studies (2 to 4 units). Prerequisite: consent of instructor. A course of independent study for advanced undergraduates who wish to pursue a special research project under the direction and close supervision of a faculty member.

Graduate Courses

200A. Readings in Italian Literature. Lecture, three hours. Prerequisite: graduate standing. The literature of the generation dominated by the Franciscan movement, proceeding through the culture of Frederick II's court to the three classics of the 14th century — Dante, Petrarch, and Boccaccio. The early humanists, the postclassic generation, and the cultural booming under Lorenzo il Magnifico.
Mr. Chiappelli, Mrs. Cottino-Jones

200B. Readings in Italian Literature. Lecture, three hours. Prerequisites: course 200A, graduate standing. The literature of the High Renaissance of central Italy in its three most popular genres (lyric poetry, chivalric poem, and theater), proceeding through the counter-reformistic culture, especially of northern and southern Italy. The main Enlightenment figures and the cultural evolution stemming from them.
Mr. Betti, Mr. Chiappelli

200C. Readings in Italian Literature. Lecture, three hours. Prerequisites: course 200B, graduate standing. The literature of the Romantic era, proceeding through a study of the literary figures of the Italian "Risorgimento." The various "novecentisti" movements, the literature between the two wars, and the contemporary generation.
Mr. Betti, Mr. Cecchetti, Ms. Re

201. Bibliography and Methods of Research. Lecture, three hours. Mrs. Cottino-Jones

205A-205B. Methods of Literary Criticism. Lecture, three hours:

205A. Brief History of Literary Criticism.

205B. Discussion of Modern Critical Approaches. Mrs. Cottino-Jones

210A-210B-210C. Early Italian Literature. Lecture, three hours:

210A. The Origins of Italian Language and Early Texts. Mr. Tuttle

210B. The *Scuola Siciliana* and Early Poetry in Central and Northern Italy. Mr. Tuttle

210C. The *Dolce Stil Novo.*

212A. Theory of Textual Criticism. Prerequisite: graduate standing. A presentation and discussion of the methods to be employed in the preparation of a critical edition of a medieval and/or Renaissance literary text. Mr. Chiappelli

214A-214G. Italian Literature of the 14th Century. Lecture, three hours:

214A. Dante's *Vita Nuova* and *Rime.* Mr. Chiappelli

214B. *Convivio and De Vulgari Eloquentia.*

214C. The *Commedia* and the *Monarchia.* Mr. Chiappelli

214D. Petrarca. Mr. Chiappelli

214E. The *Decameron.* Mrs. Cottino-Jones

214F. Boccaccio's Other Works. Mrs. Cottino-Jones

214G. Sacchetti and Other Prose Writers. Mrs. Cottino-Jones

215A-215B-215C. Italian Literature of the 15th Century. Lecture, three hours:

215A. Fiction and Other Prose Texts. Mr. Chiappelli

215B. Writings of the Humanists.

215C. The Age of Lorenzo de' Medici and Poliziano. Mr. Betti

216A-216E. Italian Literature of the 16th Century. Lecture, three hours:

216A. Machiavelli. Mr. Chiappelli

216B. Ariosto.

216C. Bembo, Folengo, Aretino, and the Theater. Mrs. Cottino-Jones

216D. Prose (Castiglione, Della Casa, Guicciardini, Cellini).

216E. Tasso. Mr. Chiappelli

217A-217B-217C. Italian Literature of the 17th Century. Lecture, three hours:

217A. Bruno, Campanella, Galilei, Magalotti. Mrs. Cottino-Jones

217B. Commedia dell'arte and the Theater. Mrs. Cottino-Jones

217C. Marino and Marinisti. Mrs. Cottino-Jones

218A-218E. Italian Literature of the 18th Century. Lecture, three hours:

218A. The Prose from Vico to Cesarotti. Mr. Betti

218B. Essayists and Autobiographical Writers. Mr. Betti

218C. The Theater, Especially Metastasio, Goldoni, C. Gozzi. Mr. Pasinetti

218D. Parini and the Poets of Arcadia. Mr. Pasinetti

218E. Alfieri. Mr. Betti

219A-219F. Italian Literature of the 19th Century. Lecture, three hours:

219A. Foscolo. Mr. Chiappelli

219B. Leopardi. Mr. Cecchetti

219C. Manzoni. Mr. Pasinetti

219D. Trends in Fiction before Verga. Mr. Betti

219E. Verga. Mr. Cecchetti

219F. Italian Literature at the Turn of the Century. Mr. Pasinetti

220A-220B-220C. Italian Literature of the 20th Century. Lecture, three hours:

220A. From D'Annunzio to Futurism and the Early Twenties. Mr. Cecchetti

220B. Contemporary Italian Poetry. Mr. Cecchetti

220C. Contemporary Italian Fiction. Mr. Pasinetti

M230A-M230B. Folk Tradition in Italian Literature. (Same as Folklore M230A-M230B.) Lecture, two hours.

250A-250D. Seminar on Dante. Seminar, three hours. Mr. Chiappelli

251. Seminar on Petrarch. Seminar, three hours. Mr. Chiappelli

252. Seminar on Boccaccio. Seminar, three hours. Mrs. Cottino-Jones

253A-253B-253C. Seminar on Chivalric Poetry in Italy. Seminar, three hours. The relationship between the genre and its French medieval sources, with a study of its evolution in Italy through Pulci, Boiardo, Ariosto, and Tasso. Mrs. Cottino-Jones

254. Seminar on Machiavelli. Seminar, three hours. Mr. Chiappelli

255A-255B. Seminar on the Baroque. Seminar, three hours. Mrs. Cottino-Jones

256A-256B. Seminar on the 18th Century. Seminar, three hours. Mr. Pasinetti

257A-257B. Seminar on Romanticism. Seminar, three hours. Mr. Pasinetti

258A-258B. Seminar on Contemporary Italian Literature. Seminar, three hours. Mr. Cecchetti

259A-259B-259C. Studies in the History of Italian Language:

259A. History of the Italian Language. Prerequisite: graduate standing. A historical survey of the development of the language from medieval times to the unification of the country (1861). *Questione della lingua,* general acceptance of Florentine speech, and its evolution into the national language. Mr. Tuttle

259B. The Structure of Modern Italian. Prerequisite: graduate standing. Various tendencies in modern and contemporary Italian. Foreign influences in today's Italian language. Relationship between the national language and the various dialects. Mr. Tuttle

259C. Italian Dialectology. The historical differentiation of the Italian dialects considered in its areal dimension. Specific geolinguistic problems and solutions illustrating the growth of the discipline up to its present merging with sociolinguistics as Italian dialects become more vertically defined. Mr. Tuttle

298. Variable Topics in Italian Studies. Lecture, three hours; discussion, one hour. Prerequisite: graduate standing or consent of instructor. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental graduate courses.

370. Problems and Methods in the Teaching of Italian. Lecture, two hours. Mrs. Cheeseman

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495A-495D. The Teaching of Italian at the College Level (2 to 4 units each). Prerequisite: consent of instructor:

495A. Techniques in Teaching Italian Literature.

495B. Techniques in Teaching Italian Culture.

495C. Techniques in Teaching Italian Conversation.

495D. Techniques in Teaching Italian Film.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Individual Studies (4 to 8 units). May be repeated twice. S/U grading.

597. Preparation for Comprehensive Examinations (4 to 8 units). S/U grading.

599. Ph.D. Research and Writing (4 to 8 units). May be repeated. S/U grading.

Kinesiology

Adjunct and Visiting Assistant Professors

Alan J. Garfinkel, Ph.D., *Adjunct*
Thomas P. Martin, Ph.D., *Visiting*

Scope and Objectives

Kinesiology is the study of the biochemical, morphological, and general physiological responses of the human to exercise and environmental conditions; the description of movement and the neuromuscular and biomechanical determinants of motor performance; and the development, acquisition, and modification of motor performance. The purpose of this study is intended to develop and integrate principles and concepts of human movement.

Bachelor of Science Degree

Pre-Kinesiology Major

All students intending to major in kinesiology are identified as pre-kinesiology majors until the premajor requirements have been satisfied. Transfer students with 80 or more units must have completed one year of general chemistry with laboratory in order to be admitted as pre-kinesiology majors.

The pre-kinesiology major requirements are Kinesiology 12A, 12B, 14; Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, 25; Biology 5 or 7; Physics 3A and 3B (or 6A and 6B, or 8A and 8C); one introductory statistics course; Psychology 10; and an additional course from one of the following departments: Anthropology, Psychology, or Sociology.

Premajor courses outside the department may be taken for a letter grade or on a P/NP basis; Kinesiology 12A, 12B, and 14 must be taken for a letter grade (certain certification and graduate programs also require letter grades for courses). All premajor courses must be passed with a grade of C – or better or a P and must be completed with an overall grade-point average of 2.0 or better.

The Student Affairs Office in 2834 Slichter Hall petitions you into the major after you complete the premajor courses.

If you are in the kinesiology major or premajor, you must confer with the departmental counselor on a regular basis. If you are interested in this major and are transferring from another college or university, you should consult with the departmental counselor at least six months prior to your expected enrollment date at UCLA. Call the Student Affairs Office for an appointment.

The Major

Required Core Courses: Kinesiology 120, 122, 124, 126.

A total of five upper division electives (20 units) is required. Although all five courses may be taken in kinesiology, three upper division courses (12 units) must be taken in the department. Courses 193, 196A-196B, and 400-level courses may not be applied toward this requirement. One or two of the five courses (up to eight units) may be taken in other departments related to your course of study. A list of approved extra-departmental courses is available in the Student Affairs Office.

A C average must be maintained in all upper division courses taken in the department. All upper division courses required for the major (including extra-departmental electives) must be taken for a letter grade.

Honors Program

The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.5 GPA in upper division kinesiology courses, completion of the premajor courses, and identification of a sponsoring faculty adviser. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

Preparation for Graduate Study

Undergraduate students who plan to do doctoral studies in kinesiology are advised to complete Mathematics 3A and 3B. Students who wish to pursue doctoral studies in biomechanics must complete two full years of calculus. Students interested in graduate study (master's degree or Ph.D.) in areas of physiological kinesiology must complete two full years of chemistry (11A, 11B/11BL, 11C/11CL, 21, 23, 25). Consult the Student Affairs Office for additional information.

Graduate Study

The department offers Master of Science and Doctor of Philosophy degrees in the following fields:

(1) Exercise physiology — cardiovascular adaptations of exercise, environmental factors influencing work capacity, neuromuscular and metabolic adaptations to exercise, and neuromotor control.

(2) Biomechanical determinants of motor performance.

(3) Motor control, perceptual motor development, and social/psychological determinants of human motor performance.

When applying for graduate work, you should specify an interest in one of these general fields.

Admission

Applicants for graduate study are expected to have completed an undergraduate degree in kinesiology or the equivalent as outlined below under the master's and doctoral programs. A grade-point average of at least 3.0 (B) in all upper division undergraduate coursework is required. A departmental faculty committee considers applicants on the following bases: (1) prior scholastic performance, (2) three letters of recommendation, and (3) applicant's statement of purpose, which should include (a) relevant background or preparation, (b) field of emphasis, specific study interests, and type of research sought, (c) expectations, goals, degree objective, (d) specific courses in the department to be taken and one or two departmental faculty members whose research area parallels the study interest.

A list of faculty names and research interests is available from the Department of Kinesiology, 2834 Slichter Hall, UCLA, Los Angeles, CA 90024. Applicants are encouraged to communicate directly with the faculty, and personal interviews are encouraged.

Aptitude tests, including the Graduate Record Examination (GRE) or Miller's Analogies, are not required but may be submitted for consideration.

Applications for all quarters must be submitted by Fall Quarter deadlines, since applications for all quarters are reviewed only in January/February each year.

Master of Science Degree

Applicants without an undergraduate degree in kinesiology will receive serious consideration, particularly if undergraduate or other experiences provide a strong relationship to kinesiology. However, applicants are expected to complete minimum undergraduate preparation prior to graduate work. Completion of course deficiencies may take as much as an additional year of coursework, which may not be applied toward the master's degree. Required undergraduate preparation is equivalent to the following: (1) four required courses selected from cellular biology, inorganic chemistry, organic chemistry, introductory psychology, physics (mechanics), physics (electricity), calculus (differential), and calculus (integral), (2) one course each in statistics, human anatomy, and human physiology required for the B.S. degree in Kinesiology, (3) the four kinesiology core courses required for the B.S. degree, and (4) one elective from the proposed area of graduate study. Additionally, applicants in the field of exercise physiology should have completed one year of inorganic chemistry, one year of organic chemistry/biochemistry, and two quarters of calculus.

Course Requirements

The Master of Science in Kinesiology requires nine courses: five graduate-level kinesiology courses, two courses from a related field, one second-level statistics or research design course, and one other course from either kinesiology or a related field.

A minimum of six of the nine courses must be graduate-level (200) courses, toward which one 596 course may be applied. Lists of approved related field and statistics or research design courses may be obtained from the department.

A total of eight units of Kinesiology 596 may be taken for credit; only one course (four units) may be applied toward the minimum course requirement for the master's degree. Courses 597 and 598 may not be applied toward any of the course requirements for the degree. There is no limit on the number of times a master's student may enroll in course 597 or 598.

Thesis Plan

Students who elect the thesis plan for the master's degree must report the results of an original research investigation. Under the guidance of the thesis committee, you must pro-

pose a problem area or outline of study, conduct original research in a specific area, and report the results. With committee approval, you may submit either a thesis manuscript or a manuscript suitable for publication.

Comprehensive Examination Plan

Students who elect this plan must achieve a passing mark on a comprehensive examination. The general purpose of the plan is that students acquire a thorough understanding of a reasonably broad problem area, which must be specified in consultation with an adviser. The selection of courses in the department and the related field must be pertinent to the problem area, and justification is required with the petition for advancement to candidacy.

While a written examination is required, the committee may use additional means to evaluate the competency of the candidate.

If you fail the comprehensive examination, you may not repeat it until the following quarter. Only one repetition is allowed.

Ph.D. Degree

Doctoral students are expected to have the basic preparation coursework in kinesiology required of master's students. Six of the eight preparation courses required for the M.S. are required of doctoral students. You must show a solid educational background in one of three general fields of kinesiology, and undergraduate and prior graduate work is evaluated in terms of your declared field of interest.

Major Fields or Subdisciplines

From the three general content fields of the department's instructional and research programs, six *areas of concentration* have been identified: (1) biomechanics; (2) cardiorespiratory function and adaptation; (3) movement performance and learning; (4) musculoskeletal function and adaptation; (5) neural control of movement; (6) social psychological aspects of human movement.

You select one of the six areas of concentration as a major and one area as a minor. These areas are expected to relate to your proposed dissertation problem.

Course Requirements

Fourteen courses are specified for the doctoral degree, some of which may be satisfied by prior graduate work. Selection of all courses must be approved by the guidance committee and is determined in part by the selection of major and minor areas of concentration.

A total of eight departmental courses is required, two of which must be seminars. One seminar course requirement may be met by enrolling in two quarters of Kinesiology 290. Two 596 courses may be applied toward the degree requirements.

A minimum of three courses or 12 units in a related field outside the department is required. An approved list of courses in anatomy, biological chemistry, biology, biomathematics, education, engineering, neuroscience, pharmacology, physiology, psychology, public health, and radiological sciences is maintained by the department. A fourth course, either departmental or in a related field outside the department, and two department-approved advanced statistics courses are also required.

First-Year Doctoral Review

After completion of three quarters of coursework, the graduate affairs committee conducts a doctoral review to determine whether you (1) continue in the doctoral program, (2) enter the master's program, or (3) discontinue graduate study in the department. The review must be completed by the end of the fourth quarter of graduate work as a doctoral student.

Teaching Experience

Each candidate must complete two quarters as a teaching assistant. All teaching evaluations become a permanent part of your departmental record.

Qualifying Examinations

Each doctoral student must take two written qualifying examinations: one in a major area and one in a minor area. Written qualifying examinations may be taken when the student and guidance committee consider appropriate. These examinations, administered in Fall and Spring Quarters, are scored (1) passed at the Ph.D. level of achievement, (2) passed at the master's level of achievement, or (3) failed. To continue in the doctoral program, you must pass each examination at the Ph.D. level of achievement. If you fail to do so, you may (1) complete the master's degree, (2) discontinue graduate work in the department, or (3) reschedule the area examinations once at the discretion of the guidance committee.

After successfully passing the departmental written qualifying examinations, a University Oral Qualifying Examination is conducted by the doctoral committee. Normally, the examination is held the quarter following the completion of written examinations, all coursework, and two quarters of research work with your major professor. If you do not pass, the examination may be rescheduled at the discretion of the doctoral committee.

After advancement to candidacy, you must complete and submit a dissertation which meets the approval of the doctoral committee.

Final Oral Examination

A final oral examination is generally required, although the members of the doctoral committee who are to approve the dissertation have the option to waive it in exceptional cases. The major emphasis in this examination is a defense of the dissertation.

Lower Division Courses

12A. Introduction to Human Physiology. (Formerly numbered 12.) Lecture, three hours; laboratory, 90 minutes. Prerequisites: Biology 5 or 7, Chemistry 25, Physics 3B. An introduction to human physiology. Topics include cell and muscle physiology, cellular neurophysiology, and endocrinology.
Mr. Chandler, Mr. Vailas (W)

12B. Introduction to Human Physiology. (Formerly numbered 12.) Lecture, three hours; laboratory, 90 minutes. Prerequisite: course 12A. An introduction to human physiology. Topics include respiration and cardiovascular, renal, and gastrointestinal physiology. Mr. Barnard, Mr. Gardner (F,Sp)

13. Introduction to Human Anatomy (6 units). Lecture, four hours; laboratory, four hours. Not intended for kinesiology majors; a combination of courses 13 and 14 is equivalent to nine units. A structural survey of the human body, including the skeletomuscular, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens. Ms. Phillips (W)

14. Human Neuromuscular Anatomy (6 units). Lecture, four hours; laboratory, four hours. A thorough study of the skeletal, articular, muscular, and nervous systems. Special emphasis on relating these body structures to human movement capabilities. Laboratory includes examination of prosected human cadaver specimens. Ms. Phillips (F,Sp)

Upper Division Courses

115. Aquatic Kinesiology. Lecture, three hours; laboratory, two hours. Prerequisite: course 124. A study of man's adaptation to the aquatic environment.
Mr. Egstrom (F)

116. Exercise and Cardiovascular Function. Prerequisites: courses 120, 122, 124, 126. A consideration of the acute and chronic effects of exercise in the diagnosis, prevention, and treatment of cardiovascular disorders and physical fitness.
Mr. Barnard, Mr. Gardner (F)

117. Conditioning for Maximum Performance. Prerequisite: course 124. Study of factors and conditions accelerating and retarding levels of performance and work under various physiological and environmental conditions. Mr. Egstrom (W)

118. Cellular Dynamics of Exercise. Prerequisites: courses 124, 126. Cellular responses to acute and chronic exercise. Mr. Martin (W)

120. Behavioral Bases of Movement (6 units). Lecture, four hours; laboratory, three hours. Prerequisite: completion of premajor coursework (except for course 12B). An examination of motor performance and motor learning and the influence of selected psychological variables on human movement.
Ms. Scanlan, Mr. Schmidt (F,Sp)

122. Biomechanical Bases of Movement (6 units). Lecture, four hours; laboratory, three hours. Prerequisite: completion of premajor coursework (except for course 12B). Kinematic and kinetic principles underlying human movement, focusing on the human neuromuscular and skeletal systems.
Mr. Gregor, Mr. Zernicke (W)

124. Cardiorespiratory Bases and Environmental Factors Affecting Movement (6 units). Lecture, four hours; laboratory, three hours. Prerequisite: completion of premajor coursework. Response of the cardiovascular and respiratory systems to acute and chronic exercise, environmental stress, and adaptation. Mr. Barnard, Mr. Egstrom, Mr. Gardner (W)

126. Neuromuscular and Metabolic Bases of Movement (6 units). Lecture, four hours; laboratory, three hours. Prerequisite: completion of premajor coursework. Metabolic, muscular, and neural processes underlying movement and adaptation to exercise.
Mr. Chandler, Mr. Edgerton, Ms. Smith (F,Sp)

C132. Biomechanics of Musculoskeletal Injury. (Formerly numbered 132.) Prerequisites: course 122, consent of instructor. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues in normal and abnormal stress situations. Analysis of connective tissue growth processes, normal physiology, and repair mechanisms in conjunction with musculoskeletal injuries and effects of exercise and physical activity. Concurrently scheduled with course C232. Mr. Zernicke (F)

134. Electromyographic Assessment. (Formerly numbered 134A.) Lecture, two hours; laboratory, three hours. Prerequisite: course 122. Techniques of electromyographic analysis combining theoretical aspects with laboratory experiences. Mr. Gregor (Sp)

139. Dissection Anatomy. Lecture, two hours; laboratory, six hours. Prerequisites: course 122, consent of instructor. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculature and neurovascular supply. Ms. Phillips (F,Sp)

140. Mechanisms of Neuromuscular Control. Prerequisite: course 126. Recommended: Psychology 15 or 115. Advanced topics in the neurophysiology of the sensorimotor systems. Mr. Chandler, Ms. Smith (W)

C153. Acquisition of Motor Skills. Prerequisite: course 120. An investigation into the principles of the acquisition of motor skills, such as those applicable to industry, musical performance, or sport. Major topic areas include methodological considerations, the structure of practice sessions, feedback and knowledge of results, theories of motor learning, and retention of skills. May be concurrently scheduled with course C253. Mr. Schmidt (W)

C156. Motor Behavior and Motor Control. Prerequisite: course 120. An analysis of primarily human movement behavior and control, with emphasis on a behavioral level of analysis. Topic areas include methodological issues, open- and closed-loop control, and individual differences. May be concurrently scheduled with course C256. Mr. Schmidt

160. Human Movement Development. Prerequisite: course 120. Movement development throughout life, with emphasis on individual and societal determinants. Mr. Cratty, Mr. Keogh (F,W)

165. Perceptual Motor Education. Prerequisites: courses 120, 160. Movement problems of the minimally neurologically handicapped, with emphasis on the clumsy child syndrome. Mr. Cratty, Mr. Keogh (W)

C178. Group Dynamics in Sport. (Formerly numbered 178.) Prerequisite: course 120 or consent of instructor. Examination of group dynamics in sport. Topics include group productivity, group structure, leadership, motivational factors, cohesion, conflict. May be concurrently scheduled with course C278. Mr. Cratty, Ms. Scanlan (F)

191A-191Z. Proseminars in Kinesiology. Prerequisites: upper division standing, consent of instructor. Limited to 15 students. Advanced study of special topics. May be repeated for credit with topic change.

193. Field Studies in Kinesiology (2 units). Lecture, one hour; fieldwork, six hours. Prerequisites: courses 120, 122, 124, 126, or equivalent, consent of instructor via course application. Supervised field studies in specific careers related to kinesiology. May be repeated once but may not be applied toward the major. P/NP grading. Mr. Keogh (F,W,Sp)

196A-196B. Laboratory Practicum in Kinesiology (2 units each). Laboratory, four hours. Prerequisites or corequisites: course 139, consent of instructor. Supervised practicum and training for advanced students who serve as undergraduate assistants in the basic anatomy course in the preparation of laboratory materials and innovative projects. May not be applied toward the major.

197A-197Z. Variable Topics in Kinesiology. Prerequisite: consent of instructor. A variable topics course which covers specific subjects of special interest to undergraduate students. Eight units may be applied toward the B.S. degree requirements.

199A-199ZZ. Special Studies in Kinesiology (2 or 4 units). Prerequisites: kinesiology major with advanced junior standing and a 3.0 GPA in the major, or senior standing, and consent of instructor and department chair. Directed independent research with a faculty member (identified in course title by two initials). A course application (available in 2834 Slichter Hall) must be submitted to the chair on or before the first day of class. A total of eight units of 199 and 199H may be applied toward the B.S. degree requirements.

199HA. Honors Thesis. (Formerly numbered 199HA-199HZZ.) Directed independent research for departmental honors with a faculty member, involving definition of a research topic and extensive reading and research in the field of the proposed honors thesis. In Progress grading.

199HB. Honors Thesis. (Formerly numbered 199HA-199HZZ.) Prerequisite: course 199HA. Continued reading and research that culminates in a final honors thesis. A total of eight units of 199H may be applied toward the major and the B.S. degree requirements.

Graduate Courses

206. Metabolism of Organ Systems Affected by Exercise. Prerequisite: Chemistry 23. The key regulatory mechanisms of metabolism involved in the exercise response and adaptation. Mr. Vailas

207. Respiratory Function during Exercise. Prerequisite: course 124. Topics include the acute and chronic effects of exercise on pulmonary gas exchange, gas transport and ventilatory control, and limiting factors to aerobic function. Mr. Gardner

208. Neuromuscular and Metabolic Factors in Exercise. Prerequisite: course 118 or consent of instructor. Fundamental aspects of skeletal muscle contraction and metabolic demands under various exercise and training conditions, including neural and endocrine mechanisms potentially involved in inducing specific training effects on skeletal muscle, liver, kidney, gastrointestinal tract, and brain. Mr. Edgerton

209. Environmental Factors in Exercise. Prerequisites: courses 122, 124, and 126, or consent of instructor. Environmental pressure of high altitude and underwater diving, as well as temperature factors, as they affect work performance; adaptation to unusual environments. Mr. Egstrom (Sp)

211. Exercise Cardiovascular Physiology. Prerequisite: Physiology 101. Attention to cardiovascular adaptations to acute exercise as well as adaptations associated with regular exercise training. Mr. Barnard (Sp)

212. Cardiovascular Research Techniques. Lecture, one hour; laboratory, four hours. Prerequisites: course 211, consent of instructor. Experience in working with experimental animals, in conducting surgery, and in understanding the use of flow meters, radioactive microspheres, pressure transducers, and other techniques commonly used in cardiovascular research. Mr. Barnard

221. Underwater Kinesiology. Prerequisites: courses 122 and 124, or consent of instructor. Biomechanical, physiological, methodological, and behavioral limitations to underwater activities. Mr. Egstrom

230A. Muscle Dynamics. Prerequisite: course 122. Recommended: course 134. Integrated study of electrical and dynamic parameters of muscle-action, including topics in length-tension and force-velocity interrelationships; critical analysis of electromyographic and digital computer techniques. Mr. Gregor (F)

230B. Musculoskeletal Mechanics. Prerequisites: course 122, Mathematics 3A, 3B. Mechanical parameters of the moving human musculoskeletal system, including the use of cinematographic, force platform, and digital computer techniques. Topics include biostatistics, biodynamics, and empirical data modeling. Mr. Zernicke (W)

C232. Biomechanics of Musculoskeletal Injury. Prerequisites: course 122, consent of instructor. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues in normal and abnormal stress situations. Analysis of connective tissue growth processes, normal physiology, and repair mechanisms in conjunction with musculoskeletal injuries and effects of exercise and physical activity. Concurrently scheduled with course C132. Mr. Zernicke (F)

235A-235B. Dynamical Systems Modeling (2 units, 4 units). Prerequisite: consent of instructor. Concepts of dynamical systems as applied to systems studied by biomechanics, motor control, and behavioral theories. Six units may be taken for credit; however, only four units may be applied toward the minimum graduate course requirement. In Progress grading. Mr. Garfinkel

240. Neural Systems for Motor Control. Prerequisites: course 140, Psychology 115 (or equivalent). Proprioception, the skeletomotor and fusimotor systems and their control by spinal reflexes and supraspinal centers, including the cerebellum, basal ganglia, and cerebral cortices. Ms. Smith (Sp)

241. Theories of Voluntary Motor Control. Prerequisites: courses 240, 250. Exploration and discussion of neural control system for voluntary movement, including alpha-gamma linkage and closed versus open loops. Some attention to neural models for motor learning and memory. Ms. Smith

M243. Brainstem Control of Rhythmical Movements. (Same as Anatomy M226; lecture is the same as Oral Biology 207, which is two units only.) Lecture, two hours; discussion, two hours. Discussion of the central nervous system mechanisms which coordinate and control the contraction patterns of the muscles which are involved in behaviors such as suckling, chewing, swallowing, speech, respiration, and locomotion. Emphasis on the interaction among brainstem reflexes, pattern generators, and "voluntary" control centers. Mr. Chandler, Mr. Goldberg

250. Behavioral Approach to Motor Control. Prerequisites: course 120, consent of instructor. An information processing approach to skill acquisition and performance. Particular emphasis on current theories of motor control from the behavioral literature.

C253. Acquisition of Motor Skills. Prerequisite: course 120. An investigation into the principles of the acquisition of motor skills, such as those applicable to industry, musical performance, or sport. Major topic areas include methodological considerations, the structure of practice sessions, feedback and knowledge of results, theories of motor learning, and retention of skills. May be concurrently scheduled with course C153. Mr. Schmidt (W)

C256. Motor Behavior and Motor Control. Prerequisite: course 120. An analysis of primarily human movement behavior and control, with emphasis on a behavioral level of analysis. Topic areas include methodological issues, open- and closed-loop control, and individual differences. May be concurrently scheduled with course C156. Mr. Schmidt

260. Motor Development. Prerequisite: course 160. Critical analysis of behavioral approaches in the formulation of motor development theory. Mr. Keogh

262. Movement Disorders in Children. Prerequisite: course 160 or 165 or consent of instructor. Current research in developmental and behavioral aspects of movement disorders in children. Topics include early identification and intervention, perceptual and cognitive relationships, and evaluation of movement training programs. Mr. Cratty, Mr. Keogh

272. Motivation in Movement Contexts. Prerequisites: course 120, one course in psychology, and/or consent of instructor. Examination of the social, cultural, and psychological antecedents of achievement behavior in movement contexts. Current theories of achievement motivation, related research, and pertinent issues specific to physical activity; review of methodologies and motivation intervention techniques. Specific attention to sex, age, and environment-related influences on motivation and achievement patterns. Ms. Scanlan

M273. Social Psychological Aspects of Competitive Youth Sport. (Formerly numbered 273.) (Same as Psychology M234.) Prerequisite: course 120 or consent of instructor. Review of research concerning the social psychological aspects of competitive sport for children. Sport is presented as a major achievement domain for young participants. Topics include sources and consequences of competitive stress, significant adult influences and interactions, predictors of performance, determinants of participation and dropping out, and socialization through sport. Ms. Scanlan

C278. Group Dynamics in Sport. Prerequisite: course 120 or consent of instructor. Examination of group dynamics in sport. Topics include group productivity, group structure, leadership, motivational factors, cohesion, conflict. May be concurrently scheduled with course C178. Mr. Cratty, Ms. Scanlan (F)

290. Research Issues in Kinesiology (2 units). Seminar. Prerequisite: consent of instructor. Discussion of current research issues. Topics selected by participants in the class. Two 290 courses may be used to satisfy one seminar course requirement for the graduate program.

291A-291B-291C. Seminars in Cardiorespiratory Function and Adaptation (2 to 4 units each). Prerequisites: courses 207 and 208, or consent of instructor. Selected topics on cardiorespiratory function and adaptation. Students are required to present a two-hour seminar.

292A-292B-292C. Seminars in Biomechanics (2 to 4 units each). Prerequisites: courses 230A, 230B, consent of instructors. Selected topics in biomechanics of movement. Students are required to present a two-hour seminar.

293A-293B-293C. Seminars in Musculoskeletal Function and Adaptation (2 to 4 units each). Prerequisites: courses 118 and 208, or consent of instructor. Selected topics on the muscular determinants of movement, the metabolic aspects of exercise, and the mechanics of connective tissue. Students are required to present a two-hour seminar.

294A-294B-294C. Seminars in Neural Control of Movement (2 to 4 units each). Prerequisites: courses 140 and either 240 or M243. Selected topics on the neural determinants of movement behavior. Students are required to present a two-hour seminar.

295A-295B-295C. Seminars in Movement Performance and Learning (2 to 4 units each). Prerequisites: courses 250 or C253 and C256, or consent of instructor. Selected topics on current issues in acquisition and control of human movement. Students are required to present a two-hour seminar.

297A-297B-297C. Seminars in Social Psychological Aspects of Human Movement (2 to 4 units each). Prerequisite: course 272 or M273 or consent of instructor. Selected topics on current issues in the social psychological aspects of human movement. Students are required to present a two-hour seminar. Ms. Scanlan

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. In-Service Practicum for Teaching Assistants in Kinesiology (2 units). Prerequisite: consent of instructor. Required of all teaching assistants. Supervised practicum in teaching laboratory courses in kinesiology; material preparation and use of teaching aids. May not be applied toward degree requirements. S/U grading. (F)

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Individual Studies for Graduate Students (2 to 8 units). A petition signed by the faculty sponsor, graduate adviser, and graduate affairs committee chair must be submitted prior to the second week of class. Eight units may be taken for credit; however, only four units may be applied toward the minimum of five graduate courses required for the M.S. Eight units may be applied toward the eight kinesiology courses required for the Ph.D.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 16 units). To be arranged with faculty member serving as the student's comprehensive examination chair or doctoral committee chair. Course section is identified by a two-letter code using faculty member's initials (see department for code). May not be applied toward the M.S. or Ph.D. course requirements. May be repeated as necessary. S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 16 units). To be arranged with faculty member serving as the student's thesis committee chair. Course section is identified by a two-letter code using faculty member's initials (see department for code). May not be applied toward the M.S. course requirements. May be repeated as necessary. S/U grading.

599. Research for and/or Preparation of Ph.D. Dissertation (2 to 16 units). Course section is identified by a two-letter code using faculty member's initials (see department for code). May not be applied toward the Ph.D. course requirements. May be repeated as necessary. S/U grading.

Scope and Objectives

UCLA has been in the forefront of U.S. universities with significant teaching and research interests in Latin American studies for more than 50 years. More than 100 faculty members from 22 departments and professional schools regularly offer a broad range of courses with an emphasis on Latin America. These course offerings in the humanities, social sciences, fine arts, and professional fields provide students a unique opportunity to focus on Latin America, a region of growing importance.

The Latin American Studies Program, coordinated through UCLA's Latin American Center, offers the Bachelor of Arts and Master of Arts degrees. In the undergraduate major students develop a program combining language and methodological training with interdisciplinary studies in one of three areas: arts and humanities, social sciences, or ecology and environment. At the graduate level, students pursue more specialized coursework and interests, culminating in an interdisciplinary research study. Cooperative degree programs with the UCLA Schools of Architecture and Urban Planning, Education, Engineering and Applied Science, Library and Information Science, Management, and Public Health provide the opportunity to combine the M.A. in Latin American Studies with a master's degree in a professional field.

Bachelor of Arts Degree

Undergraduate studies of the Latin American region are designed to serve the needs of (1) students desiring a general education focused on the Latin American cultural region; (2) students planning to enter business, government, or international agency service; (3) students preparing to teach social science or language; and (4) students preparing for advanced academic study of Latin America.

Preparation for the Major

You must complete all preparation courses with a C (2.0) in each course; the courses are applicable toward the Letters and Science lower division general education requirements.

Foreign Language Requirement

Language requirements are uniform for all students in the major regardless of core area. Proficiency in two languages equivalent to (1) Spanish 25 and Portuguese 3 or (2) Portuguese 25 and Spanish 5 is required. In lieu of Portuguese 1, 2, and 3, you may take Portuguese 102A-102B which is designed for students with a background in Spanish. An indigenous language of Latin America may be substituted for the minor language.

Course Limitations

You may not take more than eight units of Latin American Studies 199 for letter-grade credit nor more than eight units in any single term. No course taken on a Passed/Not Passed basis may be applied toward the B.A. degree requirements. In order to register in a 199 course, you must have advanced junior standing and an overall GPA of 3.0, or senior standing.

Double Majors

Through judicious use of electives, you may find it possible to obtain the B.A. degree with two majors (e.g., Latin American studies and history). Interested students who have achieved junior standing should consult the undergraduate advisers of both departments involved, initiating the appropriate petition with the undergraduate adviser in Latin American Studies.

Study in Latin America

You are encouraged to spend up to one year in Latin America either (1) to study with an education abroad program; (2) to study in Latin American universities; (3) to conduct research; or (4) to complete an internship in an international or development agency. Full credit is granted according to the individual programs arranged in consultation with the undergraduate adviser. Proposals must be presented in writing to the interdepartmental committee.

Core Areas

You select one of three core areas as the focus of your major: arts and humanities, social sciences, or ecology and environment. Requirements for each core area are listed below.

Core I: Arts and Humanities

Preparation: Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Spanish and Portuguese M44; Art History 55 or Music 81K and Dance 73B.

Core Area: Ten upper division courses from the approved list distributed as follows:

(1) *Core Concentration:* Five courses from literature and folklore or fine arts (art, music, dance, theater arts) or linguistics. Only one course from the electives list may be applied toward the core concentration.

(2) *Theory and Methods:* One course from theory and methods.

(3) *Internal Breadth:* Four additional courses from the arts and humanities core area but outside the core concentration. No more than two of these may be electives.

External Breadth: From the approved list, six upper division courses outside the arts and humanities core area distributed as follows: two courses in each of two core concentrations such that at least one core concentration is selected from the social sciences core (e.g., history) and at least one is developed within the ecology and environment core (e.g., public health). No more than three external breadth courses may be electives.

Approved Undergraduate Course List

(1) Literature and Folklore

Folklore and Mythology M149. Folk Literature of the Hispanic World

History 169. Latin American Elitelore

Portuguese (Spanish and Portuguese) 130A-130B. Survey of Brazilian Literature

C131. Colonial Brazilian Literature

C132. Romanticism in Brazilian Literature

C133. Naturalism, Realism, and Symbolism in Brazilian Literature

C134. 20th-Century Brazilian Literature: Poetry and Drama

C135. 20th-Century Brazilian Literature: Novel

Spanish (Spanish and Portuguese) 136A-136B. Survey of Spanish-American Literature

137. The Literature of Colonial Spanish America

139. Romanticism and Realism in Spanish-American Literature

142. 20th-Century Spanish-American Literature: Fiction and the Essay

143. 20th-Century Spanish-American Literature: Poetry and Drama

144. Mexican Literature

M149. Folk Literature of the Hispanic World

170B. Senior Honors Seminar: Topics in Spanish-American Literature

Theory and Methods

Folklore and Mythology 101. Introduction to Folklore

190. Selected Topics in Folklore and Mythology Studies

199. Special Studies in Folklore

Portuguese (Spanish and Portuguese) 199. Special Studies

Spanish (Spanish and Portuguese) 119A. Introduction to the Study of Literature: Prose

119B. Introduction to the Study of Literature: Poetry and Drama

199. Special Studies

(2) Fine Arts

Art History (Art, Design, and Art History) C117A. Advanced Studies in Pre-Columbian Art: Mexico

C117B. Advanced Studies in Pre-Columbian Art: Central America

C117C. Advanced Studies in Pre-Columbian Art: The Andes

118B. The Arts of Pre-Columbian America

Dance 173B. Dance of Mexico

183A. Dance in Latin America

Motion Picture/Television (Theater, Film, and Television) 106C. History of African, Asian, and Latin American Film

Music 131A-131B. Music of Hispanic America

157. Music of Brazil

Theory and Methods

Anthropology *118A, 118B. Museum Studies

*133R. Aesthetic Anthropology

*137. Ethnography on Film

Art History (Art, Design, and Art History) *199. Special Studies in Art

Dance *199. Special Studies in Dance

Motion Picture/Television (Theater, Film, and Television) 199. Special Studies in Theater Arts

Music *M180. Analytical Approaches to Folk Music

*C190A-C190B. Proseminar in Ethnomusicology

*199. Special Studies in Music

(3) Linguistics

Portuguese (Spanish and Portuguese) 100A. Phonology and Morphology

*100B. Syntax

*M118A. The History of Portuguese and Spanish: Phonology

*M118B. The History of Portuguese and Spanish: Morphology and Syntax

Spanish (Spanish and Portuguese) *100A. Introduction to the Study of Spanish Grammar: Phonology and Morphology

*100B. Introduction to the Study of Spanish Grammar: Syntax

*115. Applied Linguistics

*M118A. The History of Portuguese and Spanish: Phonology

*M118B. The History of Portuguese and Spanish: Morphology and Syntax

*119A. Introduction to the Study of Literature: Prose

*119B. Introduction to the Study of Literature: Poetry and Drama

*170C. Senior Honors Seminar: Topics in Hispanic Linguistics

Theory and Methods

Anthropology *143A, 143B. Field Methods in Linguistic Anthropology

Linguistics *100. Introduction to Linguistics

*103. Introduction to General Phonetics

*110. Introduction to Historical Linguistics

*120A. Linguistic Analysis: Phonology

*120B. Linguistic Analysis: Grammar

*164. Modern Theories of Language

*C165A. Linguistic Theory: Phonology

*C165B. Linguistic Theory: Grammar

*170. Language and Society: Introduction to Sociolinguistics

*199. Special Studies in Linguistics

Portuguese (Spanish and Portuguese) *199. Special Studies

Spanish (Spanish and Portuguese) *199. Special Studies

(4) Electives

Anthropology *M140. Language in Culture

Folklore and Mythology *118. Folk Art and Technology

Latin American Studies 197. Interdisciplinary Topics in Latin American Studies

199. Special Studies in Latin American Studies

Motion Picture/Television (Theater, Film, and Television) 112. Film and Social Change

Music *M154A-M154B. The Afro-American Musical Heritage

Portuguese (Spanish and Portuguese) 140. Portuguese, Brazilian, and African Literature in Translation

Spanish (Spanish and Portuguese) 160B. Hispanic Literatures in Translation: Spanish America and Brazil

---

*Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Core II: Social Sciences

Preparation: Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Economics 1 and 2, or 100; Economics 40 or Sociology 18.

Core Area: Ten upper division courses from the approved list distributed as follows:

(1) *Core Concentration:* Five courses from anthropology and sociology or economics or geography or history or political science. Only one course from the electives list may be applied toward the core concentration.

(2) *Theory and Methods:* One course from theory and methods.

(3) *Internal Breadth:* Four additional courses from the social sciences core area but outside the core concentration. No more than two of these may be electives.

External Breadth: From the approved list, six upper division courses outside the social sciences core area distributed as follows: two courses in each of two core concentrations such that at least one core concentration is selected from the arts and humanities core (e.g., fine arts) and at least one is developed within the ecology and environment core (e.g., public health). No more than three external breadth courses may be electives.

---

*Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Master of Arts Degree

Admission

In addition to University minimum requirements, the B.A. degree in Latin American Studies constitutes the normal basis for admission. Applicants with a degree in another field can be admitted but must complete certain undergraduate prerequisites subsequent to admission. Applicants with Latin American field experience or special methodological studies are given special consideration. All applicants should meet minimum requirements in at least one language of Latin America. The following items are required:

(1) Three academic letters of recommendation, unless you have been away from school for some time, in which case one of the letters may be from an employer.

(2) A minimum of a 3.0 or B average in the junior/senior years of college.

(3) A statement of purpose discussing your background in Latin American studies, proposed program of study, and future career plans.

(4) A minimum score of 1,000 on the Aptitude Test (combined verbal and quantitative sections) of the Graduate Record Examination (GRE).

(5) A resume or curriculum vitae describing academic and Latin American experience.

Students are admitted each quarter. Application deadlines are November 1 for Winter Quarter, February 1 for Spring Quarter, and May 15 (or July 1 by special petition) for Fall Quarter.

Fellowship applications for the academic year are due on January 15 prior to the Fall Quarter for which application is made. Prospective students may write for departmental brochures to the Academic Programs Office, Latin American Center, 10347 Bunche Hall, UCLA, Los Angeles, CA 90024.

Major Fields or Subdisciplines

You are expected to develop and integrate three fields in Latin American studies, to be selected from the following: anthropology, art, economics, engineering, education, folklore, geography, history, law, library science, linguistics, management, music, political science, Portuguese, public health, sociology, Spanish, theater arts, and urban planning. At least one of the selected fields must be a social science.

Foreign Language Requirement

Proficiency equivalent to 24 quarter units of university-level Spanish and 12 quarter units of university-level Portuguese *or* 16 quarter units of university-level Portuguese and 20 units of university-level Spanish is required. Since these courses may not be applied toward the M.A. degree, you are encouraged to pass these proficiency levels by examination. A major Indian language of Latin America may be substituted for either Spanish or Portuguese. You must fulfill the foreign language requirement by examination or petition for a waiver of the examination if you have gained competency in another manner (i.e., native speaker, upper division coursework, Peace Corps service).

Course Requirements

Two plans are available. For the comprehensive examination plan, a minimum of nine courses is required, to be distributed among three fields or disciplines either on a 3-3-3 or 4-3-2 basis. Of the nine courses, five must be at the graduate level, with at least one in each of the three fields.

For the thesis plan (which requires prior approval), a minimum of 10 courses is required, to be distributed on a 4-3-3 basis among three fields. Three graduate-level courses are required in the first field, with one each in the two minor fields.

All courses must be selected from the department-approved list of courses. Other courses must be petitioned in advance.

Courses numbered in the 300 and 400 series are not applicable toward the M.A. degree.

No more than eight units of 500-series courses may be applied toward the total course requirement for the M.A. degree; no more than four units may be applied toward the five graduate courses required for the degree.

Graduate courses may be repeated unless they are lecture courses.

Comprehensive Examination Plan

In addition to course requirements, you must prepare a research paper on an approved topic that integrates two of the three fields in which coursework has been undertaken. Your research paper committee must approve your topic in advance and must receive a draft of the paper at least five weeks prior to the end of the quarter in which you plan to graduate. Committee members make recommendations for revision, evaluate the final draft and, if your work meets the University standards of scholarship, recommend the award of the M.A. degree.

Thesis Plan

Although you are generally expected to follow the M.A. comprehensive examination plan, in special cases you may be allowed to follow the M.A. thesis plan. You must develop a carefully prepared proposal that provides sound justification for the thesis plan, including provisions for funding any planned field research.

Once the thesis plan option has been approved, you select a three-member faculty thesis committee to work with you in the development of the thesis and to read, evaluate, and approve the drafts and final version. Once the final version is approved, the thesis committee recommends the award of the M.A. degree. By the end of the quarter before graduation, you must file for advancement to candidacy with the Graduate Division.

Cooperative Degree Programs

Several options are available to combine the M.A. in Latin American Studies with a professional degree. After acceptance by both the Latin American Studies Program and the respective professional school, you may pursue both degrees simultaneously. Articulated degree programs are currently available with the Schools of Education (M.Ed. in Curriculum), Engineering and Applied Science (M.S. in Engineering), Library and Information Science (M.L.S.), and Public Health (M.P.H.); articulated programs do not allow course credit to be applied toward more than one degree. Concurrent degree programs are available with the Graduate Schools of Architecture and Urban Planning (M.A. in Architecture/Urban Planning) and Management (M.B.A.).

Individual Ph.D. Programs

You may design an individual doctoral program in Latin American studies. An explicit proposal must be submitted to your M.A. committee for analysis and endorsement, and then be submitted to the Graduate Council for approval.

Lower Division Course

99. Introduction to Latin American Problems. Limited to 15 students. An interdisciplinary seminar for lower division students. May be repeated for credit with topic change.

Upper Division Courses

M155. Disease Problems of Socioeconomic and Political Impact in Latin America. (Same as Public Health M115.) Lecture, six hours; discussion, six hours. Prerequisite: one upper division course in Latin American studies. Social, economic, and political impact of important disease problems in Latin American countries. Mr. Work

197. Interdisciplinary Topics in Latin American Studies. Advanced interdisciplinary course for upper division students. May be repeated for credit with topic change.

199. Special Studies in Latin American Studies (4 or 8 units). Prerequisite: upper division standing. An intensive directed research program in which students conduct interdisciplinary research or complete an internship with an international agency or program dealing with Latin America. Faculty sponsorship and written reports required.

Graduate Courses

M200. Latin American Research Resources. (Same as History M265 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide the experience and competency required for future bibliographic and research sophistication as the basis for enhanced research results. Mr. Lauerhass

201. Statistical Resources for Latin American Research. The contemporary statistical materials important for research in Latin American studies. Discussion on the qualitative and interpretative aspects of the material, especially as it relates to data developed for publication in the Latin American Center's *Statistical Abstract of Latin America* and its Supplement Series.

M225. Computer Methodologies in Latin American Studies and Anthropology. (Same as Anthropology M289.) Lecture, three hours. Prerequisite: consent of instructor. Basic principles of computing and information processing, along with their potential application in Latin American research. Examination of the impact that computers are having in Latin American society. Mr. Behrens

M250A. Indians of South America. (Same as Anthropology M272.) Lecture, three hours. Prerequisite: consent of instructor. Survey of the literature and research topics related to Indian cultures of South America. May be repeated for credit. Mr. Wilbert

250B. Interdisciplinary Seminar in Latin American Studies. Lecture, three hours. Prerequisite: consent of instructor. Problem-oriented seminar on critical areas stressed in the University's cooperative programs in Latin America.

250C. Interdisciplinary Topics in Latin American Studies. Prerequisite: consent of instructor. Reading knowledge of Spanish or Portuguese is normally required. A seminar devoted to selected topics of an interdisciplinary nature.

M268A-M268B. Seminar in Recent Latin American History. (Same as History M268A-M268B.) Seminar, three hours. Prerequisite: consent of instructor. Reading knowledge of Spanish and Portuguese is normally required. A seminar devoted to selected topics of an interdisciplinary nature. In Progress grading. Mr. Wilkie

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). May be repeated, but only four units may be applied toward the minimum graduate course requirement. S/U grading.

597. Preparation for M.A. Comprehensive Examination (2 to 8 units). Ordinarily taken only during the quarter in which the student is being examined. S/U grading.

598. Research for and Preparation of M.A. Thesis. Only four units may be applied toward the minimum graduate course requirement. S/U grading.

Approved Graduate Course List

Refer to the Latin American Studies undergraduate section for the lists of approved undergraduate courses.

Fine Arts

Art History (Art, Design, and Art History) *201. Historiography of Art History

220. Oceanic, Pre-Columbian, African, and Native North American Art

Dance *280A-280E. Advanced Studies in Dance Ethnology

*Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Law and Society

4256 Bunche Hall, (213) 825-3862

Scope and Objectives

The Special Undergraduate Program in Law and Society can only be taken jointly with a major in political science, and all requirements for the political science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in political science and specialization in law and society. The program is designed to allow students to explore the relationships of law with ethics, economics, crime, and social and political institutions and theories.

Special Undergraduate Program

Preparation for the Program

Required: Political Science 10, 40, 70, and 20 or 50; two courses from History 7A, 7B, Philosophy 4, 6, 22.

Upper Division

The political science major should be completed as follows: Political Science 117; one course in Field I other than course 117; two courses in Field III; four courses in Field V; two other political science electives; six courses from Anthropology 152, Economics 172, History 151A, 151B, Philosophy 150, 151A, 151B, 157A, 157B, 166, Sociology 145, 146, 147, 162.

For further information, contact Vicki Waldman, Political Science Counselor, in the program office.

Bruce P. Hayes, Ph.D.
Thomas J. Hinnebusch, Ph.D. *(Linguistics and African Languages)*
Patricia A. Keating, Ph.D.

Assistant Professors

John W. Du Bois, Ph.D.
Hilda J. Koopman, Ph.D. *(Linguistics and African Languages)*
Timothy A. Stowell, Ph.D.
Eric Wehrli, Ph.D.

Adjunct Associate Professors

Susan R. Curtiss, Ph.D.
Ian Maddieson, Ph.D.

Scope and Objectives

The goal of linguistics is the enrichment of knowledge about the nature, grammar, and history of human language. Linguistics is a theoretical discipline, akin to philosophy, anthropology, and cognitive psychology. It is important for prospective students to understand that studying linguistics is not a matter of learning to speak many languages. Linguistics courses draw examples from the grammars of a wide variety of languages, and the more languages linguists know about in depth (as distinct from possessing fluency in the use of them), the more likely they are to discover universal properties. It is also possible to pursue these universal aspects of human language through the intensive in-depth study of a single language. This accounts for the high proportion of examples from English and familiar European languages found in linguistics courses and research publications.

The core areas of linguistic theory are phonology (with its roots in phonetics), syntax, and semantics. A grammar is a system of rules which characterize the phonology, syntax, and semantics of a natural language. The properties of grammars are the central focus of linguistic theory.

Because language is central to all humanistic disciplines, as well as to several social science areas, it is studied from many points of view. Linguistics itself cannot be said to recognize a single optimal approach to the subject. Hence, the courses provide a variety of approaches which reflect the diversity of the field.

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Linguistics Department was judged second best in the nation in the quality of its faculty. It offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees.

Undergraduate Study

The majors described below are of three types: (1) a major which concentrates entirely on general linguistics; (2) several majors which combine the basic courses of the general program with a language concentration or other related fields; and (3) a major which concentrates entirely on an African language area. The combined majors in conjunction with teacher certification programs are especially appropriate for students who have nonuniversity teaching careers as goals, and the African major is for students with specific African interests.

A 2.0 grade-point average in linguistics courses, with a C – or better in each, is required for all of the Linguistics Department majors.

Bachelor of Arts in Linguistics

This major is designed for students with an exceptional interest in and aptitude for the study of languages and linguistics. It enables the undergraduate to gain substantial familiarity with several languages and types of linguistic structure and to become conversant with the historical study of language and formal theories of linguistics.

Preparation for the Major

Required: Completion of the equivalent of the sixth quarter in each of two foreign languages or the sixth quarter in one foreign language and the third quarter in each of two other foreign languages. In addition you must take two of the following: Philosophy 31, Psychology 10, one course in cultural anthropology.

The Major

Required: A minimum of 11 upper division or graduate courses, including Linguistics 100, 103, 110, 120A, 120B, and either 164, C165A, or C165B (both C165A and C165B are strongly recommended for students planning linguistics graduate work; course 164 is recommended for students *not* planning linguistics graduate work). The remaining five courses are electives, three of which must be linguistics courses. The other two may be in linguistics or in certain other fields as listed below. Electives have generally been selected from the following list (courses not on the list may be used as electives only in consultation with an adviser): Linguistics C104, 125, 127, 130, C135, 140, M146, M150, 164, C165A, C165B, 170, 175, C180, 185, 195, 199 (if four units), African Languages 190, Anthropology 143A, 143B, Philosophy 127A, 127B, 172, Psychology 122, 123, English 121, 122, or upper division courses in a foreign language beyond the sixth quarter. In addition to the 11 upper division courses, at least three courses (which may be either upper or lower division) are required in a language other than those in the Romance, Slavic, or Germanic families. These courses may be applied toward the foreign language requirement described above under "Preparation for the Major." If you complete an advanced language course, you are considered to have completed the equivalent of whatever courses are prerequisite to that one (e.g., if you complete French 100A, you have automatically satisfied the requirement of the sixth quarter of work in one language).

Linguistics 195, or 196A and 196B are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper which can be submitted to graduate admissions committees. To enroll in the courses, you must consult with the department's senior essay and honors counselor.

Specialization in Computing

Students in any of the linguistics majors (except linguistics and computer science) may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 60, Linguistics C180, 185. You graduate with a bachelor's degree in your major and a specialization in computing.

Honors in Linguistics

Honors in linguistics are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 195 or 196A/196B. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Bachelor of Arts in Linguistics and Computer Science

Pre-Linguistics and Computer Science Major

Admission to the major is contingent on passing the following courses, which constitute the linguistics and computer science premajor, with a grade-point average of 3.3 or better and no grade lower than a C: Linguistics 100, Philosophy 31, Program in Computing 10A, 10B, 10C.

Preparation for the Major

Required: Mathematics 31A, 31B, Philosophy 31, Program in Computing 10A, 10B, 10C, 30, completion of the sixth quarter in one foreign language and the third quarter in a second foreign language. Mathematics 31A and 31B must be passed with grades of C or better. Mathematics 61 is strongly recommended.

The Major

Required: Fourteen upper division courses as follows: Linguistics 100, 103, C104, 120A, 120B, either 164, C165A, or C165B (the last of these being most strongly recommended for this major), C180, 185, one upper division elective in linguistics, Computer Science 111 or 181, 131, 132, 141, 163.

Bachelor of Arts in Linguistics and East Asian Languages and Cultures

Preparation for the Major

Required: Completion of the sixth quarter in either Chinese or Japanese; Philosophy 31; one course in cultural anthropology; either East Asian Languages and Cultures 40A or 40B, as appropriate; completion of the sixth quarter in one other foreign language or the third quarter in each of two other foreign languages.

The Major

Required: Linguistics 100, 103, 110, 120A, 120B, either 164, C165A, or C165B, one upper division elective in linguistics; for the classical Japanese track: East Asian Languages and Cultures 119A-119B, 129, 137, CM176, 179A, 179B; for the modern Japanese track: East Asian Languages and Cultures 119A-119B, CM176, three courses from 134A, 134B, 145, C166, C178, C181, C182; for the classical Chinese track: East Asian Languages and Cultures 113A-113B-113C, four courses from 152A, 152B, 163A, 163B, 163C; for the modern Chinese track: East Asian Languages and Cultures 121A-121B-121C, four courses from 122A, 122B, 124A, 124B, 124C, 126, 151A, 151B.

Bachelor of Arts in Linguistics and English

Preparation for the Major

Required: English 3, 10A, 10B, 10C, Philosophy 31, completion of the sixth quarter in each of two foreign languages or the sixth quarter in one foreign language and the third quarter in each of two other foreign languages.

The Major

Required: Fifteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either 164, C165A, or C165B, two upper division electives from other linguistics courses; English 121, 122, 140A, and four electives from 141A, 141B, 142A, 142B, 143, the 150 series (one course only), the 160 series (one course only), the 170 series (one course only).

Bachelor of Arts in Linguistics and French

Preparation for the Major

Required: French 1, 2, 3, 4, 5, 6, 12, 15, completion of the sixth quarter in one other foreign language or the third quarter in each of two other foreign languages.

The Major

Required: Sixteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either 164, C165A, or C165B, two upper division electives in linguistics, French 100A, 100B, 100C, 103, 105, 106, and two elective upper division French literature courses.

Bachelor of Arts in Linguistics and Italian

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 25, Latin 1, 2, 3, completion of the third quarter in one other foreign language or the sixth quarter in Latin, Philosophy 31, one course in cultural anthropology.

The Major

Required: Thirteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either 164, C165A, or C165B, two upper division electives in linguistics, Italian 102A, 190, and three additional upper division electives in Italian.

Bachelor of Arts in Linguistics and Philosophy

Preparation for the Major

Required: Philosophy 31, 32, and two courses from 1, 6, 7, 21; completion of the sixth quarter in each of two foreign languages or the sixth quarter in one foreign language and the third quarter in each of two other foreign languages.

The Major

Required: Fourteen upper division courses as follows: Linguistics 100, 103, 120A, 120B, C165B, three upper division electives in linguistics; six upper division courses in philosophy, including at least five from Philosophy 126A through 135, 170, 172, 184, 186, 187, 188, of which at least two must be from 127A, 127B, 172.

Bachelor of Arts in Linguistics and Psychology

Preparation for the Major

Required: Psychology 10, 41, 42, completion of the sixth quarter in one foreign language and the third quarter in a second foreign language. Program in Computing 10A is strongly recommended.

The Major

Required: Fourteen upper division courses as follows: Linguistics 100, 103, 120A, 120B, 130, two upper division electives in linguistics, Psychology 110, 120, 121, 122 or 123, 130, and the remaining elective to be selected from 112A, 112B, 112C, 112E, 115, 116, 124B, 135, 137A. Linguistics 164 and Psychology 115 are strongly recommended.

Bachelor of Arts in Linguistics and Scandinavian Languages

Preparation for the Major

Required: Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, 30, completion of the sixth quarter in one other foreign language or the third quarter in each of two other foreign languages.

The Major

Required: Fourteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either 164, C165A, or C165B, two upper division electives in linguistics, Scandinavian 105 and 106, or 110 twice, 199 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.

Bachelor of Arts in Linguistics and Spanish

Preparation for the Major

Required: Spanish 1, 2, 3, 4, 5, 25, M42, M44, completion of the sixth quarter in one other foreign language or the third quarter in each of two other foreign languages.

The Major

Required: Fifteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either 164, C165A, or C165B, two additional upper division courses in linguistics (preferably 130 and 170), Spanish 100A, 100B, 115 or M118A, 119A, 119B, and two additional upper division courses in Spanish.

Bachelor of Arts in African Languages

Preparation for the Major

Required: Nine courses from African Languages 1A through 42C and 199 (six in one language and three in another).

The Major

Required: A minimum of 15 upper division courses, including three courses in an African language; African Languages 150A-150B, 190, 192; Linguistics 100, 103; three courses selected from English 114, Geography 189, History 125A, 125B, 125C, 126A, 126B, 127A, 127B, 128A, 128B, Linguistics 110, 120A, 120B or 127, 140, M146, 170, Music 143A, 143B, Political Science 166A, 166B, 166C. Linguistics 164 and completion of the sixth quarter in one of the following non-African languages are strongly recommended: French, Dutch and Afrikaans, German, Portuguese, Arabic.

Graduate Study

The programs leading to the M.A. and Ph.D. degrees in Linguistics are open to qualified graduate students who are interested in descriptive, theoretical, and historical linguistics. Preparation for graduate study in linguistics should be equivalent in as many respects as possible to the undergraduate curriculum in linguistics.

There is also a graduate program leading to a Ph.D. in Applied Linguistics. It is administered by an interdepartmental committee, not by the Department of Linguistics. The requirements of the program are stated earlier in this chapter.

Master of Arts Degree

Admission

Students are normally admitted to begin residence in the Fall Quarter only (exceptions may be made by the chair). The deadline for submission of applications for the Fall Quarter is December 31 of the previous year. This deadline may occasionally be extended for applicants who do not wish to be considered for fellowship support.

Applicants are asked to submit a statement of purpose, which should include their background for graduate study in linguistics and their immediate and long-range goals in the field. They should also have at least two scholars under whom they have studied submit letters to the department about their qualifications. Scores on the verbal, quantitative, and analytical sections of the Graduate Record Examination (GRE) must be submitted with the

application. There is no minimum score requirement. In addition, applicants must submit a copy of some research paper or other piece of writing in linguistics or a closely related field.

While not required for admission, Linguistics 100, 103, 110, 120A, 120B, C165A, C165B are prerequisites to graduate courses in their respective areas. At the time of admission, students are notified which, if any, of the above courses are required due to deficiencies. However, if there is any question of whether courses taken elsewhere are equivalent to the above courses, students must discuss this with their advisers.

Prospective students may request an information brochure from the Administrative Analyst, Department of Linguistics, 2113 Campbell Hall, UCLA, Los Angeles, CA 90024. This brochure explains, in particular, advising procedures and procedures for the formation of M.A. and Ph.D. guidance committees.

Specialization

At the M.A. level, six core courses in phonetics, phonology, syntax, semantics, and historical linguistics are required. The remaining three (of the nine graduate courses required) may be taken in any area of linguistics, generally aiming toward a doctoral specialization. Except for these electives, no specialization is possible at the M.A. level.

Foreign Language Requirement

You must demonstrate knowledge of one research language before receiving an M.A. and a second research language before advancement to candidacy. Knowledge can be demonstrated by one of four methods: (1) a reading examination administered by the department; (2) a research paper based on extensive sources in the language; (3) a conversation examination showing knowledge in depth; (4) an Educational Testing Service (ETS) graduate language examination. One of the languages must have substantial literature on linguistics; the other may serve as a contact language for field research. The latter option must be approved by the departmental language committee. Native speakers of languages other than English may use English to meet one of the foreign language requirements unless English was the language of instruction in their elementary and secondary education. The departmental brochure provides details about the departmentally administered language examinations.

Course Requirements

The M.A. degree requires the completion, with a B average or better, of nine graduate courses in linguistics. The following eight courses are required: Linguistics C165A/C200A, C165B/C200B, 201A, 202, 203, 206A, 206B, 207. One elective is required and must be a graduate linguistics course. Students who enter without deficiencies will already have taken courses C165A and C165B or the equivalent, so they must take three electives in all. The core courses in the relevant areas are normally considered prerequisite to the proseminars (courses 251 through 259B), which may be repeated for credit with topic change. No more than four units of course 596A or 596B and no more than eight units of course 501 may be applied toward the required nine courses. Courses in the 260 series may be applied as electives for the M.A. if taken for four units.

The following undergraduate courses or the equivalent are prerequisite to graduate courses in the corresponding areas: Linguistics 100, 103, 110, 120A, 120B, C165A, C165B. Course 103 must have been passed with a grade of B or better as prerequisite to courses 210A and 210B. If course 103 is waived on the basis of training elsewhere, you must pass a department examination in practical phonetics. This requirement must be completed before admission into the doctoral program.

No more than two courses (with grades of B or better) from institutions outside the University of California may be applied toward the M.A.

Thesis Plan

After completing the required courses and the foreign language examination, students selecting this plan submit a thesis based on original research to a thesis committee for approval. All students intending to proceed to the Ph.D. must adopt this plan.

If you wish to be considered for advancement into the doctoral program, a copy of the thesis, complete and clearly legible, but not necessarily in final typed form, must be in the hands of the committee at least two weeks before the last day of classes in the quarter. Limits on the length of the thesis are stipulated in the departmental brochure.

Requirements for receiving an M.A. include the filing of a Petition for Advancement to Candidacy form early in the quarter during which you expect to take the degree. The thesis must be typed according to regulations set by the University. Information on these regulations and procedures is available from the Graduate Division.

Comprehensive Examination Plan

After completing the required courses and the foreign language examination, you must pass a comprehensive examination administered by a four-member committee of the faculty, appointed by the chair. This is normally an oral examination, general in scope, and results in a terminal M.A. degree.

Ph.D. Degree

Admission

General admission requirements are the same as those listed for the M.A. Students who have done their earlier graduate work at UCLA are considered for admission into the Ph.D. program on the basis of the following: (1) completion of all requirements for the M.A. and (2) the faculty's evaluation of the quality of the M.A. thesis and of the student's overall work and promise.

If you have already received an M.A. in Linguistics from another department or institution, you must fulfill all the requirements expected of an M.A. candidate, including the coursework, unless work elsewhere is equivalent and satisfies the course requirements. Then there are two possible procedures: (1) you may submit a master's thesis written at another institution or department or (2) if you have not written a thesis elsewhere, you must submit to the evaluation committee a paper equal in depth and scope to a thesis. A committee is appointed and, in either case, once the committee has approved the thesis or paper, it is submitted to the entire faculty who evaluate its quality and your accomplishments and promise.

Major Fields or Subdisciplines

You may specialize in syntax, semantics, phonology, phonetics, language change, typology, sociolinguistics, neurolinguistics, and many language areas, notably African languages and American Indian languages. Other specializations may be possible, depending on the availability of faculty expertise.

Foreign Language Requirement

A doctoral committee cannot be officially appointed until the foreign language requirement has been met. Details are given above under the "Foreign Language Requirement" for the M.A. degree.

Course Requirements

Candidates for the Ph.D. are required to have taken 36 units of graduate coursework beyond the M.A. requirements. These units must include Linguistics 210A and 210B, unless they have been used to fulfill the M.A. requirement, and eight units in an area distinct from that of the student's major area of concentration. The 36 units may not include courses 275, 597, or 599. Of the 36 units, no more than 12 units may be in course 596A. A maximum of four two-unit seminars may be included in the 36 units. At some time, you are expected to present some of the results of your research at a meeting of the Linguistics Department Colloquium. This is a requirement for the degree.

Qualifying Examinations

In order to be advanced to candidacy, you are required to prepare two substantive research papers of publishable quality in different areas

or fields of linguistics. These papers are to be submitted to and approved by a doctoral guidance committee. A written prospectus of the dissertation must be submitted to the guidance committee, with a copy for the department file, one month prior to the oral examination. At this time, provided the language requirement has been met, an official doctoral committee must be established.

The University Oral Qualifying Examination is administered by the doctoral committee, based primarily on the topic of the dissertation research. The examination deals with the background necessary for you to pursue research on the specific topic. Reexamination is possible on recommendation of the committee. You are expected to take the examination and be advanced to candidacy no later than six quarters after being admitted to the doctoral program.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

A final defense of the dissertation is required, scheduled at a time, and with advance notice, that will enable a substantial number of students and faculty to attend. The defense is not restricted to the doctoral committee.

General Linguistics

Lower Division Courses

1. Introduction to the Study of Language. A summary, for the general undergraduate, of what is known about human language; the unique nature of human language, its structure, its universality, and its diversity; language in its social and cultural setting; language in relation to other aspects of human inquiry and knowledge.

10. The Structure of English Words. Lecture, three to four hours. An introduction to the structure of English words of classical origin, including the most common base forms and the rules by which alternate forms are derived. Students may expect to achieve substantial enrichment of their vocabulary while learning about etymology, semantic change, and abstract rules of English word formation.
Mr. Stockwell

97. Lower Division Seminar. Variable topics; consult *Schedule of Classes*, College of Letters and Science, or department for current topic. May be repeated for credit.

Upper Division Courses

100. Introduction to Linguistics. An introduction to the theory and methods of linguistics: universal properties of human language; phonetic, phonological, morphological, syntactic, and semantic structures and analysis; the nature and form of grammar.

103. Introduction to General Phonetics. Lecture, three hours; laboratory, two hours. Prerequisite or corequisite: course 100 or equivalent. The phonetics of a variety of languages and the phonetic phenomena that occur in languages of the world. Extensive practice in the perception and production of such phenomena. Ms. Keating, Mr. Ladefoged

C104. Experimental Phonetics. Lecture, four hours; laboratory, two hours. Prerequisite: course 103. Survey of the principal techniques of experimental phonetics. Use of laboratory equipment for recording and measuring phonetic phenomena. Concurrently scheduled with course C204.
Mr. Anderson, Ms. Fromkin, Ms. Keating, Mr. Ladefoged

110. Introduction to Historical Linguistics. Prerequisites: courses 100, 103, 120A, and 120B or 127. The methods and theories appropriate to the historical study of language, such as the comparative method and method of internal reconstruction. Sound change, grammatical change, semantic change.
Mr. Anttila, Mr. Schuh, Mr. Stockwell

114. American Indian Linguistics. (Formerly numbered 114A, 114B.) Strongly recommended prerequisite: course 100. Survey of genetic, areal, and typological classifications of American Indian languages; writing systems for American Indian languages; American Indian languages in social and historical context. One or more languages may be investigated in detail. Ms. Munro (W or Sp)

120A. Linguistic Analysis: Phonology. Prerequisites: courses 100, 103. Descriptive analysis of phonological structures in natural languages; emphasis on insight into the nature of such structures rather than linguistic formalization.
Mr. Bedell, Mr. Bright, Mr. Hayes

120B. Linguistic Analysis: Grammar. Prerequisite: course 100. Course 120A is not prerequisite to 120B. Descriptive analysis of morphological and syntactic structures in natural languages; emphasis on insight into the nature of such structures rather than linguistic formalization.
Mr. Bedell, Mr. Bright, Mr. Stowell

125. Semantics. Prerequisite: course 120B. A survey of the most important theoretical and descriptive claims about the nature of meaning.
Ms. Thompson

127. Syntactic Typology and Universals. Prerequisite: course 100. A study of the essential similarities and differences among languages in the grammatical devices they use to signal the following kinds of concepts: relations between nouns and verbs (case and word order), negation, comparison, existence/location/possession, causation, interrogation, reflexivization, relativization, attribution (adjectives), time (tense and aspect), and backgrounding (subordination). Data from a range of languages presented and analyzed. Mr. Keenan, Ms. Thompson

130. Child Language Acquisition: Introduction. Prerequisites: courses 100, 120A, and 120B, or consent of instructor. A survey of contemporary research and theoretical perspectives in the acquisition of language. Emphasis on linguistic interpretation of existing data, with some attention to relationship with second language learning, cognitive development, and other topics. Discussion of acquisition of English and other languages and universals of linguistic development. Ms. Keating

C135. Theoretical Issues in Disorders of Language Development. (Formerly numbered CM135.) Prerequisites: courses 1 or 100, and 130, or consent of instructor. Introduction to the field of language disorders of children. Some clinical syndromes which are associated with delayed or deviant language acquisition: aphasia, autism, mental retardation. Theories regarding etiology and the relationship of these disorders to each other. Such questions as the relationship of cognition to linguistic ability. Concurrently scheduled with course C235.

140. Linguistics in Relation to Language Teaching. Prerequisites: courses 120A, 120B. Aspects of linguistics in relation to the teaching of language, with particular focus on the special problems entailed in the teaching of non-European languages.
Mr. Stockwell

M146. Language in Culture. (Same as Anthropology M140.) Prerequisite: upper division standing or consent of instructor. The study of language as an aspect of culture; the relation of habitual thought and behavior to language; and language and the classification of experience. A holistic approach to the study of language, with emphasis on the relationship of linguistic anthropology to the fields of biological, cultural, and social anthropology, as well as archaeology.
Mr. Kroskrity

M150. Introduction to Indo-European Linguistics. (Same as Indo-European Studies M150.) Prerequisites: one year of college-level study (course 3 or better, eight units minimum) of either Greek or Latin and either German or Russian. A survey of the Indo-European languages from ancient to modern times; their relationships and chief characteristics.
Mr. Anttila

164. Modern Theories of Language. Prerequisites: courses 120A, 120B. A critical and historical survey of some of the central claims and types of supporting evidence put forward by transformational theory and by at least one other influential school of contemporary linguistics. About one third of the course deals with phonology, the remainder with syntax and semantics. Students who plan to take courses C165A, C165B should not take 164.
Mr. Bedell, Mr. Schachter, Mr. Stowell

C165A. Linguistic Theory: Phonology. Prerequisite: course 120A. Recommended for students who plan to do graduate work in linguistics. The theory of generative phonology; the form of phonological rules; formal and substantive phonological universals. Concurrently scheduled with course C200A.
Mr. Anderson, Mr. Hayes

C165B. Linguistic Theory: Grammar. Prerequisite: course 120B. Recommended for students who plan to do graduate work in linguistics. The form of grammars; word formation and sentence formation; formal and substantive universals in syntax; relation between syntax and semantics. Concurrently scheduled with course C200B.
Mr. Schachter, Mr. Stowell

170. Language and Society: Introduction to Sociolinguistics. Prerequisite: course 100 or consent of instructor. Study of the patterned covariation of language and society; social dialects and social styles in language; problems of multilingual societies.
Mr. Du Bois

175. Linguistic Change in English. Prerequisites: courses 110, 120A, 120B. Principles of linguistic change as exemplified through a detailed study of the history of English pronunciation, lexicon, and syntax.
Mr. Stockwell

M176. Introduction to the Structure of Japanese. (Same as East Asian Languages and Cultures CM176.) Lecture, three hours. Prerequisite: two years of Japanese. Knowledge of linguistics is not required. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in the form of a contrastive analysis of Japanese and English. Ms. Akatsuka

C180. Mathematical Backgrounds for Linguistics. Prerequisites: courses 120A, 120B. Prior mathematics knowledge is not assumed. Introduction to selected topics in set theory, logic and formal systems, modern algebra, and automata theory, with elementary applications to linguistics. Topics vary each quarter. Concurrently scheduled with course C208.
Mr. Keenan

185. Introduction to Computational Linguistics. (Formerly numbered 145.) Prerequisites: courses 120B, C180, Program in Computing 10B. Recommended: course C165B, Program in Computing 60. Basic training in computational linguistics. Overview of the field and discussion of some applications, focusing on computational models and parsing algorithms, including transition networks and chart parsers. Students expected to complete programming exercises. Mr. Wehrli

195. Senior Essay. Prerequisite: consent of instructor. Limited to senior linguistics majors. An extended piece of writing is undertaken on a linguistic topic selected by the student to be completed under the supervision of a faculty member. Consult the professor in charge to enroll.

196A. Honors Essay. Prerequisites: 3.5 GPA, course C165A or C165B (may be taken concurrently). Recommended (but not required): completion of both courses C165A and C165B before or during the quarter in which course 196A is taken. A draft of an extended piece of writing on a linguistic topic selected by the student is prepared under the supervision of a faculty member. Consult the professor in charge to enroll. In Progress grading (credit to be given only on completion of course 196B). (Sp)

196B. Honors Essay (2 units). Prerequisite: course 196A. The piece of writing drafted in course 196A is presented in a seminar, revised, and put into final form under the supervision of a faculty member. Consult the professor in charge to enroll. (F)

197. Special Topics in Linguistics. Prerequisite: course 1 or 100 or consent of instructor. Variable topics selected from any undergraduate linguistics course area in which students desire greater in-depth knowledge. May be repeated for credit with topic change.

199. Special Studies in Linguistics (2 to 4 units). Prerequisites: courses 120A, 120B, consent of instructor. May be repeated for credit.

Graduate Courses

C200A. Linguistic Theory: Phonology. Prerequisite: course 120A. The theory of generative phonology; the form of phonological rules; formal and substantive phonological universals. Concurrently scheduled with course C165A. While the topics of coverage are the same for undergraduate and graduate students, the depth of reading required of graduate students is greater, with more primary sources included. Also, graduate students are expected to produce a substantially deeper and more thorough research paper. Mr. Anderson, Mr. Hayes

C200B. Linguistic Theory: Grammar. Prerequisite: course 120B or 127. The form of grammars; word formation and sentence formation; formal and substantive universals in syntax; relation between syntax and semantics. Concurrently scheduled with course C165B. While the topics of coverage are the same for undergraduate and graduate students, the depth of reading required of graduate students is greater, with more primary sources included. Also, graduate students are expected to produce a substantially deeper and more thorough research paper.
Mr. Schachter, Mr. Stowell

201A. Phonological Theory: Current Issues. Prerequisite: course C165A/C200A. Survey of current issues in phonological theory.
Mr. Anderson, Mr. Bedell, Mr. Hayes

201B. Phonological Theory in the 20th Century. Prerequisite: course C165A/C200A. Survey of the development of phonological theory in the 20th century. Mr. Anderson, Mr. Bedell

202. Theory of Language Change. Prerequisite: course 110. Survey of current issues in language change.
Mr. Anttila, Ms. Munro, Mr. Schuh, Mr. Stockwell

203. Theory of Phonetics. Prerequisite: course 120A. The preliminaries to speech analysis. Functional anatomy of the vocal organs; fundamental principles of acoustics and of the acoustic theory of speech production; issues in the perception of speech; the nature and design of feature systems for phonetic and phonological analysis.
Mr. Anderson, Ms. Keating, Mr. Ladefoged

C204. Experimental Phonetics. Lecture, four hours; laboratory, two hours. Prerequisite: course 103. Survey of the principal techniques of experimental phonetics. Use of laboratory equipment for recording and measuring phonetic phenomena. Concurrently scheduled with course C104. Graduate students are expected to produce a substantial research paper.
Mr. Anderson, Ms. Fromkin, Ms. Keating, Mr. Ladefoged

205. Morphological Theory: Current Issues. Prerequisites: courses C165A/C200A, C165B/C200B, or equivalent. Survey of current theories and research problems in morphology. Nature of morphological structure; derivational and inflectional morphology; relation of morphology to phonology, syntax, and the lexicon. Mr. Anderson, Mr. Hayes

206A. Syntactic Theory: Current Issues in Formal Syntax. Prerequisite: course C165B/C200B. Survey of current issues in formal syntactic theory.
Mr. Schachter, Mr. Stowell

206B. Syntactic Theory: Current Issues in Functional and Typological Approaches to Syntax. Prerequisite: course C165B/C200B. Survey of current issues in functional and typological approaches to syntax. Mr. Du Bois, Ms. Thompson

207. Semantic Theory. Recommended prerequisite when theoretical perspective is that of formal semantics: course C180 or equivalent. Approaches to the study of meaning. Different offerings of the course approach semantics from different theoretical perspectives (e.g., formal semantics, functional semantics, interpretive semantics). May be repeated for credit if theoretical approach is different.
Mr. Du Bois, Mr. Keenan

C208. Mathematical Backgrounds for Linguistics. Prerequisites: courses 120A, 120B. Corequisite: course C200B. Prior mathematics knowledge is not assumed. Introduction to selected topics in set theory, logic and formal systems, modern algebra, and automata theory, with elementary applications to linguistics. Topics vary each quarter. Concurrently scheduled with course C180. Graduate students are expected to complete additional problem sets.
Mr. Keenan

209. Natural Language Processing. Recommended prerequisites: courses C165B, C180, 185, or equivalent. Computational models of language processing, with emphasis on syntactic processing. Overview of field. Artificial vs. natural language processing techniques. Discussion and evaluation of several parsing strategies (ATN, two-stage parsers, deterministic parsers, etc.) from computational and psychological points of view. Mr. Wehrli

210A. Field Methods I (6 units). Prerequisites: courses C165A/C200A, C165B/C200B. Analysis of a language unknown to members of the class from data elicited from a native speaker of the language. Term papers are relatively full descriptive sketches of the language. May be repeated for credit with topic change.

210B. Field Methods II (6 units). Prerequisite: course 210A in preceding quarter. Because different languages are investigated in different years, course 210B can only be taken as a direct continuation of 210A in the same year. When there are multiple sections, continuation must be in the same section. May be repeated for credit with topic change.
Mr. Bright, Ms. Munro, Mr. Schachter

220. Linguistic Areas. Prerequisites: courses 120A, and 120B or 127. Recommended: courses C165A/C200A, C165B/C200B. Analysis and classification of languages spoken in a particular area (e.g., Africa, the Balkans, South Asia, Southeast Asia, Australia, Aboriginal North America, Aboriginal Latin America, Far East, etc.). May be repeated for credit with topic change.

225. Linguistic Structures. Prerequisites: courses 120A, and 120B or 127. Recommended: courses C165A/C200A, C165B/C200B. Phonological and grammatical structure of a selected language and its genetic relationships to others of its family. May be repeated for credit with topic change.

C235. Theoretical Issues in Disorders of Language Development. (Formerly numbered CM235.) Prerequisites: courses 1 or 100, and 130, or consent of instructor. Introduction to the field of language disorders of children. Some clinical syndromes which are associated with delayed or deviant language acquisition: aphasia, autism, mental retardation. Theories regarding etiology and the relationship of these disorders to each other. Such questions as the relationship of cognition to linguistic ability. Concurrently scheduled with course C135. Graduate students are expected to apply more sophisticated knowledge and produce a research paper of greater depth.

M246C. Topics in Linguistic Anthropology. (Same as Anthropology M241.) Prerequisite: consent of instructor. Problems in relations of language, culture, and society. May be repeated for credit.

Proseminars numbered 251 through 254 may be taken for either two or four units. If a proseminar is taken for four units, a paper is required. Proseminars and seminars numbered 251 and above may be repeated for credit, having been approved by the Graduate Council as nonrepetitive in content.

251. Topics in Phonetics and Phonology I: Proseminar (2 or 4 units). Prerequisite: course C165A/C200A. Courses 201A and/or 203 may be required. Specialized topics in phonetics and phonology. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. Meets with course 256A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

252. Topics in Syntax and Semantics I: Proseminar (2 or 4 units). Prerequisite: course C165B/C200B. Course 206A, 206B, or 207 may be required. Specialized topics in syntax and semantics. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. Meets with course 257A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

253. Topics in Language Variation I: Proseminar (2 or 4 units). Prerequisite: course 110. Course 202 may be required. Specialized topics in language variation. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. Meets with course 258A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

254. Topics in Linguistics I: Proseminar (2 or 4 units). Prerequisites: courses C165A/C200A, C165B/C200B, consent of instructor. Course 201A, 201B, 202, 203, 206A, 206B, or 207 may be required. Individual proseminars on topics such as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, psycholinguistics, etc. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. Meets with course 259A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

256A. Topics in Phonetics and Phonology II: Proseminar. Prerequisite: course C165A/C200A. Courses 201A and/or 203 may be required. Specialized topics in phonetics and phonology. May be repeated for credit. Meets with course 251. In Progress grading (credit to be given only on completion of course 256B).

256B. Topics in Phonetics and Phonology II: Proseminar (2 units). Prerequisite: course 256A. Specialized topics in phonetics and phonology. May be repeated for credit.

257A. Topics in Syntax and Semantics II: Proseminar. Prerequisite: course C165B/C200B. Courses 206A, 206B, and/or 207 may be required. Specialized topics in syntax and semantics. May be repeated for credit. Meets with course 252. In Progress grading (credit to be given only on completion of course 257B).

257B. Topics in Syntax and Semantics II: Proseminar (2 units). Prerequisite: course 257A. Specialized topics in syntax and semantics. May be repeated for credit.

258A. Topics in Language Variation II: Proseminar. Prerequisite: course 110. Course 202 may be required. Specialized topics In language variation. May be repeated for credit. Meets with course 253. In Progress grading (credit to be given only on completion of course 258B).

258B. Topics in Language Variation II: Proseminar (2 units). Prerequisite: course 258A. Specialized topics in language variation. May be repeated for credit.

259A. Topics in Linguistics II: Proseminar. Prerequisites: courses C165A/C200A, C165B/C200B, consent of instructor. Course 201A, 201B, 202, 206A, 206B, or 207 may be required. Individual proseminars on topics such as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, psycholinguistics, etc. May be repeated for credit. Meets with course 254. In Progress grading (credit to be given only on completion of course 259B).

259B. Topics in Linguistics II: Proseminar (2 units). Prerequisite: course 259A. Individual proseminars on topics such as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, psycholinguistics, etc. May be repeated for credit.

Seminars numbered 260A through 264C may be taken for either two or four units. If a seminar is taken for four units, an oral presentation is required. Seminars may be taken for two units credit only by students who have been formally admitted to the doctoral program. All others must enroll for four units.

260A-260B-260C. Seminar in Phonetics (2 or 4 units). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

261A-261B-261C. Seminar in Phonology (2 or 4 units). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

262A-262B-262C. Seminar in Syntax and Semantics (2 or 4 units). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

263A-263B-263C. Seminar in Language Variation (2 or 4 units). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

264A-264B-264C. Seminar in Special Topics in Linguistic Theory (2 or 4 units). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. Special topics may include child language, neurolinguistics, psycholinguistics, sociolinguistics, etc. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

275. Linguistics Colloquium. Prerequisite: completion of the M.A. requirements. Varied linguistic topics, generally presentations of new research by students, faculty, and visiting scholars. S/U grading.

276. Linguistics Colloquium (No credit). Prerequisite: graduate standing. Same as course 275, but taken without credit by students not presenting a colloquium. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

411A-411B-411C. Research Orientation (1 unit each). (Formerly numbered 411A-411B.) Prerequisite: graduate standing. Sequence of lectures by all faculty of the department, plus faculty from closely related departments and programs, to acquaint new graduate students with the research directions and resources of the department and elsewhere on campus. May not be applied toward the M.A. or Ph.D. requirements. S/U grading.

422. Practicum in Phonetic Data Analysis (2 units). Prerequisite: graduate standing. Workshop in the examination of phonetic data, such as sound spectrograms, oscillographic records, and computer output. May not be applied toward the M.A. or Ph.D. degree requirements. S/U grading.

Ms. Keating, Mr. Ladefoged

433. The Use of Computers in Linguistics (2 units). Prerequisite: graduate standing in linguistics. Guided use of the departmental computer facilities. May not be applied toward the M.A. or Ph.D. degree requirements. S/U grading.

Mr. Hayes, Mr. Ladefoged

495. College Teaching of Linguistics (2 units). Prerequisite: graduate standing. Required of all new teaching assistants. Seminars, workshops, and apprentice teaching. Selected topics, including curriculum development, various teaching strategies and their effects, teaching evaluation, and other topics on college teaching. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596A. Directed Studies (1 to 8 units). Prerequisite: completion of all undergraduate deficiency courses. Directed individual study or research. May be applied toward the M.A. course requirements. May be repeated for credit. S/U grading.

596B. Directed Linguistic Analysis (1 to 8 units). Prerequisite: completion of M.A. degree requirements. Intensive work with native speakers by students individually. May be repeated for credit. S/U grading.

597. Preparation for M.A. Comprehensive and Ph.D. Qualifying Examinations (1 to 8 units). Prerequisite: at least six graduate courses in linguistics. May be taken *only* in the quarters in which students expect to take the comprehensive or qualifying examination. May not be applied toward the M.A. course requirements. May be repeated for credit. S/U grading.

598. Research for M.A. Thesis (1 to 8 units). Prerequisite: consent of guidance committee chair. Research and preparation of M.A. thesis. May not be applied toward the M.A. course requirements. May be repeated for a maximum of eight units. S/U grading.

599. Research for Ph.D. Dissertation (1 to 16 units). Prerequisite: advancement to Ph.D. candidacy. May not be applied toward the Ph.D. course requirements. May be repeated for credit. S/U grading.

African Languages

Lower Division Courses

1A-1B-1C. Elementary Swahili. Lecture, five hours. The major language of East Africa, particularly Tanzania. Mr. Hinnebusch

2A-2B-2C. Intermediate Swahili. Prerequisites: courses 1A-1B-1C or consent of instructor.

Mr. Hinnebusch

7A-7B-7C. Elementary Zulu. Lecture, five hours. The most widely spoken of the Nguni languages of South Africa; mutually intelligible with other members of this group. Mr. Kunene

8A-8B-8C. Intermediate Zulu. Prerequisites: courses 7A-7B-7C or consent of instructor.

Mr. Kunene

11A-11B-11C. Elementary Yoruba. Lecture, five hours. Prerequisite: consent of instructor. The major language of Western Nigeria.

12A-12B-12C. Intermediate Yoruba. Prerequisites: courses 11A-11B-11C or consent of instructor.

31A-31B-31C. Elementary Bambara. Lecture, five hours. Prerequisite: consent of instructor. The major language of Mali, also widely spoken in adjacent parts of West Africa; includes Maninka (Malinke), Dyula, and other mutually intelligible dialects.

32A-32B-32C. Intermediate Bambara. Prerequisites: courses 31A-31B-31C or consent of instructor.

41A-41B-41C. Elementary Hausa. Lecture, five hours. The major language of Northern Nigeria and adjacent areas. Mr. Schuh

42A-42B-42C. Intermediate Hausa. Prerequisites: courses 41A-41B-41C or consent of instructor.

Mr. Schuh

51A-51B-51C. Elementary Amharic. Lecture, five hours (15 hours for intensive course). The major language of Ethiopia. P/NP (undergraduates), S/U (graduates), or letter grading.

52A-52B-52C. Intermediate Amharic. Lecture, five hours (15 hours for intensive course). Prerequisites: courses 51A-51B-51C or consent of instructor. P/NP (undergraduates), S/U (graduates), or letter grading.

97. Elementary and Intermediate Studies in African Languages. Prerequisite: consent of instructor. Instruction at an elementary or intermediate level, based on the needs of the students, in any language for which appropriate facilities are available. Those taught in the past included Akan, Efik, Fula, Igbo, Lingala, Luganda, and Xhosa.

Upper Division Courses

103A-103B-103C. Advanced Swahili. Prerequisites: courses 2A-2B-2C or consent of instructor. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili.

Mr. Hinnebusch

123A-123B-123C. Advanced Yoruba. Prerequisites: courses 12A-12B-12C or consent of instructor. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba.

133A-133B-133C. Advanced Bambara. Prerequisites: courses 32A-32B-32C or consent of instructor. Readings in Bambara literature and the contemporary press. Discussions mainly in Bambara.

143A-143B-143C. Advanced Hausa. Prerequisites: courses 42A-42B-42C or consent of instructor. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa. Mr. Schuh

150A-150B. African Literature in English Translation. (Formerly numbered 150A-150B-150C.) Prerequisite: History 10A or 10B. Course 150A is prerequisite to 150B. Narrative and didactic oral prose and poetry of sub-Saharan Africa and written prose and poetry of South Africa. Mr. Kunene

153A-153B-153C. Advanced Amharic. Lecture, five hours (15 hours for intensive course). Prerequisites: courses 52A-52B-52C or consent of instructor. Readings in Amharic literature and the contemporary press. Discussions mainly in Amharic. P/NP (undergraduates), S/U (graduates), or letter grading.

190. Survey of African Languages. An introduction to the languages of Africa, their distribution and classification, and their phonological and grammatical structures; illustrations from several representative languages, with appropriate language laboratory demonstrations and drills.

192. Comparative Studies in African Languages. Prerequisites: two quarter courses in an African language or course 190. Recommended prerequisite or corequisite: Linguistics 110. Comparison of structural and lexical features of a group of closely related languages, such as Southern Bantu, Southwestern Mande, Akan, or Senufo.

199. Special Studies in African Languages (1 to 6 units). Prerequisite: consent of instructor. Instruction at an advanced level or supervised research, based on the needs of individual students, in any language or group of languages for which appropriate facilities are available.

Graduate Courses

201A-201B. Comparative Niger-Congo. Prerequisites: Linguistics C165A, C165B, 220. Recommended: three quarter courses in one Niger-Congo language selected from courses 1A through 32C, 199. Investigation of relationships within the Niger-Congo family as a whole or within selected branches of the family.

202A-202B-202C. Comparative Bantu. Prerequisites: Linguistics 110, C165A, C165B. Recommended: three quarter courses in one Bantu language selected from courses 1A through 8C, 199. Investigation of relationships among the Bantu languages; the extent and external relationships of Bantu.
Mr. Hinnebusch

270. Seminar in African Literature. Mr. Kunene

596. Directed Studies (1 to 8 units). Directed individual study or research. Four units may be applied toward the M.A. course requirements. May be repeated for credit. S/U grading.

Indigenous Languages of the Americas

Lower Division Courses

18A-18B-18C. Elementary Quechua. Lecture, five hours. The language of the Incas and its present-day dialects, as spoken in Andean South America.

Upper Division Courses

119A-119B-119C. Advanced Quechua. Prerequisites: courses 18A-18B-18C or consent of instructor. Readings in Quechua. Dialectal and stylistic variation. Discussions mainly in Quechua. Mr. Bedell

Graduate Course

596. Directed Studies in Quechua (1 to 8 units). Prerequisites: courses 119A-119B-119C or consent of instructor. Directed individual study or research in Quechua. Four units may be applied toward the M.A. course requirements. May be repeated for credit. S/U grading.

Related Courses in Other Departments (Other than Language Courses)

Anthropology 143A. Field Methods in Linguistic Anthropology: Practical Phonetics

143B. Field Methods in Linguistic Anthropology: Syntax, Semantics, Textual Cohesion

Armenian (Near Eastern Languages) 210. History of the Armenian Language

Dutch and Afrikaans (Germanic Languages) 234. The Structure of Modern Standard Dutch

East Asian Languagea and Cultures CM176. Introduction to the Structure of Japanese

223. Seminar: Linguistic Analysis of Japanese Narratives

English 121. The History of the English Language

122. Introduction to the Structure of Present-Day English

210. History of the English Language

218. Celtic Linguistics

240. Studies in the History of the English Language

241. Studies in the Structure of the English Language

English (ESL) 241K. Contrastive and Error Analysis in the ESL Context

260K. Psycholinguistics and Language Teaching

280K. Language Policy in Developing Countries

Folklore and Mythology 217. Folk Speech

French 204A. Phonology and Morphology from Vulgar Latin to French Classicism

204B. Syntax and Semantics from Vulgar Latin to French Classicism

Scope and Objectives

Gauss has called mathematics the "Queen of the Sciences." It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics aims to provide courses of study that will introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

Undergraduate Study

Preliminary Examination in Mathematics

If you wish to enroll in Mathematics A or 1, you are required to take the mathematics section of the Chemistry/Mathematics Preliminary Examination; if you wish to enroll in Mathematics 3A or 31A, you must pass the examination.

This examination may be taken at any one of several times, including all sessions of the summer Orientation Program. It will also be given on Tuesday, September 23, 1986, for Fall Quarter 1986; Wednesday, October 29, 1986, for Winter Quarter 1987; and Wednesday, February 4, 1987, for Spring Quarter 1987. For information, contact the Undergraduate Mathematics Office, 6375 Math Sciences (206-6857).

Advanced Placement in Calculus

Students who have taken the Advanced Placement (AP) Calculus AB test and obtained a score of 3 or higher receive five units of credit and Mathematics 31A equivalency. Those who take the BC test and obtain a score of 3 or higher receive 10 units of credit and Mathematics 31A, 31B equivalency.

If you have had calculus in high school but do not have Advanced Placement Test credit, you may take beginning calculus (Mathematics 3A or 31A), or you may seek advanced placement by passing examinations in the subject. Consult the Undergraduate Mathematics Office for further details.

Credit Limitations

Credit will be given for at most one course in each of the following groups: (1) 3A, 31A, 31AH; (2) 3B, 31B, 31BH; (3) 3C, 3E; (4) 110A, 117; (5) 131C, 131CH, 132; (6) 140A, 141A; (7) 150A, 152A.

Mathematics 2, 38A, 38B, and 50 are not open for credit to students with credit for any course from Mathematics 110A through 199.

Mathematics 140A-140B-140C and 141A-141B are not open for credit to students with credit for Electrical Engineering 103 (or former course 124A.)

Mathematics 150A-150B and 152A-152B are not open for credit to students with credit for Electrical Engineering 131A (or former course 120A.)

You may not take a mathematics course for credit if you have credit for a more advanced course which has the first course as a prerequisite. This applies in particular to the repetition of courses (e.g., if you wish to repeat Mathematics 31B, you must do so before completing course 32A).

Program in Computing

The Program in Computing is not a major, but a supplement to existing Letters and Science majors. The purpose of the program is to offer all students an opportunity to obtain elementary education in computer science.

Program in Computing 1 is designed for students who wish a broad, general introduction to the topic of computers and computation. It is also strongly recommended for those who wish to take course 3 or 10A, but who have no prior experience in computing.

The balance of the curriculum is designed for several constituencies:

(1) Letters and Science majors who wish to obtain an extensive education in basic computer science and then apply this knowledge to their discipline should take Program in Computing 10A, 10B, 10C and, depending on the advice of their major department, either course 30 or 60 or both.

(2) Pre-mathematics majors who wish to advance to the mathematics of computation major must take Program in Computing 10A, 10B, 10C or 30, and the related required courses in mathematics and physics.

(3) Physical science students who would like one course in programming should take either Program in Computing 3 (uses FORTRAN) or 10A (uses PASCAL), on the advice of their major department.

Pre-Mathematics Major

All students who wish to enter one of the majors offered by the Mathematics Department must first register as a pre-mathematics major. After completing all required preparation courses for the major of your choice and before accumulating a total of 135 quarter units, you should apply for admission to the major by filing a change of major petition in the Undergraduate Mathematics Office, 6375 Math Sciences. Transfer students must have completed a minimum of three preparation for the major and major courses at UCLA before petitioning to enter the major.

Admission requirements for the operations research plan under the mathematics/applied science major differ from those stated above (see "Operations Research Plan" later in this section). Petitions to enter the operations research plan and the mathematics of computa-

tion major are processed once per year and must be submitted by the deadlines indicated in the descriptions of those programs.

Admission Requirements: Students entering UCLA directly from high school who declare themselves as pre-mathematics majors at the time they apply for admission are automatically admitted as such.

UCLA students who wish to enter the pre-mathematics major must have a minimum grade of C – in each preparation for the major course completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed major courses must also average at least 2.0. Students with 60 or more units of credit must have completed at least 12 units of calculus to enter the pre-mathematics major.

Transfer students must have a minimum grade of C in the equivalent of each preparation for the major course completed. Those transferring with 60 or more quarter units of credit must have completed at least 12 quarter units of calculus to enter the pre-mathematics major.

Undergraduate Majors

The Mathematics Department offers four majors: mathematics, applied mathematics, mathematics of computation, and mathematics/applied science. In addition one program is offered in cooperation with the School of Engineering and Applied Science: the mathematics/computer science major, described following this departmental listing.

The mathematics major is designed for students whose basic interest is mathematics; the applied mathematics major for those interested in the classical relationship between mathematics, the physical sciences, and engineering; the mathematics of computation major for individuals interested in the mathematical theory and the applications of computing; and the mathematics/applied science major for those with substantial interest in the applications of mathematics to a particular outside field of interest. As part of the mathematics/applied science major, the department offers programs for students interested in the fields of actuarial science and operations research.

Courses taken to fulfill any of the requirements for any of the mathematics majors must be taken for a letter grade.

If you plan to pursue graduate study in mathematics, you are strongly encouraged to take a three-quarter sequence of graduate-level courses during your senior year.

Bachelor of Science in Mathematics

Preparation for the Major

Students officially admitted to the mathematics major for Fall Quarter 1985 or thereafter must fulfill the following preparation requirements.

Those admitted prior to Fall Quarter 1985 may fulfill the preparation requirements listed in the 1984-85 *UCLA General Catalog.*

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, 8C, and one additional course from Physics 8B, 8D, 8E, Chemistry 11A, 11B. Each course must be passed with a minimum grade of C –, and you must have a minimum overall GPA of 2.0 for the courses.

The Major

Students officially admitted to the mathematics major for Fall Quarter 1985 or thereafter and those admitted prior to Fall Quarter 1985 with less than 90 quarter units completed prior to Fall Quarter 1984 must fulfill the following major requirements. Those admitted prior to Fall Quarter 1985 with 90 or more quarter units completed prior to Fall Quarter 1984 may fulfill the major requirements listed in the 1984-85 *UCLA General Catalog.*

Required: Mathematics 110A, 110B, 115A, 120A, 131A-131B, 131C, and at least five additional courses from 106 through 199. The 12 courses must be passed with a minimum overall GPA of 2.0.

Bachelor of Science in Applied Mathematics

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, 8C, and one additional course from Physics 8B, 8D, 8E, Chemistry 11A, 11B. Each course must be passed with a minimum grade of C –, and you must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Mathematics 115A, 131A, either 131B or 132, 142; two two-quarter sequences from two of the following categories: *numerical analysis* — courses 140A-140B or 141A-141B, *probability and statistics* — courses 150A-150B or 152A-152B, *differential equations* — courses 135A-135B; four additional courses from 110A through 199 (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken). The 12 courses must be passed with a minimum overall GPA of 2.0.

Bachelor of Science in Mathematics of Computation

Applications for admission are accepted during Spring Quarter only and must be submitted by May 15. All preparation courses for the major must be completed by the end of the quarter in which you apply for admission. Resources for the program are limited, and the number of students admitted may be restricted accordingly.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, 10B, 10C or 30, Physics 8A, 8C, and one additional course from Physics 8B, 8D, 8E, Chemistry 11A, 11B. Each course must be passed with a minimum grade of C –, and you must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Eleven mathematics courses, including Mathematics 115A, 117, 131A, two additional courses from 110A through 199, and six courses from Plan A (scientific computing) — courses 131B or 132, 140A-140B-140C, and 135A-135B or 145/146, or Plan B (computation theory) — courses 114A-114B-114C and 118A-118B-118C, or Plan C (computational statistics) — courses 140A-140B, 150A-150B or 152A-152B, and 153A-153B; three upper division computer science courses (12 units) selected from an approved list available in the Undergraduate Mathematics Office.

Bachelor of Science in Mathematics/Applied Science

The major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty adviser, design their own program. You may also select one of the established programs: the actuarial plan, the mathematics/economics plan, or the operations research plan. In the past, mathematics/applied science majors have combined the study of mathematics with fields such as physics, biology, chemistry, biochemistry, economics, and geography.

If you are interested in designing an individual program, you should meet with the undergraduate faculty adviser, 6375 Math Sciences, during your sophomore year. A proposed program is drawn up and then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade of C. Additional preparation, varying with the individual program, may be required.

The Major

Required: Fourteen courses, seven in mathematics selected from Mathematics 110A through 199 and seven upper division courses in a related field selected from one or two other departments. The seven mathematics courses must be passed with an overall GPA of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. If you will have 135 or more units by the end of the quarter in which you plan to enter the program, you will not be admitted to the major.

Actuarial Plan

Preparation for the Major: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Economics 1 and 2, or 100. Economics 100 may not be applied as one of the upper division courses for the major. You must have a minimum overall 2.5 GPA in the six calculus courses.

The Major: Seven mathematics courses, including Mathematics 115A, 140A or 141A, 144, 152A-152B, and two courses from 113, 140B or 141B, 151, 153A; seven outside courses, including Economics 101A, 101B, 102, 147A, 160, and two additional courses from Management 130, 190, English 131A through 131H, Economics 145 through 199.

Mathematics/Economics Plan

Preparation for the Major: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1, 2, Program in Computing 10A, and one other social science course.

The Major: Seven mathematics courses, including Mathematics 110A or 117, 115A, 131A, 144, 150A or 152A, and two additional courses from 110A through 199; seven economics courses, including Economics 101A, 101B, 102, 144, 145, 147A, and one additional course from 147A through 199.

Operations Research Plan

Enrollment in this plan, designed for students interested in careers and graduate study in operations research and management science, is limited. You must have completed Mathematics 33A and one economics course before the application deadline of April 15, 1987. The admissions committee bases its decisions on your grades in preparation for the major courses, motivation, and intellectual promise. Application forms and further information are available in the department.

Preparation for the Major: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Economics 1, 2, Program in Computing 10A, 10B, 30, 60.

The Major: Seven courses in mathematics and seven in economics and management. Consult the department for recommended courses. Programs will be designed so that students in this plan qualify for a specialization in computing.

Specialization in Computing

Majors in mathematics, applied mathematics, or mathematics/applied science may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course, (3) completing at least two courses from Mathematics 141A, 141B, 169, 169HS. You must petition for admission to this program and are advised to do so after you complete Program in Computing 10B (petitions should be filed in the Undergraduate Mathematics Office). You graduate with a bachelor's degree in your major and a specialization in computing.

The Teaching of Mathematics

The department offers a major in the teaching of mathematics. Consult the Mathematics Department for information.

Honors

Honors Courses

The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics. Call the department (206-1286) for further details.

Honors Program

Students majoring in mathematics, applied mathematics, or mathematics of computation who wish to graduate with departmental honors should apply for admission to the honors program in the Undergraduate Mathematics Office. You may apply any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall GPA of 3.6 or better. The program entails taking a specified sequence of courses as part of your major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.

If you complete the program, you are awarded honors at graduation; if you demonstrate exceptional achievement, you are awarded highest honors. Consult the department for further information.

Graduate Study

Admission

Prospective graduate students in mathematics need not have an undergraduate mathematics major, but they should have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics — particularly advanced calculus, algebra, differential equations, and differential or projective geometry. For admission to a master's degree program, you must have earned in those upper division mathematics courses a cumulative grade-point average of at least 3.2; for direct admission to the doctoral program, at least 3.5.

If you have already obtained a master's degree, you must have maintained an average of better than 3.6 in graduate study.

You must take the Graduate Record Examination (GRE) Aptitude Test and Advanced Test in Mathematics and must submit three letters of recommendation from mathematicians who know your recent work.

Applications and a booklet, *Graduate Studies in Mathematics at UCLA,* are available from the Graduate Adviser, Department of Mathematics, 6356 Math Sciences, UCLA, Los Angeles, CA 90024.

Master of Arts Degree

You may earn the M.A. degree under the comprehensive examination plan, either in the basic *(pure mathematics)* program or an interdisciplinary program in *applied mathematics.*

Foreign Language Requirement

There is no foreign language requirement for master's students.

Course Requirements

Eleven courses are required for the M.A. degree, of which at least eight must be graduate courses, while the remaining three may be approved upper division courses. With consent of the graduate vice chair, students in the applied mathematics program may take up to five of the required 11 courses in other departments, provided that these courses are in professional or scientific fields closely related to research in applied mathematics.

You may enroll in Mathematics 596 any number of times and may apply up to two 596 courses toward the 11-course requirement for the M.A., provided you receive a B or better in these courses (not the grade S).

Comprehensive Examination Plan

For the basic (pure mathematics) M.A., the comprehensive examination consists of two written four-hour tests, one in algebra and one in analysis. For students in the applied mathematics program, the comprehensive examination consists of a four-hour written test in analysis and a similar test selected from numerical analysis, methods of applied mathematics, or probability/statistics. These tests, prepared by a comprehensive examination committee, are offered early in Fall Quarter or toward the end of Spring Quarter. You may take one or both of the examinations at one sitting and may retake them any number of times until you pass them.

Master of Arts in Teaching

The M.A.T. program serves the needs of present and prospective mathematics teachers in high school and junior college.

Foreign Language Requirement

There is no foreign language requirement for M.A.T. students.

Course Requirements

Eleven courses are required, as follows.

Core Courses: You must take Mathematics 201A-201B-201C and 202A-202B. Normally, you also take one quarter of course 596 while fulfilling the essay requirement described below.

Credential Requirements: If you plan to teach in secondary schools and do not already have valid credentials for such teaching, you should enroll in the single subject credential program in the Graduate School of Education. Of the courses required by this program, you may receive M.A.T. credit only for the following: Education 100A, 100B, 112, 312, 330A, 330B. Actual receipt of the credential is not a degree requirement. You should check with the Graduate School of Education for a full and up-to-date description of credential requirements and should submit a Graduate School of Education application for admission to the credential program.

At present, no education courses or practice teaching are required for the community college credential. To qualify for this credential, it is sufficient to have the M.A.T. degree.

In exceptional cases, an M.A.T. program may be individually designed for candidates for a credential other than the two already mentioned.

Additional Courses: Besides the six core courses described above, you must take a seventh upper division or graduate course in mathematics. Particularly recommended are Mathematics 106, 110B, 110C, 111A, 111B, 131B, 135A, and 152B. Candidates on the junior college track normally take five 100- or 200-level courses in mathematics in addition to the six core courses. However, with prior approval of the graduate vice chair, such students may present for degree credit one course of a predominantly mathematical nature taken in another department.

You may not receive degree credit for Mathematics 370 or for any mathematics course numbered 104 through 109, except course 106. In addition, you may not receive degree credit for more than two quarters of course 596 or for more than two quarters of any 300-series courses.

Essay Requirement: You must prepare a master's essay on some subject in mathematics related to your prospective teaching. You write this under the direction of a faculty member while enrolled in Mathematics 596.

Teaching Experience

Teaching experience is not a formal requirement for the M.A.T. degree, although students working for a secondary credential must take the supervised teaching course. M.A.T. students are eligible for teaching assistantships.

Comprehensive Examination Plan

In the M.A.T. program, you take one examination in mathematical subject matter and one in content and philosophy of secondary school mathematics. Ordinarily, these are administered in conjunction with Mathematics 201A-201B-201C and 202A-202B. Reexamination after failure is allowed.

Ph.D. Degree

Students may earn the Ph.D. degree in Mathematics at UCLA either in the classical, *pure mathematics* program or under an interdisciplinary program in *applied mathematics*. There are many possible choices of fields within both of these programs, and you are urged to read the booklet, *Graduate Studies in Mathematics at UCLA*, where the specialties of the faculty and the active research areas in the department are described in some detail.

Foreign Language Requirement

You are required to pass two written departmental language examinations in French, German, or Russian (with the consent of the graduate vice chair, students in the applied program may substitute a computer language project for one of the languages). International students whose principal language of instruction in elementary and secondary education was not English may substitute English for one of the foreign languages, but their other language must be one of French, German, or Russian (even if they are in the applied program).

These examinations, offered in the Fall and Spring Quarters, require the translation of material in some basic field of mathematics without the use of a dictionary. They may be retaken any number of times until passed. One of the language examinations must be passed within seven quarters of registered full-time study, the second within 13 quarters. In any event, one examination must be passed before taking the first oral qualifying examination.

Course Requirements

In the pure mathematics program, you must pass (with a grade of A or B) at least 12 courses from Mathematics 205A through 285L, but excluding the basic courses 210A-210B, 245A-245B, and 246A-246B. At most, three of these courses may be in the 285 series. You must also satisfy a *seminar participation requirement* by participating actively in at least two advanced seminars (normally you lecture twice for a total of 90 minutes). Credit for one seminar must be obtained within three registered quarters after passing the written qualifying examinations, the other within five quarters.

In the applied mathematics program, you must pass (with a grade of A or B) at least 18 approved graduate courses, including at least 12 courses from Mathematics 205A through 285L. At most, three of these may be in the 285 series.

Qualifying Examinations

In the pure mathematics program, you are required to take four written qualifying examinations in the following fields: algebra, real analysis, complex analysis, and one field selected from geometry-topology, statistics-probability, logic, or numerical analysis. The examinations are given in the Fall or Spring Quarter. You must pass two examinations within a period of six registered quarters and all four examinations within a period of nine registered quarters after being admitted to graduate study.

In the applied mathematics program, you must pass four qualifying examinations. The first three consist of one written examination in applied real and complex analysis and two written examinations selected from three areas (applied differential equations, numerical analysis, and probabililty-statistics). Two of these three examinations are to be completed by the end of six quarters after being admitted to graduate study; the third by the end of nine quarters. The fourth qualifying examination, either written or oral, is in your specialized "outside" field, testing your competence at a research level.

After passing the four qualifying examinations, you may set up the doctoral committee which administers the University Oral Qualifying Examination for advancement to candidacy.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination may be waived by the doctoral committee, with the approval of the graduate vice chair.

Program in Computing

Lower Division Courses

1. Introduction to Computers and Computing. Lecture, three hours; discussion, one hour; computer terminals, five hours. Not open to students with credit for course 10A or equivalent. Fundamentals of computers and computing: machine organization and computer hardware; algorithm and software development; data representation; social impact of computing; contemporary computer applications.

3. Introductory FORTRAN Programming. Lecture, three hours; discussion, two hours; computer terminals, 10 hours. Students with credit for course 10A will receive only two units of credit for this course. Basic principles of programming, using FORTRAN as the example language. A terminal course intended for physical science and engineering majors who need to use the extensive library of existing FORTRAN programs. Students who wish to take more advanced Program in Computing courses should take course 10A rather than this course.

10A. Introduction to Programming. (Formerly numbered 10.) Lecture, three hours; discussion, two hours; computer terminals, 10 hours. Recommended prerequisite for students with no prior computing experience: course 1. Students with credit for course 3 will receive only two units of credit for this course. Basic principles of programming, using PASCAL as the example language: algorithmic, procedural problem solving; program design and development; control structures and data structures; human factors in programming and program design.

10B. Intermediate Programming. Lecture, three hours; discussion, two hours. Prerequisite: course 10A. Review of sets, arrays, records; text processing; stacks; queues; linked lists; static and dynamic allocations; binary trees; binary search; quicksort.

10C. Advanced Programming. Lecture, three hours; discussion, two hours. Prerequisite: course 10B. Review of simple sorts; shellsort; heapsort; external mergesorting, binary search trees; hashing; multiway trees; lexical analysis; parsing; C language.

30. Machine Organization and Assembly Language Programming. Lecture, three hours; discussion, two hours; computer terminals, 15 hours. Prerequisite: course 10B. Not open for credit to students with credit for Computer Science 30. Description of machine organization and operation. Representation of information, instruction sets and formats, addressing modes, memory organization and management, I/O processing and interrupts.

60. Data Structures and Algorithms. Lecture, three hours; discussion, one hour; computer terminals, 10 hours. Prerequisites: course 10B, Mathematics 31A, 31B, 61. Review of basic data structures: arrays, stacks, queues, lists, trees. Advanced data structures: priority queues, heaps, balanced trees. Sorting, searching techniques. Corresponding algorithms.

Mathematics

Lower Division Courses

A. Intermediate Algebra (No credit). (Formerly numbered 1A.) Lecture, five hours. Prerequisite: Level I Chemistry/Mathematics Preliminary Examination. Mathematics A displaces four units on the student's Study List but yields no credit toward a degree. May not be applied toward Letters and Science general education requirements. Not open to students with credit for other mathematics courses. Designed for students requiring a review of elementary and intermediate algebra. Arithmetical operations on the real numbers, algebraic notation, polynomials, rational exponents, linear and quadratic equations and inequalities, coordinate geometry. (F,W,Sp)

1. Precalculus. (Formerly numbered 1B.) Lecture, three hours; discussion, two hours. Prerequisites: course A with a grade of C – or better, or two and one-half years of high school mathematics and successful completion of the Level I Chemistry/Mathematics Preliminary Examination. The function concept. Linear and polynomial functions and their graphs, zeros of polynomials. Inverse, exponential, and logarithmic functions. Trigonometric functions.

2. Finite Mathematics for Social Science Students. Lecture, three hours; discussion, one hour. Prerequisite: course 1 or three years of high school mathematics. Not open for credit to students with credit for any course from Mathematics 110A through 199. Finite mathematics consisting of elementary logic, sets, combinatorics, probability, vectors, and matrices.

3A. Calculus for Life Science Students. Lecture, three hours; discussion, one hour. Prerequisites: three and one-half years of high school mathematics (including trigonometry) and successful completion of the Level II Chemistry/Mathematics Preliminary Examination, or completion of course 1 with a grade of C – or better. Not open for credit to students with credit in another calculus sequence. Techniques and applications of the differential calculus.

3B. Calculus for Life Science Students. Prerequisite: course 3A with a grade of C – or better. Techniques and applications of the integral calculus.

3C. Calculus for Life Science Students. Prerequisite: course 3B with a grade of C – or better. Functions of several variables, vectors, partial differentiation, and multiple integration.

3E. Calculus for Economics Students. Lecture, three hours; discussion, two hours. Prerequisite: course 3A or 31A with a grade of C – or better. Not open for credit to students with credit for course 3C. Functions of several variables; techniques of graphing, partial derivatives, maxima and minima, Lagrange multipliers. Exponential functions.

5. Introduction to Calculus. Lecture, three hours; discussion, one hour. Not open for credit to students with credit for courses 3A, 3E, or 31A. Satisfies the Letters and Science quantitative reasoning requirement. A brief look at the source of many of the quantitative methods in the physical, biological, and social sciences. The concepts, techniques, and applications of the differential and integral calculus of polynomial, rational, and exponential functions. Applications, with emphasis on the use of calculus in business and economics.

31A. Calculus and Analytic Geometry. Lecture, three hours; discussion, one hour. Prerequisites: at least three and one-half years of high school mathematics (including some coordinate geometry and trigonometry) and successful completion of the Level II Chemistry/Mathematics Preliminary Examination, or completion of course 1 with a grade of C – or better. Differential calculus and applications; introduction to integration.

31AH-31BH. Calculus and Analytic Geometry (Honors Sequence). Lecture, three hours; discussion, one hour. Prerequisites: successful completion of the Level II Chemistry/Mathematics Preliminary Examination or an additional honors placement examination, consent of instructor. An honors sequence parallel to courses 31A, 31B.

31B. Calculus and Analytic Geometry. Lecture, three hours; discussion, one hour. Prerequisite: course 31A with a grade of C – or better. Transcendental functions; methods and applications of integration.

32A. Calculus of Several Variables. Lecture, three hours; discussion, one hour. Prerequisite: course 31B with a grade of C – or better. Introduction to differential calculus of several variables.

32AH-32BH. Calculus of Several Variables (Honors Sequence). Prerequisites: course 31BH, or 31B with a grade of A and consent of instructor. An honors sequence parallel to courses 32A, 32B.

32B. Calculus of Several Variables. Lecture, three hours; discussion, one hour. Prerequisite: course 32A with a grade of C – or better. Introduction to the integral calculus of several variables.

33A. Matrices and Differential Equations. Prerequisite: course 32A or 32AH. Introduction to matrix theory; introduction to differential equations.

33AH-33BH. Matrices, Differential Equations, and Infinite Series (Honors Sequence). Prerequisites: course 32BH, or 32B with a grade of A and consent of instructor. An honors sequence parallel to courses 33A, 33B.

33B. Infinite Series. Prerequisite: course 33A or 33AH or consent of instructor. Infinite sequences and series; complex numbers.

38A. Fundamentals of Arithmetic. Lecture, three hours; discussion, one hour. Prerequisite: sophomore standing. Not open for credit to students with credit for any course from Mathematics 110A through 199. May not be applied toward Letters and Science general education requirements. Courses 38A, 38B, and 104 form a one-year sequence for prospective elementary teachers in the Diversified Liberal Arts Program. Counting numbers and other subsystems of the real numbers; sets; operations, relations, algorithms; applications and problem solving. Emphasis on understanding arithmetic procedures.

38B. Fundamentals of Arithmetic. Lecture, three hours; discussion, one hour; laboratory, one hour to be arranged. Prerequisite: course 38A. Not open for credit to students with credit for any course from Mathematics 110A through 199. May not be applied toward Letters and Science general education requirements. A continuation of course 38A. Elementary number theory; probability and statistics; the microcomputer and simple instructional programs; measurement and approximation; coordinate geometry. Other topics appropriate for the elementary classroom.

50. Elementary Statistics. (Formerly numbered 50A-50B.) Lecture, three hours; discussion, one hour. Prerequisite: three years of high school mathematics or course 1 or consent of instructor. Not open for credit to students with credit for any course from Mathematics 110A through 199 or Economics 40. Descriptive statistics, elementary probability, random variables, binomial and normal distributions. Large and small sample inference concerning means.

61. Introduction to Discrete Structures. Lecture, three hours; discussion, one hour. Prerequisites: courses 31A, 31B, and Program in Computing 10A or 3 or equivalent. Not open for credit to students with credit for course 113. Discrete structures commonly used in computer science and mathematics, including sets and relations, permutations and combinations, graphs and trees, induction, Boolean algebras.

Upper Division Courses

Mathematics 110A, 115A, 117, 120A, 131A-131B, 144, 152A, and 152B are offered each quarter. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Undergraduate Mathematics Office in February.

General and Teacher Training

104. Fundamental Concepts of Geometry. Lecture, three hours; discussion, one hour. Prerequisite: two years of high school mathematics including geometry. Designed for prospective elementary teachers (also see Mathematics 38A, 38B). The following topics may be included: the number lattice and Pick's theorem; graphs of equations and relations in the Cartesian plane, including examples with a finite field; the Pythagorean theorem from several points of view; an introduction to the theory of area, volume, and similarity; regular polygons and polyhedra, regular tilings of the plane; enumerative and counting problems, including some in spaces of four or more dimensions; selected topics in topology such as the Euler characteristic of the plane; and an introduction to synthetic and analytic plane geometry. Although primary emphasis is on the subject itself, rather than its social setting, in recent years the course has illustrated a number of class-tested teaching strategies that have been successful with school-age children.

106. History of Mathematics. Prerequisite: course 32A. Topics in the history of mathematics, with emphasis on the development of modern mathematics.

Algebra, Number Theory, and Logic

110A-110B-110C. Algebra. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. **110A.** Not open for credit to students with credit for course 117 or former courses 101A-101B. The ring of integers, integral domains, fields, polynomial domains, unique factorization. **110B.** Groups, structure of finite groups. **110C.** Further topics in rings and modules; field extensions, Galois theory, applications to geometric constructions, and solvability by radicals.

110AH-110BH-110CH. Algebra (Honors Sequence). Prerequisite: consent of instructor. An honors sequence parallel to courses 110A-110B-110C.

111A-111B-111C. Theory of Numbers. Lecture, three hours; discussion, one hour. Prerequisites: courses 110A or 117, and 115A, or consent of instructor. Divisibility, congruences, Diophantine analysis, selected topics in the theory of primes, algebraic number theory, Diophantine equations.

112A-112B-112C. Set Theory and Logic. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. **112A.** Informal axiomatic set theory presented as a foundation for modern mathematics. **112A-112B.** Predicate logic, formalized theories; Gödel's completeness and incompleteness theorems.

113. Combinatorics. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Permutations and combinations, counting principles, recurrence relations and generating functions, combinatorial designs, graphs and trees, with applications including games of complete information. Combinatorial existence theorems, Ramsey's theorem.

114A-114B-114C. Computation Theory and Logic. (Formerly numbered 114A-114B.) Lecture, three hours; discussion, one hour. Prerequisites: courses 33B, 61, 115A (latter may be taken concurrently with course 114A). Finite automata: Turing machines and other models of computation; recursive functions; Church's thesis; Gödel numbering of computations; universal machines; unsolvability results. Recursive and recursively enumerable sets; reducibilities; relative recursiveness. Propositional and predicate logic; syntax and semantics; formal deductions; completeness and compactness; effective enumerability of valid sentences. Formal number theory; representation of recursive functions; incompleteness and undecidability; theorems of Gödel, Tarski, Church. Complexity of computations; time and space limitations; nondeterministic machines; the polynomial classes P and NP; complete problems; measures of complexity; speed-up and gap theorems; lengths of proofs.

115A. Linear Algebra. (Formerly numbered 115.) Lecture, three hours; discussion, one hour. Prerequisite: course 33A. Abstract vector spaces; linear transformations and matrices; determinants; inner product spaces; low dimension eigenvector theory.

115B. Linear Algebra. Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Linear transformations, conjugate spaces, duality; the theory of a single linear transformation, Jordan normal form; bilinear forms, quadratic forms; Euclidean and unitary spaces, symmetric skew and orthogonal linear transformations, polar decomposition.

117. Algebra for Applications. Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Not open for credit to students with credit for course 110A or former course 101A. Integers, congruences; fields, applications of finite fields; polynomials; permutations, introduction to groups.

118A-118B-118C. Combinatorial Algorithms. (Formerly numbered 118.) Lecture, three hours; discussion, one hour. Prerequisites: courses 33B, 61, 115A, 117 (latter may be taken concurrently with course 118A). Introduction to discrete mathematics and algorithms as used in computer science and related fields. Topics include asymptotic analysis, arithmetic algorithms, computer-oriented algorithms, graphs and matroids, coding theory and designs.

Geometry and Topology

120A-120B. Differential Geometry. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B, 115A, 131A. Curves in 3-space, Frenet formulas, surfaces in 3-space, normal curvature. Gaussian curvature. Congruence of curves and surfaces. Intrinsic geometry of surfaces, isometrics, geodesics, Gauss-Bonnet theorem.

121. Introduction to Topology. Prerequisite: course 131A. Metric and topological spaces, topological properties, completeness, mappings and homeomorphisms, the metrization problem.

122. Projective Geometry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110A-110B, 115A. Projective spaces, especially lines and planes; homogeneous coordinates; the principles of duality; projectivities, the fundamental theorem, and the theorems of Desargues, Pappus, Steiner, and Pascal.

123. Foundations of Geometry. Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Axioms and models, Euclid's geometry, Hilbert's axioms, neutral (absolute) geometry, hyperbolic geometry, Pincare's model, independence of the parallel postulate.

Analysis

131A-131B. Analysis. Lecture, three hours; discussion, one hour. **131A.** Prerequisites: courses 32B, 33B. Real numbers, point set topology in $\mathbb{R}^n$ and in metric spaces, limits, continuity, derivatives, infinite sequences and series. **131B.** Prerequisites: courses 115A, 131A. Functions of bounded variation, Riemann-Stieltjes integral, sequences and series of functions, multivariable differential calculus, implicit and inverse function theorems, extremum problems.

131AH-131BH. Analysis (Honors Sequence). Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. An honors sequence parallel to courses 131A-131B. Courses 131AH-131BH and 131CH form a full honors sequence in analysis.

131C. Complex Analysis. Lecture, three hours; discussion, one hour. Prerequisite: course 131A. Not open for credit to students with credit for course 132. Rigorous treatment of fundamental results of theory of functions of one complex variable. Topics include analytic functions, proof of Cauchy integral theorem and formula, residue theorem, winding numbers and local behavior of holomorphic functions, maximum principle, harmonic functions.

131CH. Complex Analysis (Honors). (Formerly numbered 132H.) Lecture, three hours; discussion, one hour. Prerequisites: course 131BH, consent of instructor. An honors course parallel to course 131C. Courses 131AH-131BH and 131CH form a full honors sequence in analysis.

132. Complex Analysis for Applications. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Not open for credit to students with credit for course 131C. Introduction to the basic formulas and calculation procedures of complex analysis of one variable relevant to applications. Topics include Cauchy-Riemann equations, Cauchy integral formula, power series expansion, contour integrals, residue calculus.

133. Integration on Manifolds. Prerequisite: course 131B. Integration theory for functions of several variables, multilinear algebra, differential forms, Stokes' theorem on manifolds.

134. Measure and Integration. Prerequisite: course 131B or consent of instructor. An introduction to Lebesgue measure and integration.

135A-135B. Ordinary Differential Equations. Lecture, three hours; discussion, one hour. Prerequisites: courses 33A, 33B, 115A. Systems of differential equations; linear systems with constant coefficients, analytic coefficients, periodic coefficients, and linear systems with regular singular points; existence and uniqueness results; linear boundary and eigenvalue problems; two-dimensional autonomous systems, phase-plane analysis; stability and asymptotic behavior of solutions.

136. Partial Differential Equations. (Formerly numbered 135C.) Lecture, three hours; discussion, one hour. Prerequisites: courses 33A, 33B. Linear partial differential equations, particularly of the second order: the wave equation, the heat equation, and Laplace's equation; appropriate boundary, initial value problems, and eigenvalue problems.

Applied Mathematics

140A-140B-140C. Numerical Analysis. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B, 115A, and Program in Computing 3 or 10A or equivalent. Not normally open for credit to students with credit for courses 141A, 141B, Electrical Engineering 103 (or former course 124A). Emphasis on both theory, with error analysis, and applications. Analysis of numerical methods for the following areas: **140A.** Nonlinear equations, systems of linear equations, and eigenvalue problems. **140B.** Interpolation, approximation, fast Fourier transforms, differentiation, and integration. **140C.** Differential equations, systems of nonlinear equations, and optimization.

141A-141B. Applied Numerical Methods. Lecture, three hours; discussion, one hour. Prerequisites: courses 32A, 32B, 33A, 33B, 115A, and Program in Computing 3 or 10A or equivalent. Not open for credit to students with credit for courses 140A, 140B, Electrical Engineering 103 (or former course 124A). Introduction to scientific computing, with emphasis on programming, algorithms, and applications. Case studies. Numerical methods and computer implementation for the following areas: **141A.** Nonlinear equations, systems of linear equations, optimization, interpolation, differentiation, and integration. **141B.** Differential equations, least-squares approximation, Monte Carlo methods, and linear programming.

142. Mathematical Modeling. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B and 33B, or consent of instructor. An introduction to the fundamental principles and the spirit of applied mathematics. Emphasis on the manner in which mathematical models are constructed for physical problems. Illustrations from many fields of endeavor (e.g., physical science, biology, economics, traffic dynamics, etc.).

143. Analytic Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Foundations of Newtonian mechanics, kinematics and dynamics of a rigid body, variational principles and Lagrange's equations; calculus of variations, variable mass; related topics in applied mathematics.

144. Linear Programming. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. Not open for credit to students with credit for Electrical Engineering 136 (or former course 129A). Principles of linear programming, the duality theorem, the simplex methods; applications to industrial and business problems. Additional topics such as sensitivity analysis, integer programming, distribution and transportation algorithms, and applications to game theory.

145. Fourier Methods for Differential Equations. (Formerly numbered 145A.) Lecture, three hours; discussion, one hour. Prerequisite: course 33B. Fourier series and integral transforms, separation of variables, eigenfunction expansions. Applications from such areas as mechanical vibrations, fluid dynamics, heat conduction, and electromagnetics.

146. Methods of Applied Mathematics. (Formerly numbered 145B.) Lecture, three hours; discussion, one hour. Prerequisite: course 33B. Integral equations, Green's function, and calculus of variations. Selected applications from control theory, optics, dynamical systems, and other engineering problems.

147. Game Theory. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or 144 or consent of instructor. Principles and techniques of game theory. Games in extensive form. Matrix games. The minimax theorem and calculation of optimal strategies. Stochastic games. Cooperative and noncooperative solutions of bimatrix games. Coalitional games and applications. Additional topics such as combinatorial games, repeated games, the Lemke-Howson algorithm, assignment games and the marriage problem, economic markets, cost allocation, measurement of voting power.

Probability and Statistics

150A-150B-150C. Probability and Statistics. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B, 115A. Not open to students with credit for courses 152A, 152B, Electrical Engineering 131A (or former course 120A). A basic course in probability and statistics emphasizing theory and applications and aimed at a general audience. Prepares students to understand probability and statistical models in their own field as well as to pursue more advanced topics in either subject. Course 150A and the first half of 150B are devoted to probability, the remainder to statistics.

151. Stochastic Processes. Lecture, three hours; discussion, one hour. Prerequisites: courses 150A-150B or consent of instructor. An introduction to the theory and application of stochastic models, emphasizing Markov chains and pure jump processes; illustrations from queueing systems, point processes, birth and death processes, renewal theory; Poisson processes, Brownian motion.

152A-152B. Statistics. Lecture, three hours; discussion, one hour. Prerequisite for course 152A: course 32B (recommended: course 33B); for course 152B: courses 115A and 152A, or consent of instructor. Not open to students with credit for courses 150A, 150B, 150C, Electrical Engineering 131A (or former course 120A). An introductory course in the theory and applications of statistics. Condenses courses 150A-150B-150C into two quarters mainly by omitting topics, especially in probability theory.

153A-153B. Introduction to Computational Statistics. (Formerly numbered M153.) Lecture, three hours; discussion, one hour. Prerequisites: courses 115A, and 150B or 152B. Linear and nonlinear regression analysis using package programs. Emphasis on the relation between statistical theory, numerical results, and the analysis of data. **153A.** BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. **153B.** Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

169. Mathematics of Computer Graphics. Lecture, three hours; discussion, one hour. Prerequisites: course 115A, and Program in Computing 10A or equivalent knowledge of programming in either the PASCAL or C language. Study of homogeneous coordinates, projective transformations, interpolating and approximating curves, representation of surfaces, and other mathematical topics useful for computer graphics.

169HS. Honors Seminar in Mathematics of Computer Graphics. Lecture, three hours. Prerequisites: course 169, consent of instructor. Limited enrollment (admission to be based on performance in course 169; participants need not be in an honors program). A participating seminar on topics not covered in course 169. Each student prepares a substantial course project and presents it to the class.

Special Studies

190. Honors Mathematics Seminar. Prerequisites: honors program standing, consent of instructor. A participating seminar on advanced topics in mathematics.

191. Upper Division Seminars (2 to 4 units). Prerequisites: courses 32A, 32B, 33A, 33B, consent of instructor. Limited to 15 students. Each quarter the department offers a limited number of seminars in various branches of mathematics. Substantial student participation. May be repeated for credit.

199. Special Studies in Mathematics (1 to 4 units). Prerequisite: consent of department chair and instructor. At the discretion of the chair and subject to the availability of staff, individuals or groups may study topics suitable for undergraduate course credit but not specifically offered as separate courses. May be repeated for credit, but no more than one 199 course may be applied toward the upper division courses required for a major offered by the Mathematics Department.

Graduate Courses

Teacher Preparation

201A-201B-201C. Topics in Algebra and Analysis. Prerequisite: B.A. degree in Mathematics or equivalent. Designed for students in the mathematics-education program. Important ideas of algebra, geometry, and calculus leading effectively from elementary to modern mathematics. Approaches to the number system, point sets, geometric interpretations of algebra and analysis, integration, differentiation, series and analytic functions. May not be applied toward the M.A. degree requirements.

202A-202B. Mathematical Models and Applications. Prerequisite: B.A. degree in Mathematics or equivalent. Designed for students in the mathematics-education program. A development of mathematical theories describing various empirical situations. Basic characterizing postulates; development of a logical structure of theorems. Modern topics such as operations research, linear programming, game theory, learning models, models in social and life sciences. May not be applied toward the M.A. degree requirements.

Number Theory

205A-205B-205C. Number Theory. Prerequisites: courses 210A and 246A, or consent of instructor. Topics from analytic algebraic and geometric number theory, including distribution of primes and factorization in algebraic number fields. Selected topics from additive number theory, Diophantine approximation, partitions, class-field theory, lattice point problems, valuation theory, etc.

206A-206B. Combinatorial Theory. Prerequisite: consent of instructor. Generating functions. Probabilistic methods. Polya's theorem. Enumerative graph theory. Partition theory. Number theoretical applications. Structure of graphs, matching theory, duality theorems. Packings, pavings, coverings, statistical designs, difference sets, triple systems, finite planes. Configurations, polyhedra. Ramsey theory, finite and transfinite, and applications.

Algebra

210A-210B-210C. Algebra. Prerequisites: courses 110A-110B-110C or consent of instructor. Students with credit for courses 110B and/or 110C will not receive M.A. degree credit for courses 210B and/or 210C. Group theory, including the theorems of Sylow and Jordan-Holder-Schreier; rings and ideals, factorization theory in integral domains, modules over principal ideal rings, Galois theory of fields, multilinear algebra, structure of algebras.

211. Structure of Rings. Prerequisite: course 210A or consent of instructor. The radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

212. Homological Algebra. Prerequisite: course 210A or consent of instructor. Modules over a ring, homomorphisms and tensor products of modules, functors and derived functors, homological dimension of rings and modules.

213A-213B. Theory of Groups. Prerequisite: course 210A or consent of instructor. Topics include representation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, solvable and nilpotent groups, classical groups, algebraic groups.

214A-214B. Algebraic Geometry. Prerequisite: course 210A or consent of instructor. Preliminaries from the theory of commutative rings and algebras. Theory of algebraic varieties. Topics include plane curves, resolution of singularities, invariant theory, intersection theory, divisors and linear systems.

215A-215B. Commutative Algebra. Prerequisite: course 210A or consent of instructor. Topics from commutative ring theory, including techniques of localization, prime ideal structure in commutative Noetherian rings, the principal ideal theorem, Dedekind rings, modules, projective modules, the Serre conjecture, regular local rings.

Logic and Foundations

220A-220B-220C. Mathematical Logic and Set Theory. Prerequisites: courses 112A-112B-112C or equivalent. Model theory: compactness theorem; Lowenheim-Skolem theorems; definability; ultraproducts; preservation theorems; interpolation theorems. Recursion function theory: Church's thesis; recursively enumerable sets; hierarchies; degrees. Formal proofs: completeness and incompleteness theorems; decidable and undecidable theories; quantifier elimination. Set theory: Zermelo-Fraenkel and von Neumann-Gödel axioms; cardinal and ordinal numbers; continuum hypothesis; constructible sets; independence results and forcing.

222A-222B. Lattice Theory and Algebraic Systems. Lecture, three hours. Prerequisite: course 210A or consent of instructor. Partially ordered sets, lattices, distributivity, modularity; completeness, interaction with combinatorics, topology, and logic; algebraic systems, congruence lattices, subdirect decomposition, congruence laws, equational bases, applications to lattices.

223A. Model Theory. Prerequisites: courses 220A-220B-220C. Topics include ultraproducts, preservation theorems, interpolation theorems, saturated models, omitting types, categoricity, two cardinal theorems, enriched languages, soft model theory, and applied model theory.

223B. Set Theory. Prerequisites: courses 220A-220B-220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinatorial set theory.

223C. Recursion Theory. Prerequisites: courses 220A-220B-220C. Topics include degrees of unsolvability, recursively enumerable sets, undecidable theories, inductive definitions, admissible sets and ordinals, and recursion in higher types.

223D. Descriptive Set Theory. Prerequisites: courses 220A-220B-220C. Classical descriptive set theory: Borel and projective sets. Effective descriptive set theory. Consequences of strong set-theoretic hypotheses.

Geometry

226A-226B-226C. Differential Geometry. Prerequisite: course 231A or consent of instructor. Manifold theory; connections, curvature, torsion, and parallelism. Riemannian manifolds; completeness, submanifolds, constant curvature. Geodesics; conjugate points, variational methods, Myers theorem, nonpositive curvature. Further topics such as pinched manifolds, integral geometry, Kahler manifolds, symmetric spaces.

228. Convex Sets. Prerequisite: course 121 or 245A or consent of instructor. Basic concepts for convex sets in topological linear spaces; separation theorems and support functions; local convexity; convex functions; Helly type theorems; duality.

229A-229B-229C. Lie Groups and Lie Algebras. Prerequisite: knowledge of basic theory of topological groups and differentiable manifolds. Lie groups, Lie algebras, subgroups, subalgebras. Exponential map. Universal enveloping algebra. Campbell-Hausdorff formula. Nilpotent and solvable Lie algebras. Cohomology of Lie algebras. Theorems of Weyl, Levi-Mal'cev. Semi-simple Lie algebras. Classification of simple Lie algebras. Representations. Compact groups. Weyl's character formula.

Topology

230. General Topology. Prerequisites: courses 131A-131B or consent of instructor. Students with credit for course 121 will not receive M.A. degree credit for this course. Topological spaces and maps, products, quotient spaces, connectedness and compactness, separation properties, local properties, completeness. Homotopy and the fundamental group.

231A. Manifold Theory. Prerequisites: courses 121 and 131A-131B, or consent of instructor. Manifolds, tangent and cotangent spaces, vector fields and integral curves, Lie brackets, differential forms and exterior derivative, Stokes' theorem on manifolds.

231B. Introduction to Homology Theory. Prerequisite: course 231A or consent of instructor. Elementary concepts of homotopy theory. Singular chains and the boundary operator, definition of homology, Mayer-Vietoris sequence, calculation of homology of standard spaces.

231C. Further Topics in Geometry and Algebraic Topology. Prerequisites: courses 231A and 231B, or consent of instructor. Topics may include cohomology and duality theorems, de Rahm's theorem, cup products, and transversality intersection theory of submanifolds. Additional topics as time permits.

232A-232B-232C. Algebraic Topology. Prerequisite: course 121 or 230 or consent of instructor. Fundamental group; homology theory, singular theory, cellular theory, computation of homology groups; cohomology theory, cup and cap products, duality; homotopy theory, fiberspaces, Hurewicz theorem, obstruction theory.

236. Advanced Topics in Geometric Topology. Prerequisites: courses 231A and 231B, or consent of instructor. Handlebody theory, transversality; PL topology; surgery. Topics vary from year to year.

237. Advanced Topics in Algebraic Topology. Prerequisites: courses 232A-232B-232C or consent of instructor. K-theory; fixed-point theory; extraordinary cohomology theories. Topics vary from year to year.

Analysis and Differential Equations

240. Methods of Set Theory. Lecture, three hours. Prerequisites: courses 110A-110B, 121 or equivalent, 131A-131B. Naive, axiomatic set theory, the axiom of choice and its equivalents, well-orderings, transfinite induction, ordinal and cardinal arithmetic. Applications to algebra: Hamel bases, the Stone representation theorem. Applications to analysis and topology: the Cantor-Bendixson theorem, counterexamples in measure theory, Borel and analytic sets, Choquet's theorem.

245A-245B-245C. Real Analysis. Prerequisites: courses 121, 131A-131B, or equivalent (course 230 may be taken concurrently). Students with credit for course 134 will not receive M.A. degree credit for course 245A. Basic measure theory. Measure theory on locally compact spaces. Fubini theorem. Elementary aspects of Banach and Hilbert spaces and linear operators. Function spaces. Radon-Nikodym theorem. Fourier transform and Plancherel on R^n and T^n.

246A-246B-246C. Complex Analysis. Prerequisites: courses 131A-131B. Students with credit for course 132 will not receive M.A. degree credit for course 246A. Cauchy-Riemann equations. Cauchy's theorem. Cauchy's integral formula and the residue calculus. Power series. Normal families. Harmonic functions. Linear fractional transformations. Conformal mappings. Analytic continuation. Examples of Riemann surfaces. Infinite products. Partial fractions. The classical transcendental functions. Elliptic functions.

247A-247B. Classical Fourier Analysis. Lecture, three hours. Prerequisites: courses 245A-245B, 246A. Distribution on R^n and T^n. Principal values; other examples. Distributions with submanifolds as supports. Kernel theorem. Convolution; examples of singular integrals. Tempered distributions and Fourier transform theory on R^n. Distributions with compact or one-sided supports and their complex Fourier transforms.

250A. Ordinary Differential Equations. Prerequisite: course 246A or consent of instructor. Basic theory of ordinary differential equations. Existence and uniqueness of solutions. Continuity with respect to initial conditions and parameters. Linear systems and nth order equations. Analytic systems with isolated singularities. Self-adjoint boundary value problems on finite intervals.

250B. Nonlinear Ordinary Differential Equations. Prerequisite: course 250A. Asymptotic behavior of nonlinear systems. Stability. Existence of periodic solutions. Perturbation theory of two-dimensional real autonomous systems. The Poincaré-Bendixson theory.

250C. Advanced Topics in Ordinary Differential Equations. Prerequisites: courses 250A, 250B. Selected topics, such as spectral theory or ordinary differential operators, nonlinear boundary value problems, celestial mechanics, approximation of solutions, and Volterra equations.

251A. Introductory Partial Differential Equations. Prerequisite: consent of instructor. Classical theory of heat, wave, and potential equations; fundamental solutions, characteristics and Huygens principle, properties of harmonic functions. Classification of second-order differential operators. Maximum principles, energy methods, uniqueness theorems. Additional topics as time permits.

251B-251C. Topics in Partial Differential Equations. Prerequisite: consent of instructor. An in-depth introduction to topics of current interest in partial differential equations or their applications.

252A-252B-252C. Advanced Topics in Complex Analysis. Prerequisites: courses 245A-245B-245C and 246A-246B-246C, or consent of instructor. Potential theory, subharmonic functions, harmonic measure; Hardy spaces; entire functions; univalent functions; Riemann surfaces; extremal length, variational methods, quasiconformal mappings. Topics vary from year to year.

253A-253B. Several Complex Variables. Prerequisites: courses 245A-245B-245C and 246A-246B-246C, or consent of instructor. Introduction to analytic functions of several complex variables. The $\bar{\partial}$ problem, Cousin problems, domains of holomorphy, complex manifolds.

254A-254B. Trigonometrical Series. Prerequisite or corequisite: course 245A or 246A or consent of instructor. Selected topics in Fourier series, power series, orthogonal polynomials, almost periodic functions, and completeness of sets of functions.

Functional Analysis

255A. Functional Analysis. Prerequisites: courses 245A-245B or 265A-265B, and 246A, or consent of instructor. Banach spaces, basic principles. Weak topologies. Compact operators. Fredholm operators. Special spaces including Hilbert spaces and C(X).

255B-255C. Topics in Functional Analysis. Prerequisite: course 255A. Topics include Banach algebras, operators on Banach spaces and Hilbert space, semigroups of operators, linear topological vector spaces, and other related areas.

256A-256B-256C. Topological Groups and Their Representations. Lecture, three hours. Prerequisite: course 255A or consent of instructor. Topological groups and their basic properties. Haar measure. Compact groups and their representations. Duality and Fourier analysis on locally compact abelian groups. Induced representations, Frobenius reciprocity. Representations of special groups (Lorentz, Galilean, etc.). Projective representations. Representations of totally disconnected groups.

258A-258B. Commutative Banach Algebras. Lecture, three hours. Prerequisites: courses 246A, 255A, 255B. The Gel'fand theory of commutative Banach algebras. Applications to harmonic analysis on locally compact abelian groups. Algebras of holomorphic functions. Special topics.

259A-259B. Operator Algebras in Hilbert Space. Prerequisites: courses 255A, 255B-255C. Selected topics from the theories of C* and von Neumann algebras. Applications.

Applied Mathematics

260. Introduction to Applied Mathematics. Prerequisite: course 142 or consent of instructor. The construction, analysis, and interpretation of mathematical models of problems which arise outside of mathematics.

261. Multiperson Game Theory. Lecture, three hours. Prerequisite: graduate standing in mathematics or consent of instructor. Nonadditive set functions; games in characteristic function form; imputations and domination; von Neumann-Morgenstern solutions; the core; totally balanced games; kernel and nucleolus; multilinear extension and the Shapley value; fixed-point theorems; Nash equilibrium; nontransferable utility; lambda-transfer method. Applications to markets, cost allocation, assignment and marriage problems, voting power.

M263. Hydrodynamic Instabilities and Turbulence. (Same as Earth and Space Sciences M211.) Lecture, three hours. An introduction to the theories of hydrodynamic instability and the nonstatistical description of turbulence; stability bounds by the energy method; linear theory of instability; finite amplitude theories of post-instability flows; bounds on properties of turbulent flows by variational techniques.

Mr. Busse (alternate years)

264. Applied Complex Analysis. Prerequisite: course 246A or consent of instructor. Topics include contour integration conformal mapping, differential equations in the complex plane, special functions, asymptotic series, Fourier and Laplace transforms, singular integral equations.

265A-265B. Real Analysis for Applications. Prerequisites: courses 131A-131B or consent of instructor. Not open for credit to students with credit for courses 245A-245B-245C. Lebesgue measure and integration on the real line, absolutely continuous functions, functions of bounded variation, L^2 and L^p spaces. Fourier series. General measure and integrations, Fubini and Radon-Nikodym theorems, representation of functionals, Fourier integrals.

266A. Applied Ordinary Differential Equations. Prerequisites: courses 131A-131B, 132, and 135A-135B or 145 and 146. Spectral theory of regular boundary value problems and examples of singular Sturm-Liouville problems, related integral equations, phase-plane analysis of nonlinear equations.

266B-266C. Applied Partial Differential Equations. Prerequisite: course 266A or consent of instructor. Classification of equations, classical potential theory, Dirichlet and Neumann problems. Green's functions, spectral theory of Laplace's equation in bounded domains, first-order equations, wave equations, Cauchy problem, energy conservation, heat equation, fundamental solution, equations of fluid mechanics and magnetohydrodynamics.

267A-267B. Applied Algebra. Prerequisite: course 110A or equivalent. Students with credit for course 210A will not receive M.A. degree credit for course 267A. Linear algebra, eigenvalues, and quadratic forms; linear inequalities, finite fields, and combinatorial analysis. Group theory, with emphasis on representations. Application to physical problems.

268B-268C. Topics in Applied Functional Analysis. Prerequisite: course 255A. Topics include spectral theory with applications to ordinary differential operators, eigenvalue problems for differential equations, generalized functions, and partial differential equations.

269A-269B-269C. Advanced Numerical Analysis. Prerequisites: courses 115A, 135A, and 140A-140B-140C, or consent of instructor. Numerical solution for systems of ordinary differential equations; initial and boundary value problems. Numerical solution for elliptic, parabolic, and hyperbolic partial differential equations. Topics in computational linear algebra.

270A-270E. Mathematical Aspects of Scientific Computing. (Formerly numbered 270A-270B.) Lecture, three hours. Prerequisites: courses 115A, 140A or 141A-141B, and Program in Computing 10A or equivalent, or consent of instructor. **270A.** Techniques of Scientific Computing. Mathematical modeling for computer applications, scientific programming languages, software development, graphics, implementation of numerical algorithms on different architectures, case studies. **270B-270C.** Computational Linear Algebra. Direct, fast, and iterative algorithms, overdetermined systems; singular value decomposition, regularization, sparse systems, the algebraic eigenvalue problem. **270D-270E.** Computational Fluid Dynamics. Basic equations, finite difference, finite element, pseudo-spectral, and vortex methods; stability, accuracy, shock capturing, and boundary approximations.

271A. Tensor Analysis. Prerequisite: course 131A or consent of instructor. Algebra and calculus of tensors on n-dimensional manifolds. Curvilinear coordinates and coordinate-free methods. Covariant differentiation. Green-Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

271B. Analytical Mechanics. Prerequisites: course 271A, prior knowledge of mechanics. Newtonian and Lagrangian equations. Hamilton's principle. Principle of least action. Holonomic and nonholonomic systems. Hamilton's canonical equations, contact transformations, applications.

271C. Introduction to Relativity. Prerequisites: course 271A, prior knowledge of mechanics. Restricted theory of relativity. Extensions to general theory. The relativistic theory of gravitation.

272. Advanced Topics in Continuum Mechanics. Prerequisites: courses 142, 251A, or equivalent. Mathematical aspects of solid and/or fluid mechanics. Instability, wave propagation, nonlinear and stochastic phenomena.

273. Wave Mechanics. Prerequisite: consent of instructor. General concepts of mechanical systems (states, space-time, "logics," etc.). Classical and quantum examples. Correspondence principle. Spinors.

M274A. Asymptotic Methods. (Same as Civil Engineering M292.) Lecture, three hours. Prerequisites: course 132, Chemical Engineering M192A, or equivalent. The fundamental mathematics of asymptotic analysis, asymptotic expansions of Fourier integrals, method of stationary phase. Watson's lemma, method of steepest descent, uniform asymptotic expansions, elementary perturbation problems.

274B-274C. Perturbation Methods. (Formerly numbered M274B.) Lecture, three hours. Prerequisite: course 266A or equivalent. Boundary layer theory, matched asymptotic expansions, WKB theory. Problems with several time scales: Poincaré's method, averaging techniques, multiple-scale analysis. Application to eigenvalue problems, nonlinear oscillations, wave propagation, and bifurcation problems. Examples from various fields of science and engineering.

Probability and Statistics

275A-275B. Probability Theory. Prerequisite: course 245A or 265A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorem, conditioning, ergodic theory, martingale theory.

275C. Stochastic Processes. Prerequisites: courses 275A-275B. Selected topics such as Brownian motion and potential theory. Markov processes, infinite particle systems, Gaussian processes. Content varies from year to year. May be repeated for credit.

276A-276B. Mathematical Statistics. Prerequisites: courses 150A-150B-150C or 152A-152B and 131A-131B. **276A.** Bayes, admissible, and minimax decision rules; sufficiency and completeness; uniformly most powerful tests. **276B.** Fisher information; Cramer-Rao inequality; asymptotic properties of tests and estimators; maximum likelihood estimators; likelihood ratio and chi-square tests of hypotheses.

276C. Statistical Decision Theory. Prerequisite: course 276A. Invariant estimates and tests; best unbiased and locally best tests; multiple decision problems; application to the general linear model; other topics.

277. Sequential Analysis. Prerequisite: course 276A. Bayes sequential decision rules, stopping rule problems, optimality of the sequential probability ratio test, Wald's fundamental identity.

278. Nonparametric and Robust Statistics. Prerequisite: course 276B. Development of nonparametric and robust procedures for hypothesis testing, estimation in one- and two-sample problems, linear and nonlinear regression, multiple classification, density estimation.

M279A-M279B-M279C. Linear Statistical Models. (Same as Public Health M205A-M205B-M205C.) Lecture, three hours. Prerequisites: course 150C or 152B, Public Health 100C, or equivalent. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, the Gauss-Markov theorem, fixed and random component models, balanced and unbalanced designs.

M280. Computational Statistics. (Same as Biomathematics M280 and Public Health M207J.) Lecture, three hours. Prerequisites: courses 115A, 150C, or equivalent. Introduction to theory and design of statistical programs: pivoting and other technologies used in stepwise regression, nonlinear regression algorithms, algorithms for balanced and unbalanced analysis of variance, including the mixed model, iterative rescaling, and other methods for log-linear models.

Special Studies

285A-285L. Seminars. Prerequisite: consent of instructor. No more than two 285 courses may be applied toward the M.A. degree requirements except by prior consent of the graduate vice chair. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with members of the staff:

285A. Seminar in the History and Development of Mathematics.

285B. Seminar in Number Theory.

285C. Seminar in Algebra.

285D. Seminar in Logic.

285E. Seminar in Geometry.

285F. Seminar in Topology.

285G. Seminar in Analysis.

285H. Seminar in Differential Equations.

285I. Seminar in Functional Analysis.

285J. Seminar in Applied Mathematics.

285K. Seminar in Probability.

285L. Seminar in Statistics.

286A-286M. Participating Seminars (No credit). Prerequisite: consent of instructor. Seminars and discussion by staff and students. No course credit is given, but the courses may be used to satisfy the participating seminar requirement for the Ph.D. S/U grading:

286A. Participating Seminar in the History and Development of Mathematics.

286B. Participating Seminar in Number Theory.

286C. Participating Seminar in Algebra.

286D. Participating Seminar in Logic.

286E. Participating Seminar in Geometry.

286F. Participating Seminar in Topology.

286G. Participating Seminar in Analysis.

286H. Participating Seminar in Differential Equations.

286I. Participating Seminar in Functional Analysis.

286J. Participating Seminar in Applied Mathematics.

286K. Participating Seminar in Probability.

286L. Participating Seminar in Statistics.

286M. Participating Seminar in Mathematics.

290. Seminar in Current Literature. For Ph.D. candidates. Readings and presentations of papers in mathematical literature under the supervision of a staff member.

370. The Teaching of Mathematics. Lecture, three hours. Prerequisites: course 3B or 31B, senior standing. A critical inquiry into present-day tendencies in the teaching of mathematics.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 4 units). Supervised individual reading and study on a project approved by a faculty member, which may be preparation for the M.A. essay. May be repeated for credit, but only two 596 courses may be applied toward the M.A. degree unless departmental consent is obtained.

599. Research in Mathematics (2 to 8 units). Study and research for Ph.D. dissertation. May be repeated for credit.

Mathematics/ Computer Science (Interdepartmental)

6375 Math Sciences, (213) 206-1286

Scope and Objectives

The major is a specialized and demanding one, designed for students who have strong interests and aptitudes in mathematics as well as computing and who wish to prepare themselves for advanced professional work or graduate study in certain areas of computer science or mathematics. The program concentrates on fundamental concepts and is not intended to be a general undergraduate data processing major for those interested in application fields (in fact, no such major is offered at UCLA).

This major is a cooperative program offered jointly by the Department of Computer Science in the School of Engineering and Applied Science, and the Department of Mathematics. The program, administered by the Mathematics Department, leads to the Bachelor of Science degree.

Bachelor of Science Degree

Admission

Because of limited facilities (staff, laboratories, computing resources) and the expansion of programs in the Computer Science and Mathematics Departments, this interdepartmental major may soon be disestablished. Students admitted to the University for Fall Quarter 1986 and thereafter may not have the option of entering this major but will have an opportunity to pursue one of the alternate programs available to students with an interest in computing (see the mathematics of computation major and the specialization in computing under the Mathematics Department section).

Students admitted to the pre-mathematics/computer science major prior to Fall Quarter 1986 can apply for admission to the mathematics/computer science major or to one of the alternate programs. All pre-mathematics/computer science majors applying for admission to the major are subject to the minimum entrance requirements listed in the 1985-86 *UCLA General Catalog.*

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, 10B, 10C, 30, Physics 8A, 8C.

The Major

Required: Fourteen courses, seven in mathematics and seven in computer science, distributed as follows: (1) Mathematics 110A or 117, 115A, 150B or 152A, and four additional courses from 110A through 199 (suggested: 113, 114A, 118A, 140A, 140B, 140C, 141A, 141B, 142, 144, 150A or 152B, 153A); (2) Computer Science 131, 141, 151A, 151B, 152A, 152B, 181, and one additional course from Electrical Engineering 102, 103, Mechanical, Aerospace, and Nuclear Engineering 194A, 194B, or Computer Science 111 through 199 (courses 152A and 152B are laboratory courses; each is to be taken concurrently with its mate). Credit may not be applied toward the degree for more than one of Mathematics 140A, 141A, Electrical Engineering 103.

Minimum Standards

A minimum grade of C is required in each preparation for the major course; a minimum grade of C – is required in all major courses. In addition, you must maintain a GPA of 2.0 or better in upper division mathematics courses and a GPA of 2.0 or better in upper division computer science and electrical engineering courses in the major.

If you do not earn the specified minimum grade in a particular course, you must repeat that course. If you fail to earn the minimum grade for the repeated course, you may not remain in the premajor or major.

Credit Limitations

The credit limitation rules that apply to mathematics majors also apply to mathematics/computer science majors.

Honors Program

Majors who wish to graduate with honors should apply for admission to the honors program. You may enter the program after completing two upper division mathematics courses and eight upper division units in computer science or electrical engineering courses in the major with an overall GPA of 3.6. The program consists of completing a suitable special project or participating seminar, earning a 3.6 GPA in upper division mathematics courses, and a 3.6 GPA in upper division computer science and electrical engineering courses in the major.

If you complete the program, you are awarded honors at graduation; if you demonstrate exceptional achievement, you are awarded highest honors.

Microbiology

5304 Life Sciences, (213) 825-8482

Professors

Frederick A. Eiserling, Ph.D., *Chair*
C. Fred Fox, Ph.D.
June Lascelles, Ph.D.
Rafael J. Martinez, Ph.D.
Donald P. Nierlich, Ph.D.
M. J. Pickett, Ph.D.
Sydney C. Rittenberg, Ph.D.
William R. Romig, Ph.D.
Eli E. Sercarz, Ph.D.
Anthony J. Salle, Ph.D., *Emeritus*

Associate Professors

Arnold J. Berk, M.D.
Aldons J. Lusis, Ph.D. *(Medicine)*
Mary C. Territo, M.D. *(Medicine)*
Bernadine J. Wisnieski, Ph.D.
Owen N. Witte, M.D.

Assistant Professors

Robert P. Gunsalus, Ph.D.
Joan E. McEwen, Ph.D.
Robert W. Simons, Ph.D.

Adjunct Professors

Keichi Itakura, Ph.D.
John H. Silliker, Ph.D.
Gary Wilcox, Ph.D.

Adjunct Lecturer

Laurel G. Heffernan, Ph.D.

Scope and Objectives

Microbiology at UCLA is a diverse science that includes bacteriology, virology, and the study of single mammalian cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate students majoring in microbiology prepare for careers in medicine or dentistry, medical technology, industrial microbiology (including biotechnology and genetic engineering), and agricultural or environmental sciences, among others. The courses presented by the department lead to a Bachelor of Science degree and depend heavily on preparation in chemistry, biology, physics, and mathematics. They provide preparation for careers in microbiology or for further advanced study leading to the doctorate.

The graduate program emphasizes the areas of cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host-parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research careers in all of these fields. The objective of the department is to provide breadth in microbiology at the undergraduate level and depth and training in independent study and research for the graduate microbiologist.

Note: Several upper division and graduate courses in this department are multiple-listed with those in the Microbiology and Immunology Department in the UCLA School of Medicine. If you are interested in a fundamentally disease-oriented approach to microbiology, see the Microbiology and Immunology Department description in Chapter 15.

Bachelor of Science Degree

Pre-Microbiology Major

Students (new, transfer, or change of major) who wish to major in microbiology first register as pre-microbiology students. After completing the preparation for the major courses with an overall C – grade-point average and Microbiology 101 with a grade of C or better, you should petition to enter the major in the Undergraduate Office, 5205 Life Sciences. All preparation courses must be taken for a letter grade. Whenever possible, Microbiology 7 should be taken in place of Biology 7. If you enter with 80 or more units of credit, in order to specify pre-microbiology as your major, you must have completed one year of general chemistry; Biology 5, 7, or equivalent; one of the following: organic chemistry with laboratory (two courses), calculus-based physics, calculus (one year).

Preparation for the Major

Required: Microbiology 7 (or Biology 7); Biology 5, 8; Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, 25; Mathematics 3A, 3B, 3C (or 31A, 31B, 32A); Physics 6A, 6B, 6C (or 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL).

The Major

Required: A total of 40 upper division units, including Microbiology 101, 102, C103A or C103B or 110, 119, M185; Chemistry 152; four additional upper division courses from the departmental list or from related departments selected with approval of the faculty adviser. All major courses must be taken for a letter grade, with a minimum overall 2.0 GPA. A maximum of four units of Microbiology 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied. In addition, you must earn a C or better in courses 101 and 102 before continuing with further departmental upper division work. If you repeat one of these courses, you must earn a grade of B or better to remain in the major.

Honors Program

An overall grade-point average of 3.2 and a 3.5 in the premajor and major are required for graduation with honors in microbiology. Junior standing and the sponsorship of a faculty adviser are also required. For further information, contact the Undergraduate Office.

Master of Arts Degree

Admission

Requirements for admission are the same as for the Ph.D. degree, with the addition of a research proposal. Students who select this program must obtain sponsorship for a laboratory research problem prior to submitting an application. Information is available from the Graduate Adviser, Department of Microbiology, 5304 Life Sciences, UCLA, Los Angeles, CA 90024.

The department accepts relatively few students whose objective is a master's degree; applicants should contact a potential faculty sponsor at the time of application.

Ph.D. Degree

Admission

For admission, you must have completed an undergraduate major in bacteriology, microbiology, or a related field with superior scholastic achievement. You should have preparation in calculus, physics, biology, genetics, organic and biological chemistry, and microbiology. Physical chemistry is strongly recommended. You may be admitted with background deficiencies to be remedied prior to or concurrent with graduate studies. Submit scores of the Graduate Record Examination (GRE) Aptitude Test directly to the department. The Advanced Test in Biology or Chemistry is strongly recommended. Evidence (via letters of recommendation, interviews, or direct knowledge) of your research potential and motivation is also required. Completion of a master's degree is not normally required.

Course Requirements

Formal Lecture/Laboratory Courses

Biochemistry: Chemistry M253 (six units; offered only in the Fall Quarter; to be completed during the first year) and Microbiology 225/225L or M239/M239L (lecture and laboratory, eight units each; offered in the Winter and Spring Quarters respectively; to be completed during the first year) are required.

Genetics and Regulation: One 200-level, four-unit course to be selected from the current course listings maintained in the Graduate Office is required.

A total of eight additional units of 200-level coursework to be selected from at least two of the following three subject areas is required: (1) general microbiology and cell biology, (2) host-parasite interactions and virology, (3) immunology. Acceptable courses are listed in the Graduate Office.

You are expected to complete a course in physical chemistry (Chemistry 156). This requirement can be waived on the basis of work done before entering UCLA.

Student-Participation Seminar Courses

Each quarter, seminar courses in which students read and report on current scientific research literature are organized. You must enroll in five such courses (10 units), including two offerings in the C204 series, during your first two years in residence.

Laboratories

During your first 15 months in residence, you rotate for one quarter each through three laboratories within the department (outside laboratories are permissible with consent of the advisory committee). You normally enroll in Microbiology 596 for four units of credit for each laboratory.

First-Year Proposal

By June 30 of your first year of study you must submit an original research proposal of approximately five pages. The topic may be based on a subject presented in a departmental professional seminar or on material from one of the seminar courses. Suggestions and evaluations are returned to you and used by faculty to evaluate continuation into the second year.

Teaching Experience

The department considers teaching experience to be an integral part of the graduate program. All Ph.D. candidates are required to serve as teaching assistants or in some other formal teaching capacity for three quarters. Prior experience at another institution is acceptable when approved by the departmental graduate adviser.

Qualifying Examinations

The written examination must be taken within 24 months of entry into graduate school and must be passed, if reexamination is required, no later than 27 months from the date of entry. (These periods may be extended with the written consent of the departmental graduate adviser and your mentor.)

The examination is administered by the doctoral committee which normally serves as the thesis committee as well. As a major part of the examination, you prepare and defend a written research proposal. Before presentation to the doctoral committee, you are encouraged to present the proposal before a student seminar group.

The University Oral Qualifying Examination covers both your proposal and general scientific background. It is not restricted to the topics of the proposal. The committee may arrange alternate ways to assess your preparation and qualifications.

Final Oral Examination

A dissertation on a subject of your choice selected in consultation with the major professor is required. The final oral examination, administered by the doctoral committee, is a defense of the completed dissertation, presented as a professional seminar and open in part to the public.

Lower Division Courses

6. Introduction to Microbiology. Lecture, three hours. Not open for credit to students with credit for courses 7, 10, 101, Biology 5, 6, 7, 8, or equivalent courses taken elsewhere. Designed for the nontechnical student; an introduction to the biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs. (F,W,Sp)

7. The New Cell Biology. Lecture, three hours; laboratory, two hours. Prerequisites: Biology 5, Chemistry 11A. Designed for undergraduate students intending to major in microbiology and others as interested. Lecture and laboratory sessions to give students basic elements of scientific observation using prokaryotic and eukaryotic cell structure and cellular interactions. Intensive training in use of light microscope techniques. Actual on-hand training in microscopic techniques using video microscope, slides, and demonstrations. Extensive exposure to landmark observations and experiments in development of modern cell biology and structure. Mr. Fox, Mr. Witte (W)

10. General Microbiology. Lecture, three hours; laboratory, six hours. Prerequisites: course 7 (or Biology 7), Biology 5, Chemistry 11A, 15. Designed for health sciences students. Not open for credit to students with credit for Microbiology 101; does not substitute for course 101 in the major. An introduction to the biology of bacteria and their role in diseases of man. Ms. Wisnieski (Sp)

Upper Division Courses

101. Fundamentals of Bacteriology. Lecture, three hours; laboratory, six hours. Prerequisites: course 7 (or Biology 7), Biology 5, Chemistry 21, 23, 25. The historical foundations of the science; introduction to bacterial structure, physiology, biochemistry, genetics, and ecology. Mr. Gunsalus (Sp), Ms. Lascelles (F), Ms. McEwen (Sp), Mr. Romig (F)

102. Introductory Virology. Lecture, three hours; laboratory, four hours. Prerequisite: course 101. Biological properties of bacterial and animal viruses; replication; methods of detection; interactions with host cells and multicellular hosts.
Mr. Berk, Mr. Romig (W)

C103A. Biochemistry and Biology of Bacterial Infection. (Formerly numbered 103.) Lecture, three hours. Prerequisites: course 101, Chemistry 152. The biochemical properties of bacteria which afford the potential for pathogenicity. The epidemiology and transmission of disease; chemotherapy and drug resistance. Concurrently scheduled with course C203A. Mr. Martinez (W)

C103B. Biochemistry of Host Defense Mechanisms. Lecture, three hours. Prerequisites: courses 101, M185, Chemistry 152. The biochemical basis of host defense mechanisms, with emphasis on the role of immunoglobulins in combating microbial invasion; the biology and biochemistry of phagocytic cells and constitutive mechanisms of host defense. Concurrently scheduled with course C203B.
Mr. Martinez (Sp)

C104A. Molecular Biology of Bacterial Growth (2 units). Lecture, three hours. Prerequisites: course 101, Biology 8, and Chemistry 25, or equivalent, or consent of instructor. Introduction to bacterial physiology, with lectures stressing its experimental foundation. Topics include chromosome replication, gene expression, control of growth rate and cell division, role of cyclic AMP and other regulatory factors, cloning and genetic engineering. May be concurrently scheduled with course C204A.
Mr. Nierlich (Sp, five weeks)

C104B. Biochemical Genetics of Eukaryotic Cells (2 units). Lecture, three hours. Prerequisites: prior background in biochemistry and genetics. Concepts in biochemical genetics, illustrated with recent research papers dealing with genetic analysis in yeast, drosophila, and mammalian systems. Topics include somatic cell genetics, gene mapping, mitochondrial genetics, homeotic genes, transposable elements, gene amplification, and other diseases. May be concurrently scheduled with course C204B.
Mr. Lusis (F, second five weeks)

C104C. The Mammalian Cell as a Microorganism (2 units). Lecture, three hours. Prerequisites: Chemistry 152, consent of instructor. The cultured mammalian cell as an experimental system for the study of normal regulatory processes and disease mechanisms. Contents include regulation of cell growth in chemically defined medium; establishment, cloning, and characterization of cell lines, cultured cells as model systems in the study of normal growth and development, disease mechanisms and cancer. May be concurrently scheduled with course C204C.
Mr. Fox (F, first five weeks)

C104E. RNA Tumor Viruses (2 units). Lecture, three hours. Prerequisites: Chemistry 152, consent of instructor. The interactions of RNA tumor viruses with differentiating tissues, such as the immune system and erythroid development. May be concurrently scheduled with course C204E.
Mr. Witte (Sp, five weeks)

105AH-105BH-105CH. Honors Laboratory in Bacterial Pathogenesis. Laboratory, 12 hours. Prerequisites: honors standing, consent of instructor. Highly recommended; course C103A. Limited enrollment. Current research projects on the biochemistry and genetics of the bacterial infectious process under direct supervision of instructor. **105AH.** The pathogen's genetic component, focusing on plasmid encoded functions. **105BH.** Effects of genetic alterations on the pathogen's proteins and LPS. **105CH.** Examination of the interaction of genetically modified pathogens with the host and host-denied components.
Mr. Martinez (F, 105AH; W, 105BH; Sp, 105CH)

108. Hematology (2 units). Prerequisites: senior standing, consent of department. Diagnostic procedures used for the study of normal and pathological blood cells. Ms. Territo (Sp)

110. The Microbiology of Infection. Lecture, three hours; laboratory, six hours. Prerequisites: courses 101, 102, and Chemistry 152, or consent of instructor. The salient characteristics of bacteria, rickettsiae, and viruses, both pathogenic and adventitious, associated with diseases of man. Mr. Pickett (F)

C111. Biology of the Prokaryotic Cell. (Formerly numbered 111.) Lecture, three hours; discussion, one hour. Prerequisites: course 101 and Chemistry 152, or consent of instructor A review of current knowledge of the structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C211. Mr. Eiserling, Ms. Wisnieski (W)

113. Bacterial Metabolism. Lecture, three hours. Prerequisites: course 101 and Chemistry 152, or consent of instructor. Aspects of energy generation and biosynthesis in relation to bacterial growth in pure culture and natural environment. Selected topics on readings from the current literature.
Ms. Lascelles (W)

119. Microbial Genetics and Genetic Engineering. Lecture, three hours; discussion, one hour. Prerequisites: course 102 and Biology 8, or consent of instructor. Genetics of bacteria and bacteriophages, with emphasis on recombinant DNA technology and use of microbial systems in genetic engineering.
Mr. Simons (Sp)

151. Principles of Food Microbiology. Lecture, three hours. Prerequisite: course 101 (or equivalent with consent of instructor). Fundamental principles of food microbiology. Emphasis on basic microbiological principles as applied to food products and processing. Science-oriented approach rather than technology oriented. Readings in past and current research literature in food microbiology. Mr. Silliker (W)

M185. Immunology. (Same as Biology M185 and Microbiology and Immunology M185.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 8, Chemistry 23, 25. Recommended corequisite: Chemistry 152 or 156. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cell immune reactions.
Mr. Clark, Mr. Sercarz (F)

M186. Experimental Design in Immunology. (Same as Biology M186 and Microbiology and Immunology M186.) Laboratory, 12 hours. Prerequisites: course M185, consent of instructor. Corequisite: course M187. Emphasis on a limited number of situations designed to train the student in organizing and evaluating immunological laboratory experiments.
Mr. Clark, Mr. Sercarz (W)

M187. Immunology Seminar (2 units). (Same as Biology M187 and Microbiology and Immunology M187.) Prerequisites: course M185, consent of instructor. Corequisite: course M186. Student presentation of selected papers from the immunology literature. Designed to serve as a forum for the critical analysis of research papers.
Mr. Clark, Mr. Sercarz (W)

189. Immunological Methods. Lecture, two hours; laboratory, four hours. Prerequisite: course M185. Immunological and immunochemical techniques used in the modern research and clinical laboratory. (Sp)

195. Proseminar (2 units). Discussion, one hour. Prerequisites: senior standing, consent of instructor. Limited enrollment. Discussion by small groups of students and instructor on current research literature. Topic announced each quarter. (F,W,Sp)

199. Special Studies in Microbiology (2 to 8 units). Prerequisites: course 101 and Chemistry 152 with grades of B or better, junior standing, B average in the premajor and major. Individual research project under the direct supervision of a departmental faculty member. A copy of the report describing the research must be filed with the Undergraduate Office at the end of the quarter. Four units may be applied toward the major. May be repeated for a maximum of 16 units. (F,W,Sp)

199H. Honors Thesis (4 or 8 units). Prerequisite: honors program standing. Directed individual research for departmental honors; students must have a faculty sponsor. Three sequential 199H quarters are required. A progress report must be submitted to the faculty sponsor at the end of each of the first two quarters, with the honors thesis submitted at the end of the final quarter. A maximum of four units may be applied toward the major, with the balance applied toward the B.S. degree requirements. (F,W,Sp)

Graduate Courses

C203A. Biochemistry and Biology of Bacterial Infection. Lecture, three hours. The biochemical properties of bacteria which afford the potential for pathogenicity. The epidemiology and transmission of disease; chemotherapy and drug resistance. Concurrently scheduled with course C103A. Graduate term paper on a topic approved by the instructor required.
Mr. Martinez (W)

C203B. Biochemistry of Host Defense Mechanisms. Lecture, three hours. The biochemical basis of host defense mechanisms, with emphasis on the role of immunoglobulins in combating microbial invasion; the biology and biochemistry of phagocytic cells and constitutive mechanisms of host defense. Concurrently scheduled with course C103B. Graduate term paper on a topic approved by the instructor required. Mr. Martinez (Sp)

C204A. Molecular Biology of Bacterial Growth (2 units). Lecture, three hours; discussion, one hour. Prerequisites: course 101, Biology 8, and Chemistry 25, or equivalent, or consent of instructor. Introduction to bacterial physiology, with lectures stressing its experimental foundation. Topics include chromosome replication, gene expression, control of growth rate and cell division, role of cyclic AMP and other regulatory factors, cloning and genetic engineering. May be concurrently scheduled with course C104A. Includes an additional discussion section for graduate students on the research literature and methodology. S/U or letter grading. Mr. Nierlich (Sp, five weeks)

C204B. Biochemical Genetics of Eukaryotic Cells (2 units). Lecture, three hours; discussion, one hour. Prerequisites: prior background in biochemistry and genetics. Concepts in biochemical genetics, illustrated with recent research papers dealing with genetic analysis in yeast, drosophila, and mammalian systems. Topics include somatic cell genetics, gene mapping, mitochondrial genetics, homeotic genes, transposable elements, gene amplification, and other diseases. May be concurrently scheduled with course C104B. Includes an additional discussion section for graduate students on the research literature and methodology. S/U or letter grading.
Mr. Lusis (F, second five weeks)

C204C. The Mammalian Cell as a Microorganism (2 units). Lecture, three hours; discussion, one hour. Prerequisites: Chemistry 152, consent of instructor. The cultured mammalian cell as an experimental system for the study of normal regulatory processes and disease mechanisms. Contents include regulation of cell growth in chemically defined medium; establishment, cloning, and characterization of cell lines, cultured cells as model systems in the study of normal growth and development, disease mechanisms and cancer. May be concurrently scheduled with course C104C. Includes an additional discussion section for graduate students on the research literature and methodology. S/U or letter grading.
Mr. Fox (F, first five weeks)

C204E. RNA Tumor Viruses (2 units). Lecture, three hours; discussion, one hour. Prerequisites: Chemistry 152, consent of instructor. The interactions of RNA tumor viruses with differentiating tissues, such as the immune system and erythroid development. May be concurrently scheduled with course C104E. Includes an additional discussion section for graduate students on the research literature and methodology. S/U or letter grading. Mr. Witte (Sp, five weeks)

C211. Biology of the Prokaryotic Cell. Lecture, three hours; discussion, one hour. Prerequisites: course 101 and Chemistry 152, or consent of instructor. A review of current knowledge of the structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C111. Term paper on research topic selected by each graduate student required. Mr. Eiserling, Ms. Wisnieski (W)

214. Methods in Membrane Biology. Lecture/discussion, three hours; laboratory, nine hours. Prerequisite: consent of instructor. Emphasis on the basic techniques for isolating and characterizing biological membranes and component molecules. Basic and advanced techniques of membrane biochemistry and biophysics. Ms. Wisnieski (W, alternate years)

221U-221Z. Seminars and Symposia on Molecular Biology (2 to 4 units each). Lecture, two hours; discussion, three hours. Prerequisite: consent of instructor. Seminar courses which integrate topically with symposia organized and sponsored by the Molecular Biology Institute. These international symposia feature leading researchers in selected areas of molecular biology. Students receive an abstract booklet for the symposium and use the abstracts as the starting point for weekly presentations on the topics to be treated at the symposium; in this way they prepare for participation in the symposium. Topics are announced each year on September 1 by the Department of Microbiology and the Molecular Biology Institute. Mr. Fox and the Staff (W)

M223. Membrane Research Seminar (2 units). (Same as Microbiology and Immunology M223.) Prerequisite: consent of instructor. Critical discussions of the current literature in membrane research, with emphasis on the relationship between structure and function in lipid bilayers. May be repeated for credit.
Mr. Bramhall, Ms. Wisnieski

225. Biochemical Methods in Microbial and Cell Biology (2 units). Prerequisite: consent of instructor. Emphasis on techniques for purification and characterization of proteins, including cell disruption, column chromatography, gel electrophoresis, ultracentrifugation, various optical methods, and use of radioisotopes. Mr. Lusis (W, alternate years)

225L. Laboratory in Biochemical Methods in Microbial and Cell Biology (6 units). (Formerly numbered 225.) Laboratory, 12 hours. Prerequisite: consent of instructor. Corequisite: course 225. Laboratory in techniques for purification and characterization of proteins, including cell disruption, column chromatography, gel electrophoresis, ultracentrifugation, various optical methods, and use of radioisotopes. Mr. Lusis (W, alternate years)

M230A. Structural Molecular Biology (2 units). (Same as Biology M230A and Chemistry M230A.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor based on a written research proposal. Fundamentals of electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals.
Mr. Eiserling, Ms. Kasamatsu (F, alternate years)

M230C. Structural Molecular Biology Laboratory. (Same as Biology M230C and Chemistry M230C.) Laboratory, 10 hours. Prerequisite: consent of instructor based on a written research proposal. Practical experience with electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals.
Mr. Eiserling, Ms. Kasamatsu (F, alternate years)

235. Synthesis and Application of Oligonucleotides (2 units). Prerequisite: consent of instructor. Chemical methods for the synthesis of oligonucleotides and use of them for studies of molecular biology. Mr. Itakura (Sp)

235L. Laboratory Synthesis and Application of Oligonucleotides (6 units). Laboratory, 12 hours. Corequisites: course 235, consent of instructor. Laboratory in advanced methods in oligonucleotide synthesis and application. Oligonucleotides are synthesized chemically by either the phosphotriester or phosphite method and used for site specific mutation experiments. The resultant mutant is screened by the oligonucleotides.

M239. Techniques in Nucleic Acid Research (2 units). (Same as Biology M239.) Highly recommended corequisite: course M239L. Advanced methods in characterization of genes, including sequence determination. Isolation of nucleic acids by centrifugation, chromatography, and electrophoresis, and characterization by restriction mapping and blot hybridization. Cloning in bacterial and plasmid vectors, sequence determination by the dideoxy technique, computer analysis of sequences.
Mr. Nierlich, Mr. Simpson (Sp, alternate years)

M239L. Laboratory in Nucleic Acid Research (6 units). (Formerly numbered M239.) (Same as Biology M239L.) Laboratory, 12 hours. Corequisite: course M239. Laboratory in advanced methods in characterization of genes, including sequence determination. Isolation of nucleic acids by centrifugation, chromatography, and electrophoresis, and characterization by restriction mapping and blot hybridization. Cloning in bacterial and plasmid vectors, sequence determination by the dideoxy technique, computer analysis of sequences.
Mr. Nierlich, Mr. Simpson (Sp, alternate years)

M246. Computer Analysis of Genetic Organization. (Same as Biology M246.) Lecture, two hours; laboratory, six hours. Prerequisites: course 119 or Biology 144 or equivalent, and Biology 8. Lectures and laboratory instruction in contemporary procedures for the analysis of nucleic acid and protein sequence data with the computer. No prior computer experience is necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.
Mr. Nierlich, Mr. Simpson (Sp, alternate years)

250. Seminar in Microbial Metabolism (2 units). Prerequisite: consent of instructor. Discussion and student presentations of recent work in the areas of genetic regulation and physiology of bacterial metabolism. Mr. Gunsalus (F,W)

251. Seminar in Regulation and Differentiation (2 units). S/U grading.
Mr. Gunsalus, Mr. Nierlich (F)

253. Seminar in Biochemistry of Host Defense Mechanisms (2 units). Lecture/discussion, one hour. Prerequisite: consent of instructor. Discussion of the literature dealing with host defense mechanisms. The biochemical mechanisms of action of host defense. S/U or letter grading. Mr. Martinez (F)

255. Seminar in Microbial Cell Biology (2 units). Prerequisite: consent of instructor. Student presentations and critical discussion of current literature on various aspects of prokaryotic and eukaryotic cell biology and morphogenesis. May be repeated for credit. Ms. EcEwen (F)

256. Seminar in Microbial Genetics (2 units).
Mr. Eiserling, Mr. Romig (F,W,Sp)

M258A. Molecular Genetics of the Immune System (2 units). (Same as Biology M250A and Microbiology and Immunology M258A.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on immunoglobulin I and II, oncogenes of the immune system, T cell antigen receptor, and loci affecting differentiation. S/U or letter grading. Mr. Wall and the Staff (W, five weeks)

M258B. T and B Cell Function (2 units). (Same as Biology M250B and Microbiology and Immunology M258B.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on ontogeny, activation, and effector function of T and B cells. S/U or letter grading.
Mr. Bonavida and the Staff (W, five weeks)

M258C. Major Histocompatibility Complexes (2 units). (Same as Biology M250C and Microbiology and Immunology M258C.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on the structure of human and murine MHC chromosomal regions and genes, MHC polymorphism, MHC-like systems, MHC-linked genes, MHC and disease, and nonimmune function of MHC. S/U or letter grading.
Mr. Clark, Ms. Scofield (Sp, five weeks)

M258D. Immunopathology (2 units). (Same as Biology M250D and Microbiology and Immunology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on tolerance and autoimmunity, autoimmune disease models, immune complex disease, immediate hypersensitivity and its cellular basis, and natural and acquired immune deficiency disease. S/U or letter grading. Mr. Fahey, Mr. Porter (Sp, five weeks)

M258E. Immunoregulation (2 units). (Same as Biology M250E and Microbiology and Immunology M258E.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent research of instructor. Reading and discussion of current research articles on idiotype networks, suppressor T cells, tolerance at T and B cell levels, and Ir gene control. S/U or letter grading.
Mr. Sercarz (F, five weeks)

M258F. Immunochemistry (2 units). (Same as Biology M250F and Microbiology and Immunology M258F.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on the immunochemistry of antibodies, antigens, and complement, antigenic recognition, antibody restriction. S/U or letter grading.
Mr. Schumaker, Ms. Wisnieski (F or Sp, five weeks)

M260. Immunology Forum (2 units). (Same as Microbiology and Immunology M260.) Prerequisite: course M185. A broad range of current topics in immunology presented and discussed at an advanced frontier level. A continuing UCLA-wide, general graduate-level seminar involving faculty, postdoctoral immunologists, and graduate students from diverse departments. S/U or letter grading.
Mr. Sercarz (F,W,Sp)

M263. Cellular Immunology Seminar (2 units). (Same as Microbiology and Immunology M263.) Prerequisite: consent of instructor. Critical discussions of the current literature in T and B cell immunology, with emphasis on molecular mechanisms.
Mr. Sercarz (F,W,Sp)

270. Seminar in Molecular Virology (2 units). Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular virology, including viral gene expression and function. S/U grading.
Mr. Berk, Mr. Witte (F,W,Sp)

280. Seminar in Molecular and Cellular Endocrinology (2 units). Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and cellular endocrinology. S/U grading. Mr. Fox (Sp)

290. Seminar in Molecular Genetics (2 units). Lecture, one hour; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and genetic analysis of cellular gene regulation. (F,W,Sp)

M298. Seminar on Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M298, Biology M298, Chemistry M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. committee. Each student conducts or participates in discussions on assigned topics. May be repeated for credit. (F,W,Sp)

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Research (2 to 12 units).

598. Research for M.A. Thesis (2 to 12 units).

599. Research for Ph.D. Dissertation (2 to 12 units).

Scope and Objectives

The Ph.D. in Molecular Biology is offered under the supervision of an interdepartmental committee. The Molecular Biology Institute serves this committee and the various departments concerned in support of faculty research and teaching associated with the Ph.D. program. Staff members are drawn from participating departments and from the Molecular Biology Institute. Areas for study include structure and function of macromolecules, molecular genetics, and virology; bioenergetics, catalysis, and control; molecular basis of chromosome replication and gene expression and of cancer and its control.

Ph.D. Degree

Admission

Recommended undergraduate training for the Ph.D. program includes a major in a biological or physical science. Coursework should include mathematics through calculus, one year of general and organic chemistry, one year of physics, two quarters of physical chemistry based on the use of calculus, and one year of biology. Undergraduate requirements may be modified for qualified candidates with interests in certain areas. Candidates who enter the program with course deficiencies are expected to fulfill these early in the graduate program. In addition to University requirements, six quarters of Molecular Biology M298 are required.

Only superior students are admitted, and in addition to the application, transcripts, and statement of purpose, three letters of recommendation are required along with Graduate Record Examination (GRE) scores. Copies of materials sent to the Graduate Admissions Office should also be sent directly to the Graduate Office, Molecular Biology Program, 168 MBI, UCLA, Los Angeles, CA 90024.

Course Requirements

The usual program is two regular courses per quarter in addition to laboratory research, or the equivalent of 12 quarter units of upper division or graduate work. Six quarters of Molecular Biology M298 are required.

Teaching Experience

Teaching experience is encouraged, although it is not a requirement for the degree.

Qualifying Examinations

Examinations are given in Molecular Biology M298, and four must be passed. The University Oral Qualifying Examination on original research proposed by the candidate independently of the Ph.D. adviser and on a topic distinct and separate from thesis research is held usually during the second year in the program. A "midstream seminar" must be presented during the third year in the program.

Final Oral Examination

The final oral examination is required of all students for the degree.

Graduate Course

M298. Seminar on Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M298, Biology M298, Chemistry M298, Microbiology M298, and Microbiology and Immunology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. committee. Each student conducts or participates in discussions on assigned topics. May be repeated for credit. (F,W,Sp)

Related Courses in Other Departments

The following courses offered by the departments listed are particularly appropriate to the research areas mentioned above. With the approval of the guidance committee or research supervisor, other related courses may be included in the program.

Biological Chemistry M248, M253, M255, M257, M261, M263, M264A-M264B-M264C, 265, 266A-266B-266C, M267, M269, M298

Biology 227, 228, 229, M230A, M230B, M230C, M230D, 231, 233A-233B, 234A, 238, M248, 255, 280, M282, 294, M298

Chemistry M230A, M230B, M230C, M230D, M253, M255, M257, 259, M261, 262, M263, M264A-M264B-M264C, 266, M267, M269, 279, M298

Microbiology 250, 251, 253, 256, M258A, M258B, M260, M263, 270, M298

Microbiology and Immunology 208, 250, 254, M256, M258A, M258B, 261, 262, 265, M282, M293, M298

Thomas Penchoen, Ph.D. *(Berber and Arabic)*

Lecturers

Shimeon Brisman *(Hebrew)*
David L. Lieber, D.H.L. *(Hebrew)*

Scope and Objectives

The mission of the department is the discovery, interpretation, dissemination, and preservation of human values created over a period of five or more thousand years in an area which was the cradle of all civilization.

The department offers instruction in the major modern and ancient languages of the Near East: Akkadian, ancient Egyptian, Arabic, Armenian, Berber, Coptic, Hebrew, Persian, and Turkic. To meet increasing demands for a knowledge of this area and its past and present, it treats each language in a wide perspective — as a means of communication, as a vehicle of a cultural heritage, as a research tool for the area, and as an object of research itself.

Undergraduate majors may be taken in ancient Near Eastern civilizations, Arabic, Hebrew, and Jewish studies. Masters and Ph.D. programs are offered in Ancient Near Eastern Civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, and Turkic.

Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.

Undergraduate Study

The department offers the Bachelor of Arts degree in four fields: (1) Ancient Near Eastern Civilizations, (2) Arabic, (3) Hebrew, and (4) Jewish Studies. In each of these fields you must meet the prerequisites and take the courses prescribed. Your adviser assists in selecting a plan of study developed around your interests.

Bachelor of Arts in Ancient Near Eastern Civilizations

There are four options for a major in ancient Near Eastern civilizations: (1) Mesopotamia, (2) Egypt, (3) Syria-Palestine, and (4) biblical studies.

Preparation for the Major

Prerequisites for options 1 and 2 are German 1 and 2; prerequisites for options 3 and 4 are Greek 1, 2, Hebrew 1A-1B-1C, 102A-102B-102C. Majors in all four fields are expected to continue their study of German or Greek beyond the prerequisite levels.

The Major

Majors in all four options are required to take 14 courses selected in consultation with the program adviser.

Majors selecting options 1, 2, and 3 are required to take four language courses as follows: *option 1:* Semitics 140A-140B, 141, 142; *option 2:* Ancient Near East 120A-120B-120C, 121A; *option 3:* Semitics 130 and three quarters of Hebrew 120. The remaining 10 courses for all three options are to be selected from the following: three literature courses from Ancient Near East 150A, 150B, 150C, Jewish Studies M150A; three courses in history and religion from Ancient Near East M104A, M104B, 130, 170, History 105, M191A, 193D, 203, Iranian 169, 170; three courses in archaeology and art from Ancient Near East 160A, 160B, 161A, 161B, 161C, 162, Art History 102; one course in research methodology (such as Anthropology 115Q, 115R, 116P, or M116Q, or Linguistics 120A, 120B, or English 100A, 140A) taken preferably in another department with the consent of the adviser.

Majors selecting option 4 are required to take 14 courses as follows: three quarters of Hebrew 120; Ancient Near East 150C, 162, 170; English 108B or History 194A; Greek 130; Jewish Studies M150A; History M191A; Semitics 130. The remaining three courses may be selected from Ancient Near East M104A, M104B, 130, 150A, 150B, 160A, 160B, Art History 102, 105A, Classics 168, Greek 131, History 105, 193D, 194B, Iranian 169, 170, Latin 120.

Bachelor of Arts in Arabic

Students majoring in Arabic may combine the major with the interdepartmental Program in Business and Administration to enhance their career opportunities. Due to the number of additional courses required, you are advised to consider this option early in your academic career.

Preparation for the Major

Required: Arabic 1A-1B-1C, 150A-150B.

The Major

Required: Fourteen courses, including Arabic 102A-102B-102C, Islamics 110; six courses from Arabic 120, 130, 132, 140; two courses from Arabic 111A, 111B, 111C, 112A, 112B, 112C, 114A, 114B, 114C; two courses from Geography 187, History 106A, 106B, 106C.

Bachelor of Arts in Hebrew

Preparation for the Major

Required: Hebrew 1A-1B-1C, 102A-102B-102C, Jewish Studies M150A-150B, or equivalent.

The Major

Required: Sixteen courses, including Hebrew 103A-103B-103C; three quarters of Hebrew 120; two courses from Hebrew 130, 135; two courses from Hebrew 140, 160; Hebrew 190A-190B; two additional courses in Hebrew or Aramaic to be approved by the adviser; two courses from History M191A, M191B, 192A, 192B.

Bachelor of Arts in Jewish Studies

Preparation for the Major

Required: Hebrew 1A-1B-1C, History M191A-M191B, or equivalent.

The Major

Required: Sixteen courses, including Hebrew 102A-102B-102C, 103A-103B-103C, Jewish Studies M150A-150B, 151A-151B, 199, and five other upper division courses. At least two of the five must be courses in the areas of Hebrew, Jewish history, or Yiddish. The remaining three may be selected either from those areas or from courses with Jewish content given in other departments and approved by the adviser.

Master of Arts Degree

Admission

In addition to the regular University requirements, a bachelor's degree or its equivalent in the language area selected for the degree, the Graduate Record Examination (GRE) Aptitude Test, and three letters of recommendation are required. The GRE must be taken within 24 months prior to receipt of your admission application by the department. As a rule, you will not be admitted if your grade-point average is below 3.25 or if your GRE score is below 1,600. Prospective students may write to the Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA, Los Angeles, CA 90024.

You are assigned an adviser after being admitted. Subsequently, an examining committee is established to administer the comprehensive examination.

Major Fields or Subdisciplines

Ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

You may concentrate on either language or literature in your selected field but are required to do work in both. In the case of the ancient Near Eastern field, you may concentrate on a combination of both language and literature with Near Eastern archaeology.

Foreign Language Requirement

You are required to pass an examination in one major modern European language other than English by the end of your third quarter in residence. The choice of the language is determined in consultation with your adviser. You may satisfy this requirement by one of the following methods: (1) Educational Testing Service (ETS) examination with a minimum score of 550, (2) departmentally administered examination, (3) two years of language instruction at a UC campus, with grades of B or better. It is strongly recommended that if you intend to continue toward a Ph.D. degree, you acquire knowledge of a second major European language other than English while still a candidate for the M.A. degree.

Course Requirements

A minimum of nine upper division and graduate courses is required, at least six of which must be on the graduate level. All candidates are required to take one quarter of Near Eastern Languages 200.

Students in ancient Near Eastern civilizations are required to study two ancient languages of the ancient Near East (Ancient Egyptian, Akkadian, Aramaic, or Hebrew) and the history and archaeology of the related area. The area of concentration may be either the linguistic, literary, or archaeological aspect of the discipline.

Students in Hebrew are required to study Hebrew and another Semitic language; in Semitics, three Semitic languages; in Turkish, two Turkic languages; in Arabic, Armenian, and Iranian, the major language and one culturally related Near Eastern language.

Twelve units of course 596 may be applied toward the total course requirement; eight units may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

After completion of course requirements and the foreign language examination, you are required to take a written comprehensive final examination in your major and related fields.

Ph.D. Degree

Admission

In addition to the regular University requirements, an M.A. or equivalent in your field, the Graduate Record Examination (GRE) Aptitude Test, and three letters of recommendation are required. The GRE must be taken within 24 months prior to receipt of your admission application by the department. As a rule, you will not be admitted if your grade-point average is below 3.25 or if your GRE score is below 1,600. Prospective students may write to the Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA, Los Angeles, CA 90024.

The M.A. program need not have been completed at UCLA. You are assigned an adviser after being admitted. Subsequently, an examining committee is established to administer the qualifying examinations.

Major Fields or Subdisciplines

Ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

You may concentrate on either language or literature in your selected field but are required to do work in both. In all areas of specialization, your program of study is selected in consultation with your adviser.

Foreign Language Requirement

Two modern major European languages other than English are required. The choice of languages must be approved by the adviser, who may also require additional language skills in modern and/or ancient languages if such skills are needed for scholarly work in the area of your interests.

The requirement is fulfilled by one of the following options: (1) passing the Educational Testing Service (ETS) examination with a minimum score of 550, (2) departmentally administered examination, (3) two years of language instruction at a UC campus, with grades of B or better.

You are expected to pass one of the two required European languages at the beginning of your first quarter in residence and the second language no later than the beginning of the fourth quarter.

Course Requirements

If you are specializing in the languages of the Near East, you are expected to take the equivalent of one year of general linguistics and one year of grammar in your field of concentration (e.g., Semitics or Turkic). You must also achieve competence in three culturally related languages within your field of concentration, with particular emphasis on two. You are also advised to acquaint yourself with the historical, literary, religious, and social background of the various language areas selected.

If you are specializing in the literatures of the Near East, you are required to achieve competence in two languages; your second language must be a literary language from the cultural area related to the first (e.g., a Hebraist can choose Akkadian, Arabic, Aramaic, or Yiddish; an Arabist can choose Persian or Turkish, and so on). You must also be familiar with the history of literary criticism and methods of literary research. This requirement may be fulfilled by taking courses offered by various departments at UCLA, particularly the course in literary criticism offered by the English Department or the course in the methodology of comparative literature.

If you are specializing in ancient Near Eastern civilizations, you are required to achieve competence in two ancient languages. You may concentrate in either the linguistic, literary, or archaeological aspect of the discipline.

Qualifying Examinations

You must pass the written qualifying examinations before your doctoral committee is formed.

Candidates in languages are examined in three Near Eastern languages and the literary and historical background of at least two of them. Candidates in literature are examined in the literatures written in two languages within the cultural area of concentration and the historical and cultural background of these lan-

guages, with emphasis on one of them. Candidates in ancient Near Eastern civilizations are examined in two ancient languages and the history and archaeology of the ancient Near East.

When you have passed the written examinations, your doctoral committee administers the University Oral Qualifying Examination. Passing this examination allows you to advance to candidacy and begin work on your dissertation.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The department does not require an oral defense of the dissertation except when deemed necessary by the doctoral committee.

Ancient Near East

(Akkadian, Aramaic, Phoenician, and Ugaritic are listed under Semitics.)

Upper Division Courses

M104A-M104B. Ancient Egyptian Civilization. (Same as History M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. The political and cultural institutions of ancient Egypt and the ideas on which they were based. **M104A.** Chronological discussion of Prehistory, the Old and Middle Kingdom. **M104B.** The New Kingdom and the Late period until 332 B.C.
Mr. Callender (alternate years)

120A-120B-120C. Elementary Ancient Egyptian. Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Grammar and texts.
Mr. Callender

121A-121B-121C. Intermediate Ancient Egyptian. Lecture, three hours. Prerequisites: courses 120A-120B-120C. Readings in ancient Egyptian literature.
Mr. Callender

123A-123B. Coptic. Lecture, three hours. Prerequisite: consent of instructor. An introduction to Coptic grammar and reading of Coptic texts.
Mr. Callender

124. Middle Egyptian Technical Literature. Prerequisite: course 121C. Reading of Middle Egyptian technical literature in hieroglyphic transcription. Medical, veterinary, mathematical, and astronomical texts included. Mr. Callender

130. Ancient Egyptian Religion. Lecture, three hours. An introductory survey of various ancient Egyptian religious beliefs and practices, their origin, and development. Discussions of religiopolitical institutions such as divine kingship and pious foundations. Mr. Callender

140A-140B. Elementary Sumerian. Lecture, three hours. Prerequisites: Semitics 140A-140B. Elementary grammar and reading of royal inscriptions, letters, and administrative texts from the Ur III period.

145. Sumerian Literary Texts. Lecture, three hours. Prerequisites: courses 140A-140B or consent of instructor. Reading and interpretation of selected Sumerian literary texts.

150A-150B-150C. Survey of Ancient Near Eastern Literatures in English. Lecture, three hours. Each course may be taken independently for credit. **150A.** Mesopotamia; **150B.** Egypt; **150C.** Syria and Palestine. Mr. Buccellati, Mr. Callender, Mr. Segert

160A-160B. Introduction to Near Eastern Archaeology. Lecture, three hours. Terminology, geography, principles, strategy of research, bibliography, and a general survey of Near Eastern archaeology.
Ms. Carter (alternate years)

161A-161B-161C. Archaeology of Mesopotamia. Prerequisite: consent of instructor. Survey of the main archaeological periods in Mesopotamia, with special emphasis on late prehistoric and early historical periods and with reference to neighboring cultural areas. Each course may be taken independently for credit. Ms. Carter

162. Archaeology of Palestine. Lecture, three hours. A survey of the archaeology of Palestine and the Sinai Peninsula from the Bronze Age to the destruction of Jerusalem in A.D. 70, with emphasis on the geographic setting and relationships to the other cultures of the Near East.
Mr. Segert (alternate years)

163A-163B. Archaeology of Iran. Lecture, three hours. Designed to introduce students to Iranian archaeology from prehistoric through Achaemenid times. **163A.** The prehistoric and protohistoric phases of Iranian archaeology. **163B.** The archaeology of Elam, the Iron Age, and the Achaemenid Empire. Ms. Carter

164A-164B-164C. The Archaeology of the Historic Periods in Mesopotamia. Prerequisites: courses 161A-161B-161C and History 105, or consent of instructor. Survey of the main archaeological periods in Mesopotamia, with special emphasis on the historic periods and with reference to neighboring cultural areas. Each course may be taken independently for credit. Ms. Carter

170. Introduction to Biblical Studies. Lecture, two hours. Knowledge of original languages is not required. The Bible (Old and New Testaments) as a book. Canon, text, and versions. Linguistic, literary, historical, and religious approaches to Bible study. Survey of history of interpretation from antiquity to the present. Mr. Segert

199. Special Studies in the Ancient Near East (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

210. Late Egyptian. Lecture, three hours. Prerequisites: courses 121A-121B-121C, consent of instructor. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. May be repeated for credit.
Mr. Callender

211A-211B. Texts of the Greco-Roman Period. Prerequisite: course 121C. Introduction to the grammar and orthography of hieroglyphic texts from Greco-Roman temples. Text readings and translation of various textual types. Mr. Callender

220. Seminar in Ancient Egypt. Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit. Mr. Callender

221A-221B. Demotic. Prerequisite: course 121C. Introduction to Demotic grammar and orthography. Reading of texts from various genres.
Mr. Callender

240A-240B-240C. Seminar in Sumerian Language and Literature. Lecture, two hours. Prerequisite: consent of instructor. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis and literary history.

M250. Seminar in Ancient Mesopotamia. (Same as History M207.) Seminar, three hours. Selected topics on the political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit.
Mr. Buccellati

250X. Seminar in Ancient Mesopotamia (1 unit). Prerequisite: consent of instructor. Selected topics on the political, social, and intellectual history of ancient Mesopotamia. A course for students who participate regularly in class meetings but without the homework required in course M250. May be repeated for credit. S/U grading. Mr. Buccellati

260. Seminar in Ancient Near Eastern Archaeology. Lecture, two hours. Prerequisite: consent of instructor. May be repeated for credit.

261. Practical Field Archaeology (2 to 8 units). Fieldwork, two hours. Prerequisite: consent of instructor. Participation in archaeological excavations or other archaeological research in the Near East under supervision of the staff. May be repeated.
Mr. Buccellati, Ms. Carter

262. Seminar in Object Archaeology. Discussion, two hours; laboratory, one hour. Prerequisite: consent of instructor. Selected topics in the analysis and interpretation of Near Eastern archaeological finds in museum collections. Students work with objects in the Heeramanek Collection of the Los Angeles County Museum of Art. Ms. Carter

272. Semitic Background of the New Testament. Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C, Semitics 130, Greek 1, and 2, or consent of instructor. Study of the Semitic elements in the Greek New Testament: traditions transmitted in Aramaic, relations to the Old Testament and to the post-Biblical literature, and Palestinian Judaism.
Mr. Segert

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units).

599. Ph.D. Dissertation Research and Preparation (2 to 8 units).

Lower Division Courses

1A-1B-1C. Elementary Literary Arabic. Lecture, six hours. Basic grammar and syntax.

Upper Division Courses

102A-102B-102C. Intermediate Literary Arabic. Lecture, four hours; discussion, one hour. Prerequisites: courses 1A-1B-1C or consent of instructor. Grammar and syntax; readings of excerpts from literary texts; composition.

111A-111B-111C. Elementary Spoken Egyptian Arabic. Lecture, three hours. Prerequisites: courses 1A-1B-1C or consent of instructor. Basic grammar and syntax of Egyptian colloquial Arabic.

112A-112B-112C. Advanced Spoken Egyptian Arabic. (Formerly numbered 112.) Lecture, three hours. Prerequisites: courses 111A-111B-111C or consent of instructor. Grammar and syntax; excerpts from literary texts using colloquial Arabic.

114A-114B-114C. Spoken Moroccan Arabic. Lecture, three hours; laboratory, one hour. Introduction to the spoken Arabic dialect of Morocco. Phonology, morphology, and syntax. Emphasis on developing oral skills. Mr. Penchoen

120. Islamic Texts. Prerequisite: course 102C or equivalent. Readings from Koran, Tafsir, Hadith, Figh. May be repeated for credit. Mr. Poonawala

130. Classical Arabic Texts. (Formerly numbered 130A-130B-130C.) Lecture, three hours. Prerequisite: course 102C or equivalent. Readings from medieval literary texts, with grammatical and syntactical analysis. May be repeated for credit.
Mr. Bonebakker

132. Philosophical and Kalam Texts. (Formerly numbered 132A-132B-132C.) Lecture, three hours. Prerequisite: course 120 or consent of instructor. Readings in medieval and Kalam texts. May be repeated for credit. Mr. Davidson

140. Modern Arabic Texts. (Formerly numbered 140A-140B-140C.) Lecture, three hours. Prerequisite: course 102C or equivalent. Readings in contemporary Arabic texts, including newspapers and journals. May be repeated for credit. Mr. Poonawala

141. Modern Arabic Literature. Lecture, three hours. Prerequisites: two quarters of course 140 or consent of instructor. Readings in selected texts representing the most important trends in contemporary Arabic literature, with an outline of literary history from the beginning of the 19th century to the present. Conducted in Arabic. May be repeated for credit.

150A-150B. Survey of Arabic Literature in English. Lecture, three hours. Knowledge of Arabic is not required. Survey of Arabic literature from its beginnings to the present, with selected readings in translation. Each course may be taken independently for credit. Mr. Bonebakker (F,W)

199. Special Studies in Arabic (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

220. Seminar in Islamic Texts. (Formerly numbered 220A-220B-220C.) Lecture, three hours. Prerequisite: consent of instructor. Doctrines and hermeneutics of various schools of thought in Islam, with selected readings from major works. May be repeated for a maximum of 24 units.
Mr. Poonawala (F,W,Sp, alternate years)

230. Medieval Literary Texts. (Formerly numbered 230A-230B-230C.) Lecture, two hours. Prerequisite: consent of instructor. Readings in Arabic prose and poetry, survey of prosody. May be repeated for a maximum of 24 units. Mr. Bonebakker (F,W,Sp)

240. Seminar in Arab Historians and Geographers. (Formerly numbered 240A-240B-240C.) Lecture, three hours. Prerequisite: consent of instructor. Selected readings from the works of major historians, geographers, and travelers. May be repeated for a maximum of 24 units.
Mr. Poonawala (F,W,Sp, alternate years)

250. Seminar in Arabic Literature. (Formerly numbered 250A-250B-250C.) Lecture, two hours. Prerequisite: consent of instructor. Selected topics from Arabic literature. Readings of texts from manuscript. May be repeated for a maximum of 24 units.
Mr. Bonebakker (F,W,Sp)

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units).

599. Ph.D. Dissertation Research and Preparation (2 to 8 units).

Hebrew

Lower Division Courses

1A-1B-1C. Elementary Hebrew. Lecture, three hours; laboratory, two hours. Structural principles of grammar. Students who have prior knowledge of reading and some vocabulary are advised to take courses 10A-10B-10C. Students with credit for course 10A will not receive credit for 1A; those with credit for course 10B will not receive credit for 1B and/or 1C. Mr. Sabar (F,W,Sp)

10A-10B-10C. Accelerated Elementary Hebrew. Lecture, five hours. Open to students who wish to cover the equivalent of two years of college Hebrew in one academic year. Designed for students who have previously studied the rudiments of Hebrew. Students with credit for course 1A will not receive credit for 10A; those with credit for course 1B and/or 1C will not receive credit for 10B. Mr. Davidson (F,W,Sp)

Upper Division Courses

102A-102B-102C. Intermediate Hebrew. Lecture, five hours. Prerequisites: courses 1A-1B-1C or equivalent. Amplification of grammar; reading of vocalized texts from modern, biblical, and medieval/rabbinic literature. Section 1 is for students with strong grammatical background; section 2, for students with strong conversational background. The two sections should be equal in both language skills by the end of Winter Quarter. Mr. Sabar (F,W,Sp)

103A-103B-103C. Advanced Hebrew. Lecture, three hours; conversation, two hours. Prerequisites: courses 102A-102B-102C or equivalent. Introduction to modern Hebrew literary texts.
Mr. Hakak (F,W,Sp)

120. Biblical Texts. Lecture, three hours. Prerequisites: courses 102A-102B-102C or equivalent. Translations and analysis of Old Testament texts, with special attention to texts of primary literary and historical importance. May be repeated for credit.
Mr. Lieber (F,W,Sp)

130. Rabbinic Texts. Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor. Readings in Mishnah, Talmud, and/or Midrash. May be repeated for credit. Mr. Davidson

135. Medieval Hebrew Texts. Lecture, three hours. *Prerequisites: courses 103A-103B-103C or consent* of instructor. Readings in medieval Hebrew prose and poetry. May be repeated for a maximum of 16 units. Mr. Davidson

140. Modern Hebrew Poetry and Prose. Lecture, three hours. Prerequisites: courses 103A-103B-103C, consent of instructor. A study of the major Hebrew writers of the past one hundred years: prose — Mendele, Ahad Ha'am, Agnon, Yizhar; poetry — Bialik, Tchernichovsky, Greenberg, Shlonsky, Alterman, Amihai. May be repeated for credit. Mr. Hakak

160. The Hebrew Essay. Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor. The Hebrew essay from its rise in Europe in the late 18th century to the contemporary Israeli essay. Study of literary, political, philosophical, and scholarly essay. May be repeated for credit. Mr. Hakak

190A-190B. Survey of Hebrew Grammar. Lecture, three hours. Prerequisites: courses 102A-102B-102C or consent of instructor. Descriptive and comparative study of Hebrew grammar: phonology and morphology. Topics include the development of the Hebrew language from biblical times to the present day, its relation to Arabic and other Semitic languages, methods of language expansion in Israeli Hebrew, traditional pronunciation of Hebrew by various Jewish communities, Hebrew contribution to other Jewish languages (Yiddish, Ladino, Judeo-Arabic). Mr. Sabar (W,Sp, alternate years)

199. Special Studies in Hebrew (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

210. History of the Hebrew Language. Prerequisites: courses 103A-103B-103C or consent of instructor. The development of the Hebrew language in its various stages: biblical, Mishnaic, medieval, modern, and Israeli; differences in vocabulary, morphology, syntax, and the influence of other languages; problems of language expansion in Israeli Hebrew. Mr. Sabar (Sp, alternate years)

220. Studies in Hebrew Biblical Literature. Lecture, three hours. A critical study of the Hebrew text in relation to the major versions; philological, comparative, literary, and historical study of various biblical books. May be repeated for credit. Mr. Segert

230. Seminar in Medieval Hebrew Literature. Seminar, three hours. May be repeated for credit. Mr. Davidson (F,W)

231. Texts in Judeo-Arabic. Prerequisite: reading knowledge of Hebrew and Arabic. Reading of philosophic texts in Judeo-Arabic. Mr. Davidson

241. Studies in Modern Hebrew Prose Fiction. Studies in specific problems and trends in Hebrew prose fiction of the last two centuries. May be repeated for credit. Mr. Band (W,Sp)

242. Studies in Modern Hebrew Poetry. Studies in specific problems and trends in Hebrew poetry of the last two centuries. Mr. Band (W,Sp)

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units).

599. Ph.D. Dissertation Research and Preparation (2 to 8 units).

Iranian

Lower Division Courses

10A-10B-10C. Persian Conversation (2 units each). Lecture, three hours. Prerequisite: consent of instructor. Systematic and structured Persian conversation.

Upper Division Courses

101A-101B-101C. Elementary Persian. Lecture, four hours; laboratory, two hours. Mrs. Milani

102A-102B-102C. Intermediate Persian. Lecture, three hours; laboratory, three hours. Prerequisites: courses 101A-101B-101C or equivalent. Mrs. Milani

103A-103B-103C. Advanced Persian. Lecture, three hours. Prerequisites: courses 102A-102B-102C or equivalent.

140. Contemporary Persian Belle Lettres. Lecture, three hours. *Prerequisites: courses* 103A-103B-103C or equivalent, consent of instructor. A study of the major Persian poets and prose writers of the 20th century: prose — Jamalzadeh, Hedayat, Chubuk, Al Ahmad, Sa'edi, Golestan; poetry — Nima, Shamlu, Farrokhzad, Akhavan. Mr. Banani

141. Contemporary Persian Analytical Prose. Lecture, three hours. Prerequisites: courses 102A-102B-102C or equivalent, consent of instructor. A study of selected modern Persian analytical and expository prose texts, with emphasis on social sciences, literary criticism, and history. Mr. Banani

150A-150B. Survey of Persian Literature in English. Lecture, three hours. Knowledge of Persian is not required. Each course may be taken independently for credit. Mr. Banani

169. Civilization of Pre-Islamic Iran. A survey of Iranian culture from the beginnings through the Sasanian period. Mr. Schmidt

170. Religion in Ancient Iran. History of religion in Iran from the beginning to the Mohammedan conquest; Indo-Iranian background, Zoroastrianism, Manichaeism, Mazdakism. Mr. Schmidt

190A-190B. Introduction to Modern Iranian Studies. Lecture, three hours. Prerequisites: courses 101A-101B-101C or equivalent. Survey of the Iranian languages. Comparative and historical grammar. Mr. Bodrogligeti

199. Special Studies in Iranian (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

220A-220B. Classical Persian Texts. Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor. Study of selected classical Persian texts. Each course may be taken independently for credit. Mr. Banani

221. Rumi, the Mystic Poet of Islam. Seminar, three hours. Prerequisites: course 220A or 220B or equivalent, consent of instructor. A study of the life and works of Rumi in the context of interaction of Sufism and poetic creativity. May be repeated twice for credit. Mr. Banani

M222A-M222B. Vedic. (Same as East Asian Languages and Cultures M222A-M222B.) Prerequisites: knowledge of Sanskrit equivalent to East Asian Languages and Cultures 162, consent of instructor. Characteristics of the Vedic dialect and readings in the Rig-Vedic hymns. Only course M222B may be repeated for credit. Mr. Schmidt

230A-230B. Old Iranian. Prerequisite: consent of instructor. Studies in the grammars and texts of Old Persian and Avestan. Comparative considerations. Only course 230B may be repeated for credit. Mr. Schmidt

231A-231B. Middle Iranian. Prerequisite: consent of instructor. Studies in the grammars and texts of such Middle Iranian languages as best serve the students' needs (e.g., Pahlavi, Sogdian, Sakian). Only course 231B may be repeated for credit. Mr. Schmidt

250. Seminar in Classical Persian Literature. Seminar, three hours. Prerequisites: courses 103A-103B-103C and 199, or consent of instructor. May be repeated twice for credit. Mr. Banani

251. Seminar in Contemporary Persian Literature. Seminar, three hours. *Prerequisites: course 140 or* equivalent, consent of instructor. Studies in specific problems and trends in Persian poetry and prose in the 20th century. May be repeated twice for credit. Mr. Banani

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units).

599. Ph.D. Dissertation Research and Preparation (2 to 8 units).

215A-215B. Syriac. Lecture, two hours. Morphology and syntax of the Syriac language; readings in the Syriac translation of the Bible and Syriac literature. Only course 215B may be repeated for credit. Mr. Segert (alternate years)

220A-220B. Ugaritic. Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of the Ugaritic language and literature. Only course 220B may be repeated for credit. Mr. Segert

225. Phoenician. Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of Phoenician language and inscriptions. May be repeated for credit. Mr. Segert

230. Seminar in Northwest Semitic Languages and Literatures. Seminar, two hours. Prerequisite: consent of instructor. May be repeated for credit. Mr. Segert

240. Seminar in Akkadian Language. Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in the linguistic analysis of Akkadian dialects. May be repeated for credit. Mr. Buccellati

240X. Seminar in Akkadian Language (1 unit). Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in the linguistic analysis of Akkadian dialects. A course for students who participate regularly in class meetings but without the homework required in course 240. May be repeated for credit. S/U grading. Mr. Buccellati

241. Seminar in Akkadian Literature. Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit. Mr. Buccellati

241X. Seminar in Akkadian Literature (1 unit). Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. A course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit. S/U grading. Mr. Buccellati

280A-280B-280C. Seminar in Comparative Semitics. Seminar, two hours.

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units).

599. Ph.D. Dissertation Research and Preparation (2 to 8 units).

Turkic Languages

Upper Division Courses

101A-101B-101C. Elementary Turkish. (Formerly numbered 101A-101B, 102A.) Lecture, five hours. Grammar, reading, conversation, and elementary composition drills. Mr. Jaeckel (F,W,Sp)

102A-102B-102C. Advanced Turkish. (Formerly numbered 102B, 103A-103B.) Lecture, five hours. Prerequisites: courses 101A-101B-101C or equivalent. Continuing study of grammar, conversation, and composition. Readings in modern literature and social science texts. Mr. Jaeckel

111A-111B-111C. Elementary Uzbek. Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Elementary grammar, reading, and composition exercises; elementary conversation. Mr. Bodrogligeti

112A-112B-112C. Advanced Uzbek. Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Descriptive Uzbek grammar, reading, and analysis of Uzbek literary and folkloric texts. High-style composition and conversation. Mr. Bodrogligeti

114A-114B-114C. Bashkir. Lecture, three hours. Prerequisite: course 102A or consent of instructor. Grammar, reading of literary and folkloric texts. Mr. Bodrogligeti

160. Cultural History of the Turks. (Formerly numbered 160A-160B.) Lecture, three hours. Prerequisite: consent of instructor. A survey of the cultural history of the Turks, as seen primarily through their literature, from their early history to the present. Mr. Bodrogligeti

170. Turco-Mongolian Nomadic Empires. Lecture, three hours. Prerequisite: consent of instructor. Required of students in the Turkic program. A survey of the history of Turkic and Mongolian dominions from the 3rd century B.C. to A.D. 19th century (Hsiung-nu, Hsien-pi, Juan-Juan, T'u-Chueh, Uyghur, Khitan, Karakhanid, Seljuq, Kara-Khitay, Khorazmian, Jengiz-Khanite). Mr. Bodrogligeti

180. Modern Turkic Languages and Peoples. (Formerly numbered 180A-180B-180C.) Lecture, three hours. Prerequisite: consent of instructor. Required of students in the Turkic program and recommended for students in Soviet studies. An ethnic and linguistic survey of the Turkic peoples. Mr. Bodrogligeti

199. Special Studies in Turkic Languages (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

210A-210B-210C. Introduction to Ottoman. Lecture, three hours. Prerequisite: consent of instructor. Introduction to the literary language of the Ottoman Empire from its foundation in the 14th century to its overthrow in the 20th century for students of the history, literature, and religion of the Balkans, the Near East, and Central Asia. Topics include the Arabic script as applied to Ottoman; Arabic and Persian elements in grammar and vocabulary. Readings of historical and literary texts. Mr. Jaeckel (F,W,Sp)

211. Ottoman Diplomatics. Lecture, three hours. Prerequisites: courses 210A-210B-210C or equivalent. Organization and contents of the Ottoman archives; reading and discussion of documents and registers. Introduction to the use of Ottoman archive materials as a source for historical research. Mr. Shaw

220A-220B-220C. Chagatay. Lecture, three hours. Prerequisites: courses 101A-101B or 112A-112B-112C or 114A-114B-114C or consent of instructor. Introduction to Chagatay: descriptive grammar; Arabic, Persian, and Tajik elements in grammar and vocabulary. Readings and composition drills. Mr. Bodrogligeti

225A-225B-225C. Old Turkic: Turk and Uygur. Lecture, three hours. Prerequisites: course 180, consent of instructor. Textual and linguistic analysis of Turk and Old Uygur documents: inscriptions, Manichean and Buddhist literary works. Mr. Bodrogligeti (alternate years)

230A-230B-230C. A Historical and Comparative Survey of the Turkic Languages. Lecture, three hours. Prerequisite: course 180. Extinct and living Turkic languages. The history of Turkic: developments in the phonemic, grammatical, and lexical systems from the 8th to the 20th century. Structural analysis of the Turkic languages on a comparative basis. Mr. Bodrogligeti

235A-235B. Middle Turkic: Karakhanid, Khorazmian, Mamluk-Kipchak, and Old Anatolian. Lecture, three hours. Prerequisites: course 180, consent of instructor. A survey of Middle Turkic documents. Textual and linguistic analysis of Middle Turkic texts from various literary genres. Mr. Bodrogligeti (alternate years)

240A-240B-240C. Advanced Ottoman. Lecture, three hours. Prerequisites: courses 210A-210B-210C or equivalent or consent of instructor. Emphasis on the different genres of Ottoman writing (belles lettres as well as various types of state documents) in the elaborate high style of the classical Ottoman period (15th to 19th century). Selections are read in manuscript to prepare students to read works in the form in which they are likely to encounter them in their research. Mr. Bodrogligeti, Mr. Jaeckel (F,W,Sp)

250A-250B-250C. Islamic Texts in Chagatay. Lecture, three hours. Prerequisites: courses 220A-220B-220C or consent of instructor. A philological and linguistic survey of the basic Islamic source material written in the Chagatay literary language. Reading and discussion of Chagatay texts on Islamic topics. Mr. Bodrogligeti

280A-280B. Seminar in Modern Turkish Literature. Seminar, two hours. Prerequisites: course 102B or equivalent, consent of instructor. Specific issues and trends in the development of Turkish literature from the middle of the 19th century to the present. Mr. Jaeckel

290A-290B. Seminar in Classical Turkic Literature: Ottoman, Chagatay, and Azeri. Lecture, two hours. Prerequisites: courses 210A-210B-210C and/or 220A-220B-220C, consent of instructor. Survey of the Islamic literatures of the Turks in the classical period. Readings of Ottoman, Chagatay, and Azeri texts from various literary genres. Discussion of stylistic, prosodic, and linguistic characteristics. Mr. Bodrogligeti

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units).

599. Ph.D. Dissertation Research and Preparation (2 to 8 units).

Near Eastern Studies
(Interdepartmental)

5353 Bunche Hall, (213) 825-1374, 825-4601

Professors

Nikki Keddie, Ph.D. *(History)*
Ismail Poonawala, Ph.D. *(Near Eastern Languages and Cultures)*
Georges Sabagh, Ph.D. *(Sociology)*
Stanford J. Shaw, Ph.D. *(History), Chair*

Assistant Professor

Irene A. Bierman, Ph.D. *(Art History)*

Scope and Objectives

The graduate major in this discipline is called "Islamic Studies." For details, see the program by that name earlier in this chapter.

The undergraduate major is designed primarily for (1) students seeking a general education and desiring a special emphasis in this particular area, (2) those who plan to live and work in the Near East whose careers will be aided by a knowledge of its peoples, languages, and institutions, and (3) students preparing for academic study in the various disciplines pertaining to the Near East.

Bachelor of Arts Degree

Preparation for the Major

Required: The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish. You must also obtain a reading proficiency in French, German, Italian, Russian, or Spanish as demonstrated by completing six quarter courses or their equivalent in the language of your choice. You may substitute for the European language requirement Program in Computing 1 and one course from Economics 40, Mathematics 50, Political Science 6, Psychology 41, or Sociology 18, plus one course from Economics 141, Geography 171, Political Science 102, Psychology M142, or Sociology 116. Also required are History 9D and four courses from History 1A, 1B, 1C, Anthropology 5, 6, Economics 1, 2, Geography 3, Political Science 20, 50, Sociology 1.

The Major

Required: Sixteen courses as follows: (1) completion of the advanced level or equivalent in the same language taken in lower division; (2) History 106A-106B-106C and three additional courses in the history of the Near East, two of which are related to the major language; (3) four courses (two of which must be in the same discipline) from Anthropology 110, 176, Art History 102, 104A, 104B, C104C, Economics 110, 111, 112, 190, Geography 187, 188, Political Science 132A, 132B, 164, 165, Sociology 132, 133. This program may be modified in exceptional cases with consent of the adviser.

If you are interested in doing graduate work in this field, see the M.A. and Ph.D. programs offered under "Islamic Studies" earlier in this chapter.

For further information, contact Professor Stanford J. Shaw at the program address.

Scope and Objectives

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Philosophy Department was judged fifth best in the nation in terms of the quality of its faculty. It offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees.

Philosopher, translated from the Greek, literally means "lover of wisdom." The term has come to mean someone who seeks knowledge, enlightenment, truth. The undergraduate program in philosophy is not directed at career objectives (although it is traditionally a good preparation for law, theology, and graduate work in philosophy). Philosophy is taught to undergraduates primarily as a contribution to their liberal education. All of the lower and most of the upper division offerings should be of interest and useful to students who are reflective about their beliefs or who wish to become so. It also provides the occasion to ponder the foundations of almost any other subject to which they are exposed — whether history, religion, government, or science.

The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

Bachelor of Arts Degree

Preparation for the Major

Required: Philosophy 21, 22, 31, and one other lower division course in philosophy.

The Major

Required: Twelve upper division or graduate philosophy courses (48 units). Seven of the 12 courses must be distributed among the groups into which the undergraduate and graduate courses are divided, in the following manner: two courses (eight units) in each of three of the groups and one course (four units) in the remaining group.

Courses listed under "Special Studies" may be applied toward the major but not toward a group requirement. A maximum of eight units of Philosophy 199 may be applied toward the major but not toward a group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisers.

Honors at Graduation

On the recommendation of the department faculty, honors in philosophy are awarded at graduation to a major whose grade-point average in upper division philosophy courses is 3.3 and who has completed two graduate courses (eight units) in philosophy with an average GPA of 3.5.

Master of Arts Degree

Admission

It is the policy of the department to admit only those who plan to earn the Ph.D. degree. For admission requirements, see the description under "Ph.D. Degree."

Foreign Language Requirement

You must demonstrate a reading knowledge of French, German, Latin, or Greek. (When relevant to your research, another language may be substituted with the consent of the department.) This requirement can be satisfied by passing, with a score of at least 500, the Educational Testing Service (ETS) Graduate School Foreign Language Test in an approved language. Alternatively, it can be satisfied in either of the ways in which the Ph.D. language requirement can be satisfied.

Course Requirements

You must complete at least nine upper division or graduate courses (36 units), excluding Philosophy 199, of which five courses (20 units) must be in the 200 series.

Courses in the 500 series may not be applied toward the course requirements for the M.A. in Philosophy.

Comprehensive Examination Plan

Students seeking the M.A. must pass the master's comprehensive examination (see the "Ph.D. Degree"). In case of failure, the examination may be repeated.

Ph.D. Degree

Admission

Admission to UCLA as a graduate student in philosophy requires approval both by the Graduate Division and by the Department of Philosophy. The University application and one official transcript from each institution attended should be sent directly to Graduate Admissions; the departmental application, three letters of recommendation (on the official forms), a statement of purpose, a sample of your written work, official scores from the Graduate Record Examination (GRE) Aptitude Test (the Advanced Test in Philosophy is not required), official Test of English as a Foreign Language (TOEFL) scores for applicants whose native language is not English, and one official transcript from each institution attended should be sent to the department graduate counselor. Departmental information and applications can be obtained by writing to the Graduate Counselor, Department of Philosophy, 321 Dodd Hall, UCLA, Los Angeles, CA 90024.

Admission to graduate study in philosophy is not probationary. At the end of your first year of study, the department conducts a review of your work; results are discussed in a meeting between you and your graduate adviser.

Foreign Language Requirement

You must demonstrate a reading knowledge of French, German, Latin, or Greek. (Another language may be substituted with the consent of the department, if it is used in the doctoral work.) You may satisfy this requirement by completing, with a grade of C or better, the final course in a two-year sequence of college courses in an approved language. Alternatively, you may satisfy the requirement by passing the department language examination. Completion of the foreign language requirement is not required for admission to the doctoral program but is required by the University for advancement to candidacy.

Course Requirements

A Ph.D. candidate must complete, with a grade of B or better, the three first-year seminars, plus nine additional upper division and graduate courses in philosophy (not including individual studies courses), distributed as follows:

Logic: Two upper division or graduate courses in logic in either the Philosophy or Mathematics Department (approved by your adviser).

History of Philosophy: Two graduate-level courses.

Ethics and Value Theory: One graduate-level course.

Metaphysics and Epistemology: One graduate-level course.

Electives: Three upper division or graduate-level courses of your choice.

Group classification of a course is generally given by its catalog listing, but final classification of a course is determined by the instructor on the basis of its content and the departmental guidelines. Normally, no substitutions for these courses are allowed, but if you have done graduate coursework elsewhere, you may be permitted to substitute previous graduate coursework in exceptional cases.

Teaching Experience

Before receiving a Ph.D., you are required to spend five quarters as a teaching assistant at UCLA.

Qualifying Examinations

The master's comprehensive examination consists of four different examinations. One is in logic on the materials covered in Philosophy 31 and 32. Consult the *Manual for Graduate Students in Philosophy* for further information about this examination.

There are also examinations on each of the three first-year seminars. These examinations last two hours and each occurs soon after the completion of the seminar to which it applies. The examination is passed or failed as a whole, which does not necessarily require passing of all four parts.

In the second and third years, you must write two papers, prepared in accordance with a specific format, called "propositions." One must be on a topic in metaphysics or epistemology and the other on a topic in ethics or value theory.

The first proposition should be submitted before the end of the second year; the second, before the end of the third year. Both propositions must be accepted by the department before you can take the University Oral Qualifying Examination. Consult the *Manual for Graduate Students in Philosophy* for further details.

In the third year, you begin a new series of individual studies courses (Philosophy 596) with your dissertation supervisor to develop a well-defined dissertation project. A doctoral committee is selected and the University Oral Qualifying Examination is scheduled. The primary purpose of this examination is to determine whether you will be able to complete the dissertation successfully. The scope of the examination varies according to the definiteness of the dissertation topic and the extent of your preliminary investigations. In case of failure, the doctoral committee makes a recommendation for or against allowing a second oral examination.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination may be waived by the doctoral committee. This determination is usually made at the time of the oral qualifying examination.

Lower Division Courses

1. The Beginnings of Western Philosophy. Lecture, three hours; discussion, one hour. The origins of Greek cosmology and philosophy, the beginnings of systematic thought and scientific investigation concerning such questions as the origin and nature of the material world, the concept of laws of nature, the possibility and extent of knowledge. Concentration on the pre-Socratic philosophers, particularly Anaximander, Heraclitus, the Pythagoreans, Parmenides, Empedocles, and the Greek atomists, during the first two thirds of the course and on Socrates and some earlier works of Plato in the last few weeks.
Mr. Albritton, Mr. Furth

2. Introduction to the Philosophy of Religion. Lecture, three hours; discussion, one hour. An introductory study of such topics as the nature and grounds of religious belief, the relation between religion and ethics, the nature and existence of God, the problem of evil, and what can be learned from religious experience. Mr. Adams, Mrs. Adams

3. Personal and Social Ideals. Lecture, three hours; discussion, one hour. A study of various conceptions of human perfection and social utopias. Readings from such authors as Freud, Thomas More, Marx, B.F. Skinner, and Sartre.

4. Philosophical Analysis of Contemporary Moral Issues. Lecture, three hours; discussion, one hour. A critical study of principles and arguments advanced in discussion of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, the right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, rights of women. Ms. Hampton, Mr. Quinn

5A. Philosophy in Literature. Lecture, three hours; discussion, one hour. A philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and the meaning of life through examination of great literary works in the Western tradition.
Mr. Morris, Mr. Nelson

6. Historical Introduction to Moral and Political Philosophy. Lecture, three hours; discussion, one hour. A study of some classic works in moral and political philosophy. Questions that may be discussed include What is justice? Why be moral? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society? Ms. Hampton

7. Introduction to the Philosophy of Mind. Lecture, three hours; discussion, one hour. An introductory study of philosophical issues about the nature of the mind and its relation to the body, including materialism, functionalism, behaviorism, determinism and free will, the nature of psychological knowledge.
Mr. Burge, Mr. Healey

8. Introduction to the Philosophy of Science. Lecture, three hours; discussion, one hour. An introduction to philosophical questions about the nature of science, drawing examples from specific scientific theories and controversies that can be understood without much mathematical or technical background. What role do observation and explanation play in building and evaluating scientific theories? How should we view the relation between science and common sense? Mr. Healey

9. Principles of Critical Reasoning. The nature of arguments: how to analyze them and assess the soundness of the reasoning they represent. Common fallacies that often occur in arguments discussed in light of what counts as a good deductive or inductive inference. Other topics include the use of language in argumentation to arouse emotions as contrasted with conveying thoughts, the logic of scientific experiments and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting).
Mr. Kaplan

10. Virtues and Vices. Lecture, three hours; discussion, one hour. A study of the traditional theory of the virtues and vices, and an inquiry into its truth. Readings in Aristotle, Aquinas, and contemporary authors; discussion of concepts such as courage, wisdom, and justice. Should we accept the traditional list of the virtues and vices, or should it be revised?
Mrs. Foot

21. Skepticism and Rationality. Lecture, three hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? An introduction to the study of these and related questions through the works of some great philosophers of the modern period, such as Descartes, Leibniz, Berkeley, or Hume.
Mr. Donnellan, Mr. Furth, Mr. Yost

22. Introduction to Ethical Theory. Lecture, three hours; discussion, one hour. Recommended or required for many upper division courses in Group III. A systematic introduction to ethical theory, including discussion of egoism, utilitarianism, justice, responsibility, the meaning of ethical terms, relativism, etc.
Mr. Quinn

31. Logic, First Course. Lecture, three hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in logic. The elements of symbolic logic, sentential and quantificational; forms of reasoning and structure of language. Mr. Almog, Mr. Burge, Mr. Kalish, Mr. Kaplan, Mr. Nelson

32. Logic, Second Course. Lecture, three hours; discussion, one hour. Prerequisite: course 31 (preferably in the preceding quarter). Symbolic logic: extension of the systematic development of course 31. Quantifiers, identity, definite descriptions.
Mr. Almog, Mr. Burge, Mr. Kalish, Mr. Kaplan

97. Freshman Seminar. Prerequisite: consent of instructor. Variable topics; consult *Schedule of Classes* or "Department Announcements" for current topic. May be repeated for credit with consent of instructor.

Upper Division Courses

Group I: History of Philosophy

100A. History of Greek Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one course in philosophy or consent of instructor. Survey of Greek philosophy, with emphasis on the metaphysics and epistemology of Plato and Aristotle.
Mr. Albritton, Mr. Furth

100B. Medieval and Early Modern Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one course in philosophy or consent of instructor. Strongly recommended: course 100A. Survey of the development and transformation of Greek metaphysics and epistemology within the context of philosophical theology, and the transition from the medieval to the early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes.
Mrs. Adams

100C. History of Modern Philosophy, 1650-1800. Lecture, three hours; discussion, one hour. Prerequisite: one course in philosophy. Strongly recommended: course 100B. Courses 100A, 100B, and 100C should be taken in immediately successive quarters if possible. Survey of the development of metaphysics and the theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include the views of these (and perhaps other) philosophers of the period on mind and body, causality, the existence of God, skepticism, empiricism, the limits of human knowledge, and the philosophical foundations of modern science. Mr. Adams

101A. Plato — Earlier Dialogues. Lecture, three hours; discussion, one hour. Prerequisite: one course in philosophy or consent of instructor. A study of selected topics in the early and middle dialogues of Plato. Mr. Furth

101B. Plato — Later Dialogues. Lecture, three hours; discussion, one hour. Prerequisite: course 101A. A study of selected topics in the middle and later dialogues of Plato. Mr. Furth, Mr. Quinn

102. Aristotle. *Lecture, three hours; discussion, one* hour. Prerequisite: one course in philosophy or consent of instructor. A study of selected works of Aristotle. Mr. Furth

104. Topics in Islamic Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one course in philosophy or consent of instructor. The development of Muslim philosophy in its great age (from Kindo to Averroes, 850 to 1200), considered in connection with Muslim theology and mysticism.

105. Medieval Philosophy from Augustine to Maimonides. Prerequisite: one course in philosophy or consent of instructor. The development of early medieval philosophy within the framework of Judeo-Christian theology and its assimilation and criticism of the Greek philosophical heritage. Focus on the problem of universals, the existence and nature of God, the problem of evil, and the doctrines of the Trinity and atonement. Selected writings from Augustine through Maimonides read in English translation.
Mrs. Adams

106. Later Medieval Philosophy. Prerequisite: one course in philosophy or consent of instructor. Metaphysics, theory of knowledge, and theology of Aquinas, Duns Scotus, and Ockham, with less full discussion of other authors from the 13th through early 15th century. Selected texts read in English translation.
Mrs. Adams

107. Topics in Medieval Philosophy. Prerequisite: one course in philosophy. Recommended: course 105 or 106. The study of the philosophy and theology of one medieval philosopher such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham, or the study of a single area such as logic or theory of knowledge in several medieval philosophers. Topic announced each quarter. May be repeated for credit with consent of instructor. Mrs. Adams

C109. Descartes. Prerequisites: course 21 or two courses in philosophy or consent of instructor. A study of the works of Descartes, with emphasis on the *Meditations.* Issues such as the problem of skepticism, the foundations of knowledge, the existence of God, the relation between mind and body. Limited to 30 students when concurrently scheduled with course C209. Mr. Burge, Mr. Nelson

C110. Spinoza. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. A study of the philosophy of Spinoza. May be concurrently scheduled with course C210, in which case there is a weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.
Mr. Adams

C111. Leibniz. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. A study of the philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is a weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.
Mr. Adams, Mr. Nelson

C112. Locke and Berkeley. Prerequisite: one course in philosophy or consent of instructor. A study of the philosophies of Locke and Berkeley; emphasis may sometimes vary from one figure to the other. May be concurrently scheduled with course C212.
Mr. Donnellan

C114. Hume. Prerequisite: one course in philosophy or consent of instructor. Selected topics from the metaphysical, epistemological, and ethical writings of Hume. *Limited to 40 students when concurrently* scheduled with course C214. Mr. Donnellan

115. Kant. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or 22 or consent of instructor. A study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor.
Ms. Hampton

116. 19th-Century Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one course in philosophy or consent of instructor. Selected topics in 19th-century thought.

117. Late 19th- and Early 20th-Century Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one course in philosophy or consent of instructor. Selected topics in the work of one or more of the following philosophers: Bolzano, Frege, Husserl, Meinong, G. Moore, the early Russell, and Wittgenstein. May be repeated for credit with consent of instructor. Mr. Almog, Mr. Burge

Group II: Logic, Semantics, and Philosophy of Science

126A. Philosophy of Science. Lecture, three hours; discussion, one hour. Prerequisite: one course in philosophy or consent of instructor. A historical introduction to the philosophy of science. Several general topics discussed in the context of actual episodes in the development of the natural sciences.
Mr. Healey, Mr. Nelson

126B. Philosophy of Science. Lecture, three hours; discussion, one hour. Prerequisite: course 31 or 126A or consent of instructor. An introduction to contemporary philosophy of science, focusing on problems of central importance. Mr. Healey, Mr. Nelson

126C. Philosophy of Science: Social Sciences. Lecture, three hours; discussion, one hour. Prerequisites: two courses in philosophy or consent of instructor. A discussion of topics in the philosophy of social science (e.g., the methods of the social sciences in relation to the physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, the nature of social laws).
Mr. Nelson

127A. Philosophy of Language. Prerequisite: course 31 or consent of instructor. Syntax, semantics, pragmatics. The semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor.
Mr. Burge, Mr. Church, Mr. Kaplan

127B. Philosophy of Language. Prerequisite: course 32 or consent of instructor. Course 127A is not prerequisite to 127B. Selected topics similar to those considered in course 127A, but at a more advanced and technical level. Mr. Church, Mr. Kaplan

128A. Philosophy of Mathematics. Prerequisites: courses 31, 32, and preferably one additional course in logic. The philosophy of mathematics; logicism of Frege and Russell, arithmetic reduced to logic; ramified type theory and impredicative definition (Russell, Poincare, the early Weyl). Mr. Church

128B. Philosophy of Mathematics. Prerequisite: course 128A or consent of instructor. Intuitionism of Brouwer, Heyting, and the later Weyl; proof theory of Hilbert. Mr. Church

129. Philosophy of Psychology. Lecture, three hours; discussion, one hour. Prerequisites: one four-unit course in psychology, one course in philosophy. Selected philosophical issues arising from psychological theories. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of the theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology. Mr. Burge

130. Philosophy of Space and Time. Lecture, three hours; discussion, one hour. Prerequisites: two courses in philosophy or one course in philosophy and one course in physics, or consent of instructor. *Selected philosophical problems concerning the nature* of space and time. The philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include the nature of geometry, conventionalism, absolutist versus relationist views of space and time, philosophical impact of relativity theory. Mr. Healey

131. Science and Metaphysics. Lecture, three hours; discussion, one hour. Prerequisites: two courses in philosophy or consent of instructor. An intensive study of one or two metaphysical topics on which the results of modern science have been thought to bear. Topics may include the nature of causation, the reality and direction of time, time-travel, backwards causation, realism, etc. May be repeated for credit with consent of instructor. Mr. Healey

133. Topics in Logic and Semantics. Prerequisite: course 32. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics.
Mr. Kalish, Mr. Kaplan, Mr. Martin

134. Introduction to Set Theory. Prerequisites: course 32 or upper division standing in mathematics, consent of instructor. Introduction to axiomatic set theory; sets, natural numbers, relations, functions, cardinality, infinity. Mr. Kalish, Mr. Martin

135. Introduction to Metamathematics. Prerequisite: course 32. Recommended: course 134 or equivalent. Models, satisfaction, truth, definability; logical truth and logical consequence; consistency and completeness.
Mr. Church, Mr. Kalish, Mr. Kaplan, Mr. Martin

136. Modal Logic. Prerequisites: courses 31, 32. The first course in a two-quarter sequence (also see course 176). Topics include various normal modal systems, derivability within the systems, Kripke-style semantics and generalizations, Lemmon-Scott completeness, incompleteness in tense and modal logic, quantificational extension.
Mr. Kaplan, Mr. Martin (W)

Group III: Ethics and Value Theory

150. Society and Morals. Lecture, three hours; discussion, one hour. Prerequisite: course 22 or consent of instructor. A critical study of principles and arguments advanced in discussion of current moral and social issues. Topics similar to those in course 4, but familiarity with some basic philosophical concepts and methods is presupposed. May be repeated for credit with consent of instructor.

151A-151B. History of Ethics. Prerequisites: two courses in philosophy or consent of instructor. Course 151A is not prerequisite to 151B. **151A.** Selected Classics in Ancient Ethical Theories: Plato, Aristotle; **151B.** Selected Classics in Modern Ethical Theories: Hume, Kant, Mill, etc. Mr. Quinn

153A. Topics in Ethical Theory: Normative Ethics. *Prerequisite: course 22 or consent of instructor.* A study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, principles of culpability and praiseworthiness (the criteria of right action). May be repeated once for credit with consent of instructor. Mr. Quinn

153B. Topics in Ethical Theory: Metaethics. Prerequisite: course 22 or consent of instructor. A study of selected problems in metaethics. Topics may include the analysis of moral language, the justification of moral beliefs, moral realism, skepticism, etc. May be repeated once for credit with consent of instructor.
Mrs. Foot, Mr. Quinn

155. Medical Ethics. An examination of the philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and medical experimentation. Mrs. Foot

156. Topics in Political Philosophy. Lecture, three hours; discussion, one hour. Prerequisites: two courses in philosophy or consent of instructor. Recommended: course 22. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. Ms. Hampton

157A-157B. History of Political Philosophy. *Lecture, three hours; discussion, one hour. Prerequisites:* two courses in philosophy or consent of instructor. May be repeated with consent of instructor. **157A.** Reading and discussion of classic works in earlier political theory, especially those by Hobbes, Locke, Hume, and Rousseau. **157B.** Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx. Ms. Hampton

161. Topics in Aesthetic Theory. Lecture, three hours; discussion, one hour. Prerequisite: one course in philosophy or consent of instructor. Philosophical theories about the nature and importance of art and art criticism, aesthetic experience, and aesthetic values. May be repeated for credit with consent of instructor. Mr. Quinn

166. Introduction to Legal Philosophy. Prerequisite: one course in philosophy or consent of instructor. An examination, through the study of recent philosophical writings, of such topics as the nature of law, the relationship of law and morals, legal reasoning, punishment, and the obligation to obey the law.
Ms. Hampton, Mr. Morris

Group IV: Metaphysics and Epistemology

170. Philosophy of Mind. Lecture, three hours; discussion, one hour. Prerequisites: two relevant courses in philosophy or consent of instructor. An analysis of various problems concerning the nature of mind and mental phenomena, such as the relation between the mind and the body, and our knowledge of other minds. May be repeated once for credit with consent of instructor. Mr. Donnellan

172. Philosophy of Language and Communication. Prerequisites: two relevant courses in philosophy or linguistics or consent of instructor. Theories of meaning and communication; how words refer to things; limits of meaningfulness; analysis of speech acts; relation of everyday language to scientific discoveries. Mr. Donnellan

175. Topics in Philosophy of Religion. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or 22 or consent of instructor. An intensive investigation of one or two topics or works in the philosophy of religion, such as the attributes of God, arguments for or against the existence of God, or the relation between religion and ethics. Topics announced each quarter. May be repeated for credit with consent of instructor.
Mr. Adams, Mrs. Adams, Mr. Albritton

176. Metaphysics of Modality. Prerequisites: courses 31, 32. Highly recommended: course 136. The second course in a two-quarter sequence (also see course 136). Metaphysical foundations of modal logic and the philosophical basis of the model theory of modal logic. What are "possible worlds"? What is the "accessibility" relation? Is modal logic a logic or a theory? Is its focus logical or metaphysical necessity? Are the two notions really distinct? How metaphysically involved is (quantified) modal logic? What is its connection to the doctrines of (1) "Haecceitism" and (2) "Aristotelian Essentialism"? P/NP or letter grading. (Sp)

177A. Existentialism. Lecture, three hours; discussion, one hour. Prerequisite: one course in philosophy or consent of instructor. Analysis of the methods, problems, and views of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, Marcel, and Camus. Possible topics include metaphysical foundations, nature of mind, freedom, problem of the self, other people, ethics, existential psychoanalysis.

177B. Historical Studies in Existentialism. Prerequisite: one course in philosophy or consent of instructor. A study of the central philosophical texts of one of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Buber, Sartre, or Camus. Emphasis on explication and interpretation of the texts. May be repeated for credit with consent of instructor.
Mr. Adams

178. Phenomenology. Lecture, three hours; discussion, one hour. Prerequisites: two courses in philosophy or consent of instructor. Introduction to the phenomenological method of approaching philosophical problems via the works of some of the following: Brentano, Husserl, Heidegger, Scheler, Sartre, Merleau-Ponty, Ricoeur. Topics include ontology, epistemology, and particularly philosophy of mind.

179. Oriental Philosophy: Buddhism. An examination of the central concepts and arguments in Buddhist philosophy, with emphasis on the school of Mahayana Buddhism. Appropriate parallels to social concepts in the Western tradition.

182. Elements of Metaphysics. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. Study of basic metaphysical questions; nature of the physical world, of minds, and of universals; and the answers provided by alternative systems (e.g., phenomenalism, materialism, dualism). Mr. Yost

183. Theory of Knowledge. Prerequisite: course 21 or consent of instructor. An analysis of the concept of empirical knowledge. Mr. Nelson, Mr. Yost

184. Topics in Metaphysics. Prerequisite: course 21 or consent of instructor. An intensive investigation of one or two topics or works in metaphysics, such as personal identity, the nature of dispositions, possibility and necessity, universals and particulars, causality. Topics announced each quarter. May be repeated for credit with consent of instructor.
Mr. Albritton, Mr. Donnellan, Mr. Healey

186. Topics in the Theory of Knowledge. Prerequisite: course 182 or 183 or consent of instructor. An intensive investigation of one or two selected topics or works in the theory of knowledge, such as a priori knowledge, the problem of induction, memory, knowledge as justified true belief. Topics announced each quarter. May be repeated for credit with consent of instructor. Mr. Albritton

187. Philosophy of Action. Prerequisites: two courses in philosophy or consent of instructor. A study of various concepts employed in the understanding of human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception. Mr. Albritton, Mr. Burge, Mr. Donnellan

188. Philosophy of Perception. Prerequisites: two courses in philosophy or consent of instructor. A critical study of the main philosophical theories of perception and the arguments used to establish them.
Mr. Yost

189. Major Philosophers of the 20th Century. Prerequisites: two courses in philosophy or consent of instructor. A study of the writings of one or more major modern philosophers (e.g., Russell, Moore, Wittgenstein, Carnap, Quine). May be repeated for credit with consent of instructor.
Mr. Albritton, Mr. Burge, Mr. Donnellan

Special Studies

192. Philosophical Analysis of Issues in Women's Liberation. Prerequisite: one course in philosophy or consent of instructor. A critical study of concepts and principles which arise in the discussion of women's rights and liberation. Topics may include economic and educational equality, preferential treatment, abortion, sex roles, sexual morality, marriage, love, friendship.

193. Christian Ethical Thought. Lecture, three hours; discussion, one hour. Reading of selected classic and contemporary authors in the Christian ethical tradition, with philosophical analysis and assessment of their views on morality and the religious life. Mr. Adams

195. 19th- and 20th-Century Religious Thought. Lecture, three hours; discussion, one hour. A philosophical approach to Western religious thought of the last 200 years, through study of selected works by such authors as Kant, Schleiermacher, Kierkegaard, Buber, Camus, and Tillich. Mr. Adams

196. Undergraduate Seminar in Philosophy. Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Variable topics; consult *Schedule of Classes* or "Department Announcements" for current topic. May be repeated for credit with consent of instructor.

197. Reading and Writing Philosophy. Prerequisites: two lower or upper division courses in philosophy. Designed to help philosophy students improve their ability to read philosophical texts and write philosophical essays. Selected texts used to illustrate problems of reading and writing; students are required to do and redo written work. Mr. Quinn

199. Special Studies (2 to 8 units). Prerequisite: consent of instructor. Eight units may be applied toward the degree requirements, but course cannot be substituted for a course in one of the four groups on the basis of similarity of subject matter.

Graduate Courses

200A-200B-200C. Seminar for First-Year Graduate Students. Limited to and required of all first-year graduate students in philosophy. Selected topics in metaphysics and epistemology, history of philosophy, and ethics.

Group I. History of Philosophy

201. Plato. Prerequisite: consent of instructor. A study of the later dialogues. Mr. Furth

202. Aristotle. Prerequisite: consent of instructor. Analysis of major problems in Aristotle's philosophy based on the reading, exposition, and critical discussion of relevant texts in English translation.
Mr. Furth

203. Seminar: History of Ancient Philosophy. Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor. Mr. Furth

206. Topics in Medieval Philosophy. Prerequisite: consent of instructor. The study of the philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham or the study of a single area such as logic or theory of knowledge in several medieval philosophers. Topics announced each quarter. May be repeated for credit with consent of instructor.
Mrs. Adams

207. Seminar: History of Medieval and Renaissance Philosophy. Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor.
Mrs. Adams

208. Hobbes. Prerequisite: consent of instructor. Hobbes' political philosophy, especially the *Leviathan*, with attention to its relevance to contemporary political philosophy. Ms. Hampton

C209. Descartes. Prerequisite: consent of instructor. A study of the works of Descartes, with emphasis on the *Meditations*. Issues such as the problem of skepticism, the foundations of knowledge, the existence of God, the relation between mind and body. May be concurrently scheduled with course C109.
Mr. Burge, Mr. Nelson

C210. Spinoza. Prerequisite: consent of instructor. Selected topics in the philosophy of Spinoza. May be concurrently scheduled with course C110, in which case there is a two-hour biweekly discussion meeting, plus additional readings and a longer term paper for graduates. Mr. Adams

C211. Leibniz. Prerequisite: consent of instructor. Selected topics in the philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is a two-hour biweekly discussion meeting, plus additional readings and a longer term paper for graduates. Mr. Adams, Mr. Nelson

C212. Locke and Berkeley. Prerequisite: consent of instructor. Selected topics in the philosophy of Locke and Berkeley. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C112. Mr. Donnellan

C214. Hume. Prerequisite: consent of instructor. Selected topics in the philosophy of Hume. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C114.
Mr. Donnellan

215. Kant. Prerequisite: consent of instructor. An intensive study of selected writings of Immanuel Kant.
Mr. Adams, Ms. Hampton

216. 19th-Century Philosophy. Prerequisite: consent of instructor. Topics in 19th-century philosophy. May be repeated for credit with consent of instructor.

219. Seminar: History of Modern Philosophy. Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor. Mr. Adams

220. Seminar: Topics in History of Philosophy. Seminar, three hours. Prerequisite: consent of instructor. Selected problems and philosophers which may be drawn from different periods. May be repeated for credit with consent of instructor.
Mr. Adams, Mrs. Adams

Group II. Logic, Semantics, and Philosophy of Science

221A. Topics in Set Theory. Prerequisite: Mathematics 112A or consent of instructor. Sets, relations, functions, partial and total orderings; well-orderings. Ordinal and cardinal arithmetic, finiteness and infinity, the continuum hypothesis, inaccessible numbers. Formalization of set theory: Zermelo-Fraenkel; von Neumann-Gödel theory. May be repeated for credit with consent of instructor. Mr. Kalish, Mr. Martin

221B. Non-Neumannian Set Theory. Prerequisite: course 221A or consent of instructor. Standard (so-called Z-F) set theory relies on a principle of limitations of size as a means of avoiding antinomy. As this principle was first formulated explicitly as an axiom of set theory by von Neumann, set theories in which it fails may appropriately be spoken of as non-Neumannian. Possibilities in regard to non-Neumannian set theories explored; proposed axiomatizations and relative consistency proofs based on the assumed consistency of Z-F set theory or of Z-F set theory plus a strong axiom of infinity. Mr. Church

221C. History of Set Theory. Prerequisite: consent of instructor. The development of the concept of set and axiomatic set theory by examining selected writings of Frege, Cantor, Russell, Zermelo, Gödel, and several others. The origins and significance of certain key ideas, such as set theory as logic, axiomatic set theory as a reaction to the paradoxes, formal first-order axiomatic set theory as opposed to informal axiomatics, type theory and the rank hierarchy, ramification and predicativity, proper classes and sets as small classes, and the particular Zermelo-Fraenkel axiomatic theory. Emphasis on the actual expressed ideas and views of various influential authors.
Mr. Martin

222A-222B-222C. Gödel Theory:

222A. Prerequisites: several courses in logic, preferably including course 135. First in a series of three courses leading to Gödel's incompleteness theorem and Tarski's definition of truth.

222B. Prerequisite: course 222A. Second-order arithmetic. Second in series of three courses leading to Gödel's incompleteness theorem and Tarski's definition of truth.

222C. Prerequisite: course 222B. Gödel numbering and Gödel theory. Final course in the Gödel theory series. Mr. Church, Mr. Martin

224. Philosophy of Physics. Prerequisite: consent of instructor. Selected philosophical topics related to physical theory, depending on interests and background of the participants, including space and time; observation in quantum mechanics; foundations of statistical mechanics. May be repeated for credit with consent of instructor. Mr. Healey

225. Probability and Inductive Logic. Prerequisites: course 134 or Mathematics 112A-112B or consent of instructor.

226. Topics in Mathematical Logic. Prerequisite: consent of instructor. Content varies from quarter to quarter. May be repeated for credit with consent of instructor. Mr. Kalish, Mr. Kaplan, Mr. Martin

227. Philosophy of Social Science. Prerequisite: consent of instructor. An examination of philosophical problems concerning concepts and methods used in the social sciences. Topics may include the relation between social processes and individual psychology, the logic of explanation in the social sciences, determinism and spontaneity in history, the interpretation of cultures radically different from one's own. Students with a primary interest and advanced preparation in a social science are encouraged to enroll. May be repeated for credit with consent of instructor.
Mr. Nelson

230. Seminar: Logic. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Church, Mr. Kaplan, Mr. Martin

231. Seminar: Intensional Logic. Prerequisite: consent of instructor. Topics may include the logic of sense and denotation, modal logic, the logic of demonstratives, epistemic logic, the intensional logic of *Principia Mathematica*, possible worlds semantics. May be repeated for credit with consent of instructor. Mr. Church, Mr. Kaplan, Mr. Martin

232. Philosophy of Science. Prerequisite: consent of instructor. Selected topics in the philosophy of science. May be repeated for credit with consent of instructor. Mr. Healey, Mr. Nelson

233. Seminar: Philosophy of Physics. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Healey

Group III. Ethics and Value Theory

241. Topics in Political Philosophy. Prerequisites: course 150, 156, 157A, or 157B or any two courses in philosophy or consent of instructor. An examination of one or more topics in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor. Ms. Hampton

245. Seminar: History of Ethics. Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor.

246. Seminar: Ethical Theory. Prerequisite: consent of instructor. Selected topics. Content varies from quarter to quarter. May be repeated for credit with consent of instructor. Mr. Quinn

247. Seminar: Political Theory. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Ms. Hampton

248. Problems in Moral Philosophy. Prerequisite: consent of instructor. An intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor.
Mrs. Foot

255. Seminar: Aesthetic Theory. Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor. Mr. Quinn

M256. Topics in Legal Philosophy. (Same as Law M217.) Lecture, three hours. Prerequisite: consent of instructor. An examination of topics such as the concept of law, the nature of justice, problems of punishments, legal reasoning, and the obligation to obey the law. May be repeated for credit with consent of instructor. Mr. Munzer

M257. Seminar: Philosophy of Law. (Same as Law M524.) Lecture, three hours. Prerequisite: consent of instructor. Selected topics in the philosophy of law. May be repeated for credit with consent of instructor.
Mr. Morris

Group IV. Metaphysics and Epistemology

271. Seminar: Topics in Metaphysics and Epistemology. Discussion, three hours. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Albritton, Mr. Nelson

275. Human Action. Prerequisites: two upper division philosophy courses or consent of instructor. An examination of theories, concepts, and problems concerning human actions. Topics may include analysis of intentional actions; determinism and freedom; the nature of explanations of intentional actions. May be repeated for credit with consent of instructor.
Mr. Albritton, Mr. Donnellan

280. 20th-Century Continental Philosophy. Prerequisite: consent of instructor. Selected topics in 20th-century continental European philosophy. May be repeated for credit with consent of instructor.

281. Seminar: Philosophy of Mind. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Burge

282. Seminar: Metaphysics. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

283. Seminar: Theory of Knowledge. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Donnellan

284. Seminar: Philosophy of Perception. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

285. Philosophy of Psychoanalysis. Prerequisite: consent of instructor. An examination of topics such as the nature and validity of psychoanalytic explanations and interpretations, psychoanalysis and language, metapsychological concepts such as the unconscious, the ego, id, superego, defense mechanisms, and the psychoanalytic conception of human nature. Mr. Morris

286. Philosophy of Psychology. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology. Mr. Burge

287. Seminar: Philosophy of Language. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.
Mr. Burge, Mr. Donnellan, Mr. Furth

288. Seminar: Wittgenstein. Prerequisite: consent of instructor. Mr. Albritton

289. Seminar: Philosophy of Religion. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.
Mr. Adams, Mrs. Adams, Mr. Albritton

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching of College Philosophy (2 to 4 units). Prerequisite: consent of instructor. Seminars, workshops, and apprentice teaching. Selected topics, including evaluation scales, various teaching strategies and their effects, and other topics in college teaching. May be repeated for credit. S/U grading.

596A-596B. Directed Individual Studies (2 to 8 units). Properly qualified graduate students who wish to pursue a problem through reading or advanced study may do so if their proposed project is acceptable to a staff member. May be repeated for credit. S/U (course 596B) and letter (course 596A) grading.

597. Directed Studies for Graduate Examinations (2 to 8 units). Preparation for M.A. comprehensive examination or Ph.D. oral qualifying examinations. S/U grading.

599. Research for Ph.D. Dissertation (2 to 8 units). Prerequisite: advancement to Ph.D. candidacy. May be repeated for credit. S/U grading.

Shin-Yan Yang, Ph.D., *Adjunct*
A. Zawadowski, Ph.D., *Adjunct*

Scope and Objectives

Physics is a basic science with actual and potential applications in many fields. The undergraduate curriculum is broad and general with respect to physics but includes an introduction to theoretical and experimental work in specialized subfields of physics in the senior year. The Physics B.S. degree program is primarily directed at providing a basic foundation for students who intend to go on to graduate school in physics or related fields such as engineering or other physical sciences. However, for many this is a terminal degree preparatory to working as an engineer or technician in industry. The B.A. program in General Physics provides flexibility for students who are interested in fields outside of physics in which a strong background knowledge of physics would be helpful.

The department offers a comprehensive graduate program leading to the Master of Science degree, the Master of Arts in Teaching (M.A.T.), and the Ph.D., which is offered in theoretical or experimental work in a choice of subfields.

Undergraduate Study

The Department of Physics offers a choice of two undergraduate majors: the B.S. degree program in Physics and the B.A. degree program in General Physics. Courses taken to fulfill any of the requirements for either major must be taken for a letter grade.

Bachelor of Science in Physics

This major should be taken if you intend to continue toward the Ph.D. in Physics.

Preparation for the Major

Required: Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL, 8E; Chemistry 11A, 11B/11BL, 11C (11CL is recommended but not required); Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available in the Undergraduate Physics Office.

The Major

Required: Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 131, three courses from the 180 series; three additional upper division lecture courses selected from 108, 114, M122, 123, 124, 126, 132, 140. An upper division course in mathematics may be substituted for Physics 132 with consent of an adviser. A C average is required in the above courses. Reading knowledge of Russian, German, or French is recommended.

If you are preparing for graduate school, you should take additional courses in physics and mathematics. Physics M122, 123, 124, 126, 132, and 140 are recommended.

Transfer Students: Junior transfer students should preferably have completed (1) a two-year calculus-analytic geometry sequence or equivalent and (2) the calculus-based physics course at their previous college, but in no case should less than three semesters or four quarters of the mathematics and one year of the physics sequence be completed before transferring to UCLA. At least C grades in all mathematics and physics courses taken are required.

Bachelor of Arts in General Physics

The major is intended to provide the necessary flexibility for fields in which a strong background of knowledge in physics would be helpful. If you intend to continue work toward the Ph.D. in Physics, you are advised to work for the B.S. in Physics as described earlier.

Preparation for the Major

Required: Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL, 8E; Chemistry 11A, 11B/11BL, 11C (11CL is recommended but not required); Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available in the Undergraduate Physics Office.

The Major

Required: Physics 105A, 110A, 110B, 112, 115A, 131, one course from the 180 series, two upper division physics electives (excluding 185 and 199), and five upper division courses in no more than two other UCLA departments. A C average in the upper division physics courses is required.

Teaching Credentials

You may earn credentials for teaching physical sciences and other subjects in California elementary and secondary schools. Completion of the Teacher Credential Program in the Teacher Education Laboratory is required. Consult the Graduate School of Education (201 Moore Hall) for information.

Graduate Study

The Department of Physics offers opportunities for graduate study leading to the M.S., M.A.T. (Master of Arts in Teaching), and Ph.D. degrees. Special emphasis is given to preparation in the following fields of physics: acoustics/low-temperature, elementary particles, intermediate energy and nuclear physics, plasma and astrophysics, solid-state and condensed matter, spectroscopy.

Admission

You must have an excellent undergraduate record in addition to meeting the University minimum requirements. You are required to take the Graduate Record Examination (GRE) Advanced Test in Physics and to submit three letters of recommendation. International applicants who are applying for financial support (fellowships, teaching assistantships, and research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English.

Application materials may be obtained by writing to the Graduate Office, Department of Physics, 3-145G Knudsen Hall, UCLA, Los Angeles, CA 90024.

Master of Science Degree

Major Fields or Subdisciplines

It is not required to designate an area of specialization for a terminal master's degree.

Course Requirements

The University requires a total of nine courses for the M.S. degree. The Physics Department requires that a minimum of six of the nine be graduate courses in physics of which you must pass the five fundamental (core) courses: Physics 210A, 210B, 215A, 221A, 221B. To complete the minimum six graduate courses you are required to pass one of the following courses with a grade of B or better: 220, 221C, 231A. The remaining three courses (to complete the nine courses for the M.S. degree) may be satisfied by upper division or graduate courses, not necessarily in physics, which are acceptable to the Physics Department. No more than two of the three courses may be from Physics 596 or seminar courses. Only eight units of 500-series courses may be applied toward the total course requirement for the M.S.degree (courses 597 and 598 may not be applied).

Comprehensive Examination Plan

A passing grade on a written comprehensive examination is required. It is recommended that the examination be taken during the first year by UCLA graduates in physics and must be taken no later than the fourth quarter in residence by other students. This examination is given twice a year.

Although the department operates under the comprehensive examination plan rather than the thesis plan, arrangements generally can be made to write a master's thesis, provided you have a particularly interesting research problem and a professor is willing to undertake the guidance of your work. You must petition the departmental committee of graduate advisers for permission to pursue the thesis plan. The comprehensive examination requirement is waived if the petition is approved.

Master of Arts in Teaching

Major Fields or Subdisciplines

It is not required to designate an area of specialization for the M.A.T. degree.

Course Requirements

This degree leads to qualification for teaching credentials at the secondary school or junior college level. Five graduate courses, five professional (300 series) courses, and 12½ total courses are required.

(1) The five graduate physics courses must include Physics 370 and four courses from 210A, 210B, 215A, 221A, 221B.

(2) Also required are the courses necessary for completion of the preliminary State of California Single Subject Teaching Credential, K-12: Education 100A, 100B, 112, 312, 315A-315B, 330B, 330C, Public Health 187.

Courses in the 500 series may not be applied toward the M.A.T. degree.

Teaching Experience

Teaching experience is required insofar as the required education courses are concerned (supervised teaching at the secondary or junior college level).

Comprehensive Examination Plan

A passing grade on a written comprehensive examination is required. M.A.T. candidates who fail to qualify at the master's level of achievement may repeat the examination a second time. Permission to repeat it a third time may be granted only under exceptional circumstances.

Ph.D. Degree

Major Fields or Subdisciplines

Ph.D. degrees are granted in the following fields of specialization: elementary particles, intermediate energy and nuclear physics, low-temperature/acoustics, plasma and astrophysics, solid-state and condensed matter, and spectroscopy.

Course Requirements

Before the formation of a doctoral committee, you must satisfy the core course requirements by taking Physics 210A, 210B, 215A, 221A, 221B. Course examinations are graded on both a letter and an S/U basis. All students seeking candidacy for the Ph.D. degree must pass with a grade of S the final examination in four of the five courses. In case of failure, you may petition to repeat the examination in question. The five examinations should be completed by your fifth quarter in residence. In addition to the five required courses, you must fulfill a breadth requirement by passing one of the following courses with a B or better: Physics 220, 221C, 231A (course 132 is the mathematics prerequisite to graduate classes; if you have not taken this course or its equivalent as an undergraduate, you must do so at the beginning of your graduate career).

Qualifying Examinations

All departmental graduate students (master's and Ph.D.) take the same examination, which is graded as follows: (1) pass at the Ph.D. level of achievement, (2) pass at the master's level of achievement, or (3) fail.

All students in the Ph.D. program must pass the examination at the Ph.D. level of achievement. Permission to take it a second time may be granted only under exceptional circumstances.

You may arrange for the comprehensive oral examination (departmental field oral) only after completing the core course requirements and passing the comprehensive written examination at the Ph.D. level. The departmental oral may encompass material covered in all graduate courses but with special emphasis on your field of specialization. The examination, if failed, may be repeated on the recommendation of your committee to the graduate affairs officer. All students are expected to complete the examination by the eighth quarter in residence.

The doctoral committee conducts the University Oral Qualifying Examination, which may include (1) material in your field of specialization, (2) related material that members of the committee from other departments may wish to ask, and (3) discussion of the proposed dissertation problem. Committee members guide, read, approve, and certify the dissertation. At least two members from the Physics Department and at least one outside member must act in this capacity. A decision is also made at this time as to whether a final oral examination is required.

When a satisfactory report on the completion of the written and oral qualifying examinations has been submitted, you are eligible to be formally advanced to candidacy for the Ph.D.

Final Oral Examination

This examination ordinarily is a discussion of your original work, including your dissertation and other related matters to be determined by the committee. It may be, if the committee so desires, a survey or comprehensive examination.

Lower Division Courses

Physics 1Q is intended for entering freshman physics majors and normally is taken in your first quarter in residence. Although it is not a required course or a part of or prerequisite to any general physics sequence of courses, its purpose is to indicate the nature of current research problems in physics.

Physics 3A, 3B, 3C form a one-year sequence of courses in general physics (with laboratory). In this sequence only algebra and trigonometry are used in providing a mathematical description of physical phenomena; calculus is not used.

Physics 6A, 6B, 6C form a one-year sequence of courses in basic physics for students in the biological and health sciences. However, unlike Physics 3A, 3B, 3C, calculus is used throughout, and successful completion of basic calculus courses is a prerequisite for admission to this sequence.

Physics 8A, 8B, 8C, 8D, 8E form a sequence of courses in general physics for majors in physics.

The department takes into account prior preparation in physics. If you feel your background would permit acceleration, you may be exempted from courses 8A through 8E by taking the final examination with a class at the end of any quarter. These serve as placement examinations. You should discuss such possibilities with your departmental adviser.

Physics 10 is a one-quarter, non-laboratory course which surveys the whole field of physics. Any two or more courses from Physics 3A, 6A, 8A, and 10 are limited to six units credit.

1Q. Contemporary Physics (2 units). Limited to physics majors. A review of current problems in physics, with emphasis on those being studied in the research laboratories at UCLA. The significance of the problems and their historical context. (F)

3A. General Physics: Mechanics of Solids and Fluids. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisites: three years of high school mathematics including trigonometry or two years of high school mathematics and a one-term college course in mathematics with trigonometry included in the group of courses or equivalent courses. Not open for credit to students with credit for course 8A or equivalent. The fundamentals of classical mechanics: Newton's laws; conservation of momentum, angular momentum, energy; Kepler's laws; dynamics of systems of particles; fluid mechanics. (F,W)

3B. General Physics: Heat, Sound, Electricity and Magnetism. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisite: course 3A or equivalent. Temperature, heat, and the laws of thermodynamics. Introduction to wave motion, resonance. Sound and acoustics. Electric and magnetic fields. Electric power. Elements of DC and AC circuits. (W,Sp)

3C. General Physics: Light, Relativity, and Modern Physics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisite: course 3B or equivalent. Light, optical instruments. Introduction to relativity. The electron and the atom. Matter waves. Nuclear and particle physics. (F,Sp)

6A. Physics for Life Science Majors: Mechanics and Wave Motion. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisites: Mathematics 3A, 3B, 3C (may be taken concurrently), or equivalent. (F,W)

6B. Physics for Life Science Majors: Electricity and Magnetism. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisite: course 6A. (W,Sp)

6C. Physics for Life Science Majors: Light and Modern Physics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisite: course 6B. (F,Sp)

8A. Physics for Scientists and Engineers: Mechanics. Lecture/demonstration, four hours; discussion, one hour. Prerequisite: Mathematics 31A or equivalent. Recommended: high school physics and chemistry. Corequisites: course 8AL, Mathematics 31B. Motion, Newton's laws, work, energy, linear and angular momentum, rotation, equilibrium, gravitation. (F,W,Sp)

8AL. Physics Laboratory for Scientists and Engineers: Mechanics (1 unit). Lecture, one hour; laboratory, 90 minutes. Corequisite: course 8A or consent of instructor. (F,W,Sp)

8B. Physics for Scientists and Engineers: Waves, Sound, Heat. Lecture/demonstration, three hours; discussion, one hour. Prerequisites: course 8A, Mathematics 31B. Corequisites: course 8BL, Mathematics 32A (or equivalent). Harmonic oscillators, standing and traveling waves, fluid dynamics, sound, kinetic theory of gases, laws of thermodynamics. (F,W,Sp)

8BL. Physics Laboratory for Scientists and Engineers: Waves, Sound, Heat (1 unit). Lecture, one hour; laboratory, 90 minutes. Corequisite: course 8B or consent of instructor. (F,W,Sp)

8BH. General Physics: Vibration, Wave Motion, Sound, Fluids, Heat, and Kinetic Theory (Honors). Lecture/demonstration, three hours; discussion, one hour. Prerequisites: course 8A with a grade of A or recommendation of 8A instructor, Mathematics 31B (or preferably 31BH) completed and 32A (or preferably 32AH) concurrent, or equivalent. The same material as course 8B but in greater depth. (Sp)

8HB. Physics for Scientists and Engineers (Honors) (5 units). Lecture, four hours; discussion/laboratory, two and one-half hours. Prerequisite: same as for the Physics 8 and 8L series. Limited to the top 20 students (determined by previous Physics 8 grades) with consent of instructor. Intended for outstanding students with a deep interest in physics. Honor students participate in the lectures and examinations of the regular Physics 8 series. Discussions and laboratories given by an honors instructor who discusses challenging problems in depth. (F,W,Sp)

8C. Physics for Scientists and Engineers: Electricity and Magnetism. Lecture/demonstration, three hours; discussion, one hour. Prerequisites: course 8B, Mathematics 32A. Corequisites: course 8CL, Mathematics 32B. Electrostatics: electric field and potential, capacitors and dielectrics. Currents, DC circuits, transients in RC circuits. Magnetism: magnetic fields and forces, Ampere's law, Faraday's law. Maxwell's equations in integral form. Inductance and transients in RL circuits. (F,W,Sp)

8CL. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism (1 unit). Lecture, one hour; laboratory, 90 minutes. Corequisite: course 8C or consent of instructor. (F,W,Sp)

8CH. General Physics: Electricity and Magnetism (Honors). Lecture/demonstration, three hours; discussion, one hour. Prerequisites: course 8BH or 8B with a grade of A or recommendation of 8B instructor and Mathematics 32A (or preferably 32AH) completed and 32B (or preferably 32BH) concurrent, or consent of instructor. The same material as course 8C but in greater depth. (F)

8HC. Physics for Scientists and Engineers (Honors) (5 units). Lecture, four hours; discussion/laboratory, two and one-half hours. Prerequisite: same as for the Physics 8 and 8L series. Limited to the top 20 students (determined by previous Physics 8 grades) with consent of instructor. Intended for outstanding students with a deep interest in physics. Honor students participate in the lectures and examinations of the regular Physics 8 series. Discussions and laboratories given by an honors instructor who discusses challenging problems in depth. (F,W,Sp)

8D. Physics for Scientists and Engineers: Electromagnetic Waves, Light, and Relativity. Lecture/demonstration, three hours; discussion, one hour. Prerequisites: course 8C, Mathematics 32B. Corequisites: course 8DL, Mathematics 33A. AC circuits, resonance. Maxwell's equations in differential form. Electromagnetic waves. Light: reflection, refraction, interference, diffraction, polarization. The special theory of relativity. (F,W,Sp)

8DL. Physics Laboratory for Scientists and Engineers: Electromagnetic Waves, Light, and Relativity (1 unit). Lecture, one hour; laboratory, 90 minutes. Corequisite: course 8D or consent of instructor. (F,W,Sp)

8DH. General Physics: Electromagnetic Waves, Light, and Relativity (Honors). Lecture/demonstration, three hours; discussion, one hour. Prerequisites: course 8CH or 8C with a grade of A or recommendation of 8C instructor and Mathematics 32B (or preferably 32BH) completed and 33A (or preferably 33AH) concurrent, or consent of instructor. The same material as course 8D but in greater depth. (W)

8HD. Physics for Scientists and Engineers (Honors) (5 units). Lecture, four hours; discussion/laboratory, two and one-half hours. Prerequisite: same as for the Physics 8 and 8L series. Limited to the top 20 students (determined by previous Physics 8 grades) with consent of instructor. Intended for outstanding students with a deep interest in physics. Honor students participate in the lectures and examinations of the regular Physics 8 series. Discussions and laboratories given by an honors instructor who discusses challenging problems in depth. (F,W,Sp)

8E. Physics for Scientists and Engineers: Modern Physics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisites: course 8D, Mathematics 33A. Corequisite: Mathematics 33B or equivalent. Wave-particle duality, quantum theory, Schroedinger equation, hydrogen atom, exclusion principle. (W,Sp)

10. Physics. Lecture/demonstration, three hours; quiz/discussion, one hour. Not open for credit to students with credit for courses 3A, 6A, 8A, or an equivalent course in mechanics. Special mathematical preparation beyond that necessary for admission to the University in freshman standing is not required. Satisfies in part the Letters and Science requirements in the physical sciences for nonphysical science majors. Topics include planetary motion, Newton's laws, gravitation, electricity and magnetism, wave motion, light, sound, and heat, relativity, quantum mechanics, atoms, and subatomic particles. As time permits, the development of physical ideas is placed in cultural and historical perspective. (F,W,Sp)

11. Modern Physics for Nonscience Majors. Lecture/demonstration, three hours; quiz/discussion, one hour. Prerequisite: course 10. Topics include the concept of energy, quantum theory, nuclear physics, relativity.

14A-14B. Mechanics: Preparatory Courses. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 3A, 3B, and 3C, or 31A. Corequisite for course 14A: Mathematics 31B. Introductory courses in mechanics that satisfy the physics prerequisite for course 6B or 8B. Primarily intended for students who are inadequately prepared for course 6A or 8A. Lectures, demonstrations, discussions, laboratory, and small group problem-solving sessions. (W,Sp)

Upper Division Courses

Prerequisites for all upper division courses: Physics 8A through 8E, Mathematics 31A, 31B, 32A, 32B, 33A, and (except for Physics 105A, 116) 33B, or consent of instructor. Students must complete one quarter of upper division physics before enrolling in the 180 laboratory series.

105A. Analytic Mechanics. Newtonian mechanics and conservation laws, gravitational potentials, calculus of variations, Lagrangian and Hamiltonian mechanics, central force motion, linear oscillations.

105B. Analytic Mechanics. Prerequisite: course 105A. Relativity with four vectors, non-inertial reference frames, dynamics of rigid bodies, coupled oscillators, normal modes of oscillation, vibrating strings, and wave propagation.

108. Optical Physics. Prerequisite: course 110B. Interaction of light with matter; dispersion theory, oscillator strength, line widths, molecular scattering. Coherence theory, Kirchhoff formulation of diffraction theory, crystal optics, optical rotation, electro and magneto optical effects. Additional topics of fundamental or current interest.

110A. Electricity and Magnetism. Lecture, three hours. Prerequisite: course 131. Electrostatics and magnetostatics.

110B. Electricity and Magnetism. Prerequisite: course 110A. Faraday's law and Maxwell's equations. Propagation of electromagnetic radiation. Multipole radiation and radiation from an accelerated charge. The special theory of relativity.

112. Thermodynamics. (Formerly numbered 112A.) Lecture, three hours; discussion, one hour. Fundamentals of thermodynamics, including the first, second, and third laws. The statistical mechanical point of view and its relation to thermodynamics. Some simple applications.

114. Mechanics of Wave Motion and Sound. Vibrating systems and wave propagation in gases, liquids, and solids, including elements of hydrodynamics and elasticity. Applications in ultrasonics, low-temperature physics, solid-state physics, architectural acoustics.

115A. Elementary Quantum Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses 105B (may be taken concurrently), 131. The classical background, basic ideas, and methods of quantum mechanics.

115B. Elementary Quantum Mechanics. Prerequisite: course 115A. Development of the methods and concepts of quantum mechanics.

116. Electronics. Lecture, three hours; laboratory, three hours. Alternating current circuits, vacuum tube characteristics and parameters, transistor characteristics and parameters, amplifiers, oscillators, nonlinear tube and transistor circuits.

M122. Plasma Physics. (Same as Electrical Engineering M185.) Prerequisite: course 110A or Electrical Engineering 101. Senior-level introductory course to physics of plasmas and ionized gases and fundamentals of controlled fusion. Particle motion in magnetic fields; fluid behavior, plasma waves; resistivity and transport; equilibrium and stability; kinetic effects. Discussion of illustrative laboratory experiments.

123. Atomic Structure. Prerequisite: course 115B. The theory of atomic structure. Interaction of radiation with matter.

124. Nuclear Physics. Lecture, three hours; discussion, one hour. Prerequisite: course 115B. Nuclear charge, mass, radius, spin, and moments; nuclear models; nuclear forces; alpha, beta, and gamma emission.

126. Elementary Particle Physics. Prerequisite: course 115B. Experimental determination of the properties of elementary particle states. Relativistic kinematics and phase space; angular momentum and isotopic spin formalism; elastic and inelastic scattering; invariance principles and conservation laws; strong, electromagnetic, and weak interactions. Survey of important experiments.

131. Mathematical Methods of Physics. (Formerly numbered 131A.) Lecture, three hours; discussion, one hour. Vectors and fields in space, linear transformations, matrices, and operators; Fourier series and integrals.

132. Mathematical Methods of Physics. (Formerly numbered 131B.) Lecture, three hours; discussion, one hour. Prerequisite: course 131. Green's functions and boundary value problems, complex variables, and topics selected from tensors, Laplace transforms, probability theory, approximation techniques.

140. Introduction to Solid-State Physics. Prerequisite: course 115B or equivalent. Introduction to the basic theoretical concepts of solid-state physics with applications. Crystal symmetry; cohesive energy; diffraction of electron, neutron, and electromagnetic waves in a lattice; the reciprocal lattice; phonons and their interactions; free electron theory of metals; energy bands.

160. Introduction to Plasma Physics through Computer Modeling. Lecture, three hours; discussion, one hour. Prerequisites: courses 105A, 105B, 110A, 110B. Computer simulations of plasma behavior; wave propagation in plasmas, Landau damping of waves, Coulomb collisions between particles, collective transport of plasmas across magnetic fields, nonlinear plasma behavior. Mr. Dawson

180A. Nuclear Physics Laboratory.

180B. Physical Optics and Spectroscopy Laboratory.

180C. Solid-State Physics Laboratory.

180D. Acoustics Laboratory.

180E. Plasma Physics Laboratory.

180F. Elementary Particle Physics Laboratory.

185. Foundations of Physics. Prerequisite: senior standing in physics or consent of instructor. The historical development and philosophical sources of classical and modern physics.

199. Special Studies in Physics (2 to 4 units). May be repeated, but no more than 12 units may be applied toward the Physics B.S. degree requirements.

Graduate Courses

210A. Electromagnetic Theory. Boundary value problems in electrostatics and magnetostatics. Multipole expansions; dielectrics and macroscopic media. Maxwell's equations and conservation laws. Wave guides and resonators; simple radiating systems.

210B. Electromagnetic Theory. The electromagnetic potentials and the Hertz vectors. Cylindrical waves. Spherical waves. Debye potentials. Multipole radiation. Classical relativistic electrodynamics. Radiation from moving charges.

213A. Advanced Atomic Structure. Group representation theory. Angular momentum and coupling schemes. Interaction of radiation with matter.

213B. Advanced Atomic Structure. The n-j symbols, continuous groups, fractional parentage coefficients, n electron systems.

213C. Molecular Structure. Application of group theory to vibrational and electronic states of molecules. Molecular orbital theory. Raman effect. Angular momentum and coupling in molecules.

214A. Advanced Acoustics. Propagation of waves in elastic and fluid media. Reflection, refraction, diffraction, and scattering of waves in fluids. Attenuation mechanisms in fluids.

214B. Advanced Acoustics. Propagation in nonhomogeneous fluids and in moving fluids. Radiation pressure, acoustic streaming, and attenuation in large amplitude sound fields. Propagation of sound in liquid helium. Mechanisms resulting in attenuation for elastic waves in solids.

215A. Statistical Physics. Thermodynamics and statistical mechanics with applications.

215B. Nonequilibrium Statistical Mechanics. Probability theory, Markov processes, equations of change, BBGKY hierarchy and its consequences, Boltzmann equation, Chapman-Enskog method, transport coefficients, fluctuation-dissipation theorems, density matrix, H-theorems.

215C. Quantum Statistical Mechanics and the Many Body Problem. Classical methods for interacting systems; quantum field theory techniques in statistical mechanics; Green's function approach; the Coulomb gas; the imperfect Bose gas; electron-phonon interaction; superconductivity; phase transitions; theory of Fermi liquid.

220. Classical Mechanics. Lecture, three hours. Hamilton-Jacobi theory, action-angle variables, classical perturbation theory, and selected topics such as introduction to physics of continuous media and fluids, nonlinear phenomena.

221A. Quantum Mechanics. Lecture, three hours. Fundamentals of quantum mechanics, operators and state vectors, equations of motion.

221B. Quantum Mechanics. Lecture, three hours. Prerequisite: course 221A. Rotations and other symmetry operations, perturbation theory.

221C. Quantum Mechanics. Lecture, three hours. Formal theory of collision processes, quantum theory of radiation, introduction to relativistic quantum mechanics.

222A-222B-222C. Plasma Physics. Properties of a Coulomb gas with and without a magnetic field: equilibrium, oscillations, instabilities, fluctuations, collective phenomena, transport properties, and radiation. Description via single-particle orbit theory, magnetohydrodynamics, and kinetic equations of various types.

223. Advanced Classical Mechanics. Prerequisite: course 220. Topics such as nonlinear mechanics, ergodic theory, mechanics of continuous media.

224. Introduction to the Strong Interaction. Evidence concerning the strong interaction, particularly as exemplified in nucleon-nucleon and pion-nucleon systems. Isospin, the scattering matrix, the density matrix and polarization, the properties of pions, the one pion exchange potential, phase shift analysis.

225A-225B. Advanced Nuclear Physics. Prerequisites: courses 221A, 221B. Normally preceded by course 224. An advanced course in the structure of complex nuclei, nuclear models, scattering and reactions.

226A-226B-226C. Elementary Particle Physics (6 units each). (Formerly numbered 226A-226B.) Lecture, four hours. Prerequisites: courses 221A, 221B, 221C, or equivalent, and 230A-230B (may be taken concurrently). Modern theories of elementary particle physics beginning with symmetry principles and conserved quantities, classic V-A theory of weak interactions, gauge field theories (Abelian and non-Abelian), spontaneous symmetry breaking, $SU(2) \times U(1)$ electroweak interactions of leptons, quarks, Ws, Z°, and γ, quark theory of hadrons and quantum chromodynamics.

230A-230B-230C. Relativistic Quantum Theory (6 units each). Lecture, four hours. Prerequisites: courses 221A, 221B, and 221C, or equivalent, or consent of instructor. Modern quantum field theory, including quantum electrodynamics and quantum chromodynamics, renormalization group methods, path-integral quantization, spontaneous symmetry breakdown, monopoles and other solitons.

231A. Methods of Mathematical Physics. Not open for credit to students with credit for Mathematics 266A. Linear operators, review of functions of a complex variable, integral transforms, partial differential equations.

231B. Methods of Mathematical Physics. Not open for credit to students with credit for Mathematics 266B. Ordinary differential equations, partial differential equations, and integral equations. Calculus of variations.

231C. Methods of Mathematical Physics. Not open for credit to students with credit for Mathematics 266C. Perturbation theory. Singular integral equations. Numerical methods.

232A-232B. Relativity. The special and general theories, with applications to elementary particles and astrophysics.

232C. Special Topics in General Relativity.

233. Introduction to High-Energy Astrophysics. Introductory lectures on modern high-energy astrophysics. High-energy radiation processes. Neutron stars. Pulsars. X-ray sources. Black holes. Supermassive rotators and quasars.

235. Group Theory and Quantum Mechanics. Prerequisite: course 221A. Group representation theory and applications to the quantum mechanics of atoms, molecules, and solids.

241A. Solid-State Physics. Prerequisites: courses 140, 215A, 221A. Symmetry, free electrons, electrons in a periodic potential, experimental measurement of band structure and Fermi surface parameters, cohesive energy, lattice vibrations, thermal properties.

241B. Solid-State Physics. Prerequisite: course 241A. Transport theory with applications, electron-electron interactions.

241C. Solid-State Physics. Prerequisite: course 241B. Semiconductors, magnetism, phase transitions, superconductivity.

242A-242B. Advanced Solid-State Theory. Prerequisites: courses 241A, 241B, and 241C (may be taken concurrently). Many body methods in solid-state physics.

243A-243K. Special Topics in Solid-State Physics. 243A. Disordered Systems; **243B.** Magnetic Resonance; **243C.** Phase Transitions; **243D.** Magnetism; **243E.** Superconductivity; **243F.** Macromolecules; **243G.** Semiconductors; **243H.** Optical Interactions; **243I.** Nonlinear Optics; **243J.** Hopping Transport; **243K.** Low-Temperature Physics.

260. Seminar: Problems in Plasma Physics.

261. Seminar in Special Problems in Theoretical Physics.

262. Seminar in Physics of the Solid State.

264. Seminar in Advanced Physical Acoustics.

266. Seminar in Propagation of Waves in Fluids.

268. Seminar in Spectroscopy.

269A. Seminar in Nuclear Physics (2 to 4 units).

269B. Seminar in Elementary Particle Physics (2 to 4 units).

280E. Advanced Plasma Laboratory. Lecture, two hours; laboratory, four hours. Prerequisites: courses M122, 180E. Laboratory experiments on the behavior of plasmas in magnetic fields. Study of the basic physics of particle motions, distribution functions, and fluid dynamics. Plasma waves and nonlinear phenomena. Advanced probe, microwave and plasma diagnostics.

284. Advanced Laboratory in Acoustics and Cryogenics. Selected advanced experiments in acoustics and cryogenics designed to train students in the techniques and instrumentation used in acoustic research and low-temperature physics.

290. Research Tutorial in Plasma Physics (2 or 4 units). Seminars and discussion by staff and students directed toward problems of current research interest in the plasma physics group, both experimental and theoretical. Each graduate student doing research in this field is required to take three quarters of this course, ordinarily during the second or third year. May be repeated for credit. S/U grading.

291. Research Tutorial in Elementary Particle Theory (2 or 4 units). Prerequisites: courses 226A, 230A, 230B. Seminars and discussion by staff, postdoctoral fellows, and graduate students. Each graduate student doing research in this field is required to take this course, ordinarily during the second or third year. May be repeated for credit. S/U grading.

292. Research Tutorial in Spectroscopy, Low-Temperature, and Solid-State Physics (2 or 4 units). Seminars and discussion by staff and students on problems of current research interest in spectroscopy, low-temperature, and solid-state physics. Each graduate student doing research in these fields is required to take this course, ordinarily during the second or third year. May be repeated for credit. S/U grading.

295. Research Tutorial in Solid Earth Physics (2 or 4 units). Seminars and discussion in solid earth physics. Each graduate student doing research in this field is required to take this course (or course 292 if appropriate), ordinarily in the second or third year. May be repeated for credit. S/U grading.

298. Research Tutorial in Experimental Elementary Particle Physics (2 or 4 units). Limited to six students. Seminars and discussion by staff and students on current problems in experimental elementary particle physics. Each graduate student doing research in this field is required to take this course, ordinarily during the second or third year. May be repeated for credit. S/U grading.

299. Research Tutorial in Nuclear Physics (2 or 4 units). Seminars and discussion in nuclear physics by staff and students, in both experiment and theory. Each graduate student doing research in this field is required to take this course, ordinarily during the second or third year. May be repeated for credit. S/U grading.

370. The Teaching of Physics. Prerequisite: consent of instructor. A study of the physics laboratory experiments and demonstrations available today for secondary school and community college physics courses. Part of the Master of Arts in Teaching (M.A.T.) program but open to other interested students.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching of College Physics (2 units). Lecture/discussion (five or more one-hour meetings during the quarter, plus intensive training week at the beginning of Fall Quarter). Required of all new teaching assistants. A special course for teaching assistants designed to deal with the problems and techniques of teaching college physics. The ideas and techniques learned applied and evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading.

596. Directed Individual Studies (2 to 12 units). May be repeated for credit. S/U grading.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). May be repeated. S/U grading.

598. Master's Thesis Research and Writing (2 to 8 units). May be repeated. S/U or letter grading.

599. Ph.D. Research and Writing (8 to 12 units).

Scope and Objectives

The undergraduate program in political science aims to provide an understanding of basic political processes and institutions as these operate in different national and cultural contexts. It also covers the interaction between national states, the changing character of the relations between citizens and governments, and the values and criteria by which the quality of political life is judged. The program may be

individually focused to serve the needs of the liberal arts major, the student seeking preparation for graduate work in political science, public administration, law, and other professional fields, and the student preparing for specialized roles in political and public organizations.

The graduate program leads to the Ph.D. degree in Political Science (a master's degree may be earned in the process of completing Ph.D. requirements). It is designed to give students a strong foundation in the discipline while enabling them to acquire additional skills for advancing their professional careers.

Bachelor of Arts Degree

Students entering UCLA in Fall Quarter 1984 or thereafter must fulfill the requirements for the political science major listed in this catalog. Those who entered prior to Fall Quarter 1984 should consult the departmental counselor.

Pre-Political Science Major

All students intending to major in political science must enroll as pre-political science majors. After completion of preparation for the major courses, you need to petition to enter the major in the Undergraduate Office, 4256 Bunche Hall.

Preparation for the Major

Required: Four lower division courses from Political Science 10, 20, 40, 50, 70, 80, including at least two courses from 10, 20, and 50. These lower division courses are prerequisites to upper division courses and are required in those fields designated as your concentration or distribution field.

You must complete all premajor courses with a 2.0 grade-point average by the time you attain 135 units. Admission to the major is granted only after successful completion of all lower division requirements.

The Major

Required: Ten upper division courses (40 units) selected from Political Science 102 through 199 taken for a letter grade. You are also required to complete four upper division courses (16 units) in one or two of the following social sciences: anthropology, communication studies (only Communication Studies 160), economics, geography, history, management (only Management 150, 190), psychology (except Psychology 115, 116, 117), sociology. These courses must be taken for a letter grade. You are required to maintain a 2.0 overall grade-point average in all upper division political science courses.

Upper division political science courses are organized into six fields: (I) political theory, (II) international relations, (III) politics, (IV) comparative politics, (V) public law, and (VI) public administration and local government.

In fulfilling the requirement of 10 upper division political science courses, you must satisfy the following:

(1) A **concentration** in one field by completing the lower division course and at least four upper division courses in that field. It is recommended that one of these courses be an undergraduate seminar (C197A-C197C; see field concentration requirements below).

(2) A **distribution** of the two lower division courses and two courses in each of two other fields (four upper division courses).

(3) Two additional elective courses in political science to comprise the total of 10.

Students who entered prior to Fall Quarter 1984 should consult the departmental counselor.

Field Concentration Requirements: The lower division course is prerequisite to upper division courses in those fields designated as the concentration field and the two distribution fields for majors. Specific requirements for field concentration are as follows:

(I) *Political Theory:* Political Science 10 and any four courses in Field I.

(II) *International Relations:* Course 20 and any four upper division courses in Field II. Four units from courses 175A-175B may be applied as one of the four courses in Field II. Only one of the defense studies courses—138A, 138B, 138C — may be applied toward the field concentration requirement.

(III) *Politics:* Course 40 and any four courses in Field III. Course 182A may also be applied toward concentration in this field.

(IV) *Comparative Politics:* Courses 50, 168, and any three additional courses in Field IV. Course 115, 188A, or 188B — but no more than one of them — may also be applied toward concentration in this field.

(V) *Public Law:* Courses 70, 170, and any three additional courses in Field V. Course 70 is prerequisite to 172A and 172B.

(VI) *Public Administration and Local Government:* Course 80 and any four courses in Field VI. Course 138C, 173, or 174 — but no more than one of them — may also be applied toward concentration in this field.

Note: No course may be applied toward both concentration and distribution requirements.

Also, courses 119, 139, 149, 169, 179, and 189 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Courses 195A-195B-195C and 199 may not be applied toward either the concentration or distribution requirement.

Undergraduate Seminars

Each quarter the department offers a series of seminars (Political Science C197A-C197F) in each field. The prerequisites are two upper division courses in the field in which the seminar is offered, a 3.25 average at the upper division level in political science, or discretion of the instructor. These courses may be applied toward either the concentration or distribution requirement, and students who qualify are encouraged to take them.

Honors Program

The department honors program is open to seniors and to students who (1) have completed five upper division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper division political science courses, and (3) are eligible for College of Letters and Science honors. You should have substantial experience in writing research papers and take at least one seminar course in the Political Science C197 series before you enter the honors program or course 195A.

Students wishing to qualify for graduation with departmental honors must complete the following: (1) courses 195A-195B-195C, in which a senior thesis is written; (2) eight upper division courses (excluding courses 119, 139, 149, 169, 179, and 189) distributed as follows: four courses in one field and four additional courses, two in each of two other fields; (3) four upper division courses in one or two of the social sciences other than political science.

M.A. and Ph.D. Degrees
