**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced prerequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced prerequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**192A-192B. Undergraduate Practicum in Chemistry and Biochemistry. (4-4)** Lecture, one hour; laboratory, four hours; workshop, two hours. Enforced prerequisites: courses 14BL and 14CL, or 20L and 30AL, or Science Education 100SL. Intended for students who are planning careers in secondary science chemistry teaching. Complements service learning California Teach science courses that involve teaching field experiences in middle school and high school classrooms. Examination of chemistry issues such as chemical storage and use, waste management, laboratory organization, safety, and techniques. P/NP or letter grading.

**192C-192D. Undergraduate Assistant Education Practicum in Chemistry and Biochemistry. (4-2)** Seminar, one hour; assigned setting, six hours (course 192C) or five hours (course 192D). Limited to juniors/seniors. Training and supervised practicum for advanced undergraduate students to assist in chemistry and biochemistry lectures. Students assist in preparation of materials and development of innovative programs under guidance of faculty members and teaching assistants. May not be applied toward course requirements for any departmental major. May be repeated for credit with consent of instructor. Individual contract required. Information and contracts may be obtained from department. P/NP grading.

**M192E. Introduction to Collaborative Learning Theory and Practice. (1)** (Same as Atmospheric and Oceanic Sciences M192A, Computer Science M192A, Life Sciences M192A, Mathematics M192A, and Physics M192S.) Seminar, one hour. Training seminar for undergraduate students who are selected for learning assistant (LA) program. Exploration of current topics in pedagogy and education research focused on methods of learning and their practical application in small-group settings. Students practice communication skills with frequent assessment of and feedback on progress. Letter grading.

**192F. Methods and Application of Collaborative Learning Theory and Practice: Introduction, Methods, and Applications. (2 to 4)** Seminar, one hour; clinic, one to eight hours. Requisite: course 192E or Life Sciences 192A or Physics 192S with grade of C- or better. With instructor guidance, students apply pedagogical principles based on current education research, assist with development of innovative instructional materials, and receive frequent feedback on their progress. May be repeated for four times for credit. Letter grading.

**193A. Journal Club Seminars: UC LEADS and MARC. (2)** Seminar, three hours. Designed for juniors/seniors in undergraduate research training programs such as UC LEADS and MARC or those who have strong com-

mitment to pursue graduate studies in natural sciences, engineering, or mathematics. Weekly reading and oral presentations of research or research papers selected from current literature. May be repeated for credit. Letter grading.

**193B. Journal Club Seminars: Chemistry and Biochemistry. (2)** Seminar, three hours. Limited to undergraduate students. Discussion of readings selected from current literature in particular field. May be repeated for credit. P/NP grading.

**194. Research Group Seminars: Chemistry and Biochemistry. (1)** Seminar, three hours. Designed for undergraduate students who are part of research group. Advanced study and analysis of current topics in physical, organic, or inorganic chemistry or biochemistry. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. P/NP grading.

**196A. Research Apprenticeship in Chemistry and Biochemistry. (2 to 4)** Tutorial, three hours per week per unit. Limited to juniors/seniors. Entry-level research apprenticeship for upper-division students under guidance of faculty mentor. Consult department for additional information regarding requirements, enrollment petitions, and written proposal deadlines. May be repeated for maximum of 8 units. Individual contract required. P/NP grading.

**196B. Research Apprenticeship in Chemistry and Biochemistry. (2 to 4)** Tutorial, three hours per week per unit. Enforced prerequisite: course 196A (8 units). Limited to juniors/seniors. Research apprenticeship for upper-division students under guidance of faculty mentor. Consult department for additional information regarding requirements, enrollment petitions, and written proposal deadlines. May be taken for maximum of 4 units. Individual contract required. P/NP or letter grading.

**199. Directed Research in Chemistry and Biochemistry. (2 to 4)** Tutorial, three hours per week per unit. Enforced prerequisite: course 196A (8 units). Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating report required. May be repeated for maximum of 12 units. Individual contract required. P/NP or letter grading.

## Graduate Courses

**C200. Genomics and Computational Biology. (5)** Lecture, four hours; discussion, one hour. Introduction for biochemistry students of technologies and experimental data of genomics, as well as computational tools for analyzing them. Biochemistry and molecular biology dissected life into its component parts, one gene at a time, but lacked integrative mechanisms for putting this information back together to predict what happens in complete organism (e.g., over 80 percent of drug candidates fail in clinical trials). High-throughput technologies such as sequencing, microarrays, mass-spec, and robotics have given biologists incredible new capabilities to analyze complete genomes, expression patterns, functions, and interactions across whole organisms, populations, and species. Use and analysis of such datasets becomes essential daily activity for biomedical scientists. Core principles and methodologies for analyzing genomics data to answer biological and medical questions, with focus on concepts that guide data analysis rather than algorithm details. Concurrently scheduled with course C100. S/U or letter grading.

**201. Scientific Proposal Writing. (2)** Lecture, three hours. Designed for graduate biochemistry and molecular biology students. How to write scientific proposals to be submitted to funding agencies. How to develop curricula vitae, put together grant proposals, and critique proposals. Letter grading.

**203B. Ethics in Chemical Research. (2)** Seminar, one hour. Discussion of ethics in graduate education, teaching, and chemical research, including issues such as conflicts of interest, plagiarism, intellectual property, sexual harassment, and other topics related to ethical conduct of research. S/U grading.

**203C. Research Integrity and Ethics in Genetics Research. (2)** Lecture, 90 minutes. Data analysis and management, statistical methods, use of commercial reagents, microscopy data analysis, figure prepara-

tion, authorship, mentoring, human subjects protection, animal subject protection, and conflict of interest. May be repeated for credit. S/U grading.

**203D. Advanced Topics in Responsible Conduct in Cellular and Molecular Biology Research. (2)** Seminar, two hours. Enforced prerequisite: course 203A or 203B or 203C. Cellular and molecular biology PhD students continue to learn how to conduct research in field to reliably advance knowledge while maintaining ethical principles. Designed to be taken in fourth or fifth year of PhD work where students would have already been exposed to many challenges of performing and reporting experiments and who are in stage of their careers where they are beginning to think of applying for postdoctoral fellowships and research and teaching positions. Course helps fulfill training requirement in research integrity for NIH training grants and individual NRSA awards. S/U grading.

**204. Student Research Seminar. (2)** Seminar, one hour. Limited to students supported by UCLA program in Cellular and Molecular Biology Predoctoral Training. Research seminar presented by second- and third-year students. S/U grading.

**CM205A. Introduction to Chemistry of Biology. (4)** (Same as Pharmacology M205A.) Lecture, three hours; discussion, one hour. Introduction to chemical biology. Topics include computational chemical biology, utility of synthesis in biochemical research, peptidomimetics, designed reagents for cellular imaging, natural product biosynthesis, protein engineering and directed evolution, cell biology of metal ions, imaging metal ions in cells, metal-containing drugs. Concurrently scheduled with course C105. Letter grading.

**M205B. Issues on Chemistry/Biology Interface. (2)** (Same as Pharmacology M205B.) Seminar, one hour. Requisite: course CM205A. Selected talks and papers presented by training faculty on solving problems and utilizing tools in chemistry and molecular biology on chemistry/biology interface (CBI). S/U grading.

**206. Chemistry of Biology Seminar. (2)** Seminar, three hours. Limited to students supported by UCLA program in Chemistry/Biology Interface Predoctoral Training. Current research topics at interface of chemistry and biology. May be repeated for credit. S/U grading.

**C207. Organometallic Chemistry. (4)** Lecture/discussion, three hours. Requisite or corequisite: course 172. Survey of synthesis, structure, and reactivity (emphasizing mechanistic approach) of compounds containing carbon bonded to elements selected from main group metals, metalloids, and transition metals, including olefin complexes and metal carbonyls; applications in catalysis and organic synthesis. Concurrently scheduled with course C107. S/U or letter grading.

**C208. Mass Spectrometry for Chemists and Biochemists. (2)** Lecture, one hour; laboratory, four hours. Requisite: course 153A. Introduction to principles and practice of organic and inorganic mass spectrometry. Topics include EI, CI, ICPMS, GC/MS, LC/MS, ESI, MALDI, MS/MS protein identification, and proteomics. Concurrently scheduled with course C108. S/U or letter grading.

**209. Introduction to Chemistry Research. (2)** Seminar, two hours. Half-hour presentations each session by three different chemistry professors to introduce their research programs. S/U grading.

**210. Advanced Topics in Chemical Research. (2)** Seminar, one hour. Designed for second-year graduate students to help them engage contemporary challenges in chemical research and their own research projects. Building of critical thinking skills and proposal writing skills. S/U grading.

**C213B. Quantum Chemistry Methods. (4)** Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 113A. Complete introduction to electronic structure theory methods used by general computational chemistry community, focusing primarily on *ab initio* methods. Students gain understanding of electronic structure methods and tools to identify which methods are suitable for which types of systems. Methods covered include Hartree Fock, density-functional theory, perturbative methods, and modern high-correlation methods; and highlight algo-

rithms necessary to implement these methods efficiently. Concurrently scheduled with course C113B. Independent study project required of graduate students. S/U or letter grading.

**C215A-C215B. Quantum Chemistry: Methods. (4-4)** Lecture, four hours; discussion, one hour. Requisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A, with grades of C- or better. Recommended: knowledge of differential equations equivalent to Mathematics 134 or 135 or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C215A or Physics 115B with grade of C- or better is requisite to C215B. Students entering course C215A are normally expected to take course C215B in following term. Designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C115A-C115B. S/U or letter grading.

**C215C. Advanced Quantum Chemistry: Applications. (4)** Lecture, three hours; discussion, one hour. Requisite: course C215B. Topics in quantum chemistry selected from molecular structure, collision processes, theory of solids, symmetry and its applications, and theory of electromagnetic radiation. Concurrently scheduled with course C115C. S/U or letter grading.

**218. Chemistry Student Exit Seminar. (2)** Seminar, two hours. Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

**219A. Seminars: Research in Physical Chemistry—Photon Resolved Spectroscopy of Materials (Physical Chemistry). (2)** Seminar, three hours. Limited to chemistry graduate students. Discussion of recent progress in area of photon resolved spectroscopies, with focus on materials and biophysics applications. Literature discussion, discussion of recent results, safety procedures, and guest lectures. S/U grading.

**219E-219Z. Seminars: Research in Physical Chemistry. (2 each)** Seminar, three hours. Advanced study and analysis of current topics in physical chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading. **219E.** Dynamics of Molecule-Molecule and Molecule-Surface Reactions. **219I.** Spectroscopy of Isolated Molecules, Complexes, and Clusters. **219J.** Chemistry and Biophysics of Interfaces. **219K.** Statistical Mechanics of Disordered Systems. **219L.** Modern Methods for Molecular Reactions and Structure. **219Q.** Ultrafast Studies of Chemical Reaction Dynamics in Condensed Phase. **219R.** Kinetic, Thermodynamic, and Interfacial Effects in Materials. **219S.** Nanoscience. **219T.** Single-Molecule Spectroscopy in Biology. **219U.** Theory and Applications of Magnetic Resonance Spectroscopy and Imaging. **219V.** Complex Fluids: Composition, Structure, and Rheology. **219W.** Biophysics and Statistical Mechanics of Soft Matter. **219X.** Dynamic Processes in Chemically Reacting Flow Systems. **219Y.** Theory and Computation for Materials. **219Z.** Single-Cell Physiology.

**221A-221Z. Advanced Topics in Physical Chemistry. (2 to 4 each)** Lecture, two to four hours. Each course encompasses one recognized specialty in physical chemistry, generally taught by faculty members whose research interests embrace that specialty. S/U or letter grading.

**C222. Mathematical Methods for Chemistry. (4)** Lecture, four hours. Enforced requisites: Mathematics 31A, 31B, 32A, 32B. Review of basic mathematics necessary to study physical chemistry at graduate level, with focus on review of vectors, linear algebra, elementary complex analysis, and solution of ordinary and partial differential equations. Development of problem-solving skills through homework based on these mathematical techniques, with examples from physical chemistry. Concurrently scheduled with course C122. S/U or letter grading.

**C223A-C223B. Classical and Statistical Thermodynamics. (4-4)** Lecture, four hours; discussion, one hour. Requisite: course 110B or 156. Recommended: course 113A. Presentation of fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and perfect gas. Applications of classical and statistical thermodynamics selected from diatomic and polyatomic gases, solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C123A-C123B. S/U or letter grading.

**M223C. Nonequilibrium Statistical Mechanics and Molecular Biophysics. (4)** (Same as Physics M215D.) Lecture, three hours. Requisites: courses C215B and C223B, or Physics 215A. Fundamentals of nonequilibrium thermodynamics and statistical mechanics applied to molecular biophysics. S/U or letter grading.

**C226A. Computational Methods for Chemists. (4)** Lecture, one hour; laboratory, four hours. Requisites: courses 110A, 113A, Mathematics 33A. Covers some basics of scientific coding. Introduction to advanced applications provided through commercially available computational packages. Includes quantum mechanical techniques for chemistry, reactivity, spectroscopy, solid state calculations; statistical mechanical techniques for chemistry and biochemistry; python coding, basic algorithms, machine learning, and numerical techniques. Concurrently scheduled with course C126A. S/U or letter grading.

**CM227. Synthetic Biology for Biofuels. (4)** (Same as Chemical Engineering CM227.) Lecture, four hours; discussion, one hour. Requisite: course 153A. Engineering microorganisms for complex phenotype is common goal of metabolic engineering and synthetic biology. Production of advanced biofuels involves designing and constructing novel metabolic networks in cells. Such efforts require profound understanding of biochemistry, protein structure, and biological regulations and are aided by tools in bioinformatics, systems biology, and molecular biology. Fundamentals of metabolic biochemistry, protein structure and function, and bioinformatics. Use of systems modeling for metabolic networks to design microorganisms for energy applications. Concurrently scheduled with course CM127. S/U or letter grading.

**228. Chemical Physics Seminar. (2)** Seminar, two hours. Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

**229. Introduction to Physical Chemistry Research. (2)** Lecture, 90 minutes. Designed primarily for entering graduate physical chemistry students. S/U grading.

**230A. Methods of Structural Molecular Biology: X-Ray Crystallography and Electron Microscopy. (4)** Lecture, four hours; discussion, one hour. Requisites: course 156, Mathematics 3C or 33A, Physics 1C or 5B. Methods for structure determination of biomacromolecules—proteins and nucleic acids—focusing on X-ray crystallography, cryo-EM imaging, and electron diffraction. Covers mathematical and computational methods used to obtain atomic structural models of biomolecules. Key physical principles include scattering phenomena, interference and diffraction, symmetry, Fourier transforms, and atomic interpretation of molecular structures in three-dimensions. Letter grading.

**M230B. Structural Molecular Biology. (4)** (Same as Molecular, Cell, and Developmental Biology M230B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

**M230D. Structural Molecular Biology Laboratory. (2)** (Same as Molecular, Cell, and Developmental Biology M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. S/U or letter grading.

**C232A. Core Principles in Cell and Molecular Biology. (4)** Lecture, four hours. Requisites: Life Sciences 7A, 7B, 7C, 23L. Students gain broad foundational knowledge and skills for rigorous research in emerging areas of cell and molecular biology. Focus on foundational knowledge of cell and molecular biology research areas including cell cycle, cell signaling, cell metabolism, cell communication, cell states and fates, genomes, and proteomes. Focus on skills development for cell and molecular biology research. Students are equipped with theory of modern experimental approaches, and acquire hands-on skills training in designing experiments and analyzing data using these approaches. Students meet with directors of shared core facilities that specialize in these approaches to facilitate use of these approaches in their research. Continuation of in-depth analysis of rigorous experimental design and statistical analyses in cell and molecular biology. Concurrently scheduled with course C132A. Letter grading.

**232B. Skills Development for Cell and Molecular Biologists. (2)** Seminar, two hours. Students are trained to develop skills necessary to persist and thrive as researchers and scholars in cellular and molecular biology. Topics include resilience in science, balancing work/life, organizing research and career goals, writing impactful abstracts, and presenting great talks. S/U grading.

**232C. Advanced Topics and Approaches in Cell and Molecular Biology Research. (2)** Seminar, two hours. Students are trained in current research problems in cellular and molecular biology, and how modern approaches are being used to address these problems. Topics vary based on topical questions and emerging methods/technologies in cellular and molecular biology research. S/U grading.

**232D. Career Development for Cell and Molecular Biologists. (2)** Seminar, two hours. Provides career training to prepare cellular and molecular biologist trainees for biomedical careers. Topics include exploring careers in academia, industry, non-traditional paths, and building start-ups; creating professional resumes, cover letters, and job opportunity networks; and connecting to internships on and off campus. S/U grading.

**235A-235R. Seminars: Research in Organic Chemistry. (2 each)** Seminar/research group meeting, three hours. Advanced study and analysis of current topics in organic chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading. **235E.** Theoretical and Physical Organic Chemistry. **235F.** Synthetic Methods and Synthesis of Natural Products. **235G.** Organometallic Chemistry and Organic Synthesis. **235I.** Fullerene Chemistry and Materials Science. **235K.** Organic Chemistry in Organized and Restricted Media. **235N.** Target- and Diversity-Oriented Synthesis of Natural Products and Product-Like Molecules. **235O.** Polymer Chemistry and Biomaterials. **235P.** Reaction Discovery and Total Synthesis of Complex Molecules. **235Q.** Synthetic Organic Chemistry Research. **235R.** Fluorous Materials, Synthetic Chemistry, and Supramolecular Assembly. **235S.** Synthetic Methods Development and Mechanistic Study.

**236. Spectroscopic Methods of Organic Chemistry. (4)** Lecture, three hours. Requisite or corequisite: course C243A. Problem solving using proton and carbon 13 nuclear magnetic resonance, infrared spectroscopy, and mass spectrometry; new techniques in NMR, IR, and MS, with emphasis on Fourier transform NMR. S/U or letter grading.

**C238. Natural Product Biosynthesis: Chemical Logic and Enzymatic Machinery. (4)** Lecture, three hours; discussion, one hour. Covers fundamental chemical logic and enzyme mechanisms involved in biosynthesis of natural products. Discussion of major classes

of natural product including polyketides, nonribosomal peptides, terpenes, alkaloids. Emphasis on biosynthetic logic used by nature to form complex molecules. Discussion of several important enzyme families in context of biosynthesis, including assembly-line megasynthases, group transferases, oxidoreductases, etc. Historical account of natural product isolation and characterization, as well as modern account of synthetic biology and genome based efforts that are used in discovery of new natural products. Includes extensive survey of scientific literature in format of presentations and discussions. Concurrently scheduled with course C138. Letter grading.

**C240. Bionanotechnology.** (4) Lecture, three hours. Requisites: courses 30C, 110A. Basic physical, chemical, and biological principles in bionanotechnology; materials and strategies for top-down and bottom-up fabrication of ordered biologically derived molecules, characterization and detection techniques, and biomimetic materials and applications at nanoscale. Concurrently scheduled with course C140. S/U or letter grading.

**241A-241Z. Special Topics in Organic Chemistry. (2 to 4 each)** Lecture, two to four hours. Requisite or corequisite: course C243A. Each course encompasses one recognized specialty in organic chemistry, generally taught by faculty members whose research interests embrace that specialty. S/U or letter grading.

**C243A. Structure and Mechanism in Organic Chemistry.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 30C and 30CL (may be taken concurrently), 110B, and 113A, with grades of C- or better. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C143A. S/U or letter grading.

**C243B. Organic Chemistry: Mechanism and Structure.** (4) Lecture, three hours; discussion, one hour. Requisite: course C243A. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C143B. S/U or letter grading.

**244A. Organic Synthesis: Methodology and Stereochemistry.** (4) Lecture, three hours; discussion, one hour. Modern synthetic reactions and transformations involving organic substrates. Special emphasis on reagents useful in asymmetric induction and stereoselective synthesis of structurally complex target molecules. S/U or letter grading.

**244B. Strategy and Design in Organic Synthesis.** (4) Lecture, three hours. Requisite or corequisite: course C243A. Theory behind planning of syntheses of complex molecules from simpler ones. Organic reactions and their use in synthetic process. Reasoning and art involved in organic synthesis. S/U or letter grading.

**C245. Theoretical and Computational Organic Chemistry.** (4) Lecture, two hours; discussion, one hour; computer laboratory, one hour. Requisites: courses 30C, 113A. Applications of quantum mechanical concepts and methods to understand and predict organic structures and reactivities. Computational modeling methods, including laboratory experience with force-field and quantum mechanical computer calculations. Concurrently scheduled with course C145. S/U or letter grading.

**247. Organic Colloquium.** (2) Seminar, two hours. Seminars in organic chemistry and related areas presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

**248. Organic Chemistry Student Seminar.** (2) Seminar, two hours. Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. Strongly recommended for first- and second-year organic chemistry graduate students. Presentation required if taken for letter grade. S/U or letter grading.

**249A. Methods of Materials Chemistry: Synthesis, Characterization, Physical Properties, Applications, and Devices.** (2) Seminar, two hours. Designed for first-year graduate students to teach advanced problem-solving skills and critical thinking, with focus on problems and recent literature pertaining to mate-

rials chemistry. How materials are synthesized and characterized. Discussion of important physical properties, as well as broad range of applications and behavior in devices. S/U grading.

**249B. Methods of Chemical Synthesis: Organic/Inorganic/Organometallic.** (2) Seminar, two hours. Designed for first-year graduate students to teach advanced problem-solving skills and critical thinking, with focus on problems and recent literature pertaining to chemical synthesis of organic, inorganic, and organometallic compounds. S/U grading.

**249C. Methods of Physical/Theoretical/Biophysical Chemistry.** (2) Seminar, two hours. Designed for first-year graduate students to teach advanced problem-solving skills and critical thinking, with focus on problems and recent literature pertaining to physical, theoretical, and biophysical chemistry. S/U grading.

**C250. Research Methods and Integrity in Cellular and Molecular Biology.** (4) Lecture, two hours; discussion, two hours. Data analysis and management, statistical methods, use of antibody and kit reagents, figure preparation, authorship, mentoring, human subjects protection, animal subject protection, and conflict of interest. May be repeated for credit. Concurrently scheduled with course C150. Letter grading.

**CM255. Mitochondria in Medicine, Biology, and Chemistry.** (1) (Same as Biological Chemistry M255.) Seminar, two hours every other week. Open to undergraduate and graduate science majors considering or currently conducting research in areas related to mitochondria. Large number of physiological and pathophysiological processes involve mitochondrial function and dysfunction. Focus on understanding how mitochondria metabolism, form, and function impact health and disease. Physiology and cell biology of healthy and dysfunctional mitochondria critically assessed at subcellular, cellular, tissue, and organismal levels. Topics include in-depth analyses of literature and critical evaluation of experimental design and methods of current research. May be repeated for credit. Concurrently scheduled with course C155. S/U grading.

**256A-256Z. Seminars: Research in Biochemistry.** (2 each) Seminar, three hours. Advanced study and analysis of current topics in biochemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading. **256B.** Biochemistry of Protein Function. **256D.** Transcriptional Control Mechanisms in *Drosophila* Embryogenesis. **256F.** Current Topics in Prokaryotic Development. **256G.** Nucleic Acid Structure Determination by NMR. **256J.** Contractile Proteins in Muscle Contraction and Cell Motility. **256K.** Biochemistry and Molecular Biology of *Chlamydomonas*. **256L.** Literature of Structural Biology. **256N.** Advanced Topics in Structural Biology. **256O.** Membrane Biophysics. **256P.** Analysis of Protein Structure. **256Q.** Biochemistry and Function of Ubiquitin in Yeast and Higher Eukaryotes. **256R.** Biomolecular Nuclear Magnetic Resonance Spectroscopy and Protein Structure. **256S.** Proteome Bioinformatics. **256T.** RNA Processing and RNA Genomics. **256U.** Mitochondrial Biogenesis and Link to Disease. **256V.** Proteomics and Mass Spectrometry. **256W.** Cytoskeletal Dynamics during *Drosophila* Oogenesis. **256X.** Microtubule-Based Structures and Human Disease. **256Y.** Research in Genomics: Biochemistry, Synthetic Biology, and Genomics. **256Z.** Information Processing and Intercellular Signaling Networks.

**257. Physical Chemistry of Biological Macromolecules.** (4) Lecture, one hour; discussion, one hour; laboratory, four hours. Requisite: course 153A. Theory of hydrodynamic, thermodynamic, and optical techniques used to study structure and function of biological macromolecules. S/U or letter grading.

**258. Advanced Topics in Biochemistry and Molecular Biology.** (2) Lecture, two hours. Critical analysis of experimental design and methods in biochemistry and molecular biology. In-depth analysis of literature in one or more areas of current research. May be repeated for credit. S/U or letter grading.

**CM259. Mechanisms of Gene Regulation.** (4) (Same as Biological Chemistry M259.) Lecture, four hours. Requisite: course 153B. RNA polymerase structures and mechanisms; promoter recognition and transcrip-

tion cycle; mechanisms of activation; transcriptional poising and elongation control; Mediator of transcription; chromatin remodeling and modification; epigenetic regulation; cotranscriptional and transcription-coupled RNA processing; impact of transcription on mRNA processing and stability; nuclear export of mRNA. Concurrently scheduled with course C159. S/U or letter grading.

**CM260A. Introduction to Bioinformatics.** (4) (Same as Bioinformatics M221, Computer Science CM221, and Human Genetics M260A.) Lecture, four hours; discussion, two hours. Requisites: Computer Science 32 or Program in Computing 10C with grade of C- or better, and one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, Mathematics 170E, or Statistics 100A. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventing new computational and statistical techniques to analyze biological data. Focus on sequence analysis and alignment algorithms. Concurrently scheduled with course CM160A. S/U or letter grading.

**260BL. Advanced Bioinformatics Computational Laboratory.** (2) Laboratory, four hours. Enforced requisite: course CM260A. Corequisite: course CM260B. Development and application of computational approaches to ask and answer biological questions by implementing variety of bioinformatics and systems biology algorithms. Advantages and disadvantages of different algorithmic methods for studying biological questions and preliminary understanding of how to compute statistical significance of results. Development of conceptual understanding of implementation of bioinformatics algorithms and foundation for how to do innovative work in these fields. Experience in observing impact of computational complexity of algorithms in computing solutions. S/U or letter grading.

**262. Biochemistry and Molecular Biology of Protein Translocation Systems.** (3) Lecture, two hours; discussion, two hours. Requisites: courses 269A through 269D. Protein translocation into nucleus, mitochondrion, peroxisome, chloroplast, endoplasmic reticulum, and protein export in bacteria. Letter grading.

**263. Seminars in Chemical Biology.** (2) Seminar, two hours. Seminars in chemical biology (broadly defined) presented by outside speakers, graduate students, postdoctoral fellows, and faculty/staff from diverse scientists. May be repeated for credit. S/U or letter grading.

**C264. Free Radicals in Biology and Medicine.** (2 to 4) Lecture, three hours. Enforced requisites: courses 153A and either 153B or 153C, with grades of C- or better. Biochemical reactivity of dioxygen, its role in mitochondrial metabolism, neurodegenerative diseases, apoptosis, and aging. Discussion of radical reactions, how they are harnessed to achieve enzyme catalysis, and how free radicals contribute to or regulate essential biological processes. These same reactions run amok under certain types of stress and can contribute to wide variety of diseases, including neurodegenerative diseases (e.g., Huntington's, Parkinson's, and Alzheimer's diseases), mitochondrial diseases, atherosclerosis, and aging. Concurrently scheduled with course C164. S/U or letter grading.

**C265. Metabolic Control by Protein Modification.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 153A, 153B, 153C. Biochemical basis of controlling metabolic pathways by posttranslational modification of proteins, including phosphorylation and methylation reactions. Concurrently scheduled with course C165. Letter grading.

**266. Proteomics and Protein Mass Spectrometry.** (4) Lecture, four hours. Essential technologies and concepts practiced in proteomics-based research, including methods for protein separation and display, protein quantitation, and protein identification. Emphasis on fundamentals of protein mass spectrometry. S/U or letter grading.

**267. Nanoscience and Chemistry.** (4) Lecture, four hours. Enforced requisites: courses 110A, 113A, 171, 172. Designed for advanced undergraduate and graduate students. Why nanoscience is important and in-

teresting and critical role of chemistry in nanoscience. Chemistry and physics of variety of synthetic inorganic nanostructures, including metallic nanostructures (nanocrystals, nanorods, nanowires), semiconductor nanostructures (quantum dots/rods, nanowires, plates), and carbon nanostructures (fullerene, nanotubes, graphene). Discussion of synthetic approaches, structures, and physical properties, as well as potential technological opportunities of each. Letter grading.

**268. Biochemistry Research Seminar. (2)** Seminar, two hours. Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students on topics of current biochemical research interest. May be repeated for credit. S/U or letter grading.

**269A. Protein Structure. (2)** Lecture, five hours; discussion, two hours. Requisites: courses 153A, 153B, 153C, 156. Three-dimensional structure of proteins. Forces that stabilize structure of soluble and membrane proteins. Kinetics of protein folding and role of chaperones. Prediction of protein structure from sequence. Letter grading.

**269B. Biocatalysis and Bioenergetics. (2)** Lecture, five hours; discussion, two hours. Requisites: courses 153A, 153B, 153C, 156. Mechanisms and regulation of protein-mediated catalysis. Proteomics and metabolomics. Concepts in electron, proton, and energy transfer. Energy transducing membranes in chloroplasts and mitochondria. Letter grading.

**269C. Nucleic Acid Structure and Catalysis. (2)** Lecture, five hours; discussion, two hours. Requisites: courses 153A, 153B, 153C, 156. Three-dimensional structure of DNA and RNA. Sequence-specific recognition of DNA and RNA. RNA-catalyzed processes, including self-splicing and peptide bond formation. Letter grading.

**269D. Mechanism and Regulation of Gene Expression. (2)** Lecture, five hours; discussion, two hours. Requisites: courses 153A, 153B, 153C, 156. Mechanism and regulation of transcription in prokaryotes and eukaryotes. Mechanism and regulation of mRNA processing; mRNA export and degradation. Letter grading.

**269E. Biomolecular Structure, Catalysis, and Regulation. (2)** Lecture, five hours; discussion, two hours. Requisites: courses 153A, 153B, 153C, 156. Protein-protein interactions, proteomics, protein networks, regulatory circuits, cellular dynamics, imaging of cellular processes. Letter grading.

**C270. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (2 to 4)** Lecture, two to three hours; discussion, zero to two hours. Requisites: courses 153A and 153B, or Life Sciences 3 and 23L, and course 153L. Recommended: courses 153C, 154, Life Sciences 4. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. Concurrently scheduled with course CM170. S/U or letter grading.

**271. Advanced Topics in Inorganic Chemistry. (2 to 4)** Lecture, two to four hours. Each offering encompasses one recognized specialty in inorganic chemistry, generally taught by faculty members whose research interests embrace that specialty. S/U or letter grading.

**C272. Advanced Inorganic Chemistry. (4)** Lecture, three hours; discussion, one hour. Requisite: course 171 with grade of C- or better. Systematic approach to modern inorganic chemistry, structure and bonding of inorganic molecules and solids, structure/reactivity relationships, vibrational spectra of complexes, electronic structure and ligand-field theory, mechanisms of inorganic reactions, bonding and spectroscopy of organometallic compounds, transition metals in catalysis and biology. Concurrently scheduled with course C172. S/U or letter grading.

**272A-272N. Seminars: Research in Inorganic Chemistry. (2 each)** Seminar, three hours. Advanced study and analysis of current topics in inorganic chemistry. Discussion of current research and literature in research specialty of faculty member teaching course.

S/U grading. **272A.** Chemistry of Materials. **272C.** Inorganic Spectroscopy. **272G.** Issues in Chemical Education. **272I.** Organometallic Chemistry. **272K.** Inorganic Nanostructures: Synthesis, Properties, and Functions. **272L.** Molecular Materials. **272M.** Methodology for Chemical Synthesis of Complex Molecules. **272N.** Electrochemical Materials and Interfaces.

**C273. Electrochemical Systems. (4)** Lecture, three hours; discussion, two hours. Introduction to principles of electrochemical systems commonly applied in research of inorganic chemistry, materials sciences, and nanotechnology. With examples in recent literature and discussions of experimental practice, focus on qualitative and quantitative evaluation of information obtained from electrochemical characterization methods. Understanding of course contents helps appreciate research and technologies in catalysis, energy storage and conversion, and advanced environmental technologies. Concurrently scheduled with course C173. S/U or letter grading.

**C274. Inorganic and Metalorganic Laboratory Methods. (5)** Lecture, two hours; laboratory, eight hours. Enforced requisites: courses 30CL and 171, with grades of C- or better. Synthesis of inorganic compounds, including air-sensitive materials; Schlenk techniques; chromatographic and ion exchange methods; spectroscopic characterization and literature applications. Concurrently scheduled with course C174. S/U or letter grading.

**C275. Inorganic Reaction Mechanisms. (4)** Lecture, three hours. Requisites: courses 110A, 110B, 113A, and 172, with grades of C- or better. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free-radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C175. S/U or letter grading.

**C276A. Group Theory and Applications to Inorganic Chemistry. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 113A and 172, with grades of C- or better. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C176. S/U or letter grading.

**276B. Physical Methods in Inorganic Chemistry. (4)** Lecture, three hours. Requisite: course C276A. Theory and applications of spectroscopic techniques, including magnetic resonance and vibrational and surface science methods, to inorganic compounds and materials. S/U or letter grading.

**277. Crystal Structure Analysis. (4)** Lecture, three hours. Theory and practice of modern crystallography, with emphasis on practical experience in structure determination. Topics include crystallographic symmetry, scattering theory, data collection, Fourier analysis, heavy atom techniques, direct methods, isomorphous replacement, crystallographic refinement, error analysis, and common pitfalls. S/U or letter grading.

**278. Inorganic Chemistry Student Seminar. (2)** Seminar, two hours. Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

**C280. Solid-State Chemistry. (4)** Lecture, three hours. Requisite: course 172 with grade of C- or better. Survey of new materials and methods for their preparation and characterization, with emphasis on band theory and its relationship to chemical, optical, transport, and magnetic properties, leading to deeper understanding of these materials. Concurrently scheduled with course C180. S/U or letter grading.

**C281. Polymer Chemistry. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 30B, 110A. Synthesis of organic and inorganic macromolecules, thermodynamic and statistical mechanical descriptions of unique properties of polymers, polymer characterization methods, and special topics such as conductive and biomedical polymers and polymeric reagents in synthesis. Concurrently scheduled with course C181. S/U or letter grading.

**282. Introduction to Inorganic Chemistry Research. (2)** Lecture, 90 minutes. Discussion of current research in inorganic chemistry, designed primarily for entering graduate inorganic chemistry students. S/U grading.

**283. Evolution of Devices from Concept to Product. (2)** Seminar, 90 minutes. Required of students in Materials Creation Training Program. Training in fundamental science and engineering to fabricate electrical, photonic, and microelectromechanical devices. Discussion of intellectual property issues and development of business plan. May be repeated for credit. S/U or letter grading.

**285. Materials Chemistry Laboratory. (5)** Lecture, two hours; laboratory, eight hours. Requisites: courses 30AL, 110A, 113A, 171. Materials synthesis and physical properties of complex materials. Combines synthetic skills with fundamental physical understanding and characterization in approximately equal proportions to relate materials synthesis to materials function. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**400. Safety in Chemical and Biochemical Research. (2)** Lecture, two hours. Survey of safe laboratory practices for experimental research in organic, inorganic, and physical chemistry and biochemistry. Topics include laser safety, cryogenic hazards, high- and low-pressure experimentation, gas and carcinogen handling, chemical spills, fire extinguishing, and chemical disposal. S/U grading.

**495. Teaching College Chemistry. (2)** Seminar, two hours; discussion, two hours; 20 hours training during week prior to Fall Quarter. Course for teaching assistants designed to deal with problems and techniques of teaching college chemistry. S/U grading.

**596. Directed Individual Study or Research. (2 to 16)** Tutorial, to be arranged with faculty member who directs study or research. May be repeated for credit. S/U or letter grading.

**597. Preparation for MS Comprehensive Examination or PhD Qualifying Examinations. (2 to 4)** Tutorial, to be arranged. May be taken for maximum of 8 units. S/U grading.

**598. Research for and Preparation of MS Thesis. (2 to 16)** Tutorial, to be arranged. Each faculty member supervises research of MS students and holds research group meetings, seminars, and discussions with students. May be repeated for credit. S/U or letter grading.

**599. Research for and Preparation of PhD Dissertation. (2 to 16)** Tutorial, to be arranged. Each faculty member supervises research of PhD students and holds research group meetings, seminars, and discussions with students. May be repeated for credit. S/U or letter grading.

## DEPARTMENT OF CHICANA/O AND CENTRAL AMERICAN STUDIES

*College of Letters and Science*

7349 Bunche Hall  
Box 951559  
Los Angeles, CA 90095-1559

**Chicana/o and Central American  
Studies**

310-206-7695

**Undergraduate Student Adviser e-mail**

**Graduate Student Adviser e-mail**

Leisy J. Abrego, PhD, *Chair*

## Faculty Roster

### Professors

Leisy J. Abrego, PhD  
Eric R. Avila, PhD (*Waldo W. Neikirk Term  
Professor*)

Matthew A. Barreto, PhD  
Charlene Villaseñor Black, PhD  
Maylei S. Blackwell, PhD  
Héctor V. Calderón, PhD  
Jason P. De León, PhD  
Alicia Gaspar de Alba, PhD  
Laura E. Gómez, PhD  
Gary M. Segura, PhD  
Daniel G. Solórzano, Jr., PhD  
Veronica Terríquez, PhD  
Abel Valenzuela, Jr., PhD

### Professors Emeriti

Judith F. Baca, MA  
Reynaldo F. Macías, PhD  
Susan J. Plann, PhD  
María Cristina Pons, PhD  
Otto Santa Ana, PhD

### Associate Professors

Genevieve G. Carpio, PhD  
Raúl A. Hinojosa-Ojeda, PhD  
Gaye T. Johnson, PhD  
Robert Chao Romero, JD, PhD  
J. Christopher Zepeda-Millán, PhD

### Assistant Professors

Karina Alma, PhD  
Floralma E. Boj López, PhD  
Laura C. Chávez-Moreno, PhD

### Lecturer

Alma López Gaspar de Alba, MFA

## Overview

Addressing local, national, and transnational contexts, the Chicana/Chicano and Central American studies curriculum at UCLA explores race, class, gender, and sexuality paradigms as they have shaped the history of the field; as well as new directions in the study of Chicanas/

Chicanos and Latinas/Latinos, including border and transnational studies; expressive arts; history, literature, and language of Americas; and labor, law, and policy studies.

Departmental faculty members, situated in one of the most diverse cities in the world, utilize Los Angeles as a laboratory for studying the social transformations taking place in California, the Southwest, and the U.S. The department provides students with the interdisciplinary research tools necessary to advance knowledge in the field, provide academic leadership, and serve community needs with academic resources.

## Mission

The mission of the César E. Chávez Department of Chicana/o and Central American Studies is to train a new generation of scholars to research and analyze the life, history, and culture of Mexican-origin people within the U.S., as well as of other Latina/Latino and indigenous populations in the Americas.

## Undergraduate Major

### Chicana and Chicano Studies BA

The BA program in Chicana and Chicano Studies is committed to the practice of different forms of scholarship and pedagogy and to the promotion of critical thinking about such issues as gender, sexuality, social action, language, race, ethnicity, class, assimilation/acculturation paradigms, and indigenous traditions. The literary and visual arts often function as vehicles for social change and creative empowerment, and so they constitute one focus of the curriculum, that aims to strike a balance among the social sciences, humanities, arts, and the professions. The major prepares students for graduate education in academic and professional fields and for a variety of positions that involve community and social service in the U.S. and abroad.

### Capstone Program

The Chicana and Chicano Studies major is a designated capstone program. Students have options for completing a senior honors thesis, individual research, or senior project under the direction of a faculty member. Alternatively, students may elect to complete an upper-division course that includes additional coursework culminating in completion of a capstone paper or creative project. Through their capstone work, students are expected to demonstrate working knowledge of the major findings and methods of the disciplines from which they have drawn their Chicana and Chicano studies coursework, show their capacities for conceiving and executing a research or creative project on a self-selected topic as well as identifying and evaluating relevant documentation pertaining to that project, demonstrate appropriate levels of scholarly discourse on their selected topic, and develop greater capacity to be of lifelong service to the Chicana/Chicano and Latina/

Latino community and to global society in the tradition of César Chávez and scholar activist exemplars.

## Learning Outcomes

The Chicana and Chicano Studies major has the following learning outcomes:

- Demonstrated skills and expertise, including research, analysis, and writing
- Demonstrated familiarity and competence in a range of interdisciplinary methodologies and approaches
- Demonstrated ability to identify and analyze appropriate primary and secondary sources, material evidence, and other primary documents
- Demonstrated mastery and integration of knowledge and learned abilities
- Demonstrated ability to use knowledge gained in classroom to conceive and execute projects
- Demonstrated broad knowledge of fundamentals acquired through coursework, as informed by race, class, gender, and sexuality paradigms
- Conception and execution of an original research project that identifies and engages with a topic relevant to the student's area of concentration
- Presentation of work to peers for discussion and critique

## Entry to the Major

### Transfer Students

Transfer applicants to the Chicana and Chicano Studies major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one interdisciplinary Chicana/Chicano history and culture course, one interdisciplinary Chicana/Chicano social structure and contemporary conditions course, and five quarter terms of Spanish.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* Chicana/o and Central American Studies 10A, 10B, Spanish 5 or equivalent.

### The Major

*Required:* A total of 11 upper-division courses, including Chicana/o and Central American Studies 101; one service learning course from 100XP or M170XP or from the approved list available in the department office each term; two related study courses from the approved list of courses outside the department (related study includes courses that provide a comparative perspective to Chicana and Chicano studies and/or a contextualization of Chicana and Chicano communities in the world); one advanced seminar course from 191 or another course by petition to the department chair; and a concentration of four courses in one area listed below and two courses in a second area:

*Border and Transnational Studies:* Chicana/o and Central American Studies CM110, 120, M124, M125, M126, M132, 143, M144, CM147, 151, 152, 153A, M154, M155A, M156A, 163, 176, 184, 191

*Expressive Arts:* Chicana/o and Central American Studies M103C, M103D, M103G, 104, M108A, M115, M116, 117, CM135, M175, M185, M186A, M186AL, M186B, M186BL, M186C, M186CL, M187, 191

*History, Culture, and Language of Americas:* Chicana/o and Central American Studies M105A, M105C, 109, CM110, 111, M114, M116, 131, M132, M133, M139, C141, 142, 143, 145B, 146, 157, M158, M159A, M159B, 160, 168A, 168B, 169, 171, M173, 181, CM182, M183, 184, M187, 191

*Labor, Law, and Policy Studies:* Chicana/o and Central American Studies M102, CM106, M119, 120, M121, M122, 123, M127, M128, M130, M148, 149, 150, 151, 152, M156A, M156B, 165, 166, 174AX, 174BX, CM177, 178, C179, 191

### Honors Program

The proposal, research, data collection, analysis, and writing of the thesis (or the creative equivalent to this process) take place in Chicana/o and Central American Studies 198A, 198B, and 198C, which may not be applied toward the major requirements. An honors thesis of at least 30 pages or a significant creative project is required.

### Optional Multidisciplinary Senior Thesis

Chicana and Chicano Studies majors have the option during their senior year to enroll in two 199 courses with the intention of producing an undergraduate thesis. The first term includes thesis conceptualization and formulation, along with preliminary data collection for the thesis. The second term entails completion of the data collection, analysis of the data, and writing of the thesis. Enrollment in the two 199 courses is with the advice and consent of a faculty member.

### Policies

#### The Major

No more than 8 units of 188, 191, and 199 courses may be applied toward the major; enrollment in the courses must be approved in writing by the department chair.

Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

#### Honors Program

The Chicana and Chicano Studies honors program provides the opportunity for motivated and dedicated students to undertake a year-long research or creative project with the guidance and supervision of a faculty member. The program is open to all juniors and seniors who have a 3.5 grade-point average in the major, a cumulative GPA of 3.0 or better, and completed 90 or more total units, including Chicana/o and Central American Studies 10A, 10B, 101, and one course from 89, 89HC, 189, or 189HC.

The application for admission must be submitted in spring quarter of the year prior to admission to the program, with the advice and consent of a faculty sponsor.

Students who are currently undertaking the optional multidisciplinary senior thesis and who are eligible for the honors program may opt to switch to the honors program (provided it does not delay their progress toward the degree) with the approval of the department.

## Undergraduate Minors

### Central American Studies Minor

#### Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better.

#### The Minor

*Required Lower-Division Course (5 units):* Chicana/o and Central American Studies 20 with a grade of C or better.

*Required Upper-Division Courses (24 units minimum):* Two upper-division core courses selected from Chicana/o and Central American Studies 153A, 153B, 153C, or 153D; four upper-division elective courses selected from African American Studies M154C, M154D, Anthropology 161, Art History CM139A, CM141, C142B, Chicana/o and Central American Studies 100XP, M105C, M105D, C107, M108A, M121, M122, M124, M125, M144, CM147, 151, 152, 153A, 153B, 153C, 153D (if not applied above), 164XP, 169, 188, 191, 199, Community Health Sciences 132, English 135, 176, Spanish 155, or 170.

#### Policies

A maximum of 4 units of special studies courses (197, 199) approved by the adviser may be applied toward the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

### Chicana and Chicano Studies Minor

The Chicana and Chicano Studies minor complements study in another traditional field. Students participating in the minor are required to complete both a departmental major in another discipline and the Chicana and Chicano Studies minor.

#### Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better,

have completed 45 units, and file a petition with the student adviser in 7351 Bunche Hall.

### The Minor

*Required Lower-Division Courses (10 units):* Chicana/o and Central American Studies 10A, 10B.

*Required Upper-Division Courses (20 units minimum):* Chicana/o and Central American Studies 101 and four elective courses (20 units minimum) selected from the approved list (available in the department office each term).

### Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Major

### Chicana and Chicano Studies MA, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Chicana/o and Central American Studies

### Lower-Division Courses

**10A. Introduction to Chicana/Chicano Studies: History and Culture. (5)** (Formerly numbered Chicana and Chicano Studies 10A.) Lecture, three hours; discussion, one hour. Interdisciplinary survey of diverse historical experiences, cultural factors, and ethnic/racial paradigms, including indigenouslyness, gender, sexuality, language, and borders, that help shape Chicana/Chicano identities. Emphasis on critical reading and writing skills. Letter grading.

**10B. Introduction to Chicana/Chicano Studies: Social Structure and Contemporary Conditions. (5)** (Formerly numbered Chicana and Chicano Studies 10B.) Lecture, three hours; discussion, one hour. Multidisciplinary examination of representation, ideologies, and material conditions of Chicanas/Chicanos, including colonialism, race, labor, immigration, poverty, assimilation, and patriarchy. Emphasis on critical reading and writing skills. Letter grading.

**M18. Leadership and Student-Initiated Retention. (2)** (Formerly numbered Chicana and Chicano Studies M18.) (Same as African American Studies M18, American Indian Studies M18, and Asian American Studies M18.) Seminar, two hours. Limited to freshmen/sophomores/first-year transfer students. Not open for credit to students with credit for course M118. Exploration of issues in retention at UCLA through lens of student-initiated and student-run programs, efforts, activities, and services. Focus on populations with his-

torically low graduation rates targeted by Campus Retention Committee. May not be applied toward departmental major or minor elective requirements. May be repeated once for credit. Letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**20. Central American Studies: Histories and Cultures. (5)** (Formerly numbered Chicana and Chicano Studies 20.) Lecture, one hour; discussion, one hour. Survey of histories of Central Americans from time of independence movements of early 18th century to present. Major topics include local indigenities, independence movements, 19th- and 20th-century dependency, state-nation and identity formation, politics of *mestizaje*, Indigenous resistance, imperialism and economic growth, relations with U.S., politics of development, and contemporary social movements. Letter grading.

**88. Sophomore Seminars: Chicana/o and Central American Studies. (2)** (Formerly numbered Chicana and Chicano Studies 88.) Seminar, two hours. Limited to lower-division students. Readings and discussions designed to introduce students to current research in Chicana/Chicano studies. Culminating project may be required. May not be applied toward departmental major or minor requirements. May be repeated for credit with topic change. P/NP or letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**97. Variable Topics in Chicana/o and Central American Studies. (2)** (Formerly numbered Chicana and Chicano Studies 97.) Seminar, two hours. Requisite: course 10A or 10B. Current topics and particular research methods in Chicana and Chicano studies through readings and other assignments. May be repeated for credit. P/NP or letter grading.

**98. Professional Schools Seminars. (2)** (Formerly numbered Chicana and Chicano Studies 98.) Seminar, two hours. Limited to 20 students. Introduction to issues of professional (nonacademic) settings and careers through readings and other assignments. P/NP or letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**100XP. Barrio Organization and Service Learning. (5)** (Formerly numbered 100SL.) Seminar, two hours; discussion, two hours; field placement, six hours. Limited to juniors/seniors. Service learning placement in community-based organization, labor union, or service-oriented nonprofit organization. Study of role that these organizations play in improvement and change of Chicana/Chicano communities. Students meet on regular basis with instructors and provide periodic reports of their experience. Letter grading.

**101. Theoretical Concepts in Chicana/Chicano Studies. (5)** (Formerly numbered Chicana and Chicano Studies 101.) Lecture, four hours; discussion, one hour. Requisite: course 10A or 10B. Survey of different theoretical approaches to field of Chicana and Chicano studies. Letter grading.

**M102. Mexican Americans and Schools. (4)** (Formerly numbered Chicana and Chicano Studies M102.) (Same as Education M102.) Seminar, two hours; discussion, two hours. Theoretical and empirical overview of Chicana/Chicano educational issues in U.S., with special emphasis on disentangling effects of race, gender, class, and immigrant status on Chicana/Chicano educational attainment and achievement. Examination of how historical, social, political, and economic forces impact Chicana/Chicano educational experience. P/NP or letter grading.

**M103C. Origins and Evolution of Chicano Theater. (5)** (Formerly numbered Chicana and Chicano Studies M103C.) (Same as Theater M103C.) Lecture, three hours. Designed for juniors/seniors. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s). P/NP or letter grading.

**M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement. (5)** (Formerly numbered Chicana and Chicano Studies M103D.) (Same as Theater M103D.) Lecture, three hours. Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions that led to emergence of Chicano theater. Letter grading.

**M103G. Contemporary Chicano Theater: Chicano Theater since 1980. (5)** (Formerly numbered Chicana and Chicano Studies M103G.) (Same as Theater M103G.) Lecture, three hours. Analysis and discussion of Chicano theater since 1980, including discussion of Chicana playwrights, magic realism, Chicano comedy, and Chicano performance art. Letter grading.

**104. Comedy and Culture: Your Humorous Life. (4)** (Formerly numbered Chicana and Chicano Studies 104.) Lecture, four hours. How to mine unique humorous life adventures from students' cultural identities and turn those distinct experiences into humorous literature. Students acquire skills to read their stories out loud, with emphasis on comedy in their pieces through art of storytelling and performance. P/NP or letter grading.

**104A. Art of Performance. (4)** (Formerly numbered Chicana and Chicano Studies 104A.) Seminar, four hours. Examination of seminal works of Latina/o/x theater artists with particular focus on creating and embodying personal histories in performance. Features dramatic plays, autobiographical texts, and ensemble devised works that reflect changing nature of Latina/o/x cultural landscape. Introduction to basic elements of acting, including collaborative group performance, physical storytelling, and voice/speech exercises designed to free creative voice. Examination of performance of cultural expression, political tool, and personal identity. P/NP or letter grading.

**M105A. Early Chicana/Chicano Literature, 1400 to 1920. (5)** (Formerly numbered Chicana and Chicano Studies M105A.) (Same as English M105A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicano literature from poetry of Triple Alliance and Aztec Empire through end of Mexican Revolution (1920), including oral and written forms (poetry, corridos, testimonios, folklore, novels, short stories, and drama) by writers such as Nezahualcōyotl (Hungry Coyote), Cabaza de Vaca, Lorenzo de Zavala, María Amparo Ruiz de Burton, Eusebio Chacón, Daniel Venegas, and Lorena Villegas de Magón. P/NP or letter grading.

**M105B. Chicana/Chicano Literature from Mexican Revolution to el Movimiento, 1920 to 1970s. (5)** (Formerly numbered Chicana and Chicano Studies M105B.) (Same as English M105B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Chicana/Chicano literature from 1920s through Great Depression and World War II, ending with Chicana/Chicano civil rights movement. Oral and written narratives by writers including Conrado Espinoza, Jovita González,

Cleofas Jaramillo, Angelico Chávez, Mario Suárez, Oscar Acosta, and Evangelina Vigil. P/NP or letter grading.

**M105C. Chicana/Chicano Literature since el Movimiento, 1970s to Present. (5)** (Formerly numbered Chicana and Chicano Studies M105C.) (Same as English M105C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of Chicana/Chicano literature since 1970s, with particular emphasis on how queer and feminist activism as well as Central and South American migration have shaped 21st-century chicanidad. Oral, written, and graphic fiction, poetry, and drama by writers including John Rechy, Gloria Anzaldúa, Los Bros Hernández, Ana Castillo, and Dagoberto Gilb guide exploration of queer and feminist studies, Reagan generation, immigration debates, and emerging Latina/Latino majority. P/NP or letter grading.

**M105D. Introduction to Latina/Latino Literature. (5)** (Formerly numbered Chicana and Chicano Studies M105D.) (Same as English M105D.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of U.S. Latina/Latino literature and introduction to its major critical trends, with emphasis on groups of Caribbean, Mexican, South American, and Central American origin. Representative works read in relation to such topics as relationship between Latina/Latino populations and U.S. cultural sphere, struggle for self-determination, experiences of exile and migration, border zones, enclaves and language, and *mestizaje* and its impact on cultural production. P/NP or letter grading.

**M105E. Studies in Chicana/Chicano and/or Latina/Latino Literature. (5)** (Formerly numbered Chicana and Chicano Studies M105E.) (Same as English M105E.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Variable topics course to give students broad introduction to issues and themes in Chicana/Chicano and/or Latina/Latino literature. Topics include border, immigration, revolution, language, gender, sexuality, and diaspora, among others. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**105F. Gender, Fiction, and Social Change. (4)** (Formerly numbered Chicana and Chicano Studies 105F.) Lecture, four hours. Requisite: English Composition 3. Study of essays, novels, short narratives, and plays written by Chicanas/Latinas. Required readings represent writers with focus on themes of identity, ethnicity, gender, and cross-border experiences leading to social change. Critical reading and analysis of works, searching for strengths and flaws, to point out unique contribution of each work to greater body of U.S. literature. P/NP or letter grading.

**M105XP. Seminar: Chicana/Chicano and/or Latina/Latino Literature—Community-Engaged Learning. (5)** (Formerly numbered M105SL.) (Same as English M105XP.) Seminar, three or four hours; field placement, three or four hours. Enforced requisite: English Composition 3. Specialized studies in Chicana/Chicano and/or Latina/Latino literature. In-depth study of various topics related to Chicano/Latino communities in Southern California, including Chicana/Chicano visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicano journalism; and labor and literature. Service learning component includes minimum of 20 hours of meaningful work with agency involved with Chicana/Chicano and/or Latina/Latino community and selected by instructor. P/NP or letter grading.

**CM106. Health in Chicano/Latino Population. (4)** (Formerly numbered Chicana and Chicano Studies CM106.) (Same as Public Health M106.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Examination of Chicano/Latino health status through life expectancy, causes of death, reportable diseases, services utilization, provider supply, and risk behaviors within demographic/immigration changes. Binational review of health effects in U.S. and Mexico. Concurrently scheduled with course C276. Letter grading.

**M106B. Diversity in Aging: Roles of Gender and Ethnicity. (4)** (Formerly numbered Chicana and Chicano Studies M106B.) (Same as Gender Studies M104C, Gerontology M104C, Public Affairs M131, and Social Welfare M104C.) Lecture, four hours. Exploration of complexity of variables related to diversity of aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in multidisciplinary perspective utilizing faculty from variety of fields to address issues of diversity. Letter grading.

**C107. Latina/Latino Families in U.S. (4)** (Formerly numbered Chicana and Chicano Studies C107.) Lecture, four hours; discussion, one hour (when scheduled). Study of how intersections of race, class, and gender help shape experiences of Latina/Latino families in U.S. society and how these intersections also help shape individual experiences within families. Examination of family, race, class, and gender as sociological concepts. Readings about family experiences of Mexican and Central American groups in U.S., with special emphasis on immigrants, and analysis of how race, class, and gender together play important roles in shaping these experiences. Discussion of roles of structure and space for agency in each context. Concurrently scheduled with course C212. P/NP or letter grading.

**M108A. Music of Latin America: Mexico, Central America, and Caribbean Isles. (5)** (Formerly numbered Chicana and Chicano Studies M108A.) (Same as Ethnomusicology M108A.) Lecture, four hours; discussion, one hour. Survey of traditional and contemporary musical culture. P/NP or letter grading.

**109. Chicana/Chicano Folklore. (4)** (Formerly numbered Chicana and Chicano Studies 109.) Lecture, four hours. Examination of roots of Chicana/Chicano folklore in Mexican oral tradition in mid-19th century and development of Chicana/Chicano folklore to present day. P/NP or letter grading.

**CM110. Chicana Feminism. (4)** (Formerly numbered Chicana and Chicano Studies CM110.) (Same as Gender Studies CM132A.) Lecture, four hours. Enforced prerequisite: course 10A or Gender Studies 10. Examination of theories and practices of women who identify as Chicana feminist. Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within Chicana/Chicano community and dominant society. Attention to Anglo-European and Third World women. Concurrently scheduled with course CM214. P/NP or letter grading.

**111. Chicana/Chicano and Latina/Latino Intellectual Traditions. (5)** (Formerly numbered Chicana and Chicano Studies 111.) Lecture, five hours. General view of philosophical, cultural, and social thought as well as intellectual traditions in Americas. Roles of writers as intellectuals and cultural/political strategists, and as definers of (national) identity, social reality, and struggles of liberation. Letter grading.

**113. Day of Dead Ritual. (4)** (Formerly numbered Chicana and Chicano Studies 113.) Lecture, four hours; discussion, one hour (when scheduled). Introduction to philosophical roots and evolution of traditional celebration of Day of Dead ritual. Contemplation of indigenous, Spanish, Mexican, Chicano, and other influences and manifestations of this ritual. Special attention to Nahuatl language and worldview related to this ancient ritual, such as ancient calendar systems. Designed to motivate critical thinking about what is observed in altars today and impact globalization has on tradition. P/NP or letter grading.

**113B. Origin and Evolution of Ritual Traditions in Mexico and Central America. (4)** (Formerly numbered Chicana and Chicano Studies 113B.) Lecture, four hours; discussion, one hour (when scheduled). Analytical overview of origin and evolution of cultural traditions of Christmas, Easter, and Day of Dead, from pre-Hispanic to contemporary manifestations in Mexico and Central America. Exploration of how Aztec and Mayan astronomical rituals became foundation for Spanish domination and later globalization. Winter solstice became Christmas, spring equinox became celebration of Easter, and end of harvest became Todos los Santos. Examination of original purpose of

sugar skull, piñata, pastorela shepherds' drama, and traditional dances as effective tools of colonization. Letter grading.

**M114. Chicanos in Film/Video. (5)** (Formerly numbered Chicana and Chicano Studies M114.) (Same as Film and Television M117.) Lectures/screenings, five hours; discussion, one hour. Goal is to gain nuanced understanding of Chicano cinema as political, socio-economic, cultural, and aesthetic practice. Examination of representation of Mexican Americans and Chicanos in four Hollywood genres—silent greaser films, social problem films, Westerns, and gang films—that are major genres that account for films about or with Mexican Americans produced between 1908 and 1980. Examination of recent Chicano-produced films that subvert or signify on these Hollywood genres, including *Zoot Suit*, *Ballad of Gregorio Cortez*, and *Born in East L.A.* Consideration of shorter, more experimental work that critiques Hollywood image of Chicanos. Guest speakers include both pioneer and up-and-coming filmmakers. P/NP or letter grading.

**M115. Musical Aesthetics in Los Angeles. (4)** (Formerly numbered Chicana and Chicano Studies M115.) (Same as Ethnomusicology M115.) Lecture, three hours. Confronting aesthetics from classical perspective of art as intuition, examination on cross-cultural basis of diverse musical contexts within vast multicultural metropolis of Los Angeles, with focus on various musical networks and specific experiences of Chicano/Latino, African American, American Indian, Asian, rock culture, Western art music tradition, and commercial music industry. P/NP or letter grading.

**M116. Chicano/Latino Music in U.S. (5)** (Formerly numbered Chicana and Chicano Studies M116.) (Same as Ethnomusicology M116.) Lecture, four hours; discussion, one hour. Historical and analytical examination of musical expression of Latino peoples who have inhabited present geographical boundaries of U.S. P/NP or letter grading.

**117. Chicana/Chicano Images in Mexican Film and Literature. (4)** (Formerly numbered Chicana and Chicano Studies 117.) Lecture, four hours. Preparation: adequate understanding of Spanish-language films without English subtitles. Throughout its rich history, spanning more than 100 years, Mexican cinema has produced great variety of films that deal with Chicana/Chicano experience. Like its U.S. counterpart, Mexican cinematic discourse portrayal of Chicanas/Chicanos has been plagued by use of stereotypes that limit visual representation of Chicanas/Chicanos. Exploration of causes and effects for such obtuse cinematic representation. P/NP or letter grading.

**M118. Student-Initiated Retention and Outreach Issues in Higher Education. (4)** (Formerly numbered Chicana and Chicano Studies M118.) (Same as African American Studies M118, American Indian Studies M118, and Asian American Studies M168.) Lecture, four hours. Exploration of issues in outreach and retention of students in higher education, especially through student-initiated programs, efforts, activities, and services, with focus on UCLA as case. May be repeated twice for credit. Letter grading.

**M119. Chicano/Latino Community Formation: Critical Perspectives and Oral Histories. (4)** (Formerly numbered Chicana and Chicano Studies M119.) (Same as Labor Studies M123.) Lecture, four hours. Analysis of historical formation and development of Chicano/Latino communities in 20th century, with focus on labor, immigration, economic structures, electoral politics, and international dimensions. Letter grading.

**120. Immigration and Chicano Community. (4)** (Formerly numbered Chicana and Chicano Studies 120.) Lecture, three hours. Discussion on relationship between international immigration and development of Chicana/Chicano community. Examination of U.S. immigration policy and relationship between Mexican-origin population and other Latin American immigrants. P/NP or letter grading.

**M121. Issues in Latina/Latino Poverty: Mexican and Central American Voices from Los Angeles. (4)** (Formerly numbered Chicana and Chicano Studies M121.) (Same as Labor Studies M121 and Urban Planning M140.) Lecture, four hours. Examination of key issues (work, housing, and neighborhoods) in urban poverty,

with particular focus on Mexican and Central American immigrant populations in Los Angeles. Exploration of major theoretical models that explain urban poverty and application of them in comparative context while exploring differences between Mexican and Central American immigrants. Social conditions and forces that help us understand lives of poor people in comparative context while looking at differences between two major Latino-origin populations in Los Angeles. Critical analysis of new forms of urban poverty in contemporary American society. Letter grading.

**M122. Planning Issues in Latina/Latino Communities: Preserving and Strengthening Community Assets in Mexican and Salvadoran Los Angeles. (4)** (Formerly numbered Chicana and Chicano Studies M122.) (Same as Labor Studies M122 and Urban Planning M171.) Lecture, four hours. How community and economic development interact, role of assets in community development, and unique synergies and pitfalls that enable or disable communities from developing to their potential. How to strengthen and how to preserve community resources in Pico-Union neighborhood in Los Angeles. Research entails historical analysis, reviews, interviews, electronic asset mapping, web-based data processing and analysis, oral and written reports, and cyber-based research. Letter grading.

**123. Applied Research Methods in Latino Communities. (4)** (Formerly numbered Chicana and Chicano Studies 123.) Lecture, three hours. Through combination of lectures, key readings, and several experiments, introduction to several applied research methods that are highly effective in producing sound and methodologically rigorous studies on poor and/or Latino communities, including important data that can be used for critical analysis and policy recommendations. Letter grading.

**M124. Latinx Immigration History and Politics. (4)** (Formerly numbered Chicana and Chicano Studies M124.) (Same as Honors Collegium M143.) Lecture, four hours. Critical introduction to U.S. immigration policies and politics, and their disproportionate impacts on Latinx community. Topics include some of root causes of Latin American migration; federal, state, and local immigration lawmaking; and how race, gender, and sexuality impact and are impacted by immigration policies (e.g., legalization, border militarization, deportation) and politics (from voting to activism). P/NP or letter grading.

**M125. U.S./Mexico Relations. (4)** (Formerly numbered Chicana and Chicano Studies M125.) (Same as Labor Studies M125.) Lecture, four hours. Examination of complex dynamics in relationship between Mexico and U.S., using political economy approach to study of asymmetrical integration between advanced industrial economies and developing countries. P/NP or letter grading.

**M126. Politics of Crisis: Migration, Identity, and Religion. (4)** (Formerly numbered Chicana and Chicano Studies M126.) (Same as Honors Collegium M145.) Lecture, three hours. Examination of individual and collective religious response of Latin Americans and Latinas/Latinos in U.S. to dislocations, displacements, and fragmentation produced by conquest, colonization, underdevelopment, globalization, and migration. Letter grading.

**M127. Farmworker Movements, Social Justice, and United Farm Workers Legacy. (4)** (Formerly numbered Chicana and Chicano Studies M127.) (Same as Labor Studies M127.) Lecture, four hours. Designed for juniors/seniors. Historical and social context of farmworker organizing, including its multiracial origins and its influence on fight for equality of working women. Specific focus on organizing of United Farm Workers and Farm Laborers Organizing Committee, and their relationship to AFL-CIO, other unions, and their influence on Chicano Movement. Letter grading.

**M128. Race, Gender, and U.S. Labor. (4)** (Formerly numbered Chicana and Chicano Studies M128.) (Same as Labor Studies M128.) Lecture, four hours. Designed for juniors/seniors. Introduction to history and organization of labor movement in U.S. and North America. Discussion of race, class, and gender issues

raised within movement, and various strategies for social change and economic equity pursued through organized labor and other means. Letter grading.

**M128B. Class and Gender in Care Work. (4)** (Same as Asian American Studies M162, Gender Studies M140C, and Labor Studies M143.) Lecture, three hours; discussion, one hour. Examination of how gender, race, class, and citizenship status shape domestic labor in U.S. Examination of domestic worker experiences through film, fiction, and traditional scholarship. Investigation of why domestic work is in high demand, who employs domestic workers, and why immigrants and women of color make up large percentage of this workforce. Exploration of how domestic workers navigate pay and working conditions, and how they build community and family networks in shadows of their privileged employers. P/NP or letter grading.

**M128C. Common Thread: Garment Workers Past, Present, Future. (4)** (Same as Gender Studies M169 and Labor Studies M108.) Lecture, three hours. Study blends frameworks from economics, labor history, and ethnic studies to offer in-depth exploration of lives and experiences of garment industry workers from early 19th century to present. In contrast to traditional narratives, study locates garment workers—majority of whom are immigrant women—at vanguard of U.S. labor movement, showing how they pioneered new forms of worker education and other social welfare programs, and became leaders in fight for women's, civil, and immigrant rights. Exploration of garment work relationship to American culture, tracing how sweatshop became symbol of worker exploitation, how popular culture and fashion trends impacted lived realities of workers in those shops, and how racial and gendered expectations shaped public perceptions of garment workers. By doing so, study reveals garment work to be central thread that ties together histories of global trade, industrialization, gender and sexuality, immigration, radicalism, unionization, and American imperialism. P/NP or letter grading.

**M129. Community-Engaged Research Methods. (4)** (Formerly numbered M129.) (Same as Labor Studies M129 and Public Affairs M117C.) Lecture, four hours. Students are trained in designing, drafting, piloting, and administering new survey focused on transitions to adulthood. Written in collaboration with labor and community partners serving Latinx, Asian Americans and Pacific Islanders, Black, and Indigenous youth and low-wage workers, this survey gathers data on workforce development, labor rights, education, health, mental health, and civic engagement of young people residing in Black, Indigenous, and people of color communities. Students are exposed to historical development of racial statistics, role of racial statistics in contemporary life, and critical quantitative science. Includes testing questions on racial identity and attitudes, gender identity, workforce development, labor rights, healing and wellness, and other topics determined by labor and community partners. P/NP or letter grading.

**M129B. Participatory Action Research on Youth Organizing for Racial Justice. (4)** (Same as African American Studies M129B, American Indian Studies M129, Asian American Studies M128, and Public Affairs M122.) Lecture, four hours. Students are trained to conduct participatory action research on grassroots youth organizing across California. Students gain historical and theoretical background on multi-racial and inclusive organizing. Students learn how to collect and analyze data pertaining to pressing organizing issues. Study and critical analysis of youth organizing strategies. Weekly training modules on data collection and grassroots organizing strategies that prepare students for internships in grassroots youth organizing groups serving Asian American, Black, Latinx, and Native American communities. P/NP or letter grading.

**M130. Worker Center Movement: Next Wave Organizing for Justice for Immigrant Workers. (4)** (Formerly numbered Chicana and Chicano Studies M130.) (Same as African American Studies M167, Asian American Studies M163, and Labor Studies M167.) Seminar, three hours. Development of theoretical and practical understanding of worker center movement, with focus on historical factors that have led to emer-

gence and growth of worker centers. Role of worker centers in promoting multiethnic and multiracial campaigns for workplace and economic justice. Transnational cross-border solidarity issues and rights of undocumented workers. P/NP or letter grading.

**131. Barrio Popular Culture. (4)** (Formerly numbered Chicana and Chicano Studies 131.) Lecture, three hours. Construction of model by which to organize study of Chicana/Chicano popular culture by focusing on barrio as metaphor for community. Examination of beliefs, myths, and values of Chicana/Chicano culture and representations in icons, heroes, legends, stereotypes, and popular art forms through literature, film, video, music, mass media, and oral history. Letter grading.

**M132. Border Consciousness. (4)** (Formerly numbered Chicana and Chicano Studies M132.) (Same as Lesbian, Gay, Bisexual, Transgender, and Queer Studies M132.) Lecture, three hours; discussion, one hour (when scheduled). Investigation through history, popular culture, and mass media of bilingual and bicultural identities produced by geographical and cultural space between Mexico and U.S. Special attention to border consciousness as site of conflict and resistance. Letter grading.

**M133. Chicana Lesbian Literature. (4)** (Formerly numbered Chicana and Chicano Studies M133.) (Same as Gender Studies M133 and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M133.) Lecture, four hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of *familia* in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies. Letter grading.

**M134XP. Engaging Immigrants and Their Families. (5)** (Formerly numbered Chicana and Chicano Studies M134SL.) (Same as Community Engagement and Social Change M134XP and Labor Studies M134XP.) Lecture, two hours; discussion, two hours; field placement, two hours. Survey and exploration of immigrant landscape in Los Angeles—truly global city acting in part to buffer, settle, and incorporate immigrants in daily life. Focus on civil society to explore multiple forms of interventions and impacts that take place in multiple communities across Los Angeles basin. Service learning partnerships focus on organizations addressing immigration concerns. Letter grading.

**CM135. Bilingual Writing Workshop. (4)** (Formerly numbered Chicana and Chicano Studies CM135.) (Same as Gender Studies M135C and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M135.) Seminar, four hours. Limited to juniors/seniors. Writing sample required; access to course web page mandatory; need not be bilingual to enroll. Technical instruction, analysis, and theoretical discussion of bilingual creative expression through genre of short fiction. Bilingualism as both politics and aesthetics to be central theme. Discussion and analysis of Chicana/Chicano and Latina/Latino short story collections. Peer critique of weekly writing assignments. Emphasis on narrative techniques such as characterization, plot, conflict, setting, point of view, and dialogue, and magical realism as prevailing Chicanesque/Latinesque style. Some attention to process of manuscript preparation, public reading, and publication. Concurrently scheduled with course C235. Letter grading.

**M136. Censored! Art on Trial. (4)** (Formerly numbered Chicana and Chicano Studies M136.) (Same as Lesbian, Gay, Bisexual, Transgender, and Queer Studies M136.) Lecture, four hours. Examination of censorship in visual arts, particularly art of queer Chicana/Chicano and Latina/Latino artists such as Alma Lopez, Ester Hernández, and Alex Donis. Other censored artists include feminist artist Yolanda López, queer artists Robert Mapplethorpe and David Wojnarowicz, painter Christ Offili, photographers Sally Mann and Andres Serrano, printmaker Enrique Chagoya, muralist Noni Olabisi, writer Salman Rushdie, and four performance artists—Karen Finley, Tim Miller, John Fleck, and Holly Hughes—whose work was vetoed by chair of National Endowment for Arts (NEA) in 1990 after they had suc-

cessfully passed through NEA's peer review process and who came to be known as NEA Four. P/NP or letter grading.

**M137. Maya Art and Architecture. (4)** (Formerly numbered Chicana and Chicano Studies M137.) (Same as Art History CM139A.) Lecture, three hours. Requisite: course 27. Study of art of selected Maya-speaking cultures of southern Mesoamerica from circa 2000 BC to Conquest, with particular emphasis on history and iconography. P/NP or letter grading.

**138A. Space, Place, and Race. (4)** (Formerly numbered Chicana and Chicano Studies 138A.) Seminar, four hours. Investigation of theories of spatial formation and their import for study of race and ethnicity in the U.S. Theories of space and place from interdisciplinary list of readings to investigate ways racial formation is embedded in property, maps, streets, and borders. Themes include introduction to spatial theory, settler colonialism, critical cartography, boundaries, and transgression. How space has shaped racial formation in multiracial places. Investigation of ways space, place, and race operate in maps, built environment, and multimedia world. P/NP or letter grading.

**138B. Barrio Suburbanism. (4)** (Formerly numbered Chicana and Chicano Studies 138B.) Seminar, four hours. Examination of barrio suburbanism, in which Chicanas/Chicanos and Latinas/Latinos impact working- and middle-class suburbs to reshape geography of metropolitan centers. Building upon urban studies of roles of public policy and planning in formation of el barrio, how suburban forms operate in multiracial and regional context. Points of intersection and conflict that illuminate how Chicana/Chicano and Latina/Latino populations have impacted economic, social, and political contours of suburbs in Los Angeles metropolitan region. Major themes include urban policy, planning history, mapping, immigration, relational racial formation, and pursuit of regional democracy. P/NP or letter grading.

**M139. Topics in Chicana/Chicano and/or Latina/Latino Literature. (5)** (Formerly numbered Chicana and Chicano Studies M139.) (Same as English M191B.) Seminar, three or four hours. Enforced requisite: English Composition 3. Variable specialized studies course in Chicana/Chicano and/or Latina/Latino literature. Topics may include labor and literature; Chicana/Chicano visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicano journalism; literary New Mexico; specific literary genres. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M140A. Diasporic Nonfiction: Media Engagements with Memory and Displacement I. (4)** (Formerly numbered Chicana and Chicano Studies M140A.) (Same as African American Studies M170A.) Seminar, three hours. Video production course, with emphasis on autobiographical, critical, and performance-based modes of nonfiction media making, drawing on practices of diasporic filmmakers who have grappled with suppressed collective memories of displacement, trauma, exile, and migration. What does it mean to make videos about memory in places where direct cues to remembering cannot be seen? Introduction to concepts from films and readings. Production assignments and screenings, with focus on questions of how to represent history, memory, family dynamics, and lived experience according to perspectives and interests of diasporic subjects. In Progress grading (credit to be given only on completion of course M140B).

**M140B. Diasporic Nonfiction: Media Engagements with Memory and Displacement II. (4)** (Formerly numbered Chicana and Chicano Studies M140B.) (Same as African American Studies M170B.) Seminar, three hours. Enforced requisite: course M140A. Students complete 20- to 30-minute video projects about issues or experiences central to everyday lives of collectives of diasporic peoples. They learn to propose, record, edit, and distribute one socially engaged non-fiction video and draw on their experiences from course M140A in writing voiceover, choreographing dances, designing public performances, interviewing, and recording everyday life. P/NP or letter grading.

**C141. Chicana and Latin American Women's Narrative.** (4) (Formerly numbered Chicana and Chicano Studies C141.) Lecture, four hours. Preparation: reading knowledge of Spanish (level 4). Analyses, comparisons, and discussion of narrative literary production of U.S. Chicana writers and their Latin American counterparts in English and Spanish, with particular focus on how each group deals with gender, ethnic, and class issues. Concurrently scheduled with course C251. Letter grading.

**142. Mesoamerican Literatures.** (4) (Formerly numbered Chicana and Chicano Studies 142.) Lecture, four hours. Preparation: reading knowledge of Spanish (level 4). Survey of premises of Mesoamerican literatures, including myths, lyrics, poetry, religious celebrations, rituals, and drama, specifically of Aztec and Mayan peoples prior to European contact. Letter grading.

**143. Mestizaje: History of Diverse Racial/Cultural Roots of Mexico.** (4) (Formerly numbered Chicana and Chicano Studies 143.) Lecture, four hours; discussion, one hour (when scheduled). Historical examination of diverse racial and cultural roots of Chicanas and Chicanos. Utilizing theoretical frameworks of *mestizaje*, *Aztlán*, *indigenismo*, *La Raza Cósmica*, and *la tercera raiz*, examination of some important groups who have contributed to formation of Mexican national culture. Development of race relations in Mexico during colonial period, with focus on analysis of Nahuas (Aztecs), Mixtecs, Spaniards, and African slave population. Analysis of Asian immigration to Mexico and California during national period, specifically examination of migration and adaptation experiences of Chinese, Japanese, and Punjabi-Indian immigrants. P/NP or letter grading.

**M143B. Afro-Latina/o Experience(s) in U.S.** (4) (Formerly numbered 143B.) (Same as African American Studies M155.) Lecture, four hours; discussion, one hour (when scheduled). Focus on Afro-Latina/o experience in U.S. through exploration of its historical roots and contemporary forms. How colorism in Latin America and U.S. influence Afro-Latina/o identity. Regional differences and different types of Afro-Latina/os that include Blaxicans, Nuyoricans, Afro-Cubans, and others are taken into account. Discussion of themes that include feminism, politics, culture, music, and identities in order to obtain comprehensive picture of Afro-Latina/os in U.S. yesterday and today. P/NP or letter grading.

**M144. Women's Movement in Latin America.** (4) (Formerly numbered Chicana and Chicano Studies M144.) (Same as Gender Studies M144 and Labor Studies M144.) Lecture, four hours. Course on women's movements and feminism in Latin America and Caribbean to examine diverse social movements and locations from which women have launched political and gender struggles. Discussion of forms of feminism and women's consciousness that have emerged out of indigenous rights movements, environmental struggles, labor movements, Christian-based communities, peasant and rural organizing, and new social movements that are concerned with race, sexuality, feminism, and human rights. Through comparative study of women's movements in diversity of political systems as well as national and transnational arenas, students gain understanding of historical contexts and political conditions that give rise to women's resistance, as well as major debates in field of study. P/NP or letter grading.

**145B. Literature of Chicana/Chicano Movement.** (4) (Formerly numbered M145B.) Lecture, three hours. Examination of literature of Chicana/Chicano movement covering period from first manifestations of Chicano artistic production in 1965 with *el Teatro Campesino* through rise of women's writing, including work by Cherrie Moraga (1983), Helena María Viramontes (1985), and Sandra Cisneros (1991). P/NP or letter grading.

**146. Chicano Narrative.** (4) (Formerly numbered M146.) Lecture, three hours. Introduction to major Chicano narrative genres—novel, romance, satire, autobiography, *crónica/semblanza*, Chicana detective novel, and Chicana solidarity fiction. Texts examined within

their own geographic, cultural, and historical contexts, as well as within history of narrative forms. P/NP or letter grading.

**CM147. Transnational Women's Organizing in Americas.** (4) (Formerly numbered Chicana and Chicano Studies CM147.) (Same as Gender Studies M147C.) Lecture, four hours. Feminist theories of transnational organizing. Examination of gender and race as central to processes of globalization and essential to economic and political struggles encompassed in transnational power relations. Exploration of how questions of race and gender influence global economic policies and impact local actors and their communities. In time when people, capital, cultures, and technologies cross national borders with growing frequency, discussion of process of accelerated globalization has been linked to feminization of labor and migration, environmental degradation, questions of diaspora, sexuality, and cultural displacement, as well as growing global militarization. Problems and issues created by globalization and cultural, social, and political responses envisioned by transnational organizing. Concurrently scheduled with course C215. P/NP or letter grading.

**M148. Politics of Struggle: Race, Solidarity, and Resistance.** (4) (Formerly numbered Chicana and Chicano Studies M148.) (Same as African American Studies M148.) Lecture, four hours. Examination of Chicana/Chicano intergroup relations and political coalitions with other Latinos, African Americans, Asian and Pacific Islanders, and Euro-Americans, especially in communities undergoing rapid changes in demographic composition. Letter grading.

**149. Gendered Politics and Chicana/Latina Political Participation.** (4) (Formerly numbered Chicana and Chicano Studies 149.) Lecture, four hours. Examination of Chicanas and Latinas as participants, organizers, and leaders in communities, workplaces, labor unions, and government. Survey of Chicanas/Latinas in politics and as policymakers in appointed and elected offices. Analysis of gendering of politics and political behavior. Letter grading.

**150. Affirmative Action: History and Politics.** (4) (Formerly numbered Chicana and Chicano Studies 150.) Lecture, four hours; discussion, one hour (when scheduled). Historical examination of political economic context in which affirmative action policies and programs were conceived and implemented. Review of impact on Chicanas/Chicanos, Latinas/Latinos, and other communities. Specific analysis of university admissions, hiring and contracting practices, and state initiatives. Letter grading.

**151. Human Rights in Americas.** (4) (Formerly numbered Chicana and Chicano Studies 151.) Lecture, four hours. International human rights laws in North, Central, and South America and U.S. foreign policy in context of historical, political, social, and legal issues and court decisions involving U.S. and its role and relations with governments and institutions. Historical and contemporary development of regional and international law, institutions, law, and norms related to promotion and protection of human rights. P/NP or letter grading.

**152. Disposable People: U.S. Deportation and Repatriation Campaigns.** (4) (Formerly numbered Chicana and Chicano Studies 152.) Seminar, four hours. Examination of U.S. deportation campaigns targeted at Mexican, Central American, and other Latin American workers, residents, and U.S.-born citizens. Addresses various periods of large-scale, highly-organized deportation and repatriation efforts including Great Depression in 1930s, Operation Wetback in 1950s, Central American Minors (CAM) program, Deferred Action for Childhood Arrivals (DACA), and Temporary Protected Status (TPS). P/NP or letter grading.

**153A. Central Americans in U.S.** (4) (Formerly numbered Chicana and Chicano Studies 153A.) Lecture, four hours. Interdisciplinary survey of social, historical, political, economic, educational, and cultural experiences of Central American immigrants and their children in U.S. Introduction to several contemporary experiences and issues in U.S. Central American communities. With focus mostly on Guatemalan, Honduran, and Salvadoran immigrants, exploration of social structures that constrain individuals, as well as

strategies and behaviors immigrants and their communities have taken to establish their presence and incorporate into U.S. society. How Central American identity has been constructed and how this identity intersects with race, gender, and legal status. P/NP or letter grading.

**153B. Central American Racial Constructions.** (4) (Formerly numbered Chicana and Chicano Studies 153B.) Lecture, four hours. Interdisciplinary, transhistorical, and transnational exploration of indigenism, indigeneity, afro-indigeneity, blackness, *mulataje*, *ladinización*, and other racial-gendered constructions among peoples of and in Central America, and how these groups redefine their racial identification and disidentifications in and/or in relation to U.S. P/NP or letter grading.

**153C. Migrating U.S./Central American Cultural Production.** (4) (Formerly numbered Chicana and Chicano Studies 153C.) Lecture, four hours. Exploration of culture making through memory, legends, counter-narratives, signs, symbols, foodways, and sounds as migratory processes that are transnational, transgenerational, translocal, and as part of U.S. Central American, Latina/Latino, and migrant experience within, across, and among cultural groups. P/NP or letter grading.

**153D. U.S. Central American Narratives.** (4) (Formerly numbered Chicana and Chicano Studies 153D.) Lecture, four hours. Examination of textual narratives and genres that emerged or were actively deployed from Central America beginning with civil wars of late 1960s into late 1990s. Texts are read beyond confines of nation-state as narratives and subjectivities in exile. As part of stories of immigrants, these narratives contribute to making of U.S. Central American diasporas, and these communities making home in some other place than original or (re-)imagined homeland. P/NP or letter grading.

**M154. Contemporary Issues among Chicanas.** (4) (Formerly numbered Chicana and Chicano Studies M154.) (Same as Gender Studies M132B.) Lecture, two and one half hours. Prerequisite: Gender Studies 10. Overview of conditions facing Chicanas in U.S., including issues on family, immigration, reproduction, employment conditions. Comparative analysis with other Latinas. P/NP or letter grading.

**M155A. Latinos in U.S.** (4) (Formerly numbered Chicana and Chicano Studies M155A.) (Same as Sociology M155.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Exploration of history and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading.

**M155B. U.S. Latino Politics.** (5) (Formerly numbered Chicana and Chicano Studies M155B.) (Same as Political Science M181B) Lecture, four hours; discussion, one hour (when scheduled). Examination of history and contemporary role of Latinos in U.S. political system. Topics include historical analysis of Latino immigration and migration; civil rights movement; increases in citizenship, registration, and voting in 1980s and 1990s; new wave of anti-immigrant attitudes; Development, Relief, and Education for Alien Minors (DREAM) Act and subsequent DREAMer movement; and response by Latinos today, with discussion of role of Latino vote in recent presidential elections. P/NP or letter grading.

**M156A. Immigrant Rights, Labor, and Higher Education.** (4) (Formerly numbered Chicana and Chicano Studies M156A.) (Same as Asian American Studies M166A and Labor Studies M166A.) Lecture, three hours; discussion, one hour. New immigrant rights movement, with particular attention to labor and higher education. Overview of history of immigrant rights movement and examination of development of coalition efforts between labor movement and immigrant rights movement nationally and locally. Special focus on issue of immigrant students in higher education, challenges facing undocumented immigrant students, and legislative and policy issues that have emerged. Students conduct oral histories, family histories, research on immigration and immigrant rights,

write poetry and spoken word about immigrant experience, and work to collectively develop student publication on immigrant students in higher education. P/NP or letter grading.

**M156B. Research on Immigration Rights, Labor, and Higher Education. (4)** (Formerly numbered Chicana and Chicano Studies M156B.) (Same as Asian American Studies M166B and Labor Studies M166B.) Seminar, two hours. Prerequisite: course M156A. Expansion of research conducted by students in course M156A involving oral histories, research on immigration/labor/higher education, and evaluation of legislation and legal issues impacting undocumented students. Letter grading.

**M156C. Research on Immigrant Students and Higher Education. (4)** (Formerly numbered Chicana and Chicano Studies M156C.) (Same as Asian American Studies M166C and Labor Studies M166C.) Seminar, three hours. Enforced prerequisites: courses M156A, M156B. Expansion of research conducted by students in courses M156A and M156B involving oral histories, research on immigration/labor/higher education, and evaluation of legislation and legal issues impacting undocumented students. Designed around class project, where students work on showcasing all material collected throughout year. Letter grading.

**157. Chicano Movement and Its Political Legacies. (4)** (Formerly numbered Chicana and Chicano Studies 157.) Lecture, four hours. Collective examination of Chicano Movement of 1960s and 1970s and analysis of its political legacies. Grounded in historiographic inquiry and social movement theory, investigation of mobilization of diverse sectors of *el movimiento*, including students, workers, artists, youth, community activists, and women. Exploration of myriad issues and struggles that compelled Chicanas/Chicanos to resist such as land and labor rights, education, anti-war movements, community autonomy, police brutality, political inclusion, cultural recovery, racism, sexism, and class exploitation. Investigation of diverse ideologies, debates, and legacies of Chicano Movement through analysis of Chicana/Chicano motivations for organizing, modes, strategies, innovations, challenges, and articulation of new political subjectivities. P/NP or letter grading.

**M158. Chicana Historiography. (4)** (Formerly numbered Chicana and Chicano Studies M158.) (Same as Gender Studies M157 and History M151D.) Lecture, four hours. Examination of Chicana historiography, looking closely at how practice of writing of history has placed Chicanas into particular narratives. Using Chicana feminist approaches to study of history, revisiting of specific historical periods and moments such as Spanish Conquest, Mexican Period, American Conquest, Mexican Revolution, and Chicano Movement to excavate untold stories about women's participation in and contribution to making of Chicana and Chicano history. P/NP or letter grading.

**M159A. History of Chicano Peoples. (4)** (Formerly numbered Chicana and Chicano Studies M159A.) (Same as History M151A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey lecture course on historical development of Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of Rio through 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in Mexican community by inquiry into major formative historical forces affecting community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination, and resistance. Developments related to historical events of significance occurring both in U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of paper. P/NP or letter grading.

**M159B. History of Chicano Peoples. (4)** (Formerly numbered Chicana and Chicano Studies M159B.) (Same as History M151B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey lecture course on historical development of Mexican (Chicano) community and

people of Mexican descent in U.S. through 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in Mexican community by inquiry into major formative historical and policy issues affecting community. Within framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of paper. P/NP or letter grading.

**160. Introduction to Chicana/Chicano Speech in American Society. (4)** (Formerly numbered Chicana and Chicano Studies 160.) Lecture, three hours. Survey course presenting (1) basic elements of Chicano language use, including history of Chicano languages, types and social functions of Chicano speech (*pachuco*, *caló*, Spanglish), sexist language, and multilingualism and monolingualism and (2) major social issues associated with language use by Chicanos and other urban ethnic populations. Letter grading.

**161. Chicana and Chicano Rhetoric. (4)** (Formerly numbered Chicana and Chicano Studies 161.) Lecture, four hours. Examination of speeches and other public discourse of Chicana/Chicano communities associated with political and social movements, using field of rhetoric (study of public speech and persuasion). Development of public speaking skills and abilities. P/NP or letter grading.

**163. Bilingual Advantage: Spanish Language Topics on Chicana/Chicano and Latin American Cultures. (5)** (Formerly numbered Chicana and Chicano Studies 163.) Lecture, four hours; discussion, one hour. Prerequisite: Spanish 4. Review of Spanish language literature, newsprint, radio, and television in U.S., providing for student development of academic skills in Spanish. Comparison with Spanish language mass media in other parts of world. Letter grading.

**164XP. Oral History: Latino New Immigrant Youth. (5)** (Formerly numbered 164SL.) Seminar, three hours; tutoring, three hours. Theory, methodology, and practice of oral history, together with background information on Mexican, Central American, and Latino immigration. Emphasis on oral history and *testimonio* methods. P/NP or letter grading.

**165. Latinas and Latinos in Public Education. (4)** (Formerly numbered Chicana and Chicano Studies 165.) Lecture, four hours. Examination of language issues pertinent to educational systems, including language inequity, literacy, testing, and socialization, as well as institutional ideologies. Letter grading.

**166. Paulo Freire for Chicana/Chicano Classroom. (4)** (Formerly numbered Chicana and Chicano Studies 166.) Seminar, four hours. Introduction to pedagogy of Paulo Freire and examination of historical and contemporary problems circumscribing Chicana/Chicano education. Central focus to offer Freirian alternative to answer theoretical, methodological, practical, and policy questions about schooling of Chicanas/Chicanos in U.S. P/NP or letter grading.

**M167XP. Taking It to Street: Spanish in Community. (5)** (Formerly numbered Chicana and Chicano Studies M167SL.) (Same as Spanish M165XP.) Seminar, three hours; fieldwork, 10 hours. Enforced prerequisite: Spanish 25 or 27. Service learning course to give students opportunity to use cultural and linguistic knowledge acquired in Spanish classes in real-world settings. Students required to spend minimum of eight to 10 hours per week at agreed on site in Latino community. P/NP or letter grading.

**168A. Latinos: Print Media. (4)** (Formerly numbered Chicana and Chicano Studies 168A.) Lecture, four hours. Examination of systemic (mis)representations of Latinos by print media source (*Los Angeles Times*) by means of critical discourse analysis and metaphor theory. Investigation of empirical basis for theories of racism in language in this context. Student projects range from immigration to education and crime to culture. Letter grading.

**168B. Latinos: Television News. (4)** (Formerly numbered Chicana and Chicano Studies 168B.) Lecture, four hours. Prerequisite: course 168A. Study of multi-

modal (visual, graphic, spoken, audio, and text) images disseminated by television news programs to learn how nation comes to their understanding of Latinos. Development of critical visual interpretive acuity through semiotics training and analysis of actual television news stories. Letter grading.

**169. Representations of Indigenous Peoples in Americas. (4)** (Formerly numbered Chicana and Chicano Studies 169.) Lecture, four hours. Strongly recommended prerequisite: course 101. Introduction to different forms of representation of indigenous peoples and their presence in Americas, with emphasis on Mesoamerica and Andes. How indigenous images are expressed, perceived, and constructed at point of contact with Europeans during development of indigenismo and in current period. Discussion of how these relate to Chicana/Chicano identity construction. Letter grading.

**169B. Xican@ Indigeneity. (4)** (Formerly numbered Chicana and Chicano Studies 169B.) Seminar, four hours. Limited to juniors/seniors. Research seminar organized around readings and engaged discussion of critical topic of interest in field. Exploration of issue, its theoretical implication for field, and practical implications for communities. Addresses Xican@ indigeneity. Exploration of historical and contemporary indigenous character of Xican@ peoples; what it means to be indigenous, Indian *mestiza/o*; relationship to and between cultural and linguistics memories, continuities, losses, changes, revitalization, and reclamation; and indigenous epistemologies, decolonization, and *la perspectiva Xican@*. Final research project required. P/NP or letter grading.

**M170XP. Topics in Community Engagement. (5)** (Formerly numbered Chicana and Chicano Studies M170SL.) (Same as Spanish M172XP.) Seminar, four hours; field project, four to six hours. Prerequisite: Spanish 25. Introduction to community engagement in various forms. Exploration of methods of community involvement and change making processes within variety of professional contexts in community. Students engage in experiential research, service, and/or learning to broaden their understanding of Spanish-speaking and Latinx communities. Students have opportunity to use cultural and linguistic knowledge acquired in Spanish classes in real-world settings. Topics may include oral tradition, immigrant narratives, visual culture and community, language and identity in community, urban spaces, etc. May be repeated for credit with topic change. P/NP or letter grading.

**171. Humor as Social Control. (4)** (Formerly numbered Chicana and Chicano Studies 171.) Lecture, four hours. Hegemonic humor directs laughter of more powerful people against those with less power. In this case laughter becomes weapon used against Latinos and immigrants. With rise of Latinos in last decade, there has been increase of various guises of anti-Latino hegemonic humor in commercial mass-mediated popular culture. Exploration of theorizing, as well as today's myriad examples, of such humor to develop critical literacy of social work it accomplishes. Letter grading.

**172. Chicana and Chicano Ethnography. (4)** (Formerly numbered Chicana and Chicano Studies 172.) Lecture, four hours. Culture change theory encompasses such issues as innovation, syncretism, colonialism, modernization, urbanization, migration, and acculturation. Examination of methods anthropologists/ethnographers use in studying and analyzing culture change within ethnohistorical background of Mexican and Mexican American people to clarify social and cultural origins of modern habits and customs and, more importantly, unravel various culture change threads of that experience. Topics include technology and evolution, Indian nation-states, miscegenation, peasantry, expansionism, industrialization, immigration, ethnicity, and adaptation. Field project on some aspect of culture change required. P/NP or letter grading.

**M173. Nonviolence and Social Movements. (4)** (Formerly numbered Chicana and Chicano Studies M173.) (Same as African American Studies M173 and Labor Studies M173.) Lecture, three hours; discussion, one hour. Overview of nonviolence and its impact on social

movements both historically and in its present context in contemporary society, featuring lectures, conversations, films, readings, and guest speakers. Exploration of some historic contributions of civil rights struggles and role of nonviolent action throughout recent U.S. history. Examination of particular lessons of nonviolent movements as they impact social change organizing in Los Angeles. P/NP or letter grading.

**174AX-174BX. Restoring Civility: Understanding, Using, and Resolving Conflict. (5-5)** (Formerly numbered Chicana and Chicano Studies 174AX-174BX.) Lecture, four hours; discussion, three hours. Course 174AX is enforced requisite to 174BX. Designed for students who want to learn principles of dialogue and mediation, as alternatives to violence, and practice how to apply them in educational settings. In Progress grading (174AX) and P/NP or letter (174BX) grading.

**M175. Chicana Art and Artists. (4)** (Formerly numbered Chicana and Chicano Studies M175.) (Same as Art M184 and World Arts and Cultures M128.) Lecture, four hours. Introduction to Chicana art and artists. Examination of Chicana aesthetic. Chicana artists have developed unique experience and identity as artists and Chicanas. Letter grading.

**176. Globalization and Transnationalism: Local Historical Dynamics and Praxis. (4)** (Formerly numbered Chicana and Chicano Studies 176.) Lecture, four hours. Analysis of dynamics of Chicana/Chicano transnational community formation in comparative global perspective, explored both as historical result of and key future actor in localized dynamics of transnationalization in California's relation to world. Analysis of Chicana/Chicano experience in California as both highly linked node and localized microcosm of dynamics of globalization that is both affected by as well as influences course of alternative scenarios of globalization. Designed to help students develop critical political economy analysis of interplay between globalization and localized transnational dynamics that together are giving meaning to and constructing new social identities and strategies for struggle throughout world. P/NP or letter grading.

**CM177. Latino Social Policy. (4)** (Formerly numbered Chicana and Chicano Studies CM177.) (Same as Public Affairs M142.) Lecture, three hours; discussion, one hour (when scheduled). Examination of social welfare of Latinos (Chicanos, Puerto Ricans, and Cubans) in U.S. through assessment and critical analysis of social policy issues affecting them. Survey of social, economic, cultural, and political circumstances affecting ability of Latinos to access public benefits and human services. Concurrently scheduled with course C277. Letter grading.

**178. Latinas/Latinos and Law: Comparative and Historical Perspectives. (4)** (Formerly numbered Chicana and Chicano Studies 178.) Lecture, four hours. Survey of experiences of Latinas/Latinos with U.S. legal system. Examination of landmark appellate decisions and litigation efforts in jury service, voting rights, language, public accommodations, education, and other areas. Critical assessment of role of legal principles and litigation in improving Latina/Latino position within U.S. society. Letter grading.

**C179. Language Politics and Policies in U.S.: Comparative History. (4)** (Formerly numbered Chicana and Chicano Studies C179.) Lecture, four hours. Historical overview of national and institutional language policies, especially schooling, in U.S. as context to understanding social, legal, and political constraints on bilingualism. Definitions and development of language policy and planning, history of general and educational language policies in U.S., demographic profile of language diversity, and current language and educational policy issues in U.S. Comparisons with selected international cases. Concurrently scheduled with course C274. P/NP or letter grading.

**180. Chicana/Chicano Schooling and Community Activism. (4)** (Formerly numbered Chicana and Chicano Studies 180.) Seminar, four hours. Overview of Chicana/Chicano schooling issues in U.S., with special emphasis on several important historical events that exemplify struggle for educational justice and equity that affected Chicana/Chicano education—Mendez versus Westminster (1947) desegregation case and 1968 high school Chicana/Chicano student

walkouts. Through oral history projects, documentation of legacy of Sylvia Mendez, who experienced segregation in one Mexican school in 1940s, Sal Castro, Chicano teacher and central figure in 1968 walkouts, and Chicano Youth Leadership Conference (CYLC). Examination of how historical, social, and political forces have impacted Chicana/Chicano educational experiences. P/NP or letter grading.

**181. History of Chicana/Chicano Los Angeles, 20th Century. (4)** (Formerly numbered Chicana and Chicano Studies 181.) Lecture, four hours. History of Mexican American people in 20th-century Los Angeles. Readings and lectures emphasize formation of regional identity among Mexican Americans in Los Angeles and their significance to emergence of multicultural metropolis. Letter grading.

**CM182. Understanding Whiteness in American History and Culture. (4)** (Formerly numbered Chicana and Chicano Studies CM182.) (Same as History M151C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History, construction, and representation of whiteness in American society. Readings and discussions trace evolution of white identity and explore its significance to historical construction of race class in American history. Concurrently scheduled with course C256. Letter grading.

**M183. History of Los Angeles. (4)** (Formerly numbered Chicana and Chicano Studies M183.) (Same as History M155.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Social, economic, cultural, and political development of Los Angeles and its environs from time of its founding to present. Emphasis on diverse peoples of area, changing physical environment, various interpretations of city, and Los Angeles' place among American urban centers. P/NP or letter grading.

**184. History of U.S./Mexican Borderlands. (4)** (Formerly numbered Chicana and Chicano Studies 184.) Lecture, four hours. Survey of historic and geographic diversity of Chicana/Chicano identity and culture, with emphasis on regional communities of California, New Mexico, and Texas in Spanish/Mexican borderlands as situated within U.S. national context. Letter grading.

**M185. Whose Monument Where: Course on Public Art. (4)** (Formerly numbered Chicana and Chicano Studies M185.) (Same as Art M185 and World Arts and Cultures M126.) Lecture, four hours. Recommended corequisite: course M186A, M186B, or M186C. Examination of public monuments in U.S. as basis for cultural insight and critique of American values from perspective of artist. Use of urban Los Angeles as textbook in urban space issues such as who is public, what is public space at end of 20th century, what defines neighborhoods, and do different ethnic populations use public space differently. P/NP or letter grading.

**M186A. Beyond Mexican Mural: Beginning Muralism and Community Development. (4)** (Formerly numbered Chicana and Chicano Studies M186A.) (Same as Art M186A and World Arts and Cultures M125A.) Studio/lecture, four hours. Corequisite: course M186AL. Investigation of muralism as method of community education, development, and empowerment. Exploration of issues through development of large-scale collaborative digitally created image and/or painting for placement in community. Students research, design, and work with community participants. P/NP or letter grading.

**M186AL-M186BL-M186CL. Beyond Mexican Mural: Muralism and Community Laboratory. (4-4-2)** (Formerly numbered Chicana and Chicano Studies M186AL-M186BL-M186CL.) (Same as Art M186AL-M186BL-M186CL and World Arts and Cultures M125AL-M125BL-M125CL.) Course M186AL is requisite to M186BL, which is requisite to M186CL. Mural and Digital Laboratory is art studio housed at Social and Public Art Resource Center in Venice, CA, where students work in community-based setting. Open to students during scheduled hours with laboratory tech support, it offers instruction as students independently and in collaborative teams research, design, and produce large-scale painted and digitally generated murals to be placed in community setting. P/NP or letter grading. **M186AL.** Beginning. Laboratory, four

hours. Corequisite: course M186A; **M186BL.** Intermediate. Laboratory, four hours. Requisites: courses M186A, M186AL. Corequisite: course M186B; **M186CL.** Advanced. Laboratory, two hours. Corequisite: course M186C.

**M186B. Beyond Mexican Mural: Intermediate Muralism and Community Development. (4)** (Formerly numbered Chicana and Chicano Studies M186B.) (Same as Art M186B and World Arts and Cultures M125B.) Studio/lecture, four hours. Requisites: courses M186A, M186AL. Corequisite: course M186BL. Continuation of investigation of muralism as method of community education, development, and empowerment. Exploration of issues through development of large-scale collaborative digitally created image and/or painting for placement in community. Students research, design, and work with community participants. Continuation of project through states of production to full scale and community approval. P/NP or letter grading.

**M186C. Beyond Mexican Mural: Advanced Muralism and Community Development. (4)** (Formerly numbered Chicana and Chicano Studies M186C.) (Same as Art M186C and World Arts and Cultures M125C.) Studio/lecture, six hours. Requisites: courses M186B, M186BL. Corequisite: course M186CL. Continuation of investigation of muralism as method of community education, development, and empowerment. Exploration of issues through development of large-scale collaborative digitally created image and/or painting for placement in community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

**M187. Latino Metropolis: Architecture and Urbanism in Americas. (4)** (Formerly numbered Chicana and Chicano Studies M187.) (Same as History M151E and Urban Planning M187.) Lecture, four hours. Introduction to history of architecture and urbanism in Americas, from fabled cities of Aztec empire to barrios of 21st-century Los Angeles and Miami. Emphasis on role of cities in Latina/Latino experience and uses of architecture and city planning to forge new social identities rooted in historical experiences of conquest, immigration, nationalization, and revolution. P/NP or letter grading.

**M187B. Colonial Latin American Art. (4)** (Formerly numbered Chicana and Chicano Studies M187B.) (Same as Art History CM141.) Lecture, three hours; discussion, one hour (when scheduled). Art and architecture of colonial Americas from 16th to 18th century. P/NP or letter grading.

**187C. Aztec Art. (4)** (Formerly numbered Chicana and Chicano Studies 187C.) Lecture, four hours. Introduction to Aztecs through analysis of art in different media including sculpture, featherworks, polychrome pottery, manuscripts, and architecture. Readings from ethno-historic sources compiled in early colonial period by indigenous scribes and Spanish officials (friars, soldiers, chroniclers, and administrators). Study of Aztecs, their art, their civilization, and major topics discussed in existing scholarship, including calendar, foundational and creation myths, stories of migration, human sacrifice, rulership, warfare, gender, religion, philosophy, and art and architecture. Assessment of validity of scholarly assumptions about Aztecs, their art, and society in light of available sources. P/NP or letter grading.

**188. Special Courses in Chicana/o and Central American Studies. (4)** (Formerly numbered Chicana and Chicano Studies 188.) Seminar, three hours. Some sections may require prior coursework. Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar

topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced requisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**190. Research Colloquia in Chicana/o and Central American Studies. (2)** (Formerly numbered Chicana and Chicano Studies 190.) Seminar, two hours. Designed to bring together students undertaking supervised tutorial research in seminar setting with one or more faculty members to present reports, discuss research methodologies, share findings, and provide feedback on each other's work. Culminates in public summit of Chicana/Chicano student research at which students expected to present polished position papers on their research. May be repeated for credit. P/NP grading.

**191. Variable Topics Research Seminars: Chicana/o and Central American Studies. (4)** (Formerly numbered Chicana and Chicano Studies 191.) Seminar, three hours. Limited to juniors/seniors. Research seminar organized around readings and engaged discussion of critical topic of interest in field. Exploration of issue, its theoretical implication for field, and practical implications for communities. Final research project required. May be repeated for credit. P/NP or letter grading.

**192A. Undergraduate Practicum in Chicana/o and Central American Studies. (4)** (Formerly numbered Chicana and Chicano Studies 192A.) Seminar, four hours. Limited to juniors/seniors. Training and supervised practicum for advanced undergraduate students who assist in preparation of materials and/or development of innovative programs or courses of study under guidance of faculty members in small group settings or one-on-one setting. May not be applied toward departmental major or minor elective requirements. May be repeated for credit. P/NP or letter grading.

**193. Readings/Speaker Series Seminars: Chicana/o and Central American Studies. (1)** (Formerly numbered Chicana and Chicano Studies 193.) Seminar, one hour. Limited to undergraduate Colloquia Series students. Reading of journal articles associated with speaker topics to enliven postcolloquia discussions. May not be applied toward departmental major or minor elective requirements. May be repeated for credit. P/NP grading.

**194. Research Group Seminars: Chicana/o and Central American Studies. (2)** (Formerly numbered Chicana and Chicano Studies 194.) Seminar, one hour. Designed for undergraduate students who are part of research group. Discussion of current literature in field

or of research of faculty members or students. Use of specific research method on selected topic. May be repeated for credit with topic change. P/NP grading.

**195. Community Internships in Chicana/o and Central American Studies. (4)** (Formerly numbered Chicana and Chicano Studies 195.) Tutorial, two hours; field placement, eight hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

**M195CE. Comparative Approaches to Community and Corporate Internships. (4)** (Formerly numbered Chicana and Chicano Studies M195CE.) (Same as African American Studies M195CE, American Indian Studies M195CE, Asian American Studies M195CE, and Gender Studies M195CE.) Tutorial, one hour; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Learning. Comparative study of race, gender, and indigeneity in relation to contemporary workplace dynamics. Students complete weekly written assignments, attend biweekly meetings with graduate student coordinator, and write final research paper. Faculty sponsor and graduate student coordinator construct series of reading assignments that examine issues related to internship site. Individual contract with supervising faculty member required. P/NP or letter grading.

**196. Research Apprenticeship in Chicana/o and Central American Studies. (2 to 4)** (Formerly numbered Chicana and Chicano Studies 196.) Tutorial, three hours per week per unit. Requisite: course 10A or 10B. Limited to juniors/seniors. Entry-level research apprenticeship for upper-division students under guidance of faculty mentor. Participation in all aspects of research project, including library research, reading materials, and compilation of data, with scheduled meetings throughout term with faculty mentor for discussion of project. May not be applied toward departmental major or minor requirements. May be repeated under different contract; consult department. Individual contract required. P/NP grading.

**197. Individual Studies in Chicana/o and Central American Studies. (2 to 4)** (Formerly numbered Chicana and Chicano Studies 197.) Tutorial, four hours. Requisites: courses 10A, 10B. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

**197C. Individual Capstone Studies. (2)** (Formerly numbered Chicana and Chicano Studies 197C.) Tutorial, one hour. Requisites: courses 10A and 10B, or 101. Limited to departmental junior/senior majors. Guided study led by faculty supervisor. Instructor meets with student to help design culminating capstone project so it conforms to departmental capstone project guidelines. Must be taken in conjunction with one upper-division departmental course. May not be repeated for credit. Individual contract required. Letter grading.

**198A-198B-198C. Honors Research in Chicana/o and Central American Studies. (2 each)** (Formerly numbered Chicana and Chicano Studies 198A-198B-198C.) Tutorial, one hour. Limited to junior/senior honors program students. May be repeated for credit. Individual contract required. Letter grading. **198A.** Thesis Conceptualization. Requisites: courses 10A, 10B, 101, and 89 or 189. Conceptualization and formulation of project in Fall Quarter under direct supervision of faculty member. Preliminary data collection on topic and production of proposal for thesis required. **198B.** Annotated Bibliography/Literature Review. Requisite: course 198A. Development of research skills in Winter Quarter to produce extensive annotated bibliography or literature review on thesis topic. Weekly meetings with faculty member to discuss research and develop outline, argument, and structure of thesis. **198C.** Writing and Revision. Requi-

site: course 198B. Writing, revision, and completion of departmental honors thesis in Spring Quarter to specification and satisfaction of thesis committee. Public presentation and defense of thesis required.

**199. Directed Research or Senior Project in Chicana/o and Central American Studies. (2 to 4)** (Formerly numbered Chicana and Chicano Studies 199.) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

## Graduate Courses

**200. Theoretical Paradigms in Chicana/o and Central American Studies. (4)** (Formerly numbered Chicana and Chicano Studies 200.) Seminar, three hours. Limited to graduate students. Examination of several approaches and important theoretical frameworks in field of Chicana and Chicano studies. Exploration of changes that have taken place around four key theoretical areas—coloniality, nationhood, inequality studies, and genders and sexualities. S/U or letter grading.

**201. Activist Scholarship and Intersectional Methodologies Seminar. (4)** (Formerly numbered Chicana and Chicano Studies 201.) Seminar, three hours. Limited to graduate students. Exploration of four critical epistemologies, or schools of thought, that employ intersectional methodologies as basis for social action research—Chicana/Chicano cultural studies, Chicana feminism, queer studies, and critical legal studies. S/U or letter grading.

**202. Qualitative Methods in Study of Chicanas/Chicanos and Latinas/Latinos. (4)** (Formerly numbered Chicana and Chicano Studies 202.) Seminar, three hours. Limited to graduate students. Methods course that takes students through entire empirical research cycle. Students required to collectively develop interesting research questions, conduct qualitative research, analyze original data, and write final papers that contextualize findings within existing social scientific literature. To answer research questions, students select from theoretical frameworks discussed in readings. S/U or letter grading.

**M206. Politics of Hood. (4)** (Formerly numbered Chicana and Chicano Studies M206.) (Same as Public Policy M231.) Seminar, three hours. Limited to graduate students. Investigation of root causes and consequences of critical problems impacting people who live in hood including poverty, incarceration, gentrification, welfare, public education, health disparities, and segregation, among other political issues. S/U or letter grading.

**207. Racial Geographies. (4)** (Formerly numbered Chicana and Chicano Studies 207.) Seminar, three hours. Interdisciplinary examination of spatial turn in social sciences and humanities. Drawing upon readings from geography, history, ethnic, and American studies, use of analytic of space to investigate questions of race in U.S. Focus on production of space, geographic approaches to racial formation, and anti-racist, place-based struggles. Study foregrounds intersections with Chicana and Chicano studies and models of relational racialization. S/U or letter grading.

**208. Research Design and Methods in Chicana/Chicano Studies. (4)** (Formerly numbered Chicana and Chicano Studies 208.) Seminar, four hours. Research design and methodologies in Xican@ studies grounded in perspectiva Chicana/Chican@ perspective. Study of knowledge production and scholarship in Chican@ studies, how it can be done, and how it can be evaluated. Includes critical comparison with Chicanology and identity studies, and associated biases, flaws, and fatal flaws. S/U or letter grading.

**209. Service Learning: Theory and Praxis. (4)** (Formerly numbered Chicana and Chicano Studies 209.) Seminar, three hours. Limited to graduate students. Examination of approaches and theories that underpin service learning and exploration of ways in which service learning can be utilized in variety of academic disciplines (second and foreign language instruction, education, ethnic studies, labor studies, women's studies, public health, literature, public art, political

science, etc.). Creation of research proposal for use of service learning in one course (real or hypothetical) in academic discipline of student's choice. S/U or letter grading.

**210. Queer of Color Genealogies. (4)** (Formerly numbered Chicana and Chicano Studies 210.) Seminar, three hours. Art of community-making by those multiply marginalized by categories of race, gender, class, citizenship, and gender nonconformity and disposed of normative forms of belonging. Tracking of genealogies of queer of color communities through alternative archives of desire, love, affect, memory, performance, and politics. Reading about queer of color theories and practices, with special focus on oral history, digital storytelling, and forms of social documentation methodologies. S/U or letter grading.

**211. Immobilizing Immigrants: Detention and Deportation in U.S. (4)** (Formerly numbered Chicana and Chicano Studies 211.) Seminar, three hours. History of detention and deportation policy in U.S. as it affects Mexicans and other Latinas/Latinos. Consolidation of this legal authority and its deployment across 20th century. S/U or letter grading.

**C212. Latina/Latino Families in U.S. (4)** (Formerly numbered Chicana and Chicano Studies C212.) Lecture, four hours; discussion, one hour (when scheduled). Study of how intersections of race, class, and gender help shape experiences of Latina/Latino families in U.S. society and how these intersections also help shape individual experiences within families. Examination of family, race, class, and gender as sociological concepts. Readings about family experiences of Mexican and Central American groups in U.S., with special emphasis on immigrants, and analysis of how race, class, and gender together play important roles in shaping these experiences. Discussion of roles of structure and space for agency in each context. Concurrently scheduled with course C107. Letter grading.

**M213. Asian-Latinos. (4)** (Formerly numbered Chicana and Chicano Studies M213.) (Same as Asian American Studies M213.) Seminar, three hours. Limited to graduate students. Examination of historical and contemporary populations of Asian-Latinos in Latin America and U.S. Review and critique of nascent literature on Asian-Latinos and analysis of experience of Asian-Latinos utilizing theoretical frameworks of *mestizaje*, critical mixed-race theory, and transnationalism. Coverage of often-overlooked Asian contributions to Latin American and Chicano/Latino culture and identity and exploration of unique experience of mixed-race Asian-Latinos. S/U or letter grading.

**CM214. Chicana Feminism. (4)** (Formerly numbered Chicana and Chicano Studies CM214.) (Same as Gender Studies CM232A.) Lecture, four hours. Enforced prerequisite: course 10A or Gender Studies 10. Examination of theories and practices of women who identify as Chicana feminist. Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within Chicana/Chicano community and dominant society. Attention to Anglo-European and Third World women. Concurrently scheduled with course CM110. S/U or letter grading.

**C215. Transnational Women's Organizing in Americas. (4)** (Formerly numbered Chicana and Chicano Studies C215.) Lecture, four hours. Feminist theories of transnational organizing. Examination of gender and race as central to processes of globalization and essential to economic and political struggles encompassed in transnational power relations. Exploration of how questions of race and gender influence global economic policies and impact local actors and their communities. In time when people, capital, cultures, and technologies cross national borders with growing frequency, discussion of process of accelerated globalization has been linked to feminization of labor and migration, environmental degradation, questions of diaspora, sexuality, and cultural displacement, as well as growing global militarization. Problems and issues created by globalization and cultural, social, and political responses envisioned by transnational organizing. Concurrently scheduled with course CM147. Letter grading.

**216. Product of Immigrant Illegality. (4)** (Formerly numbered Chicana and Chicano Studies 216.) Seminar, three hours. Limited to graduate students. Based mostly on U.S., exploration of dynamic field of illegality studies. Study of history of immigration policies and enforcement practices along with key empirical and theoretical contributions to understand how immigrant illegality is produced. S/U or letter grading.

**217. U.S. Central American Racial Constructs and Cultural Diversity. (4)** (Formerly numbered Chicana and Chicano Studies 217.) Seminar, three hours. Limited to graduate students. Exploration of indigenism, indigeneity, afro-indigeneity, Blackness, *mestizaje*, *mulattaje*, *ladinization* and other racial-gendered constructs in Central America by critically engaging scholarship, census data, and oral histories to understand Central American communities in U.S. Analysis on their origins and how these racial-gendered stratifications were naturalized through cultural practices. Engages cultural practices as strategies of survival for populations working against historical erasure especially enacted by nation-state. For example, why is Blackness erased in national narrative of El Salvador, why problematize Costa Rica's claim of racial equality, why and how do Garifuna communities assert their indigeneity while also engaging multiple practices and discourses of Blackness? Examination also of how these communities face genocide, ethnocide, femicide, and strategies of racial passing and resistance. S/U or letter grading.

**M218. Latinx Photoethnography. (4)** (Same as Anthropology M239R.) Seminar, three hours. Hands-on introduction to using photography as ethnographic field method. Introduction to basics of photography with review of key and relevant literature from fields of sociocultural anthropology, visual anthropology, and photographic theory. Exploration of technical, ethical, and aesthetic aspects of picture making and their relationship to anthropological field methods, participant observation, and issues of representation—especially among Latinx communities. Student-lead discussions of assigned readings and in-class hands-on learning. Quarter-long photoethnography project focused on Latinx issues in greater Los Angeles. S/U or letter grading.

**232. Aesthetics of Place in Chicana/Chicano Expressive Culture. (4)** (Formerly numbered Chicana and Chicano Studies 232.) Seminar, three hours. Examination of several place-based aesthetic traditions, including indigenous, *Santería*, diasporic, and *Aztlán* aesthetics, in Chicana/Chicano visual art, film, performance, and literature. Special focus on place as site of identity, history/memory, and creative production. S/U or letter grading.

**233. Community Cultural Development in Public Art: From Neighborhood to Global. (4)** (Formerly numbered Chicana and Chicano Studies 233.) Seminar, three hours; laboratory, one hour. Designed for graduate students. Artist approaches to transformations of local and global communities through aesthetic practices in visual arts, spoken word, visual performance, music, and dance that include participatory audience inclusion and foster civic dialogue and community advocacy and activism. Issues of cultural democracy based in cultural retention and affirmation. Case studies of artist projects in community cultural development provide contemporary examples of evolving field of work and basis for critical analysis. S/U or letter grading.

**234. New Social Media and Activist Art. (4)** (Formerly numbered Chicana and Chicano Studies 234.) Studio, four hours. Limited to graduate students. Hands-on learning and production experience as essential to full understanding of modern media. Promotion of pragmatic style of humanistic and social scientific scholarship that prepares students to think critically and productively about media form, content, and context while learning to effectively use social media. S/U or letter grading.

**C235. Bilingual Writing Workshop. (4)** (Formerly numbered Chicana and Chicano Studies C235.) Seminar, four hours. Limited to graduate students. Writing sample required; access to course web page mandatory; need not be bilingual to enroll. Technical instruction, analysis, and theoretical discussion of bilingual

creative expression through genre of short fiction. Bilingualism as both politics and aesthetics to be central theme. Discussion and analysis of Chicana/Chicano and Latina/Latino short story collections. Peer critique of weekly writing assignments. Emphasis on narrative techniques such as characterization, plot, conflict, setting, point of view, and dialogue, and magical realism as prevailing Chicanesque/Latinesque style. Some attention to process of manuscript preparation, public reading, and publication. Concurrently scheduled with course CM135. Letter grading.

**236. Latinx Noir and City at Night. (4)** (Formerly numbered Chicana and Chicano Studies 236.) Seminar, three hours. Noir literary and cinematic genre is characterized by gritty realism, social disorder, violence, and nocturnal meanderings in darkest, meanest streets of urban metropolis. Examination of Latinx representations of Los Angeles in mainstream and Chicana/Latinx literature and film. S/U or letter grading.

**M237. Hemispheric and Transnational Approaches to Contemporary Art in Americas. (4)** (Formerly numbered Chicana and Chicano Studies M237.) (Same as Art History M243.) Seminar, three hours. Maps current state and future of research, teaching, and museum practice in contemporary art of Americas, with focus on hemispheric and transnational approaches. Study of influential theoretical texts from literary studies and critical examination of recent publications in arts, including museum exhibition catalog, as hemispheric and transnational approach to contemporary Latinx and Latin American arts is posited. Focus intersects with other related topics, including art post-1968; comparative indigenities in Americas; art, globalism, and biennials; decolonial turn; transnational feminisms; and New American counter narratives. S/U or letter grading.

**238. New Directions in Chicana and Latinx Art. (4)** (Formerly numbered Chicana and Chicano Studies 238.) Seminar, three hours. Focus on current state and future of research, teaching, and museum practice in Chicana and Latinx art history. Examination of various topics, including decolonial methodologies; national versus global perspectives on Latinx art; indigeneity and Chicana art; politics and publics of prints and graphics; public murals and monuments; race and place in Los Angeles; queer and feminist approaches to Chicana and Latinx art; and collecting and display of Chicana art by museums, galleries, and private collectors. Particular emphasis on decolonial, feminist, critical race, and poststructuralist approaches. Students prepare weekly readings for discussion, and complete final presentation and research project. Parameters of project to be determined in consultation with professor. Examples include original research paper, teaching portfolio, comprehensive historiographic review, or creative project. S/U or letter grading.

**239. Digital Methods for Research and Presentations. (4)** (Formerly numbered Chicana and Chicano Studies 239.) Laboratory, four hours. Students learn how to think about one's own research in visual way, and how to develop digital skills to produce images and videos for more professional and compelling research presentations and job talks that do not infringe upon copyrighted materials. Students learn how to locate high-resolution images, and how to use Photoshop to manipulate files and create original illustrations. Students learn how to use Prezi as oral presentation software and archiving method for gathering and organizing visual materials on their research. Each student receives personalized guidance based on specificity of their research, for example, mapping software, or video editing for oral history projects, or subtitling/translating for documentary videos. Students learn how to use available applications such as iMovie or QuickTime to produce short videos that can be incorporated into their presentations. For their final project, students are required to present mock conference talk using their original manipulated images and short videos. S/U or letter grading.

**240. U.S. Central Americans Making Art and Memory. (4)** (Formerly numbered Chicana and Chicano Studies 240.) Seminar, three hours. Limited to graduate students. Memory is trope through which U.S. Central American writers, performance, visual, media,

and public artists and activists communicate across social, national, and phenomenological borders. Through contemporary theories on memory and narrativizing, introduction to U.S. Central American writers, artists, cultural activists, and historical figures. Exploration of issues including civil war, postwar, race, class, sex, gender, globalization, immigration, and identity formations. Students have option to create art, media projects, and essays that interpret readings as these relate to their lives vis-à-vis U.S. Central American cultural production. S/U or letter grading.

**M247. Chicano Literature. (4)** (Formerly numbered Chicana and Chicano Studies M247.) (Same as Spanish M247.) Lecture, three hours. Study of major movements and authors of Mexican American literature. S/U or letter grading.

**C251. Chicana and Latin American Women's Narrative. (4)** (Formerly numbered Chicana and Chicano Studies C251.) Lecture, four hours. Preparation: reading knowledge of Spanish (level 4). Analyses, comparisons, and discussion of narrative literary production of U.S. Chicana writers and their Latin American counterparts in English and Spanish, with particular focus on how each group deals with gender, ethnic, and class issues. Concurrently scheduled with course C141. Letter grading.

**252. Cultural Representations in Americas. (4)** (Formerly numbered Chicana and Chicano Studies 252.) Seminar, three hours. Analysis of Latina/Latino and Latin American fictional and nonfictional narratives and films, with emphasis on gender issues, diasporas, and global transformation. Use of aesthetic and formal analytical perspectives and several conceptual frameworks—cultural studies, postcolonial studies, neoliberalism, intersectionality, and feminist theories. Study of these cultural productions as expression of intersectionalities and differences among Latina/Latino and Latin American cultural workers, as well as among diverse populations and changing experiences their works refer to. S/U or letter grading.

**253. Tenth Muses of Chicana Theory. (4)** (Formerly numbered Chicana and Chicano Studies 253.) Seminar, three hours. Chicana lesbian feminist theory in its multiple and historical manifestations, beginning in 17th century with early proto-feminist work of Sor Juana Inés de la Cruz, Mexican nun/scholar/poet known world over as first feminist of Americas. Exploration of Sor Juana's feminist legacy in 20th-century Chicana lesbian and Chicana feminist theorists and scholars, such as Gloria Anzaldúa, Cherrie Moraga, Emma Pérez, Chela Sandoval, Norma Alarcón, and Alicia Arrizón. Discussion of foundational theoretical concepts such as Anzaldúa's foundational concepts of *mundo zurdo*, *nepantla*, *mestiza* consciousness, and *conocimiento*; Pérez's *sitio y lengua* and decolonial imaginary; Sandoval's methodology of oppressed, differential consciousness, and hermeneutics of love; and Arrizón's postcolonial queer *mestizaje*. How to apply several of these theories in decolonization of one revered cultural icon, *la Virgen de Guadalupe*. S/U or letter grading.

**254. Los Angeles: History, Space, and Culture. (4)** (Formerly numbered Chicana and Chicano Studies 254.) Seminar, three hours. Exploration of significance of Los Angeles as birthplace of Chicana/Chicano identity and historical development of Mexican American culture and community in Southern California. Historiography of Latino Los Angeles from Spanish conquest to present, with emphasis on labor, immigration, art culture, and politics. Survey of current literature on socioeconomic condition of Mexican Americans in Los Angeles and burgeoning culture and politics of Latino Los Angeles at outset of 21st century. S/U or letter grading.

**255. Mass Media Research Methods. (4)** (Formerly numbered Chicana and Chicano Studies 255.) Seminar, three hours. Limited to graduate students. Survey of range of qualitative and quantitative communication methods and findings regarding Chicana/Chicano and Latina/Latino topics for all media types in both English and Spanish. Critical evaluation of research findings across this expansive field and design of complex research problems. S/U or letter grading.

**C256. Understanding Whiteness in American History and Culture. (4)** (Formerly numbered Chicana and Chicano Studies C256.) Lecture, three hours; discussion, one hour (when scheduled). Designed for graduate students. History, construction, and representation of whiteness in American society. Readings and discussions trace evolution of white identity and explore its significance to historical construction of race class in American history. Concurrently scheduled with course CM182. Letter grading.

**M257. Chicana/o and Intersectional Marxisms. (4)** (Formerly numbered Chicana and Chicano Studies M257.) (Same as Public Policy M232.) Seminar, three hours. Examination of relationship between Marxism, intersectionality, and early-Chicana/o Marxist influenced intellectual thought. Focus on key debates and texts on connections between race, gender, sexuality, and capitalism. Review of key articles and books examining Chicana/o identity, labor, family, sexuality, and activism through Marxist theoretical framework. S/U or letter grading.

**258. Laughter, Political Humor, and Social Control. (4)** (Formerly numbered Chicana and Chicano Studies 258.) Seminar, three hours. Limited to graduate students. Investigation of power of political humor, one social practice that constructs discriminatory hierarchies in interpersonal settings and mass media. With goal of developing set of principled methods to investigate its manifestations, reading of outstanding humanistic contributions across history of its social function and power, development of classification of types and settings of political humor, and critical evaluation of recent social scientific models of its nature. S/U or letter grading.

**259. Critical Discourse Analytic Methods. (4)** (Formerly numbered Chicana and Chicano Studies 259.) Seminar, three hours. Limited to departmental graduate students. Two critical discourse analytic (CDA) methods taught to document language of public figures. Student teams employ one method (conceptual metaphor CDA or discourse historical approach) to analyze actual public official's own discourse surrounding one controversial issue. Empirical study of discourses that are based on independently developed research enterprises can be valuable tool for variety of graduate student research. S/U or letter grading.

**C274. Language Politics and Policies in U.S.: Comparative History. (4)** (Formerly numbered Chicana and Chicano Studies C274.) Lecture, four hours. Historical overview of national and institutional language policies, especially schooling, in U.S. as context to understanding social, legal, and political constraints on bilingualism. Definitions and development of language policy and planning, history of general and educational language policies in U.S., demographic profile of language diversity, and current language and educational policy issues in U.S. Comparisons with selected international cases. Concurrently scheduled with course C179. S/U or letter grading.

**C276. Health in Chicano/Latino Population. (4)** (Formerly numbered Chicana and Chicano Studies C276.) Lecture, four hours; discussion, one hour. Designed for graduate students. Examination of Chicano/Latino health status through life expectancy, causes of death, reportable diseases, services utilization, provider supply, and risk behaviors within demographic/immigration changes. Binational review of health effects in U.S. and Mexico. Concurrently scheduled with course CM106. Letter grading.

**C277. Latino Social Policy. (4)** (Formerly numbered Chicana and Chicano Studies C277.) Lecture, three hours; discussion, one hour (when scheduled). Examination of social welfare of Latinos (Chicanos, Puerto Ricans, and Cubans) in U.S. through assessment and critical analysis of social policy issues affecting them. Survey of social, economic, cultural, and political circumstances affecting ability of Latinos to access public benefits and human services. Concurrently scheduled with course CM177. Letter grading.

**M278. Immigration Policy and Activism. (4)** (Same as Public Policy M230.) Seminar, three hours. Highlighting roles of race, gender, sexuality, and citizenship

status, exploration of how immigrant rights activists organize for legalization and against detention, deportation, and border militarization. Letter grading.

**279. Globalization and Transnationalism. (4)** (Formerly numbered Chicana and Chicano Studies 279.) Seminar, three hours. Interdisciplinary seminar that integrates political-economical, historical-sociological, and anthropological-cultural perspectives to help students develop critical political-economical analysis of interplay between globalization (of flows of people, material goods, information, and political-cultural influences) and localized transnational dynamics that together are giving meaning and constructing new social identities and strategies for struggle throughout world. S/U or letter grading.

**280. Urban Social Inequality. (4)** (Formerly numbered Chicana and Chicano Studies 280.) Seminar, three hours. Examination of several key social and urban inequalities in U.S. Survey of three key contemporary issues of inequality primarily from sociology and urban planning/studies: income distribution (poverty), work and employment (labor), and neighborhoods (space/geography). Through wide range of methods, approaches, and theoretical frameworks examined, exposure to key research on inequality. S/U or letter grading.

**281. Central American Migration and Integration. (4)** (Formerly numbered Chicana and Chicano Studies 281.) Seminar, three hours. Through empirical research cycle and informed with relevant theoretical frameworks, students develop research questions based on migration and integration experiences of Central American immigrants in greater Los Angeles area. Students conduct qualitative research, analyze original data, and write final papers that contextualize findings within existing social scientific literature. S/U or letter grading.

**282. Chicana/Chicano Legal History. (4)** (Formerly numbered Chicana and Chicano Studies 282.) Seminar, three hours. Legal history of Chicanas/Chicanos in U.S. from mid-19th century to present, with emphasis on critical race theory. Examination of landmark legislation and key appellate decisions that have impacted Chicano/Latino community. Topics include critical race theory, Treaty of Guadalupe-Hidalgo, legal construction of Mexican American racial identity, historic educational segregation, contemporary educational issues, jury rights, Chicano movement, and undocumented immigration. S/U or letter grading.

**M289. Studies in Chicana/Chicano Literature. (4)** (Formerly numbered Chicana and Chicano Studies M289.) (Same as English M261.) Seminar, three hours. Intensive research and study of major themes, authors, and issues in Chicana/Chicano literature and culture. Examination of political, aesthetic, economic, and cultural context that emerges in Chicana/Chicano discourse; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

**291. Variable Topics Research Seminars: Chicana/o and Central American Studies. (4)** (Formerly numbered Chicana and Chicano Studies 291.) Seminar, three hours. Limited to graduate students. Research seminar organized around readings and engaged discussion of critical topic of interest in field. Exploration of issue, its theoretical implication for field, and practical implications for communities. Topics vary according to participating faculty members. Final research project required. May be repeated for credit with consent of director of graduate studies. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** (Formerly numbered Chicana and Chicano Studies 375.) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**495. Learner-Centered Teaching in Chicana/o and Central American Studies. (4)** (Formerly numbered Chicana and Chicano Studies 495.) Seminar, four hours. Designed for graduate students and required of all new department teaching apprentices. Interactive forum for discussing learner-centered teaching in Chi-

cana/Chicano studies. Exploration of diverse classroom strategies and pedagogical techniques specific to interdisciplinary field. Topics include preparing for discussion sections, promoting discussion among students, using class websites, office hours, grading, and campus resources. May be repeated once for credit. S/U grading.

**595. Research and Preparation for MA Thesis. (4 to 12)** (Formerly numbered Chicana and Chicano Studies 595.) Tutorial, to be arranged. Limited to departmental graduate students who have completed all MA coursework requirements. Research for and preparation of MA thesis under direction of thesis committee chair. May not be applied toward MA degree requirements. May be repeated for maximum of 12 units. S/U grading.

**596. Directed Individual Study or Research. (4 to 12)** (Formerly numbered Chicana and Chicano Studies 596.) Tutorial, to be arranged. Directed individual research and study in area related to Chicana/Chicano studies or subjects not offered as regular courses, arranged individually by student and instructor. May be repeated for maximum of 12 units. S/U or letter grading.

**597. Preparation for PhD Qualifying Examinations. (2 to 12)** (Formerly numbered Chicana and Chicano Studies 597.) Tutorial, to be arranged. Limited to departmental graduate students. Reading and preparation for PhD qualifying examinations. Mandatory and supplemental reading lists prepared by student advisory committees. May be repeated for maximum of 12 units. S/U grading.

**599. Research for PhD Dissertation. (4 to 12)** (Formerly numbered Chicana and Chicano Studies 599.) Tutorial, to be arranged. Limited to PhD students who have passed qualifying examinations. Research for and preparation of PhD dissertation under direction of dissertation committee chair. May not be applied toward PhD degree requirements. May be repeated for maximum of 8 units. S/U grading.

Eric M.V. Hoek, PhD  
Jennifer A. Jay, PhD  
Jiann-Wen Woody Ju, PhD, PE  
Dennis P. Lettenmaier, PhD, NAE  
Enrique A. López-Droguett, PhD  
Shaily Mahendra, PhD  
Steven A. Margulis, PhD

Ali Mosleh, PhD, NAE (*Evalyn Knight Professor of Engineering*)

Sriram Narasimhan, PhD

Gaurav N. Sant, PhD (*Pritzker Professor of Sustainability*)

Michael K. Stenstrom, PhD, PE

Jonathan P. Stewart, PhD, PE

Ertugrul Taciroglu, PhD

John W. Wallace, PhD

Jian Zhang, PhD

### Professors Emeriti

Stanley B. Dong, PhD, PE

Lewis P. Felton, PhD

Michael E. Fourny, PhD, PE

Richard L. Perrine, PhD

Moshe F. Rubinstein, PhD

Keith D. Stolzenbach, PhD, PE

Mladen Vucetic, PhD

William W.-G. Yeh, PhD, NAE (*Richard G. Newman AECOM Endowed Professor Emeritus of Civil Engineering*)

### Associate Professors

Mathieu Bauchy, PhD

Henry V. Burton, PhD, SE (*Presidential Endowed Professor of Structural Engineering*)

Timu W. Gallien, PhD

David Jassby, PhD

Jiaqi Ma, PhD

### Assistant Professors

Tierra S. Bills, PhD

Alvar Escrivá-Bou, PhD

Sanjay K. Mohanty, PhD

Regan F. Patterson, PhD

### Adjunct Professor

Thomas A. Sabol, PhD, SE

### Adjunct Associate Professors

Donald R. Kendall, PhD, PE

Issam Najm, PhD, PE

## Overview

The Department of Civil and Environmental Engineering programs at UCLA include civil engineering materials, earthquake engineering, environmental engineering, geotechnical engineering, hydrology and water resources engineering, structural engineering, and structural mechanics.

## Undergraduate Study

The undergraduate curriculum leads to a BS in Civil Engineering, a broad-based education in environmental engineering, geotechnical engineering, hydrology and water resources engineering, and structural engineering and mechanics. This program is an excellent foundation for entry into professional practice in civil engineering or for more advanced study. The department also offers the undergraduate Environmental Engineering minor.

## Graduate Study

At the graduate level, MS and PhD degree programs are offered in the areas of civil engineering materials, environmental engineering, geo-

technical engineering, hydrology and water resources engineering, and structures (including structural/earthquake engineering and structural mechanics). In these areas, research is being done on a variety of problems ranging from basic physics and mechanics problems to critical problems in earthquake engineering and in the development of new technologies for pollution control and water distribution and treatment.

## Undergraduate Major

### Civil Engineering BS

The civil engineering program is accredited by the Engineering Accreditation Commission of ABET.

### Capstone Major

The Civil Engineering major is a designated capstone major. In each of the major field design courses, students work individually and in groups to complete design projects. To do so, they draw on their prior coursework, research the needed materials and possible approaches to creating their device or system, and come up with creative solutions. This process enables them to integrate many of the principles they have learned previously and apply them to real systems. In completing their projects, students are also expected to demonstrate effective oral and written communication skills, as well as their ability to work productively with others as part of a team.

### Learning Outcomes

The Civil Engineering major has the following learning outcomes:

- Understanding of, and ability to apply, basic mathematical and scientific concepts that underlie the field
- Ability to contribute meaningfully to design projects
- Critical thinking skills, problem-solving abilities, and familiarity with computational procedures essential to the field
- Ability to work productively as a member of a team
- Effective oral and written communication skills

### Requirements

#### Preparation for the Major

*Required:* Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering 1, M20 (or Computer Science 31); Mathematics 31A, 31B, 32A, 32B, 33A, 33B (or Mechanical and Aerospace Engineering 82); Physics 1A, 1B, 1C, 4AL; one natural science course selected from Civil and Environmental Engineering 58XP, Earth, Planetary, and Space Sciences 3, 15, 16, 17, 20, Environment 12, Life Sciences 7A, Microbiology, Immunology, and Molecular Genetics 5, 6, or Neuroscience 10.

#### The Major

*Required:* Chemical Engineering 102A or Mechanical and Aerospace Engineering 105A,

Civil and Environmental Engineering 91 (or Mechanical and Aerospace Engineering 101), 102, 103, C104 (or Materials Science and Engineering 104), 108, 110 (or C111), 120, 135A, 150, 153, 190, Mechanical and Aerospace Engineering 103; three technical breadth courses (12 units) selected from an approved list available in the [Office of Academic and Student Affairs](#); and at least eight major field elective courses (32 units) from the lists below with at least two design courses, one of which must be a capstone design course and two of which must be laboratory courses. The laboratory courses must be taken from two distinct areas (both 120L and 129L may be taken to satisfy the two-laboratory requirement). Courses applied toward the required course requirement may not also be applied toward the major field elective requirement.

**Civil Engineering Materials:** Civil and Environmental Engineering C104, C105, C106, C111, C182; laboratory course: 108L.

**Environmental Engineering:** Civil and Environmental Engineering 154, 155, C159, C164, M165, M166; laboratory courses: 156A, 156B; capstone design courses: 157B, 157C.

**Geotechnical Engineering:** Civil and Environmental Engineering 125; laboratory courses: 120L, 129L; design courses: 121, 123 (capstone).

**Hydrology and Water Resources Engineering:** Civil and Environmental Engineering 157A, C158; laboratory course: 129L, 157L; design courses: 151, 152 (capstone).

**Structural Engineering and Mechanics:** Civil and Environmental Engineering 125, 130, 135B, M135C, C137, 142; laboratory courses: 108L, 135L, 140L; design courses: 141, 143, 144 (capstone), 147 (capstone), 148.

**Transportation Engineering:** Civil and Environmental Engineering 180, C181, C182, C185, C186.

**Additional Elective Options:** Courses selected from an approved list available in the [Office of Academic and Student Affairs](#).

For information on UC, school, and general education requirements, see the [Samueli school](#) section in College and Schools.

## Undergraduate Minor Environmental Engineering Minor

The Environmental Engineering minor is designed for students who wish to augment their major program of study with an exposure to engineering methods applied to key environmental problems facing modern society in developed and developing countries. The minor also offers students a brief experience and understanding of the roles that environmental engineering methods play in solving environmental problems.

### Admission

To enter the minor, students must be in good academic standing (2.0 grade-point average or

better) and file a petition in the [Office of Academic and Student Affairs](#), 6426 Boelter Hall.

### The Minor

*Required Lower-Division Course (4 units):* Mathematics 3C or 32A.

*Required Upper-Division Courses (24 units minimum):* Civil and Environmental Engineering 153 and five courses from Civil and Environmental Engineering 110, 150, 151, 152, 154, 155, 156A, 156B, 157A, 157B, 157C, 157L, C159, C164, M165, M166, Chemical Engineering 102A, Mechanical and Aerospace Engineering 103, 105A.

### Policies

Credit for Chemical Engineering 102A and Mechanical and Aerospace Engineering 105A is not allowed.

A minimum of 20 upper-division units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval; consult with the undergraduate counselors before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Major

### Civil Engineering MS, PhD

The Master of Science degree has the following areas of study: civil engineering materials, environmental engineering, geotechnical engineering, hydrology and water resources engineering, structural/earthquake engineering, structural mechanics, structures and civil engineering materials, transportation engineering.

The Doctor of Philosophy degree has the following major fields or subdisciplines: civil engineering materials, environmental engineering, geotechnical engineering, hydrology and water resources engineering, structural/earthquake engineering, structural mechanics, and transportation engineering.

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Civil and Environmental Engineering

### Lower-Division Courses

**1. Civil Engineering and Infrastructure. (2)** Lecture, two hours; outside study, four hours. Examples of infrastructure, its importance, and manner by which it is designed and constructed. Role of civil engineers in infrastructure development and preservation. P/NP grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**M20. Introduction to Computer Programming with MATLAB. (4)** (Same as Mechanical and Aerospace Engineering M20.) Lecture, two hours; discussion, two hours; laboratory, two hours; outside study, six hours. Requisite: Mathematics 33A. Fundamentals of computer programming taught in context of MATLAB computing environment. Basic data types and control structures. Input/output. Functions. Data visualization. MATLAB-based data structures. Development of efficient codes. Introduction to object-oriented programming. Examples and exercises from engineering, mathematics, and physical sciences. Letter grading.

**58XP. Climate Change, Water Quality, and Ecosystem Functioning. (5)** (Formerly numbered 58SL.) Lecture, four hours; service learning, two hours; outside study, nine hours. Science related to climate change, water quality, and ecosystem health. Topics include carbon and nutrient cycling, hydrologic cycle, ecosystem structure and services, biodiversity, basic aquatic chemistry, and impacts of climate change on ecosystem functioning and water quality. Participation in series of science education projects to elementary or middle school audience. Letter grading.

**91. Statics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Mathematics 31A, 31B, Physics 1A. Newtonian mechanics, vector representation, and resultant forces and moments. Free-body diagrams and equilibrium, internal loads and equilibrium in trusses, frames, and beams. Planar and nonplanar systems, distributed forces, determinate and indeterminate force systems, shear and moment diagrams, and axial force diagrams. Letter grading.

**97. Variable Topics in Civil and Environmental Engineering. (2 to 4)** Seminar, two hours. Current topics and research methods in civil and environmental engineering. May be repeated for credit. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**102. Dynamics of Particles and Bodies. (2)** Lecture, two hours; discussion, two hours; outside study, two hours. Requisites: course 91 or Mechanical and Aerospace Engineering 101, Physics 1B. Introduction to fundamentals of dynamics of single particles, system of particles, and rigid bodies. Topics include kinematics and kinetics of particles, work and energy, impulse and momentum, multiparticle systems, kinematics and kinetics of rigid bodies in two- and three-dimensional motions. Letter grading.

**103. Applied Numerical Computing and Modeling in Civil and Environmental Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course M20 (or Computer Science 31), Mathematics 33B or Mechanical and Aerospace Engineering 82 (either may be taken concurrently). Introduction to numerical computing with specific applications in civil and environmental engineering. Topics

include error and computer arithmetic, root finding, curve fitting, numerical integration and differentiation, solution of systems of linear and nonlinear equations, numerical solution of ordinary and partial differential equations. Letter grading.

**C104. Structure, Processing, and Properties of Civil Engineering Materials. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 91 or Mechanical and Aerospace Engineering 101, Chemistry 20A, 20B, Mathematics 31A, 31B, 32B, Physics 1A, 1B, 1C. Corequisite: course 108. Discussion of aspects of cement and concrete materials, including manufacture of cement and production of concrete. Aspects of cement composition and basic chemical reactions, microstructure, properties of plastic and hardened concrete, chemical admixtures, and quality control and acceptance testing. Development and testing of fundamentals for complete understanding of overall response of all civil engineering materials. By end of term, successful utilization of fundamental materials science concepts to understand, explain, analyze, and describe engineering performance of civil engineering materials. Concurrently scheduled with course C204. Letter grading.

**C105. Structure and Properties of Amorphous Civil Engineering Materials. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 91 or Mechanical and Aerospace Engineering 101, Chemistry 20A, 20B, Mathematics 31A, 31B, 32B, Physics 1A, 1B, 1C. Corequisite: course 108. Nature and properties of amorphous civil engineering materials in fields of infrastructure and technology. Special attention to composition-structure-properties relationships and design and selection with respect to targeted civil engineering applications. Concurrently scheduled with course C205. Letter grading.

**C106. Modeling and Simulation of Civil Engineering Materials. (4)** Lecture, four hours; outside study, eight hours. Requisites: Chemistry and Biochemistry 20A, 20B, Mathematics 31A, 31B, 32B, Physics 1A, 1B, 1C. Provides fundamental understanding of modeling and numerical simulations for civil engineering materials. Largely focused on practical examples and applications. By course end, students are expected to be able to independently run simulations at scale relevant to targeted problems. Concurrently scheduled with course C206. Letter grading.

**108. Introduction to Mechanics of Deformable Solids. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 91 or Mechanical and Aerospace Engineering 101, Mathematics 32B, Physics 1A. Review of equilibrium principles; forces and moments transmitted by slender members. Concepts of stress and strain. Stress-strain relations with focus on linear elasticity. Transformation of stress and strain. Deformations and stresses caused by tension, compression, bending, shear, and torsion of slender members. Structural applications to trusses, beams, shafts, and columns. Introduction to virtual work principle. Letter grading.

**108L. Experimental Structural Mechanics. (4)** Lecture, two hours; laboratory, six hours; outside study, four hours. Requisite or corequisite: course 108. Lectures and laboratory experiments in various structural mechanics testing of metals (steel, aluminum, brass), high-strength plastics, and concrete (cylinders, beams). Direct tension. Direct compression. Ultrasonic nondestructive evaluation. Elastic buckling of columns. Fracture mechanics testing and fracture toughness. Splitting tension and flexural tension. Elastic, plastic, and fracture behavior. ASTM and RILEM. Cyclic loading. Microstructures of concrete. Size effects. Letter grading.

**110. Introduction to Probability and Statistics for Engineers. (4)** Lecture, four hours; discussion, one hour (when scheduled); outside study, seven hours. Requisites: Mathematics 32A, 33A. Recommended: course M20. Introduction to fundamental concepts and applications of probability and statistics in civil engineering, with focus on how these concepts are used in experimental design and sampling, data analysis, risk and reliability analysis, and project design under uncertainty. Topics include basic probability concepts, random variables and analytical probability

distributions, functions of random variables, estimating parameters from observational data, regression, hypothesis testing, and Bayesian concepts. Letter grading.

**C111. Machine Learning and Artificial Intelligence for Civil Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course M20, Chemistry 20A, 20B, Mathematics 31A, 31B, 32B, Physics 1A, 1B, 1C. Theoretical and practical introduction to artificial intelligence and machine learning for civil engineering problems. Focus on practice and problem-solving skills. By course end, students are expected to be able to independently run machine learning analysis. Concurrently scheduled with course C211. Letter grading.

**120. Principles of Soil Mechanics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 108. Soil as foundation for structures and as material of construction. Soil formation, classification, physical and mechanical properties, soil compaction, earth pressures, consolidation, and shear strength. Letter grading.

**120L. Soil Mechanics Laboratory. (4)** (Formerly numbered 128L.) Lecture, one hour; laboratory, six hours; outside study, five hours. Requisite or corequisite: course 120. Laboratory experiments to be performed by students to obtain soil parameters required for assigned design problems. Soil classification, grain size distribution, Atterberg limits, specific gravity, compaction, expansion index, consolidation, shear strength determination. Design problems, laboratory report writing. Letter grading.

**121. Design of Foundations and Earth Structures. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 120. Design methods for foundations and earth structures. Site investigation, including evaluation of soil properties for design. Design of footings and piles, including stability and settlement calculations. Design of slopes and earth retaining structures. Letter grading.

**123. Advanced Geotechnical Design. (4)** (Formerly numbered C123.) Lecture, two hours; discussion, two hours; active learning, two hours; outside study, six hours. Requisite: course 121. Slope stability analysis, including limit equilibrium procedures, finite element method, seepage analysis, and advanced topics such as rapid drawdown, construction of embankments on soft soil, and seismic slope stability. Lateral earth retention systems including gravity walls and excavation support systems. Capstone design project involving appropriate engineering standards and realistic constraints. Letter grading.

**125. Fundamentals of Earthquake Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 135A. Overview of engineering seismology, including plate tectonics, faults, wave propagation, and earthquake strong ground motion. Development and selection of design ground motions using both probabilistic seismic hazard analysis and code-based methods. Overview of seismic design regulation and California PE examination's seismic component. Code-based seismic design for new buildings using current International Building Code seismic code provisions. Overview of seismic design of bridges, dams, and other non-building structures. Letter grading.

**C128. Geohazards and Infrastructure Resilience. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. Geologic characterization of soil and rock units. Relationships developed between landforms, active, past, and ancient geologic processes, ground and surface water, and properties of soil and rock. Geohazards associated with climate change, wildfires, landslides, volcanism, and earthquakes. Effects of geologic processes on civil infrastructure and risk assessment procedures to promote resilience. Concurrently scheduled with course C228. Letter grading.

**129L. Engineering Geomatics. (4)** Lecture, two hours; laboratory, four hours; outside study, six hours. Collection, processing, and analysis of geospatial data. Ellipsoid and geoid models of shape of Earth. Sea level, height, and geopotential surfaces. Elements and usage of topographic data and maps. Advanced global positioning systems (GPS) for high-precision

mapping. Advanced laser-based light detection and ranging (LIDAR) mapping. Quantitative terrain analysis and change detection. Hydrogeomatics: seafloor mapping. Letter grading.

**130. Elementary Structural Mechanics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 108. Analysis of stress and strain, phenomenological material behavior, extension, bending, and transverse shear stresses in beams with general cross-sections, shear center, deflection of beams, torsion of beams, warping, column instability and failure. Letter grading.

**135A. Elementary Structural Analysis. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses M20 (or Computer Science 31), 108. Introduction to structural analysis; classification of structural elements; analysis of statically determinate trusses, beams, and frames; deflections in elementary structures; virtual work; analysis of indeterminate structures using force method; introduction to displacement method and energy concepts. Letter grading.

**135B. Intermediate Structural Analysis. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 135A. Analysis of truss and frame structures using matrix methods; matrix force methods; matrix displacement method; analysis concepts based on theorem of virtual work; moment distribution. Letter grading.

**M135C. Introduction to Finite Element Methods. (4)** (Same as Mechanical and Aerospace Engineering M168.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 130 or Mechanical and Aerospace Engineering 156A or 166A. Introduction to basic concepts of finite element methods (FEM) and applications to structural and solid mechanics and heat transfer. Direct matrix structural analysis; weighted residual, least squares, and Ritz approximation methods; shape functions; convergence properties; isoparametric formulation of multidimensional heat flow and elasticity; numerical integration. Practical use of FEM software; geometric and analytical modeling; preprocessing and postprocessing techniques; term projects with computers. Letter grading.

**135L. Structural Design and Testing Laboratory. (4)** Lecture, two hours; laboratory, five hours; outside study, five hours. Requisites: courses M20, 135A. Limited enrollment. Computer-aided optimum design, construction, instrumentation, and test of small-scale model structure. Use of computer-based data acquisition and interpretation systems for comparison of experimental and theoretically predicted behavior. Letter grading.

**C137. Elementary Structural Dynamics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 135B. Basic structural dynamics course for civil engineering students. Elastic free and forced vibrations of single degree of freedom systems, introduction to response history and response spectrum analysis approaches for single and multidegree of freedom systems. Axial, bending, and torsional vibration of beams. Concurrently scheduled with course C239. Letter grading.

**137L. Structural Dynamics Laboratory. (4)** Lecture, two hours; laboratory, six hours; outside study, four hours. Requisite or corequisite: course 137. Calibration of instrumentation for dynamic measurements. Determination of natural frequencies and damping factors from free vibrations. Determination of natural frequencies, mode shapes, and damping factors from forced vibrations. Dynamic similitude. Letter grading.

**140L. Structural Components and Systems Testing Laboratory. (4)** Lecture, two hours; laboratory, six hours; outside study, four hours. Enforced requisite: course 142. Comparison of experimental results with analytical results and code requirements to assess accuracies and limitations of calculation procedures used in structural design. Tests include quasi-static tests of structural elements (beams, columns) and systems (slab-column, beam-column) and dynamic tests of simple building systems. Quasi-static tests focus on assessment of element or subsystem stiffness, strength, and deformation capacity, whereas dynamic tests focus on assessment of periods, mode

shapes, and damping. Development of communication skills through preparation of laboratory reports and oral presentations. Letter grading.

**141. Steel Structures. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 135A. Introduction to building codes. Fundamentals of load and resistance factor design of steel elements. Design of tension and compression members. Design of beams and beam columns. Simple connection design. Introduction to computer modeling methods and design process. Letter grading.

**142. Design of Reinforced Concrete Structures. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 135A. Beams, columns, and slabs in reinforced concrete structures. Properties of reinforced concrete materials. Design of beams and slabs for flexure, shear, anchorage of reinforcement, and deflection. Design of columns for axial force, bending, and shear. Ultimate strength design methods. Letter grading.

**142L. Reinforced Concrete Structural Laboratory. (4)** Lecture, two hours; laboratory, six hours; outside study, four hours. Requisites: courses 135B, 142. Limited enrollment. Design considerations used for reinforced concrete beams, columns, slabs, and joints evaluated using analysis and experiments. Links between theory, building codes, and experimental results. Students demonstrate accuracies and limitations of calculation procedures used in design of reinforced concrete structures. Development of skills for written and oral presentations. Letter grading.

**143. Design of Prestressed Concrete Structures. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 135A, 142. Equivalent loads and allowable flexural stresses in determinate and indeterminate systems. Flexural and shear strength design, including secondary effects in indeterminate systems. Design of indeterminate post-tensioned beam using both hand calculations and commercially available computer program. Discussion of external post-tensioning, one- and two-way slab systems. Letter grading.

**144. Structural Systems Design. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 141 or 142, and 190. Design course for civil engineering students, with focus on design and performance of complete building structural systems. International Building Code (IBC) and ASCE 7 dead, live, wind, and earthquake loads. Design of reinforced concrete and structural steel buildings. Computer modeling, analysis, and performance assessment of buildings. Letter grading.

**147. Design and Construction of Tall Buildings. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 135B, 141, 190. Role of structural engineer, architect, and other design professions in design process. Development of architectural design of tall buildings. Influence of building code, zoning, and finance. Advantages and limitations of different structural systems. Development of structural system design and computer model for architectural design. Letter grading.

**148. Wood and Timber Design. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisites: courses 108, 135A. Properties and behavior of wood and wood products, analysis and design of wood and timber structural members subjected to flexural, shear, and axial stresses; connections, fasteners, and detailing; and light-framed wood shear walls and diaphragms. Letter grading.

**150. Introduction to Hydrology. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course M20 (or Computer Science 31), Mechanical and Aerospace Engineering 103. Study of hydrologic cycle and relevant atmospheric processes, water and energy balance, radiation, precipitation formation, infiltration, evaporation, vegetation transpiration, groundwater flow, storm runoff, and flood processes. Letter grading.

**151. Introduction to Water Resources Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 150, Mechanical and Aerospace Engineering 103. Recommended: courses 103, 110. Principles of hydraulics,

flow of water in open channels and pressure conduits, reservoirs and dams, hydraulic machinery, hydroelectric power. Introduction to system analysis and design applied to water resources engineering. Letter grading.

**152. Hydraulic and Hydrologic Design. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses 150, 151, 190. Analysis and design of hydraulic and hydrologic systems, including stormwater management systems, potable and recycled water distribution systems, wastewater collection systems, and constructed wetlands. Emphasis on practical design components, including reading/interpreting professional drawings and documents, environmental impact reports, permitting, agency coordination, and engineering ethics. Project-based course includes analysis of alternative designs, use of engineering economics, and preparation of written engineering reports. Letter grading.

**153. Introduction to Environmental Engineering Science. (4)** Lecture, four hours; discussion, one hour (when scheduled); outside study, seven hours. Recommended requisite: Mechanical and Aerospace Engineering 103. Water, air, and soil pollution: sources, transformations, effects, and processes for removal of contaminants. Water quality, water and wastewater treatment, waste disposal, air pollution, global environmental problems. Field trip. Letter grading.

**154. Chemical Fate and Transport in Aquatic Environments. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisite: course 153. Fundamental physical, chemical, and biological principles governing movement and fate of chemicals in surface waters and groundwater. Topics include physical transport in various aquatic environments, air-water exchange, acid-base equilibria, oxidation-reduction chemistry, chemical sorption, biodegradation, and bioaccumulation. Practical quantitative problems solved considering both reaction and transport of chemicals in environment. Letter grading.

**155. Unit Operations and Processes for Water and Wastewater Treatment. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 153. Biological, chemical, and physical methods used to modify water quality. Fundamentals of phenomena governing design of engineered systems for water and wastewater treatment systems. Field trip. Letter grading.

**156A. Environmental Chemistry Laboratory. (4)** Lecture, four hours; laboratory, four hours; outside study, four hours. Requisites: course 153 (may be taken concurrently), Chemistry 20A, 20B. Basic laboratory techniques in analytical chemistry related to water and wastewater analysis. Selected experiments include gravimetric analysis, titrimetry spectrophotometry, redox systems, pH and electrical conductivity. Concepts to be applied to analysis of real water samples in course 156B. Letter grading.

**156B. Environmental Engineering Unit Operations and Processes Laboratory. (4)** Lecture, two hours; laboratory, six hours; outside study, four hours. Requisites: Chemistry 20A, 20B. Characterization and analysis of typical natural waters and wastewaters for inorganic and organic constituents. Selected experiments include analysis of solids, nitrogen species, oxygen demand, and chlorine residual, that are used in unit operation experiments that include reactor dynamics, aeration, gas stripping, coagulation/flocculation, and membrane separation. Letter grading.

**157A. Hydrologic Modeling. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 150 or 151. Introduction to hydrologic modeling. Topics selected from areas of (1) open-channel flow, including one-dimensional steady flow and unsteady flow, (2) pipe flow and water distribution systems, (3) rainfall-runoff modeling, and (4) groundwater flow and contaminant transport modeling, with focus on use of industry and/or research standard models with locally relevant applications. Letter grading.

**157B. Design of Water Treatment Plants. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 155, 190. Water quality standards and regulations, overview of water treat-

ment plants, design of unit operations, predesign of water treatment plants, hydraulics of plants, process control, and cost estimation. Letter grading.

**157C. Design of Wastewater Treatment Plants. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 155, 190. Process design of wastewater treatment plants, including primary and secondary treatment, detailed design review of existing plants, process control, and economics. Letter grading.

**157L. Hydrologic Analysis. (4)** Lecture, two hours; laboratory, five hours; outside study, five hours. Requisite: course 150. Collection, compilation, and interpretation of data for quantification of components of hydrologic cycle, including precipitation, evaporation, infiltration, and runoff. Use of hydrologic variables and parameters for development, construction, and application of analytical models for selected problems in hydrology and water resources. Letter grading.

**C158. Coastal Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 151 and Mechanical and Aerospace Engineering 103. Covers coastal water levels (tides, climate variability, storms, sea level rise, resonance), surface gravity waves (characteristics, transformation, spectra), coastal processes (overtopping, erosion, flooding), coastal protection (walls, nourishment, dunes, berms, nature-based infrastructure), coastal modeling. Concurrently scheduled with course C258. Letter grading.

**C159. Green Infrastructure. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 150, 153. Overview of fundamental science, engineering, and ecological principles to designing green infrastructure for stormwater management. Students design green infrastructure based on current practices, perform engineering calculations to calculate its performance, and develop critical thinking skills needed to design innovative or futuristic green infrastructures that would not only mitigate adverse impact of climate change, but also remain resilient under extreme weather conditions expected during climate change. Concurrently scheduled with course C259. Letter grading.

**C164. Sustainable Waste Management. (4)** (Formerly numbered 164.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 153. Introduction to environmental engineering. Management of solid wastes, some of which are hazardous, is integral part of infrastructure development, and it is required to achieve environmental sustainability. Study of all aspects of hazardous and municipal solid waste management technologies with particular emphasis on reuse of some wastes for alternative applications or energy production. Students are expected to integrate economic, environmental, regulatory, policy, and technical considerations into development of engineering designs of sustainable waste management. Student teams design sustainable remediation or waste management plans. Concurrently scheduled with course C264. Letter grading.

**M165. Environmental Nanotechnology: Implications and Applications. (4)** (Same as Engineering M103.) Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisite: Engineering M101. Introduction to potential implications of nanotechnology to environmental systems as well as potential application of nanotechnology to environmental protection. Technical contents include three multidisciplinary areas: (1) physical, chemical, and biological properties of nanomaterials, (2) transport, reactivity, and toxicity of nanoscale materials in natural environmental systems, and (3) use of nanotechnology for energy and water production, plus environmental protection, monitoring, and remediation. Letter grading.

**M166. Environmental Microbiology. (4)** (Same as Environmental Health Sciences M166.) Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisite: course 153. Microbial cell and its metabolic capabilities, microbial genetics and its potentials, growth of microbes and kinetics of growth, microbial ecology and diversity, microbiology of wastewater treatment, probing of microbes, public health microbiology, pathogen control. Letter grading.

**M166L. Environmental Microbiology Laboratory. (2)** (Same as Environmental Health Sciences M166L.) Lecture, one hour; laboratory, two hours; outside study, two hours. Requisite: course M166 (may be taken concurrently). General laboratory practice within environmental microbiology, sampling of environmental samples, classical and modern molecular techniques for enumeration of microbes from environmental samples, techniques for determination of microbial activity in environmental samples, laboratory setups for studying environmental biotechnology. Letter grading.

**170. Introduction to Construction Management. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Introduction to construction engineering theory, management, and techniques. Implementation of exercises from academic texts and real project case studies. Discussion of building systems, building components, project delivery methods, document control, critical path method scheduling, labor management, quality management, estimating, sustainability, and cost controls. Letter grading.

**180. Introduction to Transportation Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Designed for juniors/senior Civil Engineering students and Public Affairs graduate students. General characteristics of transportation systems, including streets and highways, rail, transit, air, and water. Capacity considerations, including planning, design, and operations. Components of roadway design, including horizontal and vertical alignment, cross sections, and pavements. Letter grading.

**C181. Traffic Engineering Systems: Operations and Control. (4)** (Formerly numbered 181.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 180. Traffic operations including traffic data collection and analysis, safety and crash studies, traffic flow theory, highway capacity analysis, signalized intersection design and analysis, and simulation modeling. Students gain understanding of basic traffic flow theory, learn to conduct traffic data collection and analysis, and to apply capacity analysis methods and simulation modeling for both highway and signalized intersections. Concurrently scheduled with course C281. Letter grading.

**C182. Rigid and Flexible Pavements: Design, Materials, and Serviceability. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisites: courses C104, 108, 120, Materials Science 104. Correlation, analysis, and metrication of aspects of pavement design, including materials selection and traffic loading and volume. Special attention to aspects of pavement distress/serviceability and factoring of these into metrics of pavement performance. Discussion of potential choices of pavement materials (i.e., asphalt and concrete) and their specific strengths and weaknesses in paving applications. Unification and correlation of different variables that influence pavement performance and highlight their relevance in pavement design. Concurrently scheduled with course C282. Letter grading.

**C185. Transportation Systems Analysis. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 180. Transportation researchers and practitioners are motivated by desire to explain spatial interactions that resulted in movement of people or goods from place to place. Such interactions become more intricate as new technologies emerge. To explore and perceive these intricate interactions, understanding of essential nature of transportation systems to analyze and optimally design such systems is needed more than ever. Introduction to fundamental concepts, methods, and principles underlying transportation systems analysis. Includes two modules, each of which focuses on one level of system analysis: traveler behavior and network. Concurrently scheduled with course C285. Letter grading.

**C186. Intelligent Transportation Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 180. Introduction to basic elements of intelligent transportation systems (ITS), focusing on technological, systems, and institutional aspects. Topics include systems engineering processes, advanced traveler information systems, transportation network operations, commercial vehicle operations

and intermodal freight, public transportation applications, ITS and regional strategic transportation planning, travel demand management, electronic toll collection, and road-pricing, connected and automated vehicles (CAV), data access and exchanges, cybersecurity for ITS, and other smart mobility technologies. Concurrently scheduled with course C286. Letter grading.

**188. Special Courses in Civil and Environmental Engineering. (4)** Lecture, to be arranged; discussion, to be arranged (when scheduled); outside study, to be arranged. Special topics in civil engineering for undergraduate students taught on experimental or temporary basis, such as those taught by resident and visiting faculty members. May be repeated for credit with topic or instructor change. Letter grading.

**190. Professional Practice. (2)** Lecture, two hours; discussion; one hour; outside study, three hours. Requisite: one course from 121, 141, 142, 151, 155 (may be taken concurrently). Sustainability in design (e.g., LEED certification for building projects), professional licensure (PE, SE, and GE), project management (proposals, scheduling, and budgeting), business, public policy, leadership, ethics, earthquake loads, wind loads, load combinations, and environmental impact reports. Letter grading.

**194. Research Group Seminars: Civil and Environmental Engineering. (2 to 8)** Seminar, two to eight hours; outside study, four to 16 hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field or of research of faculty members or students. May be repeated for credit. Letter grading.

**199. Directed Research in Civil and Environmental Engineering. (2 to 8)** Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit with school approval. Individual contract required; enrollment petitions available in Office of Academic and Student Affairs. Letter grading.

## Graduate Courses

**200. Civil and Environmental Engineering Graduate Seminar. (2)** Seminar, four hours; outside study, two hours. Various topics in civil and environmental engineering that may include earthquake engineering, environmental engineering, geotechnical engineering, hydrology and water resources engineering, materials engineering, structural engineering, and structural mechanics. May be repeated for credit. S/U grading.

**C204. Structure, Processing, and Properties of Civil Engineering Materials. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Discussion of aspects of cement and concrete materials, including manufacture of cement and production of concrete. Aspects of cement composition and basic chemical reactions, microstructure, properties of plastic and hardened concrete, chemical admixtures, and quality control and acceptance testing. Development and testing of fundamentals for complete understanding of overall response of all civil engineering materials. By end of term, successful utilization of fundamental materials science concepts to understand, explain, analyze, and describe engineering performance of civil engineering materials. Concurrently scheduled with course C104. Letter grading.

**C205. Structure and Properties of Amorphous Civil Engineering Materials. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 91 or Mechanical and Aerospace Engineering 101, Chemistry 20A, 20B, Mathematics 31A, 31B, 32B, Physics 1A, 1B, 1C. Corequisite: course 108. Nature and properties of amorphous civil engineering materials in fields of infrastructure and technology. Special attention to composition-structure-properties relationships and design and selection with respect to targeted civil engineering applications. Concurrently scheduled with course C105. Letter grading.

**C206. Modeling and Simulation of Civil Engineering Materials. (4)** (Formerly numbered 206.) Lecture, four hours; outside study, eight hours. Requisites: Chemistry and Biochemistry 20A, 20B, Mathematics 31A,

31B, 32B, Physics 1A, 1B, 1C. Provides fundamental understanding of modeling and numerical simulations for civil engineering materials. Largely focused on practical examples and applications. By course end, students are expected to be able to independently run simulations at scale relevant to targeted problems. Concurrently scheduled with course C106. Letter grading.

**C211. Machine Learning and Artificial Intelligence for Civil Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Theoretical and practical introduction to artificial intelligence and machine learning for civil engineering problems. Focus on practice and problem-solving skills. By course end, students are expected to be able to independently run machine learning analysis. Concurrently scheduled with course C111. Letter grading.

**220. Advanced Soil Mechanics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. State of stress. Consolidation and settlement analysis. Shear strength of granular and cohesive soils. In situ and laboratory methods for soil property evaluation. Letter grading.

**221. Advanced Foundation Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 121, 220. Stress distribution. Bearing capacity and settlement of shallow foundations, including spread footings and mats. Performance of driven pile and drilled shaft foundations under vertical and lateral loading. Construction considerations. Letter grading.

**222. Introduction to Soil Dynamics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. Review of engineering problems involving soil dynamics. Fundamentals of theoretical soil dynamics: response of sliding block-on-plane to cyclic earthquake loads, application of theories of single degree-of-freedom (DOF) system, multiple DOF system and one-dimensional wave propagation. Fundamentals of cyclic soil behavior: stress-strain-pore water pressure behavior, shear moduli and damping, cyclic settlement and concept of volumetric cyclic threshold shear strain. Introduction to modeling of cyclic soil behavior. Letter grading.

**223. Advanced Geotechnical Design. (4)** (Formerly numbered C223.) Lecture, four hours; outside study, eight hours. Requisite: course 220. Slope stability analysis, including limit equilibrium procedures, finite element method, seepage analysis, and advanced topics such as rapid drawdown, construction of embankments on soft soil, and seismic slope stability. Lateral earth retention systems including gravity walls and excavation support systems. Advanced analysis methods and design project involving real landslide problem. Emphasis on preparation of professional engineering documents such as proposals, work acknowledgements, figures, plans, and reports. Letter grading.

**224. Advanced Cyclic and Monotonic Soil Behavior. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. In-depth study of soil behavior under cyclic and monotonic loads. Relationships between stress, strain, pore water pressure, and volume change in range of very small and large strains. Concept of normalized static and cyclic soil behavior. Cyclic degradation and liquefaction of saturated soils. Cyclic settlement of partially saturated and dry soils. Concept of volumetric cyclic threshold shear strain. Factors affecting shear moduli and damping during cyclic loading. Postcyclic behavior under monotonic loads. Critical review of laboratory, field, and modeling testing techniques. Letter grading.

**225. Geotechnical Earthquake Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 220, 245 (may be taken concurrently). Analysis of earthquake-induced ground failure, including soil liquefaction, cyclic softening of clays, seismic compression, surface fault rupture, and seismic slope stability. Ground response effects on earthquake ground motions. Soil-structure interaction, including inertial and kinematic interaction and foundation deformations under seismic loading. Letter grading.

**226. Geoenvironmental Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. Field of geoenvironmental engineering involves application of geotechnical principles to environmental problems. Topics include environmental regulations, waste characterization, geosynthetics, solid waste landfills, subsurface barrier walls, and disposal of high water content materials. Letter grading.

**227. Numerical Methods in Geotechnical Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 220. Introduction to basic concepts of computer modeling of soils using finite element method, and to constitutive modeling based on elasticity and plasticity theories. Special emphasis on numerical applications and identification of modeling concerns such as instability, bifurcation, nonexistence, and nonuniqueness of solutions. Letter grading.

**C228. Geohazards and Infrastructure Resilience. (4)** (Formerly numbered 228.) Lecture, four hours; outside study, eight hours. Requisite: course 120. Geologic characterization of soil and rock units. Relationships developed between landforms, active, past, and ancient geologic processes, ground and surface water, and properties of soil and rock. Geohazards associated with climate change, wildfires, landslides, volcanism, and earthquakes. Effects of geologic processes on civil infrastructure and risk assessment procedures to promote resilience. Concurrently scheduled with course C128. Letter grading.

**M230A. Linear Elasticity. (4)** (Same as Mechanical and Aerospace Engineering M256A.) Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 156A or 166A. Linear elastostatics. Cartesian tensors; infinitesimal strain tensor; Cauchy stress tensor; strain energy; equilibrium equations; linear constitutive relations; plane elastostatic problems, holes, corners, inclusions, cracks; three-dimensional problems of Kelvin, Boussinesq, and Cerruti. Introduction to boundary integral equation method. Letter grading.

**M230B. Nonlinear Elasticity. (4)** (Same as Mechanical and Aerospace Engineering M256B.) Lecture, four hours; outside study, eight hours. Requisite: course M230A. Kinematics of deformation, material and spatial coordinates, deformation gradient tensor, nonlinear and linear strain tensors, strain displacement relations; balance laws, Cauchy and Piola stresses, Cauchy equations of motion, balance of energy, stored energy; constitutive relations, elasticity, hyperelasticity, thermoelasticity; linearization of field equations; solution of selected problems. Letter grading.

**M230C. Plasticity. (4)** (Same as Mechanical and Aerospace Engineering M256C.) Lecture, four hours; outside study, eight hours. Requisites: courses M230A, M230B. Classical rate-independent plasticity theory, yield functions, flow rules and thermodynamics. Classical rate-dependent viscoplasticity, Perzyna and Duvant/Lions types of viscoplasticity. Thermoplasticity and creep. Return mapping algorithms for plasticity and viscoplasticity. Finite element implementations. Letter grading.

**232. Theory of Plates and Shells. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 130. Small and large deformation theories of thin plates; energy methods; free vibrations; membrane theory of shells; axisymmetric deformations of cylindrical and spherical shells, including bending. Letter grading.

**233. Mechanics of Composite Material Structures. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses M230B, 232. Elastic, anisotropic stress-strain-temperature relations. Analysis of prismatic beams by three-dimensional elasticity. Analysis of laminated anisotropic plates and shells based on classical and first-order shear deformation theories. Elastodynamic behavior of laminated plates and cylinders. Letter grading.

**235A. Advanced Structural Analysis. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 135A. Recommended: course 135B. Review of matrix force and displacement methods of structural analysis; virtual work theorem, virtual forces, and displacements; theorems on stationary value of total and complementary potential energy, minimum

total potential energy, Maxwell/Betti theorems, effects of approximations, introduction to finite element analysis. Letter grading.

**235B. Finite Element Analysis of Structures. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 130, 235A. Direct energy formulations for deformable systems; solution methods for linear equations; analysis of structural systems with one-dimensional elements; introduction to variational calculus; discrete element displacement, force, and mixed methods for membrane, plate, shell structures; instability effects. Letter grading.

**235C. Nonlinear Structural Analysis. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 235B. Classification of nonlinear effects; material nonlinearities; conservative, nonconservative material behavior; geometric nonlinearities, Lagrangian, Eulerian description of motion; finite element methods in geometrically nonlinear problems; postbuckling behavior of structures; solution of nonlinear equations; incremental, iterative, programming methods. Letter grading.

**236. Stability of Structures I. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 130 or 135B. Elastic buckling of bars. Different approaches to stability problems. Inelastic buckling of columns and beam columns. Columns and beam columns with linear, nonlinear creep. Combined torsional and flexural buckling of columns. Buckling of plates. Letter grading.

**M237A. Dynamics of Structures. (4)** (Same as Mechanical and Aerospace Engineering M269A.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: courses 135A, C137, or equivalent. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Transient and steady-state response. Emphasis on derivation and solution of governing equations using matrix formulation. Letter grading.

**238. Computational Solid Mechanics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 235B. Advanced finite element and meshfree methods for computational solid mechanics. Stability and consistency in temporal discretization of parabolic and hyperbolic systems. Analysis of numerical dissipation and dispersion. Multifield variational principles for constrained problems. Meshfree methods: approximation theories, Galerkin meshfree methods, collocation meshfree methods, imposition of boundary conditions, domain integration, stability. Letter grading.

**C239. Elementary Structural Dynamics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisite: course 135B. Basic structural dynamics course for civil engineering students. Elastic free and forced vibrations of single degree of freedom systems, introduction to response history and response spectrum analysis approaches for single and multidegree of freedom systems. Axial, bending, and torsional vibration of beams. Concurrently scheduled with course C137. Letter grading.

**241. Advanced Steel Structures. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses C137, 141, 235A. Performance characterization of steel structures for static and earthquake loads. Behavior state analysis and building code provisions for special moment resisting, braced, and eccentric braced frames. Composite steel-concrete structures. Letter grading.

**243A. Behavior and Design of Reinforced Concrete Structural Elements. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 142. Advanced topics on design of reinforced concrete structures, including stress-strain relationships for plain and confined concrete, moment-curvature analysis of sections, and design for shear. Design of slender and low-rise walls, as well as design of beam-column joints. Introduction to displacement-based design and applications of strut-and-tie models. Letter grading.

**243B. Response and Design of Reinforced Concrete Structural Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 243A, 246. Information on response and behavior of reinforced concrete buildings to earthquake ground motions. Topics include use of elastic and inelastic response spectra, role of strength, stiffness, and ductility in design, use of prescriptive versus performance-based design methodologies, and application of elastic and inelastic analysis techniques for new and existing construction. Letter grading.

**244. Structural Reliability. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Introduction to concepts and applications of structural reliability. Topics include computing first- and second-order estimates of failure probabilities of engineered systems, computing sensitivities of failure probabilities to assumed parameter values, measuring relative importance of random variables associated with systems, identifying relative advantages and disadvantages of various analytical reliability methods, using reliability tools to calibrate simplified building codes, and performing reliability calculations related to performance-based engineering. Letter grading.

**245. Earthquake Ground Motion Characterization. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Corequisite: course C137 or 246. Earthquake fundamentals, including plate tectonics, fault types, seismic waves, and magnitude scales. Characterization of earthquake source, including magnitude range and rate of future earthquakes. Ground motion prediction equations and site effects on ground motion. Seismic hazard analysis. Ground motion selection and modification for response history analysis. Letter grading.

**246. Structural Response to Ground Motions. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses C137, 141, 142, 235A. Spectral analysis of ground motions: response, time, and Fourier spectra. Response of structures to ground motions due to earthquakes. Computational methods to evaluate structural response. Response analysis, including evaluation of contemporary design standards. Limitations due to idealizations. Letter grading.

**247. Earthquake Hazard Mitigation. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 130, and M237A or 246. Concept of seismic isolation, linear theory of base isolation, visco-elastic and hysteretic behavior, elastomeric bearings under compression and bending, buckling of bearings, sliding bearings, passive energy dissipation devices, response of structures with isolation and passive energy dissipation devices, static and dynamic analysis procedures, code provisions and design methods for seismically isolated structures. Letter grading.

**250A. Surface Water Hydrology. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 150. In-depth study of surface water hydrology, including discussion and interrelationship of major topics such as rainfall and evaporation, soils and infiltration properties, runoff and snowmelt processes. Introduction to rainfall-runoff modeling, floods, and policy issues involved in water resource engineering and management. Letter grading.

**250B. Groundwater Hydrology. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 150. Theory of movement and occurrence of water in subterranean aquifers. Steady flow in confined and unconfined aquifers. Mechanics of wells; steady and unsteady radial flows in confined and unconfined aquifers. Theory of leaky aquifers. Parameter estimation. Seawater intrusion. Numerical methods. Applications. Letter grading.

**250C. Hydrometeorology. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 250A. In-depth study of hydrometeorological processes. Role of hydrology in climate system, precipitation and evaporation processes, atmospheric radiation, exchange of mass, heat, and momentum between soil and vegetation surface and overlying atmosphere, flux and transport in turbulent boundary layer, basic remote sensing principles. Letter grading.

**250D. Water Resources Systems Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 151. Application of mathematical programming techniques to water resources systems. Topics include reservoir management and operation; optimal timing, sequencing and sizing of water resources projects; and multiobjective planning and conjunctive use of surface water and groundwater. Emphasis on management of water quantity. Letter grading.

**251A. Rainfall-Runoff Modeling. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 250A, 251B. Introduction to hydrologic modeling concepts, including rainfall-runoff analysis, input data, uncertainty analysis, lumped and distributed modeling, parameter estimation and sensitivity analysis, and application of models for flood forecasting and prediction of streamflows in water resource applications. Letter grading.

**251B. Contaminant Transport in Groundwater. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 250B, 253. Phenomena and mechanisms of hydrodynamic dispersion, governing equations of mass transport in porous media, various analytical and numerical solutions, determination of dispersion parameters by laboratory and field experiments, biological and reactive transport in multiphase flow, remediation design, software packages and applications. Letter grading.

**251C. Remote Sensing with Hydrologic Applications. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 250A, 250C. Introduction to basic physical concepts of remote sensing as they relate to surface and atmospheric hydrologic processes. Applications include radiative transfer modeling and retrieval of hydrologically relevant parameters like topography, soil moisture, snow properties, vegetation, and precipitation. Letter grading.

**251D. Hydrologic Data Assimilation. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 250A, 250C. Introduction to basic concepts of classical and Bayesian estimation theory for purposes of hydrologic data assimilation. Applications geared toward assimilating disparate observations into dynamic models of hydrologic systems. Letter grading.

**252. Engineering Economic Analysis of Water and Environmental Planning. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: Engineering 110, one or more courses from Economics 1, 2, 11, 101. Economic theory and applications in analysis and management of water and environmental problems; application of price theory to water resource management and renewable resources; benefit-cost analysis with applications to water resources and environmental planning. Letter grading.

**253. Mathematical Models for Water Quality Management. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 153. Development of mathematical models for simulating environmental engineering problems. Emphasis on numerical techniques to solve nonlinear partial differential equations and their application to environmental engineering problems. Letter grading.

**254A. Environmental Aquatic Inorganic Chemistry. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Chemistry 20B, Mathematics 31A, 31B, Physics 1A, 1B. Equilibrium and kinetic descriptions of chemical behavior of metals and inorganic ions in natural fresh/marine surface waters and in water treatment. Processes include acid-base chemistry and alkalinity (carbonate system), complexation, precipitation/dissolution, absorption/oxidation/reduction, and photochemistry. Letter grading.

**255A. Physical and Chemical Processes for Water and Wastewater Treatment. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 155, 254A. Review of momentum and mass transfer, chemical reaction engineering, coagulation and flocculation, granular filtrations, sedimentation, carbon adsorption, gas transfer, disinfection, oxidation, and membrane processes. Letter grading.

**255B. Biological Processes for Water and Wastewater Treatment. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 254A, 255A. Fundamentals of environmental engineering microbiology; kinetics of microbial growth and biological oxidation; applications for activated sludge, gas transfer, fixed-film processes, aerobic and anaerobic digestion, sludge disposal, and biological nutrient removal. Letter grading.

**C258. Coastal Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 151 and Mechanical and Aerospace Engineering 103. Covers coastal water levels (tides, climate variability, storms, sea level rise, resonance), surface gravity waves (characteristics, transformation, spectra), coastal processes (overtopping, erosion, flooding), coastal protection (walls, nourishment, dunes, berms, nature-based infrastructure), coastal modeling. Concurrently scheduled with course C158. Letter grading.

**258A. Membrane Separations in Aquatic Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 254A. Applications of membrane separations to desalination, water reclamation, brine disposal, and ultrapure water systems. Discussion of reverse osmosis, ultrafiltration, electrodialysis, and ion exchange technologies from both practical and theoretical standpoints. Letter grading.

**C259. Green Infrastructure. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 150, 153. Overview of fundamental science, engineering, and ecological principles to designing green infrastructure for stormwater management. Students design green infrastructure based on current practices, perform engineering calculations to calculate its performance, and develop critical thinking skills needed to design innovative or futuristic green infrastructures that would not only mitigate adverse impact of climate change, but also remain resilient under extreme weather conditions expected during climate change. Concurrently scheduled with course C159. Letter grading.

**260. Advanced Topics in Hydrology and Water Resources. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 250A, 250B, 250D. Current research topics in inverse problem of parameter estimation, experimental design, conjunctive use of surface and groundwater, multiobjective water resources planning, and optimization of water resource systems. Topics may vary from term to term. Letter grading.

**261. Colloidal Phenomena in Aquatic Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 254A, 255A. Colloidal interactions, colloidal stability, colloidal hydrodynamics, surface chemistry, adsorption of pollutants on colloidal surfaces, transport of colloids in porous media, coagulation, and particle deposition. Consideration of applications to colloidal processes in aquatic environments. Letter grading.

**261A. Advanced Water Treatment Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 255A. In-depth coverage of advanced water treatment processes, including advanced oxidation processes, photolysis, electrochemical treatment methods, and membrane separations. These advanced processes are increasingly necessary to adequately treat both drinking and wastewater. Study of process fundamentals and cutting-edge technologies in detail for thorough understanding of advantages and challenges associated with application of these processes. Letter grading.

**261B. Advanced Biological Processes for Water and Wastewater Treatment. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 255B. In-depth treatment of selected topics related to biological treatment of waters and wastewaters, such as biodegradation of xenobiotics, pharmaceuticals, emerging pollutants, toxicity, and nutrients. Discussion of theoretical aspects, experimental observations, and recent literature. Application to important and emerging environmental problems. Letter grading.

**M262A. Introduction to Atmospheric Chemistry. (4)** (Same as Atmospheric and Oceanic Sciences M203A.) Lecture, three hours. Requisite for undergraduates: Chemistry 20B. Principles of chemical ki-

netics, thermochemistry, spectroscopy, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere, upper atmosphere chemical processes; air pollution; chemistry and climate. S/U or letter grading.

**M262B. Atmospheric Diffusion and Air Pollution. (4)** (Same as Atmospheric and Oceanic Sciences M224B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution. S/U or letter grading.

**263A. Physics of Environmental Transport. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Transport processes in surface water, groundwater, and atmosphere. Emphasis on exchanges across phase boundaries: sediment/water interface; air/water gas exchange; particles, droplets, and bubbles; small-scale dispersion and mixing; effect of reactions on transport; linkages between physical, chemical, and biological processes. Letter grading.

**263B. Advanced Topics in Transport at Environmental Interfaces. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 263A. In-depth treatment of selected topics involving transport phenomena at environmental interfaces between solid, fluid, and gas phases, such as aquatic sediments, porous aggregates, and vegetative canopies. Discussion of theoretical models and experimental observations. Application to important environmental engineering problems. Letter grading.

**C264. Sustainable Waste Management. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Introduction to environmental engineering. Management of solid wastes, some of which are hazardous, is integral part of infrastructure development, and it is required to achieve environmental sustainability. Study of all aspects of hazardous and municipal solid waste management technologies with particular emphasis on reuse of some wastes for alternative applications or energy production. Students are expected to integrate economic, environmental, regulatory, policy, and technical considerations into development of engineering designs of sustainable waste management. Student teams design sustainable remediation or waste management plans. Concurrently scheduled with course C164. Letter grading.

**266. Environmental Biotechnology. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 153, 254A. Environmental biotechnology—concept and potential, biotechnology of pollutional control, bioremediation, biomass conversion: composting, biogas and bioethanol production. Letter grading.

**267. Environmental Applications of Geochemical Modeling. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 254A. Geochemical modeling is important tool for predicting environmental impacts of contamination. Hands-on experience in modeling using geochemical software packages commonly found in environmental consulting industry to gain better understanding of governing geochemical principles pertaining to movement and transformation of contaminants. Types of modeling include speciation, mineral solubility, surface complexation, reaction path, inverse mass balance, and reactive transport modeling. Case studies involve acid mine drainage, nuclear waste disposal, bioavailability and risk assessment, mine tailings and mining waste, deep well injection, landfill leachate, and microbial respiration. Research/modeling project required. Letter grading.

**C281. Traffic Engineering Systems: Operations and Control. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 180. Traffic operations including traffic data collection and analysis, safety and crash studies, traffic flow theory, highway capacity analysis, signalized intersection design and analysis, and simulation modeling. Students gain understanding of basic traffic flow theory, learn to conduct traffic data collection and analysis, and to apply capacity analysis methods and simulation mod-

eling for both highway and signalized intersections. Concurrently scheduled with course C181. Letter grading.

**C282. Rigid and Flexible Pavements: Design, Materials, and Serviceability. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Correlation, analysis, and metrication of aspects of pavement design, including materials selection and traffic loading and volume. Special attention to aspects of pavement distress/serviceability and factoring of these into metrics of pavement performance. Discussion of potential choices of pavement materials (i.e., asphalt and concrete) and their specific strengths and weaknesses in paving applications. Unification and correlation of different variables that influence pavement performance and highlight their relevance in pavement design. Concurrently scheduled with course C182. Letter grading.

**C285. Transportation Systems Analysis. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 180. Transportation researchers and practitioners are motivated by desire to explain spatial interactions that resulted in movement of people or goods from place to place. Such interactions become more intricate as new technologies emerge. To explore and perceive these intricate interactions, understanding of essential nature of transportation systems to analyze and optimally design such systems is needed more than ever. Introduction to fundamental concepts, methods, and principles underlying transportation systems analysis. Includes two modules, each of which focuses on one level of system analysis: traveler behavior and network. Concurrently scheduled with course C185. Letter grading.

**C286. Intelligent Transportation Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 180. Introduction to basic elements of intelligent transportation systems (ITS), focusing on technological, systems, and institutional aspects. Topics include systems engineering processes, advanced traveler information systems, transportation network operations, commercial vehicle operations and intermodal freight, public transportation applications, ITS and regional strategic transportation planning, travel demand management, electronic toll collection, and road-pricing, connected and automated vehicles (CAV), data access and exchanges, cybersecurity for ITS, and other smart mobility technologies. Concurrently scheduled with course C186. Letter grading.

**M287. Travel Behavior Analysis. (4)** (Same as Public Policy M221 and Urban Planning M253.) Lecture, three hours. Requisites: Public Policy 201 or M201A, and 203, or Urban Planning 207 and 220B. Descriptions of travel patterns in metropolitan areas, recent trends and projections into future, overview of travel forecasting methods, trip generation, trip distribution, mode split traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis. Letter grading.

**296. Advanced Topics in Civil Engineering. (2 to 4)** Seminar, to be arranged. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

**298. Seminar: Engineering. (2 to 4)** Seminar, to be arranged. Limited to graduate civil engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**495. Teaching Assistant Training Seminar. (2)** Seminar, two hours. Preparation: appointment as teaching assistant in Civil and Environmental Engineering Department. Seminar on communication of civil engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of visual aids; grading, advising, and rapport with students. S/U grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate civil engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for MS Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate civil engineering students. Reading and preparation for MS comprehensive examination. S/U grading.

**597B. Preparation for PhD Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate civil engineering students. S/U grading.

**597C. Preparation for PhD Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate civil engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of MS Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate civil engineering students. Supervised independent research for MS candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of PhD Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate civil engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

-----, *Chair*

## Faculty Roster

### Professors

David L. Blank, PhD  
David M. Goldstein, PhD  
Kathryn A. Morgan, PhD (*Joan Palevsky Professor of Classics*)  
Sarah P. Morris, PhD (*Steinmetz Professor of Classical Archaeology and Material Culture*)  
John K. Papadopoulos, PhD  
Alex C. Purves, PhD  
Giulia Sissa, PhD  
Gregory D. Woolf, PhD (*Ronald J. Mellor Professor of Ancient History*)

### Professors Emeriti

Sander M. Goldberg, PhD  
Robert A. Gurval, PhD  
Michael W. Haslam, PhD  
Steven Lattimore, PhD  
Jaen Puhvel, PhD  
Amy E. Richlin, PhD  
Brent H. Vine, PhD (*A. Richard Diebold, Jr., Endowed Professor Emeritus*)

### Associate Professors

Hannah Čulík-Baird, PhD  
Chris J. Johanson, PhD  
N. Bryant Kirkland, PhD  
Francesca K. Martelli, DPhil

### Assistant Professors

Sarah E. Beckmann, PhD

Ella H. Haselswerdt, PhD  
Lydia M. Spielberg, PhD  
Adriana M. Vazquez, PhD

### Lecturers

Samuel D. Beckelhymer, PhD  
Zachary P. Borst, PhD  
Richard M. Ellis, PhD

### Adjunct Associate Professor

Catherine Atherton, PhD

## Overview

The civilizations of ancient Greece and Rome are the focus of research and teaching in the Department of Classics. These areas of study are important in their own right and for their contributions to the political, cultural, intellectual, and artistic development of the Western world. To this end, the department offers a wide variety of interdisciplinary courses in classical civilization (multiple-listed in the departments of art history, philosophy, and political science), as well as elementary and advanced courses in ancient Greek and Latin language, literature, and linguistics. Classical civilization courses include such topics as Greek and Latin literature in translation (genres of epic, comedy, tragedy, biography), classical mythology, religion, law, gender and sexuality, politics, philosophy, art and archaeology, and the reception of the ancient world in modern cultures (cinema and classics).

## Undergraduate Study

Students considering a major in the department should consult with the adviser as soon as possible in their UCLA career, but in no case later than the point at which they are about to take upper-division courses.

Note: Students in the Greek, Latin, and Greek and Latin majors are permitted to take Greek 200A, 200B, 200C and Latin 200A, 200B, 200C with consent of the instructor.

## Graduate Study

Students can earn Master of Arts degrees in Classics (Greek and Latin), in Greek, or in Latin only after they have been admitted to the PhD program.

## Undergraduate Majors

### Classical Civilization BA

The civilizations of ancient Greece and Rome have made important contributions to the political, social, artistic, and intellectual development of the Western world. The purpose of the Classical Civilization major is to provide students with a formal and balanced introduction to the historical and cultural experiences of the ancient Greeks and Romans. The program of study is structured, yet not rigid. Lower-division survey courses and requirements in elementary language study, ancient history, and classical art establish an essential background of knowledge, while electives encourage individual and specialized interests. The program offers a

broad range of courses in the fields of language, literature, history, mythology, religion, philosophy, art, and archaeology. The major serves as excellent and rewarding preparation for a professional career in medicine, law, business, journalism, communications, or the arts.

## Capstone Major

The Classical Civilization major is a designated capstone major. Undergraduate students take a capstone seminar in which they use the skills and expertise acquired in earlier coursework to research, analyze, and complete a written paper or project. They identify and analyze ancient classical documents, material evidence, or other forms of primary sources and demonstrate their critical skills by engaging in presentations and weekly discourse with their peers.

## Learning Outcomes

The Classical Civilization major has the following learning outcomes:

- Demonstrated specific skills and expertise, including research, analysis, and writing
- Identification and analysis of appropriate ancient sources, material evidence, and other primary documents appropriate to the field
- Engagement with peers through presentation, discussion, and critique of student work
- Conception and execution of a project that identifies and engages with a specialized topic
- Working knowledge of scholarly discourse relative to a specialized topic

## Entry to the Major

### Transfer Students

Transfer applicants to the Classical Civilization major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one classical Greek culture course, one Roman civilization course, and one course in Greek or Roman literature in translation, classical mythology, or classical archaeology.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* Classics 10, 20, Greek 3 or 16 or Latin 3 or 16, and one course from 30, 40W, 41W, 42, 51A, 51B, 60, 88GE.

### The Major

*Required:* (1) Nine upper-division courses in the department (courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser)—no more than three may be selected from Greek 100 through 133 or Latin 100 through 133, and Classics 198A and 198B may be applied as only one course toward the major and (2) one capstone seminar (Classics 191).

## Honors Program

### Requirements

All honors students are required to take Classics 191 (or an equivalent undergraduate seminar) in their junior year before beginning work on the honors thesis. Students must then enroll in Classics 198A and 198B in consecutive terms, in which they write the thesis under the direct supervision of a faculty member. They may take courses 198A and 198B concurrently or be exempt from course 198A only with approval of the faculty undergraduate adviser. In course 198A students submit an annotated bibliography and preliminary outline of their thesis. In course 198B, they submit at least one initial draft and the final revised version of the thesis. Only course 198B may be applied toward the upper-division classical civilization requirement for departmental majors.

## Policies

### The Major

All other courses in the 190 series may be substituted only by petition.

## Honors Program

### Admission

The honors program is open to Classical Civilization majors with a cumulative grade-point average of 3.5 or better in departmental courses and an overall GPA of 3.25 or better. Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors.

### Requirements

To qualify for graduation with departmental honors, students must (1) have a cumulative grade-point average of 3.5 or better in departmental courses and an overall GPA of 3.25 or better and (2) complete Classics 198A and 198B with grades of A– or better.

To qualify for graduation with departmental highest honors, students must (1) have a cumulative GPA of 3.85 or better in departmental courses and an overall GPA of 3.65 or better and (2) complete Classics 198A and 198B with grades of A.

## Greek BA

### Capstone Major

The Greek major is a designated capstone major. Undergraduate students take a capstone seminar in which they use the skills and expertise acquired in earlier coursework to research, analyze, and complete a written paper or project. They identify and analyze ancient classical documents, material evidence, or other forms of primary sources and demonstrate their critical skills by engaging in presentations and weekly discourse with their peers.

## Learning Outcomes

The Greek major has the following learning outcomes:

- Demonstrated specific skills and expertise, including research, analysis, and writing
- Identification and analysis of appropriate ancient sources, material evidence, and other primary documents appropriate to the field
- Engagement with peers through presentation, discussion, and critique of student work
- Conception and execution of a project that identifies and engages with a specialized topic
- Working knowledge of scholarly discourse relative to a specialized topic

## Entry to the Major

### Transfer Students

Transfer applicants to the Greek major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of Greek and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* Classics 10, 20; Greek 1, 2, 3, 20, or equivalent. Greek 16 may be substituted for Greek 1, 2, 3.

### The Major

*Required:* (1) Seven upper-division Greek courses, including course 110; Greek 197 and 199 may be applied only by petition; (2) three upper-division courses in classical civilization and/or ancient history (History 112A through M112E, 113A, 113B, 114A, 114B, 114C, 115); (3) one capstone seminar (Classics 191).

## Honors Program

### Requirements

All honors students are required to take Classics 191 (or an equivalent undergraduate seminar) in their junior year before beginning work on the honors thesis. Students must then enroll in Classics 198A and 198B in consecutive terms, in which they write the thesis under the direct supervision of a faculty member. They may take courses 198A and 198B concurrently or be exempt from course 198A only with approval of the faculty undergraduate adviser. In course 198A students submit an annotated bibliography and preliminary outline of their thesis. In course 198B, they submit at least one initial draft and the final revised version of the thesis. Only course 198B may be applied toward the upper-division classical civilization requirement for departmental majors.

## Policies

### The Major

Courses in related fields not offered by the department may be substituted by petition and with approval of the faculty undergraduate adviser.

## Honors Program

### Admission

The honors program is open to Greek majors with a cumulative grade-point average of 3.5 or better in departmental courses and an overall GPA of 3.25 or better. Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors.

### Requirements

To qualify for graduation with departmental honors, students must (1) have a cumulative grade-point average of 3.5 or better in departmental courses and an overall GPA of 3.25 or better and (2) complete Classics 198A and 198B with grades of A– or better.

To qualify for graduation with departmental highest honors, students must (1) have a cumulative GPA of 3.85 or better in departmental courses and an overall GPA of 3.65 or better and (2) complete Classics 198A and 198B with grades of A.

## Greek and Latin BA

### Capstone Major

The Greek and Latin major is a designated capstone major. Undergraduate students take a capstone seminar in which they use the skills and expertise acquired in earlier coursework to research, analyze, and complete a written paper or project. They identify and analyze ancient classical documents, material evidence, or other forms of primary sources and demonstrate their critical skills by engaging in presentations and weekly discourse with their peers.

### Learning Outcomes

The Greek and Latin major has the following learning outcomes:

- Demonstrated specific skills and expertise, including research, analysis, and writing
- Identification and analysis of appropriate ancient sources, material evidence, and other primary documents appropriate to the field
- Engagement with peers through presentation, discussion, and critique of student work
- Conception and execution of a project that identifies and engages with a specialized topic
- Working knowledge of scholarly discourse relative to a specialized topic

### Entry to the Major

#### Transfer Students

Transfer applicants to the Greek and Latin major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of Greek and of Latin and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* Classics 10, 20; Greek 1, 2, 3, 20 and Latin 1, 2, 3, 20, or equivalent. Greek 16 may be substituted for Greek 1, 2, 3.

### The Major

*Required:* (1) Eight upper-division Greek and Latin courses (of which at least four must be in each language), including Greek 110 or Latin 110; Greek and/or Latin 197 and 199 may be applied only by petition; (2) three upper-division courses in classical civilization and/or ancient history (History 112A through M112E, 113A, 113B, 114A, 114B, 114C, 115); (3) one capstone seminar (Classics 191).

## Honors Program

### Requirements

All honors students are required to take Classics 191 (or an equivalent undergraduate seminar) in their junior year before beginning work on the honors thesis. Students must then enroll in Classics 198A and 198B in consecutive terms, in which they write the thesis under the direct supervision of a faculty member. They may take courses 198A and 198B concurrently or be exempt from course 198A only with approval of the faculty undergraduate adviser. In course 198A students submit an annotated bibliography and preliminary outline of their thesis. In course 198B, they submit at least one initial draft and the final revised version of the thesis. Only course 198B may be applied toward the upper-division classical civilization requirement for departmental majors.

## Policies

### The Major

Courses in related fields not offered by the department may be substituted by petition and with approval of the faculty undergraduate adviser.

## Honors Program

### Admission

The honors program is open to Greek and Latin majors with a cumulative grade-point average of 3.5 or better in departmental courses and an overall GPA of 3.25 or better. Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors.

### Requirements

To qualify for graduation with departmental honors, students must (1) have a cumulative grade-point average of 3.5 or better in departmental courses and an overall GPA of 3.25 or better and (2) complete Classics 198A and 198B with grades of A– or better.

To qualify for graduation with departmental highest honors, students must (1) have a cumulative GPA of 3.85 or better in departmental courses and an overall GPA of 3.65 or better and (2) complete Classics 198A and 198B with grades of A.

## Latin BA

### Capstone Major

The Latin major is a designated capstone major. Undergraduate students take a capstone seminar in which they use the skills and expertise acquired in earlier coursework to research, analyze, and complete a written paper or project. They identify and analyze ancient classical documents, material evidence, or other forms of primary sources and demonstrate their critical skills by engaging in presentations and weekly discourse with their peers.

### Learning Outcomes

The Latin major has the following learning outcomes:

- Demonstrated specific skills and expertise, including research, analysis, and writing
- Identification and analysis of appropriate ancient sources, material evidence, and other primary documents appropriate to the field
- Engagement with peers through presentation, discussion, and critique of student work
- Conception and execution of a project that identifies and engages with a specialized topic
- Working knowledge of scholarly discourse relative to a specialized topic

### Entry to the Major

#### Transfer Students

Transfer applicants to the Latin major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of Latin and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* Classics 10, 20; Latin 1, 2, 3, 20, or equivalent. Latin 16 may be substituted for Latin 1, 2, 3.

### The Major

*Required:* (1) Seven upper-division Latin courses, including course 110; Latin 197 and 199 may be applied only by petition; (2) three upper-division courses in classical civilization and/or ancient history (History 112A through M112E, 113A, 113B, 114A, 114B, 114C, 115); (3) one capstone seminar (Classics 191).

## Honors Program

### Requirements

All honors students are required to take Classics 191 (or an equivalent undergraduate seminar) in their junior year before beginning work on the honors thesis. Students must then enroll in Classics 198A and 198B in consecutive terms, in which they write the thesis under the direct supervision of a faculty member. They

may take courses 198A and 198B concurrently or be exempt from course 198A only with approval of the faculty undergraduate adviser. In course 198A students submit an annotated bibliography and preliminary outline of their thesis. In course 198B, they submit at least one initial draft and the final revised version of the thesis. Only course 198B may be applied toward the upper-division classical civilization requirement for departmental majors.

## Policies

### The Major

Courses in related fields not offered by the department may be substituted by petition and with approval of the faculty undergraduate adviser.

### Honors Program

#### Admission

The honors program is open to Latin majors with a cumulative grade-point average of 3.5 or better in departmental courses and an overall GPA of 3.25 or better. Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors.

#### Requirements

To qualify for graduation with departmental honors, students must (1) have a cumulative grade-point average of 3.5 or better in departmental courses and an overall GPA of 3.25 or better and (2) complete Classics 198A and 198B with grades of A- or better.

To qualify for graduation with departmental highest honors, students must (1) have a cumulative GPA of 3.85 or better in departmental courses and an overall GPA of 3.65 or better and (2) complete Classics 198A and 198B with grades of A.

## Undergraduate Minors

### Classical Civilization Minor

The Classical Civilization minor is designed to recognize a serious commitment to the study of the cultures and civilizations of ancient Greece and Rome. Lower-division survey courses in historical studies, classical literature, mythology, and film provide an essential introduction to the imagination and power of the ancient world. Students may fulfill upper-division requirements from a variety of courses in classical civilization and related fields, including political and social history, literature, art and archaeology, religion, mythology, philosophy, and cultural studies of ethnicity, gender, and sexuality in antiquity.

#### Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better.

### The Minor

*Required Lower-Division Courses (15 units):* Classics 10, 20, and one course from 30, 40W, 41W, 42, 51A, 51B, 60.

*Required Upper-Division Courses (20 units):* Five upper-division courses in classical civilization offered by the department.

### Policies

One course in a related field may be substituted with approval of the faculty undergraduate adviser. Classics 191 may be applied, but all other courses in the 190 series may be substituted only by petition.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

### Greek Language and Culture Minor

The Greek Language and Culture minor is designed to recognize a serious commitment to the study of ancient or modern Greek. After completing either lower-division ancient Greek (Greek 2, 3, 20) or modern Greek (Greek 9A, 9B, 9C), students select departmental upper-division courses centered on Greek texts, culture, and contexts. Students may take reading courses in ancient Greek prose and poetry that provide close analysis of individual texts, with attention to their historical, literary, and cultural context, and/or they may choose to take courses in Byzantine or modern Greek or courses in translation that ground their language training within the broader scope of Hellenic studies.

#### Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better.

#### The Minor

*Required Lower-Division Courses (12 or 14 units):* Greek 2, 3, and 20, or 9A, 9B, and 9C, or equivalent. Greek 16 may be substituted for Greek 2 and 3.

*Required Upper-Division Courses (20 units):* Two courses selected from Greek 100 through 187; three additional upper-division courses in Greek or classical civilization.

### Policies

Courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser. Up to three of the following courses will be automatically approved: Art History CM115A, C116A, C116B, Comparative Literature 102, 106, M120, History 112B, 112D, 113A, 113B, 116A, 116B, M185G, Indo-European Studies M150, C160, Philosophy 100A.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

### Latin Language and Culture Minor

The Latin Language and Culture minor is designed to recognize a serious commitment to the study of the Latin language. After a year of elementary Latin (Latin 1, 2, 3) or its equivalent, students select departmental upper-division reading courses in classical (and/or late antique and medieval) Latin prose and poetry that provide close analysis of individual texts, with attention to their historical, literary, and cultural context and/or they may choose to take courses in translation that ground their language training within the broader scope of Roman studies and classical reception.

Subjects of study include Roman comedy, epic, lyric, elegy, satire, history, rhetoric, philosophy, epistolography, and the novel.

#### Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better.

#### The Minor

*Required Lower-Division Courses (14 units):* Latin 2, 3, 20, or equivalent. Latin 16 may be substituted for Latin 2 and 3.

*Required Upper-Division Courses (20 units):* Two courses selected from Latin 100 through 187; three additional upper-division courses in Latin or classical civilization.

### Policies

Courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Majors

### Classics MA, CPhil, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announce-

ments, other publications, and websites of the schools, departments, and programs.

## Greek MA

The Master of Arts degree in Greek may only be earned after students have been admitted to the PhD program in Classics.

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Latin MA

The Master of Arts degree in Latin may only be earned after students have been admitted to the PhD program in Classics.

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Classics

### Lower-Division Courses

**10. Discovering Greeks. (5)** Lecture, three hours; discussion, one hour. Knowledge of Greek not required. Study of Greek life and culture from age of Homer to Roman conquest. Readings focus on selections from works of ancient authors in translation. Lectures illustrated with images of art, architecture, and material culture. P/NP or letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP or letter grading.

**20. Discovering Romans. (5)** Lecture, three hours; discussion, one hour. Knowledge of Latin not required. Study of Roman life and culture from time of city's legendary foundations to end of classical antiquity. Readings focus on selections from works of ancient authors in translation. Lectures illustrated with images of art, architecture, and material culture. P/NP or letter grading.

**30. Classical Mythology. (5)** Lecture, three hours; discussion, one hour. Introduction to myths and legends of ancient Greece and/or Rome, role of those stories in their societies, and modern approaches to studying them. P/NP or letter grading.

**40W. Reading Greek Literature: Writing-Intensive. (5)** Lecture, two hours; discussion, two hours. Requisite: English Composition 3. Exploration in detail and from variety of critical perspectives of carefully selected literary texts characteristic of ancient Greece and significant in Western literary tradition. Satisfies Writing II requirement. Letter grading.

**41W. Reading Roman Literature: Writing-Intensive. (5)** Lecture, two hours; discussion, two hours. Requisite: English Composition 3. Exploration in detail and from variety of critical perspectives of carefully selected set of literary texts characteristic of ancient Rome and significant in Western literary tradition. Satisfies Writing II requirement. Letter grading.

**42. Cinema and Ancient World. (5)** Lecture/screenings, five hours; discussion, one hour. Use of popular culture and cinema to introduce students to ancient Greek and/or Roman culture; focus at discretion of instructor. P/NP or letter grading.

**47. Medical Terminology: Origins, Nature, and Practice. (5)** Lecture, three hours. Introduction to specialized vocabulary of health sciences, which is rooted in Greek and Roman languages and in those two cultures from which much of history of modern medicine is derived. Students gain working knowledge of fundamental terminology used in medicine and health sciences as well as how this terminology has been composed. Development of ability to interpret and pronounce words. Students apply linguistic rules and how they operate in English and field-specific vocabulary to understand new terminology in various health science fields. Study of etymological origins of fundamental terminology as mnemonic aid for learning and recalling this terminology, and also to serve as mechanism for connecting health/medical professions to humanistic origins. P/NP or letter grading.

**48. Ancient Greek and Roman Medicine. (5)** Lecture, three hours; discussion, one hour. Introduction to Greek and Roman medicine in its intellectual and cultural context. Examination of construction of concepts such as health, disease, physician, man, woman, cause, and difference. Readings from Greek literature and healing in cult of Asclepius. Readings of texts from Hippocratic collection, thought to be close to practice and theory of 5th-century BCE Greek physician, relating them to medical practice, competition for students and patients, intellectual display, developing scientific methods, ethnography, and Greek philosophy. Discussion of plagues as attempts to view such outbreaks as social phenomena. Examination of how Hippocratic understanding of how—or whether—we can know about what happens inside body was developed and challenged in 3rd-century BCE Alexandria. Study of Prince of Physicians, Galen, champion of Hippocratic medicine, influential into 18th century. P/NP or letter grading.

**51A. Art and Archaeology of Ancient Greece. (5)** Lecture, three hours; discussion, one hour. Survey of major period, theme, or medium of Greek art and archaeology at discretion of instructor. P/NP or letter grading.

**51B. Art and Archaeology of Ancient Rome. (5)** Lecture, three hours; discussion, one hour. Survey of major period, theme, or medium of Roman art and archaeology at discretion of instructor. P/NP or letter grading.

**60. Fantastic Journey: Antiquity and Beyond. (5)** Lecture, two and one half hours; discussion, one hour. Investigation of phenomenon of fantastic or imaginary journey, from Homer's *Odyssey* to Stanley Kubrick's *2001: A Space Odyssey*. Examination of ways in which travel to strange or new worlds is presented through number of texts (and occasionally films) across different cultures and periods, with focus primarily on antiquity but also looking at how important motifs from ancient Greek and Roman travel narratives have endured to present day. Issues include cultural relativism, what makes space either familiar or alien, rebuilding of home in fantastic territories, methods of travel (both fantastic and mundane), methods of measuring time and distance across space, modern classifications of fantasy and science fiction, and to what extent these terms are applicable to ancient world. P/NP or letter grading.

**88A-88Z. Lower-Division Seminars. (4 each)** Seminar, three hours. Variable topics; consult Schedule of Classes or department for topics to be offered in specific term. P/NP or letter grading.

**88GE. General Education Seminar Sequences. (5)** Seminar, three hours. Focused study of one aspect of ancient Greek or Roman culture or reception of classical tradition. Topics are interdisciplinary in nature (literature, arts, religion, politics, culture) and make connections between ancient and postclassical eras. Topics include rediscovery of Pompeii and Herculaneum; Roman religion and literature; pleasures of Greek or Roman body; and 18th-century British literature and reception of classics. P/NP or letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP or letter grading.

## Upper-Division Courses

**M114A. History of Ancient Mediterranean World. (4)** (Same as History M112C.) Lecture, five hours. Intensive on-site study of history and culture of ancient Rome from founding of city to conversion of Christianity. Part of UCLA Summer Travel Program. P/NP or letter grading.

**M114B. History and Monuments of Rome: Field Studies. (4)** (Same as History M112E.) Fieldwork, five hours. Enforced corequisite: course M114A. Examination of history, art, and monuments of ancient Rome through daily lectures and field walks to museums and archaeological sites. Field trips outside Rome to Pompeii, Hadrian's Villa, and ancient Ostia. Reception and ruins of Roman antiquity in medieval, Renaissance, and modern eras explored in their historical context. Part of UCLA Summer Travel Program. P/NP or letter grading.

**M121. Ancient and Medieval Political Theory. (4)** (Same as Political Science M111A.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exposition and critical analysis of major thinkers such as Plato, Aristotle, Thucydides, St. Augustine, Aquinas, Machiavelli, and More and questions such as forms of government, citizenship, justice, happiness, rhetoric, religion, emotion. P/NP or letter grading.

**M124. Modern Receptions of Ancient Political Thought. (4)** (Same as Political Science M119A.) Lecture, three hours. Designed for juniors/seniors. Study of how Western culture has conceived and reinterpreted political thought of ancient Greeks and Romans. Topics include examination of influential case(s) of modern reception of classical antiquity. P/NP or letter grading.

**M125. Invention of Democracy. (5)** (Same as Political Science M112B.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Democracy was invented in ancient Greece as political form grounded on equality before law, citizenship, and freedom. It came into existence as struggle by *demos*, people, aware of its excellence and proud of its power, *kratos*. It became only regime capable of including all members of community while disregarding wealth, status, and diverging interests. Examination of history and theory of ancient democracy. P/NP or letter grading.

**130. Race, Ethnicity, Identity in Greco-Roman World. (4)** Lecture, two and one half hours. Examination of construction of racial and ethnic identities in Greco-Roman world and ways that ancient texts and study of antiquity have influenced Western constructions of race. Case studies include both ethnographic constructions of other by dominant groups (e.g. invention of stereotypes like barbarian and noble savage) and experiences of members of marginalized groups

within dominant cultures (e.g. Egyptian identity in Hellenistic Egypt, Greek, Syrian, and Jewish identity in Roman Empire). P/NP or letter grading.

**M133. Ancient Historiography: Theory and Practice. (4)** (Same as History M113C.) Lecture, three hours. Study of theory, practice, and development of writing history in cultures of ancient Greece and Rome. Focus is literary, centered on questions of genre and rhetoric. Encourages appreciation for how ancient historiography relates to other ancient genres (epic, biography, oratory). Readings may draw widely from various authors, including Herodotus, Thucydides, Livy, Tacitus, and others. P/NP or letter grading.

**137. Ancient Lives: Art of Biography. (4)** Lecture, three hours. Study of origins, development, and practice of writing lives (i.e., biography) represented in cultures of ancient Greece and Rome. Readings include examples from Greek and Roman lives of Plutarch and lives of Roman Emperors (Caesars) by Suetonius. Comparisons with modern biographical traditions in literature and film. P/NP or letter grading.

**138. Ancient Letters. (4)** Lecture, three hours. Requisite: course 10 or 20. Study of practice of letter writing in ancient Greek and Roman worlds. Broad survey of letters as literary compositions and historical documents or more focused analysis of one particular period, author, or theme. P/NP or letter grading.

**140. Topics in History of Greek Literature. (4)** Lecture, three hours. Requisite: course 10 or 40W. Investigation of specific issue in understanding of Greek literature, such as definition of one genre or evaluation of particular author. May be repeated for credit with topic change. P/NP or letter grading.

**141. Topics in History of Latin Literature. (4)** Lecture, three hours. Requisite: course 20 or 41W. Investigation of specific issue in interpretation of Latin literature, such as definition of one genre or evaluation of particular author. May be repeated for credit with topic change. P/NP or letter grading.

**142. Ancient Epic. (4)** Lecture, three hours. Requisite: one course from 10, 20, 30, 40W, or 41W. Homer's *Iliad* and *Odyssey*, Vergil's *Aeneid*, and Ovid's *Metamorphoses*, studied in translation. P/NP or letter grading.

**143A. Ancient Tragedy. (4)** Lecture, three hours. Requisite: course 10 or 40W. Survey of tragedy from 5th-century Athens through later antiquity. P/NP or letter grading.

**143B. Ancient Comedy. (4)** Lecture, three hours. Requisite: course 10 or 20. Survey of comedy as it developed in Greek and Roman worlds. P/NP or letter grading.

**144. Topical Studies in Ancient Culture. (4)** Lecture, three hours. Requisite: one course from 10, 20, 30, 40W, or 41W. Investigation of one problem in ancient culture that involves discussion of both Greek and Roman material. May be repeated for credit with topic change. P/NP or letter grading.

**M145A. Ancient Greek and Roman Philosophy. (4)** (Same as Philosophy M103A.) Lecture, three hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues. P/NP or letter grading.

**M145B. Later Ancient Greek Philosophy. (4)** (Same as Philosophy M103B.) Lecture, three hours. Requisite: one course from M145A, Philosophy 1, 100A, M101B, or M102. Study of some major texts in Greek philosophy of Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

**M146A. Plato—Earlier Dialogues. (4)** (Same as Philosophy M101A.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected topics in early and middle dialogues of Plato. P/NP or letter grading.

**M146B. Plato—Later Dialogues. (4)** (Same as Philosophy M101B.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected topics in middle and later dialogues of Plato. P/NP or letter grading.

**M147. Aristotle. (4)** (Same as Philosophy M102.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected works of Aristotle. P/NP or letter grading.

**148. Early Greek Medicine and Thought. (5)** Lecture, three hours; discussion, one hour. Versions of medical theory and practice in context of Greek intellectual and cultural developments. Readings from medical, philosophical, and historical texts. P/NP or letter grading.

**M149. Bodies in Antiquity. (4)** (Same as Disability Studies M122.) Lecture, three hours. Investigation of individuals and groups that compose ancient Greek and Roman societies and relationship they have with larger social body, with particular focus on marginalized or minority groups such as women, noncitizens (resident aliens and provincials), slaves, children, elderly, and disabled. Examination of ways these groups contribute to or detract from our understanding of ancient society as whole. May be repeated for credit with topic change. P/NP or letter grading.

**150A. Female in Greek Literature and Culture. (4)** Lecture, three hours. Requisite: course 10. Interdisciplinary study of concept of female in Greek literature and culture. P/NP or letter grading.

**150B. Female in Roman Literature and Culture. (4)** Lecture, three hours; discussion, one hour. Requisite: course 20. Interdisciplinary study of concept of female in Roman literature and culture. P/NP or letter grading.

**C151E. Archaeological Field Techniques. (12)** Off-campus field archaeology, 36 hours. Preparation: at least one classical archaeology course. Training in techniques of archaeological research in field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C251E. P/NP or letter grading.

**152A. Ancient City: Greek World. (4)** Lecture, three hours. Enforced requisite: course 10 or 51A or Art History 20 or History 1A. Range of interdisciplinary approaches to study of Athens and/or cities of Greek world, including Asia Minor, south Italy, and Sicily. Approaches, themes, and periods (both ancient city and receptions of city from classical antiquity to modern era) vary depending on individual instructor and topic. May be repeated for credit with topic change. P/NP or letter grading.

**152B. Ancient City: Roman World. (4)** Lecture, three hours. Enforced requisite: course 20 or 51B or Art History 20 or History 1A. Range of interdisciplinary approaches to study of Rome and/or cities of Italy and Roman Empire. Approaches, themes, and periods (both ancient city and receptions of city from classical antiquity to modern era) vary depending on individual instructor and topic. May be repeated for credit with topic change. P/NP or letter grading.

**M153A. Minoan Art and Archaeology. (4)** (Same as Art History M111.) Lecture, three hours. Requisite: course 10 or 51A or Art History 20. Study of development of art and architecture in Minoan Crete from circa 3000 to 1000 BC. P/NP or letter grading.

**M153B. Mycenaean Art and Archaeology. (4)** (Same as Art History M112A.) Lecture, three hours. Requisite: course 10 or 51A or Art History 20. Study of development of art and architecture in Mycenaean Greece from circa 2000 to 1000 BC. P/NP or letter grading.

**M153C. Archaic Greek Art and Archaeology. (4)** (Same as Art History M112B.) Lecture, three hours. Requisite: course 10 or 51A or Art History 20. Study of development of art and architecture of Greek world from approximately 800 through 490 BC. P/NP or letter grading.

**M153D. Classical Greek Art and Archaeology. (4)** (Same as Art History M112C.) Lecture, three hours. Requisite: course 10 or 51A or Art History 20. Study of development of art and architecture of Greek world from approximately 490 through 350 BC. P/NP or letter grading.

**M153E. Hellenistic Greek Art and Archaeology. (4)** (Same as Art History M112D.) Lecture, three hours. Requisite: course 10 or 51A or Art History 20. Study of development of art and architecture of Greek world from middle of 4th century BC, including transmittal of Greek art forms to Romans. P/NP or letter grading.

**M153F. Etruscan Art and Archaeology. (4)** (Same as Art History M113A.) Lecture, three hours. Requisite: course 20 or 51B or Art History 20. Arts of Italic peninsula from circa 1000 BC to end of Roman Republic. P/NP or letter grading.

**M153G. Roman Art and Archaeology. (4)** (Same as Art History M113B.) Lecture, three hours. Requisite: course 20 or 51B or Art History 20. Art and architecture of Rome and its Empire from circa 300 BC to AD 300. P/NP or letter grading.

**M153H. Late Roman Art. (4)** (Same as Art History M113C.) Lecture, three hours. Requisite: course 20 or 51B or Art History 20. Art of Roman Empire from 2nd through 4th century (AD). P/NP or letter grading.

**M153I-M153J-M153K. Classical Archaeology. (4-4-4)** (Same as Art History M114A-M114B-M114C.) Lecture, three hours. Requisite: one course from 10, 20, 51A, 51B, Art History 20, or History 1A. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman architecture, sculpture, and painting. May be repeated for credit with department consent. P/NP or letter grading.

**M153I.** Greco-Roman Architecture; **M153J.** Greco-Roman Sculpture; **M153K.** Greco-Roman Painting.

**M153L. Late Antique Art and Architecture. (4)** (Same as Art History CM115A.) Lecture, three hours. Art and architecture of late Roman Empire and early Christian world. P/NP or letter grading.

**160. Legal Advocacy in Ancient World. (4)** Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 10 or 20. Study of theory and practice of legal advocacy in classical Greece and Rome. May be repeated for credit. Letter grading.

**161. Women's History in Ancient Mediterranean. (4)** Lecture, three hours. Overview of approaches to problem of writing women's history in ancient Mediterranean world. Topics include law, medicine, work, religion (pagan, Christian, Jewish), and literature, with particular attention to themes of war, slavery, and sex trafficking. Exercises train students in critical use of primary documents and ancient sources, including inscriptions and other forms of material culture. P/NP or letter grading.

**162. Reception of Ancient Myth. (4)** Lecture, three hours. Traces reading and re-use of myth from antiquity to present, including global receptions in areas such as literature, philosophy, art, film, and politics. May be repeated once for credit with topic change. P/NP or letter grading.

**163. Ovid and Consequences. (4)** Lecture, three hours. Study of Ovid's *Metamorphoses* and persistence and extent of Roman poet's influence on subsequent literature, art, and film. Close analysis of Ovid's seminal text before turning to poem's classical, medieval, Renaissance, and modern imitations, from Apuleius to Shakespeare to Picasso and beyond. P/NP or letter grading.

**164. Spectacle Entertainments of Ancient Rome. (4)** Lecture, three hours. Requisite: course 20. Study of culture and politics of urban entertainment in ancient Rome, including gladiatorial competitions, chariot races, and theatrical productions. P/NP or letter grading.

**165. Ancient Athletics. (4)** Lecture, three hours. Requisite: course 10 or History 1A. Study of ancient Greek and Roman athletics and their connections with religion, politics, literature, and art. P/NP or letter grading.

**166A. Greek Religion. (4)** Lecture, three hours. Requisite: course 10 or 30. Study of religion of ancient Greeks. P/NP or letter grading.

**166B. Roman Religion. (4)** Lecture, three hours. Requisite: course 20. Study of religion of ancient Romans. P/NP or letter grading.

**M167. Magic in Ancient World. (4)** (Same as Ancient Near East M167.) Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 10 or 20. Exploration of art of influencing natural course of

events by occult means as practiced in ancient world at large. Coverage of beliefs in supernatural forces, rites aimed at controlling these forces effectively, and character and social roles of ritual experts in various cultures of ancient world. Source material includes types of magical spells, literary texts about magic and magicians, and artifacts such as amulets and ritual implements. P/NP or letter grading.

**168. Comparative Mythology. (4)** Lecture, three hours. Requisites: course 30, or GE Clusters 30A, 30B, and 30CW. Religious, mythical, and/or historical traditions of Greece and Rome compared with each other and with other traditions worldwide. P/NP or letter grading.

**169. Sex in Ancient World. (4)** Lecture, three hours. Requisite: course 10 or 20 or History 1A. Examination of sex and gender systems of Greek and Roman cultures in ancient Mediterranean world. What Greek and Roman sex/gender systems were, how they changed over time, and difference it makes. Readings include both modern theories about sex and history as foundation for course and broad range of ancient texts in translation. P/NP or letter grading.

**M170C. Power and Imagination in Byzantium. (4)** (Same as History M116C.) Lecture, three hours; discussion, one hour (when scheduled). Requisites: History 116A, 116B. Designed for juniors/seniors. Study of relations of authority and intelligentsia in highly centralized Byzantine Empire. Topics include criticism of emperor, iconoclasm, intellectual freedom, attempts at reform. Letter grading.

**171. Black Classicism: African American Reception of Classical Antiquity. (4)** Lecture, three hours. Study of reception of Greco-Roman antiquity, especially literature, by Black intellectuals, poets, novelists, and artists. Readings pair ancient texts with works by major African American writers (Dove, Ellison, Morrison) alongside scholarly discourse on *Classica Africana*. Also covers aspects of history of discipline of classics in U.S. with focus on Black experience. P/NP or letter grading.

**175. Classics in Central and South America. (4)** Lecture, three hours. Introduction to topics in classical reception through investigation of influence of Greco-Roman poetry on poetry of Central and South America of colonial period and beyond. From Homer to Vergil, poets of classical antiquity established robust tradition of epic with well-established literary tropes and nationalistic aims, cultural voice contributing to development of unified sense of national identity. Classical definition of epic as genre and sense of epic as vehicle for affirming and questioning national identity persisted well beyond antiquity. Investigation of one such area by examining epic traditions of Central and South America, (mediated through European models that preceded and helped shape them) and their conscious engagement with classical tradition, through examples of both neo-Latin productions and vernacular poetry in Spanish and Portuguese. P/NP or letter grading.

**180. Introduction to Classical Linguistics. (4)** Lecture, three hours. Requisite: Greek 3 or Latin 3. Linguistic approach to Greek and Latin, including Indo-European background, etymology, pronunciation, alphabets, sociolinguistics (dialects, bilingualism), and applications to classical literature. P/NP or letter grading.

**185. Origins and Nature of English Vocabulary. (5)** Lecture, three hours. Origins and nature of English vocabulary, from Proto-Indo-European prehistory to current slang. Topics include Greek and Latin component in English (including technical terminology), alphabet and English spelling, semantic change and word formation, vocabulary in literature and film. P/NP or letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. In-

dividual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**190. Research Colloquia in Classics. (1)** Seminar, one hour. Limited to juniors/seniors. Designed to bring together students undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

**191. Capstone Seminar: Classics. (5)** Seminar, three hours. Requisites: courses 10, 20, at least four upper-division major courses. Limited to declared junior/senior departmental majors; minors may be admitted with consent of instructor. Topical research seminar on important themes, periods, genres of ancient Greek and Roman world. Intended to provide students with opportunity for serious engagement with research in discipline under close faculty supervision. Readings, discussions, oral presentations, and final research paper or project. May be repeated for credit. Letter grading.

**193. Journal Club Seminars: Classics. (1)** Seminar, one hour. Limited to undergraduate students. Group discussion of readings and topics selected from current issues in classics and related disciplines. May be repeated for credit. P/NP grading.

**197. Individual Studies in Classics. (2 to 4)** Tutorial, two hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**198A-198B. Honors Research in Classics. (2-5)** Limited to junior/senior departmental honors program students. May be repeated for credit. Individual contract required. **198A.** Tutorial, six hours. Requisite: course 191. Tutorial under direct supervision of faculty member. Research and development of thesis outline in preparation of paper to be completed in course 198B. In Progress grading. **198B.** Tutorial, 15 hours. Requisite: course 198A. Completion of final research thesis under direct supervision of faculty member. Letter grading.

**199. Directed Research in Classics. (2 to 4)** Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

## Graduate Courses

**200. History of Classical Scholarship. (4)** Lecture, four hours. S/U or letter grading.

**201B. Topics in Ancient History: Roman World. (2 or 4)** Seminar, three hours. Introduction to basic methods and approaches to study of Roman history by intensive examination of selected topics, including readings of ancient texts and modern scholarship. S/U or letter grading.

**M218. Paleography of Latin and Vernacular Manuscripts, 900 to 1500. (4)** (Same as English M215, French M210, and History M218.) Lecture, three hours; discussion, two hours. Introduction to history of Latin and vernacular manuscript book from 900 to 1500 to (1) train students to make informed judgments with regard to place and date of origin, (2) provide training in accurate reading and transcription of later medieval scripts, and (3) examine manuscript book as witness to changing society that produced it. Focus on relationship between Latin manuscripts and vernacular manuscripts with regard to their respective presentation of written texts. S/U or letter grading.

**220A. Interfaces: Transmission of Roman Literature. (2 or 4)** Seminar, three hours. Examination of transmission of Latin classical literature in late antiquity, Middle Ages, and Renaissance to understand processes by which Latin literature has been preserved. S/U (2-unit course) or letter (4-unit course) grading.

**244. Textual Criticism: Studies in Preparation of Critical Edition of Greek and/or Latin Texts. (2 or 4)** Seminar, three hours. Different steps required in preparation of critical edition of ancient text: localizing manuscripts; collation; establishing stemma; selecting right reading on basis of knowledge of context, of language of author, and of sources; emendations; formulation of *apparatus criticus* and *apparatus fontium*. S/U (2-unit course) or letter (4-unit course) grading.

**245. Computing and Classics. (2 or 4)** Seminar, three hours. Introduction to processing and analysis of digitized texts of classical authors for purposes of literary history and criticism. S/U (2-unit course) or letter (4-unit course) grading.

**246. Greek and Latin Meter. (2 or 4)** Seminar, three hours. Comprehensive study of meter as it functions in classical poetry. S/U (2-unit course) or letter (4-unit course) grading.

**250. Topics in Greek and Roman Culture and Literature. (2 or 4)** Seminar, three hours. Interdisciplinary study on topics of ancient Greek and Roman culture and/or literature. May be repeated for credit with topic change. S/U or letter grading.

**251A. Seminar: Classical Archaeology—Aegean Bronze Age. (2 or 4)** Seminar, three hours. S/U or letter grading.

**251B. Seminar: Classical Archaeology—Greco-Roman Architecture. (2 or 4)** Seminar, three hours. Studies in style and iconography of various periods of Aegean, Greek, and Roman architecture. S/U (2-unit course) or letter (4-unit course) grading.

**251C. Seminar: Classical Archaeology—Greco-Roman Sculpture. (2 or 4)** Seminar, three hours. Studies in style and iconography of various periods of Aegean, Greek, and Roman sculpture. S/U (2-unit course) or letter (4-unit course) grading.

**251D. Seminar: Classical Archaeology—Greco-Roman Painting. (2 or 4)** Seminar, three hours. Studies in style and iconography of various periods of Aegean, Greek, and Roman painting. May be repeated for credit with consent of instructor. S/U or letter grading.

**C251E. Archaeological Field Techniques. (12)** Off-campus field archaeology, 36 hours. Preparation: at least one classical archaeology course. Training in techniques of archaeological research in field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C151E. S/U or letter grading.

**252. Topography and Monuments of Athens. (2 or 4)** Lecture, two or four hours. Detailed studies in topography and monuments of Athens, combining evidence of literature, inscriptions, and actual remains. S/U or letter grading.

**253. Topography and Monuments of Rome. (2 or 4)** Lecture, two or four hours. Detailed studies in topography and monuments of ancient Rome, combining evidence of literature, inscriptions, and actual remains. S/U or letter grading.

**260. Topics in Ancient Religion. (2 or 4)** Seminar, three hours. S/U or letter grading.

**287. Graduate Colloquium in Classical Literature. (2)** Seminar, three hours. Survey of basic methods of and approaches to classical scholarship, including textual criticism, literary interpretation and theory, hermeneutics, interdisciplinary studies, and computer applications to classics. Emphasis varies from year to year, depending on instructor(s). May be repeated for credit with topic change. S/U grading.

**288. Literary Theory. (2 or 4)** Discussion, three hours. Designed for graduate students. Introduction to chief texts in literary theory and criticism for readers of classical literature, with application to classical texts. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**495. Teaching Classics. (2)** Seminar, two hours. Normally to be taken by all graduate students in term before or during their first assignments as teaching assistants. Seminar/workshop in various pedagogical issues and strategies in preparation for teaching classical civilization, Greek, and/or Latin undergraduate courses. Readings and group discussions in topics related to teaching in field of classics. May not be applied toward MA or PhD course requirements. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. S/U grading.

**597. Study for MA Comprehensive Examination or PhD Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Research for PhD Dissertation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Greek

### Lower-Division Courses

**1. Elementary Greek. (5)** Lecture, three hours; discussion, two hours. P/NP or letter grading.

**2. Elementary Greek. (5)** Lecture, three hours; discussion, two hours. Enforced requisite: course 1. P/NP or letter grading.

**3. Elementary Greek. (5)** Lecture, three hours; discussion, two hours. Enforced requisite: course 2. P/NP or letter grading.

**8A-8B-8C. Elementary Modern Greek. (4-4-4)** Lecture, three hours. Course 8A is enforced requisite to 8B, which is enforced requisite to 8C. Introductory modern Greek sequence, with emphasis on spoken modern Greek. P/NP or letter grading.

**8G. Reading Scholarly Modern Greek. (4)** Lecture, two and one half hours. Designed for students who want to develop literacy competence in order to read modern Greek scholarly texts. No prior knowledge of modern Greek is required. Covers grammatical concepts and forms necessary to comprehend written academic Greek. Students gain familiarity with various academic genres in Greek (among others, articles, chapters, reviews, lecture transcripts). Emphasis on grammar and reading strategies that enable location, selection, and comprehension of texts central to research needs. Students are familiarized with major stylistic features of contemporary academic modern Greek, and consolidate their competence through reading, translating, and writing activities. Familiarization with basic aspects of modern Greek life and culture. P/NP or letter grading.

**9A-9B-9C. Intermediate Modern Greek. (4-4-4)** Lecture, three hours. Enforced requisite: course 8C. Course 9A is enforced requisite to 9B, which is enforced requisite to 9C. Intermediate-level program in modern Greek language study from communicative and task-based approach. Continued development of student understanding and use of Greek syntax and morphology through oral and written activities, reading, and listening. Students master basic communication skills, communicate in everyday real-life situations, comprehend simple passages, announcements, and advertisements, master basic rules of modern Greek grammar and syntax, read fluently, and write accurately. P/NP or letter grading.

**15. Elementary Modern Greek. (12)** Lecture, 18 to 19 hours. Eight-week intensive introduction to principles of speaking, reading, and writing modern (demotic) Greek. Offered in summer only. P/NP or letter grading.

**16. Intensive First-Year Greek. (12)** Lecture, 19 hours. Eight-week intensive introduction to Greek language equivalent to courses 1, 2, and 3. Offered in summer only. P/NP or letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**20. Intermediate Greek. (4)** Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 3 or 16. Formal review of Greek grammar and syntax and development of skills in reading original texts of Greek prose. Readings selected to introduce literature and culture of ancient Greece. P/NP or letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**100. Readings in Greek Prose and Poetry. (4)** Lecture, three hours. Requisite: course 20. Introduction to developing skills of reading longer, continuous passages of original Greek prose and/or poetry texts, with attention to literary and cultural background. Course is normally requisite to other courses in Greek 100 series. May be repeated for credit with change of assigned readings and with consent of instructor. P/NP or letter grading.

**101A. Homer: *Odyssey*. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**101B. Homer: *Iliad*. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**102. Lyric Poets. (4)** Lecture, three hours. Requisite: course 100. Selections from Archilochus to Bacchylides. P/NP or letter grading.

**103. Aeschylus. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**104. Sophocles. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**105. Euripides. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**106. Aristophanes. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**107. Hesiod. (4)** Lecture, three hours. Requisite: course 100. Reading of *Theogony* and excerpts from *Works and Days*, with emphasis on Hesiod's place in Greek literature and his role in transmission of Greek mythology. P/NP or letter grading.

**110. Study of Greek Prose. (4)** Lecture, three to four hours. Requisite: course 100. Work in sight reading and grammatical analysis of Attic prose texts; writing Attic prose. P/NP or letter grading.

**111. Herodotus. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**112. Thucydides. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**113. Attic Orators. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**115. Xenophon. (4)** Lecture, three hours. Requisite: course 100. Reading of one major work of Xenophon—*Memorabilia*, *Cyropaedia*, *Anabasis*, *Hellenica*, or *Oeconomicus*—in Greek. P/NP or letter grading.

**121. Plato. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**122. Plato: *Republic*. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**123. Aristotle: *Poetics and Rhetoric*. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**124. Aristotle: *Ethics*. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**130. Readings in New Testament. (4)** Lecture, three hours. Requisite: course 3. P/NP or letter grading.

**131. Readings in Later Greek. (4)** Lecture, three hours. Requisite: course 100. Topics vary from year to year and include Longinus, *On Sublime*; Marcus Aurelius; Arrian; Second Sophistic; Plutarch; later epic; epigram; epistolographi Graeci. P/NP or letter grading.

**132. Survey of Byzantine Literature. (4)** Lecture, three hours. Requisite: course 100. Readings based on (1) *Anthology of Byzantine Prose*, ed. Nigel Wilson and (2) *Oxford Book of Medieval and Modern Greek Verse*, ed. C.A. Trypanis, or if unavailable, *Poeti bizantini*, ed. R. Cantarella. In addition, necessary historical and cultural background provided by readings and lectures. P/NP or letter grading.

**133. Readings in Byzantine Literature. (4)** Lecture, three hours. Requisite: course 132. Topics vary from year to year and include Procopius, Agathias, Michael Psellus, Alexiad of Anna Comnena, and Digenis Akritas. P/NP or letter grading.

**140. Topics in Greek Language and Culture. (4)** Seminar, three hours. Requisite: course 9C. Covers topics in modern Greek language, culture, and history. Assigned materials are predominantly in modern Greek. Topics and geographical focus are diverse, ranging from literature and cinema to culture and history of Greek America. May be repeated for credit with topic change. P/NP or letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**197. Individual Studies in Greek. (2 to 4)** Tutorial, two hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**199. Directed Research in Greek. (2 to 4)** Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

### Graduate Courses

**200A-200B-200C. History of Greek Literature. (4-4-4)** Lecture, three hours. Lectures on history of Greek literature, supplemented by reading of Greek texts in original language. Each course may be taken independently for credit. S/U or letter grading.

**201A-201B. Homer: *Iliad*. (2 or 4 each)** Lecture, three hours. Course 201A is requisite to 201B. S/U (2-unit course) or letter (4-unit course) grading.

**202A-202B. Homer: *Odyssey* and Epic Cycle. (2 or 4 each)** Lecture, three hours. Course 202A is requisite to 202B. S/U (2-unit course) or letter (4-unit course) grading.

**203. Hesiod. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**204. Homeric Hymns. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**205. Aeschylus. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**206A-206B. Sophocles. (2 or 4 each)** Lecture, three hours. Course 206A is requisite to 206B. S/U (2-unit course) or letter (4-unit course) grading.

**207A-207B. Euripides. (2 or 4 each)** Lecture, three hours. Course 207A is requisite to 207B. S/U (2-unit course) or letter (4-unit course) grading.

**208A-208B. Aristophanes. (2 or 4 each)** Lecture, three hours. Course 208A is requisite to 208B. S/U (2-unit course) or letter (4-unit course) grading.

**209A-209B. Seminars: Hellenistic Poetry. (2 or 4 each)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**210. Advanced Greek Prose Composition. (4)** Lecture, three hours. Requisite: course 110. S/U or letter grading.

**211A-211B. Herodotus. (2 or 4 each)** Lecture, three hours. Course 211A is requisite to 211B. S/U (2-unit course) or letter (4-unit course) grading.

**212A-212B. Thucydides. (2 or 4 each)** Lecture, three hours. Course 212A is requisite to 212B. S/U (2-unit course) or letter (4-unit course) grading.

**213. Greek Historiography. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**214. Demosthenes. (2 or 4)** Lecture, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**215. Early Greek Orators. (2 or 4)** Seminar, three hours. Studies in works of Antiphon, Andocides, and Lysias. S/U (2-unit course) or letter (4-unit course) grading.

**216. Menander. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**217A-217B. Greek Lyric Poetry. (2 or 4 each)** Seminar, three hours. Each course may be taken independently for credit. S/U (2-unit course) or letter (4-unit course) grading. **217A.** Archaic Lyric. Study of lyric poetry of Archaic period, both choral and monodic, with elegiac and iambic included. **217B.** Pindar and Bacchylides. Study of choral odes of Pindar and Bacchylides, with special attention to conventions of epinician.

**220. Greek Novel. (2 or 4)** Seminar, three hours. Study of Greek romance and its place in Greek literature. Two texts (Chariton: *Chaereas and Callirhoe* and Longus: *Daphnis and Chloe*) studied in some detail. S/U (2-unit course) or letter (4-unit course) grading.

**221. Pre-Socratic Philosophers. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**222A-222B. Plato. (2 or 4 each)** Lecture, three hours. Course 222A is requisite to 222B. S/U (2-unit course) or letter (4-unit course) grading.

**223A-223B. Aristotle. (2 or 4 each)** Lecture, three hours. Course 223A is requisite to 223B. S/U (2-unit course) or letter (4-unit course) grading.

**224. Post-Aristotelian Philosophy. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**226. Imperial Greek Literature. (2 or 4)** Seminar, three hours. Study of Greek literature of Roman Empire with attention to various authors, genres, and themes. S/U or letter grading.

**229. Strengthening Greek. (4)** Seminar, three hours. Grammar review, vocabulary development, and translation skills practice in reading ancient Greek texts across variety of genres and periods. S/U or letter grading.

**240A-240B. History of Greek Language. (2 or 4 each)** Lecture, four hours. S/U or letter grading. **240A.** Linguistic history of classical Greek. **240B.** Requisite: course 240A. Postclassical, medieval, and modern Greek.

**241. Greek Epigraphy. (2 or 4)** Seminar, three hours. Survey of Greek historical inscriptions, chiefly Attic. S/U (2-unit course) or letter (4-unit course) grading.

**242. Greek Dialects and Historical Grammar. (2 or 4)** Lecture, three hours. Linguistic situation in early Greece. Readings in classical Greek dialectal texts. Greek grammar in context of common Greek and Indo-European linguistics. S/U or letter grading.

**243. Mycenaean Greek. (2 or 4)** Seminar, three hours. Script, language, and grammar of Linear B inscriptions; their relevance to ancient Greek linguistic and cultural history. S/U or letter grading.

**244. Greek Papyrology. (2 or 4)** Seminar, three hours. Preparation: reading knowledge of Greek. Introduction to Greek papyri, considered both as historical documents and as carriers of literature. S/U (2-unit course) or letter (4-unit course) grading.

**245. Greek Palaeography. (2 or 4)** Seminar, three hours. Studies in development of book hand in Greek manuscripts earlier than invention of printing. S/U (2-unit course) or letter (4-unit course) grading.

**250. Topical Studies of Ancient Greece. (2 or 4)** Lecture, three hours. Advanced study of some aspect of ancient Greek language, literature, and/or culture. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. S/U grading.

**597. Study for MA Comprehensive Examination or PhD Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Research for PhD Dissertation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Latin

### Lower-Division Courses

**1. Elementary Latin. (5)** Lecture, three hours; discussion, two hours. P/NP or letter grading.

**1G. Elementary Latin for Graduate Students. (No credit)** Lecture, eight hours. Concurrently scheduled with course 14. No grading.

**2. Elementary Latin. (5)** Lecture, three hours; discussion, two hours. Enforced requisite: course 1. P/NP or letter grading.

**3. Elementary Latin. (5)** Lecture, three hours; discussion, two hours. Enforced requisite: course 2 or 14. P/NP or letter grading.

**14. Elementary Latin: Intensive. (10)** Lecture, 10 hours. Declensions of nouns and adjectives, conjugations in indicative mood, and primary uses of subjunctive mood. Emphasis on development of ability to read easy selections of classical prose. P/NP or letter grading.

**16. Intensive First-Year Latin. (12)** Lecture, 19 hours. Eight-week intensive introduction to Latin language equivalent to courses 1, 2, and 3. Offered in summer only. P/NP or letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**20. Elementary Latin: Comprehensive Review. (4)** Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 3 or 16. Formal review of Latin grammar and syntax and development of skills in reading original texts of Latin prose. Readings selected to introduce literature and culture of ancient Rome. P/NP or letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**100. Intermediate Latin: Introduction to Reading Latin (4)** Lecture, three hours. Enforced requisite: course 20 (may be taken concurrently). Introduction to developing skills of reading longer, continuous passages of original Latin prose and/or poetry texts, with attention to literary and cultural background. Course is requisite to advanced reading courses. May be repeated for credit twice with change of assigned readings and with consent of instructor. P/NP or letter grading.

**101. Plautus. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**102. Terence. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**103. Lucretius. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**104. Ovid. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**105A. Beginning Vergil: Selections from *Aeneid* I-VI. (4)** Lecture, three hours. Requisite: course 100. Reading of one or more books from first half of *Aeneid*, designed especially for students with only limited experience in reading Latin poetry. May be repeated for credit with change in readings and consent of instructor. P/NP or letter grading.

**105B. Advanced Vergil. (4)** Lecture, three hours. Requisite: course 105A. Reading and discussion of Vergil's *Eclogues*, *Georgics*, and/or second half of *Aeneid*. May be repeated for credit with change in readings. P/NP or letter grading.

**106. Catullus. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**107. Horace. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**108. Roman Elegy. (4)** Lecture, three hours. Requisite: course 100. Selections from Catullus, Tibullus, and Propertius. P/NP or letter grading.

**109. Roman Satire. (4)** Lecture, three hours. Requisite: course 100. Readings from author(s) of Roman satire, including Horace, Persius, and Juvenal, or related satiric texts. May be repeated for credit with change in readings and consent of instructor. P/NP or letter grading.

**110. Study of Latin Prose. (4)** Lecture, three hours. Requisite: course 100. Work in sight reading and grammatical analysis of classical prose texts; writing of classical prose. P/NP or letter grading.

**111. Livy. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**112. Tacitus. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**113. Cicero: Orations. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**114. Roman Epistolography: Cicero and Pliny. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**115. Caesar. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**116. Roman Novel. (4)** Lecture, three hours. Requisite: course 100. Reading and discussion of either Petronius' *Satyricon* or Apuleius' *Metamorphoses* and

development of genre of prose novel in antiquity. May be repeated for credit with change in author and text. P/NP or letter grading.

**117. Sallust. (4)** Lecture, three hours. Requisite: course 100. P/NP or letter grading.

**118. Seneca. (4)** Lecture, three hours. Requisite: course 100. Selection of Seneca's works read in Latin. P/NP or letter grading.

**119A. Readings in Roman Prose. (4)** Lecture, three hours. Requisite: course 100. Readings of selected Roman prose author(s). Topics may vary from year to year and may be organized in terms of chronology (Republican or imperial), literary genre (Roman biography, antiquarian learning, or science), and/or theme. May be repeated for credit with topic change. P/NP or letter grading.

**119B. Readings in Roman Poetry. (4)** Lecture, three hours. Requisite: course 100. Readings of selected Roman poetry author(s). Topics may vary from year to year and may be organized in terms of chronology (Republican or imperial), epic, lyric, elegy, and/or theme. May be repeated for credit with topic change. P/NP or letter grading.

**120. Vulgate. (4)** Lecture, three hours. Requisite: course 3. Reading of selected chapters of St. Jerome's translation of Bible, with emphasis on unclassical features of Latin. P/NP or letter grading.

**121. Patristic Texts. (4)** Lecture, three hours. Requisite: course 100. Reading and discussion of one or more Latin patristic texts (especially works of Ambrose, Augustine, and/or Jerome), with emphasis on specific features of patristic, as opposed to classical, Latin. P/NP or letter grading.

**130. Introduction to Postclassical Latin. (4)** Lecture, three hours. Basic competence in classical Latin required. Readings in postclassical Latin. P/NP or letter grading.

**131. Postclassical Latin Prose. (4)** Lecture, three hours. Advanced readings of selected texts in postclassical Latin prose. P/NP or letter grading.

**133. Postclassical Latin Poetry. (4)** Lecture, three hours. Advanced readings of selected texts in postclassical Latin poetry. P/NP or letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**197. Individual Studies in Latin. (2 to 4)** Tutorial, two hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**199. Directed Research in Latin. (2 to 4)** Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

## Graduate Courses

**200A-200B-200C. History of Latin Literature (4-4-4).** Lecture, three hours. Lectures on history of Latin literature, supplemented by reading of Latin texts in original language. Each course may be taken independently for credit. S/U or letter grading.

**201. Roman Epic Tradition. (2 or 4)** Seminar, three hours. Close study of one epic poet other than Vergil (e.g., Ennius, Lucan, Valerius Flaccus, Statius, Silius Italicus), with attention to literary tradition of epic. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.

**202. Seminar: Catullus. (2 or 4)** Seminar, three hours. Detailed consideration of entire Catullan corpus. S/U (2-unit course) or letter (4-unit course) grading.

**203A. Elegiac Poetry. (2 or 4)** Lecture, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**203B. Propertius. (2 or 4)** Lecture, three hours. Course 203A is not requisite to 203B. S/U (2-unit course) or letter (4-unit course) grading.

**204A-204B. Vergil's Aeneid. (2 or 4 each)** Lecture, three hours. Course 204A is requisite to 204B. S/U (2-unit course) or letter (4-unit course) grading.

**205A. Seminar: Vergil's Bucolics. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**205B. Seminar: Vergil's Georgics. (2 or 4)** Seminar, three hours. Course 205A is not requisite to 205B. Close reading of Vergil's text; careful evaluation of influential criticism on poem, much of it recent; examination of work's place within tradition of rural poetry. S/U (2-unit course) or letter (4-unit course) grading.

**206. Horace. (2 or 4)** Lecture, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**207. Roman Comedy. (2 or 4)** Seminar, three hours. Survey of history of Roman comedy. S/U (2-unit course) or letter (4-unit course) grading.

**208. Ovid. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**209. Seminar: Roman Satire. (2 or 4)** Seminar, three hours. Detailed study of one individual satirist, with attention to his position in development of satirical genre in Roman literature. Choice of author varies from year to year. Close study of text, of characteristics of writer as social critic and artist, and of contemporary literary and social environment. S/U (2-unit course) or letter (4-unit course) grading.

**210. Advanced Latin Prose Composition. (4)** Lecture, three hours. Requisite: course 110. S/U or letter grading.

**211A-211B-211C. Seminars: Roman Historians. (2 or 4 each)** Seminar, three hours. Study of considerable portions of writings of following historians. Each course may be taken independently for credit. S/U (2-unit course) or letter (4-unit course) grading. **211A.** Sallust; **211B.** Livy; **211C.** Tacitus.

**214. Ancient Biography: Roman Lives. (2 or 4)** Seminar, three hours. Study of biography in ancient Rome. Literary survey or focused readings on lives of Cornelius Nepos, Suetonius, Tacitus, or imperial chroniclers of 4th century CE. S/U (2-unit course) or letter (4-unit course) grading.

**215. Seminar: Roman Novel. (2 or 4)** Seminar, three hours. Works such as Petronius' *Satyricon* and Apuleius' *Metamorphoses*: study of literary problems. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.

**216. Roman Rhetoric. (2 or 4)** Seminar, three hours. Close study of one rhetorical text (e.g., *Rhetorica ad Herennium*, Cicero's *de Oratore*, Seneca's *Controversiae* or *Suasoriae*, Quintilian's *Institutio*), with attention to its place in rhetorical tradition. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.

**220. Cicero's Orations. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**221A. Cicero's Philosophical Works. (2 or 4)** Lecture, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**221B. Cicero: De Natura Deorum. (2 or 4)** Lecture, three hours. Course 221A is not requisite to 221B. S/U (2-unit course) or letter (4-unit course) grading.

**222. Seminar: Roman Stoicism. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**223. Lucretius. (2 or 4)** Lecture, three hours. S/U (2-unit course) or letter (4-unit course) grading.

**224. Seneca. (2 or 4)** Seminar, three hours. Detailed study of one work of prose or poetry by younger Seneca. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.

**229. Strengthening Latin. (4)** Seminar, three hours. Grammar review, vocabulary development, and translation skills practice in reading Latin texts across variety of genres and periods. S/U or letter grading.

**231A-231B. Seminars: Medieval Latin. (2 or 4 each)** Seminar, three hours. Preparation: at least one upper-division Latin course. Course 231A is not requisite to 231B. Studies in various areas of language and literature of medieval Latin. May be repeated for credit with consent of instructor. S/U (2-unit course) or letter (4-unit course) grading.

**232. Vulgar Latin. (2 or 4)** Lecture, three hours. History and characteristics of popular Latin; its development into early forms of Romance languages. S/U or letter grading.

**235. Late Latin Poetry. (2 or 4)** Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several poets who flourished between death of Ovid and fall of Roman Empire. May be repeated for credit with change in author. S/U or letter grading.

**236. Late Latin Prose. (2 or 4)** Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several prose authors who flourished between death of Tacitus and fall of Roman Empire. May be repeated for credit with change in author. S/U or letter grading.

**240. History of Latin Language. (2 or 4)** Lecture, three hours. Development of Latin from earliest monuments until its emergence in Romance languages. S/U or letter grading.

**242. Italic Dialects and Latin Historical Grammar. (2 or 4)** Lecture, three hours. Linguistic situation in early Italy. Readings in Oscan, Umbrian, and early Latin texts. Latin grammar in context of Italic and Indo-European linguistics. S/U or letter grading.

**243. Seminar: Latin Palaeography. (2 or 4)** Seminar, three hours. Studies in development of book hand in Latin manuscripts earlier than invention of printing. S/U (2-unit course) or letter (4-unit course) grading.

**245. Neo-Latin. (2 or 4)** Seminar, three hours. Preparation: at least two upper-division Latin courses. Requisite: course 100. Survey of texts by one or more authors from Renaissance to present, written on related topics. S/U or letter grading.

**250. Topical Studies of Ancient Rome. (2 or 4)** Seminar, three hours. Advanced study of some aspect of Latin language or literature or Roman culture. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.

**495. College Teaching of Latin. (2)** Seminar, to be arranged. Preparation: appointment as teaching assistant. Methodology of instruction in conjunction with classroom practice. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. S/U grading.

**597. Study for MA Comprehensive Examination or PhD Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Research for PhD Dissertation. (2 to 8)** Tutorial, to be arranged. S/U grading.

Vilma Ortiz, PhD, *Chair*

## Faculty Committee

Jeffrey L. Decker, PhD (*English*)

Anthony R. Friscia, PhD (*Integrative Biology and Physiology*)

Sarah L. Gibbons, PhD (*Society and Genetics*)

Paul T. Hsu, MPH, PhD (*Epidemiology*)

Jennifer A. Jay, PhD (*Civil and Environmental Engineering, Environment and Sustainability*)

Jared McBride, PhD (*History*)

Vilma Ortiz, PhD (*Sociology*)

Michelle A. Rensel, PhD (*Society and Genetics*)

Steven J. Strossner, PhD (*Communication*)

Luke B. Yarbrough, PhD (*Near Eastern Languages and Cultures*)

## Overview

Cluster courses are an option for satisfying both general education and Writing II requirements. Clusters are yearlong, collaboratively taught, interdisciplinary courses that focus on a topic of timely importance, such as the global environment or interracial dynamics. The courses are taught by some of the most distinguished UCLA faculty members and seasoned graduate students. During fall and winter quarters, students attend lecture courses and small discussion sections and/or laboratories. In spring quarter, the same students enroll in one of a number of satellite seminars dealing with topics related to the cluster theme.

Freshman clusters are designed to strengthen the writing, quantitative reasoning, critical thinking, and information literacy skills that students need to excel at UCLA. At the conclusion of the entire yearlong cluster, students complete 40 to 50 percent of their general education course requirements (if they maintain a D- or better each quarter) and fulfill the Writing II requirement (if they earn a C or better in spring quarter). Cluster students are eligible for three terms of honors credit, with the spring quarter seminar granting Honors Collegium credit.

For the current cluster course offerings and general education credit, refer to the [Cluster Program](#) website.

## Clusters

### Lower-Division Courses

**M1A-M1B-M1CW. Food: Lens for Environment and Sustainability. (6-6-6)** (Same as Environment M1A-M1B-M1CW.) Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Limited to first-year freshmen. **M1A-M1B.** Lecture, three hours; discussion, two hours. Food as lens for local and global environmental and sustainability issues. Integration of environmental, social, economic, and technological solutions for fair, sustainable, and healthy food production, food security, and access. Focus on human impacts on Earth's biological and physical systems, including how food production and consumption contributes to, and is impacted by, global problems, including climate change, pollution, and overpopulation. Laboratory exercises included in discussions. P/NP or letter grading. **M1CW.** Special Topics. Seminar, three hours. Enforced requisite: course M1B. Examination of specialized environmental and sustainability topics as they relate to food, including air, water, biodiversity, climate change, food access, food security, and health. Satisfies Writing II requirement. Letter grading.

**10A-10B-10CW-10WX. Data, Justice, and Society. (6-6-6-6)** Course 10A is requisite to 10B, which is requisite to 10CW or 10WX. Limited to first-year freshmen. **10A.** Lecture, three hours; discussion, two hours. Data-based computation (i.e., algorithms, artificial intelligence, predictive modeling) increasingly play a dominant role in shaping everyday experiences of culture and society. Data and data analytics define everything from social relations and public policy to juridical status and market logistics. Introduction to politics, ethics, applications, history, critiques, and social impact of data. Introduction to how data intersects with philosophical inquiries about justice, (in)equality, power, and freedom. Students obtain deeper historical and critical view of data in society, while gaining understanding of differing and diverse cultural frames of analysis. P/NP or letter grading. **10B.** Lecture, three hours; discussion, two hours. Data-based computation (i.e., algorithms, artificial intelligence, predictive modeling) increasingly play a dominant role in shaping everyday experiences of culture and society. Data and data analytics define everything from social relations and public policy to juridical status and market logistics. Study pursues thinking about ethics and justice in a data-driven society but focus on concrete case studies. Students gain critical understanding of technology sector, and also learn of community-engaged models of deploying data skills for social justice. P/NP or letter grading. **10CW.** Special Topics. Seminar, three hours. In-depth examination of the politics, ethics, applications, history, critiques, and social impact of data. Further review, analysis, and discussion of how data technologies either impede or work toward social justice. Study continues to provide guidance on honing writing skills in order to produce excellent college essays. Satisfies Writing II requirement. Letter grading. **10WX.** Special Topics. Seminar, three hours. Community-engaged learning course with in-depth examination of the politics, ethics, applications, history, critiques, and social impact of data. Further review, analysis, and discussion of how data technologies either impede or work toward social justice. Study continues to provide guidance on honing writing skills in order to produce excellent college essays. Satisfies Writing II requirement. Letter grading.

**20A-20B-20CW. Race and Indigeneity in U.S. (6-6-6)** Course 20A is enforced requisite to 20B, which is enforced requisite to 20CW. Limited to first-year freshmen. **20A-20B.** Lecture, three hours; discussion, two hours. Examination of nature and meaning of race in American society through study of history, literature, and law. Consideration, among other topics, of construction of race as social and cultural category among two or more groups and exploration of ways in which race has shaped understanding of American citizenship. P/NP or letter grading. **20CW.** Special Topics. Seminar, three hours. Enforced requisite: course 20B. Consideration of how experience, debates, and issues of race are represented and understood in historical, legal, cinematic, and literary contexts. Satisfies Writing II requirement. Letter grading.

**21A-21B-21CW. History of Modern Thought. (6-6-6)** Course 21A is enforced requisite to 21B, which is enforced requisite to 21CW. Limited to first-year freshmen. Letter grading. **21A-21B.** Lecture, three hours; discussion, two hours. Introduction to key issues in humanities and social sciences through reading of prominent social theories of past four centuries. Consideration of writers from Rousseau and Wollstonecraft to Foucault and Beauvoir in historical context and from perspectives of academic specialties for which their work is fundamental. **21CW.** Special Topics. Seminar, three hours. Enforced requisite: course 21B. Examination of cross-section of classical and modern social theories and debates that shape them. Satisfies Writing II requirement.

**22A-22B-22CW. Toward World Economy: Perils and Promise of Globalization. (5-5-5)** Course 22A is enforced requisite to 22B, which is enforced requisite to 22CW. Limited to first-year freshmen. Letter grading. **22A-22B.** Lecture, three hours; discussion, two hours. Exploration of causes and mechanisms of globalization as well as its consequences. Critical examination of globalization theories, international institutions of trade, finance, governance, and overall impact of globalization on human society. **22CW.** Special Topics.

Seminar, three hours. Enforced requisites: course 22B, and English Composition 3 or 3H or English as a Second Language 36. Topics may include global governance, development, and health. Satisfies Writing II requirement.

**23A-23B-23CW. Inside Performing Arts: Interdisciplinary Exploration of Performance in Society and Culture. (5-5-5)** Course 23A is enforced requisite to 23B, which is enforced requisite to 23CW. Limited to first-year freshmen. Letter grading. **23A-23B.** Lecture, four hours; discussion, two hours. Introduction to historical development and evolution of performing arts, aesthetic theories and practices, and political, social, and cultural contexts within which performance has evolved. **23CW.** Special Topics. Seminar, three hours. Enforced requisites: course 23B, and English Composition 3 or 3H or English as a Second Language 36. Topics include origins and ideas of performance, art and performance, and music as cultural expression. Satisfies Writing II requirement.

**M24A-M24B-M24CW. Work, Labor, and Social Justice in U.S. (6-6-6)** (Same as Labor Studies M1A-M1B-M1CW.) Course M24A is enforced requisite to M24B, which is enforced requisite to M24CW. Limited to first-year freshmen. Letter grading. **M24A-M24B.** Lecture, three hours; discussion, two hours. Exploration of ways in which work has been transformed over last century, impact of this transformation on working people, and role of labor movement as force for social justice. **M24CW.** Special Topics. Seminar, three hours. Enforced requisite: course M24B. Topics include labor law/history, gender, race, and workplace. Satisfies Writing II requirement.

**25A-25B-25CW. Politics, Society, and Urban Culture in East Asia. (6-6-6)** Course 25A is enforced requisite to 25B, which is enforced requisite to 25CW. Limited to first-year freshmen. Letter grading. **25A-25B.** Lecture, three hours; discussion, two hours. Comprehensive exploration of historical evolution of popular East Asian urban culture and interrelationship of East Asian politics, social life, and economic and urban cultural expression. **25CW.** Special Topics. Seminar, three hours. Enforced requisite: course 25B. In-depth examination of issues in historical and contemporary East Asian popular culture. Satisfies Writing II requirement.

**26A-26B-26CW. Poverty and Health in Latin America. (6-6-6)** Course 26A is enforced requisite to 26B, which is enforced requisite to 26CW. Limited to first-year freshmen. Letter grading. **26A.** Lecture, three hours; discussion, two hours. Introduction to social determinants of health, with focus on cultural, historical, socioeconomic, public health, medical, political, and artistic context of poverty in modern Latin America and on different local, national, and regional responses to health inequities. Exploration of major trends and debates that have shaped and continue to define issues related to poverty and health in region. **26B.** Lecture, three hours; discussion, two hours. Enforced requisite: course 26A. Responses to health inequities and possible solutions to promote improved health outcomes and to social determinants of health illustrated through examples of current programs and policies. Major areas for addressing health inequity include governance, community action, social justice and human rights movements, health sector and public health programs, and global priorities. Introduction to tools to promote health, such as service delivery, health workforce, information systems, access to medicines, health systems financing, and health systems governance. **26CW.** Special Topics. Seminar, three hours. Enforced requisite: course 26B. Students meet weekly in small group seminars based on topics related to course theme to allow them to study, discuss, and then generate policy solutions to create more equitable healthcare in Latin America. Focus on one particular area of Latin America or one local Latin American community to reflect field study sites to eventually be offered and serve as preparation for summer field study component. Satisfies Writing II requirement.

**M27A-M27B-M27CW. Global Islam. (6-6-6)** (Formerly numbered 27A-27B-27CW.) (Same as Islamic Studies M27A-M27B-M27CW.) Course M27A is enforced requisite to M27B, which is enforced requisite to M27CW. Introduction to Islam, immensely diverse

global tradition which is second largest religion. Study of Islam and Muslims within framework of study of global religious traditions and emphasis on profound diversity of localized belief and practice found across world. Examination of Islam's evolution across 15 centuries, from late antiquity—when it emerged as localized religion in Central Arabia—to modern era where it is practice from U.S. to Indonesia. Concentration on broad analytical categories in study of religion such as text, culture, history, and prophecy. Students transition to more complex analyses through chronological overview of Islamic history. Study also of case studies of Muslim global networks in arenas such as art, music, literature, and political thought. **M27A-M27B.** Lecture, three hours; discussion, one hour. P/NP or letter grading. **M27CW.** Special Topics. Seminar, three hours. Satisfies Writing II requirement. Letter grading.

**30A-30B-30CW. Never-Ending Stories: Multidisciplinary Perspectives on Myth and Folklore. (6-6-6)** Course 30A is enforced requisite to 30B, which is enforced requisite to 30CW. Limited to first-year freshmen. Letter grading. **30A-30B.** Lecture, three hours; discussion, two hours. Exploration in depth of particular mythological traditions, aspects of storytelling, role of myth in culture, society, and/or art, and contributions of various disciplines to study of myth. **30CW.** Special Topics. Seminar, three hours. Enforced requisite: course 30B. Topics may include myth and modern art (including literature, music, and film), myth and ritual, oral tradition and orality, myth and political ideology, myth and science, hero and trickster, and myths of creation. Satisfies Writing II requirement.

**40A-40B-40CW. Chinese Classics, Their Legacy in East Asia, and Reimagination in Modern Times. (6-6-6)** Course 40A is enforced requisite to 40B, which is enforced requisite to 40CW. Limited to first-year freshmen. Letter grading. **40A-40B.** Lecture, three hours; discussion, two hours. Learning in traditional China was defined through mastery of canon of classic texts that students memorized as part of their education. These classics were also taught in Vietnam, Japan, and Korea, and served to create cultural ties across East Asia. Many more texts came to be considered classics—works of enduring value, read by large numbers of people across centuries, including religious scriptures, legal codes, novels, paintings, and performances. Exploration of how Chinese classics have been used and reimagined in different places and times to demonstrate enduring importance of these texts and cultural artifacts. Emphasis on how these works were interpreted throughout East Asia, relationship with past, and how shared history is seen as informing present. **40CW.** Special Topics. Seminar, three hours. Enforced requisite: course 40B. In-depth examination of Chinese classic texts and their reimagination in modern times. Satisfies Writing II requirement.

**48A-48B-48CW. Political Violence in Modern World: Causes, Cases, and Consequences. (6-6-6)** Course 48A is requisite to 48B, which is requisite to 48CW. Limited to first-year freshmen. **40A-40B.** Lecture, three hours; discussion, two hours. Exploration of causes, dynamics, and consequences of political violence. Political violence can include anything from extra-legal warfare, ethnic cleansing and genocide, civil war, riots and pogroms, terrorism and state repression, revolution and counter-revolution, and more. Political violence is not modern phenomenon: it has been part of human experience from antiquity to present. Examination, from interdisciplinary perspective, of political violence, in particular, extreme form of political violence, genocide. Readings of theoretical and empirical works from history, comparative literature, sociology, political science, psychology, and more. Employs art, film, literature, diaries, memoirs, and news media to encourage critical thinking about political violence. P/NP or letter grading. **40CW.** Special Topics. Seminar, three hours. Requisite: course 48B. In-depth examination of political violence. Satisfies Writing II requirement. Letter grading.

**60A-60B-60CW. America in Sixties: Politics, Society, and Culture, 1954 to 1974. (6-6-6)** Course 60A is enforced requisite to 60B, which is enforced requisite to 60CW. Limited to first-year freshmen. **60A-60B.** Lecture, three hours; discussion, two hours. Interdisciplinary exploration of U.S. society from Brown versus

Board of Education (1954) to resignation of Nixon. Topics include civil rights, Great Society, anti-Vietnam war movement, political and artistic countercultures, and changes in technology, law, and media. P/NP or letter grading. **60CW.** Special Topics. Seminar, three hours. Enforced requisite: course 60B. In-depth examination of political and cultural issues affecting U.S. society from 1954 to 1974. Satisfies Writing II requirement. Letter grading.

**66A-66B-66CW. Los Angeles: The Cluster. (6-6-6)** Course 66A is enforced requisite to 66B, which is enforced requisite to 66CW. Limited to first-year freshmen. Letter grading. **66A-66B.** Lecture, three hours; discussion, two hours. In-depth look at city in which UCLA is located. Drawing on concept of Los Angeles as laboratory, students engage in systematic way with urban area that is to be their home for next several years. As they do, they come to understand peoples, spaces, politics, and cultures of Los Angeles and its metropolitan region in both present and past, as well as Los Angeles' place in urban world. **66CW.** Special Topics. Seminar, three hours. Enforced requisite: course 66B. Topics may include musical cultures of Los Angeles, Los Angeles as global city, Los Angeles in fiction, Southern California and environment, planning for 21st-century Los Angeles, and housing and homelessness in Los Angeles. Satisfies Writing II requirement.

**70A-70B-70CW. Evolution of Cosmos and Life. (6 each)** Course 70A is enforced requisite to 70B, which is enforced requisite to 70CW. Limited to first-year freshmen. **70A-70B.** Lecture, three hours; discussion, two hours. Use of concept of evolution, as it applies to biological organisms, Earth, solar system, and universe itself, to introduce students to both life and physical sciences. Examination of evolution of universe, galaxy, solar system, and Earth in course 70A; focus on evolution of life in course 70B. P/NP or letter grading. **70CW.** Special Topics in Life and Physical Sciences. Seminar, three hours. Enforced requisite: course 70B. Not open for credit to students with credit for course 70DW. Examination in depth of various issues of evolution in cosmos from life sciences perspective. Satisfies Writing II requirement. Letter grading.

**M71A-M71B-M71CW. Biotechnology and Society. (6-6-6)** (Same as Society and Genetics M71A-M71B-M71CW.) Course M71A is enforced requisite to M71B, which is enforced requisite to M71CW. Limited to first-year freshmen. **M71A-M71B.** Lecture, three hours; discussion, two hours. Exploration of methods, applications, and implications of biotechnology and of ethical, social, and political implications as well as biological underpinnings. P/NP or letter grading. **M71CW.** Special Topics. Seminar, three hours. Enforced requisite: course M71B. Topics include in-depth examination of ethics and human genetics, bioweapons and biodefense, sex and biotechnology. Satisfies Writing II requirement. Letter grading.

**M72A-M72B-M72CW. Sex from Biology to Gendered Society. (6-6-6)** (Same as Communication M72A-M72B-M72CW, Society and Genetics M72A-M72B-M72CW, and Sociology M72A-M72B-M72CW.) Course M72A is enforced requisite to M72B, which is enforced requisite to M72CW. Limited to first-year freshmen. Letter grading. **M72A-M72B.** Lecture, three hours; discussion, two hours. Examination of many ways in which sex and sexual identity shape and are shaped by biological and social forces, approached from complementary perspectives of anthropology, biology, medicine, and sociology. Specific topics include biological origins of sex differences, intersex, gender identity, gender inequality, homosexuality, sex differences, sex/gender and law, and politics of sex research. **M72CW.** Special Topics. Seminar, three hours. Enforced requisite: course M72B. Topics may include politics of reproduction, sexuality, sexual identity, social construction of gender, and reproductive technologies. Satisfies Writing II requirement.

**73A-73B-73CW. Brain, Bodymind, and Society: All in Your Head? (6-6-6)** Course 73A is enforced requisite to 73B, which is enforced requisite to 73CW. Limited to first-year freshmen. **73A-73B.** Lecture, three hours; discussion, two hours. Drawing on several disciplines including disability studies, literary and film analysis,

neurobiology, philosophy, and psychology, development of interdisciplinary account of how we relate our increasingly sophisticated knowledge of brain to contexts and meanings of subjectivity, mental health, and disability. Students make connections through interdisciplinary discussion of contemporary and historical understandings of brain structure and function; biological, psychological, and philosophical approaches to memory and learning; neuroscientific and philosophical approaches to consciousness; literary and filmic representations of mental illness and disability; and disability and mad studies critiques of biomedical model of mental illness. P/NP or letter grading. **73CW.** Special Topics. Seminar, three hours. Enforced requisite: course 73B. Topics include mental illness, neuroscience in popular culture, and neuroscience of decision making. Satisfies Writing II requirement. Letter grading.

**80A-80B-80CW. Frontiers in Human Aging. (6-6-6)** Course 80A is enforced requisite to 80B, which is enforced requisite to 80CW. Limited to first-year freshmen. **80A-80B.** (Formerly numbered 80B.) Lecture, three hours; discussion, two hours. Examination of aging process from vantage points of multiple disciplines, including biology, psychology, sociology, ethics, and public policy. Study of biomedical and biological aging and psychological, social, and ethical implications of phenomena. P/NP or letter grading. **80CW.** Special Topics. Seminar, three hours. Enforced requisite: course 80B. In-depth examination of gender and aging, cellular aging, cancer, and aging of brain. Satisfies Writing II requirement. Letter grading.

**97A. Cluster Colloquia: Variable Topics. (1)** Seminar, one hour. Variable topics course designed for students who have completed one GE cluster. Study, through small-group discussion and projects, of selected topics related to one cluster theme or topic. Consult Schedule of Classes for topics and instructors. May be repeated once for credit. P/NP grading.

## Upper-Division Courses

**180A. Cultural Heritage and Representation of Identity: Debates and Writing. (5)** Lecture, three hours; discussion, two hours. Course 180A is requisite to 180B. Designed for transfer students. How tangible and intangible materials of human culture are used by their creators to fashion and refashion their identities over time and in different spaces. Introduction to multidisciplinary perspectives on human cultures and associated objects they create, different issues attendant on excavation, preservation, and presentation of these materials to different publics, and what all of this means to those whose heritage is being studied and/or exhibited through use of many rich cultural resources on and off campus. Examination of topics related to cultural heritage, with strong focus on debate and writing. Writing of weekly short essays or Op-ed pieces based on what students have learned. Letter grading.

**180B. Cultural Heritage and Representation of Identity: Special Topics. (5)** Seminar, three hours. Requisite: course 180A. How tangible and intangible materials of human culture are used by their creators to fashion and refashion their identities over time and in different spaces. Introduction to multidisciplinary perspectives on human cultures and associated objects they create; different issues attendant on excavation, preservation, and presentation of these materials to different publics; and what all of this means to those whose heritage is being studied and/or exhibited through use of many rich cultural resources on and off campus. Letter grading.

## Graduate Course

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

Steven M. Peterson, PhD  
Paul Von Blum, JD, *Emeritus*

### Lecturers

Nushin Arbabzadah, MPhil  
Celia B. Feramisco, MBA  
Mark A. Huppín, JD, PhD  
Brian S. Hurwitz, MA  
Gabriel B. Jones, PhD  
James A. Jusko, JD  
Raffi L. Kassabian, JD  
Karyl K. Kicenski, PhD  
Nazo L. Koulloukian, JD  
James S. Newton, BA  
Michael W. Suman, PhD

### Adjunct Assistant Professors

Abigail H. Goldman, MS  
Barry A. Sanders, JD

## Overview

The Department of Communication is an interdisciplinary group of scholars interested in communication at many levels of analysis, including digital and mass media, political

communication, and interpersonal social interaction.

## Undergraduate Major

### Communication BA

The major in Communication is an interdisciplinary curriculum leading to a Bachelor of Arts (BA) degree. It seeks to provide students with comprehensive knowledge of the nature of human communication at multiple levels of analysis. The major coursework includes content from the natural and social sciences, as well as the humanities. Four areas of focus are offered: communication technology and digital systems, interpersonal communication, mass communication and media institutions, and political and legal communication.

### Learning Outcomes

The Communication major has the following learning outcomes:

- Demonstrated mastery of substantive areas of the field, including mass communication and media institutions, interpersonal communication, communication technology and digital systems, and political and legal communication
- Placement of particular communication events or examples in the context of broader patterns of human activity
- Critical evaluation of arguments based on evidence
- Design and implementation of original research projects
- Completion, using acquired knowledge and skills, of a project that demonstrates core competencies in the field
- Active participation in learning-in-practice opportunities
- Evaluation and critique of oral presentations
- Demonstrated mastery of conceptualization, formulation, and oral presentation of the student's own ideas

### Entry to the Major

#### Admission

Enrollment in the major is limited. Admission to the major is by application to the committee in charge. Applications are available on the [department website](#) to regularly enrolled UCLA students during spring quarter.

#### Transfer Students

Transfer applicants to the Communication major with 90 or more units must complete at least four of the following seven lower-division required courses: Communication 10 or one interpersonal communication and one mass communication course, one public address course, one linguistics course, one statistics course, and three courses from psychology, American government, sociology, and microeconomics or political economy.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

Students are encouraged but not required to complete as many lower-division preparation for the major courses as possible before admission to the program.

*Required:* Communication 1, 10, one course selected from Anthropology 4, Linguistics 1, or Philosophy 23, one statistics course from Economics 41 or Statistics 10. Three additional courses must be selected from Political Science 40, Psychology 10, Sociology 1, and Economics 1 or 5 or Political Science 30.

### The Major

Students must complete 10 or 11 upper-division courses. The practicum requirement can be satisfied by a course that also satisfies a core or an additional area elective course requirement.

*Required Core Courses:* Communication 100, 150.

*Required Area Courses:* A total of eight courses from the following four areas, including at least one core course in each area:

*Communication Technology and Digital Systems—Core courses:* Communication 129, 131, 151, 154, 155, 156, 158, 159; *elective courses:* Communication 157, 188C, 191C.

*Interpersonal Communication—Core courses:* Communication 110, 111, M113, 114, 115, 120, 121, 122, M123, 126; *elective courses:* Anthropology 136A, M150, 151, Communication 108, 109, 112, 116, M117, 118, 119, M125, M127, 131, M144A, M144B, 188B, 191B, Linguistics 103, 170, Philosophy 172, Psychology 135 (or Sociology 132), 137C, M165, 177, Sociology 134, 156.

*Mass Communication and Media Institutions—Core courses:* Communication 133, 140, M147, 152; *elective courses:* Asian American Studies 172C, Communication 105, 106, 107, 128, 130, 132, 136, 141, 143, 145, 146, 148, M149, M165, 166, M169, 175, 179, 182, 183, 186, 187, 188A, 191A, Film and Television 108, Political Science M142D.

*Political and Legal Communication—Core courses:* Communication 101, 160, 162, 168, 170, 174; *elective courses:* Communication 102, 163, 164, 171, 173, M176, 178, 188D, 191D, Political Science M141A, 141B (or Sociology 133), 141C, 141E.

*Required Practicum Course:* One course from Communication 101, 102, 103A, 103B, 104, 109, 111, 116, M117, 155, 160, M176, 188E, or 191E.

### Honors Program

The departmental honors program provides exceptional students an opportunity for advanced research and study, under the guidance of a faculty member, that leads to the completion of an honors thesis. To qualify for graduation with departmental honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.6 or better in upper-division coursework in the major and an overall GPA of 3.3 or better in all completed UC coursework, (3) complete Communication

198A, 198B, and 198C, and (4) produce a completed satisfactory honors thesis (as determined by a recommendation of their thesis adviser and final approval by the department chair). Contact the student affairs officer for more information.

## Computing Specialization

Majors in Communication may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Program in Computing 10A and 10B, or Computer Science 31 and 32, and (3) completing four courses (at least one of which must be in communication) from Communication 122, 129, 131, 151, 153, 154, 155, 156, 158, Program in Computing 10C, 16A, 16B, 20A, 40A.

Courses need to be completed with a grade of C- or better in each course and a combined grade-point average of at least 2.0. Students must petition for admission to the program and are advised to do so after they complete Program in Computing 10B or Computer Science 32 (petitions should be filed in the Counseling Office). Students graduate with a bachelor's degree in Communication and a specialization in Computing.

## Graduate Major

### Communication MS, PhD

The program's core areas of specialization include: communication and cognition, political communication, and computational communication. Students are trained in the core of communication scholarship by engaging in coursework and research that aligns with the broader discipline.

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Communication

### Lower-Division Courses

**1. Principles of Oral Communication. (4)** Lecture, four hours. Enforced requisite: satisfaction of Entry-Level Writing requirement. Examination of foundations of communication and public speaking. Consideration of number of basic theories related to study of communication and development of skills to enable composition and delivery of speeches in accordance with specific rhetorical concepts. Improvement of ability to analyze, organize, and critically think about communicative messages while becoming better equipped to articulate ideas. P/NP or letter grading.

**1A. Public Speaking for Nonnative Speakers. (4)** Lecture, four hours. Designed for nonnative speakers of English to increase fluency and vocabulary while improving presentation skills, language usage, reasoning, style, and delivery. Conversation and pronunciation practice. Focus on theory and practice of public speaking, including selection of content, organization of ideas, language, and delivery. Practice in extemporaneous and manuscript speaking. Critical analysis of speeches in both contemporary and historical settings.

Special emphasis on group discussions, evaluations, practice of both public and private speaking skills. Offered in summer only. P/NP or letter grading.

**1B. Learning American English and Culture from Movies. (4)** Lecture, four hours. Advancement of students' fluency in conversational English while increasing their awareness of American popular culture. Primer on American-style colloquial English and nuances of contemporary customs and values offered through guided immersion in popular cinema. Offered in summer only. P/NP or letter grading.

**10. Introduction to Communication. (5)** Lecture, four hours; discussion, one hour. Introduction to study of interpersonal and mass communication using interdisciplinary approach. Exploration of basic methods and theoretical perspectives that social scientists and others use to study interpersonal and mass communication, and basic concepts used to describe and explain that communication. Historical overview of each major mass media. Study of significant current topical issues related to means of communication that reach large numbers of people. Letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**M72A-M72B-M72CW. Sex from Biology to Gendered Society. (6-6-6)** (Same as Clusters M72A-M72B-M72CW, Society and Genetics M72A-M72B-M72CW, and Sociology M72A-M72B-M72CW.) Course M72A is enforced requisite to M72B, which is enforced requisite to M72CW. Limited to first-year freshmen. Letter grading. **M72A-M72B.** Lecture, three hours; discussion, two hours. Examination of many ways in which sex and sexual identity shape and are shaped by biological and social forces, approached from complementary perspectives of anthropology, biology, medicine, and sociology. Specific topics include biological origins of sex differences, intersex, gender identity, gender inequality, homosexuality, sex differences, sex/gender and law, and politics of sex research. **M72CW.** Special Topics. Seminar, three hours. Enforced requisite: course M72B. Topics may include politics of reproduction, sexuality, sexual identity, social construction of gender, and reproductive technologies. Satisfies Writing II requirement.

**88. Sophomore Seminars: Communication Studies. (4)** Seminar, three hours. Limited to maximum of 20 lower-division students. Readings and discussions designed to introduce students to current research in discipline. Culminating project may be required. P/NP or letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**100. Communication Science. (4)** Lecture, three hours. Requisite: course 10 or Linguistics 1 or Sociology 1 or Psychology 10. Examination of fundamental issues in

communication sciences. Exploration of theoretical and methodological approaches that bridge major areas of current interdisciplinary communication research. P/NP or letter grading.

**101. Freedom of Communication. (4)** Lecture, four hours. Analysis of legal, political, and philosophical issues entailed in rights of free expression, access to audience, and access to information. Study of court decisions governing freedom of communication in U.S. P/NP or letter grading.

**102. Principles of Argumentation. (4)** Lecture, four hours. Analysis of propositions, tests of evidence, briefing. Study of hindrances to clear thinking, ambiguity of terms, and prejudices. Critical analysis of selected argumentative speeches. P/NP or letter grading.

**103A-103B. Forensics. (4-4)** Lecture, three hours. Participation in on-campus and intercollegiate forensics activities, including exposure to fundamentals of competitive forensic events. Students practice public address, interpretation of literature, debate, oratory, and extemporaneous speaking and engage in independent research and analysis. P/NP or letter grading. **103A.** Basic preparation; **103B.** Advanced practicum in speech.

**104. Analysis and Briefing. (4)** Lecture, three hours. Intensive study of selected political or social issues, preparation of bibliography, analysis and evaluation of issues and arguments. P/NP or letter grading.

**105. Media Conspiracy Theories in U.S. and Middle East. (4)** Lecture, three hours. Through mass and digital media, conspiracy theories are reshaping politics and society around world. Although conspiracy theories are globally widespread, they find particularly fertile ground in Middle East and in U.S. Definition, identification, and analysis of conspiracy theories as they appear in media of Western democracies and Muslim majority societies. Interdisciplinary approach to study of conspiracy theories. Case studies, such as conspiracies about 9/11, taken from Middle Eastern media sources in English translation. Background knowledge of Middle East not required. P/NP or letter grading.

**106. Reporting America. (4)** Lecture, three hours. Introduction to main western European and Middle Eastern news media, with materials in English. Exploration of how U.S. is represented in Europe, Middle East, Iran, and Afghanistan, with focus on three comparative case studies of Britain, Spain, and Germany. In-depth coverage of American news as reflected in Europe and Middle East. P/NP or letter grading.

**107. Terrorism in Journalism. (4)** Lecture, three hours. How do media outlets in Middle East represent Islamist terrorism? How do they describe, analyze, and comment on suicide attacks? Focus on Arab, Afghan, and Iranian media discussions of this phenomenon to explore evolution of meaning of terrorism in Muslim societies. P/NP or letter grading.

**108. Communication and Identity. (4)** Lecture, three hours. Study of relationships among communication, culture, and identity, and examination of ways in which texts (broadly construed) constitute experience, difference, and subjectivity. Focus on function of language, representation and meaning in construction of self, social collectives, and world views. Consideration of how communication is performative endeavor for humans seeking to construct identity. Students are prepared to describe and explain theories that detail performance as communicative form, analyze ways language and discourse function as texts that work to produce significant personal and social identities, and describe specific principles, motivations, and theoretical categories within interdisciplinary study of culture that produce identity. Letter grading.

**109. Entrepreneurial Communication. (4)** Lecture, four hours. Study of entrepreneurial communication from foundations in internal and external communication and development of data analysis, interpretation, and presentational skills utilized in existing, as well as in development of, contemporary innovative businesses. P/NP or letter grading.

**110. Gender and Communication. (4)** Lecture, four hours. Understanding gender is fundamental part of understanding who we are as human beings. Exploration of crucial role of gender in spheres of life involving

communication and role and origins of gender differences in communication. Contexts of communication include family, workplace, sexuality, and intimate relationships. Discussion of how media influence conceptions of gender. P/NP or letter grading.

**111. Conflict and Communication. (4)** Lecture, three hours. Analysis of when and why conflict is prevalent in daily lives (including mass media) and how communication affects reactions to and consequences of conflict. Conflict is part of our evolutionary heritage. How well we handle various conflicts affects, to great degree, our success or failure wherever we interact with others, including intimate relations, school, and workplace. P/NP or letter grading.

**112. Current Issues in Vocal Communication. (4)** Seminar, three hours. Prerequisite: course 118 or 120 or 126. Examination of contemporary issues in evolutionary communication research. Topics include design of communication systems, animal signaling, social communication, and speech production and perception. P/NP or letter grading.

**M113. Nonverbal Communication and Body Language. (4)** (Same as Psychology M137B.) Lecture, three hours. Examination of how various forms of nonverbal communication convey meaningful information to perceivers, with focus on both production and perception of multiple communication formats (e.g., affect expression of face and body, gesture, and kinematics), with strong emphasis on body language. Readings from variety of related fields. P/NP or letter grading.

**114. Understanding Relationships. (4)** Lecture, four hours. Explanation of types of communication that occur in close relationships, especially romantic relationships. In-depth coverage of variety of relationship topics, including intimacy, stages of intimate relationships, why we choose to get involved with some people as opposed to others, flirting, and self-disclosure. P/NP or letter grading.

**115. Interpersonal Dynamics. (4)** Lecture, three hours. Survey of recent scientific approaches to dyadic communication and relationships. Surveys selection of experimental, observational, and quantitative methods, and how they can be applied to key issues in dyadic communication and interpersonal relationships. Topics include recent technological techniques for measuring and influencing dyads, including role of peripheral devices such as phones or other wearable devices. Consideration of dyadic processes including influence, mimicry, leadership, active listening, and more. Consideration also of how findings apply beyond dyads to teams. Letter grading.

**116. Communication and Conflict in Couples and Families. (4)** Lecture, three hours. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce). P/NP or letter grading.

**M117. Negotiation. (4)** (Same as Labor Studies M117.) Lecture, four hours. Art and science of negotiation in securing agreements between independent parties. Theory and practice that underlies successful negotiation. Experiential course in which students learn broad array of negotiation skills, including identifying one's own (and others') communication style, identifying and incorporating components of successful negotiation, and resolving conflict between parties. Letter grading.

**118. Language and Music. (4)** Lecture, three hours. Cognitive science exploration of structure and evolution of language and music and their relationships to communication, cognition, and culture. P/NP or letter grading.

**119. Voice and Its Perception. (4)** Lecture, four hours. Focus on how human voice conveys information about identity of speakers, physical characteristics, personality, and emotional state, and on how listeners utilize this information to make judgments about speakers. Letter grading.

**120. Group Communication. (4)** Lecture, four hours. Examination of group communication from perspectives of evolutionary psychology, communications, and psycholinguistics. Topics include evolution of co-

operation, ingroup and outgroup dynamics, gossip, music improvisation, and conversational behavior. P/NP or letter grading.

**121. Communication Development. (4)** Lecture, three hours. Topics in childhood development of human interpersonal communication, including production and perception of communicative signals at different ages, methods for studying communication development, physiological and social mechanisms, cross-cultural similarities and differences in communication development, effects of media and technology, and disorders. Letter grading.

**122. Visual Communication. (4)** Lecture, three hours; discussion, one hour. Exploration of visual basis of communication through study of social minds of infants, adults, and nonhuman primates. Letter grading.

**M123. Social Cognition. (4)** (Formerly numbered 123.) (Same as Psychology M137M.) Lecture, three hours. Survey of research from field of social cognition, with emphasis on understanding cognitive processes involved in interpersonal and intergroup communication. Topics include attention, interpretation, evaluation, judgment, attribution, and memory processes. Consideration of both controlled and automatic processes. Discussion of roles of motives, goals, and affective variables. P/NP or letter grading.

**M124R. Evolution of Language. (4)** (Same as Anthropology M124R.) Lecture, three hours; discussion, one hour (when scheduled). Recommended preparation: Anthropology 1 or 4 or Linguistics 1. Designed for juniors and seniors. How did human capacity for language evolve? Examination of origin of human language from biological, comparative, developmental, social and computational perspectives. Topics include evolutionary theory, linguistic structure, gesture and speech, animal communication, language learning, language disorders, and computational models of language emergence. P/NP or letter grading.

**M125. Talk and Social Institutions. (4)** (Same as Sociology CM125.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Practices of communication and social interaction in number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. P/NP or letter grading.

**126. Evolution of Interpersonal Communication. (4)** Lecture, four hours. Examination of current issues in interpersonal communication from perspectives of evolutionary psychology and biology. Topics include coevolution of signaler and receiver adaptations, nonverbal communication, courtship behavior, miscommunication between sexes, implied language use, and deception. Letter grading.

**M127. Animal Communication. (4)** (Same as Anthropology M128Q.) Lecture, three hours. Designed for Anthropology and Communication majors. Evolution, functions, design, and diversity of animal communication systems such as bird song, dolphin calls, whale song, primate social signals, and human language. P/NP or letter grading.

**128. Play and Entertainment. (4)** Lecture, three hours. Entertainment is significant component of both interpersonal and mass communication. Examination of evolutionary history, cognitive mechanisms, and social dimensions of play and entertainment, as well as their possible pedagogical effects. Letter grading.

**129. Gaming Mind. (4)** Lecture, three hours. Exploration of various aspects of online computer games that are becoming increasingly popular and technically sophisticated, with focus on what people learn from games, how they learn it, and whether learning is potentially useful. Letter grading.

**130. Science of Language. (4)** Lecture, three hours. Introduction to scientific foundations of psycholinguistics, and connections to applied issues in communication. Survey of various scientific methods, and how they are applied to key issues in language and communication. Discussion of how we can measure meanings of words, complexity of sentences, and study of how these are processed (and produced) during communication. Includes some hands-on exer-

cises, including learning some scientific tools that can be used both in future research and in field. Letter grading.

**131. Computer Models of Communicators. (4)** Lecture, three hours. Introduction to using computerized methods to model communication processes. Survey of various computational methods, and how to apply these in hands-on exercises. Exercises help setup small-scale simulations of communicators on personal computers. Covers computer models for individual communicators, dyads, groups, and collective (mass) systems. Letter grading.

**132. Multicultural Television. (4)** Lecture, four hours. Critical evaluation of television programming and scholarly research of new developments in television. Application of research findings by students to real-world contexts in course discussions, papers, and presentations. Letter grading.

**133. Decoding Media Strategies. (4)** Lecture, three hours; discussion, one hour. Today's mass media are thriving business, central part of cultural identity, and vital component of democracy. How do these different and often conflicting functions determine content of mass media? Examination of psychological dynamics of advertising, nature of entertainment and mass culture, practice of propaganda, and changing patterns of media ownership. Assessment of impact of mass media on individuals and social institutions. Letter grading.

**136. Media Portrayals of Gays and Lesbians. (4)** Lecture, three hours. How mass media have portrayed gays and lesbians and why. Media's depiction, portrayal, and handling of homosexuality, with particular focus on how gays and lesbians have been negatively stereotyped, portrayed unrealistically, and often not portrayed at all. Exploration not only of how gays and lesbians have been represented, but also why certain portrayals have tended to dominate. P/NP or letter grading.

**140. Theory of Persuasive Communication. (4)** Lecture, four hours. Dynamics of communication designed to influence human conduct; analysis of structure of persuasive discourse; integration of theoretical materials from relevant disciplines of humanities and social sciences. Letter grading.

**141. Films of Persuasion: Social and Political Advocacy in Mass Society. (4)** Lecture, three hours; discussion, one hour. Films often provide commentary about public issues. Examination of how films communicate to large audiences about history, society, and politics. Critical evaluation of these works to understand power and limitations of films as social persuasion. Letter grading.

**143. Rhetoric of Popular Culture. (4)** Lecture, three hours. Rhetorical approach to study of U.S. popular culture. Examination, both at theoretical level and through specific case studies, of ways in which popular cultural texts perform rhetorically to influence political and social struggles shaping everyday life. How do particular artifacts or communicative texts constitute source for (re)negotiation of cultural meanings as well as greater understanding of ways language functions as vehicle for human action. Letter grading.

**M144A-M144B. Conversational Structures I, II. (4-4)** (Same as Sociology CM124A-M124B.) Lecture, three hours; discussion, one hour. P/NP or letter grading.

**M144A.** Introduction to various structures employed in organization of conversational interaction, such as turn-taking, action sequencing, and repair. **M144B.** Requisite: course M144A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

**145. Situation Comedy and American Culture. (4)** Lecture, three hours. Historical analysis of sitcom genre from its beginning in late 1940s to present. Investigation of how sitcoms have influenced American life and culture and how American life and culture have influenced sitcoms. Exploration of issues of family, race and ethnicity, class and economy, gender roles, and political culture. P/NP or letter grading.

**146. Evolution of Mass Media Images. (5)** Lecture, four hours; discussion/laboratory, one hour. Analysis of evolutionary psychology as basis for images se-

lected by media portraying women and/or minorities in entertainment, advertising, and informational communication. Letter grading.

**M147. Sociology of Mass Communication. (4)** (Same as Sociology M176.) Lecture, four hours; discussion, one hour (when scheduled). Studies in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society. P/NP or letter grading.

**148. Marketing Communications. (4)** Lecture, three hours. Examination of key concepts and methods in marketing communications in both traditional and digital media. Development and execution of communications strategies, with primary emphasis on consumer insight, branding, market segmentation and positioning, message strategy, promotion, and execution of marketing communications through appropriate media technologies. Letter grading.

**M149. Media: Gender, Race, Class, and Sexuality. (5)** (Same as Gender Studies M149 and Labor Studies M149.) Lecture, four hours; activity, one hour. Limited to junior/senior Communication and Gender Studies majors and Labor Studies minors. Examination of manner in which media culture induces people to perceive various dominant and dominated and/or colonized groups of people. Ways in which women, gay, lesbian, bisexual, transgendered, racial, and ethnic marginalized peoples, class relations, and other subaltern or subordinated groups are presented and often misrepresented in media. Investigation and employment of practical applications of communications and feminist theories for understanding ideological nature of stereotyping and politics of representation through use of media, guest presentations, lectures, class discussions, and readings. Introduction to theory and practice of cultural studies. Letter grading.

**150. Methodologies in Communication Research. (5)** Lecture, four hours; discussion, one hour. Prerequisite: Economics 41 or Statistics 10. Limited to Communication majors. Examination of quantitative and qualitative methodologies in communication research. Letter grading.

**151. Computer-Mediated Communication. (4)** Lecture, four hours. Examination of how computer technology, particularly Internet, has influenced patterns of human communication. History and distinctiveness of computer-mediated communication (CMC). CMC's influence on modern economic, political, and social interaction. Letter grading.

**152. Analysis of Communication Effects. (4)** Lecture, four hours. Survey of experimental and field research on effects of communications. Study of source, message, and environmental factors affecting audience response. P/NP or letter grading.

**153. Introduction to Data Science. (4)** Lecture, three hours. Prerequisite: one course from Computer Science 31, 32, Program in Computing 10A, 10B with grade of C+ or better, or equivalent. Examination of how large-scale data can be used to systematically measure various aspects of human activities. Review of series of computational and statistical methods which enable scalable analysis and cost reduction. Students learn to interpret and understand research findings and implications from published work. Review of ethical issues in data science, such as privacy and model biases. Investigation of limitations and risks of current methods. Discussion of various ways to improve transparency and accountability of data-driven research. Letter grading.

**154. Social Communication and New Technology. (4)** Lecture, four hours. Internet's digital core was designed for military command. Yet emerging network was gradually co-opted to perform communicative functions such as gossip, dating, news, entertainment, and trade. Exploration of history, social effects, and possible futures of digital communication. Letter grading.

**155. Artificial Intelligence and New Media. (4)** Lecture, three hours; discussion, one hour. Prerequisite: Computer Science 31 or 32 or Program in Computing 10A or 10B with grade of C+ or better. Artificial intelli-

gence (AI) and machine learning (ML) have made rapid progress in recent years on various fronts. Many of their advanced techniques are being transferred to number of domains such as business, transportation, medicine, advertisement, military operations, and social media, and aiding our decision making, planning, reasoning, and forecasting. Review of origin and modern development of artificial intelligence and its recent breakthroughs through many applications with special emphasis on its usages of media industry, e.g., personalization, recommendation, and targeted advertising. Covers its technical merits as well as controversies such as ethical and moral issues of AI, privacy concerns in data collection, and fair use of AI in general. Prior knowledge in mathematics, statistics, or computer science not required. Discussion of elementary technical details as course unfolds. Letter grading.

**156. Social Networking. (4)** Lecture, three hours. Investigation of how new online social networks have facilitated interpersonal interactions for knowledge sharing, romance, business, politics, and entertainment. Critical investigation of current popular social networking websites (e.g., Facebook, Twitter, YouTube) through social network analysis and other social science research methods. P/NP or letter grading.

**157. Celebrity, Fame, and Social Media. (4)** Lecture, three hours. Analysis of how following personal lives of media-created celebrities impacts self-esteem, connectedness, and personal relationships from cultural studies and social sciences perspectives, and how entities cultivate celebrity for financial gain. Topics include celebrity gossip and privacy, news sharing, public relations, and impact of social media on fan support, image construction, and damage control. P/NP or letter grading.

**158. Revolutions in Communication Technology. (4)** Lecture, three hours. Study of dynamic processes of innovation in history of communication from its earliest expressions to information age. Examination of developments in speech, images, and writing. Investigation of interactions of cognitive factors, social change, and technological innovation. Letter grading.

**159. Artificial Intelligence and Society. (4)** Lecture, three hours. Impact of artificial intelligence (AI) on society is growing rapidly. Exploration of questions of what if superhuman AI is achieved, will it free humans from tedious jobs or cause mass unemployment, and how to guarantee AI safety so that it will not annihilate human civilization. Letter grading.

**160. Political Communication. (4)** Lecture, four hours; discussion, one hour. Study of nature and function of communication in political sphere; analysis of contemporary and historical communications within established political institutions; state papers; deliberative discourses; electoral campaigns. Letter grading.

**162. Presidential Communication. (4)** Lecture, three hours. Examination of historical evolution of presidential communication environment, resources, and strategies, as well as how presidential campaign communication has evolved over time and implications for how presidents govern. Letter grading.

**163. Public Diplomacy. (4)** Seminar, four hours. Exploration of field of public diplomacy and its theory and practices. How points of view and imagery in context of international politics can be influenced and changed. Development of presentation skills and understanding of structure of profession. Letter grading.

**M165. Agitational Communication. (4)** (Same as Labor Studies M175.) Lecture, four hours; discussion, one hour (when scheduled). Theory of agitation; agitation as force for change in existing institutions and policies in democratic society. Intensive study of selected agitational movements and technique and content of their communications. Letter grading.

**166. Inside Hollywood. (4)** Lecture, four hours. Identification of how motivation and creativity interact with business interest, research, and policies in producing entertainment for media market. Letter grading.

**168. Communication and Media Law. (4)** Lecture, three hours. Focus on sample of most important intersections between law and communication: copyright, trademarks, freedom of speech, privacy, secrecy, surveillance, and publicity rights. Law and communica-

tion have been intertwined since introduction of book censorship and licensing in late 16th century, and blasphemy laws before that. That relationship has grown increasingly complex in time in response to technological changes in communication media, evolution of modern state forms, and changing expectations about freedom of and responsibility for both communication and information gathering. From music piracy, knock-offs of famous brands, ubiquitous presence of closed-circuit television, facial recognition software, global tracking systems, biosensors, and data mining practices, intersection between communication, media, and law has become part of our life, on scale and to extent that would have been unthinkable few years ago. Letter grading.

**M169. Critical Vision: History of Art as Social and Political Commentary. (5)** (Same as Honors Collegium M179.) Seminar, three hours. Study of tradition of visual arts (painting, graphic art, photography, sculpture) as vehicles for social and political commentary. P/NP or letter grading.

**170. Legal Communication. (4)** Lecture, three hours; discussion, one hour. Review of Fifth Amendment privilege against self-incrimination, including analysis of Miranda warnings, police interrogation procedures, coerced confessions, and why innocent people confess. Examination of jury behavior, reliability of eyewitness testimony, and fair trials. Mock trial presentation. Intimate expression and right to define one's own concept of existence and meaning, using examples of evolving rulings on same-sex marriage, abortion, and right to die. Use and misuse of grand juries in police misconduct cases, including Eric Brown, Michael Garner, and Breonna Taylor cases. Questions of judicial activism, legal precedent, and standards of review. Letter grading.

**171. Theories of Freedom of Speech and Press. (4)** Lecture, three hours. Exploration of relationship between freedoms of speech and press and values of liberty, self-realization, self-government, truth, dignity, respect, justice, equality, association, and community. Study of significance of these values examined in connection with issues such as obscenity, defamation, access to media, and control of commercial, corporate, and government speech. P/NP or letter grading.

**173. Affect and Emotion in Political Communication. (4)** Lecture, three hours. There is growing body of work in political communication that emphasizes importance of affect, emotion, and personality in politics. Sensitivity to threat or disgust; reactions of fear, anger, or happiness; tendency to focus more on negative than on positive information—each of these can impact feelings about candidates, and positions on wide range of domestic and foreign issues. Many of these feelings are in reaction to mass-mediated information; and changing media technologies likely increases volume of affective or emotional content reaching public. Review of recent work on these themes, drawn from both media psychology and political communication. Letter grading.

**174. Entertainment and Politics. (4)** Lecture, three hours. Research in political communication often focuses on news coverage. Our ideas about world around us do not just come from news content, however—we are affected by wide range of entertainment media as well. Consideration of how changes in media technology have increasingly broken down division between news and entertainment. Review of work on impacts that entertainment-focused media—including television shows, movies, and music—have on political preferences. Letter grading.

**175. Criticism and Public Arts. (4)** Lecture, four hours; discussion, one hour (when scheduled). Introduction to methods and problems of criticism in public arts. Study of several types of critical methods: formalistic, analogue, pragmatic, and aesthetic criticism. Topics include definition of art and criticism, aesthetic media, genre and resources of film, television, theater, and public discourse, varieties of critical method, problems of critical judgment. Letter grading.

**M176. Visual Communication and Social Advocacy. (4)** (Same as Labor Studies M176.) Lecture, four hours. Visual communication reaches diverse audiences in communicating major social and political topics. Cartoons, posters, murals, and documentary

photography have had powerful world impact. Survey of all four genres of visual communications as features of modern mass media. Letter grading.

**178. Propaganda and Media. (4)** Lecture, three hours. Examination of nature of propaganda, institutional structure of American media, and relationship between propaganda and American news media. History of propaganda in America from World War I era forward, competing theories of democracy and media, and role of corporations in propaganda and news. Letter grading.

**179. Images of U.S. (4)** Lecture, four hours. Awareness of international role of U.S. necessitates clear understanding of way our nation is perceived by others. Exploration of roots of U.S. images in minds of people abroad. Analysis of influences that contribute to images and ways in which images affect practical matters. P/NP or letter grading.

**182. Nonverbal Communication in Architecture. (4)** Lecture, four hours. Study of how elements of design and style of various buildings in architectural history send messages to viewers and users of such buildings. Letter grading.

**183. Media and Mind. (4)** Lecture, three hours. Investigation of media persuasion and entertainment appeal through three intersecting approaches: study of cognition, reflection on personal experience, and hands-on analysis of television, film, and radio. Topics include perception, imagination, narrative, play, emotion, and dreams. Students collaborate with each other to assemble media critiques and create their own short stories. P/NP or letter grading.

**185. Field Studies in Communication. (2 to 4)** Lecture, two hours. Designed for juniors/seniors. Fieldwork in communication. Students participate in two-hour seminar sessions and spend seven hours in approved community settings each week for each 2 units of credit. May be taken for maximum of 4 units per term. P/NP grading.

**186. Media, Ethics, and Digital Age: Case-Study Approach. (4)** Lecture, three hours. To publish or not to publish? Study addresses questions of media ethics—and ethics more broadly—using case-study method to debate pressing issues from actual newsrooms. Students participate in Socratic discussion of fairness, bias, and personal and societal implications of printed, broadcast, and digitized word. Letter grading.

**187. Ethical and Policy Issues in Institutions of Mass Communication. (4)** Lecture, three hours. Intensive examination of ethical and policy issues arising from interaction of media institutions (print, film, broadcasting, and new technologies) and societal institutions (Congress, federal agencies, courts, Presidency, schools, churches, political action groups, advertisers, and audiences). P/NP or letter grading.

**188. Careers in Communication. (1)** Seminar, two hours. Rigorous study of communication theories, research methods, and applications prepares students to succeed in multiple fields, including technology, entertainment, journalism, non-profit, law, education, politics/government, and management. Provides practical support and skill development that helps students transition to being professional in workplace. Consultation of successful industry professionals from variety of fields to understand how they leveraged their education to excel within their organizations. P/NP grading.

**188A. Variable Topics in Mass Communication and Media Institutions. (4)** Lecture, four hours. Variable topics; consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. Letter grading.

**188B. Variable Topics in Interpersonal Communication. (4)** Lecture, three hours. Variable topics; consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. Letter grading.

**188C. Variable Topics in Communication Technology and Digital Systems. (4)** Lecture, four hours. Variable topics; consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. P/NP or letter grading.

**188D. Variable Topics in Political and Legal Communication. (4)** Lecture, four hours. Variable topics; consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. P/NP or letter grading.

**188E. Variable Topics: Practicum. (4)** Lecture, three hours. Practicum lectures on selected topics in communication. Reading, writing, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**191A. Variable Topics Research Seminars: Mass Communication and Media Institutions. (4)** Seminar, three hours. Research seminars on selected topics in mass communication. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

**191B. Variable Topics Research Seminars: Interpersonal Communication. (4)** Seminar, three hours. Research seminars on selected topics in interpersonal communication. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

**191C. Variable Topics Research Seminars: Communication Technology and Digital Systems. (4)** Seminar, three hours. Research seminars on selected topics in communication technology and digital systems. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

**191D. Variable Topics Research Seminars: Political and Legal Communication. (4)** Seminar, three hours. Research seminars on selected topics in political and legal communication. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

**M191DC. CAPPP Washington, DC, Research Seminars. (8)** (Same as History M191DC, Political Science M191DC, Public Affairs M191DC, and Sociology M191DC.) Seminar, three hours. Limited to CAPPP Program students. Seminars for undergraduate students in Center for American Politics and Public Policy's program in Washington, DC. Focus on development and execution of original empirical research based on experiences from Washington, DC-based

field placements. Study of variety of qualitative methods (observation, interviewing, etc.), with comparison to quantitative analysis. Examination of features of solid and significant research; intensive writing. Letter grading.

**191E. Variable Topics Research Seminars: Practicum. (4)** Seminar, three hours. Practicum seminars on selected topics in communication. Reading, writing, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

**194. Research Group Seminars: Communication Studies. (2)** Seminar, two hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field or of research of faculty members or students. May be repeated for credit. P/NP grading.

**195. Summer Internships. (4)** Tutorial, to be arranged. Internship in supervised setting in community agency or business. Students meet with adviser and provide final reports of their experiences. May be repeated for credit. Individual contract with supervising faculty member required. Offered in summer only. P/NP grading.

**195DB. UCLA Daily Bruin and Student Media Internship. (2)** Tutorial, one hour. Limited to students participating in Daily Bruin. Intended to help students get most benefit from their internship experience with UCLA student media. Students meet biweekly with instructor, provide periodic reports on their experience, and engage with industry mentors. May be taken for maximum of 12 units. P/NP grading.

**197. Individual Studies in Communication Studies. (2 to 4)** Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject area required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**198A-198B-198C. Honors Research in Communication Studies. (4-4-4)** Tutorial, three hours. Limited to junior/senior majors. May be repeated for credit. Individual contract required. Letter grading. **198A.** Requisites: courses 10, 150. Development of comprehensive research project under direct supervision of faculty member. **198B.** Requisite: course 198A. Continuation of work initiated in course 198A. Presentation of summary of data gathered and relevant progress to supervising faculty member. **198C.** Requisite: course 198B. Completion of research developed in courses 198A, 198B. Presentation of honors project to supervising faculty member.

**199. Directed Research or Senior Project in Communication Studies. (2 to 4)** Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

## Graduate Courses

**200. Theories in Communication Science. (4)** Seminar, three hours. Exploration of theoretical and methodological approaches that bridge major areas of current interdisciplinary communication science research. S/U or letter grading.

**205. Professional Pathways. (1)** Seminar, one hour. Earning PhD in any of allied social, cognitive, and computational sciences can support multiple career paths. Doctoral students are exposed to range of career pathways. Each meeting focuses on one possible career path and features guest speaker who works in that particular industry. S/U grading.

**210. Communication Speaker Series. (2)** Seminar, 90 minutes. Designed for graduate students in social and natural sciences. Weekly speaker presentations in communication sciences. Focus on interdisciplinary approaches to psychological, political, and computational communication. S/U grading.

**215. Communication Research Laboratory. (1)** Research group meeting, one hour. Limited to graduate students. Designed for graduate students in social and natural sciences. Discussion of current research

issues and preliminary findings. Opportunities for feedback on current and proposed research activity. Assigned readings included. May be repeated for credit. S/U grading.

**220. Research Methods in Communication Science. (4)** Seminar, three hours. Study of how communication science research is conducted with focus on quantitative methodology. Students gain understanding of tools used to conduct research, and experience with these tools through formulating own research ideas and projects. S/U or letter grading.

**230. Communication and Cognition. (4)** Seminar, three hours. Exploration of how cognitive processes underlie multiple aspects of communication, including its evolutionary and biological underpinnings, its relevance for broad types of communication (e.g., interpersonal and mass media), and its integrative capacity across multiple areas of social science research. S/U or letter grading.

**231. Advances in Science of Interpersonal Human Communication. (4)** Seminar, three hours. Examination of quantitative approaches to interpersonal communication processes. Topics include measuring human interactive behavior, experimentation and observational research contexts, and testing theories of human interactive behavior using computational models. S/U or letter grading.

**232. Infant Communication. (4)** Seminar, three hours. Covers topics in development of interpersonal communication during infancy including neural and social mechanisms, role of culture, clinical issues, and research methodology. S/U or letter grading.

**M232C. Cognitive Artificial Intelligence. (4)** (Same as Statistics M232C.) Lecture, three hours. Recommended requisites: Statistics M232A, M232B. Demonstration of how to build artificial intelligence by following principles of human intelligence revealed by cognitive science, including learning from small data, expressing causality of physical world, and inferring mental states of others for intuitive social interactions. Draws from statistical modeling, cognitive science, artificial intelligence, computer vision, and robotics. S/U or letter grading.

**233. Evolution, Sex/Gender, and Communication. (4)** Seminar, three hours. Sex—typically, male versus female—is fundamental social category with broad social and biological relevance. It influences our interests, preferences, social strategies, how we communicate with others. It also influences what others expect from us. Within context of this course, term gender refers to one's location on continua of femininity (female-typical) and masculinity (male-typical), including identifying as neither male- nor female-typical. Like sex, gender affects how we approach social world and how social world responds to us. Exploration of deep evolutionary foundations of sex and gender, and their modern manifestations. Topics covered may include evolutionary mismatches between ancestral past and modern present, sex/gender and mass media, navigating world of shifting gender norms, and how sex/gender influences interpersonal relationships and sexuality. S/U or letter grading.

**M234. Social Vision. (4)** (Same as Psychology M222G.) Seminar, three hours. Exploration of nascent field of social vision, with emphasis on how observers utilize visible cues in face and body to form impressions of other people and how these perceptions are moderated by existing knowledge structures and motivations. S/U or letter grading.

**235. Evolution of Vocal Communication. (4)** Seminar, three hours. Examination of current research in evolutionary approaches to vocal communication. Topics include introduction to acoustic phonetics, animal signaling, and social communication. S/U or letter grading.

**236. Humans and Machines. (4)** Seminar, three hours. Examination of communication in human-machine interactions, exploring idea that well-established psychological processes play critical roles in interactions with non-social objects. Examination of social psychology of perception across distinct sensory modalities (shape, motion, voice, touch). Study of social psy-

chological processes between humans and non-human entities (objects, computers, robots). S/U or letter grading.

**237. Prediction and Conjecture in Communicative Behavior. (4)** Seminar, three hours. Examination of range of domain-specific communicative conjectures. In advertising, conjectural dimensions of communication play central role in structuring historical development of strategies and innovations. Examination of phenomenon of resistance and introduction of concept of communicative potential. In entertainment, examination of cognitive processes of viewpoint projection, playful exploration of new forms of interaction, and investigation of development of heuristics for creatively constraining searches in infinite possibility spaces. In education, consideration of dynamics of student and instructor dialogically developing conjectural plans for guiding student cost-effectively into productive new spaces of learning. In context of television news and other forms of broadcast communication, examination of role of verbal and non-verbal signals in opening and closing conjectural discursive spaces. S/U or letter grading.

**250. Political Communication. (4)** Seminar, three hours. Consideration of determinants of media content and degree to which Americans' political opinions and actions are influenced by that content. Specific topics include history of news media, recent media trends, theories of attitude formation and change, media bias, role of sources in construction of news, economics of news production and consumption, ways in which media shape public perceptions of political world, campaign communication, and general role of mass media in democratic process. S/U or letter grading.

**251. Presidential Communication. (4)** Seminar, three hours. Examination of one vital source of presidency's burgeoning power: president's unmatched communication power. Study of historical evolution of president's communication environment, resources, and strategies. Exploration of how presidential campaign communication has evolved over time, and implications of this evolution for how presidents govern. S/U or letter grading.

**252. Political Parties and Strategic Partisan Communication. (4)** Seminar, three hours. Examination of theories about how political parties operate in countries around world. Covers topics including normative role of parties in modern democracies, reasons why parties exist, party competition, electoral systems, variation in number and types of parties across countries, party identification, voting, and internal party dynamics. S/U or letter grading.

**253. Affective Political Communication. (4)** Seminar, three hours. Consideration of role that affect plays in production and consumption of political news, and in political communication, behavior, and psychology. S/U or letter grading.

**270. Computational Communication. (4)** Seminar, three hours. New computational methods developed and applied for communication research along with massive datasets and computing infrastructure enable large-scale quantitative analyses on human communication and activities at scale. Introduction to state-of-art methods in computational social science and how they can apply in communication research. S/U or letter grading.

**271. Networks. (4)** Seminar, three hours. Covers theory and applications from scientific study of networks. Students learn to use network analysis and visualization software and collect and analyze original network data. S/U or letter grading.

**272. Cognitive Artificial Intelligence. (4)** Seminar, three hours. Study demonstrates how to build artificial intelligence by following principles of human intelligence revealed by cognitive science. These principles include learning from small data; capturing causality of physical world; inferring others' mental states for intuitive cooperation and communication. To achieve this goal, tools are drawn from cognitive science, social sciences, artificial intelligence, computer vision, and robotics. S/U or letter grading.

**273. Big Data Analysis with Machine Learning. (4)** Seminar, three hours. Preparation: familiarity with coding (Python or R) and basic statistical analysis. Introduction to advanced machine learning methods that can apply to large-scale datasets in text, audio, and visual data modalities. Students learn how to develop, train, and validate machine learning models and apply methods to their own research. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to Communication graduate students. Directed study on variable topics in consultation with faculty member. S/U or letter grading.

**597. Preparation for PhD Qualifying Examination. (2 to 12)** Tutorial, to be arranged. Limited to Communication PhD graduate students. Reading and preparation for PhD qualifying examination. Mandatory and supplemental reading lists approved by student advisory committee. May be repeated for credit as necessary with consent of adviser. S/U grading.

**599. Research for PhD Dissertation. (2 to 12)** Tutorial, to be arranged. Preparation: successful completion of qualifying examinations. Limited to Communication PhD graduate students. May be repeated for credit. S/U grading.

---

## COMMUNITY ENGAGEMENT AND SOCIAL CHANGE

*Interdisciplinary Minor  
College of Letters and Science*

A265 Murphy Hall  
Box 951571  
Los Angeles, CA 90095-1571

**Community Engagement and Social Change**

Andrew G. Atkeson, PhD, *Chair*

## Faculty Committee

Andrew G. Atkeson, PhD (*Economics*)  
Jennifer A. Jay, PhD (*Civil and Environmental Engineering, Environment and Sustainability*)  
Rashmita S. Mistry, PhD (*Education*)  
Amy E. Ritterbusch, PhD (*Social Welfare*)  
Rafael Romero, PhD (*Biomedical Research*)  
Ananya Roy, PhD (*Geography, Social Welfare, Urban Planning*)  
David Delgado Shorter, PhD (*Anthropology, Gender Studies, World Arts and Cultures/Dance*)

## Overview

The Community Engagement and Social Change minor is designed to provide students with a core analytical, experiential, and theoretical framework for understanding three intersecting dimensions of civic engagement at the local level: issues of social inequality, modes of social change, and the community in which the

engagement takes place. The minor can be paired with any major as an applied and active way of putting disciplinary tools to use, and is intended for highly motivated students of any ideological perspective who are committed to education among a broader community of learners.

Students complete a core curriculum, elective courses, a course on a strategy of social change, and a community-engaged capstone research project examining a social issue in a specific Los Angeles community context.

## Undergraduate Minor Community Engagement and Social Change Minor

The minor is an interdisciplinary program that creates a unique opportunity for students to examine social inequality and strategies for social change through sustained community engagement in Los Angeles and beyond. It complements any major.

Students have a lower-division or upper-division option for their gateway community-engaged course in the minor, then choose two additional community-engaged learning experiences, a strategy for social change course, and an upper-division elective.

### Capstone

Students complete a two-quarter capstone course series in which they learn about different forms of community-engaged research that is conducted with and to benefit a community partner. Working in collaboration with a non-profit organization, students prepare a community-engaged research proposal and then complete a research paper. Integrated into the capstone course, students develop an e-Portfolio that conveys their journey through the minor.

### Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better, submit a completed application, and submit a written statement describing how civic engagement relates to their academic interests or career goals. [Digital applications](#) are available.

### The Minor

*Required Core Courses (17 to 20 units):* Community Engagement and Social Change 50XP or 100XP with a grade of B or better; two additional community-engaged courses (at least one of which must be upper division) from American Indian Studies C122XP, Anthropology 116XP, Arts Education M192XP, Asian American Studies 104A, 104B, 140XP, M166A, M166B, M166C, Chicana/o and Central American Studies 100XP, M122, M134XP, M156A, M156B, M156C, Community Engagement and Social Change 100XP, 105XP, 108XP, M110XP, 133XP, M134XP, 163SL, 165XP, M170XP, M175SL, M188XP, Economics 173AX, 173BX, M188XP, Education 130AX, European Languages and Transcultural Studies C101XP, Gender Studies 120SL, History M181SL, Hon-

ors Collegium 127, Labor Studies M122, M134XP, M166A, M166B, M166C, Lesbian, Gay, Bisexual, Transgender, and Queer Studies 180XP, Mathematics 73XP, 74XP, 75XP, Science Education 100XP, Spanish M165XP, Statistics 140XP, 141XP, M171, Urban Planning M171, 185XP, World Arts and Cultures 177XP, any 195CE course, or other courses that include a substantive community-engagement experience; and one upper-division elective course from the community-engaged options above or from African American Studies M167, M173, American Indian Studies C121, Anthropology 138P, M138Q, Asian American Studies M108, 141AX, 141BX, M143A, Chicana/o and Central American Studies CM106, M122, 123, M127, M128, 129, M144, 172, C179, Community Engagement and Social Change M115, 145, 180, Economics 131, M135, 137, Education 165, English Composition 130D, 134, Gender Studies M186B, History M146B, Labor Studies 181, 182, Philosophy 150, C156, 157A, 157B, Political Science M105, 112A, Psychology 129C, 133G, 175, Public Affairs 114, Public Policy 105, Sociology 113, M115, 143, 156, 158, Urban Planning M122, M171, World Arts and Cultures 100A, 100B, 144, 160 or courses that meet requirements for the UCLA Quarter in Washington program or the UC Center Sacramento program.

*Required Strategy of Social Change Course (4 to 5 units):* One course from African American Studies M167, American Indian Studies C120, C130, Art M186A, Asian American Studies M163, Chicana/o and Central American Studies M127, M130, M186A, Community Engagement and Social Change M122XP, 150, 152, M188XP, Disability Studies 111, Economics M135, 173AX, 173BX, Education 156, Labor Studies M117, M127, 152, M167, M175, 179B, Political Science M105, 141B, 171D, 172, Public Policy 105, C115, Social Welfare 102, 132, World Arts and Cultures 100A, M125A, or other by petition.

*Required Capstone (8 units):* Community Engagement and Social Change 191AX, 191BX, with grades of B or better.

### Policies

Students may petition to apply one lower-division community-engaged course, one upper-division community-engaged course, or one upper-division elective not listed above toward the minor. Transfer students may petition to have a community-engaged course taken at a prior institution applied toward the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 3.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

### Capstone

Community Engagement and Social Change 191AX and 191BX must be completed with grades of B or better. Students must have completed the core courses requirement, and at

least one other community-engaged course prior to enrolling in the Community Engagement and Social Change 191AX. Students that are a part of the Astin Scholars program may have the courses Community Engagement and Social Change M180A, M190B, and M190C satisfy the capstone requirement. Students may petition to have a capstone sequence completed for their major satisfy the minor's capstone requirement. Petitions are reviewed on a base-by-case basis, and are assessed by how closely the major capstone requirements align with desired learning outcomes associated with the minor's capstone requirement. Students may also petition to complete the capstone under the guidance of a faculty sponsor through independent research, Community Engagement and Social Change 199, after completing 191AX. The faculty mentor approves proposed readings as well as length and scope of the final paper or project based on guidelines developed by the faculty committee.

## Community Engagement and Social Change Lower-Division Courses

**10. Introduction to Engaged Scholarship. (2)** Seminar, two hours. Limited to students participating in preapproved UCLA civic engagement programs. Introduction to history, research, and philosophy of general University/community partnerships, as well as specific opportunities for active engagement by undergraduate students at UCLA. Offered in summer only. P/NP grading.

**18. Bruin Leaders: Model for Social Change. (1)** Lecture, two hours; fieldwork, one hour. Introduction to leadership development and civic engagement through community service. Based on nonhierarchical mode of leadership developed by UCLA Graduate School of Education and Information Studies. Topics include diversity issues, organizational skills and team-building development, and personal growth and community service goals. Participation in first-week orientation session required. Consult Schedule of Classes for topics to be offered in specific term. May not be repeated for credit. P/NP grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**50XP. Engaging Los Angeles. (5)** (Formerly numbered 50SL.) Lecture, two hours; discussion, two hours. Community-engaged learning course with focus on diverse communities of Los Angeles. Analysis of general shared history of Los Angeles. Comparing or contrasting of experiences of several different racial/ethnic groups. Engagement in meaningful work off campus to reflect on assets, injustices, and inequities that have shaped experiences of native or immigrant communities. Analysis of Los Angeles in which residents coexist and interact while managing tensions and social justice issues inherent in minority/majority city. Letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental read-

ings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**95A-95B. Introduction to Community-Based Internships. (2-4)** Tutorial, one hour; fieldwork, four hours (course 95A) and 10 hours (course 95B). Course 95A is not requisite to 95B. Introduction to community-based work for students in specialized UCLA scholarship programs. Platform for preplanned, organized, structured, and supervised off-campus experiences with academic context. Acceptable placements include corporate, nonprofit, and governmental organizations that meet criteria for undergraduate internships as established by Center for Community Engagement. Individual contract with supervising faculty member required. P/NP or letter grading.

**95CE. Introduction to Community-Based Internships. (2)** Tutorial, one hour; fieldwork, four hours. Introduction to community-based work for third-term freshman/sophomore students who have not completed 90 units. Platform for preplanned, organized, structured, and supervised off-campus experiences with academic context. Acceptable placements include corporate, nonprofit, and governmental organizations that meet criteria for undergraduate internships as established by Center for Community Engagement. May be repeated once for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

**98A. Leadership and Social Change. (2)** Seminar, two hours. Exploration of different modes of leadership and consideration of how effective leadership can bring about positive social change. We live in period of extraordinary opportunity and challenge—in which breathtaking technological advances sit alongside breathtaking cynicism and corruption. Examination of how effective and inspiring leaders can lead in such environment, if it is possible to make difference and effect change in face of deep structural inequality, criteria that make effective leader, and if each of us bears within ourselves leadership potential. Exploration of past models of successful leadership and different models of present-day leadership, drawing on inspiring examples from social activism, politics, religion, law, philanthropy, and education. Students are encouraged to formulate their own models of leadership. Three to four day experiential learning opportunity in leadership development off campus. P/NP grading.

**98B. Organizational Analysis and Workforce Readiness. (2)** Seminar, two hours. Requisite: course 98A. Analytic training on how to study institutions and organizations. Students identify, contact, and interview practitioner from work area of interest. Site visits to various working environments in Los Angeles area. Analytics training on how to study institutions and organizations and prepare research briefs on organizations/institutions to be visited. P/NP grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**100XP. Perspectives on Civic Engagement for Social Justice. (5)** (Formerly numbered 100SL.) Seminar, three hours. Community-based learning course. Examination of theories and concepts of civic engagement as means to achieve social justice. Exploration of what informs and influences student theories of change. Reflection on these concepts through work in collaboration with select community-based organizations dedicated to changing status quo with regard to power and opportunity in Los Angeles. Letter grading.

**102. Reflections on Alternative Spring Break. (2)** Seminar, two hours. Limited to students who have participated in USAC Community Service Commission Alternative Spring Break immediately prior to Spring Quarter. Discussion of role of higher education initia-

tives in civic identity formation, with specific attention to reflection on Alternative Spring Break experiences. P/NP or letter grading.

**105XP. Client-Based Program Evaluation and Research. (4)** (Formerly numbered 105SL.) Seminar, three hours; fieldwork, 10 hours. Limited to juniors/seniors. Service learning course for undergraduate students and community partners through which students learn theory and practice of program evaluation. Evaluation of nonprofit organizations in Los Angeles by research teams. Offered in summer only. Letter grading.

**107. Counseling Multicultural Communities. (2)** Seminar, six hours. Prospective AAP peer counselors are equipped to understand unique challenges that students from historically underrepresented communities may face during their transition to UCLA. Participants also gain deeper understanding of cultural capital with which those students enter UCLA while reflecting on their own experiences. Participants define their roles as UCLA peer counselors, and reflect on how students' cultural backgrounds and educational experiences empower them to achieve academic and personal development. P/NP grading.

**108XP. Introduction to Early Childhood Education: Civic Engagement Perspectives. (4)** (Formerly numbered 108SL.) Lecture, three hours; fieldwork, eight hours. Limited to students who are participating members of Jumpstart AmeriCorps literacy program. Service learning course on early childhood development and civic engagement. Overview of child development theory as well as examination of policies and systems that impact practice of preschool education. Discussion about history and future of civic engagement movement designed to engage diverse groups of committed stakeholders in reaching common goal. P/NP or letter grading.

**M110XP. Community-Based Studies of Popular Literature. (5)** (Formerly numbered M110SL.) (Same as English M115XP) Lecture, four hours; discussion, one hour (when scheduled); fieldwork, two hours. Enforced requisite: English Composition 3. Service learning course that examines history and development of one or more genres of popular literature, with attention to contemporary communities of readers and writers and formation of civil society. Topics vary and may include children's literature and childhood literacy, mass market fiction and book club culture, or science fiction and science policy. Service-learning component includes meaningful work with local nonprofit organizations selected in advance by instructor. May be repeated for credit with topic change. P/NP or letter grading.

**M115. Citizenship and Public Service. (4)** (Same as Political Science M115C.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: Political Science 10. Designed for juniors/seniors. Study of ways in which political thinkers have conceived of ideas of citizenship and public service, how these ideas have changed over time, and frameworks for thinking about citizenship in era of markets and globalization. P/NP or letter grading.

**M121. Race, Gender, and Data. (4)** (Same as Digital Humanities M121.) Seminar, three hours. Requisite: Digital Humanities 101. Data plays a crucial role in political representation, governmental resource allocation, and policy decisions. Investigation of how data does or does not ascribe a quantitative value to a human life by employing a community-engaged emphasis to study how emerging digital models link data with social justice organizing. Students learn to read datasets produced by governmental entities such as the U.S. Census Bureau, Bureau of Labor Statistics, and Department of Health and Human Services. Assignments include working on a community-engaged data project that evaluates and addresses key concerns facing communities-of-color. Introduction to critical data studies and applied data ethics. Studio sessions include lessons on finding and analyzing datasets relevant to racial and gender justice themes; and to generating data visualizations, digital stories, and maps using the latest software tools. No prior knowledge of statistics or quantitative analysis is required. P/NP or letter grading.

**M122XP. Philanthropy as Civic Engagement. (5)** (Formerly numbered M122.) (Same as Honors Collegium M123XP) Seminar, three hours. Limited to juniors/seniors; application required. Study of history, philosophy, and practice of philanthropy. Practical experience in setting priorities and making philanthropic investments in Los Angeles-based nonprofit organizations. Letter grading.

**130. Intercultural Communication in Global Workplace. (4)** Seminar, three hours. Students enrolled in international summer internships draw on their own and each other's experiences to critically think about intercultural communication, and to draw insights from that academic literature to define and build intercultural communication competencies in context of workplace environment. P/NP or letter grading.

**133XP. Topics in Community-Engaged Research: Theory and Practice. (5)** (Formerly numbered 133SL.) Seminar, three hours; fieldwork, two hours. Service learning course that examines variable topics related to theory and practice of community-based research. Service learning component includes meaningful work with community partners selected in advance by instructor and Center for Community Learning. May be repeated for credit with topic or instructor change. Letter grading.

**M134XP. Engaging Immigrants and Their Families. (5)** (Formerly numbered M134SL.) (Same as Chicana/o and Central American Studies M134XP and Labor Studies M134XP) Lecture, two hours; discussion, two hours; field placement, two hours. Survey and exploration of immigrant landscape in Los Angeles—truly global city acting in part to buffer, settle, and incorporate immigrants in daily life. Focus on civil society to explore multiple forms of interventions and impacts that take place in multiple communities across Los Angeles basin. Service learning partnerships focus on organizations addressing immigration concerns. Letter grading.

**145. Conflict, Power, Inequality, and Change. (4)** Lecture, four hours. Broad historic trend of systems in conflict since beginnings of colonialism, including capitalism, urbanism, liberalism, and neoliberalism. Examination of modalities and theories of conflict and transformation, with emphasis on three primary forms of societal conflict: social movements, war, and terrorism. Study of resource scarcity through two specific dimensions: how it is leveraged to meet political ends, and how it can be harnessed for conflict intervention, resolution, transformation, and prevention. P/NP or letter grading.

**M147. Critical Analysis of Strategies toward Environmental Justice. (4)** (Same as Environment M147.) Lecture, three hours. Exploration of and engagement in critical analyses of strategies toward environmental justice including environmental education, civic ecology, environmental stewardship, policy advocacy campaigns, citizen science, community engagement, community planning, and urban tree canopy. Strategies are interwoven across four interconnected modules: community exposure to harm; access to ecosystem benefits and services; lack of diversity and engagement; and utilization of social-ecological systems approach. Students conduct case study analysis of strategies employed in efforts to move toward environmental justice, and develop collective course resource on environmental justice strategies. P/NP or letter grading.

**150. Social Innovation Theory and Application. (4)** Seminar, three hours. Limited to students in UCLA Summer Social Innovation Research Program. Study of social innovation as theory of civic engagement, with particular emphasis on how social innovators have transformed way we address entrenched social issues. Study of elements of existing social innovation models and strategies for employing methods of social change on campus and in communities. Offered in summer only. Letter grading.

**151. Documentary Film Making as Strategy for Social Change. (4)** Lecture, two hours; discussion, two hours. Survey of selection of documentary films diverse in genre (advocacy, observational, essayistic, ego document, archival) and subject (war, exploitation, incarceration, ecosystem collapse, revolution, genocide). Discussion of films in their historical and artistic

context, and in way they are vehicles for community engagements and social change. P/NP or letter grading.

**152. Exploring Social Change: Critical Analysis through Lens of Community Organizing. (4)** Lecture, four hours. Exploration of theories driving social change and how visions and agendas get organized toward common efforts. Analysis of organizing frameworks through specific movements for social, economic, and political change. Introduction to praxis, defined by Paulo Freire in *Pedagogy of the Oppressed* as “reflection and action directed at the structures to be transformed.” P/NP or letter grading.

**163SL. Civic Engagement and Public Use of Knowledge: Special Topics. (5)** Seminar, three hours; fieldwork, three hours. Limited to juniors/seniors. Service learning course that examines variable topics related to University/community partnerships and role of civic education in higher education. May be repeated for credit with topic or instructor change. Letter grading.

**165XP. Storytelling for Social Justice: Research and Writing with Nonprofit Organizations. (5)** (Formerly numbered 165SL.) Seminar, three hours; fieldwork, two hours. Limited to juniors/seniors. Exploration of how nonprofit organizations use storytelling strategies to advance social justice. Offers opportunity to use research and writing skills telling stories of social justice through print and online media. Students collaborate with nonprofit organizations to complete research and communication projects. Special focus on how storytelling can empower individuals and communities and advance equity in diverse urban centers like Los Angeles. Letter grading.

**M170XP. Food Studies and Food Justice in Los Angeles. (4)** (Formerly numbered M170SL.) (Same as Food Studies M170XP.) Seminar, three hours; fieldwork, two hours. Interdisciplinary service learning course that provides general understanding of access and equity issues related to food chain in Los Angeles. Exploration of social justice issues faced by residents of lower-income communities. Reading of research from multiple disciplines, including but not limited to public health, environmental justice, and public policy. Service-learning component includes meaningful work with off-campus community partners selected in advance by instructor and Center for Community Learning. Letter grading.

**172XP. Community-Engaged Research to Address Health Disparities. (4)** Lecture, three hours; fieldwork, three hours. Examination of use of community-engaged research to understand and address health disparities in minority communities. Focus on chronic disease disparities: inequities in risk and outcomes from conditions such as hypertension, diabetes, obesity, heart disease, chronic pulmonary diseases, autoimmune disorders, and HIV. Examination also of role these conditions play in COVID-19 risk and disparities, and role that community-engaged strategies can play in preventing or reducing health disparities. Includes case studies, discussions with community partners and researchers, and assignments to explore impact of community engagement on chronic disease disparities and to mitigate inequitable impact of COVID-19. Student teams partner with community organizations and develop partnered project, with deliverable to community partner due at end of course. P/NP or letter grading.

**M175SL. Addressing Social Determinants in Racial/Ethnic Minority Communities to Reduce and Prevent Health Disparities. (4)** (Same as Psychology M175SL.) Seminar, two hours; fieldwork, 10 hours. Examination of how addressing social determinants in racial/ethnic minority communities can reduce or eliminate physical and mental health disparities. Currently in racial and ethnic minority communities, health status of individuals can be function of built environment, exposure to pollutants and toxins, scarcity of supermarkets or stores with fresh produce and nutritional food, noise levels, and variety of other stressors and unhealthy conditions. Health interventions are often focused on individual-level change or increases in access to healthcare with little in way of changing risk environments. Designed to identify and provide opportunities to understand how to address social determinants related to negative health outcomes in ra-

cial/ethnic minority neighborhoods and communities and to experience how to use social determinants literature in service of collaborative activities with community organizations. P/NP or letter grading.

**M176XP. Making Films about Food. (5)** (Formerly numbered M176SL.) (Same as Food Studies M176XP and Public Affairs M176XP) Lecture, three hours. Introduction to documentary video production and distribution. Students work on assignments in pairs and small groups to create 8- to 10-minute video about one of several Los Angeles partner organizations that advocate for healthy, local, sustainable food. Consideration, through video production, of challenges posed by existing farming, ranching, and distribution methods, and strategies these groups are pursuing to create more sustainable food pathways. Students look at social media communication strategies to help think through intervention in face of historically entrenched industrial food production and regulations that remain favorable to mass-produced, processed food items. P/NP or letter grading.

**180. Access to Justice: Hope and Reality. (4)** Seminar, three hours. Limited to UCLA students who are members of JusticeCorps program through AmeriCorps. JusticeCorps was established as innovative approach to solving one pressing issue faced by courts around country today: providing equal access to justice. Examination of promise of justice system in America to provide meaningful access to courts for all who seek it. What premises underlie structure of U.S. legal system? Exploration of sociopolitical context for current legal system, including origins and current status of legal services and self-help movements, including role of JusticeCorps. Were these strategies designed to make promise of equal justice a reality or have they inadvertently, or intentionally, resulted in two-tiered legal system—one for those with means and another for those without? P/NP or letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**M188XP. Practicum in Social Entrepreneurship. (4)** (Formerly numbered M188.) (Same as Economics M188XP) Seminar, three hours. Enrollment by consent of instructor. Offers students full-scale immersion into challenges of launching social enterprise. Students work in teams alongside staff of local nonprofit organizations in 10-week social enterprise accelerator program aimed at helping participating organizations secure financial and operational resources they need to implement social enterprise for which viable business plan has already been constructed. Students meet assigned organization, study its business plan, and work with instructors of course and staff of nonprofit organization to develop tailored plan of work for 10-week accelerator program. Students carry out work in conjunction with staff of organization under supervision of instructors and with assistance of experienced entrepreneur volunteer mentors. P/NP or letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor.

May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**M190A. Introduction to Community-Engaged Research. (4)** (Same as Labor Studies M190A.) Seminar, three hours. Enrollment by consent of instructor. Designed for students participating in Astin Community Scholars Program. Introduction of principles of community-engaged research. Exploration of intentions behind doing research with community residents and organizations, our responsibilities when conducting research in historically disenfranchised communities, and relationship between socially-just research outcomes and methodologies. P/NP or letter grading.

**M190B. Community-Engaged Research in Practice: Community Scholars. (4)** (Same as Labor Studies M190B.) Seminar, three hours. Requisite: course M190A. Enrollment by consent of instructor. Designed for students participating in Astin Community Scholars Program. Students learn from faculty, community stakeholders, graduate students, and key academic experts about emerging organizing models, best practices, and changing landscape in chosen topic. Provides students with opportunity to work with leaders from key community and labor organizations across Los Angeles on six-month dynamic participatory research project. Focus on current topic affecting Angelenos and neighboring communities. Key outcomes may include production of policy reports, popular education materials, and/or book publication by UCLA Labor Center and collaborative partners. Primary focus on engaging policy makers and other change agents. P/NP or letter grading.

**M190C. Community-Engaged Research in Practice: Community Scholars. (4)** (Same as Labor Studies M190C.) Seminar, three hours. Requisites: courses M190A, M190B. Enrollment by consent of instructor. Designed for students participating in Astin Community Scholars Program. Students learn from faculty, community stakeholders, graduate students, and key academic experts about emerging organizing models, best practices, and changing landscape in chosen topic. Provides students with opportunity to work with leaders from key community and labor organizations across Los Angeles on six-month dynamic participatory research project. Focus on current topic affecting Angelenos and neighboring communities. Key outcomes may include production of policy reports, popular education materials, and/or book publication by UCLA Labor Center and collaborative partners. Primary focus on engaging policy makers and other change agents. P/NP or letter grading.

**191AX. Capstone Research Seminar. (4)** (Formerly numbered 191A.) Seminar, three hours. Provides students with analytical and applied framework for process of researching historical and contemporary social issues and efforts to bring about change in local communities. Letter grading.

**191BX. Capstone Research Seminar: Projects. (4)** (Formerly numbered 191B.) Seminar, three hours. Provides students with analytical and applied framework for process of researching historical and contemporary social issues and efforts to bring about change in local communities. Culminates in capstone research project, typically length required of publishable journal articles (15-25 pages). Students' research should be implementation of design completed in course 191A, and should be informed by their coursework in the minor. Letter grading.

**195CE. Community and Corporate Internships in Community Engagement and Social Change. (4)** Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Engagement. Students complete weekly written assignments, attend bi-

weekly meetings with graduate student instructor, and write final research paper. Faculty mentor and graduate student instructor construct series of reading assignments that examine issues related to internship site. May be repeated for credit with consent of Center for Community Engagement. Individual contract with supervising faculty member required. P/NP or letter grading.

**M195DC. Quarter in Washington, DC, Internships. (4)** (Same as History M195DC, Political Science M195DC, Public Affairs M195DC, and Sociology M195DC.) Tutorial, four hours. Limited to junior/senior Quarter in Washington program students. Internships in Washington, DC, through Center for American Politics and Public Policy. Students meet on regular basis with instructor and provide periodic reports of their experience. Individual contract with supervising faculty member required. P/NP grading.

**198. Honors Research in Civic Engagement. (4)** Tutorial, one hour. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. Individual contract required. Letter grading.

**199. Directed Research or Senior Project in Civic Engagement. (4)** Tutorial, to be arranged. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated once for credit. Individual contract required. Letter grading.

## Graduate Course

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

## Faculty Roster

### Professors

David P. Eisenman, MD, MSHS, *in Residence*  
Chandra L. Ford, PhD, MPH, MLIS  
Gilbert C. Gee, PhD  
Jessica D. Gipson, MPH, PhD (*Fred H. Bixby Professor of Population Policy*)  
Kimberly D. Gregory, MD, MPH, *in Residence*  
Robert J. Kim-Farley, MD, MPH, *in Residence*  
Randall S. Kuhn, PhD  
James A. Macinko, PhD  
Michael L. Prelip, DPA, MPH, CHES  
Michael A. Rodriguez, MD, MPH  
Dawn M. Upchurch, PhD, LAC  
Ondine S. von Ehrenstein, MPH, MS, PhD  
May C. Wang, MPH, DrPH

### Professors Emeriti

Deborah C. Glik, ScD  
Michael S. Goldstein, PhD  
Isabelle F. Hunt, DrPH, RD  
Marjorie Kagawa-Singer, PhD, MA, MN, RN  
Virginia C. Li, MPH, PhD  
Donald E. Morisky, ScD, MSPH, ScM  
Alfred K. Neumann, MD, MA, MPH, FABPM  
Charlotte G. Neumann, MD, MPH  
Anne R. Pebley, PhD (*Fred H. Bixby Professor Emerita of Population Policy*)  
Kimberly I. Shoaf, DrPH  
Judith M. Siegel, PhD, MSHyg

### Associate Professors

Hiram Beltrán-Sánchez, PhD  
Philip M. Massey, PhD, MPH  
May Sudhinaraset, PhD  
Courtney S. Thomas Tobin, PhD  
Jennifer A. Wagman, PhD, MHS

### Assistant Professor

Sean A. Darling-Hammond, JD, PhD

### Lecturer

Bonnie Taub, PhD

### Adjunct Professors

Diana M. Bontá, DrPH, RN  
Elizabeth D'Amico, PhD  
Sheba M. George, PhD  
Ronald J. Halbert, MD  
Ilan H. Meyer, PhD  
Wendelin M. Slusser, MD, MS  
Samuel J. Stratton, MD, MPH  
Paula A. Tavrow, PhD  
Deborah R. Young, PhD

### Adjunct Associate Professors

Alina H. Dorian, PhD  
Dena R. Herman, MPH, PhD, RD  
Cathy M. Lang, MPH, PhD  
Shira C. Shafir, MPH, PhD

### Adjunct Assistant Professors

Matthew R. Beymer, MPH, PhD  
Dana E. Hunnes, MPH, PhD, RD  
Natalie D. Muth, MD, MPH, RDN, FAAP  
Elizabeth Yzquierdo, MPH, EdD

### Academic Administrator

Sarah R. Blenner Uzan, JD, MPH

## Overview

The Department of Community Health Sciences is concerned with health equity and well-being for all individuals and communities. To understand and foster optimal health among diverse communities, the mission of the department is to prepare students to be interdisciplinary global leaders who can effectively address persistent and emerging public health issues, conduct and disseminate innovative research on the social determinants of health, translate the findings for public health practice, and collaborate with communities in research and training.

## Graduate Study

The department offers schoolwide professional (MPH) and academic (MS and PhD) de-

gree programs. Graduates of the professional programs assume positions in the planning, administration, and evaluation of public health programs and policies in the U.S. and abroad. Graduates of the academic programs assume teaching, research, and managerial positions in universities, government agencies, nongovernmental organizations, international health agencies, and research centers.

## Graduate Majors

### Community Health Sciences MS, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Master of Public Health for Health Professionals

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Community Health Sciences

### Lower-Division Courses

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**48. Nutrition and Food Studies: Principles and Practice. (5)** Lecture, three hours; discussion, one hour. Overview of nutritional sciences and public health nutrition. Examination of basic science concepts of nutrition and application of them to student lives and real-world issues through lectures, videos, diet analysis, activities, reports, discussion of video and reading assignments, and reviews of community programs that apply nutrition and behavior theory to improve health of public. Students use observational research methods to create and answer questions about nutrition question in their cohort. P/NP or letter grading.

**60. Intergroup Dialogue: Peer Dialogue. (2)** Seminar, two hours. Discussion on issues of difference, conflict, and community to facilitate understanding between social/cultural groups. Student participation in semi-structured face-to-face meetings with students from other social identity groups to learn from each others' perspectives, read and discuss relevant reading material, and explore their own and other groups' experiences in various social and institutional contexts. Exploration of ways of taking action to create change and bridge differences at interpersonal and social/community levels. P/NP or letter grading.

**80. FITTED: Fitness Improvement Training through Exercise and Diet. (1)** Lecture, one hour; activity, two hours. Success in undergraduate experience is very much influenced by attributes beyond intellectual competence. Examination of personal, social, and environmental factors that influence college students' eating behaviors, physical activity patterns, and body image. Development of individualized student plans for eating well, being active, and feeling good about their bodies. Learning of practical skills with application to nutrition, physical activity, positive body image, stress management, and other aspects of wellness as students participate in critical evaluation of popular diets, healthy body weights, fitness, supplements, media body ideals, and self-destructive thoughts. P/ NP grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors and departmental honors programs. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**91. Peer Health Counselor Training. (4)** Lecture, four hours. Limited to students in Peer Health Counselor Program. Analysis of student healthcare issues as related to campus healthcare delivery system and to healthcare consumer. Identification of health needs, determination of appropriate resources, delivery of preventive and self-care education, and delineation of peer health counselor's role. P/NP or letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**100. Introduction to Community Health Sciences. (4)** Lecture, four hours. Limited to junior/senior non-majors and graduate students, with preference given to undergraduates in Public Health minor. Not open for credit to students with credit for course 120. Introductory course to provide students with broad and comprehensive overview of concepts, empirical research, and public health practice in community health sciences, with emphasis on social context and determinants of population health, and principles of planning interventions to protect and improve public health. Includes ways to define and measure health and illness, social construction of illness, social and behavioral determinants of health, and health disparities. Discussion also of social and behavioral theories of health-related behavior change, health promotion strategies and methods, advocacy, and public policy. Letter grading.

**120. Promoting Healthy Communities. (5)** Lecture, four hours; discussion, one hour. Prerequisite: Public Health 50B. Limited to Public Health majors. Not open for credit to students with credit for course 100. Comprehensive overview of concepts, empirical research, and public health practice in community health sciences, with emphasis on social context and determinants of population health and principles of planning interventions to protect and improve public health. Ways to define and measure health and illness, social construction of illness, social and behavioral determinants of health, and health disparities, including socioeconomic status, race/ethnicity, gender, and age. Social and behavioral theories of health-related behavior

change, health promotion strategies and methods, and public policy. Case studies of evidence-based health promotion programs provided. Letter grading.

**130. Nutrition and Health. (4)** Lecture, three hours; laboratory, one hour. Preparation: one biology course, one chemistry course. Basic and clinical nutrition theory and practice for students in health sciences curricula. P/NP or letter grading.

**131. Healthy Food Access in Los Angeles: History and Practice of Urban Agriculture. (4)** Lecture, three hours; laboratory, 90 minutes. History and recent revival of urban agriculture (gardening) in Los Angeles area. Exploration of how urban gardening is response to crises such as U.S. obesity epidemic and resulting health problems. Critiques of industrial agriculture in California and elsewhere in U.S. Exploration of how urban agriculture springs from healthy food/active living and consumer movements that advocate access to locally grown, in-season, affordable food. Biweekly hands-on gardening laboratory in Sunset Canyon Recreation Center Organic Garden. P/NP or letter grading.

**132. Health, Disease, and Health Services in Latin America. (4)** Lecture, four hours. Introduction to health, disease, and health services in Latin America, with emphasis on epidemiology, health administration, medical anthropology, and nutrition. P/NP or letter grading.

**M140. Health Issues for Asian Americans and Pacific Islanders: Myth or Model? (4)** (Same as Asian American Studies M129.) Lecture, three hours; fieldwork, one hour. Introductory overview of mental and physical health issues of Asian Americans and Pacific Islanders; identification of gaps in health status indicators and barriers to both care delivery and research for these populations. Letter grading.

**160. Intergroup Dialogue: Theory and Practice of Peer Facilitation. (4)** Lecture, four hours. Recommended prerequisite: course 60. Discussion on issues of difference, conflict, and community to facilitate understanding between social/cultural groups. Peer facilitator training course to develop understanding of theoretical and research foundations of intergroup dialogue, peer-facilitated discussions involving relationship building (and coalition building) through thoughtful engagement around different social identity issues. Study of variety of techniques, tools, and strategies to support students in their capacity to implement sustained dialogues with students from other social identity groups. Letter grading.

**161. Intergroup Dialogue: Training Practicum. (4)** Seminar, four hours. Enforced prerequisite: course 160. Application and further development of content and skills learned in course 160. Co-facilitation of weekly dialogues with students on specific identity theme and further development of knowledge and techniques in areas of group dynamics, conflict intervention, communication and community, and mental health effects of structural inequality as they relate to discussions of social justice and multicultural issues. Readings in these areas and discussions of ongoing dialogue dynamics. May be repeated once for credit. Letter grading.

**CM170. Improving Worker Health: Social Movements, Policy Debates, and Public Health. (4)** (Same as Labor Studies M170.) Lecture, three hours; fieldwork, two hours. Examination of intersection between work, health, and environment, analysis of social causes of health disparities, investigation of historical trends and social movements, interpretation of current policy debates, and development of innovative interventions. Concurrently scheduled with course CM470. P/NP or letter grading.

**179. Life Skills for College Students. (4)** Seminar, four hours. Multidisciplinary exploration of student development in undergraduate experience, with focus on processes of identity formation and emotional and social development. Emphasis on variability associated with gender, race, ethnicity, culture, and sexual orientation. Testing of real-life relevance of theory and research. P/NP or letter grading.

**180. Field Studies in Cancer Control. (4)** Lecture, two hours; discussion, one hour; fieldwork, four hours. Prerequisite: Molecular, Cell, and Developmental Biology

50. Designed for juniors/seniors. Opportunity for students to become involved in cancer control through classroom discussion, lectures, service in field, and guided research. Biology of cancer, its prevention, early detection, treatment, and rehabilitation. Letter grading.

**181. Campus/Community Health and Wellness Promotion: From Theory to Practice. (4)** Lecture, two hours; discussion, two hours. Limited to juniors/seniors. Theory, training, and experience in health/wellness promotion and health/wellness education in selected campus communities. Participation in supervised small-group program planning project. Letter grading.

**187A-187B. Introduction to Interventions for At-Risk Populations. (4-4)** Lecture, three hours; committee meetings/community service, two to six hours. Course 187A is requisite to 187B. Designed for juniors/seniors. Health and social needs/services from primarily public health perspective, drawing on related academic/professional disciplines. Community-based service learning strategy used to enhance knowledge of concepts covered. As part of service portion, students trained as caseworkers and committee members. Letter grading.

**188A-188B. Special Courses in Community Health Sciences. (4-2)** Lecture, two hours (188B) and three hours (188A). Examination of current topics or particular subfields or experimental or temporary courses in community health sciences. Specific topic areas vary with instructor. May be repeated for credit with topic change. P/NP or letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors and departmental honors programs. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**195. Community or Corporate Internships in Community Health Sciences. (4)** Tutorial, six hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Further supervision provided by public health organization for which students do internship. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising placement sponsor required. P/NP or letter grading.

**197. Individual Studies in Community Health Sciences. (2 to 4)** Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**199. Directed Research in Community Health Sciences. (2 to 4)** Tutorial, one hour. Limited to juniors/seniors. Entry-level research apprenticeship under guidance of faculty mentor with affiliated research interests. Collaboration with faculty mentors on their research in area related to community health sciences. May be repeated for credit. Individual contract required. Letter grading.

## Graduate Courses

**200. Global Health Problems. (4)** Lecture, two hours; discussion, two hours. Overview of health profile of world in the century. Global health problems and methods by which they have been dealt in context of Alma Ata goal of health for all by year 2000. Letter grading.

**205. Immigrant Health. (4)** Lecture, two hours; discussion, one hour. Limited to graduate students. Overview of key topics in public health for documented and undocumented immigrants and refugees in U.S. Demographics, health status, behavioral risk factors, and social determinants, health and human rights, and access to healthcare and prevention services. Analysis of public policy across topics. Builds skills necessary to develop integrated approach to health of immigrant populations. Letter grading.

**M208. Introduction to Demographic Methods. (4)** (Same as Biostatistics M208, Economics M208, and Sociology M213A.) Lecture, four hours. Preparation: one introductory statistics course. Introduction to methods of demographic analysis. Topics include demographic rates, standardization, decomposition of differences, life tables, survival analysis, cohort analysis, birth interval analysis, models of population growth, stable populations, population projection, and demographic data sources. Letter grading.

**M209. Population Models and Dynamics. (4)** (Same as Sociology M213C.) Lecture, three hours. Requisite: course M208. Population models and their dynamics in population processes. How demographic models are used in estimation of population size, age structure, and associated dynamics. Computer simulations of demographic processes to gauge conclusions from demographic models. Estimation of demographic models in human population and broader relevance of demographic analysis to study of any population or system, including health and social systems. S/U or letter grading.

**210. Community Health Sciences. (4)** Lecture, three hours; discussion, one hour. Preparation: one social sciences course. Basic concepts, relationships, and policy issues in field of community health, variability in definitions of health and illness, correlates of health and illness behavior, impact of social and community structure on health status, major contemporary approaches to health promotion and health education at community level. Use of comparative international perspective. Letter grading.

**211A-211B. Program Planning, Research, and Evaluation in Community Health Sciences. (4-4)** Lecture, three hours; discussion, one hour; outside assignments, eight hours. Course 211A is requisite to 211B. Development, planning, and administration of public health programs in community settings. Introduction to range of research methods and techniques used in designing and conducting health research, with particular emphasis on evaluation of community-based public health programs. Course organized into three modules. Letter grading. **211A.** Requisite: course 210; **211B.** Requisites: courses 210, 211A, and Biostatistics 100B or Epidemiology 100 or Public Health 200A and 200B.

**212. Advanced Social Research Methods in Health. (4)** Lecture, four hours; laboratory, two hours; outside assignments, eight hours. Requisites: courses 211A, 211B, Biostatistics 100B, 406. Problems of health survey design and data collection; measurement issues in data analysis and interpretation; use of computer for analysis of large-scale survey data using various statistical techniques. Letter grading.

**213. Research in Community and Patient Health Education. (4)** Lecture, three hours; discussion, two hours. Requisite: course 210. Application of conceptual, theoretical, and evaluation skills to community-based health education risk-reduction programs. Computer applications, data management, and research methodologies taught through microcomputer and mainframe computer management and analysis of program databases. Letter grading.

**214. Issues in Program Evaluation. (4)** Discussion, three hours; reading and research paper, one hour. Requisite: course 212. Advanced seminar that explores problems of planning and implementing evaluation research in context of local demonstration projects. Letter grading.

**M216A. Qualitative Research: Design and Data Collection. (4)** (Formerly numbered M216.) (Same as Anthropology M285A.) Seminar, three hours; laboratory, one hour. Intensive seminar/field course in qualitative

research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care. Letter grading.

**M216B. Qualitative Research: Analysis and Dissemination. (4)** (Same as Anthropology M285B.) Lecture, three hours. Hands-on approach to qualitative data analysis. Students learn how to conduct all steps of thematic analysis, including developing codes and coding schemes, analytic techniques to compare and categorize data, assessing validity and quality of data, as well as summarizing and presenting qualitative findings. Lectures, discussion of readings, and practical exercises by hand and with Dedoose computer software. S/U or letter grading.

**M217. Current Issues in Food Studies. (4)** (Same as Urban Planning M216.) Seminar, three hours. Limited to Food Studies Graduate Certificate Program students. Food is complex subject given that production, procurement, preparation, consumption, and exchange of edible matter is biologically vital to human growth, development, and function and critical to many aspects of society and culture. Food studies is growing cross-disciplinary field of research, teaching, and advocacy that encompasses and draws from cultural anthropology and geography, food law and policy, urban planning, sociology, literature, history, public health, nutrition, environmental science, molecular and cell biology, science and technology studies (STS), agronomy, and other disciplines. Survey of some of these wide-ranging topics and disciplines that define food studies. Letter grading.

**M218. Questionnaire Design and Administration. (4)** (Same as Epidemiology M218.) Lecture, four hours. Requisites: courses 211A and 211B, or Epidemiology 200B and 200C. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires. Letter grading.

**219. Theory-Based Data Analysis. (4)** Seminar, three hours. Enforced requisites: courses 270A, 270B, Biostatistics 100B, 406, Public Health 200A, 200B, or permission of instructor. Limited to Community Health Sciences PhD students. Translation of theory into data analytic plan, its application to real data, and interpretation of results obtained through multivariate analysis. Analysis of quantitative data using range of multivariate techniques, such as linear multiple regression and logistic regression. Analysis of theoretical problem using student quantitative data or public use data. Letter grading.

**220. Racism and Public Health: Social Epidemiologic Approaches. (4)** Seminar, two hours; discussion, one hour. Requisite: Biostatistics 100B. Integration of social epidemiologic methods and critical approaches to study of racial stratification and public health, with focus on (1) conceptualizing racism-related factors as social determinants of health, (2) building methodological competence for conducting research on racism as social determinant of health, and (3) developing critical self-consciousness to better understand how persons' racial- or racism-related perspectives and experiences might inform their research. Letter grading.

**221. African American Health across Life. (4)** Seminar, two hours. Requisite: course 210. Critical examination of social, psychological, and biological pathways to health and longevity among African Americans through engagement with empirical research from multiple disciplines (public health, sociology, psychology, medicine). Guided by social stress theory and other theoretical perspectives, consideration of health impact of historical and contemporary racial inequality. Application of this critical lens to examine current events and propose potential public health solutions and avenues for intervention. Study of African American health is often characterized by deficit approach, which defines well-being of this population only in terms of their health risks relative to majority. Discussion of risk factors associated with adverse health outcomes, but also identification of numerous resources used by African Americans to promote resilience and preserve health. Letter grading.

**M222. Understanding Fertility: Theories and Methods. (4)** (Same as Sociology M206.) Lecture, three hours. Preparation: one formal or social demography course. Requisite: Biostatistics 100A. Application of demographic theories and methods to describe fer-

tility trends and differentials and social and proximate determinants of fertility, with emphasis on understanding key proximate determinants. For advanced students interested in population, demography of health, and social demography. Letter grading.

**224. Social Determinants of Nutrition and Health. (4)** Lecture, three hours. Preparation: one basic nutrition course. Health promotion strategies aimed at reducing chronic disease risk through lifestyle changes have not been particularly successful in addressing needs of socioeconomically disadvantaged groups. Overview of literature supporting relationship between socioeconomic disadvantage and food-related health conditions such as obesity, diabetes, and osteoporosis. Critical examination of plausible pathways from perspectives of multidisciplinary (economics, nutrition, sociology, and more), with focus on linkages between social and physical environment (including built environment) and food equity/access; discussion of how food may be catalyst for improving social capital and health. Discussion of examples of local and international efforts to improve access to healthy foods and/or limit access to unhealthy foods. Exploration of methods for assessing social capital and food-related aspects of neighborhood environments. S/U or letter grading.

**225. Writing for Publication in Public Health. (4)** Seminar, four hours. Requisites: course 219, two graduate biostatistics courses, one graduate epidemiology course. Development of skills for advanced doctoral students in producing peer-review-quality research papers, with focus on theoretically informed empirical research papers. Examination of other types of manuscripts (e.g., reviews) included. Letter grading.

**226. Women's Health and Well-Being. (4)** Lecture, four hours. Limited to graduate students. Interdisciplinary perspective critically examining research on women's health. Overview of scientific inquiry and methods; gender roles; status attainment and medical sociology. Review of current data on women's health. Letter grading.

**227. Conceptualizing and Measuring Structural Racism. (4)** Lecture, three hours. Limited to graduate students. How structural racism and other forms of systematic inequality may contribute to health inequities. Moves beyond interpersonal experiences of racism to focus on ways to conceptualize, measure, and investigate racism perpetuated and maintained by social institutions. Letter grading.

**M228. Introduction to Mixed Methods Research. (4)** (Same as Health Policy and Management M228.) Seminar, three hours; discussion, one hour. Limited to graduate students. Highly recommended: Health Policy and Management 225A and 225B, or completion of coursework in basic research design and methods. Introduction to mixed methods research, with emphasis on its application to public health research. Equips students with skills to critique mixed method research designs and to design mixed methods research investigation for health issue of interest. Study of different mixed methods research designs commonly used in public health and health services research, including feasibility studies, convergent parallel design, sequential mixed methods, and multiphase studies. Use of combination of didactic and applied techniques. S/U or letter grading.

**229. Policy and Public Health Approaches to Violence Prevention. (4)** Lecture, four hours. How policies relate to violence and development of skills to transmit this knowledge. Examination of wide range of policy topics and how each might be associated with reduction/increase in violence/violent injury. Letter grading.

**230. Family and Sexual Violence. (4)** Lecture, three hours; community, three to four hours. Examination of rape, incest, and spouse and elder abuse. Presentation of definitions, causes, outcomes of research on family and sexual violence, as well as response of social service, medical, and criminal justice systems. Letter grading.

**231. Maternal and Child Nutrition. (4)** Lecture, four hours. Nutrition of mothers, infants, and children in countries at various levels of socioeconomic development; measures for prevention and treatment of protein/calorie malnutrition; relationship between nutrition

and mental development; impact of ecological, socio-economic, and cultural factors on nutrition, nutrition education, and service. Letter grading.

**M232. Determinants of Health. (4)** (Same as Health Policy M242.) Lecture, three hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and evidence for social, economic, environmental, genetic, health system, and other factors that influence health of populations and defined subgroups. Letter grading.

**233. Hunger and Food Insecurity as Public Health Issues. (4)** Lecture, three hours. Designed for graduate students. Public health aspects of hunger and food insecurity in historical and international perspectives, including measurement and identification of vulnerability, prevention, and options for relieving acute food shortage. Letter grading.

**M234. Obesity, Physical Activity, and Nutrition Seminar. (4)** (Same as Health Policy M255.) Seminar, three hours; outside study, one hour. Designed for graduate students. Multidisciplinary introduction at graduate level to epidemiology, physiology, and current state of preventive and therapeutic interventions for obesity in adults and children, including public health policy approaches to healthy nutrition and physical activity promotion. S/U or letter grading.

**235. Influence of Social and Physical Environment on Racial Health Disparities. (4)** Seminar, three hours. Preparation: at least one biostatistics or epidemiology course. Limited to graduate students. Examination of how community stressors and neighborhood resources may contribute to health disparities. Discussion of multiple factors that contribute to environmental injustice and their potential solutions. Do health disparities arise because minorities and low-income populations live in harmful environments? Is relationship between environment and health disparities merely one of potential exposure to chemical/physical hazards, or are there psychosocial mechanisms at community level that act above or beyond effects of physical environment? Letter grading.

**M237. Evolving Paradigms of Prevention: Interventions in Early Childhood. (4)** (Same as Health Policy M290.) Seminar, three hours; fieldwork, one hour. Designed for graduate students. Introduction to use of early childhood interventions as means of preventing adverse health and developmental outcomes. Concepts of developmental vulnerability, approaches to assessment, models of service delivery, evaluation and cost-benefit issues, funding, and other policy issues. Letter grading.

**238. Evolving Paradigms of Prevention: Interventions in Adolescence. (4)** Seminar, three hours. Adolescent health and interventions, with focus on sex, alcohol, and drug use. Focus on adolescent identity development, adolescent sexuality, discussion of gay, lesbian, bisexual, and transgender issues, components of sexual risk-taking behavior, and alcohol and drug use (e.g., peer influence, changes in brain activity) and interventions that have been developed to address these behaviors. Building of skills to work with adolescent populations and in community-based settings. Letter grading.

**M239. Race, Ethnicity, and Culture as Concepts in Practice and Research. (4)** (Same as Asian American Studies M239.) Seminar, three hours. Integration of cross-cultural findings in healthcare with current American (U.S.) healthcare system paradigms to facilitate designing culturally based public health programs and train culturally competent practitioners. Letter grading.

**240. Child and Reproductive Health in Communities: Global Environmental Perspective. (4)** Lecture, three hours. Limited to graduate students. Examination of global issues of child and reproductive health in relation to environmental factors in interplay with socio-economic and biological factors. Environmental influences are responsible for one quarter of total burden of disease worldwide, and for more than one third of burden among children—most of them living in resource-poor countries and communities. Discussion of impacts of qualitatively different, and potentially modifiable, factors such as access to safe water or urbanization, as well as environmental contribution to high-burden outcomes in childhood and reproduction.

Focus on lower income settings and discussion of relevant population-based approaches to assessment and intervention. Letter grading.

**246. Women's Roles and Family Health. (4)** Lecture, two hours; discussion, one hour. Rapidly changing roles of women throughout world are having important effects on women's own health and that of their families. Analysis of multidisciplinary research from both developing and industrialized countries to provide basis for in-depth discussion of programmatic and policy implications. Letter grading.

**247. Population Change and Public Policy. (4)** Lecture, four hours. Examination of international population change, population-related policies, and public health implications of demographic processes. Letter grading.

**M248. Primary Health Care. (4)** (Same as Health Policy and Management M248.) Lecture, four hours. Strongly recommended requisite: Public Health 200A, 200B. Recommended requisite: course 200 or Health Policy and Management 240. Primary Health care (PHC) is considered to be foundation of all health systems and should be able to resolve 80 percent or more of population's health problems. Overview of organization, structure, and functions of primary health care with emphasis on low- and middle-income country settings. Study of history and origins of PHC, roles and functions of PHC in health systems, different organizational and managerial approaches to organizing and delivering health care within PHC framework, and tools for measuring how well PHC programs and services are functioning. Review and critical analysis of evidence-based on PHC effectiveness and impact and present detailed case studies of PHC programs in diverse settings around world. Letter grading.

**M249L. Ethical Theory and Applications in Public Health. (4)** (Same as Health Policy M285.) Lecture, four hours. Requisites: Health Policy 200A, 200B. Introduction to ethical theories and critical ethical issues pertaining to healthcare policy and healthcare management. Research, writing, and discussion on variety of topics related to health and human rights to enhance professionalism, leadership, and systems thinking and improve student sensitivity to needs of patients, coworkers, and fiduciary shareholders. How ethics are foundation of leadership. Letter grading.

**M250. HIV/AIDS and Culture in Latin America. (4)** (Same as Latin American Studies M262.) Seminar, three hours. Exploration of cultural, political, and public health context for people living with and at risk for HIV/AIDS and their families in Latin America. Public health aspects, including epidemiology, comorbidity concerns and community interventions, medical anthropological study of experience of those impacted, and grass-roots responses, as well as political/economic context addressing poverty and structural violence. Letter grading.

**M251. Nutritional Epidemiology I. (4)** (Same as Epidemiology M254.) Lecture, two hours; discussion/laboratory exercise, one hour. Preparation: introductory biostatistics and epidemiology courses. Review of all aspects of contemporary nutrition sciences that require application of epidemiologic principles and methods, ranging from food-borne outbreak investigation to evidence-based regulatory assessment of health claims for foods. Experience in actual world of collecting, analyzing, and interpreting data related to nutrition and health or disease outcomes. S/U or letter grading.

**M252. Health Policy Analysis. (4)** (Same as Health Policy M233.) Lecture, three hours. Requisites: courses M276, Health Policy 200A, M236. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of life-cycle of public policy. Letter grading.

**254. Intentional Disasters: War and Refugees. (2)** Lecture, two hours. Recommended requisites: courses 211A, 211B, 295, Epidemiology 100, one survey methods course. Previous international experience strongly encouraged. Overview of intentional disasters, with focus on technically underdeveloped areas and consequent population migration. Principal focus on health consequences of these events and strategies to address health issues. Letter grading.

**M256. Interdisciplinary Response to Infectious Disease Emergencies: Public Health Perspective. (4)** (Same as Medicine M256, Nursing M298, and Oral Biology M256.) Lecture, three hours; discussion, one hour. Designed to instill in professional students ideas of common emergency health problems and coordinated response, with specific attention to bioterrorism. Examination of tools to help students prevent, detect, and intervene in infectious disease emergencies. Interdisciplinary sessions also attended by students in Schools of Dentistry, Medicine, and Nursing during weeks two through five. Letter grading.

**257. Program Planning in Community Disaster Preparedness. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 211A, 211B, 295. Health education and emergency management principles combined to design, plan, implement, and evaluate community disaster preparedness programs, including needs assessment, identification of target population, objective writing, program planning, and process, outcome, and impact evaluation. Letter grading.

**258. Cooperative Interagency Management in Disasters. (4)** Lecture, four hours. Recommended requisite: course 295. Designed for graduate students. Broad overview of how different agencies involved in disaster responses work together to handle impact of mass population emergencies. Identification of role of local, state, and federal governments, nonprofit and private sector organizations, media, and healthcare facilities in disaster situations. Students meet with representatives of different agencies involved in disaster responses and visit one of area's state-of-art emergency management operations facilities. Letter grading.

**M259. Smoking, Drinking, Shooting, and Driving: Understanding Public Health Policy in U.S. (4)** (Same as Health Policy and Management M259.) Lecture, two hours; discussion, two hours. Recommended requisite: Community Health Sciences 286. Overview of essential theories regarding development, implementation, and impact of public health policies in U.S. with emphasis on state and local governments. Students develop skills in public health policy research (laws, regulations, statutes, ordinances) and engage in critically analyzing evidence for different approaches currently used to address some of main causes of death and disability in U.S. including tobacco, alcohol, firearms, food and nutrition, and motor vehicle safety. Readings, case studies, exploration of public use data, group discussions, and directed individual research. Students engage in discussion and debate regarding contemporary challenges and emerging trends. S/U or letter grading.

**M260. Health and Culture in Americas. (4)** (Same as Anthropology M233R and Latin American Studies M260.) Lecture, three hours. Recommended requisite: course 132. Health issues throughout Americas, especially indigenous/Mestizo Latin American populations. Holistic approach covering politics, economics, history, geography, human rights, maternal/child health, culture. Letter grading.

**M263. Social Demography of Los Angeles. (4)** (Same as Sociology M263.) Lecture, three hours. Designed for graduate students. Use of city of Los Angeles to examine major social and demographic factors that characterize cities in U.S. Examination of role of these factors in affecting health outcomes. Letter grading.

**M264. Latin America: Traditional Medicine, Shamanism, and Folk Illness. (4)** (Same as Anthropology M233Q and Latin American Studies M264.) Lecture, three hours. Recommended preparation: course 132, bilingual English/Spanish skills. Examination of role of traditional medicine and shamanism in Latin America and exploration of how indigenous and mestizo groups diagnose and treat folk illness and Western-defined diseases with variety of health-seeking methods. Examination of art, music, and ritual and case examples of religion and healing practices via lecture, film, and audiotape. Letter grading.

**270A-270B. Foundations of Community Health Sciences. (4-4)** Lecture, four hours. Enforced requisite: course 210. Course 270A is enforced requisite to 270B. Limited to departmental doctoral students. In-

depth analysis of theories, methods, and research on which community health sciences are based. Letter grading.

**271. Health-Related Behavior Change. (4)** Lecture, four hours. Requisite: course 210. Unified behavioral science approach to natural determinants of change, as foundation for planned change in health-related behavior at community, group, and individual levels. Letter grading.

**M272. Social Epidemiology. (4)** (Same as Epidemiology M272.) Lecture, two hours; discussion, one hour. Requisite: Epidemiology 100 or Public Health 200A and 200B. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on lifestyles and other socioenvironmental factors associated with general susceptibility to disease and subsequent mortality. Letter grading.

**276. Complementary and Alternative Medicine. (4)** Lecture, three hours. Requisite: course 210. Analysis of use and acceptance of complementary and alternative medicine (CAM) by clients and providers. Core beliefs of CAM, relationship of CAM and spirituality, licensure and certification of CAM providers, relationship of CAM and conventional medicine, impact of CAM on client identity. Letter grading.

**277. Advanced Community Health Education. (4)** Lecture, two hours; discussion, two hours. Requisite: course 210. Before planning educational components of health program, one must assess behaviors and factors influencing health problem. Conceptual, theoretical, and evaluative skills developed and applied in constructing community-based educational program. Letter grading.

**M278. Work and Health. (4)** (Same as Environmental Health Sciences M270.) Lecture, three hours; practicum, one hour. Recommended preparation: graduate-level methods/statistics course, basic epidemiology. Designed for graduate students. Exploration of impact of work on physical and psychological health in context of newly emerging discipline. Focus on psychosocial models, measurement (including hands-on experience), contextual factors (gender, ethnicity, social class), and how work stressors can be ameliorated. S/U or letter grading.

**281A. Capstone Seminar: Health Promotion and Education. (4)** Seminar, 90 minutes; discussion, 90 minutes. Enforced requisite: course 210. Current problems and findings in health promotion and education (e.g., nutrition, family health, AIDS/HIV, minority health); learning from presentations and critical discussions of master's project reports completed under faculty supervision. Letter grading.

**281B. Capstone Seminar: Health Promotion and Education. (2)** Seminar, one hour; discussion, one hour. Current problems and findings in health promotion and education (e.g., nutrition, family health, AIDS/HIV, minority health); learning from presentations and critical discussions of master's project reports completed under faculty supervision. Letter grading.

**282. Social Marketing for Health Promotion and Communication. (4)** Lecture, three hours; fieldwork, one hour. Requisite: course 210. Planning, creating, implementation, and evaluation of comprehensive health communication campaigns, including use of social marketing practices and strategies of audience research, marketing psychology, creative message development, branding, comprehensive media use for dissemination, transmedia. Competencies: conducting focus group interviews, creating and evaluating effective health campaigns, critical assessment of existing campaigns. Letter grading.

**283. Evidence-Based Health Promotion Programs for Older Adults. (4)** Seminar, three hours. Requisite: course 210. Graduate seminar intended to explore sociocultural determinants of health-related behaviors among aged. Letter grading.

**284. Sociocultural Aspects of Mental Health. (4)** Seminar, three hours. Requisite: course 210. Designed for graduate students. Examination of how society shapes mental health of its members and lives of those who have been identified as mentally ill. Group differences (e.g., gender, ethnicity) in disorder and how it is socially constructed. Letter grading.

**286. Doctoral Roundtable in Community Health Sciences. (4)** Seminar, two hours. Designed for departmental doctoral students who must enroll every term until they are advanced to candidacy. Interactive seminar with focus on research process and social mechanisms in science. May be repeated for credit. S/U grading.

**M287. Politics of Health Policy. (4)** (Same as Health Policy and Management M287 and Public Policy M266.) Lecture, three hours; discussion, one hour. Examination of politics of health policy process through analysis of case studies such as environmental protection, pandemic preparedness and response, preventive health services for women, and racial and income inequality and health. Examination of framework for assessing evidence-based policy making and effects of political structure and current political divisions, including efforts such as to repeal and dismantle Affordable Care Act. Letter grading.

**288. Health Communication in Popular Media. (4)** Lecture, three hours; discussion, one hour. Requisites: course 210 or prior social sciences courses. Media utilization, media effects, media content, media advocacy, media literacy, health journalism, video and audio storytelling techniques, new media, entertainment education, and transmedia. Competencies: media content analysis, writing popular nonfiction (blogs, journalism), creating and evaluating effective communications using popular media. Letter grading.

**290. Race, Class, Culture, and Aging. (4)** Lecture, three hours; discussion, one hour. Experience of aging for African American, Latino, and Asian elderly examined in context of their families, communities, and nation. Exploration of cultural and structural influences on health and lived experiences of those elders. Letter grading.

**291. Health Policy and Aged. (4)** Lecture, three hours; discussion, one hour. Examination of political, economic, and social forces that shape health policy for aged, identifying failings in those policies within framework of broader health policy problems. Letter grading.

**292. Information Technology for Health Promotion and Communication. (4)** Lecture, three hours; field practice, one hour. Requisites: course 210 or prior social sciences courses. Health literacy, Internet use and health communication, design of health communication materials using digital media that integrates practice and theory and includes websites, print materials, short videos, curricula, and training materials. Laboratory sessions for materials production. Competencies: creating health communication materials for diverse audiences using new media information technology applied to website, social media, print media, video, and audio platforms. Letter grading.

**293. Social and Behavioral Research in AIDS: Roundtable Discussion. (2 to 4)** Discussion, two hours; individual consultation, two hours. Review and discussion of research programs directed toward identification of psychosocial, biobehavioral, environmental, and community factors related to prevention and control of AIDS/HIV. Letter grading.

**M294. Social and Behavioral Factors of HIV/AIDS: Global Perspective. (4)** (Same as Psychiatry M288.) Lecture, four hours. Requisites: course 100 and Epidemiology 100, or prior social sciences courses. Overview of social and behavioral factors that influence both transmission and prevention of HIV/AIDS throughout world. Letter grading.

**295. Overview of Emergency Public Health. (4)** Lecture, four hours. Designed for graduate students. Overview of issues involved in disaster preparedness and response for public health agencies. Introduction to theoretical and practice aspects of field of emergency public health. Examination of disaster cycle and various natural and human-induced hazards from public health perspective. Letter grading.

**296. Advanced Research Topics in Community Health Sciences. (2 to 4)** Discussion, two to four hours. Advanced study and analysis of current topics in community health sciences. Discussion of current research and literature in research speciality of faculty member teaching course. May be repeated for credit. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**400. Field Studies in Public Health. (4)** Fieldwork, to be arranged. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward MS minimum course requirement; 4 units may be applied toward 60-unit minimum total required for MPH degree. Letter grading.

**M411. Issues in Cancer Prevention and Control. (4)** (Same as Health Policy M411.) Lecture, four hours. Designed for juniors/seniors and graduate students. Introduction to causes and characteristics of cancer epidemic, cancer control goals for nation, and interventions designed to encourage smoking cessation/prevention, cancer screening, and other dietary, psychosocial, and lifestyle changes. Letter grading.

**M420. Children with Special Healthcare Needs: Systems Perspective. (4)** (Same as Health Policy M420 and Social Welfare M290I.) Lecture, three hours; fieldwork, one hour. Examination and evaluation of principles, policies, programs, and practices that have evolved to identify, assess, and meet special needs of infants, children, and adolescents with developmental disabilities or chronic illness and their families. Letter grading.

**427. Reproductive Health in Sub-Saharan Africa. (4)** Lecture, four hours. Recommended requisite: course 247. In-depth understanding of reproductive health challenges facing sub-Saharan Africa and main programs designed to address them. Topics include family planning, STIs, abortion, adolescents, HIV/AIDS, and refugees. Letter grading.

**M428. Child and Family Health Program Community Leadership Seminar. (2)** (Same as Health Policy M428.) Seminar, two hours. Designed for graduate students. Examination of characteristics of community-based organizations (CBOs) and role of leadership in decision-making process involved in major issues facing maternal and child health in Los Angeles County. Focus on specific leadership competencies that are or should be employed by organizations effective in shaping maternal and child health programs and policies (or any population-level policies and programs). Leaders from CBOs in Los Angeles meet with students, comment on their practicum experiences, and underscore community leadership concepts demonstrated by those CBOs. S/U or letter grading.

**M430. Building Advocacy Skills: Reproductive Health Focus. (4)** (Same as Health Policy M434.) Seminar, three hours. Recommended requisite: one prior health policy course such as Community Health Sciences 247 or Health Policy 235. Designed for School of Public Health graduate and doctoral students. Skills-building course to develop competency in assessing, developing, and implementing advocacy strategies for reproductive health initiatives. Introduction to legislative and community advocacy initiatives and to policymaking process, including policy analysis and development of resources necessary for legislative advocacy. Identification of advocacy goals and objectives, development of advocacy plan, coalition building, organizational capacity building, media relations, and message development for various audiences. Students learn about range of former and current reproductive health advocacy campaigns. Letter grading.

**431. Foundations of Reproductive Health. (4)** Lecture, three hours. Limited to graduate students. Understanding reproductive technologies and practices is critical for public health students interested in designing programs to address problems such as unwanted pregnancy, family planning, sexually transmitted diseases, and inadequate preventive services. Examination of foundations of reproductive health from medical perspective, with particular attention to implications for public health programs, health services, and policy. Topics include anatomy and physi-

ology of male and female reproductive health tracts, methods of birth control, medical and surgical abortion, infertility, maternal care, and sexual violence and trauma. S/U or letter grading.

**432. Perinatal Healthcare: Principles, Programs, and Policies.** (4) Lecture, three hours; discussion, one hour. Comprehensive examination of perinatal health-care, including perinatal epidemiology, outcome measures, public programs, controversies surrounding new technology, regionalization, organization of services at federal, state, and county levels, and medical/legal issues. S/U or letter grading.

**434A. Maternal and Child Health in Developing Areas.** (4) Lecture, four hours. Requisite: course 231. Major health problems of mothers and children in developing areas, stressing causation, management, and prevention. Particular reference to adapting programs to limited resources in cross-cultural milieus. S/U or letter grading.

**435. Seminar: Advanced Issues in Women's Health.** (4) Seminar, three hours. Preparation: at least one prior women's health course, one to two biostatistics courses, one research methods course. Provides more advanced and in-depth understanding of ways in which scientists know; and considerations of women's place in scientific discourse. Examination of series of case studies as starting point for discussion. Letter grading.

**M436A-M436B. Child Health, Programs, and Policies.** (4-4) (Same as Health Policy M449A-M449B.) Lecture, four hours. Requisite: Health Policy 100. Course M436A is requisite to M436B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations. Letter grading.

**440. Public Health and National Security at U.S.-Mexico Border.** (4) Lecture, two hours; discussion, one hour; research and literature review, one hour. Designed for graduate students. Exploration of community and environmental health and health services issues that are present along U.S.-Mexico and coastal California borders. Integrated within public health framework are issues and mitigation of national security and disaster/terrorist risks and hazards. Letter grading.

**441. Planning and Evaluation of Global Health Programs.** (4) Lecture, four hours. Theory, guidelines, and team exercise for planning community health/family planning projects in U.S. and in developing countries. Phases include community needs identification; goal setting; budget and work plan development; funding; staffing; evaluation design; data and cost analysis; and project presentation. Letter grading.

**444. Anthropometric and Dietary Aspects of Nutritional Assessment.** (4) Lecture, two hours; discussion, one hour; laboratory, two hours. Practical skills in anthropometric and dietary assessment, including selection of appropriate methods, data gathering and handling, and analysis and presentation. Letter grading.

**446. Nutrition Education and Training: Third World Considerations.** (4) Lecture, two hours; discussion, one hour; student participation, one hour. Requisite: course 434A. Problems and priorities in nutrition education and training for families and health workers in Third World countries, including new concepts in primary healthcare services, mass media, communications, and governmental and international interventions. S/U or letter grading.

**447. Health and Social Context in Middle East.** (4) Lecture, four hours. Recommended preparation: background in Islamic or Middle Eastern studies. Requisite: course 200 or 231 or 434A. Current health issues and problems of countries in Middle East and implications for socioeconomic development. Review of economic, demographic, and cultural variation of region to provide background for discussion of trends and patterns of health and nutritional status of population in area. Letter grading.

**448. Nutrition Policies and Programs: Domestic and International Perspectives.** (4) Lecture, two hours; discussion, two hours; field visits. Preparation: one nutrition sciences course and/or nutrition program ex-

perience. Nutrition programs and policies in U.S. and developing countries compared and contrasted. Analysis of role of major international, governmental, and nongovernmental agencies. Emphasis on meeting needs of vulnerable populations. Letter grading.

**449. Nutrition and Chronic Disease.** (4) Lecture, four hours. Requisite: course 130 or one introductory nutrition or biology course. Advanced-level seminar on nutritional needs of healthy individuals, current knowledge of role of nutrition in disease prevention, nutritional and metabolic responses to disease, and role of nutritional therapy in management of disease. Letter grading.

**451. Post-Disaster Community Health.** (4) Lecture, four hours. Examination of how public health research and practices can be combined to address post-disaster community health needs. Identification of disaster-related health problems, data collection strategies, and service delivery approaches in post-disaster environment. Letter grading.

**452. Management of Food and Nutrition in Major Emergencies.** (4) Lecture, three hours. Designed for second-year master's or doctoral students interested in humanitarian relief. Basic principles required to design rational and cost-effective food and nutrition emergency relief approaches and programs. Letter grading.

**CM470. Improving Worker Health: Social Movements, Policy Debates, and Public Health.** (4) (Same as Environmental Health Sciences M471 and Urban Planning M470.) Lecture, three hours; fieldwork, two hours. Examination of intersection between work, health, and environment, analysis of social causes of health disparities, investigation of historical trends and social movements, interpretation of current policy debates, and development of innovative interventions. Concurrently scheduled with course CM170. S/U or letter grading.

**477. Health Disparities, Health Equity, and Sexual Minority Populations.** (4) Lecture, two hours; discussion, one hour. Limited to graduate students. Examination of health disparities affecting sexual minority populations, category that includes lesbians, gay men, bisexuals, and transgender (LGBT) persons. Use of Healthy People 2010 Companion Document for LGBT Health to outline key health issues and national recommendations for achieving reductions in each area. Discussion of considerations for providing clinical care and public health practice in this population, unique social and contextual factors influencing LGBT health, and methodological issues for conducting research among LGBT persons. S/U or letter grading.

**482. Practicum: Community Health Sciences.** (4) Discussion, two hours; fieldwork, up to 20 hours. Requisites: courses 210, 211A, 211B. Understanding of professional practice in health-related organizations. Letter grading.

**484. Risk Communications.** (4) Lecture, three hours; fieldwork, one hour. Requisites: courses 210, 211A, and 211B, or prior public health and behavioral sciences courses. Risk communication theory, research, and practice, including social and psychological bases of population risk perceptions, media theories, and how risk is portrayed in media. Environmental, product safety, food-borne and infectious diseases, disasters, and bioterrorism communication. Competencies: understanding everyday and emergency risk communication principles, creating valid risk communication messages and materials, working proactively with new media. Letter grading.

**485. Resource Development for Community Health Programs.** (4) Lecture, three hours; fieldwork, one hour. Enforced requisites: courses 211A, 211B, Public Health 200A, 200B, or permission of instructor. Designed for graduate students. Overview course of fund and resource development for public health and community-based programs. Lectures and workshops include developing grant proposals, researching funding sources, evaluating proposals, developing volunteer and in-kind resources, and implementing capital campaigns. Letter grading.

**487. Community Organization for Health.** (4) Lecture, three hours; fieldwork, four to six hours. Preparation: three public health, sociology, or anthropology

courses. Requisite: course 210. Theory and practice of community organizations, including models and strategies of community organization and their application to health problems and health policy. Particular attention to use of community organization for health promotion and to change public policy. Letter grading.

**501. Cooperative Program.** (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research.** (2 to 12) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward MPH and MS minimum total course requirement. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations.** (2 to 12) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research.** (2 to 8) Tutorial, to be arranged. Only 4 units may be applied toward MPH and MS minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research.** (2 to 12) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

### Adjunct Professor

Romy Sutherland, PhD

## Overview

Standing at the forefront of innovative work in literary, theoretical, and cultural studies, comparative literature is one of the most exciting fields in the humanities. As a multifaceted discipline, it promotes linguistic proficiency in more than one language, fosters cultural knowledge of more than one culture, and empowers students with the critical and theoretical tools necessary for them to achieve success in a quickly globalizing world. The UCLA program offers students the opportunity to work with the diverse faculty members of the Department of Comparative Literature as well as with the vast number of faculty members in any language and literature departments.

Interdisciplinary and multilingual in scope, the department is committed to continuing its pioneering work in defining new literary paradigms and fostering new directions for exploration in literary and critical studies from around the globe, with particular focus on lesser-known literatures, cultures, and languages. Its diverse class offerings allow students the unique opportunity to explore and grasp new ventures in the humanities (such as health humanities, global south studies, decolonial studies, and memory studies) as well as continuing pursuits of the relationship between translation and transnationalism, literary theory and emerging media, the future of national literatures in an era of globalization, gender and sexuality studies, East-West cultural encounters, human rights, critical race studies, and experimental approaches to literature and culture.

Focusing on elements that preoccupy literary and critical studies in general, such as genre, narrative, form, period, theme, language, and theory, comparative literature also extends its range to questions that concern other disciplines such as anthropology, art history, film and media studies, gender studies, history, and philosophy. Courses are designed to provide students with both a historical and theoretical

understanding of literary, visual, and cultural forms, themes, and movements. Given its focus on interdisciplinary research and pedagogy, comparative literature is the ideal site around which to explore and expand the boundaries of national cultures, modern languages, and literary studies.

## Undergraduate Major

### Comparative Literature BA

#### Learning Outcomes

The Comparative Literature major has the following learning outcomes:

- Ability to analyze literary texts
- Ability to situate literary texts in their aesthetic, historical, and cultural contexts
- Knowledge of different methods of analyzing literature
- Understanding of the importance of reading texts in their cultural context
- Ability to read literary texts in two languages
- Ability to write clearly-written, structured analytic essays

#### Entry to the Major

#### Transfer Students

Transfer applicants to the Comparative Literature major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one English composition course, two literature survey courses, at least one of which must be world literature, and the equivalent of at least one year of foreign language.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

#### Requirements

#### Preparation for the Major

*Required:* (1) Two courses from the Comparative Literature 1, 2, or 4 series (with approval of the director of undergraduate studies, a comparable and appropriate lower-division course in another department may be substituted for one of the courses), (2) completion of the College Writing requirement, and (3) literary proficiency in at least one language other than English, to be demonstrated by admission into one upper-division literature course in the original language.

#### The Major

*Required:* Ten courses, of which (1) five must be from comparative literature offerings, including Comparative Literature 100 and at least four additional comparative literature courses selected from M101 through 197, (2) three upper-division literature courses using original language texts in the primary language area, and (3) two upper-division literature courses using original language texts in the secondary language area (students may petition the student services adviser to take two upper-division literature courses in translation if their

primary literature area is in a language other than English).

#### Honors Program

The departmental honors program is open to Comparative Literature majors with a 3.5 departmental and a 3.25 overall grade-point average. Eligible interested students should contact the student services adviser to enter the program.

Departmental honors candidates must complete all requirements for the major and an honors research paper (in addition to regular course requirements) in two of the four required upper-division comparative literature courses. These two honors research papers must be completed during the quarter in which the student is enrolled in the course. Candidates must also complete a fourth course in the primary literature area and Comparative Literature 198 with a core faculty member in which they write an independent research paper of approximately 25 pages.

## Undergraduate Minor

### Comparative Literature Minor

The Comparative Literature minor offers students interested in literature and the humanities the opportunity to gain insight into the critical problems and theories addressed by comparative literature and to apply that knowledge in literature and comparative literature courses.

#### Admission

To enter the minor students must have fulfilled the College Writing requirement, have completed 40 units with an overall grade-point average of 2.0 or better, have taken at least one year or equivalent of a language other than English, and contact the student services adviser, 350B Kaplan Hall, 310-825-7650.

#### The Minor

*Required Courses (28 units minimum):* (1) Four upper-division comparative literature courses (one course from Comparative Literature 1A through 4DW may be substituted), (2) two upper-division courses in one literature (e.g., Arabic, Chinese, English, French, German, Korean, Russian, Spanish) in the original language, and (3) one upper-division course in a second literature in the original language (one level-six foreign language course may be substituted).

#### Policies

If students complete two upper-division courses in a language other than English, they may petition to take one upper-division course taught in English translation to fulfill the third requirement.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Major

### Comparative Literature MA, CPhil, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Comparative Literature Lower-Division Courses

**1A. World Literature: Antiquity to Middle Ages. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to students with credit for course 2AW or 4AW. Study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as *Iliad* or *Odyssey*, Greek tragedies, portions of Bible, Virgil, Petronius, St. Augustine, and others such as *Gilgamesh* or *Tristan and Iseult*. P/NP or letter grading.

**1B. World Literature: Middle Ages to 17th Century. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to students with credit for course 2BW or 4BW. Study of world literature, with emphasis on Western civilization as it grapples with its past and with other civilizations. Examination of works such as Dante's *Divine Comedy*, Cervantes' *Don Quixote*, Shakespeare's *King Lear*, and Sor Juana's Mexican poetry. P/NP or letter grading.

**1C. World Literature: Age of Enlightenment to 20th Century. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to students with credit for course 2CW or 4CW. Study of major texts in world literature, with emphasis on Western civilization. Authors include Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, Joyce, Woolf, and Stevens. P/NP or letter grading.

**1D. Great Books from World at Large. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to students with credit for course 2DW or 4DW. Study of major literary texts usually overlooked in courses that focus only on canon of Western literature. Texts from at least three of following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NP or letter grading.

**1E. Social Media and Storytelling: Comparing Cultures. (5)** Lecture, two hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Study of ways in which social media construct increasingly diverse and decentered narratives—with which we make localized sense of world. Equal emphasis on textual, visual, and sonic networks in arts, politics, and health care. P/NP or letter grading.

**2AW. Survey of Literature: Antiquity to Middle Ages. (5)** Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to

students with credit for course 1A or 4AW. Study of selected texts from antiquity to Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as *Odyssey*, *Gilgamesh*, Sappho, Greek tragedies, *Aeneid*, Petronius, *Beowulf*, Marie de France, *Tristan and Iseult*, *One Thousand and One Nights*, *Popul Vuh*. Satisfies Writing II requirement. Letter grading.

**2BW. Survey of Literature: Middle Ages to 17th Century. (5)** Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 1B or 4BW. Study of selected texts from Middle Ages to 17th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Chaucer, Dante, Cervantes, Marguerite de Navarre, Shakespeare, Calderón, Molière, and Racine. Satisfies Writing II requirement. Letter grading.

**2CW. Survey of Literature: Age of Enlightenment to 20th Century. (5)** Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3. Not open for credit to students with credit for course 1C or 4CW. Study of selected texts from Age of Enlightenment to 20th century, with emphasis on literary analysis and expository writing. Diderot, Dostoevsky, Flaubert, Goethe, Ibsen, James Joyce, Kafka, Jamaica Kincaid, Garcia Marquez, Rousseau, M. Shelley, Strindberg, Swift, Voltaire. Analysis of texts includes focus on structures, processes, and practices that generate inter-group inequities or conflicts as well as those that support fairness and inclusiveness. Satisfies Writing II requirement. Letter grading.

**2DW. Survey of Literature: Great Books from World at Large. (5)** Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3. Not open for credit to students with credit for course 1D or 4DW. Study of major literary texts usually overlooked in courses that focus only on canon of Western literature, with emphasis on literary analysis and expository writing. Texts from at least three of following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. Analysis of texts includes focus on structures, processes, and practices that generate inter-group inequities or conflicts as well as those that support fairness and inclusiveness. Satisfies Writing II requirement. Letter grading.

**4AW. Literature and Writing: Antiquity to Middle Ages. (5)** Discussion, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 1A or 2AW. Study and discussion of selected texts from antiquity to Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as *Iliad*, *Odyssey*, *Gilgamesh*, Sappho, Greek tragedies, *Aeneid*, Petronius, *Beowulf*, or Marie de France. Satisfies Writing II requirement. Letter grading.

**4BW. Literature and Writing: Middle Ages to 17th Century. (5)** Discussion, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 1B or 2BW. Study and discussion of selected texts from Middle Ages to 17th century, with emphasis on literary analysis and expository writing. Texts may include works and authors such as Chaucer, Dante's *Divine Comedy*, Cervantes' *Don Quixote*, Shakespeare, *One Thousand and One Nights*, Christine de Pizan, *Popul Vuh*, Molière, and Racine. Satisfies Writing II requirement. Letter grading.

**4CW. Literature and Writing: Age of Enlightenment to 20th Century. (5)** Discussion, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 1C or 2CW. Study and discussion of selected texts from Age of Enlightenment to 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, M. Shelley, Flaubert, Ibsen, Strindberg, Dostoevsky, Gogol, Kafka, Joyce, Beckett, L. Hughes, and Garcia Marquez. Satisfies Writing II requirement. Letter grading.

**4DW. Literature and Writing: Great Books from World at Large. (5)** Seminar, four hours. Enforced requisite: English Composition 3. Not open for credit to students with credit for course 1D or 2DW. Study and discussion of major literary texts usually overlooked in courses that focus only on canon of Western literature, with emphasis on literary analysis and expository writing. Texts from at least three of following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. Texts may include works by authors such as Achebe, Can Xue, Desai, Emecheta, Kincaid, Neruda, Ngugi, Pak, Rushdie, and El Saadawi. Analysis of texts includes focus on structures, processes, and practices that generate inter-group inequities or conflicts as well as those that support fairness and inclusiveness. Satisfies Writing II requirement. Letter grading.

**10. Virtual Realities: Introduction to Humanities. (5)** Lecture, two hours; discussion, two hours. What exactly are humanities? Position of humanities as not science is becoming unclear as human communication, thought, and culture are increasingly tied to technology. Examination of various disciplines within humanities at UCLA to define their place in today's society, contemplate their possible function in tomorrow's world, and determine to whom humanities will and will not cater in future. P/NP or letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**20. Blockchain: Future of Absolutely Everything. (5)** Lecture, three hours; discussion, one hour. Interdisciplinary examination of social, cultural, and scientific workings of blockchain. Critical exploration of ethical, legal, and cultural effects of blockchain's potential to improve human behavior and impact our sense of individuality. P/NP or letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**100. Introduction to Literary and Critical Theory. (5)** Lecture, four hours. Preparation: satisfaction of Entry-Level Writing and College Writing requirements. Requisites: two courses from Comparative Literature 1 or 2 series or English 10 series or Spanish 60 series, etc. Seminar-style introduction to discipline of comparative literature presented through series of texts illustrative of its formation and practice. Letter grading.

**M101. Hebrew Literature in English—Literary Traditions of Ancient Israel: Bible and Apocrypha. (4)** (Same as Jewish Studies M150A.) Lecture, three hours. Study of literary culture of ancient Israel through examination of principal compositional strategies of Hebrew Bible and Apocrypha (read in translation). P/NP or letter grading.

**102. Classical Tradition: Epic. (4)** Seminar, three hours. Designed for upper-division literature majors. Analysis of *Iliad*, *Odyssey*, *Aeneid*, *Gerusalemme Liberata*, and

*Paradise Lost* both in relation to their contemporary societies and to literary traditions. Emphasis on how poets build on work of their predecessors. P/NP or letter grading.

**103. People on Run: Migrants, Minorities, and Multiculturalism in Europe.** (4) Seminar, three hours. Problem of migrants and refugees in ongoing crisis of European Union. Examination of contemporary crisis of European Union and of European multiculturalism in particular. Overview of history of European integration since World War II, as well as more focused examination of ways in which culture and migration have come to dominate discussions of future of what had primarily been conceived of as one economic union. Offered in summer only. P/NP or letter grading.

**104. Art of Film Adaptation.** (4) Seminar, three hours. Engagement with current debates and key theoretical texts about film adaptation. Exploration of art of film adaptation in broad sense, including transformation of short stories, plays, novels, historical accounts, biographies, paintings, musical compositions, or philosophical concepts into multilayered medium of cinema. Adaptations addressed include selection of films from range of cultural and linguistic traditions by directors such as Kiarostami, Varda, Kurosawa, Babenco, Rossellini, Hitchcock, Antonioni, Kieslowski, and Taymor. Specific directors, films, and cinematic traditions vary year to year. P/NP or letter grading.

**C105. Comic Vision.** (4) Lecture, three hours. Designed for upper-division literature majors. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate varieties of comic expression. May be concurrently scheduled with course C205. Undergraduate students read all works in translation. P/NP or letter grading.

**106. Archetypal Heroes in Literature.** (4) Seminar, three hours. Designed for juniors/seniors. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to modern period. All works read in translation. P/NP or letter grading.

**107. Film on Brain.** (4) Seminar, three hours; discussion/analysis, two hours; film laboratory, one hour. Designed for juniors/seniors. Survey and analysis of intersections between film analysis and neuroscience. Exploration of questions such as how do cues on screen prompt emotions in mind; what are viewers' neurological responses to comedy; what are potential affective impacts of color; how do brains respond to screen violence. Investigation of emotional contagion that occurs between certain screen characters and certain viewers, including in narrative structures acknowledged to be fictitious. Analysis of filmic strategies and techniques employed by directors to elicit emotional responses from audiences. Students learn to produce five- to eight-minute film on relevant topic in film laboratory. P/NP or letter grading.

**108. Autobiography in Francophone and Anglophone Worlds.** (5) Seminar, three hours. Designed for juniors/seniors. Focus on number of narratives that use autobiographical mode to situate self in relation to history of nations and biography of family members. Introduction to theories of subjectivity and to genre of self-writing in France, Africa, and Caribbean. Comparison of serial autobiographies of Assia Djebar, Annie Ernaux, and Jamaica Kincaid to better understand limits of genre. Texts represent different limit cases of autobiography and can be read as biography, auto/ethnography, and auto/historiography. Examination of differences that emerge between autobiographical pact (Lejeune) that some authors create with their readers and liberties that others take with history. Attention to way visual culture (painting, photography, film) helps authors make their point, access memory, or create metaphors of self. P/NP or letter grading.

**M110. One Thousand and One Nights/Alf Layla Wa-Layla.** (4) (Same as Arabic M110.) Lecture, three hours. Knowledge of Arabic not required. Since its appearance in Europe in 1704, *One Thousand and One Nights* is most well-known work of Arabic literature in West. Examination of cycle of tales more commonly known as *Arabian Nights*, including history of its translation, contemporary oral performances of tales in Arabic-speaking world, literary emergence of vernacular

language in relation to classical Arabic, and Western appropriations of tales in music, film, and novels (Ravel, Rimsky-Korsakov, Barth, Poe, and Walt Disney). P/NP or letter grading.

**111. Histories and Methodologies of Comparative Literature.** (5) Seminar, three hours. Preparation: satisfaction of Entry-Level Writing and College writing requirements. Prerequisites: two courses from Comparative Literature 1 or 2 series or English 10 series or Spanish 60 series. Recommended: course 100. Exploration of history of comparative literature discipline and variety of central methodological past and present debates concerning nature of discipline. Introduction to several key theoretical texts from early 20th century to present, addressing these and other related questions: what does it mean to read comparatively? What is significance of reading literature across existing national and linguistic borders? What are criteria for conducting such comparative readings? Is comparative reading more concerned with finding similarities or differences? P/NP or letter grading.

**112. Poetics of Hip-Hop.** (4) Seminar, three hours. Exploration of poetics of hip-hop within tradition of comparative literature. Examination of rhythm, rhymes, flow, wordplay, traditions of signifying, beats, samples, production, and hermeneutics of music videos within historical framework. Historical and current hip-hop criticism and scholarship from comparative perspective, with goal of developing methods, approaches, and strategies for interpreting and writing about hip-hop. P/NP or letter grading.

**113. Opera in LA Live.** (4) Seminar, three hours; field trips. Interpretation of operas currently being performed in Los Angeles from critical perspective of comparative literature studies. Content varies to match changing repertoire. Critical exploration and relation of every aspect of opera as literary and musical form. Analysis and interpretation of original literary source and libretto, music, singing, staging, dramaturgy, reception, and live performance. Two or more field trips to LA Opera, UCLA Opera, and/or Long Beach Opera to experience opera. P/NP or letter grading.

**M119. Al-Andalus: Literature of Islamic Spain.** (4) (Same as Arabic M155.) Lecture, three hours. Study of literature of Islamic Spain to learn about interaction of Arabic and Western and Arabic and Jewish cultures and to recognize Islamic culture as vital force in European life and letters. P/NP or letter grading.

**M120. Women and Literature in Southeastern Europe.** (4) (Same as Central and East European Studies M120.) Seminar, three hours. Examination of changing roles of women in Balkan countries (Albania, Bosnia-Herzegovina, Bulgaria, Croatia, Greece, Macedonia, Montenegro, Romania, Serbia, Slovenia, Turkey) in last forty years. Emphasis on cultural, social, political, and economic factors affecting women's roles during countries' transition from agricultural to industrial economy and from communism to post-communism (in former communist countries). Sensitizes students to complexity of issues in region and helps them better understand multiplicity of causes of present situation. Interdisciplinary study, drawing on sociological/women's studies, articles, and short fiction by women writers for analysis. Discussion of topics covered in articles, positions taken by authors, and ways in which aspects of Southeast European realities are rendered in fictional form by women writers from region. P/NP or letter grading.

**C122. Renaissance Drama.** (4) Lecture, three hours. Designed for upper-division literature majors. Broad introduction to subject matter and types of plays in Renaissance, with consideration of historical and literary influences on plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with course C222. Undergraduate students read all works in translation. P/NP or letter grading.

**M123. Oral Literature and Performance of Arab World.** (4) (Same as Arabic M123.) Lecture, three hours. Knowledge of Arabic not required. Introduction to study of living oral traditions of troubadours, storytellers, oral poets, and performers in Arabic-speaking Middle East. P/NP or letter grading.

**M132. Comparative Media Studies.** (4) (Same as Russian M132.) Lecture, three hours. History, form, and function of various media. Grounded in political and commercial experience of eastern Europe, comparative investigation of media technologies, today's burgeoning markets, and yesterday's tragic abuses. Development of media form(s) and content across various times, places, and cultures, with special attention to Slavic phenomena. Letter grading.

**M142. Travel Narratives, Testimony, Autobiography.** (4) (Same as Portuguese M142C.) Lecture, four hours. Taught in English. Exploration of travel, memory, and narrative in Portuguese-speaking world. Primary and secondary texts depict issues of displacement, cultural contact, and assimilation. Overview of connections among Portuguese-speaking cultures. May be repeated for credit with topic change. P/NP or letter grading.

**M148. Contemporary Arab Film and Song.** (4) (Same as Arabic M148.) Seminar, three hours. Exploration of conjunctions between contemporary Arab film and song and between popular cultures and cultures of commitment (Itizam), with possible focus on specific genres such as realist/neorealist Arab film; feminist Arab film or popular Arab film and song; topics such as nation, gender, and representation or democracy and human rights or censorship, reception, and resistance. Possible examination of various national cinemas such as Tunisian, Egyptian, Moroccan, Algerian, and Palestinian. Various musical genres such as Rai, Mizoued, and Hip-hop also examined in relation to emergence not only of national cinemas, national music industries, and iconic singers but also of video clip, satellite TV, star academy, and reality shows—all products of transnational and pan-Arab mass media. P/NP or letter grading.

**C152. Symbolism and Decadence.** (5) Seminar, four hours. Designed for upper-division literature majors. Study of symbolist and decadent movements in 19th- and 20th-century English and French poetry and prose, including authors such as Baudelaire, Rimbaud, Verlaine, Mallarmé, Wilde, Yeats, and Eliot. May be concurrently scheduled with course C252. Undergraduate students may read all required French texts in translation. P/NP or letter grading.

**C153. Post-Symbolist Poetry and Poetics.** (5) Seminar, four hours. Designed for upper-division literature majors. Study of specific poets and poetics related to them during first half of 20th century. Texts may include poets such as W.B. Yeats, Ezra Pound, T.S. Eliot, Paul Valéry, R.M. Rilke, Gunnar Kjelöf, and Wallace Stevens. May be concurrently scheduled with course C253. Undergraduate students may read all works in translation. P/NP or letter grading.

**154. Adventures of Avant-Garde.** (5) Seminar, four hours. Designed for upper-division literature majors. Interdisciplinary study of avant-garde literature and art, including futurism, Dadaism, Expressionism, Surrealism, new avant-gardes. Works by Marinetti, Boccioni, Picasso, Stein, Malevich, Popova, Mayakovsky, Brecht, Fritz Lang, Duchamp, Breton, Buñuel, Lispector, Warhol, Orhan. Emphasis on cross-fertilization among different kinds of aesthetic expression. P/NP or letter grading.

**C156. Fantastic Fictions.** (4) Seminar, three hours. Designed for upper-division literature majors. Time and again in modern literature, corpses become conduits or catalysts for revelation. What are ghosts that fiction frequently cannot put to rest, and what is their connection to national history or nation language or narrative? Readings from James Joyce, John Banville, Henry James, Toni Morrison, Adolfo Bioy Casares, Juan Carlos Onetti, Juan Rulfo, and Carlos Fuentes, with films by Alejandro Amenabar, Andrei Tarkovsky, and Kenji Mizoguchi. May be concurrently scheduled with course C256. Undergraduate students read all works in translation. P/NP or letter grading.

**C160. Literature and Visual Arts.** (4) Lecture, three hours. Designed for juniors/seniors. Knowledge of art history valuable but not required. Assuming that literature and visual arts are in some degree expressions of cultural and philosophical patterns of eras, study of relationships between writers and movements in painting, architecture, and sculpture. Interdisciplinary investigation of similarities and differences between

plastic and verbal arts in comparative study. May be repeated for credit with instructor and/or topic change. May be concurrently scheduled with course C260. Undergraduate students read all works in translation. P/NP or letter grading.

**C161. Fiction and History. (4)** Seminar, three hours. Designed for upper-division literature majors. Analysis of use of historical events, situations, and characters in literary works of Renaissance and/or modern period. Texts and individual assignments range from Renaissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Verga, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors' choice and use of historical material. May be concurrently scheduled with course C261. P/NP or letter grading.

**M162. Israel Seen through Its Literature. (4)** (Same as Jewish Studies M162.) Lecture, three hours. Attempt to impart profound understanding of Israel as seen through its literature. Examination of variety of literary texts—stories, novels, and poems—and reading of them in context of their historical backgrounds. P/NP or letter grading.

**C163. Crisis of Consciousness in Modern Literature. (5)** Seminar, three hours. Designed for upper-division literature majors. Study of modern European and American works that are concerned both in subject matter and artistic methods with growing self-consciousness of human beings and their society, with focus on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with course C263. Undergraduate students may read all works in translation. P/NP or letter grading.

**C164. Modern European Novel. (5)** Seminar, three hours. Designed for upper-division literature majors. Study of modern European novel's development from 19th to 21st century. Use of authors such as Hardy, Strindberg, Lagerkvist, Gide, Proust, Mann, Joyce, Kafka, Woolf, Nabokov, Grass, Christa Wolf, and Enquist to focus on development of themes such as shifting authority, gender conflicts, change versus stability, formal experimentation, and self-consciousness in narrative. May be concurrently scheduled with course C264. Undergraduate students may read all works in translation but are encouraged to read in original language whenever possible. P/NP or letter grading.

**M165. Holocaust in Literature. (4)** (Same as Jewish Studies M187.) Lecture, three hours. Investigation of how Holocaust informs variety of literary and cinema works and raises wide range of aesthetic and moral questions. P/NP or letter grading.

**M166. Modern Jewish Literature in English: Diaspora Literature. (4)** (Same as Jewish Studies M151A.) Lecture, three hours. Study of literary responses of Jews to modernity, its challenges, and threats. Readings in texts originally written in English or translated from Hebrew, Yiddish, German, Russian, French, and Italian. Analysis of formal aspects of each work. P/NP or letter grading.

**M167. Modern Arabic Literature in English. (4)** (Same as Arabic M151.) Lecture, three hours. Designed for upper-division literature majors. Topics may include constructions of otherness in modern Arab culture; East-West debate; memory, trauma, and mourning; violence, narrative, and ethics; globalization, oil, and cultural insurgency; Arab culture in transnational context or questions of reception, exoticism, translation, and marketing. Genres may include prison narratives; novel of terror; memoirs by women and/or by refugees and exiles; 19th- and 20th-century travel narratives; Arabic romantic poetry; literature of pre-1948; rise of Arab novel. Areas may range from generic look at Arab world to narrow focus on Maghreb or one country such as Algeria, Palestine, Iraq, Lebanon, or Egypt. May also be organized around Arab literatures written in one specific language, namely English, Arabic, or French. Letter grading.

**169. Continental African Authors. (4)** Lecture, three hours. Prerequisite: one course from 1A, 1B, 1C, 2AW, 2BW, 2CV, or English Composition 3 or 3H. Introduction to new set of African authors and attempt to discern

similarities or differences they may have with major authors such as Achebe, Ngugi, Armath, Soyinka, etc. P/NP or letter grading.

**CM170. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (5)** (Same as Gender Studies CM170.) Seminar, three hours. Designed for upper-division literature majors. Investigation of narrative texts by contemporary French, German, English, American, Spanish American, African, and Asian women writers from cross-cultural perspective. Common themes, problems, and techniques. Concurrently scheduled with course CM270. P/NP or letter grading.

**M171. Chinese Immigrant Literature and Film. (4)** (Same as Asian American Studies M130B and Chinese M153.) Lecture, three hours; discussion, one hour. Knowledge of Chinese not required. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues. P/NP or letter grading.

**C172. Postmodern Novel. (4)** Seminar, three hours. Designed for upper-division literature majors. Study of postmodern novel as it developed out of modernism. Postmodernism defined in three different ways—philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with course C272. Undergraduate students read all works in translation. P/NP or letter grading.

**M175. Race, Gender, Class. (5)** (Same as Asian American Studies M165.) Seminar, three hours. Theoretical and literary readings combined to explore three main aspects of social and cultural experience (race, gender, class) as separate but interconnected spheres affecting both minority and majority populations in U.S. Examination of these issues from comparative perspectives. P/NP or letter grading.

**M176. Literature and Technology. (4)** (Same as Japanese M156.) Lecture, three hours. Knowledge of Japanese not required. Examination of representation of technology in 20th-century fiction. Discussion of impact of technology on shifting images of gender, subjectivity, and national identity. P/NP or letter grading.

**177. Comparative Literature of Francophone and Anglophone Caribbean. (5)** Seminar, three hours. Designed for juniors/seniors. Introduction to literature and culture of Caribbean basin from New Orleans to Haiti, Martinique, Guadeloupe, Jamaica, Antigua, or Trinidad. Topics include history of French and English colonial influences and rivalries, Haitian revolution and its literary legacies, emergence of nationalist discourses, search for cultural identity, rhetoric of negritude, global poetics of relation, créolité movement, and literary achievements of African diaspora. P/NP or letter grading.

**C178. India Ink: Literature and Culture of Modern South Asia. (5)** Seminar, three hours. Survey of significant issues in history of 20th-century Indian literature and culture. Great works of modern Indian culture by such figures as Rabindranath Tagore, Satyajit Ray, Faiz Ahmed Faiz, and U.R. Anantha Murthy, including novels, short stories, poetry, films, music, and works in cultural criticism and historical scholarship. Central and defining issue for 20th-century Indian culture is experience of British colonial rule and massive cultural and material changes that accompanied it. Exploration of manner in which literature and culture have developed in interaction with powerful social forces, such as struggle for national independence from Britain under leaders like Mahatma Gandhi and expansion of Indian diaspora. Concurrently scheduled with course C278. P/NP or letter grading.

**M179SL. Movement in Art, Philosophy, and Daily Life. (5)** (Same as Middle Eastern Studies M179SL.) Seminar, three hours; fieldwork, three hours. Exploration of relation between humans and world. Only relevant output of brain, irrespective of what may or may not go on inside it, is control over movements. In living animals, sentience or consciousness exists to integrate often complex input and decide on course of action. Similarly, ownership and agency are inseparably associated with biological systems that control our

movements. Movements play vital part in constructing psychosocial environment that permeates and surrounds us. Exploration of how humans and animals move, and how movement, as well as limitations of mobility, relate to personal and community identity. P/NP or letter grading.

**180. Variable Topics: Medical Humanities in Comparative Contexts. (4)** Seminar, three hours. Designed for juniors/seniors. Study and discussion of defined periods and approaches in medical humanities, giving pride of place to literary and cultural expressions in dialogue with other disciplines such as anthropology, history, linguistics, philosophy, psychology, or sociology. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. P/NP or letter grading.

**180SL. Variable Topics: Medical Humanities in Comparative Contexts and Community-Based Learning. (4)** Seminar, three hours; fieldwork, three hours. Exploration of topics in medical humanities with community service component, giving pride of place to literary and cultural expressions with other disciplines such as art, philosophy, or sociology. Ways in which medical humanities can make contributions to Los Angeles community through service learning. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**186. Undergraduate Research Seminar: Comparative Literature. (4)** Seminar, three hours. Preparation: satisfaction of Entry-Level Writing and College Writing requirements. Designed for undergraduate students interested in learning more about research and/or writing honors thesis. Introduction to research in comparative literature, with focus on critical and theoretical methodologies and approaches to analyzing literary texts. Students complete final paper on topic of their own design. P/NP or letter grading.

**C187. Reading across Culture. (5)** Seminar, three hours. What is it we do when we try to understand words, habits, gestures, and beliefs not our own? Do we understand something foreign to us by immersing ourselves in it or by standing apart? Does ability to understand something foreign imply taking universal standpoint? Can we make judgments about beliefs other than our own? Questions of cultural interpretation have long history in both Western and non-Western cultures. Discussion of history of questions about cross-cultural interpretation and comparative interpretation of cultures in both comparative literature and cultural anthropology. Reading of some very complex and influential works by such writers as Claude Lévi-Strauss, Amitav Ghosh, James Clifford, Edward Said, Gayatri Spivak, and Erich Auerbach. Concurrently scheduled with course C287. P/NP or letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor.

May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**190. Research Colloquia in Comparative Literature. (2)** Seminar, three hours. Designed to bring together students undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

**191. Variable Topics in Comparative Literature. (4)** Seminar, three hours. Designed for juniors/seniors. Study and discussion of limited periods and specialized issues and approaches in literary theory, especially in relation to other modes of discourse such as history, philosophy, psychology, linguistics, anthropology. Development of culminating project required. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. P/NP or letter grading.

**M191P. Careers in Humanities. (4)** (Same as English M191P) Seminar, three hours. Challenges misassumptions regarding humanities majors and their practical applications to life after graduation. Exploration of wide range of careers, with hands-on practice in crafting professional narrative. Guest lectures from UCLA professionals and alumni—all experts in career planning and local industry. Students engage with workplace leaders, and simultaneously build professional dossier—on paper or online—in preparation for life after UCLA with a humanities degree. P/NP or letter grading.

**197. Individual Studies in Comparative Literature. (2 to 4)** Tutorial, three hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**198. Honors Research in Comparative Literature. (2 to 4)** Tutorial, three hours. Limited to senior comparative literature honors students. Development and completion of honors thesis or comprehensive project on comparative topic selected by student and written under supervision of core faculty member. Students expected to meet regularly with supervisor throughout term. No more than one course may be used to fulfill four-course requirement for Comparative Literature majors. May be repeated once for maximum of 8 units. Individual contract required. Letter grading.

**199. Directed Research or Senior Project in Comparative Literature. (2 to 4)** Tutorial, three hours. Requisite: course 100. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit with consent of chair. Individual contract required. P/NP or letter grading.

## Graduate Courses

**200A. Theory of Comparative Literature. (6)** Seminar, three hours. Study of theory of literature, with emphasis on genealogy of theoretical problems. S/U or letter grading.

**200B. Methodology of Comparative Literature. (6)** Seminar, three hours. Requisite: course 200A. Study of methodology of comparative literature, with emphasis on its history. S/U or letter grading.

**202. Classical Tradition: Epic, Tragedy, or Comedy. (4)** Seminar, three hours. Preparation: reading knowledge of Greek, Latin, or Italian. Analysis of Greek and Roman works and their re-creations in Renaissance and modern periods. Emphasis on how poets build on

work of their predecessors. Reading may range from *Iliad* or *Odyssey* to tragedies by Sophocles and Euripides or satires by Aristophanes. S/U or letter grading.

**C205. Comic Vision. (4)** Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate varieties of comic expression. May be concurrently scheduled with course C105. Graduate students required to prepare papers based on texts read in original languages and to meet as group one additional hour each week. S/U or letter grading.

**206. Archetypal Heroes in Literature. (4)** Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literatures from antiquity to modern period. S/U or letter grading.

**210. Comparative Studies in Autobiography. (5)** Seminar, three hours. Limited to graduate students. Introduction to theories of autobiography and subjectivity and to genre of autobiography in literatures in French and English and across centuries. Topics include early modern approaches to self-writing, Rousseau and emergence of modern self, women's autobiography, postcolonial autobiography, cultural studies and turn to personal, fictions of self-representation, serial autobiography, and virtual selves. Theorists may include Georges Gusdorf, Philippe Lejeune, Paul de Man, Jacques Derrida, Helene Cixous, Michel Foucault, Pierre Bourdieu, and Toril Moi. S/U or letter grading.

**220. Topics in Medieval Studies. (4)** Seminar, four hours. Preparation: reading knowledge of one appropriate foreign language. Examination of nature of cross-cultural, cross-linguistic, and cross-confessional exchange in known medieval worlds of Europe, Asia, and Africa, with focus on communication and translation. Drawing on literary, social, cultural, economic, art history, and manuscript studies to trace formation of discourses produced by diverse encounters. Choice of bilingual texts. May be repeated for credit with topic change. S/U or letter grading.

**C222. Renaissance Drama. (4)** Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Broad introduction to subject matter and types of plays in Renaissance, with consideration of historical and literary influences on plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with course C122. Graduate students required to prepare papers based on texts read in original languages and to meet as group one additional hour each week. S/U or letter grading.

**250A-250B. Seminar in Experimental Critical Theory. (4-4)** Seminar, three hours. Advanced course in critical theory, drawing on wide range of approaches and methods, from anthropology, art, history, literature, performance, philosophy, and political theory. Variable topics are set annually. Includes canonical thinkers (e.g., J. Butler, J. Derrida, M. Detienne, G. Dumézil, F. Héritier, B. Latour, C. Lévi-Strauss, A. Mbembe, E. Renan, M. Strathern) and contemporary critics (e.g., E. Apter, B. Cassin, E. Coccia, S. Bachir Diagne, W. Chi Dimock, P. Frankopan, S. Hartman, L. Lowe, J. Osterhammel, J.-F. Schaub, G. Spivak, E. Viveiros de Castro). S/U or letter grading. **250A.** Enforced requisite: course 200A. **250B.** Enforced requisite: course 250A.

**M251. Literatures and Cultures of Maghreb. (4)** (Same as Arabic M255.) Seminar, three hours. Limited to graduate students. Examination of traditionally diverse literatures of Maghreb in their multiple and competing contexts of language and gender politics, religious and cultural formations, Pan-Arabism and postcolonial nationhood, Third-Worldism and economic development, modernity and globalization, immigration and citizenship, soccer industry and Rai music, mass media and Star Academy Maghreb, and more. Readings of literatures in English and in English translations from different Maghreb languages (particularly Arabic and French) in conjunction with theories of language and linguistic pluralism, cultural translation,

deconstruction, and host of other relevant theories of gender, globalization, and postcolonial cultural studies. S/U or letter grading.

**C252. Symbolism and Decadence. (5)** Seminar, four hours. Preparation: reading knowledge of French. Study of symbolist and decadent movements in 19th- and 20th-century English and French poetry and prose, including authors such as Baudelaire, Rimbaud, Verlaine, Mallarmé, Wilde, Yeats, and Eliot. May be concurrently scheduled with course C152. Graduate students required to prepare papers based on texts read in original languages and may meet as group one additional hour each week. S/U or letter grading.

**C253. Post-Symbolist Poetry and Poetics. (5)** Seminar, four hours. Study of specific poets and poetics related to them during first half of 20th century. Texts may include poets such as W.B. Yeats, Ezra Pound, T.S. Eliot, Paul Valéry, R.M. Rilke, Gunnar Ekelöf, and Wallace Stevens. May be concurrently scheduled with course C153. Graduate students may meet as group one additional hour each week. S/U or letter grading.

**C256. Fantastic Fictions. (4)** Seminar, three hours. Time and again in modern literature, corpses become conduits or catalysts for revelation. What are ghosts that fiction frequently cannot put to rest, and what is their connection to national history or nation language or narrative? Readings from James Joyce, John Banville, Henry James, Toni Morrison, Adolfo Bioy Casares, Juan Carlos Onetti, Juan Rulfo, and Carlos Fuentes, with films by Alejandro Amenabar, Andrei Tarkovsky, and Kenji Mizoguchi. May be concurrently scheduled with course C156. Graduate students have additional meetings and theoretical readings by Benjamin, Freud, Barthes, Derrida, Rabate, Rickels, and Caruth. S/U or letter grading.

**C260. Literature and Visual Arts. (4)** Lecture, three hours. Knowledge of art history valuable but not required. Assuming that literature and visual arts are in some degree expressions of cultural and philosophical patterns of eras, study of relationships between writers and movements in painting, architecture, and sculpture. Interdisciplinary investigation of similarities and differences between plastic and verbal arts in comparative study. May be repeated for credit with instructor and/or topic change. May be concurrently scheduled with course C160. Graduate students required to read works in original languages. S/U or letter grading.

**C261. Fiction and History. (4)** Seminar, three hours. Analysis of use of historical events, situations, and characters in literary works of Renaissance and/or modern period. Texts and individual assignments range from Renaissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Verge, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors' choice and use of historical material. May be concurrently scheduled with course C161. Graduate students required to prepare papers based on texts read in original languages. S/U or letter grading.

**C263. Crisis of Consciousness in Modern Literature. (5)** Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of modern European and American works that are concerned both in subject matter and artistic methods with growing self-consciousness of human beings and their society, with focus on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with course C163. Graduate students required to prepare papers based on texts read in original languages and to meet as group one additional hour each week. S/U or letter grading.

**C264. Modern European Novel. (5)** Seminar, three hours. Preparation: reading knowledge of at least one appropriate foreign language. Study of modern European novel's development from 19th to 21st century. Use of authors such as Hardy, Strindberg, Lagerkvist, Gide, Proust, Mann, Joyce, Kafka, Woolf, Nabokov, Grass, Christa Wolf, and Enquist to focus on development of themes such as shifting authority, gender conflicts, change versus stability, formal experimentation, and self-consciousness in narrative. May be concur-

rently scheduled with course C164. Graduate students required to prepare papers based on texts read in original languages whenever possible and to meet one additional hour each week. S/U or letter grading.

**266. Writing and Photographic Image. (4)** Seminar, three hours. Preparation: knowledge of one appropriate foreign language. Designed for graduate students. Investigation of intertextual relations between writing and photography in American and European contexts. Study rests on premise that photograph enters public domain framed by writing and discourse and that, in turn, some forms of writing are framed by photographic modes of representation. S/U or letter grading.

**267. Comparative Arab Studies. (5)** Seminar, three hours. Limited to graduate students. Investigation of ways in which Arab *littérateurs*, artists, and intellectuals have perseveringly sought to imagine and construct viable structures of cultural empowerment on pyre of political project of Arab nationalism and in growing response to globalization and consolidation of Western colonial and imperial ideologies in Arab world. Particular attention to technical and experimental modes of expression through which Arab artists working in different genres have engaged with some persistent and recurrent questions related to their mission, vocation, and commitment (*iltizam*) to fundamental concerns of Arab world, to responsible mimetic urgency, and to general uses/potencies of rhetoric and poetics within contexts of profound asymmetries of power, temporalities, and actualities. S/U or letter grading.

**CM270. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (5)** (Same as Gender Studies CM270.) Seminar, four hours. Designed for graduate students. Investigation of narrative texts by contemporary French, German, English, American, Spanish American, African, and Asian women writers from cross-cultural perspective. Common themes, problems, and techniques. Concurrently scheduled with course CM170. S/U or letter grading.

**271. Imaginary Women. (4)** Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Examination of archetypal female figures in classical/traditional literatures and their incarnations in modern African American, Anglo-American, Asian American, European, Native American, and Spanish-American literatures. Particular emphasis on position of women in cultures and ideology of authors. S/U or letter grading.

**C272. Postmodern Novel. (4)** Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of postmodern novel as it developed out of modernism. Postmodernism defined in three different ways—philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with course C172. Graduate students required to meet as group one additional hour each week. S/U or letter grading.

**M274. Theorizing Third World. (4)** (Same as Asian American Studies M261.) Seminar, three hours. Investigation of politics of power, gender, and race in complex relationships between so-called First World and Third World, using both theoretical and textual approaches. S/U or letter grading.

**275. Nationalism and Immigration Today. (4)** Seminar, three hours. Preparation: knowledge of one appropriate foreign language. Designed for graduate students. Literary and social discourses on issues of nationalism, immigration, and politics of identity in our postcolonial era, with consideration of broad range of texts (aesthetic representations, theoretical reflections, and legal documents). S/U or letter grading.

**M276. Reading Modern Bodies. (4)** (Same as Japanese M276.) Seminar, three hours. Designed for graduate students. Exploration of construction of human body through various modern technologies and discourses, including those of disease, diet, race, gender, and sexuality. Examination of texts from variety of locales, with particular emphasis on Japan. S/U or letter grading.

**277. Caribbean Literature from Negritude to Diaspora. (4)** Seminar, three hours. Historical approach to modern Anglophone and Francophone Caribbean literature, retracing search for cultural identity, beginning with negritude movement's claim to Africa as expressed in Aimé Césaire's classic poem *Cahier d'un retour au pays natal* and ending with consideration of dispersion of identities in work of writers and intellectuals who contend with problem of diasporic Caribbean culture. S/U or letter grading.

**C278. India Ink: Literature and Culture of Modern South Asia. (5)** Seminar, three hours. Survey of significant issues in history of 20th-century Indian literature and culture. Great works of modern Indian culture by such figures as Rabindranath Tagore, Satyajit Ray, Faiz Ahmed Faiz, and U.R. Anantha Murthy, including novels, short stories, poetry, films, music, and works in cultural criticism and historical scholarship. Central and defining issue for 20th-century Indian culture is experience of British colonial rule and massive cultural and material changes that accompanied it. Exploration of manner in which literature and culture have developed in interaction with powerful social forces, such as struggle for national independence from Britain under leaders like Mahatma Gandhi and expansion of Indian diaspora. Concurrently scheduled with course C178. S/U grading.

**279. Subaltern Studies: Colonial Histories and Cultural Critique. (5)** Seminar, three hours. Examination of certain links between practice of cultural criticism and problems in historiography of colonial and post-colonial societies. Use of key texts by members of Subaltern Studies collective of Indian historians to explore some central issues arising from this relationship. What kind of interdisciplinary space is produced by dialog of history and literary and cultural theory? Attention to literary texts to practice such interdisciplinary criticism. Nature of modernity in colonial setting. What is nature of bourgeoisie in colonial society? What kind of modernization does it seek? What is relationship of modern metropolitan bourgeoisie to indigenous one? S/U or letter grading.

**280. Latin American Literature in Comparative Contexts. (4)** Seminar, three hours. Preparation: reading knowledge of one foreign language. In-depth study of one topic of Latin American literature in comparative context. May be repeated for credit. S/U or letter grading.

**M281. Studies in Contemporary Spanish-American Literature. (4)** (Same as Spanish M280B.) Seminar, three hours. Preparation: reading knowledge of one foreign language. In-depth study of topic of Latin American literature in comparative context. May be repeated for credit. S/U or letter grading.

**284. Theories of Translation. (4)** Seminar, three hours. Examination of various approaches to concept of translation and to its significance for literary studies. Readings include authors such as Matthew Arnold, Walter Benjamin, George Steiner, and Susan Bassnett. S/U or letter grading.

**285. Translation Workshop. (4)** Seminar, three hours. Preparation: solid reading knowledge of at least one foreign language. Open to qualified undergraduates with proper language preparation. Introduction to principles of literary translation heuristically, that is, on basis of texts participating students translate, and presentation of student work for discussion. Opportunity for students to determine whether they have desire and talent to pursue literary translation as part of their professional lives. S/U or letter grading.

**286. Workshop: Social Sciences Translation. (4)** Seminar, three hours; tutorial, one hour. Preparation: solid reading knowledge of at least one foreign language. Designed for graduate social sciences students. Techniques students need to render scholarly texts in their fields from language they use in their research into English and to advance their knowledge of language to stage where they can use it more effectively in all aspects of their research, as well as take advantage of translation techniques they have learned. S/U or letter grading.

**C287. Reading across Culture. (5)** Seminar, three hours. What is it we do when we try to understand words, habits, gestures, and beliefs not our own? Do we understand something foreign to us by immersing our-

selves in it or by standing apart? Does ability to understand something foreign imply taking universal standpoint? Can we make judgments about beliefs other than our own? Questions of cultural interpretation have long history in both Western and non-Western cultures. Discussion of history of questions about cross-cultural interpretation and comparative interpretation of cultures in both comparative literature and cultural anthropology. Reading of some very complex and influential works by such writers as Claude Lévi-Strauss, Amitav Ghosh, James Clifford, Edward Said, Gayatri Spivak, and Erich Auerbach. Concurrently scheduled with course C187. S/U or letter grading.

**M288. Modern Arab Thought. (4)** (Same as Arabic M288.) Seminar, three hours. While much has been written and said about resurgence and spread of political Islam after collapse of ideology of secular nationalism and failure of Arab left to apprehend exigencies of postrevolutionary/postcolonial moment, little has been devoted to less sensational topic of modern Arab thought despite unmistakable proliferation of critical output produced by Arab thinkers and artists in aftermath of 1967. Course addresses and redresses this glaring imbalance by considering new cultural material—literary, critical, philosophical, artistic, and journalistic—produced before and after al-Nahda but mostly before and after 1967 and fosters insightful approaches to unlikely coexistence in Arab contemporaneity of ever-deepening and generalized crisis and of steady and consolidated development (if not effervescence) of cultural and artistic production. S/U or letter grading.

**289. Theory of Film and Literature. (5)** Seminar, three hours; film screening, two hours. Study of redefinition and aims of theories of film and literature. Approaches vary by instructor (e.g., postcoloniality, psychoanalysis, semiotics, transnationalism, gender theory). S/U or letter grading.

**290. Contemporary Theories of Criticism. (4)** Seminar, three hours. Prerequisite: course 200A. Advanced course in theory of literature focusing on structuralist, psychoanalytic, and Marxist approaches. S/U or letter grading.

**291. Problems in Theory of Literature. (4)** Seminar, three hours. Preparation: reading knowledge of French or German. Prerequisite: course 290. Study of specific topics in theory of literature for advanced students in criticism and literary theory. May be repeated for credit. S/U or letter grading.

**292. Theories of Empire. (4)** Seminar, three hours. History of theorizations of modern imperialism and colonialism since relevant writings of Karl Marx and Friedrich Engels. Examination of number of landmark theories of empire and consideration of whether or not they may be said to constitute coherent tradition or line of theoretical development. Question of resistance to imperial rule and role it plays in these theoretical accounts. S/U or letter grading.

**299. Aesthetics and Literature. (4)** Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of literary theory through exploration of approaches to literature by philosophers grounded on analytic tradition. Careful attention to concepts of truth, meaning, expression, representation, metaphor, fiction, and literature. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**495. Preparation for Teaching Literature and Composition. (4)** Seminar, three hours. Seminar on problems and methods of presenting literary texts as exemplary materials in teaching of composition. Deals with theory and classroom practice and involves individual counseling and faculty evaluation of teaching assistants' performance. May not be applied toward MA course requirements. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor,

department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research. (2 to 12)** Tutorial, to be arranged. Limited to graduate comparative literature students. Necessary for students in comparative literature who need additional individual study and research. May be repeated for credit. S/U or letter grading.

**596X. Directed Individual Study. (2 to 4)** Tutorial, to be arranged. Preparation for foreign language examination. S/U grading.

**597. Preparation for MA and PhD Examinations. (2 to 12)** Tutorial, to be arranged. Limited to graduate students. Preparation for MA comprehensive examination or PhD qualifying examinations. May be repeated for credit. S/U grading.

**599. Research for PhD Dissertation. (2 to 12)** Tutorial, to be arranged. Limited to PhD students. Research for and preparation of PhD dissertation. May be repeated for credit. S/U grading.

### Overview

The major in Computational and Systems Biology is designed primarily for highly motivated undergraduate students interested in interdisciplinary studies in life sciences, behavioral sciences, and engineering and computer sciences. Preparation for the major consists of a broad foundation in basic sciences—chemistry,

biology, physics, and mathematics, plus an introduction to computing. The major itself provides students with foundations in mathematical modeling, information processing, and control and system analysis, with an emphasis on quantitative ideas and methodologies. Mathematical and other analytical skills are essential in the major.

Computational and Systems Biology majors have several options for in-depth studies: a coherent integration of courses selected from one of three tracks in bioinformatics, biological data sciences, or dynamical modeling. The major is appropriate preparation for employment or for graduate studies in any of these areas, with emphasis on interdisciplinary activities. It is also appropriate preparation for professional school studies in dentistry, engineering, management, medicine, and public health.

### Undergraduate Major

#### Computational and Systems Biology BS

Computational and Systems Biology majors select a coherent integration of courses from one of three designated tracks: bioinformatics, biological data sciences, or dynamical modeling. The synergy for all tracks is integrative systems, information, and computational systems modeling sciences in biology. The focus is primarily quantitative, as mastery of advanced quantitative skills is essential for multidisciplinary understanding. Each track emphasizes different systems or modalities, and modeling or other computational approaches. Students choose one of the three tracks when they declare the major. Well-justified customized tracks may also be approved by the faculty.

#### Bioinformatics Track

The bioinformatics track is designed for students interested in computational discovery and management of biological data, primarily genomic, proteomic, or metabolomic data. Bioinformatics emphasizes computational, statistical, and other mathematical approaches for mining, modeling, and analyzing high-throughput biological data and the inherent structure of biological information. Example research problems include finding statistical patterns that reveal genomic or evolutionary or developmental information, studying how regulatory sequences give rise to programs of gene expression, or researching how the genome encodes the capabilities of the human mind.

#### Biological Data Sciences Track

The biological data sciences track addresses a diverse set of biological questions—ranging from medicine, to genomics, physiology, pharmacology, neuroscience, ecology, and evolution—using recent tools and advances in mathematics and computation—specifically machine learning, statistical data sciences, and informatics. Biological data sciences leverages new and developing courses within computational and systems biology and across UCLA, and greatly aids students who aim to go di-

rectly into industry—biotech, pharmaceuticals, and more—as well as computational biology graduate school. The track has a strong focus and deep integration with life sciences.

### Dynamical Modeling Track

The dynamical modeling track seeks to provide students a strong foundation in the use of mathematical and computational models for analyzing biological systems. The modeling approaches are based on a varied set of approaches such as partial differential equations, stochastic equations, dynamical systems theory, stability theory and linear algebra, network theory, cellular automata, and numerical methods. Dynamical models are the heart of evolution that underpin all of biology and can be applied to disease spread, tumor growth and treatment, wound healing, cell migration, blood flow, ecology, climate change biology, population genetics, evolutionary theory, game theory, and scaling theory. Models are tailored based on the biological and physical details of the system and can often be simplified or used to build intuition based on the associated timescales and spatial dimensions—from cellular signaling and transcriptional regulation to communication between organs through hormones to consumer-resource interactions among species. The track allows students to develop quantitative approaches to interpret complex biological systems and is a gateway towards careers in biotechnology and academia.

### Capstone Major

The Computational and Systems Biology major is a designated capstone major. The capstone experience is a senior-level sequence of two courses integrating the discipline via mathematical modeling, simulation, and active research and report writing. Students are expected to demonstrate critical thinking skills and familiarity with research techniques needed to successfully pursue a project in computational and systems biology, conceive and execute a project on which they engage current methods and theory, communicate original scholarly findings to peers both in oral and written form, and work productively with others as part of a team. The experience culminates with completion of the senior thesis requirement.

### Learning Outcomes

The Computational and Systems Biology major has the following learning outcomes:

- Demonstrated familiarity with research techniques needed to successfully pursue a research project
- Demonstrated critical thinking skills in mathematics, computation, and quantitative thinking
- Demonstrated critical thinking skills in life science disciplines and biological applications
- Conception and execution of a research project that engages current methods and theory
- Oral and written communication of original scholarly findings to peers
- Productive participation with others as part of a research team

## Entry to the Major

### Pre-major

Students entering UCLA directly from high school or first-term transfer students who declare the Computational and Systems Biology pre-major at the time of application are automatically admitted.

Current students who were admitted as first-year or transfer students (transfer students must have been admitted under the division of life sciences) may request to declare the pre-major once they have met the following criteria: (1) completed one quarter at UCLA, (2) are in good academic standing, (3) have a minimum cumulative grade-point average (GPA) of 2.0, and (4) have established a pre-major GPA of a minimum of 2.7 by taking at least one pre-major course at UCLA for a letter grade.

Requests to declare the pre-major should be sent by e-mail to the [program](#). For more information, see the [program website](#).

All courses taken for the pre-major must be completed with a grade of C or better. Pre-major course Computer Science 32 is required for students following the Biological Data Sciences track, but does not have to be completed prior to applying to the major. Pre-major courses Program in Computing 10B and 10C, or Computer Sciences 32, are required for students following the Bioinformatics track, but do not have to be completed prior to applying to the major.

All students are identified as pre-majors until they satisfy the preparation for the major requirements by achieving (1) a minimum 2.7 GPA in all pre-major courses, and (2) a minimum grade of C in all pre-major courses.

### Transfer Students

Transfer applicants to the Computational and Systems Biology major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of general chemistry with laboratory for majors, two years of calculus for majors, one year of calculus-based physics, one year of biology with laboratory for majors, and one programming course using C++, Python, or similar language.

Transfer applicants must meet the same academic requirements as current UCLA students, based on all courses transferred from another institution that satisfy pre-major requirements, and must have completed one 12-unit term of residence in regular session at UCLA.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* A minimum of 66 to 82 units (depending on the calculus series, computer programming courses, and additional requisites for specific concentrations), including Chemistry and Biochemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L; Computer Science 31 or

Program in Computing 10A; Life Sciences 7A, 7B, 7C; Life Sciences 30A, 30B, 40, and Computational and Systems Biology M32 or Mathematics M32T, or Mathematics 31A or 31AL, 31B, and Statistics 10; Mathematics 33A, 33B; Physics 1A, 1B, and 1C, or 1AH, 1BH, and 1CH, or Physics 5A, 5B, and 5C.

Students following the bioinformatics track must also complete Computer Science 32 or Program in Computing 10B and 10C.

Students following the biological data sciences track must also complete Computer Science 32.

Additional lower-division courses may be requisite to desired track courses.

### The Major

The major consists of a methodology core of seven courses (27 units) and a track of five upper-division courses (20 units minimum).

#### Methodology Core

*Required:* (1) Computational and Systems Biology M150, M184, 185, (2) one probability course from: Electrical and Computer Engineering 131A, Mathematics 170E, or Statistics 100A, (3) one statistics course from: Biostatistics 100A or Statistics 100B, and (4) two capstone courses from the following options: Computational and Systems Biology M187 and 195, or M187 and 199, or 198A and 198B.

#### Tracks

*Required:* A minimum of five courses (20 units minimum) from the tracks listed below. No 199 course may be applied toward any track.

*Bioinformatics (at least 20 units):* One course selected from Computer Science CM121, CM122, or CM124; two courses selected from Computer Science CM121, CM122, CM124, Ecology and Evolutionary Biology C135, Molecular, Cell, and Developmental Biology CM156, 187AL, Physiological Science 125, or Statistics M254; two life science courses selected from the list below.

*Note:* Computer Science 32 or Program in Computing 10B and 10C, and Computational and Systems Biology M32 (same as Life Sciences M32 or Mathematics M32T) or Mathematics 32A are completed in the pre-major.

*Biological Data Sciences (at least 20 units):* Three courses selected from Computer Science CM124 (or M226), M146 (or Mathematics 156 or Statistics C161), 161, 168, 180 (or Mathematics 182), Electrical and Computer Engineering C143A, C147, Mathematics 155, 164, Statistics 101A, or 101C; two life science courses selected from the list below. A maximum of two courses may be from mathematics.

*Note:* Computer Science 32 is completed in the pre-major.

*Dynamical Modeling (at least 20 units):* Three courses selected from Computational and Systems Biology M186 (or Computer Science M182), Electrical and Computer Engineering 102, 113, Ecology and Evolutionary Biology C119A, C119B, Mathematics 134 (or 135), 136, 142, 146, 168, or 171; two life science courses selected from the list below. A maximum of two courses may be from mathematics.

*Life Science Courses (for all three tracks):* any two courses selected from the subareas below. Courses may be chosen from different subareas.

*Biochemistry:* Chemistry 153A, 153B.

*Ecology:* Ecology and Evolutionary Biology 100, 116, 120, 129, 161, C172, C174.

*Epidemiology:* Epidemiology 100, Microbiology, Immunology, and Molecular Genetics 101, 102, 168, C185A.

*Genetics and Molecular Biology:* Life Sciences 107, Molecular, Cell, and Developmental Biology 138, M140, 144, 165A (or 100).

*Neurosystems:* Neuroscience M101A (or Psychology 115), M101B, 102, 205, 260, Physiological Sciences C144, Physics C186, Psychology 119M.

*Physiology:* Bioengineering C102, Biomathematics 206, Ecology and Evolutionary Biology 170 (or Physiological Sciences 166), Physiological Sciences 149.

### Honors Program

Students with a grade-point average of 3.5 or better in required major courses and a 3.0 cumulative GPA may apply for admission to the honors program. Honors or highest honors may be granted at the discretion of the faculty sponsor and the faculty committee to students demonstrating exceptional ability on the senior research thesis.

### Policies

#### Preparation for the Major

All courses taken for the Preparation for the Major must be completed with a grade of C or better. Students are allowed to repeat up to two Preparation for the Major courses in which they receive a C– or worse. Students who receive a third grade of C– or worse in Preparation for the Major courses are dismissed from the program.

#### The Major

Each course in the major must be passed with a grade of C or better.

## Undergraduate Minors

### Mathematical Biology Minor

The Mathematical Biology minor introduces undergraduate students to an active interdisciplinary research field at UCLA. The minor core examines biological systems in a holistic and quantitative manner by emphasizing systems and integrative principles in biology. Students who complete the minor have sufficient training to apply the knowledge they learn in graduate school or employment of their choice. Students complete a core curriculum and an elective course. The minor consists of lower-division courses basic to the minor, five core courses, and one elective course that provide the needed background in mathematical biology, molecular and cell biology, statistics and probability, and mathematical modeling and simulation methods for biological systems.

## Admission

To enter the minor, students must be in good academic standing (2.0 grade-point average or better) and have completed Computer Science 31 or Program in Computing 10A with a grade of C or better. Requests to declare the minor must be sent by e-mail to the [program](#). The e-mail should include full name, UID number, request to declare the minor, and a statement indicating whether the student consents to being added to the departmental Common Collaboration and Learning Environment (CCLE) web page.

## The Minor

*Required Lower-Division Courses (8 units):* Mathematics 33A, 33B.

*Required Upper-Division Courses (24 units):* Computational and Systems Biology M184, M186, Mathematics 170A or Electrical and Computer Engineering 131A or Statistics 100A, Molecular, Cell, and Developmental Biology M140 or 144, Statistics 100B, and one elective course selected from Electrical and Computer Engineering 102, Mathematics 134, 136, 171, Molecular, Cell, and Developmental Biology 172, or Physiological Science 125.

## Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Structural Biology Minor

The Structural Biology minor introduces undergraduate students to an active interdisciplinary research field at UCLA. It examines biological systems in a holistic and quantitative manner by emphasizing systems and integrative principles in biology. It consists of lower-division courses basic to the minor, four core courses, and one elective course that provide the needed background in structural biology, biologic microscopy, and biochemistry. Students who complete the minor have sufficient training to apply the knowledge they learn in graduate school or employment of their choice.

## Admission

To enter the minor, students must be in good academic standing (2.0 grade-point average or better) and have completed Computer Science 31 or Program in Computing 10A with a grade of C or better. Requests to declare the minor must be sent by e-mail to the [program](#). The e-mail should include full name, UID number, request to declare the minor, and a statement indicating whether the student consents to being added to the departmental Common Collaboration and Learning Environment (CCLE) web page.

## The Minor

*Required Lower-Division Course (4 units):* Mathematics 33A.

*Required Upper-Division Courses (22 units):* Chemistry and Biochemistry 153A, M230B, Computational and Systems Biology M184, Microbiology, Immunology, and Molecular Genetics 105, and two elective courses selected from Biostatistics 100A, Chemistry and Biochemistry M117, 156, Electrical and Computer Engineering 102, 113, Statistics 100A, 100B.

## Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Systems Biology Minor

The Systems Biology minor introduces undergraduate students to an active, interdisciplinary, quantitative biosciences research and teaching field at UCLA. It offers a coherent course plan encompassing basic foundations of the field. Beside broadening student knowledge in systems biology, the minor provides students with enhanced perspective about computational and systems biology methods and applications and better prepares students to make more informed choices about their future directions and careers. The minor consists of lower-division courses basic to the minor, a survey seminar course, four core courses, and one elective course that provide the needed background in molecular and cell biology, computational and systems engineering, and mathematical modeling and simulation methods for biological systems.

## Admission

To enter the minor, students must be in good academic standing (2.0 grade-point average or better) and have completed Computer Science 31 or Program in Computing 10A with a grade of C or better. Requests to declare the minor must be sent by e-mail to the [program](#). The e-mail should include full name, UID number, request to declare the minor, and a statement indicating whether the student consents to being added to the departmental Common Collaboration and Learning Environment (CCLE) web page.

## The Minor

*Required Lower-Division Courses (8 units):* Mathematics 33A, 33B.

*Required Upper-Division Courses (24 units):* Computational and Systems Biology M184, M186, Electrical and Computer Engineering 102, 141 (or Mechanical and Aerospace Engineering 171A), Molecular, Cell, and Developmental Biology M140 or 144, and one elective course selected from Mathematics 134, 151A, 151B, 170A, 170B, 171, Molecular, Cell, and

Developmental Biology 172, or Physiological Science 125.

## Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Computational and Systems Biology

### Lower-Division Courses

**10. Preparation for Research in Computational Biology. (3)** Lecture, two and one half hours. Provides students with basic understanding of several computational tools used in molecular biology research. Focus on practical application of these tools rather than deep theoretical understanding. Creates more inclusive and accessible experience for learners. Students are introduced to computational tools for carrying out research in computational biology, including basic statistics, Python, R, and UNIX. P/NP or letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**M32. Essential Calculus for Mathematical Biologists. (4)** (Same as Mathematics M32T and Life Sciences M32.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 30A, 30B. Not open to students with credit for Mathematics 31A, 31B, 32A, or 32B. Designed for life sciences students. Methods and results of single and multivariable calculus essential for quantitative training in biology. Limits, differentiation (single and several variables), optimization, integration and methods of integration, Taylor polynomials and applications to approximation, Taylor and other power series, vector valued functions, gradients, and Lagrange multipliers. P/NP or letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**M130. Fundamentals of Digital Imaging and Image Processing. (5)** (Same as Molecular, Cell, and Developmental Biology M130.) Lecture, three hours; laboratory, two hours. Requisites: Life Sciences 7A, 7B, 7C,

and Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, and 3C, or Mathematics 31A, 31B, and 32A or 33A. Digital imaging has become integral tool to our everyday lives and to nearly every field of life sciences. Quantitative approach to learning about basic properties of digital signals and surveying fundamental methods for processing and analyzing images. Letter grading.

**M150. Biological Modeling: Mathematical and Computational Approaches.** (5) (Same as Ecology and Evolutionary Biology M159.) Lecture, four hours; laboratory, three hours. Requisites: Life Sciences 7A, 7B, 7C, Mathematics 33A and 33B, with grades of C or better. Recommended Requisites: Physics 1A, 1B, and 1C, or 5A, 5B, and 5C, with grades of C or better. Students learn how to translate their biological knowledge and intuition into mathematical equations and computer simulations, and how to interpret and glean biological insights from quantitative results and predictions. Review and integration of core mathematical and computational approaches in novel ways. Students gain experience translating and intuition about systems through many examples across range of biological levels, such as predator-prey, disease transmission, cancer initiation, cell migration, neural systems, vascular networks, sleep, drug interactions, gene expression, and more. Students learn how to manipulate data, basics of coding, and how to instantiate their mathematical models and biological intuition through numerical solutions and simulations. Letter grading.

**M175. Stochastic Processes in Biochemical Systems.** (4) (Same as Chemistry M186.) Lecture, three hours. Requisites: Life Sciences 1, 2, 3, and 4, or 7A, 7B, and 7C, Mathematics 33B, Electrical and Computer Engineering 131A or Mathematics 170A or Statistics 100A. Covers random and stochastic processes in play in biochemical systems, including ion channels, cytoskeleton, cell migration and mitosis, gene expression networks, and signal transduction. Covers mathematical tools such as continuous and discrete Markov processes, first passage, time escape problems, statistical mechanics, and information theory. Letter grading.

**M178. Quantitative Regulatory Biology and Signal Transduction.** (4) (Same as Microbiology M178 and Physiological Science M178.) Lecture, three hours; laboratory, one hour. Requisites: Life Sciences 7A, 7B, 7C, 30A, 30B. Introduction to key biological regulatory circuit motifs and systems biology concepts that are critical to understanding how cellular responses are controlled. Letter grading.

**M184. Introduction to Computational and Systems Biology.** (2) (Same as Bioengineering M184 and Computer Science M184.) Lecture, two hours; outside study, four hours. Enforced requisites: one course from Civil Engineering M20, Computer Science 31, Mechanical and Aerospace Engineering M20, or Program in Computing 10A; and Life Sciences 30B or Mathematics 3B or 31B. Survey course designed to introduce students to computational and systems modeling and computation in biology and medicine, providing motivation, flavor, culture, and cutting-edge contributions in computational biosciences and aiming for more informed basis for focused studies by students with computational and systems biology interests. Presentations by individual UCLA researchers discussing their active computational and systems biology research. P/NP grading.

**185. Research Opportunities in Computational and Systems Biology.** (4) Lecture, two hours; discussion, two hours. Requisites: course M184, Life Sciences 7C, Mathematics 33A, 33B. Introduction to interdisciplinary laboratory research methods and research opportunities in computational and systems biology to prepare and initiate students for active engagement in research. Presentation of potential projects by faculty members and student visits to individual laboratories and participation in ongoing projects. P/NP or letter grading.

**M186. Computational Systems Biology: Modeling and Simulation of Biological Systems.** (5) (Same as Bioengineering CM186, Computer Science CM186, and Ecology and Evolutionary Biology M178.) Lecture, four hours; laboratory, two hours; discussion, one

hour. Requisites: Life Sciences 30A, 30B, Mathematics 32A or M32T, 33A, and 33B; or Mathematics 31A, 31B, 32A or M32T, 33A, and 33B. Dynamic biosystem modeling and computer simulation methods for studying biological/biomedical processes and systems at multiple levels of organization. Intermediate linear and nonlinear control system, multicompartmental, epidemiological, pharmacokinetic, and other biomodeling methods applied to life sciences problems at molecular, cellular, organ, and population levels. Both theory- and data-driven modeling, with focus on translating biomodeling goals and data into dynamical mathematical models, and implementing them for simulation, quantification, and analysis. Numerical simulation, optimization, and parameter identifiability and search algorithms, with model discrimination and analysis and software exercises in PC laboratory assignments. Letter grading.

**M187. Research Communication in Computational and Systems Biology.** (4) (Same as Bioengineering CM187 and Computer Science CM187.) Lecture, four hours; outside study, eight hours. Requisites: course M150 or M186 or Computer Science M182; and research experience (course 199, Bioengineering, Computer Science 199, or equivalent). Closely directed, interactive, and real research experience in active quantitative systems biology research laboratory. Direction on how to focus on topics of current interest in scientific community, appropriate to student interests and capabilities. Critiques of oral presentations and written progress reports explain how to proceed with search for research results. Major emphasis on effective research reporting, both oral and written. Letter grading.

**189. Advanced Honors Seminars.** (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts.** (1) Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**195. Community or Corporate Internships in Computational and Systems Biology.** (4) Tutorial, eight hours. Limited to juniors/seniors. Supervised internship under guidance of faculty mentor. Further supervision to be provided by organization for which students are doing internship. Students may be required to meet on regular basis with instructor and provide periodic reports of their experience. Culminating report/project required. May be repeated for credit. Maximum of 4 units of 195 can be applied toward major. Individual contract required. P/NP grading.

**198A-198B. Honors Research in Computational and Systems Biology.** (4-4) Tutorial, 12 hours. Maximum of 8 units of courses 198A and 198B may be applied toward major. Individual contract required. **198A.** Requisite: course M150. Limited to Computational and Systems Biology students. Supervised individual research involving extensive reading and development of honors thesis or comprehensive project under guidance of faculty mentor. In Progress grading (credit to be given on completion of course 198B). **198B.** Requisite: course 198A. Continued reading and research culminating in honors thesis under direct supervision of faculty member. Letter grading.

**199. Directed Research in Computational and Systems Biology.** (4) Tutorial, 12 hours. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating report/thesis required. May be repeated for credit. Four units may be applied toward major requirements. Individual contract required. Letter grading.

Douglas S. Bell, MD, PhD, *in Residence*

Thomas Chou, PhD

Jason Ernst, PhD

Eleazar Eskin, PhD

Eran Halperan, PhD

Kenneth L. Lange, PhD (*Maxine and Eugene  
Rosenfeld Endowed Professor of  
Computational Genetics*)

Gang Li, PhD

James O. Lloyd-Smith, PhD

Bogdan Pasaniuc, PhD

Zhilin Qu, PhD, *in Residence*

Marcus L. Roper, PhD

Van M. Savage, PhD

Eric M. Sobel, PhD, *in Residence*

Marc A. Suchard, MD, PhD

Wei Wang, PhD (*Leonard Kleinrock Term  
Professor of Computer Science*)

Hua Zhou, PhD

### Professors Emeriti

Abdelmonem A. Afifi, PhD

Robert I. Jennrich, PhD

Elliot M. Landaw, MD, PhD

### Associate Professors

Valerie Arboleda, MD, PhD, *in Residence*

Jingyi Jessica Li, PhD

Sriram Sankararaman, PhD

Noah A. Zaitlen, PhD

### Assistant Professors

Brunilda Balliu, PhD

Jeffrey N. Chiang, PhD

Harold J. Pimentel, PhD

Daniel J. Tward, PhD

Bolei Zhou, PhD

### Adjunct Professors

David Elashoff, PhD

Jeffrey A. Gornbein, DrPH

### Adjunct Associate Professors

Maria-Rita R. D'Orsogna, PhD

Mary E. Sehl, MD, PhD

### Adjunct Assistant Professor

Elior Rahmani, PhD

## Overview

As biology advances rapidly in quantitative research methods, both the need and potential for closely associated theoretical research increases. On numerous medical science frontiers—such as genetics, molecular biology, oncology, pharmacology, neuroscience, and physiology—the Department of Computational Medicine contributes both in basic research and the development of specialized software to support investigation and health care. UCLA has one of the few departments in this rapidly evolving field.

The department builds from abstract modeling toward research vital to the advancement of current biomedical frontiers. The doctoral program reflects this in requirements for advanced training in a biomedical research specialty and in the mathematical and computing skills required to contend realistically with the complex phenomena encountered in biology and medicine. The art of quantitative research is developed individually from the first year.

The department welcomes both undergraduate and graduate students in other majors to its courses in mathematical modeling, research computing, and biomedical statistics. Pre-medical majors with mathematical and computational interests can receive early guidance toward an MD/PhD joint degree. The department also offers quantitative research training in the medical curriculum and postgraduate medical programs.

## Graduate Majors

### Biomathematics MS, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Clinical Research MS

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Data Science in Biomedicine MS

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more de-

tailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Biomathematics

### Lower-Division Courses

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**170A. Introductory Biomathematics for Medical Investigators. (4)** Lecture, three hours; discussion, one hour. Intensive elementary statistics course emphasizing design and applications to observational studies and experiments/clinical trials. Statistical topics include study design, descriptive statistics, elementary probability and distributions, confidence intervals and hypothesis testing, sample size and power, linear regression and correlation, analysis of variance, nonparametric statistics. Applications to biomedical literature and design of clinical trials. Letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**190HA-190HB. Honors Research in Biomathematics. (4-4)** Tutorial, to be arranged. Limited to juniors/seniors. Individual research in some aspect of biomathematics designed to acquaint students in depth with mathematical models and computer applications in biology. Must be taken for at least two terms and for total of at least 8 units. Thesis required. P/NP or letter grading.

**197. Individual Studies in Biomathematics. (2 to 4)** Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**199. Directed Research or Senior Project in Biomathematics. (2 to 8)** Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

### Graduate Courses

**200. Research Frontiers in Biomathematics. (2)** Lecture, two hours. Series of presentations by faculty members on research frontiers in biomathematics. S/U grading.

**200B. Frontiers and Methods in Mathematical Systems. (4)** Lecture/seminar, four hours. Introduction to cutting-edge research in mathematical biology. Imparts critical thinking through critique of research. Trains students in scientific writing and presentation skills. Short writing assignments, figure preparation, and slide development. Letter grading.

**201. Deterministic Models in Biology. (4)** Lecture, three hours; laboratory, three hours. Preparation: knowledge of linear algebra and differential equations. Examination of conditions under which deterministic

approaches can be employed and conditions where they may be expected to fail. Topics include compartmental analysis, enzyme kinetics, physiological control systems, and cellular/animal population models. S/U or letter grading.

**202. Biological Systems: Structure, Function, Evolution. (4)** Lecture, four hours. Preparation: knowledge of calculus, differential equations, and partial differential equations. Introduction to concepts, equations, and approximations that describe structure and function of biological systems, evolutionary principles, and network design and dynamics. Topics include cancer initiation and progression, gene expression, epistasis, response to fluctuating environments, network structure, and functional traits. S/U or letter grading.

**M203. Stochastic Models in Biology. (4)** (Same as Human Genetics M203.) Lecture, four hours. Requirement: Mathematics 170A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and variety of other biological and medical disciplines. S/U or letter grading.

**204. Biomedical Data Analysis. (4)** Lecture, four hours. Requirement: at least one course in probability or statistics that included basic probability, elementary distributions, hypothesis testing, and confidence intervals; knowledge of elementary calculus. Familiarity with elementary matrix algebra and previous programming experience are strongly preferred. Modern scientific research and quality and quantity of data have been greatly affected by rapid expansion of statistical computing software. Problem-oriented study of latest methods in applied statistical data analysis and its use arising in laboratory and clinical research. S/U or letter grading.

**205. Top Computational Algorithms. (4)** Lecture, four hours. Recommended preparation: undergraduate calculus, linear algebra, probability. Overview of most important and beautiful algorithms in numerical analysis, statistics, bioinformatics, and computer science. Emphasis on mathematical derivation, practical complexity analysis, significant applications, and coding in Julia programming language. Big data applications particularly stressed. Letter grading.

**206. Introduction to Mathematical Oncology. (4)** Lecture, four hours; computer laboratory, two hours. Preparation: ordinary partial differential equations, one computer programming course. Deterministic and stochastic modeling of cell metabolism, colony growth, and responses to radio-, chemo-, and immuno-therapeutic agents applied to carcinogenesis, therapy, emergence of resistance to therapy. Simulation, optimization methods introduced. Current literature review. S/U or letter grading.

**M207A. Theoretical Genetic Modeling. (4)** (Same as Biostatistics M272 and Human Genetics M207A.) Lecture, three hours; discussion, one hour. Requirements: Mathematics 115A, 131A, Statistics 100B. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

**M207B. Applied Genetic Modeling. (4)** (Same as Biostatistics M237 and Human Genetics M207B.) Lecture, three hours; laboratory, one hour. Requirements: Biostatistics 200B, 202B (may be taken concurrently) or equivalent coursework or consent of instructor. Covers basic genetic concepts (prior knowledge of human genetics not required). Topics include statistical methodology underlying genetic analysis of both quantitative and qualitative complex traits. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M207A; students may take either and are encouraged to take both. S/U or letter grading.

**208. Geometric Methods in Medical Imaging. (4)** Lecture, four hours. Recommended preparation: undergraduate calculus, linear algebra, probability. Overview of mathematical and computational techniques to study geometric objects underlying medical images. Includes curves, surfaces, sizes, shapes, and diffusion tensors that describe cells, tissues, and organs. S/U or letter grading.

**209. Mechanisms and Modeling in Bioanalytical Assays. (4)** Lecture, three hours. Preparation: knowledge of basic physical chemistry and ordinary differential equations. Recommended prerequisite: course 201. Review of basic physical mechanisms and mathematical analyses used in common bioanalytical assays. Topics include chromatography, electrophoresis, blotting, DNA sequencing, PCR, SELEX, ChIP-sequencing, FACS, FRAP, and FISH. S/U or letter grading.

**210. Optimization Methods in Biology. (4)** Lecture, four hours. Preparation: undergraduate mathematical analysis and linear algebra; familiarity with programming language such as Fortran or C. Modern computational biology relies heavily on finite-dimensional optimization. Survey of theory and numerical methods for discrete and continuous optimization, with applications from genetics, medical imaging, pharmacokinetics, and statistics. S/U or letter grading.

**M211. Mathematical and Statistical Phylogenetics. (4)** (Same as Biostatistics M239 and Human Genetics M211.) Lecture, three hours; laboratory, one hour. Preparation: undergraduate course in statistics and probability. Theoretical models in molecular evolution focusing on phylogenetic techniques. Topics include evolutionary tree reconstruction methods, studies of viral evolution, phylogeography and coalescent approaches. Examples provided from evolutionary biology and evolutionary medicine, with unique focus on implications for human disease processes. Laboratory for hands-on computer analysis of sequence data. S/U or letter grading.

**M212. Evolutionary Ecology. (4)** (Same as Ecology and Evolutionary Biology M232.) Lecture, two and one half hours. Requisite: Ecology and Evolutionary Biology M200A or 200B, or equivalent. Concepts and topics include fundamental concepts of evolutionary ecology, including life history theory, quantitative genetics and phenotypic evolution, and advances made in field in last decade. May be repeated for credit. Letter grading.

**213. Modeling Vascular Networks. (4)** Lecture, four hours. Recommended preparation: calculus, differential equations, complex analysis, elementary knowledge of partial differential equations. Introduction to equations that describe fluid flow dynamics and branching, and hierarchal networks to provide survey of models for structure and flow of vascular systems. Vascular systems are nearly ubiquitous in nature, occurring across animals, plants, and other organisms. Coverage of applications to tumor growth and angiogenesis, sleep, allometric scaling, and other phenomena. S/U or letter grading.

**M226. Machine Learning in Bioinformatics. (4)** (Same as Bioinformatics M226, Computer Science M226, and Human Genetics M226.) Lecture, four hours; outside study, eight hours. Enforced prerequisite: Computer Science 32 or Program in Computing 10C with grade of C- or better. Recommended: one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, or Statistics 100A. Familiarity with probability, statistics, linear algebra, and algorithms expected. Designed for engineering students as well as students from biological sciences and medical school. Biology has become data-intensive science. Bottleneck in being able to make sense of biological processes has shifted from data generation to statistical models and inference algorithms that can analyze these datasets. Statistical machine learning provides important toolkit in this endeavor. Biological datasets offer new challenges to field of machine learning. Examination of statistical and computational aspects of machine learning techniques and their application to key biological questions. Letter grading.

**M232. Statistical Analysis of Incomplete Data. (4)** (Same as Biostatistics M232.) Lecture, three hours; discussion, one hour. Requisites: Biostatistics 200C, 202B or equivalent. Sources of incomplete data, recognizing familiar methods as solutions to missing-data problems, missing-data mechanisms, weighting and imputation strategies, model-based and design-based inference, likelihood-based and Bayesian methods, statistical computing strategies, multivariate models for diverse data types, nonignorable models, review of

available statistical software. Emphasis on incorporating incomplete-data perspective into broader statistical-science framework. S/U or letter grading.

**M234. Applied Bayesian Inference. (4)** (Same as Biostatistics M234.) Lecture, three hours; laboratory, one hour. Requisite: Biostatistics 200B or another substantial regression course. Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

**M243. Condensed Matter Physics of Cells. (4)** (Same as Physics M243L.) Seminar, four hours. Designed for graduate students. Basic paradigms of condensed matter physics and applications to biophysical modeling. S/U or letter grading.

**M257. Computational Methods for Biostatistical Research. (4)** (Same as Biomathematics M257.) Lecture, three hours; discussion, one hour. Requisites: Biostatistics 250A or Statistics 100C, Mathematics 115A. Preparation for quantitative research in statistics and data sciences. Numerical analysis and hands-on computing techniques for handling big data. Numerical analysis topics include computer arithmetic, solving linear equations, Cholesky factorization, QR factorization, regression computations, eigenvalue problems, iterative solvers, numerical optimization, and design and analysis of statistical simulation experiments. Computing techniques include basics of R programming, reproducible research using R and RStudio, collaborative research, parallel computing, and cloud computing. No prior knowledge of R assumed. S/U or letter grading.

**259. Controversies in Clinical Trials. (2)** Lecture, one hour; discussion, one hour. Preparation: completion of professional health sciences or MD degree. Required of all MS in Clinical Research students. Discussion and analysis of eight published and well-known trials with students, one invited clinical faculty member, and course director. Development of critical ability to evaluate trial design and pitfalls. S/U or letter grading.

**M260A-M260B. Methodology in Clinical Research I, II. (4-4)** (Same as Medicine M260A-M260B.) Lecture, four hours. Recommended preparation: MD, PhD, or dental degree. Requisites: courses 170A, 265A. Course M260A is requisite to M260B. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

**M260C. Methodology in Clinical Research III. (4)** (Same as Medicine M260C.) Discussion, four hours. Recommended preparation: MD, PhD, or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

**M261. Responsible Conduct of Research Involving Humans. (2)** (Same as Medicine M261.) Lecture, two hours; discussion, two hours. Preparation: completion of one basic course in protection of human research subjects through Collaborative Institutional Training Initiative. Discussion of current issues in responsible conduct of clinical research, including reporting of research, basis for authorship, issues in genetic research, principles and practice of research on humans, conflicts of interest, Institutional Review Board (IRB), and related topics. S/U or letter grading.

**M262. Communication of Science. (2)** (Same as Psychiatry M230.) Lecture, two hours; discussion, one hour. Presentation of various types of scientific writings and their good practice. Details of writing specific articles: methods, results, discussion. Writing of review article. Grant submissions: aims, background, results, design. Role of appendices. Communication with lay public. S/U or letter grading.

**M263. Clinical Pharmacology. (2)** (Same as Medicine M263 and Psychiatry M263.) Lecture, two hours. Preparation: completion of professional health sciences degree (MD, DDS, DNSc, or PhD). Overview of

principles of clinical pharmacology, especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targeting, gene therapy, and genomics. Letter grading.

**264. Applied Data Collection and Analysis. (4)** Lecture, four hours. Presentation of research project development, including protocol development, data collection, quality control, clinical/electronic health record (EHR) data, structuring data for analysis, and data archival. Lectures, in-class practicums using actual studies and datasets, and student presentations. Letter grading.

**265A. Data Analysis Strategies I. (4)** Lecture, two hours; laboratory, two hours. Preparation: MD or PhD degree. Requisite: course 170A. Designed to provide students with hands-on experience developing and testing hypotheses using various types of databases. Topics include developing testable hypothesis, data management, and analysis strategies and written presentation of findings. Experience with full process of hypothesis generation, operationalization of variables, selection of analysis techniques, and presentation of findings so students are better prepared to complete data analysis, interpretation of results, and written presentation of their findings (e.g., for master's thesis and subsequent articles). Students encouraged to provide their own data. Databases provided for use in completing exercises for those without available data. Letter grading.

**266A. Applied Regression Analysis in Medical Sciences. (4)** Lecture, three hours; laboratory, one hour. Requisite: course 170A. Proficiency in applied regression analysis, with focus on interpretation of results and performing computation. Primary topics include simple linear regression, multiple regression, regression model selection, analysis of variance, logistic regression, and survival analysis. Letter grading.

**266B. Advanced Biostatistics. (4)** Lecture, three hours; discussion, one hour. Requisite: course 266A. Continuation of course 266A. Some traditional multivariate methods, such as principle components, factor analysis, cluster analysis, and more contemporary methods, including recursive partitioning and missing data. Multilevel and longitudinal analysis. Letter grading.

**M270. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4)** (Same as Bioengineering M296B, Computer Science M296B, and Medicine M270D.) Lecture, four hours; outside study, eight hours. Requisite: course 220 or Bioengineering CM286 or M296A. Estimation methodology and model parameter estimation algorithms for fitting dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on optimal sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment design via applications in physiology and pharmacology. Letter grading.

**M271. Statistical Methods in Computational Biology. (4)** (Same as Bioinformatics M223 and Statistics M254.) Lecture, three hours; discussion, one hour. Preparation: elementary probability concepts. Requisite: Bioinformatics M221 or Statistics 100A or 200A. Introduction to statistical methods developed and widely applied in several branches of computational biology, such as gene expression, sequence alignment, motif discovery, comparative genomics, and biological networks, with emphasis on understanding of basic statistical concepts and use of statistical inference to solve biological problems. Letter grading.

**M280. Statistical Computing. (4)** (Same as Biostatistics M280 and Statistics M230.) Lecture, three hours. Requisites: Mathematics 115A, Statistics 100C. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods. Letter grading.

**M281. Survival Analysis. (4)** (Same as Biostatistics M215.) Lecture, three hours; discussion, one hour. Requisite: Biostatistics 202B or Statistics 100C. Statistical methods for analysis of survival data. S/U or letter grading.

**M282. Longitudinal Data. (4)** (Same as Biostatistics M236.) Lecture, three hours; laboratory, one hour. Requisite: Biostatistics 200B or another substantial regression course. Analysis of continuous responses for which multivariate normal model may be assumed. Students learn how to think about longitudinal data, plot data, and how to specify mean and variance of longitudinal response. Advanced topics include introductions to clustered, multivariate, and discrete longitudinal data. S/U or letter grading.

**M284. Methodology of Clinical Trials. (4)** (Same as Biostatistics M238.) Lecture, three hours; discussion, one hour. Requisite: Biostatistics 200B. Introductory material on design and analysis of clinical trials, including adaptive methods for early and late randomized trials. S/U or letter grading.

**285. Introduction to High-Throughput Data Analysis. (4)** Seminar, three hours. Requisites: courses M260A, M260B. Introduction to high-throughput data analysis, including DNA microarray technologies and next-generation sequencing technology. Presentation of statistical methods and software for handling complex data produced by experiments using these technologies. Some hands-on training on data analysis provided. S/U or letter grading.

**299. Special Topics in Clinical Research. (2 to 6)** Seminar, three hours. Requisites: courses M260A, M260B. Advanced study and analysis of current topics in clinical research. Discussion of current research and literature in research specialty of faculty member teaching course. Content varies from term to term and may include lectures from visiting scientists. May be repeated for credit with consent of instructor. S/U or letter grading.

**596. Directed Individual Study or Research in Biostatistics. (2 to 12)** Tutorial, to be arranged. Individual study on topics not yet covered by offerings of department. May be repeated for credit with topic change. S/U or letter grading.

**597. Preparation for MS or PhD Comprehensive Examination or PhD Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Individual study. S/U grading.

**599. Research for and Preparation of PhD Dissertation. (2 to 12)** Tutorial, to be arranged. S/U grading.

## Data Science in Biomedicine

### Graduate Courses

**200. Foundations of Data Science. (4)** Lecture, four hours; discussion, two hours. Preparation: familiarity with programming and algorithms, probability, statistics, linear algebra. Study offers background in mathematical and engineering foundations that are building blocks of data science. Topics include linear algebra, probability, and statistics. Overview of science software engineering and reproducibility fundamentals including working on a compute cluster, pipeline development, virtual notebooks, version control. Letter grading.

**205. Machine Learning Applications in Biomedicine. (4)** Lecture, four hours; discussion, two hours. Requisite: course 200 or equivalent. Introduction to machine learning analysis of biomedical data, with focus on formulating interdisciplinary problems as computational problems and then solving those problems using machine learning techniques and computational interdisciplinary research in genetics. Fundamentals of machine learning and applications to genetics and health records. Letter grading.

**206. Advanced Machine Learning Applications in Biomedicine. (4)** Lecture, four hours; discussion, two hours. Requisite: course 200 or equivalent. Statistical models for analysis of biomedical data that captures the structure of the data and accounts for the constraints. Topics include Bayesian models, probabilistic graphical models, deep learning, time series, dynamical systems, stochastic processes, scalable inference (gradient descent, stochastic gradient descent, expectation-maximization, Markov chain Monte Carlo, variational inference), privacy-preserving inference

(differential privacy, inference over encrypted data), interpretable machine learning, and fairness and bias. Letter grading.

**207. Data Science for Medical Imaging. (4)** Lecture, four hours; discussion, two hours. Requisite: course 200 or equivalent. Overview of medical image modalities and 3D visualization, classical image processing (histogram analysis and filtering), modern deep learning techniques (convolutional networks), image alignment, and statistical analysis of populations. Letter grading.

**208. Recent Research in Machine Learning in Medicine. (4)** Lecture, four hours; discussion, two hours. Requisite: course 200 or equivalent. Overview of recent research in machine learning applied to medicine. Covers recent papers utilizing data science approaches to analyze large amounts of medical data. Topics include analysis of medical imaging data, electronic health records, and waveforms. Students receive instruction on how to read recent research papers, and present these papers in class. Letter grading.

**209. Recent Research in Data Science in Genomic Medicine. (4)** Lecture, four hours; discussion, two hours. Requisite: course 200 or equivalent. Overview of recent research in data science applied to genomic medicine. Covers recent papers that use data science approaches to analyze large amounts of genomic data along with medical data with the goal of improving patient care. Topics include analysis of genomic data to diagnose rare diseases, estimation and utilization of polygenic risk scores in electronic medical records, and integrating novel types of genomic data into clinical care. Students receive instruction on how to read recent research papers, and present these papers in class. Letter grading.

## COMPUTER SCIENCE

Miryung Kim, PhD, *Vice Chair, Graduate Studies*

Glenn D. Reinman, PhD, *Vice Chair, Undergraduate Studies*

Amit Sahai, PhD, *Vice Chair, Academic Advancement*

## Faculty Roster

### Professors

Junghoo (John) Cho, PhD  
Jason (Jingsheng) Cong, PhD (*Volgenau Professor of Engineering Excellence*)

Adnan Y. Darwiche, PhD  
Joseph J. DiStefano III, PhD  
Eleazar Eskin, PhD  
Eran Halperin, PhD  
Miryung Kim, PhD  
Richard E. Korf, PhD  
Songwu Lu, PhD

Todd D. Millstein, PhD  
Stanley J. Osher, PhD  
Rafail Ostrovsky, PhD (*Norman E. Friedmann Professor of Knowledge Sciences*)  
Jens Palsberg, PhD

Miodrag Potkonjak, PhD  
Glenn D. Reinman, PhD  
Amit Sahai, PhD (*Symantec Term Professor of Computer Science*)

Majid Sarrafzadeh, PhD (*Levi James Knight, Jr. Term Professor of Innovation*)

Stefano Soatto, PhD  
Mani B. Srivastava, PhD  
Demetri Terzopoulos, PhD  
George Varghese, PhD (*Jonathan B. Postel Professor of Networking*)

Wei Wang, PhD (*Leonard Kleinrock Term Professor of Computer Science*)

Harry G. Xu, PhD  
Lixia Zhang, PhD (*Jonathan B. Postel Professor of Computer Systems*)

Song-Chun Zhu, PhD

### Professors Emeriti

Algirdas A. Avizienis, PhD  
Rajive L. Bagrodia, PhD  
Alfonso F. Cardenas, PhD  
Jack W. Carlyle, PhD  
Wesley W. Chu, PhD  
Michael G. Dyer, PhD  
Milos D. Ercegovic, PhD  
Eliezer M. Gafni, PhD  
Sheila A. Greibach, PhD  
Leonard Kleinrock, PhD  
Allen Klinger, PhD  
Lawrence P. McNamee, PhD  
Richard R. Muntz, PhD  
Judea Pearl, PhD  
Carlo A. Zaniolo, PhD (*Norman E. Friedmann Professor Emeritus of Knowledge Sciences*)

### Associate Professors

Kai-Wei Chang, PhD  
Jason Ernst, PhD  
Alyson K. Fletcher, PhD  
Quanquan Gu, PhD  
Choi-Jui Hsieh, PhD  
Raghu Meka, PhD  
Anthony J. Nowatzki, PhD  
Sriram Sankararaman, PhD  
Alexander Sherstov, PhD  
Yizhou Sun, PhD  
Yuval Tamir, PhD  
Guy Van den Broeck, PhD

### Assistant Professors

Omid Abari, PhD  
Aditya Grover, PhD  
Achuta Kadambi, PhD  
Baharan Mirzasoleiman, PhD  
Violet (Nanyun) Peng, PhD  
Fabien Scalzo, PhD, *in Residence*  
Bolei Zhou, PhD

### Senior Lecturers SOE

Paul R. Eggert, PhD  
David A. Smallberg, MS

### Adjunct Professors

David E. Heckerman, PhD  
Van Jacobsen, MS  
Alan C. Kay, PhD

### Adjunct Associate Professors

Carey S. Nachenberg, MS  
Giovanni Pau, PhD  
Ramin Ramezani, PhD

**Adjunct Assistant Professor**

Ravi Netravali, PhD

**Overview**

Computer science is concerned with the design, modeling, analysis, and applications of computer systems. Its study at UCLA provides education at the undergraduate and graduate levels necessary to understand, design, implement, and use the software and hardware of computers and digital systems. The programs offer comprehensive and integrated studies of subjects in computer system architecture, computer networks, distributed computer systems, programming languages and software systems, information and data management, artificial intelligence, computer science theory, computational systems biology and bioinformatics, and computer vision and graphics.

The undergraduate and graduate studies and research projects in the Department of Computer Science are supported by significant computing resources. In addition to the departmental computing facility, there are over a dozen research laboratories specializing in areas such as distributed systems, multimedia computer communications, distributed sensor networks, VLSI systems, VLSI CAD, embedded and reconfigurable systems, computer graphics, bioinformatics, and artificial intelligence. Also, the Cognitive Systems Laboratory is engaged in studying computer systems that emulate or support human reasoning. The Biocybernetics Laboratory is devoted to multidisciplinary research involving the application of engineering and computer science methods to problems in biology and medicine.

**Undergraduate Majors****Computer Science and Engineering BS**

The Computer Science and Engineering curriculum at UCLA provides students with the education and training necessary to design, implement, test, and utilize the hardware and software of digital computers and digital systems. The curriculum has components spanning both the Computer Science and Electrical and Computer Engineering departments. The curriculum covers all aspects of computer systems from electronic design through logic design, MSI, LSI, and VLSI concepts; device utilization, machine language design, implementation and programming, operating system concepts, systems programming, networking fundamentals, and higher-level language skills; and their application. Students are prepared for employment in a wide spectrum of high-technology industries.

The computer science and engineering program is accredited by the Computing Accreditation Commission and the Engineering Accreditation Commission of **ABET**.

**Capstone Major**

The Computer Science and Engineering major is a designated capstone major. Computer Sci-

ence and Engineering students complete a major product design course. Graduates are expected to apply the basic mathematical and scientific concepts that underlie modern computer science and engineering; design a software or digital hardware system, component, or process to meet desired needs within realistic constraints; function productively with others as part of a team; identify, formulate, and solve computer software- and hardware-related engineering problems; and demonstrate effective communication skills.

**Learning Outcomes**

The Computer Science and Engineering major has the following learning outcomes:

- Application of basic mathematical and scientific concepts that underlie the modern field
- Design of a software or digital hardware system, component, or process to meet desired needs within realistic constraints
- Function productively with others on a team, including those with different specialties within the field
- Identification, formulation, and solution of computer software- and hardware-related engineering problems
- Effective communication

**Requirements****Preparation for the Major**

*Required:* Computer Science 1, 31, 32, 33, 35L, M51A; Electrical and Computer Engineering 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 1A, 1B, 1C, and 4AL or 4BL.

**The Major**

*Required:* Computer Science 111, 118, 131, M151B, M152A, 180, 181, Electrical and Computer Engineering 100, 102, 115C; one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, or Statistics 100A; one capstone design course (Computer Science 152B); a minimum of 4 units and one elective course selected from Electrical and Computer Engineering 101A through M185; a minimum of 12 units and three elective courses selected from Computer Science 111 through CM187, and up to 8 units of Computer Science 188; and 12 units of technical breadth courses selected from an approved list available in the **Office of Academic and Student Affairs**.

Students who want to deepen their knowledge of electrical engineering are encouraged to select that discipline as their technical breadth area.

For information on UC, school, and general education requirements, see the **Samueli school** section in College and Schools.

**Policies****The Major**

Credit is not allowed for both Computer Science 170A and Electrical and Computer Engineering 133A unless at least one of them is applied as part of the technical breadth area. Electrical and Computer Engineering 110,

131A, and CM182 may not satisfy elective credit. A petition may be submitted to consider four units of Computer Science 194 or 199 for an elective. Credit is not guaranteed and subject to vice chair review.

A multiple-listed (M) course offered in another department may be used instead of the same computer science course (e.g., Electrical and Computer Engineering M116C may be taken instead of Computer Science M151B). Credit is applied automatically.

**Computer Science BS**

The Computer Science curriculum is designed to accommodate students who want professional preparation in computer science but do not necessarily have a strong interest in computer systems hardware. The curriculum consists of components in computer science, a minor or technical support area, and a core of courses from the social sciences, life sciences, and humanities. Within the curriculum, students study subject matter in software engineering, principles of programming languages, data structures, computer architecture, theory of computation and formal languages, operating systems, distributed systems, computer modeling, computer networks, compiler construction, and artificial intelligence. Majors are prepared for employment in a wide range of industrial and business environments.

The computer science program is accredited by the Computing Accreditation Commission of **ABET**.

**Capstone Major**

The Computer Science major is a designated capstone major. Students complete either a software engineering or a major product design course. Graduates are expected to apply the basic mathematical and scientific concepts that underlie modern computer science and engineering; design a software or digital hardware system, component, or process to meet desired needs within realistic constraints; function productively with others as part of a team; identify, formulate, and solve computer software- and hardware-related engineering problems; and demonstrate effective communication skills.

**Learning Outcomes**

The Computer Science major has the following learning outcomes:

- Application of basic mathematical and scientific concepts that underlie the modern field
- Design of a software or digital hardware system, component, or process to meet desired needs within realistic constraints
- Function productively with others on a team, including those with different specialties within the field
- Identification, formulation, and solution of computer software- and hardware-related engineering problems
- Effective communication

## Requirements

### Preparation for the Major

Required: Computer Science 1, 31, 32, 33, 35L, M51A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 1A, 1B, 1C, and 4AL or 4BL.

### The Major

*Required:* Computer Science 111, 118, 131, M151B, M152A, 180, 181; one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, or Statistics 100A; one capstone software engineering or design course from Computer Science 130 or 152B; a minimum of 20 units and five elective courses selected from Computer Science 111 through CM187, and up to 8 units of Computer Science 188; a minimum of 12 units and three science and technology courses (not used to satisfy other requirements) that may include 12 units of upper-division computer science courses or 12 units of courses selected from an approved list available in the [Office of Academic and Student Affairs](#); and 12 units of technical breadth courses selected from an approved list available in the Office of Academic and Student Affairs.

For information on UC, school, and general education requirements, see the [Samueli school](#) section in College and Schools.

## Policies

### The Major

Students must take at least one course from Computer Science 130 or 132. Computer Science 130 or 152B may be applied as an elective only if it is not taken as the capstone course.

Credit is not allowed for both Computer Science 170A and Electrical and Computer Engineering 133A unless at least one of them is applied as part of the science and technology requirement or as part of the technical breadth area. A petition may be submitted to consider four units of Computer Science 194 or 199 for an elective. Credit is not guaranteed and subject to vice chair review.

A multiple-listed (M) course offered in another department may be used instead of the same computer science course (e.g., Electrical and Computer Engineering M116C may be taken instead of Computer Science M151B). Credit is applied automatically.

## Computer Engineering BS

The undergraduate curriculum provides all computer engineering students with preparation in the mathematical and scientific disciplines that lead to a set of courses that span the fundamentals of the discipline in the major areas of data science and embedded networked systems. These collectively provide an understanding of many inventions of importance to our society, such as the Internet of Things, human-cyber-physical systems, mobile/wearable/implantable systems, robotic systems, and more generally smart systems at all scales in diverse spheres. The design of

hardware, software, and algorithmic elements of such systems represents an already dominant and rapidly growing part of the computer engineering profession. Students are encouraged to make use of their computer science and electrical and computer engineering electives and a two-quarter capstone design course to pursue deeper knowledge within one of these areas according to their interests, whether for graduate study or preparation for employment.

### Capstone Major

The Computer Engineering major is a designated capstone major that is jointly administered by the Computer Science, and Electrical and Computer Engineering, departments. Undergraduate students complete a design course in which they integrate their knowledge of the discipline and engage in creative design within realistic and professional constraints. Students apply their knowledge and expertise gained in previous mathematics, science, and engineering coursework. Students identify, formulate, and solve engineering problems and present their projects to the class.

### Learning Outcomes

The Computer Engineering major has the following learning outcomes:

- Application of mathematical, scientific, and engineering knowledge
- Design of a software or hardware system, component, or process to meet desired needs within realistic economic, environmental, social, ethical, health, safety, security, reliability, manufacturability, and sustainability constraints
- Function productively on a team with others
- Identification, formulation, and solution of computer engineering problems
- Effective communication

## Requirements

### Preparation for the Major

*Required:* Computer Science 1 (or Electrical and Computer Engineering 1), 31, 32, 33, 35L, M51A (or Electrical and Computer Engineering M16); Electrical and Computer Engineering 3; Engineering 96I; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 1A, 1B, 1C, and 4AL or 4BL.

### The Major

*Required:* Computer Science 111, 118 (or Electrical and Computer Engineering 132B), M151B (or Electrical and Computer Engineering M116C), M152A (or Electrical and Computer Engineering M116L), 180; Electrical and Computer Engineering 100, 102, 113, 115C; one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, Statistics 100A; 8 units of computer science and 8 units of electrical and computer engineering upper-division electives; three technical breadth courses (12 units) selected from an approved list available in the [Office of Academic and Student Affairs](#); 8 units capstone design from

either Electrical and Computer Engineering 180DA/180DW or 183DA/183DB.

For information on UC, school, and general education requirements, see the [Samueli school](#) section in College and Schools.

## Undergraduate Minors

### Bioinformatics Minor

The Bioinformatics minor introduces undergraduate students to the emerging interdisciplinary field of bioinformatics, an active area of research at UCLA combining elements of the computational sciences with the biological sciences. The minor organizes the many course offerings in different UCLA departments into a coherent course plan providing students with significant training in bioinformatics in addition to the training they obtain from their major. Students who complete the minor will be strong candidates for admission to PhD programs in bioinformatics as well as have the relevant training to obtain jobs in the biotechnology industry.

Students complete a core curriculum and an elective course and are strongly encouraged to participate in undergraduate research as early as possible in one of the many groups offering research opportunities in bioinformatics.

### Admission

To enter the minor, students must be (1) in good academic standing (2.0 grade-point average or better), (2) have completed at least two of the lower-division requirements with minimum grades of C, and (3) file a petition through Message Center. Steps to apply are outlined on the [Office of Academic and Student Affairs](#) website. Information about the minor and the application are available on the minor website.

### The Minor

*Required Lower-Division Courses (17 units minimum):* Computer Science 32 or Program in Computing 10C, Life Sciences 7A, Mathematics 33A, 61.

*Required Upper-Division Courses (18 units minimum):* Computer Science 180 (or Mathematics 182), M184, two courses selected from Computer Science CM121, CM122, and CM124, and one course selected from Chemistry and Biochemistry C100, 153B, Civil and Environmental Engineering 110, Computer Science CM121, CM122, CM124, 170A, CM186, CM187, Ecology and Evolutionary Biology C135, Electrical and Computer Engineering 102, 131A, 141, Human Genetics C144, Mathematics 170A, 170E, Microbiology, Immunology, and Molecular Genetics 132, Molecular, Cell, and Developmental Biology 144, 187AL, Physiological Science 125, Statistics 100A, 100B.

Students are strongly encouraged to take Computer Science M184 as early as possible to obtain an overview of computational biology.

## Policies

Eight units of either Bioinformatics 199 or Computer Science 194 or 199 may be applied as an elective by petition.

If students apply any of Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, or Statistics 100A toward major requirements or another minor, then no other course from that set may be applied toward the minor requirements.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

All minor courses must be taken for a letter grade (unless not offered on that grading basis), and students must have a minimum grade of C– in each and an overall C (2.0) grade-point average in all courses taken for the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Data Science Engineering Minor

The minor is intended to expose students to the entire data science life cycle from both foundational and application perspectives. The foundational courses provide the engineering skills to collect, cleanse, and store data; analyze and draw inference from data; and take action and make decisions. A wide-ranging list of interdisciplinary courses focuses on various data-science applications using these skills.

## Admission

To apply for the minor, students must have an overall grade-point average of 3.0 or better, have completed or be in the process of completing in the present quarter the two lower-division required courses with the grade B– or better, and file a petition through Message Center. Steps to apply are outlined on the [Office of Academic and Student Affairs](#) website. Information about the minor and the application are available on the minor [website](#).

## The Minor

*Required Lower-Division Courses (8 units):* Computer Science 32, Mathematics 33A.

*Required Upper-Division Courses (12 units minimum):* One course from Civil and Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, or Statistics 100A; Computer Science M148 or Electrical and Computer Engineering M148; Computer Science 145 or M146 or Electrical and Computer Engineering M146.

*Elective Upper-Division Courses (8 units minimum):* Two courses from Computer Science M119, CM121, CM122, CM124, 143, 145 or M146 (if not taken as a required course), 161, 180, M182, Electrical and Computer Engineering 102, 113, 114, M119, 133A, M146 (if not taken as a required course), C147, 183DA and 183DB (both must be taken), Mechanical and

Aerospace Engineering C137, 185, Statistics 100B, 115, 170, or C180.

## Policies

Variable topics courses may be taken as topics apply.

Transfer credit for any of the above is subject to approval; consult with the undergraduate counselors before enrolling in any courses for the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and student must have a minimum grade of C in each and an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Major Computer Science MS, PhD

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Concurrent Degree Program

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

- Computer Science MS/Master of Business Administration

## Bioinformatics

### Lower-Division Courses

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Course

**199. Directed Research in Bioinformatics. (2 to 4)** Tutorial, six to 12 hours. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. Letter grading.

## Computer Science

### Lower-Division Courses

**1. Freshman Computer Science Seminar. (1)** Seminar, one hour. Introduction to department resources and principal topics and key ideas in computer science and computer engineering. Students create critical summaries of seminar talks. P/NP grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**30. Principles and Practices of Computing. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Designed for students in computer science and related majors who do not have prior programming experience. Precursor course to introductory computer science sequence (courses 31, 32, 33). Teaches students how to use computers as tool for problem solving, creativity, and exploration through design and implementation of computer programs. Key topics are data types including integers, strings, and lists; control structures, including conditionals and loops; and functional decomposition. Letter grading.

**31. Introduction to Computer Science I. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Introduction to computer science via theory, applications, and programming. Basic data types, operators and control structures. Input/output. Procedural and data abstraction. Introduction to object-oriented software development. Functions, recursion. Arrays, strings, pointers. Abstract data types, object-oriented programming. Examples and exercises from computer science theory and applications. Letter grading.

**32. Introduction to Computer Science II. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 31. Object-oriented software development. Abstract data type definition and use. Overloading, inheritance, polymorphism. Object-oriented view of data structures: stacks, queues, lists. Algorithm analysis. Trees, graphs, and associated algorithms. Searching and sorting. Case studies and exercises from computer science applications. Letter grading.

**33. Introduction to Computer Organization. (5)** Lecture, four hours; discussion, two hours; outside study, nine hours. Enforced requisite: course 32. Introductory course on computer architecture, assembly language, and operating systems fundamentals. Number systems, machine language, and assembly language. Procedure calls, stacks, interrupts, and traps. Assemblers, linkers, and loaders. Operating systems concepts: processes and process management, input/output (I/O) programming, memory management, file systems. Letter grading.

**35L. Software Construction. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 31. Fundamentals of tools and environments for software construction projects, particularly open-source platforms used in upper-division computer science courses. Software practice through collaborative student project. Letter grading.

**M51A. Logic Design of Digital Systems. (4)** (Same as Electrical and Computer Engineering M16.) Lecture, four hours; discussion, two hours; outside study, six hours. Introduction to digital systems. Specification and implementation of combinational and sequential systems. Standard logic modules and programmable logic arrays. Specification and implementation of algorithmic systems: data and control sections. Number systems and arithmetic algorithms. Error control codes for digital information. Letter grading.

**97. Variable Topics in Computer Science. (1 to 4)** Lecture, one to four hours; discussion, zero to two hours. Designed for freshmen/sophomores. Variable topics in computer science not covered in regular computer science courses. May be repeated once for credit with topic or instructor change. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**111. Operating Systems Principles. (5)** Lecture, four hours; laboratory, two hours; outside study, nine hours. Enforced prerequisites: courses 32, 33, 35L. Introduction to operating systems design and evaluation. Computer software systems performance, robustness, and functionality. Kernel structure, bootstrapping, input/output (I/O) devices and interrupts. Processes and threads; address spaces, memory management, and virtual memory. Scheduling, synchronization. File systems: layout, performance, robustness. Distributed systems: networking, remote procedure call (RPC), asynchronous RPC, distributed file systems, transactions. Protection and security. Exercises involving applications using, and internals of, real-world operating systems. Letter grading.

**112. Modeling Uncertainty in Information Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced prerequisites: course 111 and one course from Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Designed for juniors/seniors. Probability and stochastic process models as applied in computer science. Basic methodological tools include random variables, conditional probability, expectation and higher moments, Bayes theorem, Markov chains. Applications include probabilistic algorithms, evidential reasoning, analysis of algorithms and data structures, reliability, communication protocol and queueing models. Letter grading.

**117. Computer Networks: Physical Layer. (4)** Lecture, two hours; discussion, two hours; laboratory, two hours; outside study, six hours. Not open to students with credit for course M171L. Introduction to fundamental computer communication concepts underlying and supporting modern networks, with focus on wireless communications and media access layers of network protocol stack. Systems include wireless LANs (IEEE802.11) and ad hoc wireless and personal area networks (e.g., Bluetooth, ZigBee). Experimental project based on mobile radio-equipped devices (smart phones, tablets, etc.) as sensor platforms for personal applications such as wireless health, positioning, and environment awareness, and experimental laboratory sessions included. Letter grading.

**118. Computer Network Fundamentals. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced prerequisite: course 111. Designed for juniors/seniors. Introduction to design and performance evaluation of computer networks, including such topics as what protocols are, layered network architecture, Internet protocol architecture, network applications, transport protocols, routing algorithms and protocols, internetworking, congestion control, and link layer protocols including Ethernet and wireless channels. Letter grading.

**M119. Fundamentals of Embedded Networked Systems. (4)** (Same as Electrical and Computer Engineering M119.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 33; 118 or Electrical and Computer Engineering 132B; one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, Statistics 100A. Design trade-offs and principles of operation of cyber physical systems such as devices and systems constituting Internet of Things. Topics include signal propagation and modeling, sensing, node architecture and operation, and applications. Letter grading.

**CM121. Introduction to Bioinformatics. (4)** (Same as Chemistry CM160A.) Lecture, four hours; discussion, two hours. Requisites: course 32 or Program in Computing 10C with grade of C- or better, and one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics

170A, Mathematics 170E, or Statistics 100A. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventing new computational and statistical techniques to analyze biological data. Focus on sequence analysis and alignment algorithms. Concurrently scheduled with course CM221. P/NP or letter grading.

**C122. Algorithms in Computational Genomics. (4)** (Formerly numbered CM122.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32 or Program in Computing 10C with grade of C- or better, and one course from Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, Mathematics 170E, or Statistics 100A. Course C121 is not requisite to C122. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Databases of genomic sequence data are among the largest datasets in all of science. Assembling, indexing, and querying such tremendous datasets is computationally challenging yet critical for many areas of biomedical research. Focus on development of scalable algorithms for analysis of genomic sequence data, with additional focus on formulating biologically relevant problems as computational problems and then solving these problems by developing new algorithms. Concurrently scheduled with course C222. Letter grading.

**CM124. Machine Learning Applications in Genetics. (4)** (Same as Human Genetics CM124.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32 or Program in Computing 10C with grade of C- or better, Mathematics 33A, and one course from Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, Mathematics 170E, or Statistics 100A. Designed for engineering students as well as students from biological sciences and medical school. Introduction to computational analysis of genetic variation and computational interdisciplinary research in genetics. Topics include introduction to genetics, identification of genes involved in disease, inferring human population history, technologies for obtaining genetic information, and genetic sequencing. Focus on formulating interdisciplinary problems as computational problems and then solving those problems using computational techniques from statistics and computer science. Concurrently scheduled with course CM224. Letter grading.

**130. Software Engineering. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Requisites: courses 111, 131. Recommended prerequisite: Engineering 183EW or 185EW. Structured programming, program specification, program proving, modularity, abstract data types, composite design, software tools, software control systems, program testing, team programming. Letter grading.

**131. Programming Languages. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Enforced prerequisites: courses 33, 35L. Basic concepts in design and use of programming languages, including abstraction, modularity, control mechanisms, types, declarations, syntax, and semantics. Study of several different language paradigms, including functional, object-oriented, and logic programming. Letter grading.

**132. Compiler Construction. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 131. Compiler structure; lexical and syntactic analysis; semantic analysis and code generation; theory of parsing. Letter grading.

**133. Parallel and Distributed Computing. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced prerequisites: courses 131, M151B. Distributed memory and shared memory parallel architectures; asynchronous parallel languages: MPI, Maise; primitives for parallel computation: specification of parallelism, interprocess communication and synchronization; design of parallel programs for scientific computation and distributed systems. Letter grading.

**134. Distributed Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced prerequisite: course 118. Covers fundamental concepts regarding design and implementation of distributed systems. Topics include synchronization (e.g., clock synchronization, logical clocks, vector clocks), failure recovery (e.g., snapshotting, primary-backup), consistency models (e.g., linearizability, eventual, causal), consensus protocols (e.g., Paxos, Raft), distributed transactions, and lock. Students gain hands-on, practical experience through multiple programming assignments that work through steps of creating fault-tolerant, sharded key/value store. Exploration of how these concepts have manifested in several real-world, large-scale distributed systems used by Internet companies like Google, Facebook, and Amazon. Letter grading.

**136. Introduction to Computer Security. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced prerequisite: course 118. Introduction to basic concepts of information security necessary for students to understand risks and mitigations associated with protection of systems and data. Topics include security models and architectures, security threats and risk analysis, access control and authentication/authorization, cryptography, network security, secure application design, and ethics and law. Letter grading.

**C137A. Prototyping Programming Languages. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced prerequisite: course 131. How different programming language paradigms provide dramatically different ways of thinking about computation and offer trade-offs on many dimensions, such as modularity, extensibility, expressiveness, and safety. Concrete exploration of three major programming paradigms—functional, object-oriented, and logic programming—by prototyping implementations of languages in each. Analysis of prototypes to shed light on design and structural properties of each language and paradigm and to allow easy comparison against one another. Hands-on experience implementing new abstractions, both as stand-alone languages and as libraries in existing languages. Concurrently scheduled with course C237A. Letter grading.

**C137B. Programming Language Design. (4)** Seminar, four hours; outside study, eight hours. Enforced prerequisite: course C137A. Study of various programming language designs, from computing history and research literature, that attempt to address problems of software systems that are bloated, buggy, and difficult to maintain and extend despite trend in computing toward ever higher levels of abstraction for programming. Hands-on experience designing, prototyping, and evaluating new languages, language abstractions, and/or programming environments. Concurrently scheduled with course C237B. Letter grading.

**143. Data Management Systems. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Enforced prerequisite: course 32 or Program in Computing 10C. Information systems and database systems in enterprises. File organization and secondary storage structures. Relational model and relational database systems. Network, hierarchical, and other models. Query languages. Database design principles. Transactions, concurrency, and recovery. Integrity and authorization. Letter grading.

**144. Web Applications. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced prerequisite: course 143. Important concepts and theory for building effective and safe Web applications and first-hand experience with basic tools. Topics include basic Web architecture and protocol, XML and XML query language, mapping between XML and relational models, information retrieval model and theory, security and user model, Web services and distributed transactions. Letter grading.

**145. Introduction to Data Mining. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced prerequisite: course 143. Introductory survey of data mining (process of automatic discovery of patterns, changes, associations, and anomalies in massive databases), knowledge engineering, and wide spectrum of data mining application areas such as

bioinformatics, e-commerce, environmental studies, financial markets, multimedia data processing, network monitoring, and social service analysis. Letter grading.

**M146. Introduction to Machine Learning. (4)** (Same as Electrical and Computer Engineering M146.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32 or Program in Computing 10C; Civil and Environmental Engineering 110 or Electrical and Computer Engineering 131A or Mathematics 170A or 170E or Statistics 100A; Mathematics 33A. Introduction to breadth of data science. Foundations for modeling data sources, principles of operation of common tools for data analysis, and application of tools and models to data gathering and analysis. Topics include statistical foundations, regression, classification, kernel methods, clustering, expectation maximization, principal component analysis, decision theory, reinforcement learning and deep learning. Letter grading.

**M148. Introduction to Data Science. (4)** (Same as Electrical and Computer Engineering M148.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 31 or Program in Computing 10A, and 10B, and one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, Mathematics 170E, or Statistics 100A. How to analyze data arising in real world so as to understand corresponding phenomenon. Covers topics in machine learning, data analytics, and statistical modeling classically employed for prediction. Comprehensive, hands-on overview of data science domain by blending theoretical and practical instruction. Data science lifecycle: data selection and cleaning, feature engineering, model selection, and prediction methodologies. Letter grading.

**M151B. Computer Systems Architecture. (4)** (Same as Electrical and Computer Engineering M116C.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses 33, and M51A or Electrical and Computer Engineering M16. Recommended: courses 111, and M152A or Electrical and Computer Engineering M116L. Computer system organization and design, implementation of CPU datapath and control, instruction set design, memory hierarchy (caches, main memory, virtual memory) organization and management, input/output subsystems (bus structures, interrupts, DMA), performance evaluation, pipelined processors. Letter grading.

**M152A. Introductory Digital Design Laboratory. (2)** (Same as Electrical and Computer Engineering M116L.) Laboratory, four hours; outside study, two hours. Enforced requisite: course M51A or Electrical and Computer Engineering M16. Hands-on design, implementation, and debugging of digital logic circuits, use of computer-aided design tools for schematic capture and simulation, implementation of complex circuits using programmed array logic, design projects. Letter grading.

**152B. Digital Design Project Laboratory. (4)** Laboratory, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course M151B or Electrical Engineering M116C. Recommended: Engineering 183EW or 185EW. Limited to seniors. Design and implementation of complex digital subsystems using field-programmable gate arrays (e.g., processors, special-purpose processors, device controllers, and input/output interfaces). Students work in teams to develop and implement designs and to document and give oral presentations of their work. Letter grading.

**161. Fundamentals of Artificial Intelligence. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Enforced requisite: course 180. Introduction to fundamental problem solving and knowledge representation paradigms of artificial intelligence. Introduction to Lisp with regular programming assignments. State-space and problem reduction methods, brute-force and heuristic search, planning techniques, two-player games. Knowledge structures including predicate logic, production systems, semantic nets and primitives, frames, scripts. Special topics in natural language processing, expert systems, vision, and parallel architectures. Letter grading.

**162. Natural Language Processing. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 145 or M146. Recommended requisite: course 35L. Introduction to wide range of natural language processing, tasks, algorithms for effectively solving these problems, and methods of evaluating their performance. Focus on statistical and neural-network learning algorithms that train on text corpora to automatically acquire knowledge needed to perform task. Discussion of general issues and present abstract algorithms. Assignments on theoretical foundations of linguistic phenomena and implementation of algorithms. Implemented versions of some of algorithms are provided in order to give feel for how discussed systems really work, and allow for extensions and experimentation as part of course projects. Letter grading.

**168. Computational Methods for Medical Imaging. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32 or Program in Computing 10C with grade of C- or better, Mathematics 33A, one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, or Statistics 100A. Theory and practice of image acquisition including angiography, computed tomography (CT), and magnetic resonance (MR). Project-based course covers applied topics in medical imaging including image processing, atlas, predictive modeling, personalized medicine, data driven and machine learning methods. Letter grading.

**170A. Mathematical Modeling and Methods for Computer Science. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Enforced requisites: course 180, Mathematics 33B. Introduction to methods for modeling and simulation using interactive computing environments. Extensive coverage of methods for numeric and symbolic computation, matrix algebra, statistics, floating point, optimization, and spectral analysis. Emphasis on applications in simulation of physical systems. Letter grading.

**M171L. Data Communication Systems Laboratory. (2 to 4)** (Same as Electrical and Computer Engineering M171L.) Laboratory, four to eight hours; outside study, two to four hours. Recommended preparation: course M152A. Limited to seniors. Not open to students with credit for course M117. Interpretation of analog-signaling aspects of digital systems and data communications through experience in using contemporary test instruments to generate and display signals in relevant laboratory setups. Use of oscilloscopes, pulse and function generators, baseband spectrum analyzers, desktop computers, terminals, modems, PCs, and workstations in experiments on pulse transmission impairments, waveforms and their spectra, modem and terminal characteristics, and interfaces. Letter grading.

**172. Real-Time Three-Dimensional Animation. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 32. Introduction to handling of geometry, appearance, and motion specifically for real-time virtual environments, both on theoretical and practical levels. Completion of one quality real-time three-dimensional animation by following through from preproduction to postproduction. End products expected to be game demonstrations, storytelling games, or machinima (use of real-time graphics engines to create cinematic productions). Focus on achieving highest quality productions to qualify and submit products to Student Academy Awards competition. Use of Unity Game Engine to make technical decisions to adapt stories to games. Introduction to interaction concepts, enabling students to create low-fidelity real-time three-dimensional animation and to concepts in artificial intelligence, enabling them to refine their interactions to create high-fidelity real-time three-dimensional animation. Letter grading.

**174A. Introduction to Computer Graphics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 32. Basic principles behind modern two- and three-dimensional computer graphics systems, including complete set of steps that modern graphics pipelines use to create realistic images in real time. How to position and manip-

ulate objects in scene using geometric and camera transformations. How to create final image using perspective and orthographic transformations. Basics of modeling primitives such as polygonal models and implicit and parametric surfaces. Basic ideas behind color spaces, illumination models, shading, and texture mapping. Letter grading.

**174B. Introduction to Computer Graphics: Three-Dimensional Photography and Rendering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 174A. State of art in three-dimensional photography and image-based rendering. How to use cameras and light to capture shape and appearance of real objects and scenes. Process provides simple way to acquire three-dimensional models of unparallelled detail and realism. Applications of techniques from entertainment (reverse engineering and postprocessing of movies, generation of realistic synthetic objects and characters) to medicine (modeling of biological structures from imaging data), mixed reality (augmentation of video), and security (visual surveillance). Fundamental analytical tools for modeling and inferring geometric (shape) and photometric (reflectance, illumination) properties of objects and scenes, and for rendering and manipulating novel views. Letter grading.

**C174C. Computer Animation. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 174A. Designed for juniors/seniors. Introduction to computer animation, including basic principles of character modeling, forward and inverse kinematics, forward and inverse dynamics, motion capture animation techniques, physics-based animation of particles and systems, and motor control. Concurrently scheduled with course C274C. Letter grading.

**180. Introduction to Algorithms and Complexity. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 32, Mathematics 61. Designed for junior/senior Computer Science majors. Introduction to design and analysis of algorithms. Design techniques: divide-and-conquer, greedy method, dynamic programming; selection of prototypical algorithms; choice of data structures and representations; complexity measures: time, space, upper, lower bounds, asymptotic complexity; NP-completeness. Letter grading.

**181. Theory of Computing. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 180. Designed for junior/senior Computer Science majors. Finite state machines, context-free languages, and pushdown automata. Closure properties and pumping lemmas. Turing machines, undecidability. Introduction to computability. Letter grading.

**M182. Dynamic Biosystem Modeling and Simulation Methodology. (4)** (Same as Bioengineering M182.) Lecture, four hours; discussion, one hour; laboratory, two hours; outside study, five hours. Requisites: Life Sciences 30A and 30B, or Mathematics 3A and 3B, or 31A and 31B. Recommended requisite or corequisite: Mathematics 3C, 32A, or 32T. For undergraduate students in life, computational, engineering, and mathematical sciences. Active learning approach. Introduction to explicit modeling and simulation of dynamic biological systems. Basic methodology for transforming biology, biochemistry, and physiology into system diagrams, graphs, and mathematical expressions for studying their behavior. Structural models, formulated from basic conservation and mass action laws and feedback concepts, are further transformed into first-order differential equations, and implemented in simulation diagrams for quantifying and exploring biosystem properties. Examples show how to use these explicit models to gain clarity on nature of biosystem phenomena, and frame questions and explore new ideas for research. Letter grading.

**183. Introduction to Cryptography. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Preparation: knowledge of basic probability theory. Enforced requisite: course 180. Introduction to cryptography, computer security, and basic concepts and techniques. Topics include notions of hardness, one-way functions, hard-core bits, pseudorandom generators, pseudorandom functions and pseudorandom

permutations, semantic security, public-key and private-key encryption, key-agreement, homomorphic encryption, private information retrieval and voting protocols, message authentication, digital signatures, interactive proofs, zero-knowledge proofs, collision-resistant hash functions, commitment protocols, and two-party secure computation with static security. Letter grading.

**M184. Introduction to Computational and Systems Biology. (2)** (Same as Bioengineering M184 and Computational and Systems Biology M184.) Lecture, two hours; outside study, four hours. Enforced requisites: one course from 31, Civil Engineering M20, Mechanical and Aerospace Engineering M20, or Program in Computing 10A; and Life Sciences 30B or Mathematics 3B or 31B. Survey course designed to introduce students to computational and systems modeling and computation in biology and medicine, providing motivation, flavor, culture, and cutting-edge contributions in computational biosciences and aiming for more informed basis for focused studies by students with computational and systems biology interests. Presentations by individual UCLA researchers discussing their active computational and systems biology research. P/NP grading.

**CM186. Computational Systems Biology: Modeling and Simulation of Biological Systems. (5)** (Same as Bioengineering CM186, Computational and Systems Biology M186, and Ecology and Evolutionary Biology M178.) Lecture, four hours; laboratory, two hours; discussion, one hour. Requisites: Life Sciences 30A, 30B, Mathematics 32A or M32T, 33A, and 33B; or Mathematics 31A, 31B, 32A or M32T, 33A, and 33B. Dynamic biosystem modeling and computer simulation methods for studying biological/biomedical processes and systems at multiple levels of organization. Intermediate linear and nonlinear control system, multi-compartmental, epidemiological, pharmacokinetic, and other biomodeling methods applied to life sciences problems at molecular, cellular, organ, and population levels. Both theory- and data-driven modeling, with focus on translating biomodeling goals and data into dynamical mathematical models, and implementing them for simulation, quantification, and analysis. Numerical simulation, optimization, and parameter identifiability and search algorithms, with model discrimination and analysis and software exercises in PC laboratory assignments. Concurrently scheduled with course CM286. Letter grading.

**CM187. Research Communication in Computational and Systems Biology. (4)** (Same as Bioengineering CM187 and Computational and Systems Biology M187.) Lecture, four hours; outside study, eight hours. Requisites: course M182 or CM186 or Computational and Systems Biology M150; and research experience (course 199, Bioengineering 199, Computational and Systems Biology 199, or equivalent). Closely directed, interactive, and real research experience in active quantitative systems biology research laboratory. Direction on how to focus on topics of current interest in scientific community, appropriate to student interests and capabilities. Critiques of oral presentations and written progress reports explain how to proceed with search for research results. Major emphasis on effective research reporting, both oral and written. Concurrently scheduled with course CM287. Letter grading.

**188. Special Courses in Computer Science. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Special topics in computer science for undergraduate students taught on experimental or temporary basis, such as those taught by resident and visiting faculty members. May be repeated for credit with topic or instructor change. Letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced requisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual

study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**192. Methods and Application of Collaborative Learning Theory in Life Sciences. (2)** Seminar, two hours; clinic, four hours. Requisites: course 192A or Life Sciences 192A (may be taken concurrently), and at least one term of prior experience in same course in which collaborative learning theory is practiced and refined under supervision of instructors. With instructor guidance, students apply pedagogical principles based on current education research, assist with development of innovative instructional materials, and receive frequent feedback on their progress. May be repeated four times for credit. Letter grading.

**M192A. Introduction to Collaborative Learning Theory and Practice. (1)** (Formerly numbered 192A.) (Same as Atmospheric and Oceanic Sciences M192A, Chemistry M192E, Life Sciences M192A, Mathematics M192A, and Physics M192S.) Seminar, one hour. Training seminar for undergraduate students who are selected for learning assistant (LA) program. Exploration of current topics in pedagogy and education research focused on methods of learning and their practical application in small-group settings. Students practice communication skills with frequent assessment of and feedback on progress. Letter grading.

**194. Research Group Seminars: Computer Science. (4)** Seminar, four hours; outside study, eight hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field or of research of faculty members or students. May be repeated for credit. Letter grading.

**199. Directed Research in Computer Science. (2 to 8)** Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit with school approval. Individual contract required; enrollment petitions available in Office of Academic and Student Affairs. Letter grading.

## Graduate Courses

**201. Computer Science Seminar. (2)** Seminar, four hours; outside study, two hours. Designed for graduate computer science students. Seminars on current research topics in computer science. May be repeated for credit. S/U grading.

**202. Advanced Computer Science Seminar. (4)** Seminar, four hours; outside study, eight hours. Preparation: completion of major field examination in computer science. Current computer science research into theory of, analysis and synthesis of, and applications of information processing systems. Each member completes one tutorial and one or more original pieces of work in one specialized area. May be repeated for credit. Letter grading.

**205. Health Analytics. (4)** Lecture, four hours; outside study, eight hours. Enforced requisites: courses 31, 180. Recommended: statistics and probability, numerical methods, knowledge in programming languages. Applied data analytics course, with focus on healthcare applications. How to properly generate and analyze health data. Project-based course to learn about best practices in health data collection and validation. Exploration of various machine learning and data analytic tools to learn underlying structure of datasets to solve healthcare problems. Different machine learning concepts and algorithms, statistical models, and building of data-driven models. Big data analytics and tools for handling structured, unstructured, and semi-structured datasets. Letter grading.

**211. Network Protocol and Systems Software Design for Wireless and Mobile Internet. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 118. Designed for graduate students. In-depth study of network protocol and systems software design in area of wireless and mobile Internet. Topics include (1) networking fundamentals: design philosophy of TCP/IP, end-to-end arguments, and protocol design principles, (2) networking protocols: 802.11 MAC standard, packet scheduling, mobile IP, ad hoc routing, and wireless TCP, (3) mobile computing systems software: middleware, file system, services, and applications, and (4) topical studies: energy-efficient design, security, location management, and quality of service. Letter grading.

**212A. Queueing Systems Theory. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 112, Electrical Engineering 131A. Resource sharing issues and theory of queueing (waiting-line) systems. Review of Markov chains and baby queueing theory. Method of stages. M/E./1. E./M/1. Bulk arrival and bulk service systems. Series-parallel stages. Fundamentals of open and closed queueing networks. Intermediate queueing theory: M/G/1, G/M/m. Collective marks. Advanced queueing theory: G/G/1, Lindley integral equation, spectral solution. Inequalities, bounds, approximations. Letter grading.

**M213A. Embedded Systems. (4)** (Same as Electrical and Computer Engineering M202A.) Lecture, four hours; discussion, one hour; outside study, seven hours. Designed for graduate computer science and electrical engineering students. Methodologies and technologies for design of embedded systems. Topics include hardware and software platforms for embedded systems, techniques for modeling and specification of system behavior, software organization, real-time operating system scheduling, real-time communication and packet scheduling, low-power battery and energy-aware system design, timing synchronization, fault tolerance and debugging, and techniques for hardware and software architecture optimization. Theoretical foundations as well as practical design methods. Letter grading.

**M213B. Energy-Aware Computing and Cyber-Physical Systems. (4)** (Same as Electrical and Computer Engineering M202B.) Lecture, four hours; outside study, eight hours. Requisite: course M51A or Electrical and Computer Engineering M16. Recommended: courses 111, and M151B or Electrical and Computer Engineering M116C. System-level management and cross-layer methods for power and energy consumption in computing and communication at various scales ranging across embedded, mobile, personal, enterprise, and data-center scale. Computing, networking, sensing, and control technologies and algorithms for improving energy sustainability in human-cyber-physical systems. Topics include modeling of energy consumption, energy sources, and energy storage; dynamic power management; power-performance scaling and energy proportionality; duty-cycling; power-aware scheduling; low-power protocols; battery modeling and management; thermal management; sensing of power consumption. Letter grading.

**214. Big Data Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 111. Modern computing has entered era of big data. Introduction to concepts and state-of-art in modern big data systems. Study of distributed storage and database systems, which provide foundation for other systems. Discussion of systems built for specific kinds of workloads, such as processing of streaming data, relational data, batched data, graph data, as well as machine learning. Letter grading.

**215. Internet of Things: Connectivity and Sensing. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisite: course 118 or equivalent. Focus on emerging and state-of-art Internet of Things (IoT) technologies and their applications. Covers diverse set of IoT and wireless networking technologies such as millimeter wave (mmWave), acoustic, radio-frequency identification (RFID), Wi-Fi, long range (LoRa), Bluetooth, global positioning system (GPS) for variety of emerging communication and sensing applications such as 5G, dig-

ital medicine, digital farming, smart cities, and smart homes. Students learn how to design and build IoT system. Letter grading.

**216. Network Algorithms.** (4) Lecture, four hours; outside study, eight hours. Recommended preparation: one course on networks. Requisite: course 211. Introduction to algorithms for routers and servers. Models of network devices and hardware design. Principles for efficient implementation. Lookup algorithms (exact match, prefix lookups, advanced cardiac life support), fair queuing implementations, crossbar and scalable switches, with examples from well-known networking devices. Advanced topics include traffic measurement and network security. Letter grading.

**217A. Internet Architecture and Protocols.** (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course 118. Focus on mastering existing core set of Internet protocols, including IP, core transport protocols, routing protocols, DNS, NTP, and security protocols such as DNSSEC, to understand principles behind design of these protocols, appreciate their design tradeoffs, and learn lessons from their operations. Letter grading.

**217B. Advanced Topics in Internet Research.** (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course 217A. Designed for graduate students. Overview of Internet development history and fundamental principles underlying TCP/IP protocol design. Discussion of current Internet research topics, including latest research results in routing protocols, transport protocols, network measurements, network security protocols, and clean-slate approach to network architecture design. Fundamental issues in network protocol design and implementations. Letter grading.

**218. Advanced Computer Networks.** (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 112, 118. Review of seven-layer ISO-OSI model. High-speed networks: LANs, MANs, ATM. Flow and congestion control; bandwidth allocation. Internetworking. Letter grading.

**219. Current Topics in Computer System Modeling Analysis.** (4) Lecture, eight hours; outside study, four hours. Review of current literature in area of computer system modeling analysis in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. Letter grading.

**CM221. Introduction to Bioinformatics.** (4) (Same as Bioinformatics M221, Chemistry CM260A, and Human Genetics M260A.) Lecture, four hours; discussion, two hours. Requisites: course 32 or Program in Computing 10C with grade of C– or better, and one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, Mathematics 170E, or Statistics 100A. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventing new computational and statistical techniques to analyze biological data. Focus on sequence analysis and alignment algorithms. Concurrently scheduled with course CM121. S/U or letter grading.

**C222. Algorithms in Computational Genomics.** (4) (Formerly numbered CM222.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32 or Program in Computing 10C with grade of C– or better, and one course from Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, Mathematics 170E, or Statistics 100A. Course C221 is not requisite to C222. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Databases of genomic sequence data are among the largest datasets in all of science. Assembling, indexing, and querying such tremendous datasets is computationally challenging yet critical for many areas of biomedical research. Focus on development of scalable algorithms for analysis of genomic sequence data, with additional focus on formulating biologically relevant problems as

computational problems and then solving these problems by developing new algorithms. Concurrently scheduled with course C122. Letter grading.

**CM224. Machine Learning Applications in Genetics.** (4) (Same as Bioinformatics M224 and Human Genetics CM224.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32 or Program in Computing 10C with grade of C– or better, Mathematics 33A, and one course from Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, Mathematics 170E, or Statistics 100A. Designed for engineering students as well as students from biological sciences and medical school. Introduction to computational analysis of genetic variation and computational interdisciplinary research in genetics. Topics include introduction to genetics, identification of genes involved in disease, inferring human population history, technologies for obtaining genetic information, and genetic sequencing. Focus on formulating interdisciplinary problems as computational problems and then solving those problems using computational techniques from statistics and computer science. Concurrently scheduled with course CM124. Letter grading.

**M225. Computational Methods in Genomics.** (4) (Same as Bioinformatics M225 and Human Genetics M265.) Lecture, two and one half hours; discussion, two and one half hours; outside study, seven hours. Introduction to computational approaches in bioinformatics, genomics, and computational genetics and preparation for computational interdisciplinary research in genetics and genomics. Topics include genome analysis, regulatory genomics, association analysis, association study design, isolated and admixed populations, population substructure, human structural variation, model organisms, and genomic technologies. Computational techniques and methods include those from statistics and computer science. Letter grading.

**M226. Machine Learning in Bioinformatics.** (4) (Same as Bioinformatics M226, Biomathematics M226, and Human Genetics M226.) Lecture, four hours; outside study, eight hours. Enforced requisite: course 32 or Program in Computing 10C with grade of C– or better. Recommended: one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, or Statistics 100A. Familiarity with probability, statistics, linear algebra, and algorithms expected. Designed for engineering students as well as students from biological sciences and medical school. Biology has become data-intensive science. Bottleneck in being able to make sense of biological processes has shifted from data generation to statistical models and inference algorithms that can analyze these datasets. Statistical machine learning provides important toolkit in this endeavor. Biological datasets offer new challenges to field of machine learning. Examination of statistical and computational aspects of machine learning techniques and their application to key biological questions. Letter grading.

**M229S. Seminar: Current Topics in Bioinformatics.** (4) (Same as Biological Chemistry M229S and Human Genetics M229S.) Seminar, four hours; outside study, eight hours. Designed for graduate engineering students as well as students from biological sciences and medical school. Introduction to current topics in bioinformatics, genomics, and computational genetics and preparation for computational interdisciplinary research in genetics and genomics. Topics include genome analysis, regulatory genomics, association analysis, association study design, isolated and admixed populations, population substructure, human structural variation, model organisms, and genomic technologies. Computational techniques include those from statistics and computer science. May be repeated for credit with topic change. Letter grading.

**230. Software Engineering.** (4) Lecture, four hours; discussion, two hours. Recommended preparation for undergraduate students: prior software engineering course. Required preparation for graduate students: undergraduate-level knowledge of data structures and object-oriented program languages. As software systems become increasingly large and complex, automated software engineering analysis and develop-

ment tools play important role in various software engineering tasks, such as design, construction, evolution, and testing and debugging of software systems. Introduction to foundations, techniques, tools, and applications of automated software engineering technology. Development, extension, and evaluation of mini automated software engineering analysis tool and assessment of how tool fits into software development process. Introduction to current research topics in automated software engineering. S/U or letter grading.

**231. Types and Programming Languages.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 131. Introduction to static type systems and their usage in programming language design and software reliability. Operational semantics, simply-typed lambda calculus, type soundness proofs, types for mutable references, types for exceptions. Parametric polymorphism, let-bound polymorphism, polymorphic type inference. Types for objects, subtyping, combining parametric polymorphism and subtyping. Types for modules, parameterized modules. Formal specification and implementation of variety of type systems, as well as readings from recent research literature on modern applications of type systems. Letter grading.

**232. Static Program Analysis.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 132. Introduction to static analysis of object-oriented programs and its usage for optimization and bug finding. Class hierarchy analysis, rapid type analysis, equality-based analysis, subset-based analysis, flow-insensitive and flow-sensitive analysis, context-insensitive and context-sensitive analysis. Soundness proofs for static analyses. Efficient data structures for static analysis information such as directed graphs and binary decision diagrams. Flow-directed method inlining, type-safe method inlining, synchronization optimization, deadlock detection, security vulnerability detection. Formal specification and implementation of variety of static analyses, as well as readings from recent research literature on modern applications of static analysis. Letter grading.

**233A. Parallel Programming.** (4) Lecture, four hours; outside study, eight hours. Requisites: courses 111, 131. Mutual exclusion and resource allocation in distributed systems; primitives for parallel computation: specification of parallelism, interprocess communication and synchronization, atomic actions, binary and multiway rendezvous; synchronous and asynchronous languages: CSP, Ada, Linda, Maisie, UC, and others; introduction to parallel program verification. Letter grading.

**233B. Verification of Concurrent Programs.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 233A. Formal techniques for verification of concurrent programs. Topics include safety, liveness, program and state assertion-based techniques, weakest precondition semantics, Hoare logic, temporal logic, UNITY, and axiomatic semantics for selected parallel languages. Letter grading.

**234. Computer-Aided Verification.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 181. Introduction to theory and practice of formal methods for design and analysis of concurrent and embedded systems, with focus on algorithmic techniques for checking logical properties of hardware and software systems. Topics include semantics of reactive systems, invariant verification, temporal logic model checking, theory of omega automata, state-space reduction techniques, compositional and hierarchical reasoning. Letter grading.

**235. Advanced Operating Systems.** (4) Lecture, four hours. Preparation: C or C++ programming experience. Requisite: course 111. In-depth investigation of operating systems issues through guided construction of research operating system for PC machines and consideration of recent literature. Memory management and protection, interrupts and traps, processes, interprocess communication, preemptive multitasking, file systems. Virtualization, networking, profiling, research operating systems. Series of laboratory projects, including extra challenge work. Letter grading.

**236. Computer Security. (4)** Lecture, four hours; outside study, eight hours. Prerequisites: courses 111, 118. Basic and research material on computer security. Topics include basic principles and goals of computer security, common security tools, use of cryptographic protocols for security, security tools (firewalls, virtual private networks, honeypots), virus and worm protection, security assurance and testing, design of secure programs, privacy, applying security principles to real-world problems, and new and emerging threats and security tools. Letter grading.

**C237A. Prototyping Programming Languages. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced prerequisite: course 131. How different programming language paradigms provide dramatically different ways of thinking about computation and offer trade-offs on many dimensions, such as modularity, extensibility, expressiveness, and safety. Concrete exploration of three major programming paradigms—functional, object-oriented, and logic programming—by prototyping implementations of languages in each. Analysis of prototypes to shed light on design and structural properties of each language and paradigm and to allow easy comparison against one another. Hands-on experience implementing new abstractions, both as stand-alone languages and as libraries in existing languages. Concurrently scheduled with course C137A. Letter grading.

**C237B. Programming Language Design. (4)** Seminar, four hours; outside study, eight hours. Enforced prerequisite: course C237A. Study of various programming language designs, from computing history and research literature, that attempt to address problems of software systems that are bloated, buggy, and difficult to maintain and extend despite trend in computing toward ever higher levels of abstraction for programming. Hands-on experience designing, prototyping, and evaluating new languages, language abstractions, and/or programming environments. Concurrently scheduled with course C137B. Letter grading.

**M238. Quantum Programming. (4)** (Formerly numbered 238.) (Same as Quantum Science and Technology M205.) Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: Mathematics 115A. History of quantum computing; notion of qubit; four postulates that provide interface to quantum mechanics; concepts of quantum circuit and universal gate set; quantum teleportation; superdense coding; no-cloning theorem; suite of fundamental quantum algorithms including Shor's algorithm, Grover's algorithm, and quantum approximate optimization algorithm; several quantum programming languages and how they compare; quantum simulators; quantum compilers; quantum error correction; quantum advantage. Students implement several quantum algorithms in multiple languages and run them on both simulators and quantum computer. Letter grading.

**239. Current Topics in Computer Science: Programming Languages and Systems. (4)** Lecture, four hours; outside study, eight hours. Review of current literature in area of computer science programming languages and systems in which instructor has developed special proficiency as consequence of research interests. May be repeated for credit with topic change. Letter grading.

**240A. Databases and Knowledge Bases. (4)** Lecture, four hours; outside study, eight hours. Prerequisite: course 143. Theoretical and technological foundation of Intelligent Database Systems, that merge database technology, knowledge-based systems, and advanced programming environments. Rule-based knowledge representation, spatio-temporal reasoning, and logic-based declarative querying/programming are salient features of this technology. Other topics include object-relational systems and data mining techniques. Letter grading.

**240B. Advanced Data and Knowledge Bases. (4)** Lecture, four hours; outside study, eight hours. Prerequisites: courses 143, 240A. Logical models for data and knowledge representations. Rule-based languages and nonmonotonic reasoning. Temporal queries, spatial queries, and uncertainty in deductive databases and object relational databases (ORDBs). Abstract

data types and user-defined column functions in ORDBs. Data mining algorithms. Semistructured information. Letter grading.

**241B. Pictorial and Multimedia Database Management. (4)** Lecture, three and one half hours; discussion, 30 minutes; laboratory, one hour; outside study, seven hours. Prerequisite: course 143. Multimedia data: alphanumeric, long text, images/pictures, video, and voice. Multimedia information systems requirements. Data models. Searching and accessing databases and across Internet by alphanumeric, image, video, and audio content. Querying, visual languages, and communication. Database design and organization, logical and physical. Indexing methods. Internet multimedia streaming. Other topics at discretion of instructor. Letter grading.

**244A. Distributed Database Systems. (4)** Lecture, four hours; outside study, eight hours. File allocation, intelligent directory design, transaction management, deadlock, strong and weak concurrency control, commit protocols, semantic query answering, multi-database systems, fault recovery techniques, network partitioning, examples, trade-offs, and design experiences. Letter grading.

**245. Big Data Analytics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: course 143 or 180 or equivalent. With unprecedented rate at which data is being collected today in almost all fields of human endeavor, there is emerging economic and scientific need to extract useful information from it. Data analytics is process of automatic discovery of patterns, changes, associations, and anomalies in massive databases, and is highly interdisciplinary field representing confluence of several disciplines, including database systems, data warehousing, data mining, machine learning, statistics, algorithms, data visualization, and cloud computing. Survey of main topics in big data analytics and latest advances, as well as wide spectrum of applications such as bioinformatics, E-commerce, environmental study, financial market study, multimedia data processing, network monitoring, social media analysis. Letter grading.

**246. Web Information Management. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisites: courses 112, 143, 180, 181. Designed for graduate students. Scale of Web data requires novel algorithms and principles for their management and retrieval. Study of Web characteristics and new management techniques needed to build computer systems suitable for Web environment. Topics include Web measuring techniques, large-scale data mining algorithms, efficient page refresh techniques, Web-search ranking algorithms, and query processing techniques on independent data sources. Letter grading.

**247. Advanced Data Mining. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: course 145 or M146 or equivalent. Introduction of concepts, algorithms, and techniques of data mining on different types of datasets, covering basic data mining algorithms, advanced topics on text mining, recommender systems, and graph/network mining. Team-based project involving hands-on practice of mining useful knowledge from large data sets is required. Letter grading.

**249. Current Topics in Data Structures. (4)** Lecture, four hours; outside study, eight hours. Review of current literature in area of data structures in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. Letter grading.

**251A. Advanced Computer Architecture. (4)** Lecture, four hours; outside study, eight hours. Prerequisite: course M151B. Recommended: course 111. Design and implementation of high-performance systems, advanced memory hierarchy techniques, static and dynamic pipelining, superscalar and VLIW processors, branch prediction, speculative execution, software support for instruction-level parallelism, simulation-based performance analysis and evaluation, state-of-art design examples, introduction to parallel architectures. Letter grading.

**251B. Parallel Computer Architectures. (4)** Lecture, four hours; outside study, eight hours. Prerequisite: course M151B. Recommended: course 251A. SIMD and MIMD systems, symmetric multiprocessors, distributed-shared-memory systems, messages-passing systems, multicore chips, clusters, interconnection networks, host-network interfaces, switching element design, communication primitives, cache coherency, memory consistency models, synchronization primitives, state-of-art design examples. Letter grading.

**252A. Arithmetic Algorithms and Processors. (4)** Lecture, four hours; outside study, eight hours. Prerequisite: course 251A. Number systems: conventional, redundant, signed-digit, and residue. Types of algorithms and implementations. Complexity measures. Fast algorithms and implementations for two-operand addition, multioperand addition, multiplication, division, and square root. Online arithmetic. Evaluation of transcendental functions. Floating-point arithmetic and numerical error control. Arithmetic error codes. Residue arithmetic. Examples of contemporary arithmetic ICs and processors. Letter grading.

**256A. Advanced Scalable Architectures. (4)** Lecture, four hours; outside study, eight hours. Prerequisite: course M151B. Recommended: course 251A. State-of-art scalable multiprocessors. Interdependence among implementation technology, chip microarchitecture, and system architecture. High-performance building blocks, such as chip multiprocessors (CMPs). On-chip and off-chip communication. Mechanisms for exploiting parallelism at multiple levels. Current research areas. Examples of chips and systems. Letter grading.

**M258A. Design of VLSI Circuits and Systems. (4)** (Same as Electrical and Computer Engineering M216A.) Lecture, four hours; discussion, two hours; laboratory, four hours; outside study, two hours. Prerequisites: course M51A or Electrical and Computer Engineering M16, and Electrical and Computer Engineering 115A. Recommended: Electrical and Computer Engineering 115C. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on chips. Letter grading.

**M258C. LSI in Computer System Design. (4)** (Same as Electrical and Computer Engineering M216C.) Lecture, four hours; laboratory, four hours; outside study, four hours. Prerequisite: course M258A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. Letter grading.

**258F. Physical Design Automation of VLSI Systems. (4)** Lecture, four hours; outside study, eight hours. Detailed study of various physical design automation problems of VLSI circuits, including logic partitioning, floorplanning, placement, global routing, channel and switchbox routing, planar routing and via minimization, compaction and performance-driven layout. Discussion of applications of number of important optimization techniques, such as network flows, Steiner trees, simulated annealing, and generic algorithms. Letter grading.

**258G. Logic Synthesis of Digital Systems. (4)** Lecture, four hours; outside study, eight hours. Prerequisites: courses M51A, 180. Detailed study of various problems in logic-level synthesis of VLSI digital systems, including two-level Boolean network optimization; multilevel Boolean network optimization; technology mapping for standard cell designs and field-programmable gate-array (FPGA) designs; retiming for sequential circuits; and applications of binary decision diagrams (BDDs). Letter grading.

**258H. Analysis and Design of High-Speed VLSI Interconnects. (4)** Lecture, four hours; outside study, eight hours. Prerequisites: courses M258A, 258F. Detailed study of various problems in analysis and design of high-speed VLSI interconnects at both integrated circuit (IC) and packing levels, including interconnect capacitance and resistance, lossless and lossy transmission lines, cross-talk and power distribution noise, delay models and power dissipation models, interconnect topology and geometry optimization, and clocking for high-speed systems. Letter grading.

**259. Current Topics in Computer Science: System Design/Architecture. (4)** Lecture, four hours; outside study, eight hours. Review of current literature in area of computer science system design in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. Letter grading.

**260. Machine Learning Algorithms. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Recommended prerequisite: course 180. Problems of identifying patterns in data. Machine learning allows computers to learn potentially complex patterns from data and to make decisions based on these patterns. Introduction to fundamentals of this discipline to provide both conceptual grounding and practical experience with several learning algorithms. Techniques and examples used in areas such as healthcare, financial systems, commerce, and social networking. Letter grading.

**260B. Algorithmic Machine Learning. (4)** Lecture, four hours; outside study, eight hours. In-depth examination of handful of ubiquitous algorithms in machine learning. Covers several classical tools in machine learning but more emphasis on recent advances and developing efficient and provable algorithms for learning tasks. Topics include low-rank approximations, online learning, multiplicative weights framework, mathematical optimization, outlier-robust algorithms, streaming algorithms. S/U or letter grading.

**260C. Deep Learning. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisites: courses 180, 260. Not open to students with credit for Electrical and Computer Engineering C147 or C247. Study of basics of deep neural networks and their applications, including but not limited to computer vision, natural language processing, and graph mining. Covers topics including foundation of deep learning, how to train neural network (optimization), architecture designs for various tasks, and other advanced topics. By course end, students are expected to be familiar with deep learning and be able to apply deep learning algorithms to variety of tasks. Letter grading.

**260D. Large-Scale Machine Learning. (4)** Lecture, four hours; discussion, two hours; outside study six hours. Prerequisite: course M146. To alleviate costs and improve robustness and generalization performance of modern machine learning models, it becomes crucial to develop methods with strong theoretical guarantees to warrant efficient, accurate, and robust learning. Discussion of advanced topics and state-of-art research to improve efficiency, robustness, and scalability of machine learning algorithms on large data. Topics include advanced optimization, variance reduction, distributed training, federated learning, data summarization, robust learning, neural network pruning, neural architecture search, neural network quantization. Letter grading.

**260R. Reinforcement Learning. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Fundamentals and advanced topics of reinforcement learning (RL), computational learning approach where agent tries to maximize total amount of reward it receives while interacting with complex and uncertain environments. Includes introduction of Markov decision processes, model-free RL and model-based RL methods, policy optimization, RL distributed system design, as well as case studies of RL in game playing such as AlphaGo, traffic simulation, autonomous driving, and other machine autonomy applications. Advanced topics of RL such as multi-agent RL, human-in-loop method, and imitation learning. Letter grading.

**261. Deep Generative Models. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: course M146. Fundamentals of variational autoencoders, generative adversarial networks, autoregressive models, normalizing flow models, energy-based models, diffusion models. Applications of generative models in reinforcement learning, scientific discovery, and societal challenges in high-stakes deployments. S/U or letter grading.

**261A. Problem Solving and Search. (4)** Lecture, four hours; outside study, eight hours. Prerequisite: course 180. In-depth treatment of systematic problem-solving

search algorithms in artificial intelligence, including problem spaces, brute-force search, heuristic search, linear-space algorithms, real-time search, heuristic evaluation functions, two-player games, and constraint-satisfaction problems. Letter grading.

**262A. Learning and Reasoning with Bayesian Networks. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: course 112 or Electrical Engineering 131A. Review of several formalisms for representing and managing uncertainty in reasoning systems; presentation of comprehensive description of Bayesian inference using belief networks representation. Letter grading.

**M262C. Current Topics in Causal Modeling, Inference, and Reasoning. (4)** (Same as Statistics M241.) Lecture, four hours; outside study, eight hours. Prerequisite: one graduate probability or statistics course such as course 262A, Statistics 200B, or 202B. Review of Bayesian networks, causal Bayesian networks, and structural equations. Learning causal structures from data. Identifying causal effects. Covariate selection and instrumental variables in linear and nonparametric models. Simpson paradox and confounding control. Logic and algorithmization of counterfactuals. Probabilities of counterfactuals. Direct and indirect effects. Probabilities of causation. Identifying causes of events. Letter grading.

**262Z. Current Topics in Cognitive Systems. (4)** Lecture, four hours; outside study, eight hours. Prerequisite: course 262A. Additional prerequisites for each offering announced in advance by department. Theory and implementation of systems that emulate or support human reasoning. Current literature and individual studies in artificial intelligence, knowledge-based systems, decision support systems, computational psychology, and heuristic programming theory. May be repeated for credit with topic change. Letter grading.

**263. Natural Language Processing. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Natural language processing (NLP) enables computers to understand and process human languages. NLP techniques have been widely used in many applications, including machine translation, question answering, machine summarization, and information extraction. Study of fundamental elements and recent trends in NLP. Students gain ability to apply NLP techniques in text-orientated applications, understand machine learning and algorithms used in NLP, and propose new approaches to solve NLP problems. Letter grading.

**263A. Language and Thought. (4)** Lecture, four hours; outside study, eight hours. Prerequisite: course 130 or 131 or 161. Introduction to natural language processing (NLP), with emphasis on semantics. Presentation of process models for variety of tasks, including question answering, paraphrasing, machine translation, word-sense disambiguation, narrative and editorial comprehension. Examination of both symbolic and statistical approaches to language processing and acquisition. Letter grading.

**263C. Animats-Based Modeling. (4)** Lecture, four hours; outside study, eight hours. Prerequisite: course 130 or 131 or 161. Animats are mobile/sensing animal-like software agents embedded in simulated dynamic environments. Emphasis on modeling: goal-oriented behavior via neurocontrollers, adaptation via reinforcement learning, evolutionary programming. Animat-based tasks include foraging, mate finding, predation, navigation, predator avoidance, cooperative nest construction, communication, and parenting. Letter grading.

**264A. Automated Reasoning: Theory and Applications. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: course 161. Introduction to theory and practice of automated reasoning using propositional and first-order logic. Topics include syntax and semantics of formal logic; algorithms for logical reasoning, including satisfiability and entailment; syntactic and semantic restrictions on knowledge bases; effect of these restrictions on expressiveness, compactness, and computational tractability; applications of automated reasoning to diagnosis, planning, design, formal verification, and reliability analysis. Letter grading.

**265A. Machine Learning. (4)** Lecture, four hours; outside study, eight hours. Prerequisites: courses 263A, 264A. Introduction to machine learning. Learning by analogy, inductive learning, modeling creativity, learning by experience, role of episodic memory organization in learning. Examination of BACON, AM, Eurisko, HACKER, teachable production systems. Failure-driven learning. Letter grading.

**M266A. Statistical Modeling and Learning in Vision and Cognition. (4)** (Same as Statistics M232A.) Lecture, three hours. Preparation: basic statistics, linear algebra (matrix analysis), computer vision. Computer vision and pattern recognition. Study of four types of statistical models for modeling visual patterns: descriptive, causal Markov, generative (hidden Markov), and discriminative. Comparison of principles and algorithms for these models; presentation of unifying picture. Introduction of minimax entropy and EM-type and stochastic algorithms for learning. S/U or letter grading.

**M266B. Statistical Computing and Inference in Vision and Cognition. (4)** (Same as Statistics M232B.) Lecture, three hours. Preparation: basic statistics, linear algebra (matrix analysis), computer vision. Introduction to broad range of algorithms for statistical inference and learning that could be used in vision, pattern recognition, speech, bioinformatics, data mining. Topics include Markov chain Monte Carlo computing, sequential Monte Carlo methods, belief propagation, partial differential equations. S/U or letter grading.

**267A. Probabilistic Programming and Relational Learning. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Introduction to computational models of probability and statistical models of relational data. Study of relational representations such as probabilistic databases, relational graphical models, and Markov logic networks, as well as various probabilistic programming languages. Covers their syntax and semantics, probabilistic inference problems, parameter, and structure learning algorithms, and theoretical properties of representation and inference. Expressive statistical modeling, how to formalize and reason about complex statistical assumptions and encode knowledge in machine learning models. Survey of key applications in natural language processing, graph mining, computer vision, and computational biology. Letter grading.

**M268. Machine Perception. (4)** (Same as Electrical and Computer Engineering M206.) Lecture, four hours; discussion, two hours; outside study, six hours. Designed for graduate students. Computational aspects of processing visual and other sensory information. Unified treatment of early vision in man and machine. Integration of symbolic and iconic representations in process of image segmentation. Computing multimodal sensory information by neural-net architectures. Letter grading.

**268S. Seminar: Computational Neuroscience. (2)** Seminar, two hours; outside study, four hours. Designed for students undertaking thesis research. Discussion of advanced topics and current research in computational neuroscience. Neural networks and connectionism as paradigm for parallel and concurrent computation in application to problems of perception, vision, multimodal sensory integration, and robotics. May be repeated for credit. S/U grading.

**269. Seminar: Current Topics in Artificial Intelligence. (4)** Seminar, to be arranged. Review of current literature and research practicum in area of artificial intelligence in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. Letter grading.

**C274C. Computer Animation. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced prerequisite: course 174A. Introduction to computer animation, including basic principles of character modeling, forward and inverse kinematics, forward and inverse dynamics, motion capture animation techniques, physics-based animation of particles and systems, and motor control. Concurrently scheduled with course C174C. Letter grading.

**275. Artificial Life for Computer Graphics and Vision. (4)** Lecture, four hours; outside study, eight hours. Enforced requisite: course 174A. Recommended: course 161. Investigation of important role that concepts from artificial life, emerging discipline that spans computational and biological sciences, can play in construction of advanced computer graphics and vision models for virtual reality, animation, interactive games, active vision, visual sensor networks, medical image analysis, etc. Focus on comprehensive models that can realistically emulate variety of living things (plants and animals) from lower animals to humans. Exposure to effective computational modeling of natural phenomena of life and their incorporation into sophisticated, self-animating graphical entities. Specific topics include modeling plants using L-systems, biomechanical simulation and control, behavioral animation, reinforcement and neural-network learning of locomotion, cognitive modeling, artificial animals and humans, human facial animation, and artificial evolution. Letter grading.

**M276A. Pattern Recognition and Machine Learning. (4)** (Same as Statistics M231A.) Lecture, three hours; discussion, one hour. Designed for graduate students. Fundamental concepts, theories, and algorithms for pattern recognition and machine learning that are used in computer vision, image processing, speech recognition, data mining, statistics, and computational biology. Topics include Bayesian decision theory, parametric and nonparametric learning, clustering, complexity (VC-dimension, MDL, AIC), PCA/ICA/TCA, MDS, SVM, boosting. S/U or letter grading.

**280A-280CO-280D-280DA-280DP-280G-280G. Algorithms. (4 each)** Lecture, four hours; outside study, eight hours. Requisite: course 180. Additional requisites for each offering announced in advance by department. Selections from design, analysis, optimization, and implementation of algorithms; computational complexity and general theory of algorithms; algorithms for particular application areas. Subtitles of some current sections: Principles of Design and Analysis (280A); Distributed Algorithms (280D); Graphs and Networks (280G). May be repeated for credit with consent of instructor and topic change. Letter grading.

**280AP. Approximation Algorithms. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 180. Background in discrete mathematics helpful. Theoretically sound techniques for dealing with NP-Hard problems. Inability to solve these problems efficiently means algorithmic techniques are based on approximation—finding solution that is near to best possible in efficient running time. Coverage of approximation techniques for number of different problems, with algorithm design techniques that include primal-dual method, linear program rounding, greedy algorithms, and local search. Letter grading.

**281A. Computability and Complexity. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 181 or compatible background. Concepts fundamental to study of discrete information systems and theory of computing, with emphasis on regular sets of strings, Turing-recognizable (recursively enumerable) sets, closure properties, machine characterizations, nondeterminisms, decidability, unsolvable problems, easy and hard problems, PTIME/NPTIME. Letter grading.

**M282A. Cryptography. (4)** (Same as Mathematics M209A.) Lecture, four hours; outside study, eight hours. Introduction to theory of cryptography, stressing rigorous definitions and proofs of security. Topics include notions of hardness, one-way functions, hard-core bits, pseudorandom generators, pseudorandom functions and pseudorandom permutations, semantic security, public-key and private-key encryption, secret-sharing, message authentication, digital signatures, interactive proofs, zero-knowledge proofs, collision-resistant hash functions, commitment protocols, key-agreement, contract signing, and two-party secure computation with static security. Letter grading.

**M282B. Cryptographic Protocols. (4)** (Same as Mathematics M209B.) Lecture, four hours; outside study, eight hours. Requisite: course M282A. Consideration of advanced cryptographic protocol design and analysis. Topics include noninteractive zero-

knowledge proofs; zero-knowledge arguments; concurrent and non-black-box zero-knowledge; IP=PSPACE proof, stronger notions of security for public-key encryption, including chosen-ciphertext security; secure multiparty computation; dealing with dynamic adversary; nonmalleability and composability of secure protocols; software protection; threshold cryptography; identity-based cryptography; private information retrieval; protection against man-in-middle attacks; voting protocols; identification protocols; digital cash schemes; lower bounds on use of cryptographic primitives, software obfuscation. May be repeated for credit with topic change. Letter grading.

**M283A-M283B. Topics in Applied Number Theory. (4-4)** (Same as Mathematics M208A-M208B.) Lecture, three hours. Basic number theory, including congruences and prime numbers. Cryptography: public-key and discrete log cryptosystems. Attacks on cryptosystems. Primality testing and factorization methods. Elliptic curve methods. Topics from coding theory: Hamming codes, cyclic codes, Gilbert/Varshamov bounds, Shannon theorem. S/U or letter grading.

**284A-284C-284P. Topics in Automata and Languages. (4-4-4)** Lecture, four hours; outside study, eight hours. Requisite: course 181. Additional requisites for each offering announced in advance by department. Selections from families of formal languages, grammars, machines, operators; pushdown automata, context-free languages and their generalizations, parsing; multidimensional grammars, developmental systems; machine-based complexity. Subtitles of some current and planned sections: Context-Free Languages (284A), Parsing Algorithms (284P). May be repeated for credit with consent of instructor and topic change. Letter grading.

**285CC. Communication Complexity. (4)** Lecture, four hours; outside study, eight hours. Limited to graduate students. Mathematical maturity strongly encouraged. Introduction to communication complexity with coverage of fundamentals, key classic theorems, and current research directions. Consider function  $f$  whose arguments are distributed among several parties, making it impossible for any one party to compute  $f$  in isolation. Communication complexity theory studies how many bits of communication are needed to evaluate  $f$ . Pioneered in 1979 by Turing award winner Andrew Yao, communication complexity has become central area of theoretical computer science with deep open questions, beautiful mathematics, and vast array of applications. Letter grading.

**CM286. Computational Systems Biology: Modeling and Simulation of Biological Systems. (5)** (Same as Bioengineering CM286.) Lecture, four hours; laboratory, two hours; discussion, one hour. Requisites: Life Sciences 30A, 30B, Mathematics 32A or M32T, 33A, and 33B; or Mathematics 31A, 31B, 32A or M32T, 33A, and 33B. Dynamic biosystem modeling and computer simulation methods for studying biological/ biomedical processes and systems at multiple levels of organization. Intermediate linear and nonlinear control system, multicompartmental, epidemiological, pharmacokinetic, and other biomodeling methods applied to life sciences problems at molecular, cellular, organ, and population levels. Both theory- and data-driven modeling, with focus on translating biomodeling goals and data into dynamical mathematical models, and implementing them for simulation, quantification, and analysis. Numerical simulation, optimization, and parameter identifiability and search algorithms, with model discrimination and analysis and software exercises in PC laboratory assignments. Concurrently scheduled with course CM186. Letter grading.

**CM287. Research Communication in Computational and Systems Biology. (4)** (Same as Bioengineering CM287.) Lecture, four hours; outside study, eight hours. Requisites: course M182 or CM286 or Computational and Systems Biology M150; and research experience (course 199, Bioengineering 199, Computational and Systems Biology 199, or equivalent). Closely directed, interactive, and real research experience in active quantitative systems biology research laboratory. Direction on how to focus on topics of current interest in scientific community, appropriate to student interests and capabilities. Critiques of oral

presentations and written progress reports explain how to proceed with search for research results. Major emphasis on effective research reporting, both oral and written. Concurrently scheduled with course CM187. Letter grading.

**288S. Seminar: Theoretical Computer Science. (2)** Seminar, two hours; outside study, six hours. Requisites: courses 280A, 281A. Intended for students undertaking thesis research. Discussion of advanced topics and current research in such areas as algorithms and complexity models for parallel and concurrent computation, and formal language and automata theory. May be repeated for credit. S/U grading.

**289A. Current Topics in Computer Theory. (4)** Lecture, four hours; outside study, eight hours. Review of current literature in area of computer theory in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. Letter grading.

**289CO. Current Topics in Computer Theory: Complexity Theory. (4)** Lecture, four hours; outside study, eight hours. Diagonalization, polynomial-time hierarchy, PCP theorem, randomness and de-randomization, circuit complexity, attempts and limitations to proving P does not equal NP, average-case complexity, one-way functions, hardness amplification. Problem sets and presentation of previous and original research related to course topics. Letter grading.

**289L. Current Topics in Computer Theory. (4)** Lecture, four hours; outside study, eight hours. Review of current literature in area of computer theory in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. Letter grading.

**289OA. Current Topics in Computer Theory: Online Algorithms. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 180. Introduction to decision making under uncertainty and competitive analysis. Review of current research in online algorithms for problems arising in many areas, such as data and memory management, searching and navigating in unknown terrains, and server systems. Letter grading.

**289P. Current Topics in Computer Theory. (4)** Lecture, four hours; outside study, eight hours. Review of current literature in area of computer theory in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. Letter grading.

**289RA. Current Topics in Computer Theory: Randomized Algorithms. (4)** Lecture, four hours; outside study, eight hours. Basic concepts and design techniques for randomized algorithms, such as probability theory, Markov chains, random walks, and probabilistic method. Applications to randomized algorithms in data structures, graph theory, computational geometry, number theory, and parallel and distributed systems. Letter grading.

**289SG. Current Topics in Computer Theory. (4)** Lecture, four hours; outside study, eight hours. Review of current literature in area of computer theory in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. Letter grading.

**M296A. Advanced Modeling Methodology for Dynamic Biomedical Systems. (4)** (Same as Bioengineering M296A and Medicine M270C.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 141 or 142 or Mathematics 115A or Mechanical and Aerospace Engineering 171A. Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems. Control system, multicompartmental, noncompartmental, and input/output models, linear and nonlinear. Emphasis on model applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory. Letter grading.

**M296B. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4)** (Same as Bioengineering M296B, Biomathematics M270, and Medicine M270D.) Lecture, four hours; outside study, eight hours. Requisite: course CM286 or M296A or Biomathematics 220. Estimation methodology and model parameter estimation algorithms for fitting dy-

dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on optimal sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment design via applications in physiology and pharmacology. Letter grading.

**M296C. Advanced Topics and Research in Biomedical Systems Modeling and Computing. (4)** (Same as Bioengineering M296C and Medicine M270E.) Lecture, four hours; outside study, eight hours. Requisite: course M296B. Research techniques and experience on special topics involving models, modeling methods, and model/computing in biological and medical sciences. Review and critique of literature. Research problem searching and formulation. Approaches to solutions. Individual MS- and PhD-level project training. Letter grading.

**M296D. Introduction to Computational Cardiology. (4)** (Same as Bioengineering M296D.) Lecture, four hours; outside study, eight hours. Requisite: course CM186. Introduction to mathematical modeling and computer simulation of cardiac electrophysiological process. Ionic models of action potential (AP). Theory of AP propagation in one-dimensional and two-dimensional cardiac tissue. Simulation on sequential and parallel supercomputers, choice of numerical algorithms, to optimize accuracy and to provide computational stability. Letter grading.

**298. Research Seminar: Computer Science. (2 to 4)** Seminar, two to four hours; outside study, four to eight hours. Designed for graduate computer science students. Discussion of advanced topics and current research in algorithmic processes that describe and transform information: theory, analysis, design, efficiency, implementation, and application. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**495. Teaching Assistant Training Seminar. (2)** Seminar, four hours; outside study, two hours. Limited to graduate Computer Science Department students. Seminar on being effective teaching assistant, including preparation, classroom presentation, encouraging interactive discussion, active learning, office hours, review sessions, making up and grading assignments and exam questions, proctoring exams, and grading. S/U grading.

**495B. Teaching with Technology. (2)** Seminar, two hours; outside study, four hours. Limited to graduate Computer Science Department teaching assistants. Seminar for teaching assistants covering how technology can be used to aid instruction in and out of classroom. S/U grading.

**497D-497E. Field Projects in Computer Science. (4-4)** Fieldwork, to be arranged. Students are divided into teams led by instructor; each team is assigned one external company or organization that they investigate as candidate for possible computerization, submitting team report of their findings and recommendations. In Progress (497D) and S/U or letter (497E) grading.

**596. Directed Individual or Tutorial Studies. (1 to 8)** Tutorial, to be arranged. Limited to graduate computer science students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for MS Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate computer science students. Reading and preparation for MS comprehensive examination. S/U grading.

**597B. Preparation for PhD Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate computer science students. Preparation for PhD preliminary examinations. S/U grading.

**597C. Preparation for PhD Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate computer science students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of MS Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate computer science students. Supervised independent research for MS candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of PhD Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate computer science students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. S/U grading.

## CONSERVATION OF CULTURAL HERITAGE

*Interdepartmental Program  
College of Letters and Science*

A210 Fowler Building  
Box 951510  
Los Angeles, CA 90095-1510

**Conservation of Cultural Heritage**

**E-mail contact**

Glenn Wharton, PhD, *Chair*

### Faculty Committee

Kathlyn (Kara) M. Cooney, PhD (*Near Eastern Languages and Cultures*)

Johanna R. Drucker, PhD (*Design|Media Arts, Information Studies*)

Justin P. Dunnivant, PhD (*Anthropology*)

H. Pirouz Kavehpour, PhD (*Bioengineering, Mechanical and Aerospace Engineering*)

Michael Osman, PhD (*Architecture and Urban Design*)

M. Rahim Shayegan, PhD (*Near Eastern Languages and Cultures*)

Lothar von Falkenhausen, PhD (*Art History*)

Glenn Wharton, PhD (*Art History*)

### Overview

The UCLA/Getty Conservation interdepartmental program provides an excellent platform for education and research in the conservation of material culture. It supports discovery and innovation through research that transcends the boundaries of traditional disciplines. It uniquely trains cultural property professionals in the best practices and methods of cultural heritage conservation through various pedagogical approaches including, but not limited to, core teaching and learning, independent research, and laboratory experience in museums and in the field. Finally, it positively impacts the community by engaging with a more informed public that would seek to protect cultural heritage from imminent threats.

### Graduate Study

The program offers two degree options: a practice-focused three-year Master of Arts (MA) degree in Conservation of Cultural Heritage and a research-focused Doctor of Philosophy (PhD)

degree in Conservation of Material Culture. Though the two degrees share a scholarly approach to the discipline and strong commitment to the advancement of the conservation profession, they provide distinctive competencies, preparing students for different careers in the cultural heritage section and beyond.

The aim of the program is to train the next generation of multidisciplinary researchers, heritage practitioners, and cross-cultural leaders in the theoretical and experimental developments and policy of conservation and sustainable preservation of material culture. Through this training, graduates will bring innovative, cutting-edge methods and holistic approaches to the conservation profession. More specifically, these degree programs aim to provide students with integrated, comprehensive curricula to foster the next generation of conservation professionals and leaders with strong research, theoretical, and applied qualitative and quantitative skills; rigorous training in conservation theory, praxis, ethics, policy, and research; substantive research training in a specific domain of application in conservation; and experiential learning and mentoring in communication, scientific writing skills, and the ability to work in multidisciplinary teams.

The objectives of the program are to provide students with a solid educational base and practical training in the conservation of both archaeological and ethnographic materials, as well as an appreciation of the often complex issues related to significance, access, and use of these materials that can be very different from the criteria for conservation of fine art or historical materials. The special focus of the program and its interdisciplinary curriculum serves the archaeological, scientific, native, and cultural minority communities alike and offers a nexus at the boundaries of conservation, archaeology, ethnography, the natural sciences, and engineering.

The partnership between UCLA and the Getty in establishing the program ensures that both a major research university and an institution with a principal mandate for conservation of world cultural heritage are working to create rich and vibrant conservation training opportunities. The program helps students develop working relationships with a wide array of colleagues in the Getty Conservation Institute, the J. Paul Getty Museum, other local museums and cultural organizations, and different departments and programs at UCLA.

## Graduate Majors

### Conservation of Cultural Heritage MA

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Conservation of Material Culture MS, PhD

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Conservation of Cultural Heritage

### Lower-Division Courses

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**C120. Field Methods in Archaeological Conservation: Readiness, Response, and Recovery. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials C120.) Laboratory, four hours. Overview of risks (direct and indirect) and materials vulnerability of in situ cultural heritage and movable archaeological materials in emergency situations (rescue excavations, disasters, conflicts), with emphasis on readiness, first aid response, and recovery. Readiness focuses on preparedness and preventive measures, including reburials, shelters, rescue excavations, and documentation as well as developing inventories and awareness campaigns. First aid response covers development of on-site emergency risk assessments to evaluate damage and putting triage theory into practice, salvage rescue operations, emergency temporary in situ stabilization and protection (using locally available materials), and training. Recovery is based on documentation, lifting methods, handling, transportation, and storage. Emphasis on finding practical solutions to prevent and mitigate damage and to recover and safeguard archaeological artifacts. Concurrently scheduled with course C220. Letter grading.

**C142. Managing Collections for Museums, Libraries, and Archives. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials C142.) Lecture, two hours; activity, two hours. How conservators work together with curators, collections managers, mount makers, designers, and registrars to permit collections to be both accessed and preserved. Concurrently scheduled with course C242. Letter grading.

### Graduate Courses

**210. Cultural Materials Science II: Characterization Methods in Conservation of Materials. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 210.) Lecture, four hours. Preparation: general chemistry, inorganic and organic chemistry, materials science. Principles and methods of materials characterization in conservation: optical and electron microscopy, X-ray and electron spectroscopy, X-ray diffraction, infrared spectroscopy, reflectance spectroscopy and multispectral imaging spectros-

copy, chromatography, design of archaeological and ethnographic materials characterization procedures. Letter grading.

**210L. Cultural Materials Science Laboratory: Technical Study. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 210L.) Laboratory, four hours. Requisites: course M215 (or 216) and one course from 260 through 264. Corequisite: course 210. Research-based laboratory through object-based problem-solving approach in conservation materials science. Experimental techniques, characterization, and analysis of archaeological and ethnographic materials (using materials science principles and reverse engineering processes) to determine technological features, defects, and products of alteration. Hands-on experience with noninvasive imaging and spectroscopic techniques, sampling and sample preparation methods, analysis of microsamples. Letter grading.

**211. Science Fundamentals in Conservation of Materials. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 211.) Lecture, three hours. Introduction to important scientific parameters in conservation of materials that are of great importance for both fundamental science and practical applications. Students gain better understanding of intrinsic properties of materials, mechanisms of deterioration, and conservation treatments. General chemistry, physics, and physical chemistry (atomic structure bonding, etc.), fluid transfer in porous materials, diffusion, interfaces, surface tension, wetting, adsorption, adhesion, dissolution and crystallization, mechanical properties (properties/characterization), phase transformations (glass, metals, polymers). Letter grading.

**M215. Cultural Materials Science I: Analytical Imaging and Documentation in Conservation of Materials. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials M215.) (Same as Materials Science M213.) Lecture, two hours; laboratory, two hours. Basic and advanced techniques on digital photography, computer-aided recording tools, and scientific imaging to determine and document condition (defects) and technological features of archaeological and ethnographic materials. Development of basic theoretical knowledge on imaging and photonics technology and practical skills on conservation photo-documentation, analytical (forensic) photography, and advanced new imaging technologies. Letter grading.

**216. Science of Conservation Materials and Methods. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 216.) Lecture, two hours; laboratory, two hours. Recommended requisite: laboratory safety fundamental concepts course by Office of Environment, Health, and Safety. Introduction to physical, chemical, and mechanical properties of conservation materials (employed for preservation of archaeological and cultural materials) and their aging characteristics. Science and application methods of traditional organic and inorganic systems and introduction of novel technology based on biomineralization processes and nanostructured materials. Letter grading.

**C220. Field Methods in Archaeological Conservation: Readiness, Response, and Recovery. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials C220.) Laboratory, four hours. Overview of risks (direct and indirect) and materials vulnerability of in situ cultural heritage and movable archaeological materials in emergency situations (rescue excavations, disasters, conflicts), with emphasis on readiness, first aid response, and recovery. Readiness focuses on preparedness and preventive measures, including reburials, shelters, rescue excavations, and documentation as well as developing inventories and awareness campaigns. First aid response covers development of on-site emergency risk assessments to evaluate damage and putting triage theory into practice, salvage rescue operations, emergency temporary in situ stabilization and protection (using locally available materials), and training. Recovery is based on documentation, lifting methods, handling, transportation, and storage. Emphasis on finding practical solu-

tions to prevent and mitigate damage and to recover and safeguard archaeological artifacts. Concurrently scheduled with course C120. Letter grading.

**M221. Principles, Practice, and Ethics in Conservation of Cultural Heritage. (4)** (Formerly numbered 221.) (Same as Art History M272B.) Seminar, three hours. Introduction to preservation of cultural heritage materials, including what should be preserved and why, as well as who should be involved in decision-making process. Use of several examples of issues and problems involved in preservation of works of art, from L.A. Murals to Sistine Chapel, from ancient wall paintings to Statue of Liberty. Discussion of issues of preservation and restoration of these cultural heritage materials both in museum and outdoor environment contexts. Materials and techniques used to make cultural heritage materials, in relation to preservation efforts needed to prevent decay and loss. Introduction to examples of conservation issues related to sites, buildings, monuments, and collections. Ethical and contextual aspects with reference to changing values in conservation of cultural materials, illustrating how cultural materials may have been treated differently according to those values. S/U or letter grading.

**222. Conservation and Community. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 222.) Laboratory, four hours. Designed for graduate conservation students. Introduction to work as conservators with indigenous repositories housing cultural collections. Students learn different models for tribal museums and cultural centers, and importance of material selection and properties in baskets they are treating. Letter grading.

**224. Issues in Preservation and Management of Archaeological and Cultural Sites. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 224.) Seminar, three hours. Designed to offer practical model of preservation and management planning for heritage sites that reflects real case-study scenarios. Adaptive management planning following iterative processes for sustainable heritage preservation addressing threats and challenges such as climate change and global warming, conflicts, and neglect. Consideration of significance and value of heritage sites and role of stakeholders. Investigation of methods of evaluation of physical condition and development of risk assessments to address physical risks in milieu of site preservation management, including visitors' organization, urban development, socioeconomic growth, and tourist development. Letter grading.

**230. Conservation Laboratory: Ceramics, Glass, Glazes. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 230.) Laboratory, four hours. Requisite: course 260. Recommended: course M215. Hands-on study in deterioration and conservation of ceramics and glass. Evaluation of use of conservation materials in joining, gap-filling, and restoration of ceramics and experience in their use provided. Letter grading.

**231. Conservation Laboratory: Stone and Adobe. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 231.) Laboratory, four hours. Enforced requisite: course 261. Research-based laboratory on conservation of stone and adobe. Conservation issues on cleaning, consolidation, protection, and structural instability. Characterization, diagnostic assessment, and development of conservation treatment proposals. Testing of materials. Letter grading.

**232. Conservation Laboratory: Organic Materials I. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 232.) Laboratory, four hours. Enforced requisite: course 262. Designed for graduate conservation students. How to recognize characteristic deterioration problems found in organic materials from archaeological and ethnographic contexts and introduction to typical treatments used historically and currently for these materials. Materials focus on wood, bark and barkcloth, paper, and plastics and rubber. Letter grading.

**234. Conservation Laboratory: Metals I. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 234.) Laboratory, four hours. Enforced requisite: course 263. Recommended:

course 215. Recommended corequisite: course M210. Designed for graduate conservation students. Hands-on work to study deterioration and conservation of metallic artifacts and composite objects containing metals (copper and copper alloys, and silver). Corrosion of ancient metals and their deterioration processes, conservation, problems in stability, issues with composite objects, their deterioration and stabilization, cleaning, joining, and gap-filling. Letter grading.

**238. Conservation Laboratory: Organic Materials II. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 238.) Laboratory, four hours. Enforced requisite: course 262. Designed for graduate conservation students. Typical treatments used historically and currently for deterioration problems found in organic materials from archaeological and ethnographic contexts. Materials include plant and animal fibers, feathers, and quills. Letter grading.

**239. Conservation Laboratory: Metals II. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 239.) Laboratory, four hours; outside study, eight hours. Requisites: courses 234, 263. Recommended: courses M210, M215. Treatment of conservation problems of metallic artifacts made of iron, steel, cast iron, gold, zinc, and aluminum that have some importance in ethnographic objects. Practical work on metallic artifacts. Letter grading.

**M240. Environmental Protection of Collections for Museums, Libraries, and Archives. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials M240.) (Same as Information Studies M238.) Lecture, two hours; laboratory, two hours. Requisite: Information Studies 432. Required of graduate conservation students. Review of environmental and biological agents of deterioration, including light, temperature, relative humidity, pollution, insects, and fungi. Emphasis on monitoring to identify agents and understanding of materials sensitivities, along with protective measures for collections. Letter grading.

**241. Conservation Laboratory: Organic Materials III. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 241.) Laboratory, four hours. Enforced requisites: courses 232, 238, 262. Designed for graduate conservation students. Treatment of organic materials from archaeological and ethnographic contexts and introduction to typical treatments used historically and currently for these materials. Materials include wood, gourd, paper, bark, and barkcloth. Letter grading.

**C242. Managing Collections for Museums, Libraries, and Archives. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials C242.) Lecture, two hours; activity, two hours. Designed for graduate conservation students. How conservators work together with curators, collections managers, mount makers, designers, and registrars to permit collections to be both accessed and preserved. Concurrently scheduled with course C142. Letter grading.

**M244. Collection Management for Archives, Libraries, and Museums. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials M244.) (Same as Information Studies M244.) Lecture, two hours; fieldwork, two hours. How conservators work together with curators, collections managers, mount makers, designers, and registrars to permit collections to be both accessed and preserved. Letter grading.

**250. Conservation Laboratory: Rock Art, Wall Paintings, and Mosaics. (4)** (Formerly numbered M250.) Laboratory, four hours. Requisites: courses 210, 210L, 264. Recommended: course M215. Research-based laboratory on conservation of rock art, wall paintings (archaeological and modern composites on cements), mosaics, and decorated architectural surfaces. Experimental techniques and analysis of materials (using materials science and reverse engineering processes) for characterization of technology, constituent materials, and alteration products; development of conservation treatment proposals, testing of conservation products, and methods and conservation treatment. Letter grading.

**251. Contemporary Development in Conservation. (4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 251.) Seminar, two hours. Designed for graduate conservation students. Seminar series of invited international experts in archaeological and ethnographic conservation, who address contemporary issues in conservation of cultural materials. Letter grading.

**260. Structure, Properties, and Deterioration of Materials: Ceramics, Glass, Glazes. (2)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 260.) Lecture, three hours. General introduction to different types of ancient ceramic and glass materials. Relationship between composition (chemistry), structure (crystals, molecular arrangement, and microstructure), and properties of ceramics, glass, glazes. Nature of frit and faience deterioration explained using basic concepts from physics and chemistry. Chemical, optical, and structural properties. Deterioration phenomena, defects, and products of alteration of ceramics and vitreous artifacts. Hands-on examination of variety of samples and artifacts. Letter grading.

**261. Structure, Properties, and Deterioration of Materials: Stone and Adobe. (2)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 261.) Lecture, three hours. Introduction to igneous, sedimentary, and metamorphic rocks (geological context, mineralogical composition, macrostructure, and microstructure). Clay minerals: composition, structure, and properties. Rocks and stone: geographical distribution and occurrence, and usage by ancient cultures. Adobe: clay-based manmade materials. Mechanical and petrophysical properties of stone and adobe. Relationships between composition/structure and properties. Intrinsic and structural stability, resistance to weathering. Deterioration mechanisms and factors (physical, chemical, and biochemical). Letter grading.

**262. Structure, Properties, and Deterioration of Materials: Organics I. (2)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 262.) Lecture, one hour; laboratory, one hour. General introduction to different types of organic materials used to produce ethnographic and archaeological cultural heritage. Relationship between material composition, processing, and properties of natural and manufactured materials using basic concepts from biology and chemistry. Structural stability and deterioration phenomena of these materials as found in cultural collections. Letter grading.

**263. Structure, Properties, and Deterioration of Materials: Metals. (2)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 263.) Lecture, three hours. General introduction to different types of ancient and ethnographic metals. Relationship between composition (chemistry), structure (crystals, molecular arrangement, and microstructure), and properties of metals explained using basic concepts from physics and chemistry. Chemical, optical, and structural properties. Deterioration phenomena, defects, and products of alteration of metallic artifacts. Hands-on examination of variety of samples and artifacts. Letter grading.

**264. Structure, Properties, and Deterioration of Materials: Rock Art, Wall Paintings, Mosaics. (2)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 264.) Lecture, three hours. Recommended preparation: basic knowledge of general chemistry and materials science. Introduction to materials and techniques of rock art, wall paintings (including painted surfaces on cement and composite decorative architectural surfaces), and mosaics. Archaeological and ethnographic context, techniques, and materials. Pigments, colorants, and binding media. Chemical, optical, and structural properties. Relationship between composition (chemistry), structure (crystals, molecular arrangement, and microstructure), and properties explained using basic concepts from physics and chemistry. Intrinsic attributes and resistance to weathering. Causes, sources, and mechanisms of deterioration (physical, chemical, and biochemical). Letter grading.

**265. Structure, Properties, and Deterioration of Materials: Organics II. (2)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 265.) Lecture, one hour; laboratory, one hour. General introduction to plant-based organic materials used to produce ethnographic and archaeological cultural heritage: wood, bark, paper, bast fibers, grasses. Relationship between materials, processing, and properties of natural materials using basic concepts from biology and chemistry. Structural stability and deterioration phenomena of these materials as found in cultural collections. Letter grading.

**288. Special Topics in Conservation. (2 or 4)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 298.) Lecture, three hours; laboratory, one hour. Special topics on theoretical and practical subjects in conservation such as focused materials studies, new conservation approaches, advanced scientific applications, or current special work by core program faculty or visiting scholars. If appropriate, field trips may be arranged. May be repeated for credit with topic or instructor change. Letter grading.

**290. Conservation Program Internship. (6 or 12)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 498.) Fieldwork, 20 or 40 hours. Open only to Conservation MA program graduate students who have completed first year of conservation program coursework. Supervised conservation-related professional and research-based training in field through participation in field projects (i.e., archaeological excavation, site management, indigenous site preservation and consultation), as well as in museum, library, archive, and collections conservation and science departments, regional and national laboratories, or at other similar venues. All intern placements must be preapproved by program and developed in collaboration between student, faculty members, and host institution/agency. S/U grading.

**596. Directed Individual Studies. (2 to 6)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 596.) Tutorial, seven hours. Limited to graduate conservation students. Individual guided studies that may include conservation research and/or surveys or treatment projects carried out at Villa laboratories or at local collection or analytical facility. To be arranged with program faculty members, and supervision may be shared between faculty members and outside specialists. Letter grading.

**597. Preparation for PhD Qualifying Examination. (2 to 12)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 597.) Tutorial, to be arranged. May not be applied toward PhD course requirement. May be repeated for credit. S/U grading.

**598. MA Thesis Preparation. (2 to 12)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 598.) Tutorial, two hours; laboratory, one hour. Development of research paper on conservation topic or treatment-based investigation that can be theoretical in scope or practically oriented. Letter grading.

**599. PhD Dissertation and Preparation. (2 to 12)** (Formerly numbered Conservation of Archaeological and Ethnographic Materials 599.) Tutorial, to be arranged. May not be applied toward PhD course requirement. May be repeated for credit. S/U grading.

## DENTISTRY

Los Angeles, CA 90095-1762

Dentistry

310-825-9789

Paul H. Krebsbach, DDS, PhD, *Dean*

### Overview

The UCLA School of Dentistry offers courses for general campus students. Dentistry 199 and 199H are individual special studies courses for UCLA undergraduates with definitive research interests and abilities applicable to dentistry. The subject areas include oral biology, clinical research, and dental health policy. Interested students should contact the associate dean of research at 310-825-6401 to obtain the names and areas of interest of participating School of Dentistry faculty members.

Dentistry faculty information is available from the department.

## Dentistry

### Lower-Division Courses

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**199. Individual Special Studies. (2 to 8)** Tutorial, to be arranged. Studies in dentistry and related subject areas appropriate for training of particular students, with required reading assignments or laboratory work leading to final oral or written examination. May be repeated for maximum of 16 units. P/NP or letter grading.

**199H. Individual Special Studies (Honors). (2 to 8)** Tutorial, to be arranged. Studies in dentistry and related subject areas appropriate for training of particular students, with required paper submitted at end of course in addition to final examination (paper to be of publication quality as judged by course mentor). May be taken for maximum of 8 units. P/NP or letter grading.

### Graduate Course

**441C. Introduction to Healthcare. (2)** Lecture, two hours. Description and analysis of American dental care system from historical, ethical, and legal perspectives. Assessment of how dentistry fits within general provision of healthcare services in America, with comparisons to dental care provisions in other countries. S/U grading.

#### Assistant Professors

Jenna B. Caravello, MFA

Chandler B. McWilliams, MFA, MA

Daniel S. Snelson, PhD

### Overview

The Department of Design|Media Arts offers the Bachelor of Arts (BA) and Master of Fine Arts (MFA) degrees. The BA degree focuses on visual communication design, with emphasis on digital media. The MFA degree focuses on media arts. These uniquely challenging programs invite students to balance aesthetic sensibility with logical reasoning, formal theories with practical application, and contemporary thought with historical perspective.

The Department of Design|Media Arts reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

### Facilities

Facilities and equipment in the department enable students to create work in two, three, and four dimensions. They expand opportunities for students to develop interactive media applications in a networked environment and advanced computer graphics. The department equipment includes computer laboratories with

high-end PC and Macintosh computers and relevant software for the creation of works for print, web, video, and other media, a fabrication laboratory with equipment ranging from table saws to three-dimensional printers to a CNC machine to create physical objects combined with electronics, and a print laboratory with high-quality printers.

## Undergraduate Major

### Design|Media Arts BA

The undergraduate program begins with the study of basic design elements and processes: form, color, drawing, letterforms and typography, motion, and interactivity. Historical perspectives and social issues are also introduced. At the upper-division level, studio courses explore current uses of interactive media and new directions in visual communication design, including the study of time and motion, as well as virtual form and space in computer-generated environments. Through a balance of courses in theory, criticism, and practice, students develop an understanding of design principles. Most courses are taught as studios of no more than 22 students, which encourages individual growth and fosters a sense of community within the department.

### Capstone Major

The Design|Media Arts major is a designated capstone major. Students are required to complete an advanced project of their own that entails full engagement with the design process. Through their capstone work, students demonstrate their capacities for research, ideation/concept development, creative and design direction, communication strategy, design, production/fabrication, and critical analysis. Capstone courses focus on career choice, and final projects are showcased at the spring senior show.

### Learning Outcomes

The Design|Media Arts major has the following learning outcomes:

- Deep understanding of the field through immersion
- Exploration and development of ideas through listening to and observation of patterns
- Definition of an event and its surroundings and mise-en-scène, and the ethos of the student's idea
- Development of the specifics of a design
- Conceptualization of how an idea reaches its audience, how and when it launches, and how it stays relevant and vibrant
- Designed specifics of each element of the visual vocabulary—from graphic elements to photography, videography, and illustrations—including definition of spatial, material, and auditory elements
- Thorough research of appropriate and relevant production methods
- Analysis, review, and critique of others' work

## Requirements

### Preparation for the Major

*Required:* Design|Media Arts 8, 10, 21, 22, 24, 25, 28.

### The Major

*Required:* Twelve upper-division courses: Design|Media Arts 101, 104; six courses selected from 152, 153, 154, 155, 156, 157, 158, 161, 163; three courses selected from 160, 171, 172, 173; and one capstone course: 159.

It is recommended that students have each term's program approved by the departmental adviser.

Consult the [Schedule of Classes](#) for courses limited to majors only.

## Graduate Major

### Design|Media Arts MFA

The three-year Master of Fine Arts (MFA) program fosters mature, professional-quality work utilizing the most current technologies in the field of media arts. The program focuses on developing an individual thesis project that incorporates in-depth research and theoretical exploration of a topic, culminating in a final exhibition of work.

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Design|Media Arts

### Lower-Division Courses

**1. Graphic Design. (2)** Studio, 30 hours. Limited to high school students. Basic and advanced photography skills using digital cameras. Alteration/manipulation of photos using techniques from latest version of Adobe Photoshop. Uploading of images on Web or in print. Production of digital and print portfolio of student work. Field trips to surrounding West Los Angeles locales to shoot photos. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

**2. Web Design. (2)** Studio, 30 hours. Limited to high school students. How Web design works: basic hand coding and creation of personalized homepages with Macromedia Director and Flash software. Photograph scanning and manipulation of images in Adobe Photoshop to incorporate student Web designs. Critique of various Web pages to analyze successful use of Web design and understand enormous potential of Internet. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

**3. Game Design. (4)** Studio, 30 hours. Limited to high school students. Development of fundamental skills to create games and game art that express personal and subjective approach to game making. Artistic vision combined with technological expertise to teach students fundamentals of designing games, building game worlds, creating game characters, and making playable games for mobile platforms. Use of current software and technology, including Maya and Unity3D. Creation of game projects that students exhibit

and can use for college applications. Offered only as part of UCLA Game Lab Summer Institute. P/NP grading.

**4. Audio Video Design. (2)** Studio, 30 hours. Limited to high school students. Creation of storyboard for short documentary, commercial, or music video. Students shoot and edit their own work by learning fundamentals of preproduction and postproduction using latest digital software, Adobe Premiere and After Effects, to create their work. Burning of DVD of finished production. Visits from professional video producer to help guide students in creating their own videos. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

**5. Introduction to Design | Media Arts. (4)** Studio, 40 hours. Limited to high school students. Two-week summer course designed to meet needs of high school students interested in exploring their creative potential within fields of design media arts, with focus on concepts of narrative and storytelling. Introduction to and exploration of variety of media such as graphic, web, game, and video design with goal of combining and integrating these media to express and realize their narrative projects. Students work with most current software and technology in each discipline area, developing diverse skill sets while cultivating conceptual capabilities around storytelling project, and with experienced instructors and professionals in field to develop projects utilizing this comprehensive and integrative approach. Culminates in portfolios that may be used for college applications. Possible field trips. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

**6. Art/Science and Technology Studio/Laboratory. (4)** Studio/laboratory, 40 hours. Limited to high school students. Two-week summer course, including lectures, required screenings, laboratory visits, field trips, and outside study. Exploration of creative aspects of scientific research and innovation to gain broad understanding of impact of science on contemporary art and popular culture, with focus on new sciences of biotechnology and nanotechnology. Development of proposals and ideas that could serve as prototypes for either art projects or scientific research study. P/NP grading.

**8. Media Histories. (5)** Lecture, three hours; outside study, 12 hours. Synthetic overview of optical media and aesthetic movements covering past two centuries: photography and industrialization/Romanticism (1850 to 1900), cinema and modernism (1900 to 1950), television and postmodernism (1950 to 2000), and digital media and unimodernism (2000 to 2050). How such movements can inform generative work and how understanding these media becomes essential in emerging era of digital humanities. P/NP or letter grading.

**9. Art, Science, and Technology. (5)** Lecture, three hours; discussion, one hour; outside study, 11 hours. Exploration and survey of cultural impact of scientific and cultural innovations, technology-driven art inspired by science, and art/science collaborative projects. Introduction to vast array of cutting-edge research taking place on campus; scientific guest lecturers. Emphasis on art projects that use technology and respond to new scientific concepts. P/NP or letter grading.

**10. Design Culture. (5)** Lecture, three hours; outside study, 12 hours. Open to nonmajors. Understanding design process, with emphasis on development of visual language; study of historic, scientific, technological, economic, and cultural factors influencing design in physical environment. P/NP or letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**21. Drawing and Color. (4)** Studio, six hours; outside study, six hours. For drawing, exploration of relationship between concept and image creation while fostering development of sound drawing and observation skills. For color, exploration of development of fundamental skills in mixing and applying pigments with brush on watercolor paper, as well as use of computer as tool for working with colors. Combination of

painting and software to be predominant way of exploring and presenting ideas regarding color. P/NP or letter grading.

**22. Form. (4)** Studio, six hours; outside study, six hours. Interrelation of two-dimensional surfaces and three-dimensional forms with traditional and experimental materials as foundation for creativity; origination and solution of problems. P/NP or letter grading.

**24. Motion. (4)** Studio, six hours; outside study, six hours. Introduction and integration of traditional design tools, camera, and digital technologies for application to visual thinking and fundamentals of design. P/NP or letter grading.

**25. Typography. (4)** Studio, six hours; outside study, six hours. Focus on three typographic basics: letter, text, and grid. Introduction to fundamentals of typography. Assignments designed to develop understanding of form, scale, and shape of letters as single elements and as texture in layout. Emphasis on grid (structure and layout) and information hierarchy to create successful typographic messages. P/NP or letter grading.

**28. Interactivity. (4)** Studio, six hours; outside study, six hours. Requisites: courses 21, 22, 25. Introduction to concept of interactivity and field of media art that follows history of computer as media for artistic exploration in relation to print, animation, and interactivity. Discussion of potential and ideas related to interactivity, with focus on required skills for creating interactive work. Development of programming skills in service of creating examples of media art. Concepts and skills taught enhance student ability to excel in future courses about Internet, animation, interactive media, and game design. Discussion and readings on four themes—form/programming, motion, interactivity/programming, and interface. P/NP or letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**101. Media Arts: Introduction. (5)** Lecture, three hours; outside study, 12 hours. Limited to and required of Design|Media Arts majors. Survey of media arts, their history, aesthetics, and cultural roles from late-19th century to present. Investigation of media arts within broad historical and cultural framework. Discussion of parallels and links with other cultural forms, including history of technology and various art and design practices. P/NP or letter grading.

**104. Design Futures. (5)** Lecture, three hours; outside study, 12 hours. Preparation: completion of preparation for major courses. Open to nonmajors with consent of instructor. Critical examination of design practice and theory of 20th and 21st centuries, incorporating historical as well as speculative methodologies. Consideration of how various design practices and techniques related to each other across cultures and media, with strong emphasis on communication design. P/NP or letter grading.

**152. Tangible Media. (5)** Studio, six hours; outside study, nine hours. Requisites: courses 22, 28, and 101 or 104. Through workshops, readings, lectures, critiques, and discussions, reevaluation of role of desktop computers (and their mice, trackpads, keyboards, screens, and gamepads) plays in forming our understanding of what is technically possible, sensible, logical, foolish, magical, and intuitive. P/NP or letter grading.

**153. Video. (5)** Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requisite: course 101 or 104. Use of video technology (video systems, cameras, displays, editing, and storage) to integrate image, sound, time, and motion. Emphasis on expression, continuity, and sequential patterns for video communication. P/NP or letter grading.

**154. Word + Image. (5)** Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requisites: courses 21, 22, 25, and 101 or 104. Focus on relationship of type to content, image, and materials. Acquisition of knowledge of and sensitivity to typography in context of complex communication problems in print and digital media. Research, concept and content development, and articulation of methodology for visualization. P/NP or letter grading.

**155. Interactive Animation. (5)** Studio, six hours; outside study, nine hours. Requisites: courses 101 or 104, and 156. Exploration of traditional and experimental animation techniques that are central to 2D and 3D interactive digital projects and video games. Coursework develops skills and concepts that are integral to animation workflows and game engine animation systems including traditional animation principles, 2D sprite animation, rigging 2D and 3D game objects, and character controller implementation. Students experiment with common and alternative input methods for real-time interactivity. Readings, screenings, and in-class gameplay sessions supplement lessons. P/NP or letter grading.

**156. Three-Dimensional Modeling and Motion. (5)** Studio, six hours; outside study, nine hours. Requisite: course 101 or 104. Introduction to theories of three-dimensional form, spatial design, and lighting, using three-dimensional visualization and video tools. Tools originally designed for motion to be used to construct form. Use of aspects of time, such as speed and duration, to contemplate form and interaction. Exploration of virtual versus real form. Letter grading.

**157. Game Design. (5)** Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requisites: courses 24, 28, and 101 or 104. Introduction to game design, with focus on developing conceptual and practical skills that form basis for both digital and nondigital game development. Development of four playable game projects that explore various aspects of game design: rule design, game balance, multiplayer strategy, complexity, randomness, polemics, narrative, physical interaction, and aesthetic and pragmatic aspects of physical game design. P/NP or letter grading.

**158. Game Engine. (5)** Studio, six hours; outside study, nine hours. Requisites: courses 24, and 101 or 104. Introduction of fundamentals of programming interactive projects in game development software. Focus on familiarizing students with game engines, computer programming concepts, player experience, and other skills that are foundational to making digital games. Lectures, exercises, and class projects teach skills needed to create digital games including custom rules, interactive physics systems, vectors, generative or randomized levels, save data, custom input systems, score-keeping, and sound. P/NP or letter grading.

**159. Capstone Senior Project in Design Media Arts. (5)** (Formerly numbered 159A.) Studio, six hours; outside study, nine hours. Requisites: courses 8, 10, 21, 22, 24, 25, 28, 101, and 104, and 160, 171, 172, or 173. Preparation: completion of preparation for major courses. Students should have completed six core, upper-division studio courses. Limited to seniors and should be completed in last year. Focus on creating final project that can be showcased at Senior Show. Letter grading.

**159B-159C. Capstone Senior Project. (5-5)** Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Limited to seniors. Focus on creating final project that can be showcased at Senior Show. Students can take two different courses in different terms or the same course twice in different terms. Total units for courses 159A, 159B, and 159C may not exceed 10 units, with maximum of 5 units per term. Letter grading. **159B.** Video

and Animation. Requisites: courses 24, 28, 101, 104, 153, 156, and 160, 171, 172, or 173. Linear media, including storyboarding, video, animation, modeling, editing, postproduction, and lighting. **159C.** Visual Communication and Image. Requisites: courses 24, 28, 101, 104, 154, and 160, 171, 172, or 173. Visual communication, editorial design, photography, typography, branding, and narrative environments.

**160. Special Topics in Design | Media Arts. (5)** Studio, six hours; outside study, nine hours. Completion of preparation for major and upper-division core courses required. Requisite: course 101 or 104. Selected topics in design and media arts explored through variety of approaches that may include projects, readings, discussion, research papers, and oral presentations. Topics announced in advance. May be repeated for credit with topic change. Letter grading.

**161. Network Media. (5)** Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requisites: courses 28, 154. Exploration of creative, technical, and critical tools to realize Internet-based projects. Focus on students gaining deeper understanding of Internet as creative platform—where did it come from, how does it work, how do you make things for it, and what do you want to say? Technical workshops on HTML, CSS, JavaScript, and design support development of series of studio projects using variety of network tools. Examination through discussion of cultural, social, political, and philosophical implications of Internet. Consideration of roles of race, gender, sexuality, disability, class, and influence within increasingly networked world, and strategies of response as artists and designers. Examination and challenging of structuring power relationships, inequities, and biases embedded within network tools, technologies, and media. Letter grading.

**163. Narrative. (5)** Lecture, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Requisite: course 101 or 104. Provides wider understanding of arts that parallels world of 20th-century visual languages. Study of threads that allow viewer to connect story of one art form to another in richer context. Letter grading.

**171. Topics in Interactivity and Games. (5)** Studio, six hours; outside study, nine hours. Completion of preparation for major and upper-division core courses required. Requisites: courses 101 or 104, 157. Selected topics in interactive media and games explored through variety of approaches that may include projects, readings, discussion, research papers, and oral presentations. Topics announced in advance. May be repeated for maximum of 15 units. Letter grading.

**172. Topics in Video and Animation. (5)** Studio, six hours; outside study, nine hours. Completion of preparation for major and upper-division core courses required. Requisites: courses 101 or 104, and 153 or 156. Selected topics in video and animation explored through variety of approaches that may include projects, readings, discussion, research papers, and oral presentations. Topics announced in advance. May be repeated for maximum of 15 units. Letter grading.

**173. Topics in Visual Communication and Image. (5)** Studio, six hours; outside study, nine hours. Completion of preparation for major and upper-division core courses required. Requisites: courses 24, 28, 101 or 104, 154. Selected topics in visual communication and image explored through variety of approaches that may include projects, readings, discussion, research papers, and oral presentations. Topics announced in advance. May be repeated for maximum of 15 units. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**195A-195B. Community or Corporate Internships in Design | Media Arts. (2-4)** Tutorial, six and 12 hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business related to design. Students meet on regular basis with instructor

and provide periodic reports of their experience. Courses 195A and 195B may be repeated for combined maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

**198. Honors Research in Design | Media Arts. (4)** Tutorial, two hours. Preparation: 3.0 grade-point average overall. Limited to juniors/seniors. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated once for credit. Individual contract required. Letter grading.

**199. Directed Research in Design | Media Arts. (2 to 5)** Tutorial, four hours. Preparation: 3.0 grade-point average in major. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

## Graduate Courses

**200. Design|Media Arts Faculty Seminar. (2)** Seminar, two hours. Limited to graduate design|media arts students. Designed to familiarize new graduate students with departmental faculty members and their creative work and research to help students select their faculty advisers. May be repeated once for credit. S/U grading.

**252A. Programming Media 1. (5)** Studio, six hours; outside study, nine hours. Limited to majors. Introduction to computer programming within context of art and design. Exploration of conceptual space enabled by electronic media through exercises, presentations, discussions, and critiques. Weekly exercises balance concept and technique to reveal potential of computer as medium and tool. Experience with programming basics includes procedural and object-oriented programming, two- and three-dimensional graphics, file I/O, color models, and image processing. Letter grading.

**252B. Programming Media 2. (5)** Studio, six hours; outside study, nine hours. Enforced requisite: course 252A. Limited to majors. Exploration of use of electro-mechanical actuators and sensors, custom interface design, microcontroller programming, and building kinetic and interactive physical artworks. Practical electronics theory, programming for embedded systems, two-dimensional and three-dimensional CAD, basic milling, laser cutting, mold making, circuit building, and other sculptural electronics fabrication techniques. Letter grading.

**252C. Virtuality. (5)** Studio, six hours; outside study, nine hours. Limited to Design|Media Arts majors. Introduction to essential 3D computer graphics techniques, concepts, and implementations. Students complete short exercises to better understand workflows used to create 3D digital art and adjacent media including but not limited to 3D models and animation, virtual and augmented reality, video games, motion capture, photogrammetry, 3D scanning, and physics simulations. Offers technical, formal, and theoretical background for 3D computer graphics to inspire new perspectives on potential of artmaking in virtual spaces. Letter grading.

**269. Graduate Seminar. (4)** Seminar, four hours. Designed for graduate design|media arts students. Survey of critical theories in media art and design. Critical examination of student work by peers, faculty members, and expert guests. Must be taken twice for MFA degree. May be repeated for credit with consent of adviser. Letter grading.

**272. Introduction to Art | Science. (5)** Seminar, three hours. For past 50 years artists have increasingly moved from being inspired by scientific innovation and discovery to actually collaborating with scientists and even residing and working in science laboratories. History of science in relation to artists' interpretation of scientific work to current works that are created in response to recent developments in biotechnology and nanotechnology. Letter grading.

**289. Special Topics in Media Arts. (3)** Seminar, 90 minutes; seven and one half hours arranged. Examination of topics relevant to media arts theory and practice, with scheduled meetings to be arranged be-

tween faculty member and student as needed. Topics announced in advance. May be taken for maximum of 18 units. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**403. Graduate Critique. (2)** Seminar, three hours; outside study, three hours. Limited to first- and second-year departmental graduate students. Students meet with instructor in small classroom setting to exchange ideas through presentation of current projects and research, discussion, research papers, and reports. Instructors may invite visiting critics to contribute. May be repeated for credit. S/U grading.

**404. Graduate Tutorial. (3)** Tutorial, three hours; outside study, six hours. Limited to first- and second-year departmental graduate students. Development of body of work while working toward MFA degree, with one-to-one interaction between students and faculty members. May be repeated for credit. Letter grading.

**495. Teaching Assistant Training Practicum. (2)** Seminar, three hours; outside study, three hours. Forum for first-year teaching assistants for discussion and exploration of teaching pedagogy and classroom mechanics. Problems and practices of teaching design at college level, as well as role of teaching assistants within department. Designed to help new teaching assistants develop teaching skills and to orient them to department and University policies and resources. May not be applied toward degree requirements. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. May be repeated for credit with consent of adviser. S/U or letter grading.

**597. Preparation for MFA Comprehensive Examination. (4 to 8)** Tutorial, to be arranged. Designed for second-year MFA students to prepare for comprehensive examination. May be repeated for credit with consent of adviser. S/U grading.

**598. MA Research and Thesis Preparation. (4 to 12)** Tutorial, to be arranged. Designed for second-year MA students. May not be applied toward minimum graduate course or unit requirements for MA degree. May be repeated for credit. S/U grading.

Willeke Z. Wendrich, PhD (*Near Eastern Languages and Cultures*)

## Overview

The Digital Humanities minor is an interdisciplinary minor that studies the foundations and futures of the digital world. Digital humanities interprets the cultural and social impact of the new information age as well as creates and applies new technologies to answer cultural, social, and historical questions, both those traditionally conceived and those enabled by new technologies. The interdisciplinary curriculum draws on faculty members from more than 15 departments, five schools, and three research centers at UCLA. It places project-based learning at the heart of the curriculum, with students working in collaborative teams to realize digital research projects with real-world applications. Students use tools and methodologies such as three-dimensional visualization, data mining, network analysis, and digital mapping to conceptualize and advance research projects. Students have the opportunity to make significant contributions to scholarship in fields ranging from archaeology and architecture to history and literature. By preparing students to be active participants in the design and production of new knowledge, the minor emphasizes the critical thinking skills, creativity, and collaborative methodologies necessary for success in the digital information age.

## Undergraduate Minor

### Digital Humanities Minor

The Digital Humanities minor is intended to provide students with literacy in creating, interpreting, and applying the technologies of the digital world. It examines the cultural and social impact of new technologies and enables students to harness these technologies to develop their own research projects in a wide range of fields.

### Admission

To apply for the minor, students must (1) have an overall grade-point average of 2.7 or better and (2) submit an application essay supporting their interest in pursuing the minor and enumerating any digital projects that they have already undertaken. On acceptance to the minor, students are expected to identify an academic area of digital humanities in which they intend to concentrate. Information about the minor is available on the [minor website](#). To submit an application for the minor, see the website.

### The Minor

*Required Lower-Division Course (4 to 6 units):* One elective course selected from Ancient Near East 10W, Architecture and Urban Design 10A, Classics 10, 20, 42, Clusters 66A, Digital

Humanities 30, German 61A, Information Studies 20, or 30.

*Required Upper-Division Courses (25 to 28 units):* Digital Humanities 101; one upper-division elective course selected from Digital Humanities 110 through 160; one capstone course selected from Digital Humanities 187, 198, or 199; and three elective courses selected from Ancient Near East M101C (or Art History M110C), 125A, M125B (or Architecture and Urban Design M125B), M125C (or Architecture and Urban Design M125C), 162, C165, CM169 (or Anthropology CM110Q), Anthropology M116R (or Chinese M183), Architecture and Urban Design 132, Armenian C153, Art History C145A, C145B, Classics 164, 166B, Design|Media Arts 104, Digital Humanities 151, 195 or 196, English 118A, History 188, Korean 183, 187, Russian 121, 129, Scandinavian C133A, C171, Society and Genetics 131, 175, Spanish 130, 150, 170, Urban Planning 129, 141.

### Policies

Variable topics courses may be taken as topics apply.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

## Digital Humanities

### Lower-Division Courses

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**30. Los Angeles Tech City: Digital Technologies and Spatial Justice. (5)** Lecture, two and one half hours; studio, two hours. Investigation of spatial justice and injustice in multi-ethnic city of Los Angeles through Lens of three thematic technologies that built and transformed Los Angeles into global metropolis: cars and highways, networking technologies culminating in Internet and World Wide Web, and film and broadcast media. Use of innovative forms of investigation and communication, from digital mapping to video-sensing, to integrate interpretative and historical approaches of humanities with material and projective practices of design. Letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Stu-

dents must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**101. Introduction to Digital Humanities. (4)** Lecture, 75 minutes; discussion, 75 minutes. Foundation course for students in Digital Humanities minor, providing theoretical and conceptual framework for understanding genesis of digital world. Use of contemporary cultural-historical methodology to focus on rise of new media and information technologies in 19th, 20th, and 21st centuries, such as photography, film, radio, television, Internet, and World Wide Web and their impact on how individuals, groups, and cultures experienced their worlds. Letter grading.

**110. User Experience and Design. (4)** Seminar, three hours. Requisite: course 101. Introduction to fields of user experience (UX) research and design. Covers UX design methods and process, including ethnographic field research, persona-scenario development, information architecture, prototyping, and usability testing. Students learn by hands-on practice in human-centered process: how to understand users, how to design interface and interaction for users, and how to evaluate and communicate user experience design with users. Letter grading.

**120. Social Media Data Analytics. (4)** Lecture, three hours; laboratory, one hour. Requisite: course 101 or consent of instructor. Social media data analytics, with focus on questions of power, privilege, identity, whose voices count and in what spaces, as well as how data science and digital humanities may be used to challenge power structures. Study of how social media has been used both to undermine and to support social justice and political change movements, ways in which social media data is currently used by corporate entities, and ethical data usage. Students learn digital research methods including quantitative and qualitative data analytics, statistics, as well as data visualization to examine social media data. Letter grading.

**M121. Race, Gender, and Data. (4)** (Same as Community Engagement and Social Change M121.) Seminar, three hours. Requisite: course 101. Data plays a crucial role in political representation, governmental resource allocation, and policy decisions. Investigation of how data does or does not ascribe a quantitative value to a human life by employing a community-engaged emphasis to study how emerging digital models link data with social justice organizing. Students learn to read datasets produced by governmental entities such as the U.S. Census Bureau, Bureau of Labor Statistics, and Department of Health and Human Services. Assignments include working on a community-engaged data project that evaluates and addresses key concerns facing communities-of-color. Introduction to critical data studies and applied data ethics. Studio sessions include lessons on finding and analyzing datasets relevant to racial and gender justice themes; and to generating data visualizations, digital stories, and maps using the latest software tools. No prior knowledge of statistics or quantitative analysis is required. P/NP or letter grading.

**125. Data Analysis for Social and Cultural Research. (4)** Seminar, three hours. Requisite: course 101 or consent of instructor. Data analysis and statistical methods tailored for students in humanities and social sciences, with focus on topics and issues related to social justice. Study of descriptive and inferential statistics as applied in humanistic research. Consideration of how to generate evidence-based, statistically sound arguments, applying methods learned throughout the course to a collaborative project. Students learn statistical methods, R Studio environment and language, and how to communicate their arguments in cogent narratives supported by evidence. Letter grading.

**131. Digital Mapping and Critical Geographic Information Systems. (4)** Seminar, three hours. Requisite: course 101 or consent of instructor. Introduction to digital mapping and critical geographic information systems. Study of basic data types including geographic, structured, and unstructured. Students en-

gage with fundamental mapping practices such as geolocating structured data, working with open data through web mapping technologies, georeferencing historical maps, and creating location-based narratives and visualizations. Through project-based learning, students discover how to manage and apply data to wide range of digital mapping technologies. Consideration of how to incorporate these concepts into humanities and social sciences research. Letter grading.

**M145. Literary Texts and Literary Languages: Strategies of Analysis and Digital Tools. (4)** (Same as Russian M145.) Lecture, three hours. Lectures and readings in English. Non-obligatory additional materials in Russian. Formal, quantitative, and computational methods for analysis of poetry and prose. Digital tools for analysis. P/NP or letter grading.

**140. Coding for Humanities. (4)** Seminar, three hours. Requisites: course 101. Introduction to coding, with focus on Python. Study of basic structural elements such as lists, if statements, dictionaries, loops, functions, and classes. Consideration of how to apply these concepts to research in humanities and social sciences, and project-based learning. Students discover how to manage and display data with added impact. Content and goals are guided by freedom to research more effectively and freedom of speech. Letter grading.

**150. Advanced Topics in Digital Humanities. (4)** Seminar, three hours. Requisite: course 101. Introduction to advanced research methods or thematic issues in digital humanities such as database and visualization technologies, social media technologies, application programming interfaces, and digital mapping to acquire familiarity with particular set of technologies by learning practical research methods and theoretical issues to carry out advanced research in this area. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. Letter grading.

**151. Advanced Topics in Urban Humanities. (4)** Seminar, three hours. Introduction to advanced research topics in urban humanities. Looking at specific subject matters related to notion of spatial equity in context of Los Angeles, exploration of how certain spatial technologies such as geographic information systems (GIS) cartography, mobile telephony, real-time data collection, social media, digital databases, and interactive web platforms can be deployed to research and document urban experience. Familiarization with digital tools used to study urban issues, from affordable housing to access to public space and employment, to civic participation. Letter grading.

**187. Capstone Seminar in Digital Humanities. (4)** Seminar, three hours. Requisite: course 101. Students are guided in development and realization of collaborative digital humanities research project. Students learn to develop and refine research question, carry out advanced research in digital humanities, and present results of their research to their peers. Students participate in structured trainings, work with classmates to select suitable research topics, give weekly updates about their research process, and develop presentation of project. Librarians and members of Digital Research Consortium introduce students to available digital collections, archives, and other resources at UCLA. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**195. Community or Corporate Internships in Digital Humanities. (4)** Tutorial, two hours; fieldwork, eight hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Placements to be arranged by instructor. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. Letter grading.

**196. Research Apprenticeship in Digital Humanities. (4)** Tutorial, three hours per week per unit. Limited to juniors/seniors. Entry-level research apprenticeship for upper-division students under guidance of faculty mentor. May be repeated for credit. Individual contract required. P/NP grading.

**198. Honors Research in Digital Humanities. (4)** Tutorial, one hour. Requisite: course 101. Limited to juniors/seniors. Development and completion of significant research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

**199. Directed Research in Digital Humanities. (2 to 4)** Tutorial, one hour. Requisite: course 101. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. Letter grading.

## Graduate Courses

**201. Introduction to Digital Humanities. (5)** Seminar, three hours; laboratory, one hour. Introduction to field of digital humanities. Historical overview of field from its beginning in post-World War II era to present, highlighting major intellectual problems, disciplinary paradigms, and institutional challenges that are posed by digital humanities. Examination of major epistemological, methodological, technological, and institutional challenges posed by digital humanities through number of specific projects that address fundamental problems in creating, interpreting, preserving, and transmitting human cultural record. How digital technologies and tools, ranging from map visualizations and modeling environments to database structures and interface design, are arguments that make certain assumptions about, and even transform, objects of study. Letter grading.

**M221. Data and Society. (4)** (Same as Social Science M240.) Seminar, three hours. Introduction to way data and computing technologies increasingly play pivotal role in social life. Students pose critical questions about social impact of data, while also gaining literacy in engaging digital and data tools. Students learn to recognize historically and institutionally produced biases in data research and science. Engagement is encouraged with how to work with data for social justice aims. S/U or letter grading.

**250. Special Topics in Digital Humanities. (4)** Seminar, three hours. Enforced requisite: course 201. Introduction to advanced research method or thematic issue in digital humanities, such as digital textual analysis, digital mapping database and visualization technologies, or social media technologies. Acquisition of familiarity with particular set of technologies by learning practical research methods and theoretical issues to carry out advanced research in this area. Examination of critiques of theoretical underpinnings of such technologies and issues that they raise. May be repeated for credit with topic change. Letter grading.

**299. Special Projects in Digital Humanities. (2 to 4)** Tutorial, one hour. Enforced requisite: course 201. Limited to and required of graduate students in Digital Humanities Graduate Certificate Program. Supervised research and investigation under guidance of faculty mentor. Culminating project required. May be repeated for maximum of 12 units. Letter grading.

**596. Directed Individual Study or Research. (2 to 12)** Tutorial, three hours. To be arranged with faculty member who directs study or research. S/U or letter grading.

## Overview

Disability—whether bodily, cognitive, emotional, or sensory—is part of the fabric of universal human experience; yet it is often regarded as a deficit to be fixed, cured, or hidden, with disabled individuals cast as unfortunate victims. The robust Disability Studies program is challenging this view, changing attitudes, and redefining normal.

By exploring disability as a social issue and cultural identity rather than a medically defined condition, students are prepared to use the experience of disability as a lens to re-envision models of access, inclusion, participation, communication, and equality.

Led by some of the most distinguished UCLA faculty, disability studies examines the meaning and nature of disability from a variety of perspectives, including arts and humanities, health sciences, social sciences, public policy, technology, and education. At UCLA, the conversation around disability has shifted from exclusion to inclusion, from limitations to possibilities.

## Undergraduate Major

### Disability Studies BA

Disability Studies is a multifaceted field that examines the nature, meaning, and consequences of disability. The Bachelor of Arts (BA) degree in Disability Studies is an interdisciplinary, community-based, capstone major. It appeals to undergraduates seeking a conceptual and practical understanding of disability as a foundation for graduate or professional studies and/or careers across a broad spectrum of professions. The major curriculum recognizes disability as a central part of our lived experience; a critical dimension of social, cultural, and political identity; and a frequent target of discrimi-

nation and exclusion. Through foundational courses, interdisciplinary electives, community-engaged course work, and a senior capstone research project, students in the major learn to think critically about disability as a core aspect of the human experience, preparing them to enact transformational change across disability communities and beyond.

### Capstone Major

The Disability Studies major is a designated capstone major. Students have the option of completing a capstone seminar (Disability Studies 191) or independent research project (Disability Studies 198A and 198B, or 199A and 199B) that enables them to use knowledge and skills acquired through previous coursework to engage, under the guidance of a faculty member, in a research or creative project that results in a final paper or other product.

### Learning Outcomes

The Disability Studies major has the following learning outcomes:

- Demonstrated understanding of disability studies concepts, theories, history, and political movements
- Integration of multiple perspectives on disability through interdisciplinary inquiry
- Development of professional skills through academic and applied experiences
- Use of theory to inform practice through participation in community-engaged learning activities
- Conduction and communication of research to various audiences

### Entry to the Major

#### Admission

Students must first complete all preparation for the major courses. Students must have a UC grade-point average (GPA) of 2.0 or better in those courses and an overall GPA of 2.0. Students are accepted into the major on a rolling basis but no later than the end of spring quarter of their junior year.

#### Pre-major

Incoming first-year students may be admitted as Disability Studies pre-majors on acceptance to UCLA. Pre-major students must apply for major standing by the end of spring quarter of their junior year. All other students must first complete Disability Studies 1, and then contact the undergraduate counselor in A316 Murphy Hall to request pre-major standing.

#### Transfer Students

Transfer applicants to the Disability Studies major with 90 or more units must complete the following preparatory courses prior to admission to UCLA: one social theory course; one race, identity, and society course; one humanities and ethics course; and one data analysis course. Disability Studies 1 must be taken at UCLA once a transfer student is admitted to the University.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* (1) Disability Studies 1; (2) one *social theory* course selected from Anthropology 3, Public Affairs 10, 80, or Sociology 1; (3) one *race, identity, and society* course selected from African American Studies 1, 6, American Indian Studies M10, Asian American Studies 10, 20, 30, 40, 50, Chicana/o and Central American Studies 10A, 10B, 20, Clusters 20B, M72B, 80BX, Communication M72B, Design|Media Arts 10, Education 11, Gender Studies 10, Labor Studies 10, Society and Genetics M72B, Sociology M72B, or World Arts and Cultures M23; (4) one *humanities and ethics* course selected from Clusters M71B, 73B, Comparative Literature 1E, Design|Media Arts 10, Molecular, Cell, and Developmental Biology 60, Philosophy 22, 22W, Society and Genetics 5, or M71B; and (5) one *data analysis* course selected from Education 35, Life Sciences 40, Political Science 6, Public Affairs 60, Statistics 10, or 13.

### The Major

*Required Core Course (5 units):* Disability Studies 101W.

*Disability-Centered Electives (8 units):* Select two courses from American Sign Language M115, Anthropology 137P, 149 (when offering an interdisciplinary perspective of disability), Asian American Studies M117, Design|Media Arts 171, Disability Studies 102 through 187, Education 104A, 132, English M103, Gender Studies M121, 152, M161, Honors Collegium M183, Nursing M172 and M172XP (must be taken together to satisfy requirement), Psychology M107, 127A, 127B, 127C, 132A, M139, Society and Genetics M166, M183, Sociology M120, or M148.

*Interdisciplinary Perspectives on Disability (16 units):* Select one course from each of the four categories:

*Category 1: Health Humanities and Bioethics—* Anthropology 137P, 149 (when offering an interdisciplinary perspective of disability), Asian American Studies M117, M129, M161, Community Health Sciences 100, M140, Comparative Literature 180, Disability Studies 138XP, M139, M148, M166, M172 and M172XP (must be taken together to satisfy requirement), M183, Education 132, Health Policy and Management M110, History 179A, 179B, 179C, Honors Collegium M183, Nursing M172 and M172XP (must be taken together to satisfy requirement), Philosophy 173, Public Affairs M131, 134, Psychology M107, 127A, 127B, 127C, M139, Society and Genetics M166, M183, or Sociology M148

*Category 2: Access and Social Change—* Community Engagement and Social Change 172XP, Disability Studies 145, M148, M149, M166, M172 and M172XP (must be taken together to satisfy requirement), Design|Media Arts 171, Education 104A, Gender Studies 152, Nursing M172 and M172XP (must be taken together to satisfy requirement), Psychology 132A, Society and Genetics M166, Sociology M120, or M148

*Category 3: Representation, Embodiment, and Disability Cultures—* American Sign Language

M115, Comparative Literature 180, Disability Studies M103, 111, M114, M115, M121, M139, M161, English M103, Gender Studies 104, M121, M161, Psychology M139, or Theater M114

*Category 4: Global and Historical Perspectives*—Anthropology 137P, 149 (when offering an interdisciplinary perspective of disability), Community Health Sciences 132, Comparative Literature 180, Disability Studies M103, English M103, Gender Studies 152, History 179A, 179B, or 179C

*Internship or Research Practicum (8 units):* Disability Studies 195CE (taken twice) or 196 (taken twice).

*Capstone (5 or 6 units):* one capstone course from Disability Studies 191 (5 units) or two capstone courses from Disability Studies 198A and 198B (6 units) or 199A and 199B (6 units).

## Honors Program

All honors students must complete their capstone requirement by taking courses 198A and 198B, in which they research, write, and present an honors thesis.

## Policies

### Preparation for the Major

All courses must be completed with a 2.0 or better grade-point average.

### The Major

Each course must be taken for a letter grade, and students must earn a C or better grade in Disability Studies 101W.

Disability Studies 101W and one quarter of Disability Studies 195CE or 196 must be taken prior to the capstone.

## Honors Program

### Admission

The honors program is open to majors with a 3.5 departmental and a 3.0 overall grade-point average (GPA). Students with lower GPAs may petition for admission to the program. Students should apply by winter quarter of the junior year. For application forms and more information, contact the departmental counselor in A316 Murphy Hall.

### Requirements

To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 198A and 198B) and an overall GPA of 3.0.

## Disability Studies

### Lower-Division Courses

**1. Construction of (Dis)ability and Ableism in U.S. (5)** Lecture, two hours; discussion, two hours. Examination of ways in which certain bodies and minds have been categorized, disabled, conceived of, oppressed, and liberated in U.S. over time. Using intersectional lens, exploration of origins of American eugenics movement, social construction of normalcy and (dis)ability, and ableism in its many forms (e.g., individual, legal, medical, cultural, financial). Students learn how to apply critical disability studies framework to evaluate relationships between race, ethnicity, language, gender, sexual orientation, income, and dis-

ability in relation to disablement and ableism. Covers key topics and theoretical frameworks in disability studies to give students foundational and conceptual knowledge needed to analyze social, political, and cultural issues from critical disability studies perspectives. P/NP or letter grading.

**10. Intersections of Art History and Disability Studies: Disability in Modern Art. (5)** Lecture, four hours. Broad overview of presence of disability and its manifestations through modern art in the 19th and 20th centuries. Introduction of historical development and fundamental intellectual and ethical issues associated with representation of disability in arts and humanities. Investigation of complex relations between artistic and humanistic expression and this major facet of society and culture. Introduction of new methodology and language to build framework around how disability might fit into discourse of modern art as alternative way of knowing and how disability informs modern art by way of radical aesthetics of representation that challenges sociocultural norms. Consideration of how disability aesthetics informs photography, performance art, outsider art, and curatorial practices. P/NP or letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**101. Perspectives on Disability Studies. (5)** Lecture, one hour; discussion, two hours. Not open for credit to students with credit for course 101W. Creation of critical framework for understanding concept of disability from sampling of disciplinary perspectives. Organized around productive and central tension in disability studies—between disability as lived subjective experience that is both individual and communal, and disability as objective, medical, legal, and sometimes stigmatized category. Students encouraged to make connections between units and to create their own perspectives on disability in field that defines itself by how it changes. Letter grading.

**101W. Perspectives on Disability Studies. (5)** Lecture, one hour; discussion, two hours. Enforced requisite: English Composition 3 or English as a Second Language 36. Not open for credit to students with credit for course 101. Creation of critical framework for understanding concept of disability from sampling of disciplinary perspectives. Organized around productive and central tension in disability studies—between disability as lived subjective experience that is both individual and communal, and disability as objective, medical, legal, and sometimes stigmatized category. Students encouraged to make connections between units and to create their own perspectives on disability in field that defines itself by how it changes. Satisfies Writing II requirement. Letter grading.

**102. Disability and Violence. (4)** Seminar, three hours. Relationship between disability and violence from three angles: (1) review of disproportionate incidence of violence committed against people with disabilities, whether specifically as form of hate crime or based on dependency and/or vulnerability that accompany some types of disability, (2) study of role of disability and particularly mental illness in representations of criminality and violence, and (3) disablement or emergent disability (injuries, illnesses, and impairments created by social inequity) as consequence of intersecting forms of racial, gender, sexual, and class subordination, or as result of state or interpersonal violence. Consideration of possible coalition-based strategies for challenging systemic subordination and prospects for improving disability-consciousness across social movement efforts and campaigns. P/NP or letter grading.

**M103. Studies in Disability Literatures. (5)** (Same as English M103.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of modes of disability in literature, with specific emphasis on thematic concerns. Topics may include introduction to disability studies; race, gender, and disability; disability narratives; etc. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**110. Disability and Popular Culture. (4)** Lecture, four hours. Drawing from disability studies, media studies, and theories of representation, examination of increasing visibility of people with disabilities in popular culture. How disability is represented and who gets to represent it. Analysis and critique of representations of people with disabilities in late 20th and early 21st century cinema and television to understand functioning of representation in popular culture. Development of critical media literacy skills. P/NP or letter grading.

**111. Disability as Spectacle: Performing Nonnormative Bodies. (4)** Lecture, two hours; studio, two hours. Examination through eyes of disability activists and artists interrogating how aspects of body get deemed nonnormative. Investigation of what it means to push against pressure to fit in, as well as how to contest invisibility of some disabilities that happen when normal bodies get defined visually. Use of this lens on disability to research and explore role that bodies play in political battles over who gets socially valued and who does not. P/NP or letter grading.

**M112. Disability and Musical-Dramatic Arts: Representation, Embodiment, Themes, and Practices. (5)** (Same as Musicology M112.) Lecture, four hours; discussion, one hour. Exploration of ways disability and impairment factor into musical and musical-dramatic creation and performance, considered historically and aspirationally in terms of representation, embodiment, thematics, and developing practices. P/NP or letter grading.

**M113. Variable Topics on Music and Disability. (4)** (Same as Musicology M113.) Seminar, four hours. Analysis and critique of depiction of disability and music. Topics may include introduction to disability studies; exploring work and creative strategies of disabled musicians; music technologies and instrument design; representation of disability in music; and more. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M114. Variable Topics in Performance and Disability Studies. (4)** (Same as Theater M114.) Seminar, four hours. Analysis and critique of depiction of disability in theater. Topics may include introduction to disability studies; race, gender, and disability; representation of disability in theater; and more. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M115. Enforcing Normalcy: Deaf and Disability Studies. (4)** (Same as American Sign Language M115.) Lecture, three hours. Exploration of historical, medical, social, political, philosophical, and cultural influences that have constructed categories of normalcy, disability, and deafness. Building on writing of Michel Foucault and critical work in field of disability studies, inquiry into institutions that have enforced standards of normalcy throughout 19th and 20th centuries to present. Primary attention to rise of medical

authority in West, history of eugenics, and contemporary bioethics issues confronting disability and deaf communities. P/NP or letter grading.

**120. Special Topics on Race and Disability. (4)** Lecture, four hours. Exploration of race and disability, with emphasis on lived realities of people of color with disabilities. Use of scholarly texts from disability studies, sociology, gender studies, or critical race studies to investigate and critique mechanisms and systems that shape race, ableism, and dominant/nondominant power dynamics. P/NP or letter grading.

**M121. Topics in Gender and Disabilities. (4)** (Same as Gender Studies M121.) Lecture, three and one half hours. Limited to juniors/seniors. Ways in which issues of disability are affected by gender, with particular attention to various roles, positions, and concerns of women with disabilities. Approach is intersectional, exploring how social categories of class, race, ethnicity, religion, age, sexuality, nationality, and citizenship affect and are affected by gender and disability. Topics may include law (civil rights, nondiscrimination), representation (arts, literature), education, public policy, health. May be repeated for credit with topic and instructor change. P/NP or letter grading.

**M122. Bodies in Antiquity. (4)** (Same as Classics M149.) Lecture, three hours. Investigation of individuals and groups that compose ancient Greek and Roman societies and relationship they have with larger social body, with particular focus on marginalized or minority groups such as women, noncitizens (resident aliens and provincials), slaves, children, elderly, and disabled. Examination of ways these groups contribute to or detract from our understanding of ancient society as whole. May be repeated for credit with topic change. P/NP or letter grading.

**M125. Exploring Intersections of Ability and Sexuality. (4)** (Same as Lesbian, Gay, Bisexual, Transgender, and Queer Studies M125.) Lecture, three hours. Exploration of identity as means of understanding cultural formations, dominant/nondominant power dynamics, and systems of visual representation. Intersectional approach to explore how ability and sexuality intersect, overlap, and change notions of identity. Use of scholarly texts from disability studies, lesbian, gay, bisexual, and transgender studies, popular culture, performance, and film to investigate factors that shape ability and sexuality as basis for identity. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**129. Theory, Policy, and Practice of Special Education: Implications for Educators and Advocates. (4)** Lecture, three hours. Examination of issues of disability in K-12 schooling and social and historical contexts of special education policy, as well as its implementation. Focus on equity-related legal and policy issues in education, specifically those associated with disability, race, language, and gender and how these intersect. Consideration of landmark court decisions such as *Brown versus Board of Education* (1954) and *Board of Education versus Rowley* (1982), as well as key legislation such as *Americans with Disabilities Act (ADA)* and *Individuals with Disabilities Education Act (IDEA)*. P/NP or letter grading.

**M130. Disability Policy and Services in Contemporary America. (4)** (Same as Gerontology M165 and Social Welfare M165.) Lecture, three hours. Limited to juniors/seniors. Growing numbers of people of all ages with disabilities are leading active and productive lives in American communities. Many others are struggling to lead such lives. Who are people with disabilities in contemporary America? How has U.S. responded over time to various needs and aspirations of people with disabilities, young and old? What demands have been made over time by disability advocates? How has government addressed demands of advocates for various disability populations? What do we know about extent to which public policies and programs are responsive to people in need? How do demographics, economics, and politics continue to influence evolving public policy responses? P/NP or letter grading.

**131. Alternative Approaches to Language Acquisition. (4)** Seminar, four hours. Examination of everyday experience of language delay, disorder, difference, and difficulty from disability studies perspective. Presenta-

tion of key concepts and terminology of culture, disability, and language use. Discussions and assignments critically evaluate findings on language acquisition by asking questions from disability studies about inclusion, individual- and socially constructed experience, and power. P/NP or letter grading.

**138XP. Applied Autism Intervention: Multidisciplinary Perspective. (4)** (Formerly numbered 138SL.) Seminar, 90 minutes; fieldwork, six hours. Service-learning course for undergraduate students in Early Childhood Partial Hospitalization Program (ECPHP). Introduction to history, theory, and practice of autism interventions and social and cultural factors that determine how society and medical profession understand autism as diagnostic category. Study of processes involved in identifying autism as represented in fields of psychology, neuroscience, and disability studies. Review of social versus medical model of disability and analysis of dominant as well as counter discourse on autism. Overview of broader educational issues for children living with disabilities as well as parent perceptions. P/NP or letter grading.

**M139. Perspectives on Autism and Neurodiversity. (4)** (Same as Psychology M139.) Seminar, three and one half hours. Genealogy of autism as diagnostic category and cultural phenomenon from its historical roots as new, rare, and obscure condition in early 1940s to its current contested status as minority identity and/or global epidemic. Examination of material sourced from various fields and disciplines invested in autism, including psychology, neuroscience, arts and humanities, popular media, anthropology, activism, and critical autism studies. Students encounter and analyze multiple perspectives on autism and put them in conversation with one another. Attention paid to way people on spectrum define, explain, and represent their own experiences of autism and discussion of what ramifications of these multiple framings are in context of autism intervention strategy and disability policy today. Letter grading.

**145. Mental Disability Law. (4)** Lecture, three hours. Examination of definitions and some characteristics of those conditions that legal systems recognize as mental disabilities. Review of evolution of these definitions through U.S. and Western histories, with focus on role conceptions of mental illness has played in various racial, gendered, and economic regimes. Exploration of primary approaches U.S. legal system takes to address needs, vulnerabilities, and rights of people with disabilities and of people with mental disabilities. Discussion of some key challenges and controversies affecting policy and practice in this area and varying strategies for engaging those challenges. P/NP or letter grading.

**M148. Sociology of Mental Illness. (4)** (Same as Sociology M148.) Lecture, three hours; discussion, one hour. Analysis of major sociological and social psychological models of madness. Study of social processes involved in production, recognition, labeling, and treatment of mental illness. P/NP or letter grading.

**M149. Disability Rights Law. (4)** (Same as Sociology M120.) Lecture, four hours. Examination of disability-related issues impacting people of all ages across wide spectrum of settings in both public and private sectors—from preschool to higher education, from military to workplace, and from intensely urban environments to online and virtual worlds. Topics range from persistent and recurring disputes to novel controversies fueled by new technologies and changing times. P/NP or letter grading.

**150. Human Rights, International Development, and Disability. (4)** Lecture, three hours. Basic introduction to theories of human rights, sociology of development, and contemporary rights-based development theory and practice. International disability rights movement to serve as case study, following passage of U.N. *Convention on Rights of Persons with Disabilities* in 2006 to changes on ground in developing countries that are occurring today. Offered in summer only. P/NP or letter grading.

**M157. Choreographing Disability. (4)** (Same as Dance M157.) Seminar, four hours. Through study of range of performance by, featuring, or about people who identify as disabled, reading and discussion of range of writing about experiences of disability and

process of making work about disability by key artists and thinkers. Introduction to concept of choreography as political/cultural idea broadly defined as scored movement and organization and behavior of bodies, as well as choreography as poetic form for expression of ideas, creative tool, or product. Viewing and discussion of work, and embodying ideas through movement and dance-making. P/NP or letter grading.

**M161. Sports, Normativity, and Body. (4)** (Same as Gender Studies M161.) Lecture, four hours. Since creation of International Olympic Committee in 1894, athletes with disabilities have had, and been denied, formal opportunities to compete with able-bodied athletes. Overview of some major topics of discussion concerning intersections of athletic competition and disability, addressing variety of perspectives and themes on disability and sport, such as passing, sports integration, competition versus charity, and masculinity. Sources include readings, film, television, and biographical writings that address sports, body and disability generally, and Special Olympics specifically. P/NP or letter grading.

**163A-163B. Autism Media Laboratory. (5-5)** Lecture, two hours; discussion, one hour. Course 163A is requisite to course 163B. People with autism who are nonspeaking face challenges fully participating in their communities. Exploration of documentary filmmaking as catalyst to educate greater community on importance of inclusion of people with disabilities. Students work together with community teachers, autistic self-advocates who are nonspeaking or minimally speaking, to create documentary short films. Students explore issues related to autism and disability while gaining exposure to observational, interview-based, and participatory documentary shooting and editing techniques. Letter grading.

**M164A. Documentary Production for Social Change: Mobility in Los Angeles. (5)** (Same as Urban Planning M164A.) Seminar, three hours; fieldwork, two hours. Exploration of documentary filmmaking as catalyst for social change, using daily commute in Los Angeles as case study. Introduction to issues of race, ethnicity, gender, disability, and class on experiences of commuting, access to public transportation, and car-based versus alternative (bike and pedestrian) forms of commuting. Exposure to observational, interview-based, and participatory documentary shooting and editing techniques, as well as social marketing strategies that are vital to documentary production and distribution. Letter grading.

**164B. Documenting Dis/Ability on Film. (4)** Lecture, four hours. Nonfiction digital media is used as contemporary form of investigation or research or is attached to research projects, built into websites, used in campaigns for social and political activism, and exhibited at film festivals. Social-issue documentaries appear more frequently on cable, public television, and Internet. Examination of how powerful documentaries still rely on well-told stories by passionate filmmakers. P/NP or letter grading.

**M166. Health-Care Ethics. (4)** (Same as Society and Genetics M166.) Lecture, three hours; discussion, one hour. Consideration of critical ethical concepts as they apply to health-care practice, medical decision-making, and medical technology development and use. Consideration of concepts drawn from philosophy, literature and culture, and political history including freedom, equality, justice, vitality, knowledge, kinship, mercy, illness, and disability. Examination of how concept of human dignity should shape health-care decisions such as physician-aided dying or selective abortion; proper relationship between history and concept of human rights and distribution of medical resources; how political and ethical category equality should structure development and use of genetic editing; how health-care concept of patient autonomy relates to political concept of liberty or freedom; how to evaluate good life, or what philosophers call flourishing, in medical treatment decisions for individuals or development of therapies. P/NP or letter grading.

**M171. Philanthropy: Confronting Challenges of Serving Disabled. (5)** (Same as Honors Collegium M170.) Lecture, three hours. Enforced requisite: course 101 or 101W. Study of history, philosophy, and

practice of philanthropy using lens of disability studies theory in conversation with important themes of charity, paternalism, and systems of dependency. Analysis of multiple perspectives of philanthropy to gain practical experience setting priorities and making philanthropic investments in Los Angeles-based non-profit organizations serving people with disabilities. Letter grading.

**M172. Care Work: Disability Justice and Health Care. (2)** (Same as Nursing M172.) Lecture, one hour; discussion, one hour. Exploration of nature, history, models, and propositions of care, care work, disability, disability justice movement, and health care. Consideration of intersections, interdependence, and complexities of formal and informal care webs and care economies between caregivers and receivers, which includes kin, advocates, disability communities, and health professionals. Use of multi-media, scholarly texts, and theoretical frameworks from disability justice, disability studies, film, gender studies, health, labor studies, law, nursing, and public policy to investigate the concepts of care and care work. Letter grading.

**M172XP. Care Work: Disability Justice and Health Care. (3)** (Same as Nursing M172XP.) Seminar, one hour. Corequisite: course M172. Exploration of nature, history, models, and propositions of care, care work, disability, disability justice movement, and health care. Consideration of intersections, interdependence, and complexities of formal and informal care webs and care economies between caregivers and receivers, which includes kin, advocates, disability communities, and health professionals. Use of multi-media, scholarly texts, and theoretical frameworks from disability justice, disability studies, film, gender studies, health, labor studies, law, nursing, and public policy to investigate the concepts of care and care work. Emphasis on community engagement with observational and collaborative interaction and learning in governmental, non-profit, community-based organizations, or health-care networks of disability care. Letter grading.

**M183. Being Human: Identity and Mental Illness. (5)** (Same as Honors Collegium M183 and Society and Genetics M183.) Seminar, three hours. Exploration of relationship between identity and mental illness through different approaches to nature and treatment of mental disorder, from biomedical accounts of brain-based pathology (and identity) to Mad Pride movement emphasis on mental diversity. Enduring philosophical questions regarding personal identity, consciousness, selfhood and mind-body relationship are investigated through consideration of conditions such as dissociative identity disorder, trauma, psychosis, autism, and depression. P/NP or letter grading.

**187. Special Topics in Disability Studies. (4)** Lecture, one hour; discussion, two hours (when scheduled). Variable topics in one area within disability studies. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**191. Variable Topics Senior Research Seminars: Disability Studies. (5)** Seminar, three hours. Enforced requisite: course 101 or 101W. Designed for advanced junior/senior Disability Studies minors. In-depth study of major themes in disability studies research. Themes vary by instructor and term. Students pursue independent research related to course theme, with guidance

from instructor, then share and critique other student works in progress. May be repeated for credit with topic change. Letter grading.

**M191F. Topics in Gender and Disability. (5)** (Same as Gender Studies M191F.) Seminar, three hours. In-depth study of major themes in disability studies and gender studies. Themes vary by instructor and term. Students pursue independent research related to course theme, with guidance from instructor, then share and critique other student works in progress. May be repeated for credit with topic change. Letter grading.

**194. Capstone Research Seminar. (2)** Seminar, two hours. Enforced requisite: course 195CE. Required of students pursuing Disability Studies minor. Integration of off-campus work with academic theories and concepts within field of disability studies. Students report on their internship experiences and analyze relationship between their internship and issues of policy, ethics, systemic responses to community needs, or personal and intellectual transformations. Students identify one faculty mentor and develop proposal for required capstone research project. Letter grading.

**195CE. Community and Corporate Internships in Disability Studies. (4)** Tutorial, to be arranged; field-work, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Engagement. Students complete weekly written assignments, attend biweekly meetings with graduate student instructor, and write final research paper. Faculty mentor and graduate student instructor construct series of reading assignments that examine issues related to internship site. May be repeated for credit with consent of Center for Community Engagement. No more than 8 units may be applied toward major; units applied must be taken for letter grade. May not be applied toward concentration or distribution requirements. Individual contract with supervising faculty member required. Letter grading.

**196. Research Apprenticeship in Disability Studies. (4)** Tutorial, one hour. Limited to junior/senior Disability Studies minors. Entry-level research apprenticeship under guidance of faculty mentors affiliated with Disability Studies minor. Collaboration with faculty mentors on their research in area related to disability studies. May be repeated for credit. Individual contract required. Letter grading.

**198A-198B. Honors Research in Disability Studies. (2-4)** Tutorial, one hour. Enforced requisite: course 101 or 101W. Course 198A is enforced requisite to 198B. Limited to juniors/seniors. Required capstone course to Disability Studies minor for students pursuing College Honors. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. In Progress (198A) and letter (198B) grading.

**198C. Honors Research in Disability Studies. (2 to 3)** Tutorial, one hour. Limited to juniors/seniors. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

**199A-199B. Directed Research in Disability Studies. (2-4)** Tutorial, one hour. Enforced requisite: course 101 or 101W. Course 199A is enforced requisite to 199B. Limited to juniors/seniors. Required capstone course to Disability Studies minor. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. In Progress (199A) and letter (199B) grading.

**199C. Senior Project in Disability Studies. (2 to 3)** Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. Letter grading.

## Graduate Course

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate,

or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

## Faculty Roster

### Professors

Vassilis Angelopoulos, PhD  
Jonathan M. Aurnou, PhD  
T. Mark Harrison, PhD  
David K. Jacobs, PhD  
David C. Jewitt, PhD  
Abby Kavner, PhD  
Carolina R. Lithgow-Bertelloni, PhD (*Louis B. and Martha B. Slichter Endowed Professor of Geosciences*)  
Craig E. Manning, PhD  
Jean-Luc Margot, PhD  
Kevin D. McKeegan, PhD  
Jonathan L. Mitchell, PhD  
William I. Newman, PhD  
David A. Paige, PhD  
Gilles F. Peltzer, PhD  
Edwin A. Schauble, PhD  
Hilke E. Schlichting, PhD  
J. William Schopf, PhD  
Lars P. Stixrude, PhD  
Tina I. Treude, PhD  
Aradhna K. Tripathi, PhD  
Marco C. Velli, PhD  
An Yin, PhD  
Edward D. Young, PhD

### Professors Emeriti

Peter Bird, PhD  
Friedrich H. Busse, PhD  
Paul M. Davis, PhD  
Wayne A. Dollase, PhD  
Clarence A. Hall, Jr., PhD  
Raymond V. Ingersoll, PhD  
Margaret G. Kivelson, PhD  
Robert L. McPherron, PhD  
Arthur L. Montana, PhD  
Walter E. Reed, PhD  
Bruce N. Runnegar, PhD  
Christopher T. Russell, PhD  
Gerald Schubert, PhD  
Ronald L. Shreve, PhD  
Raymond J. Walker, PhD

### Associate Professors

Caroline D. Beghein, PhD

Lingsen Meng, PhD (*Leon and Joanne V.C. Knopoff Professor of Physics and Geophysics*)

Seugli Moon, PhD  
Ulrike Seibt, PhD

### Assistant Professors

Mackenzie D. Day, PhD  
Hao Cao, PhD  
Peng Ni, PhD

### Adjunct Professors

Yingjuan Ma, PhD  
Robert C. Newton, PhD  
Edward J. Rhodes, PhD

## Overview

The disciplines of geology, geochemistry, geophysics, paleobiology, and space physics are concerned with the structure and evolution of the solar system, Earth, and life: essentially, the physical environment and its interaction with biota. These studies entail the application of fundamental physics and chemistry to a broad subject area stretching from astronomy at one extreme to biology at the other. Areas that are emphasized in the Department of Earth, Planetary, and Space Sciences include isotope and trace element analyses, petrology and mineralogy, sedimentology, paleobiology and organic geochemistry, structural geology and tectonophysics, seismology, the Earth's interior, planetary physics, and space plasmas.

## Career Prospects

The variety of techniques applied lead to several concentrations within the three main disciplines. Students completing their studies with a BS or MS degree usually are employed by industry. Many are employed in environment-related activities; others are involved in mineral or oil exploration or in construction. Students attaining the PhD degree are usually employed by universities or governmental and industrial research groups.

The Bachelor of Arts program in Earth and Environmental Science is intended to provide a broad background in Earth sciences that is especially appropriate for students intending to become K through 12 teachers in Earth, physical, or life sciences. It may also be of interest to students who plan careers in business, dentistry, environmental sciences, government, journalism, law, medicine, or public health. Those who intend to become professional geologists, geochemists, or geophysicists and/or to continue into graduate studies in Earth or space sciences are urged to pursue one of the BS degrees.

## Undergraduate Majors

### Earth and Environmental Science BA

#### Capstone Major

The Earth and Environmental Science major is a designated capstone major. Students are re-

quired to use skill and knowledge sets from previous coursework to complete a field-based research project from conception to written report. Projects must be placed into context within the current state of understanding, and results are presented at a research symposium or published as a brief report.

### Learning Outcomes

The Earth and Environmental Science major has the following learning outcomes:

- Use of skills and knowledge set from coursework
- Definition of research methodology and data
- Placement of project into context of current state of understanding
- Completion of research project from conception to written report
- Oral presentation at a research symposium, or brief published report, of field experience results

### Entry to the Major

#### Transfer Students

Transfer applicants to the Earth and Environmental Science major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course with laboratory, one general chemistry course with laboratory for majors, and one calculus course. One introductory biology course (evolution) with laboratory, a second general chemistry course, and one calculus-based physics course with laboratory are recommended.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

### Requirements

#### Preparation for the Major

*Required:* Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17 or Clusters 70A); one course from Earth, Planetary, and Space Sciences 51, 61, or M71; Chemistry and Biochemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L; Life Sciences 7B or another introductory organismic biology course; Mathematics 3A and 3B, or 31A and 31B; Physics 1A or 5A.

#### The Major

*Required:* Two courses from Earth, Planetary, and Space Sciences 103A, 103B, 111, 112; one capstone 199 research course in the senior year; four additional upper-division courses from Earth, Planetary, and Space Sciences other than M187, and 189 through 199; two courses from Geography 101, M102, M103, 116, 120, M126, M131, 136.

### Policies

#### Preparation for the Major

Each course must be passed with a minimum grade of C-.

## Engineering Geology BS

### Capstone Major

The Engineering Geology major is a designated capstone major. Students are required to use skill and knowledge sets from previous coursework to complete a field-based research project from conception to written report. Projects must be placed into context within the current state of understanding, and results are presented at a research symposium or published as a brief report.

### Learning Outcomes

The Engineering Geology major has the following learning outcomes:

- Use of skills and knowledge set from coursework
- Definition of research methodology and data
- Placement of project into context of current state of understanding
- Completion of research project from conception to written report
- Oral presentation at a research symposium, or brief published report, of field experience results

### Entry to the Major

#### Transfer Students

Transfer applicants to the Engineering Geology major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course with laboratory, one general chemistry course with laboratory for majors, and one year of calculus. A second general chemistry course and one course of calculus-based physics with laboratory are recommended.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

### Requirements

#### Preparation for the Major

*Required:* Three courses from Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17 or Clusters 70A), 51, 61, M71; Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering M20; Mathematics 31A, 31B, 32A, 33A; Physics 1A, 1B, 1C, 4AL, 4BL. Recommended: Mathematics 32B.

#### The Major

*Required:* Earth, Planetary, and Space Sciences 103A, 103B, 111, 112, 136A, 139; four courses selected from Civil and Environmental Engineering 108, 120, 121, 125, 129L, 150, 151, C158; two capstone field research courses (Earth, Planetary, and Space Sciences 121, 121F).

### Policies

#### Preparation for the Major

Each course must be passed with a minimum grade of C-.

## Geology BS

### Capstone Major

The Geology major is a designated capstone major. Students are required to use skill and knowledge sets from previous coursework to complete a field-based research project from conception to written report. Projects must be placed into context within the current state of understanding, and results are presented at a research symposium or published as a brief report.

### Learning Outcomes

The Geology major has the following learning outcomes:

- Use of skills and knowledge set from coursework
- Definition of research methodology and data
- Placement of project into context of current state of understanding
- Completion of research project from conception to written report
- Oral presentation at a research symposium, or brief published report, of field experience results

### Entry to the Major

#### Transfer Students

Transfer applicants to the Geology major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course with laboratory, one calculus course, and one general chemistry course with laboratory for majors. A second calculus course and a second general chemistry course are recommended.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

### Requirements

#### Preparation for the Major

*Required:* Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17 or Clusters 70A), 51, 61, M71; Chemistry and Biochemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L; Life Sciences 7B; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 4AL, and 4BL, or 5A and 5B.

#### The Major

*Required:* Earth, Planetary, and Space Sciences 103A, 103B, 111, 112; two capstone field research courses (121, 121F); five additional 100-level Earth, planetary, and space sciences courses (except Earth, Planetary, and Space Sciences M187, and 189 through 199).

Students may opt to take courses from the following groups.

*Computational Geosciences:* Earth, Planetary, and Space Sciences 136A, 150, M171

*Geobiology:* Earth, Planetary, and Space Sciences CM114A, CM114B, 116, M118

*Geochemistry:* Earth, Planetary, and Space Sciences 103C, C106, C107, C109, C113, 152, 153

*Planetary science:* Earth, Planetary, and Space Sciences 136A, C143, 155, C179

*Surface processes:* Earth, Planetary, and Space Sciences 136A, C143, 150, C162, 165

*Tectonics/Structural Geology:* Earth, Planetary, and Space Sciences 119, 133, 136A, 165

### Honors Program

The honors program in geology is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a faculty member.

Students must complete a minimum of two terms (8 units) of Earth, Planetary, and Space Sciences 198 leading to the preparation of a satisfactory honors thesis.

### Policies

#### Preparation for the Major

Each course must be passed with a minimum grade of C–.

#### Honors Program

Requirements for admission to candidacy are the same as those required for admission to the Honors Programs of the College of Letters and Science. Qualified students wishing to enter the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geology are awarded at graduation to those students who have a cumulative grade-point average of 3.5, have completed at least 90 graded units at the University of California, and have completed a minimum of two terms (8 units) of Earth, Planetary, and Space Sciences 198 leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

## Geophysics BS

### Capstone Major

The Geophysics major is a designated capstone major. Students are required to use skill and knowledge sets from previous coursework to complete a field-based research project from conception to written report. Projects must be placed into context within the current state of understanding, and results are presented at a research symposium or published as a brief report.

### Learning Outcomes

The Geophysics major has the following learning outcomes:

- Use of skills and knowledge set from coursework
- Definition of research methodology and data
- Placement of project into context of current state of understanding
- Completion of research project from conception to written report
- Oral presentation at a research symposium, or brief published report, of field experience results

### Entry to the Major

#### Transfer Students

Transfer applicants to the Geophysics major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course with laboratory, one general physics course with laboratory for majors, and one year of calculus. A third calculus course and a second calculus-based physics with laboratory course are recommended.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

### Requirements

#### Preparation for the Major

*Required:* Earth, Planetary, and Space Sciences 51, 61, M71, and one course from 1 (preferred) through 15; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

#### The Major

*Required Core:* Earth, Planetary, and Space Sciences 136A, 171, one capstone field research course (136C), one course from 152, 153, 154, 155; Physics 105A, 105B, 110A, 110B, 131.

At least three courses from one of the following areas are also required: (1) *applied geophysics*—Earth, Planetary, and Space Sciences 111, 112, 122, 136B, M140, 150, 152, (2) *marine geophysics*—courses 119, 122, 136B, M140, 150, 153, (3) *planetary geophysics*—courses M140, 150, 153, 154, 155, (4) *solid earth geophysics*—courses 119, 122, 136B, M140, 150, 152, or (5) *space physics*—Atmospheric and Oceanic Sciences C170, Earth, Planetary, and Space Sciences 136B, M140, 154, 155, Physics M122. Any course used to satisfy an area requirement cannot also be applied toward the core requirements listed above.

### Honors Program

The honors program in geophysics is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a faculty member.

Students must complete a minimum of two terms (8 units) of Earth, Planetary, and Space Sciences 198 leading to the preparation of a satisfactory honors thesis.

### Policies

#### Preparation for the Major

Each course must be passed with a minimum grade of C–.

#### The Major

Substitutions of equivalent courses from engineering or other physical sciences departments must be approved by the undergraduate adviser.

#### Honors Program

Requirements for admission to candidacy are the same as those required for admission to the Honors Programs of the College of Letters and Science. Qualified students wishing to enter

the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geophysics are awarded at graduation to those students who have a cumulative grade-point average of 3.5, have completed at least 90 graded units at the University of California, and have completed a minimum of two terms (8 units) of Earth, Planetary, and Space Sciences 198 leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

## Undergraduate Minors

### Earth and Environmental Science Minor

In the Earth and Environmental Science minor students study the interaction of the solid Earth, oceans, and atmosphere with human activities. The minor provides background in Earth sciences that is especially appropriate for students intending to become K through 12 teachers in Earth, physical, or life sciences. It may also be of interest to students who plan careers in business, dentistry, environmental sciences, government, journalism, law, medicine, or public health.

#### Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better.

#### The Minor

*Required Lower-Division Courses (8 or 9 units):* Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17 or Clusters 70A), and one course from Earth, Planetary, and Space Sciences 51, 61, or M71; or two courses from Earth, Planetary, and Space Sciences 51, 61, or M71.

*Required Upper-Division Courses (20 units minimum):* Five 100-level Earth, planetary, and space sciences courses (except Earth, Planetary, and Space Sciences M187, and 189 through 199).

#### Policies

A minimum of 20 upper-division units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

### Geochemistry Minor

Geochemistry emphasizes use of minerals, magmas, elements, and isotopes to date events, determine rates, and track matter through its cycles in the planets and biosphere. These skills are valuable in environmental and natural-resource work and anthropology, as well as in studying the histories of the planets.

### Admission

To enter the Geochemistry minor, students must have an overall grade-point average of 2.0 or better.

#### The Minor

*Required Lower-Division Courses (9 units):* Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17 or Clusters 70A), 51.

*Required Upper-Division Courses (20 to 26 units):* Two courses from Earth, Planetary, and Space Sciences C106, C107, C109, and three courses from 103A, 103B, 103C, C106 or C107 or C109 (whichever course was not applied above), C113, CM114A or CM114B, 152, 153.

#### Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

### Geology Minor

Geology is the study of the surface of the Earth and the rocks and processes that created it. Field methods, interpretation of rocks, and modern plate-tectonic models are emphasized, with the goals of finding valuable or hazardous materials and inferring geologic history. These skills are valuable in engineering, urban planning, and environmental and resource studies.

#### Admission

To enter the Geology minor, students must have an overall grade-point average of 2.0 or better.

#### The Minor

*Required Lower-Division Courses (8 or 9 units):* Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17 or Clusters 70A), and one course from Earth, Planetary, and Space Sciences 51, 61, or M71; or two courses from Earth, Planetary, and Space Sciences 51, 61, or M71.

*Required Upper-Division Courses (22 units):* Two courses from Earth, Planetary, and Space Sciences 103A, 103B, 111, 112, and three additional 100-level Earth, planetary, and space sciences courses (except Earth, Planetary, and Space Sciences M187, and 189 through 199).

#### Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the mi-

nor. Successful completion of the minor is indicated on the transcript and diploma.

### Geophysics and Planetary Physics Minor

Classical physics, supported by field data, mathematics, and computing, is used to understand diverse processes from ocean circulation and earthquakes to the formation of planets and the flow of particles and electromagnetic fields in space. These skills are valuable in environmental, engineering, and resource studies and more broadly in any kind of career that requires quantitative analysis.

#### Admission

To enter the Geophysics and Planetary Physics minor, students must have an overall grade-point average of 2.0 or better.

#### The Minor

*Required Lower-Division Courses (8 or 9 units):* Earth, Planetary, and Space Sciences 1 (or any course from Earth, Planetary, and Space Sciences 3 through 17, 51, 61, or Clusters 70A), M71.

*Required Upper-Division Courses (20 units):* Earth, Planetary, and Space Sciences 136A, M171, and three courses from M140, 152, 153, 154, 155.

#### Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Majors

### Geochemistry MS, CPhil, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Geology MS, CPhil, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Geophysics and Space Physics MS, PhD

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Planetary Science MS, PhD

### Requirements

In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Earth, Planetary, and Space Sciences

### Lower-Division Courses

**1. Introduction to Earth Science. (5)** Lecture, three hours; laboratory, two hours; field days. Not open to students with credit for or currently enrolled in course 100. Elements of Earth science; study of Earth materials; nature and interpretation of geologic evidence; study of geologic processes; historical aspects of geology. Mandatory field trips introduce students to solving of geologic problems in field. P/NP or letter grading.

**3. Astrobiology. (5)** Lecture, three hours; discussion, one hour. Origin, evolution, distribution, and future of life on Earth and in universe. Course material primarily from planetary and Earth sciences, paleontology and biology, astronomy, chemistry, and physics. P/NP or letter grading.

**5. Environmental Geology of Los Angeles. (4)** Lecture, three hours; discussion, two hours; field trips. Geologic hazards and natural resources of greater Los Angeles region. Topics include Los Angeles geologic hazards such as earthquakes, landslides, and floods; Southern California oil fields; gold and gem mining in region; local beach processes; and Los Angeles water resource problems. Field trips to San Andreas fault, California aqueduct, active landslides, and historic gold mines. P/NP or letter grading.

**M7. Perils of Space: Introduction to Space Weather. (4)** (Same as Atmospheric and Oceanic Sciences M7.) Lecture, four hours. Concepts of plasma physics. Dynamic sun, solar wind, and Earth's magnetosphere and ionosphere. Space storms and substorms and their impacts on astronauts, spacecraft, and surface power and communication grids. P/NP or letter grading.

**8. Earthquakes. (5)** Lecture, three hours; laboratory, one hour; one field day. Causes and effects of earthquakes. Plate motion, frictional faulting, earthquake instability, wave propagation, earthquake damage, and other social effects. Hazard reduction through earthquake forecasting and earthquake-resistant design. P/NP or letter grading.

**9. Solar System and Planets. (4)** Lecture, three hours; discussion, one hour. Properties of sun, planets, asteroids, and comets. Astronomical observations relevant to understanding solar system and its origin. Dynamical problems, including examination of fallacious hypotheses. Meteoritic evidence regarding earliest his-

tory of solar system. Chemical models of solar nebula. Space exploration and its planning. P/NP or letter grading.

**10. Exploring Mars, Red Planet. (4)** Lecture, three hours; discussion, one hour. History and future of Mars exploration, origin of planet, surface materials, and atmosphere. History of climate. Questions regarding water and life. Scientific and practical issues in mission design. P/NP or letter grading.

**13. Natural Disasters. (5)** Lecture, three hours; discussion, one hour; one field day. Global urbanization together with historical demographic population shift to coastal areas, especially around Pacific Ocean's Ring of Fire, are placing increasingly large parts of this planet's human population at risk due to earthquakes, volcanos, and tsunamis. Global climate change combines with variety of geologic processes to create enhanced risks from catastrophic mass movements (e.g., landslides), hurricanes, floods, and fires. Exploration of physical processes behind natural disasters and discussion of how these natural events affect quality of human life. P/NP or letter grading.

**15. Blue Planet: Introduction to Oceanography. (5)** Lecture, three hours; laboratory, two hours. Not open for credit to students with credit for or currently enrolled in Ecology and Evolutionary Biology 25. General introduction to geological, physical, chemical, and biological processes and history of Earth's global ocean system. P/NP or letter grading.

**16. Major Events in History of Life. (5)** Lecture, three hours; laboratory, two hours. Designed for nonmajors. History of life on Earth as revealed through fossil record. P/NP or letter grading.

**17. Dinosaurs and Their Relatives. (5)** Lecture, three hours; laboratory, two hours; one optional field trip. Designed for nonmajors. Exploration of biology, evolution, and extinction of dinosaurs and close relatives, in context of history of biosphere. Information from paleontology, biology, and geology. P/NP or letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**20. Natural History of Southern California. (5)** Lecture, two hours; laboratory, three hours; five field weekends. Identification, distribution, diversity of native plants and communities; identification and interpretation of rocks, minerals, and geologic features and geologic history of physiographic regions of Southern California. Emphasis on field-based learning. P/NP or letter grading.

**51. Mineralogy: Earth and Planetary Materials. (5)** Lecture, three hours; laboratory, four hours. Enforced requisite: course 1. Recommended: completion of chemistry requirement. Principles of mineralogy. Mineral structure and bonding and crystal chemistry, with focus on materials of interest for Earth and planetary sciences and major rock-forming minerals. Laboratory study of relationship between mineral structure and properties, including hand sample identification, microscopy (optical and electron), X-ray diffraction, and spectroscopy techniques. P/NP or letter grading.

**61. Geologic Maps. (4)** Lecture, two hours; laboratory, three hours; five field days. Enforced requisite: course 1. Planning, creation, and interpretation of geologic maps, including both practical and philosophical problems that arise. Topographic and geologic mapping in field. Interpretation of published maps in laboratory. P/NP or letter grading.

**M71. Introduction to Computing for Geoscientists. (4)** (Same as Atmospheric and Oceanic Sciences M71.) Lecture, three hours; laboratory, 90 minutes; outside computing study, six to 10 hours. Introduction to writing programs, visualization of geoscience data, and comparison with models. P/NP or letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**100. Principles of Earth Science. (4)** Lecture, three hours. Designed for nonmajors. Not open to students with credit for course 1. Fundamentals of physical geology and Earth history; major problems of geology, such as continental drift and development of large-scale features of Earth; physical and biological evolution. P/NP or letter grading.

**101. Earth's Energy: Diminishing Fossil Resources and Prospects for Sustainable Future. (4)** Lecture, three hours; laboratory, two hours; two optional field trips. Preparation: one lower-division atmospheric sciences, chemistry, Earth sciences, or physics course. Earth's energy resources (fossil fuels and alternatives) from Earth science and sustainability perspective. P/NP or letter grading.

**103A. Igneous Petrology. (5)** Lecture, two to three hours; laboratory, six hours; field trips. Enforced requisites: course 51, Chemistry 14B and 14BL, or 20B and 20L, Mathematics 3B or 31B. Mineralogy, chemical composition, and field occurrence of igneous rocks with reference to their origin by melting in earth. Introduction to thermodynamics as applied to petrology. Formation of magma, its movement, eruption, crystallization, and chemical evolution. Petrologic structure of crust and mantle and its relation to seismology. Overview of petrological and chemical evolution of Earth, moon, and other planets from their origin to present. P/NP or letter grading.

**103B. Sedimentary Petrology. (5)** Lecture, two to three hours; laboratory, six hours; field trips. Enforced requisite: course 103A. Recommended: course 61. Study of sedimentary rocks based on characteristics of sedimentary particles and dynamics of depositional processes. Lectures focus on development of depositional facies models, and laboratories emphasize recognition of sedimentary deposits from each major depositional facies. P/NP or letter grading.

**103C. Metamorphic Petrology. (5)** Lecture, two to three hours; laboratory, six hours; field trips. Enforced requisite: course 103A. Interpretation of metamorphic rocks based on field occurrence, mineralogical composition, texture, and application of physical and chemical principles. P/NP or letter grading.

**C106. Physical Geochemistry. (4)** Lecture, three hours. Requisite: course 51. Basic principles of physical chemistry for geologic applications. Thermodynamics and kinetics of reactions among minerals, natural waters, and magmas; construction and interpretation of phase diagrams; case studies of important geochemical and environmental issues. Concurrently scheduled with course C206. P/NP or letter grading.

**C107. Geochemistry. (4)** Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical sciences students. Origin and abundance of elements and their isotopes; distribution and chemistry of elements in Earth and its environment. Concurrently scheduled with course C207. P/NP or letter grading.

**C109. Isotope Geochemistry. (4)** Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical and biological sciences students. Theoretical aspects of isotope behavior: stable and radiogenic isotopes. Principles of geochronology. Use of isotopes as tracers in crust and mantle processes.

Stable isotopes as indicators of environment and paleoclimate. Concurrently scheduled with course C209. P/NP or letter grading.

**111. Stratigraphic and Field Geology. (6)** Lecture, two hours; laboratory, three hours; fieldwork, eight hours per week. Enforced requisites: courses 61, 112. Principles of stratigraphy; geologic mapping of selected area; preparation of geologic report. Letter grading.

**111G. Field Geology. (2 to 4)** Lecture, two hours; laboratory, three hours; fieldwork, one day per week. Designed for graduate students. Geologic mapping, principles of stratigraphy, structural geology, and map interpretation. S/U or letter grading.

**112. Structural Geology. (5)** Lecture, three hours; laboratory, six hours. Requisites: courses 1, 61. Recommended: course 51. Planar and linear structures at different scales in sedimentary, metamorphic, and igneous rocks. Faults and folds, their description, classification, and kinematic and dynamic analysis. Deformation, strength, fracture, and rheological properties of rocks. P/NP or letter grading.

**C113. Biological and Environmental Geochemistry. (4)** Lecture, three hours. Requisites: Chemistry 14A and 14B (or 20A and 20B), Mathematics 3A, 3B, and 3C (or 31A and 31B). Recommended: at least one lower-division Earth, planetary, and space sciences course. Intended for junior/senior life and physical sciences students. Study of chemistry of Earth's surface environment and interplay between biology, human activity, and geology. Introduction to origin and composition of Earth, including atmosphere, crust, and hydrosphere. Examination of how these reservoirs are affected by biological cycles and feedbacks to biological evolution and diversity. Local and global-scale movements of biologically important elements like carbon, nitrogen, and phosphorus. Concurrently scheduled with course C213. P/NP or letter grading.

**CM114A. Aquatic Geomicrobiology: Metabolisms. (4)** (Formerly numbered CM114.) (Same as Atmospheric and Oceanic Sciences CM114A.) Lecture, three hours. Recommended requisite: course C107 or Atmospheric and Oceanic Sciences M105. Study of fundamental geomicrobiological metabolisms and biogeochemical reactions occurring in aquatic systems and how these processes interact with environment. Metabolisms include photoautotrophic (anoxygenic and oxygenic photosynthesis), chemoheterotrophic (fermentation and respiration of organic matter), photoheterotrophic (organic matter degradation with light), and chemoautotrophic (iron, nitrogen, manganese, methane, and sulfur oxidation) pathways. Introduction of principals of bioenergetics (adenosine triphosphate production, Gibbs free energy, chemiosmosis, thermodynamic calculations) and biological isotope fractionation. Concurrently scheduled with course CM214A. P/NP or letter grading.

**CM114B. Aquatic Geomicrobiology: Environments. (4)** (Same as Atmospheric and Oceanic Sciences CM114B.) Lecture, three hours. Recommended requisite: course CM114A. Broad overview of aquatic geomicrobiological processes in diverse environmental settings (e.g., sediments, microbial mats, water column, wetlands, cold seeps, hydrothermal vents, deep biosphere), and how these processes drive element cycling on Earth. Concurrently scheduled with course CM214B. P/NP or letter grading.

**116. Paleontology. (4)** Lecture, three hours; laboratory, three hours; field trips. Requisite: Life Sciences 7A or 7B. Review of major groups of fossil organisms and their significance in geology and biology. P/NP or letter grading.

**M118. Advanced Paleontology. (4)** (Same as Ecology and Evolutionary Biology M145.) Lecture, three hours. Requisite: course 116 or Ecology and Evolutionary Biology 110 or 117. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. P/NP or letter grading.

**119. Continental Drift and Plate Tectonics. (4)** Lecture, three hours; computer laboratory/discussion, one hour. Requisite: course 1 or 100. Designed for juniors/

seniors in physical sciences. Exploration of history and phenomenology of plate tectonics theory, with particular focus on observables and kinematics. Evidence supporting plate tectonics theory (magnetic anomalies, seismicity, gravity). Tectonic, igneous, and metamorphic processes at plate boundaries. Focus on plate kinematics both past and present and learn how to compute and plot velocities. Exploration of plate dynamics including driving mechanism and convection. P/NP or letter grading.

**120. Rubey Colloquium: Major Advances in Earth, Planetary, and Space Sciences. (4)** Lecture, three hours. Designed for juniors/seniors. Lectures on major advances in Earth science offered by distinguished authorities (including regular faculty members). Supervision of continuity and assessment of student performance by faculty member. Content varies from year to year. If laboratory work is required, course 199 must be taken concurrently. P/NP or letter grading.

**121. Advanced Field Geology. (4)** Lecture, two hours. Requisites: courses 61, 103A, 111, 112. Problems in regional geology and field research; preparation of written geologic reports. P/NP or letter grading.

**121F. Advanced Field Geology: Fieldwork. (4)** Fieldwork, 20 hours. Advanced techniques in field geologic mapping and preparation of geologic maps and cross-sections, including igneous, metamorphic, and sedimentary terrains. P/NP or letter grading.

**122. Introduction to Seismology. (4)** Lecture, three hours; discussion, two hours. Enforced requisites: Mathematics 31A, 31B, 32A, Physics 1A (or 1AH), 1B (or 1BH). Recommended: course 71, Mathematics 33B. Earth mantle and core. Elasticity, seismic wave equation, ray theory, travel time inversion, surface waves, free oscillations. Earthquakes and source theory. P/NP or letter grading.

**123. Geosciences Outreach. (4)** Lecture, two hours; discussion, two hours; field days. Recommended requisites: at least three college-level life sciences or physical sciences courses. Introduction to pedagogical approaches and methods used in geosciences community to educate demographically diverse populations, including K-12 through higher-education audiences and general public. Focus on development of motivational and public communication skill sets as practiced at outreach events and demonstrations, including communication of science in multicultural settings. Active participation required in minimum of three scheduled outreach events over course of term, providing perspective and basis for follow-up discussions on critical geosciences literacy at local, state, and national levels. Letter grading.

**125. Volcanoes. (4)** Lecture, three hours; laboratory, three hours; field trip(s). Requisite: course 1. Recommended: course 103A, Physics 1A or 1AH or 6A. Types of volcanism. Physics of magma chambers, volcanic plumbing, explosive and effusive eruptions as illustrated by historical examples. Practical methods of volcano monitoring, with field trip. P/NP or letter grading.

**C126. Advanced Petrology. (4)** Lecture, three hours; laboratory, three hours; field trips. Enforced requisite: course 103A. Understanding genesis of igneous rocks based on geochemical, tectonophysical, and other geological evidence and principles. Concurrently scheduled with course C226. P/NP or letter grading.

**133. Historical and Regional Geology. (4)** Lecture, three hours; discussion, two hours; field trips. Requisite: course 61. Recommended requisite: course 112. Principles of historical geology. Physical evolution of Earth, especially North America. One area of Earth to be investigated in detail, with emphasis on its geologic evolution through time. Letter grading.

**136A. Applied Geophysics. (4)** Lecture, three hours; laboratory, three hours. Requisites: course M71; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 4AL, and 4BL, or 5A and 5B. Methods and knowledge involved in investigation of near-surface geophysics. Covers gravity fields, wave equations, seismic ray theory, reflection and refraction, seismic interpretation, basic earthquake source theory, and introduction to magnetic fields and electrical resistivity. P/NP or letter grading.

**136B. Applied Geophysics. (4)** Lecture, three hours; laboratory/field trips, six hours. Preparation: knowledge of MATLAB. Enforced requisite: course 136A. Principles and techniques of exploration for mineral deposits using natural and artificial electric and magnetic fields. Methods include self potential, resistivity, induced polarization, electromagnetics, magnetotellurics, magnetics. P/NP or letter grading.

**136C. Field Geophysics. (6)** Lecture, three hours; discussion, one hour; laboratory, two hours; fieldwork, 10 hours. Enforced requisite: course 136A. Application of seismic, gravimetric, magnetic, electrical, and other geophysical methods to geologic and engineering problems. Practical aspects of geophysical exploration, including planning, data collection, data reduction, and interpretation. Fieldwork on unsolved problems (week-long field trip). P/NP or letter grading.

**137. Petroleum Geology. (4)** Lecture, three hours. Requisites: courses 61, 111. Geology applied to exploration for and production of natural gas and petroleum; techniques of surface and subsurface geology; problems of petroleum geology. P/NP or letter grading.

**139. Engineering and Environmental Geology. (4)** Lecture, three hours; discussion, one hour. Requisite: course 1 or 100. Recommended: course 111. Principles and practice of soil mechanics and foundation engineering in light of geologic conditions, recognition, prediction, and control or abatement of subsidence, landslides, earthquakes, and other geologic aspects of urban planning and subsurface disposal of liquids and solid wastes. P/NP or letter grading.

**M140. Introduction to Fluid Dynamics. (4)** (Same as Atmospheric and Oceanic Sciences M120.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Fluid statics and thermodynamics. Kinematics. Conservation laws and equations of fluid motion. Circulation theorems and vorticity dynamics. Rotating frame. Irrotational flow. Letter grading.

**C141. Basin Analysis. (4)** Lecture, three hours; laboratory, three hours. Requisites: courses 103B, 111. Mechanisms of sedimentary basin development, flexural and thermal subsidence, isostasy, subsidence analysis, quantitative basin modeling, sediment provenance, tectonic settings. Concurrently scheduled with course C241. P/NP or letter grading.

**C143. Advanced Physical Sedimentology. (4)** Lecture, three hours; fieldwork, three hours. Requisites: courses 103B, 111, or equivalent. Advanced topics related to sediments, sedimentary rocks, and information that can be extracted from each. Interpretation of depositional environment from complex sedimentary structures and textures. Includes field and lecture component and builds on previous sedimentology basics. Concurrently scheduled with course C243. P/NP or letter grading.

**150. Remote Sensing for Earth Sciences. (4)** Lecture, three hours. Recommended requisites: courses 1, 61. Designed for juniors/seniors and graduate students. Remote sensing related to development of natural resources. Characteristics of electromagnetic spectrum and review of remote sensing devices. Applicability to land-use classification, soil survey, urban studies, vegetation classification; emphasis on geologic interpretation of imagery. P/NP or letter grading.

**152. Physics of Earth. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 33A, Physics 1C (or 1CH). Crust-to-core tour of Earth and physics used to explore it. Isostasy, plate tectonics, mantle convection, and geodynamo as discovered with tools of elasticity, fluid mechanics, and thermodynamics. P/NP or letter grading.

**153. Oceans and Atmospheres. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). Physics and chemistry of Earth's oceans and atmosphere; origin and evolution of planetary atmospheres; biogeochemical cycles, atmospheric radiation and climate, energetics and dynamics of oceanic and atmospheric circulation systems. P/NP or letter grading.

**154. Solar Terrestrial Physics. (4)** Lecture, three hours; discussion, one hour. Enforced requisite or corequisite: Physics 110A. Particle and electromagnetic emis-

sions from sun under quiet and under disturbed conditions. Solar wind. Magnetospheres and ionospheres of Earth and other planets. Geomagnetic phenomena and aurora. P/NP or letter grading.

**155. Planetary Physics. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). Formation of solar nebula; origin of planets and their satellites; comets, asteroids, and meteorites; celestial mechanics and dynamics; physics of planetary interiors, surfaces, and atmospheres. P/NP or letter grading.

**M156. Introduction to Plasma Science and Engineering. (4)** (Same as Electrical and Computer Engineering M185 and Physics M122.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: Electrical and Computer Engineering 101A or Physics 110B. Senior-level introductory course on electrodynamics of charged particles and their collective behavior in plasmas in laboratory, near-Earth space and astrophysical settings. Covers selected applications taken from fusion energy, space weather, materials processing, generation of coherent radiation and particle accelerators. Letter grading.

**C160. Field Seminar. (2 to 6)** Seminar, three hours; discussion, one hour; fieldwork, five to 20 days. Requisite: course 61. Field-based teaching and discussion forum that varies in focus from general geology through structure and tectonics, sedimentology, igneous and metamorphic petrology, volcanology, or other subdisciplines as prescribed. May be repeated for credit. Concurrently scheduled with course C260. P/NP or letter grading.

**C162. Application of Remote Sensing in Field. (4)** Fieldwork, five hours; laboratory, two hours. Requisite: course 150. Application of remote-sensing techniques to field situations. Digital analysis and interpretation of near-infrared, thermal-infrared, and microwave data from satellites and aircraft. Field observation of study site in California desert for testing hypotheses during week between Winter and Spring Quarters. Concurrently scheduled with course C262. P/NP or letter grading.

**165. Tectonic Geomorphology. (4)** Lecture, three hours; laboratory, two hours. Enforced requisite: course 1 or 8. Recommended: courses 61, 119, Mathematics 31A. Interactions between tectonic, climate, and surface processes shape landscapes over days to millions of years. Focus on quantifying how tectonic and surface processes interact to govern landscape evolution. How landscapes can provide insights into physical and chemical surface processes, including bedrock weathering, soil formation, hillslope transport, and river and glacial erosion. How tectonics, climate, and underlying lithology may influence those processes in landscapes. P/NP or letter grading.

**M171. Advanced Computing in Geosciences. (4)** (Formerly numbered 171.) (Same as Atmospheric and Oceanic Sciences M171.) Lecture, four hours. Enforced requisites: course M71, Mathematics 3A, 3B, and 3C (or 31A and 31B). Use of high level computing language to program microcontrollers to acquire laboratory-style experimental data. Misfit modeling and quantitative comparisons of acquired data sets and theory. Forward modeling from fundamental equations. Examples, experiments, and exercises from disciplines within geosciences. P/NP or letter grading.

**CM173. Earth Process and Evolutionary History. (6)** (Same as Ecology and Evolutionary Biology CM173.) Lecture, four hours; laboratory, three hours. Requisites: Chemistry 14A, 14B (or 20A, 20B), Life Sciences 1, 2, 3, and 4, or 7A, 7B, and 7C (or 7A and introductory course in geology). Exploration of relationship between physical processes, such as tectonics and climate, and how they affect surface and impact biology of Earth. Study of evolution of universe, Earth, and life, with integration of history of science, including Darwinian evolution and plate tectonics revolutions. Study of formation of matter offers tools to understand geologic process of climate and ecology of Earth. Past climate change to examine expected future human-influenced climate. Consideration of major events in history of life on Earth. Data and methods from geology, genetics, and geochemistry are integrated to recon-

struct past events. This reveals how Earth processes shaped life and how life shaped Earth. Concurrently scheduled with course CM273. Letter grading.

**C179. Search for Extraterrestrial Intelligence: Theory and Applications. (4)** Lecture, two hours; laboratory, two hours. Enforced requisites: Mathematics 31B, Physics 1B. Recommended: course 71, Computer Science 31, Physics 110B, Program in Computing 10A. Search for extraterrestrial intelligence (SETI) is based on number of astronomical, mathematical, statistical, and computational principles. Coverage of fundamental concepts in these disciplines in context of SETI: abundance and architecture of extrasolar planetary systems; radio astronomy, including wave propagation and dispersion; signal processing, including sampling theory and Fourier transforms; random processes, including Gaussian and Poisson statistics, and algorithm development. Design of observational program, acquisition of telescopic data, development of algorithms to analyze data, and writing of report on results. Concurrently scheduled with course C279. P/NP or letter grading.

**M187. Careers in Earth System, Environment, and Space Sciences. (1)** (Same as Atmospheric and Oceanic Sciences M187 and Environment M187.) Seminar, one hour. Examination of central role of science in understanding and addressing grand challenges in climate, earth and environment, and space exploration through seminars given by scientists, engineers, managers, and entrepreneurs from national laboratories and industry. Includes tour of National Aeronautics and Space Administration (NASA) Jet Propulsion Laboratory (JPL). Students engage speakers on science, career preparation, opportunities for undergraduate internships, and building fulfilling careers. P/NP grading.

**188. Special Topics in Earth, Planetary, and Space Sciences. (4)** Lecture/laboratory, to be arranged. Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. P/NP or letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**193A-193B-193C. Current Research in Earth, Planetary, and Space Sciences. (1-1-1)** Seminar, one hour. Limited to undergraduate students. Study of current topics in Earth, planetary, and space sciences, including participation in weekly department colloquium. May be repeated for credit. P/NP grading.

**C194. Research Topics in Earth, Planetary, and Space Sciences. (1)** Research group meeting, one to three hours. Designed for departmental students participating in research group. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. Concurrently scheduled with course C296. P/NP grading.

**198. Honors Research in Earth, Planetary, and Space Sciences. (4)** Tutorial, two hours. Limited to seniors. Individual research designed to broaden and deepen students' knowledge of some phase of Earth, planetary, and space sciences. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty mentor. May be repeated for maximum of 16 units. Individual contract required. Letter grading.

**199. Directed Research or Senior Project in Earth, Planetary, and Space Sciences. (2 to 8)** Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

## Graduate Courses

**200A. Introduction to Geophysics and Space Physics I: Solid Earth and Planets. (4)** Lecture, three hours. Requisites: Physics 105A, 110A, 112, 131. Geochemistry, cosmochemistry, and petrology; geotectonics; gravity field; seismology; heat transfer, thermal and mechanical evolution of mantle; core and geomagnetism; lunar and planetary interiors. S/U or letter grading.

**200B. Introduction to Geophysics and Space Physics II: Oceans and Atmospheres. (4)** Lecture, three hours. Requisites: Physics 105A, 110A, 112, 131. Evolution, chemistry, and heat balance of oceans and atmospheres; molecular spectra, radiative transfer, and planetary observations; dynamics of oceans and atmospheres. S/U or letter grading.

**200C. Introduction to Geophysics and Space Physics III: Plasmas—Aeronomy and Interplanetary Medium. (4)** Lecture, three hours. Requisites: Physics 105A, 110B, 112, 131. Solar surface features, heating and expansion of corona, solar wind, plasma and magnetic fields, interaction of solar wind with Earth, magnetospheric phenomena. S/U or letter grading.

**200D. Planetary Surfaces. (4)** Lecture, three hours. Introduction to basic physical processes (both exogenic and endogenic) shaping solid surfaces in solar system and description of their optical and thermophysical properties, with emphasis on simple physics-based approach. Discussion of current literature. S/U or letter grading.

**200E. Planetary Origins and Evolution. (4)** Lecture, four hours. Designed for graduate students who are interested in origins of planetary systems and history of solar system. Open to advanced undergraduate students with consent of instructor. Provides background needed to understand and/or participate in research related to formation and evolution of solar system and of other planetary systems. Description of star/planet formation process and subsequent evolution of planetary systems by integrating observations and theory. Fosters interdisciplinary knowledge and communication between Departments of Earth, Planetary, and Space Sciences and Physics and Astronomy graduate students and faculty members. S/U or letter grading.

**201. Classical Mechanics. (4)** Lecture, three hours. Kinematics, variational principles and Lagrange equations, rotational dynamics. Hamilton equations of motion, linear and nonlinear perturbation theory, applications to solar system. S/U or letter grading.

**202. Continuum Mechanics. (4)** Lecture, three hours. Kinematics and dynamics of continuous media. Properties of stress, strain, and rate-of-strain tensors. Conservation laws. Elasticity and viscosity. Heat transfer, boundary layers, and dynamical similarity. S/U or letter grading.

**203. Numerical Methods for Geosciences. (6)** Lecture, four hours. Preparation: knowledge of programming language. Requisite: Mathematics 33B. Computational precision and algorithms, linear algebra, nonlinear equations, functional approximation, integration, ordinary and partial differential equations, spectral and finite element methods, parallel computing. Sample programming exercises from Earth and space sciences. Letter grading.

**205. Inverse Theory and Data Interpretation. (4)** Lecture, three hours. Requisites: Mathematics 115A, 170A, 170B, 171. Inverse modeling problem—determination of model parameters consistent with experimental data, considering effects of random errors and nonuniqueness. Emphasis on linear and quasi-linear problems; nonlinear problems also discussed. Tools used include matrix theory, quadratic forms, orthogonal rotations, statistics, principal axis transformation

for rectangular matrices, Bachus/Gilbert resolving kernels, and Lagrange multipliers. Examples from broad range of physical sciences. S/U or letter grading.

**C206. Physical Geochemistry. (4)** Lecture, three hours. Requisite: course 51. Basic principles of physical chemistry for geologic applications. Thermodynamics and kinetics of reactions among minerals, natural waters, and magmas; construction and interpretation of phase diagrams; case studies of important geochemical and environmental issues. Concurrently scheduled with course C106. Additional independent research project and oral presentation required of graduate students. S/U or letter grading.

**C207. Geochemistry. (4)** Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical sciences students. Origin and abundance of elements and their isotopes; distribution and chemistry of elements in Earth and its environment. Concurrently scheduled with course C107. Additional homework and class presentation required of graduate students. S/U or letter grading.

**C209. Isotope Geochemistry. (4)** Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical and biological sciences students. Theoretical aspects of isotope behavior: stable and radiogenic isotopes. Principles of geochronology. Use of isotopes as tracers in crust and mantle processes. Stable isotopes as indicators of environment and paleoclimate. Concurrently scheduled with course C109. Additional literature survey, that may result in class presentation, expected of graduate students. S/U or letter grading.

**210. Geochemical Kinetics: Thermochronometry. (4)** Lecture, three hours; discussion, one hour. Designed for graduate physical and biological sciences students. Theoretical basis and application of thermochronometry: derivation of diffusion equation and methods of solution, relationship between heat and mass diffusion and their simultaneous solution, Boltzmann/Matano analysis, multicomponent diffusion, closure theory;  $^{40}\text{Ar}/^{39}\text{Ar}$  systematics and interpretive models, multidiffusion domain theory, petrological applications. Letter grading.

**211. Mathematical Methods of Geophysics. (4)** Lecture, four hours. Requisites: Physics 105A, 110A, 112, 131. Recommended: Physics 132. Designed to provide mathematical background required for students pursuing PhD in Geophysics and Space Physics, as well as related programs in department. Extensive survey of these methods, with focus on geophysical applications consistent with needs that geophysics students encounter in their research. Letter grading.

**C213. Biological and Environmental Geochemistry. (4)** Lecture, three hours. Requisites: Chemistry 14A and 14B (or 20A and 20B), Mathematics 3A, 3B, and 3C (or 31A and 31B). Recommended: at least one lower-division Earth, planetary, and space sciences course. Intended for graduate life and physical sciences students. Study of chemistry of Earth's surface environment and interplay between biology, human activity, and geology. Introduction to origin and composition of Earth, including atmosphere, crust, and hydrosphere. Examination of how these reservoirs are affected by biological cycles and feedbacks to biological evolution and diversity. Local and global-scale movements of biologically important elements like carbon, nitrogen, and phosphorus. Concurrently scheduled with course C113. S/U or letter grading.

**CM214A. Aquatic Geomicrobiology: Metabolisms. (4)** (Formerly numbered CM214.) (Same as Atmospheric and Oceanic Sciences CM237A.) Lecture, three hours. Recommended requisite: course C107 or Atmospheric and Oceanic Sciences M105. Study of fundamental geomicrobiological metabolisms and biogeochemical reactions occurring in aquatic systems and how these processes interact with environment. Metabolisms include photoautotrophic (anoxygenic and oxygenic photosynthesis), chemoheterotrophic (fermentation and respiration of organic matter), photoheterotrophic (organic matter degradation with light), and chemoautotrophic (iron, nitrogen, manganese, methane, and sulfur oxidation) pathways. Introduction of principals of bioenergetics (adenosine triphosphate production, Gibbs free energy, chemios-

mosis, thermodynamic calculations) and biological isotope fractionation. Concurrently scheduled with course CM114A. S/U or letter grading.

**CM214B. Aquatic Geomicrobiology: Environments. (4)** (Same as Atmospheric and Oceanic Sciences CM237B.) Lecture, three hours. Recommended requisite: course CM214A. Broad overview of aquatic geomicrobiological processes in diverse environmental settings (e.g., sediments, microbial mats, water column, wetlands, cold seeps, hydrothermal vents, deep biosphere), and how these processes drive elemental cycling on Earth. Concurrently scheduled with course CM114B. S/U or letter grading.

**M217. Molecular Evolution. (4)** (Same as Ecology and Evolutionary Biology M231.) Lecture, two hours; discussion, two hours. Series of advanced topics in molecular evolution, with special emphasis on molecular phylogenetics. Topics may include nature of genome, neutral evolution, molecular clocks, concerted evolution, molecular systematics, statistical tests, and phylogenetic algorithms. Themes may vary from year to year. May be repeated for credit. S/U or letter grading.

**219. Planetary and Orbital Dynamics. (4)** Lecture, four hours. Planetary rotations, satellite orbits, and tidal dissipation; planetary orbital system; resonance effects and chaos; spin-orbit and orbit-orbit coupling; planetary rings. S/U or letter grading.

**220. Principles of Paleobiology. (4)** Lecture/discussion, three hours. Limited to graduate science students. Open to qualified undergraduate biological and physical sciences students with consent of instructor. Current and classic problems in paleobiology, with emphasis on interdisciplinary problems involving aspects of biology, geology, organic geochemistry, and cosmology. Content varies from year to year. May be repeated for credit. S/U or letter grading.

**221. Field Geology. (4)** Lecture, one hour; discussion, one hour; fieldwork, 10 days. Enforced requisite: course 121F. Planning, execution, and presentation of geologic mapping projects at professional level. Resolution of problems in Southern California geology from synthesis of new and published research. Field area varies from year to year. May be repeated for credit. S/U or letter grading.

**222. Introduction to Seismology. (4)** Lecture, three hours. Types of seismic waves; travel-time seismology; epicenter location; amplitude variations; seismograph theory; explosion seismology; seismicity; focal conditions; surface wave analysis; microseisms and tsunamis. S/U or letter grading.

**M224A. Elastodynamics. (4)** (Same as Mechanical and Aerospace Engineering M257A.) Lecture, four hours. Requisites: Mechanical and Aerospace Engineering M256A, M256B. Equations of linear elasticity, Cauchy equation of motion, constitutive relations, boundary and initial conditions, principle of energy. Sources and waves in unbounded isotropic, anisotropic, and dissipative solids. Half-space problems. Guided waves in layered media. Applications to dynamic fracture, nondestructive evaluation (NDE), and mechanics of earthquakes. Letter grading.

**225. Physics and Chemistry of Planetary Interiors. (4)** Lecture, four hours. Chemical compositions of Earth and planets; high-pressure and temperature effects, phase transitions, and equations of state; variations of density and temperature with depth; thermal and compositional evolution. S/U or letter grading.

**C226. Advanced Petrology. (4)** Lecture, three hours; laboratory, three hours; field trips. Requisite: course 103A. Designed for graduate students. Understanding genesis of igneous rocks based on geochemical, tectonophysical, and other geological evidence and principles. Concurrently scheduled with course C126. Graduate students required to read more recommended references, make class presentations on particular topics resulting from that reading, and lead seminar-type discussions on their selected topics. S/U or letter grading.

**227. Mars. (4)** Lecture, three hours. Limited to graduate students. Results of recent and ongoing missions to Mars are revising many aspects of our understanding of planet and its history. Study highlights major revolutions in thinking about planet, and pro-

vides comprehensive overviews as well as current controversies related to Mars' core and magnetism, thermal evolution and volcanism, geology and cratering history, volatiles and climate, atmosphere and its interaction with space environment, and potential pre-biological and biological history. S/U or letter grading.

**228. Introduction to Planetary Dynamos. (4)** Lecture, three hours; laboratory/discussion, 90 minutes. Requisites: courses 200A, 200B, 200C. Designed for graduate students. Basic principles of planetary dynamo generation. Planetary core dynamics and core convection; mean field dynamo theory; kinematic dynamo theory; survey of modeling techniques and results. S/U or letter grading.

**M229. Planetary Atmospheres and Climates. (4)** (Same as Atmospheric and Oceanic Sciences M210.) Lecture, three hours. Enforced requisite: Physics 1C. Planetary atmospheric structure and composition, radiative transfer, and climate dynamics. Topics include origin and evolution of atmospheres, paleoclimate of Earth and Mars, atmospheric thermodynamics, plane-parallel radiative transfer, climate dynamics, climate forcings/feedbacks, bifurcation, and climate hysteresis. S/U or letter grading.

**230. X-Ray Crystallography. (4)** Lecture, three hours; laboratory, three hours. Requisite: course 51. Point, translation, and space group symmetry, diffraction of X-ray, reciprocal lattice theory, single crystal X-ray methods, diffraction symmetry and elementary crystal structure analysis. S/U or letter grading.

**231. Crystal Chemistry and Structure of Minerals. (4)** Lecture, three hours; laboratory, three hours. Requisite: course 51. Bonding, interatomic configurations, polymorphic transformations, isotypism, thermal and positional disorder; survey of structures of common minerals, and relation of physical and chemical properties to crystal structure. S/U or letter grading.

**233. Mineral Physics and Equation of State. (4)** Lecture, three hours. Interrelationship of physical properties of rock-forming minerals: optical reflectivity, refraction index, sound velocity, elastic constants, specific heat, and thermal expansivity. Determination of pressure, volume, and temperature relationships and planet-forming compounds. Variation of elastic constants with temperature and pressure. Application of shock-wave experiments to equations of state. S/U or letter grading.

**234. Petrologic Phase Equilibria. (4)** Lecture, three hours; discussion, three hours. Requisites: course 51, Chemistry 110B. Principles governing homogeneous and heterogeneous equilibria, with selected applications to mineral stability relations in igneous and metamorphic rocks (fractional crystallization, partial melting, hydrothermal solutions, element partitioning in coexisting phases). S/U or letter grading.

**235A-235B-235C. Current Research in Geochemistry. (1-1-1)** Seminar, one hour. Limited to graduate Earth, planetary, and space sciences students. Seminars presented by staff, outside speakers, and graduate students stressing current research in Earth and planetary chemistry. May be repeated for credit. S/U or letter grading.

**M237. How to Write and Publish Scientific Papers. (4)** (Same as Atmospheric and Oceanic Sciences M238.) Lecture, three hours. Recommended preparation: planning to prepare or in the process of preparing manuscripts. Introduction to process of scientific manuscript writing and publishing. Offers insights into fun and frustration of manuscript writing, important rules for manuscript structuring and scientific language, and advice on how to deal with review process. Students gain familiarity with general principles of successful publishing process. Addresses different stages of manuscript writing and publishing by answering when are data ready for publishing, where to publish, how to structure manuscript, best way to present data, how to properly get out message, which writing ethics to consider, how to effectively use citation program, how to communicate with reviewers and editors, and efficient ways to manage coauthors. S/U or letter grading.

**238. Metamorphic Petrology. (4)** Lecture, three hours; laboratory, six hours. Preparation: one introductory petrology and petrography course. Interpretation of metamorphic rocks in light of observation, theory, and experiment. Geological relations, petrographic evidence, metamorphic zoning, thermodynamics of phase equilibria, projections, chemographic relationships, use of piezobirefringent haloes, Rayleigh depletion model, isotopic fractionation, environmental factors of metamorphism. Laboratory study of representative metamorphic rocks and suites of rocks selected to illustrate topics discussed in lectures. S/U or letter grading.

**240. Space Plasma Physics. (4)** Lecture, three hours. Requisite: course 200C or Physics 210A. Physics of plasmas in space, including treatments based on magnetohydrodynamics and kinetic theory. Applications to solar or planetary winds, steady-state magnetospheres, magnetospheric convection, substorm processes, magnetic merging, field-aligned currents and magnetosphere/ionosphere coupling, ring current dynamics, and wave particle instabilities. S/U or letter grading.

**C241. Basin Analysis. (4)** Lecture, three hours; laboratory, three hours. Requisites: courses 103B, 111. Mechanisms of sedimentary basin development, flexural and thermal subsidence, isostasy, subsidence analysis, quantitative basin modeling, sediment provenance, tectonic settings. Concurrently scheduled with course C141. S/U or letter grading.

**242. Sandstone Petrology. (4)** Lecture, two hours; laboratory, four hours. Requisite or corequisite: course C141. Petrographic study of sandstones, with emphasis on provenance, petrofacies, and paleotectonic reconstructions. S/U or letter grading.

**C243. Advanced Physical Sedimentology. (4)** Lecture, three hours; fieldwork, three hours. Requisites: courses 103B, 111, or equivalent. Advanced topics related to sediments, sedimentary rocks, and information that can be extracted from each. Interpretation of depositional environment from complex sedimentary structures and textures. Includes field and lecture component and builds on previous sedimentology basics. Concurrently scheduled with course C143. S/U or letter grading.

**244. Tectonics of Sedimentary Basins. (4)** Lecture, two hours; discussion, two hours; field trips. Requisites: courses 103B, 119. Recommended: course C141. Plate-tectonic settings of sedimentary basins. Basin analysis, stratigraphy, paleoenvironments, sedimentology, and related subjects in context of plate-tectonic controls on basin evolution. S/U or letter grading.

**245A-245B-245C. Current Research in Geology. (1-1-1)** Seminar, one hour. Limited to graduate Earth, planetary, and space sciences students. Seminars presented by staff, outside speakers, and graduate students on current research in tectonics. May be repeated for credit. S/U grading.

**248. Advanced Structural Geology. (4)** Lecture, three hours; discussion, two hours. Requisite: course 111. Principles governing fracture, folding, and flow of rocks; solutions of structural problems at various scales; regional tectonic problems. S/U or letter grading.

**251. Seminar: Mineralogy. (4)** Seminar, three hours. Examination of groups of rock-forming minerals (e.g., feldspars), integrating such aspects as crystal structure, crystal chemistry, phase equilibria, and petrogenesis. S/U or letter grading.

**252. Seminar: Geochemistry. (4)** Seminar, two hours; discussion, two hours. Phase equilibria under crustal conditions, chemistry of ocean waters, recent and ancient sediments, structure and chemistry of upper mantle, geochronology, cosmochronology, and cosmochemistry. S/U or letter grading.

**253. Seminar: Petrology. (4)** Seminar, three hours. Problems of igneous or metamorphic petrology; methods of evaluating physical conditions of metamorphism; diffusion in mineralogic systems; origin of ultramafic rocks and problems of mantle; element fractionation among coexisting phases; other current subjects in field. S/U or letter grading.

**255. Seminar: Structural Geology and Tectonics. (4)** Seminar, three hours. Flow and fracture in Earth's crust from microscopic to continental scale and in experiments. Examples may include metamorphic terranes, glaciers, plutons, volcanoes, and consolidated or unconsolidated sediments. Modern concepts of oceanic basins; processes leading to segregation of continental-type rocks. S/U or letter grading.

**256. Seminar: Geophysics. (4)** (Formerly numbered 282.) Seminar, three hours. Seismology, geophysical prospecting, electromagnetic prospecting. Selected topics in Earth physics. Content varies from year to year. May be repeated for credit. S/U or letter grading.

**257. Seminar: Paleontology. (4)** Seminar/discussion, three hours. Advanced topics in paleobiology, biostratigraphy, paleoecology, and paleobiogeography, with emphasis on relations to other disciplines. S/U or letter grading.

**259. Seminar: Paleotectonics. (4)** Seminar, two hours; discussion, two hours. Requisite: course 244. Basin evolution and paleogeography, with emphasis on Phanerozoic of Western U.S. S/U or letter grading.

**C260. Field Seminar. (2 to 6)** Seminar, three hours; discussion, one hour; fieldwork, five to 20 days. Requisite: course 61. Field-based teaching and discussion forum that varies in focus from general geology through structure and tectonics, sedimentology, igneous and metamorphic petrology, volcanology, or other subdisciplines as prescribed. May be repeated for credit. Concurrently scheduled with course C160. S/U or letter grading.

**261. Topics in Magnetospheric Plasma Physics. (4)** Lecture, four hours. Lectures, discussions, and exercises on specific advanced topics in magnetospheric plasma physics. Previous courses examined magnetic storms, magnetospheric substorms, ultralow frequency waves, and adiabatic particle motion in Earth's radiation belts. S/U or letter grading.

**C262. Application of Remote Sensing in Field. (4)** Fieldwork, five hours; laboratory, two hours. Requisite: course 150. Application of remote-sensing techniques to field situations. Digital analysis and interpretation of near-infrared, thermal-infrared, and microwave data from satellites and aircraft. Field observation of study site in California desert for testing hypotheses during week between Winter and Spring Quarters. Concurrently scheduled with course C162. S/U or letter grading.

**M263A. Solar System Magnetohydrodynamics. (4)** (Same as Atmospheric and Oceanic Sciences M250A.) Lecture, three hours. Requisite: Atmospheric and Oceanic Sciences C205A. Derivation of MHD equations with two fluid aspects, generalized Ohm's law, small amplitude waves, discontinuities, shock waves, and instabilities. Applications to statics and dynamics of solar wind and planetary magnetospheres and to solar wind/magnetosphere/ionosphere coupling. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

**264. Order of Magnitude Earth and Planetary Sciences. (4)** Seminar, three hours; discussion, three hours. Limited to departmental graduate students. Many graduate students have had little practice in making rough estimates or order of magnitude (OOM) assessments of physical problems, and even less practice at talking through problems with others. One key problem is tendency for rote memorization to take precedence over understanding. Discussion of basic problems from OOM perspective, with focus on problems appropriate to Earth, planetary, and space sciences, to inculcate physically based reasoning and promote effective on-your-feet communication. Attendance at departmental colloquium required each week. S/U or letter grading.

**265. Instrumentation, Data Processing, and Data Analysis in Space Physics. (4)** Lecture, three hours. Principles, testing, and operations of magnetometers and other instruments. Data processing, display, and archiving. Time-series analysis techniques, including filtering. Fourier series, eigenanalysis, and power spectra. S/U or letter grading.

**M270A-M270B-M270C. Seminars: Climate Dynamics. (2 to 4 each)** (Same as Atmospheric and Oceanic Sciences M272A-M272B-M272C and Geography M270A-M270B-M270C.) Seminar, two hours. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

**CM273. Earth Process and Evolutionary History. (6)** (Same as Ecology and Evolutionary Biology CM228.) Lecture, four hours; laboratory, three hours. Requisites: Chemistry 14A, 14B (or 20A, 20B), Life Sciences 1, 2, 3, and 4, or 7A, 7B, and 7C (or 7A and introductory course in geology). Exploration of relationship between physical processes, such as tectonics and climate, and how they affect surface and impact biology of Earth. Study of evolution of universe, Earth, and life, with integration of history of science, including Darwinian evolution and plate tectonics revolutions. Study of formation of matter offers tools to understand geologic process of climate and ecology of Earth. Past climate change to examine expected future human-influenced climate. Consideration of major events in history of life on Earth. Data and methods from geology, genetics, and geochemistry are integrated to reconstruct past events. This reveals how Earth processes shaped life and how life shaped Earth. Concurrently scheduled with course CM173. Letter grading.

**C279. Search for Extraterrestrial Intelligence: Theory and Applications. (4)** Lecture, two hours; laboratory, two hours. Enforced requisites: Mathematics 31B, Physics 1B. Recommended: course 71, Computer Science 31, Physics 110B, Program in Computing 10A. Search for extraterrestrial intelligence (SETI) is based on number of astronomical, mathematical, statistical, and computational principles. Coverage of fundamental concepts in these disciplines in context of SETI: abundance and architecture of extrasolar planetary systems; radio astronomy, including wave propagation and dispersion; signal processing, including sampling theory and Fourier transforms; random processes, including Gaussian and Poisson statistics, and algorithm development. Design of observational program, acquisition of telescopic data, development of algorithms to analyze data, and writing of report on results. Concurrently scheduled with course C179. S/U or letter grading.

**M285. Origin and Evolution of Solar System. (4)** (Same as Astronomy M285.) Lecture, four hours. Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

**286A-286B-286C. Current Research in Planetary Sciences. (2-2-2)** Seminar, two hours. Problems of current interest concerning moon, planets, and meteorites. May be repeated for credit. S/U grading.

**287A-287B-287C. Current Research in Geophysics. (1-1-1)** Seminar, one hour. Current research in geophysics. May be repeated for credit. S/U grading.

**M288A-M288B-M288C. Current Research in Space Physics. (2-2-2)** (Same as Atmospheric and Oceanic Sciences M275A-M275B-M275C.) Seminar, two hours. Problems of current interest concerning particles and fields in space. May be repeated for credit. S/U grading.

**289. Seminar: Fluid Dynamics. (2)** Seminar, one to two hours. Problems of current interest in fluid dynamics, with emphasis on geophysical applications. May be repeated for credit. S/U grading.

**293A-293B-293C. Space Physics Journal Club. (1-1-1)** Seminar, one hour. Limited to graduate space physics students in Earth, Planetary, and Space Sciences, Atmospheric and Ocean Sciences, and Physics and Astronomy Departments. Review of current space physics literature. May be repeated for credit. S/U grading.

**295A-295B-295C. Current Research in Earth, Planetary, and Space Sciences.** (1-1-1) Lecture, one hour. Limited to graduate Earth, planetary, and space sciences students. Seminars presented by outside speakers, staff, and/or graduate students describing current research. Written reports required. May be repeated for credit. S/U grading.

**C296. Research Topics in Earth, Planetary, and Space Sciences.** (1) Research group meeting, one to three hours. Designed for departmental students participating in research group. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. Concurrently scheduled with course C194. S/U grading.

**297. Advanced Techniques in Geological Research.** (2 to 4) Lecture, two to four hours. S/U grading.

**298. Advanced Topics in Earth and Space Sciences.** (2 to 4) Lecture, two to four hours. S/U or letter grading.

**375. Teaching Apprentice Practicum.** (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**495. Teaching Earth, Planetary, and Space Sciences.** (2) Seminar, one hour; discussion, two hours. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. Special emphasis on integration of technology in classroom. S/U grading.

**501. Cooperative Program.** (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study and/or Research.** (2 to 12) Tutorial, to be arranged. May be repeated. S/U or letter grading.

**597. Preparation for MS Comprehensive Examination or PhD Qualifying Examinations.** (2 to 8) Tutorial, to be arranged. S/U grading.

**598. MS Research and Thesis Preparation.** (2 to 12) Tutorial, to be arranged. May be repeated. S/U grading.

**599. PhD Research and Dissertation Preparation.** (2 to 12) Tutorial, to be arranged. S/U grading.

## Overview

The Master of Arts (MA) degree in East Asian Studies offers an interdisciplinary and highly flexible program of study. With opportunities to take a range of advanced courses in the social sciences and humanities, students are able to tailor their programs to emphasize particular methodological and disciplinary approaches and to focus in depth on the region as a whole and on its dynamics in particular countries. Coursework and language offerings range from the ancient to the contemporary and allow students to prepare for a broad range of individual needs and career interests with a thorough grounding in the history and culture of the region.

## Undergraduate Study

Information on the undergraduate major in Asian Studies and minor in East Asian Studies can be found in the [International and Area Studies](#) section.

## Graduate Major

### East Asian Studies MA

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## East Asian Studies

### Lower-Division Course

**19. Fiat Lux Freshman Seminars.** (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

### Graduate Courses

**291A-291B. Variable Topics in East Asian Studies.** (4-4) Seminar, three hours. Selected topics on East Asia. May be repeated for credit with topic change. S/U or letter grading.

## ECOLOGY AND EVOLUTIONARY BIOLOGY

*College of Letters and Science*

101 Hershey Hall  
Box 957426  
Los Angeles, CA 90095-7246

**Ecology and Evolutionary Biology**

Graduate Office, 310-825-1959

**Graduate e-mail**

Undergraduate Office, 310-825-1680

**Message Center**

Michael E. Alfaro, PhD, *Chair*

## Faculty Roster

### Professors

Michael E. Alfaro, PhD

Priyanga A. Amarasekare, PhD

Paul H. Barber, PhD

Daniel T. Blumstein, PhD

Peggy M. Fong, PhD

Gregory F. Grether, PhD

David K. Jacobs, PhD

Nathan J.B. Kraft, PhD

James O. Lloyd-Smith, PhD

Kirk E. Lohmueller, PhD

Glen M. MacDonald, PhD (*Professor of California and the American West*)

Peter N. Nonacs, PhD

Noa Pinter-Wollman, PhD

Lawren Sack, PhD

Van M. Savage, PhD

Barnett A. Schlinger, PhD

Karen E. Sears, PhD  
 H. Bradley Shaffer, PhD  
 Thomas B. Smith, PhD  
 Victoria L. Sork, PhD  
 Tina I. Treude, PhD

### Professors Emeriti

Clifford F. Brunk, PhD  
 Martin L. Cody, PhD  
 Franz Engelmann, PhD  
 Arthur C. Gibson, PhD  
 Elma González, PhD  
 Malcolm S. Gordon, PhD  
 Patricia A. Gowaty, PhD  
 William M. Hamner, PhD  
 Henry A. Hespenheide, PhD  
 Stephen P. Hubbell, PhD  
 Kenneth A. Nagy, PhD  
 Peter M. Narins, PhD  
 Park S. Nobel, PhD  
 Philip W. Rundel, PhD  
 Charles E. Taylor, PhD  
 Richard R. Vance, PhD  
 Blaire Van Valkenburgh, PhD (*Donald R. Dickey Professor Emeritus of Vertebrate Biology*)  
 Eduardo Zeiger, PhD  
 Cheryl Ann Zimmer, PhD  
 Richard K. Zimmer, PhD

### Associate Professors

Morgan W. Tingley, PhD  
 Pamela J. Yeh, PhD

### Assistant Professors

Robert A. Eagle, PhD  
 Nandita R. Garud, PhD  
 Elsa M. Ordway, PhD  
 Felipe Zapata, PhD

### Lecturer SOE

Rachel L. Kennison, PhD

### Adjunct Professors

Jon E. Keeley, PhD  
 Barbara J. Natterson, MD

### Adjunct Associate Professors

Seth D. Riley, PhD  
 Xiaoming Wang, PhD

### Adjunct Assistant Professors

Anthony E.F. Baniaga, PhD  
 Benjamin Knowles, PhD  
 Brenda J. Larson, PhD  
 Jonathan D. Marcot, PhD  
 Debra M. Shier, PhD

## Overview

Organismic biology touches every aspect of modern life, and understanding how living organisms are adapted to their environments is the major challenge of the discipline. To meet this challenge, the Department of Ecology and Evolutionary Biology offers undergraduate and graduate instruction at all levels of biology—from regulatory and physiological processes within organisms through the natural ecology and behavior of living organisms and to the population and community dynamics of multiple species. All of these subject areas address practical problems facing the world today, and

all influence human decisions on matters ranging from conservation of the environment to advancement of medical science.

## Undergraduate Study

The Bachelor of Science (BS) degrees combine essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as advanced in-depth exposure to some of them.

Students may earn a BS degree in one of three different majors within the department: Biology (general biology); Ecology, Behavior, and Evolution; and Marine Biology. The majors build on similar lower-division introductory courses and differ primarily in the upper-division requirements. The Biology major is designed for students who desire exposure to a wide range of biological subjects. The remaining two majors—Ecology, Behavior, and Evolution and Marine Biology—provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.

## Graduate Study

The Master of Science (MS) and Doctor of Philosophy (PhD) degrees provide opportunities for advanced, concentrated study. The MS degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The PhD degree requires independent and innovative research that ultimately results in a dissertation.

## Undergraduate Majors

### Biology BS

The Biology major is designed for students with a broad interest in biology who desire to pursue careers in a wide range of biological and related fields. It provides students with excellent background preparation for postgraduate training in medicine and other health sciences, in tracks leading to academic and public service careers in biology, in biological industries, and even in nonbiological careers such as business, agriculture, and law. Emphasis is on breadth of training to expose students to all levels of modern biology.

### Learning Outcomes

The Biology major has the following learning outcomes:

- Broad understanding of basic biology concepts and principles across different levels of biological organization, from molecules to ecosystems
- Effective oral and written communication of scientific information
- Demonstrated understanding of the processes involved in new knowledge generation, including the scientific method, data collection, and data analysis
- Ability to critically evaluate scientific concepts presented in diverse media, from scientific articles to the popular press

## Entry to the Major

### Transfer Students

Transfer applicants to the Biology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 7A, 7B, and 7C, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

#### Life Sciences Core Curriculum

*Required:* Chemistry and Biochemistry 14A, 14B, 14BL, 14C, and 14D, or 20A, 20B, 20L, 30A, 30AL, and 30B; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, 3C, and Life Sciences 40 or Statistics 13, or Mathematics 31A or 31AL, 31B, 32A, and Life Sciences 40 or Statistics 13; Physics 1A, 1B, 1C, 4AL, and 4BL, or 5A, 5B, and 5C.

### The Major

Students must take two courses from each principle:

*Evolution and Genetics:* Anthropology 120, 124P, 124Q, 124S, 128P, Earth, Planetary, and Space Sciences 116, Ecology and Evolutionary Biology 103, 108, 109, 109L, 110, 111, 112, 113A, 113AL, 114A, 115, 117, 118, 120 (not open for credit to students with credit for course 185), 121, C126, 129, 130, C135, 136, 140, 143, 144, 144L, M145, C146, 149, 150, 150L, 160, 171, CM173, C174, 175, 181, 184, 185 (not open for credit to students with credit for course 120), 186, Life Sciences 107, Microbiology, Immunology, and Molecular Genetics CM156, 158, Molecular, Cell, and Developmental Biology 138, CM156, Society and Genetics M142

*Information Flow:* Anthropology 124P, 128P, Chemistry and Biochemistry C100, 153A, 166, Ecology and Evolutionary Biology 100, 100L, 116, 120 (not open for credit to students with credit for course 185), 121, 122, 125, C126, 129, 132, 134B, C135, 136, 137, 143, C146, 149, 150, 150L, 153, 156, 162, 162L, 168, 170 (not open for credit to students with credit for Physiological Science 166), 171, C172, C174, 176, M178, C179, 180A, 180B, 183, Life Sciences 107, Microbiology, Immunology, and Molecular Genetics 100L and 101 (must be taken together to satisfy requirement), 103AL, 103BL, 109AL, 109BL, 123, 132, CM156, 158, C185A, Molecular, Cell, and Developmental Biology 100, 138, 143, 144, C150, 150AL, CM156, 165B, 168, M175A, M175B, M175C, 187AL, Neuroscience M101A, M101B, M101C, 102, Physiological Science M106, 111A, 111B, CM123, 124, C126, C127, 128, C130, 136,

138, 140, C144, M145, 146, 147, 149, C152, 154, 155, 165, 166 (not open for credit to students with credit for Ecology and Evolutionary Biology 170), 167, 173, 174, 175, M176, 177, M180A, M180B, M180C

*Structure Function:* Chemistry and Biochemistry C105, 153A, 153D, 153L, Earth, Planetary, and Space Sciences 116, Ecology and Evolutionary Biology 101, 102, 103, 105, 106, 107, 109, 109L, 110, 111, 112, 113A, 113AL, 113B, 114A, 114B, 115, 117, 118, 121, 122, 123A, 123B, 124A, 125, M127, M127L, 128, 129, M131, 136, 140, 144, 144L, M145, 147, 148, 151A, 151B, 152, 155, M157, 160, 161, 162, 162L, 163, 164, 165, 166, 168, 170 (not open for credit to students with credit for Physiological Science 166), 171, C174, 181, 184, Geography 106, 107, 108, Microbiology, Immunology, and Molecular Genetics 100L and 101 (must be taken together to satisfy requirement), 103AL, 103BL, 109AL, 132, CM156, 158, 168, C185A, Molecular, Cell, and Developmental Biology 100, 138, M140, C141, 143, 144, 146, C150, 165A, 165B, 168, M175A, M175B, M175C, Neuroscience M101A, M101B, M101C, 102, Physiological Sciences 107, 108, 111A, 111B, 120, 121, 122, CM123, 124, C126, C127, 128, C130, 136, 138, 140, C144, M145, 146, 147, 149, C152, 153, 154, 155, 165, 166 (not open for credit to students with credit for Ecology and Evolutionary Biology 170), 167, 173, 174, 175, M176, 177, M180A, M180B, M180C

*Transformations of Energy and Matter:* Atmospheric and Oceanic Sciences 102, 103, 104, M105, 130, 145, Chemistry and Biochemistry 103, 110A, 110B, 114, C123A, C123B, 136, C143A, C143B, 144, C145, 153A, 153B, 153C, 153D, 153L, 154, C159, C164, Ecology and Evolutionary Biology 103, 109, 109L, 117, 123A, 123B, 124A, M131, M139, 143, 151A, 153, 161, 162, 162L, 170 (not open for credit to students with credit for Physiological Science 166), 184, Environmental Health Sciences 100, Microbiology, Immunology, and Molecular Genetics 101

*Systems:* Anthropology 124P, 128P, Atmospheric and Oceanic Sciences 102, 103, 104, M105, 130, 145, Biostatistics 100B, Chemistry and Biochemistry 103, 153A, 153L, Earth, Planetary, and Space Sciences 116, Ecology and Evolutionary Biology 101, 102, 105, 106, 107, 108, 110, 111, 112, 113A, 113AL, 113B, 114A, 114B, 115, 116, 117, C119A, C119B, 120 (not open for credit to students with credit for course 185), 122, 123A, 123B, 124A, 124B, 125, C126, M127, M127L, 128, 129, M131, 132, 133, 136, 137, M139, 140, 142, 144, C146, 147, 148, 149, 150, 150L, 151A, 151B, 152, 153, 154, 155, 156, 160, 161, 162, 162L, 163, 164, 165, 166, 168, 170 (not open for credit to students with credit for Physiological Science 166), C172, 176, C177, M178, C179, 180A, 180B, 181, 182, 183, 184, Environmental Health Sciences 100, Geography 106, 107, 108, Life Sciences 107, M174, Microbiology, Immunology, and Molecular Genetics 100L and 101 (must be taken together to satisfy requirement), 103AL, 103BL, 105, 109AL, 109BL, 123, 132, C134, 158, 168, 180A, 180B, C185A, Molecular, Cell, and Developmental Biology 100, 138, M140, C141, 143, 144, 146, C150, 150AL, CM156, 160, 165A, 165B, 168, M175A,

M175B, M175C, 187AL, Neuroscience M101A, M101B, M101C, 102, Physiological Science 100, M106, 107, 108, 111A, 111B, 120, 121, 122, CM123, 124, C126, C127, 128, C130, M135, 136, 138, 140, C144, M145, 146, 147, 149, C152, 153, 154, 155, 165, 166 (not open for credit to students with credit for Ecology and Evolutionary Biology 170), 167, 173, 174, 175, M176, 177, M180A, M180B, M180C, Psychology 115, 133B, Society and Genetics M142

## Field Biology

The department offers three quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ), the Marine Biology Quarter (MBQ), and the joint Field Marine Biology Quarter (FMBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter involves some combination of Ecology and Evolutionary Biology 113B, 114B, 118, 124A, 124B, 125, C126, 132, 134B, and 151B. The Marine Biology Quarter includes some combination of Ecology and Evolutionary Biology 102, 106, 123A, 123B, 147, 148, 163, 164, 165, and 182. The Field and Marine Biology quarters may occur during fall, winter, or spring quarter, depending on location and faculty participation. To participate, students must enroll in all courses in the respective program. Participants in both programs are selected by personal interview. Information and applications are available in the Undergraduate Advising Office.

## Honors Program

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Ecology and Evolutionary Biology 198A and 198B. Students do not need to apply for departmental honors. All students are reviewed for honors.

## Computing Specialization

Majors may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science CM186, Psychology 186A, or 186B. A grade of C- or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Undergraduate Advising Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

## Policies

### Preparation for the Major

Each core curriculum course must be passed with a grade of C- or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C- in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

### The Major

Each Life Sciences core curriculum course must be passed with a grade of C- or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C- in three core curriculum courses, either in separate courses or repetitions of the same course, are ineligible for the Biology major.

A minimum of five upper-division courses for the major must be taken within the Ecology and Evolutionary Biology Department.

A minimum of two laboratory courses must be taken, including a minimum of one upper-division ecology and evolutionary biology laboratory course.

Courses applied to major requirements may be applied to one core principle only. Courses listed in multiple principles may not be applied simultaneously.

Field quarter instructors determine to which core principle courses apply (four requirements).

A maximum of 8 units of the Ecology and Evolutionary Biology 198 series or 4 units of Ecology and Evolutionary Biology 199 may be applied toward the major. The principal investigator determines to which principle the course applies, after the student's work and quarter are complete. The course must be for a minimum of 4 units. Credit for 199 courses from other departments may not be applied.

Each course applied toward requirements for the major must be taken for a letter grade. Courses applied to upper-division major requirements must have a minimum of 4 units. Courses with fewer than four units may be taken together to satisfy one course requirement. A maximum of one course requirement may be satisfied. A 6-unit course counts as one course on the requirements for the major.

With consent of the instructors and department, a maximum of 4 units of 200-level courses may be applied toward major requirements.

## Ecology, Behavior, and Evolution BS

The Ecology, Behavior, and Evolution major is appropriate for students preparing for graduate study in ecology, behavior, and evolution or for employment in areas such as environmental biology, animal behavior, conservation, teaching, museum work, and governmental positions dealing with environmental issues of wide importance and impact. A strong field component involving study in terrestrial and marine locales

such as coastal, desert, and mountain environments in California and the Southwest and in the Neotropics is required.

## Capstone Major

The Ecology, Behavior, and Evolution major is a designated capstone major. Students apply theory and technique learned through four years of classroom and laboratory experience to their own independent projects. The main purpose of the capstone is to provide a unique field experience that involves designing and executing a research project. Students are aided in the scientific process of learning about a new ecosystem, developing relevant questions, designing conceptually based projects, troubleshooting and completing the work, and writing a publication-ready manuscript. They are also expected to exhibit strong teamwork, problem-solving, and communication skills.

## Learning Outcomes

The Ecology, Behavior, and Evolution major has the following learning outcomes:

- Demonstrated broad knowledge of fundamentals of ecology, behavior and evolution, or marine biology acquired through coursework
- Development of skills in library research, data interpretation, synthesis, and scientific writing
- Use of current primary scientific literature, including database searches, identification of appropriate sources, and reading and understanding papers
- Understanding of key questions and hypotheses, interpretation of results and conclusions, and discrimination of quality through critique
- Use of knowledge gained for conception and execution of student project that includes self-developed questions and hypotheses, design of appropriate theoretical or empirical/experimental approach, execution of that approach, and analysis and interpretation of data
- Communication of original scientific work to colleagues and mentors through capstone scientific paper
- Demonstrated communication skills through oral or poster presentation at a symposium
- Display of strong teamwork and problem-solving skills

## Entry to the Major

### Transfer Students

Transfer applicants to the Ecology, Behavior, and Evolution major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 7A, 7B, and 7C, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

#### Life Sciences Core Curriculum

*Required:* Chemistry and Biochemistry 14A, 14B, 14BL, 14C, and 14D, or 20A, 20B, 20L, 30A, 30AL, and 30B; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, 3C, and Life Sciences 40 or Statistics 13, or Mathematics 31A or 31AL, 31B, 32A, and Life Sciences 40 or Statistics 13; Physics 1A, 1B, 1C, 4AL, and 4BL, or 5A, 5B, and 5C.

#### The Major

Students must complete the following courses:

1. At least 4 morphology and systematics units (one course) from Ecology and Evolutionary Biology 101, 103, 105, 110, 111, 112, 113A, 113AL, 114A, 115, 117, 130, 140, 144L, M157, or 184
2. At least 4 physiology units (one course) from Ecology and Evolutionary Biology 117, M157, 162, 162L, 170, Physiological Science 165, or 166. Students with credit for Ecology and Evolutionary Biology 170 cannot also take Physiological Science 166
3. At least 12 ecology, behavior, and evolution units (three courses) from Anthropology 128P, Ecology and Evolutionary Biology 100, 113A, 113AL, 116, C119A, C119B, 120, 121, 122, C126, 128, 129, 130, 133, C135, 136, 137, 142, 143, 144, 144L, C146, 149, 150, 150L, 151A, 152, 153, 154, 155, M157, 161, 162, 168, CM173 (or Earth, Planetary, and Space Sciences CM173), C174, 175, M178 (or Bioengineering CM186 or Computational and Systems Biology M186 or Computer Science CM186), 183, 184, 185, 186, Life Sciences 107 (students with credit for Life Sciences 4 cannot take Life Sciences 107). Students with credit for Ecology and Evolutionary Biology 120 cannot also take course 185
4. One capstone field quarter consisting of 12 to 16 units from the Field Biology Quarter (FBQ), Marine Biology Quarter (MBQ), join Field Marine Biology Quarter (FMBQ), or pre-approved equivalent (see undergraduate adviser)
5. At least 8 units (two courses) from Anthropology 128P, chemistry (except Chemistry and Biochemistry 188SA through 199; Chemistry and Biochemistry 153A and 153L are strongly recommended), Earth, planetary, and space sciences (geology only; except Earth, Planetary, and Space Sciences 188 through 199), ecology and evolutionary biology (except Ecology and Evolutionary Biology 188SA through 196), geography (except Geography 188SA through 199), Life Sciences 107 (students with credit for Life Sciences 4 cannot take Life Sciences 107), mathematics (except Mathematics 105A, 105B, 105C, 106, 188SA through 199), microbiology (except Microbiology 193A through 199), Molecular, Cell, and Developmental Biology 172, physics (except Physics 188SA through 199); recommended: taxon-oriented courses in ecological, behavioral, and evolutionary processes such as Ecology and Evolutionary Biology 111, 112, 113A, 113AL, 114A, 115

## Field Biology

The department offers three quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ), the Marine Biology Quarter (MBQ), and the joint Field Marine Biology Quarter (FMBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter involves some combination of Ecology and Evolutionary Biology 113B, 114B, 118, 124A, 124B, 125, C126, 132, 134B, and 151B. The Marine Biology Quarter includes some combination of Ecology and Evolutionary Biology 102, 106, 123A, 123B, 147, 148, 163, 164, 165, and 182. The Field and Marine Biology quarters may occur during fall, winter, or spring quarter, depending on location and faculty participation. To participate, students must enroll in all courses in the respective program. Participants in both programs are selected by personal interview. Information and applications are available in the [Undergraduate Advising Office](#).

## Honors Program

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Ecology and Evolutionary Biology 198A and 198B. Students do not need to apply for departmental honors. All students are reviewed for honors.

## Computing Specialization

Majors may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science CM186, Psychology 186A, or 186B. A grade of C- or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Undergraduate Advising Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

## Policies

### Preparation for the Major

Each core curriculum course must be passed with a grade of C- or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C- in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

## The Major

A maximum of 8 units of the Ecology and Evolutionary Biology 198 series or 4 units of Ecology and Evolutionary Biology 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

Courses offered as part of the Field Biology Quarter (FBQ) are open to all qualified students, but strict priority is given to students who are Ecology, Behavior, and Evolution majors, are graduating seniors, have taken a broad range of ecology, behavior, and evolution coursework, and have maintained a good grade-point average.

With consent of the instructors and department, students may enroll in 200-level courses and apply them toward major requirements.

Each course applied toward requirements for preparation for the major and the major must be taken for a letter grade. Ecology, Behavior, and Evolution majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major. Courses applied to upper-division major requirements must have a minimum of 4 units. A 6-unit course counts as one course on the requirements for the major.

As requisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 13 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. It is strongly recommended that students complete Ecology and Evolutionary Biology 109 and 109L prior to applying for the Marine Biology Quarter. Contact the [Undergraduate Advising Office](#) for all requirements for the Marine and Field Biology quarters.

## Marine Biology BS

The Marine Biology major is designed for students who wish to specialize in the area of marine sciences. Completion of this major provides students with both an excellent background in biology and specialization in various disciplines such as oceanography, subtidal and intertidal ecology, and physiology of marine organisms. Graduates are well prepared for post-graduate opportunities in the marine sciences, many other areas of biology, and medicine. The major provides valuable field experience with concomitant individual research opportunities in marine biology.

## Capstone Major

The Marine Biology major is a designated capstone major. Students apply theory and technique learned through four years of classroom and laboratory experience to their own independent projects. The main purpose of the capstone is to provide a unique field experience that involves designing and executing a research project. Students are aided in the scientific process of learning about a new ecosystem, developing relevant questions, designing conceptually based projects, troubleshooting and completing the work, and writing a publi-

cation-ready manuscript. They are also expected to exhibit strong teamwork, problem-solving, and communication skills.

## Learning Outcomes

The Marine Biology major has the following learning outcomes:

- Demonstrated broad knowledge of fundamentals of ecology, behavior and evolution, or marine biology acquired through coursework
- Development of skills in library research, data interpretation, synthesis, and scientific writing
- Use of current primary scientific literature, including database searches, identification of appropriate sources, and reading and understanding papers
- Understanding of key questions and hypotheses, interpretation of results and conclusions, and discrimination of quality through critique
- Use of knowledge gained for conception and execution of student project that includes self-developed questions and hypotheses, design of appropriate theoretical or empirical/experimental approach, execution of that approach, and analysis and interpretation of data
- Communication of original scientific work to colleagues and mentors through capstone scientific paper
- Demonstrated communication skills through oral or poster presentation at a symposium
- Display of strong teamwork and problem-solving skills

## Entry to the Major

### Transfer Students

Transfer applicants to the Marine Biology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 7A, 7B, and 7C, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

#### Life Sciences Core Curriculum

*Required:* Atmospheric and Oceanic Sciences 1 or Earth, Planetary, and Space Sciences 15; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, and 14D, or 20A, 20B, 20L, 30A, 30AL, and 30B; Life Sciences 7A, 7B, 7C, 23L; Life Sciences 30A, 30B, and 40 or Statistics 13, or Mathematics 3A, 3B, 3C, and Life Sciences 40 or Statistics 13, or Mathematics 31A or 31AL, 31B, 32A, and Life Sciences 40 or Statistics 13; Physics 1A, 1B, 1C, 4AL, and 4BL, or 5A, 5B, and 5C.

## The Major

Students must complete the following courses:

1. Ecology and Evolutionary Biology 109 and 109L
2. At least 4 laboratory units (one course) from Ecology and Evolutionary Biology 101, 105, 110, 112, 136, 170, or 181
3. At least 4 units of marine organismic biology or physiology (one course) from Ecology and Evolutionary Biology 101 (unless taken under item 2), 105 (unless taken under item 2), 107, 112, 117, 128, 140, 142, 170 (unless taken under item 2), C174, 184, or Physiological Science 166. Students with credit for Ecology and Evolutionary Biology 170 cannot also take Physiological Science 166
4. At least 4 units of ecology and behavior (one course) from Anthropology 128P, Ecology and Evolutionary Biology 100, 116, C119A, C119B, 122, C126, 128, 129, M131 (or Geography M110), 133, 136, 137, 140, 142, 143, C146, 151A, 152, 154, 155, M157, 161, 162, 170, C172, M178 (or Bioengineering CM186 or Computational and Systems Biology M186 or Computer Science CM186), 183, or 184
5. At least 4 evolution units (one course) from Anthropology M128S (or Society and Genetics M142), Ecology and Evolutionary Biology 116, 117, 120, 121, 130, 133, C135, 140, 143, 144, 144L, C146, 149, 150, 150L, CM173 (or Earth, Planetary, and Space Sciences CM173), C174, 175, 184, 185, 186, or Life Sciences 107 (students with credit for Life Sciences 4 cannot take Life Sciences 107). Students with credit for Ecology and Evolutionary Biology 120 cannot also take course 185
6. One capstone field quarter consisting of 12 to 16 units from the Marine Biology Quarter (MBQ) or pre-approved equivalent (see undergraduate adviser)
7. One additional physical, chemical, or geological oceanography course from Atmospheric and Ocean Sciences 102, 103, 104, M105 (or Ecology and Evolutionary Biology M139), 130, Chemistry and Biochemistry 103, 153A, Earth, Planetary, and Space Sciences 100, 116, 119, C141, 153, Ecology and Evolutionary Biology M131 (or Geography M110), 153, 198B, 199, Geography 101, M118 (or Atmospheric and Oceanic Sciences M106), 130, 182A, Mechanical and Aerospace Engineering 103, 150A, or Molecular, Cell, and Developmental Biology 172

## Field Biology

The department offers three quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ), the Marine Biology Quarter (MBQ), and the joint Field Marine Biology Quarter (FMBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter involves some combination of Ecology and Evolutionary Biology 113B, 114B, 118, 124A, 124B, 125, C126, 132, 134B, and 151B. The Marine Biology Quarter includes some combination of Ecology and Evolutionary Biology 102, 106, 123A, 123B, 147, 148, 163, 164, 165, and 182. The Field and Marine Biology quarters

may occur during fall, winter, or spring quarter, depending on location and faculty participation. To participate, students must enroll in all courses in the respective program. Participants in both programs are selected by personal interview. Information and applications are available in the Undergraduate Advising Office.

### Honors Program

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Ecology and Evolutionary Biology 198A and 198B. Students do not need to apply for departmental honors. All students are reviewed for honors.

### Computing Specialization

Majors may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science CM186, Psychology 186A, or 186B. A grade of C- or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Undergraduate Advising Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

### Policies

#### Preparation for the Major

Each core curriculum course must be passed with a grade of C- or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C- in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### The Major

Credit for 199 courses from other departments may not be applied.

With consent of the instructors and department, students may enroll in 200-level courses and apply them toward major requirements.

Each course applied toward requirements for preparation for the major and the major must be taken for a letter grade. Marine Biology majors must earn a C- or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major. Courses applied to upper-division major requirements must have a minimum of 4 units. A 6-unit course counts as one course on the requirements for the major.

As requisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 13 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution majors, and Marine Biology majors. Students

must complete Ecology and Evolutionary Biology 109 and 109L prior to participating in the Marine Biology Quarter. Contact the [Undergraduate Advising Office](#) for all requirements for the Marine and Field Biology quarters.

## Undergraduate Minors

### Conservation Biology Minor

The Conservation Biology minor is designed for students who wish to augment their major program of study with courses addressing issues central to the conservation and sustainability of biodiversity and natural ecosystem processes. The minor seeks to provide students with a greater depth of experience and understanding of the role that science can play in developing conservation policy.

#### Admission

To enter the minor, students must (1) be in good academic standing (2.0 grade-point average or better), (2) have completed Life Sciences 7B and Ecology and Evolutionary Biology 100 with minimum grades of C or better, and (3) submit a petition through [Message Center](#) to the Undergraduate Advising Office. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by the College of Letters and Science.

Non-life sciences majors wishing to minor in Conservation Biology should be aware that preparation courses in chemistry, life sciences, mathematics, and physics are requisites to some of the upper-division courses accepted for the minor.

#### The Minor

*Required Lower-Division Course (5 units):* Life Sciences 7B.

*Required Upper-Division Courses (28 units minimum):* Ecology and Evolutionary Biology 100, and four to six courses (24 units minimum) from 100L, 101, 103, 105, 109, 109L, 111, 112, 113A, 113AL, 114A, 114B, C119A, C119B, 122, M127 (or Environment M102 or Geography M102), 129, M131 (or Geography M110), 140, 142, 143, 144, 144L, C146, 149, 151A, 152, 153, 154, 155, 161, 162, 162L, 168, C174, 176, 180A, 180B, 183, 184, Geography M102, M103 (or Environment M103), 106, 107, 116, 117, M118 (or Atmospheric and Oceanic Sciences M106), M126 (or Environment M126), M131, 133. Courses completed as part of the Field Biology Quarter and Marine Biology Quarter may be applied if not taken to fulfill a field quarter requirement; consult with the undergraduate counselors for more information. A maximum of two upper-division geography courses may be applied to the minor.

#### Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Transfer credit for any of the above is subject to departmental approval; consult with

the undergraduate counselors before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

### Evolutionary Medicine Minor

The Evolutionary Medicine minor is designed for students who wish to augment their major program of study with courses that combine the disciplines of ecology and evolutionary biology, anthropology, psychology, and zoology with medicine to create new paradigms for investigating and understanding disease. The minor provides students with a greater depth of experience and understanding of the integration of evolutionary biology and medical education.

#### Admission

To enter the minor, students must (1) be in good academic standing (2.0 grade-point average or better), (2) have completed Life Sciences 7B and Ecology and Evolutionary Biology 100 with minimum grades of C or better, and (3) submit a petition through [Message Center](#) to the Undergraduate Advising Office. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by the College of Letters and Science.

Non-life sciences majors wishing to minor in Evolutionary Medicine should be aware that preparation courses in chemistry, life sciences, mathematics, and physics are requisites to some of the upper-division courses accepted for the minor.

#### The Minor

*Required Lower-Division Course (5 units):* Life Sciences 7B.

*Required Upper-Division Courses (24 units minimum):* Ecology and Evolutionary Biology 100, 120 or 185, and four to five courses from the following (no more than two courses from any area): Anthropology 124P, 124Q, 124S, 126P, 128P, 129, Community Health Sciences 100, 130, Ecology and Evolutionary Biology 110, 117, C119A, C119B, 121, C126, 129, 130, 143, 149, 150, 150L, M157, 171, C174, 175, 184, 186, Epidemiology 100, 197, Geography 136, Gerontology M108, 120, Honors Collegium 141, Human Genetics CM124, C144, Microbiology 106, 107, CM156, 158, 168, 174, Molecular, Cell, and Developmental Biology CM156, 168, 172, Neuroscience M101A, M101B, M101C, 101L, Philosophy 137, 155A, 155B, Physiological Science 124, 125, 165, Psychology 115, 118, 119C, 119F, Public Health C150, Social Welfare 164, Sociology 119, 143, 170.

*Required Research Project or Internship (4 units minimum):* Ecology and Evolutionary Biology 198A and 198B or 199 or a suitable research internship from another department, and must be taken for letter grades.

Participation in the Annual Biology Research Symposium (Poster Session) sponsored by the department in spring quarter is highly recommended.

## Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Transfer credit for any of the above is subject to departmental approval; consult with the undergraduate counselors before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Major

### Biology MS, CPhil, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Ecology and Evolutionary Biology

### Lower-Division Courses

**10. Plants and Civilization. (4)** Lecture, three hours; demonstration, one hour. Designed for nonmajors. Origin of crop plants; man's role in development, distribution, and modification of food, fiber, medicinal, and other plants in relation to their natural history. P/NP or letter grading.

**11. Biomedical Research Issues in Minority Communities. (5)** Discussion, four hours. Limited to 30 students. Discussions and student presentations on biomedical research as it affects minority communities, with emphasis on methodology, design, consequences, and ethics of current research. Discussion leaders provide information on preparation and training for research careers. P/NP or letter grading.

**12. Biodiversity and Extinction: Crisis and Conservation. (4)** Lecture, three hours; discussion, one hour. Examination of ecological and evolutionary principles necessary to understand nature and importance of worldwide environmental crisis. Research by students of specific conservation issues and presentation of results to class. P/NP or letter grading.

**17. Evolution for Everyone. (5)** Lecture, three hours; discussion, two hours. Exploration in detail of Darwinian natural selection, with emphasis on evidence and implications for modern problems people and societies face, including antibiotic resistance, insect resistance to pesticides, and coevolution of pollinators with crop plants. Nature of science in context of questions about ongoing real-time Darwinian processes. Letter grading.

**18. Why Ecology Matters: Science Behind Environmental Issues. (5)** Lecture, three hours; laboratory, two hours. Basic ecological concepts, scientific method, and ecological basis for local and global environmental issues. Major challenges to be faced in this century, including need to find interdisciplinary and

collaborative solutions to world's worsening environmental problems (e.g., global climate change, biodiversity loss, deforestation, pollution, declining water resources, declining fisheries). Environmental literacy to equip students to become leaders in growing green economy and to help forge solutions to current and future environmental crises that threaten natural resource base. P/NP or letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**21. Field Biology. (4)** Lecture, three hours; discussion, two hours, or field trips, three to four hours. Recommended preparation: Life Sciences 15. Not open for credit to students with credit for course 122 or Life Sciences 1. Introduction to natural history of Western North America, especially Southern California. Classification, distribution, and ecology of common plants and animals. P/NP or letter grading.

**25. Living Ocean. (5)** Lecture, three hours; laboratory, one hour; field trips, three hours. Not open for credit to students with credit for Earth, Planetary, and Space Sciences 15. Physical and chemical processes that take place in oceans, with emphasis on their effects on organisms. P/NP or letter grading.

**50. Desert Life. (4)** Lecture, three hours; laboratory, two hours. Introduction to fundamental structural, physiological, and behavioral features of desert organisms, with special emphasis on deserts of Western North America. P/NP or letter grading.

**87. California's DNA: Field Course. (1)** Lecture, one hour; fieldwork, four hours (every other week). Limited to freshmen. Students join CALeDNA community science program and do fieldwork to sample soil and sediments in California. Familiarization with University of California natural reserves spanning coast to woodland, and desert to mountains. Analysis of samples for DNA to capture snapshot of local biodiversity. Prepares students for more intensive, related upper-division science course. Guided Saturday field trips or independent trips. Letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**95. Lower-Division Internship in Biology. (4)** Tutorial/fieldwork, three hours per week per unit. Internship course for lower-division students to be supervised by Center for Community Learning, fieldwork site, and faculty adviser. Consult Undergraduate Office for more information. May be repeated twice. Individual contract with supervising faculty member required. P/NP grading.

**96. Communicating Science: Bringing Complex Concepts to Life. (2)** Seminar, three hours. Limited to Ecology and Evolutionary Biology Department majors. Development of tools for research, integrating and presenting complex scientific concepts concisely and effectively. Basic animation techniques and work in groups to illustrate life sciences concepts. How to engage audiences and convey clear messages. Letter grading.

**97. Variable Topics in Ecology and Evolutionary Biology. (1 to 4)** Seminar, three to 12 hours. Current issues in research in ecology and evolutionary biology. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor. P/NP or letter grading.

**97XA. PEERS Freshman Seminar: Succeeding in Science. (1)** Seminar, one hour. Limited to students in Program for Excellence in Education and Research in Sciences (PEERS). Series of lectures, workshops, and discussions to enhance student success in sciences by developing critical academic survival skills, acquainting students with practice of science, and highlighting opportunities available to participate in research as undergraduate students. P/NP grading.

**97XB. PEERS Sophomore Seminar: Pathways in Science. (1)** Seminar, one hour. Limited to students in Program for Excellence in Education and Research in Sciences (PEERS). Series of lectures and workshops to enhance student success in sciences by acquainting students with practice of science, opportunities available to participate in research as undergraduate students, and careers available to students with science degrees. P/NP grading.

**97XC. AAP Freshman Seminar: Succeeding in Science Majors and Careers. (1)** Seminar, one hour. Limited to science majors in Academic Advancement Program (AAP) who took Mathematics 1 in fall term. Series of lectures, workshops, and discussions designed to enhance student success in sciences by developing critical academic survival skills, acquainting students with campus resources, introducing students to practice of science, and highlighting opportunities available to participate in research as undergraduate students. P/NP grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**100. Introduction to Ecology and Behavior. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 7B. Not open for credit to students with credit for course 118, 122, 124A, 124B, 125, C126, 129, 132, 134B, 136, or 151B. Introduction to methods and topics in ecology and behavior. Growth and regulation of populations, organization of communities and ecosystems, biogeography, and behaviors animals use to find food, choose mates, and interact in social groups. Letter grading.

**100L. Introduction to Ecology and Behavior Laboratory. (4)** Laboratory, four hours. Requisites: course 100 (may be taken concurrently), Life Sciences 1 or 7B. Introduction to research methods in ecology and behavior, resulting in independent research proposals and to gain understanding of scientific method, critical evaluation of research papers, and development of scientific writing skills. Involves work outside and off-campus meetings. To apply this course to the Biology upper-division major laboratory requirement, the corresponding lecture course must be completed with a passing grade. Letter grading.

**101. Marine Botany. (6)** Lecture, four hours; laboratory, six hours; three to four field trips. Requisite: Life Sciences 1 or 7B. Introduction to biology and ecology of marine plants, including algae, sea grasses, and mangroves, with focus on form and function of marine plants and their ecological role in different marine habitats and ecosystems. Letter grading.

**102. Biology of Marine Invertebrates. (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisite: Life Sciences 1 or 7B. Morphology, systematics, life histories and natural history, ecology, behavior, and physiology of marine invertebrates. Given off campus at marine science center. P/NP or letter grading.

**103. Plant Diversity and Evolution. (5)** Lecture, three hours; laboratory, three hours; field trip. Requisites: Life Sciences 1 and 4, or 7A and 7B. Introduction to green plant tree of life, with emphasis on using phylogenetic perspective to examine major transitions in plant evolution, including evolution and diversification of land plants, vascular plants, seed plants, and currently ecologically dominant flowering plants. Introduction to phylogenetics, providing overview of theory

and methodology to reconstruct and use phylogenetic trees to study organismal evolution. Exploration of 700 million years of plant evolution, with emphasis on morphological, functional, ecological, and biogeographical perspectives. Letter grading.

**105. Biology of Invertebrates. (6)** Lecture, three hours; laboratory/field trips, six hours. Requisite: Life Sciences 1 or 7B. Introduction to systematics, evolution, natural history, morphology, and physiology of invertebrates. P/NP or letter grading.

**106. Experimental Marine Invertebrate Biology. (4 or 6)** Lecture, two hours; laboratory, 12 hours. Requisites: course 105, Physiological Science 166 (may be taken concurrently). Offered either as 6-unit quarter-long course or as 4-unit Marine Biology Quarter course. Advanced course of natural history, physiology, biochemistry of invertebrates, with emphasis on independent laboratory and field investigations. P/NP or letter grading.

**107. Evolution, Development, and Function of Invertebrate Animals. (6)** Lecture, three hours; laboratory, three hours; three weekend field trips. Requisite: course 105 or completion of Marine Biology Quarter. Advanced invertebrate biology course exploring evolutionary relationship of animal groups and evolution of marine species, comparative development and developmental genetics of invertebrate form, and form and function as they relate to marine invertebrates. Letter grading.

**108. Biodiversity in Age of Humans. (5)** Lecture, two and one half hours; discussion, one hour; field trip, six to eight hours. Students learn how to use scientific method, ask and answer questions about eDNA, analyze literature, and develop professional skills applicable to any major or career. Series of biointeractive videos, interactive worksheets, and short lectures outside of class set baseline knowledge for problem solving and applied learning in classroom. Letter grading.

**109. Introduction to Marine Science. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Strongly recommended for prospective Marine Biology Quarter students. Introduction to physical and biological world of 70 percent of planet: oceans. Designed to be integrative, with focus on geological evolution of seas, physical and chemical properties of water, and how these abiotic processes shape ecology and evolution of marine organisms and environments. Letter grading.

**109L. Introduction to Marine Science Laboratory. (4)** Laboratory, three hours; four field trips. Requisites: course 109 (may be taken concurrently), Life Sciences 1 or 7B. Introduction to marine environments and methods used to study them. Exploration of variety of concepts in marine science, ranging from oceanography to behavior, primary productivity, and marine biodiversity, with emphasis on experimental design and scientific writing. To apply this course to the Biology upper-division major laboratory requirement, the corresponding lecture course must be completed with a passing grade. Letter grading.

**110. Vertebrate Morphology. (6)** Lecture, three hours; laboratory, five hours. Requisites: Life Sciences 1, 2, and 3, or 7A and 7B. Study of vertebrate morphology, function, and evolution from viewpoint of comparative anatomy of adult forms, biomechanics, development, and paleontology. Laboratory study of selected vertebrates. Letter grading.

**111. Biology of Vertebrates. (5)** Lecture, three hours; laboratory, three hours; four one- to two-day field trips. Requisite: Life Sciences 1 or 7B. Adaptations, behavior, and ecology of vertebrates. Letter grading.

**112. Ichthyology. (6)** Lecture, three hours; laboratory, six hours; field trips. Requisite: Life Sciences 1 or 7B. Highly recommended: courses 110, 111. Biology of freshwater and marine fishes, with emphasis on their evolution, systematics, morphology, zoogeography, and ecology. Field trips to examine fishes of Southern California shoreline, tidepools, and coastal streams. Letter grading.

**113A. Herpetology. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Recommended requisite: course 120. Exploration and summarization of evolution, ecology, life history, and

conservation biology of world's reptile and amphibian fauna. Topics include conservation assessments both globally and in California, discussion sections focused on student-led critical evaluations of current literature, and in-class meetings with professional herpetologists to share their professional experiences and job opportunities. Letter grading.

**113AL. Herpetology Laboratory. (4)** Laboratory, six hours; field trips. Corequisite: course 113A. Primary focus on learning defining features, biogeography, and natural history of world's reptile and amphibian fauna, with special focus on California species. Field trips to observe living species in field, including one extended three-day trip. Letter grading.

**113B. Field Herpetology. (8)** Requisite: Life Sciences 1. Recommended: courses 100, 111. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of Field Biology Quarter. Biology, particularly ecology and behavior, of reptiles and amphibians in their natural habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion. Letter grading.

**114A. Ornithology. (5)** Lecture, three hours; laboratory/field trips, three hours. Requisite: Life Sciences 1 or 7B. Recommended: course 100. Systematics, distribution, physiology, behavior, and ecology of birds. Letter grading.

**114B. Field Ornithology. (8)** Requisite: Life Sciences 1. Recommended: course 100. Two to three weeks of off-campus research projects followed by lecture course and offered only as part of Field Biology Quarter. Biology, particularly ecology and behavior, of birds in their natural habitat. Letter grading.

**115. Mammalogy. (5)** Lecture, three hours; laboratory, three hours. Requisite: Life Sciences 1 or 7B. Topics in mammalian biology, including evolution, ecology, behavior, functional morphology, systematics, physiology, and biogeography. Letter grading.

**116. Conservation Biology. (4)** Lecture, three hours; discussion, two hours. Requisite: Life Sciences 1 or 7B. Recommended: course 100. Not open for credit to students with credit for Environment 121. Study of ecological and evolutionary principles as they apply to preservation of genetic, species, and ecosystem diversity. Discussion sections focus on interactions of science, policy, and economics in conserving biodiversity. Oral and written student presentation on specific conservation issues. Letter grading.

**117. Evolution of Vertebrates. (5)** Lecture, three hours; laboratory, three hours. Recommended requisite: course 110. Survey of origin and evolution of vertebrates through examination of fossil record. Focus on fossil record of tetrapods, with emphasis on anatomical and physiological transformations in amphibians, reptiles, birds, and mammals. Letter grading.

**118. Plant Adaptations. (8)** Lecture, one hour; field trip, 10 hours. Requisite: course 100. Five-week course offered only as part of Field Biology Quarter. Field-oriented introduction to mechanisms by which vascular plants adapt themselves to their abiotic and biotic environments using community, population, and ecophysiological levels of integration. Letter grading.

**C119A. Mathematical and Computational Modeling in Ecology. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 30B or Mathematics 3B or 31A. Recommended: courses 100, 122, Life Sciences 1 or 7B, Mathematics 3C. Introduction to modeling dynamics of ecological systems, including formulation and analysis of mathematical models, basic techniques of scientific programming, probability and stochastic modeling, and methods to relate models to data. Examples from ecology but techniques and principles applicable throughout life and physical sciences. Concurrently scheduled with course C219A. P/NP or letter grading.

**C119B. Modeling in Ecological Research. (4)** Lecture, two hours; discussion, two hours. Recommended requisite: course C119A. Advanced techniques in mathematical and computational modeling of ecological dynamics and other population dynamic problems. Independent research projects developed by students. Topics include model formulation, sto-

chastic models, fitting models to data, sensitivity analysis, presentation of model results, and other topics from current literature. Concurrently scheduled with course C219B. P/NP or letter grading.

**120. Evolution. (4)** Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, 2, 3, 4, and 23L, or 7A, 7B, 7C, and 23L, Mathematics 3A and 3B (or 31A or Life Sciences 30B). Not open for credit to students with credit for course 185. Designed for departmental majors specializing in environmental and population biology. Introduction to mechanics and processes of evolution, with emphasis on natural selection, population genetics, speciation, evolutionary rates, and patterns of adaptation. P/NP or letter grading.

**121. Molecular Evolution. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4, and 23L, or 7A and 23L. Molecular biology, with emphasis on evolutionary aspects. DNA replication, RNA transcription, protein synthesis, gene expression, and molecular evolution. Letter grading.

**122. Ecology. (4)** Lecture, three hours; discussion, two hours. Requisites: course 100, Life Sciences 1 or 7B, Mathematics 3B or 31A or Life Sciences 30B. Highly recommended: Mathematics 31B, 32A. Designed for departmental majors specializing in environmental and population biology. Introduction to population and community ecology, with emphasis on growth and distributions of populations, interactions between species, and structure, dynamics, and functions of communities and ecosystems. P/NP or letter grading.

**123A-123B. Field Marine Ecology. (4 or 8 each)** Lecture, five hours; laboratory, 15 hours. Recommended requisites: courses 100, 122. Offered either as 4- or 8-unit five-week intensive course given off campus as part of Marine Biology Quarter. Survey of current topics in marine ecology, including analysis of primary research literature combined with field study of ecology of marine organisms, populations, communities, and ecosystems. Original research project required. Letter grading. **123A.** In residence at research station located outside continental U.S. **123B.** In residence at research station located within U.S., including Alaska and Hawaii.

**124A-124B. Field Ecology. (4 or 8 each)** Lecture, five hours; laboratory or field trip, 15 hours. Requisites: course 100, Life Sciences 1 or 7B. Recommended: courses 111, 120, 122. Offered as part of Field Biology Quarter. Field and laboratory research in ecology; collection, analysis, and write-up of numerical data, with emphasis on design and execution of field studies. Letter grading. **124A.** In residence at research station located outside continental U.S. for part of or for duration of term. **124B.** In residence at research station located within U.S., including Alaska and Hawaii, for part of or for duration of term.

**125. Tropical Animal Communication. (4 or 8)** Lecture, three hours; discussion, two hours. Requisites: course 100, Life Sciences 1 or 7B. Offered either as 4-unit quarter-long course or as 8-unit Field Biology Quarter course. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Letter grading.

**C126. Behavioral Ecology. (4 or 8)** Lecture, three hours; discussion, two hours. Requisites: course 100, Life Sciences 1 or 7B, Mathematics 3C or 32A or Life Sciences 30B. Recommended: course 129. Offered either as 4-unit quarter-long course or as 8-unit Field Biology Quarter course. Evolutionary perspective of behavioral ecology, with extended consideration of selfish DNA, conflict with genomes, natural selection and coevolution, kin selection and diversity in group functioning and cooperation, social learning, game theory and alternative life histories, and human behavioral ecology. Eight-unit course covers several major areas in animal behavior more broadly, including foraging, sexual selection and predator-prey interactions in five intensive weeks, followed by extended field trip where students do individual projects. Concurrently scheduled with course C242. Letter grading.

**M127. Soils and Environment. (4)** (Same as Environment M102 and Geography M102.) Lecture, three hours; discussion, one hour; field trips. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. P/NP or letter grading.

**M127L. Soils and Environment: Field. (1)** (Same as Environment M102L and Geography M102L.) Laboratory, one hour; field excursions. Corequisite: course M127. Investigations and demonstrations supporting material in course M127, including excavating, describing, and naming soils in field, soil forming processes, geomorphology, and soils. P/NP or letter grading.

**128. Plant Physiological Ecology. (5)** Lecture, three hours; laboratory, three hours; one two-day field trip. Requisites: Life Sciences 1 or 7B, Physics 1C and 4BL, or 5B or 6C. Study of plant/environment interactions under natural conditions. Transpiration and photosynthesis, leaf temperatures, and water movement in soil/plant/atmosphere continuum. Letter grading.

**129. Animal Behavior. (4)** Lecture, three hours; discussion, two hours. Requisites: course 100, Life Sciences 1 or 7B. Introduction to behavioral ecology. Methods and results of evolutionary approaches to study of animal behavior, including foraging strategies, social competition, sexual selection, mating systems, cooperation, and social organization. Letter grading.

**130. Principles of Systematic Biology. (4)** Lecture, three hours; discussion, two hours. Requisite: Life Sciences 1 or 7B. Recommended: courses 120, 135. Concepts, principles, and methods of comparative biology as they apply to inference of evolutionary relationships among organisms. Principles and application of biological nomenclature. Letter grading.

**M131. Ecosystem Ecology. (4)** (Same as Geography M110.) Lecture, three hours; field trips. Requisite: Geography 1 or Life Sciences 7B. Designed for juniors/seniors. Development of principles of ecosystem ecology, with focus on understanding links between ecosystem structure and function. Emphasis on energy and water balances, nutrient cycling, plant-soil-microbe interactions, landscape heterogeneity, and human disturbance to ecosystems. P/NP or letter grading.

**132. Field Behavioral Ecology. (8)** Lecture, two hours; laboratory/field trip, 10 hours. Requisites: course 100, Life Sciences 1 or 7B. Recommended: course 129. Five-week course offered only as part of Field Biology Quarter. Field research in behavioral ecology, emphasizing animal communication. Design and execution of individual and small group field projects during extended field trip. Letter grading.

**133. Elements of Theoretical and Computational Biology. (4)** Lecture, three hours; discussion, one hour; laboratory, two hours. Requisites: Life Sciences 1, 2, 3, 4, 23L, and Mathematics 3A, 3B, and 3C, or 31A and 31B, or Life Sciences 30B. Strongly recommended: elementary statistics course. Introduction of basic core mathematical ideas and models necessary to understand contemporary ecology and evolutionary biology. Population ecology and growth, community ecology, population genetics, natural selection. P/NP or letter grading.

**134B. Field Physiological Ecology of Desert Animals. (8)** Fieldwork, 15 hours. Requisite: Life Sciences 1 or 7B. Recommended: course 100. Two weeks of off-campus research projects with two-week lecture course (four hours per day) and offered only as part of Field Biology Quarter. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in arid habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion. Letter grading.

**C135. Population Genetics. (4)** Lecture, three hours; discussion, one hour. Enforced prerequisite: Life Sciences 4 or 7A. Strongly recommended: course 100, Mathematics 31A, and 31B or Life Sciences 30B. Basic principles of genetics of population, dealing with genetic structure of natural populations and mechanisms of

evolution. Equilibrium conditions and forces altering gene frequencies, polygenic inheritance, molecular evolution, and methods of quantitative genetics. Concurrently scheduled with course C235. Letter grading.

**136. Ecological Restoration. (6)** Lecture, two and one half hours; laboratory, three hours; three field trips. Requisites: course 100, Life Sciences 1 or 7B. Study of ecosystems that have been degraded by overuse or unsustainable extraction of natural resources, foundation of restoration ecology including historical knowledge, reference sites, soil preparation, biodiversity, California natives, succession, disturbances, and best management practices when restoring landscape. Students learn to identify classic symptoms of unhealthy ecosystem and important metrics to determine if and when ecosystem is recovering. Students evaluate Stone Canyon Creek at UCLA. Students develop site and vegetation maps, conduct soil and water tests, and assess overall health of area. Students develop recommendations for restoration plan. Mandatory all-day field trips. Letter grading.

**137. Chemical Communication. (4)** Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL, Life Sciences 1, 2, 3, 23L. Chemical signals are most important means by which organisms communicate. Exploration of how chemical signals are produced, transported, and influence behavior of microbes, plants, and animals. Synthetic approach, with emphasis on applications to cell biology, physiology, and ecology. P/NP or letter grading.

**M139. Introduction to Chemical Oceanography. (4)** (Same as Atmospheric and Oceanic Sciences M105.) Lecture, three hours; discussion, one hour. Introductory course for physical sciences, life sciences, and engineering majors interested in oceanic environment. Chemical composition of oceans and nature of physical, chemical, and biological processes governing this composition in past and present. Cycles of major and minor oceanic constituents, with focus on those that are most important for life (i.e., carbon, nitrogen, phosphorus, silicon, and oxygen). Investigation of primary production, export production, remineralization, diagenesis, air-sea gas exchange processes. Letter grading.

**140. Biology of Marine Mammals. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Examination of evolution, systematics, natural history, anatomy, physiology, and conservation of mammals secondarily adapted to life in oceans: cetaceans, pinnipeds, sirenians, marine otters, and polar bear. Through lectures and readings from recent primary literature, students gain understanding of special adaptations to mammalian life in aquatic environment, roles of marine mammals in oceanic ecosystems, and general principles of marine mammal population biology. Study of historical and contemporary exploitation, conservation, and management of marine mammal stocks. Letter grading.

**142. Aquatic Communities. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Overview of species and communities in marine and freshwater environments. Exploration of interactions of physical and biological factors that shape communities and how scientists test hypotheses. Emphasis on critical reading of primary literature. Letter grading.

**143. Viral Ecology and Evolution. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 7A, 7B, 7C, 23L. Viruses are most common biological entity on planet, and have broad-ranging ecological and evolutionary environmental and medical impacts. This makes understanding roles of viruses central to understanding how ecosystems work, how microorganisms change over time in face of viral infection, how viral pandemics occur and progress, and how many human diseases affect individual health. Students gain comprehensive understanding of how viruses operate in environmental and medical systems, and how they and their hosts evolve over time; and reasoned perspective on future impacts of viruses in changing ecosystems, and on human societies and health. Emphasis on development of mechanistic understanding of viruses. Letter grading.

**144. Prehistoric California. (4)** Lecture, three hours; discussion, one hour; field trips. Requisite: Life Sciences 7B. Recommended: course 100. Survey of history of life as illustrated in fossil record of California. Emphasis on how faunas have changed over time, especially during periods of diversification and extinction. Relation of influence of major events of geologic, climatic, and environmental change on living organisms to environmental change on human timescales. Emphasis on how scientists collect and evaluate fossil data through understanding of living organisms. Letter grading.

**144L. Prehistoric California Laboratory. (4)** Laboratory, three hours. Corequisite: course 144. Survey of major groups of organisms from oceans and on land that can be found in fossil record of California, and relation of them to some of major events in history of life. Emphasis on how faunas have changed over time, especially during periods of diversification and extinction. Consideration of what can be ascertained about life and environments of past from fossils of California and rocks that contain them. Letter grading.

**M145. Advanced Paleontology. (4)** (Same as Earth, Planetary, and Space Sciences M118.) Lecture, three hours. Requisite: course 110 or 117 or Earth, Planetary, and Space Sciences 116. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. P/NP or letter grading.

**C146. Conservation Genetics. (4)** Lecture, three hours; discussion, one hour. Requisites: course 150 or Life Sciences 107, Life Sciences 7A, 7B, 7C. Conservation genetics is interdisciplinary field that integrates genetic methods and concepts from population genetics, evolutionary biology, molecular ecology, and systematics to understand how to conserve and manage populations and species of natural organisms, and understand genetic processes underlying why some go extinct. Case studies of plants and animals cover range of topics including habitat loss, population size, and inbreeding depression; landscape change and genetic connectivity of populations; climate change and local adaptation; management of wild and natural populations; and invasive species. Concurrently scheduled with course C246. Letter grading.

**147. Biological Oceanography (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3, 23L. Lectures include physical, chemical, and biological factors affecting abundance and distribution of organisms in marine environment. Laboratory includes experimental studies of local marine organisms, with emphasis on primary and secondary production and nutrient flux. Letter grading.

**148. Biology of Marine Plants. (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3, and 23L, or 7A, 7B, and 23L. Introduction to general biology of marine algae, including basics of structure reproduction, life histories, systematics, and introduction to physiology and ecology of marine algae. Techniques in culture and laboratory investigation and utilization of algae. Given off campus at marine science center. Letter grading.

**149. Evolutionary Genomics. (4)** Lecture, two hours; laboratory, two hours. Requisites: Life Sciences 7A, 7B, 7C, 23L. Evolutionary genomics is study of variation and changes in genomic sequences due to natural selection pressures. Virtually all organisms on this planet experience evolutionary pressures. Evolutionary pressures act on genomic variation, and in turn can change genomic composition of populations and whole species. Study of how evolutionary forces of mutation, drift, selection, recombination, and migration can change genomes. Analysis of genomic data to make evolutionary inferences. Letter grading.

**150. Principles of Genetics. (4)** Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A or 20A, 14C or 30A, Life Sciences 7A, 7B, 7C, 23L. Ge-

netics in most diverse and inclusive of biological sciences. Fields as divergent as medicine and evolution require understanding of fundamental concepts of heredity as they apply to individuals and populations. Many important social questions require understanding of genetics for informed decision making. Study of foundations of genetics at level expected of all biologists. Students learn basic terminology of field and physical and biochemical basis of various modes of heredity. Students gain understanding of some social implications of various aspects of genetics, and tools necessary to form informed opinions on these issues. Letter grading.

**150L. Principles of Genetics Laboratory. (4)** Laboratory, four hours. Corequisite: course 150. Genetics is most diverse and most inclusive of biological sciences. Fields as divergent as medicine and evolution require understanding of fundamental concepts of heredity as they apply to individuals and populations, and skills to ask and answer questions using genetic techniques. Letter grading.

**151A. Tropical Ecology. (4)** Lecture, one hour; discussion, two hours. Requisite: Life Sciences 1 or 7B. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. P/NP or letter grading.

**151B. Field Tropical Ecology. (8)** Lecture, three hours; fieldwork, five hours. Requisites: course 100, Life Sciences 1 or 7B. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of Field Biology Quarter. Introduction to biodiversity, community structure, and dynamics and ecosystem function in tropical forest habitat. Letter grading.

**152. World Vegetation Ecology and Ecophysiology. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1 or 7B. Diversity of physiological and ecological adaptations in biomes of world, explaining distribution and dynamics of world vegetation types. Focus on processes across scales from cells to ecosystem to globe, instrumentation for environmental and ecophysiological measurements, and experiments used to make discoveries about plant adaptation. Letter grading.

**153. Physics and Chemistry of Biotic Environments. (4)** Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B, and 14BL (or 20A, 20B, and 20L), Life Sciences 1. Recommended: Life Sciences 2, 3, 4, 23L, Physics 6A. Chemical and physical principles that are critical to functional responses by organisms to their habitats. Focus is integrative, providing comprehensive training in basic sciences of physics and chemistry as applied to environmental processes, and consequences of these processes for individual performance, populations, and communities. Covers variety of topics in applied chemistry, including proton pumps, carbonate biogeochemistry and ocean acidification, and allometric scaling of metabolism and effects of temperature on physiological function. Fundamentals of boundary-layer physics and their role in organism's life history. Physics as natural life process, including how organisms are mechanically structures to avoid, resist, or comply to fluid (air and water) motion. P/NP or letter grading.

**154. California Ecosystems. (5)** Lecture, three hours; laboratory or field trip, four hours. Requisite: Life Sciences 1 or 7B. Recommended: course 100. Introduction to structure, biodiversity, and dynamics of California ecosystems, with focus on Southern California, and impact of human activities on these systems. P/NP or letter grading.

**155. Community Ecology. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Recommended: course 100 or 122. Community ecology is study of biodiversity in ecological context: structure and dynamics of natural species assemblages in space and time, and ecological and evolutionary mechanisms that determine which species are present or absent from particular assemblages. Examination of existing theories of community organization and evidence, both observational and experimental, bearing on these theories. Consideration of diverse

array of communities—plant, animal, microbial, terrestrial, and marine—to give appreciation of extraordinary natural history and diversity of life on Earth as it exists in its living ecological context. Discussion of how ecological communities are responding now and will respond in future to anticipated global change, and conservation implications of these changes. Letter grading.

**156. Biology and Social Justice. (4)** Lecture, four hours. Consideration of intersection of biological discovery and human society to better understand how scientific advances have both promoted and mitigated social inequality. Letter grading.

**M157. Biology of Superheroes: Exploring Limits of Form and Function. (4)** (Same as Society and Genetics M157.) Lecture, four hours; discussion, one hour. Requisites: Life Sciences 1 and 4, or 7A and 7B. Combines topics posed in popular graphic novels, movies, and television with primary scientific literature to explore bizarre phenomena in natural world and delve into basic scientific theory and principles. Topics covered include evolution, genetics, physiology, biomechanics, brain-machine interfacing, and artificial intelligence among others. Students synthesize primary literature on diverse subjects presented. Letter grading.

**158. Introduction to Diversity, Health Disparities, and Environment. (2)** Seminar, one hour; discussion, one hour. Requisite: Life Sciences 7B. Focus on intersection of health disparities and environment. Seminar includes guest lecturers focused on environmental determinants of health, and panel discussions focused on careers addressing health disparities. Discussion where students deconstruct research talks to better understand science and how research on health disparities is conducted. Entry course for three-quarter UCLA-Howard Hughes Medical Institute Health Disparities program. Letter grading.

**M159. Biological Modeling: Mathematical and Computational Approaches. (5)** (Same as Computational and Systems Biology M150.) Lecture, four hours; laboratory, three hours. Requisites: Life Sciences 7A, 7B, 7C, Mathematics 33A and 33B, with grades of C or better. Recommended Requisites: Physics 1A, 1B, and 1C, or 5A, 5B, and 5C, with grades of C or better. Students learn how to translate their biological knowledge and intuition into mathematical equations and computer simulations, and how to interpret and glean biological insights from quantitative results and predictions. Review and integration of core mathematical and computational approaches in novel ways. Students gain experience translating and intuition about systems through many examples across range of biological levels, such as predator-prey, disease transmission, cancer initiation, cell migration, neural systems, vascular networks, sleep, drug interactions, gene expression, and more. Students learn how to manipulate data, basics of coding, and how to instantiate their mathematical models and biological intuition through numerical solutions and simulations. Letter grading.

**160. Introduction to Plant Biology. (4)** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 162. Introduction to aspects of plant biology. Topics include plant body, reproduction, plant diversity, gene expression, and basic plant function. Letter grading.

**161. Plant Ecology. (4)** Lecture, two and one half hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Introduction to ecology of terrestrial plants, covering individuals, populations, communities, and global processes. Topics include plant form and function, seed dormancy and population dynamics, life histories, disturbance and succession, community structure and dynamics, and global change. P/NP or letter grading.

**161L. Plant Ecology Laboratory. (4)** Laboratory, four hours. Requisites: course 161 (may be taken concurrently), Life Sciences 7B. Introduction to foundational principles, theory, and field application of ecology. Emphasis on ecology of terrestrial plants, use of these principles to predict consequences, and uncertainties associated with human-caused changes in environment. Examination of both biotic and abiotic elements of environment that influence distribution and abun-

dance of plant species. Includes range of activities, from observations of plant materials in laboratory and in UCLA botanical garden, to manipulative greenhouse experiments with fast growing annual plants, to computer-based explorations of dynamics of foundational ecological models. Letter grading.

**162. Plant Physiology. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 2, 3, and 23L, or 7A, 7B, 7C, and 23L. Basic aspects of plant function, including photochemical, biochemical, and physiological aspects of photosynthesis. Carbon and nitrogen metabolism and its regulation; organellar interactions and compartmentation. Water relations, ion transport, flowering, hormone action, and plant responses to stress. Letter grading.

**162L. Plant Physiology and Ecophysiology Laboratory. (4)** Laboratory, 12 hours. Requisites: course 152 or 162 (may be taken concurrently), Life Sciences 1, 2, 3, and 23L, or 7A, 7B, 7C, and 23L. Focus on whole-plant physiology and ecophysiology from biochemical and molecular processes to whole-plant function and field performance to gain understanding and appreciation of plant function, including dynamic processes of growth, development, and reproduction. Exercises provide training in approaches and instrumentation such that students become scientists, applying physiological techniques to answer questions on plant function, including use of programs such as FunAnatomy (plant anatomy) and FastPlant (growing experiment). To apply this course to the Biology upper-division major laboratory requirement, the corresponding lecture course must be completed with a passing grade. Letter grading.

**163. Biology of Marine Tetrapods. (4)** Lecture, five hours; laboratory and fieldwork, 15 hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3, and 23L, or 7A, 7B, and 23L. Highly recommended: course 111. Five-week intensive course offered only as part of Marine Biology Quarter. Survey of higher vertebrates living in marine habitats, including estuarine amphibians, marine reptiles, seabirds, and marine mammals. Laboratory emphasizes observational and experimental approaches to study of morphology, systematics, ecology, and behavior of local marine birds and mammals. Given off campus at marine science center. Letter grading.

**164. Field Biology of Marine Fishes. (4)** Lecture, five hours; laboratory, 15 hours. Requisite: Life Sciences 1. Recommended: Mathematics 3A, 3B, 3C. Five-week intensive course offered only as part of Marine Biology Quarter. Selected aspects of natural history, ecology, and behavior of diverse assemblage of local marine fishes. Fieldwork strongly emphasized. Given off campus at marine science center. P/NP or letter grading.

**165. Ecological Physiology of Marine Vertebrates. (4)** Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14B and 14BL, or 20B and 30AL, Life Sciences 1, 3, 23L. Recommended: Life Sciences 30B or Mathematics 3C or 32A, and Physics 1C and 4BL, or 6C or 6CH. Five-week intensive course offered only as part of Marine Biology Quarter. Introduction to physiological adaptations of marine vertebrates to major physicochemical variables in world oceans and to major marine habitats. Given off campus at marine science center. Letter grading.

**166. Biology of Marine-Land Interface. (4)** Lecture, five hours; fieldwork, 15 hours. Enforced requisites: courses 109, 109L, Chemistry 14A, 14B, 14BL (or 20A, 20B, 20L), Life Sciences 1, Physics 6A, Statistics 13. Recommended: Life Sciences 2, 3, 4. Land-sea interface is one of most biologically rich, yet challenging habitats on Earth. Organisms must contend with wide range of environmental conditions, including extreme variations in temperature, oxygen, pH, ultraviolet radiation, osmotic stress, and water availability. These habitats are among best natural laboratories for investigating patterns and processes of organism-environment interactions. Basic training in characterization of physical and chemical environmental features to establish basic tenets of organismal performance, as well as population and community dynamics in response to extreme environmental challenges. Forging of critical new linkages between chemistry,

physics, and biology through lecture, laboratory, and field investigations. Offered as part of Marine Biology Quarter. Letter grading.

**167. Natural History Collections in Biological Sciences. (4)** Lecture, two and one half hours; discussion, one hour. Requisite: Life Sciences 7B. Consideration of how natural history collections play vital role in research, learning, and engagement. Topics include history of museum collections; history of naming species; collection curation; collections-based research; decolonization and diversity, equity, accessibility, and inclusion practices; and education and outreach using museum collections. Students learn to curate collections and gain understanding of how collections are used for education, outreach, and research. Letter grading.

**167L. Natural History Collections in Biological Sciences Laboratory. (4)** Laboratory, four hours. Requisite: course 167 (may be taken concurrently). Consideration of how natural history collections play vital role in research, learning, and engagement. Topics include history of museum collections; history of naming species; collection curation; collections-based research; decolonization and diversity, equity, accessibility, and inclusion practices; and education and outreach using museum collections. Students learn to curate collections and gain understanding of how collections are used for education, outreach, and research. Culminates in final project, where students synthesize and implement their knowledge to produce educational, outreach, or research product using specimens from museum. Letter grading.

**168. Global Change Ecology. (4)** Lecture, three hours; discussion, one hour. Exploration of physical climate system and its variability, carbon cycle and related biogeochemistry and ecosystem processes, land-use change, urbanization, and interactions among ecosystems, climate, biogeochemistry, and impact of global change on societally relevant issues and concerns. Global change ecology is field at interface between ecological systems and all aspects of environmental change that affects substantial part of globe. Focus on use of observations and models, consideration of multiple scales of change (temporal and spatial), interaction of human behaviors and choices with natural systems, and linkages across different aspects of global change science. Letter grading.

**170. Animal Environmental Physiology. (6)** Lecture, three hours; laboratory, six hours. Requisites: Chemistry 14D, or 30B and 30BL, Life Sciences 1, 2, 3, 4, and 23L, or Life Sciences 7A, 7B, 7C, and 23L, 30B or Mathematics 3C or 32A, Physics 1C and 4BL, or 5B or 6C or 6CH. Not open for credit to students with credit for Physiological Science 166. Designed for Ecology, Behavior, and Evolution majors. Introduction to physiology (function) of animal organs and organ systems, with emphasis on environmental interactions and ecological adaptations. Letter grading.

**171. Coming of Age on Planet Earth. (4)** Lecture, three hours; discussion, one hour. Across phylogenetically broad range of species, individuals in same developmental stage of life share vulnerabilities and similar challenges. Exploration of shared challenges facing animals as they transition from juveniles to mature adults through integration of behavioral ecology, neuroscience, life history theory, and phylogenetic modeling. Emphasis on life history theory, phylogenetic analyses, and development of testable hypotheses. Students gain understanding of how Tinbergian framework can be applied to understanding developmental characteristics; ability to conceive of and perform formal systematic review; skills necessary to create and interpret phylogenies; and framework for applying lenses of behavioral ecology, neuroscience, and evolutionary biology to better understand coming of age on planet Earth. Letter grading.

**C172. Advanced Statistics in Ecology and Evolutionary Biology. (4)** Lecture, two hours; laboratory, two hours. Enforced Requisite: Life Sciences 40 or Statistics 10 or 13. Overview of and application of advanced statistical methods that go beyond linear models and mean comparison, including bootstrapping, permutations, Bayesian statistics, mixed models, clustering, and network analysis. At course end students should be able to explain which statis-

tical approaches are appropriate for different types of research questions and critically evaluate their outputs. All statistical analysis conducted in R. Concurrently scheduled with course C202. P/NP or letter grading.

**CM173. Earth Process and Evolutionary History. (6)** (Same as Earth, Planetary, and Space Sciences CM173.) Lecture, four hours; laboratory, three hours. Requisites: Chemistry 14A, 14B (or 20A, 20B), Life Sciences 1, 2, 3, and 4, or 7A, 7B, and 7C (or 7A and introductory course in geology). Exploration of relationship between physical processes, such as tectonics and climate, and how they affect surface and impact biology of Earth. Study of evolution of universe, Earth, and life, with integration of history of science, including Darwinian evolution and plate tectonics revolutions. Study of formation of matter offers tools to understand geologic process of climate and ecology of Earth. Past climate change to examine expected future human-influenced climate. Consideration of major events in history of life on Earth. Data and methods from geology, genetics, and geochemistry are integrated to reconstruct past events. This reveals how Earth processes shaped life and how life shaped Earth. Concurrently scheduled with course CM228. Letter grading.

**C174. Comparative Biology and Macroevolution. (4)** Lecture, three hours; laboratory, three hours. Requisite: Life Sciences 1 or 7B. Recommended: one introductory statistics course. Modern comparative biology provides framework for studying broad questions in evolution—How do body shapes evolve? What are dynamics of evolutionary arms race? Why are there so many species in tropics? Why are there so many beetles and so few crocodiles? Did dinosaurs put brakes on diversification of mammals? Examination of why tree of life is essential to understanding patterns of biological diversity and how phylogenetic comparative methods are used to test macroevolutionary hypotheses. Concurrently scheduled with course C230. Letter grading.

**175. Evolutionary Dynamics of Sex. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Fitness dynamics of reproduction when females and males are in conflict over reproductive decisions, with focus on animals with human examples as appropriate. Emphasis on natural selection thinking, sexual selection, and origins of sexual conflict, including Fisherian sex allocation, evolution of manipulation through deceptive communication, and theory of Darwinian sexual conflict. Letter grading.

**176. Ecological Ethics. (4)** Seminar, four hours. Requisite: Life Sciences 1 or 7B. Debates and discussions on current ethical considerations relevant to fields of ecology, evolution, conservation, and behavior. Letter grading.

**C177. Practical Computing for Evolutionary Biologists and Ecologists. (4)** Lecture, three hours; laboratory, two hours. Requisite: Life Sciences 1 or 7B. Introduction to fundamental skills needed for manipulation, analysis, and visualization of large data sets. Basic programming and scripting in Python as well as working in shell, regular expressions, and related topics. Concurrently scheduled with course C234. Letter grading.

**M178. Computational Systems Biology: Modeling and Simulation of Biological Systems. (5)** (Same as Bioengineering CM186, Computational and Systems Biology M186, and Computer Science CM186.) Lecture, four hours; laboratory, two hours; discussion, one hour. Requisites: Life Sciences 30A, 30B, Mathematics 32A or M32T, 33A, and 33B; or Mathematics 31A, 31B, 32A or M32T, 33A, and 33B. Dynamic biosystem modeling and computer simulation methods for studying biological/biomedical processes and systems at multiple levels of organization. Intermediate linear and nonlinear control system, multicompartmental, epidemiological, pharmacokinetic, and other biomodeling methods applied to life sciences problems at molecular, cellular, organ, and population levels. Both theory- and data-driven modeling, with focus on translating biomodeling goals and data into dynamical mathematical models, and implementing them for simulation, quantification, and analysis. Numerical simulation, optimization, and parameter identi-

fiability and search algorithms, with model discrimination and analysis and software exercises in PC laboratory assignments. Letter grading.

**C179. Communicating Science to Informal Audiences. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 158, 187. Science communication is essential skill for advancing scientific research and society. Students work collaboratively to communicate results of original research using formal (e.g., written paper and poster/multimedia presentation) and/or informal (e.g., video, brochure, digital media, etc.) forms of science communication. Students also create reflective communication piece (written, podcast, video) about what they learned through process of research that could be shared with broad audience. Concurrently scheduled with course C237. Letter grading.

**180A-180B. Seminars: Biology and Society. (2-4)** Seminar, two hours (course 180A) and four hours (course 180B). Investigations and discussions of current socially important issues involving substantial biological considerations, either or both as background for policy and as consequences of policy. May be repeated once for credit with instructor change. Letter grading.

**181. Parasitology. (6)** Lecture, three hours; laboratory, six hours. Requisites: Life Sciences 1, 3, and 23L, or 7A, 7B, and 23L. Introduction to principles, biology, and evolution of infectiousness, symbiosis, and parasitism, emphasizing protozoan and helminth parasites, including those of man. Letter grading.

**182. Marine Parasitology. (4)** Lecture, five hours; laboratory, 15 hours. Requisite: Life Sciences 1 or 7B. Recommended: courses 112, 181. Five-week intensive course offered only as part of Marine Biology Quarter. Introduction to natural history and ecology of host-parasite interaction involving intertidal fish hosts. Laboratory includes collection and preparation techniques. Given off-campus at marine science center. Letter grading.

**183. Finding Ecological Solutions to Environmental Problems. (4)** Seminar, two hours; discussion, two and one half hours. Requisite: course 100. Ecological practicum in which students work in teams with client (e.g., non-profit, governmental) to research and propose solutions to diverse ecological problems. Students learn practical skills to apply ecological science to solving of diverse and interdisciplinary environmental problems, in intimate and participatory environment. Students learn and are expected to produce high-quality academic work at professional level. Letter grading.

**184. Evolution, Development, and Disease. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 7B. Recommended prerequisite: course 103, 110, 120, M157, C174, or 185. Exploration of developmental mechanisms underlying evolution of animal design, including impacts of environment on these mechanisms. Exploration of what happens to animal form, including that of humans, when these developmental mechanisms are disrupted by environmental and genetic factors. Letter grading.

**185. Evolutionary Medicine. (4)** Lecture, two and one half hours; discussion, one hour. Requisite: Life Sciences 1 or 7B. Not open for credit to students with credit for course 120. Designed for departmental majors specializing in environmental and population biology and in medicine. Introduction to mechanics and processes of evolution, with emphasis on natural selection, population genetics, speciation, evolutionary rates, and patterns of adaptation. Coverage of fundamental principles of evolution, with special focus on medicine and human health. P/NP or letter grading.

**186. Evolutionary Medicine: Clinical Perspective on Medical, Surgical, and Psychiatric Disorders. (4)** Lecture, three hours; discussion, one hour. From breast cancer and heart failure to self-injury, obsessive-compulsive and eating disorders, all contemporary medical issues have evolutionary roots. Understanding of application of evolutionary thought to issues faced by physicians, veterinarians, psychologists, and other healthcare providers. Development of awareness and understanding of evolutionary roots of these disorders provides future healthcare providers

with expanded perspective that enhances their practice and benefits their patients in whatever field they enter. Letter grading.

**187. Variable Topics in Ecology and Evolutionary Biology. (4)** Lecture, three hours; discussion, one hour. Prerequisites: Life Sciences 1, 2, 3, 4, and 23L, or 7A, 7B, 7C, and 23L. Investigation, discussion, and study of current important issues involving substantial biological considerations in ecology and evolutionary biology. Contact Undergraduate Advising Office for current topics. May be repeated for credit. P/NP or letter grading.

**188. Special Courses in Ecology and Evolutionary Biology. (2)** Seminar, two hours. Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced prerequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced prerequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**190. Research Colloquia in Ecology and Evolutionary Biology. (1)** Seminar, one hour. Designed to bring together students undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. P/NP grading.

**191. Variable Topics Research Seminars: Ecology and Evolutionary Biology. (4)** Seminar, three hours. Seminars on current issues in research in ecology and evolutionary biology. Consult Schedule of Classes for topics and instructors. If content is approved in advance by Undergraduate Advising Office, undergraduate departmental majors may petition to use course to satisfy or partially satisfy elective requirement. May be repeated for credit with consent of instructor. P/NP or letter grading.

**192A-192B. Undergraduate Assistant in Ecology and Evolutionary Biology. (4-2)** Seminar, 12 hours (course 192A) and six hours (course 192B). Limited to juniors/seniors. Training and supervised practicum for advanced undergraduate students in assisting with courses related to biology. Students assist in preparation of materials and development of innovative programs with guidance of faculty members in small course settings. Consult Undergraduate Advising Of-

fice for further information. May not be applied toward course requirements for departmental majors. May be repeated for credit. P/NP grading.

**193. Journal Club Seminars: Ecology and Evolutionary Biology. (1)** Seminar, two hours. Enforced corequisite: one course from 198A through 198D or 199. Limited to undergraduate students. Development of in-depth understanding of and ability to discuss current literature in field of students' own research. May be repeated for credit. P/NP grading.

**194A. Research Group or Internship Seminars: Access to Research Careers. (2)** Seminar, six hours. Designed for juniors/seniors in research traineeships or those who have strong commitment to pursue graduate studies in molecular, biochemical, physiological, or biomedical fields. Weekly presentation and discussion of paper selected from current literature. No more than 4 units may be applied toward departmental majors. May be repeated for credit. Letter grading.

**194B. Research Group or Internship Seminars: Ecology and Evolutionary Biology. (1)** Seminar, two hours. Corequisite: one course from 198A through 198D or 199. Designed to encourage participation and stimulate progress in specific research areas for undergraduate students who are part of departmental research group or internship. Discussion of use of specific research methods and current literature in field or of research of faculty members or students. May be repeated for credit. P/NP or letter grading.

**195. Community or Corporate Internships in Ecology and Evolutionary Biology. (4)** Tutorial, 12 hours. Internship course for juniors/seniors to be supervised by Center for Community Learning, fieldwork site, and faculty adviser. Consult Undergraduate Advising Office for more information. Students meet on regular basis with instructor and provide periodic reports of their experience. May not be applied toward requirements for departmental majors. May be repeated twice for credit. Individual contract with supervising faculty member required. P/NP grading.

**196. Research Apprenticeship in Ecology and Evolutionary Biology. (2 to 4)** Tutorial, three hours per week per unit. Limited to juniors/seniors. Entry-level research apprenticeship for upper-division students under guidance of faculty mentor. May be repeated for credit. Individual contract required. P/NP or letter grading.

**198A-198D. Honors Research in Ecology and Evolutionary Biology. (4 each)** Tutorial, 12 hours. Limited to juniors/seniors. Supervised individual research designed to broaden and deepen students' knowledge of some phase of biology. Must be taken with Ecology and Evolutionary Biology Department faculty for at least two terms and for total of at least 8 units. Eight units may be applied toward departmental majors. Individual contract required. In Progress (198A) and letter (198B) grading. Students may elect to enroll in additional research through courses 198C and 198D (letter grading). Report on progress must be presented to undergraduate adviser each term 198 course is taken.

**199. Directed Research in Ecology and Evolutionary Biology. (2 to 4)** Tutorial, six to 12 hours. Preparation: submission of written proposal outlining study or research to be undertaken. Studies to involve laboratory or field-related research, not literature surveys or library research. Proposal to be developed in consultation with instructor and submitted for approval to undergraduate adviser before day instruction begins in that term. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. At end of term culminating report describing progress of study or research and signed by student and instructor must be presented to undergraduate adviser. Only one 199 course may be applied toward departmental majors. May be repeated for credit. Individual contract required. Letter grading.

## Graduate Courses

**200A. Evolutionary Biology. (4)** (Formerly numbered M200A.) Lecture, two hours; discussion, two hours. Current concepts and topics in evolutionary biology, including microevolution, speciation and species concepts, analytical biogeography, adaptive radiation,

mass extinction, community evolution, molecular evolution, and development of evolutionary thought. S/U or letter grading.

**200B. Ecology. (4)** Lecture, two hours; discussion, two hours. Principles and current topics in ecology. Topics may include island biogeography, disturbance ecology, chemical ecology, and physiological ecology. S/U or letter grading.

**200C. Advanced Animal Behavior. (4)** Lecture, two hours; discussion, two hours. Survey of major topics in field of behavioral ecology. Topics include introduction to variety of research pursuits in field and questions and debates at leading edges of research. Advanced interdisciplinary primer that spans topics from mechanisms of behavior at molecular and cellular levels to consequences of behavior for Darwinian fitness and ecological and evolutionary processes. S/U or letter grading.

**201. Introduction to R for Ecology and Evolutionary Biology. (1)** Lecture, six hours; discussion, six hours. Designed for departmental PhD students. Offered as intensive two-day course at beginning of term. Introduction to R language. Topics include working at command line, writing scripts and functions, flow control, graphics, and conducting basic simulations in discrete and continuous time. S/U grading.

**C202. Advanced Statistics in Ecology and Evolutionary Biology. (4)** Lecture, two hours; laboratory, two hours. Enforced Requisite: Life Sciences 40 or Statistics 10 or 13. Overview of and application of advanced statistical methods that go beyond linear models and mean comparison, including bootstrapping, permutations, Bayesian statistics, mixed models, clustering, and network analysis. At course end students should be able to explain which statistical approaches are appropriate for different types of research questions and critically evaluate their outputs. All statistical analysis conducted in R. Concurrently scheduled with course C172. S/U or letter grading.

**203. Marine Botany and Physiology. (4)** Lecture, two hours; discussion, one hour; laboratory, six hours; experimental project. Designed for graduate students. Structure, reproduction, life histories, and biology of marine algae, with emphasis on physiological ecology and biochemistry. Techniques in culture and physiological, ecological, and biochemical investigation of algae. Given off campus at marine science center. S/U or letter grading.

**204. Advanced Biology of Algae. (4)** Lecture, four hours; discussion, one hour. Consideration of current research in experimental phycology. Topics include discussion of appropriate aspects of chemical and physical oceanography and limnology; algal physiology; biochemistry, physiological ecology, and algal processes in ocean and freshwater habitats. S/U or letter grading.

**205. Marine Invertebrate Biology. (4)** Lecture, four hours; laboratory, eight hours. Functional morphology, life histories, and systematics of marine invertebrates of all major and most minor taxa; emphasis on living animal and its habitat. Given off campus at marine science center. S/U or letter grading.

**206. Advanced Ichthyology. (4)** Lecture, three hours; laboratory, three hours. Requisite: course 111 or 112. Advanced study of various aspects of fish biology. Theme varies from year to year. May be repeated for credit. S/U or letter grading.

**208. Advanced Vertebrate Morphology. (4)** Lecture, two hours; laboratory, eight hours. Requisite: course 110. Emphasis on functional approach to evolution of vertebrate locomotor, feeding, and circulatory systems. Laboratory includes comparative and experimental analyses of morphological adaptation. Independent project required. May be repeated once for credit. S/U or letter grading.

**209. Behavior of Arthropods. (4)** Lecture, three hours; discussion, one hour. Advanced study of topics in behavior of terrestrial arthropods, including communication, feeding, reproductive, and social behavior. Emphasis on both mechanistic and adaptive approaches toward understanding behavior. Independent project required. S/U or letter grading.

**210. Advanced Ornithology. (4)** Lecture, two hours; laboratory, two hours; fieldwork, two hours. Prerequisite: course 114A. Advanced study of topics in modern avian biology. Emphasis on experimental approaches to investigations of physiology (energetics, nutrition, osmoregulation), ecology (population and community organization), and behavior (foraging, breeding, sociality). S/U or letter grading.

**217. Marine Ecology. (4)** Lecture, four hours; discussion, one hour. Designed for graduate students. Structure, diversity, and energetics of marine communities; behavior, population dynamics, and biogeography of component species; associated oceanography and geology. Given off campus at marine science center. S/U or letter grading.

**218. Oceanology. (4)** Lecture, four hours; discussion, one hour. Designed for graduate students. Ecology and dynamics of pelagic and benthic associations; physicochemical properties of seawater and marine substrates and their biological significance; qualitative and quantitative methods of oceanology. Given off campus at marine science center. S/U or letter grading.

**C219A. Mathematical and Computational Modeling in Ecology. (4)** Lecture, three hours; discussion, one hour. Prerequisite: Life Sciences 30B or Mathematics 3B or 31A. Recommended: courses 100, 122, Life Sciences 1 or 7B, Mathematics 3C. Introduction to modeling dynamics of ecological systems, including formulation and analysis of mathematical models, basic techniques of scientific programming, probability and stochastic modeling, and methods to relate models to data. Examples from ecology but techniques and principles applicable throughout life and physical sciences. Concurrently scheduled with course C119A. S/U or letter grading.

**C219B. Modeling in Ecological Research. (4)** Lecture, two hours; discussion, two hours. Recommended prerequisite: course C219A. Advanced techniques in mathematical and computational modeling of ecological dynamics and other population dynamic problems. Independent research projects developed by students. Topics include model formulation, stochastic models, fitting models to data, sensitivity analysis, presentation of model results, and other topics from current literature. Concurrently scheduled with course C119B. S/U or letter grading.

**220. Conservation Science: Theory and Practice. (3)** Lecture, three hours. Limited to graduate students. Conceptual foundations of conservation science and its applications to real-world conservation problems. Designed for students who intend to be academic researchers and want to learn about conservation in way that can make research immediately relevant, and those who intend to be conservation practitioners and want to be exposed to cutting-edge theory and thinking to tackle today's complex conservation challenges. May be repeated for credit. S/U grading.

**224. Marine Molecular Biology. (8)** Lecture, three hours; laboratory, eight hours. Preparation: background in marine sciences, basic cell biology and biochemistry. Ten-week intensive course designed to train marine biologists in advanced techniques of cell and molecular biology. Independent project required. Given off campus at marine science center. S/U or letter grading.

**M226. Global Health Measures for Biological Emergencies. (4)** (Same as Epidemiology M226.) Lecture, four hours. Prerequisite: Epidemiology 220. Mitigation of bioterrorism falls outside traditional public health programs and public health graduate education. Because of seriousness of such threats, it is important that individuals trained in public health understand problems and responses. Letter grading.

**CM228. Earth Process and Evolutionary History. (6)** (Same as Earth, Planetary, and Space Sciences CM273.) Lecture, four hours; laboratory, three hours. Prerequisites: Chemistry 14A, 14B (or 20A, 20B), Life Sciences 1, 2, 3, and 4, or 7A, 7B, and 7C (or 7A and introductory course in geology). Exploration of relationship between physical processes, such as tectonics and climate, and how they affect surface and impact biology of Earth. Study of evolution of universe, Earth, and life, with integration of history of science, including Darwinian evolution and plate tec-

tonics revolutions. Study of formation of matter offers tools to understand geologic process of climate and ecology of Earth. Past climate change to examine expected future human-influenced climate. Consideration of major events in history of life on Earth. Data and methods from geology, genetics, and geochemistry are integrated to reconstruct past events. This reveals how Earth processes shaped life and how life shaped Earth. Concurrently scheduled with course CM173. Letter grading.

**C230. Comparative Biology and Macroevolution. (4)** Lecture, three hours; laboratory, three hours. Prerequisite: Life Sciences 1 or 7B. Recommended: one introductory statistics course. Modern comparative biology provides framework for studying broad questions in evolution—How do body shapes evolve? What are dynamics of evolutionary arms race? Why are there so many species in tropics? Why are there so many beetles and so few crocodiles? Did dinosaurs put brakes on diversification of mammals? Examination of why tree of life is essential to understanding patterns of biological diversity and how phylogenetic comparative methods are used to test macroevolutionary hypotheses. Concurrently scheduled with course C174. S/U or letter grading.

**M231. Molecular Evolution. (4)** (Same as Earth, Planetary, and Space Sciences M217.) Lecture, two hours; discussion, two hours. Series of advanced topics in molecular evolution, with special emphasis on molecular phylogenetics. Topics may include nature of genome, neutral evolution, molecular clocks, concerted evolution, molecular systematics, statistical tests, and phylogenetic algorithms. Themes may vary from year to year. May be repeated for credit. S/U or letter grading.

**M232. Evolutionary Ecology. (4)** (Formerly numbered 232.) (Same as Biomathematics M212.) Lecture, two and one half hours. Prerequisite: course M200A or 200B, or equivalent. Concepts and topics include fundamental concepts of evolutionary ecology, including life history theory, quantitative genetics and phenotypic evolution, and advances made in field in last decade. May be repeated for credit. Letter grading.

**233. UCLA/La Kretz Workshop in Conservation Genomics. (2)** Lecture, two hours; discussion, one hour; laboratory, two hours. Five-day field experience at La Kretz Center Field Station and Stunt Ranch in Santa Monica Mountains. Conservation biology and genetics have had long and intimate relationship and constitute one key application of evolutionary analysis to real-world biological problems. Impacts of population genetics, phylogenetics, and phylogeography have been particularly striking for conservation biology and have helped solve some of most pressing problems in biological conservation. Annual workshop to provide training environment for small group of motivated graduate students to explore how conservation problems can best be addressed with genomic-level data. Hands-on experience on efficient collection, troubleshooting, and analysis of large datasets for conservation-relevant problems. Active participation from members of several U.S. government agencies at forefront of endangered species protection and management, providing forum for exploring relevant aspects of conservation genomics to managers. S/U grading.

**C234. Practical Computing for Evolutionary Biologists and Ecologists. (4)** Lecture, three hours; laboratory, two hours. Prerequisite: Life Sciences 1 or 7B. Introduction to fundamental skills needed for manipulation, analysis, and visualization of large data sets. Basic programming and scripting in Python as well as working in shell, regular expressions, and related topics. Concurrently scheduled with course C177. Letter grading.

**C235. Population Genetics. (4)** Lecture, three hours; discussion, one hour. Basic principles of genetics of population, dealing with genetic structure of natural populations and mechanisms of evolution. Equilibrium conditions and forces altering gene frequencies, polygenic inheritance, molecular evolution, and methods of quantitative genetics. Concurrently scheduled with course C135. S/U or letter grading.

**236. Seminar: Marine Molecular Biology. (4)** Seminar, 10 hours. Prerequisite: course 224. Seminar on current issues and work in marine molecular biology. Given off campus at marine science center. S/U or letter grading.

**C237. Communicating Science to Informal Audiences. (4)** Lecture, three hours; discussion, one hour. Prerequisites: courses 158, 187. Science communication is essential skill for advancing scientific research and society. Students work collaboratively to communicate results of original research using formal (e.g., written paper and poster/multimedia presentation) and/or informal (e.g., video, brochure, digital media, etc.) forms of science communication. Students also create reflective communication piece (written, podcast, video) about what they learned through process of research that could be shared with broad audience. Concurrently scheduled with course C179. Letter grading.

**M238. Ocean Biogeochemical Dynamics and Climate. (4)** (Same as Atmospheric and Oceanic Sciences M235.) Lecture, three hours. Interaction of ocean biogeochemical cycles with physical climate system. Biogeochemical processes controlling carbon dioxide and oxygen in oceans and atmosphere over time-scales from few million years to several years. Anthropogenic perturbation of global carbon cycle and climate. Response of ocean ecosystems to past and future global changes. Use of isotopes to study ocean biogeochemical cycles and climate. Interactions between biogeochemical cycles on land and in ocean. S/U or letter grading.

**240. Physiology of Marine Animals. (4)** Lecture, four hours; discussion, one hour. Designed for graduate students. Lecture and laboratory studies on cellular, tissue, organ, and animal physiology; regulatory biology; metabolic characteristics of cells, energy transformations. Given off campus at marine science center. S/U or letter grading.

**C242. Behavioral Ecology. (4)** Lecture, three hours; discussion, two hours. Prerequisites: course 100, Life Sciences 1 or 7B, Mathematics 3C or 32A or Life Sciences 30B. Recommended: course 129. Evolutionary perspective of behavioral ecology, with extended consideration of selfish DNA, conflict with genomes, natural selection and coevolution, kin selection and diversity in group functioning and cooperation, social learning, game theory and alternative life histories, and human behavioral ecology. Concurrently scheduled with course C126. Letter grading.

**243. Animal Communication. (4)** Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 3C or 32A, and Physics 1C and 4BL, or 6C or 6CH. Physical properties of animal signals and physiological mechanisms underlying their generation and reception. Lectures treat signal analysis, signal transmission, and receptor design in light of constraints placed on each sensory modality. Examples of communication systems using visual, auditory, chemical, electrical, and magnetic cues, with emphasis on biological adaptations for efficiently signaling species-specific information. S/U or letter grading.

**244. Advanced Insect Physiology. (4)** Lecture, two hours; laboratory, five hours. Detailed discussion of current problems in insect physiology, with advanced laboratory. S/U or letter grading.

**C246. Conservation Genetics. (4)** Lecture, three hours; discussion, one hour. Prerequisites: course 150 or Life Sciences 170, Life Sciences 7A, 7B, 7C. Conservation genetics is interdisciplinary field that integrates genetic methods and concepts from population genetics, evolutionary biology, molecular ecology, and systematics to understand how to conserve and manage populations and species of natural organisms, and understand genetic processes underlying why some go extinct. Case studies of plants and animals cover range of topics including habitat loss, population size, and inbreeding depression; landscape change and genetic connectivity of populations; climate change and local adaptation; management of wild and natural populations; and invasive species. Concurrently scheduled with course C146. S/U or letter grading.

**247. Advanced Plant Biology. (4)** Lecture, three hours; discussion, two hours. Requisite: course 162 or Molecular, Cell, and Developmental Biology C141. Open to undergraduates with consent of instructor. Designed to expose first-year graduate students to topics of current interest in plant biology. Subjects include plant genetics, growth and development, organelle structure, development and function, and plant-specific metabolic processes (photosynthesis, nitrogen fixation, metabolism of small molecules). S/U or letter grading.

**250. Professional Skills for Biological Research. (2 to 3)** Seminar, two hours. Preparation, writing, and submission of research proposals. Collection and maintenance of field and laboratory data, preparation of scientific presentations, review of literature, and publishing strategies. Optional field trip offered during some years for 1 extra unit. S/U or letter grading.

**251. Seminar: Systematics. (2)** Seminar, two to four hours. Current topics in systematic biology, including methods development and specific applications in study of phylogeny. Theme varies from year to year. May be repeated for credit. S/U or letter grading.

**253. Seminar: Plant Structure. (2)** Seminar, two hours. S/U or letter grading.

**255. Seminar: Invertebrate Zoology. (2)** Seminar, two hours. S/U or letter grading.

**259. Seminar: Herpetology. (2)** Seminar, three hours. Seminar on current approaches to herpetology. Main theme varies from year to year in areas such as biogeography, ecology, behavior, environmental physiology. S/U or letter grading.

**260. Seminar: Biology of Terrestrial Vertebrates. (2)** Seminar, two hours. S/U or letter grading.

**261. Molecular Ecology of Plant Populations. (2)** Seminar, two hours. Requisite: course M200A. Integration of ecological, population genetic, and evolutionary concepts to understand evolutionary ecology and conservation biology of plant populations in natural and disturbed settings, with application to both terrestrial and marine systems. Letter grading.

**263. Seminar: Population Genetics. (2 or 4)** Seminar, three to six hours. Seminar on topics of current interest in population genetics, such as kin selection, sociobiology, cultural evolution, conservation genetics, etc. S/U or letter grading.

**264. Seminar: Stomatal Function. (4)** Seminar, two hours; discussion, two hours. Open to undergraduates with consent of instructor. Structure and function of guard cells; gas exchange; environmental and hormonal regulation of stomatal responses; sensory transduction; stomatal adaptations. S/U or letter grading.

**265. Seminar: Biophysical Plant Ecology. (2)** Seminar, two hours. S/U or letter grading.

**267. Seminar: Current Topics in Evolutionary Ecology. (2)** Seminar, two hours. S/U or letter grading.

**268. Seminar: Population Biology. (2)** Seminar, two hours. S/U or letter grading.

**269. Seminar: Animal Ecology. (2)** Seminar, three hours. Advanced study of specific topics in animal ecology and related fields. S/U or letter grading.

**270. Seminar: Environmental Physiology. (2)** Seminar, two hours. S/U grading.

**271. Seminar: Phycology and Mycology. (2)** Seminar, two hours. Requisite: course 101. Advanced study in biology of algae and fungi. Topics in physiological ecology, physiology, and biochemistry of algae and fungi, and their industrial uses. Algae and fungi as experimental organisms. Phylogeny and origin of eukaryote organisms. Evolutionary origin of chloroplasts. S/U or letter grading.

**272. Seminar: Marine Biology. (2)** Seminar, two hours. S/U or letter grading.

**273. Seminar: Entomology. (2)** Seminar, two hours. Discussion of specific topics in entomology and related fields. Main theme varies from year to year, but usually emphasizes areas such as behavior, ecology, and evolution. S/U grading.

**274. Seminar: Behavioral Ecology. (2)** Seminar, two hours. Discussion of theoretical and empirical aspects of topics in behavioral ecology. S/U or letter grading.

**279. Seminar: Evolutionary Biology. (2)** Seminar, two hours. Requisite: course M231. Emphasis on particular issue in evolutionary biology, varying in topic whenever offered. Topics may include advances in phylogenetic methodology; relationship between development and evolution; biogeography, climate change, and faunal evolution; dispersal mechanisms and macroevolutionary patterns; adaptation and diversification; macroevolutionary patterns in fossil record. S/U or letter grading.

**282. Seminar: Ichthyology. (2)** Seminar, two hours. Requisite: course 111 or 112. Student presentations and discussion of specific topics in ichthyology. Theme varies from year to year. May be repeated for credit. S/U or letter grading.

**M286. Seminar: Statistical Problem Solving for Population Biology. (2)** (Same as Statistics M286.) Seminar, two hours. Designed for graduate students. Statistical solutions to complex data analysis and/or experimental design problems encountered by biology graduate students in their own research. S/U or letter grading.

**288. Seminar: Plant Cell Biology. (2)** Seminar, two hours. Recommended preparation: course 162. S/U or letter grading.

**M290. Seminar: Comparative Physiology. (2)** (Same as Physiological Science M290.) Seminar, two and one half hours. Discussion of specific topics in comparative physiology of animals. Topics vary from year to year, with emphasis on systems physiology, neuroethology, or behavioral physiology. S/U or letter grading.

**291. Seminar: Physiology and Biochemistry of Arthropods. (2)** Seminar, two hours. S/U or letter grading.

**296. Seminar: Ecology and Evolutionary Biology. (1 to 4)** Seminar, three hours. Advanced study and analysis of current topics in cellular, organismic, and population biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U or letter grading.

**297. Selected Topics in Ecology and Evolutionary Biology. (1 to 4)** Seminar, one to three hours. Advanced study and analysis of variable research topics in research issues in ecology and evolutionary biology. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor. S/U or letter grading.

**299. Seminar: Parasitology. (2)** Seminar, two hours. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**495. Preparation for Teaching Biology in Higher Education. (2)** Seminar, to be arranged. Designed for graduate students. Study of problems and methodologies in teaching biology, which includes workshops, seminars, apprentice teaching, and peer observation. S/U grading.

**496. Preparation for Teaching Biology in Higher Education. (2)** Lecture, two hours. Designed for graduate students. Strongly recommended as sequel to course 495 discussions on teaching, theory, and development of advanced skills. Study of methods and approaches to teaching of specific areas in biology, with emphasis on laboratory teaching, instructor/student interaction, and undergraduate motivation. S/U grading.

**596. Directed Individual (or Tutorial) Studies. (2 to 12)** Tutorial, to be arranged. Letter grading.

**596F. Directed Individual (or Tutorial) Studies. (2 to 8)** Tutorial, to be arranged. Given off campus at marine science center. S/U or letter grading.

**597. Preparation for MA Comprehensive Examination or PhD Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. May not be applied toward MA or PhD course requirements. S/U grading.

**598. MA Thesis Research and Writing. (2 to 12)** Tutorial, to be arranged. S/U grading.

**599. PhD Dissertation Research and Writing. (2 to 12)** Tutorial, to be arranged. S/U grading.

## ECONOMICS

*College of Letters and Science*

8283 Bunche Hall  
Box 951477  
Los Angeles, CA 90095-1477

**Economics**  
310-825-1011

Jinyong Hahn, PhD, *Chair*  
John W. Asker, PhD, *Undergraduate Vice Chair*  
Ichiro Obara, PhD, *Graduate Vice Chair*  
Andrew G. Atkeson, PhD, *Director, Business Economics*

## Faculty Roster

### Professors

John W. Asker, PhD (*Armen A. Alchian Professor of Economic Theory*)  
Andrew G. Atkeson, PhD (*Stanley M. Zimmerman Endowed Professor of Economics and Finance*)  
Martha J. Bailey, PhD  
Simon A. Board, PhD (*Benjamin Graham Endowed Professor of Value Investing*)  
Ariel T. Burstein, PhD  
Denis N. Chetverikov, PhD (*Charles E. Davidson Endowed Term Professor of Economics*)  
Dora L. Costa, PhD (*Kenneth L. Sokoloff Professor of Economic History*)  
Sebastian Edwards, PhD (*Henry Ford II Professor of International Management*)  
Pablo D. Fajgelbaum, PhD (*Dubchansky Endowed Professor of Economics*)  
Jinyong Hahn, PhD  
Gary D. Hansen, PhD  
Hugo A. Hopenhayn, PhD  
Oleg Itskhoki, PhD (*Venu and Ana Kotamraju Endowed Professor of Economics*)  
Zhipeng Liao, PhD  
Adriana Lleras-Muney, PhD  
Rosa L. Matzkin, PhD (*Charles E. Davidson Endowed Professor of Economics*)  
Maurizio Mazzocco, PhD  
Kathleen M. McGarry, PhD  
Moritz Meyer-ter-Vehn, PhD  
Ichiro Obara, PhD  
Lee E. Ohanian, PhD  
Peter E. Rossi, PhD (*James A. Collins Professor of Management*)  
Andres Santos, PhD  
Aaron Tornell, PhD  
Jonathan E. Vogel, PhD  
Till M. von Wachter, PhD  
Pierre-Olivier Weill, PhD

### Professors Emeriti

William R. Allen, PhD  
Masanao Aoki, PhD  
Costas Azariadis, PhD  
Moshe Buchinsky, PhD  
Harold Demsetz, PhD  
Bryan C. Ellickson, PhD

Roger E. Farmer, PhD  
 Arnold C. Harberger, PhD  
 Benjamin Klein, PhD  
 Deepak K. Lal, DPhil (*James S. Coleman Professor Emeritus of International Development Studies*)  
 Naomi R. Lamoreaux, PhD  
 Axel S. Leijonhufvud, PhD  
 John J. McCall, PhD  
 Joseph M. Ostroy, PhD  
 John G. Riley, PhD  
 Finis R. Welch, PhD  
 William R. Zame, PhD

### Associate Professors

David R. Baqaee, PhD  
 Natalie D. Bau, PhD  
 Saki Bigio, PhD  
 Michela Giorcelli, PhD  
 Martin B. Hackmann, PhD  
 Jay Y. Lu, PhD  
 Sule Ozler, PhD

### Assistant Professors

Alexander W. Bloedel, PhD  
 Daniel Clark, PhD  
 Bernardo S. da Silveira, PhD  
 Felipe M. Goncalves, PhD  
 João Guerreiro, PhD  
 Daniel Haanwinckel, PhD  
 Juliana Londoño-Vélez, PhD  
 Rodrigo R.A. Pinto, PhD  
 William M. Rafey, PhD  
 Michael A. Rubens, PhD  
 Tomasz M. Sadzik, PhD  
 Yotam Shem-Tov, PhD  
 Shuyang Sheng, PhD

### Lecturer

Edward P. McDevitt, PhD

### Adjunct Associate Professor

Randall R. Rojas, PhD

### Adjunct Assistant Professors

Kimberly S. Boswell, PhD  
 Patrick D. Convery, MBA, PhD  
 Olivia I. Osei-Twumasi, PhD  
 William E. Simon, Jr., JD, PhD  
 Christopher J. Surro, PhD

## Overview

The UCLA Department of Economics is one top-ranked departments in the world. Through their research, the young and active faculty shape policy and inform the public on critical issues affecting the U.S. and the world. The department's work covers diverse topics such as the origins and persistence of the Great Depression and its lessons for today's economy, the relationship between education and health outcomes, cartels and antitrust policy, the economics of health care, and the impact of immigration on labor markets. Many faculty have received special recognition for their body of research by election to prestigious institutions such as the National Academy of Science, the American Academy of Arts and Sciences, and the Econometric Society, or have received celebrated awards such as the Guggenheim and Sloan Fellowships.

The undergraduate students are equally impressive. They are among the brightest students on campus and consistently go on to find success in the job market and in graduate school. Approximately 3,000 majors make the department the largest among major economics departments across the country, and one of the largest majors on campus. Students come from countries around the world, but the majority call California their home. Many are the first in their families to attend college, and the department is proud of them and their accomplishments.

An economics degree opens the door to a world of opportunities beyond UCLA. Department alumni play important roles in business, entertainment, and academia. Many maintain strong ties with UCLA and with the department. Undergraduate students go on to attend business school, law school, medical school, and graduate school in a variety of disciplines.

## Undergraduate Study

The Economics Department undergraduate program is designed for students who wish to gain a thorough understanding of both empirical and theoretical approaches to economics. Emphasis is on economic principles applied to resolving interpersonal conflicts of interest and coordinating productive activity in a world of scarce resources. Because students must gain a thorough theoretical and technical competence before extensive study of the applied specializations in the discipline, the analytic core of the major in Economics is closely structured. Some courses are appropriate for non-majors, but the curriculum is most suitable for students who wish to make the study of economics the primary focus in their undergraduate education.

The undergraduate major provides students with analytical training in reference to socioeconomic phenomena and provides an excellent theoretical background for those pursuing graduate education in economics, law, management, public administration, journalism, social welfare, architecture and urban planning, and education.

## Graduate Study

The graduate program is designed primarily for students pursuing the PhD degree. The doctorate is awarded to those students who have achieved the level of study and training required for a professional economist. The degree recognizes students' ability to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

## Undergraduate Majors

### Economics BA

#### Learning Outcomes

The Economics major has the following learning outcomes:

- Application of economic analyses to everyday life, and visualization of economics in real-world situations
- Application of learning to policy-relevant issues
- Ability to understand current events
- Ability to assess the likely impact of specific policies put forth by government entities
- Evaluation of the role played by assumptions in arguments made for and against economic and policy issues
- Use of quantitative evidence and economic models to assess the validity of economic and policy-relevant arguments
- Understanding of statistical methodology and interpretation of statistical evidence
- Use of data to construct quantitative economics arguments, and to understand the statistical problems associated with interpreting the results
- Understanding of the role of sample selection/endogeneity in affecting results, and how to correct for these issues
- Formulation of written arguments that state assumptions and hypotheses, and evaluation of their pros and cons based on evidence
- Oral presentation of a carefully reasoned economic argument, and response to related questions
- Graphic presentation of a carefully reasoned economic argument by means of graphs, figures, charts, and presentation software
- Working knowledge of information databases, and knowledge of how to use the Web in gathering reliable information
- Location and use of primary data sources such as surveys
- Use of knowledge gained to understand and evaluate current economic events and new economic ideas

## Entry to the Major

### Admission

Application for the Economics major should be submitted to the department undergraduate counseling office through the Message Center. To apply, students must have completed at least 72 quarter units (but no more than 135 quarter units), one 12-unit term in residence in regular session at UCLA, and all courses listed under preparation for the major. Grades for preparation for the major courses must be reflected on the Degree Audit Report (DAR) prior to submission.

### Pre-major

While students are completing the lower-division preparation for the major courses, they may be classified as Economics pre-majors.

### Transfer Students

Transfer applicants to the Economics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one microeconomics course, one macroeconomics course, two calculus courses from the mathematics/physical sciences sequence, and one English critical reading and writing course. Transfer students must successfully complete all remaining pre-major re-

requirements within their first three registered terms at UCLA.

Transfer credit for any of the above is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* Economics 1, 2, 11, 41; one Writing II course or English Composition 129B; Mathematics 31A, and 31B or 31E.

### The Major

*Required:* Twelve upper-division economics courses as follows: Economics 101, 102, 103, 103L, 104, 104L, and six Economics Department upper-division elective courses. No more than two of the elective courses may also be selected from Management 120A, 120B, 122, 127A, 130A, 180 (real estate finance only).

### Honors Program

Students must complete Economics 198A and 198B in which a thesis is written.

## Policies

### Preparation for the Major

Each course must be taken for a letter grade. A 2.0 (C) grade is required in each pre-major course. To enter the major, students must have a minimum 2.5 grade-point average in the economics and mathematics preparation courses and a GPA of at least 2.0 in any upper-division courses taken for the major before applying.

For students admitted to UCLA in fall 2023 and later, repetition of more than two pre-major economics courses or of any preparation course more than once, including equivalent courses taken elsewhere, results in automatic denial of admission to the major.

For students admitted to UCLA prior to fall 2023, repetition of more than one preparation course or of any preparation course more than once, including equivalent courses taken elsewhere, results in automatic denial of admission to the major.

### The Major

Each course must be taken for a letter grade. Transfer credit is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major. Laboratory courses are required for all upper-division economics courses when they are offered and listed as mandatory co-requisite.

To graduate, students must have at least a 2.0 grade-point average in their upper-division major courses, with grades of C- or better in Economics 101, 102, 103, 103L, 104, and 104L. A minimum grade of D or better is required in the six upper-division elective courses for the major.

## Honors Program

The departmental honors program is open to majors who have a cumulative grade-point average of at least 3.5 in the major and in all courses taken at UCLA prior to application.

To qualify for departmental honors at graduation, students must (1) select at least seven of the required upper-division economics courses from the approved list designated for departmental honors, (2) complete a two-term senior thesis acceptable to the departmental honors committee in Economics 198A and 198B, and (3) complete the major requirements with at least a 3.5 grade-point average in the economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

Economics 198A and 198B, the courses required for thesis preparation, may be counted as upper-division courses toward the field in which the thesis is written (for purposes of satisfying the requirements for the major). More information and application forms are available from an undergraduate counselor in 2263 Bunche Hall.

## Business Economics BA

The Business Economics BA program offers a major for students seeking a business orientation in their study of economics. It does not replicate the traditional undergraduate business school curriculum. Instead, it offers a more tightly focused curriculum that is guided by the rigorous logic and integrative perspective of economics. It is designed to prepare students for graduate education in business, economics, and law. The program requires students to include specific courses offered by the department and the John E. Anderson Graduate School of Management (see [the major](#)).

## Learning Outcomes

The Business Economics major has the following learning outcomes:

- Understanding, through application of microeconomics, of the interaction of individuals and organizations in markets; and of the role of public policy in shaping those interactions
- Understanding, through application of macroeconomics, of the functioning of market economies at regional, national, and global levels; and of the role of public policy in shaping those interactions
- Understanding and application of accounting principles to analysis of business problems
- Acquisition and use of data to evaluate hypotheses with tables, charts, and statistical analyses
- Use of appropriate analytical perspectives and approaches to frame problems involving the interaction of people, organizations, markets, and society; identify effective strategic approaches to problem solving; and gather and organize key information to facilitate problem solving

## Entry to the Major

### Admission

Applications for admission by current UCLA students are handled exclusively by the Department of Economics. To apply, students must have completed at least 72 quarter units (but no more than 135 quarter units), one 12-unit fall, winter, or spring term in residence at UCLA, and all courses listed under preparation for the major. Applications are available on the undergraduate economics Bruin Learn website and are accepted online during the first three weeks of each quarter as well as summer session A. In addition, they must (1) have a 2.0 (C) minimum grade in each preparation course, (2) have a minimum 3.0 (B) overall average in all preparation courses excluding the Writing II course, and (3) have a minimum 2.0 (C) grade-point average in their upper-division courses taken for the major before applying (Economics 101 applies on the major preparation grade-point average).

The requisite grade-point averages plus completion of the preparation for the major courses do not guarantee admission to the program.

### Pre-major

While students are completing the preparation courses for the major, they may be classified as Business Economics pre-majors.

### Transfer Students

Transfer applicants to the Business Economics major must complete the following introductory courses prior to admission to UCLA: one microeconomics course, one macroeconomics course, two calculus courses from the mathematics/physical sciences sequence, one English composition/critical thinking course. Transfer students who wish to enter UCLA as Business Economics pre-majors must meet the admission screening requirements. For information, contact Undergraduate Admission.

Transfer credit for any of the above is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* Economics 1, 2, 11, 41, 101; one Writing II course; Management 1A, 1B; Mathematics 31A, and 31B or 31E.

### The Major

*Required:* Economics 102, 103, 103L, 104, 104L, and at least two courses from the 106 series; English Composition 131B; five upper-division elective courses in economics and management (no more than three management courses from Management 108, 120A, 120B, 122, 123, 124, 126, 127A, 127B, 130A, 140 may be applied toward the elective requirement). In addition to Economics 103 and 103L, and 104 and 104L, at least two economics courses with laboratories must be completed

and may be selected from either the Economics 106 series or an economics elective.

### Honors Program

Students must complete Economics 198A and 198B in which a thesis is written.

### Policies

#### Preparation for the Major

Each course must be taken for a letter grade.

For students admitted to UCLA in fall 2023 and later, repetition of more than two pre-major economics courses or of any preparation course more than once, including equivalent courses taken elsewhere, results in automatic denial of admission to the major.

For students admitted to UCLA prior to fall 2023, repetition of more than one preparation course or of any preparation course more than once, including equivalent courses taken elsewhere, results in automatic denial of admission to the major.

#### The Major

Each upper-division major course must be taken for a letter grade. Transfer credit for any of the major courses is subject to department approval; consult with an undergraduate counselor before enrolling in any courses for the major. Laboratory courses are required for all upper-division economics courses when they are offered and listed as mandatory co-requisite.

To graduate, students must have a minimum 2.0 grade-point average in their upper-division major courses, with at least a C- in each course. (Economics 101 applies on the preparation for the major, therefore requiring a minimum grade of C.)

### Honors Program

The departmental honors program is open to majors who have a cumulative grade-point average of at least 3.5 in the major and in all courses taken at UCLA prior to application.

To qualify for departmental honors at graduation, students must (1) select at least seven of the required upper-division economics courses from the approved list designated for departmental honors, (2) complete a two-term senior thesis acceptable to the departmental honors committee in Economics 198A and 198B, and (3) complete the major requirements with at least a 3.5 grade-point average in the economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

Economics 198A and 198B, the courses required for thesis preparation, may be counted as upper-division courses toward the field in which the thesis is written (for purposes of satisfying the requirements for the major). More information and application forms are available from an undergraduate counselor in 2263 Bunche Hall.

## Mathematics/Economics BS

See the [Mathematics/Economics](#) interdepartmental program section for a description of the major.

## Graduate Majors

### Economics MA, CPhil, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Master of Quantitative Economics

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Economics

### Lower-Division Courses

**1. Principles of Economics. (4)** Lecture, three hours; discussion, one hour. Not open to students with credit for former course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on allocation of resources and distribution of income through price system. P/NP or letter grading.

**2. Principles of Economics. (4)** Lecture, three hours; discussion, one hour. Enforced requisite: course 1. Not open to students with credit for former course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregative economics, including national income, monetary and fiscal policy, and international trade. P/NP or letter grading.

**3A. Introduction to Investments. (2)** Lecture, two hours. Broad introduction to investments. No previous financial, economic, or math background needed. Students learn organizing framework with which to understand investing landscape with highlight on key concepts and functionality related to business and personal investments. Topics include why financial markets exist and how they work, efficient market hypothesis, risk versus reward, investment styles, valuation techniques, simple quantitative analysis, power of compound interest, financial crises, and role private equity, venture capital, innovation and start-ups, and personal financial advisers. Serves as excellent introduction to career paths in finance and for those who want to increase their financial literacy. P/NP grading.

**3B. Introduction to Investments. (2)** Lecture, two hours. Requisite: course 3A. Broad introduction to investments. No previous financial, economic, or math background needed. Students learn organizing framework with which to understand investing landscape with highlight on key concepts and functionality related to business and personal investments. Topics include exchange rates, central banks, financial statements, value creation, interpreting financial ratios,

power of compound interest and understanding present value, diversification, capital asset pricing model, Sharpe ratio, and understanding asset's beta, hedge funds. Serves as excellent introduction to career paths in finance and for those who want to increase their financial literacy. P/NP grading.

**4. Introduction to Investments. (4)** Lecture, two hours. Broad introduction to investments. No previous financial, economic, or math background needed. Students learn organizing framework with which to understand investing landscape with highlight on key concepts and functionality related to business and personal investments. Topics include why financial markets exist and how they work, efficient market hypothesis, risk versus reward, investment styles, valuation techniques, simple quantitative analysis, power of compound interest, financial crises, and role private equity, venture capital, innovation and start-ups, personal financial advisers, exchange rates, central banks, financial statements, value creation, interpreting financial ratios, understanding present value, diversification, capital asset pricing model, Sharpe ratio, and understanding asset's beta, hedge funds. Serves as excellent introduction to career paths in finance and for those who want to increase their financial literacy. P/NP or letter grading.

**5. Economics for everyone. (5)** Lecture, three hours; discussion, one hour. Introduction to models and tools used by economists in practical real-world context. Study of important topical issues such as inequality, health care, and environmental policies. Students learn about available data sources and become better equipped to understand current events. May not be used to fulfill entrance requirements for any Economics Department major. P/NP or letter grading.

**10P. Economics Toolkit: Introduction to Python for Economists. (4)** Lecture, three hours. Python is commonly used programming language for data science. It is powerful and easy to learn tool that can be applied to make simple histograms or fit complicated machine learning models. Introduction to using Python for basic data exploration, analysis, and visualization. Emphasis on applications with economic data and econometric analysis. P/NP grading.

**10R. Economics Toolkit: Introduction to R for Economists. (4)** Lecture, three hours. Hands-on introduction to data analysis in economics using R. Covers essential mathematical tools and introduces mechanics of R. No prior knowledge of R, computer programming, statistics, or economics is required. P/NP grading.

**11. Microeconomic Theory. (4)** Lecture, three hours; discussion, one hour. Enforced requisites: courses 1, 2, Mathematics 31A, 31B, with grades of C or better. Laws of demand, supply, returns, and costs; price and output determination in different market situations. P/NP or letter grading.

**12. Introduction to Personal Finance. (4)** Lecture, three hours; discussion, one hour. Introduction to personal finance. No previous financial, economic, or mathematics background required. Open to nonmajors. Covers wide array of topics at introductory level that are of interest to students on practical level and more broadly for students seeking to deepen their understanding of key features of financial system, financial institutions, and various aspects of personal finance encountered by typical household over their life cycle. Topics covered include interest rates, time value of money, types of loans most relevant to typical household, credit and debit cards, savings and investment, stocks and bonds, risk and diversification, personal income taxes, varieties of insurance, retirement and savings plans, macroeconomic concepts, social security, Medicare, and aspects of behavioral economics. Letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**41. Probability and Statistics for Economists. (4)** Lecture, three hours; discussion, one hour. Enforced requisites: Mathematics 31A, 31B, with grades of C or better. Not open to students with credit for former Statistics 11. Introduction to theory and practice of math-

ematical statistics with emphasis on its use in economics. Introduction of basic statistical concepts such as random variables, probability distributions, estimation, confidence intervals, and hypothesis testing. Letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**97. Economic Toolkit. (4)** Lecture, three hours. Coverage of essential mathematical and programming skills needed for study of Economics. Review of calculus (first derivatives, partial derivatives, elementary integral calculus), Excel (handling data, using simple arithmetical, mathematical, and financial functions, use of Solver), and extended introduction to statistical language R and/or Stata. Consult instructor for specific software. Offered in summer only. P/NP grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**101. Microeconomic Theory. (4)** Lecture, three hours; discussion, one hour. Requisite: course 11. Theory of factor pricing and income distribution, general equilibrium, implications of pricing process for optimum allocation of resources, game theory, and interest and capital. P/NP or letter grading.

**102. Macroeconomic Theory. (4)** Lecture, three hours; discussion, one hour. Requisite: course 101. Theory of income, employment, and price level. Analysis of secular growth and business fluctuations; introduction to monetary and fiscal policy. P/NP or letter grading.

**103. Introduction to Econometrics. (4)** Lecture, three hours; discussion, one hour. Enforced requisites: courses 11, and 41 or Mathematics 170A and 170B or 170E and 170S or Statistics 100A and 100B. Enforced corequisite: 103L. Introduction to theory and practice of univariate regression analysis with emphasis on its use in economics. Introduction to method of least squares, Gauss-Markov theorem, confidence intervals and hypothesis tests in univariate regression context, and standard errors in case of heteroscedasticity and serial correlation. Emphasis on applications with real data and computer software (R programming language) to implement discussed methods. P/NP or letter grading.

**103L. Econometrics Laboratory. (1)** Lecture, one hour; laboratory, one hour. Enforced requisites: courses 11, and 41 or Mathematics 170A and 170B or 170E and 170S or Statistics 100A and 100B. Enforced corequisite: 103. Econometric analysis of case-based studies. Hands-on data collection and problem solving. Use of econometric software. P/NP or letter grading.

**104. Data Science for Economists. (4)** Lecture, three hours; laboratory, one hour. Enforced requisites: courses 11, 103. Enforced corequisite: course 104L. In-depth discussion of multivariate regression. Introduction to estimation of multivariate regression, and confidence intervals and hypothesis tests in context of multivariate regression. Discussion of instrumental variables and binary choice models. Emphasis on hands-on experience on data analytics and real data applications. P/NP or letter grading.

**104L. Data Science for Economists Laboratory. (1)** Lecture, one hour; laboratory, one hour. Enforced requisites: courses 11, 103. Enforced corequisite: course 104. Econometric analysis of case-based studies. Hands-on data collection and problem solving. Use of econometric software. P/NP or letter grading.

**106A. Economics in Practice. (4)** Seminar, three hours. Enforced requisites: courses 11, 101, 102. Enforced corequisite: course 106AL. Students, in groups of four, address three small problems and one large and more complex problem. Discussion of student-proposed solutions to problems in their groups, with small-group discussions to student presentations of results in class. Detailed coaching and feedback by MBA students on student analysis and presentations. Final written and oral presentations required. P/NP or letter grading.

**106AL. Economics in Practice Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101, 102. Enforced corequisite: course 106A. Case-based analysis requiring students to apply material from course 106A to real-world problems regarding issues such as economic theory and empirical methods. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**106D. Designed Markets. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 11, 101. Enforced corequisite: course 106DL. Discussion of markets and other institutions that were purposefully designed, mostly by economists. Choices designers face when designing such markets, Markets and their context and corresponding economic models. Topics include matching between medical residents and hospitals, matching between high school students and New York and Boston high schools, kidney transplants, course allocation in business schools, eBay auctions, and prediction markets. Examination of how to optimize one's actions and outcomes in such markets. P/NP or letter grading.

**106DL. Designed Markets Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101. Enforced corequisite: course 106D. Case-based analysis requiring students to apply material from course 106D to real-world problems regarding topics such as matching between medical residents and hospitals, matching between high school students and New York and Boston high schools, kidney transplants, course allocation in business schools, eBay auctions, and prediction markets. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**106E. Economics of Entrepreneurship. (4)** Lecture, three hours. Requisite: course 101. Enforced corequisite: course 106EL. Enrollment priority to Business Economics majors. Application of economic theory to practice of managing new businesses—combining elements of strategy, marketing, and entrepreneurial finance courses. Examination of both strategic decisions of entrepreneurs (pricing, advertising, deterring entry) and more practical issues (funding, business plans, patents). Letter grading.

**106EL. Economics of Entrepreneurship Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisite: course 101. Enforced corequisite: course 106E. Case-based analysis requiring students to apply material from course 106E to real-world problems regarding topics involving combining elements of strategy, marketing, and entrepreneurial finance courses. Examination of both strategic decisions of entrepreneurs (pricing, advertising, deterring entry) and more practical issues (funding, business plans, patents). Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**106F. Finance. (4)** Lecture, three hours. Requisite: course 102. Enforced corequisite: course 106FB. Not open for credit to students with credit for Management 130A. Only one course from Economics 106F and Management 130A may be applied toward Economics and Business Economics majors. Enrollment priority to Business Economics majors. Introduction to principles of asset valuation and role of financial markets in market economy. Basic topics include time value of

money, discounted cash flow analysis, CAPM model, and applications to public policy. P/NP or letter grading.

**106FB. Finance Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisite: course 102. Enforced corequisite: course 106F. Case-based analysis requiring students to apply theory from course 106F to real-world problems regarding topics such as discounted cash flow analysis, CAPM model, applications to public policy, and more. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**106G. Introduction to Game Theory. (4)** Lecture, three hours; discussion, one to two hours (when scheduled). Requisite: course 101. Enforced corequisite: course 106GL. Enrollment priority to Business Economics majors. Introduction to basic ideas of game theory and strategic thinking. Discussion of ideas such as dominance, backward induction, Nash equilibrium, commitment, credibility, asymmetric information, and signaling, with application to examples from economics, politics, business, and other real-life situations. Letter grading.

**106GL. Introduction to Game Theory Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisite: course 101. Enforced corequisite: course 106G. Case-based analysis requiring students to apply material from course 106G to real-world problems involving game theory and strategic thinking in economics, politics, business, and other real-life situations. Hands-on data collection and problem solving and presentation of student analyses in writing with possible oral presentations. P/NP or letter grading.

**106I. Organization of Firms. (4)** Lecture, three hours. Enforced requisites: courses 11, 101. Enforced corequisite: course 106IL. Enrollment priority to Business Economics majors. Role of firms in traditional economic theory and modern developments in theory of firms. Topics include relationship between employer and employee, principal-agent models and moral hazard, formal versus relational contracts, successful firms as coherent systems of mutually supporting parts, property rights and asset ownership, boundaries of firms, employment versus independent contracting, internal organization of firms, role and levels of firm hierarchy. P/NP or letter grading.

**106IL. Organization of Firms Laboratory. (1)** Lecture, one hour; laboratory, one hour. Enforced requisites: courses 11, 101. Enforced corequisite: course 106I. Case-based analysis requiring students to apply material from course 106I to real-world problems. Hands-on data collection and problem solving and presentation of student analyses in writing and with oral presentations. P/NP or letter grading.

**106M. Financial Markets and Financial Institutions. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 11, 101, 102. Enforced corequisite: course 106ML. Application of analytical tools of economics and finance to real-world problems in financial markets to link models students have learned in prior courses to patterns observed in financial markets and to understand when it is that further theoretical refinements are required to better account for certain observed patterns. Development of understanding of potential effects of monetary and regulatory policies on financial markets. Topics include bond market, stock market, foreign exchange market, financial crises, and financial regulation. Analysis and discussion of lessons of subprime crisis and European sovereign debt crisis. P/NP or letter grading.

**106ML. Financial Markets and Financial Institutions Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101, 102. Enforced corequisite: course 106M. Case-based analysis requiring students to apply material from course 106M to real-world problems involving financial markets and financial institutions. Issues include potential effects of monetary and regulatory policies on financial markets. Topics include bond market, stock market, foreign exchange market, financial crises, and financial regulation. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**106P. Pricing and Strategy. (4)** Lecture, three hours. Requisite: course 101. Enforced corequisite: course 106PL. Enrollment priority to Business Economics majors. Advanced pricing topics typically include linear programming and shadow pricing, peak load pricing, two-part pricing, strategic pricing, and auctions and bidding. Letter grading.

**106PL. Pricing and Strategy Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisite: course 101. Enforced corequisite: course 106P. Case-based analysis requiring students to apply material from course 106P to real-world problems involving linear programming and shadow pricing, peak load pricing, two-part pricing, strategic pricing, and auctions and bidding. Hands-on data collection and problem solving and presentation of student analyses in writing. P/NP or letter grading.

**106S. Competitive Strategy. (4)** Lecture, three hours. Enforced requisites: courses 11, 101. Enforced corequisite: course 106SL. Examination of competitive strategy and competitive advantage using game theoretic models and case studies. Topics include economics of scale, network effects, switching costs, and platform markets. Written final project and presentation required. P/NP or letter grading.

**106SL. Competitive Strategy. (1)** Lecture, one hour; laboratory, one hour. Enforced requisites: courses 11, 101. Enforced corequisite: course 106S. Case-based analysis requiring students to apply material from course 106S. Hands-on data collection and problem solving and presentation of student analyses in writing and with oral presentations. P/NP or letter grading.

**106T. Economics of Technology and E-Commerce. (4)** Lecture, three hours. Requisites: courses 11, 101. Enforced corequisite: course 106TL. Use of rigorous economic tools to analyze world of technology and e-commerce. Examination of economic theory, empirical analysis, and case studies to study variety of new markets. Topics include bidding in online auctions, two-sided markets, matching markets, and reputation mechanisms. Written case on one particular firm and presentation required. P/NP or letter grading.

**106TL. Economics of Technology and E-Commerce Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101. Enforced corequisite: course 106T. Case-based analysis requiring students to apply theory from course 106T to real-world problems regarding issues such as bidding in online auctions, two-sided markets, matching markets, reputation mechanisms, and more. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**106V. Investments. (4)** Lecture, three hours. Requisite: course 102. Recommended: course 106F. Enforced corequisite: course 106VL. Enrollment priority to Business Economics majors. Introduction to principles investment and portfolio theory. Topics include optimal portfolio construction, fixed income analysis, option pricing theory, and active portfolio management. P/NP or letter grading.

**106VL. Investments Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisite: course 102. Recommended: course 106F. Enforced corequisite: course 106V. Case-based analysis requiring students to apply theory from course 106V to real-world problems regarding issues such as portfolio management, option pricing, and other investment topics. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**107. History of Economic Theory. (4)** Lecture, three hours. Enforced requisites: courses 11, 101, 102. Survey of economic analysis from Grecian antiquity to early 20th century, concentrating on 18th and 19th centuries; special attention to selected writers, including Aristotle, mercantilists, Physiocrats, Hume, Smith, Malthus, Ricardo, Marx, marginalists, and Marshall. P/NP or letter grading.

**111. Theories of Development. (4)** Lecture, three hours. Requisites: courses 11, 101, 103. Corequisite: course 111L. Application of theoretical and empirical tools from microeconomics to provide insights into problems confronting low-income countries today and to

evaluate policies that are likely to be effective in improving well-being of poorest on globe. P/NP or letter grading.

**111L. Theories of Development Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101, 103. Corequisite: course 111. Case-based analysis requiring students to apply material from course 111 to real-world problems involving development. Topics and analysis include measures of development, sources of economic growth and development, impediments to development, and policy prescriptions. P/NP or letter grading.

**112. Policies for Economic Development. (4)** Lecture, three hours. Requisite: course 102 or 111. Suggested strategies for economic development: inflation, balanced growth, industry versus agriculture, import substitution, export-oriented expansion, foreign aid, and others. Selected case studies. P/NP or letter grading.

**M112A. International Development. (4)** (Same as Public Policy CM171.) Lecture, three hours. Requisite: course 102 or 111. Why are some countries rich, while other countries are poor? What can policymakers do to reduce poverty? Discussion of current research on these questions. Study of both methodologies used to answer questions in development economics, like natural experiments and randomized control trials, as well as relationship between development and institutions, education, growth, culture, and gender. Reading intensive, seminar-style course. Students are expected to read academic articles in economics and actively participate in discussions. Students also learn how to use data to evaluate policies. P/NP or letter grading.

**113. Globalization and Gender. (4)** Lecture, three hours. Requisite: course 11. Examination of gender dimensions of economic development and globalization from perspective of feminist economics. This perspective implies foregrounding labor, broadly defined to include paid and unpaid work; examining gender differences in work; access to resources; and well-being outcomes; and how these are affected by macroeconomic policies and how gender inequalities are relevant for societal well-being. Since early 1980s economic globalization has been achieved on basis of common set of macroeconomic policies pursued in industrial and developing countries alike. These policies frame both gender-differentiated impacts of policy and initiatives that are implemented to reduce inequalities between men and women. Examination of impact of these policies on gender inequalities in developing countries. P/NP or letter grading.

**121. International Trade Theory. (4)** Lecture, three hours; discussion, one hour. Requisite: course 101. Corequisite: course 121L. Not open to students with credit for former course 120. Theory of international trade: bases, direction, terms, volume, and gains of trade. Effects of tariffs, quantitative restrictions, and international integration. Effects of free and restricted trade on economic welfare and political stability. P/NP or letter grading.

**121L. International Trade Theory Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisite: course 101. Corequisite: course 121. Case-based analysis requiring students to apply material from course 121 to real-world problems involving international trade. Topics and analysis include theory of international trade: bases, direction, terms, volume, and gains of trade; effects of tariffs, quantitative restrictions, and international integration; effects of free and restricted trade on economic welfare and political stability. P/NP or letter grading.

**122. International Finance. (4)** Lecture, three hours; discussion, one hour. Requisite: course 102. Enforced corequisite: course 122L. Not open to students with credit for former course 120. Emphasis on interpretation of balance of payments and adjustment to national and international equilibria through changes in price levels, exchange rates, and national income. Other topics include making international payments, determination of exchange rates under various monetary standards, capital movements, exchange controls, and international monetary organization. P/NP or letter grading.

**122L. International Finance Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisite: course 102. Enforced corequisite: course 122. Case-based analysis requiring students to apply material from course 122 to real-world problems involving international finance. Topics and analysis include balance of payments, exchange rates under various monetary arrangements, capital flows, exchange controls, and international monetary organization. Hands-on data collection and problem solving and presentation of student analyses in writing. P/NP or letter grading.

**123. Forecasting Exchange Rates and Constructing Currency Portfolios. (4)** (Formerly numbered M123.) Lecture, three hours; discussion, one hour. Requisites: courses 41, 102, 103, 103L, or consent of instructor. Enforced corequisite: course 123L. Study of main theoretical models of exchange rates and how to design computer codes to make real-time exchange rate forecasts by applying such models to real-world data. Different statistical tests to evaluate accuracy of forecasts and to assess risk-reward trade-offs of currency portfolios. Students gain applied research and presentation skills. Discussion of books and newspaper articles about financial markets and impact of economic news on exchange rates. Students expected to be familiar with use of spreadsheets, such as Excel. Coding basics is highly recommended. P/NP or letter grading.

**123L. Forecasting Exchange Rates and Constructing Currency Portfolios Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 41, 102, 103, 103L, or consent of instructor. Enforced corequisite: course 123. Hands-on approach in which students write computer codes associated with concepts learned in Economics 123. Students apply these codes to real-world data in order to generate exchange rate forecasts and evaluate prediction accuracy of their forecasting models. Students use these forecasts to construct short-long portfolios of currencies and assess reward-risk trade-offs of such portfolios. To generate and evaluate forecasts, students use Tradestation software, which can be access in Social Sciences Computing laboratories. P/NP or letter grading.

**C126A-C126B-C126C. Seminars: International Economics. (4-4-4)** Seminar, three hours. Requisites: courses 11, 101, 102. Limited to seniors. Overview of most current developments in international economics for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C285A-C285B-C285C. P/NP or letter grading.

**130. Public Economics. (4)** Lecture, three hours. Requisites: courses 11, 101, 103. Enforced corequisite: course 130L. Role of government in market economy. Alternative justifications for government intervention. Principles and effects of spending programs (especially social insurance and health), taxation, deficit financing, and federal credit programs. Taxation in open economy. Properties of public choice mechanisms. P/NP or letter grading.

**130L. Public Economics Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101. Enforced corequisite: course 130. Case-based analysis requiring students to apply theory from course 130 to real-world problems regarding government spending programs, taxation, deficit financing, and federal credit programs. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**131. Economics of Health and Healthcare. (4)** Lecture, three hours. Requisites: courses 11, 101, 103. Enforced corequisite: course 131L. Economic analysis of health and healthcare. Presentation of several detailed economic models, including models of addiction, demand for healthcare, demand for insurance, nonprofit behavior, and other models. Evaluation of quantitative information from course readings and development of better understanding of econometric concepts and results. P/NP or letter grading.

**131L. Economics of Health and Healthcare Laboratory. (1)** Lecture, one hour; laboratory, one hour. Enforced requisites: courses 11, 101, 103. Enforced corequisite: course 131. Case-based analysis requiring students to apply theory from course 131 to real-world problems regarding economics of health and healthcare. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**132. Topics in Taxation and Social Insurance. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 11, 101. In-depth examination of selected topics related to current policy debates. Topics vary from year to year but typically emphasize tax policy or social insurance. Topics may include optimal taxation; tax inefficiencies and their implications for labor supply, savings, and investment; income redistribution and personal income tax; corporate taxation and implications for firms' investment and financing decisions; Social Security and SSDI reform; and welfare programs. P/NP or letter grading.

**133. Intergenerational Poverty in America. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 11, 101, 103. Enforced corequisite: course 133L. Examination of how poverty influences child development and, ultimately, their income and well-being in adulthood. Overview of poverty and intergenerational mobility in America, looking at historical trends and placing U.S. in international context. To understand why poverty is persistent across generations in U.S., study of economic model of skill formation in childhood. Consideration of existing research exploring how number of factors explain intergenerational persistence of poverty, including parental time, pollution, infant and child health, justice system, neighborhoods, stress, and preschool/education systems. Discussion of evidence on whether various public policies can improve mobility. P/NP or letter grading.

**133L. Intergenerational Poverty in America Laboratory. (1)** Lecture, one hour; laboratory, one hour. Enforced requisites: courses 11, 101, 103. Enforced corequisite: course 133. Case-based analysis requiring students to apply theory and analysis from course 133 to real-world problems regarding intergenerational poverty in America. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**134. Environmental Economics. (4)** Lecture, three hours. Requisites: course 41 or Statistics 12 or 13, and course 101. Introduction to major ideas in natural resources and environmental economics, with emphasis on designing incentives to protect environment. Highlights important role of using empirical data to test hypotheses about pollution's causes and consequences. P/NP or letter grading.

**M135. Economic Models of Public Choice. (4)** (Same as Political Science M105.) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: any lower-division political science course. Enforced requisite: course 11. Designed for juniors/seniors. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problem, voting and majority choice, demand revelation, and political bargaining. P/NP or letter grading.

**137. Introduction to Urban and Regional Economics. (4)** Lecture, three hours. Requisite: course 11. Survey of broad range of policy and theoretical issues that are raised when economic analysis is applied in urban setting. Topics include urbanization and urban growth, housing markets, location decisions of households and firms, transportation, urban labor markets, and local public sector. P/NP or letter grading.

**140. Computational Methods for Economists. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 101, 102, 103, Mathematics 31A, 31B, 32A, 33A, 33B. Enforced corequisite: course 140L. Introduction to variety of computational methods used in economics. Use of Python and numerical techniques to solve models in macroeconomics and finance, microeconomics, and econometrics. Students should be familiar with scientific programming language such as R or MATLAB but are not required to know Python. P/NP or letter grading.

**140L. Computational Methods for Economists Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 101, 102, 103, Mathematics 31A, 31B, 32A, 33A, 33B. Enforced corequisite: course 140. Problem-solving and project-based laboratory requiring students to apply computational methods from course 140 to solve models in macroeconomics and finance, microeconomics, and econometrics. Students should be familiar with scientific programming language such as R or MATLAB but are not required to know Python. P/NP or letter grading.

**141. Topics in Microeconomics: Mathematical Finance. (5)** Lecture, three hours; computer laboratory, one hour. Requisites: course 11, Mathematics 32A, either Statistics 100A or Mathematics 170A. Economics of financial markets, competitive equilibrium with time and uncertainty, one period security market model, market completeness. P/NP or letter grading.

**142. Topics in Microeconomics: Probabilistic Microeconomics. (4)** Lecture, three hours. Requisite: course 101. Combination of basic probability introduced in Statistics 11 with microeconomic models presented in courses 11 and 101 in order to explain phenomena such as insurance, job search, and stock market behavior. Optimal production and consumption under uncertainty. Review of probability and introduction to alternative measures of risk and risk aversion. P/NP or letter grading.

**143. Advanced Econometrics. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 103. Not open for credit to students with credit for former course 147A or 147B. Heteroskedasticity, limited dependent variable, panel data, time-series. P/NP or letter grading.

**144. Economic Forecasting. (4)** Lecture, three hours. Preparation: familiarity with data analysis software (e.g., R, Excel, MATLAB, Stata) and/or programming experience. Enforced requisites: courses 101, 103/103L. Survey of theory and application of time-series methods to forecasting in economics, business, and government. Topics include modeling and forecasting trend, seasonality, and cycles. Discussion of stochastic trends, volatility measure, and evaluation of forecasting techniques. Hands-on approach to real-world data analysis methods widely used by economists and other professionals. P/NP or letter grading.

**145. Topics in Microeconomics: Mathematical Economics. (4)** Lecture, three hours. Requisite: course 101. Possible topics include game theory; competitive equilibrium analysis; examination of market failure and role for market intervention. P/NP or letter grading.

**C146A-C146B-C146C. Seminars: Asset Pricing. (4-4-4)** Seminar, three hours. Requisites: courses 11, 101, 102. Limited to seniors. Overview of most current developments in asset pricing theory for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C296A-C296B-C296C. P/NP or letter grading.

**147. Computational Finance and Data Analysis for Financial Engineering. (4)** Lecture, three hours. Requisites: courses 41, 101, 103. Enforced corequisite: course 147L. Introduction to econometric modeling in empirical/computational finance. Focus on study of econometric models and methods to understand financial market dynamics. Review of essential concepts in probability/statistics and time-series econometrics. Investigation of some popular financial econometric models and estimation methods. Review of selected topics in finance, and how to apply econometric methods to analyze and understand empirical properties of financial market data. Analytical problem sets and data exercises to enhance theoretical understandings and practical skills. P/NP or letter grading.

**147L. Computational Finance and Data Analysis for Financial Engineering Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 41, 101, 103. Enforced corequisite: course 147. Project-based analysis requiring students to apply econometric modeling techniques from course 147 to real-world financial data. P/NP or letter grading.

**148. Behavioral Economics. (4)** Lecture, three hours. Enforced requisite: course 101. Behavioral economics is emerging subfield of economics that incorporates insights from psychology and other social sciences into economics to improve realism of economic models by incorporating realistic features such as aversion for losses, problems with self control, or concerns for others and thereby improve economic analyses. Review of some standard assumptions made in economics and examination of evidence on how human behavior systematically departs from these assumptions. Investigation of attempts to explore alternative models of human decision making and assessment to what extent these alternative models help improve economic analyses. P/NP or letter grading.

**149. Time-Series Econometrics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 41, 103, Mathematics 31A, 31B. Enforced corequisite: course 149L. Time-series econometrics studies dynamic behaviors of economic variables using tools from probability theory and statistics. It plays important role in data analysis in macroeconomics and finance. Introduction to methods of time-series analysis in econometrics. Topics include weak dependence, autoregressive-moving-average (ARMA) processes, linear processes, economic forecasting, long-run variance and heteroskedasticity and autocorrelation consistent (HAC) estimation, unit root theory, estimation and inference of time-varying volatility models. Provides useful preparation to students who plan to take empirically oriented macroeconomics and finance courses, and solid understanding of tools required to analyze and model economic time series data and financial asset prices/returns. Emphasis throughout on link between statistical models and implementation. P/NP or letter grading.

**149L. Time-Series Econometrics Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 41, 103, Mathematics 31A, 31B. Enforced corequisite: course 149. Problem-solving and project-based analysis requiring students to apply time-series analysis from course 149 to real-world time-series data. Applications involve weak dependence, autoregressive-moving-average (ARMA) processes, linear processes, economic forecasting, long-run variance and heteroskedasticity and autocorrelation consistent (HAC) estimation, unit root theory, estimation and inference of time-varying volatility models. Provides useful preparation to students who plan to take empirically oriented macroeconomics and finance courses, and solid understanding of tools required to analyze and model economic time series data and financial asset prices/returns. Emphasis throughout on link between statistical models and implementation. P/NP or letter grading.

**150. Labor Economics. (4)** Lecture, three hours. Requisites: courses 11, 101, 103. Enforced corequisite: course 150L. Supply and demand for labor. Analysis of government, union, and other constraints on competitive system of wage determination. Wage level and structure. Wages and human capital theory. P/NP or letter grading.

**150L. Labor Economics Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101, 103. Enforced corequisite: course 150. Case-based analysis requiring students to apply theoretical tools from course 150 to real-world problems involving labor economics. Topics include labor supply decisions, household production decisions, life-cycle aspects of labor supply, short-run and long-run labor demand, monopsony in labor market, quasi-fixed labor costs and labor demand, human capital, and other extended topics. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**151. Topics in Labor Economics. (4)** Lecture, three hours. Requisites: courses 101, 150. Selected topics in labor theory; income distribution; business cycles and unemployment; investments in human capital and life cycles; migration; human fertility; marriage and divorce, etc. P/NP or letter grading.

**152. Women, Men, and Economy. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 11, 101, 103. Corequisite: course 152L. Introduction to using tools of economics to understand gender-

related issues. Review of economic models of household, fertility, and labor supply. Discussion of how they help interpret long-term trends in marriage and divorce, fertility, and women's labor-force participation. Review of economic models of wage determination, with focus on explanations of and policy remedies for earnings differentials between women and men. Examination of new research in economics on gender-related topics. P/NP or letter grading.

**152L. Women, Men, and Economy Laboratory. (1)** Lecture, three hours; laboratory, one hour. Requisites: courses 11, 101, 103. Corequisite: course 152. Empirical-based analysis requiring students to apply theoretical and empirical tools from course 152 to real-world gender-related issues, and to further discuss latest research in field. P/NP or letter grading.

**C156A-C156B-C156C. Seminars: Labor Economics. (4-4-4)** Seminar, three hours. Requisites: courses 11, 101, 102. Limited to seniors. Overview of most current developments in labor economics for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C266A-C266B-C266C. P/NP or letter grading.

**160. Money and Banking. (4)** Lecture, three hours. Requisite: course 102. Principles of money and banking in U.S.; legal and institutional framework; money supply process; instruments, effects, and practice of monetary policy. P/NP or letter grading.

**161. Monetary Theory. (4)** Lecture, three hours. Requisites: courses 101, 160. Nature of money and monetary exchange; level and term structure of interest rates; level and growth rate of money; transmission of monetary shocks; theory and practice of monetary policy. P/NP or letter grading.

**164. Advanced Topics in Macroeconomics: Theory of Economic Growth. (4)** Lecture, three hours. Requisite: course 102. Enforced corequisite: course 164L. Use of neoclassical growth model to address various issues, with emphasis on quantitative analysis. Development of economic theory and application to study of long-run growth, industrial revolution, and Great Depression. P/NP or letter grading.

**164L. Advanced Topics in Macroeconomics: Theory of Economic Growth Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisite: course 102. Enforced corequisite: course 164. Case-based analysis requiring students to apply theory from course 164 to real-world macroeconomic growth problems. Hands-on data collection and problem solving and presentation of student analyses in writing. P/NP or letter grading.

**165. History of Capitalism in American Economy. (4)** Lecture, three hours. Enforced requisite: course 102. Enforced corequisite: course 165L. How capitalism—what economists call market economy with well-defined and protected civil rights and property rights—has contributed to America's economic growth. Quantitative course, with analysis of how different features of capitalist economies impact economic growth, investment, consumption, and technical change, using computer simulations based on prominent historical examples. P/NP or letter grading.

**165L. History of Capitalism in American Economy Laboratory. (1)** Lecture, one hour; laboratory, one hour. Enforced requisite: course 102. Enforced corequisite: course 165. Case-based analysis requiring students to apply theory and historical data from course 165 to simulate and analyze how variety of macroeconomic policies impact economic activity. Hands-on data collection and problem solving and presentation of student analyses in writing. P/NP or letter grading.

**C166A-C166B-C166C. Seminars: Monetary Economics/Macroeconomics. (4-4-4)** Seminar, three hours. Requisite: course 102. Limited to seniors. Overview of most current developments in monetary economics and macroeconomics for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new pa-

pers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C226A-C226B-C226C. P/NP or letter grading.

**167. Victims and Villains; Panics and Bubbles. (4)** Lecture, three hours. Requisites: course 101, Management 1A, 1B. Focus on phenomena of panics, bubbles, and manias in financial history. In-depth analysis and discussion of underlying causes, private and public policy responses, similarities, and contemporary issues in today's financial landscape. Focus on study of financial meltdown of 2008 with comprehensive treatment of financial and banking panics, with discussion of underlying housing and stock market bubbles. Also covers five other financial crises: panic of 1907, Great Depression, Japanese real estate and stock market bubbles of 1980s, American banking crises of 1980s, and Asian Contagion of late 1990s. Highlights various components of financial crises with case and discussion on each component. Students read case studies relating to each, and more general related readings including speeches, papers, and articles. Letter grading.

**168. Introduction to Principles of Value Investing. (4)** Lecture, three hours. Requisites: course 101, Management 1A, 1B. Introduction to fundamental principles of value investing. Discussion of fundamental themes relating to value investing, and demonstration of how these ideas compare favorably with other investment approaches. Topics include differences between investment and speculation, how to search for inefficiencies in marketplace, and importance of incorporating margin of safety in any analysis. Introduction of standard accounting and valuation tools, including liquidation value. Prepares students to analyze and interpret financial statements. Designed for students considering careers in security analysis, investment banking, consulting, and corporate finance. Letter grading.

**169. Applied Value Investing. (4)** Lecture, three hours. Requisites: courses 101, 168, Management 1A, 1B. Enrollment by application only. Extends principles of introductory value investing class to more advanced and wider variety of applications. Makes use of multiple case studies to enhance comprehension with real-world examples and to highlight necessary valuation skills that students are expected to master. Also covers market dynamics that can create opportunities to find structurally mispriced securities such as rights offerings, spin-offs, restructurings, and liquidations. Designed for students considering careers in security analysis, investment banking, consulting, and corporate finance. Letter grading.

**170. Industrial Organization: Theory and Tactics. (4)** Lecture, three hours. Requisite: course 101. Enforced corequisite: course 170L. Not open for credit to students with credit for former course 170 or 171. Monopoly, collusion and competition, strategic firm behavior, nonprice competition with and without entry, pricing practices, antitrust. Comparison of economic and legal treatments of competitive process. Monopoly competition, and collusion as economic theory, as antitrust doctrine, and as fact. Source of monopoly. Predatory behavior. Misleading practices in theory and policy. General problem of relationship between private rights of action and competitive entry. P/NP or letter grading.

**170L. Industrial Organization: Theory and Tactics Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisite: course 101. Enforced corequisite: course 170. Case-based analysis requiring students to apply material from course 170 to real-world problems involving monopoly, collusion, strategic firm behavior, pricing practices, antitrust and other topics. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

**171. Industrial Organization: Policy and Regulation. (4)** Lecture, three hours. Requisite: course 101. Enforced corequisite: course 171L. Recommended requisite: course 103. Preparation: calculus. Designed to give foundation in topics within field of industrial organization relating to regulation of monopoly power within economy and different way that that manifests

across firm conduct and industrial settings. Particular attention to topics in antitrust policy, with some exploration of intersection between economics and law. Topics include in-depth analysis of cartels and mergers, including abstract theory and specifics of analytical approaches deployed in enforcement by Department of Justice and Federal Trade Commission. P/NP or letter grading.

**171L. Industrial Organization: Policy and Regulation Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisite: course 101. Enforced corequisite: course 171. Recommended requisite: course 103. Preparation: calculus. Empirically-based analysis requiring students to provide empirical analysis to material covered in course 171, with emphasis on antitrust issues and policies. In particular, use of standard empirical toolkit to critically evaluate public policy and regulation with special emphasis on antitrust policy. P/NP or letter grading.

**173AX-173BX. Introduction to Social Entrepreneurship. (4-4)** (Formerly numbered 173A-173B.) Lecture, one hour; research group meeting, two hours. Course 173AX is requisite to 173BX. Full-scale immersion into world of social entrepreneurship. Introduction to basics of business planning for social enterprises. Students are assigned in teams to work with participating social enterprises in Los Angeles area to implement new revenue-generating business plan for social enterprises to which they are assigned. Teams receive support from MBA student volunteers as advisers on how to work effectively together and how to resolve issues that arise with staff of assigned social enterprise. Courses 173AX and 173BX must be taken in consecutive terms. In Progress (173AX) and P/NP or letter (173BX) grading.

**174. Economics of Sports. (4)** Lecture, three hours. Enforced requisites: courses 11, 41, 101. Recommended: courses 103/103L. Course in applied microeconomics that employs both theoretical and empirical tools to analyze wide range of topics related to sports industry. Topics include history of labor relations in professional sports, history and analysis of player salaries in professional sports, market for professional sports franchises and sports broadcast rights, league expansion and relocation decisions, understanding of role of economic impact studies (cost-benefit analysis) and public/private partnerships in facility financing, relationship between academics and athletics in collegiate sports, racial discrimination in sports, exploration of behavioral issues such as strategic effort, measuring return on investment from sport sponsorships, and calculation of economic damages in legal cases involving athletes. P/NP or letter grading.

**C176A-C176B-C176C. Seminars: Industrial Organization. (4-4-4)** Seminar, three hours. Requisites: courses 11, 101, 102. Limited to seniors. Overview of most current developments in industrial organization for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C276A-C276B-C276C. P/NP or letter grading.

**177. Field Projects in Investing. (4)** Seminar, three hours. Enforced requisites: courses 167, 168, 169. Enrollment by application only. Experiential learning tool and seminar course where students complete significant research on investment-related topic. Participating students are paired with asset management firm and engage regularly to complete research project. Designed to expose students to real-world practice of asset valuation, including applications of tools and inputs (including economics, accounting, and quantitative techniques) in asset valuation. Letter grading.

**181. Development of Economic Institutions in Western Europe. (4)** Lecture, three hours. Requisite: courses 11, 103. Corequisite: course 181L. Application of economic theory and quantitative reasoning to study economic history of Western Europe from 18th to 20th century. Topics include Malthusian theory, Industrial Revolution, demographic transition, formation

and persistence of institutions and organizations, World Wars, and development of Europe during 1950s and 1960s. P/NP or letter grading.

**181L. Development of Economic Institutions in Western Europe Laboratory. (1)** Lecture, three hours; laboratory, one hour. Requisite: courses 11, 103. Corequisite: course 181. Empirical analysis requiring application of material from corresponding lecture course to selected historical issues, such as Malthusian theory, Industrial Revolution, demographic transition, formation and persistence of institutions and organizations, World Wars, and development of Europe during 1950s and 1960s. Hands-on data collection and problem solving and presentation of student analyses in writing. P/NP or letter grading.

**182A. U.S. Economics History: From Colonial Times to the Civil War. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 11, 41 (or equivalent). Enforced corequisite: course 182AL. Examination of the development of the U.S. economy up to and including the Civil War. Focus on using economic models and numbers to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. While the past persists for a long time in the form of people and institutions, there are periods of dramatic change brought on by technological change and by war. Study of the past, with its very different institutions, to inform the present. For example, there was no U.S. currency until the Civil War. Each bank printed its own notes and each state had different banking regulations. Investigation of how the system worked, whether it was effective in allocating capital, and how stability depended on banking regulations. P/NP or letter grading.

**182AL. U.S. Economics History: From Colonial Times to the Civil War Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 11, 41 (or equivalent). Enforced corequisite: course 182A. Empirical analysis requiring application of material from course 182A to the development of the U.S. Economy up to and including the Civil War. Focus on application of economic models and empirical analysis to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. P/NP or letter grading.

**182B. U.S. Economics History: From the Civil War to World War I. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 11, 41 (or equivalent). Enforced corequisite: course 182BL. Examination of the development of the U.S. economy from the Civil War to World War I. Focus on using economic models and numbers to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. While the past persists for a long time in the form of people and institutions, there are periods of dramatic change brought on by technological change and by war. Study of the past, with its very different institutions, to inform the present. For example, the time period from the Civil War to World War I witnessed the rise of large corporations and complaints of monopoly power. There was anti-trust law. Investigation of degree to which collusion and monopoly was a problem, and whether anti-trust law solved the problem or if the regulators were captured. Consideration also that there was no Federal Reserve until December 1914, and examination of the problems created by not having a Federal Reserve. P/NP or letter grading.

**182BL. U.S. Economics History: From the Civil War to World War I Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 11, 41 (or equivalent). Enforced corequisite: course 182B. Empirical analysis requiring application of material from course 182B to the development of the U.S. Economy from the Civil War to World War I. Focus on application of economic models and empirical analysis to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. P/NP or letter grading.

**182C. U.S. Economics History: From World War I to 1980s. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 11, 41 (or equivalent). Enforced corequisite: course 182CL. Examination of the development of the U.S. economy from the World War I to

1980s. Focus on using economic models and numbers to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. While the past persists for a long time in the form of people and institutions, there are periods of dramatic change brought on by technological change and by war. Study of the past, with its very different institutions, to inform the present. For example, during the 2007-2008 financial crisis, economists looked to the Great Depression, a topic on which then Federal Reserve chairman Ben Bernanke published. Economists also look to the past to understand the role of government deficits in inflation and in economic growth. P/NP or letter grading.

**182CL. U.S. Economics History: World War I to 1980s Laboratory. (1)** Lecture, one hour; laboratory, one hour. Requisites: courses 11, 41 (or equivalent). Enforced corequisite: course 182C. Empirical analysis requiring application of material from course 182C to the development of the U.S. Economy from World War I to 1980s. Focus on application of economic models and empirical analysis to understand what drove the evolution of the economy, why structural changes occurred, and why there was persistence. P/NP or letter grading.

**183. Development of Economic Institutions in U.S. (4)** Lecture, three hours. Requisites: courses 11, 103. Enforced corequisite: course 183L. Study of changing economic conditions in U.S. from Colonial times to early 20th century and effects of these changes on American society. P/NP or letter grading.

**183L. Development of Economic Institutions in U.S. Laboratory. (4)** Lecture, one hour; laboratory, one hour. Requisite: course 11. Enforced corequisite: course 183. Empirical analysis requiring students to apply material from course 183 to selected historical issues such as migration, slavery, industrialization, capital formation, Great Depression, human capital formation, and California development and relate them to current real-world issues. Hands-on data collection and problem solving and presentation of student analyses in writing. P/NP or letter grading.

**185. Career Development. (1)** Lecture, one hour. Enrollment priority to departmental majors. Designed to provide Business Economics majors with key knowledge and practical skills used in real world that complement traditional academics to maximize interview, communication, and presentation skills and strengthen résumé building. Coverage of career paths in business profession in various aspects to broaden students' knowledge of career opportunities. Review of current business environment, financial markets, economy, unemployment, banking crises, market updates, and all related business topics. P/NP grading.

**C186A-C186B-C186C. Seminars: Economic History. (4-4-4)** Seminar, three hours. Limited to seniors. Overview of most current developments in economic history for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C246A-C246B-C246C. P/NP or letter grading.

**187. Upper-Division Research Seminar: Applications of Economic Theory. (4)** Seminar, three hours. Requisites: courses 11, 101. Limited enrollment seminars in which students usually write research paper on topic selected in consultation with instructor. May be repeated for credit with topic change. P/NP or letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced requisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty

mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**M188XP. Practicum in Social Entrepreneurship. (4)** (Formerly numbered M188.) (Same as Community Engagement and Social Change M188XP) Seminar, three hours. Enrollment by consent of instructor. Offers students full-scale immersion into challenges of launching social enterprise. Students work in teams alongside staff of local nonprofit organizations in 10-week social enterprise accelerator program aimed at helping participating organizations secure financial and operational resources they need to implement social enterprise for which viable business plan has already been constructed. Students meet assigned organization, study its business plan, and work with instructors of course and staff of nonprofit organization to develop tailored plan of work for 10-week accelerator program. Students carry out work in conjunction with staff of organization under supervision of instructors and with assistance of experienced entrepreneur volunteer mentors. P/NP or letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**191. Variable Topics Research Seminars: Economics. (4)** Seminar, three hours. Enforced requisites: courses 101, 102, 103. Research seminars on selected topics in economics. Reading, discussion, and development of culminating project. Consult Schedule of Classes for topics and instructors. May be repeated for credit with topic change. P/NP or letter grading.

**192. Undergraduate Practicum in Economics. (3)** Seminar, two hours. Limited to juniors/seniors. Training and supervised practicum for advanced undergraduate students. Students assist in preparation of course materials and development of innovative programs with guidance of faculty members. P/NP or letter grading.

**195A-195B. Community or Corporate Internships in Economics I, II. (2-4)** Tutorial, to be arranged. Requisites: courses 11, 101. Limited to junior/senior Economics, Business Economics, Economics/International Area Studies, and Mathematics/Economics majors. Internship to be supervised by Economics Department. Further supervision to be provided by business or entity for which student is doing internship. Students meet on regular basis with instructor and provide periodic reports of their experience. May not be applied toward major requirements. Only 8 units from courses 195A and 195B may be applied toward undergraduate degree. Individual contract with supervising faculty member required. P/NP grading.

**195C. Community and Corporate Internships in Economics. (4)** Tutorial, to be arranged; fieldwork, eight to 10 hours. Requisites: courses 11, 101. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated by Economics Department. Students complete weekly written assignments, attend biweekly meetings with graduate student coordinator, and write final research paper. Faculty sponsor and graduate student coordinator construct series of reading assignments that examine issues related to internship site. May not be applied

toward major requirements. May be repeated for credit with consent of department. Individual contract with supervising faculty member required. P/NP or letter grading.

**198A. Honors Research in Economics I. (4)** Tutorial, three hours. Prerequisites: courses 11, 101, 102. Limited to senior departmental honors program students. First term of two-term sequence in which students develop honors thesis or comprehensive research project under direct supervision of faculty member. Individual contract required. In Progress grading (credit to be given only on completion of course 198B).

**198B. Honors Research in Economics II. (4)** Tutorial, three hours. Prerequisite: course 198A. Limited to senior departmental honors program students. Second term of two-term sequence in which students complete honors thesis or comprehensive research project under direct supervision of faculty member. Individual contract required. Letter grading.

**199A. Directed Research in Economics. (4)** Tutorial, three hours. Prerequisites: courses 11, 101, 102. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated twice but may be applied only once toward major requirements. Individual contract required. P/NP or letter grading.

**199B. Directed Research in Economics/International Area Studies. (4)** Tutorial, three hours. Students prepare research papers under guidance of faculty mentor on economy of country or region of specialization. May be repeated for credit. Individual contract required. P/NP or letter grading.

## Graduate Courses

### Foundations of Economics

**200. Mathematical Methods in Economics. (4)** Lecture, three hours. Should be taken prior to enrollment in course 201A. Examination of mathematical methods used in graduate-level courses in microeconomics, macroeconomics, and quantitative methods. Topics include real analysis, linear algebra and matrices, calculus of many variables, static optimization, convex analysis, and dynamics and dynamic optimization. S/U grading.

**200B. Mathematical Methods in Economics II. (4)** Lecture, three hours; laboratory, two hours. Should be taken prior to or concurrent with course 201B. Linear algebra and its application to linear difference equations. Basic real analysis, normed vector space/Banach space, Hahn/Banach theorem, Schauder fixed point theorem, and theory of correspondences. S/U grading.

**201A. Microeconomics: Theory of Firm and Consumer. (4)** Lecture, three hours. Two input/two output model. Walrasian equilibrium and Pareto efficiency. Choice over time—consumer savings and firm investment decisions. Choice under uncertainty—state claims model, asset pricing. S/U or letter grading.

**201B. Microeconomics: Basic Concepts and Techniques of Noncooperative Game Theory and Information Economics. (4)** Lecture, three hours. Nash equilibrium and subgame perfection. Games with incomplete information. Models of strategic market behavior. Screening and signaling. Bargaining models. Theory of firm. S/U or letter grading.

**201C. Microeconomics: Game Theory with Asymmetric Information and Applications. (4)** Lecture, three hours. Perfect Bayesian equilibrium and refinements, mechanism design. Applied topics such as adverse selection, signaling, moral hazard, bidding, price discrimination, and public good provision. S/U or letter grading.

**202A. Macroeconomics: Dynamics and Growth Theory. (4)** Lecture, three hours. Essential techniques and concepts from dynamical mathematics and neoclassical growth theory. Linear and nonlinear dynamical systems. Dynamic programming and control theory. Stochastic dynamics. Determinacy of equilibrium. Descriptive, optimal, and overlapping generations models of accumulation. Stochastic growth theory. Increasing returns and applications to economic development. S/U or letter grading.

**202B. Macroeconomics: Business Cycles. (4)** Lecture, three hours. Survey of representative agent and complete market models of short-run fluctuations. Facts about fluctuations and long-term growth. Real business cycle theory. Calibrating and simulating dynamic models. Asset prices, money, and inflation. Taxation of factor incomes. Cyclical aspects of employment. S/U or letter grading.

**202C. Macroeconomics: Topics in Macroeconomics. (4)** Lecture, three hours. Heterogeneous-agent models of endogenous fluctuations and growth. General equilibrium techniques in macroeconomics. Overlapping fluctuations model with national debt. Fiscal policy. Externalities, indeterminacy, and growth. Expectations and business cycles. Money and monetary policy. Historical overview of mainstream macroeconomics. Wicksell and Keynes. Monetarist controversy. New classical and new Keynesian macroeconomics. S/U or letter grading.

**203A. Introduction to Econometrics I. (4)** Lecture, three hours; discussion, one hour. Probability and statistical tools for econometric models. Topics include random variables, distribution and density functions, transformations, identification, sampling, estimators, asymptotic properties. S/U or letter grading.

**203B. Introduction to Econometrics II. (4)** Lecture, three hours; discussion, one hour. Estimation and testing. Basic linear regression model, tests of hypotheses, generalized least squares, heteroskedasticity, multicollinearity, error-in-variables, and qualitative dependent variables. S/U or letter grading.

**203C. Introduction to Econometrics III. (4)** Lecture, three hours; discussion, one hour. Econometrics methods for time-series econometrics, including theory and applications. Topics include detrending techniques, unit root theory, cointegrated system approaches, autocorrelation robust inference, Wold and Beveridge and Nelson (BN) decompositions, model selection, nonlinear nonstationary models, spatial density asymptotics and semi-nonparametric time-series models. S/U or letter grading.

**M204A. Applications of Economic Theory: California Population Research Topical Seminar Series. (4)** (Same as Sociology M225A.) Seminar, three hours. Limited to California Center for Population Research (CCPR) affiliates. Examination of issues such as demography, health, aging, labor, and broad array of topics concerned with effects of economic, social, and political transformations on human behavior both in U.S. and abroad. S/U grading.

**204B. Applications of Economic Theory: California Population Research Topical Seminar Series. (4)** Seminar, three hours. Examination of issues such as demography, health, aging, labor, and broad array of topics concerned with effects of economic, social, and political transformations on human behavior both in U.S. and abroad. May be taken independently for credit. S/U grading.

**204C. Applications of Economic Theory: California Population Research Topical Seminar Series. (4)** Seminar, three hours. Examination of issues such as demography, health, aging, labor, and broad array of topics concerned with effects of economic, social, and political transformations on human behavior both in U.S. and abroad. May be taken independently for credit. S/U grading.

**204D-204K. Applications of Economic Theory. (4 each)** Lecture, three hours. S/U or letter grading.

**M204L. Seminar: Pharmaceutical Economics and Policy. (1)** (Same as Health Policy M204A.) Seminar, three hours every other week. Prerequisite: Health Policy M236. Limited to graduate public health and economics students. Various topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress grading (credit to be given only on completion of courses M204M and M204N).

**M204M. Seminar: Pharmaceutical Economics and Policy. (1)** (Same as Health Policy M204B.) Seminar, three hours every other week. Prerequisite: Health Policy M236. Limited to graduate public health and economics students. Various topics in economics of pharmaceutical industry, including rates of innovation,

drug regulation, and economic impact of pharmaceuticals. In Progress grading (credit to be given only on completion of course M204N).

**M204N. Seminar: Pharmaceutical Economics and Policy. (2)** (Same as Health Policy M204C.) Seminar, three hours every other week. Prerequisite: Health Policy M236. Limited to graduate public health and economics students. Various topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. Letter grading.

**204R. Applications of Economic Theory. (4)** Lecture, three hours. Preparation: completion of first-year microeconomics and graduate econometrics courses. In past decade economists have learned remarkable amount about how society works. Increased understanding has come about through application of distinctively economic methods of research—explicit mathematical models and eclectic statistical techniques—to topics such as healthcare, crime, education, and immigration. Taken together this work has led to increased understanding of inequality, how to measure it, how inequality has increased in U.S., how America differs from other rich countries and, most important, what causes inequality. Study of this work, with focus on two important influences on inequality—education and health—which are two areas in which knowledge is accumulating most rapidly. S/U grading.

**205. Economic Modeling. (4)** Lecture, three hours. Development of modeling skills by considering sequence of economic issues (e.g., peak load pricing, regulation, monopoly, capital asset pricing, Pareto efficiency). Emphasis on multivariate constrained optimization. S/U or letter grading.

**206. Law and Economics Workshop. (2 or 3)** Seminar, two hours. Prerequisite: course 201A or Management 405. Knowledge of empirical methods and basic calculus required. Interdisciplinary speakers series bringing together outside speakers with scholars and students from UCLA Law School and academic departments. Topics include contracts, torts, intellectual property, and business law. Students write graded reaction papers. May be repeated for credit. Concurrently scheduled with Law 648 and Management 294. S/U or letter grading.

**207. History of Economic Thought. (4)** Lecture, three hours. Topics from classical economics, including work of Smith, Ricardo, and Mill, and developments from 1870s, including contributions of major figures of marginalist revolution, socialist controversy, and history of welfare economics. S/U or letter grading.

**M208. Introduction to Demographic Methods. (4)** (Same as Biostatistics M208, Community Health Sciences M208, and Sociology M213A.) Lecture, four hours. Preparation: one introductory statistics course. Introduction to methods of demographic analysis. Topics include demographic rates, standardization, decomposition of differences, life tables, survival analysis, cohort analysis, birth interval analysis, models of population growth, stable populations, population projection, and demographic data sources. Letter grading.

**209A-209B-209C. PhD Research Seminar. (4-4-4)** Seminar, three hours. Designed to help PhD students transition from standard learning (attending lecture, taking examinations) into creating independent research. Students are supported in developing their dissertation and professional skills in all aspects of process of creating their own research, including writing and presentation. Covered topics include finding research ideas, writing introductions, building narratives, writing models, presenting empirical analysis, writing referee reports, responding to referees, presentation, elevator pitch, etc. For each topic, students study canonical examples and work on their own papers. Faculty provide feedback and build supportive environment in which students can learn and experiment. S/U grading.

### Economic Theory

**211A. Contract Theory. (4)** Lecture, three hours. Preparation: introductory probability. Enforced prerequisite: course 201C. Study of trading relationships between small number of agents. Coverage of many tools and techniques used in models of moral hazard,

adverse selection, and incomplete contracting, starting with static models of moral hazard and mechanism design and development of their dynamic counterparts. Consideration of environments where agents cannot use formal contracts, studying relational contracts and trading relationships with no contracts. Analysis of wide variety of applications from industrial organization, corporate finance, personnel economics, and public economics. S/U or letter grading.

**211B. Economics of Uncertainty, Information, and Games. (4)** Lecture, three hours. Preparation: introductory probability. Enforced requisite: course 201C. Theory of individual decision making under uncertainty, applied to topics such as asset pricing models, adverse selection, moral hazard, bargaining, signaling, auctions, and search. S/U or letter grading.

**211C. Game Theory and Economic Applications. (4)** Lecture, three hours. Preparation: introductory probability. Enforced requisite: course 201C. Intended for students who are interested in doing research in microeconomic theory and for students who want to acquire good theory background to do applied work. Coverage of combination of standard results in field and topics of current research, including notions of equilibrium in static and dynamic games, reasoning in games, repeated games, games of incomplete information, and experiments. S/U or letter grading.

**212A. Topics in Advanced Theory: Search Theory. (4)** Lecture, three hours. Preparation: calculus, introductory probability. Price searching, queueing, Brownian motion, martingales, and applications to theory of firm. May be repeated for credit. S/U or letter grading.

**212B. Topics in Advanced Theory: Applied Game Theory. (4)** Lecture, three hours. Preparation: calculus, introductory probability. Use of theory of Bayesian games to study bargaining, monetary theory, and oligopoly. Use of theory of mechanisms to study auction design and imperfectly competitive markets. May be repeated for credit. S/U or letter grading.

**213A-213B. General Equilibrium and Game Theory. (4-4)** Lecture, three hours. Requisite: course 201C. Selected advanced theoretical topics of current interest and introduction to modern mathematical economics, including general equilibrium theory and game theory. S/U or letter grading.

**214A. Topics in Mathematical Economics: General Equilibrium Theory. (4)** Lecture, three hours. Requisite: course 201C. Core convergence theorem, cooperative and noncooperative approach to competitive equilibrium theory, perfectly competitive equilibria, no-surplus condition, and applications to mechanism theory and incomplete market models. May be repeated for credit. S/U or letter grading.

**M215. Topics in Applied Game Theory. (4)** (Same as Political Science M208B.) Lecture, three hours. Preparation: calculus or introductory probability. Designed for graduate economics and political science students. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading.

**218A-218B-218C. Proseminars: Economic Theory. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers. Discussion of advanced topics and recent developments in game theory, information and uncertainty, and general equilibrium theory. Presentation of recent papers published and unpublished in economic theory as well as research of instructor and students. In-class presentation expected. S/U grading.

**219A-219B-219C. Workshops: Economic Theory and Mathematical Economics. (4-4-4)** Lecture, three hours. Workshops for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

## Monetary Economics

**221A. Monetary Economics I. (4)** Lecture, three hours. Requisites: courses 202A, 202B, 202C. Dynamic methods in business cycles and economic growth. Multiperiod life-cycle models. Sustainable public deficits. Money and inflationary finance. Human capital.

Endogenous fluctuations and regime switching. Econometrics of multiple equilibrium models. Political economy of government deficits and inflation. S/U or letter grading.

**221B. Monetary Economics II. (4)** Lecture, three hours. Emphasis on theoretical, historical, and policy aspects of monetary economics. Financial intermediation, bank panics, asset price volatility, game theoretic models of policy, inflation, implication of monopolistic competition, search and coordination failures, central bank operations, and evolution of monetary institutions. S/U or letter grading.

**221C. Monetary Economics III. (4)** Lecture, three hours. Requisites: courses 202A, 202B, 202C. Emphasis on quantitative dynamic models useful in study of equilibrium business cycles and public finance. Recursive competitive equilibria in representative agent overlapping-generation models, including models with money, taxes, liquidity constraints, and other distortions. S/U or letter grading.

**221D. Monetary Economics IV. (4)** Lecture, three hours. Requisites: courses 202A, 202B, 202C. Emphasis on applied macroeconomics, with topic change each year. Students select one particular data set to study. Each week class studies article from recent work in applied macroeconomics or applied econometrics that teaches one technique or suggests one theoretical restriction on data. Subgroups of students report back to class using technique on their selected data set. S/U or letter grading.

**222B-222Z. Topics in Monetary Economics. (4 each)** Lecture, three hours. Current research in monetary economics. Content varies. May be repeated for credit. S/U or letter grading.

**C226A-C226B-C226C. Seminars: Monetary Economics/Macroeconomics. (4-4-4)** Seminar, three hours. Designed for pre-dissertation and dissertation writers. Overview of most current developments in monetary economics and macroeconomics for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C166A-C166B-C166C. S/U (C226B) and S/U or letter (C226A, C226C) grading.

**228A-228B-228C. Proseminars: Monetary Economics. (4-4-4)** Seminar, three hours. Workshops for pre-dissertation and dissertation writers. Literature surveys or research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper or presentation required. S/U grading.

**229A-229B-229C. Workshops: Monetary Economics. (4-4-4)** Lecture, three hours. Workshops for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

## Econometrics

**231A. Advanced Econometrics I. (4)** Lecture, three hours. Econometric methods for microeconomic models. Topics include identification, nonparametric estimation, limited dependent variable models, duration, panel data, tests of hypotheses. S/U or letter grading.

**231B. Advanced Econometrics II. (4)** Lecture, three hours. Econometric methods for empirical research in economics. Topics include simultaneous equations, instrumental variables, panel data, treatment effects, and point and partial identification, with applications in static and dynamic games, social interactions, matching, and network formation. S/U or letter grading.

**231C. Advanced Econometrics III. (4)** Lecture, three hours. Advanced topics in econometrics that may vary year to year. Current topics include empirical process methods with applications to quantile regression and general M-estimation, estimation and inference methods in high-dimensional models, including

LASSO and Dantzig Selector techniques, and bootstrap. May be repeated for credit. S/U or letter grading.

**M232A. Topics in Econometrics: Bayesian Econometrics. (4)** (Same as Political Science M208E.) Lecture, three hours. Requisites: courses 231A, 231B. Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simplification of models, criticism. May be repeated for credit. S/U or letter grading.

**232B. Topics in Econometrics: Time Series. (4)** Lecture, three hours. Requisites: courses 231A, 231B. Stationary stochastic processes, Box/Jenkins methods, spectral analysis, forecasting, rational expectation models, analysis of macroeconomic data. May be repeated for credit. S/U or letter grading.

**232D-232M. Topics in Econometrics. (4 each)** Lecture, three hours. Requisites: courses 231A, 231B. Current research in econometrics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

**238A-238B-238C. Proseminars: Econometrics. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Research paper or presentation required. S/U grading.

**239A-239B-239C. Workshops: Econometrics. (4-4-4)** Lecture, three hours. Workshops for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

## Economic History

**241. Economic History of Western Europe. (4)** Lecture, three hours. Designed for graduate students. Seminar on European economic history, with emphasis on evolution of institutions and growth. Serfdom, medieval agriculture and agricultural revolution, demographics, industrial revolution, imperial expansion, and decline of Britain. S/U or letter grading.

**242. Economic History of U.S. (4)** Lecture, three hours. Seminar on American economic history. Onset of industrialization, relative economic backwardness of South, slavery, technological change, rise in industrial concentration, women in labor force, development of financial markets. S/U or letter grading.

**243A-243Z. Topics in Economic History. (4 each)** Lecture, three hours. Current research in economic history. Content varies. May be repeated for credit. S/U or letter grading.

**244. U.S. Labor Markets and Public Programs since 1940. (4)** Lecture, three hours. Designed for PhD students. Introduction to current research at intersection of labor economics, public economics, and U.S. economic history, focusing on period after 1940. Topics include economic and wage inequality; intergenerational mobility; increasing (and stalling) educational attainment; changes in health and health care; Great Migration; gender gap in pay and rise of married women's market work; baby boom and bust; racial inequality from slavery to Civil Rights era; and war on poverty. S/U or letter grading.

**C246A-C246B-C246C. Seminars: Economic History. (4-4-4)** Seminar, three hours. Designed for pre-dissertation and dissertation writers. Overview of most current developments in economic history for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C186A-C186B-C186C. S/U grading.

**248A-248B-248C. Proseminars: Economic History. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers. Discussion of advanced topics and recent developments in economic history. Presentation of work-in-progress. Research paper required. S/U grading.

**249A-249B-249C. Von Gremp Workshops: History of Entrepreneurship in U.S. Economy. (4-4-4)** Lecture, three hours. Designed for graduate students. Workshops for advanced graduate students. Research in progress discussed by visiting experts, UCLA faculty members, graduate students. S/U grading.

## Public Finance

**251A. Theory and Policy of Taxation. (4)** Lecture, three hours. Examination of influence of taxation on economic efficiency and incidence of taxation in first part of course. Topics include tax equivalences, Ramsey rules, and alternative forms of taxation. Special tax provisions, tax incentives, and progressivity in taxation in second part of course. S/U or letter grading.

**251B. Cost-Benefit Analysis of Public Projects and Programs. (4)** Lecture, three hours. Requisite: course 251A. Presentation of those aspects of applied capital theory that are relevant in decisions concerning investment projects in first part of course. Differences between social and private benefits and costs (shadow prices) for foreign exchange, capital, and labor, with applications to public investment decisions, in second part of course. S/U or letter grading.

**252. Economics of Federalism. (4)** Lecture, three hours. Theories of perfect games and social organization. Role of government, collective goods, collective defense, local public goods, spillovers, and intergovernmental relations. S/U or letter grading.

**253A-253Z. Topics in Public Finance. (4 each)** Lecture, three hours. Current research in public finance. Content varies. Topics include Social Security taxes and programs, unemployment insurance, public provision of medical care, theory of public goods, and theory of public choice. May be repeated for credit. S/U or letter grading.

**254A-254B-254C. Workshops: Public Economics. (4-4-4)** Lecture, three hours. Designed for graduate students. Workshops for advanced graduate students. Research in progress discussed by graduate students, UCLA faculty members, visiting experts. S/U grading.

## Applied Microeconomics

**261A. Labor Economics I. (4)** Lecture, three hours. Wage determination in competitive labor markets. Extension of wage determination to schooling and occupational choice, life-cycle earnings profiles, discrimination, minimum wage legislation, and unionism. Emphasis on empirical literature. S/U or letter grading.

**261B. Labor Economics II. (4)** Lecture, three hours. Requisite: course 261A. Models of life-cycle learning and work behavior, with particular emphasis on recent literature examining labor force behavior and experience of women. S/U or letter grading.

**262A. Topics in Labor Economics. (4)** Lecture, three hours. Current research in labor economics. Content varies. May be repeated for credit. S/U or letter grading.

**262D. Topics in Labor Economics: Development Economics. (4)** Lecture, three hours. Preparation: completion of first-year graduate microeconomics and econometrics courses. Coverage of important key topics in microeconomics of development, such as health, education, risk coping, savings, credit, and household economics. Discussion of empirical methods. S/U or letter grading.

**262F. Topics in Labor Economics: Public Sector Microeconomics. (4)** Lecture, three hours. Preparation: completion of first-year graduate microeconomics and econometrics courses. Coverage of topics related to tax incidence, deadweight loss, public expenditure, income taxation and transfer programs, with emphasis on impacts of such programs on labor supply and savings, social security, unemployment insurance, and other insurance programs. S/U or letter grading.

**262P. Topics in Labor Economics. (4)** Lecture, three hours. Current research in labor economics. Content varies. May be repeated for credit. S/U or letter grading.

**263. Topics in Urban Economics. (4)** Lecture, three hours. Current research in urban and regional economics. Content varies. Serves as forum for presenta-

tion of papers on urban economics by students, UCLA faculty members, and visitors. May be repeated for credit. S/U or letter grading.

**264A. General Equilibrium and Finance. (4)** Lecture, three hours. Designed for graduate students. Introduction to mathematical finance from general equilibrium viewpoint. CAPM and static equilibrium models. Intertemporal models in discrete and continuous time. Spanning, option prices, and derivatives. Martingales, random walks, and market efficiency. S/U or letter grading.

**264B. Fundamentals and Bubbles in Asset Prices. (4)** Lecture, three hours. Requisite: course 264A. Designed for graduate students. Applications of dynamic general equilibrium to asset pricing in economies with exchange and production. Basic empirical puzzles in U.S. and international asset prices, 1880 to 2000: excess volatility, equity premium and risk-free rate puzzle, predictability. Models of habit formation, asset price bubbles, and limited arbitrage asset pricing theories. Market imperfections and bounded rationality. S/U or letter grading.

**264C. Asset Prices, Forecasting, and Learning. (4)** Lecture, three hours. Requisite: course 264A. Designed for graduate students. Introduction to forecasting methods and applications to asset pricing. Signal-extraction under different uncertainty specifications. Kalman filtering and forecasting. Robust filtering and forecasting. Models of behavioral finance. Stylized facts on forecasts and asset pricing anomalies: short-term momentum and long-term reversals of returns. Option pricing anomalies. S/U or letter grading.

**264D. Econometrics of Asset Prices. (4)** Lecture, three hours. Requisite: course 264A. Designed for graduate students. Applications of time-series methods to analysis of asset prices: general method of moments, vector autoregressions, and maximum likelihood estimation. Restrictions imposed by no-arbitrage on time series of returns. Empirical implications of macroeconomic models for asset prices. Response of asset prices to shocks. Incomplete markets. S/U or letter grading.

**C266A-C266B-C266C. Seminars: Labor Economics. (4-4-4)** Seminar, three hours. Designed for pre-dissertation and dissertation writers. Overview of most current developments in labor economics for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C156A-C156B-C156C. S/U (C266B) and S/U or letter (C266A, C266C) grading.

**268A-268B-268C. Proseminars: Labor and Population. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers working on empirical issues in areas of labor and population, broadly defined. Presentation of work-in-progress or background material for proposed thesis topics, to be discussed and criticized by faculty and fellow students. Presentation or research paper required. S/U grading.

**269A-269B-269C. Workshops: Labor Economics. (4-4-4)** Lecture, three hours. Workshops for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

## Industrial Organization

**271A. Industrial Organization, Price Policies, and Regulation I. (4)** Lecture, three hours. Major economic aspects of property rights system. Firm and market compared from perspective of alternative arrangements for allocating resources. Traditional problems of competition, monopoly, and industrial concentration. Brief analysis of those portions of antitrust policy bearing on industrial structure. S/U or letter grading.

**271B. Industrial Organization, Price Policies, and Regulation II. (4)** Lecture, three hours. Requisite: course 271A. Study of firm organization and pricing under conditions of less than perfect competition; in-

formation costs and advertising; economic and legal analysis of marketing practices such as discrimination, tie-in selling, resale price maintenance, exclusive dealing, and territorial arrangements. S/U or letter grading.

**271C. Mathematical Theory in Industrial Organization. (4)** Lecture, three hours. Requisites: courses 201A, 201B, 201C. Formal modeling of theory of industrial organization: principal-agent problem, entry deterrence, endogenous price discrimination, monopolistic competition, new approaches to rationality. S/U or letter grading.

**272A-272Z. Topics in Industrial Organization. (4 each)** Lecture, three hours. Current research in industrial organization. Content varies. May be repeated for credit. S/U or letter grading.

**273A. Public Utility Regulation. (4)** Lecture, three hours. Theory, practice, and consequences of regulation in electric power, gas, water, telecommunications, broadcasting, and other regulated industries; experiences of unregulated monopoly and public enterprises by way of contrast. S/U or letter grading.

**C276A-C276B-C276C. Seminars: Industrial Organization. (4-4-4)** Seminar, three hours. Designed for pre-dissertation and dissertation writers. Overview of most current developments in industrial organization for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C176A-C176B-C176C. S/U (C276B) and S/U or letter (C276A, C276C) grading.

**278A-278B-278C. Proseminars: Industrial Organization and Regulation. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers to discuss advanced topics and recent developments in industrial organization and regulation. Presentation of work-in-progress for feedback from faculty and fellow students. Presentation or research paper required. S/U grading.

**279A-279B-279C. Workshops: Business Organization. (4-4-4)** Lecture, three hours. Workshops for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

## International Economics

**281A. International Trade Theory. (4)** Lecture, three hours. Theoretical and empirical analysis of microeconomic relationships among countries. Determinants of commodity and factor flows, prices, and factor rewards. Effects of trade barriers. S/U or letter grading.

**281B. International Finance. (4)** Lecture, three hours. Theory and evidence on balance of payments, exchange rate determination, international transmission of inflation and business cycles, macroeconomic policy in open economies, alternative monetary systems. S/U or letter grading.

**281C. International Economics. (4)** Lecture, three hours. Theoretical and empirical analysis of interrelation between flows of capital, people, and goods. Applications to current policy. S/U or letter grading.

**282A-282Z. Topics in International Economics. (4 each)** Lecture, three hours. Current research in international economics. Content varies. May be repeated for credit. S/U or letter grading.

**284. Soviet Economic Theory and Organization. (4)** Lecture, three hours. Overall strategy of planning used by USSR planners and specific planning methods, interpreted broadly to cover not only instructions and objectives but also institutional arrangements. Intended and unintended outcomes of methods. S/U or letter grading.

**C285A-C285B-C285C. Seminars: International Economics. (4-4-4)** Seminar, three hours. Designed for pre-dissertation and dissertation writers. Overview of most current developments in international economics for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and dis-

cussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C126A-C126B-C126C. S/U grading.

## Development Economics

**286A. Economic Development. (4)** Lecture, three hours. Requisites: courses 201C, 202C. Study of theoretical and empirical problems related to developing countries. Emphasis on relation between international trade and economic development, dynamic aspects of commercial policies, inflation, stabilization, structural adjustment, growth and migration. S/U or letter grading.

**286B. Cost-Benefit Analysis of Development Projects. (4)** Lecture, three hours. Requisite: course 286A. Methodology for evaluating investment projects, with special attention to types of issues that arise in developing countries. Discussion of social versus private evaluation criteria; applications to highway, electricity, and irrigation projects. S/U or letter grading.

**287A. Topics in Development Economics: Economic Problems of Latin America. (4)** Lecture, three hours. Economic history of Latin America. Great depression, import substitution and industrialization, inflation and growth, free market experiments, and economic integration. May be repeated for credit. S/U or letter grading.

**287B. Topics in Development Economics: Economic Development in East Asia. (4)** Lecture, three hours. Recent economic history of East Asia, focusing on postwar development of Japan, Korea, and China. Emphasis on role of international investment and trade, especially with U.S., in area's economic development. May be repeated for credit. S/U or letter grading.

**287C. Topics in Development Economics: Economic Development. (4)** Lecture, three hours. Designed for graduate students. Topics in monetary and exchange rate policy in developing countries. Students expected to develop analytical tools and underlying policy issues. May be repeated for credit. S/U or letter grading.

**287D. Topics in Development Economics. (4)** Lecture, three hours. Current research in development economics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

**288A-288B-288C. Proseminars: International and Development Economics. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers on current issues in international trade and finance and development economics. Presentation of work-in-progress for feedback from faculty and other graduate students. Presentation or research paper required. S/U grading.

**291A. Asset Pricing. (4)** Lecture, three hours. Introduction to models of firm dynamics, their use in modeling valuation of firms, and embedding of these models in general equilibrium for purposes of understanding market valuation of corporate sector as whole. Introduction also to continuous-time search-and-matching models and their applications to financial economics. S/U or letter grading.

**291B. Asset Pricing. (4)** Lecture, three hours. Recent theoretical and empirical research on monetary policy. Includes issues such as how monetary policy is implemented in practice. What are effects of different monetary policy tools, what restrictions on government does monetary policy impose, transmission mechanisms of monetary policy, welfare costs of inflation, how does monetary policy interact with credit markets and how does it affect asset prices. S/U or letter grading.

**C296A-C296B-C296C. Seminars: Asset Pricing. (4-4-4)** Seminar, three hours. Designed for pre-dissertation and dissertation writers. Overview of most current developments in asset pricing theory for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty mem-

bers, and advanced graduate students. Concurrently scheduled with courses C146A-C146B-C146C. S/U (C296B) and S/U or letter (C296A, C296C) grading.

**298A-298B-298C. Proseminars: Asset Pricing. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers on empirical issues in area of asset pricing, broadly defined. Presentation of work-in-progress or background material for proposed dissertation topics that are discussed and criticized by faculty members and fellow students. Presentation or research paper required. S/U grading.

## Teaching Practicum

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

## Master of Quantitative Economics

**401A. Microeconomic Theory. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Coverage of fundamentals of optimization, choices by price-taking agents, consumer and producer surplus, monopoly and competition, Walrasian equilibrium and two welfare theorems, constant returns to scale economy, choice over time, uncertainty, and information and market design. Letter grading.

**401B. Applied Economics. (4)** Lecture, three hours. Limited to Master of Applied Economics students. How to be sophisticated users and producers of research on issues and policies in several core areas of labor, public, and health economics. Rigorous analyses of core policy questions with cutting-edge empirical analysis. Letter grading.

**402A. Macroeconomic Theory. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Introduction to main topics of graduate macroeconomics, including macroeconomic data, models of economic growth, supply and demand of factors of production, business cycle models, unemployment, monetary policy and inflation, and fiscal policy and deficits. Letter grading.

**402B. Applied Macroeconomics. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Study of alternative theories of causes of unemployment and inflation, with focus on Keynesian approach to monetary and fiscal policy and modifications and extensions of Keynesian ideas designed to explain financial crises. Letter grading.

**403A. Introduction to Statistical Methods and Econometrics. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Introduction to probability, statistics, econometrics, and time-series methods used in economics, business, and government. Topics include random variables, hypothesis testing, estimation, distribution functions, simple and multiple regression, and estimation with stationary/nonstationary processes. Letter grading.

**403B. Applied Econometrics. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Basic tools necessary for high-level cutting-edge empirical research. Coverage of variety of methods suited for empirical studies that apply to experimental data, quasi-experimental data, panel data, and cross-sectional data. Letter grading.

**404A. Writing and Presentation Skills for Economists I. (4)** Seminar, three hours. Limited to Master of Applied Economics students. Designed to help students develop communication and presentation skills essential for success in any aspect of business. Practice in writing economics documents for variety of professional audiences. Writing taught as process—brainstorming, collaborating, continually revising, and challenging ideas. Presentation skills to focus on presenting information clearly and organizing ideas, with emphasis on role of audience when presenting, because audience determines diction, style, tone, organization, research, and ideas. Grammar incorporated as needed, especially in regard to writing. Letter grading.

**404B. Writing and Presentation Skills for Economists II. (4)** Seminar, three hours. Limited to Master of Applied Economics students. Builds on skills learned in course 404A. Writing component to focus on summarizing, critiquing, and report writing. Process writing used and self-editing skills stressed. Presentations include summary/critique, opinion piece, and final group presentation that includes proposals. Grammar incorporated as needed, especially in regard to writing. Letter grading.

**405. Macroeconomic Implications of Globalization. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Development of understanding of some main macroeconomic implications of increasing integration of world economy through trade linkages, multinational production, and financial markets. Letter grading.

**406. Money and Banking. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Introduction to models and data used to understand connection between asset prices, health of financial sector, and macroeconomy, including review of recent papers to gain introduction to questions being addressed on research frontier. Letter grading.

**407. Economics of Entrepreneurship. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Examination of role of entrepreneurship and entrepreneurial strategies—source of ideas, value creation, market development, scaling, exit strategies. Group practice of entrepreneurship. Development of original ideas into business plans. Letter grading.

**408. Environmental Economics. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Introduction to major ideas in environmental economics by studying causes and consequences of pollution, with special emphasis on understanding China's environmental challenges and policy options. Letter grading.

**409. Forecasting Asset Prices. (1 to 4)** Lecture, three hours. Limited to Master of Quantitative Economics students. Introduction to recent developments in international finance. Coverage of lending booms and financial crises both theoretically and empirically, as well as foreign exchange market anomalies and different approaches to forecasting exchange rates. Letter grading.

**410. Economists in Action. (1 to 2)** Seminar, three hours. Limited to Master of Applied Economics students. How theory maps into policymaking. Renowned policymakers from Central Banks, Economics Ministries, and International Organizations to lecture on policy-relevant topics. Completion of assignments linking lectures with economic theory and real-world events. Letter grading.

**411. Inequality and Macroeconomy. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Introduction to analysis of economic inequalities and interplay between inequality and macroeconomy. What are relative roles of market forces and institutions in shaping dynamics of economic inequality? What are consequences of globalization on distribution of income within and between countries? Does inequality hamper economic growth and macroeconomic stability? How do macroeconomic policies and structural reforms affect distribution of income and wealth? Use of simple models and empirical analysis by taking global and historical perspective. Discussions about inequality in U.S. and Europe over last two centuries, as well as challenges raised by recent inequality trends in China, India, and Latin America. Letter grading.

**412. Fundamentals of Big Data. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Introduction to basic concepts, uses, and challenges of big data, with emphasis on pragmatic hands-on applications using real-world data for current and future big data practitioners—consumers of big data insights for economic applications. Letter grading.

**413. Data Analytics and Big Data. (4)** Lecture, three hours. Recommended corequisite: course 412. Limited to Master of Applied Economics students. Designed for end users of big data, those who translate analytic results into business applications, with guest lecturers from wide spectrum of industrial and corpo-

rate big data users. Presentations of their business models for leveraging big data, sharing of data sets, and guiding students to extract actionable business insights for those industries. Letter grading.

**414. Asset Pricing and Portfolio Theory in Practice. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Study covers asset pricing and portfolio theory, critical areas for deeper understanding of financial markets and investments. Building from theory, incorporation of empirical analysis and real-world issues to bridge theory with practice through case studies. Letter grading.

**415. Evidenced-Based Policy Analysis in Labor, Public, and Health Economics. (4)** Lecture, three hours. Limited to Master of Applied Economics students. Introduction to key policy questions in labor, public, and health economics, including health care, education, unemployment, training programs, and welfare. Economic principles at heart of these topics and main approaches to scientifically evaluate policies that affect them, including data, current case evidence, cutting-edge empirical methods, and their relation to microeconomic theory. Letter grading.

**421. Incentives, Information, and Markets. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Introduction to concepts of information economics that lie at heart of modern economics and application of them to understand incentives within firms, as well as competition between them. Study of theoretical models and functioning of real-life markets, such as insurance, labor, and consumer markets. Consideration of whether we can design policies that improve market outcomes. Role of models in economics, and how to tie data and theory together. Letter grading.

**422. International Economics. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Investigation of several theoretical frameworks in international economics followed by applications to empirical questions. Neoclassical trade models, analysis of firms and heterogeneous producers, and economic geography topics. Case studies and empirical papers focus on understanding determinants of trade patterns and on measurement of aggregate and distributional effects of international trade. Discussion of recent research on effects of NAFTA and Brexit, effect of trade on inequality in developed and developing countries, and impact of infrastructure investments on trade and development. Letter grading.

**423. Introduction to Applied Data Science. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Designed to build strong bases in tools and methods of data science and analytics. Introduction of tools for capture, transformation, imputation, visualization, and mapping of data for downstream processing in analytics pipeline. Introduction of analytics subsystems and scalable storage and processing of very large and complex datasets. Information theory, computational analysis, and behavioral economics with specific emphasis on data science in economics. Letter grading.

**424. Income Inequality. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Investigation of rise of earning inequality (with emphasis on U.S.), focusing on learning how to use models and data to quantify impact of range of forces on inequality. Overview of broad empirical trends, with emphasis on understanding how to document these facts ourselves. Consideration of three classes of potential explanations for these patterns: international connections (e.g., trade and immigration), institutional change (e.g., minimum wage and unionization), and technical change (e.g., computerization and spread of robots). Focus on quantifying these forces ourselves. Study of top income inequality: why have extremely rich become much richer than very rich? Focus on CEO compensation. Letter grading.

**425T. Machine Learning for Economists. (4)** (Formerly numbered 425.) Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Covers set of fundamental machine learning algorithms, models, and theories, and intro-

duces advanced engineering practices for implementing data-intensive intelligent systems. Topics involve both supervised methods (e.g., support vector machine, neural network, etc.) and unsupervised methods (e.g., clustering, dimensionality reduction, etc.), and their applications in classification, regression, data analysis, and visualization. Letter grading.

**426. Knowledge Discovery and Data Mining. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Study of theoretical and practical techniques in field of data mining and knowledge discovery. Topics include data processing, association rules, supervised learning, clustering, etc., and their applications in visualization, social network analysis, sentiment mining, and opinion analysis. Focus on making sense of large-scale or web-scale dataset, and providing students with first-hand project experiences. Letter grading.

**427. Applied Machine Learning. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Preparation: basic understanding of technology principles, basic programming skills, sufficient mathematical background in probability, statistics, and matrix analysis. Foundational course with primary application to data analytics. Intended to be accessible to students from backgrounds such as economics or mathematics, and to students from less technical backgrounds. Covers some fundamental topics in machine learning such as Bayesian learning, optimization for learning, metric learning, and various classification, regression, clustering techniques, and other advanced topics. Real-world data-intensive problems. Letter grading.

**428. Health Care Analytics: Methods and Applications. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Introduction to basic concepts of health economics. Development of skills in economic modeling and real-world data analysis. Written policy briefs and business cases evaluating pros and cons of different approaches to improving health care markets. Letter grading.

**429A. Professional Development for Emerging Economists I. (1 to 2)** Seminar, two hours. Limited to Master of Applied Economics students. Designed to help students develop professional skills essential for success in professional business settings. Aids students in translating topics covered in other courses into language and format that is accessible to industry/non-academic settings. Students conduct labor market research, identify and analyze industry trends, and develop targeted plan to achieve professional success. Exploration of skills identification, goal setting, researching employment market, and résumé writing. Letter grading.

**429B. Professional Development for Emerging Economists I. (1 to 2)** Seminar, two hours. Enforced requisite: course 429A. Limited to Master of Applied Economics students. Designed to help students develop professional, communication, and presentation skills essential for success in professional business settings. Aids students in translating topics covered in other courses into language and format that is accessible to industry/non-academic settings. Students practice presenting for variety of professional audiences. Exploration of presentation skills, personal branding, salary negotiation, and interviewing techniques. Letter grading.

**430. Applied Econometrics with Python. (3 to 4)** Lecture, three hours; discussion, one hour. Limited to Master of Quantitative Economics students. Introduction to econometrics and its applications to economics, business, and government using Python. Topics include simple and multiple regression, cross-sectional and panel data, instrumental variables, and binary choice models. Letter grading.

**431. Introduction to Econometrics, Cross-Sectional and Panel Data, and Time Series. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Introduction to econometrics, cross-sectional and panel data, and time series methods used in economics, business, and government. Topics include estimation, simple and multiple

regression, cross-sectional and panel data, instrumental variables, and estimation with stationary/non-stationary processes. Letter grading.

**432. Data Science for Financial Time Series. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Data science provides many useful tools for modeling financial data and testing hypotheses on how markets work, and prices are formed. Study of these important tools. Focus on econometric models and methods to understand financial market dynamics. Topics include returns of financial assets, statistical tests on financial market efficiency, linear time series models, time-varying expected return models, heteroscedastic volatility models, optimal portfolio choice problem, capital asset pricing models, factor models, portfolio allocation, tracking and risk management. Letter grading.

**433. Core Finance. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Introduction to core principles of asset valuations. Emphasis on common economic reasoning used in valuation problems. Derivations and study of valuation formulas for three broad asset classes: fixed income securities, equity, and derivatives. Practical applications to investment problems, and relation to current financial news. Letter grading.

**434. Machine Learning and Big Data for Economists. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Discussion of some machine learning techniques including lasso, regression trees, random forests, and neural networks. Covers most recent developments at intersection of machine learning and econometrics, now commonly referred to as double machine learning. Study of double machine learning in detail, and discussion of how to apply it to enhance analysis of classical econometric problems, such as program evaluation and demand estimation. Letter grading.

**435. Principles of Big Data Management Systems. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Focus on modern data management systems that are used in data analytics. Students are exposed to cutting-edge data management concepts and systems and provided with working knowledge needed to manage large-scale data. Covers modern data management techniques of cloud storage systems, NoSQL databases, and map-reduce computing paradigm. Letter grading.

**436. Introduction to Financial Accounting. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Financial accounting is concerned with preparation and public dissemination of financial reports designed to reflect corporate performance and financial condition. By providing timely, relevant, and reliable information, these reports facilitate decision-making of investors, creditors, and other interested parties. Financial markets depend on information contained in these reports to evaluate executives, estimate future stock returns, assess firms' riskiness, and allocate society's resources to their most productive uses. Letter grading.

**437. Health Economics: Understanding Roles of Regulation, Public Policy, and Demographic Change. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Applied Economics students. Applied microeconomics study of economics of health care sector. Examination of trends in health care costs, functioning of health care sector, structure of insurance markets, and current public health issues. Study of how underlying economic concepts such as adverse selection and moral hazard lead to market failures. Examination of impact of policy and demographic change on future costs. Letter grading.

**441A. Applied Data Management for Economists. (1)** Lecture, three hours. Limited to Master of Applied Economics students. Introduction to modern practices in data gathering, cleaning, and warehousing. Topics include web scraping using application programming interfaces, engineering of R packages, and data manipulation in Structured Query Language (SQL). Emphasis on applications of data pipeline expected of entry-level analyst. Supplements Master of

Applied Economics coursework by offering solutions to expedite R coding techniques and dissemination of analytic findings. Letter grading.

**441B. Applied Data Management for Economists. (1)** Lecture, three hours. Limited to Master of Applied Economics students. Development of student data visualization toolkit using Tableau and Python packages. Focus on techniques to simplistically communicate data, Excel functions/dashboards, Tableau dashboards, Matplotlib library, and interactive visualizations with Plotly. Letter grading.

**441C. Applied Data Management for Economists. (1)** Lecture, three hours. Limited to Master of Applied Economics students. Introduction to business intelligence software relevant for big data and financial services companies. Survey of Amazon Web Services, Microsoft Power BI, and Apache Hadoop, and deployment of automated solutions on these platforms. Development of presentation skills necessary for industry. S/U or letter grading.

**442A. Econometric Python Laboratory. (1)** Laboratory, three hours. Limited to Master of Quantitative Economics students. Simulates tasks of financial researcher by encouraging creative approaches to interest rate monitoring, finding leading indicators, and portfolio construction. Students locate and clean financial datasets, then conduct experiments running significance tests throughout data pipeline. Coursework includes many open questions that offer students opportunities to take novel approaches and investigate forecasting with basket of procedures. Letter grading.

**442B. Master of Applied Economics Finance Laboratory. (1)** Laboratory, three hours. Limited to Master of Applied Economics students. Broadens exposure to tasks seen in financial analyst role. Coding tasks are centered around options order book, depth chart, volume profile, cointegrated assets, and commodities data. Theory covered consists of behavioral finance relating to technical analysis, applications of portfolio optimization and hedging techniques. Letter grading.

**443. SQL and Data Management. (2 to 4)** Lecture, three hours. Limited to Master of Quantitative Economics students. Introduction to most requested data management tools in industry. Students gain hands-on experience with SQL database queries and database management through integrations with database management systems, query editors, and Python and R programming languages. Students practice saving advanced commands as stored procedures on collective database, simulating tasks seen in real world. Use of Excel and Visual Basic for Applications to make data cleaning, visualization, and data management processes more efficient. Letter grading.

**444. Stock Market and Fundamental Equity Research Analysis. (2 to 4)** Lecture, three hours. Limited to Master of Quantitative Economics students. Preparation: basic understanding of finance and financial markets concepts and theories. Exploration of fundamental analysis, method of measuring security's value by assessing economic and financial factors. Through lectures, readings, and interactive discussions, exploration of macroeconomic and microeconomic factors that affect intrinsic value of security. Study is designed to deepen student exposure to world of fundamental equity research through research and development of investment memorandum. Letter grading.

**445. Applied Machine Learning for Economists I. (2 to 4)** Lecture, three hours; discussion, one hour. Limited to Master of Quantitative Economics students. Exploration of how machine learning can be used to find underpriced real estate opportunities—representative of types of problems frequently faced in industry by analysts, computer scientists, economists, and data scientists. Use of machine learning algorithms and tools to find undervalued assets through applied approach. Exploration, cleaning, wrangling, and analysis of property listings dataset. Use of trees and forests to improve ability to find good deals. Incorporation of additional datasets—demographic and census data—and use of principal component analysis and support vector machines to better identify properties.

Use of Python, Pandas, SciKit Learn, Apache Spark, Apache Sedona, and other technologies. Letter grading.

**446. Applications of Cloud Computing and Blockchain. (2 to 4)** Lecture, three hours. Limited to Master of Quantitative Economics students. Introduction to cloud services software relevant for big data analytics and data scientists. Survey of Amazon Web Services. Study of automated solutions to data gathering, storage, and machine learning. Students acquire specific skill sets in application programming interfaces and web scraping with Python through hands-on problem solving. Use of blockchain and smart contracts to make business processes more efficient through technical and theoretical application. Letter grading.

**447. Applied Financial Forecasting and Machine Learning. (2 to 4)** Lecture, three hours. Requisites: courses 430, 431. Limited to Master of Quantitative Economics students. Outlook of economy is of vital importance for many key decisions. Introduction to theory and application of cutting-edge tools used by economists and business leaders to inform their views of economy. These tools are applied to forecast or nowcast key economic indicators such as inflation, unemployment, and gross domestic product. Examination of how forecasts of fundamentals can be used to inform our views on asset prices. Letter grading.

**448. Teamwork and Leadership in Data Science. (2 to 4)** Lecture, three hours. Limited to Master of Quantitative Economics students. Teamwork and leadership skills are essential to excelling in virtually any role in any field. Understanding of how teams work and whether, why, and how one can obtain and thrive in leadership role is critical. Students learn how to lead, manage, negotiate, and effectively participate in teams of data scientists, learning from, interacting with, and presenting to data science leaders and other distinguished experts. Students gain practical insights and skills that can be applied in field of data of science, in related fields, and more broadly, in their lives and careers. Letter grading.

**449. Collaboration and Team Management for Emerging Economists. (1 to 4)** Seminar, three hours. Limited to Master of Quantitative Economics students. Designed to help students develop social-emotional learning skills through interactive activities and lessons to improve their abilities to succeed in variety of team settings. Lessons and activities are designed to be highly interactive, expressive, and creative and aid students in stress reduction, emotion management, and team building. Students are aided in translating topics covered in other courses into language and format that is accessible to industry/non-academic settings. Letter grading.

**450. Master of Quantitative Economics Capstone Project. (1 to 4)** Tutorial, three hours. Limited to Master of Quantitative Economics students. Semi-independent or directed-study in which students complete their capstone project. Capstone project is final element of Master of Quantitative Economics program, and is intended to help students transition from academic studies to professional world. Includes analysis of quantitative and/or qualitative data, research techniques, and writing strategies. Students submit drafts of project components throughout quarter to adviser. Letter grading.

**451. Financial Institutions and Monetary Policy. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Quantitative Economics students. Study of complex financial architecture that has emerged in last several years, and its evolution over time. Covers institutional detail, and theoretical and empirical research on monetary policy. Development of some basic models and production of Python code to produce plots regarding relevant data. Letter grading.

**452. Empirical Industrial Organization. (4)** Lecture, three hours; discussion, one hour. Limited to Master of Quantitative Economics students. Introduction to empirical methods and applications in industrial organization (IO). Development of empirical toolkit to estimate industry models of demand and supply and apply it to analysis of emerging issues in IO from regulator, consumer, and firm perspective. Underlying theme is that most real-world markets are neither perfectly

competitive, nor strict monopolies, but rather involve strategic interactions among firms and consumers. To capture these interactions empirically, development of empirical models of consumer demand and firm competition, and use of these models to analyze interactions of firm strategies (including pricing, product quality choices, and advertising) and market structure across range of industries. Letter grading.

## Special Studies

**495. Teaching College Economics. (2)** Seminar, one hour; laboratory, three hours. Designed for graduate students. Required of all new teaching assistants. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Individual Study. (2 to 8)** Tutorial, to be arranged. Directed individual study or research. S/U grading.

**597. Individual Study: Graduate Examinations. (2 to 8)** Tutorial, to be arranged. Directed individual study in preparation for MA comprehensive examination or PhD qualifying examinations. S/U grading.

**599. Individual Research: PhD Dissertation. (2 to 8)** Tutorial, to be arranged. Preparation: advancement to PhD candidacy. Directed individual research in preparation of PhD dissertation. S/U grading.

## Overview

As one of the top-ranked public graduate programs in education in the nation, the Department of Education is guided by a commitment to integrate theory and practice and to improve educational practice and policy. The department attracts prominent scholars and is internationally recognized for its research centers in evaluation, higher education, child development, and urban education. Whether students choose to pursue a Doctor of Philosophy (PhD), a Doctor of Education (EdD), a master's degree, or a services or instructional credential, they graduate with a broad understanding of educational theory and tested practice.

## Undergraduate Major

### Education and Social Transformation BA

#### Learning Outcomes

The Education and Social Transformation major has the following learning outcomes:

- Understanding of educational landscape
- Understanding of learning and human development
- Understanding of education and educational institutions in social, cultural, and historical contexts
- Understanding of organizational cultures and dynamics
- Ability to interpret social data and research and critically evaluate research studies
- Ability to apply these understandings to imagine, assess, and implement solutions to specific problems in education
- Clear and cogent communication
- Understanding of multiple perspectives, diversity, pluralism, and social justice

#### Entry to the Major

##### Pre-major

Students entering UCLA directly from high school can select the Education and Social Transformation pre-major on the UCLA admission application. Transfer students may also select the pre-major. See Transfer Students for details.

Continuing students who were not admitted directly to the pre-major may apply for admission if they are able to complete the preparation for

the major by the end of their second year to apply by the fall of their third year.

### Admission

Students must submit an application to declare the Education and Social Transformation major. Admission is based on academic performance in preparation for the major courses and overall academic record at UCLA. The [application](#) is available on the major website.

### First-Year Students

After completing the required lower-division courses and 45 lower-division units, students identified as Education and Social Transformation pre-majors may formally apply to declare the major.

### Transfer Students

Transfer applicants to the Education and Social Transformation major with 90 or more units are considered for admission based on academic achievement. Transfer credit is subject to department approval. Consult an undergraduate counselor before enrolling in any courses for the major.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

Transfer students who were not admitted directly to the Education and Social Transformation pre-major may apply for admission if they are able to complete the preparation for the major by the end of their second quarter at UCLA.

### Requirements

#### Preparation for the Major

*Required:* Education 10 or 11, and 35.

#### The Major

*Required:* at least nine upper-division courses distributed as follows:

1. Two courses from each of the following three areas of competency: *Histories and Philosophies of Education*—Education 100 through 119; *Contexts of Teaching, Learning, and Development*—Education 120 through 149; *Inquiry and Design for Learning*—Education 150 through 169
2. At least one additional course in education, which may come from any of the areas of competency or from courses designated as electives (Community Engagement and Social Change 130, Education 170 through 179)
3. Education 180
4. One community engagement course selected from Education M129XP, 130AX, 130BX, 130CX, M131A, M131B, M131C, M142, 144XP, 159, 171, 176, 195, 195CE, or 196XP (this course may also be applied toward an area of competency). Students must complete Education 180 prior to taking a community engagement course
5. Capstone course: Education 181. Students must complete five out of the six courses from the areas of competency and complete the community engagement course requirement before enrolling in the capstone course

## Policies

### Preparation for the Major

Preparation for the major courses must be completed with a C grade or better.

### The Major

Each course must be taken for a letter grade and be a minimum of 4 units. Students must have a grade-point average of 2.0 or better in upper-division education courses.

## Undergraduate Minors

### Education Studies Minor

The [Education Studies minor](#) is intended to address the diverse information needs of the UCLA undergraduate community to allow students to learn more about the multitude of contemporary professional research issues confronting the field of education, understand the complex interactions between the legal, social, political, and economic forces that influence and shape educational policies in America, provide an introduction for students who wish eventually to pursue careers in education either as teachers or researchers.

### Admission

To enter the minor, students must have at least sophomore standing with a cumulative grade-point average of 2.3 or better, have completed one education course with a grade of C or better, and submit the [minor application](#). Applicants are expected to be committed to inquiry of issues central to educational research and practice. Students must follow the program of study in effect at the time of their admission.

Students may apply for admission once they have completed one approved Education course. Students must apply by the spring quarter of their third year.

### The Minor

*Required Courses (28 units minimum):* Any seven education courses (minimum of 4 units each), one of which may be a lower-division course.

### Policies

A maximum of 8 graded units of Education 195 through 199 may be applied toward the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade and be a minimum of 4 units. Students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Information and Media Literacy Minor

The [Information and Media Literacy](#) minor is designed for students who wish to augment their major program with a group of related courses that provide a systematic, focused, and critical introduction to information and media literacies. The core courses together with electives provide students with an understanding of the processes, dynamics, and societal implications of the production and dissemination of information and media and skills for their judicious evaluation, consumption, and productive use.

### Admission

To enter the minor, students must have a cumulative grade-point average of 2.3 or better, have completed one required lower-division or upper-division course with a grade of B or better, and submit the minor application. [Applications](#) are available on the minor website.

### The Minor

*Required Lower-Division Core Courses (10 units):* Two courses selected from Information Studies 10, 20, 30.

*Required Upper-Division Core Courses (9 units):* Information Studies C115, M121 (or Education M121).

*Upper-Division Elective Courses (12-15 units):* Three courses selected from Education 105C, 107A, 109A, 109B, 126, M131C, 133, M135, M137, 144, CM178, Information Studies 118, M135, M137, 180, or 199.

### Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade and be a minimum of 4 units. Students must have a cumulative grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Majors

### Doctor of Education

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

#### Concurrent Degree Program

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

- Doctor of Education/Juris Doctor

## Education MA, PhD

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Articulated Degree Program

Articulated degree programs permit no credit overlap; students must complete degree requirements separately for each degree.

- Education MA/Doctor of Medicine

### Concurrent Degree Program

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

- Education MA, PhD/Juris Doctor

## Educational Administration EdD

The Department of Education offers a Doctor of Education (EdD) degree in Educational Administration jointly with UC Irvine.

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Master of Education

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Articulated Degree Program

Articulated degree programs permit no credit overlap; students must complete degree requirements separately for each degree.

- Master of Education/Latin American Studies MA

### Concurrent Degree Program

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

- Master of Education/Juris Doctor

## Special Education PhD

The Department of Education offers a Doctor of Philosophy (PhD) degree in Special Education jointly with California State University, Los Angeles.

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Education

### Lower-Division Courses

**10. Introduction to Educational Issues and Scholarship. (5)** Lecture, two hours; discussion, two hours. Introduction to broad landscape of public education in U.S. Intended for those interested in educational research, policy, or teaching in both formal and informal educational contexts. Readings highlight work of educational researchers from UCLA Department of Education, especially ways their scholarship intersects with policy and practice. Students work in groups to identify real-life problem affecting public education in Los Angeles. Study of this problem from multiple perspectives. Conceptualization of socially-just solution. Letter grading.

**11. Education, Equality, and Future of American Society: Problems, Prospects, and Policies. (5)** Lecture, four hours; discussion, one hour. Schools are primary institutions charged with responsibility of preparing young people for their roles as citizens so that they can participate in our democracy. Public schools also serve as key sites where two essential, and at times conflicting, functions are carried out: students are sorted based on measures (and perceptions) of their ability to fill occupations and roles that are essential to economy; and students are educated in hopes that next generation will acquire knowledge, creativity, and problem-solving skills to solve problems created by previous generations. Focus on understanding challenges, contradictions, and complexities associated with carrying out these functions. Letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**35. Introduction to Inquiry and Research in Education. (5)** Lecture, two hours; discussion, two hours. Introduction to empirical and analytical educational research. Intended for undergraduates interested in learning how to find, interpret, and evaluate educational research. Overview of different methods of conceptualizing inquiry and gathering evidence, including qualitative approaches (e.g., ethnographic, semi-structured interviews, case study), quantitative approaches (e.g., survey, measurement, experimental, descriptive), mixed methods, and design-based research. Highlights multiple methods of inquiry and research, ethics of conducting research in social sciences, and norms of conducting and reporting research in field of education. Overview of selected strands of equity-oriented research in education. Letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors and departmental honors programs. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**92F. Academic Success in Undergraduate Experience. (2)** Lecture, one hour; discussion, one hour. Designed for first-year or transitioning students to promote understanding of factors involved in making adjustments to college experience, both academic and social. Letter grading.

**98. Critical Issues in Education. (4)** Seminar, 30 minutes; laboratory, 30 minutes. Introduction to critical educational issues and approaches taken by researchers, policymakers, and education advocates as they respond to these issues. Laboratory portion of course engages students in small research groups where they acquire background on particular issue of interest, learn about social sciences research, and conduct mini-research projects. May be repeated for credit. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

#### Histories and Philosophies

**100. Introduction to Philosophy of Education. (5)** Seminar, four hours. Introduction to major Western philosophical thinkers on education including Dewey, Freire, Froebel, Locke, Montessori, Plato, Rousseau, and others. Examination of ultimate goals of education, content of education, and processes of teaching and learning according to these theorists and their influence on later educational thought and practice. Assignments include readings, response papers, film analyses, educator interviews, document analysis (for their underlying educational philosophy), and proposal of educational philosophy. Letter grading.

**101B. History of Schools in U.S. (4)** Lecture, four hours. Intensive consideration of American society, including its racial and cultural diversity as well as how settler colonial projects influence our present conditions. Consideration of historical development of schools in U.S., examining issues of racism, ethnic and gender differences, perspectives of cultural diversity, and impact on classroom instruction. Critical analysis of contexts and structure of public education in California, focusing on state, district, and school governance and finance. Letter grading.

**101C. History of Higher Education. (5)** (Formerly numbered C101.) Lecture, three hours; discussion, one hour. Exploration of major eras in history of higher education. Topics include issues concerning access, diversity, parental choice, cultural literacy, teacher empowerment, and role of popular media. Letter grading.

**M102. Mexican Americans and Schools. (4)** (Same as Chicana/o and Central American Studies M102.) Seminar, two hours; discussion, two hours. Theoretical and empirical overview of Chicana/Chicano educational issues in U.S., with special emphasis on disentangling effects of race, gender, class, and immigrant status on Chicana/Chicano educational attainment and achievement. Examination of how historical, social, political, and economic forces impact Chicana/Chicano educational experience. P/NP or letter grading.

**M103. Asian American Education and Schooling. (4)** (Same as Asian American Studies M114.) Seminar, four hours. Examination of existing body of research from various disciplines on Asian/Pacific American educational experiences. Letter grading.

**104A. Introduction to Exceptional Learners. (4)** (Formerly numbered 134.) Lecture, two hours; discussion, one hour. Survey of characteristics and related educational needs of students (preschool through high school) who vary in mental, physical, psychological, and social characteristics. Focus on disabilities, with exploration in area of gifted/talented education. Emphasis on inclusion, and legal, social, and philosophical issues associated with it. Students learn perspectives from disability studies and engage in class activities designed to challenge students to put inclusion into practice. Students develop understanding of various areas and exceptionalities of special education with emphasis on role of student special needs in context of general education settings. Letter grading.

**105A. Early Childhood Education and Policy. (5)** (Formerly numbered 105.) Seminar, four hours. Overview of early care and education (ECE) landscape in U.S. and variety of policy systems used to provide care for young children. Consideration of possibilities and pitfalls of ECE as much hailed solution for educational inequality. Critical thought about how to use policy to provide young children with what they need to thrive. Letter grading.

**105B. Topics in Child Development and Social Policies. (5)** (Formerly numbered 133.) Seminar, four hours. Research seminar designed to enable students to gain basic understanding of ways in which public policies are established and implemented, learn about policy landscape in several major domains of child and family life in U.S. and other countries, and use scientific research on children's cognitive and social development to evaluate and understand effects of social and economic policies. Letter grading.

**105C. Comparative Educational Policies and Practices. (5)** (Formerly numbered 109C.) Seminar, four hours. Cross-national survey of educational policies and practices in delivery of education services. Comparative perspective on national context defining institutional differences in policy and practices in delivery and access, types (within tier and sector diversity), and funding mechanism for education services in both developing and developed country contexts. Focus on examination of state of education and socio-political, economic, and cultural factors that contribute to similarities and differences in institutional structures, organizational, and management functions, and on agenda for consideration of equality and equity in deployment of resources for realization of inclusive quality education for all. Early childhood education, foundational education, post-secondary education (including university and non-university systems), and lifelong learning (and adult education) as themes informing cross-national comparison of policies and practices in delivery of education services. Letter grading.

**105D. Policy Analysis and Real Politics of Education. (5)** (Formerly numbered 110.) Lecture, two hours; discussion, two hours. Exploration of relationship between scholarly policy analysis and actual workings of policy systems. Selected topics include achievement standards and assessment, school finance, equal access to education, and school reform. Letter grading.

**105E. Organization for Economic Cooperation and Development and Education. (5)** Seminar, three hours. Introduction to education policy analysis at international level with focus on Organization for Economic Cooperation and Development (OECD) program of work and outputs related to field of education. Overview of history of OECD and model of governance related to education, criticisms of OECD's power and influence on education, as well as coverage of range of OECD comparative data, comparative studies, and thematic and policy reviews related to education. Letter grading.

**106A. Education and Law. (5)** (Formerly numbered 129.) Seminar, four hours. Research seminar providing overview of high-profile legal controversies that shape so many policy debates at both K-12 and higher education levels. Major areas of focus include campus safety, religion and schools, educational quality and law, broad-based right to equal educational opportunity, and Internet-related issues and concerns. Letter grading.

**106B. Lesbian, Gay, Bisexual, and Transgender Issues in Education and Law. (4)** (Formerly numbered 147.) Lecture, four hours. Lesbian, gay, bisexual, and transgender-related controversies that arise in schools, colleges, and universities today and how they are being addressed by legal and education communities. In particular, examination of real-life consequences of current laws and exploration of what might be done to make things better for all persons. Letter grading.

**106C. Diversity, Democracy, and Law. (4)** Lecture, four hours. Introductory overview of high-profile legal controversies that shape so many of policy debates regarding access to higher education and equity for underrepresented students, free speech and expression, academic freedom and other First Amendment-related controversies and legal issues. Letter grading.

**107A. Race, Class, and Education Inequality in U.S. (5)** (Formerly numbered 130.) Lecture, two hours; discussion, two hours. Focus extensively on understanding educational experiences of following groups in U.S.: African Americans, Asian Americans and Pacific Islanders, Chicanas/Chicanos/Latinas/Latinos, and low-income white Americans. Examination of how historical development of public education in U.S. has influenced its present form. Critical look at some current issues and policy debates in education, including debate over school reform, bilingual education, and affirmative action. Letter grading.

**107B. Race and Education: Access, Equity, and Achievement. (5)** (Formerly numbered 164.) Seminar, four hours. Social/psychological perspective on education, with particular attention to race, ethnicity, and inequality. Study of structural, social, and personal determinants of educational outcomes. Consideration of relationship of schools to social context and other societal institutions. Examination of how education sets life trajectory in America and effects of race/ethnicity on access to educational opportunity in our society. Letter grading.

**M108. Sociology of Education. (5)** (Same as Sociology M175.) Lecture, four hours; discussion, one hour. Study of how U.S. educational system both promotes socioeconomic opportunities and maintains socioeconomic inequalities: historical and theoretical perspectives on role of education in U.S. society; trends in educational attainment; ways in which family background, class, race, and gender affect educational achievement and attainment; stratification between and within schools; effects of education on socioeconomic attainment, family, health, attitudes, and social participation; educational policies to improve school quality and address socioeconomic inequalities. Letter grading.

**109A. Globalization and Learning. (4)** (Formerly numbered 152A.) Lecture, two hours; discussion, two hours. Introduction to different conceptualizations of globalization and their relationship to educational processes and learning in contemporary societies. Discussion of several concepts and theoretical lenses as basis for approaching and understanding how dialectics of global and local are affecting educational systems and learning over lifespans. Letter grading.

**109B. Global Citizenship Education. (4)** (Formerly numbered 152B.) Lecture, four hours. Exploration of issues of global citizenship in education and society as whole by analyzing critical challenges and envisioning possible solutions to multiple layers of theoretical, empirical, and practical implementation of global citizenship education. Examination of how global citizenship education and education for sustainable development are beginning to impact life, actions, policies, and practices of educators, students, non-government organizations, governments, multinational organizations, and other key players in local and global contexts. Examination of how global citizenship education impacts our worldview, teaching, and learning as we strive to envision and work toward more just and sustainable society. Letter grading.

**C111. Politics of Education. (5)** (Formerly numbered C125.) Lecture, two hours; discussion, two hours. Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as foundation for public policy analysis; interest groups in

education policy formation and implementation; and focus on Freirean pedagogy. Concurrently scheduled with course C207. P/NP or letter grading.

**112. Black Student Activism: History of Resistance on Campus. (4)** Lecture, three hours; discussion, one hour. Activism is long-standing component of student life on U.S. college and university campuses. Focus on Black student activism. As higher education became more accessible to Black Americans, new wave of activism entered college campuses, with Black Lives Matter movement being one of most recent examples. Examination of philosophical, intellectual, social, economic, and political elements that have shaped and propelled Black student activism over past two centuries. Exploration of earliest activist activities among Black students, ranging from abolitionist movement in early 1800s to fight for Black and African studies programs during 1960s and 1970s. Interrogation of what past teaches about Black student activism today. Study includes discussions, mock debates, case studies, and primary source analyses. Letter grading.

**113. Democracy, Justice, and Education. (5)** Lecture, three hours. Democracy, justice, and education are core ideals that define public discourse and scholarship about schooling. Exploration of these ideals from philosophical and practical perspective in context of century-old community schools movement. Global pandemic has renewed public interest in community schools framed as equity-focused anti-poverty reform to provide integrated social supports such as health, nutrition, and after-school programs. Movement also has strong democratic roots tied to local control, collective problem solving, and community-based learning—challenging ideas about who has power, how young people learn, and how teachers teach. Inquiry grounded in experience of two UCLA community schools as well as five other community school sites chosen by students. Examination of whether and how these schools are sites of social transformation by investigating contexts, theories, and practices that define their work. Letter grading.

**117. Road Trip: Exploring College Campus Cultures across U.S. (5)** Seminar, four hours. Study of what other college campuses beside UCLA have to offer. Intended for students interested in understanding prominent aspects of non-mainstream U.S. colleges and universities. Exploration of institutional missions of special mission colleges and universities, how these institutions provide services to students, and unique strengths and challenges on these campuses through discussions, mock debates, case studies, and assignments that delve deeper into experiences of attending these special mission colleges and universities. Letter grading.

**118. Sociology of Community Colleges. (5)** Seminar, four hours. Application of existing research, and sociological and economic theories to analysis of community colleges. Scholars have employed diverse set of concepts, theoretical frameworks and methods to understand these educational institutions. Examination of this sector of higher education in U.S. through range of qualitative, quantitative, historical, and case studies. Covers economic and sociological foundations of research on community colleges and their missions (transfer, remediation/developmental, adult basic education, English as second language, workforce development, etc.), institutional dynamics and organizational culture, government and business impact, for-profit colleges, social media use among students and administrators, student support and community-building, and effective reform efforts. Letter grading.

**119. Variable Topics in Histories and Philosophies of Education. (4)** Seminar, four hours. Variable topics course organized around courses that introduce students to landscape of education within historical, disciplinary, and policy contexts. Consult Schedule of Classes for topics and instructors. May not be repeated for credit. Letter grading.

## Contexts of Teaching and Learning

**120. Early Childhood Development. (5)** Seminar, four hours. Development of positive social behaviors and their enhancement. Broad overview of children's psy-

chological development, with emphasis on personal, social, and emotional attributes of preschool and elementary school child. Aspects of prosocial behavior and aggression. Enhancement of prosocial behavior and modification of such negative behaviors as aggression. Review and evaluation of contemporary educational programs for promoting positive social behaviors in elementary schools. Methodological aspects of child development. Overview of early childhood education and issues related to role of family, school, and television in child development. Letter grading.

**M121. Introduction to Media Literacies. (5)** (Same as Information Studies M121.) Seminar, four hours. Exploration of relationships between media, technology, and popular culture. Students guided to analyze media representations, question process of normalizing dominant ideologies, and create counter-hegemonic media messages. Through application of critical media literacy framework, students expand notions of literacy to be more inclusive of all types of texts; and deepen their abilities to question power of word, image, and sound-bite to represent social and environmental injustice. Letter grading.

**123. Teaching Profession. (5)** Seminar, four hours. Exploration of traditional and alternative teaching practices and public responses to teachers teaching and students learning. Examination of education in socioeconomic context and discussion of some philosophical questions that challenge teaching profession. Letter grading.

**C124. Theory and Practice of Intergroup Dialogue: Building Facilitation Skills. (4)** (Formerly numbered C160.) Seminar, four hours. Topics include social psychology of intergroup relations, intercultural and dialogic communication theories, methods for reconciling and bridging differences in schools and communities, research and evaluation of intergroup dialogues and other educational methods for improving intergroup relations, and core competencies for planning, delivering, and evaluating intergroup dialogues in multicultural settings. While providing foundational grounding in theory and pedagogy of intergroup dialogue, particular attention to relationships between intergroup dynamics, structural inequalities, systems of privilege and oppression, and mental health outcomes and disparities among populations. Concurrently scheduled with course C244. Letter grading.

**CM125XP. Narratives of Justice: Disrupting School-to-Prison Pipeline—Arts, Activism, and Agency. (4)** (Formerly numbered CM163.) (Same as African American Studies CM113XP.) Lecture, four hours; discussion, one hour. Exploration of policies and practices, art and activism, and other forms of agency engaging school-to-prison pipeline. Concurrently scheduled with course CM229B. P/NP or letter grading.

**126. Language, Literacy, and Academic Development: Educational Considerations for School-Age Multilingual and English Language Learner Students. (5)** (Formerly numbered 166.) Seminar, five hours. Use of child-centered approach to examine instructional strategies and assessment practices with preK-12 multilingual and English learner (EL) students who are learning academic content at same time they are acquiring English (and possibly additional languages) in school. Critical comparison of effectiveness of English-only programming with dual-language approaches (e.g., two-way immersion, transitional bilingual education) and roles of summative and formative assessments in educational decision making with multilingual and EL students. Letter grading.

**127. Educational Psychology: Contexts for Teaching and Learning. (5)** Lecture, two hours; discussion, two hours. Not open for credit to students with credit for course 128. Broad overview of educational psychology, with examination of relationship of teaching and learning; various perspectives as to how children learn; issues of teaching and learning that arise based on child's social class, ethnic background, gender, age, and level of ability. Letter grading.

**128. Educational Psychology: Contexts for Learning and Development. (4)** Lecture, four hours. Not open for credit to students with credit for course 127. Overview of theories, methods, and research in educational psychology. Education psychology involves study of

how students learn and contexts that support this learning. Learning is complex process. Study of research and theory related to different aspects of learning including cognition, motivation, and self-regulation. Discussion of ways in which educators can support these processes in students. Letter grading.

**M129. Arts Education Undergraduate Practicum: Preparation, Observation, and Practice. (4)** (Formerly numbered M190.) (Same as Arts Education M192.) Seminar, three hours. Enforced requisite: course M142. Limited to juniors/seniors. Training and supervised practicum for advanced undergraduate students participating in Visual and Performing Arts Education minor. Students implement and evaluate original arts education programs under guidance of faculty members in small course settings. P/NP or letter grading.

**M129XP. Arts Education Undergraduate Practicum and Capstone Project. (4)** (Formerly numbered M190SL.) (Same as Arts Education M192XP.) Seminar, three hours; practicum, three hours; outside study, six hours. Enforced requisites: courses M104, M190. Limited to juniors/seniors. Continuation of arts education training and supervised practicum for advanced undergraduate students participating in Visual and Performing Arts Education minor. Students continue to implement and evaluate original arts education programs under guidance of faculty members and designated guiding teachers in K-12 public school settings. May be repeated for credit with consent of instructor. P/NP or letter grading.

**130AX. Instructional Apprenticeship in Teaching and Learning at UCLA Lab School. (4)** (Formerly numbered 196C.) Tutorial, 10 hours. Requisite: course 180. Limited to juniors/seniors. Not open for credit to students with credit for course 130BX or 130CX. Training and supervised apprenticeship for advanced undergraduate students at UCLA Lab School (Corinne A. Seeds campus), K-6 elementary school on UCLA campus. Students gain understanding of innovative educational work that goes into teaching and learning at UCLA Lab School through seminars, readings, observations, and discussions. Individual meetings with faculty mentor throughout term. Letter grading.

**130BX. Instructional Apprenticeship in Teaching and Learning at UCLA Partner Schools. (4)** (Formerly numbered 196D.) Tutorial, 10 hours. Requisite: course 180. Limited to juniors/seniors. Not open for credit to students with credit for course 130AX or 130CX. Introduction to K-12 teaching profession through training and supervised off-campus experiences at UCLA partner schools. Students gain grounded understanding of social issues in education through readings, observations, direct support in classrooms, and tutoring activities. Individual meetings with faculty mentor throughout term. Letter grading.

**130CX. Instructional Apprenticeship in Teaching and Learning at UCLA Community Schools. (4)** Tutorial, 10 hours. Requisite: course 180. Not open for credit to students with credit for course 130AX or 130BX. Examination of how UCLA partners with Los Angeles Unified School District (LAUSD) to educate, engage, empower, and serve students and families through community schooling model. Through readings, discussions, guest speakers, and course assignments, students are offered varied opportunities to examine case studies on how two institutions, UCLA and UCLA Community Schools, partner together to ensure greater engagement and democratic development to transform neighborhood school, as well as link school day and after-school curricula to solve locally identified, real-world, and community problems to uplift entire school community. Students gain grounded understanding of social issues in education through readings, observations, direct support in classrooms, and tutoring activities. Letter grading.

**M131A. Language, Literacy, and Human Development Research Group Seminars. (5)** (Formerly numbered M194A.) (Same as African American Studies M194A.) Seminar, three hours; laboratory, two hours (when scheduled). Requisite: course 180. Research seminar designed to provide opportunity to combine theory and practice in study of human development in

educational contexts. Focus on relationship between theories of development, culture, and language. Letter grading.

**M131B. Culture, Gender, and Human Development Research Group Seminars. (5)** (Formerly numbered M194B.) (Same as African American Studies M194B.) Seminar, three hours; laboratory, two hours (when scheduled). Requisite: course 180. Research seminar designed to provide opportunity to combine theory and practice in study of human development in educational contexts. Focus on relationship between theories of development, culture, and gender. Letter grading.

**M131C. Culture, Communications, and Human Development Research Group Seminars (5)** (Formerly numbered M194C.) (Same as African American Studies M194C.) Seminar, three hours; laboratory, two hours (when scheduled). Requisite: course 180. Research seminar designed to provide opportunity to combine theory and practice in study of human development in educational contexts. Focus on relationship between theories of development, culture, and technologies. Letter grading.

**132. Autism: Mind, Brain, and Education. (5)** Lecture, two hours; discussion, two hours. Study of autism spectrum disorders (ASD) and related disabilities. Discussion of characteristics of disorder, effective interventions, and exploration of impact of children with ASD on families. Limited number of independent observations of individuals in community required. Letter grading.

**133. Literacy in Society. (5)** (Formerly numbered 122.) Lecture, four hours. Literacy plays significant role in cognition and language, political governance and law, and economic, social, and personal well-being. Exploration of these aspects of literacy and their implications for teaching and learning. Examination of literacy in workplace, healthcare, and community. Consideration of new literacies, interrelationship between literacy and technology, and impact of illiteracy on income and opportunity. Letter grading.

**134. Early Childhood Mathematics Education. (5)** Seminar, two hours; fieldwork, two hours. Focus on how research in early childhood mathematics can be used to engage young people in learning mathematics. Study addresses research on how young children learn mathematics, teaching preschool mathematics, and policy context that shapes student opportunities in early childhood education. Particular attention paid to equity issues. Includes fieldwork at local preschool site working with students in mathematics. Letter grading.

**M135. Environmental Justice through Lens of Media and Education. (5)** (Same as Information Studies M135.) Seminar, four hours. Exploration of human relationships with natural world, historically and today. Students take critical look at ways information has been shaped, audiences positioned, and movements manipulated to promote commercial interests over public good. Exploration of progressive movements that have in past challenged—and currently challenge—neoliberal agendas, extractive policies, and unsustainable practices. Letter grading.

**M136. Working Families and Educational Inequalities in Urban Schools. (4)** (Same as Labor Studies M136.) Seminar, three hours; fieldwork, five hours. Exploration of complex relationship between working-class and poor communities and inequalities in American urban schools. Drawing on multiple disciplinary frameworks that address issues of race, ethnicity, and immigration, schools viewed as sites where inequalities are produced and resisted. Review of history of exclusionary treatment and divergent conceptual frames that educational researchers have used to understand notion of inequality, access to quality public education, and how race, ethnicity, and class affect school experiences for working-class and poor communities. Look inside schools through community service learning opportunity to examine systems, structures, and everyday practices that sustain and reproduce inequality and policies that intend to remedy educational inequalities in urban schools. Opportunity to investigate issues of working-class families and inequalities as they relate to students' own communities and experiences. P/NP or letter grading.

**M137. Critical Digital Media Literacies. (4)** (Formerly numbered 137.) (Same as Information Studies M137.) Lecture, four hours. Students question relationships with digital media and information society and explore how media and information communication technologies are improving society, strengthening democracy, and opening up opportunities for challenging hegemony and promoting social transformation. Problematicization of social media and questioning of ways it is being used to surveil, capture data, spread hate, mislead, distract, and destabilize democracies. Students analyze media representations, question process of normalizing dominant ideologies, and create counter-hegemonic media messages. Combines theoretical foundations of cultural studies and critical pedagogy with practical applications of new digital media and technology, as well as traditional print-based means of communication. Exploration of media representations of race, class, gender, sexual orientation, and other identity markers. Students analyze and create media projects related to education. Letter grading.

**138. Cognitive Development and Schooling. (5)** Lecture, four hours; discussion, one hour. Overview of theories, methods, and research on children's cognitive development and implications of this work for educational practice. Covers range of research from different perspectives, drawing from domains such as developmental psychology, cognitive psychology, developmental cognitive neuroscience, and education. Students learn about basic cognitive processes. Exploration of ways in which contexts—including those at home, early-care settings, and school—impact children's development. Letter grading.

**139. Culture and Cognition. (4)** Lecture, four hours. Introduction to theoretical foundations of research on culture and cognition. Drawing from insights of cultural psychology and anthropology, study of various definitions of community spaces, etc.; and consideration of social, political, and educational implications of ways these terms are conceptualized. Study address questions of relationship between culture and development of mind; how this relationship might be studied; what insight research on culture and cognition offers for the organization of learning environments; and for understandings of diversity and equity. Letter grading.

**140. Educational Perspectives of Relational Practices in Modern Medicine. (5)** Seminar, four hours. Systematic discussion of personhood and body concepts, in context of asymmetric person-to-person relationships in high-tech modern medical training and practice. Exploration of diverse implications for building theories of relational practice. Students learn to use phenomenological approach, to make sense of lived experience of making sense of world we inhabit; and stance on who we are and activities at hand in everyday practices. Phenomenological approach maintains focus on how things show up; what affordances emerge in activities and practices; and how we comport toward them making sense of them, others, and ourselves. Letter grading.

**141. Adolescent Development. (5)** Lecture, four hours. Introduction to adolescence—period of tremendous change and growth across all domains of development, including physical, social, cognitive, and emotional during second decade of life. Topics may include pubertal development, adolescent brain development, family, friend, peer, and intimate relationships, social identity and intergroup relations, school, work, and civic engagement. Draws on developmental science research on adolescence and applies that knowledge to examination of practices and policies. Contemporary and global conceptualizations of adolescence and more complex understandings of developing self in relation to significant others (i.e., family, friends, peers) and bounded in socio-historical time and place (i.e., school, work, media). Letter grading.

**M142. Introduction to Arts Education for Multiple Publics: Theory and Practice. (4)** (Formerly numbered M104.) (Same as Arts Education M102.) Seminar, three hours; outside study, nine hours. Introductory course with focus on arts education for multiple publics in inner-city settings. Study of core issues in arts education, creativity, and social justice as students develop, implement, and assess original syllabi,

lesson plans, and community learning projects for multiple publics in inner-city schools and arts organizations. Collaboration with partner schools in planning, teaching, and evaluation of arts education programs in dance, music, theater, and visual arts. P/NP or letter grading.

**143. Understanding Pathways to College. (4)** Lecture, two hours; discussion, two hours. Examination of inequality across K-12 and higher education to understand how college admissions are stratified across racial and class lines. Roles of school personnel, higher education admissions, families, and students in promoting equal educational opportunity. Course is good preparation for students interested in working in UCLA programs such as Early Academic Outreach Programs that serve students in Los Angeles area schools. Letter grading.

**144. Pedagogies of Global Citizenship Education. (4)** (Formerly numbered 152C.) Lecture, four hours. Not open for credit to students with credit for course 144XP. Questions regarding nature and possibility of education that can foster global citizenship necessary to understand and resolve world's most pressing issues. Focus on curriculum and instruction of global citizenship education. Using local and global research, exploration and analysis of various perspectives, curricula, and pedagogies pertaining to teaching and implementation of global citizenship education at different levels of education. Letter grading.

**144XP. Pedagogies of Global Citizenship Education. (5)** Lecture, three hours; field work, one hour. Requisite: course 180. Not open for credit to students with credit for course 144. Questions regarding nature and possibility of education that can foster global citizenship necessary to understand and resolve world's most pressing issues. Focus on curriculum and instruction of global citizenship education. Using local and global research, exploration and analysis of various perspectives, curricula, and pedagogies pertaining to teaching and implementation of global citizenship education at different levels of education. Letter grading.

**145. Children, Immigration, and Education. (4)** Lecture, four hours. Exploration of diverse experiences of young people across globe whose lives have been shaped by movement across geopolitical, social, cultural, and linguistic borders from sociological, anthropological, psychological, public policy, and educational perspectives. Bringing together these multiple epistemological lenses, study addresses issues of identity, citizenship, belonging, growing up in multi- and bilingual communities, learning in and out schools, educational processes and policies, school-family connections, and more. Letter grading.

**146. Critical Perspectives on Educational Assessment Approaches: Pre-Kindergarten to College. (4)** Seminar, three hours. Introduction of fundamental concepts and approaches in large-scale and classroom assessment. Brings critical perspectives to assessment design, uses, and interpretations, looking weekly at specific use cases in diverse learning contexts. Letter grading.

**147. Social Context of Learners in K-12: Diversity, Residential Mobility, Immigration, and Food Security Conditions in California. (5)** (Formerly numbered 139.) Seminar, four hours. Examination of K-12 student experience in California schools. Comparison of geographic disparity in shared experiences, and prevalence of special and difficulty circumstances that have implications for learning and learning outcomes. Key areas identified include race and ethnic diversity in schools; geographic and residential mobility (including homelessness and temporary/transitional housing placement conditions); migration-schooling nexus (migrant education); and food insecurity conditions in student population. Data-driven, school-level analysis relying on statistics from California Department of Education and Los Angeles Unified School District. Data from other states offers points of comparison with respect to student demographic and geographic experience across categories explored. Examination of potential impact of differential burden of inequality and disparity in resource opportunity on student learning and learning outcomes. Letter grading.

**149. Variable Topics in Contexts of Teaching and Learning. (4)** Seminar, four hours. Variable topics course organized around topics that teach students about theory and research on how people learn as well as sociocultural contexts that shape teaching and learning. Consult Schedule of Classes for topics and instructors. May not be repeated for credit. Letter grading.

## Inquiry and Design

**150. Quantitative Research in Education: Claims and Evidence. (5)** Lecture, two hours; discussion, two hours. Requisite: course 35. Introduction to four conceptual tools used to evaluate soundness of conclusions drawn from research evidence: notions of internal validity, statistical validity, construct validity, and external validity. Statistical validity requires basic fluency with quantitative data analysis, which students learn using statistical software R. Analysis of how values and beliefs shape quantitative education research and how research findings get translated when they are reported for popular media audiences. Quantitative background is not required. Letter grading.

**151. Quantitative Research in Education: Measurement and Assessment. (5)** Lecture, four hours; discussion, one hour. Enforced prerequisite: course 35, with grade of C or better. Intended for students who are interested in better understanding what makes good tests and how to critically interpret and evaluate tests and test scores in educational contexts. Introduction to measurement, testing, and assessment in educational settings. Overview of foundational concepts, methods, issues, and practices of educational measurement and assessment. Overview of basic statistical concepts and methods. Highlighting and evaluation of three core concepts of assessment: reliability, validity, and fairness. Students develop ability to critically interpret assessment data and apply both classical and modern theories of measurement and validly measure constructs of interest such as knowledge, attitude, and motivation. Students demonstrate understanding of equity and social justice issues related to fair use of educational measurement and assessment. Letter grading.

**152. Quantitative Research in Education: Regression Analysis. (5)** Lecture, two hours; discussion, two hours. Requisite: course 150 or 151. Preparation: basic familiarity with programming language R. Introduction to regression as tool to answer questions about education. Regression is commonly used to answer questions about association claims—relationship between variables—and causal claims—causal effect of one variable on another. Using regression appropriately requires thoughtfulness about what kinds of questions regression can answer, about assumptions regression relies on, about limitations of our data, and about how particular variables (e.g., race and gender) are incorporated into analyses in order to avoid regression results that may be biased and may reify rather than interrogate problematic ideas. Emphasis on learning fundamental concepts of regression analysis and how these concepts can be thoughtfully applied to address different kinds of questions about education. Students are trained how to read and critically assess research and applications using R programming language. Letter grading.

**156. Introduction to Qualitative Research in Education for Social Transformation. (5)** Lecture, two hours; discussion, two hours. Requisite: course 35. Qualitative researchers who focus on education and social transformation often examine social roots of educational inequalities and injustices, and organization of teaching and learning across diverse settings in order to understand educational possibilities. Introduction to epistemological, theoretical, ethical, and political foundations of conducting qualitative research in education. Students become familiar with breadth and scope of qualitative research. Theoretically-grounded, practical orientation that teaches students how qualitative researchers work individually and in teams to design studies that may ultimately support movement toward educational and social change. Assignments guide students through iterative research design process, which includes conducting needs assessment

using qualitative data collection tools, making sense of pilot data, and negotiating research plans with stakeholders. Letter grading.

**157. Qualitative Research in Education: Ethnography. (5)** Seminar, four hours. Requisite: course 35. Examination of debates and dilemmas of conducting ethnography research in educational settings. Survey of research methodologies and methods (observations and interviews) in ethnography of education research. With consideration to issues of race/ethnicity, gender, sexual orientation, class, language, and immigration status, study guided by central question of how ethnography can inform efforts to create more socially-just educational systems and spaces of learning. Designed to help students develop skills important for senior capstone project. Letter grading.

**159. Educational Research and Equity in Informal Learning: Collaboration between Hammer Museum and UCLA Education. (5)** Seminar, three hours. Requisites: courses 35, 180. Through collaboration with Hammer Museum, introduction to importance of informal learning contexts, specifically in art museums, and value of conducting educational research within such contexts, while keeping equity at center of inquiry and exploration. Study of art museum pedagogies and philosophies. Reflection on art museum responsibility to support positive learning experiences for diverse audiences and local communities. Exploration of Research-Practice Partnerships education research approach that can support art museums in understanding problems of practice and questions of interest to their communities through mutually beneficial collaboration between researchers and practitioners. This approach challenges more traditional research-practitioner power dynamics by creating opportunities for both to jointly negotiate research questions, methods, and data analysis. Letter grading.

**160. Transformative Research in Community-Based Settings. (5)** (Formerly numbered 188A.) Lecture, four hours; fieldwork, one hour. Requisites: courses 35, 180. Introduction to broad tradition of transformative research in education—public scholarship that aims to disrupt long-standing educational inequities in partnership with local communities. This tradition includes Youth Participatory Action Research (YPAR), Community-Based Action Research (CBAR), and other collaborative approaches that value diverse forms of expertise and knowledge. Through variety of community-engaged learning opportunities, students are supported to develop ability to analyze education in social and political context, develop skills for effecting change, demonstrate understanding of multiple perspectives, diversity, pluralism, and social justice. Letter grading.

**165. Educational Program Evaluation. (5)** (Formerly numbered 139.) Seminar, four hours. Requisite: course 35. Stages and methods for conducting evaluations of educational and social programs, with emphasis on evaluation approaches that are theoretically grounded, methodologically rigorous, practical, and useful. Letter grading.

**166. Program Evaluation Theories and Practice. (5)** Seminar, four hours. Requisites: courses 10, 35. Introduction to various theories concerning evaluation of educational and social programs. Examination of how these theories differ with respect to goals, priorities, and associated procedures. Development of evaluation plan for specific program. In developing this plan, students consider core features of program, engage program stakeholders to understand needs and priorities, and connect their proposed approach to specific evaluation theories. Through parallel development of multiple plans to evaluate single program, students observe extent and manner in which differences in theory are manifested in evaluation design. Letter grading.

**169. Variable Topics in Inquiry and Design. (4)** Seminar, four hours. Requisite: course 35. Variable topics course organized around courses that teach students how to read and communicate about research. Consult Schedule of Classes for topics and instructors. May not be repeated for credit. Letter grading.

## Electives

**170. Exploration of Topics in Education. (2)** (Formerly numbered 184.) Lecture, one hour. Variable topics course, with emphasis on theories of teaching and learning, connecting them to instructional activities for students in various learning settings, including libraries and schools. P/NP grading.

**171. Community Service Learning for Academic Achievement. (4)** (Formerly numbered 185.) Lecture, two hours; discussion, two hours. Emphasis on cognitive learning and motivation theories and their relevance to strategies for developing curricular instructional techniques and training that contribute to tutoring, counseling, and other instructional assistance in various school settings. P/NP or letter grading.

**172. Activism through Community Service. (5)** Seminar, four hours. Exploration of impact and importance of activism in addressing health, educational, and social disparities that have led to discrimination, segregation, and marginalization of people of color. Students acquire methodology to combat these issues through participating in activism and community service at UCLA to further address issues that minoritized populations experience. Students apply their experiential knowledge from their respective projects in Community Programs Office Student Association, Student Initiated Outreach Center, Community Service Commission, or other UCLA community service organization to provide critiques and solutions to issues they are combating in their respective projects. Letter grading.

**173. Dialog across Difference. (4)** Seminar, three hours. Offers safe and inviting space to engage in open, constructive discourse on issues related to social identities, such as race/ethnicity, socio-economic class, and sexual orientation identities. Students learn from one another's perspectives, participate in experiential learning exercises, read and discuss relevant materials, and explore their own and other groups' experiences in various social and institutional contexts. Offers opportunities to appreciate and learn to bridge differences, discover and maximize commonalities, interact with others around controversial issues pertaining to various forms of privilege and oppression, and work to help create social change. Letter grading.

**174A. Experiential Learning in Secondary Classrooms: Health. (4)** (Formerly numbered 170C.) Lecture, one hour; fieldwork, four hours. Training and supervised practicum for undergraduate mathematics students interested in teaching in secondary classrooms, including working with 6th- through 12th-grade students in school sites. Focus on health requirements from California Commission on Teacher Credentialing. Experts in field lead discussion of issues related to physical and mental health of students and educators, issues of bullying, and learning theories and practices that engage diverse groups of students in classrooms. Active engagement in reflection on issues in schools in which students work. Letter grading.

**174B. Experiential Learning in Secondary Classrooms: Law. (2)** (Formerly numbered 170D.) Lecture, one hour; fieldwork, four hours. Training and supervised practicum for undergraduate mathematics or science students interested in teaching in secondary classrooms, including working with 7th- through 12th-grade students in school sites. Focus on law requirements from California Commission on Teacher Credentialing. Experts in field lead discussion of issues related to legal and ethical concerns of schooling, culture of schools, issues of bullying, building of classroom community, and learning theories and practices that engage diverse groups of students in classrooms. Active engagement in reflection on issues in schools in which students work. Letter grading.

**174C. Experiential Learning in Secondary Classrooms: Technology. (2)** (Formerly numbered 170E.) Lecture, one hour; fieldwork, four hours. Training and supervised practicum for undergraduate mathematics students interested in teaching in secondary classrooms, including working with 7th- through 12th-grade students in school sites. Focus on technology requirements from California Commission on Teacher Credentialing. Experts in field lead discussion of issues related to use of technology in classrooms, and

learning theories and practices that engage students with diverse needs and interests. Active engagement in reflection on issues in schools in which students work. Letter grading.

**175A. Educational Innovations in Sport and Entertainment in Context of Diversity. (4)** Seminar, four hours. Introduction to central issues at nexus of education, sports, entertainment, and diversity. Examination and investigation of recent innovations in education, sports leadership, and entertainment that promise greater representation, equity, and inclusion of marginalized groups. Examination of media role in forming perceptions and attitudes, and its educational force in changing perceptions of athletes, and of college and professional sports. Examination of innovations in education, sports leadership, and entertainment that promote greater diversity. Examination of these and other related issues through prism of relevant theories, recent research literature, and documentaries. Letter grading.

**175B. Educational Leadership and Diversity in Sports: Equity, Access, and Future Prospects. (4)** Seminar, three hours. Examination of how leadership of sport, especially within intercollegiate athletics, impacts higher education, businesses, and other related organizations at macro and micro levels. Examination of equity across racial, gender, and social-class lines in both collegiate and professional sports. Addresses access in terms of which institutional mechanisms are in place to cultivate culture that empowers student-athletes, women, and people of color to positively matriculate in terms of social mobility. Approach to evaluating success of various organizations with diverse leaders and participants in sport focuses on both qualitative and quantitative measures. Letter grading.

**175C. Education, Hip-Hop Culture, and Sport. (4)** Lecture, three hours. Exploration of intersection of hip-hop culture, sport, and education; and how hip-hop culture serves as instrument of critical and culturally relevant pedagogy in K-12 education, higher education, and informal learning contexts. Exploration of development and rise of hip-hop from underground movement to dominant, cultural phenomenon; and its appropriation by prominent sports personalities. Exploration of hip-hop's connection to television, social media, fashion, art, and film. Exploration of how this cultural art form intersects with development of social identities and cultural learnings in traditional and non-traditional educational settings (e.g., public schools, private schools, charter schools, and home schooling); and its enormous educational impact in general. Exploration of potential of hip-hop music and its cultural art form for furthering culturally relevant pedagogies and learning experiences. Letter grading.

**175D. Education of Contemporary Athletes: Leadership Themes and Principles. (4)** Seminar, three hours. Introduction to educational and business themes surrounding leadership in athletics. Emphasis on requisite experiences, knowledge, skills set, and abilities/characteristics for pursuing career in sport team operations; and how this impacts educational experiences of athletes. Study dissects current (mis)perceptions related to careers as general managers or sports agents, and supplies students with actionable plans for career development and advancement. Students learn about potential educational and career impact of impending and passed legislation related to name, image, and likeness rights of contemporary college student-athletes, including detailed discussion and analysis of how California bill fits within overall higher education model at universities such as UCLA. Letter grading.

**176. Transformative Research in Community-Based Settings: Practicum. (5)** (Formerly numbered 188B.) Lecture, four hours; fieldwork, one hour. Requisites: courses 35, 160. Introduction to broad tradition of transformative research in education—public scholarship that aims to disrupt long-standing educational inequities in partnership with local communities. This tradition includes Youth Participatory Action Research (YPAR), Community-Based Action Research (CBAR), and other collaborative approaches that value diverse forms of expertise and knowledge. Through variety of community-engaged learning opportunities, students are supported to develop ability to analyze education

in social and political context, develop skills for effecting change, demonstrate understanding of multiple perspectives, diversity, pluralism, and social justice. Letter grading.

**M177. Creating Safe and Welcoming Schools. (4)** (Same as Public Affairs M125.) Lecture, two hours; discussion, one hour. Examination of historical context and causes of school violence, theories, and diverse perceptions of school climate and safety. Special emphasis on impact of school climate on oppressed groups and how social contexts such as poverty and how neighborhood resources influence school safety. Letter grading.

**CM178. Critical Media Literacy and Politics of Gender: Theory and Production. (4)** (Same as Gender Studies CM178.) Seminar, three hours. Corequisite: course CM178L. Use of range of pedagogical approaches to theory and practice of critical media literacy that necessarily involves understanding of new technologies and media forms. Study of both theory and production techniques to inform student analysis of media and critical media literacy projects. Concurrently scheduled with course CM278. Letter grading.

**CM178L. Critical Media Literacy and Politics of Gender: Laboratory. (2)** (Same as Gender Studies CM178L.) Laboratory, two hours. Corequisite: course CM178. Hands-on production experience as integral component of course CM178. Concurrently scheduled with course CM278L. Letter grading.

## Required Courses

**180. Orientation to Community Engagement. (4)** Seminar, four hours. First course in three-part series to satisfy community engagement requirement for Education and Social Transformation major capstone project. Introduction to conceptions and contexts of community engagement, focusing on possibilities and complexities of critical and asset-based approaches to community engagement. In preparation for students' own community engagement experiences in community organizations, early childhood centers, or schools in Los Angeles, emphasis on reflecting on positionality, identifying forms of power and privilege, and understanding relationships between systemic issues and community engagement. Letter grading.

**180W. Orientation to Community Engagement. (5)** Seminar, four hours. Requisite: English Composition 3. Limited to Education and Social Transformation majors. Not open for credit to students with credit for course 180. First course in three-part series to satisfy community engagement requirement for Education and Social Transformation major. Introduction to conceptions and contexts of community engagement, focusing on possibilities and complexities of critical and asset-based approaches to community engagement. In preparation for students' own community engagement experiences, emphasis on reflecting on positionality, identifying forms of power and privilege, and understanding relationships between systemic issues and community engagement. Satisfies Writing II requirement. Letter grading.

**181. Capstone in Education and Social Transformation. (5)** Seminar, four hours. Third course in required capstone sequence for Education and Social Transformation major. Students reflect on their coursework, community engagement experiences, and other curricular and co-curricular opportunities while completing major. Students compile portfolio that incorporates work completed through Education and Social Transformation major curriculum as well as form reflection paper where students synthesize their learning. This includes reflection on their personal development, how coursework and community engagement experience contributed to their fulfillment of learning outcomes for major, and plans for future. Students produce compelling final public presentation of their portfolio. Letter grading.

**187. Variable Topics in Education. (5)** Seminar, five hours; discussion, two hours. Limited to juniors/seniors. Variable topics course organized around disciplinary knowledge central to development of core understandings of educational and learning processes, phenomenon, policies, methods, and instruction. Development of culminating project. Consult Schedule of

Classes for topics and instructors. May be applied as core credit for Education Studies minor students. May be repeated three times for credit. Letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced prerequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced prerequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**191A-191D. Current Issues in Education. (4 each)** Seminar, four hours. Limited to juniors/seniors. Variable topics course organized on selected current issues basis, integrating field observations and readings through seminar discussions. Development of culminating project. Consult Schedule of Classes for topics and instructors. May be repeated for credit. Letter grading.

**C192A. Practicum in Intergroup Dialogue Facilitation. (4)** Seminar, three hours. Requisite: course C160. Application and further development of content and skills learned in course C160. In addition to co-facilitating weekly dialogues, students are expected to participate in weekly teaching apprentice practicum seminars. Readings, discussions of group dynamics, and one-on-one meetings with assigned coach. Fosters supportive learning environment where each student facilitator can gain more insight and knowledge into skills of dialogue facilitation and continue process of self-reflection and critical inquiry of own identities, biases, beliefs, and perspectives. Includes learning as large group and time to receive individualized consultation as co-facilitation dyad from instructor. Concurrently scheduled with course C292A. Letter grading.

**195. Community Internships in Education. (4)** Tutorial, one hour; fieldwork, eight to 10 hours. Requisite: course 180. Limited to junior/senior Education and Social Transformation majors. Internship in approved educational or community setting to be supervised by instructor. Students meet biweekly with instructor, write reflective journals, and prepare final paper. May be repeated for credit. Individual contract with supervising faculty member required. Letter grading.

**195CE. Community or Corporate Internships in Education. (4)** Tutorial, one hour; fieldwork, eight to 10 hours. Requisite: course 180. Limited to juniors/seniors. Internship in supervised preapproved K-12 settings coordinated through Center for Community Engagement. Students meet on regular basis with faculty sponsor or designee to construct series of reading and writing assignments that examine educational issues related to meaningful work at internship site. Students expected to learn ways in which urban schools are structured, organized, and operate. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

**196R. Research Apprenticeship in Education. (2 to 4)** Tutorial, three hours per week per unit. Limited to juniors/seniors. Entry-level research apprenticeship for upper-division students under guidance of faculty mentor. May be repeated for credit. Individual contract required. P/NP or letter grading.

**196XP. Community-Engaged Research Apprenticeship. (4)** Tutorial, 12 hours. Requisite: course 180. Recommended: course 160. Limited to junior/senior Education and Social Transformation majors. Research apprenticeship in community setting for upper-division students under guidance of faculty mentor.

Faculty adviser must be actively engaged in work of that community and focus of research must address needs of that community. May be repeated for credit. Individual contract required. Letter grading.

**197. Individual Studies in Education. (2 to 4)** Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**199. Directed Research or Senior Project in Education. (2 to 4)** Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

## Graduate Courses

**200A. Historical Research and Writing. (4)** Lecture, four hours. Methods of historical research and writing for students who are or who will be engaged in research and in report or paper or thesis writing, regardless of their field of interest. S/U or letter grading.

**200B. Survey Research Methods in Education. (4)** Lecture, four hours. Requisite: course 230A. Problems of conceptualization, organization, and gathering non-experimental and quasi-experimental quantitative and qualitative data. S/U or letter grading.

**200D. Research Methods: Special Topics. (4)** Lecture, four hours. Variable topics in research methods in education. S/U or letter grading.

**M201C. History of American Education. (4)** (Same as History M264.) Discussion, three hours. History of educational thought and of social forces impinging on American education from 1880s to present. Analysis of relation between these ideas and forces, and aims and practices of American education today. S/U or letter grading.

**202. Evaluation Theory. (4)** Lecture, four hours. Prevalent evaluation theories, systems for categorizing these theories, and process of theory development in educational evaluation. S/U or letter grading.

**204A. Introduction to Education and Social Sciences. (4)** Lecture, four hours. Interdisciplinary course intended to introduce students to study of educational issues, texts, and movements of thought through social sciences and comparative perspectives. S/U or letter grading.

**204B. Introduction to Comparative Education. (4)** Lecture, four hours. Examination of conceptual and methodological questions underlying comparative education. Particular attention to development of field and to styles of social analysis that may be applied to comparative and cross-national studies in education. S/U or letter grading.

**204C. Education and National Development. (4)** Lecture, four hours. Designed for graduate students. Analysis of various social sciences perspectives and methodologies (including modernization, dependency, Marxist, neo-Marxist, liberation theology, and world-system theories of change and development) and changing notions of role of education in development of less-industrialized countries of world. S/U or letter grading.

**204D. Minority Education in Cross-Cultural Perspective. (4)** Lecture, four hours. Historical and contemporary analyses of educational policies with regard to ethnic, religious, and linguistic minorities through selected national and international case studies. Introduction to cross-cultural education in representative countries in relation to social, political, and economic systems. S/U or letter grading.

**204E. International Efforts in Education. (4)** Lecture, four hours. Designed for graduate students. Critical analysis of complex world of development cooperation, with particular reference to bilateral and multilateral efforts in education. S/U or letter grading.

**204F. Nonformal Education in Comparative Perspective. (4)** Lecture, four hours. Comparative and international study of organized and systematic educational activity for children, youth, and adults carried on outside of schools. Types of programs include, among

others, consciousness raising, community action, skills training, literacy, and extension programs. S/U or letter grading.

**206A. Philosophy of Education: Introduction. (4)** Lecture, four hours. Systematic introduction to field, indicating ways in which philosophy serves to elucidate educational aims, content, methods, and values. S/U or letter grading.

**C207. Politics of Education. (5)** Lecture, two hours; discussion, two hours. Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as foundation for public policy analysis; interest groups in education policy formation and implementation; and focus on Freirean pedagogy. Concurrently scheduled with course C111. S/U or letter grading.

**208A. Perspectives on Sociology of Education. (4)** Lecture, four hours. Sociological perspectives on current issues in educational policy and practice, including desegregation, decentralization, equality of educational opportunity, structure of educational organization, teacher/student relationships, reform in education at elementary, secondary, postsecondary levels. S/U or letter grading.

**208B. (Im)migrant Youth, Ethnography, and Education. (4)** Seminar, four hours. Exploration of experiences of immigrant youth in U.S. schools, with focus on language, culture, and educational equity in urban settings. Letter grading.

**209A. History of Higher Education. (5)** (Formerly numbered C209A.) Lecture, four hours. Exploration of major eras in history of higher education. Topics include issues concerning access, diversity, parental choice, cultural literacy, teacher empowerment, and role of popular media. S/U or letter grading.

**209C. Research and Evaluation in Higher Education. (4)** Lecture, four hours. Development of conceptual and practical understanding of research and evaluation in higher education. Topics include basic statistics, survey design, data analysis, assessment issues, and research proposal writing. Letter grading.

**211A. Educational and Psychological Measurement: Underlying Theory and Practice. (4)** Lecture, four hours. Requisite: course 230A. Measurement theory as applied to educational and psychological testing, with focus primarily on classical test theory, reliability estimation, and test construction and selection. S/U or letter grading.

**211B. Educational and Psychological Measurement: Generalizability Theory. (4)** Lecture, four hours. Requisites: courses 230A, 230B, 230C. Basic and advanced topics in use of generalizability theory to address problems in measurement. S/U or letter grading.

**211C. Introduction to Factor Analysis and Item Response Theory. (4)** Seminar, three hours. Requisites: course 230B or equivalent, and one course in education measurement (course 200B, 211A, 211B, or equivalent). Introduction to linear factor analysis (FA) and item response theory (IRT) models and their uses in research and assessment. Topics include specification, estimation, evaluation, and interpretation of exploratory and confirmatory models. Students use FA and IRT methods to perform range of basic data analyses. S/U or letter grading.

**212A. Learning and Education. (4)** Lecture, four hours. Models of learning, modeling, reinforcement, motivation, encoding, memory, transfer, individual differences, and instruction. S/U or letter grading.

**212B. Motivation and Affect in Educative Process. (4)** Lecture, four hours. Review of theoretical and empirical literature on motivational factors in school settings and conditions for acquisition of affective outcomes. S/U or letter grading.

**217A. Social Development and Education. (4)** Seminar, four hours. Biological and familial, school, and other influences on children; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice. S/U or letter grading.

**217B. Cognitive Development and Education. (4)** Lecture, two hours; discussion, two hours. Designed for graduate students. Critical review of theories and research in cognitive development, with focus on work of Piaget and Vygotsky, and relation of this work to issues in educational practice. S/U or letter grading.

**M217C. Personality Development and Education. (4)** (Same as Psychology M245.) Lecture, four hours. Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development. S/U or letter grading.

**217D. Language Development and Education. (4)** Lecture, four hours. Research and theory on how children develop their first language; sociolinguistic and psycholinguistic issues in preschool and primary years; bilingual and dialectical issues. S/U or letter grading.

**M217F. Adolescent Development. (4)** (Same as Psychology M242G.) Seminar, four hours. Designed for graduate students. Review of recent research on physical, cognitive, social, and psychological development during second decade of life. Topics include pubertal development, changes in parent/adolescent relationships, role of peers, identity development, high-risk behaviors, stress and coping, and school adjustment. Letter grading.

**219. Laboratory: Advanced Topics in Research Methodology. (4)** Laboratory, four hours. Provides assistance in design of research and interpretation of data to advanced students from other divisions. Coverage of special topics not included in other courses on research methods. S/U or letter grading.

**220A. Inquiry into Schooling: Organization and Change. (4)** Lecture, four hours. Critical analysis of issues in reconstruction of schooling; concepts of function and structure of schooling; organization theory; systems approaches in analysis of organization development and change. S/U or letter grading.

**221. Computer Analyses of Empirical Data in Education. (4)** Lecture, two hours; laboratory, two hours. Requisites: courses 209C (section 1), 230A. Designed to develop conceptual and technical skills needed for designing and executing empirical research utilizing statistical packages. Each student conducts two original studies. Equal emphasis on techniques of data analysis and interpretation of results. S/U or letter grading.

**222A. Introduction to Qualitative Methods and Design Issues in Educational Research. (4)** Lecture, three hours; discussion, one hour. Introductory course for students interested in epistemology, theories, and styles of qualitative research in educational settings. Theory and practice of naturalistic, qualitative research design covered in second half of course. Letter grading.

**222B. Participant-Observation Field Methods. (4)** Lecture, two hours; discussion, two hours. Requisite: course 222A. First of two courses on participant-observation field methods. Key skills (e.g., observation, recording, interviewing, role management, data storage) learned through classroom lectures and simulations, and by conducting actual field-based research project. Letter grading.

**222C. Qualitative Data Reduction and Analysis. (4)** Lecture, two hours; discussion, two hours. Requisite: course 222B. Continuation of fieldwork project started in course 222B, with focus on practical skills and conceptual/methodological issues involved in reducing and analyzing qualitative data. Letter grading.

**222D. Qualitative Inquiry: Special Topics. (4)** Lecture, four hours. Special topics course on some field or aspect of qualitative inquiry. Topics may include classroom ethnography, advanced ethnographic writing and/or multimedia design, discourse analysis, and microethnography of social interaction. S/U or letter grading.

**223. Procedural Issues in Evaluation. (4)** Lecture, four hours. Assessment methodologies appropriate for evaluation problems. Writing evaluation proposals, developing program monitoring procedures, selecting

appropriate evaluation design strategies, coping with ethical considerations in evaluation, framing decision context, and reporting evaluation results. Letter grading.

**224. Leading Change through Evaluation: Methods of Continuous Improvement. (4)** Lecture, four hours. Introduction to disciplined inquiry and continuous improvement methods as means for driving change in complex systems. Introduction to organizational learning and change, and adult learning concepts. Focus on disciplined inquiry as strategy to lead change, whether for individuals, teams, or organizations, and its application in education, health care, and other disciplines. S/U or letter grading.

**225A. Issues in Education of Exceptional Individuals. (4)** Lecture, four hours. Designed for graduate students. Analysis of major research regarding contemporary trends, issues, and programs for exceptional individuals; consideration of commonalities and differences among exceptional individuals. S/U or letter grading.

**227C. Research on Behavioral and Social Characteristics of Exceptional Individuals. (4)** Lecture, four hours. Requisite: course 227B. Analysis of social and emotional development of exceptional individuals and development of social competence in special education programs. S/U or letter grading.

**229. Seminar: Special Topics in Urban Schooling. (4)** Seminar, four hours. Research on selected topics in fields of administration, policy, curriculum, and teaching studies and on conceptualization of hypotheses and research programs on division topics and issues. Letter grading.

**CM229B. Narratives of Justice: Disrupting School-to-Prison Pipeline—Arts, Activism, and Agency. (4)** (Same as African American Studies CM213XP) Lecture, four hours; discussion, one hour. Exploration of policies and practices, art and activism, and other forms of agency engaging school-to-prison pipeline. Concurrently scheduled with course CM125XP. S/U or letter grading.

**230A. Introduction to Research Design and Statistics. (4)** Lecture, four hours. Designed for graduate students. Key concepts and issues in design and conduct of social sciences research. Introduction to descriptive statistics and fundamentals of statistical inference. Letter grading.

**230AL. Introduction to Research Design and Statistics: Computer Laboratory. (1)** Laboratory, one hour. Corequisite: course 230A. Computer data analysis laboratory for introductory research design and statistics. Instruction in SPSS, Stata, and SAS statistical analysis packages. S/U grading.

**230B. Linear Statistical Models in Social Science Research: Multiple Regression Analysis. (4)** Lecture, four hours. Requisite: course 230A or passing score on screening examination. Solid and comprehensive training in regression-based methods for analyzing quantitative social science data. Letter grading.

**230BL. Linear Statistical Models: Computer Laboratory. (1)** Laboratory, one hour. Corequisite: course 230B. Computer data analysis laboratory for linear statistical models. Instruction in SPSS, Stata, SAS, and other relevant statistical analysis packages. S/U grading.

**230C. Linear Statistical Models in Social Science Research: Analysis of Designed Experiments. (4)** Lecture, four hours. Requisites: courses 230A, 230B. Solid and comprehensive training in experimental design and analysis methods, especially use of analysis of variance methods. S/U or letter grading.

**230CL. Linear Statistical Models for Experimental Research: Computer Laboratory. (1)** Laboratory, one hour. Corequisite: course 230C. Computer data analysis laboratory for linear statistical models for experimental research. Instruction in SPSS and SAS statistical analysis packages. S/U grading.

**231A. Toolkit for Quantitative Methods Research. (4)** Lecture, four hours. Requisites: courses 230A, 230B, 230C. Elementary probability. Working knowledge with calculus. Mathematical and statistical results useful for advanced quantitative methodology research. Matrix algebra. Random vectors. Multivariate

distribution theory. Likelihood and Bayesian estimation and inference. Linear and generalized linear models. Simulation. S/U or letter grading.

**M231B. Factor Analysis. (4)** (Same as Psychology M253.) Lecture, four hours. Requisites: courses 211B, 231A. Exploratory factor analysis, rotations, confirmatory factor analysis, multiple-group analysis. S/U or letter grading.

**231BL. Factor Analysis: Computer Laboratory. (1)** Laboratory, one hour. Corequisite: course M231B. Computer data analysis laboratory for exploratory and confirmatory factor analysis. Instruction in CEFA, LISREL, and other relevant statistical analysis packages. S/U grading.

**231C. Advanced Item Response Theory. (4)** (Formerly numbered 211C.) Lecture, four hours. Requisites: courses 231A, M231B. Review of standard item response theory models, multidimensional models, multiple group models and models with covariates, item and person parameter estimation, differential item functioning analysis, testing model fit, linking and scale alignment, computerized adaptive testing. S/U or letter grading.

**231D. Advanced Quantitative Models in Nonexperimental Research: Multilevel Analysis. (4)** Lecture, four hours. Requisites: courses 230B, 230C. Examination of conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities); consideration of alternative analytical models. Letter grading.

**M231E. Statistical Analysis with Latent Variables. (4)** (Same as Statistics M244.) Lecture, three hours. Requisites: courses 231A, M231B. Introduction to general latent variable modeling framework. Important special cases of this framework include confirmatory factor analysis, structural equation models, item response models, latent class models, and multilevel models, among others. Topics include discussions of general statistical and computational framework, model formulation, identification, estimation, and testing. Letter grading.

**233. Professional Writing in Education. (4)** Lecture, four hours. Intended to assist in professional development as writers, with focus on style and organization, scholarly genres, modes of discourse, and broader issues of conceptualization and method. Letter grading.

**234. Critical Perspectives on Economic Approaches to Education. (4)** Seminar, four hours. Introduction to concepts and principles in economics of education using critical perspective. Overview of evolving relationship between education and economics, including growing use of education as economic policy tool and increased role of economic principles in internal functioning of educational systems. S/U or letter grading.

**235. Comparative Political Economy of Education and Skills. (4)** Seminar, four hours. Use of political economy of education perspective for exploring, at international and comparative levels, link between alternative models of governing, providing and financing education and training systems and impact of alternatives on outcomes such as unequal chances to learn, types of skill formation, and well-being. S/U or letter grading.

**237. Law and Urban Education. (4)** Lecture, four hours. Examination of recent legal controversies that may impact ability of urban educators to meet needs of students in multicultural society, with special emphasis on such equity-related issues as desegregation, school finance, standardized testing, and rights of language minority students. Letter grading.

**238. Cross-National Analysis of Higher Education. (4)** Lecture, four hours. Comparative study of national systems of higher education: their division of work, basic values, structures of authority, modes of national integration, and types of change. S/U or letter grading.

**240. Immigrant Children and Education. (4)** Seminar, four hours. Examination of immigrant child and youth experience, with primary focus on educational outcomes. Topics include historical changes in experiences of immigrant youth, dynamics of immigrant families, cultural, ethnic, and socioeconomic status-related influences in immigrant youths' adjustment, and school-family connections. Letter grading.

**241. Conceptual Frameworks for Research in Urban Education.** (4) Seminar, four hours. Examination of diverse set of foundational theories for educational researchers concerned with understanding, designing, and studying transformative, culturally sustaining, and democratic educational practices. Includes both founding parents and neo perspectives in emancipatory/liberatory pedagogy, sociocultural/sociocultural activity theory, critical race theory, cultural modeling/culturally sustaining pedagogy and contributions from learning sciences, indigenous, post-colonial, sociological, political-economic, and anthropological approaches to educational research. Attends both to original ideas and how they have changed over time, as well as how faculty in the Urban Schooling program draw on these frameworks for their research. Letter grading.

**242. Learning, Culture, and Schooling.** (4) Seminar, four hours. Education typically refers to explicit efforts by experienced members of society to instruct new members in acceptable ways of thinking and acting in that society. Study of how learning sciences—broadly, social sciences interested in study of learning, with particular focus on variants of psychology—attempt to explain human cognitive development, and how people learn to think and act. Investigation of how accounts of learning and development can be, and have been, used to inform instruction in school. Focus on schools primarily as means to examine how theoretical perspectives on learning can inform praxis and scholarship or educational justice and equity. Letter grading.

**243. Reflections on Methods in Social Sciences.** (4) Lecture, four hours. Preparation: two research methods courses. Fundamental issues surrounding use of methods in social sciences, including issues in philosophy of social sciences, relationship between theory and facts, ontological status of constructs, cognition and social research, sources of evidence in ethnography, research and social policy. Letter grading.

**C244. Theory and Practice of Intergroup Dialogue: Building Facilitation Skills.** (4) Seminar, four hours. Topics include social psychology of intergroup relations, intercultural and dialogic communication theories, methods for reconciling and bridging differences in schools and communities, research and evaluation of intergroup dialogues and other educational methods for improving intergroup relations, and core competencies for planning, delivering, and evaluating intergroup dialogues in multicultural settings. While providing foundational grounding in theory and pedagogy of intergroup dialogue, particular attention to relationships between intergroup dynamics, structural inequalities, systems of privilege and oppression, and mental health outcomes and disparities among populations. Concurrently scheduled with course C124. Letter grading.

**246A. Decision Analysis and Advanced Computer Methods for Educational Policy and Planning.** (4) Seminar, four hours. How information technology and decision analysis impact K-12 schooling, higher education, and technical training/workplace settings. With research paper, oral presentation, and two research briefs, students can pursue decision analysis areas of special interest to their professional and career objectives. S/U or letter grading.

**248. Seminar: Special Topics in Child Development and Education.** (4) Seminar, four hours. Content varies; limits of investigation set by individual instructor. S/U or letter grading.

**249. Theories and Methods in Developmental Science.** (4) Lecture, three hours. Broad overview of theories and methods used to study development of children in context. Introduction to foundational theories in field of developmental science, and exposure to range of methodological approaches—ranging from sources of data to analytic approaches—that researchers use to characterize developmental change. S/U or letter grading.

**250A. Fundamentals of U.S. Higher Education System.** (4) Lecture, four hours. Designed for graduate students. Two-course sequence designed to orient new students to issues, ideas, and literature that con-

stitute this division, with emphasis on underlying social and political issues that shape higher education and organizational change. Letter grading.

**250B. Organizational Analysis of Higher Education.** (4) Lecture, four hours. Designed for graduate students. Two-course sequence designed to orient new students to issues, ideas, and literature that constitute this division, with emphasis on underlying social and political issues that shape higher education and organizational change. Letter grading.

**250C. Theoretical Frameworks of Higher Education.** (4) Lecture, four hours. Designed for graduate students. Overview of various social sciences theories used to analyze institutions and issues of contemporary higher education. Explanation of how theory and methodology affect research design and framing of research questions in studies of higher education. Letter grading.

**252B. Educational Enterprise.** (4) Lecture, two hours; discussion, two hours. Requisite: course 252A. Limited to Educational Leadership Program students. Use of structural, human resource, political, and symbolic frames to study K-16 education, with focus on educational environments, organizations, and curriculum and instruction. Letter grading.

**M253A. Seminar: Current Problems in Comparative Education.** (4) (Same as Gender Studies M253A.) Seminar, four hours. Examination of some of most influential critical theorists, including Marx, Nietzsche, Freud, Marcuse, Foucault, Fanon, and de Beauvoir and their contributions to critique of contemporary education, society, and politics. S/U or letter grading.

**253B. Seminar: African Education.** (4) Seminar, four hours. Designed for graduate students. Contemporary issues in African educational systems, including questions of access and equity, quality and efficiency, relevance and responsiveness, links between schools and communities, and policy and practice in education. S/U or letter grading.

**253C. Seminar: Asian Education.** (4) Seminar, four hours. S/U or letter grading.

**253D. Seminar: Latin American Education.** (4) Seminar, four hours. S/U or letter grading.

**253G. Seminar: Asian Americans and Education.** (4) Seminar, four hours. Basic issues and topics related to Asian Americans in field of education. Examples of issues and topics include Asian Americans and community, socioeconomic status, education-to-work transition, language and culture question. S/U or letter grading.

**253H. Seminar: Chicanos/Hispanics and Education.** (4) Seminar, four hours. Basic issues and topics related to Chicanos and other Hispanic groups in education. Review of literature on specific educational levels and Chicano/Hispanic student progress (e.g., early childhood, elementary, higher education; specific topics: assessment, access, tracking, segregation; implications for schooling). S/U or letter grading.

**253I. Education and Social Change in Middle East and Islamic World.** (4) Seminar, four hours. Critical and analytic examination of historical and current role of traditional and modern (Western) education in affecting social, political, and economic changes in countries of Middle East and Islamic world (including Pacific Rim, South and Central Asia). S/U or letter grading.

**254. Seminar: History of Education.** (4) Seminar, four hours. Requisite: course M201C. Study of current movements in historiography of education and critical reading of texts in history of education. S/U or letter grading.

**255A-255B-255C. Seminars: Special Topics. (4-4-4)** Seminar, four hours. May be repeated for credit. S/U or letter grading. **255A.** Measurement; **255B.** Design; **255C.** Data Analysis.

**256A. Seminar: Special Topics in School Learning.** (4) Seminar, four hours. S/U or letter grading.

**256B. Seminar: Special Topics in Development.** (4) Seminar, four hours. S/U or letter grading.

**259. Administration of International Programs in Higher Education.** (4) Seminar, four hours. Introduction to theory and practice of internationalization in U.S. higher education, looking at meaning of concept

of comprehensive internationalization across campus, issues of effective leadership and management, and individual aspects of internationalization, including study abroad program development and implementation, international student recruitment and support services, international curriculum—area and language studies, English as a second language programs, international internships and careers, faculty development in international travel and research, international partnerships/branch campuses, international development and grant projects, international alumni, distance learning/massive open online courses (MOOCs)/hybrid models. Letter grading.

**M260A. Introduction to Programming and Data Management.** (4) (Formerly numbered 260A.) (Same as Public Policy M276A.) Lecture, three hours. Fundamental skills of data management. Development of strong foundation in R programming language. R is most popular language for statistical analysis and one of most popular languages for data science applications (e.g., web-scraping, interactive maps, network analysis). Students become proficient in data management and R programming through weekly problem sets, completed in groups. No prior experience with R required. S/U or letter grading.

**M260B. Fundamentals of Programming.** (4) (Formerly numbered 260B.) (Same as Public Policy M276B.) Lecture, three hours. Recommended requisite: course M260A. Second course in programming/data science sequence designed for students who do not have programming background. Uses primarily R programming language. Organized around practical programming skills/concepts that are fundamental across modern object-oriented programming languages (e.g., Python, Javascript). Topics include organizing files, folders, and scripts; reading (importing) and writing (exporting) data; using Git and GitHub for version control and collaboration; iteration (e.g., loops); conditional execution; writing functions; strings and regular expressions. These general programming skills are prerequisite for flashier data science applications (e.g., web-scraping, interactive maps). Students become proficient in programming skills/concepts through weekly problem sets, completed in groups. S/U or letter grading.

**261E. Higher Education Seminar: Diversity Issues and Research Perspectives.** (4) Seminar, four hours. Examination of how racial diversity and its related dynamics have transformed and at same time been reshaped by institutions of higher education, with focus specifically on student experiences, curricula, institutional climate, educational policies, and administrative practices. Letter grading.

**261F. Seminar: Cognitive and Personal Development of College Students.** (4) Seminar, four hours. Examination of cognitive development of college students; issues of personal and social development, including leadership, and interpersonal relations and skills. S/U or letter grading.

**262B. Seminar: Reading.** (4) Seminar, four hours. S/U or letter grading.

**263. Seminar: Higher Education.** (4) Seminar, four hours. May be repeated for credit. S/U or letter grading.

**264. Seminar: Teacher Education.** (4) Seminar, four hours. Research, issues, and practices in preservice and in-service teacher preparation, evaluation, and certification. Social, philosophical, and methodological issues and current trends in America and abroad. Opportunities to observe, participate in, and discuss teacher education programs. S/U or letter grading.

**265. Higher Education Policy.** (4) Lecture, four hours. Requisites: courses 250A, 250B. Understanding public policy for higher education requires understanding of both issues and policy process. Review of major topics on which U.S. government is active, as well as key actors and their influence. Letter grading.

**M266. Feminist Theory and Social Sciences Research.** (4) (Same as Gender Studies M266.) Lecture, four hours. Examination of how diverse feminist social theories of last quarter century have both challenged and strengthened conventional social sciences theories and their methodologies. Introduction especially to feminist standpoint theory, distinctive critical theory methodology now widely used in social sciences. Letter grading.

**270. Introduction to Cultural Studies. (4)** Lecture, four hours. Investigation of current trends in cultural studies through examination of different methods of cultural interpretation, seminal texts in cultural studies, and practical criticism engaging popular artifacts of media culture. Emphasis on developing critical media literacy as goal of cultural studies. Letter grading.

**272. Case-Study Research in Education Policy and Practice. (4)** Discussion, four hours. Use of case-study methods in education research, providing opportunities for applying methodological skills to actual case-study research projects. Focus on single and multiple case studies that investigate issues in education policy and practice. Letter grading.

**274. Science, Technology, and Social Research after Eurocentrism. (4)** Lecture, four hours. Philosophy of natural sciences for social scientists that examines challenges to conventional research assumptions raised by multicultural and postcolonial science and technology studies that have emerged since World War II. Focus on sciences and technologies in third-world development projects, comparative ethnoscience movements, and new theories of knowledge and how to do maximally objective research emerging from these literatures. Letter grading.

**275. Race and Education. (4)** Seminar, four hours. Designed for graduate students. Examination of role of race in educational policymaking. Exploration of broad interpretation of how schools contribute to racial stratification and inequality by linking sociological and sociopsychological theories of race, racial attitudes, and conflict to historical policy analysis. Letter grading.

**276. Contemporary Theories of Writing. (4)** Lecture, four hours. Review of current theories of writing and literacy research and examination of relationships among writing and literacy, culture, and human development. In particular, examination of history of writing research over last three decades as part of broader intellectual history. Letter grading.

**CM278. Critical Media Literacy and Politics of Gender: Theory and Production. (4)** (Same as Gender Studies CM278.) Seminar, three hours. Corequisite: course CM278L. Use of range of pedagogical approaches to theory and practice of critical media literacy that necessarily involves understanding of new technologies and media forms. Study of both theory and production techniques to inform student analysis of media and critical media literacy projects. Concurrently scheduled with course CM178. Letter grading.

**CM278L. Critical Media Literacy and Politics of Gender: Laboratory. (2)** (Same as Gender Studies CM278L.) Laboratory, two hours. Corequisite: course CM278. Hands-on production experience as integral component of course CM278. Concurrently scheduled with course CM178L. Letter grading.

**280A. Seminar: Selected Topics in Special Education. (2 to 6)** Seminar, two to six hours. Focus on research and clinical problems in special education. Introduction to range of clinical services and research strategies. Exploration of current topics in field. S/U or letter grading.

**281. College Access Seminar. (4)** Seminar, two hours; discussion, two hours. Knowledge of changing dynamics of college access at individual, organizational, and field levels and understanding of links between K-12 and postsecondary stratification and how educational advantage and disadvantage accumulates throughout education and affects equity in college access. Letter grading.

**284. Critical Theory in Education: Power, Politics, and Liberation. (4)** Lecture, four hours. Designed for graduate students. Introduction to major themes, issues, and methodologies within what has come to be known as critical and educational tradition, including some major theoretical writings in liberal, neo-Marxist, left liberal/postmodernist, and Marxist subfields of critical education tradition. Letter grading.

**285. Education and Law. (4)** Lecture, four hours. Examination of recent high-profile, education-related disputes at both K-12 and higher education levels. Exploration of topics including campus safety and privacy, student freedom of expression, technology-related issues and concerns, religion in schools, cyberbullying,

and accountability for off-campus behavior. Examination of access to quality education by analyzing disputes arising at every stage of education process, from issues regarding practices that may engender school-to-prison pipeline to ongoing legal battles regarding race-conscious policies, Every Student Succeeds Act, K-12 teacher tenure, school sports, unmet needs of English language learners, misuse of special education system, impact of burgeoning charter school movement, and rights of undocumented students. Concurrently taught with Law 282. Letter grading.

**M286. Language, Culture, and Education. (4)** (Same as Anthropology M256.) Seminar, three hours. Examination of ongoing movement to reclaim and reimagine schooling as site to sustain indigenous, Black, Latinx, Asian and Pacific Islander communities, including ways these identities/memberships intersect with gender identity and expression, sexuality, dis/ability, language, migration, place, class, and more. For centuries of teaching and learning, communities have sought to push against ways nation-state schools have devalued communities, their lifeways, and their lives. Most recently, this movement is indebted to several decades of research, theory, and practice in asset or strength-based pedagogy tradition. Work on culturally sustaining pedagogy (CSP) has joined these decades (and centuries) of work to offer vision of school that seeks to perpetuate and foster—to sustain—linguistic, literate, and cultural pluralism as part of schooling for positive social transformation and revitalization. S/U or letter grading.

**287. Research on Language Issues in Education. (4)** Seminar, four hours. Roles of language(s) in formal and informal education, including study of opportunities and challenges offered by language variation found in schools. Examination of language acquisition theories along with those of language ideologies, language policies, and multilingualism. Letter grading.

**288. Research Apprenticeship Course. (2)** Discussion, two hours. Course facilitates mentorship model of training PhD students in education, with focus on development of graduate student research topics. Assignment of common readings related to these topics; students have opportunity to offer and receive feedback. May be repeated for credit. S/U grading.

**C292A. Practicum in Intergroup Dialogue Facilitation. (4)** Seminar, three hours. Requisite: course C244. Application and further development of content and skills learned in course C244. In addition to co-facilitating weekly dialogues, students are expected to participate in weekly teaching apprentice practicum seminars. Readings, discussions of group dynamics, and one-on-one meetings with assigned coach. Fosters supportive learning environment where each student facilitator can gain more insight and knowledge into skills of dialogue facilitation and continue process of self-reflection and critical inquiry of own identities, biases, beliefs, and perspectives. Includes learning as large group and time to receive individualized consultation as co-facilitation dyad from instructor. Concurrently scheduled with course C192A. Letter grading.

**295. Freire. (4)** Seminar, four hours. Requisite: course C125 or C207 or prior knowledge of Freire's work. Analysis of intellectual production of Paulo Freire linked to social context in which it took place. Study of his life and work in five phases: Brazilian Experience (1921 to 1964); Chilean Experience, where he published *Education as Practice of Freedom and Pedagogy of Oppressed*, as well as other lesser-known works, while also devoting most of this period to empirical research in literacy training (1964 to 1969); his work at Harvard, and then World Council of Churches in Geneva (1970 to 1980), including his consulting with postcolonial revolutionary governments in Africa; his return to Brazil and his work as Secretary of Education in São Paulo (1989 to 1992); and his global travels from 1980 until his death in 1997. Focus on work left incomplete before his death (including ecopedagogy and citizen's schools), and by implication his analyses, critiques, and impact in world, his methodology of generative word, and comparisons with other theoretical referents. Letter grading.

**296A-296D. Seminars: Research Topics in Education. (2 each)** Seminar, three hours. Advanced study and analysis of current topics in education. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

**296G. Research Topics in Education: Legal Aspects of Educational Management. (2)** Lecture, two hours. Examination and analysis of legal issues, especially as they apply to school organizations. Letter grading.

**296H. Research Topics in Education: Organizational Theory. (2)** Lecture, two hours. Examination and analysis of organizational theories, especially as they apply to school organizations. Letter grading.

**296I. Theory in Educational Inquiry. (2)** Seminar, two hours. Theory and its application to study of educational settings and institutions. Examination of major paradigms, important schools of thought, and particular theoretical areas and theories within field of education, with focus both on conceptually and empirically based works as means for grounding discussions of theory and application. Letter grading.

**296J. Introduction to Survey Research Methods. (2)** Seminar, two hours. Introduction to conceptual and methodological issues involved in survey-based research in education, offering structured opportunity to practice various practical aspects of survey (instrument) development. Questionnaire design, format, and delivery; question writing, pretesting, and testing; and sample design and considerations, nonresponse, measurement error, and data preparation. Letter grading.

**296K. Research Design. (2)** Seminar, two hours. Effective educational leaders require ability to accurately diagnose educational problems before jumping to proposed solutions. Study designs must include systematic ways to collect and analyze data, as well as minimize potential threats to validity of data and analysis. Designed to equip students with tools needed to design research studies that address specific real-world educational problems. Basic understanding of research designs as strategies for investigating educational problems, such as types of questions that can be answered appropriately with qualitative and mixed methods studies, design components, planning for fieldwork and data collection, sampling, ethics, and credibility. Letter grading.

**299A-299B-299C. Research Practicum: Education. (4-4-4)** Clinical, to be arranged. May be repeated for credit. Letter grading.

**301. Introduction to Information and Presentation Tools. (2)** Laboratory, two hours. Limited to credential program students. Sequence of laboratory sessions providing preservice teachers with introduction to education technology infrastructure and classroom presentation tools. Introduction to resources and services, e-mail functions and Internet, and presentation software and multimedia elements. S/U grading.

**305. Health Education for Teachers. (2)** Lecture, two hours. Limited to Teacher Education Program students. Teaching/learning process as applied to personal and community health. Topics include psychoactive drugs (alcohol, tobacco, and narcotics), human sexuality, nutrition, community health resources, and analysis of state's health framework. S/U grading.

**309. Methodologies for English Language Learners. (2)** Laboratory, two hours. Limited to credential program students. Pedagogy for bilingual and English language learners. Discussion of competencies needed by all content area teachers of English language, including strategies for teaching in and through English. Topics include educational issues, organizational approaches, and communicative approach; strategies and activities. Letter grading.

**315. Principles and Methods for Teaching Reading for Multiple Subject Instruction. (3)** Lecture, three hours. Reading instruction in elementary schools. Analysis of reading problems and programs; study of relationships between language/culture/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. Letter grading.

**315B. Elementary Literacy Methods. (3)** Seminar, three hours. Theoretical principles and pedagogical strategies necessary for developing and maintaining balanced comprehensive literacy program for elementary students. Examination of how children learn to read, write, and use language. Letter grading.

**318A. Integrated Methods for Elementary Teachers. (3)** Lecture, three hours. Examination and development of instructional programs and analyses and practices of instructional methods for teaching K-6 content, with emphasis on interdisciplinary approach that integrates content areas. Aligned with California state frameworks and California content standards for grades K-12 that address needs and interests of diverse students. Letter grading.

**318B. Integrated Methods for Elementary Teachers. (4)** Lecture, four hours. Examination and development of instructional programs and analyses and practices of instructional methods for teaching K-6 content, with emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Aligned with California state frameworks and California content standards for grades K-12, including English Language Development Standards—all of which address needs and interests of diverse students. Letter grading.

**318C. Integrated Methods for Elementary Teachers. (3)** Lecture, three hours. Examination and development of instructional programs and analyses and practices of instructional methods for teaching K-6 content, with emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Aligned with California state frameworks and California content standards. Letter grading.

**319. Mathematics Methods. (3)** Lecture, three hours. Details of children's mathematics thinking and use of that information as way to ground learning about teaching of mathematics. Letter grading.

**320A-320B-320C. Secondary Content and Literacy Methods. (4-3-3)** Lecture, three hours. Examination and development of instructional programs and analyses and practices of instructional methods for teaching content in grades 7-12. Emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Methods courses are aligned with California state frameworks and California content standards for grades K-12, including English Language Development Standards—all of which address needs and various interests of diverse students. Letter grading.

**321A. Secondary Content and Literacy Methods in Ethnic Studies. (3)** Lecture, three hours. Examination and development of instructional programs, analyses, and practices of instructional methods for teaching ethnic studies in grades 7 through 12, with emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Methods courses align with California state frameworks and California content standards for grades K through 12, including English Language Development Standards—all of which address needs and various interests of diverse students. Ethnic studies curriculum focuses on Chicano studies, African American/Black studies, indigenous studies, Asian American studies, and gender/sexuality studies and how to develop curriculum focused on local histories in urban classrooms. S/U grading.

**321B. Ethnic Studies Curriculum Development. (3)** Lecture, three hours. Examination and development of theoretical frameworks around curriculum development for ethnic studies in grades 7 through 12, with emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Methods courses align with California state frameworks and California content standards for grades K through 12, including English Language Development Standards—all of which address needs and various interests of diverse students. Ethnic studies curriculum focuses on Chicano studies, African American/Black studies, indigenous studies, Asian American studies,

gender/sexuality studies, and how to develop curriculum focused on local histories in Los Angeles urban classrooms. S/U grading.

**328. Principles and Methods for Teaching Mandarin Effectively. (2 to 6)** Lecture, two to six hours. Emphasis on proficiency-based foreign language teaching methods incorporating language assessment skills, modeling, hands-on experiences, and development of teaching and teacher-training materials. S/U grading.

**330A. Observation and Participation. (2 to 6)** Site-based fieldwork, 10 to 15 hours. Students are assigned to school sites with racially, culturally, and linguistically diverse student populations. Throughout observation and participation period, students analyze effective strategies for achieving learning for all students, including sociocultural approaches and appropriate use of educational technology. S/U grading.

**330B. Student Teaching. (4 to 8)** Site-based fieldwork, 10 to 20 hours. Requisite: course 330A. Students are assigned to student teach in designated school sites with racially, culturally, and linguistically diverse student populations. Throughout student teaching period, students as novice teachers plan, implement, and assess daily lessons and units, as well as actively engage in reflecting on issues specific to school/community relations. S/U grading.

**330C. Student Teaching. (4 to 8)** Site-based fieldwork, 10 to 30 hours. Requisite: course 330A. Students are assigned to student teach in designated school sites with racially, culturally, and linguistically diverse student populations. Throughout student teaching period, students as novice teachers plan, implement, and assess daily lessons and units, as well as actively engage in reflecting on issues specific to school/community relations. Increased daily responsibilities. S/U grading.

**330D. Classroom Residency and Teaching. (4)** Site-based fieldwork, 40 hours. Students are employed by local school districts to teach as residents in designated school sites with racially, culturally, and linguistically diverse student populations. Students also work in collaborative teams through Teacher Education Program to initiate change project in their local school and/or complete case study on project. S/U grading.

**360A-360B-360C. Novice Seminars. (2-2-2)** Seminar, two hours. Analysis of basic principles and concepts of planning, conducting, and evaluating units of curriculum and instruction. Emphasis on study and utilization of constructivist strategies and their application in elementary and secondary schools. Examination of different methods of computer literacy and teaching subject matter. Students may conduct ethnographic inquiry of local community of their designated partnership district. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**390A-390B-390C. Colloquium Series: Human Development and Psychology. (1-1-1)** Seminar, one hour. Required of first-, second-, and third-year Human Development and Psychology (HDP) PhD students. Training to conduct research that has practical implications as well as theoretical significance within field of applied human development. Children's cognitive, language, personality, and social development in educationally relevant settings such as schools and day-care programs. Series unites scholars exploring contemporary issues in applied human development and provides framework to facilitate research and training in human development within school and UCLA community, as well as forum to share information with other investigators and institutions. May be repeated for credit. S/U grading.

**402. Curriculum Principles and Practices. (4)** Lecture, four hours. Critical analysis of major concepts, underlying assumptions, policy issues, and processes in development and implementation of curriculum in educational setting. Problems in formulation of pur-

poses, selection of learning experiences, organization of curriculum, and curriculum evaluation. S/U or letter grading.

**403. Infant-Toddler Child Development and Care. (4)** Lecture, four hours. Exploration of infant and toddler development (ages 0 to 3) and implications of development on their care and education. Introduction to major theories in child development, developmental milestones, and recent brain development research. Topics include family engagement, inclusion, risk contexts, developmentally appropriate practices, and assessment. S/U or letter grading.

**405A. Teaching in Urban Schools: Exploring Communities. (2)** Seminar, two hours. Limited to credential program students. Learning about urban communities by critically examining students' own beliefs, assumptions, and experiences about them to deepen understanding and appreciation about urban communities. Letter grading.

**405B. Teaching in Urban Schools: Exploring Identities. (2)** Seminar, two hours. Limited to credential program students. Examination and reflection on student values, beliefs, assumptions, and lives to determine how these factors shape way students view their world and, in particular, teaching, learning, students, their families, and their neighborhoods and communities. Letter grading.

**405C. Teaching in Urban Schools: Exploring Family-School Connections. (2)** Seminar, two hours. Limited to credential program students. Exploration of interrelationships among families, communities, and school systems, engaging parents, caregivers, guardians, students, and school personnel to develop strategies for working with families and to develop philosophy of education. Letter grading.

**406. Social Foundations and Cultural Diversity in American Education. (3)** Lecture, three hours. Intensive consideration of American society, particularly its racial and cultural diversity. Topics include historical development of American society, manifestations of cultures, and ways to learn about students' cultures. Examination of issues of racism, ethnic and gender differences, perspectives of cultural diversity, and impact on educational and classroom instruction. Letter grading.

**406B. Social Foundations and Cultural Diversity in American Education: Ethnic Studies Emphasis. (3)** Lecture, three hours. Historical, social, political, and economic contexts of schooling in U.S., with special emphasis on perspectives and contributions from ethnic studies. Examination of central arguments centered around systemic processes, deficit-framing, meanings produced in cultural contexts, and agency and activism. Letter grading.

**407. Psychological Foundations of Education. (3)** Lecture, three hours. Analysis of learning processes in school situations. Processes of human motivation, affective, cognitive, social, and personal development of children and adolescents, evaluation of learning, individual differences, and implications of relevant theory and research. Letter grading.

**409. Language Structure, Acquisition, and Development. (3)** Lecture, three hours. Theoretical foundations of language structure and first and second language acquisition, with focus on major themes of current research that provide framework for schooling of English language learners. Rationale for bilingual/English language acquisition and development programs. Historical and current theories and models of language. Letter grading.

**411. Procedural Issues in Evaluation. (4)** Lecture, four hours. Assessment methodologies appropriate for evaluation problems. Writing evaluation proposals, developing program monitoring procedures, selecting appropriate evaluation design strategies, coping with ethical considerations in evaluation, framing decision context, and reporting evaluation results. Letter grading.

**412. Why Research Matters to Student Affairs Practice. (3 or 4)** Lecture, three hours. How do researchers study impact of college on students? How can that research be used to improve student affairs practice? Introduction to world of college impact research and orientation to major ongoing studies conducted at

UCLA and beyond. Students interact with researchers and provide input on how research results might be utilized to improve work of student affairs. Letter grading.

**413A. Language and Culture. (2 to 4)** Lecture, two hours. Limited to credential program students. Offered and required for Bilingual Authorization Programs. Focus on language of emphasis for bilingual teachers. Practice in listening, reading, speaking, and writing competencies required for bilingual classrooms. Assessment made at end of course to determine proficiency of Bilingual Authorization Program candidates. Letter grading.

**413B. Methodology for Primary Language Instruction. (2 to 4)** Lecture, three hours. Offered and required for Bilingual Authorization Programs. Consideration of models for developing cultural and language skills of home speakers of language of emphasis; practice in use of activities to develop student ability to use language for real-world and academic purposes in culturally appropriate ways. Consideration of models for teaching academic content in primary language for delivery of core curriculum to bilingual students. Letter grading.

**413C. Culture of Emphasis. (2 to 4)** Lecture, three hours. Offered and required for Bilingual Authorization Programs. Conducted in language of authorization. Discussion of commonalities of culture of emphasis in its home country or countries; major historical periods and events; values, belief systems, and expectations; migration and immigration; historical and contemporary demography. Letter grading.

**414A. Student Affairs Practice and Theory. (3)** Lecture, two hours; discussion, two hours. Examination of needs for student affairs services, range of services, their philosophical and empirical rationale, and their organization and evaluation to provide knowledge base for developing theories of practice. Ongoing involvement in cooperative learning project to examine these issues both as team members and as individuals. Offered in summer only. Letter grading.

**414C. College Student Counseling. (3)** Lecture, three hours. Overview of counseling at college counseling centers. Review of historical context, philosophical and practical bases, organization and administration, specific programs, and contemporary issues and trends in college student counseling. Letter grading.

**414E. Administration of Student Affairs. (3)** Lecture, two hours; discussion, two hours. Overview of general knowledge and processes essential to effectively administer programs or services under student affairs. Examination of relationship between environmental factors and strategies for governing, planning, and managing student affairs programs and services. Offered in summer only. Letter grading.

**416. Program Development and Planning in Student Affairs. (4)** Lecture, two hours; discussion, two hours. Planning of programs that provide or support learning for individuals and groups in student affairs context. Examination of philosophical foundations of program planning, along with pedagogical and logistical dimensions of program development. Letter grading.

**419. Introduction to Research in Student Affairs. (4)** Lecture, two hours; discussion, two hours. Designed to orient students to nature of educational research in context of student affairs. Overview of quantitative, qualitative, and mixed methods to position students as scholar-practitioners. Exposure to these methods supplemented by examination of how they are used in published research relevant to practice of student affairs. Letter grading.

**420A. Principles of Curriculum. (4)** Lecture, four hours. Critical examination of basic concepts underlying determination of objectives, selection and organization of learning experiences, and evaluation process. S/U or letter grading.

**425. Principles for Teaching Exceptional Individuals. (3)** Lecture, three hours. Approaches for teaching exceptional individuals in special and regular education programs. Principles and assumptions underlying alternative approaches. Emphasis on individualizing curriculum and classroom management. Letter grading.

**426A-426B. Program Development and Program Evaluation in Student Affairs. (2-2)** Lecture, two hours. Introduction to program development and planning, as well as to assessment and program review. Development of knowledge of and skill in planning educational and training programs that provide support for learning within context of student affairs, as well as knowledge of and skill in developing, implementing, and analyzing assessment projects within student affairs context. Study of basic theoretical perspectives underlying program design/implementation and program review/assessment and application by developing, implementing, and assessing effectiveness of one program. In Progress (426A) and letter (426B) grading.

**440C. Administration of Instructional Programs. (4)** Lecture, four hours. Examination of current educational problems in society and strategies of their solution through curriculum policy and practice; instructional design and operation; in-service training of teaching staffs. S/U or letter grading.

**441A. Instructional Supervision A. (4)** Lecture, four hours. Analysis of teaching in light of research-substantiated elements of instruction: task analysis, appropriate objectives, principles that increase motivation, rate and degree of learning, retention and transfer, monitoring and adjusting instruction to meet needs and capacities of learners. S/U or letter grading.

**442B. Legal Aspects of Educational Management and Practice. (4)** Lecture, four hours. Examination of structures and kinds of law governing educational systems in U.S.; constitutional dimensions of church/state relations; employees' civil rights and legal aspects of hiring, firing, and negotiating procedures; student attendance, control, and civil rights. S/U or letter grading.

**443. Policy Analysis in Education. (4)** Lecture, four hours. Overview of political, economic, and legal context of educational policy formation. Included in examination are issues that impact on minorities (e.g., bilingual education, desegregation, affirmative action, role of subdominants in policy-making process). S/U or letter grading.

**448A. Urban School Leadership. (4)** Lecture, four hours. Analysis of problems of urban school leadership. Emphasis on changing nature of urban principalship, with considerable attention to role of other school and community agencies that interact with urban school leaders. S/U or letter grading.

**448B. Urban Leadership Laboratory. (4)** Laboratory, four hours. Analysis of and opportunity to practice human and technical skills requisite for success as urban school leader. Topics include negotiations, conflict resolution, applied computer technology, and effective communication. Activities include gaming, simulation, computer programming, and group dynamics. S/U or letter grading.

**450. Leadership Capacity Building. (4)** Lecture, one hour; discussion, three hours. Limited to Educational Leadership Program students. Course taken in year three of Educational Leadership Program to help students with their communication and leadership capacities. S/U grading.

**451. Foundations of Organizations and Leadership. (4)** Lecture, four hours. Limited to Educational Leadership Program students. Promotion of understanding of traditional and contemporary conceptions of leadership and organizational theory, with application of these conceptions to student professional work settings. Letter grading.

**452A-452B. Educational Enterprise. (4-4)** Lecture, two hours; discussion, two hours. Limited to Educational Leadership Program students. Use of structural, human resource, political, and symbolic frames to study K-16 education. Letter grading. **452A.** Focus on purposes of education governance, finance, access, and equity. **452B.** Requisite: course 452A. Focus on educational environments, organizations, and curriculum and instruction.

**454A. Action Research: Collaboration in Change. (4)** Lecture, one hour; discussion, two hours; small group work, one hour. Limited to Educational Leadership Program students. Students carry out full cycle of action research at educational site. Projects done in

teams as students hone and assess their collaboration abilities. Exploration of qualitative and quantitative data gathering methods and analyses. Letter grading.

**454B. Action Research: Collaboration in Change. (4)** Lecture, one hour; discussion, two hours; small group work, one hour. Limited to Educational Leadership Program students. Second course in two-course sequence on learning how to do and use action research. Honing of team processes and team roles while collaborating on data collection and analysis at educational site. Letter grading.

**455. Writing and Inquiry. (4)** Lecture/workshop, eight hours per month; discussion, one hour; laboratory, one hour. Limited to doctoral students in Educational Leadership Program. Intended to assist students' professional development as writers, addressing style and organization, scholarly genres, modes of discourse, and broader issues of conceptualization and method. Letter grading.

**456. Altering Structure and Culture of Schooling. (4)** Lecture, four hours; discussion, four hours. Limited to Educational Leadership Program students. Using applied orientation, examination of variety of approaches to organizational change and ways to sustain change. Letter grading.

**458A-458B-458C. Practicum: Dissertation. (2-2-2)** Seminar, two hours; discussion, two hours. Preparation: completion of first- and second-year courses. Limited to Educational Leadership Program students. Development of EdD dissertation and its implementation to improve educational practice. Letter grading.

**460. Seminar: Special Issues in Evaluation. (2 or 4)** Seminar, one or two hours; discussion, one or two hours. Topics and instructors vary each term. Recent emphases included evaluation utilization and cost-effectiveness evaluation. S/U or letter grading.

**466. Critical Media Literacy: Teaching Youth to Critically Read and Create Media. (4)** Lecture, four hours. Preparation for educators to teach K-12 students to explore their relationships with media by critically questioning media representations and creating their own alternative media messages. Critical media literacy combines theoretical foundations of cultural studies and critical pedagogy with practical classroom applications of new digital media as well as traditional print-based means of communication. Exploration of media representations of race, class, gender, sexual orientation, and other identity markers. Educators critically question media and technology, as well as explore new alternatives for creating multimedia messages in their own classrooms. Analysis and creation of media projects related to teaching required. Letter grading.

**470A. Seminar: Large Systems and Individual Schools. (4)** Seminar, four hours. S/U or letter grading.

**471. Principles of Effective Coaching and Leadership. (4)** Seminar, four hours. Introduction to principles and practice of effective coaching and teaching for aspiring coaches considering careers in professional and collegiate athletics, K-12 schools, and community-based sports organizations. Premised on principles of social justice and on value and promise of equity, inclusion, and diversity for contributing to creation of more humane, equitable, and harmonious society and nation. Letter grading.

**472. Introduction to Philosophies of Coaching. (4)** Seminar, four hours. Introduction to philosophies of coaching—overarching frameworks, perspectives, deep beliefs, and values that drive coaches' specific practices—as they are manifested in writings and conduct of professional and college sport coaches. Exploration of these through study of successful coaches in variety of sports unpacking their fundamental keys of success. Reflection on and cultivation of one's own personal and intentional philosophy of coaching answering questions what is your why and what is your how. Exploration of questions such as what is coach, what is coach's overall purpose, what are desired results, how best can coach lead and produce these results. Methods and assignments include presentations, analyzing videos, group work, interviews, analyses of coaching philosophies, and constructing statement of one's own philosophy of coaching. Letter grading.

**473. Diversity Leadership in Sports and Athletics.**

(4) Seminar, four hours. Coaching and transformational leadership requires examination of important topics that depend upon analysis of complex, yet essential concepts. Examination and discussion of how and why sports, diversity, and leadership must be interconnected in order to meet needs of universities, professional organizations, and most importantly student-athletes. Sports as industry and as enterprise. Covers its history, purpose, evolution, and role in higher education and wider society. Emphasis on student-athletes' experiences and outcomes, well-being, and readiness for educational and professional opportunities in sports and beyond. Addresses growing need for greater gender, ethnic, and racial diversity in athletic leadership. While those who participate in sports, particularly those sports designated as revenue generating, represent much of gender and racial diversity in U.S., leadership of sports falls embarrassingly short. Emphasis on equity throughout. Letter grading.

**474. Ethical Issues in Sports. (4) Lecture, three hours.**

Coaches and sport management professionals are likely to face numerous ethical issues and dilemmas in their day-to-day professional practices. Introduction to salient moral and ethical issues involved in physical education, sports, and coaching. Students gain analytical tools to make ethically informed decisions by introducing normative principles and framework to guide decision-making in real-life situations. Covers content areas where ethical decision-making may be relevant including sportsmanship, gambling, coaching, parental responsibilities, violence, drug use and testing, race and gender equity, media, and commercialization of college sports. Includes lectures, discussions, analysis of case studies, and applications of decision-making tools to resolve ethical issues. Letter grading.

**475. Mental Health in Athletics and Coaching. (4) Lecture, three hours.**

Introduction to mental health issues in context of athletics and coaching. Mental health issues are prevalent and on rise among athletes. Coaches and other sports personnel are often first line of defense and are best positioned to recognize symptoms and refer athletes to appropriate care and interventions. Cultivates greater awareness of prevalence of mental health issues among athletes. Enables students to recognize common symptoms and manifestations of mental health concerns (e.g., depression, eating disorders, etc.). Students gain knowledge base for appropriate referrals and interventions, and range of tools for creation of safe spaces within their organizations to address mental health concerns. Cultivates informed practitioners who are sensitive to mental health concerns and empathetic to plight of many who suffer from these issues. Letter grading.

**476. History and Philosophy of Sport and Physical Education. (4) Lecture, four hours.**

Focus on philosophical positions of body as determined by philosophical schools and intellectuals, past and present. Investigation that philosophical position of body has been significant factor in determining historic development of sport and physical activity/physical education; e.g., throughout history there were times where body was not held in high esteem, which negatively impacted development of sport. Theology also had impact upon how people viewed body. Sometimes sport thrived; sometimes it was condemned depending on theological beliefs. Body has history that is tied to sport history. Modernization theory used to explain how sport and physical activity evolved from pre-modern practice to modern practice. Study takes chronological, descriptive, and interpretive approaches. Letter grading.

**477. Leadership and Management of Athletic Departments in Educational Institutions. (4) Seminar, four hours.**

Introduction to principles and practices of leadership and management of athletic departments in higher education with emphasis on social justice leadership. Students develop their own, authentic and intentional leadership philosophy for leading with purpose and integrity, and gain knowledge, skills, and values to effectively lead in athletic departments. Introduction to various models of leadership and to fundamental management skills such as strategic plan-

ning, project management, effective communication, team building, team leadership, program evaluation, and effecting organizational change. Includes readings, responses to readings, analyses of case studies, developing leadership philosophy of one's own, formulating vision and mission statements, constructing strategic plans, developing communication strategies, and other individual and collaborative assignments around leadership and management of athletic departments. Letter grading.

**481. Knowledge and Inquiry in Classroom. (4) Lecture, four hours.** Logical features of instruction and their application to inquiry techniques in teaching and learning. Various conceptions of truth, belief, and fact and opinion, and their application to classroom learning situations. S/U or letter grading.

**482D. Instructional Strategies in Urban Education: Visual and Performing Arts. (1 to 4) Lecture, two hours;**

discussion, two hours. Emphasis on instructional practices that integrate visual and performing arts into urban classrooms. Debriefing of field experiences implementing subject-centered arts instruction, instruction connecting arts disciplines, and instruction connecting arts and other core disciplines. Advanced exploration of elements of each art form, as well as content and emotional scaffolding strategies and reflection strategies to make learning accessible, engaging, and relevant. Letter grading.

**490A. Instructional Decision Making. (4) Lecture, four hours.**

Analysis of instructional models relevant to public school education. Assumptions, procedures, and constraints of each strategy considered in terms of learner and task variables. Laboratory experiences in classroom settings permit students systematically to apply and evaluate alternative instructional strategies. S/U or letter grading.

**491. Curricular Decision Making. (4) Lecture, two hours;**

discussion, two hours. Examination of alternative solutions for practical problems that classroom teachers face in making curricular decisions. Analysis of influences of psychological, societal, and institutional factors in curricular decisions. Letter grading.

**492. Data Centric Problem-Based Learning for Humanizing Purposes. (3) Lecture, three hours.**

Focuses on humanizing science, technology, engineering, and mathematics (STEM) education through integration of data science and connections to computational thinking into project-based learning (PBL) pedagogical approach. Integration of data connections to computational thinking further contextualizes humanizing STEM education. Participants (pre-service teachers) explore how their K-12 students' identities and lived experiences connect with STEM challenges. Critical analysis of data and practices of computational thinking (CT) are leveraged toward humanizing STEM purposes within curricular design and implementation of PBL project. Methods course is aligned with California state frameworks and California content standards for grades K-12, including English Language Development Standards—all of which address needs and various interests of diverse students. Letter grading.

**495. Teaching Preparation in Education. (2) Seminar, two hours.**

Teaching assistants (TA) are supported while becoming more effective and reflective teachers. Focus on how to create student-centered, inclusive learning experiences. Study of theory (relationship between teaching and learning), research (what we know about how people learn), and logistics (how this actually happens for students). Students gain understanding of serving as TA in education (e.g., departmental policies, responsibilities to students, how/where to get additional support, etc.). Students have opportunities to apply (in their own sections) what they learn, to reflect collaboratively on their ongoing TA experiences, and to learn from experienced TAs. S/U grading.

**498A-498B-498C. Directed Field Experience. (2 to 8 each) Clinical, to be arranged.**

Field experiences designed to increase understanding of student fields of study. May be repeated for credit. S/U or letter grading.

**499A-499B-499C. Advanced Directed Field Experience. (4 to 8 each) Clinical, to be arranged.** Dissertation practicum that supports students in developing their proposals. Guides students on how to write their dissertation proposals and serves as writing workshop where students have opportunities to receive feedback from instructors, fellows, and peers. May be repeated for credit. Letter grading.

**501. Cooperative Program in Special Education. (2 to 8) Tutorial, to be arranged.**

Preparation: consent of UCLA academic adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Limited to UCLA doctoral students in special education. Used to record enrollment in practicum courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Independent Study. (1 to 12) Tutorial, to be arranged (one hour per unit).** Individual study or research for graduate students. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive Examinations or Doctoral Qualifying Examinations. (1 to 12) Tutorial, to be arranged.** Individual study for master's comprehensive examinations or for PhD or EdD qualifying examinations. May be repeated for credit. S/U grading.

**598. Thesis Research. (4 to 12) Tutorial, to be arranged (four hours for every 4 units).** Research for and preparation of master's thesis. May be taken for maximum of 12 units. S/U grading.

**599. Dissertation Research. (4 to 12) Tutorial, to be arranged (four hours for every 4 units).** Research for and preparation of doctoral dissertation. May be repeated for credit. S/U grading.

## Faculty Roster

### Professors

Asad A. Abidi, PhD  
Abeer A.H. Alwan, PhD  
Danijela Cabric, PhD  
Robert N. Candler, PhD  
M.-C. Frank Chang, PhD (*Wintek Endowed Professor of Electrical Engineering*)  
Panagiotis D. Christofides, PhD (*William D. Van Vorst Professor of Chemical Engineering Education*)

Jason (Jingsheng) Cong, PhD (*Volgenau Professor of Engineering Excellence*)  
 Suhas N. Diggavi, PhD  
 Lara Dolecek, PhD  
 Christina P. Fragouli, PhD  
 Bahman Gharesifard, PhD  
 Puneet Gupta, PhD  
 Lei He, PhD  
 Subramanian S. Iyer, PhD (*Charles P. Reames Endowed Professor of Electrical Engineering*)  
 Mona Jarrahi, PhD (*Northrop Grumman Professor of Electrical Engineering*)  
 Chandrashekar J. Joshi, PhD  
 Douglas G. Lichtman, JD  
 Jia-Ming Liu, PhD (*Northrop Grumman Opto-Electronic Professor of Electrical Engineering*)  
 Wentai Liu, PhD  
 Dejan Markovic, PhD  
 Warren B. Mori, PhD  
 Ali Mosleh, PhD (*Evalyn Knight Professor of Engineering*)  
 Stanley J. Osher, PhD  
 Aydogan Ozcan, PhD (*Volgenau Professor of Engineering Innovation*)  
 Sudhakar Pamarti, PhD  
 Gregory J. Pottier, PhD  
 Yahya Rahmat-Samii, PhD (*Northrop Grumman Professor of Electrical Engineering/Electromagnetics*)  
 Behzad Razavi, PhD  
 Vwani P. Roychowdhury, PhD  
 Henry Samuelli, PhD  
 Majid Sarrafzadeh, PhD  
 Stefano Soatto, PhD  
 Jason L. Speyer, PhD  
 Mani B. Srivastava, PhD  
 Paulo Tabuada, PhD (*Vijay K. Dhir Professor of Engineering*)  
 Lieven Vandenberghe, PhD  
 John D. Villasenor, PhD  
 Kang L. Wang, PhD (*Raytheon Company Professor of Electrical Engineering*)  
 Yuanxun Ethan Wang, PhD  
 Richard D. Wesel, PhD  
 Benjamin S. Williams, PhD  
 Chee Wei Wong, PhD (*Carol and Lawrence E. Tannas, Jr. Endowed Term Professor of Engineering*)  
 Jason C.S. Woo, PhD  
 C.-K. Ken Yang, PhD  
 Lixia Zhang, PhD (*Jonathan B. Postel Professor of Computer Systems*)

### Professors Emeriti

Frederick G. Allen, PhD  
 Francis F. Chen, PhD  
 Babak Daneshrad, PhD  
 Harold R. Fetterman, PhD  
 Stephen E. Jacobsen, PhD  
 Rajeev Jain, PhD  
 Bahram Jalali, PhD (*Fang Lu Endowed Professor Emeritus of Engineering*)  
 William J. Kaiser, PhD  
 Alan J. Laub, PhD  
 Dee-Son Pan, PhD  
 Izhak Rubin, PhD  
 Ali H. Sayed, PhD  
 Frederick W. Schott, PhD  
 Gabor C. Temes, PhD

Mihaela van der Schaar, PhD  
 Alan N. Willson, Jr., PhD (*Charles P. Reames Endowed Professor Emeritus of Electrical Engineering*)  
 Kung Yao, PhD

### Associate Professors

Elaheh Ahmadi, PhD  
 Aydin Babakhani, PhD  
 Sam Emaminejad, PhD  
 Alyson K. Fletcher, PhD

### Assistant Professors

Omid Abari, PhD  
 Clarice D. Aiello, PhD  
 Sergio Carbajo, PhD  
 Xiang Anthony Chen, PhD  
 Achuta Kadambi, PhD  
 Jonathan C. Kao, PhD  
 Ankur M. Mehta, PhD  
 Nader Sehatbakhsh, PhD  
 Yuan Tian, PhD  
 Lin F. Yang, PhD  
 Yang Zhang, PhD

### Adjunct Professors

Darius Divsalar, PhD  
 Dan M. Goebel, PhD  
 Asad M. Madni, PhD

### Adjunct Associate Professor

Chi On Chui, PhD

### Adjunct Assistant Professors

Shervin Moloudi, PhD  
 Yair Rivenson, PhD

## Overview

Electrical and computer engineers are responsible for inventions that have revolutionized our society, such as the electrical grid, telecommunications, and automated computing and control. The profession continues to make vital contributions in many domains, such as the infusion of information technology into all aspects of daily life. To further these ends, the Department of Electrical and Computer Engineering fosters a dynamic academic environment that is committed to a tradition of excellence in teaching, research, and service. It has state-of-the-art research programs and facilities in a variety of fields. Departmental faculty members are engaged in research efforts across several disciplines in order to serve the needs of industry, government, society, and the scientific community. Interactions with other disciplines are strong. Faculty members regularly conduct collaborative research projects with colleagues in the Geffen School of Medicine; School of Education and Information Studies; School of Theater, Film, and Television; and College of Letters and Science.

## Research

The primary areas in the department are circuits and embedded systems, computer engineering, physical and wave electronics, and signals and systems. These areas cover a broad spectrum of specializations in, for example, communications and telecommunications, computer vision, control systems, cybersecurity,

rity, electromagnetics, embedded computer networking, embedded computing systems, engineering optimization, integrated circuits and systems, machine learning, microelectromechanical systems (MEMS), nanotechnology, photonics and optoelectronics, plasma electronics, signal processing, and solid-state electronics.

## Undergraduate Majors

### Computer Engineering BS

The undergraduate curriculum provides all Computer Engineering majors with preparation in the mathematical and scientific disciplines that lead to a set of courses that span the fundamentals of the discipline in the major areas of data science and embedded networked systems. These collectively provide an understanding of many inventions of importance to our society, such as the Internet of Things, human-cyber-physical systems, mobile/wearable/implantable systems, robotic systems, and more generally smart systems at all scales in diverse spheres. The design of hardware, software, and algorithmic elements of such systems represents an already dominant and rapidly growing part of the computer engineering profession. Students are encouraged to make use of their computer science and electrical and computer engineering electives and a two-quarter capstone design course to pursue deeper knowledge within one of these areas according to their interests, whether for graduate study or preparation for employment.

### Capstone Major

The Computer Engineering major is a designated capstone major that is jointly administered by the Computer Science and Electrical and Computer Engineering departments. Undergraduate students complete a design course in which they integrate their knowledge of the discipline and engage in creative design within realistic and professional constraints. Students apply their knowledge and expertise gained in previous mathematics, science, and engineering coursework. Students identify, formulate, and solve engineering problems and present their projects to the class.

### Learning Outcomes

The Computer Engineering major has the following learning outcomes:

- Application of mathematical, scientific, and engineering knowledge
- Design of a software or hardware system, component, or process to meet desired needs within realistic economic, environmental, social, ethical, health, safety, security, reliability, manufacturability, and sustainability constraints
- Function productively on a team with others
- Identification, formulation, and solution of computer engineering problems
- Effective communication

## Requirements

### Preparation for the Major

*Required:* Computer Science 1 (or Electrical and Computer Engineering 1), 31, 32, 33, 35L, M51A (or Electrical and Computer Engineering M16); Electrical and Computer Engineering 3; Engineering 96I; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 1A, 1B, 1C, and 4AL or 4BL.

### The Major

*Required:* Computer Science 111, 118 (or Electrical and Computer Engineering 132B), M151B (or Electrical and Computer Engineering M116C), M152A (or Electrical and Computer Engineering M116L), 180; Electrical and Computer Engineering 100, 102, 113, 115C; one course from Civil and Environmental Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, Statistics 100A; 8 units of computer science and 8 units of electrical and computer engineering upper-division electives; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; 8 units capstone design from either Electrical and Computer Engineering 180DA/180DB or 183DA/183DB.

## Policies

### The Major

An approved list of technical breadth courses is available in the [Office of Academic and Student Affairs](#).

For information on UC, school, and general education requirements, see the [Samueli school](#) section in College and Schools.

## Electrical Engineering BS

The undergraduate curriculum provides all Electrical Engineering majors with preparation in the mathematical and scientific disciplines that lead to a set of courses that span the fundamentals of the three major departmental areas of signals and systems, circuits and embedded systems, and physical wave electronics. These collectively provide an understanding of inventions of importance to society, such as integrated circuits, embedded systems, photonic devices, automatic computation and control, and telecommunication devices and systems.

Students are encouraged to make use of their electrical engineering electives and a two-term capstone design course to pursue deeper knowledge within one of these areas according to their interests, whether for graduate study or preparation for employment. See the [department website](#) for examples of specializations.

The Electrical Engineering major is accredited by the Engineering Accreditation Commission of [ABET](#).

### Capstone Major

The Electrical Engineering major is a designated capstone major. Undergraduate students complete a design course in which they integrate their knowledge of the discipline and engage in creative design within realistic and pro-

fessional constraints. Students apply their knowledge and expertise gained in previous mathematics, science, and engineering coursework. Within a multidisciplinary team structure, students identify, formulate, and solve engineering problems and present their projects to the class.

## Learning Outcomes

The Electrical Engineering major has the following learning outcomes:

- Application of knowledge of mathematics, science, and engineering
- Design of a system, component, or process to meet desired needs within realistic constraints
- Function as a productive member of a multidisciplinary team
- Effective communication
- Identification, formulation, and solution of electrical engineering problems

## Requirements

### Preparation for the Major

*Required:* Chemistry and Biochemistry 20A; Computer Science 31, 32; Electrical and Computer Engineering 2, 3, 10, 11L, M16 (or Computer Science M51A); Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

### The Major

*Required:* Electrical and Computer Engineering 101A, 102, 110, 111L, 113, 131A; six core courses selected from Computer Science 33, Electrical and Computer Engineering 101B, 115A, 121B, 132A, 133A, 141, 170A; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; 12 units of major field elective courses, at least 8 of which must be upper-division electrical and computer engineering courses—the remaining 4 units may be from upper-division electrical and computer engineering courses or from another engineering school department; and one two-term electrical and computer engineering capstone design course (8 units).

## Policies

### The Major

An approved list of technical breadth courses is available in the [Office of Academic and Student Affairs](#).

Electrical and Computer Engineering 100 and CM182 may not satisfy elective credit.

For information on UC, school, and general education requirements, see the [Samueli school](#) section in College and Schools.

## Undergraduate Minor

### Data Science Engineering Minor

The minor is intended to expose students to the entire data science life cycle from both

foundational and application perspectives. The foundational courses provide the engineering skills to collect, cleanse, and store data; analyze and draw inference from data; and take action and make decisions. A wide-ranging list of interdisciplinary courses focuses on various data-science applications using these skills.

## Admission

To apply for the minor, students must have an overall grade-point average of 3.0 or better, have completed or be in the process of completing in the present quarter the two lower-division required courses with the grade B- or better, and file a petition through Message Center. Steps to apply are outlined on the [Office of Academic and Student Affairs](#) website. Information about the minor and the application are available on the minor [website](#).

## The Minor

*Required Lower-Division Courses (8 units):* Computer Science 32, Mathematics 33A.

*Required Upper-Division Courses (12 units minimum):* One course from Civil and Engineering 110, Electrical and Computer Engineering 131A, Mathematics 170A, 170E, or Statistics 100A; Computer Science M148 or Electrical and Computer Engineering M148; Computer Science 145 or M146 or Electrical and Computer Engineering M146.

*Elective Upper-Division Courses (8 units minimum):* Two courses from Computer Science M119, CM121, CM122, CM124, 143, 145 or M146 (if not taken as a required course), 161, 180, M182, Electrical and Computer Engineering 102, 113, 114, M119, 133A, M146 (if not taken as a required course), C147, 183DA and 183DB (both must be taken), Mechanical and Aerospace Engineering C137, 185, Statistics 100B, 115, 170, or C180.

## Policies

Variable topics courses may be taken as topics apply.

Transfer credit for any of the above is subject to approval; consult with the undergraduate counselors before enrolling in any courses for the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and student must have a minimum grade of C in each and an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Major

### Electrical and Computer Engineering MS, PhD

The graduate program provides students with an opportunity to pursue advanced course-

work, in-depth training, and research investigations in several fields.

## Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

# Electrical and Computer Engineering

## Lower-Division Courses

**1. Undergraduate Seminar. (1)** Seminar, one hour; outside study, two hours. Introduction by faculty members and industry lecturers to electrical engineering disciplines through current and emerging applications of autonomous systems and vehicles, biomedical devices, aerospace electronic systems, consumer products, data science, and entertainment products (amusement rides, etc.), as well as energy generation, storage, and transmission. P/NP grading.

**2. Physics for Electrical Engineers. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: Physics 1C. Introduction to concepts of modern physics necessary to understand solid-state devices, including elementary quantum theory, Fermi energies, and concepts of electrons in solids. Discussion of electrical properties of semiconductors leading to operation of junction devices. Letter grading.

**2H. Physics for Electrical Engineers (Honors). (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: Physics 1C. Honors course parallel to course 2. Letter grading.

**3. Introduction to Electrical Engineering. (4)** Lecture, two hours; laboratory, two hours; outside study, eight hours. Introduction to field of electrical engineering. Basic circuits techniques with application to explanation of electrical engineering inventions such as telecommunications, electrical grid, automatic computing and control, and enabling device technology. Research frontiers of electrical engineering. Introduction to measurement and design of electrical circuits. Letter grading.

**10. Circuit Theory I. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 3 (or Computer Science 1 or Materials Science 10), Mathematics 33A, Physics 1B. Corequisites: course 11L (enforced only for Computer Science and Engineering and Electrical Engineering majors), Mathematics 33B. Introduction to linear circuit analysis. Resistive circuits, capacitors, inductors and ideal transformers, Kirchhoff laws, node and loop analysis, first-order circuits, second-order circuits, Thevenin and Norton theorem, sinusoidal steady state. Letter grading.

**10H. Circuit Theory I (Honors). (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 3 (or Computer Science 1 or Materials Science 10), Mathematics 33A, Physics 1B. Corequisites: course 11L (enforced only for Computer Science and Engineering and Electrical Engineering majors), Mathematics 33B. Honors course parallel to course 10. Letter grading.

**11L. Circuits Laboratory I. (1)** Lecture, one hour; laboratory, one hour; outside study, one hour. Enforced corequisite: course 10. Experiments with basic circuits containing resistors, capacitors, inductors, and transformers. Ohm's law voltage and current division, Thevenin and Norton equivalent circuits, superposition, transient and steady state analysis. Letter grading.

**M16. Logic Design of Digital Systems. (4)** (Same as Computer Science M51A.) Lecture, four hours; discussion, two hours; outside study, six hours. Introduction to digital systems. Specification and implementa-

tion of combinational and sequential systems. Standard logic modules and programmable logic arrays. Specification and implementation of algorithmic systems: data and control sections. Number systems and arithmetic algorithms. Error control codes for digital information. Letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**100. Electrical and Electronic Circuits. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: Mathematics 33A, 33B or Mechanical and Aerospace Engineering 82, Physics 1C. Not open for credit to students with credit for course 110. Electrical quantities, linear circuit elements, circuit principles, signal waveforms, transient and steady state circuit behavior, semiconductor diodes and transistors, small signal models, and operational amplifiers. Letter grading.

**101A. Engineering Electromagnetics. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Mathematics 32A and 32B, or 33A and 33B, Physics 1C. Electromagnetic field concepts, waves and phasors, transmission lines and Smith chart, transient responses, vector analysis, introduction to Maxwell equations, static and quasi-static electric and magnetic fields. Letter grading.

**101B. Electromagnetic Waves. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 101A. Time-varying fields and Maxwell equations, plane wave propagation and interaction with media, energy flow and Poynting vector, guided waves in waveguides, phase and group velocity, radiation and antennas. Letter grading.

**102. Systems and Signals. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: Mathematics 33A. Corequisite: Mathematics 33B. Elements of differential equations, first- and second-order equations, variation of parameters method and method of undetermined coefficients, existence and uniqueness. Systems: input/output description, linearity, time-invariance, and causality. Impulse response functions, superposition and convolution integrals. Laplace transforms and system functions. Fourier series and transforms. Frequency responses, responses of systems to periodic signals. Sampling theorem. Letter grading.

**110. Circuit Theory II. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisites: courses 10, M16 (or Computer Science M51A), 102. Corequisite: course 111L (enforced only for Computer Science and Engineering and Electrical Engineering majors). Sinusoidal excitation and phasors, AC steady state analysis, AC steady state power, network functions, poles and zeros, frequency response, mutual inductance, ideal transformer, application of Laplace transforms to circuit analysis. Letter grading.

**110H. Circuit Theory II (Honors). (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 10, M16 (or Computer Science M51A), 102. Corequisite: course 111L. Sinusoidal excitation and phasors, AC steady state analysis, AC steady state power, network functions, poles and

zeros, frequency response, mutual inductance, ideal transformer, application of Laplace transforms to circuit analysis. Letter grading.

**110L. Circuit Measurements Laboratory. (2)** Laboratory, four hours; outside study, two hours. Requisite: course 100 or 110. Experiments with basic circuits containing resistors, capacitors, inductors, and op-amps. Ohm's law voltage and current division, Thevenin and Norton equivalent circuits, superposition, transient and steady state analysis, and frequency response principles. Letter grading.

**111L. Circuits Laboratory II. (1)** Lecture, one hour; laboratory, one hour; outside study, one hour. Enforced requisites: courses 10, 11L. Enforced corequisite: course 110. Experiments with electrical circuits containing resistors, capacitors, inductors, transformers, and op-amps. Steady state power analysis, frequency response principles, op-amp-based circuit synthesis, and two-port network principles. Letter grading.

**112. Introduction to Power Systems. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 110. Complete overview of organization and operation of interconnected power systems. Development of appropriate models for interconnected power systems and learning how to perform power flow, economic dispatch, and short circuit analysis. Introduction to power system transient dynamics. Letter grading.

**113. Digital Signal Processing. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 102. Relationship between continuous-time and discrete-time signals. Z-transform. Discrete Fourier transform. Fast Fourier transform. Structures for digital filtering. Introduction to digital filter design techniques. Letter grading.

**113DA. Digital Signal Processing Design. (4)** Lecture, two hours; laboratory, four hours; outside study, six hours. Enforced requisite: course 113. Real-time implementation of digital signal processing algorithms on digital processor chips. Experiments involving A/D and D/A conversion, aliasing, digital filtering, sinusoidal oscillators, Fourier transforms, and finite wordlength effects. Course project involving original design and implementation of machine learning and signal processing systems for communications, radar, medical and other imaging, speech, music, or video using DSP hardware. In progress grading (credit to be given only on completion of course 113DB).

**113DB. Digital Signal Processing Design. (4)** Laboratory, four hours; outside study, eight hours. Enforced requisites: courses 113, 113DA. Real-time implementation of digital signal processing algorithms on digital processor chips. Experiments involving A/D and D/A conversion, aliasing, digital filtering, sinusoidal oscillators, Fourier transforms, and finite wordlength effects. Course project involving original design and implementation of signal processing systems for communications, speech, audio, or video using DSP chip. Completion of projects begun in course 113DA. Letter grading.

**114. Speech and Image Processing Systems Design. (4)** Lecture, three hours; discussion, one hour; laboratory, two hours; outside study, six hours. Enforced requisite: course 113. Design principles of speech and image processing systems. Speech production, analysis, and modeling in first half of course; design techniques for image enhancement, filtering, and transformation in second half. Lectures supplemented by laboratory implementation of speech and image processing tasks. Letter grading.

**115A. Analog Electronic Circuits I. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 110. Review of physics and operation of diodes and bipolar and MOS transistors. Equivalent circuits and models of semiconductor devices. Analysis and design of single-stage amplifiers. DC biasing circuits. Small-signal analysis. Operational amplifier systems. Letter grading.

**115AL. Analog Electronics Laboratory I. (2)** Laboratory, four hours; outside study, two hours. Enforced requisites: courses 110L or 111L, 115A. Experimental determination of device characteristics, resistive diode

circuits, single-stage amplifiers, compound transistor stages, effect of feedback on single-stage amplifiers, operational amplifiers, and operational amplifier circuits. Introduction to hands-on design experience based on individual student hardware design and implementation platforms. Letter grading.

**115B. Analog Electronic Circuits II. (4)** Lecture, four hours; discussion, one hour; outside study, eight hours. Enforced prerequisite: course 115A. Analysis and design of differential amplifiers in bipolar and CMOS technologies. Current mirrors and active loads. Frequency response of amplifiers. Feedback and its properties. Stability issues and frequency compensation. Letter grading.

**115C. Digital Electronic Circuits. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 100 or 115A, and Computer Science M51A. Transistor-level digital circuit analysis and design. Modern logic families (static CMOS, pass-transistor, dynamic logic), integrated circuit (IC) layout, digital circuits (logic gates, flipflops/latches, counters, etc.), computer-aided simulation of digital circuits. Letter grading.

**115E. Design Studies in Electronic Circuits. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced prerequisite: course 115B. Description of process of circuit design through lectures to complement other laboratory-based design courses. Topics vary by instructor and include communication circuits, power electronics, and instrumentation and measurement and may entail simulation-based design projects. Emphasis throughout on design-oriented analysis and rigorous approach to practical circuit design. Letter grading.

**M116C. Computer Systems Architecture. (4)** (Same as Computer Science M151B.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced prerequisites: course M16 or Computer Science M51A, Computer Science 33. Recommended: course M116L or Computer Science M152A, Computer Science 111. Computer system organization and design, implementation of CPU datapath and control, instruction set design, memory hierarchy (caches, main memory, virtual memory) organization and management, input/output subsystems (bus structures, interrupts, DMA), performance evaluation, pipelined processors. Letter grading.

**M116L. Introductory Digital Design Laboratory. (2)** (Same as Computer Science M152A.) Laboratory, four hours; outside study, two hours. Enforced prerequisite: course M16 or Computer Science M51A. Hands-on design, implementation, and debugging of digital logic circuits, use of computer-aided design tools for schematic capture and simulation, implementation of complex circuits using programmed array logic, design projects. Letter grading.

**M119. Fundamentals of Embedded Networked Systems. (4)** (Same as Computer Science M119.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 132B or Computer Science 118; one course from course 131A, Civil and Environmental Engineering 110, Mathematics 170A, 170E, Statistics 100A; Computer Science 33. Design tradeoffs and principles of operation of cyber physical systems such as devices and systems constituting Internet of Things. Topics include signal propagation and modeling, sensing, node architecture and operation, and applications. Letter grading.

**121B. Principles of Semiconductor Device Design. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced prerequisite: course 2. Introduction to principles of operation of bipolar and MOS transistors, equivalent circuits, high-frequency behavior, voltage limitations. Letter grading.

**121DA-121DB. Semiconductor Processing and Device Design. (4-4)** Design fabrication and characterization of p-n junction and transistors. Students perform various processing tasks such as wafer preparation, oxidation, diffusion, metallization, and photolithography. Introduction to CAD tools used in integrated circuit processing and device design. Device structure optimization tool based on MEDICI; process integration tool based on SUPREM. Course familiarizes students with those tools. Using CAD tools, CMOS process integration to be designed. **121DA.**

Lecture, four hours; laboratory, four hours; outside study, four hours. Enforced prerequisite or corequisite: course 121B. In progress grading (credit to be given only on completion of course 121DB). **121DB.** Lecture, two hours; laboratory, four hours; outside study, six hours. Enforced prerequisites: courses 121B, 121DA. Letter grading.

**123A. Fundamentals of Solid-State I. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 2 or Physics 1C. Limited to junior/senior engineering majors. Fundamentals of solid-state, introduction to quantum mechanics and quantum statistics applied to solid-state. Crystal structure, energy levels in solids, and band theory and semiconductor properties. Letter grading.

**123B. Fundamentals of Solid-State II. (4)** Lecture, four hours; outside study, eight hours. Enforced prerequisite: course 123A. Discussion of solid-state properties, lattice vibrations, thermal properties, dielectric, magnetic, and superconducting properties. Letter grading.

**128. Principles of Nanoelectronics. (4)** Lecture, four hours; discussion, four hours; outside study, four hours. Requisite: Physics 1C. Introduction to fundamentals of nanoscience for electronics nanosystems. Principles of fundamental quantities: electron charge, effective mass, Bohr magneton, and spin, as well as theoretical approaches. From these nanoscale components, discussion of basic behaviors of nanosystems such as analysis of dynamics, variability, and noise, contrasted with those of scaled CMOS. Incorporation of design project in which students are challenged to design electronics nanosystems. Letter grading.

**131A. Probability and Statistics. (4)** Lecture, four hours; discussion, one hour; outside study, 10 hours. Requisites: Mathematics 32B, 33B. Introduction to basic concepts of probability, including random variables and vectors, distributions and densities, moments, characteristic functions, and limit theorems. Applications to communication, control, and signal processing. Introduction to computer simulation and generation of random events. Letter grading.

**132A. Introduction to Communication Systems. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced prerequisites: courses 102, 113, 131A. Review of basic probability, basics of hypothesis testing, sufficient statistics and waveform communication, signal-design tradeoffs for digital communications, basics of error control coding, intersymbol interference channels and orthogonal frequency division multiplexing (OFDM), basics of wireless communications. Letter grading.

**132B. Data Communications and Telecommunication Networks. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced prerequisite: course 131A. Layered communications architectures. Queueing system modeling and analysis. Error control, flow and congestion control. Packet switching, circuit switching, and routing. Network performance analysis and design. Multiple-access communications: TDMA, FDMA, polling, random access. Local, metropolitan, wide area, integrated services networks. Letter grading.

**133A. Applied Numerical Computing. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced prerequisites: course 131A, and Civil Engineering M20 or Computer Science 31 or Mechanical and Aerospace Engineering M20. Introduction to numerical computing/analysis; analytic formulations versus numerical solutions; floating-point representations and rounding errors. Review of MATLAB; mathematical software. Linear equations; LU factorization; bounds on error; iterative methods for solving linear equations; conditioning and stability; complexity. Interpolation and approximation; splines. Zeros and roots of nonlinear equations. Linear least squares and orthogonal (QR) factorization; statistical interpretation. Numerical optimization; Newton method; nonlinear least squares. Numerical quadrature. Solving ordinary differential equations. Eigenvalues and singular values; QR algorithm; statistical applications. Letter grading.

**133B. Simulation, Optimization, and Data Analysis. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced prerequisite: course 133A. Simulation of dynamical systems. Algorithms for ordinary differential and difference equations. Fourier analysis; fast Fourier transforms. Random number generators. Simulation of stochastic systems, Monte Carlo methods. Constrained optimization; applications of optimization to engineering design, modeling, and data analysis. Introduction to data mining and machine learning. Algorithms and complexity. Integration of mathematical software in applications. Letter grading.

**134. Graph Theory in Engineering. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Basics of graph theory, including trees, bipartite graphs and matching, vertex and edge coloring, planar graphs and networks. Emphasis on reducing real-world engineering problems to graph theory formulations. Letter grading.

**141. Principles of Feedback Control. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced prerequisite: course 102. Mathematical modeling of physical control systems in form of differential equations and transfer functions. Design problems, system performance indices of feedback control systems via classical techniques, root-locus and frequency-domain methods. Computer-aided solution of design problems from real world. Letter grading.

**142. Linear Systems: State-Space Approach. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced prerequisite: course 102. State-space methods of linear system analysis and synthesis, with application to problems in networks, control, and system modeling. Letter grading.

**C143A. Neural Signal Processing. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 131A, Mathematics 33A. Topics include fundamental properties of electrical activity in neurons; technology for measuring neural activity; spiking statistics and Poisson processes; generative models and classification; regression and Kalman filtering; principal components analysis, factor analysis, and expectation maximization. Concurrently scheduled with course C243A. Letter grading.

**M146. Introduction to Machine Learning. (4)** (Same as Computer Science M146.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 131A or Civil and Environmental Engineering 110 or Mathematics 170A or 170E or Statistics 100A; Computer Science 32 or Program in Computing 10C; Mathematics 33A. Introduction to breadth of data science. Foundations for modeling data sources, principles of operation of common tools for data analysis, and application of tools and models to data gathering and analysis. Topics include statistical foundations, regression, classification, kernel methods, clustering, expectation maximization, principal component analysis, decision theory, reinforcement learning and deep learning. Letter grading.

**C147. Neural Networks and Deep Learning. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 131A, 133A or 205A, and M146, or equivalent. Review of machine learning concepts; maximum likelihood; supervised classification; neural network architectures; backpropagation; regularization for training neural networks; optimization for training neural networks; convolutional neural networks; practical CNN architectures; deep learning libraries in Python; recurrent neural networks, backpropagation through time, long short-term memory and gated recurrent units; variational autoencoders; generative adversarial networks; adversarial examples and training. Concurrently scheduled with course C247. Letter grading.

**M148. Introduction to Data Science. (4)** (Same as Computer Science M148.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: one course from 131A, Civil and Environmental Engineering 110, Mathematics 170A, Mathematics 170E, or Statistics 100A, and Computer Science 31 or Program in Computing 10A, and 10B. How to analyze data arising in real world so as to understand corresponding phenomenon. Covers topics in machine learning, data analytics, and statistical modeling clas-

sically employed for prediction. Comprehensive, hands-on overview of data science domain by blending theoretical and practical instruction. Data science lifecycle: data selection and cleaning, feature engineering, model selection, and prediction methodologies. Letter grading.

**149. Foundations of Computer Vision. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisites: courses 102, 131A, Mathematics 33A. Covers foundations of computer vision from both theoretical and practical perspective. Particular emphasis on classical computer vision, which should be seen as complementary to deep learning. Study is relevant for various majors in the sciences specializing in artificial intelligence, cyberphysical systems and information engineering, robotics, machine learning, perception, and others looking for applications. Letter grading.

**M153. Introduction to Microscale and Nanoscale Manufacturing. (4)** (Same as Bioengineering M153, Chemical Engineering M153, and Mechanical and Aerospace Engineering M183B.) Lecture, three hours; laboratory, four hours; outside study, five hours. Enforced requisites: Chemistry 20A, Physics 1A, 1B, 1C, 4AL. Introduction to general manufacturing methods, mechanisms, constraints, and microfabrication and nanofabrication. Focus on concepts, physics, and instruments of various microfabrication and nanofabrication techniques that have been broadly applied in industry and academia, including various photolithography technologies, physical and chemical deposition methods, and physical and chemical etching methods. Hands-on experience for fabricating microstructures and nanostructures in modern clean-room environment. Letter grading.

**162A. Wireless Communication Links and Antennas. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 101B. Basic properties of transmitting and receiving antennas and antenna arrays. Array synthesis. Adaptive arrays. Friis transmission formula, radar equations. Cell-site and mobile antennas, bandwidth budget. Noise in communication systems (transmission lines, antennas, atmospheric, etc.). Cell-site and mobile antennas, cell coverage for signal and traffic, interference, multipath fading, ray bending, and other propagation phenomena. Letter grading.

**163A. Introductory Microwave Circuits. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 101B. Transmission lines description of waveguides, impedance matching techniques, power dividers, directional couplers, active devices, transistor amplifier design. Letter grading.

**163C. Fundamental Principles of Radiofrequency and Microwave Systems. (4)** Lecture, four hours; outside study, eight hours. Enforced requisite: course 101B. Theory and design of modern radiofrequency (RF) and microwave systems such as cellular communications, satellite systems, radar systems, wireless sensors, and biological applications of microwaves such as magnetic resonance imaging (MRI). Letter grading.

**163DA. Microwave and Wireless Design I. (4)** Lecture, one hour; laboratory, three hours; outside study, eight hours. Enforced requisites: courses 101A, 101B. Course 163DA is enforced requisite to 163DB. Limited to senior Electrical Engineering majors. Capstone design course, with emphasis on transmission line-based circuits and components to address need in industry and research community for students with microwave and wireless circuit design experiences. Standard design procedure for waveguide and transmission line-based microwave circuits and systems to gain experience in using Microwave CAD software such as Agilent ADS or HFSS. How to fabricate and test these designs. In Progress grading (credit to be given only on completion of course 163DB).

**163DB. Microwave and Wireless Design II. (4)** Lecture, one hour; laboratory, three hours; outside study, eight hours. Enforced requisites: courses 101A, 101B, 163DA. Limited to senior Electrical Engineering majors. Design of radio frequency circuits and systems, with emphasis on both theoretical foundations and hands-on experience. Design of radio frequency

transceivers and their building blocks according to given specifications or in form of open-ended problems. Introduction to advanced topics related to projects through lecture and laboratories. Creation by students of end-to-end systems in application context, managing trade-offs across subsystems while meeting constraints and optimizing metrics related to cost, performance, ease of use, manufacturability, testing, and other real-world issues. Oral and written presentations of project results required. Letter grading.

**164DA-164DB. Electronic Circuits and Systems Design. (4-4)** Limited to senior Electrical Engineering majors. Design of analog circuits, components and systems, emphasizing theoretical foundations and hands-on experience. Design of key analog and digital building blocks according to given specifications or in form of open-ended problems. Introduction to advanced topics related to projects through lectures and laboratories. Creation by students of end-to-end systems in application context, managing trade-offs across subsystems while meeting constraints and optimizing metrics related to cost, performance, ease of use, manufacturability, testing, and other real-world issues. Oral and written presentations of project results required. **164DA.** Lecture, two hours; laboratory, two hours; outside study, eight hours. Requisite: course 115B (may be taken concurrently), or instructor consent. Course 164DA is enforced requisite to 164DB. In Progress (164DA) and letter (164DB) grading. **164DB.** Lecture, one hour; laboratory, three hours; outside study, eight hours. Enforced requisite: course 164DA. Letter grading.

**170A. Principles of Photonics. (4)** Lecture, four hours; recitation, one hour; outside study, seven hours. Enforced requisites: courses 2, 101A. Development of solid foundation on essential principles of photonics from ground up with minimum prior knowledge on this subject. Topics include optical properties of materials, optical wave propagation and modes, optical interferometers and resonators, optical coupling and modulation, optical absorption and emission, principles of lasers and light-emitting diodes, and optical detection. Letter grading.

**170B. Lasers and Photonic Devices. (4)** Lecture, four hours; recitation, one hour; outside study, seven hours. Enforced requisite: course 170A. Coverage of laser physics, related photonic devices, and applications of lasers. Topics include resonators, thermal radiation, Einstein coefficients, optical amplification, semiconductor lasers, optical modulation and detection. Letter grading.

**170C. Photonic Sensors and Solar Cells. (4)** Lecture, four hours; recitation, one hour; outside study, seven hours. Enforced requisite: course 101A. Recommended: courses 2, 170A. Fundamentals of detection of light for communication and sensing, as well as conversion of light to electrical energy in solar cells. Introduction to radiometry, semiconductor photodetectors, noise processes and figures of merit, thermal detectors, and photovoltaic solar cells of various types and materials. Letter grading.

**M171L. Data Communication Systems Laboratory. (2 to 4)** (Same as Computer Science M171L.) Laboratory, four to eight hours; outside study, two to four hours. Recommended preparation: course M116L. Limited to seniors. Not open to students with credit for course M117. Interpretation of analog-signaling aspects of digital systems and data communications through experience in using contemporary test instruments to generate and display signals in relevant laboratory setups. Use of oscilloscopes, pulse and function generators, baseband spectrum analyzers, desktop computers, terminals, modems, PCs, and workstations in experiments on pulse transmission impairments, waveforms and their spectra, modem and terminal characteristics, and interfaces. Letter grading.

**173DA-173DB. Photonics and Communication Design. (4-4)** Lecture, one hour; laboratory, three hours; outside study, eight hours. Introduction to measurement of basic photonic devices, including LEDs, lasers, detectors, and amplifiers; fiber-optic fundamentals and measurement of fiber systems. Modulation techniques, including AM, FM, phase and suppressed

carrier methods. Possible projects include lasers, optical communication, and biomedical imaging and sensing. **173DA.** Enforced requisite: course 101A. Recommended: course 170A or Bioengineering C170. Choice of project preliminary design. In Progress grading (credit to be given only on completion of course 173DB). **173DB.** Enforced requisites: courses 101A, 173DA. Finalization of design and testing of projects begun in course 173DA. Letter grading.

**176. Photonics in Biomedical Applications. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: course 101A. Study of different types of optical systems and their physics background. Examination of their roles in current and projected biomedical applications. Specific capabilities of photonics to be related to each example. Letter grading.

**180DA-180DW. Systems Design. (4-4)** Advanced systems design integrating communications, control, and signal processing subsystems. Introduction to advanced topics related to projects through lecture and laboratories. Open-ended projects vary each offering. Student teams create high-performance designs that manage trade-offs among subsystem components, including cost, performance, ease of use, and other real-world constraints. Societal implications of such systems. Professional technical writing instruction and assignments. Oral and written presentation of project results. **180DA.** Lecture, two hours; laboratory, four hours; outside study, six hours. Limited to senior Electrical Engineering and Computer Engineering majors. In Progress grading (credit to be given only on completion of course 180DW). **180DW.** (Formerly numbered 180DB.) Laboratory, four hours; outside study, eight hours. Enforced requisite: course 180DA. Completion of projects begun in course 180DA. Satisfies Writing II requirement. Letter grading.

**181DA-181DB. Honors Thesis. (4-4)** Tutorial, one hour; outside study, 11 hours. Limited to seniors. Research by individuals or small teams under supervision of faculty mentor, leading to composition and presentation of honors thesis. Study of fundamentals of modern research and development: project conception, planning, development and testing; design iteration cycle; research and data documentation standards; how to read technical literature. Planning, execution, and documentation of original open-ended research/development project. **181DA.** Study of research fundamentals, conception of project plan, and first iteration of design such as experiment, simulation, algorithm, or hardware artifact, each with testing and validation plan. Written documentation of design with oral presentation. In Progress grading (credit to be given only on completion of course 181DB). **181DB.** Enforced requisite: course 181DA. Iterations of design. Written documentation in form of thesis documenting results in their societal and technical contexts, and oral presentation/demonstration of final results. Letter grading.

**CM182. Science, Technology, and Public Policy. (4)** (Same as Public Affairs M164 and Public Policy CM182.) Lecture, three hours. Recent and continuing advances in science and technology are raising profoundly important public policy issues. Consideration of selection of critical policy issues, each of which has substantial ethical, social, economic, political, scientific, and technological aspects. Concurrently scheduled with course CM282. Letter grading.

**183DA. Design of Robotic Systems I. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Requisite: course 102. Recommended: courses 141, 142. Course 183DA is requisite to 183DB. Limited to senior Electrical Engineering majors. Topics in robotic design include integrated electromechanical design, design for manufacturing (DFM), design software, and design automation. Topics in robotic manufacturing include materials, sensors and actuators, programming, and rapid prototyping. Topics in control include manipulation, motion and path planning, learning and adaptation, and human-robot interaction. Additional topics may include distributed and multi-robot systems, bio-inspired robotics, project management, and societal implications. Open-ended projects vary annually. Student teams create and analyze robotic systems for various applications. Oral and

written presentation of project results. In Progress grading (credit to be given only on completion of course 183DB).

**183DB. Design of Robotic Systems II. (4)** Laboratory, four hours; outside study, eight hours. Requisite: course 183DA. Recommended: courses 141, 142. Limited to senior Electrical Engineering majors. Topics in robotic design include integrated electromechanical design, design for manufacturing (DFM), design software, and design automation. Topics in robotic manufacturing include materials, sensors and actuators, programming, and rapid prototyping. Topics in control include manipulation, motion and path planning, learning and adaptation, and human-robot interaction. Additional topics may include distributed and multi-robot systems, bio-inspired robotics, project management, and societal implications. Open-ended projects vary annually. Student teams create and analyze robotic systems for various applications. Oral and written presentation of project results. Letter grading.

**184DA-184DB. Independent Group Project Design. (2-2)** Laboratory, five hours; discussion, one hour. Enforced requisites: courses M16, 110, 110L. Course 184DA is enforced prerequisite to 184DB. Courses centered on group project that runs year long to give students intensive experience on hardware design, microcontroller programming, and project coordination. Several projects based on autonomous robots that traverse small mazes and courses offered yearly and target regional competitions. Students may submit proposals that are evaluated and approved by faculty members. Topics include sensing circuits and amplifier-based design, microcontroller programming, feedback control, actuation, and motor control. In Progress (184DA) and letter (184DB) grading.

**M185. Introduction to Plasma Science and Engineering. (4)** (Same as Earth, Planetary, and Space Sciences M156 and Physics M122.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 101A or Physics 110B. Senior-level introductory course on electrodynamics of charged particles and their collective behavior in plasmas in laboratory, near-Earth space and astrophysical settings. Covers selected applications taken from fusion energy, space weather, materials processing, generation of coherent radiation and particle accelerators. Letter grading.

**188. Special Courses in Electrical Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Special topics in electrical engineering for undergraduate students taught on experimental or temporary basis, such as those taught by resident and visiting faculty members. May be repeated once for credit with topic or instructor change. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**194. Research Group Seminars: Electrical Engineering. (2 to 4)** Seminar, four hours; outside study, eight hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field. May be repeated for credit. Letter grading.

**199. Directed Research in Electrical Engineering. (2 to 8)** Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit with school approval. Individual contract required; enrollment petitions available in Office of Academic and Student Affairs. Letter grading.

## Graduate Courses

**201A. VLSI Design Automation. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 115C. Fundamentals of design automation of VLSI circuits and systems, including introduction to circuit and system platforms such as field

programmable gate arrays and multicore systems; high-level synthesis, logic synthesis, and technology mapping; physical design; and testing and verification. Letter grading.

**201C. Modeling of VLSI Circuits and Systems. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 115C. Detailed study of VLSI circuit and system models considering performance, signal integrity, power and thermal effects, reliability, and manufacturability. Discussion of principles of modeling and optimization codevelopment. Letter grading.

**201D. Design in Nanoscale Technologies. (4)** Lecture, four hours; outside study, eight hours. Enforced prerequisite: course 115C. Challenges of digital circuit design and layout in deeply scaled technologies, with focus on design-manufacturing interactions. Summary of large-scale digital design flow; basic manufacturing flow; lithographic patterning, resolution enhancement, and mask preparation; yield and variation modeling; circuit reliability and aging issues; design rules and their origins; layout design for manufacturing; test structures and process control; circuit and architecture methods for variability mitigation. Letter grading.

**M202A. Embedded Systems. (4)** (Same as Computer Science M213A.) Lecture, four hours; discussion, one hour; outside study, seven hours. Designed for graduate computer science and electrical engineering students. Methodologies and technologies for design of embedded systems. Topics include hardware and software platforms for embedded systems, techniques for modeling and specification of system behavior, software organization, real-time operating system scheduling, real-time communication and packet scheduling, low-power battery and energy-aware system design, timing synchronization, fault tolerance and debugging, and techniques for hardware and software architecture optimization. Theoretical foundations as well as practical design methods. Letter grading.

**M202B. Energy-Aware Computing and Cyber-Physical Systems. (4)** (Same as Computer Science M213B.) Lecture, four hours; outside study, eight hours. Requisite: course M16 or Computer Science M51A. Recommended: course M116C or Computer Science M151B, and Computer Science 111. System-level management and cross-layer methods for power and energy consumption in computing and communication at various scales ranging across embedded, mobile, personal, enterprise, and data-center scale. Computing, networking, sensing, and control technologies and algorithms for improving energy sustainability in human-cyber-physical systems. Topics include modeling of energy consumption, energy sources, and energy storage; dynamic power management; power-performance scaling and energy proportionality; duty-cycling; power-aware scheduling; low-power protocols; battery modeling and management; thermal management; sensing of power consumption. Letter grading.

**202C. Networked Embedded Systems Design. (4)** Lecture, four hours; laboratory, four hours; outside study, four hours. Designed for graduate computer science and electrical engineering students. Training in combination of networked embedded systems design combining embedded hardware platform, embedded operating system, and hardware/software interface. Essential graduate student background for research and industry career paths in wireless devices for applications ranging from conventional wireless mobile devices to new area of wireless health. Laboratory design modules and course projects based on state-of-art embedded hardware platform. Letter grading.

**205A. Matrix Analysis for Scientists and Engineers. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Preparation: one undergraduate linear algebra course. Designed for first-year graduate students in all branches of engineering, science, and related disciplines. Introduction to matrix theory and linear algebra, language in which virtually all of modern science and engineering is conducted. Review of matrices taught in undergraduate courses and introduction to graduate-level topics. Letter grading.

**M206. Machine Perception. (4)** (Same as Computer Science M268.) Lecture, four hours; discussion, two hours; outside study, six hours. Designed for graduate students. Computational aspects of processing visual and other sensory information. Unified treatment of early vision in man and machine. Integration of symbolic and iconic representations in process of image segmentation. Computing multimodal sensory information by neural-net architectures. Letter grading.

**M208B. Functional Analysis for Applied Mathematics and Engineering. (4)** (Same as Mathematics M268A.) Lecture, four hours; outside study, eight hours. Requisites: course 208A (or Mathematics 115A and 115B), Mathematics 131A, 131B, 132. Topics may include  $L^p$  spaces, Hilbert, Banach, and separable spaces; Fourier transforms; linear functionals. Riesz representation theory, linear operators and their adjoints; self-adjoint and compact operators. Spectral theory. Differential operators such as Laplacian and eigenvalue problems. Resolvent distributions and Green's functions. Semigroups. Applications. S/U or letter grading.

**M208C. Topics in Functional Analysis for Applied Mathematics and Engineering. (4)** (Same as Mathematics M268B.) Lecture, four hours; outside study, eight hours. Requisite: course M208B. Semigroups of linear operators over Hilbert spaces; generator and resolvent, generation theorems, Laplace inversion formula. Dissipative operators and contraction semigroups. Analytic semigroups and spectral representation. Semigroups with compact resolvents. Parabolic and hyperbolic systems. Controllability and stabilizability. Spectral theory of differential operators, PDEs, generalized functions. S/U or letter grading.

**209AS. Special Topics in Circuits and Embedded Systems. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Special topics in one or more aspects of circuits and embedded systems, such as digital, analog, mixed-signal, and radio frequency integrated circuits (RF ICs); electronic design automation; wireless communication circuits and systems; embedded processor architectures; embedded software; distributed sensor and actuator networks; robotics; and embedded security. May be repeated for credit with topic change. S/U or letter grading.

**209BS. Seminar: Circuits and Embedded Systems. (2 to 4)** Seminar, two to four hours; outside study, four to eight hours. Seminars and discussions on current and advanced topics in one or more aspects of circuits and embedded systems, such as digital, analog, mixed-signal, and radio frequency integrated circuits (RF ICs); electronic design automation; wireless communication circuits and systems; embedded processor architectures; embedded software; distributed sensor and actuator networks; robotics; and embedded security. May be repeated for credit with topic change. S/U or letter grading.

**210A. Adaptation and Learning. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Preparation: prior training in probability theory, random processes, and linear algebra. Recommended requisites: courses 205A, 241A. Mean-square-error estimation and filters, least-squares estimation and filters, steepest-descent algorithms, stochastic-gradient algorithms, convergence, stability, tracking, and performance, algorithms for adaptation and learning, adaptive filters, learning and classification, optimization. Letter grading.

**210B. Inference over Networks. (4)** Lecture, four hours; outside study, eight hours. Preparation: prior training in probability theory, random processes, linear algebra, and adaptation. Enforced prerequisite: course 210A. Adaptation, learning, estimation, and detection over networks. Steepest-descent algorithms, stochastic-gradient algorithms, convergence, stability, tracking, and performance analyses. Distributed optimization. Online and distributed adaptation and learning. Synchronous and asynchronous network behavior. Incremental, consensus, diffusion, and gossip strategies. Letter grading.

**211A. Digital Image Processing I. (4)** Lecture, three hours; discussion, one hour; laboratory, four hours; outside study, four hours. Preparation: computer programming experience. Requisite: course 113. Fundamentals of digital image processing theory and tech-

niques. Topics include two-dimensional linear system theory, image transforms, and enhancement. Concepts covered in lecture applied in computer laboratory assignments. Letter grading.

**212A. Theory and Design of Digital Filters. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 113. Approximation of filter specifications. Use of design charts. Structures for recursive digital filters. FIR filter design techniques. Comparison of IIR and FIR structures. Implementation of digital filters. Limit cycles. Overflow oscillations. Discrete random signals. Wave digital filters. Letter grading.

**M214A. Digital Speech Processing. (4)** (Same as Bioengineering M214A.) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisite: course 113. Theory and applications of digital processing of speech signals. Mathematical models of human speech production and perception mechanisms, speech analysis/synthesis. Techniques include linear prediction, filter-bank models, and homomorphic filtering. Applications to speech synthesis, automatic recognition, and hearing aids. Letter grading.

**214B. Advanced Topics in Speech Processing. (4)** Lecture, three hours; discussion, one hour; computer assignments, two hours; outside study, six hours. Requisite: course M214A. Advanced techniques used in various speech-processing applications, with focus on speech recognition by humans and machine. Physiology and psychoacoustics of human perception. Dynamic Time Warping (DTW) and Hidden Markov Models (HMM) for automatic speech recognition systems, pattern classification, and search algorithms. Aids for hearing impaired. Letter grading.

**215A. Analog Integrated Circuit Design. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 115B. Analysis and design of analog integrated circuits. MOS and bipolar device structures and models, single-stage and differential amplifiers, noise, feedback, operational amplifiers, offset and distortion, sampling devices and discrete-time circuits, bandgap references. Letter grading.

**215B. Advanced Digital Integrated Circuits. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 115C, M216A. Analysis and comparison of modern logic families. VLSI memories (SRAM, DRAM, and ROMs). Accuracy of various simulation models and simulation methods for digital circuits. Letter grading.

**215C. Analysis and Design of RF Circuits and Systems. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 215A. Principles of RF circuit and system design, with emphasis on monolithic implementation in VLSI technologies. Basic concepts, communications background, transceiver architectures, low-noise amplifiers and mixers, oscillators, frequency synthesizers, power amplifiers. Letter grading.

**215D. Analog Microsystem Design. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 215A. Analysis and design of data conversion interfaces and filters. Sampling circuits and architectures, D/A conversion techniques, A/D converter architectures, building blocks, precision techniques, discrete- and continuous-time filters. Letter grading.

**215E. Signaling and Synchronization. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 215A, M216A. Analysis and design of circuits for synchronization and communication for VLSI systems. Use of both digital and analog design techniques to improve data rate of electronics between functional blocks, chips, and systems. Advanced clocking methodologies, phase-locked loop design for clock generation, and high-performance wire-line transmitters, receivers, and timing recovery circuits. Letter grading.

**M216A. Design of VLSI Circuits and Systems. (4)** (Same as Computer Science M258A.) Lecture, four hours; discussion, two hours; laboratory, four hours; outside study, two hours. Requisites: courses M16 or Computer Science M51A, and 115A. Recommended: course 115C. LSI/VLSI design and application in com-

puter systems. Fundamental design techniques that can be used to implement complex integrated systems on chips. Letter grading.

**216B. VLSI Signal Processing. (4)** Lecture, four hours; outside study, eight hours. Advanced concepts in VLSI signal processing, with emphasis on architecture design and optimization within block-based description that can be mapped to hardware. Fundamental concepts from digital signal processing (DSP) theory, architecture, and circuit design applied to complex DSP algorithms in emerging applications for personal communications and healthcare. Letter grading.

**M216C. LSI in Computer System Design. (4)** (Same as Computer Science M258C.) Lecture, four hours; laboratory, four hours; outside study, four hours. Requisite: course M216A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. Letter grading.

**M217. Biomedical Imaging. (4)** (Same as Bioengineering M217.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 114 or 211A. Optical imaging modalities in biomedicine. Other nonoptical imaging modalities discussed briefly for comparison purposes. Letter grading.

**218. Network Economics and Game Theory. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Discussion of how different cooperative and noncooperative games among agents can be constructed to model, analyze, optimize, and shape emerging interactions among users in different networks and system settings. How strategic agents can successfully compete with each other for limited and time-varying resources by optimizing their decision process and learning from their past interaction with other agents. To determine their optimal actions in these distributed, informationally decentralized environments, agents need to learn and model directly or implicitly other agents' responses to their actions. Discussion of existing multiagent learning techniques and learning in games, including adjustment processes for learning equilibria, fictitious play, regret-learning, and more. Letter grading.

**219. Large-Scale Data Mining: Models and Algorithms. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Introduction of variety of scalable data modeling tools, both predictive and causal, from different disciplines. Topics include supervised and unsupervised data modeling tools from machine learning, such as support vector machines, different regression engines, different types of regularization and kernel techniques, deep learning, and Bayesian graphical models. Emphasis on techniques to evaluate relative performance of different methods and their applicability. Includes computer projects that explore entire data analysis and modeling cycle: collecting and cleaning large-scale data, deriving predictive and causal models, and evaluating performance of different models. Letter grading.

**221A. Physics of Semiconductor Devices I. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Physical principles and design considerations of junction devices. Letter grading.

**221B. Physics of Semiconductor Devices II. (4)** Lecture, four hours; outside study, eight hours. Principles and design considerations of field effect devices and charge-coupled devices. Letter grading.

**221C. Microwave Semiconductor Devices. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Physical principles and design considerations of microwave solid-state devices: Schottky barrier mixer diodes, IMPATT diodes, transferred electron devices, tunnel diodes, microwave transistors. Letter grading.

**222. Integrated Circuits Fabrication Processes. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 2. Principles of integrated circuits fabrication processes. Technological limitations of integrated circuits design. Topics include bulk crystal and epitaxial growth, thermal oxidation, diffusion, ion-implantation, chemical vapor deposition, dry etching, lithography, and metallization. Introduction of advanced process simulation tools. Letter grading.

**223. Solid-State Electronics I. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Recommended requisite: course 270. Energy band theory, electronic band structure of various elementary, compound, and alloy semiconductors, defects in semiconductors. Recombination mechanisms, transport properties. Letter grading.

**224. Solid-State Electronics II. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 223. Techniques to solve Boltzmann transport equation, various scattering mechanisms in semiconductors, high field transport properties in semiconductors, Monte Carlo method in transport. Optical properties. Letter grading.

**225. Physics of Semiconductor Nanostructures and Devices. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 223. Theoretical methods for circulating electronics and optical properties of semiconductor structures. Quantum size effects and low-dimensional systems. Application to semiconductor nanometer scale devices, including negative resistance diodes, transistors, and detectors. Letter grading.

**229. Seminar: Advanced Topics in Solid-State Electronics. (4)** Seminar, four hours; outside study, eight hours. Requisites: courses 223, 224. Current research areas, such as radiation effects in semiconductor devices, diffusion in semiconductors, optical and microwave semiconductor devices, nonlinear optics, and electron emission. Letter grading.

**229S. Advanced Electrical Engineering Seminar. (2)** Seminar, two hours; outside study, six hours. Preparation: successful completion of PhD major field examination. Seminar on current research topics in solid-state and quantum electronics (Section 1) or in electronic circuit theory and applications (Section 2). Students report on tutorial topic and on research topic in their dissertation area. May be repeated for credit. S/U grading.

**230A. Detection and Estimation in Communication. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Applications of estimation and detection concepts in communication and signal processing; random signal and noise characterizations by analysis and simulations; mean square (MS) and maximum likelihood (ML) estimations and algorithms; detection under ML, Bayes, and Neyman/Pearson (NP) criteria; signal-to-noise ratio (SNR) and error probability evaluations. Introduction to Monte Carlo simulations. Letter grading.

**230B. Digital Communication Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 132A, 230A. Principles and practical techniques for communication at physical and multiple access layers. Review of communications over Gaussian channel. Synchronization and adaptive equalization. Nonlinear impairments in radio transceivers. Wireless channel models, diversity techniques, and link budgets. Modulations for wireless channels. Multi-antenna methods. Wireless multiple access and resource allocation techniques. Scalable approaches to meeting wireless data rate demand. Letter grading.

**230C. Signal Processing in Communications. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 230A. Concepts and implementations of signal processing in communication and signal processing systems. Spectral analysis using Fourier transform and windowing, parametric modeling, eigen-decomposition methods, time-frequency analysis, wavelet transform, and sub-band processing. Array processing using beamforming for SNIR enhancement, smart antenna, and source separation and localization. Introduction to compressive sampling and applications. Letter grading.

**230D. Algorithms and Processing in Communication Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 230A. Review of computational linear algebra methods on QRD, eigen- and singular-value decompositions, and LS estimation with applications to estimation and detection in communication, radar, speech, image, and array processing systems. Systolic and parallel algorithms and VLSI architectures for high performance and high throughput real-time estimation, detection, decoding, and beamforming applications. Letter grading.

**231A. Information Theory: Channel and Source Coding. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Fundamentals information compression, transmission, processing, and learning. Topics include limits and algorithms for lossless data compression, connections to model estimation and learning, channel capacity, rate versus distortion in lossy compression, and basics of information theory for networks. Letter grading.

**231B. Network Information Theory. (4)** Lecture, four hours; outside study, eight hours. Enforced requisite: course 231A. Point-to-point multiple-input, multiple-output (MIMO) wireless channels: capacity and outage; single-hop networks: multiple access, broadcast, interference, and relay channels; channels and sources with side-information; basics of multiterminal lossy data compression; basics of network information flow over general noisy networks. Letter grading.

**231E. Channel Coding Theory. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A. Fundamentals of error control codes and decoding algorithms. Topics include block codes, convolutional codes, trellis codes, and turbo codes. Letter grading.

**232A. Stochastic Modeling with Applications to Telecommunication Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A. Stochastic processes as applied to study of telecommunication systems, traffic engineering, business, and management. Discrete-time and continuous-time Markov chain processes. Renewal processes, regenerative processes, Markov-renewal, semi-Markov and semiregenerative stochastic processes. Decision and reward processes. Applications to traffic and queueing analysis of basic telecommunications and computer communication networks, Internet, and management systems. Letter grading.

**232B. Queuing Systems and Intelligent Transportation Networks. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A or equivalent. Modeling, analysis, and design of queuing systems; traffic management and design of intelligent transportation systems, communications networks, autonomous vehicular networks, business and management systems. Markovian and non-Markovian queuing systems and networks. Applications to traffic engineering, transportation and autonomous vehicular systems; computer communications, management and business systems. Letter grading.

**232D. Communications Networking and Traffic Management for Autonomous Mobile Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A or equivalent. Analysis, design, and traffic management of autonomous mobile systems. Telecommunication networks, mobile wireless networks, and multiple-access communication systems. Networking architectures, multiple-access communications under adaptive quality-of-service metrics. Switching, routing, networking protocols, and Internet. Autonomous mobile networked systems. Cellular wireless networks, WiFi mesh networks, peer-to-peer mobile ad hoc wireless networks. Autonomous transportation networked systems. Traffic management architectures in support of self-driving cars. Smart grid networks. Adaptive multimedia streaming over mobile wireless networks. Embedded sensor networks. Energy and pollution aware sustainable networking. Security mechanisms. Letter grading.

**232E. Large-Scale Social and Complex Networks: Design and Algorithms. (4)** Lecture, four hours; recitation, one hour; outside study, seven hours. Modeling and design of large-scale complex networks, including social networks, peer-to-peer file-sharing networks, World Wide Web, and gene networks. Modeling of characteristic topological features of complex networks, such as power laws and percolation threshold. Mining topology to design algorithms for various applications, such as e-mail spam detection, friendship recommendations, viral popularity, and epidemics. Introduction to network algorithms, computational complexity, and nondeterministic, polynomial-time completeness. Letter grading.

**233. Wireless Communications System Design, Modeling, and Implementation. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 113. Covers algorithms, architec-

tures, and implementation for radio transceivers, physical, and network layer functionalities. Topics include wireless channel modeling, single-carrier and multi-carrier systems, multiple antenna systems, radio impairments and their correction, architectures and circuits design trade-offs, wideband spectrum sensing, wideband signaling, cognitive radio, massive multiple-input, multiple-output (MIMO) systems, and applications in 5G and Internet of things (IoT) communication. Letter grading.

**234A. Network Coding Theory and Applications. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Algebraic approach and main theorem in network coding, combinatorial approach and alphabet size, linear programming approach and throughput benefits, network code design algorithms, secure network coding, network coding for wireless, other applications. Letter grading.

**235A. Mathematical Foundations of Data Storage Systems. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A or equivalent. Research developments in new mathematical techniques for emerging large-scale, ultra-reliable, fast, and affordable data storage systems. Topics include, but are not limited to, graph-based codes and algebraic codes and decoders for modern storage devices (e.g., Flash), rank modulation, rewriting codes, algorithms for data deduplication and synchronization, and redundant array of independent disks (RAID) systems. Letter grading.

**236A. Linear Programming. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: Mathematics 115A or equivalent knowledge of linear algebra. Basic graduate course in linear optimization. Geometry of linear programming. Duality. Simplex method. Interior-point methods. Decomposition and large-scale linear programming. Quadratic programming and complementary pivot theory. Engineering applications. Introduction to integer linear programming and computational complexity theory. Letter grading.

**236B. Convex Optimization. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 236A. Introduction to convex optimization and its applications. Convex sets, functions, and basics of convex analysis. Convex optimization problems (linear and quadratic programming, second-order cone and semidefinite programming, geometric programming). Lagrange duality and optimality conditions. Applications of convex optimization. Unconstrained minimization methods. Interior-point and cutting-plane algorithms. Introduction to nonlinear programming. Letter grading.

**236C. Optimization Methods for Large-Scale Systems. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 236B. First-order algorithms for convex optimization: sub-gradient method, conjugate gradient method, proximal gradient and accelerated proximal gradient methods, block coordinate descent. Decomposition of large-scale optimization problems. Augmented Lagrangian method and alternating direction method of multipliers. Monotone operators and operator-splitting algorithms. Second-order algorithms: inexact Newton methods, interior-point algorithms for conic optimization. Letter grading.

**M237. Dynamic Programming. (4)** (Same as Mechanical and Aerospace Engineering M276.) Lecture, four hours; outside study, eight hours. Recommended requisite: course 232A or 236A or 236B. Introduction to mathematical analysis of sequential decision processes. Finite horizon model in both deterministic and stochastic cases. Finite-state infinite horizon model. Methods of solution. Examples from inventory theory, finance, optimal control and estimation, Markov decision processes, combinatorial optimization, communications. Letter grading.

**238. Multimedia Communications and Processing. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Key concepts, principles, and algorithms of online learning and learning how to make decisions under uncertainty in broad context, including Markov decision processes, optimal stopping, reinforcement learning,

structural results for online learning, multiarmed bandits learning, multiagent learning, multiagent deep learning. Letter grading.

**239AS. Special Topics in Signals and Systems. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Special topics in one or more aspects of signals and systems, such as communications, control, image processing, information theory, multimedia, computer networking, optimization, speech processing, telecommunications, and VLSI signal processing. May be repeated for credit with topic change. S/U or letter grading.

**239BS. Seminar: Signals and Systems. (2 to 4)** Seminar, two to four hours; outside study, four to eight hours. Seminars and discussions on current and advanced topics in one or more aspects of signals and systems, such as communications, control, image processing, information theory, multimedia, computer networking, optimization, speech processing, telecommunications, and VLSI signal processing. May be repeated for credit with topic change. S/U grading.

**M240A. Linear Dynamic Systems. (4)** (Same as Chemical Engineering M280A and Mechanical and Aerospace Engineering M270A.) Lecture, four hours; outside study, eight hours. Requisite: course 141 or Mechanical and Aerospace Engineering 171A. State-space description of linear time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem, Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

**M240C. Optimal Control. (4)** (Same as Chemical Engineering M280C and Mechanical and Aerospace Engineering M270C.) Lecture, four hours; outside study, eight hours. Requisite: course 240B. Applications of variational methods, Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programming) to optimal control of dynamic systems modeled by nonlinear ordinary differential equations. Letter grading.

**241A. Stochastic Processes. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Review of basic probability, axiomatic development, expectation, convergence of random processes: stationarity, power spectral density. Response of linear systems to random inputs. Basics of estimation. Special random processes, Markov processes, martingales, etc. Letter grading.

**M242A. Nonlinear Dynamic Systems. (4)** (Same as Chemical Engineering M282A and Mechanical and Aerospace Engineering M272A.) Lecture, four hours; outside study, eight hours. Requisite: course M240A or Chemical Engineering M280A or Mechanical and Aerospace Engineering M270A. State-space techniques for studying solutions of time-invariant and time-varying nonlinear dynamic systems with emphasis on stability. Lyapunov theory (including converse theorems), invariance, center manifold theorem, input-to-state stability and small-gain theorem. Letter grading.

**C243A. Neural Signal Processing. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 131A, Mathematics 33A. Topics include fundamental properties of electrical activity in neurons; technology for measuring neural activity; spiking statistics and Poisson processes; generative models and classification; regression and Kalman filtering; principal components analysis, factor analysis, and expectation maximization. Concurrently scheduled with course C143A. Letter grading.

**246. Foundations of Statistical Machine Learning. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: course 131A, Mathematics 33A. Introduction to foundations of statistical machine learning. Overview of several widely used learning algorithms including logistic and linear regression, kernel methods and support vector machine (SVM), ensemble learning methods, decision trees and nearest neighbor classifiers. Connections to information theory through probably approximately correct (PAC) learning, stability, bias-complexity trade-

off, structural risk minimization, minimum description length (MDL), and universal learning. Introduction to representation learning with topics including unsupervised learning, clustering, (non-linear) dimensionality reduction, sketching, parametric distribution estimation including Gaussian mixtures, expectation maximization, non-parametric distribution estimation, property testing and neural networks focused on distribution sampling (variational autoencoders [VAEs], generative adversarial networks [GANs]). Discussion of reinforcement learning. Letter grading.

**C247. Neural Networks and Deep Learning. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 131A, 133A or 205A, and M146, or equivalent. Review of machine learning concepts; maximum likelihood; supervised classification; neural network architectures; backpropagation; regularization for training neural networks; optimization for training neural networks; convolutional neural networks; practical CNN architectures; deep learning libraries in Python; recurrent neural networks, back-propagation through time, long short-term memory and gated recurrent units; variational autoencoders; generative adversarial networks; adversarial examples and training. Concurrently scheduled with course C147. Letter grading.

**M248S. Seminar: Systems, Dynamics, and Control Topics. (2)** (Same as Chemical Engineering M297 and Mechanical and Aerospace Engineering M299A.) Seminar, two hours; outside study, six hours. Limited to graduate engineering students. Presentations of research topics by leading academic researchers from fields of systems, dynamics, and control. Students who work in these fields present their papers and results. S/U grading.

**M250B. Microelectromechanical Systems (MEMS) Fabrication. (4)** (Same as Bioengineering M250B and Mechanical and Aerospace Engineering M280B.) Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: course M153. Advanced discussion of micromachining processes used to construct MEMS. Coverage of many lithographic, deposition, and etching processes, as well as their combination in process integration. Materials issues such as chemical resistance, corrosion, mechanical properties, and residual/intrinsic stress. Letter grading.

**M252. Microelectromechanical Systems (MEMS) Device Physics and Design. (4)** (Same as Bioengineering M252 and Mechanical and Aerospace Engineering M282.) Lecture, four hours; discussion, one hour; outside study, seven hours. Introduction to MEMS design. Design methods, design rules, sensing and actuation mechanisms, microsensors, and micro-actuators. Designing MEMS to be produced with both foundry and nonfoundry processes. Computer-aided design for MEMS. Design project required. Letter grading.

**M255. Neuroengineering. (4)** (Same as Bioengineering M260 and Neuroscience M206.) Lecture, four hours; laboratory, three hours; outside study, five hours. Requisites: Mathematics 32A, Physics 1B or 5C. Introduction to principles and technologies of bioelectricity and neural signal recording, processing, and stimulation. Topics include bioelectricity, electrophysiology (action potentials, local field potentials, EEG, ECG), intracellular and extracellular recording, microelectrode technology, neural signal processing (neural signal frequency bands, filtering, spike detection, spike sorting, stimulation artifact removal), brain-computer interfaces, deep-brain stimulation, and prosthetics. Letter grading.

**M256A-M256B-M256C. Evaluation of Research Literature in Neuroengineering. (2-2-2)** (Same as Bioengineering M261A-M261B-M261C and Neuroscience M212A-M212B-M212C.) Discussion, two hours; outside study, four hours. Critical discussion and analysis of current literature related to neuroengineering research. S/U grading.

**M257. Nanoscience and Technology. (4)** (Same as Mechanical and Aerospace Engineering M287.) Lecture, four hours; outside study, eight hours. Introduction to fundamentals of nanoscale science and technology. Basic physical principles, quantum mechanics, chemical bonding and nanostructures, top-down and bottom-up (self-assembly) nanofabrication;

nanocharacterization; nanomaterials, nanoelectronics, and nanobiodetection technology. Introduction to new knowledge and techniques in nano areas to understand scientific principles behind nanotechnology and inspire students to create new ideas in multidisciplinary nano areas. Letter grading.

**260A. Advanced Engineering Electrodynamics. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 101B, 162A. Advanced treatment of concepts in electrodynamics and their applications to modern engineering problems. Vector calculus in generalized coordinate system. Solutions of wave equation and special functions. Reflection, transmission, and polarization. Vector potential, duality, reciprocity, and equivalence theorems. Scattering from cylinder, half-plane, wedge, and sphere, including radar cross-section characterization. Green's functions in electromagnetics and dyadic calculus. Letter grading.

**260B. Advanced Engineering Electrodynamics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 101B, 162A, 260A. Advanced treatment of concepts and numerical techniques in electrodynamics and their applications to modern engineering problems. Differential geometry of curves and surfaces. Geometrical optics and geometrical theory of diffraction. Physical optics techniques. Asymptotic techniques and uniform theories. Integral equations in electromagnetics. Numerical techniques based on method of moments. Letter grading.

**261. Microwave and Millimeter Wave Circuits. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 163A. Rectangular and circular waveguides, microstrip, stripline, finline, and dielectric waveguide distributed circuits, with applications in microwave and millimeter wave integrated circuits. Substrate materials, surface wave phenomena. Analytical methods for discontinuity effects. Design of passive microwave and millimeter wave circuits. Letter grading.

**262. Antenna Theory and Design. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 162A. Antenna patterns. Sum and difference patterns. Optimum designs for rectangular and circular apertures. Arbitrary side lobe topography. Discrete arrays. Mutual coupling. Design of feeding networks. Letter grading.

**263. Reflector Antennas Synthesis, Analysis, and Measurement. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 260A, 260B. Reflector pattern analysis techniques. Single and multireflector antenna configurations. Reflector synthesis techniques. Reflector feeds. Reflector tolerance studies, including systematic and random errors. Array-fed reflector antennas. Near-field measurement techniques. Compact range concepts. Microwave diagnostic techniques. Modern satellite and ground antenna applications. Letter grading.

**266. Computational Methods for Electromagnetics. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 162A, 163A. Computational techniques for partial differential and integral equations: finite-difference, finite-element, method of moments. Applications include transmission lines, resonators, integrated circuits, solid-state device modeling, electromagnetic scattering, and antennas. Letter grading.

**270. Applied Quantum Mechanics. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Preparation: modern physics (or course 123A), linear algebra, and ordinary differential equations courses. Principles of quantum mechanics for applications in lasers, solid-state physics, and nonlinear optics. Topics include eigenfunction expansions, observables, Schrödinger equation, uncertainty principle, central force problems, Hilbert spaces, WKB approximation, matrix mechanics, density matrix formalism, and radiation theory. Letter grading.

**271. Classical Laser Theory. (4)** Lecture, four hours; outside study, eight hours. Enforced requisite: course 170A. Microscopic and macroscopic laser phenomena and propagation of optical pulses using classical formalism. Letter grading.

**272. Dynamics of Lasers. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 271. Ultra-short laser pulse characteristics, generation, and measurement. Gain switching, Q switching, cavity dumping, active and passive mode locking. Pulse compression and soliton pulse formation. Nonlinear pulse generation: soliton laser, additive-pulse mode locking, and parametric oscillators. Pulse measurement techniques. Letter grading.

**273. Nonlinear Photonics. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 170A. Recommended: course 271. Nonlinear optical susceptibilities. Coupled-wave and coupled-mode theories. Crystal optics, electro-optics, and magneto-optics. Nonlinear optical interactions, sum- and difference-frequency generation, harmonic and parametric generation, stimulated Raman and Brillouin scattering, field-induced index changes and self-phase modulation. Nonlinear photonic devices. Nonlinear guided-wave photonics and devices. Letter grading.

**274. Optical Communication and Sensing Design. (4)** Lecture, three hours; outside study, nine hours. Requisites: courses 170A and 170B or equivalent. Top-down introduction to physical layer design in fiber optic communication systems, including Telecom, Datacom, and CATV. Fundamentals of digital and analog optical communication systems, fiber transmission characteristics, and optical modulation techniques, including direct and external modulation and computer-aided design. Architectural-level design of fiber optic transceiver circuits, including preamplifier, quantizer, clock and data recovery, laser driver, and predistortion circuits. Letter grading.

**M275. Micro- and Nanoscale Biosensing for Molecular Diagnostics. (4)** (Same as Bioengineering M273.) Lecture, four hours; discussion, one hour; outside study, seven hours. Covers state-of-art and emerging biosensors in context of molecular diagnostics. Students learn relevant biology and biochemistry pertinent to molecular diagnostics. Students gain thorough understanding of interfaces between bioparticles, biofluids, and electronics. Topics include biosensor performance parameters, modes of detection, sample preparation challenges, microfluidics, and emerging wearable biosensing platforms, as well as proteomics, genomics, and DNA sequencing technologies. Letter grading.

**279AS. Special Topics in Physical and Wave Electronics. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Special topics in one or more aspects of physical and wave electronics, such as electromagnetics, microwave and millimeter wave circuits, photonics and optoelectronics, plasma electronics, microelectromechanical systems, solid state, and nanotechnology. May be repeated for credit with topic change. S/U or letter grading.

**279BS. Seminar: Physical and Wave Electronics. (2 to 4)** Seminar, two to four hours; outside study, four to eight hours. Seminars and discussions on current and advanced topics in one or more aspects of physical and wave electronics, such as electromagnetics, microwave and millimeter wave circuits, photonics and optoelectronics, plasma electronics, microelectromechanical systems, solid state, and nanotechnology. May be repeated for credit with topic change. S/U grading.

**279CS. Clean Green IGERT Brown-Bag Seminar. (1)** Seminar, one hour. Required of students in Clean Energy for Green Industry (IGERT) Research. Literature seminar presented by graduate students and experts from around country who conduct research in energy harvest, storage, and conservation. S/U grading.

**CM282. Science, Technology, and Public Policy. (4)** (Same as Public Policy CM282.) Lecture, three hours. Recent and continuing advances in science and technology are raising profoundly important public policy issues. Consideration of selection of critical policy issues, each of which has substantial ethical, social, economic, political, scientific, and technological aspects. Concurrently scheduled with course CM182. Letter grading.

**285A. Plasma Waves and Instabilities. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 101A, and M185 or Physics M122. Wave phe-

nomina in plasmas described by macroscopic fluid equations. Microwave propagation, plasma oscillations, ion acoustic waves, cyclotron waves, hydro-magnetic waves, drift waves. Rayleigh/Taylor, Kelvin/Helmholtz, universal, and streaming instabilities. Application to experiments in fully and partially ionized gases. Letter grading.

**285B. Advanced Plasma Waves and Instabilities. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses M185, and 285A or Physics 222A. Interaction of intense electromagnetic waves with plasmas: waves in inhomogeneous and bounded plasmas, nonlinear wave coupling and damping, parametric instabilities, anomalous resistivity, shock waves, echoes, laser heating. Emphasis on experimental considerations and techniques. Letter grading.

**M287. Fusion Plasma Physics and Analysis. (4)** (Same as Mechanical and Aerospace Engineering M237B.) Lecture, four hours; outside study, eight hours. Fundamentals of plasmas at thermonuclear burning conditions. Fokker/Planck equation and applications to heating by neutral beams, RF, and fusion reaction products. Bremsstrahlung, synchrotron, and atomic radiation processes. Plasma surface interactions. Fluid description of burning plasma. Dynamics, stability, and control. Applications in tokamaks, tandem mirrors, and alternate concepts. Letter grading.

**M293. Intellectual Property for Technology Entrepreneurs and Managers. (2)** (Same as Management M247.) Seminar, two hours; outside study, four hours. Introduction to intellectual property (IP) in context of technology products and markets. Topics include best practices to put in place before product development starts, how to develop high-value patent portfolios, patent licensing, offensive and defensive IP litigation considerations, trade secrets, opportunities and pitfalls of open source software, trademarks, managing copyright in increasingly complex content ecosystems, and adopting IP strategies to globalized marketplaces. Includes case studies inspired by complex IP questions facing technology companies today. S/U or letter grading.

**295. Academic Technical Writing for Electrical Engineers. (3)** Seminar, three hours. Designed for electrical engineering PhD students who have completed preliminary examinations. Students read models of good writing and learn to make rhetorical observations and writing decisions, improve their academic and technical writing skills by writing and revising conference and journal papers, and practice writing for and speaking to various audiences, including potential students, engineers outside their specific fields, and non-engineers (colleagues outside field, policymakers, etc.). Students write in variety of genres, all related to their professional development as electrical engineers. Emphasis on writing as vital way to communicate precise technical and professional information in distinct contexts, directly resulting in specific outcomes. S/U grading.

**296. Seminar: Research Topics in Electrical Engineering. (2)** Seminar, two hours; outside study, four hours. Advanced study and analysis of current topics in electrical engineering. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**297. Seminar Series: Electrical Engineering. (1)** Seminar, 90 minutes; outside study, 90 minutes. Limited to graduate electrical engineering students. Weekly seminars and discussion by invited speakers on research topics of heightened interest. S/U grading.

**298. Seminar: Engineering. (2 to 4)** Seminar, to be arranged. Limited to graduate electrical engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. S/U or letter grading.

**299. MS Project Seminar. (4)** Seminar, to be arranged. Required of all MS students not in thesis option. Supervised research in small groups or individually under guidance of faculty mentor. Regular meetings, culminating report, and presentation required.

Individual contract required; enrollment petitions available in Office of Graduate Student Affairs. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**M495. Teaching Preparation Seminar: Teaching and Writing Pedagogies for Electrical Engineers. (2)** (Same as English Composition M495K.) Seminar, two hours. Limited to graduate electrical engineering students. Required of all departmental teaching assistants (TAs). May be taken concurrently while holding a TA appointment. Seminar on pedagogy and logistics of being a TA with emphasis on student-centered teaching, clear communication, and multimodal teaching and learning. S/U grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for MS Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Reading and preparation for MS comprehensive examination. S/U grading.

**597B. Preparation for PhD Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate electrical engineering students. S/U grading.

**597C. Preparation for PhD Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of MS Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Supervised independent research for MS candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of PhD Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

## EMERGENCY MEDICINE

*David Geffen School of Medicine*

924 Westwood Boulevard, Suite 300  
Box 951777  
Los Angeles, CA 90095-1777

**Emergency Medicine**  
310-794-0578

Gregory W. Hendey, MD, *Chair*

### Overview

The Department of Emergency Medicine focuses on the teaching and management of diagnosis and treatment of unforeseen illness or injury. The practice of emergency medicine includes the initial evaluation, diagnosis, treatment, coordination of care among multiple providers, and disposition of any patient requiring expeditious medical, surgical, or psychiatric care. A three- or four-week subinternship rotation is offered to fourth-year medical students. The length of training in the residency program is four years.

For details on the Department of [Emergency Medicine](#) and courses offered, see the department website.

[Emergency Medicine faculty](#) information is available from the department.

## ENGINEERING SCHOOLWIDE PROGRAMS

*Henry Samueli School of Engineering and Applied Science*

6426 Boelter Hall  
Box 951601  
Los Angeles, CA 90095-1601

**Engineering Schoolwide Programs**  
310-825-9580

### Overview

The Henry Samueli School of Engineering and Applied Science offers several schoolwide graduate degree programs.

### Graduate Study

The Samueli School offers the Master of Engineering (MEng) degree, Master of Science (MS) online degree in Engineering, and Engineer (Engr) degree as schoolwide degrees. The following area-specific online degrees have also been established: MS in Engineering–Aerospace, MS in Engineering–Computer Networking, MS in Engineering–Electrical, MS in Engineering–Electronic Materials, MS in Engineering–Integrated Circuits, MS in Engineering–Manufacturing and Design, MS in Engineering–Materials Science, MS in Engineering–Mechanical, MS in Engineering–Signal Processing and Communication, and MS in Engineering–Structural Materials.

A certificate of specialization is available in all areas of specialization.

### Graduate Majors

### Engineer

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Master of Engineering

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more de-

tailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering MS

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering–Aerospace MS

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering–Computer Networking MS

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering–Electrical MS

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering–Electronic Materials MS

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering–Integrated Circuits MS

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering–Manufacturing and Design MS

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering–Materials Science MS

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering–Mechanical MS

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering–Signal Processing and Communication MS

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering–Structural Materials MS

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available on the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Engineering Lower-Division Courses

**2. Technology and Society.** (2) Lecture, two hours; discussion, one hour; outside study, three hours. Introduction of broader societal opportunities, impacts, and challenges associated with technology. Drawing from historical and contemporary examples, consideration of some of ethical, policy, and legal questions spurred by rapid technological change. Development of perspectives to take broad, contextualized view of role of technology in society. Letter grading.

**19. Fiat Lux Freshman Seminars.** (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**20. First-Year Engineering Transition Bridge.** (2) Seminar, 18 hours (two weeks). Designed primarily for new students to help them understand UCLA, its culture, structure (quarter system), and academic policies; and to facilitate their transition from high school to college. Examination of research on first-year experience of college students, studying at UCLA versus high school, policies and procedures, and campus resources. Advanced preparation and early exposure to fall quarter mathematics, chemistry, and computer science curricula. Collaborative learning techniques and community-building activities are integral processes to both day and evening programs. Intensive classroom instruction and collaborative learning workshops. May be repeated for credit. Offered in summer only. P/NP grading.

**21. Computing Immersion Summer Experience.** (2) Seminar, 18 hours (three weeks). Designed primarily for new students to help them understand UCLA, its culture, structure (quarter system), and academic policies; and to facilitate their transition from high school/community college to university. Designed to immerse incoming computing students in foundation concepts and principles of computer science, with focus on fundamental computer programming principles, methodologies, and techniques. Basic concepts of programming and C++ computing language. Offered in summer only. P/NP grading.

**22. Summer Bridge Review for Enhancing Engineering Students.** (2) Seminar, 18 hours (two weeks). Designed primarily for new students to help them understand UCLA, its culture, structure (quarter system), and academic policies; and to facilitate their transition from community college to university. Intensive introduction of advanced topics covered in upper-division engineering courses. May be repeated for credit. Offered in summer only. P/NP grading.

**23. Finding Industry Internship.** (2) Seminar, two hours; outside study, four hours. Designed to engage engineering students in process of formal career development. Students learn about various components of internship/job application and practice preparing relevant materials. Prepares students for career-related social interactions. Development of skills and insights to successfully secure future opportunities, such as first industry internship. P/NP grading.

**24. Finding Undergraduate Research Opportunity.** (2) Seminar, two hours; outside study, four hours. Designed to engage engineering students, primarily those without prior experience, in process of soliciting, securing, and beginning research. Students learn about various methods and resources used to obtain laboratory position. Exploration of opportunities and guidance on how to approach those openings. Offers students smooth transition into research laboratory. P/NP grading.

**25. Communicating Undergraduate Research Results.** (2) Seminar, two hours; outside study, four hours. Designed to engage engineering students in process of communicating formal research. Students learn about various components required in publishing research. Offers templates and examples as guides for understanding technical presentations and writing. Development of skills and insights to successfully publish first research project. P/NP grading.

**26. Finding Entry-Level Job.** (2) Seminar, two hours; discussion, two hours; outside study, two hours. Designed to engage engineering students in process of getting ready to graduate and need help joining workforce. Focus on how to apply to entry-level positions in engineering field, and specifically industries that value engineering degree over technical experience. Offers suggestions to overcome typical barriers students encounter in securing entry-level position including students with no industry internships, lack of professional network, lack of hands-on technical experience, low grade-point average, lack of student organization extracurricular activities, international students, Deferred Action for Childhood Arrivals (DACA) students, and other low-confidence students. Students learn about various components of job application, practice preparing relevant materials, and prepare for career-related social interactions. Students develop skills and insights to successfully secure entry-level job as soon as possible after graduation. P/NP grading.

**87. Introduction to Engineering Disciplines.** (4) Lecture, four hours; discussion, four hours; outside study, four hours. Introduction to engineering as professional opportunity for freshman students by exploring difference between engineering disciplines and functions engineers perform. Development of skills and techniques for academic excellence through team process. Investigation of national need underlying current effort to increase participation of historically underrepresented groups in U.S. technological work force. Letter grading.

**95. Internship Studies in Engineering.** (1 to 4) Tutorial, one hour. Limited to first years/sophomores. Internship studies course supervised by associate dean or designated faculty members. Further supervision to be provided by organization for which students are doing internship. Students may be required to meet on regular basis with instructor and provide periodic reports of their experience. May not be applied toward major requirements. May be repeated for credit. Individual contract with associate dean required. P/NP grading.

**96A. Introduction to Engineering Design.** (2) Lecture, one hour; laboratory, one hour; outside study, four hours. Introduction to engineering design while building teamwork and communication skills and examination of engineering majors offered at UCLA and of engineering careers. Completion of hands-on engineering design projects, preparation of short report describing projects, and presentation of results. Specific project details and relevant majors explored vary with instructor. May be repeated once for credit with topic or instructor change. Letter grading.

**96B. Introduction to Engineering Design: Digital Imaging.** (2) Lecture, one hour; laboratory, one hour; outside study, four hours. Recommended for undergraduate Aerospace Engineering, Bioengineering, Computer Science, Electrical Engineering, and Mechanical Engineering majors. Introduction to engineering design while building teamwork and communication skills and examination of engineering majors offered at UCLA and of engineering careers. Hands-on experience with state-of-art solid-state imaging devices. How to focus, expose, record, and manipulate tele-scopic images. Development of photographic tech-

nology from early chemical experiments to wide spread use of cell phone camera. Completion of hands-on engineering design projects, preparation of short report describing projects, and presentation of results. Letter grading.

**96C. Cybernetics: Introduction to Robotic Control Systems.** (2) Lecture, one hour; laboratory, one hour; outside study, four hours. Complete introduction to robotics control systems that are critical and rapidly growing engineering technology with expanding societal impact. Designed to support entry-level students with primary principles of modern control systems. Students are provided with essential background in formal principles. Includes breakthrough technology providing hands-on experience with physical robotics control systems. Extensive use of graphical and animation methods to support understanding of mathematical concepts. Hands-on systems are provided in laboratory sections for each student for system design and characterization. Students connect personal computers to robotic control system and have real-time access for configuration and control. Convenient computing tools are provided to support each design method, as well as real-time visualization and performance characterization. Letter grading.

**96E. Introduction to Engineering Design: Electrocardiogram.** (2) Lecture, 90 minutes; laboratory, 90 minutes; outside study, three hours. Students learn and use concepts and techniques in electrical circuit design and analysis, cardiac electrophysiology, biophysics, microcontrollers, and computer programming. Students work in teams to design, construct, and test circuit boards capable of measuring human electrocardiograms by capturing data with microcontroller, with computer analysis and display. Students present their designs orally and in writing. Letter grading.

**96G. Introduction to Engineering Design: Go-Karts.** (2) Lecture, 90 minutes; laboratory, 90 minutes; outside study, three hours. Students learn and use concepts and techniques in computer-aided design, finite element analysis, machining, electric motor performance, steering linkages, and general mechanical design and assembly to work in teams and construct and test go-karts. Students present their designs orally and in writing. Letter grading.

**96I. Introduction to Engineering Design: Internet of Things.** (2) (Formerly numbered 96C.) Lecture, one hour; laboratory, one hour; outside study, four hours. Recommended for undergraduate Aerospace Engineering, Bioengineering, Computer Science, Electrical Engineering, and Mechanical Engineering majors. Introduction to engineering design while building teamwork and communication skills and examination of engineering majors offered at UCLA and of engineering careers. Hands-on experience with state-of-art Internet of things (IoT) technology to offer students opportunity to rapidly develop innovative and inspiring systems that provide ideal introduction to computing systems and IoT applications specific to their major field. IoT technology has become one of most important advances in technology history with applications ranging from wearable devices for healthcare to residential monitoring systems, natural resource protection and management, intelligent vehicles and transportation systems, robotics systems, and energy conservation. Completion of hands-on engineering design projects, preparation of short report describing projects, and presentation of results. Letter grading.

**96R. Introduction to Engineering Design: Rockets.** (2) Lecture, 90 minutes; laboratory, 90 minutes; outside study, three hours. Introduction to basic concepts in aerospace engineering, computer-aided design, finite element analysis, 3D printing, carbon fiber layup, telemetry, general mechanical design and assembly, and machine shop fabrication. Concepts applied to team-based design, construction, and testing of small 3D-printed rockets and larger, high-power rockets. Students present their designs orally and in writing, and evaluate their performance against other student teams. Rockets fired from Mojave Desert launch site in class field trip. No prior experience or coursework needed. Study led by experienced undergraduate

members of Bruin Rocket Project. Meetings, and design and fabrication homework, make use of Maker-space facilities and tools. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**102. Synthetic Biosystems and Nanosystems Design.** (4) Lecture, four hours; outside study, eight hours. Prerequisites: course M101, Life Sciences 3. Introduction to current progress in engineering to integrate biosciences and nanosciences into synthetic systems, where biological components are reengineered and rewired to perform desirable functions in both intracellular and cell-free environments. Discussion of basic technologies and systems analysis that deal with dynamic behavior, noise, and uncertainties. Design project in which students are challenged to design novel biosystems and nanosystems for nontrivial task required. Letter grading.

**M103. Environmental Nanotechnology: Implications and Applications.** (4) (Same as Civil Engineering M165.) Lecture, four hours; discussion, two hours; outside study, six hours. Recommended prerequisite: course M101. Introduction to potential implications of nanotechnology to environmental systems as well as potential application of nanotechnology to environmental protection. Technical contents include three multidisciplinary areas: (1) physical, chemical, and biological properties of nanomaterials, (2) transport, reactivity, and toxicity of nanoscale materials in natural environmental systems, and (3) use of nanotechnology for energy and water production, plus environmental protection, monitoring, and remediation. Letter grading.

**110. Introduction to Technology Management and Economics for Engineers.** (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Fundamental principles of micro-level (individual, firm, and industry) and macro-level (government, international) economics as they relate to technology management. How individuals, firms, and governments impact successful commercialization of high technology products and services. Letter grading.

**111. Introduction to Finance and Marketing for Engineers.** (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Critical components of finance and marketing research and practice as they impact management of technology commercialization. Internal (within firm) and external (in marketplace) marketing and financing of high-technology innovation. Concepts include present value, future value, discounted cash flow, internal rate of return, return on assets, return on equity, return on investment, interest rates, cost of capital, and product, price, positioning, and promotion. Use of market research, segmentation, and forecasting in management of technological innovation. Letter grading.

**112. Laboratory to Market, Entrepreneurship for Engineers.** (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Critical components of entrepreneurship, finance, marketing, human resources, and accounting disciplines as they impact management of technology commercialization. Topics include intellectual property management, team building, market forecasting, and entrepreneurial finance. Students work in small teams studying technology management plans to bring new technologies to market. Students select from set of available technology concepts, many generated at UCLA, that are in need of plans for movement from laboratory to market. Letter grading.

**113. Product Strategy.** (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Designed for juniors/seniors. Introduction to current management concept of product development. Topics include product strategy, product platform, and product lines; competitive strategy, vectors of differen-

tiation, product pricing, first-to-market versus fast-follower; growth strategy, growth through acquisition, and new ventures; product portfolio management. Case studies, class projects, group discussions, and guest lectures by speakers from industry. Letter grading.

**116. Statistics for Management Decisions. (4)** Lecture, four hours; outside study, eight hours. Management as well as engineering decisions nearly always take place in environment characterized by uncertainty. Probability provides mathematical framework for understanding how to make rational decisions when outcomes of actions are uncertain. Application of probability to problem of reasoning from sample data, encompassing estimation, hypothesis testing, and regression analysis. Discussion of specific analytical techniques needed in later courses in program. Development of basic understanding of statistical analysis. Letter grading.

**120. Entrepreneurship for Scientists and Engineers. (2)** Seminar, two hours; outside study, four hours. Designed for seniors and graduate students. Identification of business opportunities and outline of basic requisites for viable business plans, followed by specific topics related to securing basic assets and resources needed to execute those plans. P/NP grading.

**160. Entrepreneurship and Venture Initiation for Engineers. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Not open to students with credit for Management 160. Focus on process and methodology for starting new venture. Introduction to entrepreneurship from perspective of entrepreneur. Examination of core concepts and frameworks on idea generation, market analysis, fundraising, corporate structures, and financial accounting for entrepreneurial endeavors. Focus on fundamentals of building business, and also emphasis on inherent experiential nature of entrepreneurship and need for constant learning on this subject. Letter grading.

**163. Entrepreneurship and New Product Development for Engineers. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Limited to juniors/seniors. Not open to students with credit for Management 163. Designed to deepen understanding of innovations and innovative processes related to creating new products. Inquiry into why, what, and how of making new products. New products are essential to any business (start-up or well-established) and thriving economies. Making successful new products requires various types of innovation. Availability of digital technologies and global outsources have accelerated pace of these innovations. Letter grading.

**170. Project-Based Technology Bootcamp for Social Impact. (4)** Seminar, two hours; offsite work, five hours; outside study, five hours. Study of design thinking covering various business, technology, and interpersonal topics such as data analysis, user interface and user experience, how to pitch, and collaboration. Application of learned skills to define social-impact problem and build solution in student teams coached by industry professionals. May be repeated for credit. P/NP or letter grading.

**180. Engineering of Complex Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Designed for junior/senior engineering majors. Holistic view of engineering discipline, covering life-cycle of engineering, processes, and techniques used in industry today. Multidisciplinary systems engineering perspective in which aspects of electrical, mechanical, material, and software engineering are incorporated. Three specific case studies in communication, sensor, and processing systems included to help students understand these concepts. Special attention paid to link material covered to engineering curriculum offered by UCLA to help students integrate and enhance their understanding of knowledge already acquired. Motivation of students to continue their learning and reinforce lifelong learning habits. Letter grading.

**181EW. Ethical Negotiation in Technology. (4)** Lecture, five hours; discussion, three hours; outside study, four hours. Requisite: English Composition 3, 3D, 3DS, 3E, or 3SL. Not open for credit to students with credit for course 182EW, 183EW, 185EW, or 188EW. Focuses on negotiation and complex ethical issues

that emerge as result in areas such as biotechnology, information technology, nanotechnology, and energy technology. Discussion of nature of these issues; their ethical, legal, and social ramifications; and what society values in relation to these issues. Writing and revision of about 20 pages total, including two essays and one analysis of a negotiation from an ethical perspective. Satisfies engineering writing requirement. Letter grading.

**182EW. Technology and Law. (4)** Lecture, four hours; discussion, three hours; outside study, five hours. Requisite: English Composition 3, 3D, 3DX, 3E, or 3SL. Not open for credit to students with credit for course 181EW, 183EW, 185EW, or 188EW. Places engineering in broader societal context through examination of some of key ethical, legal, and regulatory issues and frameworks relevant to design and deployment of emerging technology products and services. Historical examination of ethical and legal frameworks generally and in relation to technology. Exploration of series of specific contemporary technology-related topics to examine their broader ramifications. Topics may include driverless cars, algorithms and artificial intelligence, social media, digital privacy, and impact of technology on employment. Offers students tools enabling them to think more proactively and holistically about ethical and societal dimensions of their work as technology creators. Satisfies engineering writing requirement. Letter grading.

**183EW. Engineering and Society. (4)** Lecture, four hours; discussion, three hours; outside study, five hours. Enforced requisite: English Composition 3, 3D, 3DS, 3E, or 3SL. Not open for credit to students with credit for course 181EW, 182EW, 185EW, or 188EW. Limited to sophomore/junior/senior engineering students. Professional and ethical considerations in practice of engineering. Impact of technology on society and on development of moral and ethical values. Contemporary environmental, biological, legal, and other issues created by new technologies. Emphasis on research and writing within engineering environments. Writing and revision of about 20 pages total, including two individual technical essays and one team-written research report. Readings address technical issues and writing form. Satisfies engineering writing requirement. Letter grading.

**185EW. Art of Engineering Endeavors. (4)** Lecture, four hours; discussion, three hours; outside study, five hours. Enforced requisite: English Composition 3, 3D, 3DS, 3E, or 3SL. Not open for credit to students with credit for course 181EW, 182EW, 183EW, or 188EW. Designed for junior/senior engineering students. Non-technical skills and experiences necessary for engineering career success. Importance of group dynamics in engineering practice. Teamwork and effective group skills in engineering environments. Organization and control of multidisciplinary complex engineering projects. Forms of leadership and qualities and characteristics of effective leaders. How engineering, computer sciences, and technology relate to major ethical and social issues. Societal demands on practice of engineering. Emphasis on research and writing in engineering environments. Satisfies engineering writing requirement. Letter grading.

**188. Special Courses in Engineering. (4)** Seminar, four hours; outside study, eight hours. Special topics in engineering for undergraduate students taught on experimental or temporary basis, such as those taught by resident and visiting faculty members. May be repeated for credit with topic or instructor change. Letter grading.

**188EW. Experimental Courses in Engineering Ethics. (4)** Lecture, four hours; discussion, three hours; outside study, five hours. Enforced requisite: English Composition 3, 3D, 3DS, 3E, or 3SL. Not open for credit to students with credit for course 181EW, 182EW, 183EW, or 185EW. Limited to junior/senior engineering students. Professional and ethical considerations in practice of engineering and computer science. Emphasis on research and writing within engineering and computer science. Writing and revision of about 20 pages total, including two individual technical essays. Readings address technical issues and writing form. Satisfies engineering writing requirement. Letter grading.

**191. Seminar Series in Engineering Research. (1)** Seminar, one hour. Seminar series in cutting-edge engineering research at UCLA. Each seminar is given by UCLA graduate student researcher or post-doctoral scholar. Designed to be accessible to undergraduate students in any science, technology, engineering, and mathematics (STEM) major. Offers undergraduate students window into excitement of graduate student research experience. Also offers opportunity for graduate students to learn about what their peers are doing. P/NP grading.

**192. Fundamentals of Engineering Mentorship. (2)** Seminar, two hours; outside study, four hours. Principles and practical techniques for instruction of hands-on engineering design projects. Curriculum planning, project preparation, classroom management, team collaboration, diversity awareness, fostering of group cohesion, and emergency procedures. Preparation of lessons and projects for academic year courses and high school summer outreach program, with practice presentations. May be repeated for credit. P/NP grading.

**195. Internship Studies in Engineering. (1 to 4)** Tutorial, one hour. Limited to juniors/seniors. Internship studies course supervised by associate dean or designated faculty members. Further supervision to be provided by organization for which students are doing internship. Students may be required to meet on regular basis with instructor and provide periodic reports of their experience. May not be applied toward major requirements. May be repeated for credit. Individual contract with associate dean required. P/NP grading.

**199. Directed Research in Engineering. (2 to 8)** Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit with school approval. Individual contract required; enrollment petitions available in Office of Academic and Student Affairs. Letter grading.

## Graduate Courses

**200. Program Management Principles for Engineers and Professionals. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Practical review of necessary processes and procedures to successfully manage technology programs. Review of fundamentals of program planning, organizational structure, implementation, and performance tracking methods to provide program manager with necessary information to support decision-making process that provides high-quality products on time and within budget. Letter grading.

**201. Systems Engineering. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Practical review of major elements of system engineering process. Coverage of key elements: system requirements and flow down, product development cycle, functional analysis, system synthesis and trade studies, budget allocations, risk management metrics, review and audit activities and documentation. Letter grading.

**202. Reliability, Maintainability, and Supportability. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 201. Designed for graduate students with one to two years work experience. Integrated logistic support (ILS) is major driver of system life-cycle cost and one key element of system engineering activities. Overview of engineering disciplines critical to this function—reliability, maintainability, and supportability—and their relationships, taught using probability theory. Topics also include fault detections and isolations and parts obsolescence. Discussion of 6-sigma process, one effective design and manufacturing methodology, to ensure system reliability, maintainability, and supportability. Letter grading.

**203. System Architecture. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 201. Designed for graduate students with BS degrees in engineering or science and one to two years work experience in selected domain. Art and science of architecting. Introduction to architecting methodology—paradigm and tools. Principles of architecting through analysis of architecture designs of major existing sys-

tems. Discussion of selected elements of architectural practices, such as representation models, design progression, and architecture frameworks. Examination of professionalization of system architecting. Letter grading.

**204. Trusted Systems Engineering. (4)** Lecture, four hours; outside study, eight hours. Trust is placed in information systems to behave properly, but cyber threats and breaches have become routine, including penetration of financial, medical, government, and national security systems. To build systems that can protect confidentiality, integrity, and availability involves more than composing systems from network security, computer security, data security, cryptography, etc. One can use most secure components, and resulting system could still be vulnerable. Skills learned ensure that systems are architected, designed, implemented, tested, and operated for specific levels of trust. Aspects include assessing vulnerability and risk for systems, establishing protection principles, and using them as guide to formulate system architectures; translating architecture into system design and verifying correctness of design; and constructing and following trusted development and implementation process. Letter grading.

**205. Model-Based Systems Engineering. (4)** Lecture, four hours; outside study, eight hours. Model-based systems engineering (MBSE) and systems modeling language (SysML) taught through lectures and readings, individual projects, and one group project. Lectures and readings to provide students with conceptual framework and vocabulary. Individual projects enable students to develop basic skills for creating SysML requirements and structural and behavioral diagrams. In group project students learn how to package, compartmentalize, and integrate smaller efforts while being constrained to meet schedules. Industry-recognized credentials may be obtained, as course covers Object Management Group (OMG) Certified Systems Modeling Professional (OCSMP) tests, such as Model User and Model Builder Fundamentals and Model Builder Intermediate. Letter grading.

**206. Engineering for Systems Assurance. (4)** Lecture, four hours; outside study, eight hours. Recommended requisites: course 204, Computer Science 236. Systems are constructed to perform complex functions and services. How to understand needs of users, analysis of requirements and derived requirements, creation of various system architecture products, and design and integration of various components into systems that perform these functions and services. System assurance addresses confidence that systems meet specified operational requirements based on evidence provided by applying assurance techniques. Introduction, investigation, and analysis of framework of assurance to accomplish total system assurance. Development of secure, reliable, and dependable systems that range from commercial realm such as air traffic control, Supervisory Control and Data Acquisition (SCADA), and autonomous vehicles to military realm such as command, control, communication, intelligence, and cyber. Letter grading.

**210. Operations and Supply Chain Management. (4)** Lecture, four hours; outside study, eight hours. Introduction to strategic and operating issues and decisions involved in managing enterprises. Operational processes use organization's resources to transform inputs into goods and utilizes them to provide service, or does both. Conceptual framework and set of analytical tools provided to enable students to better understand why processes behave as they do. Given this understanding, students are able to involve themselves in organization's defining strategic decisions, those related to key processes affecting organizational unit's performance. Letter grading.

**211. Financial Management. (4)** Lecture, four hours; outside study, eight hours. Introduction to concepts reflecting material generally covered in certain MBA core and elective courses. Integration of both theory—to introduce essential conceptual building blocks in accounting and finance—and empirical practice—to emphasize how these theories are actually implemented in real world. Cases, comprehensive prob-

lems, and recent events presented to provide students with as much hands-on experience in applying material presented as possible. Letter grading.

**212. Intellectual Property Law and Strategy. (4)** Lecture, four hours; outside study, eight hours. Prior knowledge of legal doctrines or materials not required. Intellectual property law is not just topic for lawyers. Engineers who have design responsibilities must understand how legal system in some instances protects their designs and in other instances stands as obstacle to what would otherwise be most efficient design choice. Engineers with management responsibilities must understand intellectual property law implications for everything from pricing to strategic partnerships. Examination of intellectual property law, not only by learning fundamental rules associated with patent, copyright, trademark, and trade secret protection, but by studying business strategies that these rules support. Examples and case studies to be taken from across content, technology, and pharmaceutical industries. Letter grading.

**213. Data and Business Analytics. (4)** Lecture, four hours; outside study, eight hours. Coverage of wide variety of spreadsheet models that can be used to solve business and engineering problems, with emphasis on mastery of Excel spreadsheet modeling as integral part of analytic decision making. Managerial models include data modeling, regression and forecasting, linear programming, network and distribution models, integer programming, nonlinear programming, and Monte Carlo simulation. Problems from operations, finance, and marketing taught by spreadsheet examples and describe general managerial situations from various industries and disciplines. Development of spreadsheet models to facilitate decision making. Letter grading.

**214. Management Communication. (4)** Lecture, four hours. Exploration of knowledge, attributes, skills, and strategies necessary to succeed communicatively in workplace, with focus on business presentation skills, visual and verbal persuasion skills, and interpersonal communication skills. Letter grading.

**215. Entrepreneurship for Engineers. (4)** Lecture, four hours; outside study, eight hours. Limited to graduate engineering students. Topics in starting and developing high-tech enterprises and intended for students who wish to complement their technical education with introduction to entrepreneurship. Letter grading.

**299. Capstone Project. (4)** Activity, 10 hours. Preparation: completion of minimum of four 200-level courses in online MS program. Project course that satisfies UCLA final comprehensive examination requirement of MS online degree in Engineering. Project is completed under individual guidance from UCLA Engineering faculty member and incorporates advanced knowledge learned in MS program of study. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**470A-470D. Engineer in Technical Environment. (3 each)** Lecture, three hours; outside study, six hours. Limited to Engineering Executive Program students. Theory and application of quantitative methods in analysis and synthesis of engineering systems for purpose of making management decisions. Optimization of outputs with respect to dollar costs, time, material, energy, information, and manpower. Case studies and individual projects. S/U or letter grading.

**471A-471B-471C. Engineer in General Environment. (3-3-1.5)** Lecture, three hours (courses 471A, 471B) and 90 minutes (course 471C). Limited to Engineering Executive Program students. Influences of human relations, laws, social sciences, humanities, and fine arts on development and utilization of natural and human resources. Interaction of technology and society past, present, and future. Change agents and resistance to change. S/U or letter (471A) grading; In Progress (471B) and S/U or letter (471C) grading.

**472A-472D. Engineer in Business Environment. (3-3-3-1.5)** Lecture, three hours (courses 472A, 472B, 472C) and 90 minutes (course 472D). Limited to Engineering Executive Program students. Language of business for engineering executive. Accounting, finance, business economics, business law, and marketing. Laboratory in organization and management problem solving. Analysis of actual business problems of firm, community, and nation, provided through cooperation and participation with California business corporations and government agencies. In Progress (472A, 472C) and S/U or letter grading (credit to be given on completion of courses 472B and 472D).

**473A-473B. Analysis and Synthesis of Large-Scale System. (3-3)** Lecture, two and one half hours; outside study, six hours. Limited to Engineering Executive Program students. Problem area of modern industry or government is selected as class project, and its solution is synthesized using quantitative tools and methods. Project also serves as laboratory in organization for goal-oriented technical group. In Progress (473A) and S/U (473B) grading.

**495A. Teaching Assistant Training Seminar. (4)** Seminar, four hours; outside study, eight hours. Preparation: appointment as teaching assistant. Limited to graduate engineering students. Seminar on communication of engineering principles, concepts, and methods, preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

**M495I. Teaching Preparation Seminar: Writing for Engineers. (4)** (Same as English Composition M495I.) Seminar, two and one half hours; outside study, nine and one half hours. Limited to graduate students. Required of all teaching assistants for Engineering writing courses not exempt by appropriate departmental or program training. Training and mentoring, with focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in engineering writing contexts. Practical concerns of preparing students to write course assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.

**M495J. Supervised Teaching of Writing for Engineers. (2)** (Same as English Composition M495J.) Seminar, one hour; outside study, five hours. Enforced requisite: course M495I. Required of all teaching assistants in their initial term of teaching Engineering writing courses. Mentoring in group and individual meetings. Continued focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in engineering writing contexts. Practical concerns of preparing students to write course assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

## Faculty Roster

### Professors

Blake Allmendinger, PhD  
 Ali Behdad, PhD (*John Charles Hillis Professor of Literature*)  
 Adam F. Bradley, PhD  
 Joseph E. Bristow, PhD  
 Christine N. Chism, PhD  
 Michael J. Colacurcio, PhD  
 Frederick M. D'Aguiar, BA  
 Elizabeth M. DeLoughrey, PhD  
 Helen E. Deutsch, PhD  
 Barbara Fuchs, PhD  
 Alicia Gaspar de Alba, PhD  
 Yogita Goyal, PhD  
 Jonathan H. Grossman, PhD  
 Ursula K. Heise, PhD (*Marcia H. Howard Term Professor of Literary Studies*)  
 Eric Jager, PhD  
 Eleanor K. Kaufman, PhD  
 Rachel C. Lee, PhD  
 Jinqi Ling, PhD  
 Christopher J. Looby, PhD  
 Marissa K. López, PhD  
 Saree Makdisi, PhD  
 Kirstie M. McClure, PhD  
 Claire E. McEachern, PhD  
 Kathleen A. McHugh, PhD  
 Haryette R. Mullen, PhD  
 Anahid J. Nersessian, PhD  
 Michael A. North, PhD  
 Rafael Pérez-Torres, PhD  
 Michael P. Rothberg, PhD (*1939 Society Samuel Goetz Professor of Holocaust Studies*)  
 Mark I. Seltzer, PhD (*Evan Frankel Endowed Professor of English*)  
 Jennifer A. Sharpe, PhD  
 Debora K. Shuger, PhD  
 Mona E. Simpson, MFA  
 Brian K. Stefans, MFA  
 Alexandra Minna Stern, PhD  
 Robert N. Watson, PhD  
 Richard A. Yarborough, PhD

### Professors Emeriti

Charles L. Batten, Jr., PhD  
 Calvin B. Bedient, PhD  
 Albert R. Braunmuller, PhD  
 King-Kok Cheung, PhD  
 Patrick K. Ford, PhD  
 Lowell Gallagher, PhD  
 Robert A. Georges, PhD  
 James E. Goodwin, PhD  
 Christopher W. Grose, PhD  
 George R. Guffey, PhD  
 N. Katherine Hayles, PhD (*John Charles Hillis Professor Emerita of Literature*)  
 Henry Ansgar Kelly, PhD  
 Jascha Kessler, PhD  
 Gordon L. Kipling, PhD  
 Richard A. Lanham, PhD  
 Richard D. Lehan, PhD  
 Kenneth R. Lincoln, PhD  
 Robert M. Maniquis, PhD  
 Anne K. Mellor, PhD  
 Joseph F. Nagy, PhD  
 Maximillian E. Novak, DPhil, PhD  
 Felicity A. Nussbaum, PhD

Raymund A. Paredes, PhD  
 Jonathan F.S. Post, PhD  
 Kenneth Reinhard, PhD  
 George S. Rousseau, PhD  
 Karen E. Rowe, PhD  
 Paul D. Sheats, PhD  
 Donka Minkova Stockwell, PhD  
 Eric J. Sundquist, PhD (*UCLA Foundation Professor Emeritus*)  
 Stephen I. Yenser, PhD

### Associate Professors

Michael C. Cohen, PhD  
 Matthew N. Fisher, PhD

## Overview

The Department of English is dedicated to the study of the literatures and cultures of those parts of the world in which English is a primary language. Although committed to no single method or approach, the department requires a knowledge of British, American, and Anglophone literary history and an engagement with a range of methodological approaches that foster intellectual curiosity and critical thinking and encourage its students to be not only expert readers and writers but engaged and ethical citizens.

An understanding and appreciation of literature can furnish lifelong rewards. In addition to offering students such personal benefits, the department seeks to foster critical analysis and lucid writing and to teach them to think about how language and representation function in the world. Such skills are essential to success in a variety of professions for which the major in

English can provide excellent preparation, including law, administration, business, teaching, media, and entertainment.

## Undergraduate Study

The department offers Bachelor of Arts (BA) degrees in English and in American Literature and Culture. When selecting courses to fulfill requirements for the majors, students are expected to choose those courses that best reflect their own interests and simultaneously contribute toward a coherent program in literary studies.

## Undergraduate Policies

Students must have completed the Entry-Level Writing requirement before taking any courses in English (other than English Composition 1 or 2). For more information, see [Entry-Level Writing](#) in Undergraduate Study.

## Graduate Study

A graduate program leading to the Master of Arts (MA) degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the PhD degree. Because the PhD program may require five years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

## Undergraduate Majors

### English BA

Students pursuing the Bachelor of Arts degree in English are expected to meet with the undergraduate counselors and undergraduate faculty adviser to plan and follow a course of study that incorporates their interests and goals with the fulfillment of requirements for the degree.

### Capstone Program

The English major is a designated capstone program. Students have the option of completing a capstone seminar or other culminating work that enables them to use knowledge and skills acquired through previous coursework to engage, under the guidance of a faculty member, in literary research or other creative projects that result in a final paper or other product.

### Learning Outcomes

The English major has the following learning outcomes:

- Proficiency in a broad knowledge/skill set including research methods, critical thinking, and analytical writing
- Familiarity with basic project material including data from multiple sources
- Familiarity with relevant scholarly and current debates in the field
- Conception and execution of an independent project
- Demonstrated seminar or workshop skills

- Demonstrated oral and written communication skills
- Demonstrated defense-of-scholarship skills

## Entry to the Major

### Transfer Students

Transfer applicants to the English major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, one English critical reading and writing course, one year of English literature survey courses, and either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or literature in translation.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* English Composition 3, English 4W or 4HW or 4WX, 10A, 10B, 10C taken in the stated sequence (each course is a requisite for the next course), and either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or literature in translation.

### The Major

*Required:* Ten 4- or 5-unit upper-division English courses, including (1) four historical period courses, one from each of the following four periods: (a) *literatures in English to 1500*—course 140A through 148 or indicated sections of 149, (b) *literatures in English, 1500 to 1700*—course 150A through 157, 166A, indicated sections of 159 or 159R, (c) *literatures in English, 1700 to 1850*—course 160A through 165C, 166B through 168, or indicated sections of 169 or 169R or 176, and (d) *literatures in English, 1850 to present*—course M101B, M101C, M102A, M102B, M104A through M104D, M105B through M105E, 116B, 130, 131, 164B, 164C, 164D, 167A, 167B, 168, 170A through 174C, 179, or 179R, or indicated sections of 176; (2) three breadth courses, one from each of three of the following four areas: (a) *gender, race, ethnicity, disability, and sexuality studies*—English 100 through 109, M126, 135, 155, 163C, 165B, 166C, or indicated sections of 119, 139, 149, 159, 159R, 169, 169R, 179, or 179R, (b) *imperial, transnational, and postcolonial studies*—course M105A through M105D, 106, 112D, 128, 130 through 135, 154, 157, 163B, 164D, 165A, 166A, 166B, 176, or indicated sections of 149, 159, 159R, 169, 169R, 179, or 179R, (c) *genre studies, interdisciplinary studies, critical theory*—course 111A through 129, 144, 146, 147, 153, 156, 161A, 161B, 161C, 163A, 163C, 164A through 164D, 167A, 167B, 171A through 177, or indicated sections of 149, 159, 159R, 169, 169R, 179, or 179R, and (d) *creative writing*—courses 136, 137, M138; (3) two elective courses (English 195CE is not applicable); (4) one seminar from course 180 through 184, or M191A through M191E.

Admission to creative writing workshops (courses 136, 137, M138) is by application only.

### Honors Program

Students must take one theory course from English 120 through 128 no later than winter quarter of the junior year. In spring quarter of the junior year, students must take course 191H. During fall and winter quarters of the senior year, students must take courses 198A and 198B, in which they write a thesis under the direction of a faculty member.

## Policies

### Preparation for the Major

A grade of C or better is required in each of English Composition 3, English 4W or 4HW or 4WX, 10A, 10B, 10C. A foreign literature in translation course list is available under [Foreign Literature in Translation](#). Transfer students who have satisfied the College of Letters and Science foreign language requirement at the high-school level through the Intersegmental General Education Transfer Curriculum (IG-ETC) program may satisfy the departmental requirement with five foreign literature in translation courses. The courses may be taken on a Passed/Not Passed (P/NP) grading basis.

### The Major

Each course applied toward requirements for the major must be 4 or 5 units and be taken for a letter grade.

## Honors Program

### Admission

The honors program is open to majors with a 3.5 departmental and a 3.25 overall grade-point average (GPA). Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. Students should apply by winter quarter of the junior year. For application forms and more information, contact the departmental counselor.

### Requirements

The one theory course from English 120 through 128 may fulfill one of three required breadth courses. Course 191H may fulfill one of the two electives for the major. Course 198B may fulfill the second of the two electives for the major.

Students in the creative writing concentration are required to have completed or been accepted into their third workshop in a single genre prior to or concurrent with enrollment in course 191H.

The thesis determines whether highest honors, honors, or no honors are received.

## American Literature and Culture BA

Students are expected to meet with the undergraduate counselors and undergraduate faculty adviser to plan and follow a course of study that incorporates their interests and goals with the fulfillment of requirements for the degree.

## Capstone Program

The American Literature and Culture major is a designated capstone program. Students have the option of completing a capstone seminar or other culminating work that enables them to use knowledge and skills acquired through previous coursework to engage, under the guidance of a faculty member, in literary research or other creative projects that result in a final paper or other product.

## Learning Outcomes

The American Literature and Culture major has the following learning outcomes:

- Proficiency in a broad knowledge/skill set including research methods, critical thinking, and analytical writing
- Familiarity with basic project material including data from multiple sources
- Familiarity with relevant scholarly and current debates in the field
- Conception and execution of an independent project
- Demonstrated seminar or workshop skills
- Demonstrated oral and written communication skills
- Demonstrated defense-of-scholarship skills

## Entry to the Major

### Transfer Students

Transfer applicants to the American Literature and Culture major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, one English critical reading and writing course, and either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or literature in translation.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* English Composition 3, English 4W or 4HW or 4WX taken in the stated sequence (English Composition 3 is requisite to any English 4 course), 11, 87, and either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or literature in translation.

### The Major

*Required:* Ten 4- or 5-unit upper-division English courses, at least two in the time period before 1848 and two in the time period after 1848, selected from the following three areas with a minimum of two selected from each area: (a) *origins—beginnings, events, and trajectories: studying the making of America in its myriad beginnings and manifestations*—courses 100, M102A, M104A, 166A, 166B, 166C, 167A, 167B, 170A, or, when treating American topics, M101B, 106, 123, 131, 139,

169, (b) *identities: places, communities, and environments: studying people, collectives and movements across the diverse geographies of the Americas*—courses 100, M102A, M102B, M104A through M104E, M105A through M105E, 106, 115A, 117, 135, 168, 170B, 170C, 172C, 173A, 173B, 173C, 174A, 174B, 174C, 175, 176, 177, and, when treating American topics, courses M101B, M101C, M101D, M103, M107A, M107B, 108, 109, 118E, M118F, 119, 119XP, M126, 132, 133, 134, 139, (c) *media: aesthetics, genres, and technologies*—courses 115A, 167A, 167B, 168, 170A, 170B, 170C, 172C, 173A, 173B, 173C, 174A, 174B, 174C, 175, 177, or, when treating American topics, courses 114, 115C, 115D, 115E, M115XP, 116A, 116B, 121 through 127, 129, 139, 169, 169R, 179, 179R; (2) one seminar from M105XP, 183A, 183B, 183C, M191A, M191B, M191C, or, when treating American topics, 180, 181A, 181B, 182E, 182F, 184, M191D, M191E; and (3) two courses pertaining to American culture offered by other departments from a list of approved courses for the major. Courses 195 and 195CE are not applicable.

## Honors Program

### Requirements

Students must take one theory course from English 120 through 128 no later than winter quarter of the junior year. In spring quarter of the junior year, students must take course 191H. During fall and winter quarters of the senior year, they take courses 198A and 198B, in which they write a thesis under the direction of a faculty member.

## Policies

### Preparation for the Major

A grade of C or better is required in each of English Composition 3, English 4W or 4HW or 4WX, 11, 87. A foreign literature in translation course list is available under [Foreign Literature in Translation](#). Transfer students who have satisfied the College of Letters and Science foreign language requirement at the high-school level through the Intersegmental General Education Transfer Curriculum (IGETC) program may satisfy the departmental requirement with five foreign literature in translation courses. The courses may be taken on a Passed/Not Passed (P/NP) grading basis.

### The Major

Each course applied toward requirements for the major must be at least 4 units and be taken for a letter grade.

## Honors Program

### Admission

The honors program is open to majors with a 3.5 departmental and a 3.25 overall grade-point average (GPA). Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. Students should apply by winter quarter of the junior year. For application forms and more information, contact the departmental counselor.

## Requirements

The one theory course from English 120 through 128 may fulfill one of three required breadth courses. Course 191H may fulfill one of the two electives for the major. Course 198B may fulfill the second of the two electives for the major.

Students in the creative writing concentration are required to have completed or been accepted into their third workshop in a single genre prior to or concurrent with enrollment in course 191H.

The thesis determines whether they receive highest honors, honors, or no honors.

# Undergraduate Minors

## Creative Writing Minor

The creative writing minor allows students to develop the craft of poetry writing or short fiction writing, as well as to explore other and emerging areas of writing practice such as creative nonfiction, screenwriting, playwriting, hybrid genres, and electronic forms. The minor is excellent preparation for those who seek to pursue advanced degrees in writing, as well as for those who seek to pursue careers in writing and the creative industries.

## Admission

To enter the minor, students must (1) have an overall grade-point average of 2.0 or better, (2) have completed the required lower-division courses, (3) have completed one upper-division course in poetry writing (English 136A or 136B) or short fiction writing (English 137A or 137B), and (4) submit a brief letter of application, a writing sample (at least 10 pages of prose or 7 to 10 poems), and a PDF copy of their degree audit report.

## The Minor

*Required Lower-Division Courses (9–10 units):* One course selected from English 4HW, 4W, or 4WX; and one additional course selected from English 10C, 11, 20, or 20W.

*Required Upper-Division Courses (24–25 units):* One course in a core genre selected from English 136A, 136B, 137A, or 137B; one advanced course in the same core genre selected from English 136B or 137B; one additional advanced course in the same genre, or one intermediate or advanced course in the other genre, or one creative writing topics course selected from English 136A, 136B, 137A, 137B, or M138; one or two elective courses selected from Asian American Studies 112C, Chicana/o and Central American Studies CM135, English M101B, M101C, M102B, M104B, M104C, M104D, M105C, 136A, 136B, 137A, 137B, M138, 170C, 171B, 171C, 172B, 173B, 173C, 174B, 174C, M192 (must be taken twice), or English Composition M138; and one capstone course culminating in a project with a creative writing focus selected from English 184, 195CE, 198B, or 199.

## Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. At least 15 upper-division units applied toward the minor must be taken in residence during the regular academic year (excluding summer sessions) at UCLA. Transfer credit is subject to department approval; consult with the undergraduate counselors before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade (except elective courses offered only on a Passed/Not Passed (P/NP) basis; no more than 4 units of P/NP coursework may be applied), and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## English Minor

The English minor is designed for students who wish to enhance their major program with the benefits of intensive study of English language and literatures, including a better understanding and appreciation of literatures in English and improvement in critical thinking, reading, and writing skills.

## Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed English 10A with a grade of C or better, and have satisfied the English Composition 3 requirement and completed English 4W. Students must file a petition to declare the minor by meeting with a student affairs officer in the [Undergraduate Counseling Office](#), 158/160 Kaplan Hall, 310-825-1389. This allows them priority enrollment in many upper-division courses.

## The Minor

*Required Lower-Division Courses (10 units):* English 10B and 10C, with grades of C or better.

*Required Upper-Division Courses (25 units):* Five courses selected from English 100 through M191E, including one course in literatures in English written before 1700 (see course lists 1a and 1b under English BA, [the major](#)) and one other course in literatures in English written before 1850 (see course lists 1a, 1b, and 1c under English BA, [the major](#)).

## Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. At least 15 upper-division units applied toward the minor must be taken in residence during the regular academic year (excluding summer sessions) at UCLA. Transfer credit is subject to department approval; consult with the undergraduate counselors before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the mi-

nor. Successful completion of the minor is indicated on the transcript and diploma.

## Literature and the Environment Minor

The Literature and the Environment minor provides students with both a solid foundation for literary interpretation and a superstructure that integrates those skills and perspectives with the questions about the past, present, and future of the biosphere. It is designed for undergraduate students who wish to enhance their major program with intensive study of literature in its relationship to the natural environment, while improving their skills in reading, writing, creative and critical thinking, and analysis of complex situations in an ethical frame. The minor examines how different cultural forms (for example, fiction, journalism, poetry, film, design, and other arts) represent environmental issues, including biodiversity, animal studies, wilderness, food, urban ecologies, postcolonial ecologies, environmental justice, and climate change.

### Admission

To enter the minor, students must be in good academic standing with an overall grade-point average of 2.0 or better and have completed English 4HW, 4W, 4WX, or any Writing II course with a grade of C or better. Students must file a petition to declare the minor by meeting with a student affairs officer in the Undergraduate Counseling Office, 158/160 Kaplan Hall, 310-825-1389. For more information, see the [minor website](#).

### The Minor

*Required Lower-Division Courses (10 units):* English 4W, 4HW, 4WX, or any Writing II course, and English M30 (or M30SL), with grades of C or better.

*Required Upper-Division Courses (20 to 24 units):* (1) English 118E and M118F or one additional 118E course on a different topic or one other English course that has a primary focus on environmental issues to be selected from a list available in the [Undergraduate Counseling Office](#) prior to the opening of enrollment each term (students may petition to substitute other courses), (2) one course selected from American Indian Studies C178, Anthropology 133, 166P, Art History 133D, 133E, C145A, Chicana/o and Central American Studies M144, M183, Food Studies M170XP, Geography 130, 136, Honors Collegium 141, 174, Italian 124, Public Policy C115, Russian 122, Urban Planning M120, 121, or CM166 (3) one course selected from Atmospheric and Oceanic Sciences M105, 107, 141, Earth, Planetary, and Space Sciences 101, Ecology and Evolutionary Biology 116, M131, 154, 176, Environment M111, M125, M126, M131, M133, 134, 150, M153, 157, C159, M161, 163, M164, 166, M167, or Environmental Health Sciences 100, (4) one course selected from English 184, 195CE, 197, 198A, 198B, or 199 that culminates in a project focused primarily on literature from an ecocritical or other environmentally focused perspective.

## Policies

Students may petition to substitute an internship course/independent study/directed research course (195CE, 197, 198, or 199) for an elective course as long as it is clearly and predominantly relevant to the topics covered in the minor and falls within the discipline of the requirement for which it serves as a substitute. No more than one upper-division independent study/directed research course (4 or 5 units) may be applied toward the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Professional Writing Minor

The [Professional Writing](#) minor includes the study and practice of originating, designing, and communicating information and ideas. As a discipline, it is the core for creating, debating, and disseminating knowledge in the 21st-century multicultural economy. The minor enables students to expand their knowledge of the practices of writing in a diverse modern society.

Through courses that understand writing broadly—as encompassing written, oral, visual, and electronic multimodal communication—students in the Professional Writing minor acquire deep intellectual and practical skills needed to perform well as good writers within the professions they choose, or to become professional writers with specific areas of academic expertise. All Writing Programs courses in the minor include a segment on digital media.

### Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better, have satisfied the Writing II requirement, and submit a 500-word essay explaining why they want to declare the minor, and how they expect it to relate to their professional lives. [Minor applications](#) are submitted on the English Department website. For more information, contact the Writing Programs adviser, 146 Kaplan Hall, 310-206-1145.

### The Minor

*Required Lower-Division Courses (4-5 units):* Any Writing II course or equivalent.

*Required Upper-Division Courses (26-30 units):* One core course from English Composition 130A through 130E; two courses selected from English 110A, 110C, 110E, 110P, 110V, M191P (or Comparative Literature M191P), M192 (or English Composition M192 or Environment M192), English Composition 131A, 131C, 131D, 132, 133, 134, 136, 137, or English M138 (or English Composition M138) when offered on a nonfiction topic; one course selected from African American Studies M194A (or Education M131A), Asian American Studies C142A, C142B, C142C, Community Engagement and

Social Change 163SL, Communication 109, 110, Dance C184, Digital Humanities 150, Ecology and Evolutionary Biology C179, Education 133, Film, Television, and Digital Media C144, Life Sciences 110, M192A, Music Industry 102, 104A, 110, 122, Research Practice 192B; one additional upper-division course selected from the lists above; and one capstone, cumulative portfolio, independent study, or community and corporate internship course from English 195CE, 197, 199, English Composition 195, or 199.

## Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

No more than one lower-division course may be applied to the minor. Students may petition to substitute courses other than those listed to satisfy elective requirements.

Each minor course must be taken for a letter grade (unless the course is graded only on a P/NP basis; no more than 4 units of P/NP may be applied to the minor), and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Major

### English MA, CPhil, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## English

### Lower-Division Courses

**4HW. Critical Reading and Writing (Honors). (5)** Lecture, four hours. Enforced prerequisite: English Composition 3 or 3H or English as a Second Language 36. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. Satisfies Writing II requirement. Letter grading.

**4W. Critical Reading and Writing. (5)** Lecture, four hours. Enforced prerequisite: English Composition 3 or 3H or English as a Second Language 36. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of 15 to 20 pages of revised writing. Satisfies Writing II requirement. Letter grading.

**4WX. Critical Reading and Writing (Community-Engaged Learning). (5)** (Formerly numbered 4WS.) Lecture, four hours; fieldwork, two hours. Enforced prerequisite: English Composition 3. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of 15 to 20 pages of revised writing. Service learning com-

ponent includes meaningful work with off-campus agency selected by instructor. Satisfies Writing II requirement. Letter grading.

**10A. Literatures in English to 1700. (5)** Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Survey of major writers and genres, with emphasis on tools for literary analysis such as close reading, argumentation, historical and social context, and critical writing. Minimum of three papers (three to five pages each) or equivalent required. P/NP or letter grading.

**10B. Literatures in English, 1700 to 1850. (5)** Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW, 10A. Survey of major writers and genres, with emphasis on tools for literary analysis such as close reading, argumentation, historical and social context, and critical writing. Minimum of three papers (three to five pages each) or equivalent required. P/NP or letter grading.

**10C. Literatures in English, 1850 to Present. (5)** Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW, 10A, 10B. Survey of major writers and genres, with emphasis on tools for literary analysis such as close reading, argumentation, historical and social context, and critical writing. Minimum of three papers (three to five pages each) or equivalent required. P/NP or letter grading.

**11. Introduction to American Cultures. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: English Composition 3, English 4W or 4HW or 4WS. Exploration of question of what is meant by America, and hence what is meant by American culture and American studies. Addresses concepts of origins (real or imagined beginnings of cultural formations), identities (narratives of people and places), and media (creative process as manifest in aesthetic forms, artistic movements, and information systems). P/NP or letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**20. Introduction to Creative Writing. (4)** Lecture, four hours; discussion, one hour (when scheduled). Preparation: submission of creative or expository writing samples to screening committee. Enforced requisites: satisfaction of Entry-Level Writing requirement, English Composition 3. Not open for credit to students with credit for course 20W. Designed to introduce fundamentals of creative writing. Emphasis either on poetry, fiction, or drama, depending on wishes of instructor(s) during any given term. Readings from assigned texts and weekly writing assignments required. P/NP or letter grading.

**20W. Introduction to Creative Writing. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: satisfaction of Entry-Level Writing requirement, English Composition 3. Not open for credit to students with credit for course 20. Designed to introduce fundamentals of creative writing and writing workshop experience. Emphasis on poetry, fiction, drama, or creative nonfiction depending on wishes of instructor(s) during any given term. Readings from assigned texts, weekly writing assignments (multiple drafts and revisions), and final portfolio required. Satisfies Writing II requirement. Letter grading.

**M30. Environmental Literature and Culture. (5)** (Same as Environment M30.) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Introduction to core themes, questions, and methods within interdisciplinary field of environmental humanities. Examination of how different culture forms (e.g., fiction, journalism, poetry, visual art) represent environmental issues. Topics may include biodiversity, wilderness, food, urban ecologies, postcolonial ecologies, environmental justice, and climate change. P/NP or letter grading.

**M30SL. Environmental Literature and Culture (Service Learning). (5)** (Same as Environment M30SL.) Lecture, three hours; discussion, one hour; fieldwork, two hours. Enforced requisite: satisfaction of Entry-Level Writing requirement. Introduction to core themes, questions, and methods within interdisciplinary field of environmental humanities. Examination of how different culture forms (e.g., fiction, journalism, poetry, visual art) represent environmental issues. Topics may include biodiversity, wilderness, food, urban ecologies, postcolonial ecologies, environmental justice, and climate change. Service learning component includes meaningful work with off-campus agency/agencies selected by instructor. P/NP or letter grading.

**31. Apocalypse: Imagining End of World. (5)** Lecture, four hours; discussion, one hour. Imagining that world will come to end is common reaction to crises such as war, genocide, famine, epidemic, and natural disaster. It is also major component of some religious traditions and political movements that aim to change society from ground up. Exploration of narrative templates and visual images that have typically accompanied stories about end of world, historical moment and movement they emerge from, their creators, audiences, and impacts. Exploration of these questions through wide range of textual and visual works from scholarship and journalism to novels, graphic novels, films, and videos. Consideration of how typical story templates, characters, and motifs of apocalypse shape current perceptions of risks, crises, and disasters that range from violent social conflict and revolutionary movements to industrial accidents, epidemics, and climate change. P/NP or letter grading.

**M50. Introduction to Visual Culture. (5)** (Same as Film and Television M50.) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: satisfaction of Entry-Level Writing requirement. Study of how visual media, including advertising, still and moving images, and narrative films, influence contemporary aesthetics, politics, and knowledge. P/NP or letter grading.

**51A. Poems and Poets. (5)** Lecture, three hours; discussion, one hour. Offers sample of enormous body of poetry written in English since Middle Ages. Reading of series of celebrated poets and their poems as way of exploring what poetry is and what it is for. Specifically, how works of art respond to conditions of social life as well as intimate personal experience. Consideration of poetry's political power. In-depth discussion about gender, race, class, sexuality, colonial violence, and, broadly, relationship between art and justice. Students are familiarized with key poetic forms, conventions, and techniques; learn how to read poem critically; and get better at putting thoughts in writing. Letter grading.

**60. L.A. Women. (5)** Lecture, four hours. Focus on women writers and filmmakers who live in and write about Los Angeles. Ranging personal essay, memoir, science fiction, romantic comedy, sitcom, and documentary, writers and filmmakers encountered linger and loiter in L.A.'s neighborhoods and their communities that expand, complicate, and enrich what we think we know about City of Angels. Students become particularly attuned to how race, ethnicity, gender, sexuality, and class inform one's orientation to and mobility within L.A. Study of history of L.A., from its more visible areas like Hollywood or Beverly Hills to its edges and outlying spaces like San Fernando Valley, Inland Empire, and East L.A. Students think critically about how women's accounts of living in, or visiting, L.A. have contributed to and intervened within stories city tells about itself. P/NP or letter grading.

**70. Medievalisms: Medieval Literature and Contemporary Culture. (5)** Lecture, four hours; discussion, one hour. Requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to English majors or students with credit for any course in the 140 series. Introduction to medieval texts juxtaposed with modern texts and media to analyze how and why the medieval (in form of crusade, quest, romance, world-construction, etc.) is continually reproduced and transformed in large scale popular productions, novels, film, and television. Textual focus on medieval works in comparison to analysis of 20th- and 21st-

century works may include Beowulf, Sir Gawain and the Green Knight, Le Morte Darthur, Lord of the Rings, Game of Thrones, and Harry Potter. P/NP or letter grading.

**80. Major American Authors. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to English majors or students with credit for any courses in 170 series. Introduction to chief American authors, with emphasis on poetry, nonnarrative prose, and short fiction of such writers as Poe, Dickinson, Emerson, Whitman, Twain, Frost, and Hemingway. P/NP or letter grading.

**85. American Novel. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to English majors or students with credit for any courses in 170 series. Development, with emphasis on form, of American novel from its beginning to present day. Includes works of such novelists as Hawthorne, Fitzgerald, Faulkner, Ellison, and Morrison. P/NP or letter grading.

**87. Topics in American Cultures. (5)** Seminar, three hours. Requisites: English Composition 3, English 4W or 4HW or 4WS, 11. Content varies. Introductory study of diverse peoples, histories, and ideas of America. P/NP or letter grading.

**88A-88Z. Lower-Division Seminars: Special Topics in English. (5 each)** Seminar, three hours. Limited to 15 students. Content varies; see departmental counselor for information. P/NP or letter grading. **88A.** Medieval Literature; **88B.** Renaissance Literature; **88C.** 17th-Century Literature; **88D.** 18th-Century Literature; **88E.** Romantic Literature; **88F.** Victorian Literature; **88G.** 20th-Century British Literature; **88H.** Colonial American Literature; **88I.** 19th-Century American Literature; **88J.** 20th-Century American Literature; **88K.** History of English Language; **88L.** Folklore and Mythology; **88M.** Literature and Society; **88SL.** Service Learning. Seminar, three hours; fieldwork, three hours. Textual analysis, analytical discussion, and written assignments about works of literature that raise issues relevant to contemporary society. Service learning component includes minimum of 20 hours service with agency involved in issues of public advocacy and social justice.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**90. Shakespeare. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to English majors or students with credit for course 150A or 150B. Survey of Shakespeare's plays, including comedies, tragedies, and histories, selected to represent Shakespeare's breadth, artistic progress, and total dramatic achievement. P/NP or letter grading.

**91A. Introduction to Poetry. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Recommended for instructional credential candidates. Study of critical issues (metrics, diction, figurative language, symbolism, irony and ambiguity, form and structure) and aesthetic issues, including evaluative criteria, followed by close critical analysis of selection of representative poems. P/NP or letter grading.

**91B. Introduction to Drama. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Examination of representative plays; readings may range from Greek

to modern drama. Emphasis on critical approaches to dramatic text; study of issues such as plot construction, characterization, special uses of language in drama, methods of evaluation. P/NP or letter grading.

**91C. Introduction to Fiction. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Introduction to prose narrative, its techniques and forms. Analysis of short and long narratives and of critical issues such as plot, characterization, setting, narrative voice, realistic and nonrealistic forms. P/NP or letter grading.

**91D. Introduction to Graphic Fiction. (5)** Lecture, three hours; discussion, one hour (when scheduled). Requisite: satisfaction of Entry-Level Writing requirement. Introduction to popularity and important cultural work of comic books and graphic novels. Emphasis on how text and image combine to create meaning, including problem of appropriateness of comics for serious cultural topics. P/NP or letter grading.

**97H. Honors Research Seminar for Freshmen and Sophomores. (4)** Seminar, three hours. Enforced requisites: English Composition 3, English 4W (or 4HW). Recommended for lower-division students who desire familiarity with research methods in literary studies. Areas may include use of archives; locating, reading, and incorporating secondary criticism; critical and textual studies; history of books. Specific literatures vary with instructor. May not be repeated for credit. P/NP or letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**100. Ways of Reading Race. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisite: English Composition 3. Introduction to interdisciplinary study of race and ethnicity, with primary focus on literature. Through examination of institutions that form understanding of race—citizenship, nationalism, class, gender, and labor—interrogation of how we come to think of ourselves and others as having race, and effects of such racialized thinking. Course is not about any particular racial or ethnic group, but highlights creation of ethnic categories and their effects on cultural production. P/NP or letter grading.

**M101A. Premodern Queer Literatures and Cultures. (5)** (Same as Gender Studies M105A and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M101A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of discrete period of queer literature from beginning to circa 1850. Works by such writers as Sappho, Plato, Marlowe, Shakespeare, and Thomas Gray may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M101B. Queer Literatures and Cultures, 1850 to 1970. (5)** (Same as Gender Studies M105B and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M101B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of discrete period of queer literature and culture from circa 1850 to 1970. Works by such authors as Walt Whitman, Radclyffe Hall, Gertrude Stein, Virginia Woolf, Langston Hughes, Tennessee Williams, Henry Blake Fuller, and James Baldwin may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M101C. Queer Literatures and Cultures after 1970. (5)** (Same as Gender Studies M105C and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M101C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Examination of cultural production, specifically literature, produced by queers after Stonewall rebellion in New York in 1969, widely regarded as origins or beginning of modern lesbian and gay rights movement in U.S. Writings and films by such authors as An-

drew Holleran, Leslie Feinberg, Achy Obejas, Essex Hemphill, Audre Lorde, Cheryl Dunye, and Alison Bechdel may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M101D. Studies in Queer Literatures and Cultures. (5)** (Same as Gender Studies M105D and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M101D.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Variable specialized studies course in queer literatures and cultures. Topics focus on particular problem or issue in terms of its relationship to queer cultures and writings. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M102A. Historical Survey of Asian American Literature. (5)** (Same as Asian American Studies M112A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Asian American literature either produced from or thematically reflecting pre-1980 period. Issues include immigration, diaspora, generational conflict, appropriation of cultural traditions, ethnic/gender formation, interethnic dynamics, and social movement. Works by such authors as Edith Eaton, Younghill Kang, Carlos Bulosan, Hisaye Yamamoto, John Okada, Frank Chin, and Maxine Hong Kingston. P/NP or letter grading.

**M102B. Contemporary Asian American Literary Issues and Criticism. (5)** (Same as Asian American Studies M112B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of post-1980 Asian American literature that explores key literary and critical issues, such as race and geography, aesthetics and activism, cultural work and immigrant labor, kinship and sexuality, model minority and Orientalism, and meat versus rice, in study of novels, poetry, performance, memoirs, and essays. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M103. Studies in Disability Literatures. (5)** (Same as Disability Studies M103.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of modes of disability in literature, with specific emphasis on thematic concerns. Topics may include introduction to disability studies; race, gender, and disability; disability narratives; etc. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M104A. Early African American Literature. (5)** (Same as African American Studies M104A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introductory survey of African American literature from 18th century through World War I, including oral and written forms (folktales, spirituals, sermons; fiction, poetry, essays), by authors such as Phillis Wheatley, Frances Harper, Frederick Douglass, Harriet Jacobs, Charles Chesnut, Booker T. Washington, and Pauline Hopkins. P/NP or letter grading.

**M104B. African American Literature from Harlem Renaissance to 1960s. (5)** (Same as African American Studies M104B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introductory survey of 20th-century African American literature from New Negro Movement of post-World War I period to 1960s, including oral materials (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, Gwendolyn Brooks, and Ralph Ellison. P/NP or letter grading.

**M104C. African American Literature of 1960s and 1970s. (5)** (Same as African American Studies M104C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introductory survey of African American literary expression from late 1950s through 1970s. Topics include rise of Black Arts Movement of 1960s and emergence of black women's writing in early 1970s, with focus on authors such as Lorraine Hansberry, Amiri Baraka, Nikki Giovanni, Alice Walker, Toni Morrison, Ishmael Reed, Audre Lorde, Paule Marshall, and Ernest Gaines. P/NP or letter grading.

**M104D. Contemporary African American Literature. (5)** (Same as African American Studies M104D.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introductory survey of African American literature from 1980s to present covering range of genres, with emphasis on diversity of perspectives and styles that have emerged over past 30 years or so. Authors may include Toni Morrison, August Wilson, Octavia Butler, Anna Deavere Smith, June Jordan, Charles Johnson, and Rita Dove. P/NP or letter grading.

**M104E. Topics in African American Literature and Culture. (5)** (Same as African American Studies M104E.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Variable topics lecture course that provides opportunity to cover African American literature from wide range of theoretical, historical, format, and thematic perspectives. Topics may include African American autobiography, 20th-century African American literature and film, black diaspora literature, post-modern African American fiction, Afro-Futurism, and African American satire. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M105A. Early Chicana/Chicano Literature, 1400 to 1920. (5)** (Same as Chicana/o and Central American Studies M105A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of Chicana/Chicano literature from poetry of Triple Alliance and Aztec Empire through end of Mexican Revolution (1920), including oral and written forms (poetry, corridos, testimonios, folklore, novels, short stories, and drama) by writers such as Nezahualcoyotl (Hungry Coyote), Cabaza de Vaca, Lorenzo de Zavala, María Amparo Ruiz de Burton, Eusebio Chacón, Daniel Venegas, and Lorena Villegas de Magón. P/NP or letter grading.

**M105B. Chicana/Chicano Literature from Mexican Revolution to el Movimiento, 1920 to 1970s. (5)** (Same as Chicana/o and Central American Studies M105B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Chicana/Chicano literature from 1920s through Great Depression and World War II, ending with Chicana/Chicano civil rights movement. Oral and written narratives by writers including Conrado Espinoza, Jovita González, Cleofas Jaramillo, Angelico Chávez, Mario Suárez, Oscar Acosta, and Evangelina Vigil. P/NP or letter grading.

**M105C. Chicana/Chicano Literature since el Movimiento, 1970s to Present. (5)** (Same as Chicana/o and Central American Studies M105C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of Chicana/Chicano literature since 1970s, with particular emphasis on how queer and feminist activism as well as Central and South American migration have shaped 21st-century chicanidad. Oral, written, and graphic fiction, poetry, and drama by writers including John Rechy, Gloria Anzaldúa, Los Bros Hernández, Ana Castillo, and Dagoberto Gilb guide exploration of queer and feminist studies, Reagan generation, immigration debates, and emerging Latina/Latino majority. P/NP or letter grading.

**M105D. Introduction to Latina/Latino Literature. (5)** (Same as Chicana/o and Central American Studies M105D.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Survey of U.S. Latina/Latino literature and introduction to its major critical trends, with emphasis on groups of Caribbean, Mexican, South American, and Central American origin. Representative works read in relation to such topics as relationship between Latina/Latino populations and U.S. cultural sphere, struggle for self-determination, experiences of exile and migration, border zones, enclaves and language, and *mestizaje* and its impact on cultural production. P/NP or letter grading.

**M105E. Studies in Chicana/Chicano and/or Latina/Latino Literature. (5)** (Same as Chicana/o and Central American Studies M105E.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Variable topics course to give students broad introduction to issues and themes in Chicana/Chicano and/or Latina/Latino literature.

Topics include border, immigration, revolution, language, gender, sexuality, and diaspora, among others. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M105XP. Seminar: Chicana/Chicano and/or Latina/Latino Literature—Community-Engaged Learning.** (5) (Formerly numbered M105SL.) (Same as Chicana/o and Central American Studies M105XP.) Seminar, three or four hours; field placement, three or four hours. Enforced requisite: English Composition 3. Specialized studies in Chicana/Chicano and/or Latina/Latino literature. In-depth study of various topics related to Chicano/Latino communities in Southern California, including Chicana/Chicano visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicano journalism; and labor and literature. Service learning component includes minimum of 20 hours of meaningful work with agency involved with Chicana/Chicano and/or Latina/Latino community and selected by instructor. P/NP or letter grading.

**106. Studies in Native American and Indigenous Literatures.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of Native American and/or transnational indigenous literary and cultural expression. Topics may include oral traditions and histories, decolonization and sovereignty, identity and place in comparative perspectives, and multiple genres and forms such as novel, poetry, drama, visual arts, dance, song, and film. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M107A. Studies in Women's Writing.** (5) (Same as Gender Studies M107A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Focus on women writers that may include historical, regional, national, or thematic emphasis, with possible topics such as authorship, self-writing, sexuality, gender, and genre. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M107B. Studies in Gender and Sexuality.** (5) (Same as Gender Studies M107B and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M107B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Examination of literary and cultural production through lens of gender and sexuality. Depending on instructor, emphasis may be historical, regional, national, comparative, or thematic and include other intersectional vectors of identity and representation such as race and ethnicity. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**108. Interracial Encounters.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: English Composition 3 or 3H. Study of literary, cultural, and/or cinematic texts produced by people from different ethnic and religious backgrounds and providing comparative cultural perspectives on living in multiethnic societies. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**109. Topics in Race, Ethnicity, Gender, and Sexuality Studies.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. Depending on instructor, emphasis may be historical, regional, national, comparative, or thematic. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**110A. Writing in English Major: Analytical.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: course 4W (or 4HW or 4WS), English Composition 3. Not open for credit to students with credit for course 110T. Improvement and refinement of writing about literature. Focus on writing as process, rewriting, and argument; minimum 15 to 20 pages of writing required. May not be repeated for credit. P/NP or letter grading.

**110C. Public Readers, Public Writers: Writing about Books for 21st-Century Audience.** (5) Lecture, four hours. Requisites: course 4W (or 4HW or 4WS), English Composition 3 (or 3D or 3DS or 3SL). In-depth study and practice of literary and cultural criticism for general audience. Focus on writing as process, re-

writing, and argument; minimum 15 to 20 pages of writing. May not be repeated for credit. P/NP or letter grading.

**110E. Writing in English Major: Advanced Essay.** (5) Seminar, three or four hours. Requisites: course 4W (or 4HW or 4WS), English Composition 3. Enrollment by consent of instructor. Workshop in writing of advanced literary analyses; study of methods and techniques of developing complex critical arguments. Minimum 15 to 20 pages of revised writing required. May not be repeated for credit. P/NP or letter grading.

**110P. Writing in English Major: Pre-Professional Portfolio.** (5) Seminar, four hours. Requisites: course 4W, English Composition 3 or equivalent. Limited to American Literature and Culture and English majors. Writing for professions. Students review written materials completed in previous English courses and develop new documents, projects, and writing samples relevant to success in variety of professions including postgraduate study. Culminates in writing portfolio of each student's work. May not be repeated for credit. P/NP or letter grading.

**110T. Writing in English Major: Transfer Students.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 4W (or 4HW), 10A, 10B, 10C, English Composition 3. Open only to English major transfer students. Not open for credit to students with credit for course 110A. Improvement and refinement of writing about literature and culture. Focus on writing as process, rewriting, and nuanced argument; minimum 15 to 20 pages of writing required. May not be repeated for credit. P/NP or letter grading.

**110V. Variable Topics in Professional Writing.** (5) Lecture, four hours. Requisites: course 4W (or 4HW or 4WS), English Composition 3 (or 3D or 3DS or 3SL). Focus on writing as adaptable, multifaceted professional skill as well as process, rewriting, and argument; minimum 15 to 20 pages of writing. May not be repeated for credit. P/NP or letter grading.

**111A. Hebrew Bible in Translation.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Literary study of Hebrew Bible (Old Testament), with emphasis on literary devices and narrative structures in relation to Judaic historical, political, psychological, philosophical, and theological themes. P/NP or letter grading.

**111B. Christian Biblical Texts in Translation.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Literary study of canonical New Testament and other Christian texts (deuterocanonical, apocryphal, gnostic, etc.), with emphasis on literary devices and narrative structures in relation to Judeo-Christian historical, political, psychological, philosophical, and theological themes. P/NP or letter grading.

**111C. Topics in Biblical Literature.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Recommended: course 111A or 111B. Study of topics in Hebrew Bible and/or New Testament, with attention to particular literary themes, motifs, genres, and modes of interpretation. Discussion of influence of Bible on discrete periods or individual authors in literatures in English. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**112A. Oral Tradition.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of myth, dramatic origins, oral epic, folktale, and ballad. P/NP or letter grading.

**112B. Celtic Mythology.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of early textual materials pertaining to Celtic peoples and their stories, with emphasis on techniques of mythological analysis. P/NP or letter grading.

**112C. Survey of Medieval Celtic Literature.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earliest times to 14th century. P/NP or letter grading.

**112D. Celtic Folklore.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to colonial and postcolonial issues and folkloric methods. P/NP or letter grading.

**112E. Food and Fantasy in Irish Tradition and Literature.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Food, cooking, feeding, eating, and drinking as powerful cultural symbols in Irish oral and literary tradition from medieval to modern times. P/NP or letter grading.

**113A. History of English Language.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study directed toward English majors of main features in grammatical, lexical, and phonetic condition of English language from Indo-European time to present. P/NP or letter grading.

**113B. Introduction to Structure of Present-Day English.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introduction to techniques of linguistic description as applied to pronunciation, grammar, and vocabulary of modern English. P/NP or letter grading.

**114. Lyric Histories.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Exploration of lyric poetry in English across centuries. Topics may include historical evolution of aesthetic forms, changing concepts of dramatic personae, matter of literary influence, and complex relationship of individual lyric speakers with their social and historical contexts. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**115A. American Popular Literature.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Examination of such popular styles and genres as sentimental literature, sensation fiction, dime novels, crime stories, pornography, science fiction, supernatural tales, Hollywood novels, and other kinds of mass literary expression. P/NP or letter grading.

**115B. British Popular Literature.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Readings in literature of British masses, from 16th-century broadsides to contemporary novels. Examination of social and cultural aspects of literature. P/NP or letter grading.

**115C. Literature for Children and Adolescents.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of historical backgrounds and development of types of children's literature, folklore and oral tradition, criticism, illustration, and bibliography and/or analysis and evaluation of literature intended mainly for students in junior and senior high schools. P/NP or letter grading.

**115D. Detective Fiction.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of British and American detective fiction and literature of detection. P/NP or letter grading.

**115E. Science Fiction.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of science fiction and speculative literatures. P/NP or letter grading.

**M115XP. Community-Based Studies of Popular Literature.** (5) (Formerly numbered M115SL.) (Same as Community Engagement and Social Change M110XP.) Lecture, four hours; discussion, one hour (when scheduled); fieldwork, two hours. Enforced requisite: English Composition 3. Service-learning course that examines history and development of one or more genres of popular literature, with attention to contemporary communities of readers and writers and formation of civil society. Topics vary and may include children's literature and childhood literacy, mass market fiction and book club culture, or science fiction and science policy. Service-learning component includes meaningful work with local nonprofit organizations selected in advance by instructor. May be repeated for credit with topic change. P/NP or letter grading.

**116A. Experimental Fiction. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of novels and short stories that employ playful or experimental practices in language, narrative, hybridity (genre, medium), typography, and other material aspects of text such as binding and book design. Focus generally on texts from 20th century and later, but can include readings dating to beginning of novel. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**116B. Introduction to Electronic Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Overview of literatures involving digital technology, such as hypertext fiction, interactive fiction, animated and interactive poetry, multimedia works, video game narrative, and works employing network protocols and print-based works influenced by digital culture. Basic introduction to new media theory. P/NP or letter grading.

**117. Literature of California and American West. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of literature in English dealing with exploration, settlement, and emergent cultural awareness of Western U.S. P/NP or letter grading.

**118A. Interdisciplinary Studies in Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of literatures in English in relation to other disciplines such as sciences, history, politics, philosophy, music, photography, visual studies, psychology. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**118B. Literature and Other Arts. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Investigation of relationship of literature to one or more other arts, including music (opera, musical theater, popular music, jazz), painting, photography, other visual arts, sculpture and other plastic arts, performance art, dance, architecture. Topics vary and may include not only English literature but foreign literature in translation. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**118C. Studies in Visual Culture. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of visual images (photography, film, video) and their relation to literary and/or popular culture. Topics include adaptation, visual analysis, word and image, image and culture, film and visual culture. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**118E. Literature and Environment. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Study of literature from environmental perspectives, including ecological and interdisciplinary consideration of issues such as environmental justice, animal studies, food studies, gender studies, urban and postcolonial ecologies, climate change, cultural biophilia and biophobia, and relationship of literature to sciences. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M118F. Food Cultures and Food Politics. (5)** (Same as Food Studies M132 and Society and Genetics M132.) Lecture, four hours; discussion, one hour (when scheduled). Requisite: English Composition 3. Introduction to interdisciplinary field of food studies, with focus on how literature, art, science writing, and visual culture address political dimensions of food and agriculture in specific contexts. P/NP or letter grading.

**119. Literary Cities. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Exploration of place of literary imagination in making of cities, with focus on questions of cultural exchange, development, migration, urban rebellion, and style. Topics may include meaning of urban space and time, city as urban village or cosmopolitan hub, segregated dystopia or postmodern future, and impact of exile, tourism, and migration in making of cities. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**119XP. Literary Cities—Service Learning. (5)** (Formerly numbered 119SL.) Lecture, four hours; discussion, one hour (when scheduled); fieldwork, two hours. Enforced requisite: English Composition 3. Exploration of place of literary imagination in making of cities, with focus on questions of cultural exchange, development, migration, urban rebellion, and style. Topics may include meaning of urban space and time, city as urban village or cosmopolitan hub, segregated dystopia or postmodern future, and impact of exile, tourism, and migration in making of cities. Service learning component includes meaningful work with local nonprofit organizations selected in advance by instructor. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**120. History of Aesthetics and Critical Theory. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Investigation of texts and ideas in history of aesthetics, critical theory, and interpretation from Greeks through 18th century. Readings may include Gorgias, Plato, Aristotle, Longinus, Biblical hermeneutics, Hume, Descartes, Kant, Schiller, and Hegel. May not be repeated for credit. P/NP or letter grading.

**121. Modern and Contemporary Aesthetics and Critical Theory. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A and 10B, or 11 and 87. Investigation of some dominant trends in 19th- and 20th-century aesthetics, critical theory, and interpretation. Topics may include Marxism, psychoanalysis, structuralism, poststructuralism, feminism, and postcolonialism. May not be repeated for credit. P/NP or letter grading.

**122. Keywords in Theory. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Recommended: courses 120, 121. Taking its model from Raymond Williams' classic vocabulary of culture and society, investigation of fundamental theoretical concepts, or keywords, that have emerged from variety of intellectual disciplines to shape literary and cultural studies. Consideration of lexical development of such keywords; how they alter and enrich assumptions about textuality, readers, and authorship; and how they engender interpretive paradigms and methodologies for study of literature and culture. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**123. Theories of History and Historicism. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Recommended: courses 120, 121. Exploration of theories of history and historicism that offer productive approaches to literary texts. Investigation of how theorists negotiate between abstract concepts of history and situated historical narratives, how histories are constructed, troped, and given authority, how histories constitute past and present in relationship to each other to stabilize tradition or induce change, and complex ways that literary texts operate within and on their historical contexts. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**124. Theories of Religion. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Recommended: courses 120, 121. Examination of relationship between literary and religious practices and traditions. Topics may include legacies of monotheisms, theories of sacrifice, sacrament, gift, and mystical traditions, as well as history of allegory and theological approaches to reading. Selected topics may address literary applications of religious categories as treated in cultural anthropology, philosophy, and critical theory. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**125. Violence in Cultural Theory and Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Recommended: courses 120, 121. Examination of literary, philosophical, religious, and/or psychological texts that theorize causes, effects, political justifications, cultural sublimations, and literary uses and critiques of violence. P/NP or letter grading.

**M126. Feminist and Queer Theory. (5)** (Same as Gender Studies M126 and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M126.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Recommended: one course from 120, 121, Gender Studies 102, 103, or 104. Investigation of key concepts and debates in study of gender, sexuality, and kinship, with focus on their interrelated significance for making of culture. Readings to be interdisciplinary, with possible emphasis on impact of changing ideas of gender and sexuality on specific historical cultures. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**127. Performance, Media, and Cultural Theory. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Recommended: courses 120, 121. Examination of concepts and modes of performance, culture, and/or media, broadly construed. Evaluation of different modes of inquiry around one or more of these concepts, as well as their intersection, in various intellectual traditions, including fields of cultural studies, performance studies, literary analysis, and film theory. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**128. Postcolonial and Transnational Theory. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Recommended: courses 130, 131. Exploration of methodological, aesthetic, and theoretical implications of postcolonial and transnational approaches to study of literature and culture. Topics may include theories of subaltern, orientalist, feminist, and/or indigenous representation and histories and may address representational issues of national sovereignty in wake of globalization and neocolonialism. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**129. Topics in Genre Studies, Interdisciplinary Studies, and Critical Theory. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Recommended: courses 120, 121. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. Depending on instructor, emphasis may be historical, regional, national, comparative, or thematic. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**130. Introduction to Postcolonial Literatures. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Introduction to major themes and issues in postcolonial literature, with focus on contemporary literature and writings produced after decolonization, often engaging history of British or other empires with emphasis on Anglophone writers from Africa, Caribbean, South Asia, and indigenous Pacific. May not be repeated for credit. P/NP or letter grading.

**131. Studies in Postcolonial Literatures. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Strongly recommended: course 130. Survey of how colonialism and decolonization have shaped literary and cultural expression, with specific emphasis on regional or thematic concerns. Topics may include literatures of Africa and African diaspora, environment and empire, Caribbean contact zones, or literatures of indigenous Pacific. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**132. Culture and Imperialism. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Exploration of relationship between culture and imperialism through lens of literary texts to raise questions about what study of empire tells about relationship between power and knowledge. Discussion of shifting patterns and paradigms of imperial rule, including way both metropolitan and peripheral or colonial spaces were transformed. Emphasis may be on particular historical period or may adopt thematic approach, such as Orientalism. Topics may include construction of gender, race, otherness, nature, religion, and nation. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**133. Transatlantic Literatures and Cultures. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Study of literatures of Atlantic to examine cultural, political, and ideological issues that followed from transatlantic movement of people, ideas, commodities, and cultural artifacts. In addition to literatures of Britain and U.S., coverage may include texts from Africa, Caribbean, Mexico, South America, Spain, and other parts of Europe. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**134. Nationalism and Transnationalism. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Examination of how critical frameworks of nation and migration, transnationalism and globalization, and tradition and modernity frame analysis of literary texts, particularly relationship between literature and national identity. Other topics include nation building in relationship to regional identities as well as discourses of national expansion, diaspora, resettlement, and exile and foundational narratives of nation in relationship to representations of mobility. Genres may include epic, romance, travel narrative, novel, and autobiography. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**135. Literature of Americas. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A and 10B, or 11 and 87. Survey of literatures of Americas, with emphasis on complex ways in which letters of North America, Central America, South America, and Caribbean forge distinctly American perspective on global affairs. Spans literature from age of encounter to 19th-century U.S. American revolution and Latin American independence movements and beyond, considering such topics as empire, colonialism, slavery, transnational dynamics, and cross-cultural transformations among indigenous, European, and African civilizations. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**136A. Creative Writing: Intermediate Poetry. (5)** Seminar, three or four hours. Enforced requisites: courses 4HW or 4W or 20 or 20W, English Composition 3. Not open for credit to students with credit for course 136B. Reading in contemporary poetry and exercises in writing of poetry. Discussion based on assigned reading and on student work. Enrollment in more than one section per term not permitted. May be repeated for maximum of 10 units. P/NP or letter grading.

**136B. Creative Writing: Advanced Poetry. (5)** (Formerly numbered 136.) Seminar, three or four hours. Enforced requisites: courses 4HW or 4W or 20 or 20W, English Composition 3. Further reading in contemporary poetry and exercises in writing of poetry. Some classroom discussion based on assigned reading, but most on student work. Enrollment in more than one section per term not permitted. May be repeated for maximum of 15 units. P/NP or letter grading.

**137A. Creative Writing: Intermediate Short Story. (5)** Seminar, three or four hours. Enforced Requisites: courses 4HW or 4W or 20 or 20W, English Composition 3. Not open for credit to students with credit for course 137B. Reading in contemporary short stories and exercises in short fiction writing. Classroom discussion based on assigned reading and student work. Enrollment in more than one section per term not permitted. May be repeated for maximum of 15 units. P/NP or letter grading.

**137B. Creative Writing: Short Story. (5)** (Formerly numbered 137.) Seminar, three or four hours. Enforced Requisites: courses 4HW or 4W or 20 or 20W, English Composition 3. Further reading in contemporary short stories and exercises in fiction writing, with emphasis on longer stories. Some classroom discussion based on assigned reading, but most on student work. Enrollment in more than one section per term not permitted. May be repeated for maximum of 15 units. P/NP or letter grading.

**M138. Topics in Creative Writing. (5)** (Same as English Composition M138.) Seminar, three hours. Requisite: English Composition 3 or 3D or 3DS or 3SL. Introductory workshop in genre(s) of instructor choice,

that may include mixed genres, playwriting, screenwriting, literary nonfiction, or others. Enrollment in more than one section per term not permitted. May be repeated for maximum of 15 units. May not be used to satisfy workshop requirements for English creative writing concentration. P/NP or letter grading.

**139. Individual Authors. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3. Specialized study of work of one single Anglophone poet, dramatist, prose writer, or novelist. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**140A. Chaucer: *Canterbury Tales*. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Introductory study of Chaucer's language, versification, and historical and literary background, including analysis and discussion of his long major poem, *Canterbury Tales*. P/NP or letter grading.

**140B. Chaucer: *Troilus and Criseyde* and Selected Minor Works. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Intensive study of *Troilus and Criseyde* and selected minor works of Chaucer, such as *Book of the Duchess*, *House of Fame*, *Parliament of Fowls*, etc. P/NP or letter grading.

**141A. Early Medieval Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B. Major poetry and prose of early medieval Britain, including epic, romance, history, saints' lives, and travel literature. Texts and topics include *Beowulf*, Vikings, poems on women, Bede, and King Alfred. P/NP or letter grading.

**141B. Introduction to Old English Language and Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B. Introductory study of Old English language and literature, including grammar and vocabulary, reading and translation of poetry and prose, and discussion of literatures and cultures of Anglo-Saxon England. P/NP or letter grading.

**141C. Topics in Old English. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisite: course 141B. Intensive study of Old English literature in original language. Texts and topics may include *Beowulf*, *Vercelli Book*, books of monsters, medical writing, etc. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**141R. Early Medieval Literature: Research Component. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Major poetry and prose of early medieval Britain, including epic, romance, history, saints' lives, and travel literature. Substantial research component included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**142. Later Medieval Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Reading and historical explication of major writers of later medieval Britain (e.g., Gawain-poet, Langland, Gower, Margery Kempe, Malory, miracle and morality plays, prose, and lyrics). P/NP or letter grading.

**142R. Later Medieval Literature: Research Component. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Reading and historical explication of major writers of later medieval Britain (e.g., Gawain-poet, Langland, Gower, Margery Kempe, Malory, miracle and morality plays, prose, and lyrics). Substantial research component included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**143. Drama to 1576. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. English drama from its Latin and Anglo-Norman roots to opening of first public playhouse. P/NP or letter grading.

**144. Medieval Romance and Literatures of Court. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Investigation of medieval court culture, exploring concepts of nobility, governance, love, loyalty, and power in range of genres: romance, courtly epic, lyric, de-

bate, and satire. Texts may include *Beowulf*, *Lais of Marie de France*, *Sir Gawain and Green Knight*, *Pearl*, and Malory's *Morte Arthure*. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**145. Medieval Literatures of Devotion and Dissent. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Exploration of devotional genres and their complex relationships with traditions of dissent in medieval English culture, encompassing hagiography, vision, conversion narrative, interreligious debate, heresy trials, and Lollard manifestos and translations. Texts may include *Dream of Rood*, *South English Legendary*, *Ancrene Wisse*, *Piers Plowman*, Lollard writings, macroplays, Wakefield cycle, *Showings of Julian of Norwich*, and *Book of Margery Kempe*. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**146. Medieval Story Cycles and Collections. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Exploration of medieval story cycles and story collections as narrative forms. Medieval story cycles engage in complex literary conversations across medieval cultures, periods, genres, and languages, while story collections often stage art of storytelling within narrative frame to invite self-consciousness about powers of literary production itself. Texts may include cycles such as texts gathered as *Matter of Britain*, *Matter of Rome*, or *Matter of France*; also *Mabinogi*, manuscript collections such as Auchinleck manuscript or Exeter book, framed narratives such as *Decameron*, *Canterbury Tales*, *One Thousand and One Nights*, and Gower's *Confessio Amantis*, or collections of exempla, legends, and dicta. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**147. Medieval Histories, Chronicles, and Records. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Investigation of medieval history writing as literary tradition. Medieval histories survive in every language of medieval Britain, including Latin, Old English, Welsh, Irish, Anglo-Norman French, and Middle English. Multilingual ubiquity of history writing points to pressures of history on history writing—histories are always shaped by political, cultural, linguistic, and textual pressures of present tense. Texts may include histories, chronicles, material records, and historiographically engaged texts. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**148. Cultures of Middle Ages. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Interdisciplinary survey of particular medieval societies, with special emphasis on complex interactions between different ethnic and cultural traditions of medieval world. Examination of processes of intercultural encounter and transmission: classical or patristic traditions into medieval culture, crusade, travel literature, and literature of contact zones, including interactions between Celtic, Anglo, and Norman societies, and debates between Pagans, Jews, Christians, and Muslims. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**149. Medievalisms. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Exploration of postmedieval production of Middle Ages as period for scholarly study, tactical premodern other to modern and contemporary, and commodity continually reinvented by postmedieval writers, artists, and popular media. Topics may include 19th-century production of medieval studies and its links to nationalism, notable medievalists and their work, and uses of Middle Ages in popular culture from Umberto Eco to Tolkien, Robin Hood, Arthur, and Merlin. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**150A. Shakespeare: Poems and Early Plays. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Intensive study of selected poems and representative comedies, histories, and tragedies through *Hamlet*. P/NP or letter grading.

**150B. Shakespeare: Later Plays. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Intensive study of representative problem plays, major tragedies, Roman plays, and romances. P/NP or letter grading.

**150C. Topics in Shakespeare. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Introduction to or advancement of student knowledge of Shakespeare's works through broad or specific topics set by instructor. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**151. Milton. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of major works of Milton, with emphasis on *Paradise Lost*. P/NP or letter grading.

**152. Literatures of English Renaissance and Early Modern Period. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of major works in their cultural context. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**153. Theatrical Renaissance: Early Modern Texts and Performances. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Topics may include professional and amateur performances in court, cities, churches, and countryside of varied sorts of texts—masques, religious drama, secular drama, charivari—alongside examination of texts, performers, and performance spaces from 1509 to 1642. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**154. Renaissance Worlds. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Variable topics, including travel literature, exploration and expansion, transnational and transoceanic texts, science and cosmography, conceptual worlds of myth and philosophy, as expressed in literature and other arts. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**155. Renaissance Subjects. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Literary representations of personhood in early modern period, with attention to issues such as personal voice, relations of privacy/community, bodies/souls, selves/others, as impacted by quotients such as gender, sexuality, race, and ethnicity as they are understood in period from 1500 to 1700. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**156. Devotion and Dissent. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Examination of religious thought and practice associated with Reformation and Counter-Reformation enterprises in early modern period and consideration of how various types of writing—poems, prayer books, sermons, historical chronicles, essays, travel narratives, trial records—reflect and assess religious ferment of era. Coverage of either broad historical range such as from Henry VIII's break with Rome to execution of Charles I or one specific topic such as varieties of martyrdom, art of confession, or conversion narratives. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**157. Translation and Innovation in English Renaissance and Early Modern Period. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of major works of English Renaissance literature and culture in relation to literatures of antiquity and continental Renaissance. Topics may include epic tradition, forerunners of novel, Renaissance humanisms, literature of love, monsters and marvels, representing nature, Ovidian transformations. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**159. Topics in Literature, circa 1500 to 1700. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Examination of literatures from or about this time period. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**159R. Topics in Literature, circa 1500 to 1700: Research Component. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of literatures from this time period and conventions of literary research. Substantial research component included. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**160A. Literature of Restoration and Earlier 18th Century. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of major works as literary documents and as products of Restoration and earlier 18th-century thought. P/NP or letter grading.

**160B. Literature of Later 18th Century. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of major works as literary documents and as products of later 18th-century thought. P/NP or letter grading.

**161A. Poetry in English to 1850. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Consideration of poetry across genres and throughout period. Topics may include rise of satire, verse forms including Pindaric ode, mock-epic, and verse-epistle, questions of literary imitation and originality, poetry's relationship to empire, and gendering of authorship. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**161B. Drama in English to 1850. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Survey of drama in English until 1850. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**161C. Novel in English to 1850. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Survey of major novelists until 1850. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**162A. Earlier Romantic Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Intensive study of writings by Blake, Wollstonecraft, W. Wordsworth, Coleridge, and Austen, with collateral readings from such authors as Godwin, Burke, Paine, Radcliffe, Edgeworth, Baillie, C. Smith, Burns, Southey, D. Wordsworth, Lamb, DeQuincey, and Scott. P/NP or letter grading.

**162B. Later Romantic Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Intensive study of writings by Byron, Keats, Percy Shelly, and Mary Shelley, with collateral readings from such authors as Hazlitt, Hunt, Landor, Clare, Moore, Peacock, Landon, Aikin, Hemans, and Prince. P/NP or letter grading.

**163A. Romanticism and Revolution. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Exploration of relationships among and between different revolutionary currents—political, economic, and aesthetic—in British Romantic period, developing readings of literary texts that situate them in revolutionary context out of which they emerged, and to which they contributed in turn. Recovery of sense of how literary and extra-literary texts emerged in common relationship; development of deeper understanding of nature of Romanticism itself. Readings from work of Blake, Wordsworth, Coleridge, Southey, Austen, Byron, Keats, Wollstonecraft, and others. May not be repeated for credit. P/NP or letter grading.

**163B. Transatlantic Romanticism. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Transatlantic studies have been central in generating new conceptual frameworks for thinking through complex issues related to interconnectedness of Atlantic rim cultures. With focus on ways in which cultures, ideologies, and political identities are reworked and reinscribed by transatlantic movement of peoples, ideas, and cultural artifacts, expansion of notions of Romanticism to include transoceanic perspectives that understand early

19th-century Romantic literature as transatlantic phenomenon. May not be repeated for credit. P/NP or letter grading.

**163C. Jane Austen and Her Peers. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Coverage of six novels of Jane Austen, as well as literary works that most influenced her: Mary Wollstonecraft's *Vindication of Rights of Woman*, Gothic novel, and Maria Edgeworth's *Belinda*. P/NP or letter grading.

**164A. Earlier 19th-Century Poetry. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Developments in English poetic genres from time of Napoleonic Wars to middle decades of 19th century. Readings enable students to understand legacies of 18th-century and Romantic writing and emergence of new forms such as dramatic monologue and novel-in-verse. P/NP or letter grading.

**164B. 19th-Century Critical Prose. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of traditions in critical thought from 1800 to 1900 in relation to development of cultural and literary criticism, social thought, and political writing. P/NP or letter grading.

**164C. 19th-Century Novel. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of development of novel from 1800 to 1900, with focus on evolution of genre in relation to cultural, social, and political contexts in which readings were composed, circulated, and received. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**164D. Global 19th Century. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Examination of 19th-century literature as global phenomenon. Ways imaginative works engaged with 19th-century global formations, that may include structures and discourses of empire, international law, communication and transport systems, political boundaries and state sovereignty, slave trade, transnational economics, travel and exploration, religious communities, military engagements, and/or cultural conflicts. May not be repeated for credit. P/NP or letter grading.

**165A. Imperial Culture, 1700 to 1850. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Exploration of relationship between culture and imperialism in 18th and 19th centuries. Discussion of relationship between literary and extra-literary texts and shifting patterns and paradigms of imperial rule, as metropolitan and peripheral spaces were transformed beyond recognition in this period. Particular attention to representations of otherness both in emergent metropolitan center and in sites of contact and conquest overseas, shifts in forms of Orientalism, developing concepts of race and nation, and ways imperial culture gradually infused almost every aspect of British culture and literature by middle of 19th century. May not be repeated for credit. P/NP or letter grading.

**165B. Gender, Sexuality, and Body, 1700 to 1850. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Examination of question of gender in literature of period known for its invention of sex/gender system. Topics may include varying representations of gender and sexuality across period, gender and authorship, and literature of embodiment. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**165C. Protestant Dissent and English Literature, 1640 to 1832. (5)** Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Religious doctrines, political ideologies, cultural practices, and aesthetics of Protestant dissent, with some attention to transatlantic radicalism, but main topic is British dissent. Adaptations of such theologies as Lutheranism, Calvinism, Anabaptism, Unitarianism, and Methodism in Scotland, England, and Wales from English Civil War and Glorious Revolution to Reform Act of 1832. Texts include representative theology and political theory (Luther, Calvin, Locke, Priestley, Paine, Wollstonecraft) and

representative poetry and fiction (Milton, Bunyan, Defoe, Blake, Coleridge, Shelley, Byron). P/NP or letter grading.

**166A. Colonial Beginnings of American Literature.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A and 10B, or 11 and 87. Historical survey of American literatures of discovery and exploration, contact, and settlement, with emphasis on genres that express distinctive colonial identities, myths, and religious visions. P/NP or letter grading.

**166B. American Literature, 1776 to 1832.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A and 10B, or 11 and 87. Historical survey of American literatures from Revolution through early republic, with emphasis on genres that reflect systematic attempts to create representative national literature and attention to American ethnic, gender, and postcolonial perspectives. P/NP or letter grading.

**166C. American Literature, 1832 to 1865.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A and 10B, or 11 and 87. Historical survey of American literatures from Jacksonian era to end of Civil War, including emergent tradition of American Romanticism, augmented and challenged by genres of popular protest urging application of democratic ideals to questions of race, gender, and social equality. P/NP or letter grading.

**167A. American Poetry to 1900.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A and 10B, or 11 and 87. Study of American poetry from Puritan period through end of 19th century. P/NP or letter grading.

**167B. American Fiction to 1900.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A and 10B, or 11 and 87. Study of American fiction (both novels and short stories) from its beginning to end of 19th century. P/NP or letter grading.

**168. Major American Writers.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A and 10B, or 11 and 87. Broad survey of representative American writers across several centuries, designed to give concise account of broad narrative of American literary development, from origins through 19th century. Includes mainly works that have traditionally been identified as American classics and asks both what makes American literature distinctive and what its relations are to other literatures in English. P/NP or letter grading.

**169. Topics in Literature, circa 1700 to 1850.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A and 10B, or 11 and 87. Examination of literatures from or about this time period. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**169R. Topics in Literature, circa 1700 to 1850: Research Component.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of literatures from this time period and conventions of literary research. Substantial research component included. Consult Schedule of Classes and departmental descriptions for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**170A. American Literature, 1865 to 1900.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Historical survey of American literature from end of Civil War to beginning of 20th century, including writers such as Howells, James, Twain, Norris, Dickinson, Crane, Chesnut, Gilman, and others working in modes of realist and naturalist novel, regional and vernacular prose, and poetry. P/NP or letter grading.

**170B. American Literature, 1900 to 1945.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Historical survey of American literature from turn of century to end of World War II. P/NP or letter grading.

**170C. American Literature since 1945.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Historical survey of American literature since end of World War II. P/NP or letter grading.

**171A. Later 19th-Century Poetry.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Developments in English poetic genres in relation to significant movements such as aestheticism, decadence, feminism, and imperialism from middle decades of 19th century to turn of 20th century. P/NP or letter grading.

**171B. 20th-Century British Poetry.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Survey of major British poets from 1900 to present. P/NP or letter grading.

**171C. 20th-Century British Fiction.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Survey of major British novelists and short story writers from 1900 to present. P/NP or letter grading.

**172A. Drama, 1850 to 1945.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C (for Theater and Film and Television majors 10A, 10B, 10C requisites are waived). Survey of drama in English, with its principal continental influences, from 1850 through World War II. P/NP or letter grading.

**172B. Drama, 1945 to Present.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of drama in English, with its principal continental influences, since World War II. P/NP or letter grading.

**172C. American Drama.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, and 10C, or 11 and 87. Study of American drama from its beginning to present day. Historical period may vary with instructor. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**173A. American Poetry, 1900 to 1945.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, and 10C, or 11 and 87. Study of American poetry from beginning of 20th century to end of World War II. P/NP or letter grading.

**173B. American Poetry since 1945.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, and 10C, or 11 and 87. Study of American poetry since end of World War II. P/NP or letter grading.

**173C. Contemporary American Poetry.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Study of American poetry, mostly by living authors, with emphasis on emergent issues and poetic forms. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**174A. American Fiction, 1900 to 1945.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Study of American novels and short stories from beginning of 20th century to end of World War II. P/NP or letter grading.

**174B. American Fiction since 1945.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Study of American novels and short stories since end of World War II. P/NP or letter grading.

**174C. Contemporary American Fiction.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Study of American novels and short stories, mostly by living authors, with emphasis on emergent issues and aesthetics. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**175. American Nonfictional Prose.** (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, and 10C, or 11 and 87. Study of American nonfictional prose (essays, autobiographies, travel narratives, and other). Partic-

ular genre and/or historical period vary with instructor. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**176. Hemispheric American Literature.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Examination of primarily North American literature from hemispheric rather than nation-based perspective. Historic breadth in study of American literature while posing such crucial theoretical issues as emergence of U.S. Empire or relationship between North America and global south, including Africa, Latin America, and Caribbean. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**177. Interdisciplinary Studies of American Culture.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Interdisciplinary study of American literature in its relationships to other disciplines, including art, architecture, film, history, music, politics, and various social sciences, with emphasis on application of literary methodology to historical survey of American culture. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**179. Topics in Literature, circa 1850 to Present.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Examination of literatures from or about this time period. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**179R. Topics in Literature, circa 1850 to Present: Research Component.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, and 10C, or 11 and 87. Study of literatures from this time period and conventions of literary research. Substantial research component included. Consult Schedule of Classes and departmental descriptions for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**180. Topics in Literature and Language.** (5) Seminar, three or four hours. Requisites: courses 10A, 10B, and 10C, or 11 and 87. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**180R. Junior Research Seminar.** (5) Seminar, three hours. Enforced requisites: courses 10A, 10B, 10C. Strongly recommended for students who plan to enroll in capstone seminars. Study of range of approaches to literary and cultural research, including archival, literary critical, and theoretical to equip students with skills working with primary sources, secondary criticism, and online databases. Specific literatures vary with instructors. May not be repeated for credit. P/NP or letter grading.

**181A. Topics in Genre Studies.** (5) Seminar, three or four hours. Requisites: courses 10A, 10B, and 10C, or 11 and 87. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**181B. Topics in Interdisciplinary Studies.** (5) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**181C. Topics in Critical Theory.** (5) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**181D. Topics in Imperial, Transnational, and Postcolonial Studies.** (5) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**182A. Topics in Medieval Literature. (5)** Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**182B. Topics in Renaissance and Early Modern Literature. (5)** Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**182C. Topics in 18th-Century Literature. (5)** Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**182D. Topics in Romantic Literature. (5)** Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**182E Topics in 19th-Century Literature. (5)** Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**182F. Topics in 20th- and 21st-Century Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, and 10C, or 11 and 87. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**183A. Topics in Colonial American Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, and 10C, or 11 and 87. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**183B. Topics in 19th-Century American Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, and 10C, or 11 and 87. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**183C. Topics in 20th- and 21st-Century American Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, and 10C, or 11 and 87. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**184. Capstone Seminar: English. (5)** Seminar, three hours. Requisites: courses 10A, 10B, and 10C, or 11 and 87, and completion of at least four upper-division courses required for major. Limited to senior English or American Literature and Culture majors. Students use knowledge from prior coursework to address current topics in discipline and work with faculty members on focused topic of research. Culminating paper or project and class presentation required. May be repeated once for credit with topic or instructor change. Letter grading.

**M185. Professional Writing Capstone. (4)** (Same as English Composition M185.) Seminar, four hours. Limited to junior/senior Professional Writing minors. Topical writing workshop on rhetorical strategies useful in written and multimodal genres. Intended to provide students with opportunity for serious engagement with writing project in their minor specialization under close faculty supervision and in constructive writing group. Reading, discussion, oral presentations, rhetorical analysis, and development of professional portfolio. Students develop their capstone projects, including identifying appropriate models, generic expectations, and rhetorical choices. P/NP or letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings

with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced requisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced requisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**190H. Honors Research Colloquia in English. (1)** Seminar, one hour. Enforced corequisite: course 198A or 198B. Designed to bring together students undertaking supervised tutorial research for departmental honors in seminar setting with one or more faculty members to discuss their own work in progress and critical readings related to honors projects. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

**M191A. Topics in African American Literature. (5)** (Same as African American Studies M179A.) Seminar, three or four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in African American literature. Topics may include Harlem Renaissance, African American literature in Nadir, black women's writing, contemporary African American fiction, African American poetry. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M191B. Topics in Chicana/Chicano and/or Latina/Latino Literature. (5)** (Same as Chicana/o and Central American Studies M139.) Seminar, three or four hours. Enforced requisite: English Composition 3. Variable specialized studies course in Chicana/Chicano and/or Latina/Latino literature. Topics include labor and literature; Chicana/Chicano visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicano journalism; literary New Mexico; specific literary genres. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M191C. Topics in Asian American Literature. (5)** (Same as Asian American Studies M191F) Seminar, three or four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Asian American literature. Topics may include genres (autobiography, novel, poetry, short fiction, or drama); specific nationalities within Asian American community; themes of transnational migration; cross-cultural, interdisciplinary, or interracial negotiation; and gender and queer politics. Reading, discussion, and development of culminating project. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M191D. Topics in Queer Literatures and Cultures. (5)** (Same as Gender Studies M191D and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M191D.) Seminar, three or four hours. Enforced requi-

site: English Composition 3. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**M191E. Topics in Gender and Sexuality. (5)** (Same as Gender Studies M191E and Lesbian, Gay, Bisexual, Transgender, and Queer Studies M191E.) Seminar, three or four hours. Enforced requisite: English Composition 3. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

**191H. Honors Research Seminars: English. (5)** Seminar, three hours. Enforced requisite: one course from 120 through 128. Open only to students who are eligible and apply for honors program in English. Introduction to research techniques and study of various approaches and applications of critical methodology as it relates to interpretation and evaluation of texts. Development and presentation of proposals for honors projects. Consult undergraduate adviser. May be repeated for credit. Letter grading.

**M191P. Careers in Humanities. (4)** (Same as Comparative Literature M191P.) Seminar, three hours. Challenges misassumptions regarding humanities majors and their practical applications to life after graduation. Exploration of wide range of careers, with hands-on practice in crafting professional narrative. Guest lectures from UCLA professionals and alumni—all experts in career planning and local industry. Students engage with workplace leaders, and simultaneously build professional dossier—on paper or online—in preparation for life after UCLA with a humanities degree. P/NP or letter grading.

**M192. Undergraduate Practicum in English: Journals. (2)** (Same as English Composition M192.) Seminar, two hours. Training and supervised practicum for undergraduate student editors of campus journals supervised by faculty members in English and/or Writing Programs. May be repeated for credit. P/NP or letter grading.

**193. Colloquia and Speakers' Series Undergraduate Seminars: English. (1)** Seminar, one hour. Limited to undergraduate students. Discussion of current critical literature and/or creative readings by writers, artists, and scholars. Exploration in greater depth of literary topics and creative work presented through sponsored forums, speakers' series, and colloquia. May be repeated for credit. P/NP grading.

**195CE. Community and Corporate Internships in English. (4)** Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Learning. Students complete weekly written assignments, attend bi-weekly meetings with graduate student coordinator, and write final research paper. Faculty sponsor and graduate student coordinator construct series of reading assignments that examine issues related to internship site. May not be applied toward major requirements. May be repeated for credit with consent of Center for Community Learning. Individual contract with supervising faculty member required. P/NP or letter grading.

**197. Individual Studies in English. (2 to 5)** Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**198A-198B. Honors Research in English. (5-5)** Tutorial, to be arranged. Requisite: course 191H. Limited to juniors/seniors. Development and completion of honors thesis under direct supervision of faculty member. May be repeated for credit. Individual contract required. In Progress (198A) and letter (198B) grading.

**199. Directed Research or Senior Project in English. (2 to 8)** Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual literary research and creative projects under guidance of faculty mentor. Cul-

minating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

## Graduate Courses

**200. Graduate Proseminar. (4)** Seminar, three hours. Introduction to profession of literary studies. Covers wide array of topics including state of discipline; scholarly organizations and conference presentations; critical and methodological approaches to literary studies; writing and publishing for scholarly and general audiences; building curriculum vitae and résumé; developing professional skills; understanding academic job market and humanities careers. S/U or letter grading.

**201. History of Literary Criticism and Aesthetic Interpretation. (4)** (Formerly numbered 201A.) Seminar, three hours. Examination of major texts in literary criticism and aesthetic interpretation from classical to contemporary period with focus and topics to be set by individual instructor. S/U or letter grading.

**202. Narrative Theory. (4)** Seminar, three hours. Introduction to concepts and theories of narrative. These may include linguistic, sociological, cognitive, and computational approaches to explain elements of narrative such as plot, narrator, character, and style across different media. S/U or letter grading.

**203. Digital Theories and Methods. (4)** Seminar, three hours. Theories and practices of using computational tools and methods, including digital archives, for analysis of literary texts across media. S/U or letter grading.

**M205A. Study of Oral Tradition: History and Methods. (4)** (Same as Scandinavian M271.) Seminar, three hours. Exploration of scholarly and literary attempts to study, define, analyze, promote, and/or appropriate oral traditions, from Homer and ancient Greece to origins of vernacular literatures, European romantic (re)discovery of oral tradition, 20th-century heuristic models of oral composition, and modern-day electronic media and popular verbal genres, such as joking and rapping. S/U or letter grading.

**M205C. Studies in Oral Traditional Genres. (4)** (Same as Scandinavian M273.) Seminar, three hours. Exploration in depth of variety and history of, and scholarship on, particular oral traditional genre (e.g., ballad, song, epic, proverb, riddle, folktale, legend) or set of closely related oral traditional genres. S/U or letter grading.

**210. History of English Language. (4)** Lecture, four hours. Detailed study of history, characteristics, and changing forms of English language from its origin until about 1900. S/U or letter grading.

**211. Old English. (4)** Lecture, four hours. Study of Old English grammar, lexicon, phonology, and pronunciation to enable students to read literature silently and aloud. Reading of as much of more interesting Old English prose and poetry as can be read in one term. S/U or letter grading.

**212. Middle English. (4)** Lecture, four hours. Requirement: course 211. Detailed study of linguistic aspects of Middle English and of representative examples of better prose and poetry. S/U or letter grading.

**M215. Paleography of Latin and Vernacular Manuscripts, 900 to 1500. (4)** (Same as Classics M218, French M210, and History M218.) Lecture, three hours; discussion, two hours. Introduction to history of Latin and vernacular manuscript book from 900 to 1500 to (1) train students to make informed judgments with regard to place and date of origin, (2) provide training in accurate reading and transcription of later medieval scripts, and (3) examine manuscript book as witness to changing society that produced it. Focus on relationship between Latin manuscripts and vernacular manuscripts with regard to their respective presentation of written texts. S/U or letter grading.

**217A-217B. Medieval Welsh. (4)** Lecture, four hours. Studies in grammar. Readings in Mabinogi and other texts. Comparative considerations. S/U or letter grading.

**230. Workshop: Creative Writing. (2 to 4)** Lecture, two to four hours. Preparation: submission of writing samples in specified genre (poetry, fiction, or drama).

May be repeated but may not satisfy more than one of nine courses required for first qualifying examination nor any of five courses required for second qualifying examination. S/U or letter grading.

**242. Language and Literature. (4)** Seminar, three hours. Application of linguistics to literary analysis. Individual seminars dealing with one historical period (medieval and Renaissance, neoclassical, or 19th century and modern), specific authors, or contributions of specific groups of linguists to literary analysis. S/U or letter grading.

**244. Old and Medieval English Literature. (4)** Seminar, four hours. Studies in poetry and prose of Old and medieval English literature; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

**245. Chaucer. (4)** Lecture, four hours. May be repeated for credit. S/U or letter grading.

**246. Renaissance Literature. (4)** Seminar, four hours. Studies in poetry and prose of Renaissance English literature, exclusive of Shakespeare; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

**247. Shakespeare. (4)** Lecture, three hours. May be repeated for credit. S/U or letter grading.

**248. Earlier 17th-Century Literature. (4)** Lecture, three hours. Studies in poetry and prose of 17th-century English literature up to Restoration; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

**249. Milton. (4)** Lecture, three hours. Studies in poetry and prose of John Milton; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

**250. Restoration and 18th-Century Literature. (4)** Seminar, three hours. Studies in English poetry and prose, 1660 to 1800; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

**251. Romantic Writers. (4)** Seminar, three hours. May be repeated for credit. S/U or letter grading.

**252. Victorian Literature. (4)** Lecture, three hours. Studies in English poetry and prose of Victorian period; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

**253. 20th- and 21st-Century Literatures in English. (4)** Seminar, three hours. Studies in 20th- and 21st-century literatures in English. Focus and topics to be set by individual instructor. May be repeated for credit. S/U or letter grading.

**254. American Literature to 1900. (4)** Lecture, three hours. Studies in Colonial and 19th-century American literature; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

**255. Topics in Novel. (4)** Seminar, three hours. Thematic approval to study of novel. May be repeated for credit. S/U or letter grading.

**256. Studies in Genre. (4)** Seminar, three hours. Formal approach to study of one genre and its changes across time. May be repeated for credit. S/U or letter grading.

**257. Methods and Tools for Study of Literature and Culture. (4)** Seminar, three hours. Survey of methods or training in particular set of methods for literary and cultural analysis. Methods may include archival, paleographical, linguistic, historical, sociological, and cognitive approaches. S/U or letter grading.

**259. Studies in Criticism. (4)** Lecture, three hours. May be repeated for credit. S/U or letter grading.

**260. Studies in Literature and Its Relationship to Arts and Sciences. (4)** Seminar, three hours. Studies in interrelationships of literature, arts, and sciences; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

**M260A. Topics in Asian American Literature. (4)** (Same as Asian American Studies M260.) Seminar, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. May be repeated for credit. S/U or letter grading.

**M261. Studies in Chicana/Chicano Literature. (4)** (Same as Chicana/o and Central American Studies M289.) Seminar, three hours. Intensive research and study of major themes, authors, and issues in Chicana/Chicano literature and culture. Examination of political, aesthetic, economic, and cultural context that emerges in Chicana/Chicano discourse; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

**M262. Studies in Afro-American Literature. (4)** (Same as African American Studies M200E.) Lecture, four hours. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit. S/U or letter grading.

**265. Postcolonial Literatures. (4)** Seminar, three hours. Study of aesthetic, historical, and social backgrounds to literatures of former British colonies that became independent after 1947. General issues related to way imperialism, colonialism, and postcolonialism have helped to shape and have been shaped by literature in English. May be repeated for credit. S/U or letter grading.

**M266. Cultural World Views of Native America. (4)** (Same as American Indian Studies M200B.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms—dance, art, song, religious and medicinal ritual—in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology. May be repeated for credit with instructor and/or topic change. Letter grading.

**270. Issues and Developments in Critical Theory. (4)** (Formerly numbered M270.) Seminar, three hours. Investigation of selected trends in critical theory. Topics may include continental philosophy, memory studies, feminist and queer studies, urban studies, environmental humanities, critical race studies, and postcolonialism. S/U or letter grading.

**M290. Science Communications and Environmental Media. (4)** (Same as Environment M242.) Seminar, three hours. Designed for graduate students in food, energy, and water systems (FEWS) training grant program to survey fields of science communications and environmental narrative from nonfiction to new media (multimedia journalism, documentary, social media, virtual reality, etc.), and to develop collaborative projects communicating student research to diverse public audiences. Course is part of National Science Foundation (NSF) graduate traineeship in integrated urban solutions for food, energy, and water systems (INFEWS). Enrollment for non-INFEWS students in STEM graduate education and related sustainability majors/topics by consent of instructor. S/U or letter grading.

**M299. Interdisciplinary American Studies. (6)** (Same as History M299.) Discussion, four hours. Readings, discussion, and papers on common theme, team-taught by faculty members from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May not be substituted for any departmental enrollment requirements. May be repeated for credit. S/U or letter grading.

**490. Publishing Academic Literary Article. (4)** Seminar, four hours. Structured as writing workshop. Determination of what publishable article looks like. Independent revision of student work. Circulation of student papers. Class-wide discussion of writing. S/U or letter grading.

**495A. Supervised Teaching Preparation. (4)** Seminar, three hours. Required of all applicants for teaching assistantships in English. Introduction to teaching of lit-

erature intended to prepare teaching assistants for their first assignments in leading discussion sections. Practical concerns of creating assignments, grading papers, and holding conferences. S/U grading.

**495B. Supervised Teaching Preparation. (3)** Seminar, two hours. Required of all teaching assistants in their initial quarter of teaching. Mentoring and group teaching assistant/mentor conferences. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study. (2 to 4)** Tutorial, to be arranged. Limited to students preparing for first qualifying examination or engaging in intensive directed research project. May not be applied toward any course requirement for degree. Consult graduate counselor to enroll or obtain information. S/U or letter grading.

**597. Preparation for PhD Examinations. (4 to 12)** Tutorial, to be arranged. Limited to second-stage PhD students preparing for second qualifying examination. S/U grading.

**598. MA Research and Thesis Preparation. (4 or 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward any course requirement for degree. S/U grading.

**599. PhD Dissertation Research. (4 or 8)** Tutorial, to be arranged. Limited to PhD students unable to enroll in seminars in their fields or to students concurrently enrolled in such seminars. (Exception to this rule must be requested by petition.) S/U grading.

---

## ENTREPRENEURSHIP

*Interdisciplinary Minor*  
John E. Anderson Graduate School of Management

149 Kaplan Hall  
Box 951530  
Los Angeles, CA 90095-1530

**Entrepreneurship**  
310-825-1389

**E-mail contact**

Olav J. Sorenson, PhD, *Chair*

## Faculty Committee

Olav J. Sorenson, PhD (*Management, Sociology*)  
Nathan M. Wilson, PhD (*Management*)  
Shi Zhang, PhD (*Management*)

## Overview

The Entrepreneurship minor introduces undergraduate students to the field of entrepreneurship. Entrepreneurship encompasses a wide range of business activities, from the generation of new ideas for products and services, to the systematic evaluation and development of those ideas, to the process of building a company to pursue them. Faculty members teaching in the minor are drawn from academic departments across campus, applied fields in the professional schools, and industry.

Through a carefully developed core curriculum and an integrative capstone experience, students in the minor obtain both breadth and depth in their understanding of the concepts, frameworks, and practical implications of

entrepreneurship in an interdisciplinary and collaborative educational environment.

## Undergraduate Minor Entrepreneurship Minor

### Admission

To enter the Entrepreneurship minor, students must (1) have an overall grade-point average of 3.0 or better and (2) submit an application supporting their interest in pursuing the minor. Applications are accepted in fall, winter, and spring quarters. To help plan the course schedule and internship/field experience, students are expected to work closely with the academic adviser. Applications are available on the [minor website](#).

### The Minor

*Required Lower-Division Course (4 or 5 units):* Communication 1 or any Writing II course.

*Required Upper-Division Courses (32 or 33 units):* Management 159, 160, 161, 169, 199 (4 units minimum), and three elective courses selected from Ancient Near East M105, Communication 109, M117, 133, 156, Dance C184, Digital Humanities 101, 150, Economics 106E, 173AX, 173BX, Environment 163, Ethnomusicology 105, Management 162, 163, 164, 165, 167, 168, Sociology 172. At least two of the three elective courses must be selected from the management courses listed above.

### Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 3.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Ryan J. Harrigan, PhD  
Shanna Shaked, PhD, MAT  
Virginia M. Zaunbrecher, JD

## Overview

The environment is defined broadly to include the interrelated issues of global climate change, loss of biological diversity, and threats to human health and well-being from the use and misuse of natural resources, applying all the tools of scientific and policy analysis as well as moral and aesthetic values to the work. The environment is a crucial component of sustainability, which is defined as the simultaneous consideration of environmental, economic, and social justice concerns. Los Angeles itself is a vital asset to this mission. As an international mega-city located in one of the world's most biologically diverse regions, Los Angeles is a magnet for scholars from around the world who are facing similar issues of pollution, access to potable water, demand for energy, fragmentation of habitat, and the need to restore ecological function to sprawling urban settlements in a manner that supports economic growth and that is socially just and equitable.

## Mission

The mission of the UCLA Institute of the Environment and Sustainability (IoES) is to advance cross-disciplinary research, teaching, and public service on matters of critical importance to the planet and the campus community.

## Undergraduate Study

The Bachelor of Science (BS) degree in Environmental Science is an innovative dual-component degree program for students seeking a challenging and invigorating science curriculum. The first component, the Environmental Science major, provides students with disciplinary breadth in several areas important to environmental science. The second component, a minor or concentration in one of seven environmental science areas, provides students with focused disciplinary depth in an area of their choosing. The minor in Environmental Systems and Society is designed for students who wish to gain a deeper understanding of the relationships between environ-

mental science and associated social and political issues.

The IoES also sponsors Environment M1A, M1B, M1CW and Clusters M1A, M1B, M1CW titled Food: Lens for Environment and Sustainability. The cluster format is a series of three integrated freshman team-taught courses over the fall, winter, and spring quarters. The fall and winter quarter courses consist of lectures and discussions. The spring quarter consists of seminars and activities in which students explore specialized food-related environmental and sustainability topics such as sustainable agriculture, food culture and justice, and strategies for feeding the growing human population.

## Graduate Study

At the graduate level, the IoES offers two degree programs and a graduate certificate.

### Graduate Certificate

The national award-winning Leaders in Sustainability graduate certificate program is free to UCLA graduate students pursuing degrees in any discipline. Companies, consumers, and governments across the world increasingly focus on making products, services, operations, and lives more sustainable. The certificate program gives students the tools to make that happen in a collaborative, action-oriented setting. By bringing together students and faculty from diverse academic fields, the program fosters cross-pollination for innovative ideas and solutions. Each graduate student takes a core sustainability class along with electives of their choosing. Working with other students, faculty and professionals, students initiate a leadership project that measurably advances sustainability. For many, this project serves as a jumping-off point into their post-graduate careers and studies.

## Undergraduate Major

### Environmental Science BS

The Environmental Science BS program represents strong collaboration between the Institute of the Environment and Sustainability and the departments of Atmospheric and Oceanic Sciences; Civil and Environmental Engineering; Earth, Planetary, and Space Sciences; Ecology and Evolutionary Biology; Environmental Health Sciences; and Geography. The program is designed for students who are deeply interested in the study of environmental science. There are two components to the program, and both must be completed to receive the degree. The first component, the Environmental Science major, requires completion of lower-division requirements grounded in basic natural sciences, a five-course upper-division environmental science requirement reflecting the disciplinary breadth of environmental science, three social sciences/humanities courses, participation in a sustainability-focused speaker series, and completion of an environmental science practicum. The second component is a minor or concentration in one of seven environmental science areas, each associated with a particu-

lar department. With assistance from IoES staff, students must formally apply to and be accepted by the associated department to receive the minor.

## Capstone Major

The Environmental Science major is a designated capstone major. In collaboration with a local agency or nonprofit institution, students work individually and in groups to complete projects that require them to integrate many of the skills, principles, theories, and concepts they have learned throughout the curriculum and apply them to real systems. Students are expected to contribute meaningfully to the analysis and solution of particular environmental science issues involving multiple disciplines and stakeholders with different perspectives. Those completing the major should possess critical thinking skills, problem-solving abilities, and familiarity with essential computational, data collection, and analysis skills, as well as demonstrate effective oral and written communication skills. Graduates should also be able to identify key ethical issues and analyze the consequences of various professional dilemmas, as well as work productively as part of a team.

## Learning Outcomes

The Environmental Science major has the following learning outcomes:

- Ability to apply theories or concepts from coursework to analysis of issues in the field
- Ability to make meaningful contribution to analysis and solution of particular issues involving multiple disciplines and stakeholders with different perspectives
- Critical thinking skills, problem-solving abilities, and familiarity with computational and data collection and analysis procedures essential to the field
- Ability to identify ethical issues raised by a particular issue
- Ability to analyze the consequences of various professional dilemmas
- Ability to work productively with others as part of a team
- Effective oral and written communication skills

## Entry to the Major

### Transfer Students

Transfer applicants to the Environmental Science major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two general chemistry courses with laboratory for majors, two general biology courses with laboratory for majors, two calculus courses, and two calculus-based physics courses.

Refer to the [UCLA transfer admission guide](#) for up-to-date information regarding transfer selection for admission.

## Requirements

### Preparation for the Major

*Required:* Chemistry 14A, 14B, and 14BL (or 20A, 20B, and 20L), Environment 10, Geography 7, Life Sciences 7A, 7B, Mathematics 3A

and 3B (or 31A or 31AL, and 31B, or Life Sciences 30A and 30B), Physics 5A and 5C (or 1A and 1B), Statistics 12 or 13 (or Life Sciences 40).

For the **atmospheric and oceanic sciences minor**, Chemistry and Biochemistry 14C (or 30A) or Mathematics 3C (or 32A) or Physics 1C (or 5B) is also required.

For the **conservation biology minor**, Chemistry and Biochemistry 14C (or 30A) or Life Sciences 7C and 23L is also required.

For the **Earth and environmental science minor**, Chemistry and Biochemistry 14C (or 30A) or Mathematics 3C (or 32A) or Physics 1C (or 5B), Earth, Planetary, and Space Sciences 1, and one course from 5, 13, 15, or 61 are also required.

For the **environmental engineering minor**, Mathematics 3C (or 32A) is also required.

For the **environmental health concentration**, Chemistry and Biochemistry 14C (or 30A) is also required.

For the **environmental systems and society minor**, one course from Chemistry and Biochemistry 14C (or 30A), Earth, Planetary, and Space Sciences 1, Life Sciences 7C (and 23L), Mathematics 3C (or 32A), and Physics 5B (or 1C) is also required.

For the **geography/environmental studies minor**, one course from Chemistry and Biochemistry 14C (or 30A), Earth, Planetary, and Space Sciences 1, Life Sciences 7C (and 23L), Mathematics 3C (or 32A), and Physics 5B (or 1C), plus Geography 5 and one course from 1, 2, 3, 4, or 6 are also required. Students should take these courses before enrolling in upper-division courses.

## The Major

The major consists of four requirements: physical and life science, social science and humanities, practicum/sustainability talks, and minor or concentration, as follows:

### Physical and Life Sciences Requirements

*Required:* Environment 175 and four additional courses from the following physical and life sciences areas. No more than two courses may be from any one department. Atmospheric and Oceanic Sciences 101, 102, 103, 104, M105, 107, 112, 121, 123, 130, 141, Civil Engineering 153, 154, M166, Earth, Planetary, and Space Sciences 101, C113, 119, 139, 150, 153, Ecology and Evolutionary Biology 100, 109, 116, 136, 151A, 154, Environment 157, Environmental Health Sciences 100, C125, C152D, Geography 101, M102, M103, 107, M110, 116, 117, M118, 120, M126, 133.

### Social Sciences and Humanities Requirements

*Required:* Environment 140 and two courses from Anthropology 132, 133, Atmospheric and Oceanic Sciences 121, 123, English 118E, Environment M125, M133, M147, 150, M153, 155, 157, C159, M161, 162, 163, M164, 166, M167, Geography M127, 130, 138, M142, 160, 171C, Philosophy 125, Public Affairs M160, Society and Genetics 141, Urban Planning 121.

### Practicum/Sustainability Talks Requirements

*Required:* Environment 180A, 180B, 180C, 185A.

### Minor and Concentration Requirements

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor. Successful completion of a minor is indicated on the transcript and diploma.

For the **atmospheric and oceanic sciences minor**, seven 4-unit courses, including (1) three from Atmospheric and Oceanic Sciences M100, 101, 102, 103, 104, M105, M106, 107, C110, C111, 112, CM114A, C115, M120, 121, 123, 130, 135, 141, C144, 145, 150, 155, C160, C170, 180 and (2) four additional courses, two of which must be upper-division, from any of the above atmospheric and oceanic sciences courses beyond the minimum four required or from Atmospheric and Oceanic Sciences 1, 2, 3, 186 (must be taken twice), Chemistry 103, 110A, 110B, 113A, C113B, 114, Earth, Planetary, and Space Sciences 15, Ecology and Evolutionary Biology 109, C119A, 122, 123A or 123B, 147, 148, Mathematics 115A, 115B, 132, 135, 136, 146, 170A, 170B, Physics 110A, 110B, 112, M122, 131, 132. Other relevant courses from related disciplines may be substituted with prior approval of the department. At least five courses approved for the minor must be upper-division. One course may be taken on a Passed/Not Passed basis.

For the **conservation biology minor**, Ecology and Evolutionary Biology 100, 116, and four to six courses from 100L, 101, 103, 105, 109, 109L, 111, 112, 113A, 113AL, 114A, 114B, C119A, C119B, 122, M127, 129, M131, 140, 142, 143, 144, 144L, C146, 149, 151A, 152, 153, 154, 155, 161, 162, 162L, 168, C174, 176, 180A, 180B, 183, 184, any courses associated with the Field Biology Quarter or the Marine Biology Quarter or approved equivalent, Geography M103, 106, 107, 116, 117, M118, M126, M131, 133 (a maximum of two Geography courses may be applied to the minor) are required.

For the **Earth and environmental science minor**, five courses from Earth, Planetary, and Space Sciences 101, 112, C113, 139, 150, 153 are required.

For the **environmental engineering minor**, Civil Engineering 153 and five courses from Civil Engineering 110, 150, 151, 152, 154, 155, 156A, 156B, 157A, 157B, 157C, 157L, C159, C164, M165, M166, Mechanical and Aerospace Engineering 103, 105A are required. Credit for both Chemical Engineering 102A and Mechanical and Aerospace Engineering 105A is not allowed.

For the **environmental health concentration**, Epidemiology 100, two courses from Environmental Health Sciences 100, C135, C185A, C185B, and three courses from Chemistry and Biochemistry 153A, Environmental Health Sciences C125, C140, C152D, C157, C164, 203 are required.

For the **environmental systems and society minor**, seven courses from Environment M111, M125, M126, M131, M133, 134, 140, M147,

150, M153, 155, 157, C159, M161, 162, 163, M164, 166, M167, 175 are required.

For the **geography/environmental studies minor**, three courses from Geography M102, M103, 109, M118, M125, M126, M127, 130, M131, 133, 136, 138, 139B, 139C, and any two additional upper-division geography courses (except those from the preceding list and courses 194 through 199) are required.

## Honors Program

The honors program provides exceptional students an opportunity for advanced research and study, under the guidance of a faculty member, that leads to the completion of an honors thesis or research project. To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper-division coursework in the major and an overall GPA of 3.0 or better, (3) complete at least 8 units of Environment 198 taken over at least two terms, and (4) produce a completed satisfactory honors thesis. The honors thesis or research project is in addition to the requirement of the completed practicum in environmental science project. Contact the student affairs officer for more information.

## Policies

### Preparation for the Major

Each course applied toward requirements for preparation for the major must be passed with a grade of C- or better. Students receiving a grade below C- in two courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

### The Major

Each course applied toward requirements for the major, except Environment 185A, must be taken for a letter grade. Students must maintain an overall grade-point average of 2.0 (C) or better in all courses applied toward the major.

## Undergraduate Minor

### Environmental Systems and Society Minor

The Environmental Systems and Society minor is designed for students who wish to augment their major program of study with courses addressing the relationships between environmental science and associated social and political issues. The minor seeks to impart a deeper understanding of environmental systems related to air, land, and water resources, providing a basis for sound professional decision making.

## Admission

To enter the minor, students must be in good academic standing (2.0 grade-point average) and file a petition at the Institute of the Environment and Sustainability, 300 La Kretz Hall, 310-206-9193.

## The Minor

*Required Lower-Division Courses (8 units):* At least two courses from Astronomy 3, Atmospheric and Oceanic Sciences 1, 2, 3, Earth, Planetary, and Space Sciences 1, 15, 16, 20, Ecology and Evolutionary Biology 10, 25, Environment M1A, M1B, 10, 12, 25, M30, M30SL, Geography 1, 2, 5.

*Required Upper-Division Courses (20 units):* At least five courses from Environment M111, M125, M126, M131, M133, 134, 140, M147, 150, M153, 155, 157, C159, M161, 162, 163, M164, 166, M167, 175.

## Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer or substitution of credit for any of the above is subject to institute approval; consult with an academic adviser at the institute before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Majors

### Doctor of Environmental Science and Engineering

The Environmental Science and Engineering (DEnv) professional doctorate program was founded in 1973 by Nobel laureate Dr. Willard Libby, who perceived a need to train environmental scientists, engineers, and policymakers in a more interdisciplinary manner than is afforded by traditional PhD programs. The program is designed with an appropriate balance of breadth and specific skills, based on a strong master's-level foundation in a science or engineering discipline. The curriculum consists of formal coursework across a full spectrum of relevant physical, biological, social, and engineering disciplines, as well as interdisciplinary research training and an off-campus residency where students complete their dissertation embedded in an agency, business, or non-profit organization. UCLA remains unique in the country in awarding the Doctor of Environmental Science and Engineering degree.

## Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Environment and Sustainability MS, PhD

The Environment and Sustainability PhD program was launched in 2018. The program equips students with diverse perspectives to develop profound new ideas, knowledge and answers to the most important concerns facing people and the planet. The program provides a deep understanding of how fundamental principles of environmental science and sustainability can be applied to research and address key environmental challenges that require skills in multiple disciplines—preparing students for a range of careers in academia, as well as public and private sectors. To promote interdisciplinarity as the core of the program's identity, each student's program of study and dissertation research are guided by two advisers from distinct areas of research and scholarship.

## Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Environment

### Lower-Division Courses

**M1A-M1B-M1CW. Food: Lens for Environment and Sustainability. (6–6–6)** (Same as Clusters M1A-M1B-M1CW.) Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Limited to first-year freshmen. **M1A-M1B.** Lecture, three hours; discussion, two hours. Food as lens for local and global environmental and sustainability issues. Integration of environmental, social, economic, and technological solutions for fair, sustainable, and healthy food production, food security, and access. Focus on human impacts on Earth's biological and physical systems, including how food production and consumption contributes to, and is impacted by, global problems, including climate change, pollution, and overpopulation. Laboratory exercises included in discussions. P/NP or letter grading. **M1CW.** Special Topics. Seminar, three hours. Enforced requisite: course M1B. Examination of specialized environmental and sustainability topics as they relate to food, including air, water, biodiversity, climate change, food access, food security, and health. Satisfies Writing II requirement. Letter grading.

**10. Introduction to Environmental Science. (4)** Lecture, three hours; laboratory, one hour. Limited to undergraduate students. Introduction to environmental science as discipline and as way of thinking. Discussion of critical environmental issues at local and global scales. Fundamentals of physical, chemical, and biological processes important to environmental science. Laboratory exercises to augment lectures. Letter grading.

**12. Sustainability and Environment. (4)** Lecture, three hours; discussion, one hour. Introduction to sustainability with emphasis on environmental component, including Earth's physical, chemical, and biological processes as related to resource demands and management. Examination of application of scientific method in helping to understand and solve sustainability problems. Case studies illustrating how natural and social scientists work on environmental sustainability issues. Focus on global climate change, biodiversity, pollution, and water and energy resources presented in context of creating sustainable human society that is environmentally sound, economically viable, and socially just and equitable. Letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**25. Good Food for Everyone: Health, Sustainability, and Culture. (5)** Lecture, three hours; discussion, one hour. Good food is healthy, sustainably produced, and culturally meaningful. Introduction to basic concepts and history of food systems, food science and nutrition, fair and sustainable food production, natural resources and environmental issues including climate change and biodiversity, agriculture and food policy and law, food distribution and access, cultural identity and artistic engagements with food. P/NP or letter grading.

**M30. Environmental Literature and Culture. (5)** (Same as English M30.) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Introduction to core themes, questions, and methods within interdisciplinary field of environmental humanities. Examination of how different culture forms (e.g., fiction, journalism, poetry, visual art) represent environmental issues. Topics may include biodiversity, wilderness, food, urban ecologies, postcolonial ecologies, environmental justice, and climate change. P/NP or letter grading.

**M30SL. Environmental Literature and Culture (Service Learning). (5)** (Same as English M30SL.) Lecture, three hours; discussion, one hour; fieldwork, two hours. Enforced requisite: satisfaction of Entry-Level Writing requirement. Introduction to core themes, questions, and methods within interdisciplinary field of environmental humanities. Examination of how different culture forms (e.g., fiction, journalism, poetry, visual art) represent environmental issues. Topics may include biodiversity, wilderness, food, urban ecologies, postcolonial ecologies, environmental justice, and climate change. Service learning component includes meaningful work with off-campus agency/agencies selected by instructor. P/NP or letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**M102. Soils and Environment. (4)** (Formerly numbered M127.) (Same as Ecology and Evolutionary Biology M127 and Geography M102.) Lecture, three hours; discussion, one hour; field trips. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. P/NP or letter grading.

**M102L. Soils and Environment: Field. (1)** (Formerly numbered M127L.) (Same as Ecology and Evolutionary Biology M127L and Geography M102L.) Laboratory, one hour; field excursions. Corequisite: course

**M102. Investigations and demonstrations supporting material in course M102, including excavating, describing, and naming soils in field, soil forming processes, geomorphology, and soils.** P/NP or letter grading.

**M103. Soil and Water Conservation. (4)** (Formerly numbered M114.) (Same as Geography M103.) Lecture, three hours; discussion, one hour. Enforced requisite: one course from course 10, Geography 1, 2, Life Sciences 7B. Designed for juniors/seniors. Systematic study of processes of and hazards posed by erosion, sedimentation, development, and pollution and techniques needed to conserve soil and maintain environmental quality. Scope includes agriculture, forestry, mining, and other rural uses of land. P/NP or letter grading.

**M111. Earth and Its Environment. (4)** (Same as Atmospheric and Oceanic Sciences M100.) Lecture, three hours. Overview of Earth as system of distinct, yet intimately related, physical and biological elements. Origins and characteristics of atmosphere, oceans, and land masses. Survey of history of Earth and of life on Earth, particularly in relation to evolution of physical world. Consideration of possibility of technological solutions to global environmental problems using knowledge gained during course. Letter grading.

**121. Conservation of Biodiversity. (4)** Lecture, three hours; discussion, two hours. Not open for credit to students with credit for Ecology and Evolutionary Biology 116. Examination of interrelation of natural biotic and human systems. Description of distribution of biodiversity and natural processes that maintain it. Critical analysis of various levels of threats and multidimensional challenges required for mitigating threats. Letter grading.

**M125. Environmentalism: Past, Present, and Future. (4)** (Formerly numbered M132.) (Same as Geography M125 and Urban Planning M165.) Lecture, three hours; discussion, one hour. Exploration of history and origin of major environmental ideas, movements or countermovements they spawned, and new and changing nature of modern environmentalism. Introduction to early ideas of environment, how rise of modern sciences reshaped environmental thought, and how this was later transformed by 19th-century ideas and rise of American conservation movements. Review of politics of American environmental thought and contemporary environmental questions as they relate to broader set of questions about nature of development, sustainability, and equity in environmental debate. Exploration of issues in broad context, including global climate change, rise of pandemics, deforestation, and environmental justice impacts of war. Letter grading.

**M126. Environmental Change. (4)** (Formerly numbered M130.) (Same as Geography M126.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of natural forces producing environmental changes over past two million years. How present landscape reflects past conditions. Effects of environmental change on people. Increasing importance of human activity in environmental modification. Focus on impact of natural and anthropogenic changes on forests. P/NP or letter grading.

**M131. Human Impact on Biophysical Environment. (4)** (Formerly numbered M109.) (Same as Geography M131.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of history, mechanisms, and consequences of interactions between humans and environment. Exploration in depth of three thematic topics (deforestation, desertification, and greenhouse gas increase and ozone depletion) and four major subjects (soil, biodiversity, water, and landforms). P/NP or letter grading.

**M133. Environmental Sociology. (4)** (Same as Society and Genetics M133 and Sociology M115.) Lecture, three hours; discussion, one hour. Relationship between society and environment. Analysis in detail of interrelations between social factors (such as class, race, gender, and religion) and environmental factors (such as pollution, waste disposal, sustainability, and global warming). P/NP or letter grading.

### **134. Environmental Economics with Data Analysis.**

**(4)** Lecture, three hours. Requisite: one course from Economics 41, Life Sciences 40, Political Science 6, Statistics 10, 12, 13, or other statistical analysis course approved by instructor. Examination of challenges of balancing environmental protection with wants and needs of people in economy. Focus on how to design efficient public policies that meet environmental goals. How to quantify cause-and-effect relationships, for example, between pollution and infant mortality, using non-experimental data. P/NP or letter grading.

### **140. Foundations of Environmental Policy and Regulation. (4)**

Lecture, three hours. Introduction to environmental policy and regulation in U.S. Provides basic knowledge and skills needed to work as professional environmental problem solver. Exploration of environmental harms that are subject to regulation, role of science in informing policy and regulation, evolution of environmental regulation, different types of regulatory instruments, regulatory process, and alternative approaches to environmental decision making. Includes California Environmental Quality Act (CEQA), Proposition 65, California's long-standing leadership role in air pollution control, and state's pioneering efforts in regulating greenhouse gas emissions. P/NP or letter grading.

### **M147. Critical Analysis of Strategies toward Environmental Justice. (4)**

(Same as Community Engagement and Social Change M147.) Lecture, three hours. Exploration of and engagement in critical analyses of strategies toward environmental justice including environmental education, civic ecology, environmental stewardship, policy advocacy campaigns, citizen science, community engagement, community planning, and urban tree canopy. Strategies are interwoven across four interconnected modules: community exposure to harm; access to ecosystem benefits and services; lack of diversity and engagement; and utilization of social-ecological systems approach. Students conduct case study analysis of strategies employed in efforts to move toward environmental justice, and develop collective course resource on environmental justice strategies. P/NP or letter grading.

### **150. Environmental Journalism, Science Communications, and New Media. (4)**

Lecture, three hours. Introduction to environmental journalism, science communications, and new media, including weekly guest lectures by prominent successful practitioners in wide variety of media. Focus on technologies, methods, genres, and theories of communicating environmental challenges, exploring solutions, and engaging public in newspapers, television, radio, movies, online, on mobile devices, and through social media. Discussion of possibilities and limitations of different media and importance of communications for environmental science, policy, public understanding, and individual decision making. Production by students of environmental communications in variety of media. P/NP or letter grading.

### **M153. Introduction to Sustainable Architecture and Community Planning. (4)**

(Same as Architecture and Urban Design CM153.) Lecture, three hours. Relationship of built environment to natural environment through whole systems approach, with focus on sustainable design of buildings and planning of communities. Emphasis on energy efficiency, renewable energy, and appropriate use of resources, including materials, water, and land. Letter grading.

### **155. Energy and Society in Time of Climate Change: Moving toward Just Transition. (4)**

Lecture, three hours. Introduction to energy systems and their regulatory infrastructure, with focus on U.S. and California. History of field of energy including rise of coal mining, development of petroleum both in U.S. and Middle East, and enrollment of public lands for extraction or collection of energy from fossil deposits and flows. Examination of concept of energy and differences between energy and power. Focus on understanding contemporary energy system, different sources of energy, how energy is transmitted and distributed, and regulatory infrastructure that has arisen around this vast and essential system that provides electricity and natural gas for most commercial and domestic activi-

ties. Discussion of challenges and opportunities in current transition away from fossil fuels and progress of just transition in California. P/NP or letter grading.

### **157. Energy, Environment, and Development. (4)**

Lecture, three hours. Requisites: Mathematics 3A and 3B (or 31A and 31B), Physics 1A and 1B (or 6A and 6B). Introduction to basic energy concepts and examination of role of various energy sources, energy conversion technologies, and energy policies in modern life. Analysis of implications of current patterns of energy production and consumption for future economic and environmental well-being. Integration of concepts and methods from physical and life sciences, engineering, environmental science, economics, and public policy. Basic quantitative skills provided to analyze and critique technical, economic, and policy choices to address challenge of balancing economic growth and environmental sustainability. P/NP or letter grading.

### **C159. Life-Cycle Assessment. (4)**

Lecture, three hours. Requisites: Life Sciences 30A and 30B, or Mathematics 3A and 3B (or 31A and 31B). Public discourse about current patterns of production and consumption of energy, and goods and services more broadly, suggest such patterns are environmentally and economically unsustainable. Introduction to basic concept of life-cycle assessment (LCA), including analytical frameworks and quantitative techniques for systematically and holistically evaluating environmental trade-offs presented by different alternatives. Focus on methodology of LCA to compute various material inputs and environmental releases from all activities associated with life cycle (i.e., raw material extraction, processing, end use, and disposal) of products or services. Discussion of strengths and limitations of LCA as tool for decision making. Students perform life-cycle analysis of one technology, product, or service of their choice. Concurrently scheduled with course C259. P/NP or letter grading.

### **160. Topics in Environmental Economics and Policy. (4)**

Seminar, three hours. Requisite: Statistics 12 or 13. Examination of intersection of environmental economics and policy, with focus on testing policy-relevant environmental hypotheses using economics research approach. Invited scholars present research aimed at yielding policy-relevant results on various topics such as climate change, pollution, and transportation. P/NP or letter grading.

### **M161. Global Environment and World Politics. (4)**

(Same as Political Science M122B.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: Political Science 20. Politics and policy of major global environmental issues such as climate change, integrating law, policy, and political science perspectives. P/NP or letter grading.

### **162. Entrepreneurship and Finance for Environmental Scientists. (4)**

Lecture, three hours; discussion, one hour. Focus on key entrepreneurial and financial concepts, with emphasis on applications that are vital for implementing environmental solutions in private, public, and nonprofit settings. Topics include basic elements of finance, project evaluation, financial planning, and marketing. Development of entrepreneurial skills to recognize opportunity and transfer ideas into viable projects that are better for environment and that benefit people and communities. Case studies used to equip students with tools necessary to successfully execute environmental goals and objectives. P/NP or letter grading.

### **163. Business and Natural Environment. (4)**

Lecture, three hours. Examination of role of business in mitigating environmental degradation and incentives to be more environmentally responsive. Emphasis on corporate strategies that deliver value to shareholders while responding to environmental concerns. P/NP or letter grading.

### **M164. Environmental Politics and Governance. (4)**

(Same as Urban Planning M160.) Lecture, three hours. Environmental planning is more than simply finding problems and fixing them. Each policy must be negotiated and implemented within multiple, complex systems of governance. Institutions and politics matter deeply. Overview of how environmental governance works in practice and how it might be improved. Letter grading.

**166. Leadership in Water Management. (4)** Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Examination of water quality and water supply issues, including interactions between scientific, technological, management, and policy issues. Invited experts, scholars, and practitioners discuss relevant issues such as pollution, climate change, and water infrastructure. Emphasis on solutions involving integrated water supply and wastewater systems. Leadership development through writing instruction and negotiations and media training. P/NP or letter grading.

**M167. Environmental Justice through Multiple Lenses. (4)** (Same as Public Affairs M161 and Urban Planning M167.) Lecture, three hours. Examination of intersection between race, economic class, and environment in U.S., with focus on issues related to social justice. Because environmental inequality is highly complex phenomenon, multidisciplinary and multi-population approach taken, using alternative ways of understanding, interpreting, and taking action. P/NP or letter grading.

**170. Environmental Science Colloquium. (1)** Seminar, 90 minutes; one field trip. Limited to undergraduate students. Study of current topics in environmental science, including participation in weekly colloquium series and field trips. May be repeated for credit. P/NP grading.

**175. Programming with Big Environmental Data-sets. (4)** Lecture, three hours. Prerequisite: Life Sciences 40 or Statistics 12 or 13. Students gain practical experience conducting empirical research by learning how to program using R. Modern empirical research often requires use of powerful statistical software like R. This programming language shares many similarities with other statistical programs, providing students with valuable labor-market skill. P/NP or letter grading.

**180A. Practicum in Environmental Science. (4)** Lecture, three hours; discussion, two hours. Enforced prerequisite: Statistics 12 or 13. Limited to Environmental Science majors who have completed 40 or more units of preparation for major courses, including statistics, and 12 or more units of upper-division courses toward major or minor requirements. Examination of case studies and presentation of tools and methodologies in environmental science, building on what students have been exposed to in other courses. Letter grading.

**180B. Practicum in Environmental Science. (5)** Lecture, one hour; laboratory, five hours. Prerequisite: course 180A. Course 180B is requisite to 180C. Limited to junior/senior Environmental Science majors. Investigation of various aspects of one environmental case study representing actual multidisciplinary issue. Particular emphasis on developing skills required for working as professionals in this field. Work may involve site investigations, original data collection and analysis, mapping and geographic information systems, and environmental policy and law issues. Case study to be defined and conducted with collaboration of local agency or nonprofit institution. Letter grading.

**180C. Practicum in Environmental Science. (5)** Lecture, one hour; laboratory, five hours. Prerequisite: course 180B. Limited to junior/senior Environmental Science majors. Investigation of various aspects of one environmental case study representing actual multidisciplinary issue. Particular emphasis on developing skills required for working as professionals in this field. Work may involve site investigations, original data collection and analysis, mapping and geographic information systems, and environmental policy and law issues. Case study to be defined and conducted with collaboration of local agency or nonprofit institution. Letter grading.

**185A. Sustainability Talks. (1)** Lecture, two hours. Analysis of principles of sustainability through series of lectures and films by world-renowned faculty members, authors, environmentalists, entrepreneurs, policymakers, and progressive thinkers. May be repeated for credit. P/NP grading.

**185B. Sustainability Action Research. (2)** Lecture, two hours; fieldwork, four hours. Investigation of issues of campus sustainability, including energy efficiency, transportation, waste stream management, sustainable food practices, and more by student re-

search to generate coalition of student researchers that, together with faculty members and UCLA staff, strive to make UCLA more sustainable community. May be repeated for credit. Letter grading.

**185C. Sustainability Action Leaders. (3)** Seminar, two hours; fieldwork, six hours. Students lead research teams to investigate issues of campus sustainability, including energy efficiency, transportation, waste stream management, sustainable food practices, and more to generate coalition of student researchers that, together with faculty members and UCLA staff, strive to make UCLA more sustainable community. May be repeated for credit. Letter grading.

**186. Comparative Sustainability Practices in Local/Global Settings. (4)** Fieldwork, four hours. Guided fieldwork and comparative analysis used to assess local sustainability practices and policies in diverse regional or international settings. Emphasis on comparing role of local and regional culture, geography, economic climate, and governmental policies on sustainability awareness and practices. Use of observations, interviews, and unobtrusive measures to document and analyze role and influence of local/global context on sustainability behavior of individuals, small businesses, and other institutions in everyday life. Letter grading.

**M187. Careers in Earth System, Environment, and Space Sciences. (1)** (Same as Atmospheric and Oceanic Sciences M187 and Earth, Planetary, and Space Sciences M187.) Seminar, one hour. Examination of central role of science in understanding and addressing grand challenges in climate, earth and environment, and space exploration through seminars given by scientists, engineers, managers, and entrepreneurs from national laboratories and industry. Includes tour of National Aeronautics and Space Administration (NASA) Jet Propulsion Laboratory (JPL). Students engage speakers on science, career preparation, opportunities for undergraduate internships, and building fulfilling careers. P/NP grading.

**188A-188B. Special Courses in Environment. (4-2)** Lecture, three hours; discussion, one hour (when scheduled—course 188A) and two hours (course 188B). Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit with topic change. P/NP or letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced prerequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced prerequisite: course 188SA. Enforced prerequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced prerequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for

maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**193. Journal Club Seminars: Environment. (1)** Seminar, one hour. Limited to undergraduate students. Discussion of readings selected from current literature of field. May be repeated for credit. P/NP grading.

**195. Community or Corporate Internships in Environmental Science. (2 or 4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average in major. Limited to junior/senior majors. Internship in supervised setting in community agency or business related to environmental science and/or sustainability. Students meet on regular basis with faculty supervisor and provide periodic reports of their experience. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required; consult undergraduate adviser. P/NP grading.

**198. Honors Research in Environmental Science. (2 to 4)** Tutorial, four hours. Limited to junior/senior Environmental Science majors. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. Must be taken for at least two terms and for total of at least 8 units. May be repeated for credit. Individual contract required. Letter grading.

**199. Directed Research in Environment. (2 to 4)** Tutorial, two hours. Preparation: submission of written proposal outlining study or research to be undertaken. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Progress report must be submitted to faculty mentor at end of term. Culminating paper or project required. May be repeated for credit, but only 4 units may be taken each term. Individual contract required. P/NP or letter grading.

## Graduate Courses

**200A-200B. Issues and Methods in Environment and Sustainability. (4-4)** Seminar, four hours. Course 200A is requisite to 200B. Examination of interdisciplinary case studies that approach problems in environment and sustainability as issues with scientific, social, economic, political, philosophical, ethical, historical, cultural, and policy dimensions. Case studies illustrate use of qualitative and quantitative methods of analysis drawn from natural sciences, social sciences, and humanities. Emphasis on conceptual frameworks for defining environmental problems and implementation of research results in solving real-world problems. S/U or letter grading.

**205A-205B-205C. Major Problems in Environment and Sustainability. (2-2-2)** Seminar, three hours. Yearlong investigation of questions through series of case studies of five of most significant problems in environment and sustainability over last century: Dust Bowl, lead contamination, dichlorodiphenyltrichloroethane (DDT), stratospheric ozone depletion, and tropical deforestation. Questions include how environmental problems become matters of public concern; what tools, techniques, and practices that make problems visible and legible to different publics and that inform possibilities for response are; how efforts aimed at understanding specific problems from different perspectives changed way other environmental problems and larger processes of environmental change are seen and approached; who gets left out in these different ways of seeing, and how do different ways of seeing and governing specific problems facilitate, justify, and compound imposition of harms on particular groups of people. Concurrently scheduled with Law 505A-505B. In Progress (205A, 205B) and S/U or letter grading (205C).

**M235. Modern Environmental Statistics. (4)** (Same as Statistics M235.) Seminar, three hours. Limited to graduate students. Prerequisites: undergraduate level calculus, linear algebra, and introductory statistics; scientific computing. Introduction to statistical approaches in environmental science, with focus on climate science. Topics include Bayesian modeling, hypothesis testing, regression, causality, multidimensional data analysis, time series modeling, and extreme value analysis. Draws upon relevant examples in scientific literature. S/U or letter grading.

**240. Food, Energy, and Water Systems Management Seminar. (1)** Seminar, one hour. Designed for students in science, technology, engineering, and mathematics (STEM) field interested in nexus of food, energy, and water systems (FEWS) management and sustainability. Discussion of issues of science, technology, policy, economics, and law with experts in industry, academia, and government. Career development activities including presentation skills, conflict resolution, business and entrepreneurship. Course is part of National Science Foundation (NSF) graduate traineeship in integrated urban solutions for food, energy, and water systems (INFEWS). Enrollment for non-INFEWS students in STEM graduate education and related sustainability majors/topics by consent of instructor. S/U grading.

**241. Food, Energy, and Water Systems Management in Urban Systems Field Laboratory. (4)** Fieldwork, four hours. Designed for students in science, technology, engineering, and mathematics (STEM) field interested in nexus of food, energy, and water systems (FEWS) management and sustainability. Weekly visits to facility related to FEWS, and discussion of issues of science, technology, policy, economics, and law in written report. Course is part of National Science Foundation (NSF) graduate traineeship in integrated urban solutions for food, energy, and water systems (INFEWS). Enrollment for non-INFEWS students in STEM graduate education and related sustainability majors/topics by consent of instructor. S/U or letter grading.

**M242. Science Communications and Environmental Media. (4)** (Formerly numbered 242.) (Same as English M290.) Seminar, three hours. Designed for graduate students in food, energy, and water systems (FEWS) training grant program to survey fields of science communications and environmental narrative from nonfiction to new media (multimedia journalism, documentary, social media, virtual reality, etc.), and to develop collaborative projects communicating student research to diverse public audiences. Course is part of National Science Foundation (NSF) graduate traineeship in integrated urban solutions for food, energy, and water systems (INFEWS). Enrollment for non-INFEWS students in STEM graduate education and related sustainability majors/topics by consent of instructor. S/U or letter grading.

**250. Tools for Sustainability Assessment. (4)** Lecture, three hours. Recommended preparation: introductory course in industrial ecology, ecological economics, environmental economics, business and management, or public policy analysis. Public discourse about implications of current patterns of production and consumption of energy and various goods and services suggests such patterns are unsustainable. What is meant by sustainability and how is it quantified? Focus on concepts and tools to assess sustainability at micro-level of individuals, products, or firms using various techniques, including life-cycle assessment, input-output analysis, and cost-benefit analysis. Exploration of sustainability at macro-level for one entire economy or nation. Discussion of usefulness and limitations of various metrics as guide for public and private decision making. S/U or letter grading.

**C259. Life-Cycle Assessment. (4)** Lecture, three hours. Requisites: Life Sciences 30A and 30B, or Mathematics 3A and 3B (or 31A and 31B). Public discourse about current patterns of production and consumption of energy, and goods and services more broadly, suggest such patterns are environmentally and economically unsustainable. Introduction to basic concept of life-cycle assessment (LCA), including analytical frameworks and quantitative techniques for systematically and holistically evaluating environmental trade-offs presented by different alternatives. Focus on methodology of LCA to compute various material inputs and environmental releases from all activities associated with life cycle (i.e., raw material extraction, processing, end use, and disposal) of products or services. Discussion of strengths and limitations of LCA as tool for decision making. Students perform life-cycle analysis of one technology, product, or service of their choice. Concurrently scheduled with course C159. S/U or letter grading.

**260. Information, Technology, Business, and Society. (4)** Seminar, three hours. Interdisciplinary research seminar to bring sound social sciences methods to latest technology developments to design effective information-based solutions to social problems. Topics include selection and framing of research questions, developing measurements, designing appropriate methods (e.g., surveys, experiments, using available data), ethical issues, and writing up research proposals. S/U or letter grading.

**277. Leaders in Sustainability. (4)** Lecture, three hours. Common course for all students participating in Leaders in Sustainability Program, including those from engineering, law, management, public affairs, public health, natural and social sciences, and others. Creation of environment for academically based discussions on various sustainability-related themes, capitalizing on wide mix of disciplines represented among participating students. Sessions feature UCLA faculty members, external speakers, and leadership skills to help students learn more about how to best put their interests in sustainability to use. Letter grading.

**290. Seminar in Environment and Sustainability. (2)** Seminar, 90 minutes. Seminars sponsored by Institute of the Environment and Sustainability and other units. Planning and execution of presentations on topics of choice. Emphasis on development of communication skills. May be repeated for credit. S/U grading.

**297A-297B. Advanced Topics in Environment and Sustainability. (4-2)** Seminar, four hours (course 297A) and two hours (course 297B). Advanced study and analysis of variable current topics in environment and sustainability. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**400. Environmental Science and Engineering Problems Course. (8)** Seminar, eight hours. Primarily designed for environmental science and engineering doctoral students. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Supervised investigation of advanced environmental problems. S/U grading.

**599. Doctoral Dissertation Research. (2 to 12)** Tutorial, to be arranged. Limited to students who have advanced to doctoral candidacy. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## ENVIRONMENTAL HEALTH SCIENCES

*Jonathan and Karin Fielding School of Public Health*

16-035 Center for Health Sciences  
Box 177220  
Los Angeles, CA 90095-1772

Environmental Health Sciences  
310-825-6381

Rachael M. Jones, MPH, PhD, *Chair*

## Faculty Roster

### Professors

Jesus A. Araujo, MD, PhD  
Michael D. Collins, PhD  
Jared M. Diamond, PhD  
Michael L. Jerrett, PhD  
Rachael M. Jones, MPH, PhD  
Jian Li, PhD  
Timothy Malloy, JD (*Frank G. Wells Endowed Professor of Environmental Law*)  
André E. Nel, MBChB, PhD  
Shane S. Que Hee, PhD  
Beate R. Ritz, MD, PhD  
Wendie A. Robbins, RN, PhD, FAAN (*Audrienne H. Moseley Professor of Biological Nursing Science*)  
Linda Rosenstock, MD, MPH  
Irwin H. Suffet, PhD  
Yifang Zhu, PhD

### Professors Emeriti

Richard F. Ambrose, PhD  
Brian L. Cole, DrPH  
Climis A. Davos, PhD  
Curtis D. Eckhart, PhD  
Richard J. Jackson, MD, MPH  
Robert A. Mah, PhD  
Arthur M. Winer, PhD

### Associate Professors

Alan I. Barreca, PhD  
Kirsten Schwarz, PhD  
Candace Su-Jung Tsai, ScD  
Jane L. Valentine, PhD

### Assistant Professors

Lara J. Cushing, MPH, PhD (*Jonathan and Karin Fielding Presidential Professor of Health Equity*)  
Miriam E. Marlier, PhD

### Adjunct Professors

Pouran D. Faghri, MD  
Daniel Z. Uslan, MD

### Adjunct Associate Professor

Kevin Y. Njabo, PhD

### Adjunct Assistant Professors

Hamid Arabzadeh, CIH  
Angelo J. Bellomo, MS  
Tao Huai, PhD

## Overview

The Department of Environmental Health Sciences focuses its research and educational activities on the protection of human health from biological, chemical, mechanical, and physical hazards in the environment. Its graduates are scientists, professionals, and leaders capable of identifying and measuring stressors of environmental concern; evaluating the health, environmental, and all other impacts of such stressors; developing means for their effective management; and evaluating alternative policies directed at improving and protecting health and the environment. Such training is accomplished through several degree programs that offer specialized study in selected academic areas of environmental health sciences such as air pollution, environmental chemistry, environ-

mental policy, toxicology, built environment and health, climate and health, global environmental health, water quality, occupational health, and industrial hygiene. Graduates of the department pursue careers in the private or public sector as researchers, educators, managers, policymakers, and/or practitioners.

The department offers Master of Science (MS) and Doctor of Philosophy (PhD) degrees in Environmental Health Sciences and, through the Fielding School of Public Health, the Master of Public Health (MPH) degree with a specialization in environmental health sciences (see [Public Health Schoolwide Programs](#)). The department also offers an area of focus on industrial hygiene for its MS and MPH degrees. A concurrent degree program (Environmental Health Sciences MPH/Master of Urban Planning) is also offered. The interdepartmental [Molecular Toxicology](#) program offers a PhD degree.

## Graduate Major

### Environmental Health Sciences MS, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Environmental Health Sciences

### Lower-Division Courses

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**89HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to lower-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental readings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**100. Introduction to Environmental Health. (4)** Lecture, three hours; discussion, one hour. Preparation: one course each in chemistry and biology. Limited to nonmajors. Not open for credit to students with credit for course 120. Introduction to environmental health, including coverage of sanitary principles and chronic and acute health effects of environmental contaminants. P/NP or letter grading.

**101. Fundamentals of Chemistry for Environmental Health. (3)** Lecture, three hours; discussion, one hour. Guided tutorial on fundamental chemical concepts that are important for public health students that either do not have strong background in chemistry or who have not recently taken chemistry class and want to refresh their knowledge. Discussion of examples relevant to environmental health more broadly in each topic area and used to illustrate why understanding fundamental chemical concepts are important. Interactive study with focus on core chemical concepts. Recommended to be taken before or concurrently with introductory courses. P/NP or letter grading.

**120. Environment and Health. (5)** Lecture, three hours; discussion, one hour. Limited to Public Health majors. Not open for credit to students with credit for course 100. Examination of scientific principles and methods of field, as well as translation of science to environmental health practice. Topics include environmental stressors and their health effects, regulations and policy, equity and justice, and systems thinking. Acquisition of skills important for public health professionals, such as application of scientific information to real-world problems and ability to communicate effectively with different stakeholders. Letter grading.

**C125. Atmospheric Transport and Transformations of Airborne Chemicals. (4)** Lecture, four hours. Preparation: one year of calculus, one course each in physics, organic chemistry, and physical chemistry. Designed for science, engineering, and public health students. Role of regional or long-range transport, and atmospheric lifetimes and fates of airborne chemicals in phenomena such as photochemical smog, acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. Concurrently scheduled with course C225. P/NP or letter grading.

**C135. Environmental Policy for Science and Engineering. (4)** Lecture, four hours. Limited to senior undergraduate and graduate students. Examination of theoretical underpinnings of several major types of regulatory policy, as well as practical issues involved in implementing and enforcing each. Exploration of selection and impact of regulatory forms from variety of disciplines and viewpoints. Focus on traditional command and control regulation (including self-executing performance standards and permitting), market-based regulation (such as emissions trading), remediation, and emerging regulatory approaches such as management-based regulation and alternatives assessment. Issues of compliance and enforcement. Concurrently scheduled with course C235. P/NP or letter grading.

**C140. Fundamentals of Toxicology. (4)** Lecture, four hours. Preparation: one course each in biology, organic chemistry, and biochemistry. Essential aspects of toxicology, with emphasis on human species. Absorption, distribution, excretion, biotransformation, as well as basic toxicologic processes and organ systems. Concurrently scheduled with course C240. Letter grading.

**C152D. Properties and Measurement of Airborne Particles. (4)** Lecture, four hours. Preparation: one year each of chemistry, physics, and calculus. Basic theory and application of aerosol science to environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems. Concurrently scheduled with course C252D. P/NP or letter grading.

**C157. Risk Assessment and Standard Setting. (4)** Seminar, four hours. Prerequisite: course C140. Designed to provide students with opportunity to review scientific basis for association of selected occupational and environmental exposures with disease.

Special emphasis on critical evaluations of literature. Attention specifically to interface of science and regulatory standards. Concurrently scheduled with course C257. P/NP or letter grading.

**C164. Fate and Transport of Organic Chemicals in Aquatic Environment. (4)** Lecture, four hours. Recommended prerequisites: Chemistry 14A and 14B, or 20A and 20B. Evaluation of how and where and in what form and concentration organic pollutants are distributed in aquatic environments. Study of mass transport mechanisms moving organic chemicals between phases, biological degradation and accumulation, and chemical reactions. Effect of humic substances on these processes. Concurrently scheduled with course C264. P/NP or letter grading.

**M166. Environmental Microbiology. (4)** (Same as Civil Engineering M166.) Lecture, four hours; discussion, two hours; outside study, six hours. Recommended prerequisite: Civil Engineering 153. Microbial cell and its metabolic capabilities, microbial genetics and its potentials, growth of microbes and kinetics of growth, microbial ecology and diversity, microbiology of wastewater treatment, probing of microbes, public health microbiology, pathogen control. Letter grading.

**M166L. Environmental Microbiology Laboratory. (2)** (Same as Civil Engineering M166L.) Lecture, one hour; laboratory, two hours; outside study, two hours. Prerequisite: course M166 (may be taken concurrently). General laboratory practice within environmental microbiology, sampling of environmental samples, classical and modern molecular techniques for enumeration of microbes from environmental samples, techniques for determination of microbial activity in environmental samples, laboratory setups for studying environmental biotechnology. Letter grading.

**C185A. Foundations of Environmental Health Sciences. (4)** Lecture, four hours. Preparation: one year of undergraduate biology and chemistry. Introduction to field of environmental health sciences designed for students pursuing concentration in environmental health or Public Health minors. Examination of series of topics relevant to science of environmental and occupational health (e.g., climate change, ecology, microbiology, and toxicology) by introducing scientific basis from ecological perspective and describing how topics relate to health on a biochemical and molecular basis. Emphasis on scientific aspects of field, with focus on critique of primary literature and quantitative approaches for examination of topics to provide skills that are critical to perform research. Concurrently scheduled with course C200A. Letter grading.

**C185B. Foundations of Environmental Health Sciences for Public Health Professionals. (2)** Lecture/seminar, two hours. Preparation: 4 units each of undergraduate chemistry and biology. Future environmental health and public health leaders must understand vocabulary and systems issues related to local, regional, and global environmental factors affecting public health. Development of content knowledge and thought processes to effectively analyze environmental health problems and development, implementation, and leading of actions to address these problems. Supplements content presented in Public Health 200A and 200B and Environment 100. Concurrently scheduled with course C200B. Letter grading.

**C185C. Foundations of Environmental Health Sciences. (6)** Lecture, four hours; group project, two hours. Enforced prerequisite: course C185A or C185B. Multidisciplinary aspects of environmental health sciences in context of public health for environmental health majors. Concurrently scheduled with course C200C. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**189HC. Honors Contracts. (1)** Tutorial, three hours. Limited to students in College Honors Program. Designed as adjunct to upper-division lecture course. Individual study with lecture course instructor to explore topics in greater depth through supplemental read-

ings, papers, or other activities. May be repeated for maximum of 4 units. Individual honors contract required. Honors content noted on transcript. Letter grading.

**197. Individual Studies in Environmental Health Sciences. (2 to 4)** Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**199. Directed Research in Environmental Health Sciences. (2 to 8)** Tutorial, one hour. Entry-level research apprenticeship under guidance of faculty mentors affiliated with research interests. Collaboration with faculty mentors on their research in area related to environmental health sciences. May be repeated for credit. Individual contract required. Letter grading.

## Graduate Courses

**C200A. Foundations of Environmental Health Sciences. (4)** Lecture, four hours. Preparation: one year of undergraduate biology and chemistry. Introduction to field of environmental health sciences designed for students pursuing MS, MPH, and PhD degrees. Examination of series of topics relevant to science of environmental and occupational health (e.g., climate change, ecology, microbiology, and toxicology) by introducing scientific basis from ecological perspective and describing how topics relate to health on a biochemical and molecular basis. Emphasis on scientific aspects of field, with focus on critique of primary literature and quantitative approaches for examination of topics to provide skills that are critical to perform research. Concurrently scheduled with course C185A. Letter grading.

**C200B. Foundations of Environmental Health Sciences for Public Health Professionals. (2)** Lecture/seminar, two hours. Preparation: 4 units each of undergraduate chemistry and biology. Future environmental health and public health leaders must understand vocabulary and systems issues related to local, regional, and global environmental factors affecting public health. Development of content knowledge and thought processes to effectively analyze environmental health problems and development, implementation, and leading of actions to address these problems. Supplements content presented in Public Health 200A and 200B and Environment 100. Concurrently scheduled with course C185B. Letter grading.

**C200C. Foundations of Environmental Health Sciences. (6)** Lecture, four hours; group project, two hours. Enforced requisite: course C200A or C200B. Multidisciplinary aspects of environmental health sciences in context of public health for environmental health majors. Concurrently scheduled with course C185C. Letter grading.

**200D. Policy Analysis for Environmental Health Science. (4)** Lecture, two hours; discussion, two hours. Designed for second-year Environmental Health Sciences MS and MPH students. Practice-focused synthesis and application of content from prior courses to analyze current environmental health policy issues. Students learn fundamentals of environmental health law, regulatory frameworks, communication strategies, approaches for working with community-based organizations, and policy analysis methods. Focus on environmental and occupational health and policy aspects of single case study. S/U or letter grading.

**201. Seminar: Health Effects of Environmental Contaminants. (2)** Seminar, two hours. Requisites: courses C200A or C200B and C200C. Emphasis on health effects of air, water, environmental pollutants on man and review of research literature. May be repeated for credit. S/U or letter grading.

**202. Seminar: Environmental Chemistry. (2)** Seminar, one hour. Requisites: courses C200A, C200B, 410A, 410B. Environmental chemistry aspects of environmental health sciences through multimedia analyses and biological and microbiological analyses. May be repeated for credit. Letter grading.

**203. Seminar: Ecotoxicology. (2)** Seminar, two hours. Discussion of various topics in ecotoxicology. Topics vary from term to term and include aspects of environmental chemistry, toxicology, and ecology. May be repeated for credit. S/U grading.

**204. Seminar: Exposure Assessment. (2)** Seminar, two hours. Discussion of various topics in exposure assessment. Topics vary by term and include aspects of population activity, microenvironments, types of monitoring (outdoor, indoor, personal, biomarkers), and multimedia sources of exposure. S/U grading.

**205. Environmental Health Sciences Doctoral Seminar. (2)** Seminar, two hours. Limited to environmental health sciences doctoral students. Presentation of current research of environmental health sciences doctoral students. May be repeated for credit. S/U grading.

**206. Seminar: Applied Coastal Ecology. (2)** Seminar, two hours. Discussion of various topics in applied coastal ecology. Topics vary by term and include wetland ecology, restoration ecology, and ecology and management of coastal watersheds. May be repeated for credit. S/U grading.

**207. Introduction to Geographic Information Systems. (4)** Lecture, two hours; laboratory, two hours. Introduction to geographic information systems (GIS), including use of GIS software, mapping, geocoding, and data analysis. S/U or letter grading.

**208. Built Environment and Health. (4)** Lecture, three hours; discussion, one hour. Limited to public health and urban planning graduate students. Interdisciplinary course on built environment and health and breaking down silos. U.S. and other developed, as well as developing, countries are facing increasingly lethal and costly epidemics of acute and chronic diseases related to land use and built environment decisions. While hazards presented by air and water pollution are well recognized for acute, infectious, and toxicological illnesses, there is increasing recognition of hazards presented by building and community designs that fail to recognize human health. Land use and built environment decisions impact every age group and social and racial minority. Impacts range from very acute (motor vehicle trauma) to long term (obesity, cancer, heart disease). Decisions have as their bases economic, financial, insurance, housing, and other factors. Analysis of each factor and related disease endpoints. S/U or letter grading.

**209. Practical Applications in Environmental Health Sciences. (2)** Lecture, two hours. Enforced requisites: courses C200A, C200B. Description of many leading environmental and occupational health problems that environmental health practitioners face today, conducted as series of lectures, assignments, hands-on field exercises, and group projects, to help students develop skills necessary to integrate concepts across disciplines in field of environmental health. May satisfy some requirements needed to qualify for Registered Environmental Health Specialist (REHS) certification. S/U or letter grading.

**212. Applied Ecology. (4)** Lecture, four hours. Preparation: one ecology course. Application of ecological theory and principles to solve environmental problems, including conservation biology, assessment of environmental impacts, and restoration ecology and mitigation of environmental impacts. Letter grading.

**213. Seminar: Practical Aspects of Biosafety and Biosecurity. (2)** Seminar/discussion, two hours. Preparation: one year of introductory biology. Recommended requisite: Microbiology 101 or 102. Designed for environmental health sciences graduate students and students in UCLA Biosafety Training Program. Interactive seminar with focus on critical concepts in and practical aspects of biosafety, biosecurity, risk assessment, and risk management that are needed for individuals wishing to serve as interns in UCLA biosafety program and/or become biosafety professionals. S/U or letter grading.

**214. Children's Environmental Health: Prenatal and Postnatal. (4)** Lecture, four hours. Preparation: one year each of chemistry and biology. Examination of how environmental exposures to chemical, physical, and biological agents during period of maturation

(from fertilization to adulthood) cause pathophysiological perturbations in homeostasis at any stage during life. Letter grading.

**215. Fundamentals of Health Impact Assessment. (4)** Seminar, four hours. Provides students with sound understanding of health impact assessment (HIA) practice, its rationale and underlying principles, and opportunities to develop and apply HIA skills in work with public agencies and community-based organizations. Focus on problem solving around case-study HIAs and student experiences working on HIA-related projects. S/U or letter grading.

**216. Planetary Health: Consequences of Environmental Change for Human Health. (4)** Seminar, three hours. Planetary health is emerging interdisciplinary field that explores connections between environmental change and public health. Human-caused impacts on natural systems that have subsequent effects on human health include changes in land use, food systems, biodiversity, air pollution, and water availability. Our ability to understand planetary health requires synthesizing information from diverse academic disciplines across spatial and temporal scales, including atmospheric and climate science, ecology, epidemiology, and policy. Students from environmental health sciences and related fields learn how to interpret studies from scientific literature that discuss various aspects of planetary health, from drivers of environmental change to human health outcomes, integrate information across multiple scientific fields, and communicate planetary health research through oral presentation and written report. S/U or letter grading.

**M217. Graduate Seminar in Environmental Economics and Policy. (4)** (Same as Public Policy M217.) Seminar, four hours. Preparation: undergraduate-level statistics, basic undergraduate microeconomics. Introduction to applied scholarship in environmental economics and policy. Enables students to become more proficient consumers and producers of social science research that explores questions of environmental policy and sustainability broadly construed. Topics include health and economic impacts of climate change, adaptation to climate change, efficient and equitable design of environmental policies (e.g., cap and trade, carbon taxes). Developmental of detailed empirical research proposal and short presentation. Letter grading.

**218. Science Communication: Art and Practice of Science Storytelling. (4)** Lecture, three hours. Students from environmental health sciences focus on communicating with diverse audiences through visual communication. Study of science of science communication and importance of narrative and storytelling to producing engaging science communication. Applying these skills to their own research topics and interests, students develop two pieces of science communication, video and photo/infographic project. Through learning fundamentals of good public communication, students also advance their peer communication. S/U or letter grading.

**219. Environmental Health Disparities. (4)** Seminar, three hours. Designed for advanced graduate students who have completed foundational coursework in environmental health sciences. Exploration of disproportionate health burden experienced by low income communities and communities of color in U.S. due to environmental hazards. Study of social, economic, and political forces that create inequitable burdens of environmental pollution. Covers theoretical frameworks and analytic tools for understanding cumulative impacts of environmental and social inequalities on health. Case studies, research, and policy debates used to explore challenges and opportunities for addressing environmental racism and advancing environmental justice. S/U or letter grading.

**220. Overview of Environmental Public Health Microbiology. (2)** Lecture, two hours. Preparation: one course in biology. Introduction to environmental public health microbiology. Focus on human-disease-causing organisms. Covers bacteria, viruses, fungi, protozoa or protists, prions, and algae. Consideration of infectious diseases and of toxins produced by these microbes. Addresses how infectious agents interact with human immune system. Overview of this wide variety of microbial topics. S/U or letter grading.

**221. Climate Change, Equity, and Health. (4)** Lecture, two hours; discussion, two hours. Basic foundation in physical mechanisms of, responses to, and health implications of human-induced climate change. Exploration of variety of epidemiologic, risk assessment, and statistical methods used to understand impacts of climate change on health across diverse demographic groups; including efforts to estimate current and future global burden of disease due to climate change, as well as avoidable and attributable risk. Elaboration of public health implications, positive and negative, of efforts to mitigate and adapt to climate change, including discussions of ethical, political, and economic aspects of these efforts. Emphasis on how adverse effects of climate change are borne disproportionately by vulnerable people and groups. Students are responsible for leading class discussions and presenting poster on their choice of topic related to climate change and health. S/U or letter grading.

**C225. Atmospheric Transport and Transformations of Airborne Chemicals. (4)** Lecture, four hours. Preparation: one year of calculus, one course each in physics, organic chemistry, and physical chemistry. Designed for science, engineering, and public health students. Role of regional or long-range transport, and atmospheric lifetimes and fates of airborne chemicals in phenomena such as photochemical smog, acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. Concurrently scheduled with course C125. S/U or letter grading.

**230A-230B-230C. Interdisciplinary Occupational Health Practice. (2-2-2)** Seminar, one hour; fieldwork, one hour. Multidisciplinary nature of occupational health practice featured and explored in these varied-activity courses, including material related to recognition, prevention, surveillance, and management of work-related health problems that occupational health and safety researchers and professionals encounter in various work environments. Lectures, seminars, field exercises, workshops, clinical case conferences, and group assignments combined to help students develop skills necessary to integrate and communicate relevant approaches to occupational hazard detection and control, work-related injury and illness surveillance, and disease and disability prevention from different disciplines in field of occupational health and safety. S/U grading.

**C235. Environmental Policy for Science and Engineering. (4)** Lecture, four hours. Limited to senior undergraduate and graduate students. Examination of theoretical underpinnings of several major types of regulatory policy, as well as practical issues involved in implementing and enforcing each. Exploration of selection and impact of regulatory forms from variety of disciplines and viewpoints. Focus on traditional command and control regulation (including self-executing performance standards and permitting), market-based regulation (such as emissions trading), remediation, and emerging regulatory approaches such as management-based regulation and alternatives assessment. Issues of compliance and enforcement. Concurrently scheduled with course C135. Letter grading.

**C240. Fundamentals of Toxicology. (4)** Lecture, four hours. Preparation: one course each in biology, organic chemistry, and biochemistry. Essential aspects of toxicology, with emphasis on human species. Absorption, distribution, excretion, biotransformation, as well as basic toxicologic processes and organ systems. Concurrently scheduled with course C140. Letter grading.

**M241. Advanced Concepts in Gene-Environment Interactions. (4)** (Same as Molecular Toxicology M247.) Lecture, three hours; discussion, one hour. Comprehensive and practical examination of emerging science of gene-environment interaction. Discussion of primary components of field, including role of metabolic pathways in modifying environmental responses and importance of environmental influences in human disease. Exploration of selected hot topics in field, such as importance of epigenetics and of microbiome. S/U or letter grading.

**C252D. Properties and Measurement of Airborne Particles. (4)** Lecture, four hours. Preparation: one year each of chemistry, physics, and calculus. Basic theory and application of aerosol science to environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems. Concurrently scheduled with course C152D. S/U or letter grading.

**252E. Identification and Measurement of Gases and Vapors. (4)** Lecture, three hours; discussion, one hour; outside study, two hours. Preparation: one year each of chemistry, physics, and calculus. Theoretical and practical aspects of industrial hygiene sampling and measurement of gases and vapors. Letter grading.

**252F. Industrial Hygiene Measurements Laboratory. (3)** Laboratory, three hours. Corequisites: courses C252D, 252E. Limited to industrial hygiene majors. Laboratory methods for sampling, measurement, and analysis of gases, vapors, and aerosols found in occupational environment. S/U or letter grading.

**252G. Industrial and Environmental Hygiene Assessment. (4)** Lecture, one hour; discussion, two hours; laboratory, two hours; outside study, four hours. Requisites: courses C200A, C200B, C252D, 252E, 252F. Environmental and industrial hygiene sampling strategies and assessment via walk-through surveys, lectures, group discussion, actual field measurements, laboratory calibrations, and analyses and reports, with emphasis on chemical, physical, and ergonomic hazards. Letter grading.

**253. Physical Agents in Work Environment. (2 to 4)** Lecture, two hours; laboratory, two hours. Preparation: one year of physics. Physics, measurement methods, health effects, and control methods for radiation (ionizing and nonionizing), noise, and thermal stress in workplace environment. S/U or letter grading.

**255. Control of Airborne Contaminants in Industry. (4)** Lecture, two hours; laboratory, two hours. Preparation: one year of physics. Requisite: course C252D. Principles and applications of control technology to industrial environments, including general and local exhaust ventilation, air cleaning equipment, and respiratory protection. S/U or letter grading.

**256. Biological and Health Surveillance Monitoring in Occupational/Environmental Health. (4)** Lecture, three hours; discussion, one hour; assignments, three hours. Principles and applications of biological monitoring and health surveillance to assess occupational and environmental exposures to organic and inorganic chemicals and physical factors. Letter grading.

**C257. Risk Assessment and Standard Setting. (4)** Seminar, four hours. Requisite: course C240. Designed to provide students with opportunity to review scientific basis for association of selected occupational and environmental exposures with disease. Special emphasis on critical evaluations of literature. Attention specifically to interface of science and regulatory standards. Concurrently scheduled with course C157. S/U or letter grading.

**258. Identification and Analysis of Hazardous Wastes. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour; one field trip. Requisite: course 252E. Designed to define, identify, label, and quantify hazardous wastes and how workers should be protected. Provides critical understanding of all analytical aspects of hazardous wastes, health aspects, and regulation and practice of handling hazardous wastes. Letter grading.

**259A. Occupational Safety and Ergonomics. (4)** Lecture, four hours. Overview of most frequent and severe occupational injuries and illnesses, their distribution, causes, analysis methods, and control approaches, including low back pain, falls, machine exposures, upper extremity musculoskeletal disorders, fleet safety, and selected ergonomics topics. Letter grading.

**259B. Workplace Safety. (2)** Lecture, two hours. Introduction to broad range of topics in workplace safety through lectures on safety hazards, their classification, metrics, control philosophy, and control methods. Specific topics include traditional safety rubrics, such as fall hazards, machine safety, and fire hazards. Introduction to concepts of safety culture

and philosophy. Review and presentation of peer-reviewed articles on topics relevant to course material. Letter grading.

**M260. Occupational Epidemiology. (4)** (Same as Epidemiology M261.) Lecture, three hours. Requisites: Epidemiology 100; for Epidemiology majors, Epidemiology 200A, 200B, 200C. Methodological considerations, approaches, and limitations in epidemiological studies of occupational groups and environments. S/U or letter grading.

**261. Chemical Behavior of Aquatic Systems. (4)** Lecture, three hours. Requisites: courses C200A, C200B, Chemistry 20A, 20B, Mathematics 3A. Chemistry of ocean waters, rivers, groundwaters, and water treatment systems. Topics include thermodynamics of natural waters, acids and bases, carbon dioxide cycle, solubility reactions, oxidation and reduction, plus applied problems. Letter grading.

**C264. Fate and Transport of Organic Chemicals in Aquatic Environment. (4)** Lecture, four hours. Preparation: bachelor's degree in science, engineering, geophysics, chemistry, biology, or public health. Evaluation of how and where and in what form and concentration organic pollutants are distributed in aquatic environments. Study of mass transport mechanisms moving organic chemicals between phases, biological degradation and accumulation, and chemical reactions. Effect of humic substances on these processes. Concurrently scheduled with course C164. S/U or letter grading.

**M270. Work and Health. (4)** (Same as Community Health Sciences M278.) Lecture, three hours; practicum, one hour. Recommended preparation: graduate-level methods/statistics course, basic epidemiology. Designed for graduate students. Exploration of impact of work on physical and psychological health in context of newly emerging discipline. Focus on psychosocial models, measurement (including hands-on experience), contextual factors (gender, ethnicity, social class), and how work stressors can be ameliorated. S/U or letter grading.

**280. Nanomaterial-Related Emerging Technologies: Exposure and Health Effects. (4)** Seminar, three hours; activity, one hour. Students gain understanding of exposure and health effects of nanomaterials and related technologies, and of approaches to control exposure risks to workers and public. Students develop foundation for advanced studies in topics regarding nanomaterial-related emerging technologies. Topics include nano- and advanced materials and their developments; electronic products containing toxic substances and nanomaterials; nanotechnology-enabled products, their liability and regulatory compliance; exposure issues related to these materials and products throughout life cycle, including occupational and environmental perspectives; and biological mechanisms in humans from exposure intakes to post-exposure effects. S/U or letter grading.

**296A-296N. Research Topics in Environmental Health Sciences. (2 each)** Seminar, two hours. Advanced study and analysis of current topics in environmental health sciences. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading. **296A.** Psychosocial Factors and Occupational Health. **296B.** Teratogenesis. **296C.** Social Inequality and Environment. **296G.** Advances in Aerosol Technology. **296H.** Occupational and Environmental Exposure Assessment. **296I.** Industrial and Environmental Hygiene. **296J.** Work, Fertility, and Family. **296K.** Aquatic Chemistry. **296L.** Water Science and Health. **296M.** Experimental and Modeling Studies of Atmospheric Pollution. **296N.** Genetic Toxicology. **296O.** Built Environment and Health. **296P.** Global Environmental Change and Health. **296Q.** Occupational and Environmental Exposure Assessment, Industrial Hygiene, and Advances in Emerging Technology.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**400. Field Studies in Environmental Health Sciences. (4)** Fieldwork, to be arranged. Field observation and studies in selected community environmental health organizations. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward MS minimum course requirement; 4 units may be applied toward 62-unit minimum total required for MPH degree. Letter grading.

**401. Environmental Measurements. (4)** Lecture, two hours; laboratory, four hours. Requisites: courses C200A, C200B, Chemistry 20A, 30AL. Instrumental methods for laboratory and field applications to assess quantity of environmental pollutants in air, food, and water, and to assess degree of exposure to such factors as noise and radiation. Letter grading.

**410A. Instrumental Methods in Environmental Sciences. (4)** Lecture, four hours; discussion, two hours; other, two hours. Preparation: one year each of physics, chemistry, and biology. Theory and principles of instrumental methods through lectures and group discussions. Letter grading.

**410B. Instrumental Methods Laboratory in Environmental Health Sciences. (4)** Lecture, one hour; discussion, one hour; laboratory, four hours; other, two hours. Preparation: one year each of physics, chemistry, and mathematics. Requisites: courses C200A, C200B. Laboratory techniques and instrumentation used in preparation and analysis of biological, environmental, and occupational samples. Letter grading.

**411. Environmental Health Sciences Seminar. (2)** Seminar, two hours. Required of graduate environmental health sciences students for one term each year. Current topics in environmental health in science, policy, and leadership. Speakers who are leading thinkers at interface of health and environment address important subjects of environmental health. May be repeated for credit. S/U grading.

**414A. Research Methods and Effective Communication in Environmental Health Sciences. (2)** Lecture, two hours. Prepares doctoral students in environmental health sciences and related fields for skills needed to undertake dissertation. Skills including performing literature searches, designing research study, proposing specific aims, forming testable hypotheses, completing Institutional Review Board (IRB) application, choosing data collection methods, data management, analysis, and interpretation; and writing research proposal. Students complete pilot research proposal for submission for funding. S/U or letter grading.

**414B. Research Methods and Effective Communication in Environmental Health Sciences. (2)** Lecture, two hours. Prepares doctoral students in environmental health sciences and related fields for skills needed to undertake dissertation. Skills including performing literature searches, designing research study, proposing specific aims, forming testable hypotheses, completing Institutional Review Board (IRB) application, choosing data collection methods, data management, analysis, and interpretation; and writing scientific paper and presenting research results. Students complete manuscript for submission to peer-reviewed journal. S/U or letter grading.

**450. Case Studies in Regulatory Decision-Making: How Government Agencies Are Influenced to Delay Abatement of Local Health Threats. (2)** Seminar, two hours. Requisites: course C200A or Public Health 200A or equivalent. Examination of process in which regulatory decisions are made. Review of several case studies in which industrial operations resulted in discharge of toxic chemicals to air, soils, or surface waters, and subsequently threatened health of adjoining community; this is common scenario for which California's health-protective regulatory process was designed. Through review of response of state and local agencies in these cases, examination of how private interests can influence regulatory decisions, rendering process ineffective in abating health threats, especially in some of California's most vulnerable communities. As practitioners in public health, consideration of how framing of complex regulatory decision in public health terms can be vital to gaining support of policy-makers and public. S/U or letter grading.

**454. Health Hazards of Industrial Processes. (4)** Lecture, two hours; field trips, four hours. Requisite: course 255. Industrial processes and operations and occupational health hazards that arise from them. Letter grading.

**461. Water Quality and Health. (4)** Lecture, three hours; discussion, one hour. Requisites: courses C200A, C200B, 401. Introduction to water quality, with coverage of hydrology, water chemistry, and various chemical contaminants that may affect human health. Various treatment methods and health implications. S/U or letter grading.

**M471. Improving Worker Health: Social Movements, Policy Debates, and Public Health. (4)** (Same as Community Health Sciences CM470 and Urban Planning M470.) Lecture, three hours; fieldwork, two hours. Examination of intersection between work, health, and environment, analysis of social causes of health disparities, investigation of historical trends and social movements, interpretation of current policy debates, and development of innovative interventions. S/U or letter grading.

**495. Teacher Preparation in Environmental Health Sciences. (2)** Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward MPH and MS minimum total course requirement. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research. (2 to 10)** Tutorial, four hours. Only 4 units may be applied toward MPH and MS minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research. (2 to 10)** Tutorial, four hours. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## EPIDEMIOLOGY

*Jonathan and Karin Fielding School of Public Health*

71-254 Center for Health Sciences  
Box 951772  
Los Angeles, CA 90095-1772

### Epidemiology

310-825-8579

Zuo-Feng Zhang, MD, PhD, *Chair*  
Matthew J. Mimiaga, PhD, *Vice Chair*  
Beate R. Ritz, MD, PhD, *Vice Chair*

## Faculty Roster

### Professors

Onyebuchi A. Arah, MD, PhD  
Timothy F. Brewer, MD  
Susan D. Cochran, MS, PhD  
Anne L. Coleman, MD, PhD (*Bradley R. Straatsma Endowed Professor of Ophthalmology*)  
Pamina M. Gorbach, MHS, DrPH  
Nina T. Harawa, MPH, PhD, *in Residence*  
S. Jody Heymann, MD, PhD

Robert J. Kim-Farley, MD, MPH, *in Residence*  
Niklas Krause, MD, MPH, PhD  
Sung-Jae Lee, PhD, *in Residence*  
Li Li, PhD, *in Residence*  
Otoniel M. Martinez-Maza, PhD  
Karin B. Michels, MPH, PhD, ScD  
Matthew J. Mimiaga, MPH, MA, ScD  
Jian Yu Rao, MD  
Anne W. Rimoin, PhD (*Gordon-Levin Endowed Professor of Infectious Diseases and Public Health*)  
Beate R. Ritz, MD, PhD  
Teresa E. Seeman, PhD  
Ondine S. von Ehrenstein, MSc, MPH, PhD  
Zuo-Feng Zhang, MD, PhD

### Professors Emeriti

Lawrence R. Ash, PhD  
Roger Detels, MD, MS  
Ralph R. Frerichs, DVM, DrPH  
Sander Greenland, DrPH, MA, MS  
Leeka I. Kheifets, MH, PhD  
Frank J. Sorvillo, MPH, PhD

### Associate Professors

Liwei Chen, MD, MPH, PhD  
Elizabeth Rose Mayeda, MPH, PhD  
Dallas T. Swendeman, PhD, *in Residence*

### Assistant Professors

Jonathan P. Jacobs, MD, PhD, *in Residence*  
Roch A. Nianogo, MD, MPH, PhD  
Akihiro Nishi, MD, DrPH  
Marissa J. Seamans, PhD

### Adjunct Professors

Najib Aziz, MD  
Julia N. Bailey, PhD  
Brian D. Bradbury, MA, DSc  
Catherine L. Carpenter, PhD  
John D. Clemens, MD  
Mia Hashibe, PhD  
Marjan Javanbakht, PhD  
Kamyar Kalantar-Zadeh, MD, PhD  
Peter Katona, MD  
Peter R. Kerndt, MD, MPH  
Tony Y. Kuo, MD  
Vontanak Saphon, PhD  
Paul A. Simon, MD, MPH  
Lisa V. Smith, MS, DrPH  
Noel S. Weiss, MD, DrPH  
Nathan D. Wong, MPH, PhD  
Zunyou Wu, PhD

### Adjunct Associate Professors

Julia E. Heck, PhD  
Rulin C. Hechter, PhD  
Christie Y. Jeon, PhD  
Dvora L. Joseph Davey, MPH, PhD  
Mark A. Malek, PhD  
Annette K. Regan, MPH, MSc, PhD  
Shira C. Shafir, MPH, PhD  
Amy R. Wohl, PhD

### Adjunct Assistant Professors

Emily S. Beeler, PhD  
Alexandra M.L. Binder, MS, ScD  
Maral E. DerSarkissian, PhD  
Paul J. Dlugniewski, MPH, PhD  
Naomi H. Greene, PhD  
Nicole A. Hoff, MPH, PhD  
Paul T. Hsu, MPH, PhD

Elani Streja, PhD  
 Madhuri Sudan, PhD  
 Sheena G. Sullivan, MD, PhD  
 Ximena P. Vergara, PhD  
 Anjie Zhen, PhD

## Overview

Epidemiology is the study of the distribution and determinants of disease in human populations. Epidemiologists study variations of disease incidence in relation to factors such as age, sex, race, environmental factors, lifestyle, demographic variables, occupational and social characteristics, place of residence, susceptibility, exposure to specific agents, or other pertinent characteristics. Also of concern are the temporal and special distribution of disease, examination of trends, and intervals between exposure to causative factors and onset of disease. The scope of the field extends from study of the patterns of disease to the causes of disease with the goal of the control or prevention of disease. What distinguishes epidemiology from other clinical sciences is the focus on health problems in populations rather than in individuals, with the focus on public health.

Epidemiology is a young field with constantly expanding boundaries. The range of activities includes identifying determinants of population health, investigation and control of disease outbreaks, study of environmental and industrial hazards, evaluation of preventive or curative programs or treatments, and evaluation of the effectiveness and efficiency of intervention or control strategies. Many tools of epidemiology are shared with other fields such as microbiology, immunology, medicine, statistics, demography, and medical geography.

There is a growing core of epidemiologic methodology that includes the principles of study design and conduct, and statistical methods. Epidemiologic tools have become relevant for many other fields that study groups of people, e.g., genetics and epigenetics, global health, pharmacology, medicine, and many others.

Epidemiologists work in many settings, including academia, international health agencies, state and local health departments, federal government agencies and health programs, health maintenance organizations, and numerous research projects privately and publicly sponsored.

## Mission

The objectives of the Department of Epidemiology fall into three broad categories—research, teaching, and community service.

## Graduate Major

### Epidemiology MS, PhD

#### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate

Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Epidemiology

### Lower-Division Courses

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

### Upper-Division Courses

**100. Principles of Epidemiology. (4)** Lecture, four hours; discussion, two hours. Preparation: one full biological sciences course. Limited to nonmajors. Not open for credit to students with credit for course 120. Introductory course to provide qualified undergraduate students with broad and comprehensive overview of concepts of epidemiology including evaluating public health problems in terms of magnitude, person, time and place; critiquing epidemiologic studies; identifying and accessing key sources of data for epidemiologic assessment; using epidemiologic methods and calculating basic epidemiology measures for operational purposes; and communicating basic principles of epidemiology such as definitions of populations, sources of bias, causation for morbidity and mortality, risk and protective factors, and basics of study design. Letter grading.

**120. Epidemiology in Public Health. (5)** Lecture, four hours; discussion, two hours. Prerequisite: Public Health 50B. Limited to Public Health majors. Not open for credit to students with credit for course 100. Introduction to main principles of epidemiology, including foundational concepts and terminology, and exploration of key historical developments of field. Survey of major study designs and statistical techniques with emphasis on application of epidemiological concepts in public health. Letter grading.

**CM175. Terrorism, Counterterrorism, and Weapons of Mass Destruction: Practical Approach. (5)** (Same as Honors Collegium M175.) Seminar, three hours. Terrorism, its origins, and ways of addressing terrorism at local, national, and global levels. Guest speakers from variety of UCLA departments and from Los Angeles. Concurrently scheduled with course C275. P/NP or letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced prerequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced prerequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced prerequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**197. Individual Studies in Epidemiology. (2 to 4)** Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

## Graduate Courses

**200A. Methods I: Basic Concepts and Study Designs. (6)** Lecture, three hours; discussion, one hour. Introduction of basic concepts and methods in epidemiology with emphasis on measuring disease occurrence, study design, and assessing causal relationships. Letter grading.

**200B. Methods II: Prediction and Validity. (6)** Lecture, six hours; discussion, four hours. Enforced requisites: course 200A and Biostatistics 100A, or Public Health 200A and 200B. Corequisite: Biostatistics 100B. Introduction to basic concepts, principles, and methods of chronic and infectious disease epidemiology. Letter grading.

**200C. Methods III: Analysis. (6)** Lecture, four hours; laboratory, two hours. Enforced requisites: courses 200A, 200B. Introduction to basic concepts, principles, and methods of epidemiologic data analysis. Letter grading.

**M203. Topics in Theoretical Epidemiology. (4)** (Formerly numbered 203.) (Same as Health Policy M201.) Lecture, three hours. Emphasis on methods that help to understand how systems operate and how to intervene on them. Exploration of how to characterize human-centered problems that arise, and how to handle complexity as core design and development challenge. Examination of different traditions of studying and modeling (representing) systems, both conceptually and quantitatively, to address questions that arise in public health. Consideration of utility and limitations of these methods for providing insight to stakeholders who are addressing population health problem. S/U or letter grading.

**M204. Logic, Causation, and Probability. (4)** (Same as Statistics M243.) Lecture, four hours. Preparation: two terms of statistics or probability and statistics. Recommended prerequisite: course 200C. Principles of deductive logic and causal logic using counterfactuals. Principles of probability logic and probabilistic induction. Causal probability logic using directed acyclic graphs. S/U or letter grading.

**205. Methods for Analyzing Non-Randomized and Quasi-Experimental Studies. (4)** Lecture, three hours. Requisites: course 200C or 401, or Biostatistics 200A or 200B or 406, and course M403 or 407A or Biostatistics 203A. Provides students with necessary tools to evaluate effectiveness or impact of public health interventions. Study designs include non-randomized, quasi-experiments, and natural experiments. Covers both theoretical concepts as well as practical tools that encompass methods borrowed from related fields including social epidemiology, health policy, econometrics, and evaluation research. These methods include instrumental variable, difference-in-difference, synthetic control, regression discontinuity, and propensity score matching. S/U or letter grading.

**206. Systems Science Modeling and Simulation in Epidemiology. (4)** Lecture, three hours. Requisites: course 200C or 401, or Biostatistics 200A or 200B or 406, and course M403 or 407A or Biostatistics 203A. Theoretical and practical introduction to modeling and simulation methods for conducting comparative, cost-effectiveness, and forecasting research. These methods include population-level (e.g., Markov state-transition models and system dynamics) and individual-level (e.g., microsimulation and agent-based modeling) simulations. These methods are employed in field sometimes referred to as systems epidemiology or computational epidemiology. Multidisciplinary fields that use tools and techniques from computer sciences, econometrics, operations research, engineering, and epidemiology to better understand disease mechanisms or evaluate intervention effectiveness. S/U or letter grading.

**207. Reproducibility in Epidemiologic Research. (4)** Lecture, three hours. Requisites: courses 200A, 401 (or Biostatistics 100B or 200A and 200B), M403. Introduction to concept of reproducibility in epidemiologic research. Students are exposed to tools for adopting practices to enhance reproducibility in their own research. Letter grading.

**M211. Statistical Methods for Epidemiology. (4)** (Same as Statistics M250.) Lecture, four hours. Preparation: two terms of statistics (such as Biostatistics 100A, 100B). Requisites: courses 200B, 200C. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in courses 200B and 200C and introduction of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

**212. Statistical Modeling in Epidemiology. (4)** Lecture, four hours. Preparation: two terms of statistics (three terms recommended). Recommended: course M204 or M211. Principles of modeling, including meanings of models, a priori model specification, translation of models into explicit population assumptions, model selection, model diagnostics, hierarchical (multilevel) modeling. S/U or letter grading.

**215. Systematic Review and Meta-Analysis. (2)** Lecture, two hours. Requisites: course 100 or 200A, and Biostatistics 100A, or Public Health 200A and 200B. Offers theoretical and practical understanding of systematic reviews and meta-analysis of clinical trials and observational studies. Students learn how to conduct systematic literature search, assess quality of selected studies, identify sources of heterogeneity, conduct meta-analysis, and understand standards of reporting on meta-analyses. Offers practical training in meta-analyses and meta-regression using STATA software. Letter grading.

**M216. Applied Sampling. (4)** (Same as Statistics CM248.) Lecture, three hours; discussion, one hour. Designed for upper-division and graduate students in social or life sciences and those who plan to major in Statistics. Topics include methods of sampling from finite populations, sources of sampling and estimation bias, and methods of generating efficient and precise estimates of population characteristics. Practical applications of sampling methods via lectures and hands-on laboratory exercises. S/U or letter grading.

**217. Social Networks and Public Health. (4)** Lecture, four hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Principles of social network research, social network analysis, and social network intervention, especially in relation to public health and health behavior. Coding examples are provided in R (mainly R igraph and ggplot2 packages). Discussion of landmark social network papers relevant to public health. S/U or letter grading.

**M218. Questionnaire Design and Administration. (4)** (Same as Community Health Sciences M218.) Lecture, four hours. Requisites: courses 200B and 200C, or Community Health Sciences 211A and 211B. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires. Letter grading.

**219. Strategies for Increasing Sensitivity and Validity of Epidemiologic Studies. (2)** Lecture, two hours. Requisite: course 100 or Public Health 200A. Discussion of strategies for increasing sensitivity and validity of epidemiologic studies. Covers issues that led to methodologic articles authored by instructor; nature of articles themselves; subsequent studies that have used suggested approaches; and any modification of methods that have been proposed. Students are expected to have basic training on epidemiological study designs and methods. S/U or letter grading.

**220. Principles of Infectious Disease Epidemiology. (4)** Lecture, three hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Ascertainment of infection, transmission, and epidemiological parameters rather than clinical and pathological aspects. Specific diseases discussed in depth to illustrate epidemiologic principles. S/U or letter grading.

**221. Emerging Infectious Diseases. (4)** Lecture, three hours. Requisite: course 220 or consent of instructor. Emerging infectious diseases (EIDs) are infections that have recently appeared within population or those whose incidence or geographic range is rapidly increasing or threatens to increase in future. Overview of important emerging and re-emerging infectious diseases globally. Addresses factors associated with disease emergence/re-emergence, research methods, preparedness, disease surveillance, outbreak investigation, and response to EIDs with global perspective. Letter grading.

**M226. Global Health Measures for Biological Emergencies. (4)** (Same as Ecology and Evolutionary Biology M226.) Lecture, four hours. Requisite: course 220. Mitigation of bioterrorism falls outside traditional public health programs and public health graduate education. Because of seriousness of such threats, it is important that individuals trained in public health understand problems and responses. Letter grading.

**227. AIDS: Major Public Health Challenge. (4)** Lecture, four hours. Requisites: courses 100 or 200A, and Biostatistics 100A, or Public Health 200A and 200B. Presentation of epidemiologic, biologic, psychological, and clinical characteristics of AIDS and HIV-1 infection. Discussion of policy implications and intervention strategies. S/U or letter grading.

**228. Biology of HIV. (4)** Lecture, three hours. Preparation: two biology courses. Requisites: course 100 and Biostatistics 100A, or Public Health 200A and 200B. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in laboratory. Letter grading.

**230. Epidemiology of Sexually Transmitted Diseases. (4)** Lecture, four hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Sexually transmitted diseases; medical/biological aspects, epidemiology and control in developed and developing countries. S/U or letter grading.

**231. Principles of Control of Infectious Diseases. (4)** Lecture, three hours. Comprehensive study of tools for control of infectious diseases and application of these tools in public health programs to achieve epidemiologic impact on disease reduction, elimination, or eradication. S/U or letter grading.

**232. Methods in Research of Marginalized and Hidden Populations. (2)** Lecture, two hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Introduction to range of different methodologies used to collect data and conduct analysis on reproductive epidemiology topics, including methods that produce quantitative data and methods that produce qualitative data, with emphasis on use of methods appropriate for challenging and sensitive research topics such as sexual behavior, abortion use, and sexual abuse. Letter grading.

**240. Cardiovascular Epidemiology. (2)** Lecture, two hours. Topics include definition, pathogenesis, descriptive epidemiology, magnitude of risk factors, strategies for prevention, lipoprotein metabolism, and epidemiology of diabetes, hypertension, and chronic lung disease. Letter grading.

**241. Epidemiology of Obesity and Diabetes. (4)** Lecture, three hours. Requisite: course 100 or 200A or Public Health 200A. Overview of epidemiology of obesity and diabetes. Students are exposed to most important research in this area. Focus includes global and regional epidemic of obesity and diabetes, risk factors and complications, classifications and assessments, prevention and management, as well as methodological issues related to study design and measurements for conducting obesity and diabetes research in large populations. Encourages students' creative thinking and improves their skills for scientific writing and oral communications through individual and team assignments. S/U or letter grading.

**242. Cancer Epidemiology. (4)** Lecture, four hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Introduction to basic concepts of cancer and molecular and genetic epidemiology. Review of current epidemiologic research in cancer in recent

medical and epidemiological literature. Research proposal on cancer-related topic required. S/U or letter grading.

**243. Molecular Epidemiology of Cancer. (4)** Lecture, four hours. Requisite: course 242 or 295. Introduction to basic concepts and methodology of molecular epidemiology of cancer and review of current molecular epidemiologic research of cancer in recent medical and epidemiological literature. S/U or letter grading.

**244. Research Methods in Cancer Epidemiology. (2)** Lecture, two hours. Requisites: course 100 or 200A, and Biostatistics 100A, or Public Health 200A and 200B. Biologic, quantitative, philosophical, and administrative considerations in epidemiologic cancer research. Hypothesis specification and choice of study design. Uses of descriptive epidemiology, cohort studies, case control studies. Clustering, screening, and cancer control. Means of identifying subjects and controls. Design of instruments. Sources of bias and confounding. S/U or letter grading.

**245. Lifestyle Intervention for Noncommunicable Chronic Diseases. (2)** Lecture, two hours. Requisites: course 100, Public Health 200A, 200B. Designed to teach students how to apply principles of trial design and data analysis to lifestyle interventions for purposes of preventing onset and progression of diseases. Focus on noncommunicable chronic diseases (i.e., obesity, diabetes, hypertension, coronary heart disease, or cancer), but concepts and methods can be applied to acute and infectious diseases as well. S/U or letter grading.

**246. Epidemiology of Aging. (2)** Lecture, two hours. Epidemiologic methods of estimating present and future burdens of aging: morbidity, disability, and dependency. Epidemiology of major disabling conditions affecting elderly. Evaluation of possible intervention strategies. Methodologic issues in geriatric epidemiology. S/U or letter grading.

**247. Lifecourse Epidemiology. (4)** Lecture, three hours. Requisites: course 100 or 200A, and Biostatistics 100A, or Public Health 200A and 200B; and Biostatistics 100B, or equivalent, or consent of instructor. Introduction to concepts and methods for studying life-course determinants of health and disease. Consideration of how exposures at one stage of human lifespan influence health outcomes at multiple life stages. Analytical approaches to research on life-course determinants of health. S/U or letter grading.

**249. Genetic Epidemiology I. (4)** Lecture, two hours. Preparation: at least one course in epidemiology, biostatistics, and genetics. Basic concepts in emerging field of genetic epidemiology, with principal focus on genetic study of complex diseases, determining genetic contributions to disease, identifying genes, and characterizing their main effects and interactions with environmental factors. S/U or letter grading.

**M254. Nutritional Epidemiology I. (4)** (Same as Community Health Sciences M251.) Lecture, two hours; discussion/laboratory exercise, one hour. Preparation: introductory biostatistics and epidemiology courses. Review of all aspects of contemporary nutrition sciences that require application of epidemiologic principles and methods, ranging from food-borne outbreak investigation to evidence-based regulatory assessment of health claims for foods. Experience in actual world of collecting, analyzing, and interpreting data related to nutrition and health or disease outcomes. S/U or letter grading.

**260. Environmental Epidemiology. (2 or 4)** Lecture, three hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Epidemiologic methods applied to evaluation of human health consequences of environmental hazards. Topics include air pollution, pesticides, drinking water contaminants, use of GIS. Review of recently completed environmental studies published in peer-reviewed literature. S/U or letter grading.

**M261. Occupational Epidemiology. (4)** (Same as Environmental Health Sciences M260.) Lecture, three hours. Requisites for majors: courses 200A, 200B, 200C; for nonmajors: course 100. Methodological considerations, approaches, and limitations in epidemiological studies of occupational groups and environments. S/U or letter grading.

**265. Epidemiologic Methods in Occupational and Environmental Health. (4)** Lecture, three hours. Introduction to epidemiologic methods applied to evaluation of human health consequences of occupational and environmental hazards, including study design, exposure assessment, and statistical techniques commonly encountered in research focused on assessing adverse health effects resulting from occupational and environmental exposures. Topics include clusters, meta-analysis, risk assessment, and policy development. Illustrated by case studies, with focus on techniques to critically evaluate and interpret current literature. Letter grading.

**266. Global Health and Tropical Medicine. (4)** Lecture, four hours. Introduction to tropical diseases and global health. How humanitarian health issues, maternal-child health, research in tropics, World Health Organizations, and political/medical constraints all are related with respect to health on worldwide scale. Letter grading.

**267. Methodologic Issues in Reproductive Epidemiology. (2)** Seminar, two hours. General discussion of methodologic issues important to epidemiologic studies of reproductive outcomes, including fertility, low birth weight, prematurity, birth defects, pregnancy loss, and perinatal mortality. Approaches to study design and exposure assessment and identification of potential sources of bias illustrated through review of recent studies published in literature and with particular focus on occupational and environmental exposures and birth cohorts. S/U or letter grading.

**268. Introduction to Pharmacoepidemiology. (2)** Lecture, two hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Pharmacoepidemiology is application of epidemiologic knowledge, reasoning, and methods to study of effects and uses of drugs. Survey of contemporary roles of pharmacoepidemiology in drug development and public health, with historical background of its evolution and projections of future prospects. S/U or letter grading.

**269. Substance Use Epidemiology. (4)** Lecture, three hours. Requisites: course 200A, and Biostatistics 100A or 100B or equivalent. Introduction to epidemiology of substance use and substance use disorders within public health paradigm. Review of drug policy in U.S., description of occurrence of substance use and related problems, examination of intersection of substance use and mental health disorders, and examination of role of epidemiology in informing and evaluating interventions targeting substance use disorders, including health services and pharmacologic and non-pharmacologic treatments. S/U or letter grading.

**270. Behavioral Epidemiology. (4)** Lecture, four hours. Requisite: course 100, or 200A, or Public Health 200A and 200B. Introduction to range of different methodologies used to collect data and conduct analyses on behaviors studied in epidemiology research. How to collect, analyze, and interpret data on behaviors that can be associated with disease outcomes, including methods to collect survey data (i.e., design of questionnaires, interviewing techniques, use of technology to collect data) and methods to collect and analyze qualitative data (e.g., ethnographic interviews, focus groups, systematic observations). Overview information on epidemiology of key behavioral factors affecting human health, including sexual risk behaviors, substance use, physical activity, and healthcare utilization. S/U or letter grading.

**271. Psychiatric Epidemiology. (4)** Lecture, three hours. Requisites: Biostatistics 100B, Public Health 200A, 200B. Psychiatry epidemiology examines occurrence and distribution of mental health disorders and probable causes and factors that influence their manifestation, trajectory, and outcome. Provides students with knowledge and skills necessary to conceptualize mental health related research questions, properly assess mental health symptoms and diagnostic classifications in their research (e.g., prevalence, incidence, and outcome), and analyze data to advance field of psychiatric epidemiology and better understand how to establish mental health and substance use treatment guidelines. With respect to measurement, emphasis is given to issues of reliability and validity in studying such disorders—while considering factors

such as gender, sexuality, race/ethnicity, age, poverty, education, culture, social support, social capital, etc. S/U or letter grading.

**M272. Social Epidemiology. (4)** (Same as Community Health Sciences M272.) Lecture, two hours; discussion, one hour. Requisite: course 100 or Public Health 200A and 200B. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on lifestyles and other socioenvironmental factors associated with general susceptibility to disease and subsequent mortality. Letter grading.

**M273. Responsible Conduct of Research in Global Health. (2)** (Same as Public Health M273.) Lecture, two hours. Requisite: Community Health Sciences 200. Introduction to fundamental principles of public health ethics, current ethical procedures, guidelines, and requirements, and ethical issues facing public health professionals working in developing countries. History of public health issues, unique ethical issues of research in developing countries, analysis of ethical implications of informed consent, responsibility to study community, mechanisms of study approval, role of funders, and role and responsibilities of review boards. S/U or letter grading.

**274. Advanced Epidemiologic Methods for Global Health. (2)** Lecture, two hours. Requisites: courses 200A, 200B, and Biostatistics 100B, or Public Health 200A and 200B. Study provides global health researchers and epidemiologists with methods that enable access to and utilization of existing data; new methods for collection of new data; and advanced methods for statistical analyses focusing on existing sources of data, surveys, data sharing, and advanced statistical and epidemiologic methods in global health. S/U or letter grading.

**C275. Terrorism, Counterterrorism, and Weapons of Mass Destruction: Practical Approach. (5)** Seminar, three hours. Terrorism, its origins, and ways of addressing terrorism at local, national, and global levels. Guest speakers from variety of UCLA departments and from Los Angeles. Concurrently scheduled with course CM175. S/U or letter grading.

**291. Seminar: Special Topics in Epidemiology. (2)** Seminar, two hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Review of current epidemiologic research contained in recent medical literature. May be repeated for credit. S/U or letter grading.

**292. Advanced Seminar: Epidemiology. (2)** Seminar, two hours. Requisites: courses 200A, 200B, 200C. Current research in epidemiology. May be repeated for credit. S/U grading.

**293. International HIV/AIDS Seminar. (2)** Seminar, two hours. Ongoing discussion of worldwide pandemic of HIV/AIDS, with emphasis on problems of surveillance, reporting, and intervention. Discussion of recent literature. Presentations by fellows from other countries. S/U grading.

**294. Epidemiology and Policy of Occupational and Environmental Health Issues. (2)** Seminar, two hours. Requisites: courses 200A, 200B, and 200C (or 100) and/or 260. Introduction to demands that go beyond pure science, with focus on issues such as risk communication, potential influence (and ethics) of oversight panels and external review groups on presenting results and conclusions, and interest of government agencies. S/U or letter grading.

**295. Seminar: Epidemiology—Cancer. (2)** Seminar, two hours. Requisite: course 100 or 200A, or Public Health 200A and 200B. Introduction of basic concepts of cancer epidemiology and review of current epidemiological research in cancer in recent medical and epidemiological literature. May be repeated for credit. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**400. Field Studies in Epidemiology. (4)** Fieldwork, to be arranged. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward MS minimum course requirement; 4 units may be applied toward 44-unit minimum total required for MPH degree. Letter grading.

**401. Applied Epidemiologic Analysis. (4)** Lecture, three hours. Requisites: course M403, Biostatistics 100B, Public Health 200A, 200B. Combines lectures, discussions, and laboratory assignments to offer conceptual understanding of analytic methods in epidemiology. Students develop basic proficiency in methods by conducting statistical analysis using epidemiologic data, with expectation that students pursue courses 200A and 200B in second year and develop expertise in methods they will use for their own research. S/U or letter grading.

**M403. Computer Management and Analysis of Health Data Using SAS. (4)** (Same as Biostatistics M403B.) Lecture, two hours; laboratory, two hours. Introduction to practical issues in management and analysis of health data using SAS programming language. Cross-sectional and longitudinal population-based data sets to be used throughout to illustrate principles of data management and analysis for addressing biomedical and health-related hypotheses. Letter grading.

**404. Advanced SAS Techniques for Management and Analysis of Epidemiologic Data. (2)** Lecture, three hours. Requisite: course M403 or 410. Hands-on experience with SAS 9.2/9.3, with focus on using SAS data and PROC steps efficiently to manage, clean, analyze, and tabulate epidemiologic data from data collection systems. Common issues and solutions in data management, including lack of documentation, data definitions, unique subject identifiers, and nonstandard data formats. S/U or letter grading.

**407. Epidemiologic Research Using R. (4)** (Formerly numbered 407A.) Lecture, three hours. Requisite: course 100 or 200A, or Public Health 200A and 200B, or consent of instructor. Designed to broadly offer R coding experience, with emphasis on data management, visualization, and analysis. Topics include data manipulation, causal inference, generation of publication-suitable figures and tables, and construction of functions. S/U or letter grading.

**407B. Applied Epidemiologic Research Using R. (2)** Lecture, two hours. Requisite: course 407A. Designed to broadly offer R coding experience, with emphasis on data management, data description using tables and figures, and data analysis. Introduction of various concepts with data to facility interactive learning each week through guided R programming tutorials. Weekly R data analysis, in which students present their research and data analysis progress using real data. Each student performs secondary data analysis and prepares abstract, brief introduction, methods, and results part of submittable brief communication paper. S/U or letter grading.

**410. Introduction to Python for Epidemiologists. (2)** Lecture, two hours. Requisites: Biostatistics 100A, Public Health 200A. Introduction to use of Python programming language for epidemiologic analyses of big data. Topics covered include supervised and unsupervised learning methods, feature engineering, and model evaluation approaches using both quantitative and text-based health data. S/U or letter grading.

**412. Public Health Surveillance. (2)** Lecture, two hours. Requisites: course 100 or 200A, and Biostatistics 100A, or Public Health 200A and 200B. Overview of public health surveillance methodology, including (1) design, implementation, and evaluation of surveillance systems, (2) analysis and interpretation of surveillance data, and (3) application of surveillance methods to specific health-related outcomes. S/U or letter grading.

**413. Methods of Scientific Communication. (2)** Lecture, two hours. Requisite: course 100 or 200A. Principles of scientific writing and communication. Approaches to developing effective written, oral, and visual presentations of epidemiologic research findings.

Communication issues arising in conduct of research, including informed consent process. S/U or letter grading.

**420. Field Trials of Health Interventions in Low-Resource Settings. (4)** Lecture, four hours. Prerequisite: course 100 or 200A, or Public Health 200A and 200B. Introduction to practical concepts and issues in conducting epidemiologic field research in developing countries, including formulating research questions, study site selection, ethical considerations, and logistics of data and specimen collection. S/U or letter grading.

**495. Teacher Preparation in Epidemiology. (2)** Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward MPH and MS minimum total course requirement. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research. (2 to 8)** Tutorial, to be arranged. Only 4 units may be applied toward MPH and MS minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research. (2 to 12)** Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## ETHNOMUSICOLOGY

*Herb Alpert School of Music*

2520 Schoenberg Music Building  
Box 951657  
Los Angeles, CA 90095-1657

**Ethnomusicology**

310-825-8381

Roger W.H. Savage, DPhil, *Chair*

## Faculty Roster

### Professors

Cheryl L. Keyes, PhD  
Mark L. Kligman, PhD (*Mickey Katz Endowed Professor of Jewish Music*)  
Steven J. Loza, PhD  
Anna F. Morcom, PhD (*Mohindar Brar Sambhi Endowed Professor of Indian Music*)  
Helen M. Rees, PhD  
Roger W.H. Savage, DPhil  
Timothy D. Taylor, PhD

### Professors Emeriti

Tara C. Browner, PhD  
Jacqueline Cogdell DjeDje, PhD  
Charlotte A. Heth, PhD

William R. Hutchinson, PhD  
Daniel M. Neuman, PhD (*Mohindar Brar Sambhi Endowed Professor Emeritus of Indian Music*)

James W. Newton, Jr.  
James W. Porter, MA  
Timothy Rice, PhD  
Hiromi Lorraine Sakata, PhD  
Anthony Seeger, PhD

### Associate Professors

Münir N. Beken, PhD  
Katherine In-Young Lee, PhD

### Lecturers

Francis Kofi Akotuah  
Marc T. Bolin, PhD  
David M. Bragger  
Jésus A. Guzmán  
Pejman Hadadi, BA  
Gamin Kang, DMA  
Behzad Nadimi  
Soheil Nadimi, BA  
Rahul D. Neuman  
Robert F. Reigle, PhD  
Diane L. White-Clayton, PhD

### Adjunct Professors

Amy R. Catlin-Jairazbhoy, PhD  
Abhiman Kaushal  
Chi Li, BA  
Maureen A. Russell, MLS, MA, CPhil

### Adjunct Associate Professor

I Nyoman Wenten, PhD

### Adjunct Assistant Professor

Supeena Insee Adler, PhD

## Overview

Ethnomusicology involves the study of all kinds of music from all over the world, using a variety of disciplinary perspectives. The Department of Ethnomusicology, the largest and first of its kind in a U.S. university, offers courses that cover the music of virtually every region of the world and of many ethnic groups in the U.S., as well as courses on popular music and film music. Most courses combine an interest in music as an art form with questions about how musical art and practice relate to other aspects of culture, society, politics, and economics. Courses are also given on the philosophy and aesthetics of music. In addition to lecture courses, the department offers performance ensemble courses in several world and American music traditions. At the undergraduate level, most of the performance courses are open to nonmajors, and many academic courses target nonmajors; prior knowledge of music is not expected or required. The Ethnomusicology Department is aligned with the departments of Music and Musicology and aspires to promote productive collaboration between performance and scholarship, a cross-cultural global understanding of the art of music, and preparatory training for a broad range of careers in music after students graduate.

## Undergraduate Major

### Ethnomusicology BA

The undergraduate major in Ethnomusicology emphasizes general world music, performance/composition, public ethnomusicology, and scholarly research. Admission requires an audition/interview. The major provides students with a wide-ranging liberal arts education in music. At its core, this includes (1) comprehensive knowledge of music cultures of the world; (2) understanding of the interrelationship of music, society, and culture; (3) grounding in the basics of Western music theory and musicianship; and (4) the experience of playing in one or several musical ensembles from various traditions around the world.

Beyond the core and emphasis requirements, students in the world music concentration may, through elective courses, prepare for a variety of career goals, including the study of ethnomusicology in graduate school, composing and performing music, working in the music industry, serving society in the nonprofit sector, or becoming a K through 12 music teacher.

### Capstone Major

The Ethnomusicology major is a designated capstone major. The capstone project is individualized to each student and requires a creative process either through music performance/composition, a research project, or an internship with a self-reflective journal detailing the process. Through that process, students are expected to demonstrate a broad knowledge base and competency in performance, writing, and/or composition and ability to apply knowledge and experience to the specific requirements of the capstone; conceive and successfully complete a project that is expressive of their specific interests and acquired expertise; and display, through written documentation or live presentation, the requisite communication and, in some cases, teamwork required by work in this field.

### Learning Outcomes

The Ethnomusicology major has the following learning outcomes:

- Demonstrated broad knowledge and competency in performance, writing, and/or composition
- Demonstrated ability to apply knowledge and experience to capstone requirements
- Conception and successful completion of a project that is individually expressive of the student's specific interests and acquired expertise
- Written document or live presentation that displays requisite communication and teamwork required by work in the field

### Entry to the Major

#### Admission

Applicants are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, test scores, a personal statement of purpose, and an on-campus

interview/audition. Applicants who are unable to travel to UCLA have the option of a Skype interview/audition.

## Requirements

### Preparation for the Major

*Required:* Ethnomusicology M6A, M6B, M6C, with grades of C– or better; 20A, 20B, 20C, with grades of C or better; Music 20A, 20B, 20C, with grades of C or better; and 12 units of ethnomusicology world music performance organizations (courses 91A through 91Z), private instruction in music (course 92), and/or world music specializations (courses 68A through 68Z).

### The Major

*Required:* Ethnomusicology 175 or 181, 183; 12 units from courses 161A through 161Z, 162, and/or 168A through 168Z; a minimum of eight upper-division ethnomusicology courses (32 to 36 units); and a capstone project in either (1) performance/composition, (2) public ethnomusicology, (3) scholarly research, or (4) other potential emphasis concepts in consultation with a faculty adviser.

*Performance/Composition Capstone:* Students must fulfill the capstone final project requirement (4 units) through a public recital (performance). Students must enroll in Ethnomusicology 199 (2 units) and pass a recital permission jury. Instrumental and vocal performers must present a portion of their recital performance, and composers must present excerpts from their recital scores in front of two faculty members. Students also enroll in Ethnomusicology 186 (2 units) during the term in which they perform their recital or their composition(s) are performed.

*Public Ethnomusicology Capstone:* Students must fulfill the capstone internship requirement, which consists of 8 units of Ethnomusicology 195B, in an institution approved by the faculty sponsor. Students must write a final research paper (at least 10 pages) at the completion of each internship.

*Scholarly Research Capstone:* Students must write a capstone thesis (25 to 30 pages) and enroll in Ethnomusicology 199 (2 units minimum) for at least one term while writing the thesis.

*Independent Capstone:* In consultation with a faculty adviser, students can propose capstone projects in other potential emphasis concepts such as technologies, film scoring, interactive arts, dance, and more. Students must enroll in Ethnomusicology 199 (2 units minimum).

## Policies

### Preparation for the Major

All entering first years are required to take the Music Theory Assessment Examination either during New Student Sessions or during zero week of fall quarter. The examination score is used to determine eligibility and placement in first-year music core courses (Ethnomusicology M6A, M6B, M6C, and Music 20A, 20B, 20C). Examination results may require enrollment in Music 3 as a requisite to both Ethnomusicology M6A and Music 20A. Entering transfer students with fewer than 15 units of

prior music theory must take the Music Theory Assessment Examination.

## Undergraduate Minors

### Ethnomusicology Minor

The Ethnomusicology minor is designed for students who wish to augment their major program with a group of related courses that provide a systematic introduction to the study of world music and performance.

### Admission

To enter the minor, students must have an overall grade-point average of 2.0 or better and be in good academic standing, have completed one lower-division course with a grade of C or better, and have successfully completed at least two (2) quarters of the same lower-division ensemble course (Ethnomusicology 91A through 91Z).

*Optional Focus in Iranian Music:* Students must select 91L as the lower-division ensemble course.

### The Minor

*Required Lower-Division Courses (9-10 units):* Ethnomusicology 5 or M25, and one course from 7, 15, 30, M35, 40, 45, M50A, M50B, 60, M73, M110A, or M110B.

*Required Upper-Division Courses (22 units):* Ethnomusicology 101; three courses (6 units) from the same performance ensemble course numbered from 161A to 161Z; and three upper-division elective courses from the department. No more than one course from 195A to 199 may be applied to the minor.

*Optional Focus in Iranian Music:* Ethnomusicology C141, 142, 143, and three courses (6 units) of 161L.

### Policies

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

### Iranian Music Minor

The Iranian Music minor is designed for students who wish to augment their major program with a group of related courses that provide a systematic introduction to the study of Iranian music, performance, and culture.

### Admission

To enter the minor, students must be in good academic standing (grade-point average of 2.0 or better), and have completed Ethnomusicology 5 or M25, 8, 91L, with grades of C or better.

## The Minor

*Required Lower-Division Courses (11 units):* Ethnomusicology 5 or M25, 8, 91L.

*Required Upper-Division Courses (20 units):* Ethnomusicology 101, 144 (must be taken twice), 145 or 163, 161L (must be taken twice).

## Policies

A minimum of 31 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Major

### Ethnomusicology MA, CPhil, PhD

The department offers MA and PhD degrees in Ethnomusicology, with a specialization in systematic musicology or music and anthropology. Both degree programs train students for future university teaching careers, as well as careers in library science and archiving, the music industry, public service, and music technology. The department provides fellowships, teaching assistantships, and research assistantships for qualified students.

### Requirements

Official, specific degree requirements are detailed in [program requirements for UCLA graduate degrees](#), available at the Graduate Education website. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Ethnomusicology

### Lower-Division Courses

**5. Music Around World. (5)** Lecture, four hours; discussion, one hour; outside study, 10 hours. Overview of world's musical traditions by selecting one or two case studies from each of nine musical world regions: Pacific, East Asia, Southeast Asia, South Asia, Middle East, Africa, Europe, Latin America, and U.S. and Canada. P/NP or letter grading.

**M6A-M6B-M6C. Introduction to Musicianship. (2-2-2)** (Same as Music M6A-M6B-M6C and Musicology M6A-M6B-M6C.) Laboratory, four hours. Preparation: placement examination. Course M6A is enforced requisite to M6B, which is enforced requisite to M6C. Students must receive grade of C– or better to proceed to next course in sequence. Introduction to musicianship through in-depth exploration of basic common musical elements and training in aural recognition, sight singing, dictation, and keyboard skills. Focus on topics such as tonal and modal harmony, rhythm, improvisation, composition, notation, and ear training to prepare students for later theory courses, participation in music ensembles, advanced study in music, and professional careers. Letter grading.

**7. Introduction to Music and Culture of Iran. (4)** Lecture, four hours. Examination of Persian music in historical, social, linguistic, and cultural contexts. Discus-

sion of musical forms, rules of improvisation, structure of modal system and rhythmic cycles, religious music, and traditional and modern pop music. Consideration of interrelationships between musical genres and other art forms (dance, theater, visual arts, and literature) and analysis of how these types of music have intersected with issues of race, class, gender, religion, ritual, politics, social movements, and cultural identity. Includes detailed introduction to musical terms and concepts throughout. Letter grading.

**8. Current Practices in Iranian Music-Making. (4)** Seminar, three hours. Introduction to contemporary practices of Iranian music-making, with particular focus on social, cultural, religious, and political issues since 1979 Iranian Revolution. Consideration of interrelationships between musical genres. Analysis of how these types of music have intersected with issues of language, race, class, gender, ritual, politics, social movements, and cultural identity. Survey of evolution of Iranian musical practices during four decades of Iranian Revolution. P/NP or letter grading.

**10A. Music Theory and Musicianship I. (5)** Lecture, four hours; discussion, one hour. Preparation: placement examination. Course 10A is enforced requisite to course 10B. Students must receive grade of C or better to proceed to next course in sequence. Basic technical terms of Western music and various non-Western musical cultures around the world; reading and writing Western music notation and some non-Western notational traditions; rhythm and intervals as they manifest themselves in distinct traditions; musical symbols, such as dynamics and articulation marks; vocabulary of ornamentations in Western and non-Western traditions; pitch organization systems of the world. Letter grading.

**10B. Music Theory and Musicianship II. (5)** Lecture, four hours; discussion, one hour. Enforced requisite: course 10A with grade of C or better. Introductory level harmony as practiced in Western classical music; Western music polyphony as a compositional technique and style; introduction to musical textures in Western and non-Western musical traditions; harmonic and formal analysis in Western and non-Western musical traditions; knowledge of various compositional techniques. Letter grading.

**15. American Life in Music. (4)** Lecture, three hours. Impact of ethnicity, race, gender, and other social processes on American music in late 20th century; use of and creativity in music to respond to and shape contemporary social processes. P/NP or letter grading.

**19. Fiat Lux Freshman Seminars. (1)** Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**20A-20B-20C. Musical Cultures of World. (5-5-5)** Lecture, four hours; discussion, one hour; outside study, 10 hours. Enforced requisite: Music 20C with grade of C or better. Traditional and popular musics from many different countries, with introduction to basic ethnomusicological concepts and development of listening and analytical skills. Each course may be taken independently for credit. Letter grading. **20A.** Europe and Americas; **20B.** Africa and Near East; **20C.** Asia.

**21. Global Popular Musics I: Emergence of Recording Industries and Major Styles. (4)** Lecture, four hours. Exploration of what pop music is, how it became global, and what globalization and glocalization are. Pop music here is defined not just as music which has a wide audience base (which is popular), but music whose existence is result of technologies of recording, mass production, and mass distribution. Examination of rise of music industries and mass-produced music in countries across world in early 20th century, exploring issues of technology, capitalism, industry, trade, and migrations associated with colonialism. Study of how pop music from U.S. and numerous countries across world was global, transregional, and globalized before era of globalization in 1990s, as recording gave music new potential to travel. P/NP or letter grading.

**22. Global Popular Musics II: From Cassettes to Digital and Online Media. (4)** Lecture, four hours. Exploration of multiplicitous world of global pop beyond major pop genres and their industries established in early to mid-20th century. Examination of dramatic decentralization of media that took place with advent of cassette technology and explosion of new forms of popular music that are listened to on recordings as much as in live settings. Examination also of how major pop genres are appropriated and localized in contexts both intended and unintended by their producers at new intensities of speed and scale and further and further distance from urban, industrial, and political centers of power. Exploration of how this loosening of central control releases quagmires of exploitation, piracy, and creativity in world of popular and recorded music, and, later, with rise of Internet and social media. P/NP or letter grading.

**M25. Global Pop. (5)** (Same as Global Jazz Studies M25.) Lecture, four hours; discussion, one hour. Development of world music or world beat, including its meaning and importance to contemporary culture as well as its history and impact. P/NP or letter grading.

**30. Music and Media. (5)** Lecture, four hours; discussion, one hour. Exploration of ways music is mediated to people by industry, technologies, and corporations. Survey of leading theorists of media and exploration of case studies. P/NP or letter grading.

**M35. Blues, Society, and American Culture. (5)** (Same as Global Jazz Studies M35.) Lecture, four hours; discussion, one hour. Sociocultural history and survey of blues music tradition from its roots in West Africa to its emergence in African American oral culture, with emphasis on philosophical underpinnings and social and political impact of blues and its influence on development of country, jazz, gospel, rhythm and blues, rock, hip-hop music, and other mediums. P/NP or letter grading.

**40. Music and Religion. (5)** Lecture, four hours; discussion, one hour. Survey of nature, role, and power of music in religious rituals around world, covering music and ritual of Hinduism, Buddhism, Judaism, Christianity, and Islam, as well as religious traditions of Native Americans and syncretic religious practices in Americas such as African American gospel music, Brazilian Candomble, Cuban Santería, and Haitian vodoun. Letter grading.

**45. Music of Bollywood and Beyond. (5)** Lecture, four hours; discussion, one hour; outside study, 10 hours. History and development of South Asian film scores in their filmic context, especially omnipresent songs that most distinctively characterize this genre. P/NP or letter grading.

**46. India through Music. (5)** Lecture, five hours; discussion, one hour; outside study, nine hours. Exploration of major aspects of society, history, and culture in India through music. There is abundance of incredibly rich musical culture in this region. Introduction to as much diversity as possible, spanning villages to cities and global contexts; high- and low-brow musics; those spanning problematic categories of folk, classical, and popular; and those from powerful as well as oppressed and marginalized peoples. Music as lens to look more deeply into social and cultural world and to explore layers of history ranging from Persianate empires, British Empire, nationhood, and contemporary globalization. Highlights lines of power in particular, notably, those of caste, class, gender, colonialism, and nationalism. Minoritized and disenfranchised people and their music are as prominent as dominant styles and provide contextualization and critique. Letter grading.

**46W. India through Music. (5)** Lecture, five hours; discussion, one hour; outside study, nine hours. Requisite: English Composition 3. Not open for credit to students with credit for course 46. Exploration of major aspects of society, history, and culture in India through music. There is abundance of incredibly rich musical culture in this region. Introduction to as much diversity as possible, spanning villages to cities and global contexts; high- and low-brow musics; those spanning problematic categories of folk, classical, and popular; and those from powerful as well as oppressed and marginalized peoples. Music as lens to look more deeply into social and cultural world and to explore

layers of history ranging from Persianate empires, British Empire, nationhood, and contemporary globalization. Highlights lines of power in particular, notably, those of caste, class, gender, colonialism, and nationalism. Minoritized and disenfranchised people and their music are as prominent as dominant styles and provide contextualization and critique. Satisfies Writing II requirement. Letter grading.

**M50A-M50B. Jazz in American Culture. (5-5)** (Same as Global Jazz Studies M50A-M50B.) Lecture, four hours; discussion, one hour. Course M50A is not requisite to M50B. Survey of development of jazz in American culture. Discussion of different compositional/performance techniques and approaches that distinguish different sub-styles of jazz from one another, as well as key historical figures that shaped development of jazz from its early years through modern jazz. Important historical social issues (segregation, Depression, World War II, Civil Rights Movement) that intersect with history of U.S. and jazz music. P/NP or letter grading. **M50A.** Late 19th Century through 1940s; **M50B.** 1940s to Present.

**60. J.S. Bach in His World and Ours. (5)** Lecture, four hours; discussion, one hour. Examination of life and music of J.S. Bach in historical and cultural context of his era through its musical manifestations in present, including changes in performance styles, scholarly studies, reception, and contemporary fan culture. P/NP or letter grading.

**68A-68F. World Music Specializations. (2-2)** Activity, three hours; outside practice, three hours. Performance of specializations in traditional vocal music, instrumental music, and dance. May be repeated for credit without limitation. P/NP or letter grading. **68A.** Music of China: Ensemble. **68F.** Music of India: Ensemble.

**68B-68O. World Music Specializations. (1 each)** Activity, two hours; outside practice, one hour. Performance of specializations in traditional vocal music, instrumental music, and dance. May be repeated for credit without limitation. P/NP or letter grading. **68B.** Music of China: Chinese Opera; **68C.** Music of China: Chinese Folk Dance; **68G.** Music of India: Tabla; **68M.** Music of Balkans: Ensemble; **68N.** Music of Balkans: Choir; **68O.** Music of Balkans: Instrumental Music.

**M73. Music and Religion in Popular Culture. (5)** (Same as Musicology M73.) Lecture, four hours; discussion, one hour. Survey of popular music in religious traditions since the 1970s. Growth of music in Jewish denominations, including Orthodox, Reform, and Conservative, and Christian contemporary music, from evangelical to cross-over artists performing in mainstream. Credit for both courses M73 and M173 not allowed. P/NP or letter grading.

**M80. Jewish American Experience through Music. (5)** (Same as Jewish Studies M80 and Musicology M80.) Lecture, four hours; discussion, one hour. In synagogue and on stage, and from LP recordings to YouTube, Jews in America have varied musical experiences. Music of synagogue, celebrations at home, in community, and theater are all interesting developments of Jewish music. New Opportunities in entertainment industry brought new possibilities for Jews in popular music, rock, and film scores. Exploration of various examples of Jews responding and adapting to their American context and becoming American through music. Exploration of different music genres and contexts. Presentations by guest composers and performers. Letter grading.

**89. Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to lower-division lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**91A-91Z. World Music Performance Organizations. (2 each)** Activity, three hours. Group performance of traditional vocal and instrumental music of world cultures. May be repeated for credit without limitation. P/NP or letter grading. **91A.** Music and Dance of American Indians; **91B.** Music of Bali; **91E.** Music and Dance of Ghana; **91G.** Music of Japan; **91H.** Music of

Java; **91J.** Music of Korea; **91K.** Music of Mexico; **91L.** Music of Persia; **91N.** Music of Near East; **91Z.** Open Ensemble.

**91P. World Music Performance Organizations: African American Music Ensemble. (2)** Activity, three hours. Performance of diverse range of vocal repertoire including spirituals, gospel, freedom/Civil Rights songs, and other works by African-diasporic composers, including anthems, hymn arrangements, and various forms of contemporary choral music. Tracing development of this music from 1600s to present, African American choral music is medium performed a cappella or with instrumental accompaniment. May be repeated for credit without limitation. P/NP or letter grading.

**92. Private Instruction in Music. (2)** Studio, one hour. Limited to Ethnomusicology majors. Private or semi-private music instruction with distinguished community-based musician, that must be arranged by students and approved by course instructor. May be repeated for credit without limitation. Letter grading.

**99. Student Research Program. (1 to 2)** Tutorial (supervised research or other scholarly work), three hours per week per unit. Entry-level research for lower-division students under guidance of faculty mentor. Students must be in good academic standing and enrolled in minimum of 12 units (excluding this course). Individual contract required; consult Undergraduate Research Center. May be repeated. P/NP grading.

## Upper-Division Courses

**C100. Audiovisual Archiving in 21st Century. (4)** Seminar, three hours. Designed for Ethnomusicology majors. Examination of history, present state, and future of audiovisual archives, with specific focus on ethics, copyright, contracts, fieldwork, preservation, and access and issues related to technology, space, budgets, and staffing. Concurrently scheduled with course C200. P/NP or letter grading.

**101. Introduction to Ethnomusicology. (4)** Lecture, four hours. Introduction to history of field of ethnomusicology, basic fieldwork and analysis methods, and current issues in research. Introduction also of career opportunities for ethnomusicology graduates. Letter grading.

**M103. Creating Musical Community. (4)** (Same as Global Jazz Studies M103, Music M103, and Musicology M103.) Seminar, four hours; discussion, one hour. Limited to school of music majors. Faculty and students make music together in different modes. Students learn certain repertoire, refine it, and bring it to concert performance. Students critically engage musical literacies and notion of social contract that forms basis of musical notation. Drawing from American music folk game traditions, highlights complex history of this country and way in which entire body is used as resource when instruments are unavailable. Letter grading.

**105. Music Business. (4)** Lecture, four hours; outside study, eight hours. Designed for junior/senior Ethnomusicology majors in public ethnomusicology emphasis. How music industry functions and how products are created, marketed, and consumed. Basic information on production of recordings and legal issues faced by musicians, students, and scholars who use music in their work. P/NP or letter grading.

**106A. Traditional North American Indian Music. (4)** Lecture, three hours; discussion, one hour. Native North American traditional music and its role in tribal societies. California, Southwest, Pacific Northwest, Northern and Southern Plains, Great Lakes/Eastern Woodlands, and Southeastern culture areas included. P/NP or letter grading.

**106B. Contemporary North American Indian Music. (4)** Lecture, three hours; discussion, one hour. Contemporary Native North American musical expression, including popular styles (folk, country, rock), intertribal Indian musical genres (powwow), syncretic religious music, and traditional/historic Pan-Indian music. P/NP or letter grading.

**M108A-108B. Music of Latin America. (5-5)** Lecture, four hours; discussion, one hour. Course M108A is not requisite to 108B. Survey of traditional and contempo-

rary musical culture. P/NP or letter grading. **M108A.** Mexico, Central America, and Caribbean Isles. (Same as Chicana/o and Central American Studies M108A.); **108B.** Latin South America.

**M109. Women in Jazz. (4)** (Same as African American Studies M109, Gender Studies M109, and Global Jazz Studies M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from 1880s to present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

**M110A-M110B. African American Musical Heritage. (5-5)** (Formerly numbered M12A-M12B.) (Same as African American Studies M116A-M116B and Global Jazz Studies M110A-M110B.) Lecture, four hours; discussion, one hour. P/NP or letter grading. **M110A.** Sociocultural history and survey of African American music covering Africa and its impact on Americas; music of 17th through 19th centuries; minstrelsy and its impact on representation of blacks in film, television, and theater; religious music, including hymns, spirituals, and gospel; black music of Caribbean and Central and South America; and music of black Los Angeles. **M110B.** Sociocultural history and survey of African American music covering blues, pre-1947 jazz styles, rhythm 'n' blues, soul, funk, disco, hip-hop, and symbiotic relationship between recording industry and effects of cultural politics on black popular music productions.

**M111. Ellingtonia. (4)** (Same as African American Studies M111 and Global Jazz Studies M111.) Lecture, three hours. Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington's music, known as Ellingtonia, is one of largest and perhaps most important bodies of music ever produced in U.S. Covers many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cootie Williams, and Mercer Ellington. P/NP or letter grading.

**113. Music of Brazil. (4)** Lecture, three hours. History of ethnic and art music in Brazil, with some reference to Portuguese antecedents. P/NP or letter grading.

**M115. Musical Aesthetics in Los Angeles. (4)** (Same as Chicana/o and Central American Studies M115.) Lecture, three hours. Confronting aesthetics from classical perspective of art as intuition, examination on cross-cultural basis of diverse musical contexts within vast multicultural metropolis of Los Angeles, with focus on various musical networks and specific experiences of Chicano/Latino, African American, American Indian, Asian, rock culture, Western art music tradition, and commercial music industry. P/NP or letter grading.

**M116. Chicano/Latino Music in U.S. (5)** (Same as Chicana/o and Central American Studies M116.) Lecture, four hours; discussion, one hour. Historical and analytical examination of musical expression of Latino peoples who have inhabited present geographical boundaries of U.S. P/NP or letter grading.

**117. American Popular Music. (4)** Lecture, four hours; discussion, one hour. Survey of history and characteristics of American popular music and its relationship to American culture, with emphasis on 20th-century popular music and its major composers, including comparison between traditional pre-1950 popular music and trends in post-1950 popular music. P/NP or letter grading.

**118. Development of Rock. (5)** Lecture, four hours. Examination of historical and stylistic development of rock from 1950s to present, with attention to its socio-cultural and political impact on American society and beyond. P/NP or letter grading.

**M119. Cultural History of Rap. (5)** (Same as African American Studies M107 and Global Jazz Studies M119.) Lecture, four hours; discussion, one hour. Introduction to development of rap music and hip-hop culture, with emphasis on musical and verbal qualities, philosophical and political ideologies, gender representation, and influences on cinema and popular culture. P/NP or letter grading.

**CM120. Bibliography and Research Methods in Rap Music/Hip-Hop Studies. (4)** (Formerly numbered C120.) (Same as African American Studies CM110.) Seminar, three hours. Requisite: course M119. Designed for juniors/seniors conducting research on hip-hop in preparation for capstone projects such as honors or senior thesis. In-depth examination of intellectual history of rap music/hip-hop studies scholarship. Examination of readings related to intellectual history of rap music scholarship and allied traditions (including breakdance and graffiti). Exploration of broad range of research methods and archival/library centers specific to hip-hop studies. Concurrently scheduled with course CM220. Letter grading.

**C121. Tibetan Pop Music: Tibet, Exile, China, and World. (4)** Lecture, four hours. Pop music is key part of contemporary Tibet, emerging in 1980s in Tibet and exile, and even earlier if mass-disseminated socialist songs of Tibet as compulsory, state-produced popular music is considered. Exploration of multifaceted world of pop music in and of Tibet and Tibet within China of Mao Zedong and socialism, and that of market socialists from Deng Xiaoping to Xi Jinping. Exploration of ways in which Tibetan pop music is voice for Tibetans in Tibet, numerically small minority in China, and in small exile population. Focus on Tibetan pop music exposes students to plethora of issues relevant to musics of small, minority, and stateless people, and of myriad political dimensions of pop music—turbulent, crude, subtle, social, and economic. Concurrently scheduled with course C221. P/NP or letter grading.

**122. Global Dynamics of K-Pop. (4)** Lecture, four hours. Focused study on K-pop—South Korea's most significant cultural export. Close attention is paid to global influences that have shaped Korean popular music in earlier decades and in turn, unprecedented global reach of K-pop in recent history. Study is divided into three units: contextualizing K-pop, transnational flows in K-pop, and critical takes on K-pop. Each unit features distinctive case studies, and lectures draw out some of broader linkages between units as they relate to modern Korean history, Cold War geopolitical formations and legacies, modern South Korean state and economy, and spread of Korean popular culture. Study draws on wide array of scholarly articles, journalistic pieces, music videos, webinars, and online resources while foregrounding larger issues that emerge through cultural analysis. P/NP or letter grading.

**M128. Exploration in Rhythms. (2)** (Same as Global Jazz Studies M128.) Lecture, two hours; outside study, four hours. Preparation: ability to read melodic or rhythmic notation. Investigation and exploration of musical time and rhythm in 20th- and 21st-century classical, jazz, world, and popular music. Concepts explored include meter, pulse, rhythmic cycles, hemiolas, and polyrhythms. P/NP or Letter grading.

**M130. Culture of Jazz Aesthetics. (4)** (Same as Anthropology M158 and Global Jazz Studies M130.) Lecture, three hours. Recommended requisite: course 20A or 20B or 20C or Anthropology 3 or 4. Aesthetics of jazz from point of view of musicians who shaped jazz as art form in 20th century. Listening to and interacting with professional jazz musicians who answer questions and give musical demonstrations. Analytical resources and historical knowledge of musicians and ethnomusicologists combined with those interested in jazz as cultural tradition. P/NP or letter grading.

**M131. Development of Latin Jazz. (4)** (Same as Global Jazz Studies M131 and Music M131.) Lecture, four hours; discussion, one hour. Survey of historical and stylistic development of musical style referred to today as Latin jazz. P/NP or letter grading.

**133. European Musics: Politics, Identities, Nationalisms. (5)** Lecture, four hours; outside study, 12 hours. Limited to Ethnomusicology, Music, Musicology, Music History, and European Studies majors. European folk, popular, and classical music as practice that shapes ideas about national, ethnic, class, and religious identity and as tool of political domination and resistance. Letter grading.

**M134. Introduction to Armenian Music. (4)** (Same as Armenian M134 and Music M134.) Lecture, three hours. Some amount of formal music study and experience as vocalist or instrumentalist desirable but not

essential. Introduction to history, tradition, and scope of music of Armenia. Focus on number of different genres and approaches, and interactions between music and culture, society, and history. P/NP or letter grading.

**135. Indo-Persian Musical Cultures: Mapping Musical Connections.** (4) Lecture, four hours. Study of connections between musical cultures of Indian subcontinent, Central Asia, and Iran. Exploration of musical ideas, forms, theories, instruments, styles, lyrics, etc. that make visible cultural continuities across broad Indo-Persianate world. Connected histories developed in these vast areas are not just through official language and religion of courts—Persian and Islam—but through trade, wandering Sufis, Persian poetry, scholars, and musicians, engendering deep and long-lasting connections. Focus is both historical and contemporary. Readings include articles and book chapters on musical cultures of Central and South Asia. By exploring diversity of commonalities in Indo-Persian musical cultures, understanding of often hidden similarities across different ethnic, cultural, geographical, and political boundaries is enhanced. Study elucidates values, ideas, and goals that relate individuals and groups across different places and cultures. Letter grading.

**136A. Music of Africa.** (5) Lecture, four hours; discussion, one hour; outside study, 10 hours. Introduction to music of Africa through general discussion of select topics such as continent and its peoples, function, musician, instruments, musical structure and related arts, and contemporary music. P/NP or letter grading.

**C136B. Music of Africa.** (4) Lecture, four hours; outside study, eight hours. Introduction to music of various African cultures and regions. Through readings, lectures, viewing of films, and analysis of music, students gain greater understanding of diverse musical traditions found on African continent and become more cognizant of contributions that people of Africa have made to world music. Concurrently scheduled with course C236B. Letter grading.

**C140. Music of Arab World.** (4) Seminar, three hours. Limited to junior/senior Ethnomusicology majors. Investigation of historical and cultural backgrounds, main musical styles, relationship between theory and practice and emphasis on mode and improvisation, and 20th- and 21st-century trends in music of Arabic-speaking Near East. Concurrent participation in Near East performance ensemble (course 91N or 161N) required. Concurrently scheduled with course C240. Letter grading.

**C141. Music of Turkey and Iran.** (4) Seminar, three hours. Limited to junior/senior Ethnomusicology majors. Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in Near East performance ensemble (course 91N or 161N) required. Concurrently scheduled with course C241. Letter grading.

**142. Music and Culture in Afghanistan and Central Asia.** (4) Lecture, four hours. Survey of music of Afghanistan, Turkmenistan, Tajikistan, Uzbekistan, and Xinjiang, including traditional and popular styles. Examination of modal systems and specific music genres of these regions, and exploration of cultural contexts, communicative functions, forms, styles, instruments, and musical philosophies. Consideration of interrelationships between musical genres and other art forms (dance, theater, visual arts, and literature) and analysis of how these types of music have intersected with issues of race, class, gender, religion, ritual, politics, social movements, and cultural identity. Includes detailed introduction to musical terms and concepts throughout. Letter grading.

**143. Musical Traditions around Iran: Baluchistan, Kurdistan, Azerbaijan, and Iraq.** (4) Lecture, four hours. Introduction to selected types of music around Iran with particular attention to Baluchistan, Kurdistan, Azerbaijan, and Iraq. Study of structures and genres of music in urban and rural communities. Examination of how music-making relates to aspects of current

Middle Eastern life such as religious observance, gender relations, ethnic and national identity, and process of globalization. Letter grading.

**144. Special Topics in Iranian Music.** (4) Seminar, three hours. Requisites: courses 5 or M25, and 8. Exploration of topics on musical cultures and styles in Iran focusing on specific sociopolitical contexts, sexuality and gender studies, politics and resistance, religion, mysticism and spirituality, and role of musical discourses and practices in Iran and in its multiple diasporas (particularly Los Angeles). Topics announced in advance. May be repeated for credit. P/NP or letter grading.

**145. Analyzing Rhythm in Persian Music.** (4) Seminar, three hours. Requisites: courses 5 or M25, and 8. Examination of rhythm principles of Iranian music. Through theoretical and applied methods, exploration of experience of musical rhythm in Iran. Students learn various rhythmic functionalities in order to gain deeper understanding and appreciation for Iran's traditional, folklore, religious, and mystical musical styles. Examination of core rhythmic elements in Iranian music both through ethnomusicological literature on and by practicing Persian percussion in class. P/NP or letter grading.

**146. Folk Music of South Asia.** (4) Lecture, three hours; laboratory, one hour. Illustrated survey of some regional genres, styles, and musical instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence. P/NP or letter grading.

**147. Survey of Classical Music in India.** (4) Lecture, four hours. Examination of melodic, metric, and formal structures of Indian classical music in context of religious, sociocultural, and historical background of country. P/NP or letter grading.

**148. Global and Local South Asian Popular Music.** (4) Lecture, four hours. India, South Asia, and South Asian diasporas are home to vast array of popular musics. Bollywood (or Hindi film music) dates from 1940s to present day and has spread to countries as diverse as Ghana, Greece, Israel, and western world from 1950s. Older history of popular music in India delves into cosmopolitan colonial cultures of jazz, minstrelsy and traveling theatre, and global circulation of gramophone discs. With advent of cassettes, then CDs, VCDs, MP3s, and now online platforms, popular musics have proliferated. These include rustic vernacular styles like Bhojpuri pop; music of downtrodden groups such as Chamar pop or Gaana; Sufi popular music highlighting religious harmony; pop-style Hindu devotional songs; and recently, militant Hindutva pop. Popular musics have also emerged from South Asian diasporas, such as Chutney and Soca from Trinidad, or Bhangra from United Kingdom Punjabis. P/NP or letter grading.

**C150. Music and Politics in East Asia.** (4) Lecture, four hours. Limited to Ethnomusicology, Music, Music History, World Arts and Cultures, Chinese, Japanese, Korean, and East Asian Studies majors. Political imperatives have long had direct and often explicit impact on music sound and context in East Asia. Examination of interaction of ideology and musical practice in medieval Korea and in contemporary Korea, Japan, Taiwan, and China. Concurrently scheduled with course C250. Letter grading.

**C155. Intangible Cultural Heritage Worldwide.** (4) Lecture, three hours. Designed for Ethnomusicology, Music History, and World Arts and Cultures majors. Through critical reading of publications by scholars, officials, and culture-bearers involved in intangible cultural heritage policy and practice, examination of history of heritage conservation; concepts of tangible and intangible heritage; pioneering roles of Japan, South Korea, and UNESCO in making intangible cultural heritage focal point of much cultural policy worldwide; tensions among international ideals, nation-state nationalisms, regionalism, ethnicity, and indigeneity in creating intangible cultural heritage policies in different settings; U.S. equivalents to intangible cultural heritage policies and practices in other countries; roles of private individuals, community initiative, and professional organizations in cultural preservation schemes; and related concept of sustainability. Concurrently scheduled with course C255. Letter grading.

**C156A-156B. Music in China.** (4-4) Letter grading. **C156A.** Lecture, four hours. Requisite: course 20C. Limited to Ethnomusicology majors. Survey of traditional, popular, and Western-influenced musics currently widespread in China, including musical analysis of different genres; examination of contexts in which they exist. Investigation of profound effect of Confucian and Communist ideologies on music. Concurrently scheduled with course C256A. **156B.** Lecture, three hours; laboratory, two hours. Requisite: course C156A. Introduction to various notational systems. Analysis of representative styles.

**157. History of Chinese Opera.** (4) Lecture, four hours. Survey of dramatic elements in Chinese operas, incorporating singing, dance, and acrobatics. Emphasis on traditional and modern Peking opera and its relation to Cantonese and other genres. P/NP or letter grading.

**158. Studies in Chinese Instrumental Music.** (4) Lecture, four hours; outside study, eight hours. Survey of Chinese musical instruments and their musical styles, classifications system, specific musical notation, and use in context of Chinese society. P/NP or letter grading.

**C159. Music on China's Periphery.** (4) Lecture, four hours; outside study, eight hours. Designed for undergraduate Ethnomusicology, Music, Music History, and World Arts and Cultures majors. Survey of musics from China's border regions and neighboring countries: technical musical characteristics and important contextual issues related to traditional and modern styles from Mongolia, Uighurs of Xinjiang, Tibet, Tibeto-Burman peoples, Hmong, and indigenous peoples of Taiwan. Concurrently scheduled with course C259. P/NP or letter grading.

**160. Survey of Music in Japan.** (4) Lecture, three hours. Survey of main genres of Japanese traditional music, including Gagaku, Buddhist chant, Biwa music, Koto music, Shamisen music, and music used in various theatrical forms. P/NP or letter grading.

**161A-161Z. Advanced World Music Performance Organizations.** (2 each) Activity, three hours; outside practice, three hours. Limited to Ethnomusicology majors. Advanced study of traditional vocal and instrumental world music. May be repeated for credit without limitation. Letter grading. **161A.** Music and Dance of American Indians; **161B.** Music of Bali; **161E.** Music and Dance of Ghana; **161G.** Music of Japan; **161H.** Music of Java; **161J.** Music of Korea; **161K.** Music of Mexico; **161L.** Music of Persia; **161M.** Music of Thailand; **161N.** Music of Near East; **161Z.** Open Ensemble.

**161P. Advanced World Music Performance Organizations: African American Music Ensemble.** (2) Activity, three hours; outside practice, three hours. Performance of diverse range of vocal repertoire including spirituals, gospel, freedom/Civil Rights songs, and other works by African-diasporic composers, including anthems, hymn arrangements, and various forms of contemporary choral music. Tracing development of this music from 1600s to present, African American choral music is medium performed a cappella or with instrumental accompaniment. May be repeated for credit without limitation. Letter grading.

**162. Advanced Private Instruction in Music.** (2) Studio, one hour; outside practice, five hours. Preparation: two years of courses 91A through 91Z or 92. Limited to Ethnomusicology majors. Advanced private or semiprivate music instruction with distinguished community-based musician, that must be arranged by students and approved by course instructor. May be repeated for credit without limitation. Letter grading.

**163. Theory, Practice, and Improvisation in Iranian Music.** (4) Seminar, three hours. Requisites: courses 5 or M25, and 8. Designed to expose students from wide background of experience, outlooks, and training to many facets of art and craft of improvisation in Iranian music. Examination of how organization of *radif* (collection of melodic figures preserved through oral tradition that provides basis of improvisation), and master and disciple teaching and tutoring, shape improvisational and performance practices in Iranian traditional music. Comparison of *radif* to number of related musical cultures: Arabic *maqam*, Turkish *makam*, and number of *ragas* from North Indian tradition. Includes in part workshop format in which stu-

dents are encouraged to bring their own musical instruments, or for vocalist to join in, in exploring *radif*. Students read about theoretical issues of *radif*, and learn how to memorize, compose, and improvise important parts of *radif*. P/NP or letter grading.

**164. World Music Composition. (4)** Lecture, three hours; laboratory, three hours; outside study, six hours. Prerequisites: courses 20A, 20B, 20C. Limited to Ethnomusicology majors. Examination in composition using variety of Western and non-Western musical systems. Final project required. Letter grading.

**C165. Selected Topics in Composition. (4)** Lecture, four hours; outside study, eight hours. Evaluation of important musical concepts and approaches to enable students to develop greater compositional technique and understanding. Ways composers of jazz, European classical, and other musical genres have successfully approached use of extended compositional forms. Examination of way in which world music traditions have interfaced with jazz and other types of music to create new musical languages. Use of concepts, structural paradigms, and inspiration from literature, visual arts, and other sources to develop student compositions. May be repeated once for credit. Concurrently scheduled with course C270. Letter grading.

**168A-168F. Advanced World Music Specializations. (2-2)** Activity, three hours; outside practice, three hours. Advanced performance of specializations in traditional vocal music, instrumental music, and dance. May be repeated for credit without limitation. P/NP or letter grading. **168A.** Music of China: Ensemble. **168F.** Music of India: Ensemble.

**168B-168O. Advanced World Music Specializations. (1 each)** Activity, two hours; outside practice, one hour. Advanced performance of specializations in traditional vocal music, instrumental music, and dance. May be repeated for credit without limitation. P/NP or letter grading. **168B.** Music of China: Zheng; **168C.** Music of China: Qin; **168G.** Music of India: Tabla; **168M.** Music of Balkans: Ensemble; **168N.** Music of Balkans: Choir; **168O.** Music of Balkans: Instrumental Music.

**171. Music and Diverse Worlds of Gender and Sexuality. (5)** Lecture, four hours; discussion, one hour. Exploration of diverse worlds of gender, sexuality, and music across multiple global locations. Introduction to theoretical approaches to study of gender and sexuality by theorists such as Judith Butler, Kimberlé Crenshaw, Jack Halberstam, bell hooks, and Sherry Ortner. Exploration of gender critically as highly plural, fluid, and intersectional phenomenon of social organization. As embodied arts existing in often liminal and highly-charged performing spaces and intertwined with pleasure, music and dance frequently foreground issues surrounding body, gender, and sexuality. While being spaces for performing of hegemonic gender identities they can reveal contradictions of normative gender identities (albeit not always intentionally or consciously), and they are also central part of many gender and sexual minority subcultures. Study of gender, performing arts, and power as inseparable, and as manifested in multiple forms of intersectionality, notably including race, class, and age. Letter grading.

**M173. Selected Topics in Music and Religion in Popular Culture. (5)** (Same as Musicology M173.) Seminar, two hours. Enforced corequisite: attendance, but not enrollment, in course M73 lecture. Exploration of connections of music, religion, and popular culture among American Jews and Christians. Credit for both courses M73 and M173 not allowed. Letter grading.

**174. Aesthetics of Music. (5)** Lecture, four hours; discussion, one hour. Designed for nonmajors. Historical survey of musical aesthetic thought and practice. Selected readings and musical examples. P/NP or letter grading.

**175. Sociology of Music. (4)** Lecture, four hours. Designed for Ethnomusicology, Music History, and Music majors. Introduction to sociology of music, its principles and basic concepts, and its critical significance for sociomusicological inquiry, including study of popular music, ethnomusicology, and cultural politics of music. P/NP or letter grading.

**M176. Music and Capitalism in West. (4)** (Same as Music Industry M176.) Lecture, four hours. Follows history of western capitalism and how it has shaped music-making and listening to present time. P/NP or letter grading.

**177. Music, Internet, and Social Media. (4)** Lecture, four hours. Innovations in media and technology accompany and contribute to fundamental changes in social and economic organization. Such shifts are often spoken of as revolutions, notably, recent digital or Internet revolution. Exploration of impact of Internet-based social media on ways in which people make music, connect through music, and live from music in diverse global contexts. Examination of how social media are social in new ways, and how they offer new potentials (and new limitations and challenges) for music. Examination of rise of Web 2.0; and exploration of how social media affects music in relation to artistic and creative work, affect and experience, livelihoods and remuneration, and music industries. Examination of both utopian and dystopian discourses in connection with music, Internet, and social media; and exploration of potential for marginalized people, as well as for corporate and political control. P/NP or letter grading.

**C178. Aesthetic and Philosophical Foundations in Systematic Musicology. (4)** Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of critical approaches to aesthetics in systematic musicology. Exploration of aesthetics and philosophy of music, sociology of music, critical theory, hermeneutics, and music criticism. Concurrently scheduled with course C204. Letter grading.

**181. Anthropology of Music. (4)** Lecture, four hours. Designed for Ethnomusicology, Music History, and Anthropology majors. Cross-cultural examination of music in context of social behavior and how musical patterns reflect patterns exhibited in other cultural systems, including economic, political, religious, and social structure. P/NP or letter grading.

**CM182. Music Industry. (4)** (Same as Music CM182, Musicology CM186, and Music Industry M182.) Lecture, four hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM288. Letter grading.

**183. Study of Ethnomusicology. (4)** Lecture, three hours; outside study, nine hours. Prerequisites: courses M6A, M6B, M6C, 20A, 20B, 20C. Designed for Ethnomusicology majors. Introduction to history of field, basic fieldwork and analysis methods, and current issues in research. Letter grading.

**C184. Public Ethnomusicology. (4)** Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology majors. How music industry functions and how products are created, marketed, and consumed. Techniques of pure research, basic and theoretical in nature, contrasted with those of applied research, practical and policy-oriented in approach. Concurrently scheduled with course C286. Letter grading.

**185. Information Literacy and Research Skills. (1)** Tutorial, one hour. Limited to Ethnomusicology majors. Designed to assist students with becoming information literate. How to locate, identify, and critically evaluate and use print and electronic information effectively and ethically. P/NP grading.

**186. Senior Recital or Project. (2)** Tutorial, one hour. Limited to seniors. Final project for students who, with approval from their faculty advisers, perform one-hour recital or have their compositions performed in one-hour recital. Organization and arrangement of rehearsal schedule with appropriate accompaniment and preparation of program for performance. Grades are assigned in term recital is performed or composition is completed and performed. P/NP grading.

**188. Special Courses in Ethnomusicology. (4)** Lecture, four hours; outside study, eight hours. Selected topics in ethnomusicology. Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

**188SA. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to discuss selected USIE seminar topic, conduct preparatory research, and begin preparation of syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SB. Individual Studies for USIE Facilitators. (1)** Tutorial, to be arranged. Enforced corequisite: course 188SA. Enforced corequisite: Honors Collegium 101E. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor to finalize course syllabus. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**188SC. Individual Studies for USIE Facilitators. (2)** Tutorial, to be arranged. Enforced corequisite: course 188SB. Limited to junior/senior USIE facilitators. Individual study in regularly scheduled meetings with faculty mentor while facilitating USIE 88S course. Individual contract with faculty mentor required. May not be repeated. Letter grading.

**189. Advanced Honors Seminars. (1)** Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, or other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

**193. Journal Club Seminars: Ethnomusicology. (2)** Seminar, two hours; outside study, four hours. Limited to undergraduate students. Reading and discussion of writings on subjects in ethnomusicology. May be repeated for credit. P/NP grading.

**195A. Community or Corporate Internships in Ethnomusicology. (2 to 4)** Tutorial, six to 12 hours. Limited to juniors/seniors with minimum cumulative 3.0 grade-point average. Internship in supervised setting in community agency or private business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

**195B. Community or Corporate Internships in Public Ethnomusicology. (2 to 4)** Tutorial, six to 12 hours. Limited to seniors in public ethnomusicology emphasis. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide weekly reports of their experience. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

**196. World Music Teaching Practicum. (4)** Seminar, two hours; fieldwork, three hours; outside study, seven hours. Limited to junior/senior Ethnomusicology majors. Integration of academic work and hands-on training. Participation in theoretical discussions of world music education and application of these theories in elementary and secondary music and social studies classrooms. P/NP or letter grading.

**197E. Individual Studies in Ethnomusicology. (2 to 4)** Tutorial, one hour; outside study, five to 11 hours. Preparation: 3.0 grade-point average. Limited to seniors. Individual intensive study in ethnomusicology, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter resulting in final research project required. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

**197S. Individual Studies in Systematic Musicology. (2 to 4)** Tutorial, one hour; outside study, five to 11 hours. Preparation: 3.0 grade-point average. Limited to seniors. Individual intensive study in systematic musicology, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter resulting in final research

project required. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

**199. Directed Research or Senior Project in Ethnomusicology. (2 to 4)** Tutorial, to be arranged. Limited to junior/senior Ethnomusicology majors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for maximum of 8 units. Individual contract required. Letter grading.

## Graduate Courses

**C200. Audiovisual Archiving in 21st Century. (4)** Seminar, three hours. Designed for Ethnomusicology majors. Examination of history, present state, and future of audiovisual archives, with specific focus on ethics, copyright, contracts, fieldwork, preservation, and access and issues related to technology, space, budgets, and staffing. Concurrently scheduled with course C100. S/U or letter grading.

**201. History of Ethnomusicology. (4)** Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Basic literature and schools of thought in field of ethnomusicology from late 19th century to 1980s. Letter grading.

**202. Current Issues in Ethnomusicology. (4)** Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Current issues, basic literature, and schools of thought in field of ethnomusicology from 1980s to present. Letter grading.

**C204. Aesthetic and Philosophical Foundations in Systematic Musicology. (4)** Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of critical approaches to aesthetics in systematic musicology. Exploration of aesthetics and philosophy of music, sociology of music, critical theory, hermeneutics, and music criticism. Concurrently scheduled with course C178. Letter grading.

**205. Seminar: Information Technology and Research Skills. (4)** Seminar, three hours. Limited to graduate ethnomusicology students. Lecture, demonstration, and practice. Basic skills for research on and about music that is essential to student careers as ethnomusicologists, specifically information technology skills, acoustics, and representational tools for nonlinguistic acoustic phenomena. Basic understanding of acoustics, ability to represent sounds in various graphic forms appropriate to them, and ability to locate and organize information sources related to field of ethnomusicology. Letter grading.

**206. Integrating Theory with Ethnography. (4)** Seminar, three hours. Designed to show how theory and primary research cannot exist without each other, and how various authors have integrated theoretical writings and ideas with their ethnographic or historical data. Reading of several recent ethnographies, mostly about music and possibly historical studies, in tandem with theoretical writings that inform arguments of these books. Letter grading.

**207. Seminar: North American Indian Music. (4)** Seminar, three hours. Requisite: course 106A or 106B. Survey of representative musical styles of Native North American Indians, including problems of transcription, methods of analysis, symbolic implications of song texts. Emphasis on interrelationship between music and cultural context. Influence of Western music in acculturative contexts. S/U or letter grading.

**208. Seminar: Latin American Music. (4)** Seminar, three hours. Review of bibliographic, methodological, and philosophical bases of musical research in Latin America, working from both general and specific perspectives. Exploration of research problems and investigations on specific musical cultures and distinct genres of musical expression. S/U or letter grading.

**M211. Seminar: African American Music. (4)** (Same as African American Studies M211.) Seminar, three hours. Requisites: courses M110A, M110B. Designed for graduate students. In-depth examination of intellectual history of African American music scholarship. Intensive investigation of problems, theories, interdis-

ciplinary methods/schools of research, and bibliography related to study of African American music. Letter grading.

**215A-215B. Ethnomusicological Perspectives and Paradigms I, II. (4-4)** Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Basic literature and schools of thought in field of ethnomusicology and related social science fields. Letter grading. **215A.** Late 19th century to 1980s; **215B.** 1960s to Present.

**216A-216B. Ethnomusicological Methods I, II. (4-4)** Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Letter grading. **216A.** Basic research techniques and perspectives on conducting research and writing it up in ethnomusicology. **216B.** Introduction to basic ethnographic fieldwork techniques and practices in ethnomusicology.

**CM220. Bibliography and Research Methods in Rap Music/Hip-Hop Studies. (4)** (Formerly numbered C220.) (Same as African American Studies CM210.) Seminar, three hours. Preparation: ongoing work or preparatory research in rap music/hip-hop studies. Designed for graduate students conducting research on hip-hop in preparation for comprehensive examination preparation, and graduate research projects including master's thesis and dissertation. In-depth examination of intellectual history of rap music/hip-hop studies scholarship. Examination of readings related to intellectual history of rap music scholarship and allied traditions (including breakdance and graffiti). Exploration of broad range of research methods and archival/library centers specific to hip-hop studies. Concurrently scheduled with course CM120. Letter grading.

**C221. Tibetan Pop Music: Tibet, Exile, China, and World. (4)** Lecture, four hours. Pop music is key part of contemporary Tibet, emerging in 1980s in Tibet and exile, and even earlier if mass-disseminated socialist songs of Tibet as compulsory, state-produced popular music is considered. Exploration of multifaceted world of pop music in and of Tibet and Tibet within China of Mao Zedong and socialism, and that of market socialists from Deng Xiaoping to Xi Jinping. Exploration of ways in which Tibetan pop music is voice for Tibetans in Tibet, numerically small minority in China, and in small exile population. Focus on Tibetan pop music exposes students to plethora of issues relevant to musics of small, minority, and stateless people, and of myriad political dimensions of pop music—turbulent, crude, subtle, social, and economic. Concurrently scheduled with course C121. S/U or letter grading.

**228. Seminar: Balkan Music. (4)** Seminar, three hours. Major issues in study of Balkan music, including song text analysis, music instruments, dance music, rituals and customs, minorities, and ideology. S/U or letter grading.

**230. European Musics: Politics, Identities, Nationalisms. (4)** Seminar, three hours; outside study, nine hours. Designed for graduate students. European classical, popular, and traditional musics, with particular attention to way in which music mirrors, negotiates, and contests ideas about and practices of national and other forms of identity, ideas developed in other domains of discourse and practice such as philosophy, history, literature, art, and folklore. Examination of way musicians, ordinary people, and politicians have used music to affect political processes involved in contesting and resolving tensions created between and among these identity formations. Historical period coverage primarily from 19th and 20th centuries, with examples from all over European continent. Letter grading.

**233A-233B-233C. European Traditional and Popular Music. (0-0-4)** Discussion, one hour. Review of literature on European traditional and popular music, with special attention to modern issues and processes. May be repeated for credit. In Progress (233A, 233B) and letter (233C) grading.

**C236B. Music of Africa. (4)** Lecture, four hours; outside study, eight hours. Introduction to music of various African cultures and regions. Through readings, lectures, viewing of films, and analysis of music, students gain greater understanding of diverse musical traditions found on African continent and become

more cognizant of contributions that people of Africa have made to world music. Concurrently scheduled with course C136B. Letter grading.

**237. Seminar: African Music. (4)** Seminar, three hours. Requisite: course 136A or C136B. Analysis of literature and schools of thought in African music scholarship from late 19th century to present, including some analysis of musical, historical, social, and cultural aspects of indigenous and contemporary art forms. S/U or letter grading.

**C240. Music of Arab World. (4)** Seminar, three hours. Limited to graduate ethnomusicology students. Investigation of historical and cultural backgrounds, main musical styles, relationship between theory and practice and emphasis on mode and improvisation, and 20th- and 21st-century trends in music of Arabic-speaking Near East. Concurrent participation in Near East performance ensemble (course 91N or 161N) required. Concurrently scheduled with course C140. S/U or letter grading.

**C241. Music of Turkey and Iran. (4)** Seminar, three hours. Limited to graduate ethnomusicology students. Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in Near East performance ensemble (course 91N or 161N) required. Concurrently scheduled with course C141. S/U or letter grading.

**248. Classical Music of India. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 146 or 147. Study of history, theory, and practice of north and south Indian classical music. Emphasis on music history and traditional theory and analysis of present-day forms, styles, techniques, and musical instruments. Concurrent participation in Indian performance group (course 91F) required. S/U or letter grading.

**C250. Music and Politics in East Asia. (4)** Lecture, four hours. Designed for graduate students. Political imperatives have long had direct and often explicit impact on music sound and context in East Asia. Examination of interaction of ideology and musical practice in medieval Korea and in contemporary Korea, Japan, Taiwan, and China. Concurrently scheduled with course C150. Letter grading.

**251. Music of Indonesia. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 20C. Emphasis on music and related performing arts of Java, Bali, and other Indonesian islands. Concurrent participation in one Indonesian performance group (course 91B or 91H) required. S/U or letter grading.

**252. Seminar: Music of Mainland Southeast Asia. (4)** Seminar, three hours. Requisite: course 20C. Presentation of materials concerning musical performance traditions of Laos, Cambodia, Vietnam, Thailand, and Burma, both in mainland Southeast Asia and in American context, with perspectives from archaeology, history, performance theory, applied anthropology, and ethnomusicology. S/U or letter grading.

**C255. Intangible Cultural Heritage Worldwide. (4)** Lecture, three hours. Designed for ethnomusicology, music history, and world arts and cultures graduate students. Through critical reading of publications by scholars, officials, and culture-bearers involved in intangible cultural heritage policy and practice, examination of history of heritage conservation; concepts of tangible and intangible heritage; pioneering roles of Japan, South Korea, and UNESCO in making intangible cultural heritage focal point of much cultural policy worldwide; tensions among international ideals, nation-state nationalisms, regionalism, ethnicity, and indigeneity in creating intangible cultural heritage policies in different settings; U.S. equivalents to intangible cultural heritage policies and practices in other countries; roles of private individuals, community initiative, and professional organizations in cultural preservation schemes; and related concept of sustainability. Concurrently scheduled with course C155. Letter grading.

**C256A. Music in China. (4)** Lecture, four hours. Requisite: course 20C. Limited to Ethnomusicology majors. Survey of traditional, popular, and Western-influenced musics currently widespread in China, including musical analysis of different genres; examination of

contexts in which they exist. Investigation of profound effect of Confucian and Communist ideologies on music. Concurrently scheduled with course C156A. Letter grading.

**C259. Music on China's Periphery. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate Ethnomusicology, Music, Musicology, and World Arts and Cultures majors. Survey of musics from China's border regions and neighboring countries: technical musical characteristics and important contextual issues related to traditional and modern styles from Mongolia, Uighurs of Xinjiang, Tibet, Tibeto-Burman peoples, Hmong, and indigenous peoples of Taiwan. Concurrently scheduled with course C159. S/U or letter grading.

**M261. Gender and Music in Cross-Cultural Perspective. (4)** (Same as Gender Studies M261.) Seminar, three hours. Designed to foster in-depth understanding of gender in study of music as culture. Topics range from ethnography of gender and sexuality, (de)codification of messages of resistance, and gender representation to gendered politics via musical production. S/U or letter grading.

**262. Musical Ethnography. (4)** Seminar, three hours; outside study, nine hours. Examination of selected book-length ethnographies, most published in last 10 years, as both literary genre and research procedure. S/U or letter grading.

**263. Perspectives in Popular Music Research. (4)** Seminar, three hours. Investigation of theoretical paradigms, issues, and research models of popular music, with emphasis on world music genres, local/global markets, mass mediation, appropriation and aesthetics of style, ethnographic methods, and impact of popular music studies on ethnomusicology. Letter grading.

**264. Urbanism and Music. (4)** Seminar, three hours; outside study, nine hours. Theoretical and methodological issues in study of city as cultural entity that affects and is affected by music making. S/U or letter grading.
